## ICASAS517A Use network tools

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use tools to assist in managing a network effectively.

### Application of the Unit

This unit applies to system administrators and network administrators who monitor security and resolve issues for the network.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Use command line tools	1.1 Outline command-line environment 1.2 Differentiate command-line and graphical user interface (GUI) systems 1.3 List <b><i>command-line tools</i></b> 1.4 Apply command-line tools in <b><i>GUI environment</i></b>
2. Use hardware tools	2.1 Identify appropriate <b><i>hardware tools</i></b> and their function 2.2 Review OHS requirements for tool use 2.3 Manage network using hardware tools 2.4 Analyse test results
3. Use software tools	3.1 Identify appropriate <b><i>software tools</i></b> for network security 3.2 Recognise <b><i>areas of vulnerability</i></b> 3.3 Classify function of each tool 3.4 Manage network using software tools 3.5 Analyse test results

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - anticipate and respond to a range of attacks
  - evaluate performance
  - identify and interrogate complex and varied areas of attack
  - interpret results of tests
- technical skills to:
  - develop and refine security of the network
  - resolve network vulnerabilities
  - test network functions and security.

### Required knowledge

- available network tools
- processes and techniques related to using network tools
- range of attacks that affect network security
- problems and challenges relating to network security.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify and use appropriate tools for:             <ul style="list-style-type: none"> <li>• monitoring network performance</li> <li>• identifying network threats</li> <li>• isolating security breaches.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• maintenance procedures</li> <li>• network system</li> <li>• availability of hardware and software tools</li> <li>• security diagnostic software</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of network tools</li> <li>• direct observation of candidate demonstrating use of appropriate network tools</li> <li>• evaluation of prepared report, outlining:             <ul style="list-style-type: none"> <li>• selection of appropriate tool</li> <li>• interpretation of output</li> <li>• recommendation of solution</li> </ul> </li> <li>• evaluation of candidate's secured system.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Command line tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• arp</li> <li>• arping</li> <li>• dig</li> <li>• hostname</li> <li>• ifconfig</li> <li>• ipconfig</li> <li>• mtr</li> <li>• nbtstat</li> <li>• netstat</li> <li>• nslookup</li> <li>• Ping</li> <li>• route</li> <li>• traceroute.</li> </ul>
<p><b><i>GUI environment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Linux platforms</li> <li>• Mac platforms</li> <li>• Windows platforms.</li> </ul>
<p><b><i>Hardware tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• butt set</li> <li>• cable stripper</li> <li>• cable testers</li> <li>• multimeter</li> <li>• optical time-domain reflectometer (OTDR)</li> <li>• protocol analyser</li> <li>• punch down tool</li> <li>• snips</li> <li>• temperature monitor</li> <li>• time-domain reflectometer (TDR)</li> <li>• toner probe</li> <li>• voltage event recorder.</li> </ul>
<p><b><i>Software tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• intrusion detection software</li> <li>• intrusion prevention software</li> <li>• packet sniffers or network analysers</li> <li>• port scanners</li> <li>• protocol analysers.</li> </ul>

<p><b><i>Areas of vulnerability</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• exploits</li> <li>• unsecured ports</li> <li>• wide-scale attacks</li> <li>• worms.</li> </ul>
--	---

## Unit Sector(s)

Systems administration and support

# ICASAS518A Install and upgrade operating systems

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain operating systems (OS) in a medium to large organisation.

## Application of the Unit

This unit applies to those working in the support area who are required to install new operating systems and upgrade existing ones.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine organisational help-desk procedures	1.1 Review organisation's technical support procedures 1.2 Interrogate help-desk system 1.3 Liaise with client
2. Install or upgrade a desktop OS	2.1 Install an <b>OS</b> 2.2 Upgrade an existing OS 2.3 Research and implement automated OS installation techniques and procedures 2.4 Migrate files
3. Manage and troubleshoot resource access	3.1 Configure local resources access 3.2 Configure sharing of local resources 3.3 Assign access rights to shared resources
4. Configure and troubleshoot hardware devices and drivers	4.1 Determine and resolve problems with hardware resources 4.2 Research and install appropriate device drivers 4.3 Configure hardware resources 4.4 Configure device drivers
5. Configure and troubleshoot the desktop and user environments	5.1 Construct <b>profiles</b> for users 5.2 Organise shortcuts 5.3 Arrange <b>screen management</b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to interpret technical manuals
- learning skills to maintain knowledge of current industry accepted hardware and software products
- literacy skills to read and interpret manuals and web sources
- planning and organisational skills to plan installations or upgrades in the most efficient manner
- problem-solving skills to solve client OS problems
- technical skills to select, source and use appropriate software and tools based on analysis of technical needs.

### Required knowledge

- procedures and techniques involved in the installation and upgrade of OS
- procedures and principles involved in unattended OS installation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• install, upgrade and customise an operating system to user requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• stand-alone or networked personal computers</li> <li>• appropriate OS installation CD or recovery boot discs</li> <li>• drivers for connected devices</li> <li>• help-desk system</li> <li>• OS service packs</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate upgrading, installing and customising an OS</li> <li>• review candidate’s completed call documentation and task documentation</li> <li>• verbal or written questioning to determine candidate’s knowledge of OS problems, installs and upgrades.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>OS</b> may include:</p>	<ul style="list-style-type: none"> <li>• Mac:             <ul style="list-style-type: none"> <li>• Mac 9</li> <li>• Mac X</li> </ul> </li> <li>• current Windows:             <ul style="list-style-type: none"> <li>• Windows 2000</li> <li>• Windows 7</li> <li>• Windows Vista</li> <li>• Windows XP</li> </ul> </li> <li>• legacy Windows:             <ul style="list-style-type: none"> <li>• DOS</li> <li>• WIN2000/NT/XP</li> <li>• WIN95/98/ME (Similar to DOS)</li> <li>• Windows 98</li> <li>• Windows ME</li> <li>• Windows NT 4.0</li> <li>• WINDOWS VISTA, Windows 7 or current Client OS</li> <li>• Windows 95</li> </ul> </li> <li>• Unix-like operating systems:             <ul style="list-style-type: none"> <li>• BSD and derivations:                 <ul style="list-style-type: none"> <li>• FreeBSD</li> <li>• NetBSD</li> <li>• OpenBSD</li> </ul> </li> <li>• GNU and Linux</li> <li>• NextStep</li> <li>• Suse Linux</li> <li>• available open source OS.</li> </ul> </li> </ul>
<p><b>Profiles</b> may include:</p>	<ul style="list-style-type: none"> <li>• local profiles</li> <li>• mandatory profiles</li> <li>• roaming profiles.</li> </ul>
<p><b>Screen management</b> may include:</p>	<ul style="list-style-type: none"> <li>• data projectors</li> <li>• multiple screens</li> <li>• screen frequency</li> </ul>

	<ul style="list-style-type: none"><li>• screen resolution.</li></ul>

## Unit Sector(s)

Systems administration and support

## ICASAS601A Implement change-management processes

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply techniques that facilitate the planning, implementation and monitoring of information technology change.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) staff in a range of areas who are required to manage change in ICT systems.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan IT system changes	<p>1.1 Research and develop <i>change procedures</i> and conventions</p> <p>1.2 Develop IT change-management plan</p> <p>1.3 Identify key personnel responsible for change-management policy and procedures</p> <p>1.4 Train staff and management in change-management procedures and policies</p> <p>1.5 Evaluate current IT <i>system</i> to determine changing <i>user</i> or business patterns</p> <p>1.6 Identify key personnel responsible for authorising and implementing change-management plan</p>
2. Identify technology system change needs	<p>2.1 Determine current IT <i>benchmarks</i></p> <p>2.2 Compare identified needs against performance benchmarks to identify possible changes</p> <p>2.3 Assess proposed changes to determine impact</p> <p>2.4 Notify key personnel of necessary change</p>
3. Implement change	<p>3.1 Plan change schedule</p> <p>3.2 Prioritise changes and allocate resources</p> <p>3.3 Implement change-management plan and procedures</p> <p>3.4 Involve <i>stakeholders</i> in the implementation process</p> <p>3.5 Capture new performance benchmarks to measure changes</p> <p>3.6 Ensure appropriate <i>liaison methods</i> are used</p> <p>3.7 Identify training <i>requirements</i></p> <p>3.8 Notify stakeholders of change</p>
4. Monitor and review implementation	<p>4.1 Measure change performance against new benchmarks</p> <p>4.2 Submit performance results to stakeholders</p> <p>4.3 Obtain sign-off on changes</p> <p>4.4 Provide appropriate documentation and reporting</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to gather and analyse data regarding the priorities and effects of specific changes
- communication skills to liaise with stakeholders and team members
- literacy skills to write technical reports
- planning and organisational skills to prioritise tasks and contingency arrangements
- technical skills to:
  - administer local and remote change procedures
  - ensure previous system is backed up for a cancelled system change
  - monitor system security during change and prevent system threats.

### Required knowledge

- change-management principles
- functions and features of current information technology systems
- internet, and internet working architecture
- principles and structure of performance benchmarking
- server access security procedures and general security issues relating to a particular operating system.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify elements that require changing</li> <li>• plan, implement, monitor and review change and apply guidelines and policies to the change-management process</li> <li>• maintain appropriate version control</li> <li>• maintain compliance with existing accessibility and other policies.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• international standards</li> <li>• operational data from an organisation</li> <li>• needs analysis data</li> <li>• organisational planning guidelines</li> <li>• version control guidelines</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• performance benchmarking</li> <li>• change-management principles</li> <li>• information technology systems</li> <li>• internet and internetworking architecture</li> <li>• server access security procedures and general security issues relating to a particular operating system</li> </ul> </li> <li>• review of candidate's completed documentation of the change process.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Change procedures</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• document</li> <li>• formal procedures that must be adhered to:                         <ul style="list-style-type: none"> <li>• check points and sign-offs with documented procedures and templates</li> <li>• communication with stakeholders</li> <li>• dispute resolution</li> <li>• implementation of financial control mechanisms</li> <li>• modification procedures</li> <li>• processes for determining size and cost</li> </ul> </li> <li>• incremental</li> <li>• process-based</li> <li>• result of an impact on quality, cost or OHS</li> <li>• socially-based</li> <li>• verbal.</li> </ul>
<p><b><i>System</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• application programs</li> <li>• networks</li> <li>• operating systems</li> <li>• websites.</li> </ul>
<p><b><i>User</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<p><b><i>Benchmarks</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• cost savings</li> <li>• performance</li> <li>• quality</li> <li>• technical.</li> </ul>
<p><b><i>Stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• community groups</li> <li>• corporate body</li> <li>• end user</li> <li>• government body</li> <li>• internal or external client.</li> </ul>
<p><b><i>Liaison methods</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• customer relationship management (CRM) technologies</li> <li>• email</li> <li>• group information sessions</li> </ul>

	<ul style="list-style-type: none"> <li>• management reviews</li> <li>• needs analysis surveys</li> <li>• newsletters</li> <li>• planning workshops</li> <li>• telephone calls</li> <li>• web information portals</li> <li>• written reports.</li> </ul>
<p><b>Requirements</b> may relate to:</p>	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>

Systems administration and support

# ICASUS701A Plan and manage virtualisation for IT sustainability

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse, plan and manage options using virtualisation and managed services for organisational processes to meet sustainability targets.

## Application of the Unit

This unit applies to those who have responsibility for conducting or managing information and communications technology (ICT) infrastructure projects, such as network managers, information technology (IT) infrastructure managers, network planners and designers, consultants or contractors.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop an organisational plan to implement IT virtualisation	<p>1.1 Analyse current enterprise operations to determine what processes or practices can be realised using virtualisation to ensure long-term sustainability within the <b>organisational guidelines</b></p> <p>1.2 Research and analyse alternative <b>virtualisation scenarios</b>, including a risk analysis and relative comparisons of each, considering return on investment (RoI)</p> <p>1.3 Produce results of the analysis prioritising the sequence of processes to be virtualised, based on <b>enterprise priorities</b> and the setting of sustainability targets for the organisation</p>
2. Manage strategies for deploying virtual machines	<p>2.1 Analyse <b>business factors</b> that cause enterprises to migrate to virtualisation</p> <p>2.2 Identify <b>virtualisation inhibitors</b> that are preventing the organisation from deploying strategies on local virtual machines</p> <p>2.3 Produce a <b>virtualisation management plan</b> to capitalise on using virtual machines according to enterprise priorities</p>
3. Manage outsourced services and cloud networks	<p>3.1 Analyse the IT requirements of the organisation to produce a cloud architecture using multiple <b>cloud computing elements</b> indicating the <b>layers of the cloud client stack</b></p> <p>3.2 Produce a cost-benefit <b>analysis</b></p> <p>3.3 Produce analytical justifications that will determine the <b>deployment model</b> that meets the <b>business requirements</b> of the organisation</p> <p>3.4 Set up a <b>service level agreement (SLA)</b> with the managed services provider (MSP) or the network provider to ensure the responsibilities of the stakeholders are specified and agreed to</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to compare and evaluate effective and innovative technical solutions involving the introduction or improvement of sustainability
- communication skills to:
  - adjust communication to suit different audiences
  - consult on and validate policy
  - liaise with stakeholders to outline resulting sustainability benefits
  - respond effectively to diversity
  - work as a member of a team
- literacy skills to:
  - prepare analytical reports, management plans and SLAs regarding the level of achievement of sustainability benchmarks, environmental targets and performance highlights
  - document technical requirements and procedures
  - evaluate complex and formal documents, such as government policy and legislation
  - interpret:
    - related sustainability documentation
    - technical specifications and installation manuals
  - process and present written information to a diverse range of people
  - write reports, design solutions and recommendations in required formats
- numeracy skills to:
  - analyse and confirm capacity and interoperability requirements
  - calculate budget requirements and limitations
  - determine workforce requirements
  - perform calculations to produce cost-benefit analysis
- planning and organisational skills to plan, prioritise and monitor own work
- problem-solving skills to:
  - account for unexpected variations to requirements
  - manage different points of view and dissenting stakeholders
  - resolve installation issues
- research and writing skills to:
  - prepare written SLA requiring precise expression, language and structures suited to the intended audience
  - research and present information
- research skills to:
  - interrogate vendor databases and websites to identify different solutions to meet client business specifications
  - gain and maintain relevant knowledge on current technology driving sustainability
- technical skills to:
  - evaluate virtual machines and methodologies

- produce cloud architecture and integration into existing network
- use sustainability software tools.

### Required knowledge

- best practice approaches relevant to sustainability
- business processes, including:
  - relevant organisational policies, procedures and protocols
  - relevant systems and procedures to aid in the achievement of workplace sustainability
- client business domain, including client organisation structure and business functionality
- cloud computing architecture
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- current industry-accepted products
- customer and business liaison
- energy consumption and energy audit methodology
- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- environmental impacts of products, processes, systems and services
- equal employment opportunity, equity and diversity principles and OHS implications of policy being developed
- IT power-consumption calculations
- linkage between processes
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the ICT industry
- quality assurance systems relevant to own organisation
- range of relevant managed services, including software, network and support
- systems diagnostic features
- technologies:
  - cloud computing
  - power supply requirements and management
  - server design and network architecture
  - set-up and configuration procedures
  - single and multiple processors
  - vendor specifications and requirements for software installation
  - virtual server functionality
  - virtualisation using software simulation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop plan for virtualisation and manage strategies, including managed services</li> <li>• determine and meet client requirements for installation and testing of virtual server</li> <li>• install, integrate and test virtualisation components according to vendor and technical specifications</li> <li>• produce cost-benefit analysis and virtualisation management plan for justification</li> <li>• set up SLAs.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• site and equipment on which servers can be virtualised</li> <li>• server virtualisation currently used in industry</li> <li>• relevant documentation, feasibility studies, equipment manuals and other site-related documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate carrying out installation, integration and testing of virtual server</li> <li>• review of plans completed by the candidate for different sites outlining design and resources required</li> <li>• verbal or written questioning to assess knowledge of methodologies used.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Organisational guidelines</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• budget allocations</li> <li>• capital expenditure</li> <li>• integrity</li> <li>• operational expenditure</li> <li>• projected growth</li> <li>• reliability</li> <li>• risk management</li> <li>• security.</li> </ul>
<p><b><i>Virtualisation scenarios</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• cloud networking:                         <ul style="list-style-type: none"> <li>• hybrid</li> <li>• private</li> <li>• public</li> </ul> </li> <li>• managed services:                         <ul style="list-style-type: none"> <li>• backup</li> <li>• network management</li> <li>• software production, support and maintenance</li> <li>• storage</li> <li>• system management</li> <li>• user management</li> </ul> </li> <li>• virtual machines:                         <ul style="list-style-type: none"> <li>• IP network and voice over internet protocol (VoIP)</li> <li>• PC</li> <li>• server</li> <li>• simulators</li> <li>• storage</li> <li>• test machines.</li> </ul> </li> </ul>
<p><b><i>Enterprise priorities</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• dynamic loads and demands</li> <li>• frequency of changes to specifications</li> <li>• return on investment</li> <li>• system integrity and security</li> <li>• time for implementation.</li> </ul>
<p><b><i>Business factors</i></b> may</p>	<ul style="list-style-type: none"> <li>• improved IT responsiveness and effectiveness</li> <li>• backup and data protection</li> </ul>

<p>include:</p>	<ul style="list-style-type: none"> <li>• company profitability and growth rate</li> <li>• guaranteed application quality of service</li> <li>• improved application availability</li> <li>• improved business continuity</li> <li>• stronger security</li> <li>• time spent on routine IT administrative tasks</li> <li>• virtualisation of business critical applications.</li> </ul>
<p><b>Virtualisation inhibitors</b> may include:</p>	<ul style="list-style-type: none"> <li>• lack of:             <ul style="list-style-type: none"> <li>• available budget</li> <li>• resources or skills to deploy</li> </ul> </li> <li>• uncertainty about:             <ul style="list-style-type: none"> <li>• best possible solution</li> <li>• business benefits of return on investment.</li> </ul> </li> </ul>
<p><b>Virtualisation management plan</b> may include:</p>	<ul style="list-style-type: none"> <li>• acquiring skills and resources</li> <li>• obtaining reliable business consultant on virtualisation</li> <li>• preparing risk analysis</li> <li>• revisiting budget allocations</li> <li>• using tools on total cost of ownership (TCO) to prove cost benefits.</li> </ul>
<p><b>Cloud computing elements</b> may include:</p>	<ul style="list-style-type: none"> <li>• cloud infrastructure:             <ul style="list-style-type: none"> <li>• billing</li> <li>• security</li> <li>• software testing</li> </ul> </li> <li>• cloud platform:             <ul style="list-style-type: none"> <li>• access control service</li> <li>• application server</li> <li>• data protection</li> <li>• web applications</li> <li>• web frontend</li> </ul> </li> <li>• cloud service:             <ul style="list-style-type: none"> <li>• communication</li> <li>• customer relationship management (CRM)</li> <li>• database</li> <li>• email server</li> <li>• file server</li> <li>• finance and accounting</li> <li>• IT tools</li> <li>• productivity</li> <li>• scheduling</li> <li>• storage and backup</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• cloud storage:             <ul style="list-style-type: none"> <li>• database.</li> </ul> </li> </ul>
<p><b><i>Layers of the cloud client stack</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• application services or software as a service (SaaS):             <ul style="list-style-type: none"> <li>• Aviary - image editor</li> <li>• business applications</li> <li>• Google docs</li> <li>• Jaycut - video editor</li> <li>• MS Office Web applications</li> <li>• Pixlr - photo editor</li> </ul> </li> <li>• infrastructure services or infrastructure as a service (IaaS):             <ul style="list-style-type: none"> <li>• Amazon Web Services</li> <li>• Flexiscale</li> <li>• GoGrid</li> </ul> </li> <li>• platform services or platform as a service (PaaS):             <ul style="list-style-type: none"> <li>• Force.com</li> <li>• Google AppEngine</li> <li>• Microsoft Azure</li> <li>• RackSpace.</li> </ul> </li> </ul>
<p><b><i>Analysis</i></b> would:</p>	<ul style="list-style-type: none"> <li>• verify if virtualisation, either through cloud computing or managed services, would offer better returns on investment</li> <li>• allow the organisation to meet sustainable targets.</li> </ul>
<p><b><i>Deployment model</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• hybrid cloud</li> <li>• private or internal cloud</li> <li>• public or external cloud.</li> </ul>
<p><b><i>Business requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• availability and performance</li> <li>• compliance</li> <li>• legal</li> <li>• open source</li> <li>• privacy</li> <li>• security</li> <li>• sustainability.</li> </ul>
<p><b><i>Service level agreement</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• backup</li> <li>• costs</li> <li>• interoperability</li> <li>• quality of service</li> <li>• reliability</li> <li>• risk management.</li> </ul>

## **Unit Sector(s)**

Sustainability

## ICASUS702A Conduct a business case study for integrating sustainability in IT planning and design projects

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish a business case to justify innovative implementation of sustainability in information technology (IT) planning and design projects. It involves accessing industry information and applying legislative guidelines.

### Application of the Unit

Project managers, planners and designers, consultants or contractors who have responsibility for conducting or managing information and communications technology (ICT) projects apply the skills and knowledge in this unit.

This unit will prepare the participant in planning and conducting cost-benefit analysis and return on investment for the implementation of sustainable schemes at the enterprise level.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Scope the project for establishing a business case for integrating sustainability in IT project</p>	<p>1.1 Analyse proposed <b>IT project</b> specifications to determine scope and extent of sustainability integration in design aspects</p> <p>1.2 Analyse and evaluate <b>expected goals</b> of project and relate the business case to broader organisational goals</p> <p>1.3 Research <b>appropriate sources of information</b> relevant to the project to prepare the business case for validation with <b>stakeholders</b></p>
<p>2. Plan and conduct the business case for a sustainable IT project</p>	<p>2.1 Evaluate the <b>critical success factors</b> to determine the vital strategy for the project to implement sustainability and gain competitive advantage</p> <p>2.2 Produce <b>estimate of costs</b> projected over an appropriate time period and determine potential for <b>return on investment</b> for a proposed design and implementation plan</p> <p>2.3 Conduct a cost-benefit analysis to determine the financial gain of the derived <b>overall benefit</b> obtained by integrating sustainability into the project</p> <p>2.4 Produce <b>executive summary</b> for the stakeholders on the proposal, including risk analysis if the sustainability component activity is not implemented</p>
<p>3. Devise management strategies for integrating sustainability into an IT project</p>	<p>3.1 Initiate and progress <b>sustainable management principles</b> that result in reduced environmental impact</p> <p>3.2 Establish, regularly review and improve <b>key performance indicators</b> (KPIs) on sustainability performance</p> <p>3.3 Incorporate innovative planning and design rules for IT projects that foster sustainability and environmental best practice</p> <p>3.4 Produce energy usage projection using estimated carbon dioxide emissions with comparable <b>benchmarks</b> and provide <b>detailed report</b> to support the long-term benefits</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to compare and evaluate effective technical solutions involving introduction or improvement of sustainability
- communication skills to:
  - adjust communication to suit different audiences
  - consult on and validate policy
  - liaise with stakeholders to outline the resulting sustainability benefits
  - respond effectively to diversity
  - work as a member of a team
- literacy skills to:
  - prepare reports and an executive summary regarding the level of achievement of sustainability benchmarks, environmental targets and performance highlights
  - document technical requirements and procedures
  - evaluate complex and formal documents, such as government policy and legislation
  - interpret technical specifications and related sustainability documentation
  - prepare a business case
- numeracy skills to:
  - analyse and confirm business requirements
  - calculate budget requirements and limitations
  - determine workforce requirements
  - perform calculations related to life cycle assessment (LCA) and carbon dioxide (CO<sub>2</sub>) emissions
- organisational skills to:
  - arrange relevant documentation and approvals
  - set out project requirements and priorities
- problem-solving skills to:
  - account for unexpected variations to requirements
  - manage different points of view and dissenting stakeholders
- project-management skills to undertake or manage a complex project
- research and writing skills to:
  - prepare written business cases requiring precise expression, language and structures suited to intended audience
  - research and present information
  - gain and maintain relevant and current technology driving sustainability
- technical skills to use sustainability software tools.

### Required knowledge

- best practice approaches relevant to sustainability

- energy consumption and energy audit methodology
- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- environmental impacts of products, processes, systems and services
- equal employment opportunity, equity and diversity principles and OHS implications of policy being developed
- global and national initiatives, legislation, policies and guidelines
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the ICT industry
- quality assurance systems relevant to own organisation
- relevant industry knowledge
- relevant organisational policies, procedures and protocols to assist in achieving workplace sustainability
- sustainability assessment tools
- sustainable management principles and strategies
- software tools for IT power consumption and CO2 emissions calculations.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• establish a business case to introduce or improve sustainability in an IT project</li> <li>• produce a cost-benefit analysis showing overall benefit of integrating sustainability into an IT project</li> <li>• devise, implement and review management strategies showing a measurable improvement using the chosen benchmark indicators.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• sites on which preparation of a business case for introducing or improving sustainability in an IT project may be carried out</li> <li>• relevant legislation, standards, guidelines, reports and equipment specifications and drawings</li> <li>• range of workplace documentation and personnel, information and resources, such as compliance obligations, organisational plans, and work responsibilities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of policy developed by candidate and procedural documentation outlining the approach taken</li> <li>• review of implementation strategy, plans and work plans prepared by candidate</li> <li>• analysis of methods used to involve stakeholders in policy development, implementation and review</li> <li>• review of work area relating to policy and procedures being developed to assess measurement of resources used, hazards and compliance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>IT project</i></b> may include:	<ul style="list-style-type: none"> <li>• content delivery or distribution network</li> <li>• data storage networks</li> <li>• equipment upgrades</li> <li>• introduction of new technology</li> <li>• media networking</li> <li>• new data centre</li> <li>• new IP network</li> <li>• security network</li> <li>• server network</li> <li>• software upgrade</li> <li>• unified communication.</li> </ul>
<b><i>Expected goals</i></b> may include:	<ul style="list-style-type: none"> <li>• achieving best practice while protecting the environment without sacrificing profitability</li> <li>• better return on investment</li> <li>• improving public perception of company image</li> <li>• meeting sustainability targets</li> <li>• providing information on trade-offs of alternative processes, products and materials</li> <li>• reducing resources and emissions.</li> </ul>
<b><i>Appropriate sources of information</i></b> may include:	<ul style="list-style-type: none"> <li>• AS/NZS 3598:2000</li> <li>• BS EN 16001:2009</li> <li>• Dow Jones Sustainability Index (DJSI)</li> <li>• international standards for environmental management - life cycle assessment:             <ul style="list-style-type: none"> <li>• AS/NZS ISO 14040:1998</li> <li>• AS/NZS ISO 14041:1999</li> <li>• AS/NZS ISO 14042:2001</li> <li>• AS/NZS ISO 14043:2001</li> <li>• AS/NZS ISO 14048:2003</li> </ul> </li> <li>• United States Environmental Protection Agency (EPA) - Life-Cycle Assessment: Principles and Practice EPA/600/R-06/060 May 2006.</li> </ul>
<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• business partners</li> <li>• community</li> </ul>

	<ul style="list-style-type: none"> <li>• customers</li> <li>• government organisations</li> <li>• industry associations</li> <li>• investors</li> <li>• shareholders</li> <li>• staff</li> <li>• technical experts.</li> </ul>
<p><b><i>Critical success factors</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• better customer satisfaction</li> <li>• improved profit margin</li> <li>• improved quality of products and services</li> <li>• improved revenue growth</li> <li>• increase in customer numbers</li> <li>• increase in new sources of business</li> <li>• positive cash flow.</li> </ul>
<p><b><i>Estimate of costs</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• annual operating costs</li> <li>• capital costs</li> <li>• detailed breakdown of costs</li> <li>• recurring costs</li> <li>• summary of costs by category.</li> </ul>
<p><b><i>Return on investment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• carbon trading</li> <li>• project life</li> <li>• rate of depreciation</li> <li>• simple return on investment calculation.</li> </ul>
<p><b><i>Overall benefit</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• improved: <ul style="list-style-type: none"> <li>• employee satisfaction</li> <li>• operational expenditure</li> <li>• use of workspace</li> <li>• organisation performance and efficiency</li> <li>• public perception of company</li> </ul> </li> <li>• more reliable service to customers</li> <li>• carbon tax trade-offs.</li> </ul>
<p><b><i>Executive summary</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• background to the proposal</li> <li>• introduction to the proposal</li> <li>• past and current environment</li> <li>• rationale for establishing the business case at this time.</li> </ul>
<p><b><i>Sustainable management principles</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• audit waste-management procedures</li> <li>• improving the energy efficiency of IT network equipment: <ul style="list-style-type: none"> <li>• reducing the need for air conditioning</li> <li>• shutting down equipment during low demand</li> </ul> </li> <li>• procurement strategies:</li> </ul>

	<ul style="list-style-type: none"> <li>• assessing suppliers’ environmental policies and procedures</li> <li>• lowering energy consumption or environmental impact of replacement products or services</li> <li>• managing the environmental impacts of electrical and electronic equipment</li> <li>• using energy consumption and environmental impact as criteria in the process of awarding contracts</li> <li>• supply chain:             <ul style="list-style-type: none"> <li>• driving ethical values through the supply chain</li> <li>• engaging supplier involvement in emissions reporting and continual improvement</li> <li>• engaging suppliers who provide information on energy consumption and product lifecycles</li> <li>• influencing suppliers to provide energy efficient products and services.</li> </ul> </li> </ul>
<p><b>Key performance indicators</b> may include:</p>	<ul style="list-style-type: none"> <li>• kg CO2 emissions from company car fleet</li> <li>• kg CO2 emitted per floor area occupied in permanent buildings</li> <li>• percentage of timber from well-managed, sustainable sources used in construction</li> <li>• percentage volume of material from sustainable sources</li> <li>• reduction of quantity (in 1000’s kg) of ozone depleting gases used in air-conditioning equipment.</li> </ul>
<p><b>Benchmarks</b> may include:</p>	<ul style="list-style-type: none"> <li>• AccountAbility AA1000 Assurance Standard (2008)</li> <li>• BSI BenchMark</li> <li>• Carbon Disclosure Project (CDP)</li> <li>• DJSI</li> <li>• Global Reporting Initiative (GRI) G3 guidelines (telecommunications sector supplement).</li> </ul>
<p><b>Detailed report</b> may include:</p>	<ul style="list-style-type: none"> <li>• calculated estimated CO2 emissions for nominated project</li> <li>• calculated potential energy savings and payback periods for recommended actions</li> <li>• innovative approaches</li> <li>• recommendations in order of priority on range of activities with sustainable outcomes.</li> </ul>

## Unit Sector(s)

Sustainability

# ICASUS703A Research strategies using SAP solutions for sustainable economic and environmental outcomes

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish a business case to justify the implementation of systems, applications and products (SAP) in operational strategies to achieve more sustainable business operations and environmental sustainability. It involves accessing industry information and applying legislative guidelines.

SAP is also referred to as systems applications and products.

## Application of the Unit

Business analysts, project managers, consultants, planners and designers who have responsibility for conducting or managing business operations apply the skills and knowledge in this unit.

This unit will prepare the participant to plan and conduct cost-benefit analysis and return on investment for the implementation of sustainable schemes at an enterprise level.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Scope the enterprise for establishing a business case for integrating SAP into business operations</p>	<p>1.1 Analyse current <i>enterprise operations</i> to determine what processes or practices can be realised using SAP to ensure long-term sustainability within <i>organisational guidelines</i></p> <p>1.2 Research and analyse a range of alternative <i>SAP product and services solutions</i>, including a risk analysis and relative comparisons to prepare a business case for validation with <i>stakeholders</i></p> <p>1.3 Produce preliminary results of the scoping analysis with recommended priority of SAP solutions that would optimise <i>business sustainability</i> and deliver competitive advantage</p>
<p>2. Plan and conduct the business case for using SAP solutions</p>	<p>2.1 Evaluate scoping analysis report to produce an <i>operating costs estimate</i> projected over appropriate time period for a proposed plan, based on <i>SAP solution</i> for business critical operation</p> <p>2.2 Conduct cost-benefit analysis to predict the potential <i>return on investment (RoI)</i> on economic and environmental sustainability and <i>business benefits</i> derived by proposed SAP solution</p> <p>2.3 Produce <i>executive summary</i> of the proposal for validation with stakeholders, including risk analysis if the SAP solution activity is not implemented</p>
<p>3. Devise management strategies for implementing SAP sustainability solution in the business operations</p>	<p>3.1 Produce management plan to implement <i>sustainability strategies</i> using <i>SAP software solution tools</i> to improve profitability and reduce environmental impacts</p> <p>3.2 Establish regular reviews using SAP reports to improve <i>key performance indicators (KPIs)</i> on sustainability performance</p> <p>3.3 Produce energy usage analysis for proposed SAP solution using projected carbon dioxide (CO<sub>2</sub>) emissions with comparable <i>benchmarks</i></p> <p>3.4 Provide detailed <i>feasibility report</i> to support long-term economic and environmental benefits</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to compare and evaluate effective SAP solutions involving introduction or improvement of sustainability
- communication skills to:
  - adjust communication to suit different audiences
  - consult on and validate policy
  - liaise with stakeholders to outline resulting sustainability benefits
  - respond effectively to diversity
  - work as a member of a team
- literacy skills to:
  - prepare reports and executive summary regarding level of achievement of sustainability benchmarks, environmental targets and performance highlights
  - document SAP requirements and procedures
  - evaluate complex and formal documents, such as government policy and legislation
  - interpret operational specifications and related sustainability documentation
  - prepare a business case
- numeracy skills to:
  - analyse and confirm target predictions
  - calculate budget requirements and limitations
  - determine workforce requirements
  - perform calculations related to life cycle assessment (LCA)
- organisational skills to arrange relevant documentation for analysis
- planning skills to set out priorities for evaluation and analysis
- problem-solving skills to:
  - account for unexpected variations to requirements
  - manage different points of view and dissenting stakeholders
- project-management skills to undertake or manage a complex project
- research and writing skills to:
  - prepare written business cases requiring precise expression, language and structures suited to the intended audience
  - research and present information
- research skills to gain and maintain relevant strategies to implement SAP solutions
- technical skills to use SAP software tools.

### Required knowledge

- best practice approaches relevant to SAP sustainability
- extensive range of SAP software solutions and tools
- energy consumption and energy audit methodology
- waste and recycling policies and management

- procurement and supply chain management
- business operation and procedures
- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- carbon emission global and national legislation and targets
- environmental impacts of products, processes, systems and services
- equal employment opportunity, equity and diversity principles and OHS implications of policy being developed
- principles, practices and available tools and techniques of economic and environmental sustainability management
- quality assurance systems relevant to own organisation
- relevant industry competency
- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• conduct a scoping exercise and produce analytical report</li> <li>• conduct cost-benefit analysis using SAP solutions to justify RoI on economic and environmental sustainability</li> <li>• produce executive summary for stakeholder validation</li> <li>• produce management plan to implement strategies using SAP software solutions</li> <li>• produce energy usage analysis and feasibility report for long-term sustainability.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• sites on which preparation of a business case for introducing or improving sustainability in an enterprise may be carried out</li> <li>• relevant legislation, standards, guidelines, reports and equipment specifications and drawings</li> <li>• range of workplace documentation and personnel, information and resources, such as compliance obligations, organisational plans, work responsibilities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of research and analysis conducted by candidate</li> <li>• review of implementation strategy, management plans prepared by candidate</li> <li>• analysis of methods used to involve stakeholders in validation, implementation and review</li> <li>• review of methodologies and procedures used by candidate to evaluate SAP solutions and recommendations made for long-term sustainability</li> <li>• review of work area relating to policy and procedures being developed to assess measurement of resources used, hazards and compliance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Enterprise operations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• building management</li> <li>• energy usage and utilities</li> <li>• finance and accounting</li> <li>• human resources</li> <li>• information technology (IT) services and support</li> <li>• manufacturing and production</li> <li>• procurement and logistics</li> <li>• recycle and waste management</li> <li>• research and development</li> <li>• sales and marketing</li> <li>• warehousing.</li> </ul>
<p><b><i>Organisational guidelines</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• automation of processes</li> <li>• budget allocations</li> <li>• capital expenditure (capex)</li> <li>• improved cash flow</li> <li>• inefficiencies</li> <li>• integrity</li> <li>• operational expenditure (opex)</li> <li>• projected growth</li> <li>• reliability</li> <li>• reporting activities</li> <li>• risk management</li> <li>• security.</li> </ul>

# ICAWEB201A Use social media tools for collaboration and engagement

## Modification History

Version	Comments
ICAWEB201A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish a social networking presence using social media tools and applications.

The unit specifically identifies the requirement to review, compare and use different types of social networking tools and applications.

## Application of the Unit

This unit applies to information and communications technology (ICT) personnel who need to develop a social networking web presence for a small or large office environment using social media tools and applications.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Describe different types of social media tools and applications	1.1 Explain characteristics of the term <b><i>social media</i></b> 1.2 Identify different types of <b><i>social-media tools and applications</i></b> 1.3 Illustrate some of the <b><i>issues</i></b> associated with the use of social media tools and applications
2. Compare different types of social media tools and applications	2.1 Select one social media type for review 2.2 Review most popular tools and applications within that social media type 2.3 Itemise benefits across a range of the most popular tools and applications 2.4 Select most appropriate social media tool or application
3. Set up and use popular social media tools and applications	3.1 Identify social media tools and applications for possible implementation 3.2 Initiate preferred social media tools and applications for use 3.3 Establish social media interface using <b><i>text and file content</i></b> 3.4 Initiate <b><i>social networking</i></b> interaction 3.5 Test and evaluate tools and applications for <b><i>ease of use</i></b> 3.6 Present findings

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user online manuals and help functions
  - read and write basic documents and instructions
- problem-solving skills to address problems when using applications
- technical skills to:
  - access the internet
  - operate a personal computer (PC) and printer
  - to enter text and numerical data
  - use social media application packages.

### Required knowledge

- basic technical terminology in relation to social networking and social media applications and tools
- basic knowledge of uploading images, text files, PDF files, audio files, video files and link associated files
- features and functions of social media applications
- import and export software functions
- linking documents
- OHS principles and responsibilities for ergonomics, including work periods and breaks
- tagging to facilitate collaborative folksonomy
- social media applications and procedures for connecting to social networking sites
- use of input and output devices
- use of RSS feeds to connect a social network.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify different types of social media tools and applications, and issues associated with their use</li> <li>• access the internet, set up a social networking presence and upload and link a wide variety of files</li> <li>• use OHS principles and responsibilities for ergonomics, such as work periods and breaks.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• PC and printer</li> <li>• internet</li> <li>• social-media tools and applications</li> <li>• online instructional documents</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of types of social media tools and applications, and social-networking sites</li> <li>• direct observation of candidate accessing and interacting with a variety of social-networking sites</li> <li>• review of social-media tools and application evaluations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Social media</i></b> may include:	<ul style="list-style-type: none"> <li>• web applications that facilitate:             <ul style="list-style-type: none"> <li>• information sharing</li> <li>• interoperability</li> <li>• user-centred design.</li> </ul> </li> </ul>
<b><i>Social-media tools and applications</i></b> may include:	<ul style="list-style-type: none"> <li>• blogs</li> <li>• folksonomies</li> <li>• hosted services</li> <li>• mashups</li> <li>• social networking sites:             <ul style="list-style-type: none"> <li>• YouTube</li> <li>• Flickr</li> <li>• Facebook</li> <li>• Twitter</li> </ul> </li> <li>• video sharing sites</li> <li>• web applications</li> <li>• wikis.</li> </ul>
<b><i>Issues</i></b> may include:	<ul style="list-style-type: none"> <li>• copyright</li> <li>• privacy</li> <li>• security</li> <li>• trust.</li> </ul>
<b><i>Text and file content</i></b> may include:	<ul style="list-style-type: none"> <li>• applications, including:             <ul style="list-style-type: none"> <li>• .exe</li> <li>• .pdf</li> <li>• .ppt</li> <li>• .rtf</li> <li>• .zip</li> </ul> </li> <li>• audio, including:             <ul style="list-style-type: none"> <li>• .mid</li> <li>• .mp3</li> <li>• .wav</li> </ul> </li> <li>• graphics, including:             <ul style="list-style-type: none"> <li>• .bmp</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• .gif</li> <li>• .jpg</li> <li>• .swf</li> <li>• .tif</li> <li>• text, including: <ul style="list-style-type: none"> <li>• .htm</li> <li>• .txt</li> </ul> </li> <li>• video, including: <ul style="list-style-type: none"> <li>• .avi</li> <li>• .mov</li> <li>• .mpg</li> </ul> </li> <li>• web, including: <ul style="list-style-type: none"> <li>• .asp</li> <li>• .xml.</li> </ul> </li> </ul>
<p><i>Social networking</i> is being connected by one or more specific types of interdependency, such as:</p>	<ul style="list-style-type: none"> <li>• common interest</li> <li>• financial exchange</li> <li>• knowledge</li> <li>• personal relationships</li> <li>• prestige</li> <li>• relationships of beliefs.</li> </ul>
<p><i>Ease of use</i> may include:</p>	<ul style="list-style-type: none"> <li>• affordability</li> <li>• desirable features for an online presence: <ul style="list-style-type: none"> <li>• bulletin boards</li> <li>• direct mailing to customers</li> <li>• online forums</li> <li>• selling of products online</li> </ul> </li> <li>• ease of communications</li> <li>• flexibility for placement of text, links and images</li> <li>• reasons for an external online presence: <ul style="list-style-type: none"> <li>• communication with potential customers</li> <li>• promotion of products and services</li> <li>• recruitment of volunteers and new staff</li> </ul> </li> <li>• reasons for an internal online presence: <ul style="list-style-type: none"> <li>• regular staff communications</li> <li>• enterprise cohesion</li> <li>• display of staff achievements</li> </ul> </li> <li>• reliability</li> <li>• set-up ease.</li> </ul>

# ICAWEB301A Create a simple markup language document

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design, create and save a basic markup language document using a text editor.

## Application of the Unit

This unit applies to web assistants responsible for creating web pages using a markup language.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Review requirements	1.1 Review the requirements of the document 1.2 Select the appropriate <i>markup language</i> based on organisational standards 1.3 Review document structure
2. Create document structure	2.1 Create and assign the basic elements of the document 2.2 Markup sections of the document to depict the <i>structure</i>
3. Validate documents	3.1 Validate markup language document against requirements 3.2 Validate markup language document in different <i>browsers</i>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with peers and supervisors
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- problem-solving skills to use markup language and troubleshoot problems
- technical skills to use a markup language to create the required web page.

### Required knowledge

- markup language and associated standards
- features and limitations of range of available browsers
- web accessibility.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create and save a markup language document</li> <li>• use a markup language without the automated generation of code.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational style guide or policy</li> <li>• document specification</li> <li>• text editor</li> <li>• range of browsers</li> <li>• internet access to validate markup</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of web pages prepared by candidate using a text editor</li> <li>• evaluation of candidate's validated markup code results in commonly used browsers.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Markup language</b> may include:	<ul style="list-style-type: none"> <li>• dynamic hypertext markup language (DHTML)</li> <li>• hypertext markup language (HTML)</li> <li>• standard generalised markup language (SGML)</li> <li>• virtual reality modelling language (VRML)</li> <li>• eXtensible hypertext markup language (XHTML)</li> <li>• eXtensible markup language (XML).</li> </ul>
<b>Structure</b> may include elements describing:	<ul style="list-style-type: none"> <li>• headings</li> <li>• lists</li> <li>• paragraphs.</li> </ul>
<b>Browsers</b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Opera</li> <li>• Safari.</li> </ul>

# ICAWEB302A Build simple websites using commercial programs

## Modification History

Version	Comments
ICAWEB302A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use web authoring tools to create, modify and test simple web pages and websites.

## Application of the Unit

This unit applies to people with responsibility for creating and maintaining simple websites.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify authoring requirements	<p>1.1 Select preferred <i>web authoring tool</i> according to <i>client</i> requirements</p> <p>1.2 Set preferences for the web authoring tool, including site <i>file transfer protocol client</i></p>
2. Create and save files	<p>2.1 Create files and save in correct location or directory</p> <p>2.2 Navigate the web authoring tool environment or workspace</p> <p>2.3 Access and use a range of features in the web authoring tool</p> <p>2.4 Maintain suitable directory structure for the site</p> <p>2.5 Save in appropriate directory structure</p> <p>2.6 Upload files to appropriate folder on the <i>server</i></p>
3. Add content to web pages	<p>3.1 Insert and format text content according to client <i>requirements</i></p> <p>3.2 Insert <i>images</i>, data tables and simple forms</p> <p>3.3 Access <i>markup language</i> and make basic modifications to code</p>
4. Create simple navigation	<p>4.1 Create a site map to plan navigation</p> <p>4.2 Create links between pages to reflect content structure using both text and images</p>
5. Test website	<p>5.1 Test elements of website content across a number of different <i>browsers</i> and browser versions to ensure consistency of presentation and performance</p> <p>5.2 Test that website meets client requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to clarify requirements
- research skills to gather information and review software suitability
- literacy skills to read and understand client requirements
- technical skills to:
  - open, edit, save, organise and back up files appropriately
  - operate a computer
  - troubleshoot basic hardware and software issues
  - upload files to web server
  - use basic hypertext markup language (HTML) coding.

### Required knowledge

- Australian Computer Society Code of Ethics
- OHS requirements relevant to the IT industry
- overview knowledge of website publishing and markup language
- sustainability concepts, including energy and resource conservation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select and use a web authoring tool to create web pages</li> <li>• insert text and image elements in a web page</li> <li>• modify existing markup</li> <li>• test web page content for consistency</li> <li>• upload files to server.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware and software</li> <li>• web authoring tools</li> <li>• web servers</li> <li>• website</li> <li>• storage media</li> <li>• FTP client software</li> <li>• server security password and access procedures</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning to assess knowledge of web publishing, markup, uploading and testing procedures</li> <li>• observation of candidate performing tasks related to creating web pages</li> <li>• review of a newly created website.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English</p>

	<p>speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Web authoring tool</b> may include:	<ul style="list-style-type: none"> <li>• Adobe Creative Suite</li> <li>• Amaya for Mac, Windows, Linux, Unix</li> <li>• BBEdit for Mac</li> <li>• CoffeeCup</li> <li>• Dreamweaver for Mac, Windows</li> <li>• EditPad</li> <li>• EditPlus</li> <li>• FrontPage</li> <li>• GoLive</li> <li>• Homesite</li> <li>• Kompozer for Windows, Mac and Linux</li> <li>• Pagemill</li> <li>• SeaMonkey for Windows, Mac and Linux.</li> </ul>
<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b>File transfer protocol client</b> may include:	<ul style="list-style-type: none"> <li>• CuteFTP for Windows</li> <li>• Filezilla for Windows, Mac OS, Linux</li> <li>• Transmit for Mac OS</li> <li>• WS-FTP for Windows.</li> </ul>
<b>Server</b> may include:	<ul style="list-style-type: none"> <li>• application or web servers</li> <li>• email servers</li> <li>• file and print servers</li> <li>• file transfer protocol (FTP) servers</li> <li>• firewall servers</li> <li>• proxy or cache servers.</li> </ul>
<b>Requirements</b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business or organisational</li> <li>• individuals</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>Images</b> may include:	<ul style="list-style-type: none"> <li>• animations</li> </ul>

	<ul style="list-style-type: none"> <li>• backgrounds</li> <li>• banners</li> <li>• clip art</li> <li>• content-related images</li> <li>• decorative elements</li> <li>• logos</li> <li>• photos.</li> </ul>
<i>Markup language</i> may include:	<ul style="list-style-type: none"> <li>• cascading style sheet (CSS)</li> <li>• hypertext markup language (HTML)</li> <li>• eXtensible hypertext markup language (XHTML)</li> <li>• eXtensible markup language (XML).</li> </ul>
<i>Browsers</i> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Lynx</li> <li>• Opera</li> <li>• Safari.</li> </ul>

## Unit Sector(s)

## Custom Content Section

Not applicable.

## ICAWEB303A Produce digital images for the web

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce and manipulate images suitable for use in website development.

### Application of the Unit

This unit applies to people with responsibility for creating graphics for a web environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine client requirements	1.1 Access and interpret <i>client</i> brief to determine client needs 1.2 Analyse client needs with regard to image content, quality and size
2. Source images	2.1 Research <i>appropriate sources</i> of images to meet a range of needs 2.2 Source images appropriate to meet needs, taking into consideration <i>copyright restrictions</i>
3. Manipulate images	3.1 Select appropriate <i>industry-standard image editing software</i> for the purpose 3.2 Create backups of assets to be used 3.3 Use features of the image-editing software to create a range of effects appropriate to client needs and web application 3.4 Edit, resize and slice images for use in <i>web applications</i> as required to meet client needs
4. Save images	4.1 Save images maintaining individual effects 4.2 Save images in <i>appropriate formats</i> for use in web applications and appropriate to the client's needs 4.3 Save images in appropriate directory structure

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to clarify requirements
- literacy skills to read and understand client requirements
- research skills to gather information on the internet
- technical skills to:
  - open, edit, save, organise and back up files appropriately
  - operate a computer
  - troubleshoot basic hardware and software issues.

### Required knowledge

- OHS requirements relevant to the IT industry
- overview knowledge of industry standards and copyright legislation
- sustainability concepts, such as energy and resource conservation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>analyse client needs</li> <li>research and source images</li> <li>manipulate and produce images for use in website development meeting the requirements of the brief.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>image manipulation software, hardware and storage devices currently used in industry</li> <li>client brief</li> <li>sources of images</li> <li>organisational policy and procedures</li> <li>appropriate learning and assessment support when required</li> <li>modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>verbal or written questioning to assess candidate's knowledge of image formats, copyright issues, program features, and web image issues</li> <li>review of digital images prepared for a website.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<b><i>Appropriate sources</i></b> may include:	<ul style="list-style-type: none"> <li>• CD collections of unrestricted use, copyright and royalty free images</li> <li>• images taken by candidate</li> <li>• internet collections of unrestricted use, copyright and royalty free images.</li> </ul>
<b><i>Copyright restrictions</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised use of images</li> <li>• copyright law</li> <li>• use of images that are public domain.</li> </ul>

## ICAWEB401A Design a website to meet technical requirements

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design a website to specifications within a particular technical and human interface environment.

### Application of the Unit

This unit applies to web designers in a broad range of technical and managerial functions who are responsible for analysis, documentation and design, including identifying the technical and human computer interface requirements that drive design.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Define technical environment	1.1 Identify <b><i>business requirements</i></b> 1.2 Identify appropriate <b><i>standards</i></b> required to develop the site 1.3 Identify appropriate <b><i>hardware</i></b> and software required
2. Define human computer interface	2.1 Conduct <b><i>user</i></b> analysis to determine a user profile and user needs 2.2 Determine user content and requirements 2.3 Determine appropriate <b><i>design principles</i></b> for the site 2.4 Identify appropriate <b><i>operating system</i></b>
3. Determine site hierarchy	3.1 Identify hierarchy of pages 3.2 Ensure content is logical and accessible to user 3.3 Ensure that navigation between pages is consistent and clear
4. Integrate design components	4.1 Apply appropriate information hierarchy to site design 4.2 Ensure design principles are appropriate to business and user 4.3 Ensure process flow is developed in a logical and simple manner 4.4 Test site against user needs 4.5 Complete and document the <b><i>design structure</i></b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients and staff
- literacy skills to interpret standards and requirements
- planning and organisational skills to conduct user analysis
- technical skills to:
  - conduct website analysis
  - use site design software.

### Required knowledge

- basic information architecture
- business process design
- copyright and intellectual property
- customer and business liaison
- ebusiness sites and corporate strategy
- implications of technology connectivity
- procedures for documenting technical specifications
- relevant World Wide Web Consortium (W3C) standards
- website design methods and standard website structures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify and select appropriate tools and procedures required to develop a website</li> <li>• analyse user analysis to identify site or design structure required</li> <li>• test website meets the standards required by the user profile or needs.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• analysis software</li> <li>• customer relationship model</li> <li>• ebusiness website</li> <li>• requirements documentation</li> <li>• site server</li> <li>• site server software</li> <li>• web servers</li> <li>• relevant standards and copyright information</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate selecting software and hardware types and identifying standards to meet business requirements</li> <li>• verbal or written questioning to assess candidate's knowledge of business standards</li> <li>• review of candidate's documented website design.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• external interfacing to the organisation</li> <li>• meeting customer needs</li> <li>• organisational goals</li> <li>• remote access.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• Institute of Electrical and Electronics Engineers (IEEE)</li> <li>• International Organization for Standardization (ISO)</li> <li>• web-oriented groups, like Internet Engineering Task Force (IETF) and W3C</li> <li>• Organisation for the Advancement of Structured Information Standards.</li> </ul>
<b><i>Hardware</i></b> may include:	<ul style="list-style-type: none"> <li>• modems and other connectivity devices, such as digital subscriber line (DSL) modems</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>
<b><i>User</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b><i>Design principles</i></b> may include:	<ul style="list-style-type: none"> <li>• consistency</li> <li>• ease of learning</li> <li>• familiarity</li> <li>• flexibility</li> <li>• product compatibility</li> <li>• protection</li> <li>• responsiveness</li> <li>• robustness</li> <li>• simplicity</li> <li>• task compatibility</li> <li>• user compatibility</li> <li>• workflow compatibility.</li> </ul>
<b><i>Operating system</i></b> may	<ul style="list-style-type: none"> <li>• AIX</li> <li>• DEC</li> </ul>

include:	<ul style="list-style-type: none"><li>• Digital Unix</li><li>• Linux</li><li>• Mac OS X</li><li>• Netware</li><li>• Silicon Graphics IRIX</li><li>• Sun Solaris, SunOS</li><li>• VMS</li><li>• Win 98, NT, 2000, and XP.</li></ul>
<i>Information hierarchy</i> may include:	<ul style="list-style-type: none"><li>• content structure</li><li>• locations and links to other internet resources where appropriate</li><li>• page layout</li><li>• secure access provisions</li><li>• technical specifications.</li></ul>
<i>Design structure</i> may include:	<ul style="list-style-type: none"><li>• cascading style sheet (CSS)</li><li>• XHTML.</li></ul>

# ICAWEB402A Confirm accessibility of websites for people with special needs

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure that a website is accessible to users with special needs, including people with auditory, visual, mobility, and cognitive impairments and those people who use assistive technology.

## Application of the Unit

This unit applies to frontline technical support personnel responsible for designing, building and testing websites.

Accessibility means that a website can be navigated and read by everyone, regardless of location, experience, or the type of computer technology used.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify accessibility standards	<p>1.1 Research and identify specific <i>user groups</i> with particular accessibility <i>requirements</i></p> <p>1.2 Identify general legislated and industry accessibility <i>standards</i> and requirements to understand the wider context of accessibility</p> <p>1.3 Identify <i>web development standards</i> and prioritise application</p> <p>1.4 Consolidate specific and general standards and requirements into an accessibility checklist for application to website-related work</p>
2. Test for website accessibility	<p>2.1 Select and prepare appropriate automatic <i>testing tools</i> and <i>software</i></p> <p>2.2 Run automatic testing tools and make document changes based on results</p> <p>2.3 Ensure that the text equivalent for every <i>non-text element</i> is present in the website where feasible</p> <p>2.4 Verify that information conveyed with colour is also available without colour</p> <p>2.5 Identify changes in the natural language of a document text</p> <p>2.6 Check and ensure that document can be read without style sheets</p> <p>2.7 Check and ensure that priorities identified in the analysis of web development standards are met and completed</p> <p>2.8 Test site with different user groups to ensure that the site transforms successfully and maintains accessibility</p>
3. Test pages	<p>3.1 Check and ensure that pages are not dependent on colour and can operate in a monochrome environment</p> <p>3.2 Check and ensure that pages are logical and accessible in a text-only environment</p> <p>3.3 Verify that pages operate on text-to-speech <i>browser</i></p> <p>3.4 Ensure that accessibility of website is signed off by appropriate person as meeting web-development standards</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with advocacy groups, business and government
- literacy skills to:
  - document test results
  - interpret standards
- problem-solving skills to accommodate user groups with special needs
- research skills to:
  - develop an accessibility checklist for application to website-related work
  - identify user groups with special needs
- technical skills to:
  - analyse a website
  - analyse the evaluation
  - design and implement technical tests, including accessibility tests
  - develop a website
  - evaluate tests and give feedback on the evaluation.

### Required knowledge

- access and equity legislation and principles
- Australian Computer Society Code of Ethics
- business process design
- applicability of copyright and intellectual property to website development
- customer and business liaison
- electronic commerce modelling language
- government, advocacy group and special needs group liaison
- application of privacy principles to website development, user access and user usage
- technical performance measurement
- web accessibility initiative (WAI)
- website accessibility, security and equity legislation
- website design methods and standard website structures
- website security
- workload metrics
- World Wide Web Consortium (W3C) standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• test a website for accessibility</li> <li>• demonstrate theoretical knowledge of website content creation</li> <li>• communicate and negotiate with user groups, government and industry</li> <li>• undertake website design.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• live website</li> <li>• requirements documentation</li> <li>• customer-relationship model</li> <li>• automatic-accessibility measuring tools</li> <li>• organisational requirements and relevant standards</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate designing and testing accessibility tools</li> <li>• review of candidate's accessibility checklist based on standards and requirements</li> <li>• review of candidate's design of valid accessibility tests</li> <li>• verbal or written questioning to assess candidate's knowledge of accessibility requirements and how to provide them.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>User groups</i></b> may include:	<ul style="list-style-type: none"> <li>• auditory impairment</li> <li>• cognitive impairment</li> <li>• mobility impairment</li> <li>• visual impairment.</li> </ul>
<b><i>Requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• organisational</li> <li>• project.</li> </ul>
<b><i>Web development standards</i></b> may include:	<ul style="list-style-type: none"> <li>• Authoring Tool Accessibility Guidelines (ATAG)</li> <li>• best practice vendor-specific accessibility standards</li> <li>• User Agent Accessibility Guidelines (UAAG)</li> <li>• WAI</li> <li>• Web Content Accessibility Guidelines (WCAG).</li> </ul>
<b><i>Testing tools</i></b> may include:	<ul style="list-style-type: none"> <li>• Bobby</li> <li>• General Magic's Web-On-Call</li> <li>• Lynx</li> <li>• Opera</li> <li>• PwWebSpeak.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised software</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>
<b><i>Non-text element</i></b> may include:	<ul style="list-style-type: none"> <li>• American Standard Code for Information Interchange (ASCII) art</li> <li>• animations, such as animated graphic interchange formats (GIFs)</li> <li>• applets and programmatic objects</li> <li>• audio tracks of video, and video</li> </ul>

	<ul style="list-style-type: none"><li>• frames</li><li>• graphical buttons</li><li>• image map regions</li><li>• images used as list bullets</li><li>• images, graphical representations of text (including symbols)</li><li>• scripts</li><li>• sounds (played with or without user interaction)</li><li>• spacers</li><li>• stand-alone audio files.</li></ul>
<b>Browser</b> may include:	<ul style="list-style-type: none"><li>• Galleon</li><li>• Google Chrome</li><li>• Internet Explorer</li><li>• Konqueror</li><li>• Lynx</li><li>• Mozilla Firefox</li><li>• Netscape Navigator</li><li>• Opera</li><li>• Phoenix.</li></ul>

# ICAWEB403A Transfer content to a website using commercial packages

## Modification History

Version	Comments
ICAWEB403A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to transfer content from a remote location to a web server using a range of commercial information technology (IT) products. The end objective is the successful upload of new or revised information on a website.

## Application of the Unit

This unit applies to website developers and maintainers who are responsible for updating websites.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Configure the file transfer protocol client	<p>1.1 Review and select <i>file transfer protocol (FTP) client</i> based on features and functions</p> <p>1.2 Ensure that file transfer protocol client is suitable for the technical environment</p> <p>1.3 Enter <i>client</i> details, including user ID, password and host name or ID into profile fields to create a permanent profile</p> <p>1.4 Choose settings such as auto-detect, save profile and password depending on organisational security and <i>privacy policy</i> and <i>organisational guidelines</i></p> <p>1.5 Test and verify configuration by connecting to the web hosting server</p>
2. Plan and prepare for data transfer	<p>2.1 Prepare data content and back it up on local <i>computer</i> or <i>server</i></p> <p>2.2 Identify data as compressed or uncompressed with tools available on the server to manage uploaded data</p> <p>2.3 Ensure files are in appropriate form for recognition and interaction by the <i>operating system</i></p> <p>2.4 Ensure receiving directory structure is applicable for the data to be uploaded</p>
3. Establish connection to server	<p>3.1 Log on to remote server using administrative, guest or anonymous accounts</p> <p>3.2 Proceed through security layers based on organisational guidelines</p> <p>3.3 Initiate file transfer protocol client program and locate destination directory</p>
4. Transfer data to remote server	<p>4.1 Select files to be transferred and choose mode (ASCII or binary)</p> <p>4.2 Run antivirus <i>software</i> on downloaded files</p> <p>4.3 Move, rename, copy, and delete files on the server as necessary and as permissions allow</p> <p>4.4 Store and order files according <i>requirements</i> and file extensions</p> <p>4.5 Conduct appropriate steps for downloaded files, such as translation, decompression or de-archival of the files for use</p> <p>4.6 Confirm data transfer and content functionality and</p>

	close connection
--	------------------

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients and staff
- literacy skills to interpret standards and requirements
- planning and organisational skills to conduct user analysis
- technical skills to:
  - conduct website analysis
  - connect to remote servers
  - manage directory maintenance
  - manage file transfers and backups
  - undertake website publishing.

### Required knowledge

- detailed knowledge of:
  - FTP server and client software
  - internet protocols
  - security issues, including denial of service, viruses and hackers
  - server access security procedures
  - server operating systems
  - website server architecture (e.g. Linux, Windows, Unix)
- overview knowledge of:
  - Australian Computer Society Code of Ethics
  - commonwealth Privacy Act 2000
  - copyright and intellectual property information.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• configure an FTP client</li> <li>• prepare content to be transferred</li> <li>• connect to the server</li> <li>• transfer content.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• web servers</li> <li>• ebusiness website</li> <li>• FTP client software</li> <li>• server security password and access procedures</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate using a range of commercial software packages to transfer content to a website</li> <li>• verbal or written questioning to assess candidate's knowledge of transfer protocols and associated security issues</li> <li>• review of candidate's documented website functionality.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English</p>

	<p>speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>FTP client</i></b> may include:	<ul style="list-style-type: none"> <li>• AxY FTP for Windows, Linux and Unix</li> <li>• cftp for Unix</li> <li>• Curl for Unix supports FTP, HTTP, Telnet</li> <li>• GFTP with GUI for Unix supports FTP, HTTP and SSH</li> <li>• lftp command-line FTP for Solaris, IRIX, HP-UX, Digital Unix and Linux</li> <li>• NcFTP client command-line FTP and HTTP URLs for Solaris FreeBSD, AIX and Linux</li> <li>• NFTP command-line FTP for Windows, Linux, OS/2</li> <li>• WS_FTP for MS Windows.</li> </ul>
<b><i>Client</i></b> may include to:	<ul style="list-style-type: none"> <li>• employee</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<b><i>Privacy policy</i></b> may include:	<ul style="list-style-type: none"> <li>• approved uses and disclosure of information held</li> <li>• how it is collected</li> <li>• information on the types of information held</li> <li>• purpose of holding the information.</li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>
<b><i>Computer</i></b> may include:	<ul style="list-style-type: none"> <li>• laptops</li> <li>• other devices</li> <li>• servers</li> <li>• workstations.</li> </ul>

<i>Server</i> may include:	<ul style="list-style-type: none"> <li>• application or web servers</li> <li>• BEA Weblogic servers</li> <li>• email servers</li> <li>• file and print servers</li> <li>• firewall servers</li> <li>• FTP servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• Novell Directory Services (NDS) servers</li> <li>• proxy or cache servers.</li> </ul>
<i>Operating system</i> may include:	<ul style="list-style-type: none"> <li>• Apple</li> <li>• Linux</li> <li>• Windows.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• customised software</li> <li>• in-house</li> <li>• packaged.</li> </ul>
<i>Requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>

## ICAWEB404A Maintain website performance

### Modification History

Version	Comments
ICAWEB404A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure that a website maintains performance levels during peak traffic times and full use access.

### Application of the Unit

This unit applies to information technology (IT) personnel who take responsibility for maintaining website performance.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Benchmark website performance	<p>1.1 Review <i>client</i> performance expectations from <i>specifications</i> and <i>business requirements</i></p> <p>1.2 Test administration and maintenance <i>requirements</i> against specifications and business requirements</p> <p>1.3 Establish performance benchmarks from specifications and business requirements</p> <p>1.4 Ensure performance benchmarks are tested</p> <p>1.5 Record measured performance benchmarks against specifications</p>
2. Track website performance	<p>2.1 Measure actual website performance against performance benchmarks in key areas and record outcomes</p> <p>2.2 Establish procedures and <i>policies</i> for maintaining stability of actions and processes related to the website</p> <p>2.3 Identify faults or suggest improvements to the website</p> <p>2.4 Implement improvements according to business requirements and organisational policy and procedures</p> <p>2.5 Establish automatic fault reporting procedures and processes</p> <p>2.6 Monitor and maintain website security measures</p> <p>2.7 Implement administration and maintenance schedules</p> <p>2.8 Establish preventative maintenance and administration indicators and ensure an alert <i>system</i> is enabled</p> <p>2.9 Track user activities and make changes to policies or procedures, depending on findings</p>
3. Tune performance	<p>3.1 Compare actual website performance against benchmarks over an appropriate period and make changes based on inconsistencies</p> <p>3.2 Record performance inconsistencies and incorporate learning into revised policy and procedures</p> <p>3.3 Use diagnostic and <i>software</i> tools to identify and correct website faults</p> <p>3.4 Plan and action preventative maintenance on a regular basis, to ensure continuous and consistent performance of website</p> <p>3.5 Complete and record fault correction and maintenance reports</p>

4. Initiate and monitor performance improvement	<p>4.1 Establish a mechanism for capturing client initiatives to assist in identifying maintenance or administration process performance problems</p> <p>4.2 Review security tools and procedures and conduct improvements where necessary</p> <p>4.3 Document and implement maintenance schedules</p> <p>4.4 Review maintenance and administration <b>documentation</b> according to policy and procedures, in order to identify areas for performance improvement</p> <p>4.5 Update the website on a regular basis, including information, links, multimedia links and back-end software</p> <p>4.6 Provide a timely and appropriate response to client to provide improvement or maintenance suggestions</p>
---	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients and staff
- literacy skills to interpret standards and requirements
- numeracy skills to evaluate performance statistics
- planning and organisational skills to:
  - conduct user analysis
  - implement and administer maintenance schedules
  - technical skills to conduct website analysis.

### Required knowledge

- detailed knowledge of:
  - security issues, such as denial of service, viruses and hackers
  - website server architecture (e.g. Linux, Windows, Unix)
- overview knowledge of:
  - Australian Computer Society Code of Ethics
  - business process design
  - commonwealth Privacy Act 2000
  - impact of copyright and intellectual property requirements on website performance
  - website security protocols
  - workload (web traffic) metrics.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• maintain website performance against benchmarks</li> <li>• ensure that website meets specifications</li> <li>• identify and rectify faults where performance criteria are not met</li> <li>• implement scheduled and non-scheduled maintenance</li> <li>• effectively monitor and tune website performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• web servers and websites</li> <li>• technical requirements</li> <li>• web-traffic diagnostic tools, including timing tools to gauge website response times</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Testing the website under different conditions of load is essential to understanding how it behaves from the client's perspective. Thus, testing tools should include some way of simulating traffic from numerous users.</p> <p>Operations must be according to organisational policy and procedures.</p> <p>Managing the performance of a website should be done under competent supervision where there is a clearly defined range of contexts for ensuring that ongoing demands on the site are met.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of policy and procedures related to website performance, with theoretical knowledge of security issues</li> </ul>

	<ul style="list-style-type: none"><li>• observation of candidate maintaining website performance against benchmarks</li><li>• review of supporting documentation of the candidate's ability to manage website performance.</li></ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• current system functionality</li> <li>• technical requirements</li> <li>• user problem statement.</li> </ul>
<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• inventory</li> <li>• payroll</li> <li>• supplier</li> <li>• tax requirements of the organisation.</li> </ul>
<b><i>Requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Policies</i></b> may include:	<ul style="list-style-type: none"> <li>• awareness raising policy</li> <li>• forensic procedures</li> <li>• incident response procedures</li> <li>• network intrusion detection systems</li> <li>• training.</li> </ul>
<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• hardware</li> <li>• software components that run a computer.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• customised software</li> <li>• in-house</li> <li>• packaged.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> </ul>

	<ul style="list-style-type: none"><li>• project management templates</li><li>• report writing principles</li><li>• version control.</li></ul>

## ICAWEB405A Monitor traffic and compile website traffic reports

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to monitor website traffic and compile traffic reports as specified.

### Application of the Unit

This unit applies to information technology (IT) personnel responsible for the maintenance of websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Select web traffic monitoring tools	<p>1.1 Identify and analyse available site-analysis <b>software</b> according to <b>organisational requirements</b> and website architecture</p> <p>1.2 Choose and install the most suitable site-analysis software or internet service provider, according to vendor requirements</p> <p>1.3 Identify the required report options according to organisational requirements and website architecture</p> <p>1.4 Develop a traffic monitoring program</p>
2. Monitor web traffic	<p>2.1 Specify required traffic reports according to <b>information requirements</b></p> <p>2.2 Generate required traffic reports</p> <p>2.3 Analyse reports to identify improvements to server and site performance</p> <p>2.4 Apply forecasting methodologies to predict traffic peaks</p>
3. Make recommendations for improvements	<p>3.1 Recommend changes in <b>hardware</b> and software</p> <p>3.2 Implement changes as directed</p> <p>3.3 Continue traffic monitoring program as required</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients and staff
- literacy skills to:
  - interpret standards and requirements
  - write technical reports
- numeracy skills to interpret website traffic statistics
- planning and organisational skills to develop a traffic monitoring program
- technical skills to use current:
  - webserver logfile analysis software
  - traffic tracking software
  - forecasting methodology for identifying traffic peaks.

### Required knowledge

- problems and challenges that arise related to:
  - queues and bottlenecks
  - website security issues
- overview knowledge of:
  - Australian Computer Society Code of Ethics
  - website copyright and intellectual property requirements
  - features and functionality of network device drivers
  - features and functionality of network operating systems
  - queuing systems
  - server design and functionality
  - commonwealth Privacy Act 2000
  - website architecture
  - workload metrics
- features and functionality of commercially available:
  - log file analysis software
  - traffic tracking software.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select and install site-analysis software or internet service provider (ISP)</li> <li>• generate and analyse traffic reports</li> <li>• recommend and implement changes as required.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• analysis software</li> <li>• ebusiness website</li> <li>• web server</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate monitoring website traffic</li> <li>• verbal or written questioning to assess candidate's knowledge of policy and procedures related to reporting and understanding website traffic, complex measurements and issues in the internet context</li> <li>• review of candidate's traffic report.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• customised</li> <li>• in-house</li> <li>• packaged.</li> </ul>
<b><i>Organisational requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• preventative maintenance and diagnostic policy</li> <li>• problem-solving processes</li> <li>• roles and technical responsibilities in the IT department</li> <li>• vendor and product service level support agreements</li> <li>• work environment.</li> </ul>
<b><i>Information requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• agendas</li> <li>• letters</li> <li>• memos</li> <li>• minutes</li> <li>• other business documents required by the organisation.</li> </ul>
<b><i>Hardware</i></b> may include:	<ul style="list-style-type: none"> <li>• digital subscriber line (DSL) modems</li> <li>• modems or other connectivity devices</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB406A Create website testing procedures

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and implement procedures that measure the performance of a website and compare them to the initial design specifications.

### Application of the Unit

This unit applies to frontline technical support personnel who are required to confirm the functionality of websites.

Testing involves significant judgement in planning, design, evaluation, technical or leadership and communications functions related to services, operations and processes.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Document and define performance criteria	1.1 Review performance specifications and determine benchmark criteria 1.2 Validate and document performance functions 1.3 Select measurement methodology and test on website 1.4 Validate each performance function separately 1.5 Record and document metric tools using appropriate methodology 1.6 Prepare performance benchmarks and seek agreement on criteria with the <i>client</i>
2. Validate performance measures	2.1 Develop inspection and test plans to validate performance measures throughout the performance cycle 2.2 Test performance functions and record results according to <i>technical documentation standards</i> 2.3 Compare results of performance function testing to benchmark 2.4 Redesign functions that do not meet appropriate performance benchmarks 2.5 Re-implement functions that have been redesigned in performance testing 2.6 Document benchmarks and obtain sign-off
3. Obtain sign-off	3.1 Validate and document performance standards and benchmarks 3.2 Submit methodology and function testing document and results to client for approval 3.3 Review client comments and make changes as appropriate 3.4 Obtain sign-off for website testing procedure

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business-related matters
- literacy skills to:
  - interpret feedback
  - interpret organisational guidelines
  - record results
- numeracy skills to:
  - take test measurements
  - measure statistics
  - interpret results
  - evaluate performance
- planning and organisational skills to:
  - develop procedures
  - plan, prioritise and monitor own work
- technical skills to:
  - conduct tests
  - design tests
  - evaluate tests
  - interpret design specifications.

### Required knowledge

- applicability of copyright and intellectual property to website development
- Australian Computer Society Code of Ethics
- client business domain, including client organisation structure and business functionality
- current industry-accepted hardware and software products
- desktop applications and operating systems as required organisational guidelines
- queuing systems, workload metrics and user request classes
- standard generalised markup language (SGML) and associated standards
- standard web-testing procedures and optimisation tools
- website design methods and standard website structures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify the critical functions to be tested</li> <li>• develop appropriate metrics for each function and assign benchmarked performance standards</li> <li>• test each performance function and compare against the appropriate benchmarks in order to validate site performance against technical requirements</li> <li>• document results to establish the performance benchmarks for subsequent site development.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• analysis software</li> <li>• ebusiness website</li> <li>• industry standards and organisational guidelines</li> <li>• site design and technical requirements documentation</li> <li>• site-development software and tools</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate selecting and conducting tests in adherence with operational procedures</li> <li>• review of candidate's documented procedures that measure the performance of a website</li> <li>• verbal or written questioning to assess knowledge of:             <ul style="list-style-type: none"> <li>• validation of performance standards and benchmarks</li> <li>• testing procedures</li> <li>• analysis techniques for results.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees</li> <li>• people who may have special needs.</li> </ul>
<b><i>Technical documentation standards</i></b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• naming standards</li> <li>• organisational standards</li> <li>• policy relating to sign-off, storage, distribution, revision</li> <li>• project management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>

Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to provide high-level assurance that websites can be effectively and efficiently provisioned and deployed live in a systematic manner.

### Application of the Unit

This unit applies to web designers and web developers who are involved in testing the effectiveness of websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare test	<p>1.1 Establish and document testing framework and schedule</p> <p>1.2 Determine processes and functions to be tested and assign quantitative and qualitative performance benchmarks to each process and function</p> <p>1.3 Benchmark and document page templates, style guides and expected traffic loads</p> <p>1.4 Determine and document <i>test methodology</i></p> <p>1.5 Assemble and brief the testing panel on the conduct of the test</p> <p>1.6 Develop <i>user</i> and installation manuals according to target audience understanding and needs</p>
2. Test individual pages	<p>2.1 Test pages against style guides and templates</p> <p>2.2 Test pages for consistency in structure and content</p> <p>2.3 Apply <i>automatic testing software</i></p> <p>2.4 Document page gross statistics of confirmed results of tests</p>
3. Test page relationships against business requirements	<p>3.1 Test installation and examples listed in instruction manual</p> <p>3.2 Test page navigability using a variety of <i>browsers</i></p> <p>3.3 Test ease of use and functionality against requirements</p> <p>3.4 Test <i>software</i> interface points against business and technical requirements</p> <p>3.5 Test site security and privacy against business requirements</p> <p>3.6 Test response time against business requirements</p> <p>3.7 Conduct load simulation testing using single and multiple independent browsers or automated load testing tools</p>
4. Apply and document further tests	<p>4.1 Test website's ability to handle concurrent access</p> <p>4.2 Test conformance to applicable privacy, accessibility and acceptable usage policy standards</p> <p>4.3 Apply automatic testing software</p> <p>4.4 Collect, collate and document results from sample user and data from automated test</p>
5. Evaluate test results	<p>5.1 Consolidate and compare results to benchmarks</p> <p>5.2 Identify results that fail to meet benchmarks and conduct site remedial iteration</p> <p>5.3 Record and document test results as the site performance baseline, against which further development or updating can be</p>

	measured 5.4 Provide evaluation feedback to <i>appropriate person</i> 5.5 Ensure appropriate person signs off on site prior to go live date
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with users and website developers
- literacy skills to:
  - document test results
  - document solutions according to organisational guidelines
  - interpret organisational requirements
- numeracy skills to deal with test results
- technical skills to:
  - analyse a website
  - design and implement technical tests
  - evaluate tests and give feedback on the evaluation
  - analyse the evaluation.

### Required knowledge

- client business domain
- structure, function and business organisation of client, including business-process design
- organisational policies and procedures that cover routine work processes and the use of:
  - web optimising tools
  - web monitoring tools
  - web testing procedures
- technical performance measurement
- website accessibility and equity principles
- website design methods and standard website structures
- website security
- workload metrics.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare an operational acceptance test that measures the independent and integrated structural content and technical components of the site</li> <li>• apply automatic testing software and collect, collate and document results or tests</li> <li>• evaluate and provide feedback on test results.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• web servers</li> <li>• ebusiness website</li> <li>• site server</li> <li>• site server software</li> <li>• analysis software</li> <li>• requirements documentation</li> <li>• organisational requirements</li> <li>• customer relationship model</li> <li>• website manuals and instructions</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate preparing an operational acceptance test</li> <li>• review of candidate's documented test results, particularly the quantitative results and their evaluation against predetermined benchmarks</li> <li>• verbal or written questioning to assess candidate's knowledge of requirements for high-level assurance of provisioning and deploying of websites.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Test methodology</i></b> may include:	<ul style="list-style-type: none"> <li>• background testing</li> <li>• distributed performance testing</li> <li>• error recovery methodologies</li> <li>• exhaustive testing</li> <li>• functional testing</li> <li>• random testing</li> <li>• unattended testing</li> <li>• user acceptance testing.</li> </ul>
<b><i>User</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party</li> <li>• people who may have special needs.</li> </ul>
<b><i>Automatic testing software</i></b> may include:	<ul style="list-style-type: none"> <li>• cascading style sheet (CSS) check, link testers</li> <li>• hypertext markup language (HTML) validator</li> <li>• links</li> <li>• spell check.</li> </ul>
<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Galleon</li> <li>• Internet Explorer</li> <li>• Google Chrome</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla Firefox</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Phoenix.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised</li> <li>• organisation-specific</li> <li>• packaged.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• user</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB408A Ensure basic website security

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to provide basic website server and protocol security appropriate to the level required by an organisation.

### Application of the Unit

This unit applies to web maintenance staff who are required to ensure that a website meets basic security requirements.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine business security requirements	<p>1.1 Identify level of security required based on the business and commercial intent of the website</p> <p>1.2 Identify whether password protection is needed for the site or part of the site</p> <p>1.3 Decide minimum or maximum password protection solutions based on <b>business requirements</b></p>
2. Ensure web server security	<p>2.1 Ensure that web <b>server</b> password is obscure and non-traceable</p> <p>2.2 Install and maintain an effective <b>intrusion detection system</b> according to business requirements</p> <p>2.3 Ensure that <b>user</b> accounts have only the required permissions on the server</p> <p>2.4 Ensure that interpreters' programs that run common gateway interfaces (CGIs) are not stored in the CGI-bin directory</p> <p>2.5 Ensure that web forms check data before passing it to the server</p>
3. Ensure protocol security	<p>3.1 Protect fixed internet <b>connection</b> and internet protocol (IP) address</p> <p>3.2 Protect shared <b>network</b> resources from intrusion according to business requirements</p> <p>3.3 Ensure that personal computer (PC) protocols and preferences follow <b>security protocols</b></p> <p>3.4 Disable control protocol or internet protocol (TCP/IP) bindings for file and printer sharing</p> <p>3.5 Ensure that network basic input/output system (NetBIOS) over TCP/IP is disabled</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business-related matters
- numeracy skills to:
  - take test measurements
  - interpret results
  - evaluate performance
- planning and organisational skills to plan, prioritise and monitor own work
- research skills to interrogate vendor databases and websites
- technical skills to:
  - write hypertext markup language (HTML)
  - write JavaScript and VBScript.

### Required knowledge

- client business domain, including client organisation structure and business functionality
- current industry-accepted hardware and software products
- desktop applications and operating systems as required
- firewall functionality
- hypertext transfer protocol (HTTP) daemons
- secure socket layer (SSL) protocol
- security patches
- specific purpose security computers acting as bastion hosts
- web-server operating systems.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify password protection solutions</li> <li>• install and maintain intrusion detection system</li> <li>• manage protocol security.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a basic website</li> <li>• web servers</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate installing and testing website security system</li> <li>• verbal or written questioning to determine candidate's knowledge of: <ul style="list-style-type: none"> <li>• client business requirements</li> <li>• industry website security standards</li> <li>• appropriate software and hardware to implement security on a website</li> </ul> </li> <li>• evaluation of candidate's website security documentation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Business requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Server</i></b> may include:	<ul style="list-style-type: none"> <li>• application or web servers</li> <li>• building environmental assessment (BEA) weblogic servers</li> <li>• email servers</li> <li>• file and print servers</li> <li>• firewall servers</li> <li>• file transfer protocol (FTP) servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• Novell Directory Services (NDS) servers</li> <li>• proxy or cache servers.</li> </ul>
<b><i>Intrusion detection system</i></b> may include:	<ul style="list-style-type: none"> <li>• Cisco</li> <li>• HP</li> <li>• Symantec</li> <li>• Tripwire.</li> </ul>
<b><i>User</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b><i>Connection</i></b> may include:	<ul style="list-style-type: none"> <li>• asymmetric digital subscriber line (ADSL)</li> <li>• cable</li> <li>• fixed line.</li> </ul>
<b><i>Network</i></b> may include:	<ul style="list-style-type: none"> <li>• data</li> <li>• internet</li> <li>• large and small local area networks (LANs)</li> <li>• national wide area networks (WANs)</li> <li>• private lines</li> <li>• use of the public switched telephone network (PSTN) for dial-up modems only</li> <li>• voice.</li> </ul>
<b><i>Security protocols</i></b> may	<ul style="list-style-type: none"> <li>• data over cable service interface specification</li> </ul>

include:	<ul style="list-style-type: none"><li>• domain name system security extensions</li><li>• IEEE 802.11 Protocol standard for secure wireless local area network products</li><li>• internet protocol security (IPSec)</li><li>• point-to-point network tunnelling protocol (PPTP)/Layer 2 tunnelling protocol (L2TP)</li><li>• secure electronic transactions</li><li>• secure multipurpose internet mail extensions</li><li>• secure shell</li><li>• SSL and transport layer security.</li></ul>

## Unit Sector(s)

Web

## ICAWEB409A Develop cascading style sheets

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop cascading style sheets (CSS) that are attached to a markup language document in order to externally define and control styles to enhance and achieve commonality between web documents.

### Application of the Unit

This unit applies to web designers and web developers who are involved in the layout and appearance of web pages.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Format, style and lay out the elements on a web page	1.1 Obtain user requirements 1.2 Style elements of a web page using a CSS 1.3 Apply CSS style sheets to multiple pages in a website 1.4 Position document elements using CSS
2. Test and validate web pages	2.1 Test website in various <i>browsers</i> 2.2 Validate the CSS against <i>industry standards</i> 2.3 Report result of tests to <i>appropriate person</i>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify appropriate CSS rules to be applied to obtain desired result
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
- numeracy skills to work with:
  - document element dimensions
  - relative and absolute measurements
- planning and organisational skills to:
  - create the CSS in allocated timeframe
  - plan the layout of the web page
- problem-solving skills to:
  - create web pages that function in a variety of screen resolutions
  - resolve browser incompatibilities
- research and literacy skills to keep up-to-date with latest industry guidelines
- technical skills to:
  - produce valid accessible web pages
  - use CSS in the most efficient and effective way.

### Required knowledge

- overview knowledge of standard web and CSS design principles
- detailed knowledge of:
  - hypertext transfer protocol (HTTP)
  - markup language (HTML, XHTML)
  - web standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop a website styled and formatted using CSS to user requirements</li> <li>• lay out page elements using CSS</li> <li>• test web pages in a variety of browsers</li> <li>• validate the CSS against industry standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a computer</li> <li>• aesthetic presentation brief</li> <li>• variety of browsers</li> <li>• HTML documents to have CSS applied to them</li> <li>• internet access to validate the CSS against the World Wide Web Consortium (W3C)</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of CSS rules and how they affect the document styling and layout</li> <li>• evaluation of candidate's created and modified web pages styled using CSS.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Google Chrome</li> <li>• Firefox</li> <li>• Safari</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera.</li> </ul>
<b><i>Industry standards</i></b> may include:	<ul style="list-style-type: none"> <li>• W3C</li> <li>• Web 2.0.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• client</li> <li>• manager</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

Web

# ICAWEB410A Apply web authoring tool to convert client data for websites

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use web development software to create website content. The unit is designed to use a web authoring tool to convert text and images to appropriate web protocols.

## Application of the Unit

This unit applies web developers who are responsible for developing websites using client data.

Using web authoring to convert data is an appropriate method for rapid data translation and prevents the need for a rewrite.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Create files	<p>1.1 Create files and save in correct location and directory</p> <p>1.2 Insert and format text content according to <i>business requirements</i></p> <p>1.3 Insert and optimise <i>images</i> as required</p>
2. Create formatting templates	<p>2.1 Create basic external cascading style sheets (CSS)</p> <p>2.2 Define styles for the required tags according to business requirements</p> <p>2.3 Link CSS to the files and display formatting</p>
3. Define library items	<p>3.1 Identify items that recur on several pages and include in library</p> <p>3.2 Format selected items according to CSS definition</p> <p>3.3 Check tags of selected items</p> <p>3.4 Create and clearly name selected library items</p> <p>3.5 Update items contained in library according to business requirements</p>
4. Develop templates	<p>4.1 Create and save file as template and link with CSS</p> <p>4.2 Format template and create and name editable regions</p> <p>4.3 Place generic image icons in page as required by business image</p> <p>4.4 Save and modify templates</p>
5. Identify authoring requirements	<p>5.1 Select preferred web authoring tool, according to business requirements</p> <p>5.2 Set preferences for web authoring tool, including site <i>file transfer protocol (FTP) client</i></p> <p>5.3 Customise and navigate the web author tool environment or workspace to meet individual <i>requirements</i></p> <p>5.4 Select buttons and tools, both opened and closed, to access full range of features</p> <p>5.5 Define and name site and root folder</p>
6. Create simple forms	<p>6.1 Add form elements to page</p> <p>6.2 Set form element properties for each form element</p> <p>6.3 Insert additional fields as required for processing form</p> <p>6.4 Identify availability and location of common gateway</p>

	<p>interface (CGI) script</p> <p>6.5 Connect form to a script in a <i>server</i> CGI bin</p> <p>6.6 Test form to ensure no errors</p>
7. Create simple navigation	<p>7.1 Create site map to plan navigation</p> <p>7.2 Create links between pages to reflect content structure using both text and images</p> <p>7.3 Check links in multiple <i>browsers</i> for errors</p> <p>7.4 Check website content across a number of different browsers and browser versions to ensure consistency of presentation, performance and accessibility</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse business requirements
- communication skills to:
  - communicate with clients
  - convey and clarify complex information
  - seek assistance and expert advice
- literacy skills to interpret technical documentation, equipment manuals and authoring specifications
- planning and organisational skills to prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - analyse and interpret technical aspects of implementation
  - design simple forms
  - operate software applications
  - select appropriate authoring tools to meet required specifications
  - write and maintain HTML.

### Required knowledge

- Australian Computer Society Code of Ethics
- Authoring Tool Accessibility Guidelines
- standard generalised markup language (SGML) and the associated standards
- standard web and CSS design principles
- website design methods and standard website structures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop web content using authoring tools to meet specifications</li> <li>• use authoring tools to create cross-browser web documents</li> <li>• create forms</li> <li>• create navigation tools.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where web content may be developed using a web authoring tool</li> <li>• site authoring software and tools currently used in industry</li> <li>• business expectations brief</li> <li>• appropriate standards and current legislation</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of web authoring tools</li> <li>• direct observation of candidate using authoring tool to convert client data for website</li> <li>• review of website developed by candidate following business requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.

## Unit Sector(s)

Web

# ICAWEB411A Produce basic client-side script for dynamic web pages

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce a number of client-side scripts for dynamic web pages, using a range of features from different appropriate languages.

## Application of the Unit

This unit applies to those working in web development who are required to produce client-side scripts as a common means of creating interactive websites. These scripts offer an effective simple means of enabling websites to provide greater interaction with clients.

Client side scripting may be used for purposes, such as form validation, but only in areas where they would affect only the document in question and no outside objects.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse requirements for web documents	1.1 Determine necessary dynamic functionality of the <b>web document</b> 1.2 Determine appropriate <b>language</b> to achieve that functionality 1.3 Determine web document requirements
2. Design and produce web documents	2.1 Design web document and embedded scripts to achieve required functionality 2.2 Write simple hypertext markup language (HTML) considering <b>accessibility</b> 2.3 Write embedded scripts
3. Test scripts and debug	3.1 Test web document against required functionality, and reiterate until correct 3.2 Complete <b>documentation</b> and submit to <b>appropriate person</b> for approval

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine the necessary dynamic functionality of the web document
- communication skills to liaise with end user
- problem-solving skills to review design and functionality conflicts
- technical skills to:
  - debug and handle errors
  - use a PC and a range of software packages
  - use internet protocols
  - view the active elements or objects across different platforms.

### Required knowledge

- basic knowledge of open platforms
- detailed knowledge of:
  - client-side scripting
  - events and event handlers
  - internet operation related to servers and clients
  - internet protocols incorporating some theoretical concepts
  - security restrictions on servers, incorporating some theoretical concepts
  - server-side and client-side concepts, incorporating standard generalised markup language (SGML) and associated standards types of function, particularly when creating scripts to implement functions.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce basic client server-side scripts for dynamic web pages</li> <li>• confirm successful viewing of the active elements or objects across different platforms.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements</li> <li>• functionality and scope requirements</li> <li>• security policy</li> <li>• web server</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's:             <ul style="list-style-type: none"> <li>• client-side script code</li> <li>• subsequent results</li> <li>• performance of real or simulated work</li> </ul> </li> <li>• observation of candidate's website using client-side scripts</li> <li>• verbal or written questioning to determine candidate's knowledge of scripting, including client-side versus server-side scripting.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Web document</b> may include:	<ul style="list-style-type: none"> <li>• previously created and new HTML documents</li> <li>• saved email files with or without attachments</li> <li>• saved HTML documents.</li> </ul>
<b>Language</b> may include:	<ul style="list-style-type: none"> <li>• ActiveX</li> <li>• dynamic hypertext markup language (DHTML)</li> <li>• JavaScript</li> <li>• VBScript.</li> </ul>
<b>Accessibility</b> may relate to:	<ul style="list-style-type: none"> <li>• cultural awareness</li> <li>• ethnicity</li> <li>• intellectual impairments and remote locations</li> <li>• physical.</li> </ul>
<b>Documentation</b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing protocols</li> <li>• version control.</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB412A Produce interactive web animation

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create advertisements, animated enhancements and animation for web pages.

### Application of the Unit

This unit applies to web designers responsible for creating and implementing animated advertisements for website clients, creating animations to enhance a web page message, and visually creating fully animated websites.

Interactive web animation is a powerful visual tool that enables web designers to be creative in designing an enriched experience for website users. Websites are enhanced through the creation of a fully interactive website.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse project requirements	<p>1.1 Determine the necessary dynamic functionality of the animation to be included inside web document</p> <p>1.2 Determine the appropriate language to achieve that functionality</p> <p>1.3 Determine web document requirements</p> <p>1.4 Research and evaluate current requirements for online advertising with major agencies and websites</p>
2. Design web animations	<p>2.1 Design <i>web document</i> and <i>animations</i> to enhance the page</p> <p>2.2 Design <i>advertisements</i> to promote the web page within a website</p> <p>2.3 Design advertisements to promote the web page on externally hosted paid advertising</p> <p>2.4 Design advertisements that meet current website advertising specifications for size, number or loops, sound and buttons</p> <p>2.5 Design and create gif replacements for animation as per major advertising agency requirements</p> <p>2.6 Design animations for a website that will add to the overall professionalism or entertainment value of a website</p>
3. Produce animations	<p>3.1 Produce web animations for web pages</p> <p>3.2 Produce web animations for external advertising</p> <p>3.3 Produce web animations for internal website advertising</p> <p>3.4 Produce web animations for a website that enhance the overall professionalism or entertainment value of the website</p> <p>3.5 Test and debug scripts against required functionality and reiterate until correct</p>
4. Publish animations	<p>4.1 Publish animations in acceptable web format</p> <p>4.2 Incorporate web animations into a hypertext markup language (HTML) page</p> <p>4.3 Complete documentation and submit to <i>appropriate person</i> for approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify appropriate design elements to match requirements
- communication skills to:
  - create a user-friendly animation
  - create an animation that markets the message effectively
  - liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - create effective marketing dialogue within the animation
  - follow naming conventions
  - interpret workplace instructions and other technical documents
- planning and organisational skills to determine the most appropriate solution
- problem-solving skills to:
  - determine best coding level to maximise the number of possible browser viewing
  - identify and rectify animation functional problems
  - identify and resolve bugs in the code created
  - identify and resolve error messages
  - select the most efficient and effective algorithms
- research skills to:
  - find the best-fit solution to client requirements
  - find solutions to encountered problems
- learning skills to research encountered problems independently
- technical skills to:
  - apply web programming concepts
  - create HTML and eXtensible hypertext markup language (XHTML) pages with embedded animation
  - create animations that are aesthetically pleasing to look at, interesting, entertaining and interactive.

### Required knowledge

- web animation programming concepts, including:
  - acceptable formats for importing assets
  - component libraries
  - cross-browser issues
  - importing, exporting libraries

- inserting the published work to an HTML or XHTML page
- internet-animation player statistics
- masking
- movements and automated movements
- publishing the finished work to an acceptable web format
- shape animation and manipulation
- symbols
- text manipulation
- transparencies
- programming control structures, object-oriented programming, including:
  - buttons
  - scripting to go to uniform resource locators (URLs)
  - scripting to jump to different parts of the animation
  - scripting using the programming language
- internet technology to choose the right scripting type to reach a maximum determined audience
- principles of analysis of web parameters and design of suitable animations.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>design and create interactive animation for advertising, following current industry standards</li> <li>design and create interactive animation to enhance the professionalism or entertainment value of a website.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>development environment</li> <li>internet access</li> <li>browsers</li> <li>appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>verbal or written questioning to determine candidate's knowledge regarding: <ul style="list-style-type: none"> <li>animation techniques</li> <li>terminology</li> <li>methods</li> </ul> </li> <li>evaluation of the effectiveness of a candidate's design and creativeness of the animation in advertisements and website enhancements</li> <li>review of the candidate's research report of web technology trends, explaining the methods and attributes used and how the animation created enhances the website and entices buyers to click on advertisements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Web document</i></b> may include:	<ul style="list-style-type: none"> <li>• previously created and new HTML documents</li> <li>• saved HTML documents.</li> </ul>
<b><i>Animations</i></b> may include:	<ul style="list-style-type: none"> <li>• ActionScript</li> <li>• Silverlight.</li> </ul>
<b><i>Advertisements</i></b> may include:	<ul style="list-style-type: none"> <li>• external advertisements promoting a website on another website</li> <li>• internal advertisements promoting products or subjects within a website.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• advertising agency</li> <li>• client.</li> </ul>

## ICAWEB413A Optimise search engines

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement search engine optimisation (SEO) techniques.

### Application of the Unit

This unit applies to web designers who are responsible for:

- creating and implementing good internet-marketing practices
- optimising pages for search engine optimisation
- introducing web pages to search engines
- monitoring search engine performance
- making recommendations for keyword enhancements
- making recommendations for search engine marketing (SEM)
- making recommendations for social network marketing (SNM).

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Analyse internet-marketing requirements</p>	<p>1.1 Determine main business of the website and <b>keywords</b> currently used on each page</p> <p>1.2 Create keyword suggestion list for the website using online tools</p> <p>1.3 Analyse best keywords for macro and sub keywords</p> <p>1.4 Create recommendations for improved optimisation for image <b>search optimisation</b> (ISO), keyword density on web pages, keywords used in headings and heading levels and <b>meta-elements</b> and page tiles</p> <p>1.5 Analyse pages and recommend sections for content</p> <p>1.6 Analyse current website position in <b>organic listings</b></p> <p>1.7 Analyse current success of online advertising</p> <p>1.8 Analyse current <b>traffic analysis reports</b> using online tools and web-hosting statistics</p> <p>1.9 Analyse current success of <b>social network marketing</b> content</p>
<p>2. Prepare an internet marketing strategy report</p>	<p>2.1 Use detail from analysis to prepare a recommendation report for the client, covering the differences between <b>search engine optimisation, search engine marketing</b> and social network marketing</p> <p>2.2 Make recommendations about search engines and social network media to target, based on volume of users</p> <p>2.3 Make recommendations on a timeframe for expecting improved <b>search engine</b> results</p> <p>2.4 Explain <b>search terms</b></p> <p>2.5 Make recommendations for the implementation of search engine optimisation and search engine marketing, including a summary of recommendations on methods to improve search engine rankings, both organic and <b>pay per click</b> (PPC)</p>
<p>3. Implement SEO strategy</p>	<p>3.1 Implement macro and sub keywords on pages</p> <p>3.2 Implement <b>keywords</b></p> <p>3.3 Implement sections for content and back links from quality websites</p> <p>3.4 Create online profiles for updating search engine data</p> <p>3.5 Introduce website to major search engines</p>
<p>4. Review SEO</p>	<p>4.1 Determine current website position in organic listings</p> <p>4.2 Review current success of online advertising with regard to</p>

	website position 4.3 Evaluate current traffic analysis reports and compare to previous results
5. Prepare a client SEO result report	5.1 Analyse website statistics for <i>site reports and listings</i> 5.2 Compare current statistics with previous site reports and listings 5.3 Summarise findings and make further recommendations

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to assess current SEO against required results
- communication skills to:
  - create well-structured SEO client reports
  - make recommendations on SEO based on well-founded research
  - understand the client requirements
- literacy skills to:
  - select appropriate keywords
  - understand the underpinning concepts
  - use keywords in a meaningful and structured way related to content
- planning and organisational skills to:
  - analyse current SEO status and make recommendations
  - create a post project analysis report
  - implement an SEO strategy
- problem-solving skills to understand the SEO need
- learning skills to research and deploy current methods of SEO
- technical skills to:
  - integrate SEO into web documents
  - use social network media to advantage.

### Required knowledge

- internet-marketing concepts, including:
  - search terms
  - keywords
  - keyword density
  - search engine ranking
  - search engine methods of assessing SEO
  - back links
  - social network media in context of SEO.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• successfully optimise pages for search engine optimisation</li> <li>• introduce web pages to search engines</li> <li>• monitor search engine performance</li> <li>• make recommendations for:             <ul style="list-style-type: none"> <li>• keyword enhancements</li> <li>• SEM</li> <li>• social network marketing.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• website files</li> <li>• file transfer protocol (FTP)</li> <li>• internet access</li> <li>• profiling tools</li> <li>• social network marketing logins</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning regarding internet marketing methods</li> <li>• review of report of internet marketing methods and best practices</li> <li>• analysis of enhancement of internet marketing to a current website.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Keywords</b> may relate to:	<ul style="list-style-type: none"> <li>• technique used to populate a web page with words used by internet users in search engine search terms</li> <li>• use of keywords: <ul style="list-style-type: none"> <li>• keyword density</li> <li>• macro keywords</li> <li>• sub keywords.</li> </ul> </li> </ul>
<b>Image search optimisation</b> may include:	<ul style="list-style-type: none"> <li>• alt attribute</li> <li>• image accessibility</li> <li>• image naming</li> <li>• image quality</li> <li>• text around the image.</li> </ul>
<b>Meta-elements:</b>	<ul style="list-style-type: none"> <li>• are HTML and XHTML elements used to provide structured metadata about a web page</li> <li>• may include: <ul style="list-style-type: none"> <li>• keywords</li> <li>• language</li> <li>• page title</li> <li>• robots attribute.</li> </ul> </li> </ul>
<b>Organic listings</b> may include:	<ul style="list-style-type: none"> <li>• listings in search engines that are not paid for.</li> </ul>
<b>Traffic analysis reports</b> may include:	<ul style="list-style-type: none"> <li>• Google Analytics</li> <li>• Google Webmaster Tools</li> <li>• traffic statistics found in web server log files.</li> </ul>
<b>Social network marketing</b> may include:	<ul style="list-style-type: none"> <li>• blogs</li> <li>• deviantArt</li> <li>• Facebook</li> <li>• Flickr</li> <li>• LinkedIn</li> <li>• MySpace</li> <li>• Twitter</li> <li>• wikis</li> <li>• YouTube.</li> </ul>

<b><i>Search engine optimisation</i></b> may include:	<ul style="list-style-type: none"> <li>preparing a website so it lists effectively in organic search engine listings.</li> </ul>
<b><i>Search engine marketing</i></b> may relate to:	<ul style="list-style-type: none"> <li>broader search engine marketing activities: <ul style="list-style-type: none"> <li>paid advertising</li> <li>paid inclusion</li> <li>paid placement of: <ul style="list-style-type: none"> <li>banner ads</li> <li>paid directory listings</li> <li>sponsored links.</li> </ul> </li> </ul> </li> </ul>
<b><i>Search engine</i></b> may include:	<ul style="list-style-type: none"> <li>Bing</li> <li>Google</li> <li>Open Directory Project (ODP)</li> <li>Yahoo.</li> </ul>
<b><i>Search terms</i></b> may include:	<ul style="list-style-type: none"> <li>difference between a macro search and a sub search</li> <li>how the major search engines rank web pages</li> <li>website current position in search engine rankings</li> </ul> <p>benefit of using online tools to create profiles, such as Google Analytics, Google Webmaster Tools and WebStats for updating search engine data</p> <ul style="list-style-type: none"> <li>use of quality back links.</li> </ul>
<b><i>Pay per click (PPC)</i></b> may include:	<ul style="list-style-type: none"> <li>paying the host when ad is clicked</li> <li>bidding for keywords.</li> </ul>
<b><i>Keywords</i></b> may include:	<ul style="list-style-type: none"> <li>alt tags</li> <li>web pages</li> <li>headings and heading levels</li> <li>metadata and page tiles</li> <li>section the content and implement section headings as per current HTML specification.</li> </ul>
<b><i>Site reports and listings</i></b> may include:	<ul style="list-style-type: none"> <li>advertising report</li> <li>social network media access report</li> <li>traffic analysis reports</li> <li>website position in organic listings.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB414A Design simple web page layouts

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and create simple web page layouts.

### Application of the Unit

This unit applies to web designers and web developers who are involved in the layout and appearance of web pages.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify main layout sections from design specification	1.1 Identify required sections of the web page 1.2 Create web page structure
2. Lay out web page to match design specification	2.1 Position document elements 2.2 Style web page elements to match design specifications
3. Test and validate layout	3.1 Test website in various <b><i>browsers</i></b> 3.2 Validate web pages against <b><i>industry standards</i></b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify appropriate cascading style sheets (CSS) rules to be applied to obtain desired result
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
- numeracy skills to work with:
  - document element dimensions
  - relative and absolute measurements
- planning and organisational skills to:
  - create the web pages in allocated timeframe
  - plan the layout of the web page
- problem-solving skills to:
  - create web pages to function in a variety of screen resolutions
  - resolve browser incompatibilities
- research, literacy and learning skills to keep up-to-date with latest industry guidelines
- technical skills to:
  - produce valid accessible web pages
  - use CSS in the most efficient and effective way.

### Required knowledge

- standard web and web scripting design principles
- detailed knowledge of:
  - CSS
  - hypertext transfer protocol (HTTP)
  - markup language, such as hypertext markup language (HTML) or eXtensible hypertext markup language (XHTML)
  - World Wide Web Consortium (W3C) standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop a website according to design specifications</li> <li>• lay out page elements</li> <li>• test web pages in a variety of browsers</li> <li>• validate the web pages against industry standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer</li> <li>• aesthetic presentation brief</li> <li>• variety of browsers</li> <li>• internet access to validate against the W3C</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a newly created or modified website</li> <li>• verbal or written questioning to assess candidate's knowledge of design principles for web pages.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Safari.</li> </ul>
<b><i>Industry standards</i></b> may include:	<ul style="list-style-type: none"> <li>• W3C</li> <li>• Web 2.0.</li> </ul>

# ICAWEB415A Produce server-side script for dynamic web pages

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit defines the outcomes, skills and knowledge required to produce server-side scripts for dynamic web pages, using a range of relevant features from different appropriate languages.

## Application of the Unit

This unit applies to web designers who are responsible for implementing dynamic web pages using server-side scripting.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement, but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse requirements for web documents requiring server-side dynamic interaction	1.1 Determine necessary dynamic functionality of the <b>web document</b> 1.2 Determine appropriate <b>language</b> to achieve that functionality 1.3 Determine web document requirements
2. Design server-side scripts	2.1 Design web document and server-side code to interact with an <b>external data source</b> 2.2 Design web document and server-side code to allow an administrator to insert, update and delete entries to the external data source 2.3 Implement security features in the web document
3. Produce web documents	3.1 Write eXtensible hypertext markup language (XHTML) considering accessibility 3.2 Write server-side scripts to current XHTML standards
4. Test scripts and debug	4.1 Test web document against required functionality and reiterate until correct 4.2 Complete <b>documentation</b> and submit to <b>appropriate person</b> for approval
5. Set up security	5.1 Determine necessary permissions to prevent error messages displaying to the public 5.2 Configure server software to minimise potential database attacks

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify dynamic server-side requirements
- communication skills to:
  - create a user-friendly web page
  - liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- learning skills to research encountered problems independently
- literacy skills to:
  - follow documented instruction from a supplied guide
  - follow server-side naming conventions
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- planning and organisational skills to determine the most appropriate solution
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the code created
  - identify and resolve error messages
  - select the most efficient and effective algorithms
- research skills to find:
  - best-fit solution to client requirements
  - solutions to encountered problems
- technical skills to:
  - apply web-programming concepts
  - create hypertext markup language (HTML) and XHTML pages
  - create software in a variety of server-side languages
  - create web pages that are aesthetically pleasing, logically laid out and user-friendly.

### Required knowledge

- server-side technologies and relevant web scripting languages
- server-side web analysis and design parameters
- programming control structures, object-oriented programming
- web-programming concepts:
  - hypertext transfer protocol (HTTP)
  - stateless programming
  - session management

- authentication and web security.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create dynamic web pages from a client requirement using server-side scripting to retrieve information from a web-hosted database</li> <li>• create scripts for the quick upload of data to web-hosted databases</li> <li>• create server-side scripts for inserting, updating and deleting data from a web server database</li> <li>• create server-side scripts to encode passwords</li> <li>• create server-side scripts to upload and retrieve images</li> <li>• create server-side scripts to manage sessions and secure login.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements</li> <li>• functionality and scope requirements</li> <li>• security policy</li> <li>• database server</li> <li>• internet and server access</li> <li>• software development environment</li> <li>• web browsers</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning of candidate regarding server-side scripts</li> <li>• evaluation of a web application using a project-based scenario to demonstrate level of competency.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Web document</b> may include:	<ul style="list-style-type: none"> <li>• previously created and new HTML documents; saved email files with or without attachments</li> <li>• saved HTML documents.</li> </ul>
<b>Language</b> may include:	<ul style="list-style-type: none"> <li>• active server pages (ASP)</li> <li>• .NET</li> <li>• Perl hypertext preprocessor (PHP)</li> <li>• Ruby On Rails.</li> </ul>
<b>External data source</b> may include:	<ul style="list-style-type: none"> <li>• Microsoft Structured Query Language (MS SQL) database</li> <li>• MySQL database</li> <li>• Oracle database</li> <li>• Postgre database</li> <li>• eXtensible markup language (XML).</li> </ul>
<b>Documentation</b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project-management templates</li> <li>• report-writing protocols</li> <li>• version control.</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## ICAWEB416A Customise content management system

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create a website powered by a content management system using an open-source solution.

### Application of the Unit

This unit applies to web developers who are responsible for integrating a website into an open-source content management system.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse specifications and requirements	1.1 Determine required functionality of the website 1.2 Determine appropriate <i>server-side language</i> that will be used to produce website 1.3 Determine content structure and navigation of the website 1.4 Determine pre-existing restraints that need to be considered when developing website solution
2. Research requirements	2.1 Research appropriate solutions, based on the website requirements, including programming language, <i>content management system, licensing structure and hosting structure</i> 2.2 Research techniques, plug-ins and additions to the existing content management system to allow solution to fulfil the needs determined while analysing website requirements
3. Create content-management system powered website	3.1 Install and configure chosen content management system 3.2 Insert and manage website content 3.3 Install and implement appropriate techniques and plug-ins
4. Validate and evaluate final website	4.1 Validate final website markup against current website standards 4.2 Validate content management system performance in different <i>browsers</i> , checking compatibility and core content management system functionality

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine uses, audience and document structure and requirements
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide and online documentation
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- problem-solving skills to use server-side and markup languages to troubleshoot problems and client requirements
- technical skills to:
  - configure or manipulate a website hosting environment
  - use a markup language to create the required web page
  - use a server-side programming language.

### Required knowledge

- markup language and associated standards
- server-side language and security techniques
- web accessibility.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create a content management system powered website using an open-source solution that allows an end user without training in a markup language to make modifications to the website's content.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements and content</li> <li>• text editor</li> <li>• range of browsers</li> <li>• internet for research and code validation</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of content management system (front and backend) in commonly used browsers to perform basic content manipulation tasks</li> <li>• evaluation of candidate's ability to fulfil client requirements using techniques, plug-ins and additional resources</li> <li>• validation of front-end code markup correctness against standards set by the World Wide Web Consortium (W3C).</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Server-side language</i></b> may include:	<ul style="list-style-type: none"> <li>• ASP.NET</li> <li>• Java</li> <li>• Perl hypertext preprocessor (PHP)</li> <li>• Ruby on Rails.</li> </ul>
<b><i>Content management system</i></b> may include:	<ul style="list-style-type: none"> <li>• Drupal</li> <li>• Expression Engine</li> <li>• Joomla</li> <li>• Mambo</li> <li>• Open CMS</li> <li>• PHP Nuke</li> <li>• Radiant CMS</li> <li>• Silverstripe</li> <li>• Typo</li> <li>• Wordpress.</li> </ul>
<b><i>Licensing structure</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• open source.</li> </ul>
<b><i>Hosting structure</i></b> may include:	<ul style="list-style-type: none"> <li>• downloads or self-installed</li> <li>• hosted solution.</li> </ul>
<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Opera</li> <li>• Safari.</li> </ul>

## ICAWEB417A Integrate social web technologies

### Modification History

Version	Comments
ICAWEB417A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to successfully develop and implement social networking in websites.

### Application of the Unit

This unit applies to web developers who are responsible for integrating social networking websites into new or pre-existing websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse specifications and requirements	1.1 Evaluate different popular <b><i>social networking websites</i></b> 1.2 Discuss benefits of social networking in websites 1.3 Discuss negative aspects of social networking 1.4 Define goals based on client requirements for a successful social networking integration
2. Develop code and documentation	2.1 Develop guidelines for implementing social networking in a website 2.2 Develop code to integrate a social networking website into a pre-existing website 2.3 Use pre-existing scripts and tools to integrate a social networking website into a pre-existing website
3. Validate integration	3.1 Validate social networking <b><i>integration</i></b> 3.2 Validate social networking integration performance in different <b><i>browsers</i></b> , checking compatibility and display

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine uses, audience and document structure and requirements
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide and online documentation
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- technical skills to develop social networking integration code.

### Required knowledge

- detailed knowledge of markup language and associated standards
- basic knowledge of server-side language.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select an appropriate social networking tool</li> <li>• integrate tool into an existing website.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements</li> <li>• text editor</li> <li>• range of browsers</li> <li>• internet for research</li> <li>• validation of code</li> <li>• API documentation</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of documentation of the advantages and disadvantages of social networking</li> <li>• evaluation of: <ul style="list-style-type: none"> <li>• candidate's integration of a social networking website into a pre-existing website</li> <li>• candidate's additional content management functionality against current programming and security standards</li> </ul> </li> <li>• validation of frontend code markup correctness against standards set by the World Wide Web Consortium (W3C).</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## ICAWEB418A Use development software and IT tools to build a basic website

### Modification History

Version	Comments
ICAWEB418A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to build a basic website that is consistent with design and technical requirements, and business expectations.

### Application of the Unit

This unit applies to web developers responsible for building websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Select and analyse website structure and development tools</p>	<p>1.1 Analyse business <i>specification</i> and select appropriate <i>software</i></p> <p>1.2 Identify technical needs for the website and select appropriate <i>software tools</i></p> <p>1.3 Identify site structure and navigation flow and demonstrate understanding of functionality</p> <p>1.4 Review design <i>documentation</i> and integrate design work with site structure and navigation, according to <i>web development standards</i></p>
<p>2. Begin site construction</p>	<p>2.1 Take action to ensure <i>user</i> input during website construction</p> <p>2.2 Validate existing information and basic content when incorporating data on website</p> <p>2.3 Apply consistent design specifications to all aspects of the website</p> <p>2.4 Gather feedback from user on web design, content, accessibility and structure, using appropriate feedback mechanism</p>
<p>3. Complete and validate website construction and content</p>	<p>3.1 Undertake an evaluation of the website against technical requirements and design specification</p> <p>3.2 Test each function and process of the website</p> <p>3.3 Conduct navigation tests and hypertext markup language (HTML) compliance with website standards</p> <p>3.4 Stress test the website to meet design criteria and user load</p> <p>3.5 Record testing results to ensure website meets user requirements</p> <p>3.6 Obtain sign-off and approval of user</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse business specification and select appropriate software
  - debug and handle errors
  - troubleshoot basic web links and HTML code errors
- communication skills to liaise with user
- literacy skills to review design documentation and record testing results
- technical skills to:
  - debug and handle errors
  - develop code in HTML
  - identify technical needs and site structure for the website
  - read design specifications and guidelines
  - use appropriate development software and tools.

### Required knowledge

- basic knowledge of:
  - design principles
  - issues around accessibility and equity principles when building for diverse users
- detailed knowledge of:
  - appropriate software and tools that meet required technical specifications
  - standard generalised markup language (SGML) and the associated standards
  - website design
  - web-specific technical attributes.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• build a basic website to website specifications</li> <li>• undertake and audit against the business requirements and design needs prior to task completion and sign-off.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• basic website specifications and guidelines</li> <li>• website development software and tools</li> <li>• internet server</li> <li>• organisational and industry standards</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of website design and web-specific technical attributes</li> <li>• evaluation of candidate's:             <ul style="list-style-type: none"> <li>• code generation and the code results</li> <li>• completed website</li> </ul> </li> <li>• direct observation of candidate creating website</li> <li>• review of candidate's created website and its fulfilment of requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Specification</i></b> may include:	<ul style="list-style-type: none"> <li>• current system functionality</li> <li>• technical requirements</li> <li>• user problem statement.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• Bluefish</li> <li>• commercial software applications</li> <li>• Dreamweaver</li> <li>• Fireworks</li> <li>• Golive</li> <li>• NetObjects Fusion</li> <li>• Notepad</li> <li>• text editors, such as Word pad.</li> </ul>
<b><i>Software tools</i></b> may include:	<ul style="list-style-type: none"> <li>• FrontPage</li> <li>• FTP programs</li> <li>• HotDog</li> <li>• Macromedia.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing protocols</li> <li>• version control.</li> </ul>
<b><i>Web development standards</i></b> may include:	<ul style="list-style-type: none"> <li>• Authoring Tool Accessibility Guidelines (ATAG)</li> <li>• Web Content Accessibility Guidelines (WCAG).</li> </ul>
<b><i>User</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>

# ICAWEB419A Develop guidelines for uploading information to a website

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to support the effective operation of a website by establishing content upload guidelines and procedures in the context of site policies.

## Application of the Unit

This unit applies to individuals working in the web area who are required to ensure that a website remains operational.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop site policies	<p>1.1 Develop and disseminate policies on acceptable usage, security, privacy and copyright issues based on technical security and privacy <i>requirements</i></p> <p>1.2 Develop and disseminate roles and responsibilities for updating and loading <i>content</i> and removing redundant information</p> <p>1.3 Document and disseminate information about the nature of content able to be updated and loaded</p> <p>1.4 Establish upload <i>documentation</i> and disseminate the processes and procedures for update, loading or removal of content on the site</p> <p>1.5 Implement automatic and routine updating and archiving procedures</p>
2. Establish updating and loading procedures	<p>2.1 Allocate and make available to contributors directory space to update and load new site content</p> <p>2.2 Identify and make available for use authoring guides and resources based on cascading style sheets (CSS) and business style guides</p> <p>2.3 Develop and make available new content templates to be applied by authors for use based on CSS parameters</p> <p>2.4 Allocate and monitor <i>server</i> permissions</p> <p>2.5 Identify preferred <i>file transfer protocol (FTP) client</i> based on best fit with technical environment and make available for use</p> <p>2.6 Customise FTP client to meet requirements</p> <p>2.7 Identify and develop authoring support tools, such as help files and links</p> <p>2.8 Disseminate authoring support tools, such as help files and links as necessary</p>
3. Document guidelines	<p>3.1 Develop documentation for loading information, taking into consideration security and privacy</p> <p>3.2 Document and make available links to recommended support tools</p> <p>3.3 Automate <i>details</i> of recent updates and loading of information, and document on the site</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise and negotiate with colleagues and clients
- literacy skills to:
  - create procedures
  - interpret legislative and standards requirements
  - interpret organisational policy and requirements
- planning and organisational skills to:
  - allocate roles and responsibilities
  - develop guidelines for uploading website content
  - meet organisational and other requirements for uploading site content
- research skills to locate and evaluate available products and services
- technical skills to:
  - analyse websites
  - archive information
  - locate and use authoring guides
  - maintain and administer a website
  - publish on a website
  - transfer files
  - undertake directory maintenance
  - use CSS and content templates
  - use FTP to move data or other files, such as help files or links
  - use website design software
  - write policy.

### Required knowledge

- copyright and intellectual property issues
- information architecture
- internet protocols
- procedures for disseminating and documenting technical specifications
- website architecture and business process design and how ebusiness sites fit into corporate strategy.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop procedures for uploading and removing website content that:             <ul style="list-style-type: none"> <li>• reflects the strategic intent of the site while maintaining site security and privacy standards</li> <li>• adheres to quality standards for the updating process and data</li> <li>• carries out updates in a secure and convenient manner</li> </ul> </li> <li>• research and recommend current industry products and services.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• servers</li> <li>• ebusiness website</li> <li>• FTP software</li> <li>• organisational documentation, requirements and guidelines</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate identifying, analysing and evaluating procedures and tools from a variety of sources, such as authoring tools and updating procedures</li> <li>• verbal or written questioning to assess candidate's knowledge of major elements of website design</li> <li>• review of guidelines developed by candidate for uploading content.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>Requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system</li> <li>• advising users of old data being archived and new content that has been posted when updating, loading and removing redundant content.</li> </ul>
<p><b>Content</b> may include information and interactive features, such as:</p>	<ul style="list-style-type: none"> <li>• background articles</li> <li>• company information</li> <li>• copyright and disclaimer notices</li> <li>• customer only information</li> <li>• customer-specific information</li> <li>• error messages</li> <li>• feedback mechanisms</li> <li>• forms</li> <li>• frequently asked questions</li> <li>• hyperlink titles</li> <li>• instructions</li> <li>• product information</li> <li>• ratings, rankings, testimonials and quotes from reviews</li> <li>• reference pages</li> <li>• site map</li> <li>• what's new.</li> </ul>
<p><b>Documentation</b> may follow:</p>	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project-management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>
<p><b>Server</b> may include:</p>	<ul style="list-style-type: none"> <li>• application and web servers</li> <li>• BEA Weblogic servers</li> </ul>

	<ul style="list-style-type: none"> <li>• email servers</li> <li>• file and print servers</li> <li>• firewall servers</li> <li>• FTP servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• Novell Directory Services (NDS) servers</li> <li>• proxy or cache servers.</li> </ul>
<i>File transfer protocol client</i> may include:	<ul style="list-style-type: none"> <li>• AxY FTP for Windows, Linux and Unix</li> <li>• cftp for Unix</li> <li>• Curl for Unix supports FTP, HTTP, and Telnet</li> <li>• gFTP with GUI for Unix supports FTP, HTTP and SSH</li> <li>• lftp command line FTP for Solaris, IRIX, HP-UX, digital Unix and Linux</li> <li>• Lukemftp command-line FTP supports FTP and HTTP URLs</li> <li>• NcFTP client command-line FTP and HTTP URLs for Solaris, FreeBSD, AIX, Linux.</li> </ul>
<i>Details</i> may include:	<ul style="list-style-type: none"> <li>• author</li> <li>• location and title of new files</li> <li>• time of update.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB420A Write content for web pages

### Modification History

Version	Comments
ICAWEB420A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to write concise and clear content for web pages on behalf of a client.

### Application of the Unit

This unit applies to web developers who are required to develop the content material for web pages.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Prepare to develop content for site</p>	<p>1.1 Identify customer information needs with reference to audience, site functionality and <i>client requirements</i></p> <p>1.2 Confirm site purpose and functionality with reference to <i>client</i> specification</p> <p>1.3 Select content channels and format as part of client requirements</p> <p>1.4 Obtain templates and style guides</p> <p>1.5 Identify content and analyse with reference to audience needs, maintenance requirements, information architecture, and site design and functionality</p> <p>1.6 Negotiate alterations to site design, as required by the content and client requirements</p>
<p>2. Write site content</p>	<p>2.1 Create content according to content and client requirements</p> <p>2.2 Establish that content is easily and conveniently accessible and visible and that information is clear, understandable and logical</p> <p>2.3 Edit content with reference to audience needs, site functionality, content and client requirements</p>
<p>3. Upload content</p>	<p>3.1 Log into server site using either administrative or anonymous file transfer protocol in preparation for upload</p> <p>3.2 Launch transfer <i>file transfer protocol (FTP) client</i> and navigate to destination directory, either graphically or by using a command line interface</p> <p>3.3 Store and order files according to logical design and user needs, using accepted file extension scheme</p> <p>3.4 Demonstrate operation in closed contention mode</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise and negotiate with clients and colleagues
- literacy skills to:
  - apply principles of plain English writing for a variety of cultures and people with special needs
  - identify content
  - write for the internet
- planning and organisational skills to:
  - analyse organisational and audience needs
  - determine appropriate content channels and formats
  - identify and understand diverse target audience needs
- technical skills to:
  - create content
  - manage and design the visual composition of the site
  - upload content.

### Required knowledge

- content features, including clarity, ease of viewing and readability
- copyright and intellectual property legislation relating to web page content
- document design, web design and usability
- functions and features of:
  - micro-content elements, such as headings, highlighted words and link text
  - style guides, such as cascading style sheets (CSS)
- information architecture
- instructional design principles
- obligations of merchants and service providers
- organisational requirements relating to web page content
- privacy requirements relating to web page content.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• write in a manner that recognises cultural differences, diversity and people with special needs</li> <li>• demonstrate some knowledge of website content creation</li> <li>• develop and upload quality content for a website.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• copy edit resources</li> <li>• culturally reviewed content</li> <li>• style guides and templates</li> <li>• website specifications</li> <li>• word-processing and web development software</li> <li>• organisational documentation and industry requirements</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate loading and removing content on a site</li> <li>• verbal or written questioning to assess candidate's knowledge of site functionality and web design</li> <li>• review of web content developed by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Client requirements</i></b> may refer to:</p>	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• organisational policies</li> <li>• people in the organisation</li> <li>• style</li> <li>• system.</li> </ul>
<p><b><i>Client</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• employee</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<p><b><i>File transfer protocol client</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised software</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>

# ICAWEB421A Ensure website content meets technical protocols and standards

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare a range of content for a website in accordance with customer specifications while ensuring that content is compatible with appropriate technical and infrastructure protocols.

## Application of the Unit

This unit applies to those working in the web development area who are required to populate websites according to standards and protocols.

Website design is important for a range contexts, including security, accessibility and legal, moral and ethical issues.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Confirm that content meets required standards</p>	<p>1.1 Take action to ensure that text-based <i>content</i> meets client needs and required style <i>standards</i></p> <p>1.2 Confirm multimedia-based content meets the business design standards or overall look of the website</p> <p>1.3 Check that the mix between multimedia and text-based content provides the required level of interaction identified in the project brief</p> <p>1.4 Test that content conforms to <i>client</i> expectations and technology</p>
<p>2. Confirm that technology supports content</p>	<p>2.1 Take action to ensure that the protocols required for multimedia content are available</p> <p>2.2 Check and confirm that the bandwidth required to support the content is available</p> <p>2.3 Check and confirm that <i>servers</i> support the content and levels of interaction</p> <p>2.4 Check and confirm that plug-ins required to support content are made available</p> <p>2.5 Test and confirm that compression techniques support delivery of content</p>
<p>3. Test content</p>	<p>3.1 Test and confirm that content displays as intended and according to business <i>requirements</i> in target <i>browsers</i></p> <p>3.2 Test with beta <i>users</i> that content encourages interaction and content interaction performs as intended and record results</p> <p>3.3 Test and confirm that plug-ins download with a minimum of steps, complication and time</p> <p>3.4 Test that interactive tools are available and provide the expected results</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with users on technical and content matters
- literacy skills to ensure text-based content meets client needs
- technical skills to:
  - act on protocols required for multimedia content
  - manage file transfer protocols
  - undertake site testing.

### Required knowledge

- applicability of copyright, privacy and intellectual property to website development
- common software compression algorithms and associated technologies
- file transfer protocol (FTP) software protocols
- internet protocols
- server access security principles and procedures
- server operating systems
- streaming technologies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare and integrate a mix of content for a website</li> <li>• use correct streaming and compression techniques.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• documents detailing organisational style guide or policies</li> <li>• PC where software installation may be performed</li> <li>• compression and streaming software</li> <li>• internet connection</li> <li>• live network</li> <li>• network components, hardware and software</li> <li>• networked computers</li> <li>• server and workstation hardware and software</li> <li>• style guides and design brief</li> <li>• technical documentation and installation manuals</li> <li>• use of software currently used in industry</li> <li>• vendor hardware and software components</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of the technologies and associated protocols associated with website design</li> <li>• direct observation of candidate managing FTPs and site testing</li> <li>• review of the candidate's active website.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Content</i></b> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• multimedia content, such as audio and video streaming</li> <li>• sound files</li> <li>• static graphics</li> <li>• text-based documents.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• organisational standards</li> <li>• project standards, found on Standards Australia website.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• clubs</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Servers</i></b> may include:	<ul style="list-style-type: none"> <li>• application and web servers</li> <li>• building environmental assessment (BEA) Weblogic servers</li> <li>• email servers</li> <li>• file and print servers</li> <li>• firewall servers</li> <li>• FTP servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• Novell Directory Services (NDS) servers</li> <li>• proxy or cache servers.</li> </ul>

Web

## ICAWEB422A Ensure website access and useability

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure that clients with various degrees of disability and with various types of web browsers can access and use a website once a connection has been established.

### Application of the Unit

This unit applies to frontline technical support personnel responsible for making sure that a website is available to users.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Design a site user test	<p>1.1 Establish usability test methods</p> <p>1.2 Identify critical business functions</p> <p>1.3 Identify full range of <i>users</i></p> <p>1.4 Confirm user expectations through market analysis, business intelligence and customer feedback</p> <p>1.5 Establish performance potential of the business from <i>business requirements</i> or other approved sources</p> <p>1.6 Establish performance measurement and <i>success criteria</i> to measure actual performance against user expectations</p> <p>1.7 Test site when ready and record outcomes</p>
2. Conduct user test	<p>2.1 Document process performance indicators and benchmarks and disseminate to sample group of users</p> <p>2.2 Assemble a full representative range of users and preferred technologies to test site features and functions based on the <i>business specification</i></p> <p>2.3 Ensure maximum user satisfaction through ease of navigation controls and design</p> <p>2.4 Ensure user and legal, accessibility, privacy and equity <i>requirements</i> and expectations are met</p>
3. Evaluate user test	<p>3.1 Collate site performance results and measure against performance indicators and benchmarks based on user expectations</p> <p>3.2 Identify performance shortfalls and ensure acceptable performance solutions are developed according to business requirements</p> <p>3.3 Establish an evaluation feedback mechanism and provide to users</p>
4. Document results	<p>4.1 Identify <i>solutions</i> to <i>problems</i> during the testing phase</p> <p>4.2 Discuss problems with developers and ensure solutions are continuously refined</p> <p>4.3 Ensure proposed solutions meet business requirements and user expectations</p> <p>4.4 Document final solutions in line with <i>organisational guidelines</i>, and distribute to <i>appropriate person</i></p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with users and website developers
- literacy skills to:
  - document solutions in line with organisational guidelines
  - document test results
  - interpret organisational requirements
- planning and organisational skills to conduct market analysis
- technical skills to:
  - analyse a website
  - analyse the evaluation
  - design and implement technical tests
  - develop a website
  - evaluate tests and give feedback on the evaluation.

### Required knowledge

- detailed knowledge of:
  - principles of accessibility and equity in the context of website development
  - technical performance measurement
  - user testing principles and techniques
  - website architecture
  - website privacy
  - website security
  - work load metrics
- overview knowledge of:
  - business process design
  - customer and business liaison
  - electronic commerce modelling language
  - organisational policy and procedures relating to website functionality.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• research user needs</li> <li>• design a valid usability test</li> <li>• facilitate the test process and document the results</li> <li>• propose solutions to meet user needs and the current and future needs of the business.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• analysis software</li> <li>• ebusiness website</li> <li>• organisational policy and procedures</li> <li>• requirements documentation</li> <li>• site server</li> <li>• site server software</li> <li>• web servers</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate designing and conducting a site user test</li> <li>• review of candidate's documented test performance results measured against performance indicators and benchmarks</li> <li>• verbal or written questioning to assess candidate's knowledge of features of benchmark websites provided by candidate for review.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Users</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b><i>Business requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisational system.</li> </ul>
<b><i>Success criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• technical and logistical considerations</li> <li>• timeframe.</li> </ul>
<b><i>Business specification</i></b> may include:	<ul style="list-style-type: none"> <li>• current system functionality</li> <li>• technical requirements</li> <li>• user problem statement.</li> </ul>
<b><i>Requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system</li> <li>• implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs.</li> </ul>
<b><i>Feedback mechanism</i></b> may include:	<ul style="list-style-type: none"> <li>• interviews</li> <li>• meetings</li> <li>• questionnaires</li> <li>• surveys.</li> </ul>
<b><i>Solutions</i></b> may include:	<ul style="list-style-type: none"> <li>• implementing a new system</li> <li>• new hardware and hardware upgrades</li> <li>• new software and software upgrades</li> <li>• user training.</li> </ul>
<b><i>Problems</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• network</li> <li>• people in the organisation</li> <li>• problems with the business</li> </ul>

	<ul style="list-style-type: none"> <li>• system.</li> </ul>
<i>Organisational guidelines</i> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB423A Ensure dynamic website security

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure and maintain the security of a dynamic, commercial website.

### Application of the Unit

This unit applies to web developers who are required to confirm the security of dynamic websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Undertake risk assessment	<p>1.1 Identify functionality and features of the website and confirm with <i>client</i></p> <p>1.2 Identify <i>security threats</i> with reference to functionality of the site and organisational <i>security policy, legislation</i> and <i>standards</i></p> <p>1.3 Complete a risk analysis to prioritise security threats and identify system vulnerabilities</p> <p>1.4 Identify resource and budget constraints and validate with client as required</p> <p>1.5 Source appropriate products, <i>security services</i> and <i>equipment</i> according to enterprise purchasing policies</p>
2. Secure operating systems (OS)	<p>2.1 Identify <i>OS</i> and cross-platform vulnerabilities</p> <p>2.2 Make appropriate scripting or configuration adjustments with reference to functionality of the site and the security policy</p> <p>2.3 Identify and rectify weaknesses specific to the OS</p>
3. Secure site server	<p>3.1 Configure the web server securely with reference to required functionality and the security policy</p> <p>3.2 Review and analyse server-side scripting with reference to required functionality and the security policy</p> <p>3.3 Install <i>firewalls</i> as required</p> <p>3.4 Establish access control permissions to <i>server</i> and <i>database</i></p>
4. Secure data transactions	<p>4.1 Identify data transactions with reference to functionality and features of website</p> <p>4.2 Identify and apply channel protocols related to requirements</p> <p>4.3 Install and configure payment systems</p>
5. Monitor and document security framework	<p>5.1 Develop a program of selective independent audits and penetration tests</p> <p>5.2 Determine performance benchmarks</p> <p>5.3 Implement audit and test programs, and record, analyse and report results</p> <p>5.4 Make security framework changes based on test results</p> <p>5.5 Develop the site-security plan with reference to security policy and requirements</p> <p>5.6 Develop and distribute related policy and procedures to client</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business-related matters
- literacy skills to:
  - collate, analyse and assess importance and relevance of product information
  - summarise and document information
  - write procedures
- numeracy skills to take test measurements, interpret results and evaluate performance
- planning and organisational skills to:
  - develop enterprise policy and procedures
  - plan, prioritise and monitor own work
- research skills to interrogate vendor databases and websites
- technical skills to:
  - configure a web server
  - identify key sources of information
  - see conflicts and integration capabilities between diverse equipment
  - understand specification sheets
  - use auditing and penetration testing techniques.

### Required knowledge

- Australian Computer Society Code of Ethics
- client business domain, structure, function and organisation, including organisational issues surrounding security
- copyright and intellectual property as related to website information
- commonwealth Privacy Act 2000
- current industry-accepted hardware and software products
- desktop applications and OS as required
- technical knowledge of functions and features of:
  - automated intrusion detection software
  - network address translation (NAT) related to securing internal IP addresses, buffer overruns and stack smashing with reference to operating system deficiencies
  - authentication and access control
  - common stored account payment systems
  - cryptography
  - CGI scripts
  - generic secure protocols
  - stored value payment systems
  - advantages and disadvantages of using the range of security features
  - protocol stack for internet communications
  - physical web server security, particularly remote host security threats.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify potential security threats to a website</li> <li>• develop strategies to secure a dynamic website</li> <li>• implement such strategies.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• dynamic website</li> <li>• security plan</li> <li>• user requirements</li> <li>• relevant legislation, standards and organisational requirements</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• client domain</li> <li>• website security techniques</li> <li>• current website security threats</li> </ul> </li> <li>• review of candidate's documented: <ul style="list-style-type: none"> <li>• risk assessment</li> <li>• performance benchmarks</li> </ul> </li> <li>• evaluation of candidate's security framework.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisation</li> <li>• individual</li> <li>• internal department</li> <li>• internal employee.</li> </ul>
<b><i>Security threats</i></b> may include:	<ul style="list-style-type: none"> <li>• denial of service and by-pass</li> <li>• eavesdropping</li> <li>• hackers</li> <li>• manipulation and impersonation</li> <li>• penetration</li> <li>• viruses using logging.</li> </ul>
<b><i>Security policy</i></b> may include:	<ul style="list-style-type: none"> <li>• audits and alerts</li> <li>• privacy</li> <li>• standards, including archival, backup and network</li> <li>• theft</li> <li>• viruses.</li> </ul>
<b><i>Legislation</i></b> may include:	<ul style="list-style-type: none"> <li>• copyright</li> <li>• liability statements</li> <li>• privacy legislation.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• organisational standards</li> <li>• project standards.</li> </ul>
<b><i>Security services</i></b> may include:	<ul style="list-style-type: none"> <li>• application proxies</li> <li>• authentication and access control</li> <li>• digital certificates</li> <li>• digital signatures</li> <li>• encryption</li> <li>• file access permissions</li> <li>• multi-platform directory services supporting relevant standards</li> <li>• network points and mainframes</li> <li>• packet filters</li> <li>• personnel security</li> <li>• screening routers</li> </ul>

	<ul style="list-style-type: none"> <li>• servers</li> <li>• secure hypertext transfer protocol (SHTTP)</li> <li>• single stage and dual stage firewalls</li> <li>• smart cards</li> <li>• secure socket layer (SSL)</li> <li>• stored account payment systems</li> <li>• stored value payment systems</li> <li>• support for generalised security services interfaces</li> <li>• trusted hardware and operating systems at selective desktops</li> <li>• trusted systems with C and B assurance levels</li> <li>• virtual private network (VPN) technology.</li> </ul>
<b>Equipment</b> may include:	<ul style="list-style-type: none"> <li>• hard drives</li> <li>• hubs</li> <li>• modems and other connectivity devices, including digital subscriber line (DSL) modems</li> <li>• monitors</li> <li>• other peripheral devices</li> <li>• personal computers (PCs)</li> <li>• personal digital assistants (PDAs)</li> <li>• printers</li> <li>• switches</li> <li>• workstations.</li> </ul>
<b>OS</b> may include:	<ul style="list-style-type: none"> <li>• Mac OS 8 or above</li> <li>• Linux 6.0 or above</li> <li>• Windows XP or above.</li> </ul>
<b>Firewalls</b> may include:	<ul style="list-style-type: none"> <li>• hardware appliances</li> <li>• individual PC solution; varying functionality, including network address translator (NAT) and IP masquerading, routing to specific machines</li> <li>• proxy servers.</li> </ul>
<b>Server</b> may include:	<ul style="list-style-type: none"> <li>• application or web servers</li> <li>• BEA Weblogic servers</li> <li>• email servers</li> <li>• file and print servers</li> <li>• file transfer protocol (FTP) servers</li> <li>• firewall servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• Novell Directory Services (NDS) servers</li> <li>• proxy or cache servers.</li> </ul>
<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> </ul>

	<ul style="list-style-type: none"><li>• relational databases.</li></ul>
<i>Requirements</i> may refer to:	<ul style="list-style-type: none"><li>• application</li><li>• business</li><li>• network</li><li>• people in the organisation</li><li>• system.</li></ul>

## Unit Sector(s)

Web

## ICAWEB424A Evaluate and select a web hosting service

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to evaluate and select an appropriate hosting service for current and future business needs.

### Application of the Unit

This unit applies to information technology (IT) personnel who take responsibility for comparing and evaluating internet service provider (ISP) services.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Select ISP	<p>1.1 Review comparable <i>characteristics</i> of a range of hosting services</p> <p>1.2 Review client usage and ensure that email and mailing list services are flexible enough to meet current and future business needs</p> <p>1.3 Review support service standards to ensure they meet business needs</p> <p>1.4 Ensure ISP hosting service has sufficient data capacity to cover partial outages</p> <p>1.5 Determine availability of <i>security technologies</i></p> <p>1.6 Determine availability of <i>scripting languages</i></p> <p>1.7 Evaluate optional <i>server applications</i> for advanced web business functions</p> <p>1.8 Confirm client selection criteria and select ISP hosting service that best matches the criteria</p>
2. Ensure guarantee of permanent online presence	<p>2.1 Establish that web-hosting service has systems in place to monitor <i>server</i> performance and availability</p> <p>2.2 Negotiate escalation procedures and performance standards with ISP</p> <p>2.3 Establish that security and backup procedures are articulated and meet business needs</p>
3. Ensure that web host meets technical requirements	<p>3.1 Take action to ensure that <i>operating system</i> supports the preferred business development software, applications, extensions and <i>databases</i></p> <p>3.2 Establish that web-host servers support dynamic websites using the preferred business technologies</p> <p>3.3 Establish that web host provides current and future disk space requirements</p> <p>3.4 Establish that site-analysis reports are available and flexible enough to meet business needs</p> <p>3.5 Establish that security systems and payment technologies meet business and customer expectations and requirements</p>
4. Benchmark performance and test against specified criteria	<p>4.1 Test performance of the ISP during on and off peak times and record outcomes</p> <p>4.2 Establish that email and mailing services have backup procedures in place and are protected from damage, erasure or unwanted damage</p>

	4.3 Take action to ensure support services perform according to business needs
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine appropriate pricing and services plan for the business
  - evaluate and compare web-hosting services
- communications skills to:
  - establish client requirements
  - negotiate escalation procedures and performance standards with ISP
- numeracy skills to assess pricing plans
- planning skills to identify future business needs
- technical skills to assess security systems and technical requirements.

### Required knowledge

- different web hosting service provision options and their scalability
- internet security issues
- operating systems used by ISPs
- performance expectations from customers and end users
- server technologies
- web hosting services and performance benchmarks.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• assess client needs and select ISP that meets the current and future needs of the business</li> <li>• evaluate web hosting service:             <ul style="list-style-type: none"> <li>• ensure price meets client’s budgetary requirements</li> <li>• ensure security systems and technical requirements of the business are met</li> </ul> </li> <li>• monitor the performance of the ISP during on and off peak times.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• hosting plans, prices and service agreements</li> <li>• use of current technology underpinning the ISP and services offered</li> <li>• business plan outlining future directions for the business</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate:             <ul style="list-style-type: none"> <li>• evaluating web-hosting services</li> <li>• benchmarking and testing ISP</li> </ul> </li> <li>• verbal or written questioning to assess candidate’s knowledge of:             <ul style="list-style-type: none"> <li>• user requirements</li> <li>• criteria for selecting an ISP</li> </ul> </li> <li>• review of reports prepared by candidate showing the results of ISP testing.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Characteristics</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• data transfer</li> <li>• functionality</li> <li>• hosting plans, such as:             <ul style="list-style-type: none"> <li>• common gateway interface (CGI) access</li> <li>• colocation of servers</li> <li>• dedicated servers</li> <li>• disk storage</li> <li>• ebusiness hosting</li> <li>• post office protocol (POP) accounts</li> <li>• scripts</li> </ul> </li> <li>• level of service</li> <li>• pricing plans</li> <li>• web-hosting facilities.</li> </ul>
<p><b><i>Security technologies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• payment gateways</li> <li>• public key infrastructure (PKI)</li> <li>• secure socket layer (SSL).</li> </ul>
<p><b><i>Scripting languages</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Perl</li> <li>• PHP and Python</li> <li>• VB.NET</li> <li>• JavaScript</li> <li>• VBScript.</li> </ul>
<p><b><i>Server applications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• database and data warehousing</li> <li>• directory services</li> <li>• file sharing</li> <li>• line-of-business applications</li> <li>• management</li> <li>• messaging</li> <li>• network and remote access</li> <li>• printer sharing</li> <li>• terminal services</li> <li>• web services.</li> </ul>
<p><b><i>Server</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Apache HTTP server</li> <li>• email servers</li> </ul>

	<ul style="list-style-type: none"> <li>• FTP servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• iPlanet-Enterprise</li> <li>• Lotus Domino</li> <li>• Microsoft Internet Information Server</li> <li>• NetDynamics</li> <li>• Netscape Enterprise server, Netscape-FastTrack, Netscape-Commerce</li> <li>• Sun Microsystems iPlanet web server</li> <li>• Sun Microsystems Java web server.</li> </ul>
<i>Operating system</i> may include:	<ul style="list-style-type: none"> <li>• Mac</li> <li>• Linux</li> <li>• Windows.</li> </ul>
<i>Databases</i> may include:	<ul style="list-style-type: none"> <li>• Microsoft SQL (MS SQL) server</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• SQL.</li> </ul>

## Unit Sector(s)

Web

# ICAWEB425A Apply structured query language to extract and manipulate data

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce structured query language (SQL) statements to work with server-side scripts enabling web designers to interact with web server databases.

## Application of the Unit

This unit applies to web designers responsible for creating server-side interaction with dynamic web pages using SQL as a means of communicating with the database.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify SQL requirements from the specification documentation	1.1 Determine information to be used from <b>database</b> 1.2 Identify tables that hold this information 1.3 Identify primary keys in these tables 1.4 Identify relationships between these tables, including foreign keys
2. Create a relational database	2.1 Create tables in a database using <b>SQL statements</b> 2.2 Identify primary and foreign keys for database table 2.3 <b>Manipulate data</b> in a database using SQL statements 2.4 Query the database using SQL statements 2.5 Write SQL statements to retrieve information from database
3. Test SQL results	3.1 Construct test data to test SQL statements 3.2 Construct expected results to verify SQL statements 3.3 Verify result of the constructed SQL statements against expected results

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine the elements of the SQL statement
- communication skills to:
  - document the code
  - understand the client requirements
- learning skills to research encountered problems independently
- literacy skills to create an SQL statement using syntax
- planning and organisational skills to write an SQL statement that is cross-browser compatible
- problem-solving skills to translate the required outcomes from the database into SQL statements
- technical skills to:
  - apply programming concepts
  - integrate SQL statements into a variety of server-side languages.

### Required knowledge

- features and application of:
  - aggregate functions:
    - MIN
    - MAX
    - SUM
    - AVG
    - COUNT
    - COUNT(\*)
  - clause:
    - GROUP BY
    - HAVING
    - ORDER BY
  - dates and times
  - SQL data types
  - numbers
  - text
  - SQL syntax:
    - SELECT
    - FROM
    - WHERE
    - LIKE
    - DISTINCT
    - CREATE

- ALTER TABLE
- INSERT INTO
- UPDATE
- DELETE
- DROP
- combining condition and Boolean operators:
  - IN and BETWEEN conditional operators
  - mathematical operators
- table joins.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to use SQL to:</p> <ul style="list-style-type: none"> <li>• create databases and tables</li> <li>• query one or more tables to provide required data</li> <li>• add, modify and delete records from tables</li> <li>• drop databases and tables.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• development environment</li> <li>• server access</li> <li>• database server</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of SQL statements and procedures</li> <li>• review of project-based SQL application prepared by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• Access</li> <li>• Informix</li> <li>• Microsoft Structured Query Language (MS SQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre</li> <li>• Sybase.</li> </ul>
<b><i>SQL statements</i></b> may include:	<ul style="list-style-type: none"> <li>• aggregate functions</li> <li>• conditions and Boolean operators</li> <li>• conditional operators</li> <li>• mathematical operators</li> <li>• table joins.</li> </ul>
<b><i>Manipulating data</i></b> may include:	<ul style="list-style-type: none"> <li>• creating tables and rows</li> <li>• deleting tables and rows</li> <li>• adding and altering data</li> <li>• retrieving data.</li> </ul>

## Unit Sector(s)

Web

# ICAWEB429A Create a markup language document to specification

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design, create and save a markup language document to a given specification using a text editor rather than an authoring tool.

## Application of the Unit

This unit applies to web designers and developers responsible for the creation of web pages using a markup language.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse specifications and requirements	1.1 Determine uses and audience of the document 1.2 Determine appropriate <b>markup language</b> based on document uses and audience and current industry best practice 1.3 Determine document structure
2. Create document structure	2.1 Create and assign basic elements of the document, taking into account <b>accessibility</b> 2.2 Mark up sections of the document to describe the <b>structure</b>
3. Incorporate web page components	3.1 Identify <b>web page components</b> 3.2 Evaluate suitable web page components 3.3 Include required web page components
4. Validate documents	4.1 Validate markup language document against specifications and record outcomes 4.2 Validate markup language document in different <b>browsers</b> for compatibility and record outcomes

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine uses, audience and document structure
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- problem-solving skills to use markup language and troubleshoot problems
- technical skills to use a markup language to create the required web page.

### Required knowledge

- markup language and associated standards
- range of available browsers' web accessibility.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design, create and save a markup language document using a markup language without the automated generation of code.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational style guide or policy</li> <li>• user requirements</li> <li>• text editor</li> <li>• range of browsers</li> <li>• internet to validate markup</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation web pages prepared by candidate using a text editor</li> <li>• evaluation of candidate's validated markup code results in commonly used browsers</li> <li>• validation of candidate's markup correctness against standards set by the World Wide Web Consortium (W3C).</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.
--	------------

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Markup language</b> may include:	<ul style="list-style-type: none"> <li>• dynamic hypertext markup language (DHTML)</li> <li>• hypertext markup language (HTML)</li> <li>• standard generalised markup language (SGML)</li> <li>• virtual reality modelling language (VRML)</li> <li>• eXtensible hypertext markup language (XHTML)</li> <li>• eXtensible markup language (XML).</li> </ul>
<b>Accessibility</b> may be related to:	<ul style="list-style-type: none"> <li>• browser software, user agent and versions</li> <li>• cultural awareness</li> <li>• ethnicity</li> <li>• physical impairments</li> <li>• remote locations.</li> </ul>
<b>Structure</b> may include elements such as:	<ul style="list-style-type: none"> <li>• headings</li> <li>• lists</li> <li>• paragraphs.</li> </ul>
<b>Web page components</b> may include:	<ul style="list-style-type: none"> <li>• flash movies</li> <li>• images</li> <li>• links</li> <li>• lists</li> <li>• tables.</li> </ul>
<b>Browsers</b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Opera</li> <li>• Safari.</li> </ul>

## Unit Sector(s)

## ICAWEB501A Build a dynamic website

### Modification History

Version	Comments
ICAWEB501A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse, design, build and test a dynamic website to meet technical requirements.

### Application of the Unit

This unit applies to web developers responsible for the analysis, design and implementation and testing of websites.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Define and analyse technical requirements	1.1 Identify business requirements and appropriate standards 1.2 Determine and <b>document</b> the purpose, expectations and functionality of the website 1.3 Analyse the user-interface design requirements, including user needs, design principles and operating systems
2. Produce software design specifications	2.1 Produce a hierarchy of the website showing navigation 2.2 Ensure content is logical and accessible to user 2.3 Produce <b>prototype</b> of the user interface 2.4 Determine and document the <b>architectural requirements</b> 2.5 Design <b>data storage</b> requirements
3. Develop website to the specified design	3.1 Create software <b>components</b> of the website 3.2 Test components of the website 3.3 Integrate components to produce the web application
4. Test web application	4.1 Test website against the requirements 4.2 Complete and document the <b>design structure</b> 4.3 Obtain client feedback and adjust web applications as appropriate

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify dynamic client and server-side requirements
- communication skills to liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- planning and organisational skills to plan and organise the most appropriate solution
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the code created
  - select the most efficient and effective algorithms
- research skills to:
  - find solutions to encountered problems
  - keep up-to-date with industry trends
- technical skills to:
  - apply web programming concepts
  - create HTML and XHTML pages
  - create software in a variety of languages, including client and server-side languages
  - create aesthetically pleasing web pages
  - understand hypertext transfer protocol (HTTP).

### Required knowledge

- features of internet technology
- principles of analysis and design
- programming control structures and object-oriented programming
- web programming concepts, including:
  - authentication and web security
  - HTTP
  - session management
  - stateless programming.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse, design, implement and test a website to meet technical requirements</li> <li>• create efficient and effective code to meet technical requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• development environment</li> <li>• server access</li> <li>• database server</li> <li>• browsers.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of documentation and code of an implemented and tested web application prepared by candidate</li> <li>• evaluation of candidate's completed website.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Document</i></b> may include:	<ul style="list-style-type: none"> <li>• software requirement specifications</li> <li>• unified modelling language (UML) diagrams</li> <li>• wireframes.</li> </ul>
<b><i>Prototype</i></b> may be in the form of:	<ul style="list-style-type: none"> <li>• images of sample web pages</li> <li>• non-functional static website to demonstrate what the site will look like.</li> </ul>
<b><i>Architectural requirements</i></b> may be in reference to:	<ul style="list-style-type: none"> <li>• classes required to build the application</li> <li>• configuration</li> <li>• operating system</li> <li>• software.</li> </ul>
<b><i>Data storage</i></b> may include:	<ul style="list-style-type: none"> <li>• database</li> <li>• files, such as eXtensible markup language (XML).</li> </ul>
<b><i>Components</i></b> may include:	<ul style="list-style-type: none"> <li>• classes required to build the application</li> <li>• flash movies</li> <li>• JavaScript</li> <li>• jQuery</li> <li>• shopping cart</li> <li>• web user controls.</li> </ul>
<b><i>Design structure</i></b> may include:	<ul style="list-style-type: none"> <li>• cascading style sheet (CSS)</li> <li>• eXtensible hypertext markup language (XHTML).</li> </ul>

## ICAWEB502A Create dynamic web pages

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to build active or dynamic web pages.

### Application of the Unit

This unit applies to web developers responsible for creating dynamic pages to provide interaction between the user and the website.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify client and server-side dynamic content	1.1 Review technical requirements 1.2 Identify sections of the website requiring client-side dynamic content 1.3 Identify sections of the website requiring server-side dynamic content 1.4 Select appropriate <i>languages</i> and technology to meet the requirements
2. Create dynamic content	2.1 Create pages using appropriate languages 2.2 Ensure code conforms to current industry best practice and standards
3. Test dynamic pages	3.1 Test website in a variety of <i>browsers</i> 3.2 Ensure required dynamic content functions according to specified requirements

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify dynamic client and server-side requirements
- communication skills to liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - follow documented instructions
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the created code
  - select the most efficient and effective algorithms
- research skills to:
  - find solutions to encountered problems
  - keep up-to-date with industry trends
- technical skills to:
  - apply basic hypertext transfer protocol (HTTP)
  - apply web programming concepts
  - create hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML) pages
  - create software in a variety of languages, including client and server-side languages
  - create aesthetically pleasing web pages.

### Required knowledge

- web-programming concepts, including:
  - authentication and web security
  - HTTP
  - session management
  - stateless programming
- detailed knowledge of:
  - internet technology
  - programming control structures
  - object-oriented programming.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce dynamic web pages that include both client and server-side dynamic content</li> <li>• create efficient and effective code to meet technical requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• development environment</li> <li>• server access</li> <li>• database server</li> <li>• browsers.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of dynamic web applications that include both client and server-side coding</li> <li>• written or verbal questioning to assess knowledge and skills of internet technology.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Languages</b> may include:	<ul style="list-style-type: none"> <li>• active server pages (ASP)</li> <li>• active server pages .net (ASP.NET)</li> <li>• Coldfusion</li> <li>• JavaScript</li> <li>• Perl</li> <li>• Perl hypertext preprocessor (PHP)</li> <li>• VBScript.</li> </ul>
<b>Browsers</b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Safari.</li> </ul>

Web

## ICAWEB503A Create web-based programs

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop web applications.

### Application of the Unit

This unit applies to web developers responsible for implementing the code required to create web applications.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Explain the hypertext transfer protocol (HTTP) and its implications when developing web applications	1.1 Describe the HTTP 1.2 Describe the limitations it has when developing web applications 1.3 Identify the advantages of HTTP in developing web applications
2. Implement session management	2.1 Create <b><i>code</i></b> to handle <b><i>session management</i></b> 2.2 Create code that retains the user's interaction with the website 2.3 Review and debug code
3. Develop applications in a stateless environment	3.1 Develop web applications that keep track of data between browser requests 3.2 Document web application with particular reference to its management of statelessness

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify dynamic client and server-side requirements
- communication skills to liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
  - review latest industry guidelines
- planning and organisational skills to plan and organise the most appropriate solution
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the code created
  - select the most efficient and effective algorithms
- research skills to:
  - keep up-to-date with industry trends
  - find solutions to encountered problems
- technical skills to:
  - apply web programming concepts
  - create hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML) pages
  - create software in a variety of languages, including client and server-side languages
  - create aesthetically pleasing web pages.

### Required knowledge

- internet technology
- principles of web analysis and design
- programming control structures and object-oriented programming
- web programming concepts:
  - authentication and web security
  - HTTP
  - session management
  - stateless programming.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

# ICAWEB504A Build a document using eXtensible markup language

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and build a valid eXtensible markup language (XML) document to suit a specified requirement.

## Application of the Unit

This unit applies to those in a development role in a variety of information technology areas who are required to use XML to build documents.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan process	1.1 Review specified requirements 1.2 Produce a plan to analyse the specified requirements 1.3 Plan the design and build of valid <b><i>XML</i></b> documentation allowing for iterative development
2. Analyse specified requirements	2.1 Determine and document the purpose, expectations and functionality of the XML document 2.2 Determine the <b><i>hardware, software</i></b> and <b><i>tools</i></b> needed to design the document 2.3 Determine the requirements for the document 2.4 Determine appropriate design methodologies, including using software engineering life cycle
3. Design and develop document	3.1 Decide on document type definition (DTD), if required 3.2 Define required entities, elements and their attributes 3.3 Produce the document following appropriate <b><i>standards</i></b> and declaring DTD, required entities, elements and their attributes, including associated graphics or sounds
4. Test document	4.1 Test document off-line against specifications and confirm document's validity 4.2 Test, where appropriate, the document online against specifications and with a representative audience 4.3 Analyse test results and confirm document's validity

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse document requirements and data environment
- communication skills to liaise with clients
- literacy skills to read required documents
- problem-solving skills to address issues in design
- technical skills to:
  - collect and disseminate data
  - use XML during development.

### Required knowledge

- Copyleft and Free Software Foundation
- copyright and intellectual property
- document object model
- introductory knowledge of business process and information modelling
- meta-modelling
- standard generalised markup language (SGML)
- United Nations Centre for Trade Facilitation and Electronic Business (UN/CEFACT) modelling methodology
- unified-modelling language
- web technologies
- XLT and XSLT.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• respond to requirements</li> <li>• produce a valid XML document</li> <li>• test the XML document</li> <li>• evaluate the test results.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• client or business requirements</li> <li>• XML parser or IE5</li> <li>• XML authoring tool.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of candidate's XML document</li> <li>• review of candidate's test results and test analysis</li> <li>• verbal or written questioning to determine candidate's knowledge of requirements, XML and testing.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>XML</i></b> may include:	<ul style="list-style-type: none"> <li>• electronic business using eXtensible markup language (ebXML).</li> </ul>
<b><i>Hardware</i></b> may include:	<ul style="list-style-type: none"> <li>• modems and other connectivity devices, such as asymmetric digital subscriber line (ADSL) modems</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised software</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>
<b><i>Tools</i></b> may include:	<ul style="list-style-type: none"> <li>• Easy XML 1.0</li> <li>• eXml Editor</li> <li>• QuickSilver 1.0 XML Suite</li> <li>• XML Bean Suite</li> <li>• XML Pro 2.0.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• W3C DOM specification, XML 1.0 (current edition), W3C XML instances, W3C XML DTDs, W3C XML DTDs, and ISO SGML meta-DTDs</li> <li>• ebXML repository and registry specification</li> <li>• ebXML requirements specification version 1.0</li> <li>• ebXML technical architecture specification</li> <li>• ebXML transport, routing and packaging specification</li> <li>• ISO 10646 Character encoding</li> <li>• ISO 11179/3 Metadata repository</li> <li>• ISO 8601:2000 Date/time/number data typing</li> <li>• ISO/IEC 14662 Open-Edi Reference Model</li> <li>• OASIS registry/repository technical specification</li> <li>• RFC 2119 Keywords for use in RFCs to indicate requirement levels</li> <li>• UN/CEFACT modelling methodology (UMM)</li> <li>• W3C XML v1.0 second edition specification.</li> </ul>

Web

## ICAWEB505A Develop complex web page layouts

### Modification History

Version	Comments
ICAWEB505A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and create a web page layout to an advanced level.

### Application of the Unit

This unit applies to web designers and web developers who are involved in the layout and appearance of web pages.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Build a web page according to the design prototype	1.1 Identify main sections of the web page layout 1.2 Create web page structure 1.3 Position web page elements to achieve design specification
2. Ensure web page is validated and tested in major browsers	2.1 Validate cascading style sheet (CSS) against <b>industry standards</b> 2.2 Correct <b>browser</b> incompatibilities using the most robust techniques 2.3 Test website in various browsers
3. Ensure website is accessible	3.1 Check website is <b>accessible</b> to ensure it can be viewed 3.2 Check website sections to ensure accessibility 3.3 Check web page elements to ensure accessibility

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify appropriate CSS rules to be applied to obtain desired result
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- numeracy skills to:
  - work with document element dimensions
  - work with relative and absolute measurements
- planning and organisational skills to:
  - create the CSS in allocated timeframe
  - plan the layout of the web page
- problem-solving skills to:
  - create web pages that will function in a variety of screen resolutions
  - resolve browser incompatibilities
- research skills to identify latest industry guidelines
- learning skills to keep up-to-date with industry guidelines and make recommendations
- technical skills to:
  - produce valid accessible web pages
  - use CSS in the most efficient and effective way.

### Required knowledge

- overview knowledge of design principles
- detailed knowledge of:
  - hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML)
  - CSS
  - hypertext transfer protocol (HTTP)
  - World Wide Web Consortium (W3C) standards
  - techniques to correct browser incompatibilities.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop a complex website layout</li> <li>• layout page elements to suit a variety of devices</li> <li>• test web pages in a variety of browsers</li> <li>• validate the pages against industry standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• computer</li> <li>• aesthetic presentation brief</li> <li>• variety of browsers</li> <li>• internet access to validate web pages against W3C.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of newly created or modified complex web page layouts</li> <li>• verbal or written questioning to assess candidate's knowledge and skills.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Industry standards</i></b> may include:	<ul style="list-style-type: none"> <li>• W3C</li> <li>• Web 2.0.</li> </ul>
<b><i>Browser</i></b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Safari.</li> </ul>
<b><i>Accessible</i></b> may relate to:	<ul style="list-style-type: none"> <li>• enabling web pages to be used in text browsers</li> <li>• making sure web pages can be viewed in a variety of platforms, including mobile devices</li> <li>• making sure website content is accessible to people with visual impairment.</li> </ul>

## ICAWEB506A Develop complex cascading style sheets

### Modification History

Version	Comments
ICAWEB506A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop complex cascading style sheets (CSS) that are attached to a mark-up language document.

### Application of the Unit

This unit applies to web designers and web developers who are involved in the layout and appearance of web pages.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine requirements and develop CSS	1.1 Obtain user requirements for style 1.2 Develop CSS to match user requirements
2. Use advanced CSS techniques to create web pages	2.1 Style elements of a web page using <b><i>advanced CSS</i></b> techniques 2.2 Position document elements using advanced CSS 2.3 Apply style sheets to multiple pages in a website
3. Ensure web page and CSS are validated and tested in all major browsers	3.1 Validate CSS against <b><i>industry standards</i></b> 3.2 Test website in various <b><i>browsers</i></b> 3.3 Rectify browser differences to ensure website is accessible

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify appropriate CSS rules to be applied to obtain desired result
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
- numeracy skills to work with:
  - document element dimensions
  - relative and absolute measurements
- planning and organisational skills to:
  - create the CSS in allocated timeframe
  - plan the layout of the web page
- problem-solving skills to:
  - create web pages that will function in a variety of screen resolutions
  - resolve browser incompatibilities
- research skills to identify latest industry guidelines and make recommendations
- learning and literacy skills to keep up-to-date with industry guidelines
- technical skills to:
  - produce valid accessible web pages
  - use CSS in the most efficient and effective way.

### Required knowledge

- overview knowledge of design principles
- detailed knowledge of:
  - hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML)
  - CSS
  - hypertext transfer protocol (HTTP) protocol
  - World Wide Web Consortium (W3C) standards
  - techniques to correct browser incompatibilities.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop a complex website styled and formatted using CSS</li> <li>• create a complex page layout using CSS</li> <li>• test web pages in a variety of browsers</li> <li>• validate the CSS against industry standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• computer</li> <li>• aesthetic presentation brief</li> <li>• HTML documents to have CSS applied to them</li> <li>• internet access to validate the CSS against the W3C</li> <li>• variety of browsers.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of CSS rules and how they affect the document styling and layout</li> <li>• evaluation of newly created or modified web pages styled using CSS.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.

# ICAWEB507A Customise a complex IT content management system

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to customise an IT content management system (CMS).

## Application of the Unit

This unit applies to web developers responsible for integrating and customising a content management system into a website.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse specifications and requirements	<p>1.1 Determine the required functionality of the website as per client requirements</p> <p>1.2 Determine the appropriate <i>server-side language</i> and <i>hosting environment</i></p> <p>1.3 Determine additional functionality that the CMS will not be able to handle 'out of the box'</p> <p>1.4 Determine how client's additional functionality is required to function</p> <p>1.5 Determine any pre-existing restraints that need to be considered when developing the website solution</p>
2. Develop customisation	<p>2.1 Plan and outline requirements of the additional functionality</p> <p>2.2 Create and develop plug-in, extension or new functionality to the CMS to meet client requirements</p>
3. Create CMS powered website	<p>3.1 Install and configure chosen <i>content management system</i></p> <p>3.2 Install and integrate new CMS functionality</p>
4. Validate and evaluate	<p>4.1 Validate final website markup against current website standards</p> <p>4.2 Validate CMS performance in different <i>browsers</i>, checking compatibility and core CMS functionality</p> <p>4.3 Validate the developed additional functionality against client requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine uses, audience and document structure and requirements
- communication skills to liaise with end users
- initiative and enterprise skills to recommend design features
- literacy skills to:
  - follow documented instruction from a supplied guide and online documentation
  - interpret workplace instructions and other technical documents
  - keep up-to-date with latest industry guidelines
- problem-solving skills to:
  - plan and develop new functionality to a core CMS package
  - use server-side and markup languages to troubleshoot problems and client requirements
- technical skills to:
  - configure or manipulate a website hosting environment
  - use a markup language to create the required web page
  - use server-side programming language to code functionality.

### Required knowledge

- content management systems
- markup language and associated standards
- server functionality
- server-side language and security techniques
- web accessibility.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create a CMS-powered website using an open source with additional custom functionality that is not available ‘out of the box’ that meets client requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements and content</li> <li>• text editor</li> <li>• range of browsers</li> <li>• internet for research, validation of code and programming documentation</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of: <ul style="list-style-type: none"> <li>• developed CMS (front and backend) in commonly used browsers to perform basic content manipulation tasks</li> <li>• content management additional functionality against current programming and security standards</li> <li>• ability to fulfil client requirements by programming custom functionality into the pre-existing core CMS</li> </ul> </li> <li>• validation of front-end code markup correctness against standards set by the World Wide Web Consortium (W3C).</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Server side language</i></b> may include:	<ul style="list-style-type: none"> <li>• ASP.NET</li> <li>• Java</li> <li>• PHP</li> <li>• Ruby on Rails.</li> </ul>
<b><i>Hosting environment</i></b> may include:	<ul style="list-style-type: none"> <li>• Linux</li> <li>• Windows.</li> </ul>
<b><i>Content management system</i></b> may include:	<ul style="list-style-type: none"> <li>• Drupal</li> <li>• Expression Engine</li> <li>• Joomla</li> <li>• Mambo</li> <li>• Open CMS</li> <li>• PHP Nuke</li> <li>• Radiant CMS</li> <li>• Silverstripe</li> <li>• Typo</li> <li>• Wordpress.</li> </ul>
<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Opera</li> <li>• Safari.</li> </ul>

## Unit Sector(s)

Web

## ICAWEB508A Develop website information architecture

### Modification History

Version	Comments
ICAWEB508A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop information architecture for a complex website that meets current and future business requirements.

### Application of the Unit

This unit applies to web developers and designers responsible for the navigation and hierarchy of a website.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify content needs	<p>1.1 Identify strategic intent of website from business <i>requirements</i> and <i>client</i> expectations</p> <p>1.2 Develop information requirements based on the website intent, intended audiences, types of client interactions, and long and short-term goals for the site</p> <p>1.3 Identify required information and group into business schemes related to the business structure</p> <p>1.4 Determine <i>content</i> requirements for each process</p> <p>1.5 Identify any <i>security</i> access requirements</p>
2. Plan content structure	<p>2.1 Cluster and document information in related topics</p> <p>2.2 Develop a hierarchy and site map of information</p> <p>2.3 Check data to confirm sequence of hierarchy</p> <p>2.4 Ensure that labels are clear, consistent, coherent and relatively intuitive for client to access</p>
3. Develop navigation system	<p>3.1 Build navigation system for overall website based on business requirements</p> <p>3.2 Ensure ease of navigation on the site and provide different ways of searching, while providing feedback to client</p> <p>3.3 Ensure navigation is <i>accessible</i></p>
4. Test and sign off	<p>4.1 Construct prototype of information architecture design</p> <p>4.2 Arrange for a subset of the client to test the prototype for usability to determine if architecture meets client expectations</p> <p>4.3 Ensure site content will format in the business and client technical environment</p> <p>4.4 Adjust architecture based on client feedback</p> <p>4.5 Sign off prototype to confirm current and future business requirements are met</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with client
- literacy skills to:
  - document technical specifications
  - interpret client business requirements
- planning and organisational skills to design website navigation
- problem-solving skills to resolve technical problems
- technical skills to:
  - conduct user analysis
  - integrate online processes
  - undertake website analysis
  - use site design software.

### Required knowledge

- client and business liaison and understanding how ebusiness sites fit into corporate strategy
- CSS
- hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML)
- hypertext transfer protocol (HTTP)
- implications of technology connectivity and documentation of technical specifications
- World Wide Web Consortium (W3C) standards
- website architecture and business process design and linkages between processes.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop and design the information architecture of a complex website that meets current business requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• web server</li> <li>• requirement specifications</li> <li>• integrated development environment (IDE) capable of creating web pages and server-side code</li> <li>• current web development technology.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of: <ul style="list-style-type: none"> <li>• a complex website to test the access path to all sections of the website</li> <li>• a site map outlining the navigation hierarchy of a complex website.</li> </ul> </li> </ul> <p>The assessments should be tested in a range of current browsers.</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English</p>

	<p>speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## ICAWEB509A Use site server tools for transaction management

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use site server tools to build, host, track and monitor transactions on an ebusiness site.

### Application of the Unit

This unit applies to those working in a web environment who are responsible for using site server tools to maintain the integrity of an ebusiness site.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Confirm and document task requirements	<p>1.1 Confirm <i>task requirements</i>, features and functionality of site with <i>client</i> as required</p> <p>1.2 Confirm <i>platform</i> or <i>software</i> related to business systems</p> <p>1.3 Confirm <i>integration requirements</i> of site with client</p> <p>1.4 Confirm standards relevant to the task and site functionality</p> <p>1.5 Document current and proposed configuration</p> <p>1.6 Document and validate client task requirements, performance criteria and scope of work with client</p> <p>1.7 Confirm available resources and budget with client</p>
2. Select tools	<p>2.1 Identify relevant site <i>server tools</i> with reference to requirements</p> <p>2.2 Review and evaluate tools with reference to task requirements and required site functionality</p> <p>2.3 Load and configure server tools according to vendor guidelines and client requirements</p> <p>2.4 Use server tools to test equipment</p>
3. Use tools	<p>3.1 Use server tools to maintain or update relevant functionality</p> <p>3.2 Coordinate and implement <i>procedures</i></p> <p>3.3 Use server tools according to vendor guidelines to achieve relevant task requirements</p>
4. Review server tools and task requirements	<p>4.1 Monitor, analyse and evaluate organisational procedures</p> <p>4.2 Review site server configuration related to client task requirements and make adjustments to configuration</p> <p>4.3 Review server tools according to client task requirements</p> <p>4.4 Use <i>site-analysis software</i> to validate server outcomes</p> <p>4.5 Create and use reports and other documentation for record keeping and auditing</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate and select products to suit a given business profile
- communication skills to:
  - communicate with clients
  - convey and clarify complex information
- literacy skills to:
  - interpret technical documentation, equipment manuals and specifications
  - write reports and related documentation
- planning and organisational skills to:
  - plan approaches to technical problems and management requirements
  - prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- technical skills to:
  - analyse and interpret technical aspects of implementation
  - analyse structured query language (SQL)
  - select appropriate site server tools to meet required specifications
  - use site-analysis software
  - use site server tools associated with relevant site server.

### Required knowledge

- business site features related to choice of tools
- functions and features of tools relevant to:
  - firewalls and proxy servers as required
  - hypertext transfer protocol (HTTP) servers as required
  - search engines as required
- security measures as required by site functionality
- tools and products in relation to site construction
- role of protocols related to features and functionality
- site-building considerations in relation to new versus established business.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select and use appropriate website server tools to maintain expected business performance and technical standards in an ebusiness environment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• server hardware</li> <li>• site server tools currently used in industry</li> <li>• existing ebusiness website</li> <li>• business expectations brief</li> <li>• appropriate standards and current legislation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of functions and features of site server tools</li> <li>• direct observation of candidate using site server tools to build, maintain and monitor transactions on an ebusiness site</li> <li>• review of reports and documentation prepared by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Task requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• building</li> <li>• customer tracking and profiling</li> <li>• database connectivity</li> <li>• ensuring secure transactions on a business site</li> <li>• hosting</li> <li>• monitoring</li> <li>• payment and delivery systems.</li> </ul>
<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b>Platform</b> may include:	<ul style="list-style-type: none"> <li>• Berkeley Software Distribution (BSD)</li> <li>• Linux</li> <li>• Windows server's WebSphere.</li> </ul>
<b>Software</b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised software</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>
<b>Integration requirements</b> may include:	<ul style="list-style-type: none"> <li>• data synchronisation</li> <li>• database implementation</li> <li>• hosting services</li> <li>• migration</li> <li>• monitor transactions</li> <li>• site server tools.</li> </ul>
<b>Server tools</b> may include:	<ul style="list-style-type: none"> <li>• development</li> <li>• disaster recovery</li> <li>• disk management</li> <li>• firewalls</li> <li>• maintenance</li> <li>• network management</li> <li>• proxy servers</li> <li>• purchasing and payment</li> <li>• search engines</li> </ul>

	<ul style="list-style-type: none"> <li>• security</li> <li>• server benchmark</li> <li>• storage and backup</li> <li>• user management.</li> </ul>
<i>Procedures</i> may include:	<ul style="list-style-type: none"> <li>• check points and sign-offs with documented procedures and templates</li> <li>• dispute resolution and modification procedures</li> <li>• implementation of financial control mechanisms</li> <li>• communication with stakeholders</li> <li>• processes for determining size and cost.</li> </ul>
<i>Site-analysis software</i> may include:	<ul style="list-style-type: none"> <li>• AccessWatch</li> <li>• CyberSpyder</li> <li>• InContext WebAnalyzer</li> <li>• Linkbot Pro</li> <li>• WebCounter</li> <li>• WebTrends Log Analyzer.</li> </ul>

## ICAWEB510A Analyse information and assign meta-tags

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse material and assign meta-tags to ensure the accurate and consistent retrieval of information by users.

### Application of the Unit

This unit applies to individuals in a range of information and communications technology (ICT) areas who are required to allocate appropriate meta-tags to information.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Identify requirements for meta-tags	<p>1.1 Identify scope and uses of material from previous and existing business and <i>stakeholder</i> requirements process</p> <p>1.2 Determine appropriate type and structure of meta-tags, taking into account identified <i>client</i> needs, requirements and expectations</p> <p>1.3 Identify and incorporate new or contemporary client requirements and expectations</p>
2. Analyse material	<p>2.1 Use analysis and description tools, standards, precedents and techniques that are appropriate, given the nature of the material</p> <p>2.2 Ensure analysis of subject content of the material reflects expected client usage requirements</p> <p>2.3 Clearly distinguish significant information from minor information</p> <p>2.4 Ensure concepts derived from analysis of material are appropriate to the business requirements and intended use</p>
3. Create meta-tags	<p>3.1 Develop meta-tags using appropriate <i>software</i></p> <p>3.2 Ensure meta-tags represent concepts appropriately, depending on the overall purpose and intended use of the material</p> <p>3.3 Ensure meta-tags conform to general conventions and business rules</p> <p>3.4 Develop reference structure of descriptors, where required to display relationships to assist clients</p> <p>3.5 Enhance meta-tags to meet identified client needs</p>
4. Test and monitor meta-tagging practices and procedures	<p>4.1 Test meta-tagging of material and make changes, if necessary</p> <p>4.2 Regularly review meta-tagging practices and procedures to ensure that client needs are being met</p> <p>4.3 Regularly review industry developments in meta-tagging and take appropriate action to improve practices</p> <p>4.4 Check meta-tags regularly for internal consistency and compliance with established structure, rules and authorities</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse materials for subject content
  - interpret client requirements
- communication skills to liaise with clients and staff
- planning and organisational skills to:
  - evaluate business requirements
  - improve meta-tagging practices over time in line with industry developments
- technical skills to:
  - conduct modelling of data processes
  - use analysis and description tools
  - use meta-tagging tools
  - write hypertext markup language (HTML).

### Required knowledge

- business operating systems
- client business domain
- data modelling
- database management system (DBMS) fundamentals
- decision support systems
- document indexing and search engines
- functions and features of databases
- meta-standards, including Dublin core and simple HTML ontology extensions
- OHS principles and responsibilities.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use appropriate techniques to analyse materials for meta-tagging</li> <li>• use software to create meta-tags</li> <li>• enhance and update meta-tags in line with client needs and industry developments.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• information and materials</li> <li>• business requirements</li> <li>• metadata software</li> <li>• project-related documentation</li> <li>• OHS information</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate creating meta-tags, and testing them</li> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• general conventions and business rules for meta-tagging</li> <li>• how reference structure of descriptors can assist clients</li> </ul> </li> <li>• review of meta-tags.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Stakeholder</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsor</li> <li>• user.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisation</li> <li>• individual</li> <li>• internal department</li> <li>• internal employee.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• Meta Builder 2</li> <li>• Tag master.</li> </ul>

# ICAWEB511A Implement quality assurance process for websites

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and conduct a planned and systematic pattern of actions required to provide adequate confidence that websites conform to relevant standards and fulfil client expectations.

## Application of the Unit

This unit applies to individuals in the web area who are required to ensure the quality of websites.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish standards	<p>1.1 Identify appropriate regulatory, accessibility, industry and organisational compliance standards</p> <p>1.2 Develop, quantify, document and disseminate measurable <b>performance standards</b>, from those standards, for all documents</p> <p>1.3 Establish a centralised, distributed or combined quality assurance methodology</p> <p>1.4 Determine the specification from which the website was developed</p> <p>1.5 Establish guidelines for controlling, updating and loading new <b>content</b> onto the website</p>
2. Apply standards and track performance	<p>2.1 Apply all processes as an integral part of the website development process</p> <p>2.2 Validate site, updates and new content against performance standards, using a wide variety of <b>browsers</b> and <b>tools</b></p> <p>2.3 Document and disseminate results</p> <p>2.4 Provide feedback to web authors, <b>users</b> and administrators on a routine and regular basis</p>
3. Develop and apply continuous improvement process	<p>3.1 Provide performance standards feedback to developers, maintainers and administrators</p> <p>3.2 Identify below-average or unacceptable performance standards and apply appropriate measures in order to improve performance</p> <p>3.3 Provide channels for interaction, feedback and suggestions from site users, administrators, developers and maintainers</p> <p>3.4 Conduct responses to interaction, feedback and suggestion providers</p> <p>3.5 Develop procedures to identify whether feedback and suggestions are applied and acted upon</p> <p>3.6 Conduct regular benchmark reviews based on improved performance and disseminate revised benchmarks</p>
4. Document quality assurance practices	<p>4.1 Document quality assurance procedures and processes</p> <p>4.2 Document quality assurance results</p> <p>4.3 Document and control changes to procedures, processes and results</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse websites for compliance to legislation and best practice
- communication skills to communicate with clients and web developers
- literacy skills to read standards and produce reports
- technical skills to:
  - develop websites
  - test website design to improve the design and maintenance processes and to ensure that all the client's elements are incorporated into the design
  - test website implementation.

### Required knowledge

- business process design and customer and business liaison
- copyright and intellectual property relating to websites
- provisions of privacy legislation relating to websites
- website accessibility and equity legislation
- website architecture and website security
- workload metrics and technical performance measurement.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify, establish and implement appropriate quality assurance standards to the website</li> <li>• develop and implement a continuous improvement process</li> <li>• develop quantitative standards</li> <li>• document quality assurance standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• web servers</li> <li>• ebusiness website</li> <li>• analysis software</li> <li>• automatic testing software</li> <li>• documentation for appropriate regulatory, industry compliance and accessibility standards</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess knowledge of: <ul style="list-style-type: none"> <li>• quality assurance</li> <li>• industry website standards</li> </ul> </li> <li>• review of candidate's performance benchmarks</li> <li>• evaluation of documented processes and procedures.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Performance standards</i></b> may include:	<ul style="list-style-type: none"> <li>• content accuracy and consistency</li> <li>• response time and latency</li> <li>• server response time</li> <li>• structural quality</li> <li>• time lines.</li> </ul>
<b><i>Content</i></b> may include:	<ul style="list-style-type: none"> <li>• background articles</li> <li>• company information</li> <li>• copyright and disclaimer notices</li> <li>• customer only information</li> <li>• customer-specific information</li> <li>• error messages</li> <li>• feedback mechanisms</li> <li>• forms</li> <li>• frequently asked questions</li> <li>• hyperlink titles</li> <li>• information</li> <li>• instructions</li> <li>• interactive features</li> <li>• product information</li> <li>• ratings, rankings, testimonials and quotes from reviews</li> <li>• reference pages</li> <li>• site map</li> <li>• what's new.</li> </ul>
<b><i>Browsers</i></b> may include:	<ul style="list-style-type: none"> <li>• Galleon</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Phoenix.</li> </ul>
<b><i>Tools</i></b> may include:	<ul style="list-style-type: none"> <li>• cascading style sheet (CSS) check</li> <li>• hypertext markup language (HTML) validating</li> <li>• link checking software</li> </ul>

	<ul style="list-style-type: none"><li>• spell check.</li></ul>
<i>Users</i> may include:	<ul style="list-style-type: none"><li>• person within a department</li><li>• department within the organisation</li><li>• third party.</li></ul>

## ICAWEB512A Administer business websites and servers

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain and manage business websites and associated servers.

### Application of the Unit

This unit applies to middle managers, such as multimedia developers, web strategists or project managers, responsible for managing business websites and associated servers.

They provide technical advice, guidance and leadership in resolution of specified problems and their role may involve responsibility for others.

The role involves leading development of strategic reviews, and preparing a security plan, as well as preparing for future growth and requirements. Related tasks include evaluating and testing security website metrics and performance indicators.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Maintain business website and contents</p>	<p>1.1 Establish personnel policy and procedures for managing access and changes to aspects of the business website</p> <p>1.2 Design and start a training program for teaching staff how to use procedures and policies as well as making changes to the business website</p> <p>1.3 Evaluate and test site-analysis software on a non-live <i>server</i> to verify features and functions are safe for use on a live server</p> <p>1.4 Generate site summary reports in line with the organisational quality management program or guidelines</p> <p>1.5 Review reports found to have generated security flaws</p> <p>1.6 Check links for functionality and ongoing relevance</p> <p>1.7 Modify web pages according to changing business requirements and analysis of site summary report</p> <p>1.8 Maintain and debug <i>database</i> information according to site and information requirements</p>
<p>2. Maintain business security of the website</p>	<p>2.1 Establish a security response procedure to control information placed on the business website by developers, designers and end users</p> <p>2.2 Develop a <i>security plan</i></p> <p>2.3 Test site security according to organisational requirements of the security plan</p> <p>2.4 Maintain site security using information from security vendors and technical media outlets</p>
<p>3. Monitor business website performance</p>	<p>3.1 Select <i>server analysis tools</i> with reference to organisational requirements and the range of functionalities requiring monitoring</p> <p>3.2 Determine business website load metrics and performance indicators in line with organisational requirements</p> <p>3.3 Measure business website server performance with server analysis tools</p> <p>3.4 Identify and document business options for performance improvement</p> <p>3.5 Submit website server performance reports to <i>client</i></p>
<p>4. Undertake capacity planning</p>	<p>4.1 Determine future peak volumes by measuring page usage and volume access</p> <p>4.2 Develop an upgrade program to deal with increasing load and performance issues</p>

	<p>4.3 Set performance benchmarks to take into consideration possible future scenarios for each load metric</p> <p>4.4 Determine options for upgrade path for <i>equipment</i> needs based on research and business website performance growth forecasting</p>
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - evaluate site-analysis software
  - select server analysis tools according to organisational requirements
- communication skills to:
  - facilitate training programs for staff
  - liaise with vendors
- literacy skills to write reports and planning documentation
- planning skills to forecast business website-performance growth
- technical skills to:
  - use:
    - current forecasting methodology for identifying traffic peaks
    - current site server
    - integrity-checking software
    - intrusion-detection software
    - traffic-tracking software
    - web server log-file analysis
  - maintain:
    - firewalls
    - virtual private network (VPN) gateways
  - respond to request for proposals (RFPs).

### Required knowledge

- bottlenecks and methods of correction
- electronic commerce modelling language (ECML)
- queuing systems
- standard generalised markup language (SGML) and associated standards
- user request classes
- website architecture
- website security issues
- workload metrics.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate and test site-analysis software</li> <li>• maintain site security</li> <li>• monitor website performance</li> <li>• develop upgrade program to cater for business website performance growth.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site servers and web servers where tasks may be performed</li> <li>• business website</li> <li>• site server and analysis software currently used in industry</li> <li>• requirements and business-planning documentation</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate testing site security according to security plan</li> <li>• verbal or written questioning to assess candidate's knowledge of features of website architecture and security issues</li> <li>• review of documentation prepared by candidate, including security plan, training program, website server performance reports and upgrade program.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Server</i></b> may include:	<ul style="list-style-type: none"> <li>• Apache HTTP server</li> <li>• email servers</li> <li>• file and print servers</li> <li>• file transfer protocol (FTP) servers</li> <li>• IBM VisualAge and WebSphere</li> <li>• iPlanet-Enterprise</li> <li>• Lotus Domino</li> <li>• Microsoft Internet Information Server (Microsoft IIS)</li> <li>• NetDynamics</li> <li>• Netscape Enterprise server, Netscape FastTrack, Netscape eBusiness</li> <li>• proxy servers</li> <li>• Sun Microsystems iPlanet web server</li> <li>• Sun Microsystems Java web server</li> <li>• Zope.</li> </ul>
<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase.</li> </ul>
<b><i>Security plan</i></b> may include:	<ul style="list-style-type: none"> <li>• alerts relating to the security objectives of the organisation</li> <li>• audits</li> <li>• privacy</li> <li>• standards: <ul style="list-style-type: none"> <li>• archival</li> <li>• backup</li> <li>• network</li> </ul> </li> <li>• theft</li> <li>• viruses.</li> </ul>
<b><i>Server analysis tools</i></b>	<ul style="list-style-type: none"> <li>• Apache Jmeter</li> <li>• Apache JSSI.</li> </ul>

may include:	
<i>Client</i> may include:	<ul style="list-style-type: none"><li>• employee</li><li>• external organisation</li><li>• individual</li><li>• internal department.</li></ul>
<i>Equipment</i> may include:	<ul style="list-style-type: none"><li>• hard drives</li><li>• hubs</li><li>• modems or other connectivity devices, including digital subscriber line (DSL) modems</li><li>• monitors</li><li>• other peripheral devices</li><li>• personal computers</li><li>• personal digital assistants (PDAs)</li><li>• printers</li><li>• switches</li><li>• workstations.</li></ul>

## Unit Sector(s)

Web

## ICAWEB515A Implement and use web services

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and use web services.

### Application of the Unit

This unit applies to software developers responsible for implementing and supporting web services for building distributed applications.

It relates to the specialist skills and knowledge specific to the implementation and consumption of web services, the related communications protocols and the associated XML technologies used in web services. This unit does not address the specialist programming skills or knowledge required for web services, these are addressed in other units of competency.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Use eXtensible markup language (XML) to provide information	<p>1.1 Create <i>XML data structures</i> from <i>various data sources</i></p> <p>1.2 Manipulate XML data structures using a <i>common application programming interface</i> (API)</p> <p>1.3 Use namespaces to scope elements from multiple XML documents</p> <p>1.4 Validate XML data structures using a <i>schema</i></p> <p>1.5 <i>Map and transform</i> an XML document from one schema to another</p>
2. Use the web service description language (WSDL) to promote a web service	<p>2.1 Understand the purpose of the WSDL</p> <p>2.2 Identify the <i>three main elements</i> that comprise the web service description language</p> <p>2.3 Build a WSDL file</p> <p>2.4 Provide web access to a WSDL file via a uniform resource locator (URL)</p>
3. Use universal description, discovery, and integration (UDDI) to locate and retrieve information about a public web service	<p>3.1 Identify the purpose of UDDI</p> <p>3.2 Understand the differences between public, extra-enterprise and intra-enterprise UDDI registry deployments</p> <p>3.3 Locate and retrieve information about a <i>public web service</i> using UDDI</p> <p>3.4 Identify the relationship between WSDL and UDDI</p>
4. Access web services using the simple object access protocol (SOAP)	<p>4.1 Identify the purpose of SOAP</p> <p>4.2 Determine the relationship between UDDI and SOAP</p> <p>4.3 Identify the basic structure and processing of a SOAP message</p> <p>4.4 Retrieve an XML document from a public web service using SOAP</p>
5. Implement a web service	<p>5.1 Outline a basic web service architecture</p> <p>5.2 Implement, test and <i>publish</i> a web service</p> <p>5.3 Incorporate and test a web service into an application</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse functional requirements
  - assess proposed web service architectures within the context of existing enterprise technologies, infrastructure and industry standards
  - determine appropriate enabling technologies required to implement a web service's functional requirements
  - determine appropriate web service architectures as prescribed by the selected proprietary or industry standards
  - determine development environments appropriate to planned web service architectures and functionality
- communication skills to:
  - describe and evaluate web service architectures with system analysts and enterprise architects
  - negotiate enterprise web service requirements with clients
  - negotiate resource requirements, project timeframes and project deliverables
  - propose web service functionality to meet the business needs of clients
- learning skills to:
  - acquire the skills and knowledge required for the implementation of web services
  - stay at the cutting edge of industry developments and industry standards
- literacy skills to:
  - interpret associated industry and web service standards
  - interpret existing enterprise technology infrastructure documentation
  - write functional requirement specifications for a web service
- planning and organising skills to:
  - plan an effective solution for a web service
  - organise resources, documentation and infrastructure elements required for the implementation of a web service
- problem-solving skills to:
  - debug code, identify code bugs and resolve all code exceptions
  - identify and implement solutions to problems with web service architecture and functionality
  - identify problems with XML document schemas and implement solutions
  - recommend solutions to problems or deficiencies associated with the implementation of web services
- research skills to:
  - enhance knowledge of industry standards and trends related to web service architectures and enabling technologies
  - identify and locate sources of information that provide solutions to technical problems

- identify sources of information and documentation required to plan and implement a web service
- technical skills to:
  - implement complex code algorithms required for web service functionality
  - implement exception handling routines in code
  - re-factor code to improve the efficiency of the code
  - use an integrated development environment to build web service components
  - write code to implement a web service.

### **Required knowledge**

- integrated-development environments
- web development technologies
- web-service architecture.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• transform data from relational or other native data sources into XML</li> <li>• validate an XML document using a predefined schema</li> <li>• provide access to business functionality via a WSDL file</li> <li>• locate a public web service business function and include it in a website using UDDI and SOAP</li> <li>• implement a web service:             <ul style="list-style-type: none"> <li>• according to business requirement specifications</li> <li>• that adheres to industry standards.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• web service business requirement specifications</li> <li>• industry standards published by the W3C</li> <li>• platform-specific documentation and help files describing the syntax and use of proprietary technologies</li> <li>• a simulated development environment incorporating the following elements:             <ul style="list-style-type: none"> <li>• relational database server</li> <li>• integrated development environment (IDE), including related frameworks, APIs and associated proprietary classes required to implement web services and their enabling technologies</li> <li>• web server</li> <li>• web browsers</li> <li>• XML editors</li> <li>• XPath testing utilities</li> </ul> </li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• written or verbal questioning to assess candidate's knowledge of XML data structures, syntax and validation techniques</li> <li>• observation of candidate demonstrating:</li> </ul>

	<ul style="list-style-type: none"> <li>• data transformation from relational data to validated XML</li> <li>• the use of XPath queries to extract information from XML or transform XML data structures</li> <li>• evaluation of candidate's project incorporating all elements of this unit of competency, including both web service publication and web service consumption.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>XML data structures</i></b> may include:	<ul style="list-style-type: none"> <li>• electronic business XML (ebXML)</li> <li>• XML 1.0 specification produced by the world wide web consortium (W3C).</li> </ul>
<b><i>Various data sources</i></b> may include:	<ul style="list-style-type: none"> <li>• comma separated value files</li> <li>• native data sources, such as ASCII or the Java-type system</li> <li>• object linking and embedding (OLE) DB data sources, such as spreadsheet files</li> <li>• relational database management systems, such as:             <ul style="list-style-type: none"> <li>• IBM DB2</li> <li>• Microsoft Structured Query Language (MS SQL) server</li> <li>• Microsoft Access</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Ingres.</li> </ul> </li> </ul>
<b><i>Common application programming interface</i></b> may include:	<ul style="list-style-type: none"> <li>• ASP.Net and MSXML and associated APIs</li> <li>• Java XML API (JAXP)</li> <li>• simple API for XML (SAX)</li> <li>• document object model as described by W3C recommendation.</li> </ul>
<b><i>Schema</i></b> may include:	<ul style="list-style-type: none"> <li>• document type definition (DTD) schema file</li> <li>• XML schema definition (XSD) file as described by W3C recommendation</li> <li>• XML-data reduced (XDR) schema definition file.</li> </ul>
<b><i>Map and transform</i></b> may include:	<ul style="list-style-type: none"> <li>• eXtensible stylesheet language transformations (XSLT)</li> <li>• XLink</li> <li>• XPath 1.0 and XPath 2.0 queries</li> <li>• XPointer</li> <li>• XQuery.</li> </ul>
<b><i>Three main elements</i></b> may include identifying:	<ul style="list-style-type: none"> <li>• contents and data types of web service messages</li> <li>• operations of web service messages</li> <li>• protocols of web service messages.</li> </ul>
<b><i>Public web service</i></b> may include:	<ul style="list-style-type: none"> <li>• public web services located through UDDI registries.</li> </ul>

<b><i>Publish</i></b> may include:	<ul style="list-style-type: none"><li>• limiting access to the web service to a local intranet</li><li>• making the web service available to the internet via a public UDDI registry</li><li>• simulating the publication of the web service through a virtual machine infrastructure.</li></ul>

Web

# ICAWEB516A Research and apply emerging web technology trends

## Modification History

Version	Comments
ICAWEB516A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to keep up-to-date with and apply emerging web technology.

## Application of the Unit

This unit applies to web developers and designers who are responsible for implementing the most up-to-date web application.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify emerging web technology trends and their uses	1.1 Review new developments in web technology 1.2 Identify appropriate web technology to meet the needs of the web application
2. Implement new web technology trends in a portfolio	2.1 Create <b>code</b> to apply the web technology 2.2 Test web application in a variety of <b>browsers</b> and rectify problems that arise

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify dynamic client and server-side requirements
- communication skills to liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - follow documented instruction for new technology
  - interpret workplace instructions and other technical documents
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the created code
  - select the most efficient and effective algorithms
- research skills to:
  - find solutions to encountered problems
  - keep up-to-date with industry trends
- technical skills to:
  - apply web programming concepts
  - create hypertext markup language (HTML) and eXtensible hypertext markup language (XHTML) pages
  - create software in a variety of languages, including client and server-side languages
  - create aesthetically pleasing web pages.

### Required knowledge

- internet technology
- principles of analysis and design
- programming control structures, object-oriented programming
- web programming concepts, including:
  - hypertext transfer protocol (HTTP)
  - stateless programming
  - session management
  - authentication and web security
  - client-side programming.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• research, investigate and apply emerging web technology trends to a web application.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs</li> <li>• development environment</li> <li>• server access</li> <li>• database server</li> <li>• internet access</li> <li>• browsers.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning regarding web technology trends</li> <li>• research report of web technology trends</li> <li>• review of the candidate explaining the latest web technology trends and their application to a client</li> <li>• evaluation of a web application using web technology trends.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English</p>

	<p>speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## BSBCMM101A Apply basic communication skills

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to develop communication skills in the workplace. It covers gathering, conveying and receiving information, along with completing assigned written information under direct supervision.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals developing basic skills and knowledge of workplace communication in preparation for working in a broad range of settings.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify workplace communication procedures	1.1. Identify organisational communication requirements and <b><i>workplace procedures</i></b> with assistance from <b><i>appropriate people</i></b> 1.2. Identify appropriate <b><i>lines of communication</i></b> with supervisors and colleagues 1.3. Seek advice on the <b><i>communication method/equipment</i></b> most appropriate for the task
2. Communicate in the workplace	2.1. Use effective questioning, and active listening and speaking skills to gather and convey information 2.2. Use appropriate non-verbal behaviour at all times 2.3. Encourage, acknowledge and act upon constructive feedback
3. Draft written information	3.1. Identify relevant procedures and formats for written information 3.2. Draft and present assigned <b><i>written information</i></b> for approval, ensuring it is written clearly, concisely and within designated timeframes 3.3. Ensure written information meets required <b><i>standards</i></b> of style, format and detail 3.4. Seek assistance and/or feedback to aid communication skills development

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions, to receive feedback, and to convey messages clearly and concisely
- culturally appropriate communication skills to relate to people from diverse backgrounds and to people with diverse abilities
- literacy skills to identify work requirements, to draft written information and to process basic, relevant workplace documentation
- problem-solving skills to solve routine problems related to the workplace, under direct supervision.

#### Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as privacy laws
- organisational policies, plans and procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• clear, concise and correct verbal and written communication</li> <li>• promptly and appropriately following instructions</li> <li>• knowledge of relevant legislation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• access to examples of documents relating to workplace communication policies and procedures.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of organisational policies, plans and procedures</li> <li>• review of written information.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Workplace procedures</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• answering telephone calls</li> <li>• following instructions</li> <li>• informal discussions</li> <li>• requests from colleagues</li> <li>• using internet and email</li> <li>• using voice mail</li> <li>• workplace procedures related to specific tasks</li> </ul>
<p><b><i>Appropriate people</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• other staff members</li> <li>• supervisors, mentors, trainers or assessors</li> </ul>
<p><b><i>Lines of communication</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• formal and informal means</li> <li>• verbal or written</li> </ul>
<p><b><i>Communication method/equipment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• computer network systems</li> <li>• facsimile machines</li> <li>• personal computer equipment including hardware, keyboards, software and communication packages</li> <li>• telephones</li> </ul>
<p><b><i>Written information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• electronic mail</li> <li>• facsimiles</li> <li>• general correspondence or standard/form letters and memos</li> <li>• handwritten and printed materials</li> <li>• telephone messages or general messages</li> </ul>
<p><b><i>Standards</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• organisational policies</li> <li>• standards set by workgroup</li> </ul>

<b>Competency field</b>	Communication - Interpersonal Communication
-------------------------	---

### Co-requisite units

<b>Co-requisite units</b>		

## BSBCRT401A Articulate, present and debate ideas

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to articulate, present and debate ideas.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who need to present and debate ideas in a work or broader life context.</p> <p>While the unit shares some similarities with units such as BSBCMM401A Make a presentation or BSBRES401A Analyse and present research information, the focus is quite different.</p> <p>This unit focuses on the creative ways in which ideas can be presented to provoke response, reaction and critical debate. Risk taking, storytelling and participation in critical debate are key features of the unit. Ideas might be quite complex in nature and relate to new products, services, creative works or new ways of doing things.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse ideas for communication to others	1.1. Distil <i>key themes, messages and positions</i> to aid in clarity of thought and presentation 1.2. Reflect on <i>different ways of communicating ideas</i> for different purposes and to different people 1.3. Identify the enabling skills and attributes of <i>individuals</i> who can effectively participate in discussions about ideas
2. Provoke response and reaction	2.1. Explore and use <i>different techniques to engage, fascinate and involve others</i> in the process of communication and exchange 2.2. Explore the ways that storytelling can be used to communicate ideas 2.3. Create <i>innovative approaches to different communication challenges</i> 2.4. Be prepared to take <i>risks</i> in the way ideas are presented 2.5. Identify <i>specific ways to provoke and encourage response</i> in particular individuals or groups
3. Debate and discuss ideas	3.1. Present and argue <i>substantiated positions</i> on ideas 3.2. Be open to critical analysis of own ideas and to the ideas of others 3.3. Identify and participate in conversations that challenge and explore different concepts and approaches, and generate new ideas 3.4. Respond to questions about ideas with confidence and relevant information 3.5. Reflect on and appraise the views of others, and use to refine ideas and to embrace new ideas

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to present ideas in ways that engage and provoke response, and to debate and discuss potentially complex concepts
- creative thinking skills to develop responses and new ideas in response to feedback
- learning and self-management skills to actively seek feedback and to learn from others
- literacy skills to develop and interpret information dealing with complex ideas.

#### Required knowledge

- creative and different ways of expressing and communicating ideas, and of making an opportunity pitch
- different ways in which individuals receive and respond to ideas and information, and what influences their response
- nature and role of risk taking in the presentation and debate of ideas
- role of storytelling in communicating ideas and key storytelling techniques
- techniques to tailor comments to particular audiences.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creative and articulate presentations that provoke interest and response</li> <li>• active and confident participation in critical debate and discussion of ideas.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• presentations to others about ideas</li> <li>• discussion and debate with others about ideas.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• direct observation of candidate participation in presentations and debates</li> <li>• evaluation of candidate's skills in responding to new and different communication situations</li> <li>• evaluation of candidate telling a story, making a pitch or presenting ideas to complete strangers in 'different' environments (e.g. in a restaurant, in the corridor, on a bus, in a lift).</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Key themes, messages and positions</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• essence of the idea</li> <li>• influences on the idea</li> <li>• relationship of idea to established tradition or practice</li> <li>• relationship of idea to new and emerging technology</li> <li>• problems and challenges with the idea</li> <li>• reasons why the idea should be supported</li> <li>• selling a creative team</li> <li>• selling creative ideas</li> <li>• selling self as a creative person</li> <li>• way the idea was developed</li> <li>• who had developed the idea and why</li> </ul>
<p><b><i>Different ways of communicating ideas</i></b> may be:</p>	<ul style="list-style-type: none"> <li>• aural</li> <li>• group presentation/pitch</li> <li>• in a forum</li> <li>• in elevators</li> <li>• one-on-one discussion</li> <li>• on planes</li> <li>• oral</li> <li>• remote (e.g. video conferencing)</li> <li>• visual</li> </ul>
<p><b><i>Individuals</i></b> may be:</p>	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• community members</li> <li>• friends</li> <li>• gallery owners</li> <li>• interviewers (media)</li> <li>• investors</li> <li>• mentors</li> <li>• panels</li> <li>• peers</li> <li>• students</li> <li>• supervisors or managers</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Different techniques to engage, fascinate and involve others</i> may include:	<ul style="list-style-type: none"> <li>• blogging</li> <li>• media releases</li> <li>• multimedia presentations</li> <li>• music</li> <li>• photography</li> <li>• storytelling</li> <li>• viral marketing</li> <li>• visual depictions</li> </ul>
<i>Innovative approaches to communication challenges</i> may involve ability to:	<ul style="list-style-type: none"> <li>• get across all key messages in a short time</li> <li>• present on unfamiliar topic</li> <li>• respond to impromptu situations</li> <li>• structure information quickly and effectively</li> </ul>
<i>Specific ways to provoke and encourage response</i> may include:	<ul style="list-style-type: none"> <li>• use of engaging objects to explain idea</li> </ul>
<i>Risks</i> may involve:	<ul style="list-style-type: none"> <li>• acknowledging own limits and difficulties</li> <li>• asking for help</li> <li>• breaking out of accepted norms</li> <li>• divulging personal information or vulnerabilities</li> <li>• failing and learning from it</li> <li>• incorporating humour</li> <li>• taking a fun approach with a potentially serious audience</li> </ul>
<i>Substantiated positions</i> may be positions which are:	<ul style="list-style-type: none"> <li>• grounded in appropriate research</li> <li>• result of rational and logical thought</li> <li>• subjected to the analysis of others (e.g. peer review)</li> <li>• supported by relevant information</li> </ul>

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who originate and develop concepts of some complexity and progress that concept to the point where it can be implemented. Individuals may be employed by organisations, be sub contractors or consultants brought in by companies to work on specific projects, or be individuals or part of a team working independently.</p> <p>Concepts could be developed for any business or community activity or process such as marketing campaigns, staff development programs, information technology and communication systems. This unit is also highly relevant to practitioners in the creative industries who develop products such advertising campaigns, radio and television programs, entertainment events, films, exhibitions and digital media products.</p> <p>A person undertaking this role would operate with a high degree of autonomy and at a senior level if working within an organisation. However, the process of generating concepts and ideas is collaborative in nature.</p> <p>Skills associated with writing proposals to support concept development are covered in BSBWRT401A Write complex documents.</p>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate and explore needs and opportunities	<p>1.1. Research and evaluate <i>existing information that informs new concept development</i></p> <p>1.2. Where appropriate, identify and use gaps in current range of <i>products, programs, processes or services</i> as the catalyst for generating new ideas or concepts</p> <p>1.3. Expand the potential of new ideas through <i>exploration of opportunities beyond the obvious</i></p> <p>1.4. Identify <i>factors</i> that could have an impact on ideas or concepts to be developed, including potential for commercialisation</p> <p>1.5. Determine whether other players are filling identified gaps or investigating similar opportunities</p> <p>1.6. Develop preliminary ideas on innovative and different ways to address needs and opportunities</p> <p>1.7. In consultation with <i>relevant stakeholders</i>, agree on broad parameters for developing ideas and concepts to meet market requirements</p>
2. Develop a range of creative approaches	<p>2.1. Use a range of <i>creative thinking techniques</i> to generate innovative and creative concepts to address identified needs</p> <p>2.2. Challenge, test and experiment with different concepts and ideas as part of a collaborative process</p> <p>2.3. Evaluate concepts in terms of their suitability for the target audience or purpose, their feasibility and their commercial potential</p> <p>2.4. Take account of social, ethical and environmental issues as concepts and ideas are generated and discussed</p> <p>2.5. Identify <i>resources</i> required to achieve desired creative and innovative outcomes</p> <p>2.6. Evaluate the effectiveness of different strategies for achieving desired outcomes</p> <p>2.7. Select concepts or approaches that achieve required outcomes in an innovative and feasible way</p> <p>2.8. Present proposed concepts or approaches in an appropriate <i>format</i></p>
3. Refine concepts	<p>3.1. Ensure concept development process is open to ongoing refinement and testing</p> <p>3.2. Seek input and feedback on concepts from relevant stakeholders</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Seek specialist advice on creative and technical aspects of proposals as required</p> <p>3.4. Compare concepts with best practice examples of similar products, programs, processes or services</p> <p>3.5. Use a range of <i>creative and practical criteria</i> to determine the advantages and disadvantages of different concepts</p> <p>3.6. Evaluate <i>constraints</i> on the realisation of concepts or ideas</p> <p>3.7. Refine proposals based on analysis and feedback</p>
4. Develop concepts to an operational level	<p>4.1. Use refined concepts as the basis for developing detailed <i>implementation specifications</i></p> <p>4.2. Present specifications to relevant parties for approval, funding or endorsement</p> <p>4.3. Reflect on methodology used to generate concepts and ideas and note ways of improving this in the future</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and teamwork skills to work collaboratively on ideas and to articulate the rationale for concepts in ways that promote constructive discussion with others
- creative thinking skills to generate a range of innovative concepts and ideas, to use lateral thinking and to take a visionary approach to developing concepts and ideas
- initiative and enterprise skills to pro-actively identify market requirements
- planning and organising skills to take account of practical issues for concept implementation
- self-management skills to meet deadlines.

#### Required knowledge

- broad context in which concepts are being developed
- cultural, social and environmental issues and impacts to be considered in developing new concepts
- issues and requirements to commercialise the concept
- legal requirements that affect work in a given industry context
- practical and operational issues to be considered in a specific work or community context
- range of broad practical and operational issues that determine whether a concept can be implemented (in any context)
- techniques for generating creative ideas and solutions, and for translating these ideas into workable concepts.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development of at least two concepts, substantiated and supported with sufficient information to allow for implementation to occur</li> <li>• generation of concepts and ideas that provide innovative solutions to identified issues</li> <li>• knowledge of legal requirements that affect work in a given industry context.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to the full range of background information required to evaluate the operational factors that will affect the implementation of concepts</li> <li>• interaction with others to reflect the collaborative nature of the concept development process.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• evaluation of concepts generated by the candidate, of the processes used to generate and test the ideas and the material developed to support the concept</li> <li>• debate and discussion with the candidate to assess knowledge of the operational context and the broader factors that impact on concept development</li> <li>• evaluation of presentation or 'pitch' made by the candidate in relation to a particular concept</li> <li>• oral or written questioning to assess knowledge of cultural, social and environmental issues and impacts to be considered in developing new concepts.</li> </ul>
<b>Guidance information for assessment</b>	

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Existing information that informs new concept development</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• creative brief</li> <li>• market research</li> <li>• organisational vision</li> <li>• personal vision and creative aspiration</li> </ul>
<p><b><i>Products, programs, processes or services</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• art and craft works</li> <li>• advertising campaigns</li> <li>• business services and processes</li> <li>• designs</li> <li>• festivals</li> <li>• films</li> <li>• interactive digital media products</li> <li>• live entertainment productions or events</li> <li>• manufactured products</li> <li>• marketing and promotional campaigns</li> <li>• museum and gallery exhibitions</li> <li>• photoimaging services</li> <li>• radio or television programs</li> </ul>
<p><b><i>Exploration of opportunities beyond the obvious</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• challenging existing assumptions and preconceptions</li> <li>• considering radical change to the way things are done</li> <li>• exploring practice in a totally different industry context</li> <li>• investigating the use of new media</li> <li>• making connections between seemingly unrelated activities</li> </ul>
<p><b><i>Factors</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• codes of practice</li> <li>• content</li> <li>• cost effectiveness</li> <li>• features of interactive digital media products:             <ul style="list-style-type: none"> <li>• delivery platform</li> <li>• level of interactivity</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• look and feel</li> <li>• navigation</li> <li>• Indigenous laws and protocols</li> <li>• length of program or film</li> <li>• level of skill and understanding required for implementation</li> <li>• nature and size of target audience</li> <li>• organisational charter and policies</li> <li>• purpose: <ul style="list-style-type: none"> <li>• advertising or marketing</li> <li>• commercial</li> <li>• educational</li> <li>• entertainment</li> <li>• game</li> <li>• information</li> </ul> </li> <li>• relevant legislation, such as: <ul style="list-style-type: none"> <li>• copyright and intellectual property</li> <li>• privacy</li> </ul> </li> <li>• results of market research</li> <li>• revenue raised by existing market share</li> <li>• technical feasibility</li> </ul>
<i>Relevant stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• administrative staff</li> <li>• clients/customers</li> <li>• designers and other creative personnel</li> <li>• directors</li> <li>• external suppliers</li> <li>• information technology personnel</li> <li>• management</li> <li>• program producers</li> <li>• technical specialists</li> <li>• writers</li> </ul>
<i>Creative thinking techniques</i> may include:	<ul style="list-style-type: none"> <li>• brainstorming: <ul style="list-style-type: none"> <li>• bulletin board</li> <li>• buzz session</li> <li>• computer-aided</li> <li>• sequencing</li> <li>• stop and go</li> </ul> </li> <li>• Edward de Bono's six thinking hats</li> <li>• ego alter or heroes</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• graphic organisers:               <ul style="list-style-type: none"> <li>• concept fans</li> <li>• visual maps</li> <li>• webbing</li> </ul> </li> <li>• lateral thinking games</li> <li>• making associations</li> <li>• mind mapping</li> <li>• morphological analysis</li> <li>• sub-culture surfing</li> <li>• trigger words</li> <li>• use of metaphors and analogies</li> <li>• vision circles</li> <li>• word salads</li> <li>• visualisation</li> </ul>
<i>Resources</i> may include:	<ul style="list-style-type: none"> <li>• computer hardware and software</li> <li>• facilities</li> <li>• printed material</li> <li>• specialist equipment</li> <li>• specialist staff</li> <li>• training</li> </ul>
<i>Formats</i> may include:	<ul style="list-style-type: none"> <li>• application forms to funding bodies or sponsors</li> <li>• briefs for consultants</li> <li>• concept maps</li> <li>• electronic presentations to promote the concept</li> <li>• in-house proposal forms</li> </ul>
<i>Creative and practical criteria</i> may include:	<ul style="list-style-type: none"> <li>• cost-effectiveness</li> <li>• evaluation against competing priorities</li> <li>• fit with personal vision and aspirations</li> <li>• fit with strategic directions of organisation</li> <li>• fit with target market needs</li> <li>• how innovative the concept is</li> <li>• level of risk</li> <li>• potential benefits</li> <li>• technical feasibility</li> <li>• time to realise the concept</li> </ul>
<i>Constraints</i> may include:	<ul style="list-style-type: none"> <li>• availability of resources and equipment</li> <li>• availability of skilled experts and personnel</li> <li>• cost</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• level of technical difficulty</li> <li>• limited funding sources</li> <li>• limited potential for commercialisation</li> <li>• time</li> </ul>
<i>Implementation specifications</i> may include:	<ul style="list-style-type: none"> <li>• briefs for work</li> <li>• detailed specification of concept including purpose and content</li> <li>• operational plan with responsibilities and time lines</li> <li>• resources breakdown (financial, human and physical)</li> </ul>

## BSBEBU401A Review and maintain a website

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to undertake data analysis, review website content and update and maintain a website.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who have knowledge of the relationship between web-sites and the core functions of an organisation. They also have working knowledge and skills of performing basic updates to web site content. They may provide administrative support within an organisation or be other individuals who have been delegated this responsibility.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review website content and use	1.1. Monitor and analyse customer and user feedback in accordance with organisational timelines 1.2. Analyse automatically collected website data and identify trends 1.3. Make recommendations on changes to the website and its content in response to <i>feedback and data analysis</i> and approve changes scheduled for implementation 1.4. Review cost implications of the recommended changes to determine their viability
2. Update website	2.1. Replace superseded and inaccurate information with current information and add additional material in accordance with organisational requirements 2.2. Follow protocols for ensuring the accuracy and authenticity of information 2.3. Remove services no longer available or required and add new ones in accordance with organisational requirements 2.4. Check <i>off-line information</i> against that posted on the website and rectify discrepancies in accordance with organisational timelines 2.5. Follow <i>security procedures</i> for updating the website
3. Carry out non technical site maintenance	3.1. Analyse user feedback to confirm that faults have resulted from the site and are not user problems 3.2. Rectify faults and make improvements to the site in response to user feedback approved by the organisation 3.3. Add new web pages and/or active links and remove redundant pages and links in accordance with organisational requirements 3.4. Make site changes in response to changes in marketing strategy in accordance with organisational requirements and consideration of cost benefits

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to interpret policies and procedures, provide recommendations to others and to draft text in a logical sequence and structure appropriate for an online format
- numeracy skills for basic statistical analysis of website usage data
- communication skills for consultation with users and customers.

#### Required knowledge

- identification and overview knowledge of key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
- ethical principles
  - codes of practice
  - privacy laws
  - Occupational Health and Safety
- basic principles of website design and maintenance
- online security issues.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• website and its content continues to meet the requirements of the business after maintenance changes</li> <li>• identification and resolution of faults, errors and/or complaints with website.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and networked computers</li> <li>• documentation relating to analysis and strategies/policies for implementation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of authenticated documents from the workplace or training environment</li> <li>• demonstration of techniques in a workplace or simulated environment.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• marketing units</li> <li>• other information and communications technology units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Feedback and data analysis</i> may include:	<ul style="list-style-type: none"> <li>• feedback in relation to content, ease of navigations and appropriateness/usefulness of content</li> <li>• statistical data in relation to usage, including;             <ul style="list-style-type: none"> <li>• hits</li> <li>• page views</li> <li>• visits</li> </ul> </li> </ul>
<i>Offline information</i> may include:	<ul style="list-style-type: none"> <li>• information available in other forms, such as;</li> <li>• brochures</li> <li>• databases</li> <li>• knowledge management systems</li> <li>• news letters</li> <li>• records systems</li> </ul>
<i>Security procedures</i> may include:	<ul style="list-style-type: none"> <li>• access protocols</li> <li>• password protected areas</li> </ul>

## BSBEBU501A Investigate and design e business solutions

### Modification History

Release	Comments
Release 2	<p>New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i>.</p> <ul style="list-style-type: none"><li>• Amend e-business to ebusiness throughout</li></ul>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to evaluate e business models and strategies, and to incorporate the results of these evaluations into the design of an e business solution.

### Application of the Unit

This unit applies to individuals who possess skills and knowledge in a specialist business area, as well as knowledge of software and other technologies. They apply these skills and knowledge in the evaluation, selection and implementation of new strategies for business, which incorporate e business solutions. They may be managers responsible for overseeing these tasks as well as technical or other knowledge experts.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

*Elements describe the essential outcomes of a unit of competency.*

*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate e business opportunities	1.1.Undertake a competitive analysis to determine the likely impact <i>new capabilities</i> will have on industry sectors and competitors 1.2.Complete and assess <i>value chain analysis</i> to identify <i>processes and relationships</i> that may benefit from the adoption of ebusiness solutions 1.3.Identify <i>threats and opportunities</i> to ebusiness implementation and evaluate potential <i>contributions to the business</i> 1.4.Conduct resource analysis to identify cost and revenue implications in developing opportunities 1.5.Identify and evaluate legal and ethical issues relating to ebusiness opportunities
2. Evaluate e business models	2.1.Identify and analyse <i>business-to-business, business-to-consumer</i> , intra-organisational ebusiness applications and <i>ebusiness models</i> 2.2.Rank compatible ebusiness models in terms of their strengths and weaknesses, considering resourcing, technical and security requirements of each 2.3.Assess cost implications of implementation of ebusiness models 2.4.Determine an ebusiness model most appropriate in relation to business plan
3. Design an e business	3.1.Formulate purpose, objectives and values for the ebusiness 3.2.Identify target market, and value chain structure in accordance with chosen ebusiness model 3.3.Identify and obtain <i>technical needs and expertise</i> required to implement ebusiness model 3.4.Investigate and develop plan to address culture change issues to manage transition to an ebusiness
4. Implement an e business strategy	4.1.Develop <i>policies and guidelines</i> to support customers, supply chain and staff to ensure successful implementation 4.2.Monitor performance of business goals and adjust policies and procedures to respond to changing needs of customers, staff and supply chain 4.3.Review ebusiness systems and models, seeking feedback from users and personnel responsible for ebusiness implementation

ELEMENT	PERFORMANCE CRITERIA
	4.4. Incorporate evaluation results and feedback to improve future ebusiness strategies

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical and problem-solving skills to assess information and apply to identified business needs
- communication skills to collaborate with technical experts and other staff
- literacy skills to identify and interpret market and product information.

### Required knowledge

- features of a range of software and hardware systems
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - copyright
  - occupational health and safety
- organisational policies and procedures relating to the systems, products and/or service being worked with.

## Evidence Guide

*The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• evaluation of ebusiness opportunities involving new business models and not simply electronic versions of existing businesses</li> <li>• rationale and supporting evidence for choice of ebusiness solution</li> <li>• knowledge of relevant legislation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and networked computers</li> <li>• documentation relating to analysis and strategies/policies for implementation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of authenticated documents from the workplace or training environment</li> <li>• demonstration of techniques in a workplace or simulated environment.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBEBU502A Implement ebusiness solutions</li> <li>• IT use units.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>New capabilities</i></b> may include:	<ul style="list-style-type: none"> <li>• 24-hour operation</li> <li>• automated marketing efforts</li> <li>• communication</li> <li>• distribution channel</li> <li>• global reach</li> <li>• online customer service</li> <li>• online inventory</li> <li>• online payments</li> <li>• online purchasing</li> <li>• online sales systems</li> <li>• supply chain</li> </ul>
<b><i>Value chain analysis</i></b> may include:	<ul style="list-style-type: none"> <li>• an analysis of a series of primary activities, such as:             <ul style="list-style-type: none"> <li>• inbound logistics</li> <li>• marketing and sales</li> <li>• operations</li> <li>• outbound logistics</li> <li>• service support</li> </ul> </li> <li>• and their support activities, such as:             <ul style="list-style-type: none"> <li>• business infrastructure</li> <li>• human resources management</li> <li>• procurement</li> <li>• technological development</li> </ul> </li> </ul>
<b><i>Processes and relationships</i></b> may include:	<ul style="list-style-type: none"> <li>• customer service</li> <li>• delivery of core services</li> <li>• delivery of government services</li> <li>• delivery of products</li> <li>• development of new products, services and markets</li> <li>• organisational structures</li> <li>• trading communities</li> </ul>
<b><i>Threats and opportunities</i></b> may include:	<ul style="list-style-type: none"> <li>• business to government (B2G) opportunities where ebusiness is conducted between an enterprise and the government</li> </ul>

	<ul style="list-style-type: none"> <li>• business-to-business (B2B) opportunities where ebusiness is conducted between companies</li> <li>• business-to-consumer (B2C) opportunities where ebusiness is conducted between an enterprise and a customer</li> <li>• competition legislation</li> <li>• disintermediation threats/opportunities where the role of 'middlemen' or other middle supply chain elements is reduced or made redundant as newer more efficient supply chain technologies are implemented</li> <li>• infrastructure requirements: disaster recovery, failsafe systems</li> <li>• internal business opportunities that improve productivity utilising ebusiness development</li> <li>• re-intermediation opportunities, where ebusiness creates new value between producers and consumers</li> <li>• risk management: payments, fraud etc.</li> </ul>
<b>Contributions to the business</b> may include:	<ul style="list-style-type: none"> <li>• effect on: <ul style="list-style-type: none"> <li>• customer satisfaction ratings</li> <li>• growth</li> <li>• market share</li> <li>• profitability</li> <li>• return on investment</li> <li>• sales</li> <li>• staff morale i.e. using efficient technologies to enhance workplace</li> <li>• staff productivity and professional development</li> </ul> </li> </ul>
<b>Business-to-business</b> may include:	<ul style="list-style-type: none"> <li>• involves ebusiness between organisations</li> <li>• may be B2G (business to government)</li> </ul>
<b>Business-to-consumer</b> may include:	<ul style="list-style-type: none"> <li>• involves ebusiness between an enterprise and a customer</li> </ul>
<b>E-business models</b> may include:	<ul style="list-style-type: none"> <li>• aggregator models</li> <li>• collaboration partners</li> <li>• competitor cooperation model</li> <li>• e-auction</li> <li>• e-government</li> <li>• e-mail</li> <li>• e-office</li> </ul>

	<ul style="list-style-type: none"> <li>• e-procurement</li> <li>• e-shop/e-tailing</li> <li>• information brokers</li> <li>• micro-payments business model</li> <li>• multilevel marketing</li> <li>• portal</li> <li>• tender services</li> <li>• third party marketplaces</li> <li>• trust services</li> <li>• value chain integrators</li> <li>• value chain service providers</li> <li>• virtual community</li> <li>• web rings</li> </ul>
<p><i>Technical needs and expertise</i> may include:</p>	<ul style="list-style-type: none"> <li>• advice on existing business strategy and base business versus growth business</li> <li>• advice on staffing arrangements</li> <li>• advice on technology issues/compatibility</li> <li>• banking information for electronic funds transfer</li> <li>• contact person</li> <li>• feedback loops</li> <li>• new protocols relating to legal or security issues for ebusiness</li> <li>• open and international standards e.g. EAN.UCC or UN/EDIFACT</li> <li>• personal identification and password for online access to business processes e.g. purchasing or supply</li> </ul>
<p><i>Policies and guidelines</i> may include:</p>	<ul style="list-style-type: none"> <li>• business ethics</li> <li>• confidentiality</li> <li>• electronic communication</li> <li>• fraud prevention and detection</li> <li>• human resources management</li> <li>• information management</li> <li>• intellectual property</li> <li>• legal issues e.g. jurisdiction, contract validity, taxation</li> <li>• outsourcing</li> <li>• performance management</li> <li>• privacy</li> <li>• risk management</li> <li>• security</li> </ul>

## **Unit Sector(s)**

Information and Communications Technology - E Business

## BSBINN601B Manage organisational change

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area. The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify change requirements and opportunities	1.1. Identify <i>strategic change needs</i> through an analysis of organisational objectives 1.2. Review existing policies and practices against strategic objectives to identify change requirements 1.3. Monitor trends in the <i>external environment</i> to identify events or trends that impact on the achievement of organisation's objectives 1.4. Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5. Review and prioritise change requirements or opportunities with <i>relevant managers</i> 1.6. Consult specialists and experts to assist in the identification of major change requirements and opportunities
2. Develop change management strategy	2.1. Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2. Undertake risk analysis, identify <i>barriers to change</i> , and agree and record mitigation strategies 2.3. Develop change management project plan 2.4. Obtain approvals from relevant authorities to confirm the change management process 2.5. Assign <i>resources</i> to the project and agree reporting protocols with relevant managers
3. Implement change management strategy	3.1. In consultation with relevant groups and individuals, develop communication or education plan to promote the benefits of the change to the organisation and to minimise loss 3.2. Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3. Consult with relevant groups and individuals for input into the change process 3.4. Identify and respond to barriers to the change according to risk management plans 3.5. Action <i>interventions and activities</i> set out in project plan according to project timetable 3.6. Activate strategies for embedding the change 3.7. Conduct regular evaluation and review, and modify project plan where appropriate to achieve change

ELEMENT	PERFORMANCE CRITERIA
	program objectives

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- high level interpersonal and leadership skills to obtain acceptance of change processes and to inspire trust
- innovation skills to think laterally and to develop creative means to enable people to accept change positively
- learning skills to enable openness to new ideas and techniques which could contribute to ongoing organisational improvement
- planning and organising skills to sequence events and to enable staff to be clear in times of change or turbulence
- problem-solving skills to identify and respond to barriers to the change and analyse risks
- project management skills to implement the change management strategy
- teamwork skills to consult with relevant groups and individuals for input to the change process
- verbal communication skills to consult with relevant stakeholders and promote the change management plan

#### Required knowledge

- change management process or cycle
- components of a change management project plan
- impact of the external environment on change strategies
- organisational behaviour
- potential barriers to change
- range of strategies for embedding change

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development of a change process that details rationale for the change and its objectives</li> <li>• implementation of a change process</li> <li>• critical evaluation of how the change process was managed</li> <li>• demonstration of techniques for responding to resistance to change.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment must ensure access to appropriate documentation and resources normally used in the workplace.
<b>Method of assessment</b>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios around change management</li> <li>• assessment of reports on change management</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>• review of change management project plan and communication or education plans</li> <li>• review of records outlining consultation with relevant groups and individuals for input to the change process</li> <li>• oral or written questioning to assess knowledge of change management strategies.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Strategic change needs</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• actions arising from strategic planning activities to bring about major change in the organisation, which may relate to:             <ul style="list-style-type: none"> <li>• people</li> <li>• processes</li> <li>• technology</li> <li>• structure.</li> </ul> </li> </ul>
<p><b><i>External environment</i></b> may refer to factors that are:</p>	<ul style="list-style-type: none"> <li>• consumer-driven</li> <li>• ecological</li> <li>• economic</li> <li>• ethical</li> <li>• global</li> <li>• legal</li> <li>• political</li> <li>• social</li> <li>• technological</li> <li>• the drive to corporate sustainability</li> <li>• the move to a knowledge economy</li> <li>• workforce-driven.</li> </ul>
<p><b><i>Relevant managers</i></b> may include those:</p>	<ul style="list-style-type: none"> <li>• affected by the change</li> <li>• holding a leadership position in the organisation</li> <li>• participating in the change project.</li> </ul>
<p><b><i>Barriers to change</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• challenges to group norms or established roles</li> <li>• existing organisational culture</li> <li>• existing reward systems</li> <li>• fear of loss of status, security, power or friends</li> <li>• interdepartmental rivalry or conflict</li> <li>• lack of involvement in the change</li> <li>• low morale</li> <li>• vested interests.</li> </ul>
<p><b><i>Resources</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• contractors</li> <li>• employees and managers</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• external and internal consultants</li> <li>• financial and budget allocation</li> <li>• hardware and software</li> <li>• physical assets.</li> </ul>
<i>Interventions and activities</i> may include:	<ul style="list-style-type: none"> <li>• action research</li> <li>• career planning</li> <li>• job redesign</li> <li>• sensitivity training</li> <li>• succession planning</li> <li>• surveys (with feedback)</li> <li>• team building</li> <li>• termination or redeployment</li> <li>• training</li> <li>• transition analysis.</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify organisational expectations for complying with intellectual property requirements</p>	<p>1.1. Identify the various types of existing and potential <b>intellectual property</b> within the organisation</p> <p>1.2. Identify and access the organisation's intellectual property <b>policies, procedures and information</b></p> <p>1.3. Identify <b>own role</b> in protecting the organisation's intellectual property, using intellectual property and avoiding intellectual property <b>infringement</b></p> <p>1.4. Provide information and advice to relevant <b>internal and external stakeholders</b> about how the organisation's intellectual property policies and procedures operate, within limits of job role</p>
<p>2. Support policies and procedures for the protection and use of intellectual property</p>	<p>2.1. Assist with the development and/or implementation of policies and procedures for the <b>protection and use</b> of the organisation's intellectual property according to the type of protection required</p> <p>2.2. Assist with the development and/or implementation of policies and procedures to prevent infringement of others' intellectual property</p> <p>2.3. Assist in the maintenance of intellectual property policies and procedures</p> <p>2.4. Contribute to the identification of <b>potential problems</b> and opportunities for improvement in the operation of the intellectual property policies and procedures and make recommendations to <b>appropriate personnel</b> for action</p>
<p>3. Contribute to recommendations about non-compliance issues with intellectual property requirements</p>	<p>3.1. Contribute to the identification of any potential <b>non-compliance</b> or intellectual property infringement issues, either internally or externally</p> <p>3.2. Contribute to recommendations to appropriate personnel about <b>actions</b> to overcome non-compliance issues</p> <p>3.3. Alert appropriate personnel to areas of potential intellectual property infringement or risk</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to provide information to relevant personnel about intellectual property
- problem solving skills to identify intellectual property compliance issues
- literacy skills to read and interpret procedures and other relevant documentation

#### Required knowledge

- basic knowledge of types of intellectual property and the key characteristics of each
- relevant organisational policies and procedures in relation to intellectual property
- the range of intellectual property residing with the organisation
- basic knowledge of relevant legislative requirements as they apply to the job role

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• identification of the different types of intellectual property within the organisation</li> <li>• identification, use and/or maintenance of an organisation's intellectual property policies and procedures</li> <li>• identification of potential non-compliance issues in an organisation</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to relevant information about an organisation's intellectual property policies and procedures if applicable, or opportunity to contribute to the development of the policies and procedures</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of a portfolio of evidence</li> <li>• oral or written presentation to stakeholders outlining the organisation's approach to intellectual property protection and infringement avoidance</li> <li>• analysis of case studies identifying potential intellectual property issues and proposed actions</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other administrative units from BSB07</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Intellectual property</i></b> refers to:</p>	<ul style="list-style-type: none"> <li>• the output of the mind or intellect rather than tangible objects. It includes:                             <ul style="list-style-type: none"> <li>• copyright</li> <li>• trade marks</li> <li>• patents</li> <li>• designs</li> <li>• plant breeder's rights</li> <li>• circuit layout rights</li> <li>• confidential information/trade secrets</li> </ul> </li> </ul>
<p><b><i>Policies, procedures and information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• intellectual property policy</li> <li>• licensing agreements</li> <li>• procedures for ensuring copyright protection</li> <li>• procedures for registering intellectual property rights</li> <li>• register of intellectual property assets</li> </ul>
<p><b><i>Own role</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• checking that other areas of the organisation are compliant</li> <li>• communicating policy and procedure changes to others</li> <li>• ensuring fees are paid</li> <li>• entering data as it arises</li> <li>• updating schedules and documents as requested e.g. register of intellectual property</li> <li>• keeping up to date with intellectual property issues through subscriptions to intellectual property services, e.g. IP Australia News Alert</li> </ul>
<p><b><i>Infringement</i></b> refers to:</p>	<ul style="list-style-type: none"> <li>• deliberate or inadvertent misuse or non-compliance with legislation, regulation, policy, codes of conduct etc. in relation to intellectual property</li> </ul>
<p><b><i>Internal and external stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• internal stakeholders:                             <ul style="list-style-type: none"> <li>• other people within the organisation who may be affected by intellectual property,</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<p>e.g. designers, writers, trainers, marketing staff, researchers whose efforts may produce intellectual property</p> <ul style="list-style-type: none"> <li>• all employees, who need to be aware of the importance of, and procedures for, intellectual property protection and avoidance of intellectual property infringement</li> <li>• external stakeholders: <ul style="list-style-type: none"> <li>• contractors</li> <li>• service providers</li> </ul> </li> </ul>
<b><i>Protection and use</i></b> may include:	<ul style="list-style-type: none"> <li>• copyright for original works under the Copyright Act 1968</li> <li>• patents for inventions and innovations under the Patents Act 1990</li> <li>• protection from misleading packaging, advertising, misuse of power in the marketplace etc. under the Trade Practices Act 1974</li> <li>• registration of business names under Business Names legislation</li> <li>• registration of trade marks under the Trade Marks Act 1995</li> <li>• registration of new or original designs under the Designs Act 2003</li> <li>• registration of domain names</li> <li>• licences, agreements or other instruments for the protection or use of intellectual property</li> </ul>
<b><i>Potential problems</i></b> may include:	<ul style="list-style-type: none"> <li>• changes to legislation or regulations</li> <li>• aspects of intellectual property not covered by existing procedures</li> <li>• fees not paid by own or external organisation</li> <li>• out of date communication about intellectual property within organisation</li> <li>• expiry of protection period</li> <li>• inappropriate or illegal use of someone else's intellectual property</li> </ul>
<b><i>Appropriate personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• manager</li> <li>• supervisor</li> <li>• person in organisation designated as responsible for intellectual property</li> </ul>
<b><i>Non-compliance issues</i></b> may	<ul style="list-style-type: none"> <li>• required fees not being paid, both to or from</li> </ul>

<b>RANGE STATEMENT</b>	
include:	<p>another body, e.g. for a licence agreement or for renewal of registered rights</p> <ul style="list-style-type: none"> <li>• material being copied by other employees, e.g. from the internet or copying software, which could have potential copyright issues</li> <li>• evidence of unlawful access to computer files</li> <li>• marketing material being produced using images and other material which could breach copyright</li> <li>• unlawful use of music or sound recordings</li> </ul>
<i>Actions</i> may include:	<ul style="list-style-type: none"> <li>• reporting non-compliance issues to supervisor</li> <li>• taking administrative action within job role, e.g. paying relevant fees</li> <li>• ensuring a copyright notice is placed on all publications (e.g. the copyright symbol ©, name of the copyright owner, year of creation or first publication)</li> </ul>

### Unit Sector(s)

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review programs, systems and processes	1.1. Establish strategies to monitor and evaluate performance and <i>sustainability</i> of key systems and processes 1.2. Undertake detailed analyses of <i>supply chains</i> , and operational, product and service delivery systems 1.3. Identify performance measures, and assessment tools and techniques, and evaluate their effectiveness 1.4. Analyse <i>performance reports</i> and variance from plans for key result areas of the organisation 1.5. Identify and analyse changing trends and opportunities relevant to the organisation 1.6. Seek advice from specialists, where appropriate, to identify technology and electronic commerce opportunities
2. Develop options for continuous improvement	2.1. Brief groups on performance improvement strategies and innovation as an essential element of competition 2.2. Foster creative climate and organisational learning by promoting interaction within and between work groups 2.3. Encourage, test and recognise new ideas and entrepreneurial behaviour where successful 2.4. Accept failure of an idea during trialling, and recognise, celebrate and embed success into systems 2.5. Undertake risk management and cost-benefit analysis for each option or idea approved for trial 2.6. Approve innovations through agreed organisational processes
3. Implement innovative processes	3.1. Promote continuous improvement and sustainability as essential to doing business 3.2. Address impact of change and consequences for people, and implement transition plans 3.3. Ensure objectives, timeframes, measures and communication plans are in place to manage implementation 3.4. Implement contingency plans in the event of non-performance 3.5. Follow up failure by prompt investigation and analysis of causes and manage emerging challenges and opportunities effectively

ELEMENT	PERFORMANCE CRITERIA
	3.6.Ensure that learnings from activities are captured and managed to inform future work 3.7.Regularly evaluate continuous improvement systems and processes 3.8.Communicate costs and benefits of innovations and improvements to relevant groups and individuals

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to identify improvement opportunities in relation to:
  - concepts and ideas developed
  - services or products delivered
- flexibility and creativity skills to think laterally
- learning skills to develop options for continuous improvement
- teamwork and leadership skills to foster a commitment to quality and an openness to innovation

#### Required knowledge

- cost-benefit analysis methods
- creativity and innovation theories and concepts
- organisational learning principles
- quality management and continuous improvement theories
- risk management
- sustainability practices

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• demonstration of consultation processes to introduce or evaluate an existing continuous improvement process or system, including suggested actions or an action plan</li> <li>• generation of an idea or concept that exhibits creative thinking and offers the possibility of benefiting the organisation</li> <li>• demonstration of how the concept or idea was introduced, tested and evaluated, which does not have to have been shown to work or to be adopted by the business</li> <li>• application of knowledge of quality management and continuous improvement theories.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment must ensure access to appropriate documentation and resources normally used in the workplace.
<b>Method of assessment</b>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of reports</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of creativity and innovation theories and concepts</li> <li>• evaluation of strategies established to monitor and evaluate performance of key systems and processes</li> <li>• review of briefing of groups on performance improvement strategies and innovation</li> <li>• review of documentation communicating costs and benefits of innovations and improvements to relevant groups and individuals.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Sustainability*** may include:

- addressing environmental and resource sustainability initiatives, such as environmental management systems, action plans, green office programs, surveys and audits
- applying the waste management hierarchy in the workplace
- complying with regulations and corporate social responsibility considerations for sustainability to enhance the organisation's standing in business and community environments
- determining organisation's most appropriate waste treatment, including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment
- implementing ecological footprint
- implementing environmental management systems, e.g. ISO 14001:1996 Environmental management systems life cycle analyses
- implementing government initiatives, e.g. Australian government's Greenhouse Challenge Plus
- improving resource and energy efficiency
- initiating and maintaining appropriate organisational procedures for operational energy consumption
- introducing a green office program - a cultural change program
- introducing green purchasing
- introducing national and international reporting initiatives, e.g. Global Reporting Initiative
- introducing product stewardship
- reducing emissions of greenhouse gases
- reducing use of non-renewable resources
- referencing standards, guidelines and approaches, such as sustainability covenants and compacts or triple bottom line reporting
- supporting sustainable supply chain.

***Supply chains*** include:

- network of facilities that procures raw materials, transforms them into intermediate products or services

<b>RANGE STATEMENT</b>	
	<p>and then finished goods or service, and delivers them through a distribution system</p> <ul style="list-style-type: none"> <li>• procurement, production and distribution, viewed as interlinked not as discrete elements.</li> </ul>
<p><i>Performance reports</i> may include:</p>	<ul style="list-style-type: none"> <li>• budget or cost variance</li> <li>• customer service</li> <li>• environmental</li> <li>• financial</li> <li>• OHS</li> <li>• quality</li> <li>• other operating parameters.</li> </ul>

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work safely	1.1. Follow established <i>safety procedures</i> when conducting work 1.2. Carry out pre-start systems and equipment checks in accordance with workplace procedures
2. Implement workplace safety requirements	2.1. Identify <i>designated persons</i> for reporting queries and concerns about safety in the workplace 2.2. Identify existing and potential <i>hazards</i> in the workplace, report them to designated persons and record them in accordance with workplace procedures 2.3. Identify and implement workplace procedures and work instructions for controlling risks 2.4. Report <i>emergency incidents</i> and injuries to designated persons
3. Participate in OHS consultative processes	3.1. Contribute to workplace meetings, inspections or other consultative activities 3.2. Raise OHS issues with designated persons in accordance with organisational procedures 3.3. Take actions to eliminate workplace hazards or to reduce <i>risks</i>
4. Follow safety procedures	4.1. Identify and report emergency incidents 4.2. Follow organisational procedures for responding to emergency incidents

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to interpret safety signs, symbols and notices
- problem-solving skills to analyse options in an emergency situation.

#### Required knowledge

- responsibilities of employers and employees under relevant health and safety legislation
- emergency procedures including procedures for fires and accidents
- commonly used hazard signs and safety symbols.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• accurately following all relevant safety procedures</li> <li>• identifying and reporting hazards to designated personnel</li> <li>• knowledge of relevant health and safety legislation</li> <li>• knowledge of relevant materials, equipment and work processes.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• safety processes, hazards and risk are relevant to the area of work</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of documentation identifying and reporting emergency incidents</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units related to the work environment</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Safety procedures* may include:

- completing required documentation
- local, state and federal legislation
- Materials Safety Data Sheets (MSDSs)
- National Health and Medical Research Council guidelines
- following OH&S guidelines relevant to workplace
- maintenance and use of cleaning apparatus in a work environment, such as;
  - disposing of spilled substances, dangerous products, 'sharps' and waste correctly
  - maintaining stocks of cleaning equipment (eg. disposable gloves, liquid repellent aprons, disinfectant)
  - sterilising and/or disposing of cleaning equipment
  - using appropriate cleaning equipment to clean spillages and breakages
  - wearing protective clothing, protective eye wear when in contact with body fluids or chemicals that may splash
- using and storing toxic and hazardous materials correctly
- keeping workplace clean and tidy
- office practice manual
- displaying health and safety brochures, magazines and other material
- undergoing operator training when using new equipment or processes
- special guidelines in a medical setting:
  - RACGP Code of Practice for the Management of Health Information in General Practice
  - RACGP Entry Standards for General

<b>RANGE STATEMENT</b>	
	<p>Practices</p> <ul style="list-style-type: none"> <li>• RACGP Sterilisation/Disinfection guidelines for General Practice</li> </ul>
<i>Designated persons</i> may include:	<ul style="list-style-type: none"> <li>• designated health and safety officers</li> <li>• health and safety representatives</li> <li>• supervisors</li> <li>• managers</li> <li>• team leaders</li> <li>• other persons authorised or nominated by the enterprise or industry</li> </ul>
<i>Hazards</i> may include anything which is a source of:	<ul style="list-style-type: none"> <li>• potential harm in terms of human injury or ill health</li> <li>• damage to property</li> <li>• damage to the environment</li> <li>• potential harm in terms of human injury or ill health including: <ul style="list-style-type: none"> <li>• toxic or hazardous materials</li> <li>• hazardous work processes</li> <li>• unsafe work practices</li> <li>• hazardous equipment</li> <li>• unstable personnel</li> </ul> </li> <li>• potential harm in a medical setting: <ul style="list-style-type: none"> <li>• blood</li> <li>• breakage / spillage</li> <li>• drug hold-ups</li> <li>• needle sticks</li> <li>• medical emergencies (eg. Falls, bleeding, seizures, fainting, collapses, panic attack, psychosis)</li> <li>• spread of infection</li> </ul> </li> <li>• potential sources of infection: <ul style="list-style-type: none"> <li>• breakages</li> <li>• contaminated waste</li> <li>• patients with colds, flu and other infectious diseases</li> <li>• sharps (eg. needles, scalpel blades)</li> <li>• spillage</li> <li>• used dressings, bandages and equipment</li> <li>• unsterilised/poorly sterilised equipment and</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	work surfaces <ul style="list-style-type: none"> <li>• unwashed hands</li> </ul>
<b>Risk is:</b>	<ul style="list-style-type: none"> <li>• the chance of something occurring that will result in injury or damage</li> </ul>
<b>Emergency incidents</b> may include:	<ul style="list-style-type: none"> <li>• accidents</li> <li>• emergency situations</li> <li>• fire</li> <li>• flood</li> <li>• sudden illness</li> <li>• incidents</li> <li>• external threats</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to establishing consultative processes within the workplace	1.1. Apply knowledge of relevant OHS laws, policies and procedures to contribute to the development of <i>consultative</i> and <i>participative OHS arrangements</i> in the workplace 1.2. Identify, record and address <i>barriers</i> to the successful functioning of OHS consultative processes 1.3. Contribute recommendations for those involved in OHS 1.4. Identify and record responsibilities of <i>relevant personnel</i> in the consultation process
2. Contribute to obtaining and providing information about OHS issues	2.1. Contribute to establishing a systematic approach to managing OHS by using <i>systems and procedures</i> to gather information on OHS issues 2.2. Utilise <i>tools and techniques</i> to source information from others about OHS issues and hazards 2.3. Identify and access <i>sources of OHS information and data</i> 2.4. Communicate relevant issues to others using appropriate <i>communication methods</i>
3. Raise OHS issues with others	3.1. Raise relevant OHS issues in meetings and record relevant aspects of discussion in accordance with workplace procedures 3.2. Follow-up outstanding issues from meetings in a timely manner 3.3. Communicate outcomes to others

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to speak, listen, read and write effectively to consult on and present OHS issues
- interpersonal skills to support others to raise OHS issues
- information management skills to store and retrieve relevant documents.

#### Required knowledge

- roles and responsibilities of OHS personnel
- relevant OHS legislation, codes of practice, agreements, industry standards, workplace policies and procedures
- organisational procedures for information sourcing and dissemination, and available communication channels and methods
- organisational procedures and protocols for record keeping, and information retrieval and management.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• contribution to consultative arrangements for managing OHS in a workplace</li> <li>• knowledge of relevant OHS legislation, codes of practice, agreements, industry standards, workplace policies and procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to relevant information on compliance requirements such as: <ul style="list-style-type: none"> <li>• organisational policies, standard operating procedures, procedures and plans</li> <li>• relevant legislation, regulations, licensing requirements, codes of practice, standards</li> </ul> </li> <li>• access to relevant internal and external OHS data files</li> <li>• access to appropriate office equipment and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of the application of OHS legislation when consulting with people in the workplace on OHS issues</li> <li>• direct questioning combined with review of portfolios of evidence and third party reports of on-the-job performance by the candidate</li> <li>• oral or written questioning to assess knowledge of roles and responsibilities of OHS personnel</li> <li>• review of records of meeting where OHS issues were raised and discussed</li> <li>• evaluation of communication with others about outcomes of OHS issues raised.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

<b>EVIDENCE GUIDE</b>	
<b>assessment</b>	industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none"><li>• other OHS units.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Consultative OHS arrangements*** may include:

- arrangements to meet workplace consultation obligations specified in relevant state, territory and commonwealth OHS legislation, including:
  - OHS and other consultative and planning committees
  - health and safety and other employee representatives such as deputy OHS representatives
  - employee and supervisor involvement in OHS activities such as inspections and audits
  - procedures for reporting hazards, raising awareness and addressing OHS issues
  - employee and workgroup meetings
- the formal and informal processes in place for the exchange of information and views on OHS hazards, risks and risk controls

***Participative OHS arrangements*** may include processes that:

- inform employees and other stakeholders of OHS matters
- seek input and offer the opportunity for stakeholders to participate in decisions that may impact on the OHS of the workplace

***Barriers*** to consultation may include:

- access to technology or information
- an unsupportive workplace culture
- cultural differences arising from ethnic diversity
- geographic dispersal of employees
- issues arising around the workplace and specific disabilities
- lack of a systematic approach to managing OHS in the workplace
- lack of support from key management
- language and literacy levels of the workforce

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• remote locations or worksites</li> <li>• rosters or shift work</li> <li>• unrealistic timeframes</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• managers and supervisors</li> <li>• OHS representatives and committee members</li> <li>• OHS specialists such as:               <ul style="list-style-type: none"> <li>• ergonomists</li> <li>• health professionals</li> <li>• injury management advisors</li> <li>• occupational hygienists</li> </ul> </li> <li>• OHS technical advisors such as:               <ul style="list-style-type: none"> <li>• engineers (design, acoustic, safety, mechanical and civil)</li> <li>• maintenance and tradespeople</li> <li>• safety representatives</li> </ul> </li> <li>• self</li> <li>• unions</li> <li>• workplace assessors with experience in language or disability issues</li> </ul>
<i>Systems and procedures</i> may include:	<ul style="list-style-type: none"> <li>• methods of information collection and reporting, including:               <ul style="list-style-type: none"> <li>• surveys</li> <li>• checklists</li> <li>• audits</li> <li>• interviews</li> <li>• inspections</li> <li>• registers</li> <li>• record keeping</li> </ul> </li> <li>• planning and consultation systems including:               <ul style="list-style-type: none"> <li>• OHS committee</li> <li>• meetings with health and safety representatives</li> </ul> </li> <li>• written communication systems, such as use of intranet, emails, memos, reports, newsletters</li> </ul>
<i>Tools and techniques</i> may include:	<ul style="list-style-type: none"> <li>• body mapping</li> <li>• employee concerns identified through a hazard reporting system</li> <li>• examination of relevant information and data</li> <li>• formal or informal meetings</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• hazard identification checklists</li> <li>• interviews with workers</li> <li>• job and systems analysis</li> <li>• material safety data sheets (MSDSs)</li> <li>• plant and equipment maintenance records</li> <li>• reviews of:               <ul style="list-style-type: none"> <li>• investigation reports</li> <li>• OHS records</li> <li>• registers of hazardous substances and dangerous goods</li> <li>• reported hazards and incidents</li> </ul> </li> <li>• surveys and suggestion boxes</li> <li>• workplace processes such as 'walk through' surveys and inspections</li> </ul>
<p><i>Sources of OHS information and data</i> may include:</p>	<ul style="list-style-type: none"> <li>• audits</li> <li>• employer groups</li> <li>• first aid records</li> <li>• hazard, incident and investigation reports</li> <li>• industry bodies</li> <li>• legislation, standards, manufacturers' manuals and specifications available at the workplace</li> <li>• minutes of meetings from incident investigations</li> <li>• MSDSs and registers</li> <li>• OHS professional bodies</li> <li>• OHS specialists</li> <li>• other manufacturers' manuals and specifications</li> <li>• regulatory authorities (for codes of practice, legislation)</li> <li>• reports</li> <li>• standards, from Australia or overseas</li> <li>• unions</li> <li>• websites, journals and newsletters</li> <li>• workplace inspections</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to procedures to raise OHS issues or request information and data	1.1. Identify <i>strategies and tools</i> for individuals or groups to raise OHS issues or request information and data 1.2. Implement and communicate to <i>stakeholders</i> and <i>interested parties</i> procedures for individuals and groups to raise OHS issues or request information and data 1.3. Identify <i>barriers</i> to individuals or groups seeking OHS information and data or raising issues 1.4. Make recommendations to address any identified barriers
2. Contribute to procedures for communicating OHS information and data	2.1. Identify with stakeholders, needs for <i>OHS information and data</i> , communication and consultation, including relevant <i>legislative requirements</i> 2.2. Provide information and data about OHS to key personnel on a regular basis, in a readily accessible manner and appropriate to the target group 2.3. Use formal and informal <i>communication processes</i> to provide information and data about OHS 2.4. Identify any barriers to individuals or groups gaining information and data about OHS 2.5. Make recommendations to address any identified barriers 2.6. Monitor and evaluate the effectiveness of actions taken to remove barriers to individuals or groups accessing information and/or data about OHS
3. Communicate OHS information, data and advice effectively to influence management decision making and action	3.1. Provide timely and appropriate OHS information, data and advice to stakeholder groups and individuals 3.2. Make OHS-related contributions in the form of ideas, information and solutions to influence management decision making and action 3.3. Use awareness of the organisation's cultural and industrial environments when dealing with OHS issues
4. Contribute to maintaining OHS arrangements	4.1. Provide support and advice to those involved in <i>OHS consultative arrangements</i> 4.2. Support the OHS issue resolution process to facilitate timely and equitable resolution of OHS

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	issues 4.3.Facilitate OHS consultative processes to meet legislative and workplace requirements 4.4.Monitor the effectiveness of OHS consultative and participative arrangements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- conflict management skills to address small disputes relating to OHS implementation issues
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities across all levels of an organisation
- interpersonal skills to establish and build relationships with internal and external stakeholders
- literacy skills to prepare reports for a range of target groups
- organisational and time management skills to sequence tasks, meet timelines and run efficient formal and informal meetings
- technology skills to use a range of communication media.

#### Required knowledge

- internal and external sources of OHS information and data
- organisational policies and procedures for OHS
- legislative requirements for:
  - consultation and communication
  - information and data collection
  - notification of incidents
  - record keeping
  - reporting of incidents
- organisational policies and procedures for managing OHS in the workplace
- principles and practices of systematic approaches to managing OHS
- principles relating to:
  - hazard identification
  - hierarchy of control
  - risk management
  - systematic approaches to OHS
- range of communication strategies to communicate effectively with people at all levels of the organisation
- relevant state/territory and commonwealth OHS legislation, codes of practice and standards
- roles and responsibilities of personnel as specified in relevant OHS legislation
- sources of OHS data.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>development and use of a product or products when contributing to the implementation of OHS processes</li> <li>knowledge of relevant state/territory and commonwealth OHS legislation, codes of practice and standards.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish and maintain an OHS system	1.1. Locate and communicate OHS policies which clearly express the organisation's commitment to implement relevant <b>OHS legislation</b> in the enterprise 1.2. Define OHS responsibilities for all workplace personnel in accordance with OHS policies, procedures and programs 1.3. Identify and approve financial and human resources for the effective operation of the OHS system
2. Establish and maintain participative arrangements for the management of OHS	2.1. Establish and maintain participative arrangements with employees and their representatives in accordance with relevant OHS legislation 2.2. Appropriately resolve issues raised through participative arrangements and consultation 2.3. Promptly provide information about the outcomes of participation and consultation in a manner accessible to employees
3. Establish and maintain procedures for identifying hazards, and assessing and controlling risks	3.1. Develop procedures for ongoing hazard identification, and assessment and <b>control of associated risks</b> 3.2. Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes 3.3. Develop and maintain procedures for selection and implementation of risk control measures in accordance with the hierarchy of control 3.4. Identify inadequacies in existing risk control measures in accordance with the hierarchy of control and promptly provide resources to enable implementation of new measures 3.5. Identify intervention points for expert OHS advice
4. Establish and maintain a quality OHS management system	4.1. Develop and provide an OHS induction and training program for all employees as part of the organisation's training program 4.2. Utilise system for <b>OHS record keeping</b> to allow identification of patterns of occupational injury and disease in the organisation 4.3. Measure and evaluate the OHS system in line with the organisation's quality systems framework 4.4. Develop and implement improvements to the OHS

ELEMENT	PERFORMANCE CRITERIA
	<p>system to achieve organisational OHS objectives</p> <p>4.5.Ensure compliance with the OHS legislative framework so that legal OHS standards are maintained as a minimum</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytic skills to analyse relevant workplace data in order to identify hazards, and to assess and control risks
- communication skills to consult with staff and to promote a safe workplace
- problem-solving skills to deal with complex and non-routine difficulties
- technology skills to store and retrieve relevant workplace data.

#### Required knowledge

- application of the hierarchy of control (the preferred order of risk control measures from most to least preferred, that is, elimination, engineering controls, administrative controls, personal protective equipment)
- hazard identification and risk management
- relevant legislation from all levels of government that affects business operation, especially in regard to OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- reporting requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• detailed knowledge and application of all relevant OHS legislative frameworks</li> <li>• establishment and maintenance of arrangements for managing OHS within the organisations' business systems and practices</li> <li>• identification of intervention points for expert OHS advice</li> <li>• principles and practice of effective OHS management in a small, medium or large business.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of written reports</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of OHS policies, information provided on the OHS system, information about the outcomes of participation and consultation provided to employees</li> <li>• oral or written questioning to assess knowledge of OHS and OHS legislation</li> <li>• evaluation of OHS induction and training</li> <li>• review of OHS record keeping system.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other OHS units</li> </ul>

<b>EVIDENCE GUIDE</b>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***OHS legislation*** will depend on state/territory legislation and requirements, and will include:

- common law duties to meet general duty of care requirements
- regulations and approved codes of practice relating to hazards in the work area
- requirements for establishment of consultative arrangements including those for health and safety representatives, and health and safety committees
- requirements for effective management of hazards
- requirements for provision of information and training including training in safe operating procedures, procedures for workplace hazards, hazard identification, risk assessment and risk control, and emergency and evacuation procedures
- requirements for the maintenance and confidentiality of records of occupational injury and disease

***Control of associated risks*** may include:

- administrative
- counselling/disciplinary processes
- elimination
- engineering
- housekeeping and storage
- issue resolution
- OHS records maintenance and analysis
- personal protective equipment
- purchasing of supplies and equipment
- workplace inspections including plant and equipment

***Organisational health and safety record keeping*** may relate to:

- audit and inspection reports
- workplace environmental monitoring records
- consultation e.g. meetings of health & safety committees, work group meeting agendas

<b>RANGE STATEMENT</b>	
	including OHS items and actions <ul style="list-style-type: none"> <li>• induction, instruction and training</li> <li>• manufacturers' and suppliers' information including dangerous goods storage lists</li> <li>• hazardous substances registers</li> <li>• plant and equipment maintenance and testing reports</li> <li>• workers compensation and rehabilitation records</li> <li>• first aid/medical post records</li> </ul>

## BSBPMG508A Manage project risk

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to manage risk within a project to avoid adverse effects on project outcomes. It covers determining, monitoring and controlling project risks, and assessing risk management outcomes.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to an individual who is clearly and solely responsible for the management and leadership of a complex project, either as an employee of an organisation or an external consultant.</p> <p>In the context of this unit a complex project is defined as a project which involves:</p> <ul style="list-style-type: none"> <li>• the need for a comprehensive and multi faceted project plan</li> <li>• the need for a formal internal or external communications strategy</li> <li>• a dedicated and diverse project budget</li> <li>• multiple administrative components</li> <li>• multiple operational components</li> <li>• a wide range of stakeholders</li> <li>• a project operations team.</li> </ul> <p>The functions performed by a program manager to manage risk within multiple projects are addressed in BSBPMG608A Direct risk management of a project program.</p>

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine project risks	1.1. Identify, document and analyse <b>risks</b> , in consultation with stakeholders and higher project authority, as the basis for risk planning 1.2. Use established <b>risk management techniques and tools</b> , within <b>delegated authority</b> , to analyse risks, assess options and recommend preferred risk approaches 1.3. Develop risk management plans, secure agreement of stakeholders and communicate plans to ensure clarity of understanding and ongoing management of risk factors 1.4. Establish designated <b>risk management processes and procedures</b> to enable effective management and communication of risk events, responses and results
2. Monitor and control project risks	2.1. Manage project in accordance with established project and risk management plans to ensure a common approach to the achievement of objectives 2.2. Monitor progress against project plans to identify variances and <b>recommend responses</b> to a higher project authority for remedial action 2.3. Implement agreed risk responses and modify plans to reflect changing project objectives in an environment of uncertainty
3. Assess risk management outcomes	3.1. Review project outcomes to determine effectiveness of risk management processes and procedures 3.2. Identify and document risk issues and recommended improvements, and pass on to higher project authority for application in future projects

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to write risk management plans
- problem-solving skills to control risks
- lateral thinking skills to identify risks
- planning and organisational skills to monitor project progress
- analytical skills to review project outcomes in terms of risk management.

#### Required knowledge

- risk management framework
- risk management techniques, tools and approaches.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>demonstrated evidence of effective risk management for multiple complex projects</li> <li>knowledge of risk management techniques, strategies and tools.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to workplace risk management documentation</li> <li>consideration of feedback from project stakeholders as to how risks were managed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skill and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>oral or written questioning to assess knowledge of the risk management framework</li> <li>analysis of responses in addressing case studies and scenarios which present project scope management issues and problems</li> <li>review of risk management plans</li> <li>evaluation of monitoring of progress against project plans</li> <li>assessment of identified and documented risk issues and recommended improvements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other units in the Diploma of Project Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b>Risks</b> may be:</p>	<ul style="list-style-type: none"> <li>• actual</li> <li>• likely/probable</li> <li>• perceived</li> <li>• potential</li> </ul>
<p><b>Risk management techniques and tools</b> may include:</p>	<ul style="list-style-type: none"> <li>• calling upon personal experience and/or subject matter experts</li> <li>• conducting or supervising qualitative and/or quantitative risk analysis, such as schedule simulation, decision analysis, contingency planning and alternative strategy development</li> <li>• using specialist risk analysis tools to assist in the decision making process</li> </ul>
<p><b>Delegated authority</b> refers to planning and activities that may:</p>	<ul style="list-style-type: none"> <li>• be conducted routinely or as changing circumstances dictate</li> <li>• be done independently within broad guidance or by taking the lead of a team</li> <li>• involve consultation with other project members, teams and internal stakeholders</li> <li>• involve the selection, use and supervision of appropriate risk management methods, tools and techniques</li> </ul>
<p><b>Risk management processes and procedures</b> may include:</p>	<ul style="list-style-type: none"> <li>• communication with stakeholders, dispute resolution and modification procedures</li> <li>• implementation of risk control trigger mechanisms</li> <li>• measurement of actual progress against planned milestones</li> <li>• recording and reporting of major variance</li> <li>• setting key milestones at significant points during the project and at completion</li> </ul>
<p><b>Recommended responses</b> to variations may be made:</p>	<ul style="list-style-type: none"> <li>• in consultation with project team members, section heads, project manager and stakeholders</li> <li>• independently or with higher project authority</li> </ul>

<b>RANGE STATEMENT</b>	
	endorsement if necessary <ul style="list-style-type: none"> <li>• regularly throughout the project life cycle</li> <li>• taking into account internal organisational change and external environmental change</li> </ul>

## BSBREL701A Develop and cultivate collaborative partnerships and relationships

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to establish collaborative partnerships and relationships with business and industry stakeholders to promote and advance learning programs.</p> <p>The unit also covers communicating to influence others, cultivating new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to leaders or managers working in either an educational organisation or a non educational enterprise where learning is used to build capabilities. It includes forming partnerships or other collaborative arrangements to achieve improved learner, community, career, or work outcomes.</p> <p>Educational leaders gain the respect of colleagues, contacts, clients and the community through demonstrating professionalism in all aspects of their work; this professionalism is underpinned by their educational expertise and effective interpersonal and communication skills. In the vocational education and training sector, learning leaders and managers must build partnerships and lead in a collaborative manner to ensure learning has a strategic role in the ever changing context, and in the face of complex influences that affect learning.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate to influence relevant individuals and stakeholders	1.1. Generate trust, confidence and support from <i>relevant individuals</i> , other <i>stakeholders</i> and <i>potential learners</i> by demonstrating a high standard of personal performance and conduct 1.2. Implement <i>communication strategies</i> to represent the organisation positively to media, local community and stakeholders 1.3. Make decisions in consultation with relevant stakeholders and relevant individuals where appropriate 1.4. Use a range of <i>influencing strategies</i> to increase commitment from staff and stakeholders to achieve organisational requirements and to contribute to desired culture 1.5. Undertake selected community and/or professional engagements that project a positive image of the organisation to the broader community and stakeholders
2. Cultivate new and existing partnerships with stakeholders	2.1. Establish outcomes to be achieved from a learning <i>partnership</i> 2.2. Analyse models for effective consultation and collaboration within a partnership 2.3. Cultivate <i>collaborative communities</i> and partnerships through application of a range of learning and communication solutions 2.4. Forge relationships, collaborative communities or partnerships between a <i>training and assessment organisation</i> and a <i>public or private sector enterprise</i> 2.5. Consult stakeholders to establish vocational education and training <i>partnership learning programs</i>
3. Establish positive collaborative relationships	3.1. Establish processes that contribute to the creation and maintenance of a positive culture that embraces collaboration 3.2. Establish processes to <i>resolve conflict in a fair, equitable and collaborative manner</i> 3.3. Organise and allocate work activities in a cost effective and equitable manner with clear, quantifiable and agreed <i>performance standards</i> 3.4. Encourage staff to embrace a learning culture and to

ELEMENT	PERFORMANCE CRITERIA
	<p>undertake activities that develop their personal competence and performance</p> <p>3.5. Empower individuals to develop their own ways of working within agreed boundaries of competence, cultural, <i>diversity</i> and <i>organisational and legal requirements</i></p> <p>3.6. Establish <i>indicators</i> and <i>feedback processes</i> that can be used to evaluate the health of the work environment</p>
4. Lead establishment of a partnership program	<p>4.1. Identify and address <i>relevant organisational policies and procedures</i> in partnership learning program plans</p> <p>4.2. Identify and incorporate relevant legal requirements into planning of learning programs established in a community or partnership setting</p> <p>4.3. Form partnership learning programs in collaborative and consultative processes involving public or private sector enterprises</p> <p>4.4. Plan and allocate <i>resource requirements</i> to accomplish a partnership learning program</p> <p>4.5. Establish relevant organisational policies and procedures relating to partnerships, and training and assessment services</p>
5. Establish reporting mechanisms for partnership program	<p>5.1. Establish <i>reporting systems</i> for <i>reporting results</i>, that meet <i>reporting requirements</i>, against planned partnership outcomes</p> <p>5.2. Implement <i>reporting systems</i> to map learner progress against partnership outcomes</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analysis and interpretation skills to:
  - evaluate organisational information management systems, policies and procedures
  - select relevant evaluation information and documentation
  - identify any potential and current non-compliance
  - access and interpret organisation's standards and values
  - analyse records or notes of the evaluation process
- initiative and enterprise skills to establish collaborative partnerships and relationships
- interpersonal and communication skills to negotiate, to question, to listen and investigate, to network and clarify issues
- planning and organising skills to:
  - research and evaluate validation processes, and to determine and implement improvements to these processes
  - develop and establish agreement to plans
- problem-solving skills to review feedback and to plan improvements
- teamwork skills to lead and motivate a team in establishing productive networks, partnerships and other relationships.

#### Required knowledge

- relevant legislation that affects the business operation, especially in regard to OHS and environmental issues, equal opportunity and anti-discrimination, industrial relations
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership styles
- personal development planning methodologies
- data collection methods
- external environment scanning relating to social, political, economic and technological developments
- emotional intelligence and its relationship to individual and team effectiveness
- organisational transformation and the management of the stages of change
- organisational design and building in responsiveness of operations to change in customer or market conditions.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• demonstrated capacity to foster learning partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills</li> <li>• developing collaborative approaches to enhance individual, team and organisational outcomes</li> <li>• initiating and implementing learning program partnerships in line with relevant regulatory, employment and organisational requirements</li> <li>• knowledge of relevant policy, legislation, codes of practice and national standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• competence is consistently demonstrated over time, and over a range and variety of situations</li> <li>• access to required assessment facilities and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of applied projects or learning activities, especially relating to formation of professional networks and stakeholder consultation in relation to forming partnerships for vocational education and training programs</li> <li>• direct observation of contextual application of skills</li> <li>• submission of a portfolio of evidence including previous work forging partnerships</li> <li>• oral or written questioning to assess knowledge of development of industry learning partnerships.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"><li>• BSBLED702A Lead learning strategy implementation</li><li>• BSBLED707A Establish career development services</li><li>• BSBLED709A Identify and communicate trends in career development</li><li>• PSPMNGT614A Facilitate knowledge management.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Relevant individuals</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• employees</li> <li>• employers</li> <li>• government agencies and departments</li> <li>• learners/students</li> <li>• industry associations, employer bodies, professional associations</li> <li>• industry representatives</li> <li>• national Industry Skills Councils</li> <li>• people working in the roles targeted by training</li> <li>• regulatory and licensing authorities</li> <li>• research agencies</li> <li>• state/territory industry training advisory bodies</li> <li>• subject or technical specialists or experts</li> <li>• unions</li> <li>• universities</li> </ul>
<p><b><i>Stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• administrative and regulatory bodies</li> <li>• coordinators, teachers, assessors, coaches, mentors and support staff</li> <li>• employees</li> <li>• industry, employee, employer, professional and peak bodies or associations</li> <li>• learners/students</li> <li>• other training and assessment organisations</li> <li>• public or private sector enterprise</li> </ul>
<p><b><i>Potential learners</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• apprentices and trainees</li> <li>• current or ongoing learners and clients</li> <li>• existing industry and enterprise employees</li> <li>• individuals changing careers</li> <li>• individuals learning new skills and knowledge</li> <li>• individuals or groups meeting licensing or other regulatory requirements</li> <li>• individuals seeking to upgrade competencies</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• individuals who are unemployed</li> <li>• individuals who have a disability</li> <li>• members of target groups such as Aboriginal and Torres Strait Islander communities</li> <li>• overseas learners and international students</li> <li>• potential learners and clients</li> <li>• recent migrants and people from culturally and linguistically diverse backgrounds</li> <li>• school leavers, new entrants to the workforce</li> </ul>
<i>Communication strategies</i> may include:	<ul style="list-style-type: none"> <li>• conducting presentations</li> <li>• developing and applying interview and interpersonal communication protocols</li> <li>• developing and circulating marketing materials</li> <li>• developing promotional materials and course outlines</li> <li>• initiating and conducting a public communication strategy</li> </ul>
<i>Influencing strategies</i> may include:	<ul style="list-style-type: none"> <li>• debate</li> <li>• dialogue</li> <li>• discussion</li> <li>• formal and informal techniques</li> <li>• levels of participation</li> <li>• moderated negotiations</li> <li>• networking</li> <li>• strategies applied face-to-face or collectively (e.g. in a learning community or community of practice)</li> </ul>
<i>Partnerships</i> may:	<ul style="list-style-type: none"> <li>• be informal</li> <li>• be physical or virtual (e.g. online)</li> <li>• involve a formal agreement</li> <li>• involve one or more enterprises, and training and assessment organisations</li> <li>• involve one or more learning programs</li> </ul>
<i>Collaborative communities</i> may include:	<ul style="list-style-type: none"> <li>• communities of practice</li> <li>• formal or informal relationships</li> <li>• informal and formal groups in collaborative relationships</li> <li>• knowledge communities</li> <li>• knowledge networks</li> <li>• learning communities</li> <li>• physical or virtual relationships</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• supply chain communities</li> <li>• virtual circles</li> </ul>
<i>Training and assessment organisation</i> may include:	<ul style="list-style-type: none"> <li>• organisation that delivers non-recognised vocational education and training</li> <li>• organisation working in a partnership arrangement with an RTO to deliver recognised vocational education and training</li> <li>• RTO delivering recognised vocational education and training services such as TAFE institutes, private commercial colleges and organisations, enterprises, community organisations, group training companies and secondary schools</li> </ul>
<i>Public or private sector enterprises</i> may include:	<ul style="list-style-type: none"> <li>• community bodies</li> <li>• government agencies</li> <li>• privately owned companies</li> </ul>
<i>Partnership learning program</i> may include:	<ul style="list-style-type: none"> <li>• accredited course which includes Training Package outcomes</li> <li>• community education program</li> <li>• nationally endorsed qualification from a Training Package or accredited course</li> <li>• part of a VET in Schools program</li> <li>• part of an apprenticeship or traineeship</li> <li>• professional development program</li> <li>• short course or non-recognised vocational program</li> <li>• short-term development plan</li> <li>• short-term induction program</li> <li>• subset of a learning strategy</li> <li>• traineeship or apprenticeship</li> <li>• workplace learning program</li> </ul>
<i>Resolving conflict in a fair, equitable and collaborative manner</i> may include:	<ul style="list-style-type: none"> <li>• adherence to relevant legislative, legal, workplace requirements</li> <li>• application of organisational complaints procedures</li> <li>• internal or external specialists</li> </ul>
<i>Performance standards</i> may be based on:	<ul style="list-style-type: none"> <li>• personal or task outcomes</li> <li>• span short- or long-term outcomes</li> <li>• strategic, operational outcomes</li> </ul>
<i>Diversity</i> includes difference in:	<ul style="list-style-type: none"> <li>• age</li> <li>• belief systems and values</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• culture</li> <li>• expertise, experience and working styles</li> <li>• gender</li> <li>• interpersonal style</li> <li>• interests</li> <li>• language, literacy and numeracy</li> <li>• physical differences</li> <li>• politics</li> <li>• race</li> <li>• religion</li> <li>• sexual orientation</li> <li>• thinking and learning styles</li> </ul>
<i>Organisational and legal requirements</i> may include:	<ul style="list-style-type: none"> <li>• collaborative and partnership arrangement agreements such as memoranda of understanding</li> <li>• confidentiality and privacy requirements</li> <li>• licensing requirements</li> <li>• requirements for initial and continuing registration as defined in the AQTF Standards for Registered Training Organisations and state/territory legislation and regulations governing provider registration and course accreditation</li> <li>• requirements of awards and enterprise bargaining agreements</li> <li>• requirements of endorsed Training Packages</li> <li>• requirements of other relevant commonwealth and state/territory legislation, for example relating to matters such as OHS, anti-discrimination, workplace and industrial relations, workers compensation, apprenticeships and traineeships</li> <li>• requirements set by professional associations</li> <li>• requirements set by quality systems</li> </ul>
<i>Indicators</i> may include:	<ul style="list-style-type: none"> <li>• formal human resources and related indicators to provide benchmark, comparative measures on: <ul style="list-style-type: none"> <li>• average hours in relation to output per employee</li> <li>• down-time</li> <li>• related operational and planning indicators</li> <li>• revenue per employee/team</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• staff absenteeism</li> <li>• staff satisfaction</li> <li>• staff turnover</li> <li>• training hours</li> </ul>
<i>Feedback processes</i> include:	<ul style="list-style-type: none"> <li>• formal complaints or suggestions procedures</li> <li>• formal-informal</li> <li>• independent audits</li> <li>• management audits/workplace checks</li> <li>• surveys</li> <li>• virtual or physical</li> <li>• whistleblower policy</li> </ul>
<i>Relevant organisational policies and procedures</i> may include:	<ul style="list-style-type: none"> <li>• access and equity</li> <li>• assessment procedures and options</li> <li>• client services</li> <li>• confidentiality requirements</li> <li>• ethical standards</li> <li>• fees and payment schedule</li> <li>• grievance and appeals processes</li> <li>• learner selection, enrolment, induction and orientation procedures</li> <li>• mutual recognition obligations</li> <li>• policies and procedures being available to all personnel, learners, clients and candidates</li> <li>• staff recruitment, induction and ongoing development and monitoring</li> <li>• support services available</li> <li>• human resources policies and procedures and legal requirements including anti-discrimination, equal employment, OHS</li> <li>• administrative and records management systems, for example that relating to: <ul style="list-style-type: none"> <li>• contract manager</li> <li>• document version control</li> <li>• maintenance, retention, archiving, retrieval, storage and security of training and assessment information and records</li> <li>• personnel responsible for analysing statistics and data to ensure organisation complies with relevant standards across all of its operations and training and assessment activities</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• privacy and access to training and assessment information and records</li> <li>• reporting and recording requirements and arrangements</li> <li>• supervisors and managers</li> <li>• union and employee representatives</li> <li>• users of training information such as finance personnel, human resources personnel, employers</li> </ul>
<i>Resource requirements</i> may include:	<ul style="list-style-type: none"> <li>• additional staff</li> <li>• distribution costs</li> <li>• equipment</li> <li>• production costs</li> <li>• promotional costs</li> <li>• research and development</li> <li>• re-tooling</li> <li>• staff training</li> </ul>
<i>Reporting systems</i> for reporting results may include:	<ul style="list-style-type: none"> <li>• arrangements for the issuing of Australian Qualifications Framework (AQF) qualifications and Statements of Attainment</li> <li>• arrangements for recognising and recording current competencies</li> <li>• electronic student management system which complies with AVETMISS or other reporting or statistical collection requirements</li> <li>• internal organisational recording and reporting systems</li> <li>• record keeping policies and procedures</li> </ul>
<i>Reporting results</i> may include:	<ul style="list-style-type: none"> <li>• Australian Apprenticeship Centre forms and letters such as for incentives and completions</li> <li>• availability of all reports and records for audit and monitoring purposes</li> <li>• enrolment forms</li> <li>• financial reporting for funding and payments from funding body</li> <li>• OHS incident reporting systems</li> <li>• performance agreements</li> <li>• reporting for apprenticeship and traineeship program delivery</li> <li>• reporting for in-house or internal program delivery</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Training Contract and RTO notifications</li> </ul>
<i>Reporting requirements</i> may include those specified in:	<ul style="list-style-type: none"> <li>• AQTF Standards for Registered Training Organisations</li> <li>• AVETMISS process documentation</li> <li>• organisational documentation</li> </ul>
<i>Reporting systems</i> to map learner progress against partnership outcomes may include:	<ul style="list-style-type: none"> <li>• electronic systems including those using business technology such as:               <ul style="list-style-type: none"> <li>• computers</li> <li>• hardware</li> <li>• software</li> <li>• telephone networks</li> </ul> </li> <li>• physical systems such as face-to-face and print communications</li> </ul>

## BSBSUS201A Participate in environmentally sustainable work practices

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to effectively measure current resource use and to carry out improvements including reducing the negative environmental impact of work practices.</p> <p>This unit requires the ability to access industry information, and applicable legislative and occupational health and safety (OHS) guidelines.</p> <p>While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant national, state and territory legislation, regulations and codes of practice impact upon this unit.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to operators/team members under supervision or guidance, who are required to follow workplace procedures and instructions, and to work in an environmentally sustainable manner. It covers:</p> <ul style="list-style-type: none"> <li>efficient resource use</li> <li>potential environmental hazards</li> <li>regulatory compliance</li> <li>improving environmental performance (within the scope of competency, authority and own level of responsibility).</li> </ul> <p>It addresses the knowledge, processes and techniques necessary to participate in environmentally sustainable work practices.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use	1.1. Identify workplace <i>environmental and resource efficiency issues</i> 1.2. Identify resources used in own work role 1.3. Document and measure current usage of resources using <i>appropriate techniques</i> 1.4. Record and file documentation measuring current usage, using technology (such as software systems) where applicable 1.5. Identify and report workplace environmental hazards to appropriate personnel
2. Comply with environmental regulations	2.1. Follow workplace procedures to ensure <i>compliance</i> 2.2. Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1. Follow <i>organisational plans</i> to improve environmental practices and resource efficiency 3.2. Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3. Make <i>suggestions</i> for improvements to workplace practices in own work area

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to comply with all relevant legislation associated with job specifications and procedures
- communication and problem-solving skills to question, seek clarification and make suggestions relating to work requirements and efficiency
- communication and teamwork skills to recognise procedures; to follow instructions; to respond to change, such as current workplace environmental/sustainability frameworks; and to support team work and participation in a sustainable organisation
- literacy, numeracy and technology skills to interpret workplace information in relation to work role, and to document and measure resource use
- technology skills to select and use technology appropriate for a task.

#### Required knowledge

- environmental and resource hazards/risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- OHS issues and requirements
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace
- terms and conditions of employment including policies and procedures, such as daily tasks, employee and employer rights, equal opportunity.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• accessing, interpreting and complying with a range of environment/sustainability legislation and procedural requirements relevant to daily responsibilities</li> <li>• accurately following organisational information to participate in and support an improved resource efficiency process and reporting as required</li> <li>• developing and/or using tools such as inspection checklists, to collect and measure relevant information on organisation resource consumption, within work role</li> <li>• identifying organisational improvements by applying efficient resource use to daily activities</li> <li>• knowledge of environmental and resource hazards/risks.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• evidence is relevant to the particular workplace role, including work area, equipment, systems, and documentation</li> <li>• review of current work area directly relating to own work, to assess measurement of resources used, hazards and compliance</li> <li>• individual or team discussion about potential for increased resource efficiency within current work area</li> <li>• access to workplace documents, information and resources (such as compliance obligations, enterprise plans, work responsibilities).</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>reports of on-the-job performance by the candidate</p> <ul style="list-style-type: none"> <li>• observation of demonstrated techniques over time and in a range of situations</li> <li>• analysis of responses to case studies and scenarios</li> <li>• review of documentation measuring current resource usage</li> <li>• evaluation of techniques used to document and measure current usage of resources</li> <li>• review of identified and reported workplace environmental hazards</li> <li>• evidence of active participation in organisational plans to improve environmental practices and resource efficiency.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBINN201A Contribute to workplace innovation</li> <li>• BSBSMB301A Investigate micro business opportunities</li> <li>• BSBWOR202A Organise and complete daily work activities.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Environmental and resource efficiency issues</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• maximising opportunities to improve business environmental performance</li> <li>• minimising environmental risks</li> <li>• promoting more efficient production and consumption of natural resources, for example minimising waste by participating in or using a waste management system</li> <li>• using resources efficiently such as material usage, energy usage (seeking alternative sources of energy or energy conservation) or efficient water usage</li> </ul>
<p><b><i>Appropriate techniques</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• examining and documenting resources in work area</li> <li>• examining invoices from suppliers</li> <li>• examining relevant information and data</li> <li>• measuring resource usage under different conditions</li> <li>• reports from other parties involved in the process of identifying and implementing improvements</li> </ul>
<p><b><i>Compliance</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• meeting relevant laws, by-laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):             <ul style="list-style-type: none"> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• local government</li> <li>• industry</li> <li>• organisation</li> </ul> </li> </ul>
<p><b><i>Organisational plans</i></b> may</p>	<ul style="list-style-type: none"> <li>• documented policies and procedures</li> <li>• work plans to minimise waste or to increase</li> </ul>

<b>RANGE STATEMENT</b>	
include:	efficiency of resources such as a green office program, supply chain program for purchasing sustainable products or an environmental management framework
<i>Suggestions</i> may include ideas that help to:	<ul style="list-style-type: none"> <li>• improve energy efficiency</li> <li>• increase use of renewable, recyclable, reusable and recoverable resources</li> <li>• maximise opportunities such as use of solar power or other alternative forms of energy, where appropriate</li> <li>• prevent and minimise risks</li> <li>• reduce emissions of greenhouse gases</li> <li>• reduce use of non-renewable resources</li> </ul>

## Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage	1.1. Identify environmental regulations applying to the enterprise 1.2. Analyse procedures for assessing <i>compliance</i> with environmental/sustainability regulations 1.3. Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate 1.4. Collect, analyse and organise information from a range of <i>sources</i> to provide information/advice and tools/resources for improvement opportunities 1.5. Measure and document current resource usage of members of the work group 1.6. Analyse and document current <i>purchasing strategies</i> 1.7. Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1. Seek input from <i>stakeholders, key personnel and specialists</i> 2.2. Access external sources of information and data as required 2.3. Evaluate alternative solutions to workplace environmental issues 2.4. Set efficiency targets
3. Implement performance improvement strategies	3.1. Source and use appropriate <i>techniques and tools</i> to assist in achieving efficiency targets 3.2. Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3. Implement and integrate <i>environmental and resource efficiency improvement plans</i> for own work group with other operational activities 3.4. Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5. Seek <i>suggestions</i> and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6. Implement costing strategies to fully value

ELEMENT	PERFORMANCE CRITERIA
	environmental assets
4. Monitor performance	4.1. Use and/or develop evaluation and monitoring, tools and technology 4.2. Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3. Evaluate strategies and improvement plans 4.4. Set new efficiency targets, and investigate and apply new tools and strategies 4.5. Promote successful strategies and reward participants where possible

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to analyse problems, to devise solutions and to reflect on approaches taken
- change management skills
- communication skills to answer questions, clarify and acknowledge suggestions relating to work requirements and efficiency
- communication/consultation skills to support information flow from stakeholders to the work group
- innovation skills to identify improvements, to apply knowledge about resource use to organisational activities and to develop tools
- literacy skills to comprehend documentation, to interpret environmental and energy efficiency requirements, to create tools to measure and monitor improvements and to report outcomes
- numeracy skills to analyse data on organisational resource consumption and waste product volumes
- planning and organising skills to implement environmental and energy efficiency management policies and procedures relevant to own work area
- problem-solving skills to devise approaches to improved environmental sustainability and to develop alternative approaches as required
- technology skills to operate and shut down equipment; where relevant, to use software systems for recording and filing documentation to measure current usage; and to use word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information
- supervisory skills to work effectively with a team

#### Required knowledge

- best practice approaches relevant to own area of responsibility and industry
- compliance requirements within work area for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within organisation, including approaches to improving resource use for work area and expected outcomes
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area
- strategies to maximise opportunities and to minimise impact relevant to own work

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• knowledge of relevant compliance requirements within work area</li> <li>• developing plans to make improvements</li> <li>• planning and organising work group activities in relation to measuring current use and devising strategies to improve usage</li> <li>• monitoring resource use and improvements for environmental performance relative to work area and supervision</li> <li>• ensuring appropriate action is taken within work area in relation to environmental/sustainability compliance and potential hazards</li> <li>• implementing new approaches to work area in an effort to resolve and improve environmental and resource efficiency issues and reporting as required.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to a range of environment/sustainability legislation, standards, guidelines and procedural requirements relevant to specific work area, daily responsibilities and supervision</li> <li>• access to a range of information, workplace documentation and resources such as compliance obligations, organisation plans, work supervision and responsibilities</li> <li>• access to reports from other parties involved in the process of identifying and implementing improvements</li> <li>• evidence is relevant to the particular workplace role, including work area, staff, stakeholders, equipment, systems and documentation.</li> </ul>
<b>Method of assessment</b>	A range of assessment methods should be used to assess practical skills and knowledge. The following examples

<b>EVIDENCE GUIDE</b>	
	<p>are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• response to case studies</li> <li>• review of reports of activities of work group in relation to measuring resource use and developing improvement strategies</li> <li>• review of work plans outlining approaches to improved practices with documented benchmarks</li> <li>• analysis of the way in which advice is sought and suggestions are made about improvements</li> <li>• observation over time and in a range of situations in relation to review of overall work area and staff, to assess and measure resource use, hazards and compliance</li> <li>• review of checklists to identify and assess resource usage at the beginning and end of the unit; reports on meetings around procedures and improvement processes and monitoring within the workplace; lists of environmental hazards/risks or inefficiencies or opportunities for improvements identified in the workplace</li> <li>• analysis of implementation of programs such as a green office program, supply chain program for purchasing sustainable products, or an environmental management framework</li> <li>• oral or written questioning to assess knowledge of environmental and energy efficiency issues, systems and procedures specific to industry practice.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBATSIC411C Communicate with the community</li> <li>• BSBINN301A Promote innovation in a team environment</li> <li>• BSBLED401A Develop teams and individuals</li> <li>• BSBMGT402A Implement operational plan</li> <li>• BSBMGT403A Implement continuous improvement</li> <li>• BSBRSK401A Identify risk and apply risk management processes.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Compliance</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• meeting relevant laws, by-laws and regulations or best practice or codes of practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):               <ul style="list-style-type: none"> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• industry</li> <li>• organisation.</li> </ul> </li> </ul>
<p><b><i>Sources</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• organisation specifications</li> <li>• regulatory sources</li> <li>• relevant stakeholders</li> <li>• resource use.</li> </ul>
<p><b><i>Purchasing strategies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• influencing suppliers to take up environmental sustainability approaches</li> <li>• researching and participating in programs such as a supply chain program to purchase sustainable products.</li> </ul>
<p><b><i>Stakeholders, key personnel and specialists</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• individuals and groups both inside and outside the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, including:               <ul style="list-style-type: none"> <li>• customers</li> <li>• employees at all levels of the organisation</li> <li>• government</li> <li>• investors</li> <li>• local community</li> <li>• other organisations</li> <li>• suppliers</li> </ul> </li> <li>• key personnel within the organisation, and specialists outside the organisation who may</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>have particular technical expertise.</p>
<p><i>Techniques and tools</i> may include:</p>	<ul style="list-style-type: none"> <li>• examination of invoices from suppliers</li> <li>• examination of relevant information and data</li> <li>• measurements made under different conditions</li> <li>• others as appropriate to the specific industry context.</li> </ul>
<p><i>Environmental and resource efficiency improvement plans</i> may include:</p>	<ul style="list-style-type: none"> <li>• addressing environmental and resource sustainability initiatives such as environmental management systems, action plans, green office programs, surveys and audits</li> <li>• applying the waste management hierarchy in the workplace</li> <li>• determining organisation's most appropriate waste treatment including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment</li> <li>• initiating and/or maintaining appropriate organisational procedures for operational energy consumption, including stationary energy and non-stationary (transport)</li> <li>• preventing and minimising risks, and maximising opportunities such as: <ul style="list-style-type: none"> <li>• improving resource/energy efficiency</li> <li>• reducing emissions of greenhouse gases</li> </ul> </li> <li>• reducing use of non-renewable resources</li> <li>• referencing standards, guidelines and approaches such as: <ul style="list-style-type: none"> <li>• ecological footprinting</li> <li>• Energy Efficiency Opportunities Bill 2005</li> <li>• Global Reporting Initiative</li> <li>• green office program - a cultural change program</li> <li>• green purchasing</li> <li>• Greenhouse Challenge Plus (Australian government initiative)</li> <li>• ISO 14001:1996 Environmental management systems life cycle analyses</li> <li>• product stewardship</li> <li>• supply chain management</li> <li>• sustainability covenants/compacts</li> <li>• triple bottom line reporting.</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
<p><i>Suggestions</i> may include ideas that help to:</p>	<ul style="list-style-type: none"> <li>• prevent and minimise risks and maximise opportunities such as:                             <ul style="list-style-type: none"> <li>• usage of solar or renewable energies where appropriate</li> <li>• reducing emissions of greenhouse gases</li> <li>• reducing use of non-renewable resources</li> <li>• making more efficient use of resources, energy and water</li> </ul> </li> <li>• maximising opportunities to re-use, recycle and reclaim materials</li> <li>• identifying strategies to offset or mitigate environmental impacts:                             <ul style="list-style-type: none"> <li>• purchasing carbon credits</li> <li>• energy conservation</li> <li>• reducing chemical use</li> <li>• reducing material consumption</li> </ul> </li> <li>• expressing purchasing power through the selection of suppliers with improved environmental performance e.g. purchasing renewable energy</li> <li>• eliminating the use of hazardous and toxic materials.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy	1.1. Define <i>scope</i> of sustainability policy 1.2. Gather information from a range of <i>sources</i> to plan and develop policy 1.3. Identify and consult <i>stakeholders</i> as a key component of the policy development process 1.4. Include appropriate <i>strategies</i> in policy at all stages of work for minimising resource use, reducing toxic material and hazardous chemical use, and employing life cycle management approaches 1.5. Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6. Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7. Agree to appropriate methods of implementation
2. Communicate workplace sustainability policy	2.1. Promote workplace sustainability policy, including its expected outcome to key stakeholders 2.2. Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3. Implement workplace sustainability policy	3.1. Develop and communicate procedures to help implement workplace sustainability policy 3.2. Implement strategies for continuous improvement in resource efficiency 3.3. Establish and assign responsibility to use recording systems for tracking continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1. Document outcomes and provide feedback to key personnel and stakeholders 4.2. Investigate successes or otherwise of policy 4.3. Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4. Modify policy and or procedures as required to ensure improvements are made

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to adjust communication to suit different audiences; to respond effectively to diversity; to work as a member of a team to consult on and validate policy
- literacy skills to read and evaluate complex and formal documents such as policy and legislation
- problem skills to effectively manage different points of view and dissenting stakeholders
- research, analytical and writing skills to research, analyse and present information; to prepare written reports requiring precision of expression and language and structures suited to the intended audience

#### Required knowledge

- best practice approaches relevant to own work area
- environmental or sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy being developed
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- quality assurance systems relevant to own organisation
- relevant industry competency
- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• candidate's involvement as a key person in planning, developing and implementing organisational policy and that the developed policy complies with legislative requirements</li> <li>• implementation strategy, as part of the policy, that has been devised, implemented and reviewed showing a measurable improvement utilising the chosen benchmark indicators</li> <li>• communicating with stakeholders to discuss possible approaches to policy development and implementation, and contributing to the resolution of disputes among stakeholders</li> <li>• developing and monitoring policies for analysing data on enterprise resource consumption</li> <li>• using software systems for recording and filing documentation for measurement of current usage and using word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information</li> <li>• reviewing and improving policies by identifying improvements and benchmarking against industry best practice and attempting new approaches continuously over time.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to relevant legislation/standards/guidelines</li> <li>• access to a range of workplace documentation and personnel, information and resources (such as compliance obligations, organisational plans, work responsibilities)</li> <li>• access to reports from other parties involved in the development and implementation of policy</li> <li>• evidence is collected over time, involving both</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>formative and summative assessment</p> <ul style="list-style-type: none"> <li>evidence is relevant to the particular workplace role, including work area, equipment, systems, and documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on the job performance by the candidate</li> <li>response to case studies</li> <li>review of policy developed and procedural documentation outlining the approach taken</li> <li>review of implementation strategy, plans and work plans</li> <li>analysis of methods used to involve stakeholders in policy development, implementation and review</li> <li>analysis of inefficiencies or opportunities for improvements identified in the workplace</li> <li>evaluation of participation in sustainability work practices and programs such as an environmental management framework</li> <li>observation over time in relation to review of work area relating to policy and procedures being developed to assess measurement of resources used, hazards and compliance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>BSBATSIM419A Contribute to the development and implementation of organisational policies</li> <li>BSBHRM506A Manage recruitment, selection and induction processes</li> <li>BSBHRM602B Manage human resources strategic planning</li> <li>BSBINN502A Build and sustain an innovative work environment</li> <li>BSBMGT515A Manage operational plan</li> <li>BSBMGT516C Facilitate continuous improvement</li> <li>BSBMGT608C Manage innovation and continuous improvement</li> <li>BSBMGT616A Develop and implement strategic</li> </ul>

<b>EVIDENCE GUIDE</b>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Scope* of workplace sustainability policy may include:

- addressing sustainability initiatives through reference to standards, guidelines and approaches such as:
  - ecological foot printing
  - Energy Efficiency Opportunities Bill 20051
  - Global Reporting Initiative
  - green office program
  - green purchasing
  - Greenhouse Challenge Plus (Australian government initiative)
  - ISO 14001:1996 Environmental management systems life cycle analyses
  - life cycle analyses
  - product stewardship
  - supply chain management
  - sustainability covenants/compacts
  - triple bottom line reporting
- integrated approach to sustainability which includes environmental, economic and social aspects, or a specific approach that focuses on each aspect individually
- investigating particular business and market context of the industry/organisation
- meeting relevant laws, by laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):
  - international
  - commonwealth
  - state/territory
  - industry

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• organisation</li> <li>• parts of the organisation to which it is to apply, including whether it is for the whole organisation, one site, one work area or a combination of these.</li> </ul>
<i>Sources</i> may include:	<ul style="list-style-type: none"> <li>• regulatory sources</li> <li>• relevant personnel</li> <li>• organisational specifications.</li> </ul>
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• individuals and groups both inside and outside the organisation who have some direct interest in the organisation's conduct, actions, products and services, including: <ul style="list-style-type: none"> <li>• customers</li> <li>• employees at all levels of the organisation</li> <li>• government</li> <li>• investors</li> <li>• local community</li> <li>• other organisations</li> <li>• regulators</li> <li>• suppliers</li> </ul> </li> <li>• key personnel within the organisation and specialists outside the organisation who may have particular technical expertise.</li> </ul>
<i>Strategies</i> may include:	<ul style="list-style-type: none"> <li>• promotional activities</li> <li>• raising awareness among stakeholders</li> <li>• training staff in sustainability principles and techniques.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Organise and complete own work schedule</p>	<p>1.1. Ensure that <i>work goals and objectives</i> are understood, negotiated and agreed in accordance with <i>organisational requirements</i></p> <p>1.2. Assess and prioritise workload to ensure tasks are completed within identified timeframes</p> <p>1.3. Identify <i>factors affecting the achievement of work objectives</i> and incorporate contingencies into work plans</p> <p>1.4. Use <i>business technology</i> efficiently and effectively to manage and monitor scheduling and completion of tasks</p>
<p>2. Monitor own work performance</p>	<p>2.1. Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks</p> <p>2.2. Ensure that <i>feedback on performance</i> is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3. Routinely identify and report on variations in the quality of service and products in accordance with organisational requirements</p> <p>2.4. Identify <i>signs of stress</i> and effects on <i>personal wellbeing</i></p> <p>2.5. Identify <i>sources of stress</i> and access appropriate <i>supports and resolution strategies</i></p>
<p>3. Coordinate personal skill development and learning</p>	<p>3.1. Identify personal learning needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2. Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3. Access, complete and record <i>professional development opportunities</i> to facilitate continuous learning and career development</p> <p>3.4. Incorporate formal and informal feedback into review of further learning needs</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read and understand the organisation's procedures, own work goals and objectives
- planning skills to organise work priorities and arrangements
- problem-solving skills to solve routine problems
- communication skills to give and receive constructive feedback relating to development needs.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparing work plans</li> <li>• scheduling and prioritising work objectives and tasks</li> <li>• knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of work schedules and performance improvement plans.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of self-assessment documentation outlining learning and development needs</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs</li> <li>• evaluation of planning for personal skill development activities and professional development opportunities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other industry capability units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Work goals and objectives</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• budgetary targets</li> <li>• production targets</li> <li>• reporting deadlines</li> <li>• sales targets</li> <li>• team and individual learning goals</li> <li>• team participation</li> </ul>
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• business and performance plans</li> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and/or procedures manuals</li> </ul>
<p><b><i>Factors affecting the achievement of work objectives</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• budget constraints</li> <li>• competing work demands</li> <li>• environmental factors such as time, weather</li> <li>• resource and materials availability</li> <li>• technology/equipment breakdowns</li> <li>• unforeseen incidents</li> <li>• workplace hazards, risks and controls</li> </ul>

## BSBWOR404B Develop work priorities

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to plan one's own work schedules, to monitor and to obtain feedback on work performance and development. It also addresses the requirement to take responsibility for one's own career planning and professional development.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who are required to design their own work schedules and work plans, and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and complete own work schedule	1.1. Prepare <b>Workgroup</b> plans which reflect consideration of resources, client needs and workgroup targets 1.2. Analyse and incorporate <b>Work objectives</b> and priorities into personal schedules and responsibilities 1.3. Identify <b>Factors affecting the achievement of work objectives</b> and establish contingencies and incorporate them into work plans 1.4. Efficiently and effectively use <b>Business technology</b> to manage and monitor planning completion and scheduling of tasks
2. Monitor own work performance	2.1. Identify and analysed personal performance through self-assessment and feedback from others on the achievement of work objectives 2.2. Seek and evaluate <b>Feedback on performance</b> from colleagues and clients in the context of individual and group requirements 2.3. Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements
3. Coordinate professional development	3.1. Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities 3.2. Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3. Use <b>Feedback</b> to identify and develop ways to improve competence within available opportunities 3.4. Identify, access and complete <b>professional development activities</b> to assist career development 3.5. Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- learning skills to recognise and develop new and necessary skills and knowledge
- literacy skills to understand the organisation's policies, procedures and communications, to write personal work plans and professional development plans, and to request and receive feedback about performance
- organising skills to prioritise, manage time and meet deadlines
- problem solving skills to develop contingency plans

#### Required knowledge

- knowledge of relevant business technology applications to schedule tasks and plan work
- knowledge of techniques to prepare personal plans and establish priorities
- methods to identify and prioritise personal learning needs
- understanding of a range of professional development options
- understanding of methods to elicit, analyse and interpret feedback
- understanding of methods to evaluate own performance

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparing and communicating own work plan</li> <li>• scheduling work objectives and tasks to support the achievement of goals</li> <li>• seeking and acting on feedback from clients and colleagues</li> <li>• reviewing own work performance against achievements through self-assessment</li> <li>• accessing learning opportunities to extend own personal work competencies</li> <li>• using business technology to monitor self development.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• the learner and trainer should have access to appropriate documentation and resources normally used in the workplace</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• observation of presentations</li> <li>• review of work and professional development plans.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• Other units from the Certificate IV in Frontline Management.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Workgroup plans</i></b> may include:	<ul style="list-style-type: none"> <li>• budgetary plans</li> <li>• production plans</li> <li>• reporting plans</li> <li>• sales plans</li> <li>• team and individual learning goals</li> <li>• team participation</li> <li>• work schedules</li> </ul>
<b><i>Work objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• budgetary targets</li> <li>• production targets</li> <li>• reporting deadlines</li> <li>• sales targets</li> <li>• team and individual learning goals</li> <li>• team participation</li> </ul>
<b><i>Factors affecting the achievement of work objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• budget constraints</li> <li>• competing work demands</li> <li>• environmental factors such as time, weather, etc</li> <li>• personnel</li> <li>• resource and materials availability</li> <li>• technology/equipment breakdowns</li> <li>• unforeseen incidents</li> </ul>
<b><i>Business technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computer applications</li> <li>• computers</li> <li>• email and internet/intranet/extranet</li> <li>• facsimile machines</li> <li>• modems</li> <li>• personal schedules</li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners</li> </ul>
<b><i>Feedback on performance</i></b> may include:	<ul style="list-style-type: none"> <li>• formal/informal performance appraisals</li> <li>• obtaining comments from clients</li> <li>• obtaining comments from supervisors and</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish team performance plan	1.1. <i>Consult</i> team members to establish a common understanding of team purpose, roles, responsibilities and <i>accountabilities</i> in accordance with organisational goals, plans and objectives 1.2. Develop <i>performance plans</i> to establish expected <i>outcomes, outputs, key performance indicators</i> and goals for work team 1.3. <i>Support</i> team members in meeting expected performance outcomes
2. Develop and facilitate team cohesion	2.1. Develop <i>strategies</i> to ensure team members have input into planning, decision making and operational aspects of work team 2.2. Develop <i>policies and procedures</i> to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4. Develop <i>processes</i> to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1. Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2. Support the team in identifying and resolving work performance problems 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all <i>stakeholders</i>
4. Liaise with stakeholders	4.1. Establish and maintain open communication processes with all stakeholders 4.2. Communicate information from <i>line manager/management</i> to the team 4.3. Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4. Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to explain team goals, to address team conflict and to build an environment of trust
- planning and organisational skills to keep team on track and focussed on work outcomes.

#### Required knowledge

- group behaviour
- strategies for mentoring and coaching to informally guide and instruct team members
- issue resolution
- strategies for gaining consensus.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• range of techniques that can be used to build work teams, strengthen communications in the team and resolve issues</li> <li>• methods for engaging with stakeholders and obtaining advice from outside the work team, to ensure team is focussed and on track</li> <li>• knowledge of group behaviour.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of written reports</li> <li>• demonstration of team building techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• review of performance plans developed for work team</li> <li>• review of policies and procedures developed to ensure team members take responsibility for own work.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Diploma of Management.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Consultation</i> may refer to:</p>	<ul style="list-style-type: none"> <li>• conducting meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual performance plans</li> <li>• mechanisms used to provide feedback to the work team in relation to outcomes of consultation</li> </ul>
<p><i>Accountabilities</i> may refer to:</p>	<ul style="list-style-type: none"> <li>• responsibilities as defined in position descriptions, codes of conduct/behaviour, duty statements or similar</li> <li>• statement of conduct outlining responsibilities/actions/performance</li> </ul>
<p><i>Performance plans</i> may refer to:</p>	<ul style="list-style-type: none"> <li>• individual performance plans linked to team goals</li> <li>• team plans based on work assignments and responsibilities</li> </ul>
<p><i>Outcomes, outputs, key performance indicators</i> may refer to agreed:</p>	<ul style="list-style-type: none"> <li>• changes in work roles and responsibilities</li> <li>• improved individual and team, performance and participation</li> <li>• improvements to systems, operations</li> <li>• measures for monitoring and evaluating the efficiency or effectiveness of systems or services</li> <li>• quality standards and expectations</li> <li>• targets for productivity improvements such as reduced downtime, higher production levels, decreases in absenteeism</li> <li>• targets for training and development</li> </ul>
<p><i>Support</i> may include:</p>	<ul style="list-style-type: none"> <li>• Coaching</li> <li>• Mentoring</li> <li>• Training and development opportunities</li> <li>• Clarification of roles and expectations</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Long term or short term plans</li> <li>• Meetings</li> </ul>
<i>Strategies</i> may refer to:	<ul style="list-style-type: none"> <li>• clarification of roles and expectations</li> <li>• electronic communication devices and processes, such as intranet and email communication systems, to facilitate input</li> <li>• long-term or short-term plans factoring in opportunities for team input</li> <li>• mentoring and 'buddy' systems to support team members in providing input</li> <li>• newsletters and briefings</li> <li>• training and development activities</li> </ul>
<i>Policies and procedures</i> may refer to:	<ul style="list-style-type: none"> <li>• organisational guidelines and systems that govern operational functions</li> <li>• procedures that detail the activities that must be carried out for the completion of actions and tasks</li> <li>• Standard Operating Procedures</li> </ul>
<i>Processes</i> may refer to:	<ul style="list-style-type: none"> <li>• brainstorming options with the team for addressing concerns</li> <li>• creating a matrix of issues and concerns and distributing for comment</li> <li>• discussions with individuals regarding their concerns</li> <li>• distributing drafts for comment with a range of options for resolution of concerns</li> <li>• training and development sessions</li> </ul>
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• Board members</li> <li>• business or government contacts</li> <li>• funding bodies</li> <li>• union/employee groups and representatives</li> <li>• work team</li> </ul>
<i>Line manager/management</i> may refer to:	<ul style="list-style-type: none"> <li>• chief executive officer</li> <li>• direct superior</li> <li>• other management representatives</li> </ul>

<b>Co-requisite units</b>		

## **CPPSEC3009A Prepare and present evidence in court**

### **Modification History**

Not Applicable

### **Unit Descriptor**

**Unit descriptor** This unit of competency specifies the outcomes required to prepare and present information which may be used in a judicial or quasi-judicial environment as evidence. It requires the ability to gather and manage information, prepare and give evidence in court, store evidence and complete documentation.

This unit may form part of the licensing requirements for persons engaging in security operations in those states and territories where these are regulated activities.

### **Application of the Unit**

**Application of the unit** This unit of competency has wide application in the security industry in those roles involving operational activities. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Gather and organise evidence.</b>	<p>1.1 Applicable provisions of <i>legislative</i> and <i>organisational requirements</i> relevant to the preparation and presentation of <i>evidence</i> are identified and complied with.</p> <p>1.2 A summary of the case history and other <i>relevant information</i> is gathered and organised.</p> <p>1.3 Information to be used as evidence is confirmed for reliability and relevance in accordance with organisational procedures.</p> <p>1.4 Evidence is organised in accordance with <i>evidence management</i> principles.</p>
<b>2 Prepare for court proceedings.</b>	<p>2.1 Briefing sessions are held with relevant persons to confirm <i>court arrangements</i>, role and involvement.</p> <p>2.2 Information to be presented as evidence and negotiation parameters is discussed with <i>relevant persons</i>.</p> <p>2.3 Briefs of evidence are submitted in a logical sequence appropriate to jurisdictional requirements and comply with the relevant rules of evidence.</p> <p>2.4 Material to be used or referred to in court proceedings is thoroughly reviewed prior to presentation in court to ensure familiarity, completeness and availability.</p> <p>2.5 <i>Documentation and exhibits</i> are prepared to ensure their acceptability for use in court in accordance with procedural requirements.</p>
<b>3 Present evidence.</b>	<p>3.1 <i>Rules of evidence</i>, procedures and <i>protocols</i> relevant to the jurisdiction involved are observed and adhered to throughout proceedings.</p> <p>3.2 Personal presentation, manner and language are consistent with court protocols.</p> <p>3.3 Evidence is admissible and presented in a clear, concise and unambiguous manner and complies with rules of evidence.</p> <p>3.4 Specialist opinion within own level of qualification and expertise is provided on request in accordance with organisational procedures.</p> <p>3.5 Outcomes of proceedings and associated documentation and evidence are noted, filed and stored in accordance with legislative requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

#### Required skills

- adhere to court protocols and procedures
- check and review documentation for accuracy, spelling and grammar
- communicate effectively with people from different social, cultural and ethnic backgrounds and of varying physical and mental abilities
- communicate verbally and non-verbally in a clear and concise manner
- identify and comply with applicable legal and procedural requirements, including licensing requirements
- identify relevant and valid information as admissible evidence
- maintain, store and preserve evidence
- prepare documentation using appropriate structure and language
- read, analyse and interpret information
- record and accurately report information
- research, select and organise information
- select and use information technology appropriate to task
- store and preserve evidence
- use a range of business equipment and technology appropriate to meet task requirements.
- verify validity of information
- write reports using formal structure and language.

#### Required knowledge

- briefing, documentation and preparation requirements
- court protocols and procedures relevant to the jurisdiction
- document and evidence management systems
- evidence preparation and presentation requirements
- general principles regarding the admissibility of evidence in courts
- organisation policies and procedures relating to own role and responsibilities and providing specialist opinion
- principles of effective communication
- privacy and confidentiality requirements
- procedures for handling and managing evidential exhibits
- relevant industry codes of practice and legislation including 'rules of evidence' and 'continuity of evidence'
- requirements for handling and managing evidential exhibits
- storage requirements for information that is susceptible to spoil or damage (film, computer tapes)
- techniques to verify and validate information.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- sourcing, organising and confirming validity of information
- following up outcomes of proceedings and feedback, reviewing implications as the basis for appropriate actions to be implemented
- managing and storing evidence and material to ensure its preservation, and completing relevant documentation in compliance with applicable legislation and licensing requirements
- presenting evidence in a clear, concise and unambiguous manner and, as required, providing specialist opinion within own level of qualification and expertise
- researching and selecting information that is determined relevant and valid for use as admissible evidence in a judicial or quasi-judicial environment
- understanding and complying with court protocols, legislative and procedural requirements including appropriate use of communication and language.

#### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to plain English version of relevant statutes and procedures
- access to a registered provider of assessment services
- access to a suitable venue and equipment
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include

access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment** This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

**Guidance information for assessment** Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to:***

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality

- relevant commonwealth, state, territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- trespass and the removal of persons
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

***Organisational requirements may relate to:***

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.

***Evidence may include:***

- audio or video recordings
- charts
- documents
- drawings
- facts
- photographs or images
- physical items (eg specimens, samples)
- statements
- testimonies.

- Relevant information may relate to:***
- admissible evidence
  - computer-based information
  - data
  - original and back-up video or audio tapes
  - original, copy or negative film or photographs
  - physical items
  - precedents
  - records of interview
  - reports or documentation
  - specimens and samples
  - tape recordings
  - witness statements.
- Evidence management may involve:***
- constant reviews during an investigation
  - continuity of possession
  - labelling
  - protection and storing of evidence
  - referral to prosecution organisations at any stage
  - systematic recording such as dating and numbering
  - using written or electronic database systems.
- Courts may include:***
- criminal, coronial and civil
  - district
  - federal
  - Human Rights and Equal Opportunity Commission
  - Industrial Relations Commission
  - Land and Environment Court
  - local
  - magistrates
  - Royal Commissions
  - supreme
  - tribunals.
- Court arrangements may relate to:***
- confirmation of evidence requirements
  - date, location and time of proceedings
  - documentation requirements.
- Relevant persons may include:***
- clients
  - colleagues
  - judicial representatives
  - legal representatives
  - police
  - supervisor.
- Documentation and exhibits may relate to:***
- affidavits
  - items of evidence

- media footage
  - photographs
  - radio and telephone records or logs
  - reports
  - reports of incidents
  - transcripts of conversation.
- Rules of evidence may involve:**
- admissibility
  - contemporaneousness.
- Court protocols may relate to:**
- examination and cross-examination procedures
  - forms of address
  - general demeanour
  - impartiality
  - punctuality
  - readiness of self and evidence
  - respect for people and offices held
  - standards of dress, physical appearance
  - voice clarity and language.

## CPPSEC5003A Assess security risk management options

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to assess options for the management of security risk in an organisational environment. It requires the ability to compare treatment options against identified security risks, rank suitable treatment options, and prepare and present recommended options and supporting analysis.

This unit may form part of the licensing requirements for persons engaged in risk assessment operations in those states and territories where these are regulated activities.

### Application of the Unit

#### Application of the unit

This unit of competency has application in those work roles involving the assessment of security risks in an organisational environment. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Determine security risk.</b>	1.1 Applicable provisions of <i>legislative</i> and <i>organisational requirements</i> , and <i>relevant standards</i> for assessment activities are identified and complied with.
	1.2 Type and nature of <i>security risks</i> are determined based on an accurate and current assessment of the client's <i>operating environment</i> and core business operations.
	1.3 Security risks are ranked in terms of degree of risk and linked to potentially suitable <i>treatment options</i> .
	1.4 Degree of risk is determined by an assessment of current and valid data.
<b>2 Identify and assess treatment options.</b>	2.1 Treatment options are identified and confirmed to be commensurate with the identified type, <i>nature and cause</i> of security risk.
	2.2 Treatment options applied in a similar context are researched and assessed for effectiveness against documented and <i>verifiable evidence</i> .
	2.3 <i>Criteria</i> for assessment of risks against treatment options are consistent with recognised industry practice and relevant standards.
	2.4 Treatment options appropriate to the full range of potential security risks are selected and prioritised according to established criteria.
<b>3 Review and present findings.</b>	3.1 A report outlining assessment findings and recommended treatment options is prepared and <i>presented</i> to relevant persons.
	3.2 Analysis and recommendations are clear, coherent and consistent with <i>terms of reference</i> and supported by verifiable evidence.
	3.3 Advice outlining possible consequences of not implementing recommended treatment options is included in the analysis.
	3.4 Effective <i>interpersonal techniques</i> and presentation procedures are used to enhance understanding and acceptance of recommended treatment options.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- accurately determine identified risks and threats
- apply reasoning and logical analysis in assessment processes
- assess risks and threats
- coaching and mentoring to provide support to colleagues
- collate numerical data
- communicate in a clear and concise manner
- determine suitability of treatment option against security risk
- determine type and nature of security risks
- identify and assess assets
- prepare and present verbal and written reports
- prioritise tasks and organise schedules
- prioritise treatment options in terms of degree of security risk
- provide written communication to a standard required for compiling reports and summarising information
- relate to persons of different social and cultural backgrounds and varying physical and mental abilities
- research and analyse information
- source and access information
- use a variety of problem-solving techniques
- use business and information technology.

### Required knowledge

- applicable Australian standards, industry codes of practice and legislation including Occupational Health and Safety (OHS)
- basic understanding of insurance in terms of acceptable risks, premium ranges and liabilities
- client's operating environment and business operations
- concept of integrated security measures including physical security; information technology security, and security of personnel and information
- concept of litigation
- current security systems and technologies available expertise
- distinction between information and intelligence
- preparation of documentation and presentation procedures
- principles of basic statistics and numeracy
- principles of effective communication
- principles of AS/NZS 4360: 2004 Risk management and related guidelines
- privacy and confidentiality requirements
- relevant industry codes of practice

## REQUIRED SKILLS AND KNOWLEDGE

- relevant legislation and regulations including licensing requirements
- risk assessment techniques
- types of treatment options appropriate to the range of security risks and threats applicable to premises and businesses.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of understanding and knowledge of the following:

- evaluating risks against developed criteria and selecting treatment options commensurate with the level and nature of potential risks based on the principles of AS/NZS 4360: 2004
- identifying the nature, cause and range of potential security risks to client based on an assessment of valid and relevant data
- preparing and presenting an analysis and options related to management of security risks and using effective interpersonal skills to enhance client understanding and acceptance of recommendations.

#### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the

provision of appropriate assessment support.

**Method of assessment** This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment** Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to:***

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination

- cultural and ethnic diversity
- environmental issues
- equal employment opportunity
- industrial relations
- OHS
- relevant industry codes of practice
- trespass and the removal of persons
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

***Organisational requirements may relate to:***

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.

***Relevant standards:***

- must include AS/NZS 4360: 2004 Risk management
- may relate to:
  - AS2630-1983 Guide to the selection and application of intruder alarm systems for domestic and business premises
  - HB 167:2006 Security Risk Management
  - HB 436 Risk Management Guidelines - Companion to AS/NZS 4360
  - HB 231:2000 Information security risk management guidelines
  - other standards relating to the treatment options as published and distributed by Standards Australia.

***Security risks may be:***

- acceptable
- across all aspects of operations
- across limited number of operations
- high likelihood
- long-term
- low likelihood
- potentially avoidable
- potentially unavoidable
- short-term
- unacceptable.

***Risk relates to:***

- the chance of something happening that will have an impact on objectives.

***Risks may relate to:***

- break-ins
- business operations
- confidentiality
- deliberate or accidental damage
- finance
- OHS
- personnel
- theft
- threats of loss, harm or damage to persons or property
- trespass
- unauthorised access
- vandalism
- workplace environment.

***Assessment of operating environment may relate to:***

- competitors
- core business functions
- environmental issues
- financial markets
- industrial relations
- market share
- nature of operations
- neighbours
- scale of operations
- situational issues
- size
- stability
- stability of company, organisation, industry and market
- stakeholders
- type of industry
- workforce.

- Security risk nature and causes may be:**
- client-based
  - external
  - financial
  - internal
  - mechanical
  - operational
  - skill based.
- Treatment options may relate to:**
- attendance
  - confidentiality
  - interventions
  - regularity of presence
  - rehearsals
  - surveillance.
- Verifiable evidence may include:**
- incident reports
  - insurance data
  - official records
  - organisational data
  - video evidence
  - witness statements.
- Criteria may include assessment of:**
- budgetary constraints
  - environmental issues
  - industrial relations
  - legal issues
  - nature of the task
  - operating environment of organisation
  - organisation structure
  - organisational image
  - political influences
  - terms of reference
  - timeframes.
- Presentation may involve:**
- charts and statistical reports
  - computer equipment including data projectors
  - models
  - real-time demonstration
  - simulation
  - the use of audio and video.
- Terms of reference may relate to:**
- client expectations
  - cost
  - limitations and exclusions of access to information
  - lines of authority
  - operational environment

***Interpersonal techniques may involve:***

- roles and responsibilities
- scale of the assessment eg full-scale operation or limited to a particular section or operation of the company
- security and other clearances
- timeframe.
- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

**Unit sector**                      Security

## **Competency field**

**Competency field**              Security and risk management

# CPPSEC5004A Prepare security risk management plan

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to plan and prepare for security risks. It requires the ability to develop a security risk management plan which incorporates suitable strategies for risk identification and treatment, and contingency arrangements compatible to identified risk.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit** This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Evaluate security risks.	<p>1.1 <i>Security risks</i> are identified and consequences interpreted in accordance with client, <i>organisational</i> and <i>legislative requirements</i> and <i>relevant standards</i>.</p> <p>1.2 Acceptable and unacceptable risks are clearly distinguished and confirmed.</p> <p>1.3 High priority risks are emphasised and specified to ensure the development of appropriate <i>controls</i>.</p> <p>1.4 Existing controls are evaluated to determine impact on risk occurrence and required modifications identified.</p>
2 Develop action plans.	<p>2.1 Action plans are developed identifying key tasks, activities and resources to achieve security risk management objectives.</p> <p>2.2 <i>Type of risk</i> associated with security context is identified and appropriate controls incorporated into planning processes.</p> <p>2.3 Communication and reporting arrangements for maintaining currency of action plans are established.</p> <p>2.4 <i>Contingency arrangements</i> for actions are developed and incorporated into plans.</p>
3 Design treatment options.	<p>3.1 Operating environment monitored to confirm potential and real risks, threats and required treatments.</p> <p>3.2 <i>Treatment options</i> are selected in line with available organisational practices, and implications researched, clarified and approved by <i>relevant persons</i>.</p> <p>3.3 Feasible treatment options are documented and costed to ensure compatibility with nature of risk and client requirements.</p> <p>3.4 Treatment options are linked to whole or part of security risks and verified with clients for suitability to security context.</p> <p>3.5 <i>Tests</i> on treatment options are conducted to determine applicability in the field, and results statistically analysed to confirm effectiveness of treatments.</p>
4 Develop security risk management plan.	<p>4.1 <i>Management requirements</i> are identified and accounted for in development of security risk management plan.</p> <p>4.2 Procedures for monitoring and review of security risk management activities are developed to ensure continuous improvement.</p> <p>4.3 Security risk management plan is developed incorporating all <i>relevant information</i> in line with appropriate <i>format</i> and relevant standards.</p>

**ELEMENT****PERFORMANCE CRITERIA**

4.4 Plan is finalised and presented to client for review and approval in accordance with organisational procedures.

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge and their level required for this unit.

**Required skills**

- access and use workplace information
- active listening
- adapt personal communication style to a variety of situations
- analyse and evaluate information and data
- coaching and mentoring to provide support to colleagues
- collate numerical data
- communicate in a clear and concise manner
- design treatment options and tests
- negotiation
- numeracy skills to calculate resources and costings
- planning
- reading to interpret complex information
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- solve problems to deal with complex and non routine difficulties
- use technology to research, analyse and report information
- writing to develop complex reports.

**Required knowledge**

- applicable Occupational Health and Safety (OHS) licensing and legislative compliance requirements
- application of the hierarchy of control
- approved communication terminology and call signs
- available support agencies and the types of services offered
- basic methods for statistical analysis and presentation of statistical data
- difference between negative and positive language
- differences between written and spoken English
- how to read and use body language to gain confidence of others
- how to record information which may be used for legal purposes
- how to safeguard confidential information

## REQUIRED SKILLS AND KNOWLEDGE

- how to use business equipment to present information
- negotiation techniques
- OHS implications relating to use of guard dogs, apprehension or arrest of persons, use of firearms, use of restraints, handcuffs, batons and spray
- organisational standards for the presentation and maintenance of written information
- principles of AS/NZS 4360: 2004 Risk management
- risk management principles and practices
- sources of supply of security equipment or systems
- tactical response measures
- use of force guidelines.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- identifying and evaluating security risks and control measures in compliance with client, organisational and legislative requirements
- designing and developing effective action plans which incorporate strategies for treating risks, contingency arrangements, key tasks and resources, and communication and reporting
- designing and testing risk treatment options which are compatible with nature of risk and client requirements, and conducting an analysis of the results to confirm effectiveness of treatments
- developing a comprehensive risk management plan in an appropriate format which incorporates a broad range of relevant information, considers implementation issues, and incorporates continuous improvement mechanisms based on the principles of AS/NZS 4360:2004.

#### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements,

performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment** This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment** Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Security risks may*

- biological hazards
- chemical spills

***relate to:***

- client contact
- electrical faults
- explosives
- financial viability
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
- property or people
- security systems
- suspicious packages or substances
- systems or process failures
- terrorism
- violence or physical threats.

***Risk relates to:***

- the chance of something happening that will have an impact on objectives.

***Organisational requirements may relate to:***

- client service standards
- implementation of OHS system
- policies for ensuring privacy and confidentiality of information
- procedures for archiving electronic and hard-copy records
- procedures for recording, storing and destroying information
- standard of language, literacy and numeracy required
- use of organisational equipment and resources.

***Legislative requirements may relate to:***

- anti-discrimination and diversity
- Australian standards, codes of practice and regulations
- award and enterprise agreements
- duty of care
- evidence collection
- licensing arrangements and certification requirements
- OHS issue resolution
- relevant commonwealth, state and territory OHS legislation, codes of practice and regulations
- roles and responsibilities of OHS representatives and committees
- trade practices

- Relevant standards:**
- use of force.
  - must include AS/NZS 4360: 2004 Risk management
  - may relate to:
    - AS2630-1983 Guide to the selection and application of intruder alarm systems for domestic and business premises
    - HB 167:2006 Security Risk Management
    - HB 436 Risk Management Guidelines - Companion to AS/NZS 4360
    - HB 231:2000 Information security risk management guidelines.
- Controls may include:**
- communication
  - deployment of specialist expertise or equipment
  - development of procedures
  - monitoring and surveillance
  - physical attendance and security
  - staff ratios and resource deployment
  - training of personnel.
- Type of risk may be:**
- intermediate
  - likely to occur
  - major
  - minor
  - physical
  - potentially avoidable
  - potentially unavoidable
  - property related
  - unlikely to occur.
- Contingency arrangements may include:**
- approvals and licenses
  - availability of additional resources
  - background information
  - back-up
  - checklists and reporting
  - identification requirements
  - instructions.
- Project planning requirements may include:**
- key outcomes
  - milestones
  - personnel involvement
  - resources
  - tasks
  - timelines.
- Treatment options**
- controlled interruptions to normal operations

**may include:**

- exercises
- information collation and analysis
- simulations
- surveillance
- verification requirements.

***Relevant persons may include:***

- authorities
- client
- managers
- technical specialists.

***Tests may include:***

- alarms and other warning devices
- exercises
- inspections
- interviews
- rehearsals
- simulations.

***Management requirements may relate to:***

- adherence to organisational policies and procedures
- allocation of suitable resources and expertise
- feedback and monitoring arrangements
- preparation of documentation and checklists
- procedures to maximise safety of operatives
- project planning
- reporting procedures and timeframes
- risk management timelines and objectives specified in action plans.

***Relevant information may include***

- action plans
- backup systems or processes
- contingency plans
- details and results of testing and relevant statistical analysis
- identified assets
- identified management requirements
- implementation issues
- operational issues
- resource requirements including allocation and location of resources
- review and monitoring procedures
- risk assessment
- supporting evidence
- threat assessment
- treatment options and strategies linked to risks and threats.

- Format may relate to:**
- accuracy
  - common industry terminology
  - enclosures and attachments
  - length
  - sequence of coverage
  - style
  - use of abbreviations
  - use of appendices
  - use of plain English.

## **Unit Sector(s)**

**Unit sector**                      Security

## **Competency field**

**Competency field**              Security and risk management

# CPPSEC5005A Implement security risk management plan

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to facilitate implementation of a security risk management plan. It requires the ability to allocate roles and responsibilities, coordinate and monitor implementation procedures, and evaluate the effectiveness of treatment options.

This unit may form part of the licensing requirements for persons engaged in risk assessment operations in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit** This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Organise functions and tasks.</b>	<p>1.1 Applicable provisions of <i>legislative</i> and <i>organisational requirements</i>, and <i>relevant standards</i> for <i>risk</i> assessment activities are identified and complied with.</p> <p>1.2 <i>Roles and responsibilities</i> associated with the implementation of the security risk management plan are clearly defined and articulated to <i>relevant persons</i>.</p> <p>1.3 <i>Activities</i> and targets are linked to achievement of milestones and outcomes in project action plans.</p> <p>1.4 <i>Resources, equipment and materials</i> to assist plan implementation are suitable to project purposes and available within specified timelines.</p> <p>1.5 Information related to the implementation of the plan is accurately and promptly distributed using established communication channels.</p> <p>1.6 Confidentiality requirements are confirmed and maintained in accordance with client and organisational requirements.</p>
<b>2 Monitor risk context.</b>	<p>2.1 Emerging risks or threats to assets are monitored and assessed to maintain ongoing suitability of implemented security risk <i>treatment options</i>.</p> <p>2.2 Changes to operating environment are monitored and corrective measures determined and incorporated into the plan as required.</p> <p>2.3 <i>Targets and outcomes</i> are regularly reviewed and evaluated to ensure achievement of <i>project aims</i> based on relevant standards.</p> <p>2.4 Existence and occurrence of risks are accurately and comprehensively documented providing an assessment of the type, nature and cause.</p> <p>2.5 Application of contingencies and corrective measures are accurately documented.</p>
<b>3 Review effectiveness of treatment options.</b>	<p>3.1 Long and short-term options are costed to ensure an accurate estimate of resources is allocated to support the plans.</p> <p>3.2 Discrepancies between treatment options and risk incidence are monitored and addressed through appropriate modifications to plans.</p> <p>3.3 Stages of implementation are identified and resources and options are coordinated to ensure access and availability.</p> <p>3.4 Corrective measures are developed, tested and incorporated into the risk management plan.</p>

**ELEMENT****PERFORMANCE CRITERIA**

3.5 Feedback on effectiveness of treatment options is sought and provided to relevant personnel.

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge and their level required for this unit.

**Required skills**

- allocate work tasks and functions
- coaching and mentoring to provide support to colleagues
- collate and analyse numerical data
- communicate in a clear and concise manner
- delegate roles and responsibilities
- determine suitability of treatment option against security risk
- determine type and nature of security risks and threats
- manage projects
- monitor implementation procedures
- monitor risk context and identify emerging risks or threats to assets
- prepare and present verbal and written reports
- prioritise tasks and organise schedules
- prioritise treatment options in terms of degree of security risk
- provide written communication to a standard required for compiling reports and summarising information
- relate to persons of different social and cultural backgrounds and varying physical and mental abilities
- research and analyse data and information
- summarise information
- use a variety of problem-solving techniques
- use business equipment and technology.

**Required knowledge**

- availability and capability of project management software
- concept of integrated security measures including physical security; information technology security, and security of personnel and information
- current security systems and technologies and available expertise
- operating environment and business operations
- preparation of documentation procedures
- principles of effective communication

## REQUIRED SKILLS AND KNOWLEDGE

- principles of AS/NZS 4360: 2004 Risk management and related guidelines
- privacy and confidentiality requirements
- process of security risk management
- relevant legislation and regulations including licensing requirements
- risk assessment techniques and processes
- sources of supply of security equipment and systems
- types of treatment options appropriate to the range of security risks and threats applicable to premises and businesses.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- monitoring emerging risks to ensure ongoing suitability of risk management plan based on principles of AS/NZS 4360: 2004
- efficient allocation of resources to support risk management plan
- effectively communicating designated roles, responsibilities and work schedules to security personnel
- preparing documentation and guidelines with a clear explanation of the incidence, nature and causes of risks and appropriate contingency arrangements
- systematically reviewing the effectiveness of treatment options and making appropriate modifications as required to address any discrepancies between treatment options and risk incidence.

#### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and

procedures

- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment** This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment** Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to:***

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- cabling
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- Force continuum, use of force guidelines

- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- surveillance
- telecommunications
- trespass and the removal of persons
- use of listening and recording devices
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

***Organisational requirements may relate to:***

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.

***Relevant standards:***

- must include AS/NZS 4360: 2004 Risk management

- may relate to:
  - AS2630-1983 Guide to the selection and application of intruder alarm systems for domestic and business premises
  - HB 167:2006 Security Risk Management
  - HB 436 Risk Management Guidelines - Companion to AS/NZS 4360
  - HB 231:2000 Information security risk management guidelines.

***Risk relates to:***

- the chance of something happening that will have an impact on objectives.

***Security risks may relate to:***

- biological hazards
- chemical spills
- client contact
- electrical faults
- explosives
- financial viability
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
- property or people
- security systems
- suspicious packages or substances
- systems or process failures
- terrorism
- violence or physical threats.

***Roles and responsibilities may relate to:***

- administrative support
- backup operational role
- decision-making
- frontline role
- team leadership
- team membership.

***Relevant persons may include:***

- client
- colleagues
- human resources personnel
- management

- Activities may include:**
- security personnel.
  - advising
  - field work
  - monitoring
  - organising
  - report preparation
  - reporting.
- Resources, equipment and materials may relate to:**
- consumables
  - equipment
  - funding
  - personnel
  - time
  - vehicles.
- Treatment options may relate to:**
- controlled interruptions to normal operations
  - exercises
  - information collation and analysis
  - simulations
  - surveillance
  - verification requirements.
- Targets and outcomes may relate to:**
- client support times
  - effective security risk management
  - incident reports
  - level of feedback from clients
  - number of new sales
  - police liaison
  - response times.
- Project aims may relate to:**
- key outcomes
  - milestones
  - personnel involvement
  - resources
  - tasks
  - timelines.

## Unit Sector(s)

Unit sector                      Security

## Competency field

Competency field      Security and risk management

## **CPPSEC5006A Determine strategy for the implementation of biometric technology**

### **Modification History**

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to determine requirements and processes for the strategic implementation of biometric technology in the workplace.

It requires the ability to determine security and biometric technology requirements, design treatment options and develop an implementation strategy for the integration of a biometrics system.

An understanding of the operating principles of biometric systems including software, hardware and acquisition devices is also required as well as the ability to interpret and apply effective principles and requirements relating to confidentiality, privacy and security in own work.

This unit may form part of the licensing requirements for persons engaged in security operations involving biometric technology in those states and territories where these are regulated activities.

## Application of the Unit

### Application of the unit

This unit of competency has application in those roles involving determining requirements for biometric technology in the workplace to maintain security. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine security requirements.	<p>1.1 Applicable <i>Occupational Health and Safety (OHS)</i>, <i>legislative</i> and <i>organisational requirements</i> relevant to workplace <i>biometric technology</i> are identified and complied with.</p> <p>1.2 Relevant <i>privacy legislation</i> and codes of ethics relevant to the workplace application of biometric technology are accessed and interpreted.</p> <p>1.3 Reliability and effectiveness of organisational <i>security safeguards</i> are evaluated.</p> <p>1.4 <i>Threats</i> to organisational physical and technical security are identified.</p> <p>1.5 <i>Risks</i> are identified and risk levels established and prioritised.</p> <p>1.6 Effective <i>communication</i> and <i>interpersonal techniques</i> are used that reflect sensitivity to individual <i>social and cultural differences</i>.</p> <p>1.7 Specialist assistance to examine and assess security requirements is sought as required in accordance with organisational requirements.</p>
2 Determine requirements for implementing biometric technology.	<p>2.1 Legislative and regulatory requirements applicable to the use of biometric technology are confirmed.</p> <p>2.2 <i>Options</i> for single or <i>multiple</i> biometric technology are determined.</p> <p>2.3 Physical and technical specifications of <i>biometric equipment and systems</i> to be installed are determined.</p> <p>2.4 Workspace requirements are identified and locations determined.</p> <p>2.5 <i>Resources</i>, skills and training requirements for the implementation of biometric technology are determined.</p> <p>2.6 <i>Existing architecture</i> is assessed for effective integration with biometric technology and <i>additional requirements</i> determined.</p>
3 Design implementation options.	<p>3.1 Implementation options are selected in accordance with industry practices and organisational policies and procedures.</p> <p>3.2 Implementation options are <i>feasible</i> and verifiable in accordance with organisational requirements.</p> <p>3.3 Implementation options are in compliance with time schedules, available resources and budgetary guidelines.</p> <p>3.4 Implementation options take into account organisational risk assessment and security requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
4 Develop an implementation strategy.	<p>3.5 Implementation options are effective and applicable in the workplace.</p> <p>4.1 All <i>relevant information</i> is collated, documented and presented in an <i>appropriate format</i> in accordance with organisational requirements.</p> <p>4.2 <i>Implementation strategy</i> is developed in accordance with organisational requirements.</p> <p>4.3 Strategy incorporates <i>contingencies</i> and allows for continuous improvement planning.</p> <p>4.4 Strategy is presented to <i>relevant persons</i> and feedback is sought and used to evaluate and refine strategy.</p> <p>4.5 <i>Records and reports</i> are completed and maintained in accordance with legislative and organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

#### Required skills

- accurately and securely maintain records, reports and other workplace information
- analyse organisational security plans, goals, objectives and existing safeguards
- coaching and mentoring to provide support to colleagues
- comply with applicable confidentiality and privacy requirements
- comply with legislation, regulations, standards, codes of practice relevant to workplace biometric technology
- conduct and evaluate risk and threat assessments
- design effective treatment options
- determine biometric technology and system requirements, including single or multiple biometrics applications
- determine resources including personnel, tools and equipment
- determine security requirements
- make effective decisions
- plan for contingencies
- read and interpret technical information including plans, designs and specifications
- relate effectively to people from a range of social, cultural and ethnic backgrounds and varying physical and mental abilities
- research and analyse data and specifications

## **REQUIRED SKILLS AND KNOWLEDGE**

- resolve problems
- select and use equipment and technology appropriate to the work task
- undertake effective enrolment of biometric and biographical data
- use appropriate communication and interpersonal skills including negotiation
- written communication skills sufficient to complete relevant records and reports.

### **Required knowledge**

- accuracy metrics and ratios according to risk tolerance
- applicable commonwealth, state or territory legislation, regulations, standards and codes of practice relevant to the full range of processes relating to workplace biometric technology
- appropriate mathematical procedures for estimating, measuring and calculating
- biometric technology installation and implementation processes, procedures and requirements
- ergonomic and safe working practices and procedures
- established threshold levels and their impact on security
- feasibility and cost-benefit analysis techniques
- initial enrolment processes
- management of enrolment data
- operating systems and integration application requirements
- operational principles of information technology
- organisational procedures for recording, reporting and maintaining workplace information
- organisational security plans, goals and objectives
- organisational standards, requirements, policies and procedures for the use of biometric technology
- principles of cultural diversity and access and equity
- privacy and ethics issues associated with biometric technology
- product options for various biometric systems
- risk, threats and vulnerabilities associated with biometric technology
- security and risk assessment and management techniques and processes
- types, functions and parameters of biometric technology including software, hardware and acquisition devices
- workplace communication channels, protocols and procedures.

## **Evidence Guide**

### **EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- accurately estimating resources to support implementation strategy and determining roles, responsibilities and work schedules
- complying with applicable legislation and codes of ethics applicable to privacy and client confidentiality
- complying with organisational policies and procedures, including OHS, relevant to biometric work tasks
- designing treatment options which are compatible with assessed risk and security requirements
- determining biometric technology requirements based on an accurate evaluation of existing security controls, assets, and potential risks and threats
- developing an effective strategy which incorporates the implementation of treatment options, contingency arrangements, and resources for the effective implementation of biometric technology in a workplace environment.

**Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

**Guidance information**

Assessment processes and techniques must be culturally

## for assessment

appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Occupational Health and Safety (OHS) requirements may relate to:***

- controlling and minimising risks
- correct manual handling including shifting, lifting and carrying
- elimination of hazardous materials and substances
- identifying hazards
- safe use and operation of equipment including
  - business technology
  - first aid equipment
  - fire safety equipment
  - personal protective clothing and equipment
  - safety equipment
- safety procedures for the protection of self and others.
- Australian standards and quality assurance requirements
- award and enterprise agreements
- Compliance Policy Guidelines (CPGs)
- counter-terrorism
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality

***Legislative requirements may relate to:***

- relevant commonwealth, state and territory legislation, codes and national standards for:
    - anti-discrimination
    - cultural and ethnic diversity
    - environmental issues
    - equal employment opportunity
    - industrial relations
    - OHS
  - relevant industry codes of practice
  - telecommunications.
  - access and equity policies, principles and practices
  - business and performance plans
  - client service standards
  - code of conduct, code of ethics
  - communication and reporting procedures
  - complaint and dispute resolution procedures
  - emergency and evacuation procedures
  - employer and employee rights and responsibilities
  - environmental management including waste disposal, recycling and re-use guidelines
  - OHS policies, procedures and programs
  - own role, responsibility and authority
  - personal and professional development
  - privacy and confidentiality of information
  - quality assurance and continuous improvement processes and standards
  - resource parameters and procedures
  - roles, functions and responsibilities of security personnel
  - standard operating procedures
  - storage and disposal of information
  - use and maintenance of equipment and systems.
- Organisational requirements may relate to:***
- a measurable physical characteristic or personal behavioural trait used to recognise the identity or verify the identity of an individual.
- Biometric refers to:***
- Biometric technologies include:***
- facial recognition
  - fingerprint recognition
  - hand geometry
  - iris recognition
  - retina recognition
  - signature recognition
  - vein recognition
  - voice recognition.

***Privacy legislation may include:***

- Commonwealth, State and Territory Privacy Acts
- national information privacy principles
- national privacy principles.

***Security safeguards may be:***

- administrative and include:
  - contingency plans (data back-up, disaster recovery, and emergency mode operation plans)
  - information access management (access authorisation, establishment and modification)
  - security awareness and training (awareness, virus protection, log-in success or failure, password management)
  - security incident procedures (report and response procedures)
  - security management (risk analysis and management)
- physical and include measures to protect information systems, buildings and equipment from natural and environmental hazards and unauthorised intrusions
- technical and include:
  - access control (user identification, emergency access procedures, automatic log-off, encryption and decryption)
  - audit control (logging, capturing data versions, times, sessions, workstations, events and user information)
  - transmission security (integrity controls, encryption).

***Threats:***

- are intentional or unintentional potential events that could compromise the security integrity of physical and technical organisational systems.

***Risk relates to:***

- the chance of something happening that will have an impact on objectives.

***Risks may relate to:***

- data and information
- personnel
- property.

***Communication may be:***

- face-to-face
- group interaction
- in Indigenous languages
- in languages other than English
- oral reporting
- participation in routine meetings
- reading independently
- recording of discussions
- speaking clearly and directly
- through the use of assistive technology

- via an interpreter
  - visual or written
  - writing to audience needs.
- Interpersonal techniques may involve:***
- active listening
  - being non-judgemental
  - being respectful and non-discriminatory
  - constructive feedback
  - control of tone of voice and body language
  - culturally aware and sensitive use of language and concepts
  - demonstrating flexibility and willingness to negotiate
  - effective verbal and non-verbal communication
  - maintaining professionalism
  - providing sufficient time for questions and responses
  - reflection and summarising
  - two-way interaction
  - use of plain English
  - use of positive, confident and cooperative language.
- Social and cultural differences may relate to:***
- dress and personal presentation
  - food
  - language
  - religion
  - social conventions
  - traditional practices
  - values and beliefs.
- Options may relate to:***
- enrolment advice
  - motivation to verify
  - tolerance for rejected attempts.
- Multiple biometrics refers to:***
- a biometric system that integrates two or more biometric technologies (facial and iris recognition, and multiple instances of a single biometric eg one, two or ten fingerprints).
- Biometric equipment and systems are:***
- automated systems able to capture a biometric sample from an individual person, extract biometric data from the sample, compare the data with one or more reference templates, determine the quality of a match, and indicate whether or not an identification or verification of identity has been achieved.
- Biometric equipment and systems may include:***
- acquisition devices:
    - cameras (video, infrared-enabled video, single-image)
    - chip or reader embedded in peripheral device
    - microphones

- optical scanners
  - biometric servers
  - hardware
  - interconnecting infrastructure
  - software:
    - server-based authentication software for biometric authentication and logging
    - software associated with acquisition devices.
- Resource requirements may include:***
- computer systems (hardware, software and infrastructure)
  - equipment
  - funding
  - personnel
  - time
  - tools.
- Existing architecture may include:***
- desktop PCs
  - local area networks (LANs)
  - mainframe systems
  - servers
  - websites
  - wide area networks (WANs).
- Additional requirements may relate to:***
- integration service requirements and interoperability
  - upgrading or replacing the system or components of the system.
- Feasibility may relate to:***
- economic and schedule feasibility
  - operational feasibility
  - technical feasibility.
- Relevant information may include:***
- assets (resources, data and information)
  - contingency plans
  - implementation issues
  - resource requirements including allocation and location
  - risk and threat assessment outcomes
  - treatment options.
- Appropriate format may include:***
- formats that cater for those with special needs for example, producing documents in large print.
- Implementation strategy may include:***
- analysis and comparison of biometrics system options
  - assessment of security risks
  - enrolment processes
  - integration requirement and system interoperability
  - resources necessary for implementation
  - staged rollouts.

***Contingencies may detail:***

- roles, responsibilities, teams and procedures associated with restoring a security system following a disruption
- side manual door entry.

***Relevant persons may include:***

- biometric technology specialists
- clients
- colleagues
- external consultants
- information technology specialists
- manager.

***Records and reports:***

- may be:
  - computer-based
  - manual
  - other appropriate organisational communication system
- may detail:
  - biometric technologies and systems
  - organisational security requirements
  - resources requirements
  - risk assessment outcomes
  - technical data and specifications
  - timeframe and financial considerations.

## **Unit Sector(s)**

**Unit sector** Security

## **Competency field**

**Competency field** Biometrics

## **CPPSEC5007A Assess biometric system**

### **Modification History**

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to conduct an assessment of the application and operations of biometric technologies and systems in a workplace environment.

It requires the ability to determine security arrangements and requirements, measure and assess the operation, application and outcomes of biometric technologies and systems in terms of efficiency and effectiveness. It also involves the preparation and presentation of assessment results.

An understanding of the operating principles of biometric systems including software, hardware and acquisition devices, and principles of measurement and assessment are also required as well as the ability to interpret and apply effective principles and requirements relating to confidentiality, privacy and security in own work.

This unit may form part of the licensing requirements for persons engaged in security operations involving biometric technology in those states and territories where these are regulated activities.

## Application of the Unit

### Application of the unit

This unit of competency has application in those roles involving the assessment of biometric technologies and systems in the workplace. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan for assessment.</b>	<p>1.1 Applicable <i>Occupational Health and Safety (OHS)</i>, <i>legislative</i> and <i>organisational requirements</i> relevant to <i>biometric technologies and systems</i> are confirmed.</p> <p>1.2 Relevant <i>privacy legislation</i> and codes of ethics relevant to the workplace application of biometric technology are accessed and interpreted.</p> <p>1.3 Context and purpose of assessment is determined and clarified with <i>relevant persons</i> as required.</p> <p>1.4 Organisational <i>security requirements</i> are determined.</p> <p>1.5 Resources relevant to assessment activities are determined and organised in accordance with workplace procedures.</p> <p>1.6 <i>Assessment plan</i> is constructed in accordance with client requirements and workplace procedures.</p>
<b>2 Conduct assessment.</b>	<p>2.1 Effective <i>communication</i> and <i>interpersonal techniques</i> are used that reflect sensitivity to individual <i>social and cultural differences</i>.</p> <p>2.2 Integration of biometric systems with <i>existing architecture</i> is assessed.</p> <p>2.3 Operational functions of biometric technologies and systems are assessed.</p> <p>2.4 Application of single or <i>multiple</i> biometric technologies are assessed.</p> <p>2.5 Data and information is assessed and errors or deficiencies identified.</p> <p>2.6 Skills and training requirements for the use, operation and maintenance of biometric systems are determined.</p>
<b>3 Complete assessment.</b>	<p>3.1 Assessment results are analysed, accurately documented and prepared in an <i>appropriate format</i> in accordance with organisational requirements.</p> <p>3.2 Findings are presented to relevant persons in accordance with workplace procedures.</p> <p>3.3 Findings are supported by verifiable evidence in accordance with organisational requirements.</p> <p>3.4 Feedback is sought, received and used in a constructive manner.</p> <p>3.5 Recommendations or identified opportunities for <i>system improvements</i> are forwarded to relevant persons to inform future practice.</p> <p>3.6 <i>Records and reports</i> are completed and maintained in accordance with legislative and organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

#### Required skills

- accurately and securely maintain records, reports and other workplace information
- analyse organisational security plans, goals, objectives and existing safeguards
- assess data and information and identify errors or deficiencies
- assess the application, operation and outcomes of biometric technologies and systems
- coaching and mentoring to provide support to colleagues
- comply with applicable confidentiality and privacy requirements
- comply with legislation, regulations, standards, codes of practice relevant to workplace biometric systems
- conduct and evaluate risk and threat assessments
- conduct contingency planning
- design effective treatment options
- determine biometric technology and system requirements, including single or multiple biometric applications
- determine resource requirements including personnel, tools and equipment
- determine security requirements
- determine skills and training requirements
- make effective decisions
- read and interpret technical information including plans, designs and specifications
- relate effectively to people from a range of social, cultural and ethnic backgrounds and varying physical and mental abilities
- resolve problems
- select and use equipment and technology appropriate to the work task
- undertake effective enrolment of biometric and biographical data
- use appropriate communication and interpersonal skills including negotiation.
- written communication skills sufficient to complete relevant records and reports
- written communication skills sufficient to write assessment plan, document assessment results and complete relevant records and reports.

#### Required knowledge

- accuracy metrics and ratios according to risk tolerance
- applicable commonwealth, state or territory legislation, regulations, standards and codes of practice relevant to the full range of processes relating to workplace biometric systems

## REQUIRED SKILLS AND KNOWLEDGE

- appropriate mathematical procedures for estimating, measuring and calculating
- assessment methods and techniques
- biometric technology and systems installation and implementation processes, procedures and requirements
- ergonomic and safe working practices and procedures
- established threshold levels and their impact on security
- feasibility and cost-benefit analysis techniques
- initial enrolment processes
- management of enrolment data
- operating systems and integration application requirements
- operational principles of information technology
- organisational procedures for recording, reporting and maintaining workplace information
- organisational security plans, goals and objectives
- organisational standards, requirements, policies and procedures for the use of biometric systems
- principles of cultural diversity and access and equity
- privacy and ethics issues associated with biometric systems
- problem identification and resolution procedures
- product options for various biometric systems
- risk, threats and vulnerabilities associated with biometric technology
- security and risk assessment and management techniques and processes
- types, functions and parameters of biometric systems including software, hardware and acquisition devices
- workplace communication channels, protocols and procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- complying with applicable legislation and codes of ethics applicable to privacy and client confidentiality
- complying with organisational policies and procedures, including OHS, relevant to biometric work tasks

- determining security requirements based on an accurate assessment of existing security controls, assets, and existing and potential risks and threats
- determining skill and training requirements to support the application of biometric technologies and systems
- efficiently and effectively assessing the application, operation and outcomes of biometric technologies and systems, including an accurate assessment of data and information
- establishing purpose and context of assessment and plan, organising and coordinating assessment activities
- preparing and presenting assessment findings, seeking and reviewing feedback, and recommending opportunities for improvement to inform future practices.

### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

### **Method of assessment**

This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

### **Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Occupational Health and Safety (OHS) requirements may relate to:***

- controlling and minimising risks
- correct manual handling including shifting, lifting and carrying
- elimination of hazardous materials and substances
- identifying hazards
- safe use and operation of equipment including
  - business technology
  - first aid equipment
  - fire safety equipment
  - personal protective clothing and equipment
  - safety equipment
- safety procedures for the protection of self and others.
- Australian standards and quality assurance requirements
- award and enterprise agreements
- Compliance Policy Guidelines (CPGs)
- counter-terrorism
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations

***Legislative requirements may relate to:***

- OHS
    - relevant industry codes of practice
    - telecommunications.
    - access and equity policies, principles and practices
    - business and performance plans
    - client service standards
    - code of conduct, code of ethics
    - communication and reporting procedures
    - complaint and dispute resolution procedures
    - emergency and evacuation procedures
    - employer and employee rights and responsibilities
    - environmental management including waste disposal, recycling and re-use guidelines
    - OHS policies, procedures and programs
    - own role, responsibility and authority
    - personal and professional development
    - privacy and confidentiality of information
    - quality assurance and continuous improvement processes and standards
    - resource parameters and procedures
    - roles, functions and responsibilities of security personnel
    - standard operating procedures
    - storage and disposal of information
    - use and maintenance of equipment and systems.
- Organisational requirements may relate to:**
- a measurable physical characteristic or personal behavioural trait used to recognise the identity or verify the identity of an individual.
- Biometric refers to:**
- facial recognition
  - fingerprint recognition
  - hand geometry
  - iris recognition
  - retina recognition
  - signature recognition
  - vein recognition
  - voice recognition.
- Biometric technologies include:**
- automated systems able to capture a biometric sample from an individual person, extract biometric data from the sample, compare the data with one or more reference templates, determine the quality of a match, and indicate whether or not an identification or verification of identity has been achieved.
- Biometric systems are:**
- acquisition devices
- Biometric systems may**

- include:***
- cameras (video, infrared-enabled video, single-image)
  - chip or reader embedded in peripheral device
  - microphones
  - optical scanners
  - biometric servers
  - hardware
  - interconnecting infrastructure
  - software
    - server-based authentication software for biometric authentication and logging
    - software associated with acquisition devices.
- Privacy legislation may include:***
- Commonwealth, State and Territory Privacy Acts
  - national information privacy principles
  - national privacy principles.
- Relevant persons may include:***
- biometric technology specialists
  - clients
  - colleagues
  - external consultants
  - information technology specialists
  - manager.
- Security requirements may be:***
- risk and threat assessments
    - auditability
    - authentication
    - integrity
    - privacy protection
    - recovery
  - security objectives
    - auditability
    - authentication
    - integrity
    - privacy protection
    - recovery
  - security safeguards
    - administrative (licensing, authorisations, contingency plans, information access management, security incident procedures, security management, security awareness and training)
    - physical (include measures to protect information systems, buildings and equipment from natural and environmental hazards and unauthorised intrusions)
    - technical (access control, audit control, transmission

security).

***Assessment plan may include:***

- enrolment requirements
- level of assessment
- measurement and testing details and methods
- necessary resources (eg number of tests)
- privacy and ethics requirements
- timelines.

***Communication may be:***

- face-to-face
- group interaction
- in Indigenous languages
- in languages other than English
- oral reporting
- participation in routine meetings
- reading independently
- recording of discussions
- speaking clearly and directly
- through the use of assistive technology
- via an interpreter
- visual or written
- writing to audience needs.

***Interpersonal techniques may involve:***

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

***Social and cultural differences may relate to:***

- dress and personal presentation
- food
- language
- religion
- social conventions
- traditional practices
- values and beliefs.

- Existing architecture may include:***
- desktop PCs
  - local area networks (LANs)
  - mainframe systems
  - servers
  - websites
  - wide area networks (WANs).
- Multiple biometrics refers to:***
- a biometric system that integrates two or more biometric technologies (facial and iris recognition, and multiple instances of a single biometric eg one, two or ten fingerprints).
- Appropriate format may include:***
- formats that cater for those with special needs for example, producing documents in large print.
- System improvements may relate to:***
- backup systems
  - changes to biometrics settings
  - contingency plans
  - threshold levels.
- Records and reports:***
- may be:
    - computer-based
    - manual
    - other appropriate organisational communication system
  - may detail:
    - applications of biometric technologies and systems
    - functional operations of biometric technologies and systems
    - resource requirements
    - risk and threat assessments
    - security arrangements and additional requirements.

## Unit Sector(s)

Unit sector                      Security

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify animation requirements	<ol style="list-style-type: none"> <li>1. Clarify <b>2D animation</b> requirements, including <b>design specifications</b> and storyboard in consultation with <b>relevant personnel</b></li> <li>2. Clarify target users/audience and requirements with regard to <b>output formats</b> and <b>delivery platforms</b></li> </ol>
Generate and assess ideas	<ol style="list-style-type: none"> <li>3. Review animations, artworks and other creative sources that may inspire design ideas</li> <li>4. Obtain other relevant information that may influence design ideas</li> <li>5. Generate a range of animation ideas that are technically feasible, respond to specifications and provide creative solutions to all design issues</li> <li>6. Present animation ideas to relevant personnel using appropriate <b>design techniques</b></li> </ol>
Plan approach	<ol style="list-style-type: none"> <li>7. Assess the range of industry-current <b>2D animation software</b> available to determine compatibility with design specifications</li> <li>8. In consultation with relevant personnel, select the most appropriate 2D animation software for a given purpose</li> <li>9. Evaluate initial design ideas and specifications against findings and discuss with relevant personnel to select final design concept</li> </ol>
Produce animations	<ol style="list-style-type: none"> <li>10. Apply basic <b>screen principles, visual design principles, communication principles, animation techniques</b> and <b>animation principles</b> to produce animated sequences</li> <li>11. Source and import, or generate sufficient quantity of key drawings to establish required actions</li> <li>12. Combine animated objects to produce single sequences according to creative requirements and specifications</li> <li>13. Integrate <b>audio assets</b> where necessary</li> <li>14. Save and store animations using appropriate output file formats and standard naming conventions</li> </ol>
Finalise animations	<ol style="list-style-type: none"> <li>15. Review animations to assess creative solutions to design specifications, appropriateness to users/audience and technical feasibility</li> <li>16. Discuss and confirm with relevant personnel additional requirements or modifications to overall designs or animations and undertake necessary amendments</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - interpret information in software user manuals and help features
  - work as a member of a project team, both independently on assignment and under direction
  - respond constructively to feedback received from other team members
- initiative and enterprise in the context of:
  - generating a range of feasible ideas for 2D animated sequences
  - visualising creative concepts
- technical skills sufficient to:
  - use appropriate software to develop 2D animations
  - produce hand-drawn sketches
  - apply the basic principles of screen, visual design and communication to produce 2D animations
  - create 2D animations in appropriate formats for a range of delivery platforms
  - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members
  - basic understanding of the relationship between the technical and creative aspects and requirements of media projects
- basic animation techniques and principles
- basic screen principles
- principles of visual design and communication
- copyright clearance procedures
- OHS standards as they apply to use of computer and keyboard for periods of time

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of a range of 2D digital animations that:             <ul style="list-style-type: none"> <li>• meet specifications</li> <li>• demonstrate the basic principles of screen, visual design and communication</li> <li>• meet the technical requirements of at least two delivery platforms listed in the range statement</li> <li>• satisfy client requirements</li> </ul> </li> <li>• collaborative approach to work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a selection of resources, equipment and current industry-current software as listed in the range statement</li> <li>• where sound is integrated in the animated sequence, access to a range of suitable software to support the integration of sound and visual elements</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of 2D digital animations created by the candidate in response to specifications</li> <li>• written or oral questioning to test knowledge of visual design principles, communication principles, animation techniques and responsibilities of different members of a project team.</li> </ul>

**EVIDENCE GUIDE**

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFANM302A Create 3D digital animations
- CUFDIG301A Prepare video assets
- CUFDIG304A Create visual design components.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>2D animations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• basic games</li> <li>• buttons</li> <li>• characters</li> <li>• illustrations</li> <li>• logos</li> <li>• morphs</li> <li>• objects</li> <li>• puzzles</li> <li>• simulated sequences</li> <li>• text</li> <li>• titles and credits.</li> </ul>
<p><b><i>Design specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• characters and objects</li> <li>• key frames</li> <li>• objects</li> <li>• references</li> <li>• samples</li> <li>• script</li> <li>• storyboard</li> <li>• technical specifications, including:             <ul style="list-style-type: none"> <li>• output file format</li> <li>• output file size</li> <li>• operating system</li> <li>• hardware specifications, including memory size, RAM</li> <li>• delivery platform</li> <li>• bandwidth</li> <li>• media form.</li> </ul> </li> </ul>
<p><b><i>Relevant personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• art director</li> <li>• audio asset creator</li> <li>• designer</li> <li>• director</li> <li>• graphic artist</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• instructional designer</li> <li>• navigation designer</li> <li>• producer</li> <li>• project manager</li> <li>• system support personnel</li> <li>• other technical and specialist personnel.</li> </ul>
<i>Output formats</i> may include:	<ul style="list-style-type: none"> <li>• DIR/DCR</li> <li>• FLA/SWF</li> <li>• GIF</li> <li>• HTML.</li> </ul>
<i>Delivery platforms</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• film</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• PDA (personal digital assistant)</li> <li>• video</li> <li>• other mobile devices.</li> </ul>
<i>Design techniques</i> may include:	<ul style="list-style-type: none"> <li>• digital illustrations of objects and characters</li> <li>• freehand sketches</li> <li>• storyboards</li> <li>• story trees.</li> </ul>
<i>Animation software</i> may include:	<ul style="list-style-type: none"> <li>• Director</li> <li>• Flash</li> <li>• Toon Boon Studio.</li> </ul>
<i>Screen principles</i> may include:	<ul style="list-style-type: none"> <li>• editing, including basic transitions</li> <li>• framing</li> <li>• lighting</li> <li>• montage</li> <li>• narrative</li> <li>• story-telling</li> <li>• style/genre.</li> </ul>
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• composition</li> <li>• emphasis</li> <li>• focal point</li> <li>• movement</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> <li>• communicating the message</li> <li>• conveying meaning</li> <li>• meeting audience requirements</li> <li>• using functional components.</li> </ul>
<i>Animation techniques</i> may include:	<ul style="list-style-type: none"> <li>• acceleration/deceleration</li> <li>• audio integration</li> <li>• hinges and pivots</li> <li>• key frames and tweens</li> <li>• looping backgrounds</li> <li>• morphing/object exaggeration</li> <li>• motion paths</li> <li>• registration points</li> <li>• rotation</li> <li>• speed/motion blur.</li> </ul>
<i>Animation principles</i> may include:	<ul style="list-style-type: none"> <li>• key frames</li> <li>• motion</li> <li>• pacing/timing</li> <li>• point of view.</li> </ul>
<i>Audio assets</i> may include:	<ul style="list-style-type: none"> <li>• music</li> <li>• narration</li> <li>• sound effects.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify animation requirements	<ol style="list-style-type: none"> <li>1. With reference to <i>production documentation</i>, clarify <i>3D animation</i> requirements and <i>design specifications</i> in consultation with <i>relevant personnel</i></li> <li>2. Examine the models to be animated to determine the most appropriate <i>animation techniques</i></li> <li>3. Identify the <i>file format</i> and <i>delivery platform</i> for animated sequences</li> <li>4. Identify <i>factors</i> that may influence animation design approach</li> <li>5. In consultation with relevant personnel, clarify work flow sequences to ensure that production schedule deadlines are met</li> </ol>
Plan approach	<ol style="list-style-type: none"> <li>6. Research animations, artworks and other creative sources that may inspire visual design ideas</li> <li>7. Generate a range of animation ideas that are technically feasible, respond to briefs and provide creative solutions to all design issues</li> <li>8. Present animation ideas to relevant personnel using appropriate <i>design techniques</i>.</li> <li>9. Adjust approach to incorporate feedback and agree on final design concepts</li> <li>10. Discuss and select <i>3D animation software</i> with relevant personnel to ensure that animated sequences meet specified outcomes</li> <li>11. Analyse <i>audio assets</i> supplied for animations as required</li> </ol>
Produce animated sequences for review	<ol style="list-style-type: none"> <li>12. Create 3D animations using animation techniques to suit design requirements</li> <li>13. Apply basic <i>animation principles</i>, <i>screen principles</i>, <i>visual design principles</i> and <i>communication principles</i></li> <li>14. Apply real world camera techniques to virtual cameras used in 3D animation</li> <li>15. Render completed animated sequences</li> <li>16. Save and store animated sequences using appropriate output file formats, standard naming conventions and version control protocols</li> <li>17. Present 3D animated sequences to relevant personnel for evaluation by agreed deadlines</li> </ol>
Finalise animated	<ol style="list-style-type: none"> <li>18. Review animated sequences to assess creative solutions to design briefs, appropriateness to users/audience and</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
sequences	technical feasibility 19. Discuss and confirm with relevant personnel additional requirements or modifications and complete changes as required

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - work as a member of a production team, both independently on assignment and under direction
  - respond constructively to feedback received from other team members
  - complete workplace documentation
- conceptual and creative skills in the context of:
  - generating feasible ideas for animated sequences
  - having a feel for movement and timing in order to produce convincing animations
  - maintaining design integrity
- technical skills sufficient to:
  - use industry-current animation software to develop digitally animated sequences
  - apply the principles of basic screen, visual design and communication to produce 3D animated sequences
  - output 3D animated sequences in appropriate file formats for a range of delivery platforms
  - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital animations
- basic 3D digital animation techniques
- basic screen principles
- principles of animation
- principles of visual design and communication
- features of a range of delivery platforms

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

| <ul style="list-style-type: none"><li>• OHS standards as they relate to working for periods of time on computers</li></ul> |
|--|

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of 3D digital animated sequences that:             <ul style="list-style-type: none"> <li>• demonstrate the principles of basic screen, visual design and communication</li> <li>• meet the technical requirements of specific platforms</li> <li>• satisfy the design brief and client requirements</li> </ul> </li> <li>• collaborative approach to work</li> <li>• attention to detail</li> <li>• ability to meet production deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a range of resources, equipment and current industry-current software as listed in the range statement</li> <li>• where sound is integrated in animated sequences, access to a range of suitable software to support the integration of sound and visual elements</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence, authenticated show reels and third-party workplace reports of on-the-job performance</li> <li>• critical analysis of a range of 3D digital animated sequences created by the candidate to determine ability to meet design requirements</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>this unit</p> <ul style="list-style-type: none"> <li>informal questioning and discussion, including response to feedback and diagnostics.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CUFANM303A Create 3D digital models</li> <li>CUFDIG303A Produce and prepare photo images</li> <li>CUFDIG304A Create visual design components</li> <li>CUFSOU301A Prepare audio assets.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Production documentation*** may include

- animatics
- brief
- storyboard
- technical specifications.

***3D animations*** may include:

- 3D elements
- 3D panoramas
- basic games
- buttons
- characters
- illustrations
- logos
- models
- morphs/blend shapes
- puzzles
- simulated sequences
- text
- titles and credits.

***Design specifications*** may include:

- characters and objects
- key frames
- objects
- references
- samples
- script
- storyboard
- technical specifications, including:
  - output file format
  - version control protocols
  - output file size
  - operating system
  - hardware specifications, including memory size, RAM
  - delivery platform

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• media form.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• 3D modeller</li> <li>• 3D producer</li> <li>• animation director</li> <li>• audio asset creator</li> <li>• director</li> <li>• graphic artist/designer</li> <li>• instructional designer</li> <li>• lead animator</li> <li>• matte painter</li> <li>• system support personnel</li> <li>• other technical and specialist personnel.</li> </ul>
<i>Animation techniques</i> may include:	<ul style="list-style-type: none"> <li>• acceleration/deceleration</li> <li>• audio integration</li> <li>• dynamic simulation</li> <li>• hierarchies</li> <li>• hinges and pivot points</li> <li>• hybrid method</li> <li>• key frames</li> <li>• layered animation</li> <li>• looping backgrounds</li> <li>• morphing/object exaggeration</li> <li>• motion capture</li> <li>• motion paths</li> <li>• pose to pose animation</li> <li>• registration points</li> <li>• rotation</li> <li>• scripted animation</li> <li>• speed/motion blur</li> <li>• straight-ahead animation.</li> </ul>
<i>File formats</i> may include:	<ul style="list-style-type: none"> <li>• AAS</li> <li>• ACT</li> <li>• ANI</li> <li>• ANM</li> <li>• ANS</li> <li>• AVI</li> <li>• AWA</li> <li>• AWM</li> <li>• CEL</li> <li>• CFT</li> </ul>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to create 3D digital models.</p> <p>This unit is a prerequisite for:</p> <ul style="list-style-type: none"><li>• CUFANM401A Prepare 3D digital models for production.</li></ul> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>3D modellers working on relatively simple projects apply the skills and knowledge described in this unit. From reference material and established designs, they create 3D models using whatever software is applicable to the production.</p> <p>3D models need to meet technical and design specifications, as well as being efficient, reliable, to scale, and easy to rig and animate.</p> <p>Modellers need to appreciate what will be required of their models in later stages of production because this can affect the work they produce. Close liaison with other team members is, therefore, important. Even though a senior modeller or technical director supervises the creation of models, people at this level are expected to work autonomously within clear guidelines.</p> <p>More complex skills associated with 3D digital modelling are covered in:</p> <ul style="list-style-type: none"> <li>• CUFANM401A Prepare 3D digital models for production.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> <li>1. With reference to <i>production documentation</i>, clarify <i>requirements</i> and <i>purpose</i> for 3D digital models</li> <li>2. In consultation with <i>relevant personnel</i>, clarify work flow sequences to ensure that <i>production</i> schedule deadlines are met</li> <li>3. Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which 3D digital models are being created</li> <li>4. Gather and analyse <i>reference materials</i> to help with visualisation of 3D models</li> </ol>
Create 3D digital models	<ol style="list-style-type: none"> <li>5. Use software features to block out models to determine correct proportions in relation to reference materials</li> <li>6. Manipulate software features to apply basic lighting and shaders as required</li> <li>7. Ensure that models' topology allows appropriate deformation, as required</li> <li>8. <i>Progressively refine</i> and check <i>integrity</i> of models until they meet design requirements</li> <li>9. Submit models to relevant personnel for comment on whether production requirements have been met and make final adjustments as required</li> <li>10. Render and output models in required <i>format</i> and submit to relevant personnel by agreed deadlines</li> <li>11. Make back-up copies of files and complete workplace documentation according to enterprise procedures</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - work as a member of a production team, both independently on assignment and under direction
  - respond constructively to feedback received from other team members
  - complete workplace documentation
- technical skills sufficient to:
  - use industry-current software applications to create 3D models to specifications
  - manage files and directories using standard naming conventions and version control protocols
  - make back-up copies of files and store appropriately
- initiative and creativity in the context of visualising and accurately creating 3D digital models of a range of animate and inanimate objects
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital models
- 3D digital modelling techniques
- strong sense of scale, form, weight and volume
- geometry as it applies to the creation of realistic 3D digital models
- features of a range of delivery platforms
- OHS standards as they relate to working for periods of time on computers

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of 3D digital models that: <ul style="list-style-type: none"> <li>• demonstrate efficient use of geometry and attention to detail</li> <li>• meet design requirements</li> </ul> </li> <li>• collaborative approach to work</li> <li>• ability to meet deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a selection of industry-current software as listed in the range statement</li> <li>• access to simulated or real production situations that require the creation of 3D digital models</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of 3D digital models created by the candidate to determine ability to create models for different kinds of objects</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFANM302A Create 3D digital animations</li> </ul>

<b>EVIDENCE GUIDE</b>

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to create digital visual effects.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Compositors or effects artists working in 3D animation and graphics studios apply the skills and knowledge described in this unit. They are responsible for creating digital visual effects to simulate physical or natural phenomenon, such as fire, crowds, flocks of birds, fluids, smoke and weather conditions.</p> <p>They receive material from various sources, which could include bluescreen elements, particles, graphics, 2D and 3D animation, and live action footage. Their job is to creatively combine elements into the final image, ensuring that the established style of the project is respected and continuity is maintained.</p> <p>Typically, their briefs are based on elements of storyboards for film, television or digital media productions, including games. A high level of creativity is required, along with proficiency in using a range of industry-current software applications to create and refine digital visual effects.</p> <p>A collaborative approach to work within a production team is essential, as is an ability to meet deadlines.</p>

Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> <li>1. With reference to <i>production documentation</i>, clarify <i>requirements</i> for <i>digital visual effects</i></li> <li>2. In consultation with <i>relevant personnel</i>, clarify work flow sequences to ensure that production schedule deadlines are met</li> <li>3. Select <i>software</i> that best suits the type of <i>production</i> and <i>delivery platform</i> for which visual effects sequences are being created</li> <li>4. Gather and analyse <i>reference material</i> to help with visualisation of final sequences</li> </ol>
Prepare components	<ol style="list-style-type: none"> <li>5. Gather all <i>assets</i> for integration and check that they are in the correct <i>output file format</i></li> <li>6. Choose digital visual effects that best represent the vision of scripts, as required</li> <li>7. Check that components comply with storyboard requirements</li> <li>8. Determine the appropriate <i>methods and techniques</i> to be used for the production of the required digital special effects</li> </ol>
Assemble previsualisations	<ol style="list-style-type: none"> <li>9. Create previsualisation of the required visual effects sequences using the appropriate assets and <i>compositing techniques</i></li> <li>10. Experiment with previsualisation to establish the best results and solve problems that arise during the process of creating the visual effects</li> <li>11. Submit previsualisation visual effects sequences to relevant personnel for evaluation and feedback</li> <li>12. Match elements as required, such as colour, lighting and camera</li> </ol>
Produce visual effects	<ol style="list-style-type: none"> <li>13. Create final visual effects</li> <li>14. Generate additional required effects to final stage</li> <li>15. Render visual effects to desired format</li> <li>16. Submit visual effects sequences to relevant personnel for evaluation and feedback by agreed deadlines</li> </ol>
Finalise visual effects	<ol style="list-style-type: none"> <li>17. Respond to feedback by making adjustments to visual effects so that they comply with design and production specifications</li> <li>18. Save files to specified storage system accessible to production team</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	19. Make back-up copies of visual effects in accordance with enterprise procedures 20. Complete workplace documentation as required 21. Review process of creating digital visual effects and note areas for future improvement

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - interpret storyboards
  - work collaboratively in a team environment, both independently and under direction
  - respond constructively to feedback received from other team members
  - complete workplace documentation
- technical skills sufficient to:
  - use common features of industry-current compositing and visual effects software
  - produce digital visual effects for a range of output formats
  - manage files and directories using standard naming conventions and version control protocols
- initiative and creativity in the context of:
  - visualising and interpreting creative concepts
  - distinguishing subtle differences that affect the matching of elements created in multiple mediums
  - creatively integrating media assets to achieve the required digital visual effects
  - troubleshooting and solving problems as they arise during the process of creating digital visual effects
- self-management, learning and planning skills sufficient to:
  - prioritise work tasks
  - continuously improve skills and knowledge by keeping up to date with industry developments and new software features
  - meet deadlines
  - seek expert assistance as required

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members in the relevant industry sector
  - sound understanding of the relationship between the technical and creative aspects and requirements of productions in which digital visual effects are used
  - issues and challenges that arise in the context of creating digital visual effects sequences

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

- |  |
|--|
| <ul style="list-style-type: none"><li>• strong understanding of light, colour, composition and mood</li><li>• keying process</li><li>• technical parameters of various platforms and how these impact on the process of creating digital visual effects</li><li>• OHS standards as they relate to working for periods of time on computers</li></ul> |
|--|

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of a range of digital visual effects sequences that: <ul style="list-style-type: none"> <li>• meet the requirements of a brief</li> <li>• demonstrate attention to detail and an ability to refine visual effects to achieve the required creative effects</li> </ul> </li> <li>• collaborative approach to work</li> <li>• ability to meet deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a selection of industry-current software as listed in the range statement</li> <li>• access to simulated or real production situations that require the creation of digital visual effects sequences</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of digital visual effects sequences created by the candidate to determine ability to create different types of effects</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

<b>EVIDENCE GUIDE</b>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Production documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animatics</li> <li>• brief</li> <li>• script</li> <li>• shot list</li> <li>• storyboard</li> <li>• technical specifications.</li> </ul>
<p><b><i>Requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• assets for integration</li> <li>• collaboration with other team members</li> <li>• creative expectations</li> <li>• design specifications</li> <li>• output format</li> <li>• technical specifications</li> <li>• timelines.</li> </ul>
<p><b><i>Digital visual effects</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• colour correction</li> <li>• compositing:             <ul style="list-style-type: none"> <li>• image layering</li> <li>• motion graphics</li> </ul> </li> <li>• filters:             <ul style="list-style-type: none"> <li>• warp</li> <li>• glow</li> <li>• blur</li> <li>• fog</li> </ul> </li> <li>• integrating lighting across different elements</li> <li>• keying:             <ul style="list-style-type: none"> <li>• chroma</li> <li>• luma/luminance</li> <li>• difference</li> </ul> </li> <li>• lighting:             <ul style="list-style-type: none"> <li>• shadow</li> <li>• atmospheric</li> <li>• flares</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• particle systems:               <ul style="list-style-type: none"> <li>• bubbles</li> <li>• smoke</li> <li>• droplets</li> <li>• weather effects</li> <li>• dust</li> <li>• atmospheric effects</li> <li>• starbursts</li> <li>• fireworks</li> </ul> </li> <li>• textures, e.g.:               <ul style="list-style-type: none"> <li>• water</li> <li>• cloth</li> <li>• fur</li> </ul> </li> <li>• tracking:               <ul style="list-style-type: none"> <li>• camera matching</li> <li>• motion tracking.</li> </ul> </li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• designer</li> <li>• director</li> <li>• editor</li> <li>• head of department</li> <li>• post-production manager</li> <li>• producer</li> <li>• SFX (special effects) supervisor</li> <li>• storyboard artist</li> <li>• technical director</li> <li>• other technical/specialist personnel.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• 3D, e.g.:               <ul style="list-style-type: none"> <li>• 3D Studio Max</li> <li>• Maya</li> <li>• Soft Image</li> </ul> </li> <li>• graphics, e.g.:               <ul style="list-style-type: none"> <li>• Photoshop</li> <li>• Illustrator</li> </ul> </li> <li>• video editing, e.g.:               <ul style="list-style-type: none"> <li>• Adobe Premier</li> <li>• Final Cut Pro</li> <li>• Avid Liquid</li> </ul> </li> <li>• visual effects/compositing, e.g.:</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Combustion</li> <li>• Shake</li> <li>• After Effects</li> <li>• Nuke</li> <li>• Digital Fusion.</li> </ul>
<i>Productions</i> may include:	<ul style="list-style-type: none"> <li>• animated productions</li> <li>• commercials</li> <li>• digital media products, e.g.:               <ul style="list-style-type: none"> <li>• simulations</li> <li>• games</li> <li>• e-learning resources</li> <li>• virtual worlds/environments</li> </ul> </li> <li>• documentaries</li> <li>• feature films</li> <li>• filmed events or performances</li> <li>• music video</li> <li>• short films</li> <li>• television productions.</li> </ul>
<i>Delivery platforms</i> may include:	<ul style="list-style-type: none"> <li>• broadcast television</li> <li>• CD</li> <li>• DVD</li> <li>• film</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• PDA (personal digital assistant)</li> <li>• other digital devices.</li> </ul>
<i>Reference material</i> may include:	<ul style="list-style-type: none"> <li>• books</li> <li>• direct observation of actions</li> <li>• DVDs ('making ofs')</li> <li>• still images</li> <li>• videos.</li> </ul>
<i>Assets</i> may include:	<ul style="list-style-type: none"> <li>• animated sequences</li> <li>• audio tracks</li> <li>• live action film footage</li> <li>• live action video footage</li> <li>• sequences of stills</li> <li>• static background plates</li> <li>• stills.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Output file format</i> may include:	<ul style="list-style-type: none"> <li>• AVI</li> <li>• EPS</li> <li>• IFF</li> <li>• JPEG</li> <li>• MPEG</li> <li>• PNG</li> <li>• Quicktime</li> <li>• Targa</li> <li>• TIFF.</li> </ul>
<i>Methods and techniques</i> may include:	<ul style="list-style-type: none"> <li>• 2D graphics and paint</li> <li>• 3D models and animation</li> <li>• compositing.</li> </ul>
<i>Compositing techniques</i> may include:	<ul style="list-style-type: none"> <li>• adding graining</li> <li>• adding motion blur</li> <li>• camera matching</li> <li>• colour matching</li> <li>• combining levels together seamlessly</li> <li>• creating convincing shadows</li> <li>• creating mattes</li> <li>• enhancing the lighting</li> <li>• keying</li> <li>• painting</li> <li>• rotoscoping.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Prepare for camera shoots	<ol style="list-style-type: none"> <li>1. Organise and prepare <i>equipment</i> for <i>shoots</i>, taking into account <i>location</i> requirements</li> <li>2. Ensure equipment is clean and operational</li> <li>3. Report equipment faults to <i>relevant personnel</i></li> <li>4. Safely charge batteries according to manufacturer specifications</li> <li>5. Ensure charged batteries are in sufficient supply to meet the needs of the production schedule</li> <li>6. Select required <i>capture format</i> and ensure sufficient supply for the intended <i>production</i></li> </ol>
Assist with camera set-up on location	<ol style="list-style-type: none"> <li>7. Lift camera and other equipment, using safe lifting and handling techniques</li> <li>8. Ensure camera and other equipment is safely secured</li> <li>9. <i>Under direction</i>, assist with positioning the camera to achieve the required shots</li> <li>10. Safely connect cables and camera to <i>power source</i> if required</li> <li>11. Assist with final check of equipment prior to shoot and report faults to relevant personnel</li> <li>12. Label and load capture media</li> <li>13. Check camera tilt and pan functions</li> </ol>
Set up lighting	<ol style="list-style-type: none"> <li>14. Mount lighting equipment following safety guidelines</li> <li>15. Run lighting cables and connect safely to power source ensuring they are located securely</li> <li>16. Under direction, position lights to achieve required effect</li> <li>17. Adjust focus and angles of lights as required</li> <li>18. Install colour frames and gels according to lighting requirements for the particular shoot</li> </ol>
Shoot video	<ol style="list-style-type: none"> <li>19. Adjust and move equipment as required</li> <li>20. Operate clapperboard if needed</li> <li>21. Operate camera according to manufacturer guidelines and instructions</li> <li>22. Shoot and record sequences as directed</li> <li>23. Time-code recording of takes with descriptions as required</li> </ol>
Wrap up shoots	<ol style="list-style-type: none"> <li>24. Clean and pack equipment using safe lifting techniques</li> <li>25. Check that all equipment is accounted for and report</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	faults to relevant personnel 26. Ensure recordings are labelled properly, together with relevant <i>documentation</i> 27. Leave location in original condition to ensure there is no adverse effect on the site 28. Review and reflect on own performance and note areas for improvement

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and organisational skills sufficient to:
  - interpret production documentation relevant to camera operations
  - work collaboratively with other crew members
  - understand and follow instructions
- technical skills sufficient to:
  - make simple adjustments to, and operate cameras and accessories typically used in low-end productions
  - safely connect cabling and equipment to power sources
- literacy and numeracy skills sufficient to interpret written instructions and to label capture format accurately and in sequence
- self-management skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise
- problem solving skills sufficient to anticipate and deal with minor set-up problems

#### Required knowledge

- basic technical understanding of camera, lighting and sound equipment used in low-end productions
- full range of functions typically found on cameras used in low-end productions
- basic principles of lighting, e.g. key, fill and back light
- roles and responsibilities of video/television production personnel
- OHS requirements as they relate to working under direction on camera shoots in a range of locations

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• ability to work effectively as a team member and take direction</li> <li>• ability to assist effectively in location set-ups</li> <li>• competent operation of cameras typically used in low-end productions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to basic camera, lighting and sound equipment</li> <li>• access to a range of varying locations and conditions</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes, and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• observation of the candidate assisting with a basic camera shoot to determine whether correct procedures are followed and equipment is operated according to instructions</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFLGT101A Apply a general knowledge of lighting to work activities.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Equipment</i> may include:	<ul style="list-style-type: none"> <li>• cameras, e.g. mini DV</li> <li>• filters</li> <li>• lens adaptors</li> <li>• lenses - fixed, zoom, wide-angle</li> <li>• lighting kit</li> <li>• mounts</li> <li>• tripods.</li> </ul>
<i>Shoots</i> may include:	<ul style="list-style-type: none"> <li>• fixed tripod</li> <li>• hand-held</li> <li>• single-camera.</li> </ul>
<i>Locations</i> may include:	<ul style="list-style-type: none"> <li>• day</li> <li>• exterior</li> <li>• in studio</li> <li>• interior</li> <li>• night.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• camera and sound operators</li> <li>• director/producer</li> <li>• members of the public</li> <li>• production assistant</li> <li>• reporter or presenter</li> <li>• technical staff.</li> </ul>
<i>Capture formats</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• flashcards</li> <li>• P2 solid-state drive</li> <li>• small hard drive</li> <li>• video.</li> </ul>
Types of <i>production</i> may include:	<ul style="list-style-type: none"> <li>• corporate/training videos</li> <li>• coverage of events</li> <li>• short current affairs stories</li> <li>• short documentaries</li> <li>• short news items.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Under direction</i> may include direction from:	<ul style="list-style-type: none"> <li>• camera operator</li> <li>• director/producer</li> <li>• reporter/journalist</li> <li>• sound recordist.</li> </ul>
<i>Power sources</i> may include:	<ul style="list-style-type: none"> <li>• AC</li> <li>• batteries.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• fault reports</li> <li>• production schedules</li> <li>• running sheets</li> <li>• scripts</li> <li>• shot lists</li> <li>• sound sheets</li> <li>• stock management and correct labelling.</li> </ul>

## CUFCAM301A Shoot material for screen productions

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to shoot screen material using a single-camera unit.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Camera operators apply the skills and knowledge described in this unit. Their prime responsibility is to capture screen images using a range of video equipment.</p> <p>Operators in this context generally work under direction but perform all camera, sound and lighting functions. Occasionally they will be assisted by a camera assistant or sound recordist. On occasion, they may be required to assist other camera operators with the movement and handling of cameras and cables.</p> <p>Mainstream activities include shooting for news and current affairs, short documentaries, and corporate and training videos.</p> <p>More specialised duties may include the capture of materials for animations and stop-motion animated productions.</p> <p>Typically camera operators are employed by television stations, production houses or corporate video units. In addition, there is a growing body of camera operators who work on a freelance basis.</p> <p>More complex skills associated with shooting television material on location, often as a one-person camera crew, are covered in:</p> <ul style="list-style-type: none"> <li>• CUFCAM401A Shoot a wide range of television content.</li> </ul>
---------------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Prepare for shoots	<ol style="list-style-type: none"> <li>1. Participate in pre-production briefings as required to confirm <i>production and post-production requirements</i></li> <li>2. Arrange <i>equipment and accessories</i> for <i>shoots</i> as directed, ensuring that everything is clean and operational</li> <li>3. Safely charge <i>batteries</i> according to manufacturer specifications and ensure sufficient supply of charged batteries to meet the needs of production schedules</li> <li>4. Select required <i>capture media</i> and ensure sufficient supply for the intended <i>production</i></li> <li>5. Prepare and pack <i>lighting</i> equipment, including gels and cables as required</li> <li>6. Undertake minor repairs on faulty equipment or report significant faults to relevant production <i>personnel</i></li> <li>7. Confirm <i>location</i>, shooting schedules and timelines with relevant production personnel</li> <li>8. Complete appropriate <i>documentation</i> prior to shoots</li> </ol>
Set up on location	<ol style="list-style-type: none"> <li>9. Determine camera positions to ensure that composition of <i>shots</i> provides correct visual interpretation of production requirements</li> <li>10. Liaise and collaborate with crew and talent and contribute ideas to initial concepts</li> <li>11. Set up equipment and accessories to ensure the safety of personnel on location</li> <li>12. Consider requirements for repositioning equipment and accessories during shoots taking into account production schedules</li> <li>13. Ensure cameras and other equipment are safely secured</li> <li>14. Label and load capture media and check camera functions</li> <li>15. Position microphones as required and conduct audio check</li> </ol>
Set up lighting	<ol style="list-style-type: none"> <li>16. Assess the quality and quantity of available light and determine the amount of correction required if necessary</li> <li>17. Mount and position lighting equipment following safety guidelines</li> <li>18. Run lighting cables and connect safely to <i>power sources</i></li> <li>19. Install colour frames and gels in accordance according to requirements for the specific shoot</li> <li>20. Select <i>lenses</i> and <i>filters</i> appropriate to the prevailing</li> </ol>

ELEMENT	PERFORMANCE CRITERIA
	conditions
Position and operate camera to capture shots	21. Consider camera shots and angles, where feasible, to ensure cuts between shots produce the desired result 22. Take account of editing or other post-production requirements while shooting 23. Ensure camera set-up meets criteria for shoot 24. Check <i>camera movements</i> to implement planned or rehearsed shots according to direction from relevant production personnel 25. Shoot and record sequences as directed, maintaining focus throughout
Manipulate cables and camera positioning	26. Participate in pre-production meetings and rehearsal, if required, and ensure that final camera and cable movements are understood 27. Communicate with relevant production personnel during shoots and position and move camera cabling according to instructions and cues received 28. React consistently to cues received from relevant production personnel and ensure consistency of timing without undue lapses 29. Move cameras and cabling without impeding the operation of camera operators and work in cooperation with other personnel to achieve the desired camera movements 30. Ensure that camera operators do not collide with other elements 31. Complete cabling handling operations without damage to equipment or injury to personnel
Wrap up the shoot	32. Check and pack equipment and accessories using safe lifting techniques 33. Ensure recorded material is labelled properly, together with relevant documentation 34. Report equipment faults and complete required documentation 35. Leave locations in original condition to ensure no adverse effect on the site 36. Review and reflect on performance and note areas for improvement

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - work collaboratively as a member of a production team
  - understand and carry out instructions and creative directions as required
  - interpret and complete production documentation
- technical skills sufficient to operate a range of professional camera, lighting and audio equipment
- problem solving skills in the context of anticipating and addressing equipment set-up problems
- self-management skills sufficient to:
  - prioritise work tasks
  - meet deadlines
- seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of production and post-production personnel
  - broadcast language and terminology
  - issues and challenges that arise in the context of shooting material for screen productions
- different image capture formats and their uses
- basic framing techniques and methods of composition
- camera-to-subject practice, i.e. lens to eye line, crossing the line, matching shots
- characteristics of commonly used microphones and audio equipment
- the effect of different light sources, diffusion materials, filters and reflectors on the lighting environment, which includes both talent and set
- types of artificial/introduced light sources available to camera operators
- basic principles of lighting, e.g. key, fill and back light
- basic concepts and techniques of cable handling and compatibility with other equipment
- OHS procedures, particularly as they relate to shooting on location

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• ability to work within production deadlines</li> <li>• ability to work effectively as a team member and under direction</li> <li>• ability to provide ideas to assist with capturing the desired style of moving image</li> <li>• ability to operate a range of professional video camera equipment and accessories</li> <li>• ability to set up lighting as directed.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a functional set of equipment based on items listed in the range statement. Equipment must be sufficient to enable the compilation of a portfolio of screen material shot in different locations, including exterior daytime, interior, night shoots, stormy weather</li> <li>• that the candidate demonstrates competency in shooting material for screen productions within a production environment over a period of time</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes, and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of screen content shot by the candidate to determine whether production requirements have been met</li> <li>• observation of the candidate setting up and operating</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>camera and lighting equipment on location</p> <ul style="list-style-type: none"> <li>written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CUFLGT101A Apply a general knowledge of lighting to work activities</li> <li>CUSSOU201A Assist with sound recordings.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Production and post-production requirements</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• night shoots</li> <li>• post-production process</li> <li>• props</li> <li>• sets</li> <li>• specialised equipment</li> <li>• venues.</li> </ul>
<p><b><i>Equipment and accessories</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• autocue monitor</li> <li>• Betacam SP</li> <li>• cables</li> <li>• cue card holders</li> <li>• digital Betacam</li> <li>• digital DVC Pro</li> <li>• digital SLR, e.g.:             <ul style="list-style-type: none"> <li>• stop-motion and software</li> <li>• iStop Motion (Mac)</li> <li>• Stop Motion Pro (PC)</li> </ul> </li> <li>• DV Cam</li> <li>• HDDV</li> <li>• headphones</li> <li>• lighting bulbs</li> <li>• lighting kit</li> <li>• lights</li> <li>• microphones, e.g.:             <ul style="list-style-type: none"> <li>• fixed</li> <li>• pole</li> <li>• lapel</li> </ul> </li> <li>• mini DV</li> <li>• mobile phones</li> <li>• motion capture facility for animation</li> <li>• mounts</li> <li>• recording device (e.g. audiotape recorder)</li> <li>• talkback facility</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• tripod</li> <li>• two-way intercom</li> <li>• video split monitor</li> <li>• video stock.</li> </ul>
<i>Shoots</i> may include:	<ul style="list-style-type: none"> <li>• animations, e.g. stop-motion</li> <li>• combined video and audio function</li> <li>• fixed/supported</li> <li>• hand-held operation</li> <li>• separate video and audio record functions</li> <li>• single-camera.</li> </ul>
<i>Batteries</i> may include:	<ul style="list-style-type: none"> <li>• lead/acid</li> <li>• lithium ION</li> <li>• Ni-Cad.</li> </ul>
<i>Capture media</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• flashcards</li> <li>• P2 solid-state drive</li> <li>• small hard drive</li> <li>• videotape.</li> </ul>
<i>Production</i> may include:	<ul style="list-style-type: none"> <li>• animations, e.g.: <ul style="list-style-type: none"> <li>• modelling</li> <li>• flat plane</li> </ul> </li> <li>• corporate videos</li> <li>• EFP (electronic field production)</li> <li>• ENG (electronic news gathering)</li> <li>• events or performances</li> <li>• news and current affairs</li> <li>• short documentaries</li> <li>• training videos.</li> </ul>
<i>Lighting</i> may include:	<ul style="list-style-type: none"> <li>• back light</li> <li>• bounced light</li> <li>• effect light, e.g. on backgrounds</li> <li>• fill light</li> <li>• flood light</li> <li>• HMI (hydrargyrum medium arc-length iodide)</li> <li>• interior lights</li> <li>• key light</li> <li>• light meters</li> <li>• luminaires</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• spot light</li> <li>• tungsten.</li> </ul>
<i>Personnel</i> may include:	<ul style="list-style-type: none"> <li>• animation director</li> <li>• camera assistant</li> <li>• director/producer</li> <li>• floor manager</li> <li>• general public</li> <li>• safety officer</li> <li>• sound recordist</li> <li>• supervisor</li> <li>• technical staff</li> <li>• talent, e.g.:               <ul style="list-style-type: none"> <li>• presenters</li> <li>• actors</li> <li>• reporter/journalist</li> </ul> </li> <li>• interviewee.</li> </ul>
<i>Locations</i> may include:	<ul style="list-style-type: none"> <li>• day</li> <li>• exterior</li> <li>• interior</li> <li>• night</li> <li>• studio.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• animation, e.g.:               <ul style="list-style-type: none"> <li>• scoring sheets</li> <li>• style sheets</li> <li>• character sheets</li> <li>• storyboards</li> </ul> </li> <li>• computer generated</li> <li>• fault reports</li> <li>• film and battery labels</li> <li>• manually written</li> <li>• production schedule</li> <li>• running sheets</li> <li>• script</li> <li>• shot lists</li> <li>• stock order forms.</li> </ul>
<i>Shots</i> may include:	<ul style="list-style-type: none"> <li>• close-up</li> <li>• cutaway shot</li> <li>• establishing or master shot</li> <li>• extreme close-up</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• eye-level shot</li> <li>• hand-held</li> <li>• high-angle</li> <li>• long shot</li> <li>• low-angle</li> <li>• mid shot</li> <li>• pan</li> <li>• point-of-view shot</li> <li>• static</li> <li>• tilt</li> <li>• track</li> <li>• wide shot</li> <li>• zoom in</li> <li>• zoom out.</li> </ul>
<i>Power sources</i> may include:	<ul style="list-style-type: none"> <li>• batteries</li> <li>• generators</li> <li>• mains power.</li> </ul>
<i>Lenses</i> may include:	<ul style="list-style-type: none"> <li>• fixed</li> <li>• lens filters</li> <li>• lens hood</li> <li>• macro</li> <li>• micro</li> <li>• wide-angle</li> <li>• wide-angle adaptor</li> <li>• zoom.</li> </ul>

## CUFDIG201A Maintain interactive content

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to maintain interactive content.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>People responsible for updating the content of websites apply the skills and knowledge described in this unit.</p> <p>Under direction, they upload a range of media assets and change text content, using a content management system that may be a proprietary system designed for a static or dynamic website. Changes to the interface and structure of the site are made by people in more senior positions.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Check website information for relevance and currency	<ol style="list-style-type: none"> <li>1. Confirm with <i>relevant personnel</i> frequency of upgrades</li> <li>2. Obtain revised and additional <i>electronic content</i> and ensure correct versions</li> <li>3. Confirm with relevant personnel the age limit of links that should be retained or deleted</li> <li>4. Confirm with relevant personnel other revisions as required</li> </ol>
Check links and navigation	<ol style="list-style-type: none"> <li>5. Select appropriate <i>link-checking software</i>, run software to test links and check currency of existing links</li> <li>6. Save report document according to technical and organisational requirements</li> <li>7. Check broken or failed links to determine site closures or new site addresses</li> </ol>
Update information	<ol style="list-style-type: none"> <li>8. Access <i>content management system</i> and load appropriate files</li> <li>9. Delete closed links and re-establish new site links if available</li> <li>10. Check internal page links and rectify or delete as required</li> <li>11. Import and/or change content material as required and specify appropriate <i>metadata</i> if required</li> <li>12. Make heading, typographical and image revisions applying appropriate style sheets and alt tags if required</li> <li>13. Insert additional pages or screens as required, applying appropriate templates or themes</li> <li>14. Upload edited files to server using file transfer protocols (FTP).</li> <li>15. Advise relevant personnel if new buttons, interface or navigation design are required to incorporate additional materials</li> </ol>
Test and confirm changes	<ol style="list-style-type: none"> <li>16. Check all links are valid</li> <li>17. Confirm with relevant personnel that all changes have been made</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - interpret and apply information in user manuals for software applications
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
  - proficiently use a content management system
  - use link-checking software
  - manage files using standard naming conventions
  - apply appropriate metadata to describe documents
  - apply style sheets, templates and themes
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- W3C Accessibility standards relevant to text and images
- internet protocols and data types
- OHS standards as they relate to working on computers for periods of time

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• accurate creation of interactive media information and links</li> <li>• proficient use of content management systems</li> <li>• attention to detail.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to industry-standard authoring software, the internet and an FTP client for uploading content</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of websites where content has been updated by the candidate on a regular basis</li> <li>• written or oral questioning to test knowledge of internet protocols, data types and W3C Accessibility standards relevant to text and images.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFIND201A Develop and apply creative arts industry knowledge</li> <li>• CUFRES201A Collect and organise content for broadcast or publication.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• client</li> <li>• programmer and technical support people</li> <li>• supervisor</li> <li>• web manager</li> <li>• other specialist creative and administrative staff as appropriate.</li> </ul>
<i>Electronic content</i> may include:	<ul style="list-style-type: none"> <li>• audio</li> <li>• HTML</li> <li>• images (photographs and illustrations)</li> <li>• PDF documents</li> <li>• text</li> <li>• video</li> <li>• Word documents.</li> </ul>
<i>Link-checking software</i> may include:	<ul style="list-style-type: none"> <li>• Xenu</li> <li>• Linkbot</li> <li>• software internal to content management systems.</li> </ul>
<i>Content management systems</i> may include:	<ul style="list-style-type: none"> <li>• authoring tools, such as: <ul style="list-style-type: none"> <li>• Dreamweaver</li> <li>• Contribute</li> </ul> </li> <li>• learning management systems, such as: <ul style="list-style-type: none"> <li>• WebCT</li> <li>• Blackboard</li> <li>• Janeson</li> <li>• Moodle</li> <li>• Sharepoint</li> </ul> </li> <li>• open source database systems</li> <li>• other proprietary database systems.</li> </ul>
<i>Metadata</i> may include:	<ul style="list-style-type: none"> <li>• author</li> <li>• copyright</li> <li>• date</li> <li>• description</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• subject</li> <li>• title</li> <li>• other metadata based on Dublin Core or other standards.</li> </ul>

## CUFDIG301A Prepare video assets

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to prepare video assets for inclusion in interactive media.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>The size of an organisation or project determines who undertakes the role described in this unit.</p> <p>In a large-scale environment, the person responsible for this task would typically be supervised by a video editor and an interactive media author.</p> <p>In a television production environment, the prime focus of the task involves converting television programs into podcast material or in a form appropriate to streaming or downloading, and this may be a dedicated role under the supervision of a producer.</p> <p>In a smaller organisation or project, a video editor or interactive author or programmer would absorb this task into their own role.</p> <p>In all cases, they are collaborating closely with other team members.</p> <p>Skills associated with other aspects of video production at this level are covered in:</p> <ul style="list-style-type: none"> <li>• CUFCAM201A Assist with a basic camera shoot</li> <li>• CUFPOS201A Perform basic vision and sound editing.</li> </ul>
---------------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify video assets	<ol style="list-style-type: none"> <li>1. Obtain digital sources of video</li> <li>2. Identify <i>file format of source video</i></li> <li>3. Identify output <i>purpose, destination</i> and <i>platform</i></li> <li>4. Discuss with <i>relevant personnel</i> required <i>output file format</i> and <i>codecs</i> for specified bandwidths</li> <li>5. Discuss with relevant personnel appropriate <i>video encoding software</i></li> </ol>
Prepare video assets	<ol style="list-style-type: none"> <li>6. Open appropriate video encoding software and load video file</li> <li>7. Ensure duration of video sequences meets that required by the specification, and clip if necessary</li> <li>8. Determine and apply appropriate video and audio codecs</li> <li>9. Batch and optimise video files where possible</li> <li>10. Save files in appropriate output file format using standard naming conventions</li> </ol>
Package video assets	<ol style="list-style-type: none"> <li>11. Assign <i>metadata tags</i> if required</li> <li>12. Group files logically in folder system using standard naming conventions</li> <li>13. Store in share drive or asset repository for production team access</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and literacy skills sufficient to interpret and clarify written or verbal instructions
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
  - proficiently use video software to prepare video sequences for inclusion in an interactive media product
  - manage files using standard naming conventions
  - apply appropriate metadata tags to describe files
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- techniques for saving and preparing digital video output to optimise file size
- OHS standards as they relate to working for periods of time on computers
- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - basic understanding of the relationship between technical and creative aspects and requirements of interactive media projects
  - basic knowledge of the features of a range of delivery platforms
  - basic understanding of what happens when video files are compressed for inclusion in interactive media products
  - appropriate codecs for various platforms and destinations
  - digital video source and output formats

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparation of a range of video sequences to be included in interactive media products that meet appropriate technical specifications</li> <li>• proficient use of video encoding software.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to industry-standard video encoding software</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of video assets prepared by the candidate on a number of occasions</li> <li>• written or oral questioning to test knowledge of codecs for various platforms and understanding of file compression.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUF301A Prepare audio assets.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>File format of source video</i></b> includes:</p>	<ul style="list-style-type: none"> <li>• Betacam, including SP and digital</li> <li>• DVC</li> <li>• DVD</li> <li>• miniDV</li> <li>• SVHS</li> <li>• Umatic</li> <li>• VHS.</li> </ul>
<p><b><i>Purpose</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animation</li> <li>• e-learning resource</li> <li>• game</li> <li>• interactive application</li> <li>• website.</li> </ul>
<p><b><i>Destination</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• computer-based playback software, such as iTunes</li> <li>• downloading server</li> <li>• internet video players, such as:             <ul style="list-style-type: none"> <li>• QuickTime</li> <li>• Windows Media Player</li> <li>• RealPlayer</li> </ul> </li> <li>• progressive downloading (buffering) server</li> <li>• streaming server.</li> </ul>
<p><b><i>Platform</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• other video playback devices</li> <li>• personal digital assistant (PDA)</li> <li>• video player (iPods).</li> </ul>
<p><b><i>Relevant personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• client</li> <li>• producer</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• programmer and technical support people</li> <li>• supervisor</li> <li>• video editor</li> <li>• other specialist creative and administrative staff.</li> </ul>

## Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Plan use of authoring tool	<ol style="list-style-type: none"> <li>1. Identify a range of appropriate <i>authoring software</i></li> <li>2. Discuss with <i>relevant personnel</i> the range of authoring software and their application to various <i>delivery platforms</i></li> <li>3. Discuss with relevant personnel <i>design specifications</i> of the <i>project</i></li> <li>4. Discuss with relevant personnel technical requirements of the project in order to select authoring software</li> </ol>
Prepare to use authoring tool	<ol style="list-style-type: none"> <li>5. Load selected authoring software</li> <li>6. Create a new file for the specified task and name file using standard naming conventions</li> <li>7. Display and use tools and features of authoring software relevant to the authoring process</li> </ol>
Produce interactive sequences	<ol style="list-style-type: none"> <li>8. Produce screens and layout according to design specifications applying basic <i>visual design principles</i></li> <li>9. Create <i>interactive media components</i> as required</li> <li>10. Source text content and apply style sheets to format text</li> <li>11. Source relevant <i>media assets</i>, optimise if required and integrate using appropriate <i>file formats</i></li> <li>12. Produce and link all components according to storyboard and apply templates or themes</li> <li>13. Manipulate markup code where errors are occurring or to finetune functionality</li> <li>14. Save in appropriate file format to directory</li> </ol>
Check functionality of interactive sequence	<ol style="list-style-type: none"> <li>15. Check that interactive elements function with minimal error on a variety of systems</li> <li>16. Present sequence to relevant personnel</li> <li>17. Incorporate changes as required</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions and design specifications
  - interpret and apply information in user manuals for software applications
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
  - use appropriate authoring software to proficiently author the sequences applying style sheets, templates or themes
  - integrate media assets for specific bandwidths
  - manage files and create appropriate directories
  - efficiently use a computer, including keyboard shortcuts
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - basic understanding of the relationship between technical and creative aspects and requirements of interactive media projects
  - basic knowledge of the features of a range of delivery platforms
  - file formats of digital media assets and basic optimisation techniques
  - HTML
  - W3C Accessibility standards relevant to text and images
- basic visual design principles as listed in the range statement
- OHS standards as they relate to working for periods of time on computers

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>development of several discrete interactive media sequences that function as planned and demonstrate an understanding of basic visual design principles</li> <li>accuracy and attention to detail in the process of developing interactive media sequences.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to a range of resources, equipment and current industry-standard software, as listed in the range statement</li> <li>access to appropriate learning and assessment support when required</li> <li>use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>evaluation of interactive sequences authored by the candidate</li> <li>written or oral questioning to test knowledge of file formats and delivery platforms.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CUFDIG304A Create visual design components.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Authoring software</i></b> may include:	<ul style="list-style-type: none"> <li>• Director</li> <li>• Dreamweaver</li> <li>• Flash</li> <li>• FrontPage</li> <li>• PageMill.</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• designer</li> <li>• graphic designer</li> <li>• information architect</li> <li>• interaction designer</li> <li>• programmer</li> <li>• supervisor</li> <li>• trainer</li> <li>• user interface designer</li> <li>• other specialist staff.</li> </ul>
<b><i>Delivery platforms</i></b> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other wireless/mobile devices.</li> </ul>
<b><i>Design specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• content inventory</li> <li>• interactive script</li> <li>• personas</li> <li>• storyboard</li> <li>• target audience</li> <li>• technical requirements, such as:             <ul style="list-style-type: none"> <li>• delivery platform</li> <li>• screen resolution and size</li> <li>• templates, style sheets and themes</li> <li>• bandwidth information</li> </ul> </li> <li>• user interface design.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Projects</i> may include:	<ul style="list-style-type: none"> <li>• production of interactive sequences to be incorporated in a:               <ul style="list-style-type: none"> <li>• game</li> <li>• educational product</li> <li>• promotional product</li> <li>• information product</li> <li>• training product</li> <li>• e-commerce.</li> </ul> </li> </ul>
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• emphasis</li> <li>• focal point</li> <li>• movement</li> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<i>Interactive media components</i> may include:	<ul style="list-style-type: none"> <li>• backgrounds</li> <li>• banners</li> <li>• icons</li> <li>• interactive buttons</li> <li>• interactive controls</li> <li>• logos</li> <li>• text</li> <li>• titles</li> <li>• user interfaces.</li> </ul>
<i>Media assets</i> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• audio</li> <li>• documents, such as PDF, Word, PowerPoint and Excel</li> <li>• graphics</li> <li>• photo images</li> <li>• text</li> <li>• video.</li> </ul>
<i>File formats</i> may include:	<ul style="list-style-type: none"> <li>• DIR/DCR</li> <li>• FLA/SWF</li> <li>• GIF</li> <li>• HTML</li> <li>• JPEG</li> <li>• MOV</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• MPEG</li> <li>• PDF</li> <li>• PICT</li> <li>• RTF</li> <li>• TIFF</li> <li>• WMV.</li> </ul>

## CUFDIG303A Produce and prepare photo images

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to prepare photo images for integration into an interactive media sequence or product.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This role may be assigned to a graphic artist or, in a larger project, to a photographer who works closely with a programmer or interactive media author to publish required images.</p> <p>The photography ranges from digital still composition to panoramas for the production of virtual worlds. Photo images can include landscapes, objects and portraits.</p> <p>Specialist skills associated with photography are covered in:</p> <ul style="list-style-type: none"> <li>• CUVPHI06A Plan and carry out image capture in response to a brief.</li> </ul>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Use scanner to capture photo images	<ol style="list-style-type: none"> <li>1. Source and select appropriate photographic images according to requirements of photographic <i>project</i> brief</li> <li>2. Discuss selection of images with <i>relevant personnel</i></li> <li>3. Assess <i>scanner features</i> to ensure that outcomes will meet the requirements of brief</li> <li>4. Operate scanner according to manufacturer specifications</li> <li>5. Select <i>scanner settings</i> to ensure image capture meets production requirements</li> <li>6. Transfer and store photographic image files to a computer using standard naming conventions</li> </ol>
Use digital camera to create photo images	<ol style="list-style-type: none"> <li>7. Discuss photographic project brief with relevant personnel</li> <li>8. Assess <i>digital camera features</i> to ensure that outcomes will meet the requirements of brief</li> <li>9. Plan camera shots taking into account lighting, framing, composition and other <i>photographic techniques</i></li> <li>10. Load and operate digital camera according to manufacturer specifications</li> <li>11. Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements</li> <li>12. Check photographic images for fitness of purpose to comply with brief</li> <li>13. Transfer and store photographic image files to a computer using standard naming conventions</li> </ol>
Edit photo images	<ol style="list-style-type: none"> <li>14. Load <i>digital imaging software</i> and import photo image source files</li> <li>15. <i>Manipulate</i> and save digital images using designated digital imaging software</li> <li>16. Create photo images that incorporate <i>visual design</i> and <i>communication principles</i> using designated digital imaging software</li> <li>17. Evaluate the outcome for visual impact, effectiveness and fitness for purpose</li> <li>18. Confirm outcome with relevant personnel</li> </ol>
Prepare photo image assets	<ol style="list-style-type: none"> <li>19. Save files in appropriate <i>output format</i> to meet <i>platform</i> requirements</li> <li>20. Assign <i>metadata tags</i> if required</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	21. Group files logically in a folder system using standard naming conventions 22. Store files in share drive or repository for production team access

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills sufficient to:
  - interpret and clarify written or verbal instructions
  - consult equipment operation manuals
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
  - proficiently use a scanner to reproduce photo images to specification
  - proficiently use a digital camera to create well-composed photo images
  - proficiently use digital imaging software to manipulate and prepare photo images
  - manage files using standard naming conventions
- self-management skills sufficient to:
  - work under pressure
  - meet deadlines
  - seek expert assistance when problems arise
- problem-solving skills sufficient to anticipate and resolve minor equipment set-up problems

#### Required knowledge

- basic photographic techniques
- basic principles of visual design and communication
- appropriate file formats for various platforms
- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - basic understanding of the relationship between technical and creative aspects and requirements of interactive media projects
  - basic knowledge of the features of a range of delivery platforms
- OHS regarding the use of scanners, cameras and computers, and handling and disposing of lithium batteries

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• ability to use digital imaging software to prepare high quality photo images that satisfy the requirements of a range of briefs</li> <li>• efficient operation of a scanner and digital camera to capture images.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a range of resources and equipment currently used by industry, including: <ul style="list-style-type: none"> <li>• flatbed scanner</li> <li>• digital camera</li> <li>• industry-standard graphics software</li> </ul> </li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of photo images prepared by the candidate on a number of occasions</li> <li>• practical demonstration by the candidate of scanner and digital camera operation</li> <li>• written or oral questioning to test knowledge of file formats and OHS issues.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFDIG304A Create visual design components.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Projects</i> may include:	<ul style="list-style-type: none"> <li>• e-commerce</li> <li>• educational product</li> <li>• game</li> <li>• information product</li> <li>• promotional product</li> <li>• training product</li> <li>• website.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• client</li> <li>• designer</li> <li>• graphic artist</li> <li>• interactive media author</li> <li>• programmer, coder and technical support people</li> <li>• supervisor</li> <li>• web manager</li> <li>• other specialist creative and administrative staff.</li> </ul>
<i>Scanner features</i> may include:	<ul style="list-style-type: none"> <li>• bit depth</li> <li>• dynamic range</li> <li>• optical resolution</li> <li>• output format (e.g. RGB, greyscale or CMYK)</li> <li>• platen size</li> <li>• reflective or transmissive (film)</li> <li>• range of film holders.</li> </ul>
<i>Scanner settings</i> may include:	<ul style="list-style-type: none"> <li>• bit depth</li> <li>• colour or greyscale</li> <li>• colour/target/working space</li> <li>• crop</li> <li>• destination</li> <li>• dust and scratch handling (e.g. ICE, FARE)</li> <li>• grain management (e.g. GEM)</li> <li>• multi-sampling</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• orientation</li> <li>• output dimension and resolution or file size</li> <li>• preferences/options</li> <li>• restoration of colour (e.g. ROC)</li> <li>• scaling</li> <li>• sharpening</li> <li>• source image type</li> <li>• tones, contrast, colour cast, saturation.</li> </ul>
<i>Digital camera features</i> may include:	<ul style="list-style-type: none"> <li>• aperture</li> <li>• automatic, program or manual settings</li> <li>• batteries</li> <li>• colour, target, working space</li> <li>• compatibility with hardware and digital imaging software</li> <li>• exposure compensation</li> <li>• file format</li> <li>• flash, fill flash</li> <li>• lens focal lengths, such as wide angle, close-up and telephoto</li> <li>• menu functions</li> <li>• resolution - megapixels</li> <li>• shutter speed</li> <li>• size and type of memory card(s)</li> <li>• subject modes</li> <li>• white balance.</li> </ul>
<i>Photographic techniques</i> may include:	<ul style="list-style-type: none"> <li>• composition</li> <li>• depth of field</li> <li>• dynamic range</li> <li>• field of view</li> <li>• framing</li> <li>• lighting.</li> </ul>
<i>Digital imaging software</i> may include:	<ul style="list-style-type: none"> <li>• a wide range of programs, e.g.: <ul style="list-style-type: none"> <li>• Adobe Photoshop</li> <li>• Adobe Photoshop Elements</li> <li>• Adobe Photoshop Lightroom</li> <li>• Apple Aperture</li> <li>• Corel Paint Shop Pro</li> <li>• Corel PhotoPaint</li> <li>• GNU Image Manipulation Program (GIMP and GIMPshop).</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
<b><i>Manipulating</i></b> digital images may include:	<ul style="list-style-type: none"> <li>• appending text/type for files and captions</li> <li>• brushing</li> <li>• creating artistic effects</li> <li>• cropping</li> <li>• editing</li> <li>• eliminating red eye</li> <li>• emulating photographic effects</li> <li>• image enhancement including tones, contrast, colour cast/tint, saturation</li> <li>• masking layers</li> <li>• retouching (i.e. cloning, rubber stamping, healing, patching)</li> <li>• sharpening</li> <li>• stitching (panoramic scenes)</li> <li>• using layers for composites</li> <li>• using pre-sets.</li> </ul>
<b><i>Visual design principles</i></b> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• emphasis</li> <li>• movement</li> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<b><i>Communication principles</i></b> may include:	<ul style="list-style-type: none"> <li>• communicates message</li> <li>• conveys meaning</li> <li>• meets audience requirements</li> <li>• uses functional components.</li> </ul>
<b><i>Output formats</i></b> may include:	<ul style="list-style-type: none"> <li>• GIF</li> <li>• JPEG</li> <li>• PDF</li> <li>• PICT</li> <li>• PNG</li> <li>• PSD</li> <li>• TIFF.</li> </ul>
<b><i>Platforms</i></b> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• other video playback devices</li> <li>• personal digital assistant (PDA)</li> <li>• video player (iPods).</li> </ul>
<i>Metadata tags</i> may include:	<ul style="list-style-type: none"> <li>• author</li> <li>• copyright notice</li> <li>• date of capture/date created</li> <li>• description</li> <li>• EXIF and IPTC standards</li> <li>• file size</li> <li>• format</li> <li>• headline/caption</li> <li>• keywords/subject</li> <li>• location/GPS coordinates</li> <li>• resolution</li> <li>• rights usage terms</li> <li>• roll/identifier #</li> <li>• subject</li> <li>• time</li> <li>• title</li> <li>• version.</li> </ul>

## CUFDIG304A Create visual design components

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to create visual designs for a range of interactive media components.</p> <p>People in this role work closely with other members of a production team. They create visual design components in response to specifications and under the supervision of a graphic designer or producer. They contribute creative ideas to the overall concept that needs to take account of technical considerations, such as the final delivery platform.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit requires the application of the key principles and practice of graphic design in the context of creating visual design components that could be integrated into a range of media products, including print media.</p> <p>A graphic artist usually undertakes this role and is expected to be competent in a range of design techniques, including freehand drawing. The visual design output will nevertheless be in a digital format for inclusion in a final media product.</p> <p>More complex skills associated with visual design aspects of a whole interactive media product are covered in:</p> <ul style="list-style-type: none"> <li>• CUFDIG402A Design user interfaces</li> <li>• CUFDIG403A Create user interfaces.</li> </ul>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> <li>1. Clarify type of visual design <i>components</i> required, in consultation with <i>relevant personnel</i></li> <li>2. In discussion with relevant personnel, identify factors that may determine or affect visual design concepts, including <i>design techniques</i></li> <li>3. Clarify in discussion with relevant personnel the target user and audience, and determine <i>format</i> and <i>delivery platform</i></li> </ol>
Generate and assess ideas	<ol style="list-style-type: none"> <li>4. Review media products, designs, images, artwork and other creative sources that may inspire visual design ideas</li> <li>5. Obtain other <i>relevant information</i> that may influence design ideas</li> <li>6. Generate a range of visual design ideas that are technically feasible, respond to specifications and provide creative solutions to all design issues</li> <li>7. Present visual design ideas to relevant personnel using design techniques</li> </ol>
Plan approach	<ol style="list-style-type: none"> <li>8. Experiment with traditional and digital imaging techniques to create required visual design components</li> <li>9. Explore range of <i>typographical</i> and <i>visual design elements</i> to create the components</li> <li>10. Evaluate initial design ideas and specifications against findings and discuss with relevant personnel to select final design concept</li> <li>11. Select design technique and discuss with relevant personnel to ensure appropriate output format meets delivery platform requirements</li> </ol>
Produce visual design components	<ol style="list-style-type: none"> <li>12. Develop structure for components based on the final design concept using selected design techniques</li> <li>13. Apply <i>visual design principles</i> and <i>communication principles</i> to produce components</li> <li>14. Save visual design in an appropriate format that satisfies the technical parameters determined in consultation with relevant personnel</li> </ol>
Finalise visual design components	<ol style="list-style-type: none"> <li>15. Review visual design components to assess whether creative solutions meet design and technical specifications</li> <li>16. Discuss and confirm with relevant personnel additional requirements or modifications and undertake any</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	necessary amendments

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written and verbal instructions
  - work as a member of a production team - both independently on assignment and under direction
  - respond constructively to feedback received from other team members
- initiative and enterprise in the context of generating a range of feasible ideas for visual designs
- technical skills sufficient to:
  - use a range of design techniques for creating visual designs, including industry-standard graphics software
  - apply visual design and communication principles to produce visual designs
  - create visual design components in appropriate formats for a range of delivery platforms
  - manage files and directories using standard naming conventions
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members
  - basic understanding of the relationship between technical and creative aspects and requirements of media projects
- basic design principles of layout and composition
- characteristics of digital and traditional imaging
- visual design and communication principles
- typography
- copyright clearance procedures
- OHS standards as they apply to the use of computer and keyboard for periods of time

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of visual design components that respond effectively to specifications and demonstrate the application of visual design and communication principles</li> <li>• ability to apply a selection of the design techniques listed in the range statement</li> <li>• ability to work collaboratively in a team environment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a range of resources, equipment and current industry-standard software as listed in the range statement</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of visual design components created by the candidate</li> <li>• written or oral questioning to test knowledge of visual design principles, communication principles and responsibilities of different members of a project team.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFDIG303A Produce and prepare photo images</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"><li>• CUFANM301A Create 2D digital animations.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Components* may include:

- 2D animation objects
- backgrounds
- banners
- basic user interfaces
- colours
- flow charts
- icons
- illustrations
- interactive buttons
- interactive controls
- logos
- simple 2D animation characters
- text
- titles
- other components required by the project.

*Relevant personnel* may include:

- art director
- asset creator
- client
- editor
- producer
- programmer
- supervisor
- technical director
- technical staff
- other specialist creative and administrative staff.

*Design techniques* may include:

- drawing freehand
- drawing on a tablet
- flow charts
- scanning drawings and photographs
- storyboards
- thumbnail sketches

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• using graphics software, such as:               <ul style="list-style-type: none"> <li>• Corel Draw</li> <li>• Corel Paint Shop Pro</li> <li>• Photoshop</li> <li>• Photoshop Elements</li> <li>• Illustrator</li> <li>• Paint.net</li> <li>• Fireworks.</li> </ul> </li> </ul>
<i>Format</i> may include:	<ul style="list-style-type: none"> <li>• bitmap image</li> <li>• digital formats, such as:               <ul style="list-style-type: none"> <li>• GIF</li> <li>• JPEG</li> <li>• PDF</li> <li>• TIFF</li> <li>• PICT</li> <li>• PNG</li> <li>• PSD</li> <li>• HTML</li> </ul> </li> <li>• hard copy</li> <li>• vector image.</li> </ul>
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• film</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• other wireless/mobile devices</li> <li>• personal digital assistant (PDA)</li> <li>• print media</li> <li>• television.</li> </ul>
<i>Relevant information</i> may include:	<ul style="list-style-type: none"> <li>• brands</li> <li>• logos</li> <li>• previous versions of components</li> <li>• printed materials</li> <li>• promotion materials</li> <li>• style guides</li> <li>• trademarks.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Typographical design elements</i> may include:	<ul style="list-style-type: none"> <li>• alignment</li> <li>• fonts and typefaces</li> <li>• kerning</li> <li>• leading</li> <li>• point and size</li> <li>• serif or sans serif</li> <li>• tracking.</li> </ul>
<i>Visual design elements</i> may include:	<ul style="list-style-type: none"> <li>• colour</li> <li>• form</li> <li>• line</li> <li>• shape</li> <li>• texture</li> <li>• tone.</li> </ul>
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• emphasis</li> <li>• focal point</li> <li>• movement</li> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> <li>• communicates message</li> <li>• conveys meaning</li> <li>• meets audience requirements</li> <li>• uses functional components.</li> </ul>

Co-requisite units		

## CUFDIG401A Author interactive media

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to author a complete interactive media product, for example, a whole website.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>People in this role need a sound understanding of mark-up languages (HTML and XML). In addition, they need to be familiar enough with scripting languages to use script libraries in authoring software to provide interactive features.</p> <p>Authors work primarily on client-side technologies. In the construction of dynamic websites, for example, they develop the templates, themes and style sheets for the programmers and technical support team to integrate into the database and install on a web server. Authors also develop forms and form objects, but the scripting for form processing is provided by programmers.</p> <p>Authors may also use a variety of authoring software to produce complex interactions such as digital simulations, games and puzzles.</p> <p>In interactive media development, authors are working with a team, including user interface designers, interactive designers, asset creators and server-side programmers.</p> <p>Skills associated with scripting are covered in:</p> <ul style="list-style-type: none"> <li>• CUFDIG404A Apply scripting language in authoring.</li> </ul>
---------------------------------------	---

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify multimedia elements	<ol style="list-style-type: none"> <li>1. Obtain <i>design specifications</i></li> <li>2. Locate content required for <i>productions</i></li> <li>3. Discuss issues of integration and formats of <i>media assets</i> with <i>relevant personnel</i></li> <li>4. Determine with relevant personnel an interactive sequence to become the prototype</li> </ol>
Identify scope of authoring software	<ol style="list-style-type: none"> <li>5. Identify range of industry-standard <i>authoring software</i></li> <li>6. Assess the authoring software in relation to specified <i>delivery platform</i></li> <li>7. Discuss selection of authoring software with relevant personnel to ensure selection will meet specified outcomes</li> <li>8. Select authoring software best suited to job requirements</li> </ol>
Use authoring software	<ol style="list-style-type: none"> <li>9. Load authoring software</li> <li>10. Create a new file for the specified task and name using standard naming conventions</li> <li>11. Display and use tools and features of authoring software relevant to the authoring process</li> </ol>
Create interactive sequence	<ol style="list-style-type: none"> <li>12. Slice and reassemble the user interface appropriate to the authoring software</li> <li>13. Import and assemble components in appropriate sequence according to creative requirements</li> <li>14. Create interactive features according to creative and technical requirements, sourcing and writing appropriate <i>markup and scripting languages</i> as required</li> <li>15. Check that interactive sequence conforms to navigation design</li> <li>16. Integrate media assets to ensure highest levels of technical performance</li> <li>17. Check that interactive sequence conforms to loading specifications</li> <li>18. Test for interoperability, eliminate all bugs and validate scripting</li> <li>19. Present interactive sequence as a prototype ensuring that sequence meets creative, production and technical requirements</li> <li>20. Save <i>output file formats</i> and identify for specified purpose</li> </ol>
Evaluate interactive	<ol style="list-style-type: none"> <li>21. Present prototype to relevant personnel</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
prototype	22. Evaluate prototype against design specifications, including achievement of a creative and user-centred product 23. Discuss and agree on required changes 24. Assist in user trials as required 25. Evaluate feedback from user trials 26. Seek confirmation from relevant personnel to transform prototype into final product
Seek confirmation from relevant personnel to transform prototype into final product	27. Make necessary changes as indicated by user trials 28. Replicate prototype functionality to complete the interactive product 29. Make final checks to ensure sequences conform to design specifications 30. Test for interoperability, eliminate bugs and validate scripting 31. Save to specified storage system accessible to production team 32. Assist in loading product to specified platform as required

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and literacy skills sufficient to interpret and clarify written or verbal instructions
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
  - correctly interpret design briefs, and design and technical specifications
  - proficiently use appropriate authoring and graphics software
  - seamlessly integrate and optimise a range of media assets to highest levels of technical performance
  - create and apply style sheets, templates or themes to conform with W3CAccessibility standards as they apply to client-side technology
  - manage files and directories using standard naming conventions and version control protocols
- initiative and flexibility in the context of troubleshooting and solving problems as they arise during the authoring process
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance as required

#### Required knowledge

- scope and applicability of industry-standard authoring software
- technical requirements for integrating digital content for use on a range of delivery platforms, including:
  - animation
  - graphics
  - text
  - video
  - audio
- user-centred design principles
- design principles of layout and composition
- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - sound understanding of the relationship between technical and creative aspects and requirements of interactive media projects

## **REQUIRED SKILLS AND KNOWLEDGE**

- sound knowledge of the features of a range of delivery platforms
- markup and scripting languages as they apply to relevant authoring software
- W3C Accessibility standards
- purpose and process of validation and the role of interoperability standards
- issues and challenges that arise in developing interactive media products
- OHS standards as they relate to working on computers for periods of time

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>development of an integrated and fully functional interactive media product that: <ul style="list-style-type: none"> <li>conforms to design specifications</li> <li>meets W3C Accessibility standards</li> <li>demonstrates creativity in design solutions</li> </ul> </li> <li>collaborative approach to work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to a range of resources, equipment and current industry-standard software as listed in the range statement</li> <li>access to appropriate learning and assessment support when required</li> <li>use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>evaluation of at least two interactive products authored by the candidate</li> <li>written or oral questioning to test knowledge of the processes followed to develop an interactive product and the respective roles and responsibilities of team members.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CUFDIG404A Apply scripting language in authoring</li> <li>ICAU4207B Apply web authoring tool to convert</li> </ul>

<b>EVIDENCE GUIDE</b>	
	client data for websites.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Design specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• creative requirements</li> <li>• navigation design</li> <li>• priority levels of W3C Accessibility standards</li> <li>• storyboards</li> <li>• technical specifications, including:             <ul style="list-style-type: none"> <li>• disk space</li> <li>• delivery platform</li> <li>• file format for final product</li> </ul> </li> <li>• time</li> <li>• user interface design.</li> </ul>
<p><b><i>Productions</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• e-commerce</li> <li>• educational product</li> <li>• game</li> <li>• information product</li> <li>• interactive application</li> <li>• promotional product</li> <li>• training product</li> <li>• website.</li> </ul>
<p><b><i>Media assets</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animation</li> <li>• audio</li> <li>• graphics</li> <li>• images</li> <li>• text</li> <li>• video.</li> </ul>
<p><b><i>Relevant personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animator</li> <li>• artist</li> <li>• asset creator</li> <li>• graphic designer</li> <li>• graphic interface designer</li> <li>• instructional designer</li> <li>• navigation designer</li> <li>• programmer</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• project manager</li> <li>• sound engineer</li> <li>• video producer</li> <li>• other specialist staff.</li> </ul>
Industry-standard <i>authoring software</i> may include:	<ul style="list-style-type: none"> <li>• Authorware</li> <li>• Breeze</li> <li>• Captivate</li> <li>• Contribute</li> <li>• Director</li> <li>• Dreamweaver</li> <li>• Flash</li> <li>• GoLive</li> <li>• PageMill</li> <li>• RoboDemo</li> <li>• graphics software, including: <ul style="list-style-type: none"> <li>• Photoshop</li> <li>• Fireworks</li> <li>• Illustrator</li> </ul> </li> <li>• simulation software, such as LabView.</li> </ul>
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other wireless/mobile devices.</li> </ul>
<i>Markup and scripting languages</i> may include:	<ul style="list-style-type: none"> <li>• ActionScript</li> <li>• HTML</li> <li>• JavaScript</li> <li>• Lingo</li> <li>• XML</li> <li>• other proprietary scripting languages.</li> </ul>
<i>Output file formats</i> may include:	<ul style="list-style-type: none"> <li>• DIR/DCR</li> <li>• FLA/SWF</li> <li>• HTML</li> <li>• PDB</li> <li>• PDF</li> <li>• PRC</li> <li>• TXT</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• WAP</li> <li>• XML</li> <li>• other proprietary formats.</li> </ul>

## CUFDIG502A Design web environments

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design web environments.</p> <p>A web environment may consist of one or many web applications and technologies integrated in various combinations.</p> <p>The design is focused on how these applications and technologies are combined and used, and the way in which interactive content is accessed by users.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>A person in this role works with clients to develop design specifications for web environments.</p> <p>Other specialised designers, graphic artists and programmers working as a team undertake the development of design specifications.</p> <p>Higher order skills associated with developing and documenting concepts that could be used as the basis for design specifications are covered in:</p> <ul style="list-style-type: none"> <li>• BSBCRT501A Originate and develop concepts.</li> </ul>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Determine project requirements	<ol style="list-style-type: none"> <li>1. Analyse project brief to identify <i>purpose</i> of, and target audience for, web environments</li> <li>2. Consult with clients to clarify <i>project requirements</i></li> <li>3. Identify target <i>audience characteristics</i> and determine how these influence all aspects of design</li> <li>4. Identify content to be incorporated and generated and how this content is to be accessed, searched or delivered</li> </ol>
Research and select web environments	<ol style="list-style-type: none"> <li>5. Research <i>web environments</i> and analyse their potential</li> <li>6. Analyse how these web environments meet audience and content requirements</li> <li>7. Identify issues relating to <i>delivery platform</i> and <i>standards</i>, and determine how these may affect web environment options</li> <li>8. Consult <i>relevant personnel</i> to ensure that all possible web environment options are considered</li> <li>9. Select web environments that will meet creative, production and technical requirements</li> </ol>
Draft design specifications	<ol style="list-style-type: none"> <li>10. Design the architecture of web environments to show interrelationship between environment components</li> <li>11. Identify each web environment and specify its individual interactive features, functionality and navigation and its relationship to design as a whole</li> <li>12. Identify content components and specify how these will be logically structured and integrated into and/or generated by web environments</li> <li>13. Specify levels of access permissions to web environments as required</li> <li>14. Specify <i>media assets</i> as required</li> <li>15. Specify user interfaces of web environments</li> <li>16. Specify <i>production requirements</i>, including appropriate <i>testing strategies</i></li> <li>17. Write draft <i>design specifications</i> to include all relevant advice to design and development teams</li> <li>18. Discuss draft design specifications with client to ensure designs are consistent with project briefs</li> </ol>
Review and confirm design specifications	<ol style="list-style-type: none"> <li>19. Review designs against required project outcomes, as well as client and audience needs</li> <li>20. Review designs to ensure they meet creative and technical requirements</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	21. Adjust designs as necessary after discussions with relevant personnel 22. Clarify <i>legislative or ownership issues</i> to comply with production and organisational requirements 23. Confirm with client acceptance of design specifications, including deliverables, milestones and timelines

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written proposals and creative briefs
  - work collaboratively in a team environment
  - present ideas for the design of web environments for discussion and feedback from team members
  - clearly and concisely document specifications for the design of web environments
- initiative, enterprise and creativity in the context of:
  - generating ideas for the design of web environments
  - thinking laterally when developing concepts
  - undertaking background research into web environments
  - maintaining design integrity
  - finding solutions to problems encountered when designing web environments
  - finding ways to minimise the effect of technical constraints
  - ensuring there is an intuitive and logical flow to the navigation of web environments
- technical skills sufficient to create storyboards, maps and other diagrams to specify the architecture and navigation of web environments
- self-management skills sufficient to:
  - meet deadlines
  - provide appropriate and timely documentation

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - sequence and interrelationship of stages in the process of developing web environments
  - broad range of web applications and technologies
  - web design and its relationship to web optimisation strategies
  - web standards, including SCORM, usability, W3C Accessibility and interoperability
  - issues and challenges that arise in designing and developing web environments
- typical formats and techniques for documenting the design of web environments
- OHS standards as they relate to working for periods of time on computers

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

- |   |
|---|
| <ul style="list-style-type: none"><li>• intellectual property rights and copyright clearance procedures</li></ul> |
|---|

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• design specifications for web environments that: <ul style="list-style-type: none"> <li>• are well documented and clearly presented</li> <li>• meet client and audience requirements</li> <li>• are technically feasible</li> </ul> </li> <li>• ability to work effectively as a member of a production team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• practical demonstration of skills through the design of web environments for at least two projects</li> <li>• access to project briefs on which designs can be based</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of designs for web environments documented by the candidate and of their effectiveness in terms of meeting project requirements</li> <li>• observation of a candidate presenting his/her design for web environments to team members and explaining how it meets requirements</li> <li>• written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>

**EVIDENCE GUIDE**

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFDIG505A Design information architecture
- CUFPPM404A Create storyboards.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purpose</i> may include:</p>	<ul style="list-style-type: none"> <li>• business and corporate</li> <li>• community</li> <li>• education</li> <li>• entertainment</li> <li>• government</li> <li>• information and news</li> <li>• knowledge management</li> <li>• personal</li> <li>• promotion</li> <li>• training.</li> </ul>
<p><i>Project requirements</i> may include:</p>	<ul style="list-style-type: none"> <li>• access to facilities and resources</li> <li>• budget</li> <li>• deliverables</li> <li>• milestones</li> <li>• personnel, including:             <ul style="list-style-type: none"> <li>• number</li> <li>• availability</li> <li>• expertise prototyping</li> </ul> </li> <li>• technical issues, including:             <ul style="list-style-type: none"> <li>• delivery platform</li> <li>• disk space</li> <li>• bandwidth</li> <li>• testing plan</li> </ul> </li> <li>• timelines.</li> </ul>
<p><i>Audience characteristics</i> may include:</p>	<ul style="list-style-type: none"> <li>• computer literacy</li> <li>• demographics, such as:             <ul style="list-style-type: none"> <li>• age</li> <li>• gender</li> <li>• education</li> <li>• occupation</li> <li>• location</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• cultural background</li> <li>• hobbies</li> <li>• interests</li> <li>• internet literacy</li> <li>• language, literacy and numeracy</li> <li>• personas</li> <li>• specific needs - physical or psychological.</li> </ul>
<i>Web environments</i> may include one or combinations of:	<ul style="list-style-type: none"> <li>• audio streaming</li> <li>• blog</li> <li>• chat</li> <li>• conferencing tool</li> <li>• content learning management system (CLMS)</li> <li>• content management system (CMS)</li> <li>• database repository</li> <li>• discussion forum</li> <li>• dynamic website</li> <li>• electronic newsletter</li> <li>• interactive calendar</li> <li>• interactive form</li> <li>• learning management system (LMS)</li> <li>• podcast</li> <li>• RSS feed</li> <li>• static website</li> <li>• TiVo</li> <li>• video streaming</li> <li>• other online collaboration and social network tools.</li> </ul>
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> <li>• digital television set</li> <li>• internet</li> <li>• mobile phone</li> <li>• other wireless/mobile devices</li> <li>• personal digital assistant (PDA).</li> </ul>
<i>Standards</i> may include:	<ul style="list-style-type: none"> <li>• interoperability</li> <li>• SCORM</li> <li>• usability</li> <li>• W3C Accessibility.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• art director</li> <li>• client</li> <li>• educator</li> <li>• graphic designer</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• head of department</li> <li>• information architect</li> <li>• instructional designer</li> <li>• programmer</li> <li>• technical director</li> <li>• technical staff</li> <li>• other specialist creative and administrative staff.</li> </ul>
<i>Media assets</i> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• audio</li> <li>• audio/visual files, such as PowerPoint</li> <li>• graphics</li> <li>• images</li> <li>• text</li> <li>• text documents, such as PDF and Word</li> <li>• video.</li> </ul>
<i>Production requirements</i> may include:	<ul style="list-style-type: none"> <li>• levels of expertise</li> <li>• production deadlines</li> <li>• production schedules</li> <li>• production team</li> <li>• production values</li> <li>• testing strategies.</li> </ul>
<i>Testing strategies</i> may include:	<ul style="list-style-type: none"> <li>• alpha</li> <li>• beta</li> <li>• completion</li> <li>• continuous</li> <li>• milestone</li> <li>• prototype</li> <li>• staged.</li> </ul>
<i>Design specifications</i> may include:	<ul style="list-style-type: none"> <li>• content inventory</li> <li>• diagrams</li> <li>• flow charts</li> <li>• maps</li> <li>• navigation charts</li> <li>• plans</li> <li>• storyboards</li> <li>• technical specifications</li> <li>• user interface mock-ups</li> <li>• wire frames.</li> </ul>

**RANGE STATEMENT**

*Legislative or ownership issues*  
may be:

- access and equity
- clearances
- confidentiality
- copyright
- intellectual property rights
- non-disclosure agreements
- open source licensing
- ownership of assets
- product licensing.

## CUFDIG503A Design e-learning resources

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to design an e-learning resource.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>The skills and knowledge outlined in this unit are applied by people working in education or training organisations, or in media production companies that specialise in the development of e-learning resources.</p> <p>The focus of this unit is different to that of the two units in the Training and Assessment Training Package that deal with e-learning resources. Namely:</p> <ul style="list-style-type: none"> <li>• TAADES503B Research and design e-learning resources</li> <li>• TAADES504B Develop and evaluate e-learning resources.</li> </ul> <p>These two units are written from the perspective of people in training organisations who are responsible for developing and delivering learning materials to be included in e-learning resources.</p> <p>CUFDIG503A is written from the perspective of a department or company responsible for developing the design of broad ranging e-learning resources in consultation with clients. However, there are synergies between the units and it may be appropriate to combine them in learning programs.</p>
---------------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify project requirements	<ol style="list-style-type: none"> <li>1. With reference to project briefs, identify <i>target learner characteristics</i> and their impact on the way resources are designed</li> <li>2. Identify <i>content</i> to be incorporated or generated and how this content is to be accessed or delivered</li> <li>3. Identify <i>delivery platforms</i> and implications that these will have on selection of <i>media assets</i></li> <li>4. Consult with clients to clarify <i>project requirements</i></li> </ol>
Research and select instructional design model	<ol style="list-style-type: none"> <li>5. Analyse content to clearly establish learning outcomes and assessment strategies</li> <li>6. Research a range of <i>instructional design models</i>, considering their characteristics, differences and ability to meet briefs</li> <li>7. Identify <i>standards</i> that may apply for a range of delivery platforms</li> <li>8. Identify <i>learning styles</i> of target learners and consider how these may impact on the design</li> <li>9. Consider a range of <i>learning activities</i> that best meet learning objectives and needs of target learners</li> <li>10. Consult with <i>relevant personnel</i> to ensure that a full range of instructional design models has been identified and sourced</li> <li>11. Select the instructional design model that best meets learning needs and project requirements</li> </ol>
Draft design specifications	<ol style="list-style-type: none"> <li>12. Use selected instructional design model to design the overall architecture of an e-learning resource</li> <li>13. Design sequences and interactivity based on content and project requirements</li> <li>14. Develop content templates for content experts if required</li> <li>15. Specify media assets as required</li> <li>16. Specify <i>communication and collaborative tools</i> as required</li> <li>17. Specify user interface of the e-learning resource</li> <li>18. Specify <i>production requirements</i>, including appropriate <i>testing strategies</i></li> <li>19. Write draft <i>design specifications</i> to include relevant advice to design and development teams</li> <li>20. Discuss draft design specifications with clients to ensure</li> </ol>

ELEMENT	PERFORMANCE CRITERIA
	designs are consistent with project briefs
Finalise design specifications	21. Review designs against required project outcomes and target learner needs 22. Review designs to ensure they meet creative and technical requirements 23. Adjust designs as necessary after discussions with relevant personnel 24. Clarify <i>legislative or ownership issues</i> to comply with production and organisational requirements 25. Confirm with clients acceptance of design specifications, including deliverables, milestones and timelines

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify project briefs
  - establish rapport with clients
  - work collaboratively in a team environment to find the best design solutions
  - clearly and concisely document specifications for the design of e-learning resources
- initiative and enterprise in the context of:
  - generating ideas for the design of e-learning resources that meet the needs of target learners
  - thinking laterally when developing ideas
  - selecting the most appropriate instructional design model
  - maintaining design integrity
- technical skills sufficient to:
  - create storyboards, maps and other diagrams to specify the architecture and navigation of e-learning resources
  - construct material in a logical order, one sequence flowing on from another
  - develop techniques for holding learner's attention
- self-management skills sufficient to:
  - meet deadlines
  - provide appropriate and timely documentation

#### Required knowledge

- typical formats and techniques for documenting the design of e-learning resources
- OHS standards as they relate to working for periods of time on computers
- range of learning models
- way in which various learning styles impact on learning models
- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - sequence and interrelationship of stages in the process of developing e-learning resources
  - web standards, including usability, W3C Accessibility and interoperability
  - web applications and technologies that are relevant to e-learning
  - issues and challenges that arise in designing and developing e-learning resources

<b>REQUIRED SKILLS AND KNOWLEDGE</b>

- |   |
|---|
| <ul style="list-style-type: none"><li>• intellectual property rights and copyright clearance procedures</li></ul> |
|---|

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• design specifications for e-learning resources that: <ul style="list-style-type: none"> <li>• are well documented and clearly presented</li> <li>• meet learner requirements</li> <li>• are technically feasible</li> </ul> </li> <li>• ability to work effectively as a member of a production team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• practical demonstration of skills through the design of at least two e-learning resources for delivery on different platforms</li> <li>• access to project briefs on which designs can be based</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of designs for e-learning resources documented by the candidate and of their effectiveness in terms of meeting project requirements</li> <li>• role-play involving a candidate presenting his/her design for an e-learning resource to a client and explaining how it meets requirements</li> <li>• written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>

**EVIDENCE GUIDE**

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFPPM404A Create storyboards.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Target learner characteristics*** may include:

- computer literacy
- demographics, such as:
  - age
  - gender
  - education
  - occupation
  - location
  - cultural background
- hobbies
- interests
- internet literacy
- language, literacy and numeracy levels
- learning environment, such as:
  - workplace
  - classroom
  - home
  - community
  - mobile
- personas
- preferred learning styles
- skills level
- specific needs - physical or psychological.

***Content*** may include:

- audio/visual materials
- curriculum documents, such as:
  - Training Packages and their units of competency
  - modules
- guides
- manuals
- PowerPoint presentations
- pre-existing learning materials
- printed materials

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• reference texts</li> <li>• training handouts.</li> </ul>
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> <li>• CD/DVD</li> <li>• digital television set</li> <li>• internet, including:               <ul style="list-style-type: none"> <li>• websites</li> <li>• blogs</li> <li>• wikis</li> <li>• database repositories</li> <li>• learning management systems, such as:                   <ul style="list-style-type: none"> <li>• Blackboard</li> <li>• WebCT</li> <li>• Janeson</li> <li>• Moodle</li> </ul> </li> <li>• virtual classrooms</li> <li>• conferencing</li> <li>• discussion forums</li> <li>• flash-based</li> <li>• chat</li> <li>• podcasting</li> <li>• video streaming</li> <li>• audio streaming</li> <li>• other online collaboration tools</li> </ul> </li> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other wireless/mobile devices.</li> </ul>
<i>Media assets</i> may include:	<ul style="list-style-type: none"> <li>• animations</li> <li>• audio</li> <li>• audio/visual files, such as PowerPoint</li> <li>• graphics</li> <li>• images</li> <li>• text documents, such as PDF and Word</li> <li>• video.</li> </ul>
<i>Project requirements</i> may include:	<ul style="list-style-type: none"> <li>• access to facilities and resources</li> <li>• assessment strategies</li> <li>• budget</li> <li>• deliverables</li> <li>• learner characteristics</li> <li>• milestones</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• personnel, including:               <ul style="list-style-type: none"> <li>• number</li> <li>• availability</li> <li>• expertise</li> </ul> </li> <li>• prototyping</li> <li>• technical issues, including:               <ul style="list-style-type: none"> <li>• delivery platform</li> <li>• disk space</li> <li>• bandwidth</li> <li>• testing plan</li> </ul> </li> <li>• timelines.</li> </ul>
<i>Instructional design models</i> include:	<ul style="list-style-type: none"> <li>• exploration</li> <li>• game</li> <li>• instructional</li> <li>• lock step</li> <li>• mentoring</li> <li>• problem-solving</li> <li>• puzzle</li> <li>• simulation</li> <li>• story-telling.</li> </ul>
<i>Standards</i> may include:	<ul style="list-style-type: none"> <li>• AQTF</li> <li>• interoperability</li> <li>• SCORM</li> <li>• usability</li> <li>• W3C Accessibility.</li> </ul>
<i>Learning styles</i> may include:	<ul style="list-style-type: none"> <li>• activist</li> <li>• learning preferences, including auditory, visual or sensory</li> <li>• pragmatist</li> <li>• reflective</li> <li>• theorist</li> </ul>
<i>Learning activities</i> may include:	<ul style="list-style-type: none"> <li>• blogs</li> <li>• case studies</li> <li>• checklists</li> <li>• discussions and debates</li> <li>• games</li> <li>• interviews</li> <li>• media presentations</li> <li>• problems</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• projects</li> <li>• quizzes</li> <li>• research reports</li> <li>• role-plays</li> <li>• simulations</li> <li>• tasks</li> <li>• work-based practical activities.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• art director</li> <li>• client</li> <li>• content expert</li> <li>• educator</li> <li>• graphic designer</li> <li>• head of department</li> <li>• information architect</li> <li>• language, literacy and numeracy specialist</li> <li>• programmer</li> <li>• reference group member</li> <li>• technical director</li> <li>• technical staff</li> <li>• other specialist creative and administrative staff.</li> </ul>
<i>Communication and collaborative tools</i> may include:	<ul style="list-style-type: none"> <li>• blogs</li> <li>• chat</li> <li>• discussion forums</li> <li>• messaging</li> <li>• TiVo</li> <li>• wikis</li> <li>• other social software tools.</li> </ul>
<i>Production requirements</i> may include:	<ul style="list-style-type: none"> <li>• levels of expertise</li> <li>• production deadlines</li> <li>• production schedules</li> <li>• production team</li> <li>• testing strategies.</li> </ul>
<i>Testing strategies</i> may include:	<ul style="list-style-type: none"> <li>• alpha</li> <li>• beta</li> <li>• completion</li> <li>• continuous</li> <li>• milestone</li> <li>• prototype</li> <li>• staged.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Design specifications</i> may include:	<ul style="list-style-type: none"> <li>• content inventory</li> <li>• diagrams</li> <li>• flow charts</li> <li>• maps</li> <li>• navigation charts</li> <li>• plans</li> <li>• storyboards</li> <li>• technical specifications</li> <li>• user interface mock-ups</li> <li>• wire frames</li> </ul>
<i>Legislative or ownership issues</i> may be:	<ul style="list-style-type: none"> <li>• access and equity</li> <li>• clearances</li> <li>• confidentiality</li> <li>• copyright</li> <li>• intellectual property rights</li> <li>• non-disclosure agreements</li> <li>• open source licensing</li> <li>• ownership of assets</li> <li>• product licensing.</li> </ul>

<b>Co-requisite units</b>		

## CUFDIG504A Design games

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design games and document the process for developing them.</p> <p>Game design requires a high degree of collaboration between script writers, programmers and graphic designers.</p> <p>Low-end games can be constructed using interactive authoring tools, but for video game productions, designers need to work with high level programmers to ensure that designs are technically feasible.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>A lead designer typically applies the skills and knowledge described in this unit, which relate to generating and then working on a game idea until the mechanics and design of the game are fully documented. A lead designer communicates the vision for a game to the rest of the team, takes ideas submitted during design meetings and analyses them to ensure they fit the game's intended objectives. This vision is captured in the game design document.</p> <p>Depending on the size of an enterprise, a lead designer may supervise assistant or level designers and would typically report to a design or creative director.</p> <p>Skills associated with story-telling are covered in:</p> <ul style="list-style-type: none"> <li>• CUFWRT402A Write extended stories.</li> </ul>
---------------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify project requirements	<ol style="list-style-type: none"> <li>1. Confirm the objective and desired outcomes of a game proposal or brief in consultation with <b>relevant personnel</b></li> <li>2. Identify <b>factors</b> that may have an impact on how a game is designed</li> <li>3. Clarify target audience to determine format and <b>delivery platform</b> of the game through discussion with relevant personnel</li> </ol>
Research games and generate ideas	<ol style="list-style-type: none"> <li>4. Select <b>state of the art games</b> from different genres to play as a source of inspiration</li> <li>5. Search <b>game literature</b> for each game and identify the games' objectives</li> <li>6. Generate range of ideas for game designs that are technically feasible, respond to the proposal or brief, and provide creative solutions to design issues</li> <li>7. Discuss ideas and collaborate, as required, with relevant personnel to ensure contribution of a range of ideas and creative solutions to initial concepts</li> </ol>
Select a game genre	<ol style="list-style-type: none"> <li>8. Identify and present a range of <b>game genres</b> to relevant personnel for consideration in terms of their characteristics, differences and ability to meet requirements of proposal or brief</li> <li>9. Consult with relevant personnel to ensure that a full range of genres has been identified and sourced</li> <li>10. Select the game genre that best meets the creative, technical and production requirements of proposal or brief</li> </ol>
Draft game design document	<ol style="list-style-type: none"> <li>11. Establish the game strategy outcomes</li> <li>12. Use <b>design techniques</b> to develop the structure of a game ensuring that all elements, including style and <b>game mechanics</b>, are fully documented</li> <li>13. Use a range of <b>criteria</b> to determine the scope of a prototype to be used in the development phase</li> <li>14. Ensure that the prototype selected is capable of <b>testing the effectiveness</b> of the proposed game</li> <li>15. Include a register of <b>game assets</b> in consultation with relevant personnel</li> <li>16. Present draft <b>game design document</b> for discussion with and feedback from other team members</li> </ol>
Finalise game design	<ol style="list-style-type: none"> <li>17. Re-evaluate game design objectives on the basis of feedback on the prototype and draft game design</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
document	document 18. Discuss and confirm additional requirements or modifications to the game design with relevant personnel 19. Specify the game <i>production specifications</i> , including appropriate <i>testing strategies</i> 20. Write final game design document to reflect all additional requirements or modifications

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written proposals and creative briefs
  - work collaboratively in a team environment
  - present game design ideas for discussion and feedback from team members
  - document game design specifications clearly and concisely
- initiative, enterprise and creativity in the context of:
  - generating innovative ideas for game designs
  - thinking laterally when developing concepts
  - undertaking background research into game ideas
  - maintaining design integrity
- technical skills sufficient to create complex designs using storyboards, maps and other diagrams to specify the architecture and navigation of game mechanics
- self-management skills sufficient to:
  - meet deadlines
  - provide appropriate and timely documentation

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - sound understanding of game theory, including traditional games
  - broad range of game genres and styles
  - technical parameters of various games platforms
  - issues and challenges that arise in designing games
- research methods for staying abreast of the latest changes and design enhancements
- requirements of game play design documents
- typical formats and techniques for documenting game designs
- intellectual property rights and copyright clearance procedures
- OHS standards as they relate to working for periods of time on computers

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development of original and innovative concepts for games</li> <li>• design of game play methods that are compelling for the user and technically feasible</li> <li>• production of clear and well-presented game design documentation</li> <li>• ability to work effectively as a member of a design team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• practical demonstration of skills through the design of a variety of games for at least two platforms</li> <li>• access to game proposals or briefs on which designs can be based</li> <li>• access to a range of games for viewing</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of game designs documented by the candidate and of their quality in terms of meeting creative briefs</li> <li>• written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit</li> <li>• case studies to assess ability to develop designs for different types of games.</li> </ul>

**EVIDENCE GUIDE**

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFPPM404A Create storyboards
- BSBCRT501A Originate and develop concepts.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant personnel*** may include:

- art director
- client
- designers
- director
- graphic artist
- head of department
- producer
- programmer
- publisher
- script writer
- software engineer
- other technical and creative staff.

***Factors*** may include:

- availability of personnel
- availability of resources
- available budget
- complexity of proposed game
- intellectual property
- need to attract finance
- production schedule
- production values
- technical parameters, including:
  - technology constraints
  - console
  - platform
  - bandwidth
  - memory/RAM
- timelines
- user and audience.

***Delivery platforms*** may include:

- CD/DVD
- digital television set
- games console
- internet

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other wireless/mobile devices.</li> </ul>
<i>State of the art games</i> may include:	<ul style="list-style-type: none"> <li>• best selling games</li> <li>• games that show unique and innovative approaches.</li> </ul>
<i>Game literature</i> may include:	<ul style="list-style-type: none"> <li>• game design books</li> <li>• game post-mortems</li> <li>• magazine, newspaper and journal articles</li> <li>• previews and reviews</li> <li>• strategy guides</li> <li>• user manuals</li> <li>• walkthroughs</li> <li>• other online game resources.</li> </ul>
<i>Game genres</i> may include:	<ul style="list-style-type: none"> <li>• adventure</li> <li>• arcade</li> <li>• first person shooter</li> <li>• massively multiplayer online</li> <li>• mazes</li> <li>• platforms</li> <li>• puzzles</li> <li>• racing</li> <li>• rhythm</li> <li>• role playing</li> <li>• simulation</li> <li>• sport</li> <li>• strategy</li> <li>• third person shooter.</li> </ul>
<i>Design techniques</i> may include:	<ul style="list-style-type: none"> <li>• drawing</li> <li>• flow chart</li> <li>• scanning</li> <li>• storyboard</li> <li>• using image and background generating tools.</li> </ul>
<i>Game mechanics</i> may include:	<ul style="list-style-type: none"> <li>• environment and object interactions</li> <li>• environment dynamics</li> <li>• game objects</li> <li>• game play elements that may include: <ul style="list-style-type: none"> <li>• skill levels</li> <li>• judgements</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• choices</li> <li>• decisions</li> <li>• codes</li> <li>• rules</li> <li>• levels of progression</li> <li>• goals</li> <li>• actions</li> <li>• events</li> <li>• levels of difficulty</li> <li>• scoring</li> <li>• calculation of scoring</li> <li>• user control</li> <li>• user interaction</li> <li>• options for single player or multiplayer</li> <li>• customisation</li> <li>• key systems</li> <li>• object actions</li> <li>• object to object interactions.</li> </ul>
<i>Criteria</i> may include whether the prototype:	<ul style="list-style-type: none"> <li>• can be demonstrated to a specialist target group</li> <li>• can be used for promotional purposes</li> <li>• can demonstrate the full potential of the game</li> <li>• can sell a concept to potential investors</li> <li>• is appropriate for the chosen genre and style.</li> </ul>
<i>Testing the effectiveness</i> of the prototype may include:	<ul style="list-style-type: none"> <li>• comparing game design with original objectives</li> <li>• group discussion techniques</li> <li>• identifying any logical inconsistencies in: <ul style="list-style-type: none"> <li>• design</li> <li>• game timing</li> <li>• story-lines</li> </ul> </li> <li>• measuring the levels of user satisfaction</li> <li>• paper and pencil techniques (dry running).</li> </ul>
<i>Game assets</i> may include:	<ul style="list-style-type: none"> <li>• animations</li> <li>• audio, including: <ul style="list-style-type: none"> <li>• sound effects</li> <li>• dialogue</li> <li>• narration</li> <li>• music</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• cut scenes</li> <li>• titles</li> <li>• video sequences.</li> </ul>
<i>Game design document</i> may include:	<ul style="list-style-type: none"> <li>• agent architectures</li> <li>• artificial intelligence</li> <li>• asset register</li> <li>• background story</li> <li>• comprehensive designs for each mission and level</li> <li>• decision-making systems</li> <li>• game mechanics</li> <li>• game tools</li> <li>• graphics</li> <li>• inventories</li> <li>• overview</li> <li>• production specifications</li> <li>• scripts</li> <li>• spatial design</li> <li>• storyboard and flow chart</li> <li>• synopsis</li> <li>• title</li> <li>• user interface</li> <li>• walkthroughs.</li> </ul>
<i>Production specifications</i> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• intellectual property</li> <li>• levels of staff expertise</li> <li>• production schedule</li> <li>• production values</li> <li>• size and composition of the development team</li> <li>• technology constraints</li> <li>• testing strategies</li> <li>• timelines.</li> </ul>
<i>Testing strategies</i> may include:	<ul style="list-style-type: none"> <li>• alpha</li> <li>• beta</li> <li>• completion</li> <li>• continuous</li> <li>• milestone</li> <li>• prototype</li> <li>• staged.</li> </ul>

<b>Co-requisite units</b>		

## CUFDIG507A Design digital simulations

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to design digital simulations.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>The range of digital simulations covered in this unit is broad, and could include virtual world environments for architecture; virtual instruments and equipment for science and engineering; or natural and technical processes and procedures in medicine, conservation and manufacturing.</p> <p>As these simulations are based on real world environments and processes, designers need to work closely with experts in the field to understand the dynamics of the processes and to be able to model these in a virtual environment.</p> <p>The unit also requires working collaboratively with programmers and software authors to ensure the simulation can be technically achieved.</p> <p>As the application for simulation is broad, including demonstration and training, this unit relates to other design units, including:</p> <ul style="list-style-type: none"> <li>• CUFDIG503A Design e-learning resources</li> <li>• CUFDIG504A Design games.</li> </ul>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify project requirements	<ol style="list-style-type: none"> <li>1. Confirm objectives and desired outcomes of briefs in consultation with <i>relevant personnel</i></li> <li>2. Identify target audience and determine format and <i>delivery platform</i> of simulations through discussion with relevant personnel</li> </ol>
Research and plan approach	<ol style="list-style-type: none"> <li>3. Investigate fully the <i>real world environment</i> that is to be simulated</li> <li>4. Obtain designs, plans and other information that may assist in modelling the real world environment</li> <li>5. Determine the <i>performance objectives</i>, task complexity and required levels of user skill</li> <li>6. Determine the required depth of physical and functional fidelity, taking into account <i>production requirements</i></li> <li>7. Research and select appropriate simulation <i>authoring tools</i></li> <li>8. Discuss ideas and collaborate, as required, with relevant personnel to ensure contribution of a range of ideas and creative solutions</li> </ol>
Draft simulation design documents	<ol style="list-style-type: none"> <li>9. Identify the <i>processes</i> that determine the functional behaviour and specify how this behaviour is to be represented by <i>control objects</i></li> <li>10. Define the underlying functionality in a model that specifies the essential settings, states, conditions and parameters</li> <li>11. Specify the <i>user interface controls</i> that enable users to interact with simulations</li> <li>12. Identify critical impacts, alerts or costs for incorrect user operation</li> <li>13. Specify positive and negative user feedback</li> <li>14. Specify the sequencing of levels of difficulty</li> <li>15. Present draft <i>simulation design documents</i> for discussion with and feedback from other team members</li> </ol>
Finalise simulation design documents	<ol style="list-style-type: none"> <li>16. Review designs against required project outcomes and performance objectives</li> <li>17. Review designs to ensure they meet creative, technical and legislative requirements</li> <li>18. Adjust designs as necessary after discussions with relevant personnel and incorporating user feedback</li> <li>19. Save and archive user interface controls for other</li> </ol>

	projects

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify project briefs
  - establish rapport with clients
  - work collaboratively in a team environment to find the best design solutions
  - clearly and concisely document specifications for the design of the digital simulation
- initiative and enterprise in the context of:
  - generating ideas for the design of digital simulations that meet the specified performance objectives
  - thinking laterally when developing ideas
  - maintaining design integrity
- technical skills sufficient to:
  - create storyboards, state-charts and other diagrams to specify the architecture and navigation of digital simulations
  - design simulations that represent a real world environment to the required level of fidelity
- self-management skills sufficient to:
  - meet deadlines
  - provide appropriate and timely documentation

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - issues and challenges that arise in the context of designing and developing digital simulations
- typical formats and techniques for documenting the design of digital simulations
- OHS standards as they relate to working for periods of time on computers
- way in which algorithms, laws, rules and mathematical formulas can represent real world processes
- intellectual property rights and copyright clearance procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• design specifications for digital simulations that: <ul style="list-style-type: none"> <li>• are well documented and clearly presented</li> <li>• meet performance requirements</li> <li>• are technically feasible</li> </ul> </li> <li>• ability to work effectively as a member of a design team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• practical demonstration of skills through the design of at least two digital simulations</li> <li>• access to briefs for digital simulations on which designs can be based</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of digital simulation designs documented by the candidate and of their quality in terms of meeting performance requirements</li> <li>• written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit</li> <li>• case studies to assess ability to develop digital simulations for a range of real world environments.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

<b>EVIDENCE GUIDE</b>	
	for example: <ul style="list-style-type: none"><li>• CUFDIG503A Design e-learning resources</li><li>• CUFDIG504A Design games</li><li>• CUFDIG506A Design interaction.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Relevant personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• art director</li> <li>• client</li> <li>• designer</li> <li>• expert</li> <li>• graphic artist</li> <li>• head of department</li> <li>• programmer</li> <li>• publisher</li> <li>• script writer</li> <li>• software engineer</li> <li>• other technical and creative staff.</li> </ul>
<p><b><i>Delivery platforms</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• CD/DVD</li> <li>• games console</li> <li>• internet</li> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other wireless/mobile devices.</li> </ul>
<p><b><i>Real world environments</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• device</li> <li>• equipment</li> <li>• machine</li> <li>• natural habitat</li> <li>• procedure</li> <li>• process</li> <li>• social environment</li> <li>• spatial environment</li> <li>• system</li> <li>• tool.</li> </ul>
<p><b><i>Performance objectives</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• control</li> <li>• dexterity</li> <li>• judgement</li> <li>• knowledge</li> <li>• memory</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• perception</li> <li>• proficiency</li> <li>• recall</li> <li>• reflection</li> <li>• speed and accuracy of decision making and problem solving</li> <li>• understanding.</li> </ul>
<i>Production requirements</i> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• schedules</li> <li>• staff expertise</li> <li>• timelines.</li> </ul>
<i>Authoring tools</i> may include:	<ul style="list-style-type: none"> <li>• authoring software, such as: <ul style="list-style-type: none"> <li>• Dreamweaver</li> <li>• GoLive</li> <li>• Contribute</li> <li>• Breeze</li> <li>• Captivate</li> <li>• Authorware</li> <li>• Flash</li> <li>• Director</li> <li>• PageMill</li> <li>• RoboDemo</li> <li>• simulation software, such as LabView</li> </ul> </li> <li>• scripting using languages, such as: <ul style="list-style-type: none"> <li>• CC++</li> <li>• Java</li> <li>• ActionScript</li> <li>• Lingo.</li> </ul> </li> </ul>
<i>Processes</i> may include:	<ul style="list-style-type: none"> <li>• astrological</li> <li>• biological</li> <li>• chemical</li> <li>• electrical</li> <li>• environmental</li> <li>• mechanical</li> <li>• mental</li> <li>• physical</li> <li>• social.</li> </ul>
<i>Control objects</i> may include:	<ul style="list-style-type: none"> <li>• algorithms</li> <li>• forces</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• laws</li> <li>• mathematical formulas</li> <li>• rules.</li> </ul>
<i>User interface controls</i> may include:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• clocks</li> <li>• dials</li> <li>• gauges</li> <li>• handles</li> <li>• joysticks</li> <li>• keyboards</li> <li>• keypads</li> <li>• knobs</li> <li>• lamps</li> <li>• levers</li> <li>• meters</li> <li>• sliders</li> <li>• switches</li> <li>• timers</li> <li>• valves</li> <li>• wheels.</li> </ul>
<i>Simulation design documents</i> may include:	<ul style="list-style-type: none"> <li>• diagrams</li> <li>• flow charts</li> <li>• maps</li> <li>• plans</li> <li>• state-charts</li> <li>• storyboards</li> <li>• technical specifications</li> <li>• user interface mock-ups</li> <li>• wire frames.</li> </ul>

## Unit Sector(s)

<b>Unit sector</b>	
--------------------	--

## Competency field

<b>Competency field</b>	Visual communication - digital content and imaging
-------------------------	--

## Co-requisite units

<b>Co-requisite units</b>		

## CUFPOS201A Perform basic vision and sound editing

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to perform basic editing functions in relation to film, television and interactive media productions.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Editing assistants apply the skills and knowledge described in this unit. Under the direction of an editor or senior editor, they are responsible for digitising, cutting and logging pre-recorded image and audio content. Editors then take this material and complete the editing process.</p> <p>Within clearly defined parameters, editing assistants are also responsible for editing content using the basic functions of editing software.</p> <p>More complex skills associated with digital editing are covered in:</p> <ul style="list-style-type: none"> <li>• CUFPOS401A Edit screen content for fast turnaround.</li> </ul>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Prepare source materials for edit	<ol style="list-style-type: none"> <li>1. Clarify <i>technical and creative requirements</i> for <i>production</i> and online <i>editing</i> in consultation with relevant <i>production personnel</i></li> <li>2. Obtain and label <i>source materials</i> and keep in a safe, clean location with appropriate <i>documentation</i></li> <li>3. Organise transfer of source materials to appropriate <i>medium</i> where necessary</li> <li>4. Check that sufficient <i>storage and memory</i> is available to meet content resolution requirements</li> <li>5. Assess source materials for technical and creative quality and arrange for remedial action where problems are identified</li> <li>6. Digitise content according to specified <i>formats</i> and burn time code where applicable, ensuring format is compatible with available <i>software</i> and <i>hardware</i></li> <li>7. Align, synchronise and organise uncut images and sound in preparation for evaluation and editing</li> <li>8. In consultation with relevant production personnel, finalise list of shots required for the edit and the method for logging them</li> </ol>
Log content for editing	<ol style="list-style-type: none"> <li>9. Check <i>editing facilities</i> are operational and arrange for faults or problems to be resolved according to enterprise procedures</li> <li>10. Obtain required editing <i>consumable materials</i> and ensure sufficient supplies are available to meet editing schedules</li> <li>11. Load source materials onto appropriate editing facility, ensuring correct image and sound are ready for use and that images and sound are synchronised or aligned accurately</li> <li>12. Identify required <i>shots</i> and sequences from source materials and catalogue them in the agreed way</li> <li>13. <i>Log</i> selected edits with reference to <i>time codes</i> and shot descriptions according to enterprise procedures</li> <li>14. Use a batch digitise list to digitise selected sequences according to relevant documentation and consistent with technical and creative requirements</li> <li>15. Create <i>edit decision lists</i> (EDLs) according to instructions from relevant production personnel</li> <li>16. Organise and save selected materials according to overall editing requirements</li> </ol>

ELEMENT	PERFORMANCE CRITERIA
	17. Finalise logging sheets and submit EDLs to relevant production personnel by the agreed deadline
Perform basic edits	18. Use <i>software functions</i> to assemble sequences according to EDLs and within time constraints 19. Review edited sequences to evaluate quality and content and to identify problems 20. Manipulate the editing software to solve identified problems and seek expert advice if required 21. Submit sequences to relevant production personnel for feedback according to enterprise procedures 22. Amend sequences as required and save in appropriate format 23. Ensure source materials, selected materials and back-up copies are stored securely and labelled correctly 24. Complete required documentation, noting variations and issues from original instructions 25. Leave workstation in original or improved condition, ensuring there has been no adverse impact on site

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and organisational skills sufficient to:
  - arrange film, television and interactive media content logically and accurately
  - liaise with relevant production personnel, e.g. editors, directors
  - understand and follow instructions as required
- technical skills sufficient to:
  - edit simple image and audio sequences and segments, including dialogue
  - digitise pre-recorded content, e.g. film, analogue video
  - follow relevant file management protocols for specified operating systems
- self-management skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise
- literacy and numeracy skills sufficient to:
  - identify and label accurately source materials and copies
  - implement and record time codes and timings
  - document image and sound components, e.g. completion of logging sheets

#### Required knowledge

- familiarity with basic picture and sound editing conventions and techniques
- industry knowledge, including:
  - roles and responsibilities of post-production personnel
  - basic understanding of the features and capabilities of facilities and equipment for sound editing and broadcast
  - working knowledge of a range of editing software and equipment
- OHS requirements as they apply to use of computers and keyboards

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• systematic preparation of content segments for editing from source video or film</li> <li>• correct identification and logging of single images, audio grabs and basic sequences</li> <li>• ability to transfer and digitise video and film materials</li> <li>• collaborative approach to work</li> <li>• attention to detail</li> <li>• ability to work to deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a range of pre-recorded films and videos</li> <li>• availability of a range of editing facilities - non-broadcast and broadcast</li> <li>• exposure to a range of computer software for editing and documentation of image and audio</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of material prepared, logged and edited by the candidate in response to instructions received from a supervising editor</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

**EVIDENCE GUIDE**

**assessment**

industry sector, workplace and job role is recommended, for example:

- CUFDIG301A Prepare video assets
- CUFSOU204A Perform basic sound editing
- CUFSOU301A Prepare audio assets.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Technical and creative requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• ADR (additional dialogue recording)</li> <li>• audio levels</li> <li>• break in control track</li> <li>• colour bars</li> <li>• drop-outs</li> <li>• film leaders</li> <li>• graphics</li> <li>• production style</li> <li>• quality of image/sound</li> <li>• rushes</li> <li>• script materials</li> <li>• sequences, e.g.:             <ul style="list-style-type: none"> <li>• vision cuts</li> <li>• sound editing, e.g. dialogue</li> <li>• voice-over</li> <li>• music</li> </ul> </li> <li>• sync marks</li> <li>• tape black</li> <li>• time codes.</li> </ul>
<p><b><i>Productions</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animated productions</li> <li>• commercials</li> <li>• documentaries</li> <li>• feature films</li> <li>• filmed events or performances</li> <li>• music video</li> <li>• pre-recorded television productions</li> <li>• short films</li> <li>• television productions, e.g. music, drama, comedy, variety, sport.</li> </ul>
<p><b><i>Editing</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• computerised data</li> <li>• digital non-linear</li> <li>• film</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• linear</li> <li>• off-line</li> <li>• online</li> <li>• video.</li> </ul>
<i>Production personnel</i> may include:	<ul style="list-style-type: none"> <li>• assistant editor</li> <li>• CGI (computer generated imagery) personnel</li> <li>• designers</li> <li>• director</li> <li>• director of photography</li> <li>• editing suite personnel</li> <li>• editor</li> <li>• floor manager</li> <li>• laboratory personnel</li> <li>• music composer</li> <li>• picture editing personnel</li> <li>• producer</li> <li>• production designer</li> <li>• production manager</li> <li>• sound editing personnel</li> <li>• sound effects personnel</li> <li>• technical director</li> <li>• other technical/specialist staff.</li> </ul>
<i>Source materials</i> may include:	<ul style="list-style-type: none"> <li>• CDs</li> <li>• DVDs</li> <li>• film</li> <li>• graphics</li> <li>• internet</li> <li>• mini disks (MDs)</li> <li>• stills</li> <li>• tape (analogue; camera, digital)</li> <li>• work prints</li> <li>• work tapes.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• assembly order</li> <li>• budgets</li> <li>• call/running sheets</li> <li>• camera reports</li> <li>• computer generated</li> <li>• continuity reports</li> <li>• contracts</li> <li>• EDLs (edit decision lists)</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• fault reports</li> <li>• hire agreements</li> <li>• list of sequences with relevant shot numbers</li> <li>• logging sheets</li> <li>• manually written</li> <li>• manufacture schedules</li> <li>• manufacturer specifications/instructions</li> <li>• marked-up scripts</li> <li>• marked-up transcripts</li> <li>• memos of instruction</li> <li>• operational/project plan</li> <li>• production schedules</li> <li>• scripts</li> <li>• sound reports</li> <li>• sound sheets, e.g.:               <ul style="list-style-type: none"> <li>• time-code log sheets for location sound recordings</li> </ul> </li> <li>• wild-line and sound effects log sheets.</li> </ul>
<i>Medium</i> may include:	<ul style="list-style-type: none"> <li>• computer disk, e.g. CD/DVD</li> <li>• film of any gauge, e.g.:               <ul style="list-style-type: none"> <li>• 16 mm</li> <li>• 35 mm</li> <li>• super 35 mm</li> <li>• 70 mm</li> </ul> </li> <li>• mini disk</li> <li>• sound</li> <li>• video of any format, e.g.:               <ul style="list-style-type: none"> <li>• miniDV</li> <li>• DVCam</li> <li>• Betacam</li> <li>• SP and digital Betacam</li> <li>• VHS/SVHS</li> </ul> </li> <li>• vision.</li> </ul>
<i>Storage and memory</i> may include:	<ul style="list-style-type: none"> <li>• disk space (hard, optical, floppy)</li> <li>• film duplicates</li> <li>• flash memory, e.g. USB drives</li> <li>• solid state, e.g. RAM.</li> </ul>
<i>Formats</i> may include:	<ul style="list-style-type: none"> <li>• audio/sound, e.g.:               <ul style="list-style-type: none"> <li>• DAT</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• AIFF</li> <li>• WAV</li> <li>• MIDI</li> <li>• MP3</li> <li>• magnetic tape</li> <li>• computerised data</li> <li>• film of any gauge</li> <li>• graphics</li> <li>• stills</li> <li>• video of any format, e.g.:               <ul style="list-style-type: none"> <li>• DVC</li> <li>• VHS</li> <li>• Beta</li> <li>• HDTV</li> <li>• AVI</li> <li>• MPEG.</li> </ul> </li> </ul>

<b>Co-requisite units</b>		

## CUFPOS401A Edit screen content for fast turnaround

### Modification History

Not applicable.

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to edit screen content for fast turnaround using non-linear editing facilities.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
-------------------------------	--

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>Editors with a reasonable level of experience apply the skills and knowledge described in this unit. Using non-linear digital facilities to edit screen content, editors occasionally require basic film handling skills.</p> <p>Primarily they are involved in day-to-day editing for daily programs such as news and current affairs. At times they work on more complex programs of a formatted or routine nature. They may also be involved in fast turnaround editing of rushes for feature films.</p> <p>Editors at this level are usually answerable to a senior editor or producer/reporter.</p> <p>More complex skills associated with editing a comprehensive range of film, television material are covered in:</p> <ul style="list-style-type: none"> <li>• CUFPOS501A Edit complex screen productions.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Prepare for edit	<ol style="list-style-type: none"> <li>1. Clarify editing requirements in consultation with relevant <i>production personnel</i> and with reference to <i>documentation</i> as required</li> <li>2. Check operation of <i>editing equipment</i> and <i>software</i>, and ensure sufficient supplies of <i>consumables</i> are available</li> <li>3. Identify and prepare <i>source materials</i> for off-line and online <i>editing</i></li> <li>4. Assess materials to be edited for required <i>technical and creative criteria</i> in consultation with relevant production personnel</li> <li>5. Endeavour to visualise completed edit with reference to available materials</li> </ol>
Commence editing process	<ol style="list-style-type: none"> <li>6. Digitise and transfer materials to suitable <i>format</i>, ensuring compatibility with editing equipment and monitoring capture for sound and image quality</li> <li>7. Where appropriate, create an <i>edit decision list</i> (EDL) subject to time constraints, noting accurately in and out points for each edit</li> <li>8. Maintain accurate documentation of editing instructions for use in all stages of post-production as required</li> <li>9. Prioritise and select materials in terms of their relevance to meet <i>production requirements</i></li> <li>10. Arrange and present selected material to retain the intended meaning of words and images</li> <li>11. Analyse and plan how preselected <i>additional materials</i> are to be used to clarify and enhance final edit</li> </ol>
Assemble vision and sound	<ol style="list-style-type: none"> <li>12. Check technical and creative criteria with relevant production personnel to ensure integrity of edit</li> <li>13. Assemble content in a way that produces coherent images and sound according to standard <i>editing conventions</i></li> <li>14. Ensure that assembled materials meet time requirements for <i>productions</i>, as well as technical and creative criteria for transmission</li> <li>15. Insert transitions, special effects and preselected additional materials as required</li> <li>16. Make appropriate compromise between content and quality in order to meet time restrictions</li> <li>17. Review assembled online or off-line edit with relevant production personnel</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	18. Implement changes as specified and finalise edit to meet deadlines
Finalise edits	19. Complete necessary documentation and file/archive source materials according to enterprise procedures 20. Report problems in completing edits to meet production requirements 21. Provide information required for successful transmission of edited material 22. Evaluate own performance against technical and creative criteria and discuss with colleagues where appropriate

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and organisational skills sufficient to:
  - arrange screen content logically and accurately
  - work collaboratively with production personnel, e.g. editors, directors
  - understand and carry out instructions and creative directions as required
  - utilise relevant file management protocols for specified operating systems
- initiative and enterprise in the context of:
  - visualising and interpreting basic story-lines in a creative way
  - troubleshooting and solving problems as they arise during the editing process
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance as required
- technical skills in the context of:
  - editing vision and sound for same-day programs to tight deadlines, e.g. news, current affairs
  - editing content according to a broad brief, e.g. verbal brief
  - digitising pre-recorded content, e.g. film, analogue video
- literacy and numeracy skills sufficient to:
  - identify and label accurately source materials and copies
  - implement and record time codes and timings
  - document image and sound components, e.g. completion of logging sheets

#### Required knowledge

- current vision and sound editing techniques and application of different editing methods, especially when fast turnaround is required
- thorough knowledge of a range of editing software and equipment
- filmmaking conventions, such as camera shots, angles and viewpoint
- OHS requirements as they relate to working on computers for periods of time
- industry knowledge, including:
  - roles and responsibilities of production and post-production team members
  - sound understanding of the creative and technical elements of a range of film and media productions
  - features of industry-standard post-production facilities and equipment for broadcast and non-broadcast
  - broadcast language and terminology

<b>REQUIRED SKILLS AND KNOWLEDGE</b>

- |   |
|---|
| <ul style="list-style-type: none"><li>• issues and challenges that arise in the context of editing vision and sound content for fast turnaround</li></ul> |
|---|

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• effective editing of a range of vision and sound content that: <ul style="list-style-type: none"> <li>• meets production requirements</li> <li>• takes account of technical and resource constraints</li> </ul> </li> <li>• ability to edit material within tight time constraints</li> <li>• collaborative approach to work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to real-time editing opportunities, together with a reasonable variety of assignments</li> <li>• access to a selection of editing software and equipment as listed in the range statement</li> <li>• opportunities to work with a range of vision and sound formats as listed in the range statement</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a selection of material edited by the candidate for fast turnaround</li> <li>• observation of the candidate editing material for fast turnaround</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>

**EVIDENCE GUIDE**

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFDIG301A Prepare video assets
- CUFSOU301A Prepare audio assets
- CUSSOU403A Perform advanced sound editing.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Production personnel*** may include:

- assistant editor
- camera operators
- CGI (computer generated imagery) personnel
- designers
- director
- floor manager
- laboratory staff
- producer
- production designer
- production manager
- senior editor
- sound editing personnel
- sound effects personnel
- technical director
- other technical/specialist staff.

***Documentation*** may include:

- assembly order
- camera reports
- computer generated
- contracts
- EDLs (edit decision lists)
- fault reports
- hire agreements
- list of sequences with relevant shot numbers
- manually written
- manufacturer specifications/instructions
- marked-up scripts
- marked-up transcripts
- memos of instruction
- operational/project plan
- production schedules
- scripts
- sound reports
- sound sheets, including

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• time-code log sheets for location sound recordings</li> <li>• wild-line and sound effects log sheets.</li> </ul>
<i>Editing equipment</i> may include:	<ul style="list-style-type: none"> <li>• computers</li> <li>• digital non-linear, e.g. Mac G5, Avid</li> <li>• editing bins</li> <li>• linear, e.g. tape to tape</li> <li>• off-line</li> <li>• online</li> <li>• pic sync</li> <li>• rewinders</li> <li>• synchronisers</li> <li>• viewers.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• after effects package</li> <li>• computer programs, e.g. Final Cut Pro</li> <li>• EDL software</li> <li>• freeware</li> <li>• Illustrator</li> <li>• Photoshop</li> <li>• shareware.</li> </ul>
<i>Consumables</i> may include:	<ul style="list-style-type: none"> <li>• computer disks</li> <li>• cotton gloves</li> <li>• film cans</li> <li>• film leader</li> <li>• labels</li> <li>• sound tapes of any format, e.g.: <ul style="list-style-type: none"> <li>• DAT</li> <li>• cartridge</li> <li>• compact audio cassette</li> <li>• reel to reel</li> </ul> </li> <li>• spare videotapes of any format, e.g.: <ul style="list-style-type: none"> <li>• DVC</li> <li>• Beta</li> <li>• VHS</li> <li>• mini-DVD</li> <li>• HDTV.</li> </ul> </li> </ul>
<i>Source materials</i> may include:	<ul style="list-style-type: none"> <li>• audio tapes</li> <li>• camera tapes</li> <li>• CDs</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• DVDs</li> <li>• film</li> <li>• graphics</li> <li>• internet</li> <li>• stills</li> <li>• work prints</li> <li>• work tapes.</li> </ul>
<i>Editing</i> may include:	<ul style="list-style-type: none"> <li>• computerised data</li> <li>• digital non-linear</li> <li>• film</li> <li>• linear</li> <li>• off-line</li> <li>• online</li> <li>• video.</li> </ul>
<i>Technical and creative criteria</i> may include:	<ul style="list-style-type: none"> <li>• ADR (additional dialogue recording)</li> <li>• audio levels</li> <li>• break in control track</li> <li>• broadcast quality</li> <li>• colour bars</li> <li>• drop-outs</li> <li>• film leaders</li> <li>• graphics</li> <li>• non-broadcast quality</li> <li>• production style</li> <li>• quality of image/sound</li> <li>• rushes</li> <li>• script materials</li> <li>• sequences, e.g.: <ul style="list-style-type: none"> <li>• vision cuts</li> <li>• sound editing, e.g. dialogue</li> <li>• voice-over</li> <li>• music</li> </ul> </li> <li>• shots, e.g.: <ul style="list-style-type: none"> <li>• wide shots</li> <li>• mid shot</li> <li>• close-ups and medium close-ups</li> <li>• two shot</li> <li>• long shot</li> <li>• wide-angle</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• high-angle</li> <li>• low-angle</li> <li>• bird's eye</li> <li>• pans</li> <li>• tilts</li> <li>• cutaways</li> <li>• two shots</li> <li>• noddy</li> <li>• reverses</li> <li>• sync marks</li> <li>• tape black</li> <li>• time codes.</li> </ul>
<i>Formats</i> may include:	<ul style="list-style-type: none"> <li>• audio/sound, e.g.: <ul style="list-style-type: none"> <li>• DAT</li> <li>• AIFF</li> <li>• WAV</li> <li>• MIDI</li> <li>• magnetic tape</li> </ul> </li> <li>• computerised data</li> <li>• film of any gauge</li> <li>• graphics</li> <li>• stills</li> <li>• video of any format, e.g.: <ul style="list-style-type: none"> <li>• DVC</li> <li>• VHS</li> <li>• Beta</li> <li>• HDTV.</li> </ul> </li> </ul>
<i>Editing decisions</i> may include:	<ul style="list-style-type: none"> <li>• action</li> <li>• composition</li> <li>• coverage</li> <li>• dialogue</li> <li>• frame ratio and rate</li> <li>• framing</li> <li>• glitches, faults, drop-outs</li> <li>• music</li> <li>• narration</li> <li>• pacing</li> <li>• script changes</li> <li>• shot composition</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• soundtrack</li> <li>• special effects</li> <li>• timing</li> <li>• voice-overs.</li> </ul>
<i>Production requirements</i> may include:	<ul style="list-style-type: none"> <li>• ADR (additional dialogue recording)</li> <li>• aesthetic</li> <li>• animation</li> <li>• atmosphere tracks</li> <li>• durations</li> <li>• effects</li> <li>• graphics</li> <li>• music</li> <li>• production titles</li> <li>• technical</li> <li>• time code, e.g.:               <ul style="list-style-type: none"> <li>• SMPTE/EBU</li> <li>• burned-in code</li> <li>• keyed-in code</li> </ul> </li> <li>• voice-overs.</li> </ul>
<i>Additional materials</i> may include:	<ul style="list-style-type: none"> <li>• archival footage:               <ul style="list-style-type: none"> <li>• sound</li> <li>• image</li> </ul> </li> <li>• file images</li> <li>• stock footage:               <ul style="list-style-type: none"> <li>• sound</li> <li>• image.</li> </ul> </li> </ul>
<i>Editing conventions</i> may include:	<ul style="list-style-type: none"> <li>• action cutting (before, during and after the action)</li> <li>• consistency of style</li> <li>• continuity (crossing the line, eyeline)</li> <li>• cut away</li> <li>• cut in</li> <li>• cut out</li> <li>• fades and dissolves</li> <li>• freeze frame</li> <li>• jump cut</li> <li>• montage.</li> </ul>
<i>Productions</i> may include:	<ul style="list-style-type: none"> <li>• animated productions</li> <li>• commercials</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• documentaries</li> <li>• feature films</li> <li>• features - television and film</li> <li>• filmed events or performances</li> <li>• live television</li> <li>• music video</li> <li>• news and current affairs</li> <li>• pre-recorded television productions</li> <li>• short films</li> <li>• television productions, e.g.: <ul style="list-style-type: none"> <li>• music</li> <li>• drama</li> <li>• comedy</li> <li>• variety</li> <li>• sport.</li> </ul> </li> </ul>

## CUFPOS402A Manage media assets

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to manage media assets for screen and media productions and projects.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The skills and knowledge outlined in this unit are typically applied by a person working in a large enterprise on projects or productions that require a wide range of media assets. They work directly with asset creators (audio, video, graphics) to ensure that the asset management system accommodates their needs.</p> <p>Though reporting to a producer or manager, a person in this role works with a fair degree of autonomy. They are responsible for setting up the conventions for file naming, sourcing, sorting and storing formal documents and media assets, and recording project or production details. They also set up systems to manage these assets effectively. The systems may need to be built by other personnel within the enterprise or production.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Establish systematic procedures for managing content and outputs	<ol style="list-style-type: none"> <li>1. Confirm media asset management requirements with <i>relevant personnel</i></li> <li>2. Set up file naming system for <i>projects</i> based on standard conventions and protocols</li> <li>3. Source and review storage repository and back-up systems appropriate for the task</li> <li>4. Set up processes to record <i>information</i> required for tracking <i>formal documents</i> and <i>media assets</i></li> <li>5. Establish conventions for recording progress and locations of media assets</li> <li>6. Develop strategy for tracking and recording media assets</li> <li>7. Brief team members on the media asset management system, including the process for alerting relevant personnel to problems encountered as the system is implemented</li> </ol>
Record information about documents and media assets	<ol style="list-style-type: none"> <li>8. Document sources of media assets according to established procedures</li> <li>9. Document progress and details of a range of outputs</li> <li>10. Maintain records of technical information on work in progress</li> <li>11. Maintain copyright and permissions information</li> <li>12. Track media assets and record information according to established system</li> <li>13. Maintain version control and identify status of interim products, prototypes and other relevant media assets</li> <li>14. Respond to and resolve problems encountered as the system is implemented</li> </ol>
Plan for project completion and storage	<ol style="list-style-type: none"> <li>15. Confirm schedule for final sign-off with relevant personnel</li> <li>16. Determine requirements for archiving</li> <li>17. Confirm procedures for finalisation of projects</li> </ol>
Finalise project	<ol style="list-style-type: none"> <li>18. File and index formal documents according to agreed project or enterprise procedures</li> <li>19. File and index scripts according to agreed project or enterprise procedures</li> <li>20. Archive media assets in established system repository system according to industry practice</li> <li>21. Ensure appropriate access by relevant personnel to formal documents and media assets developed by</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	projects 22. Review the effectiveness of the media asset management system and note areas for future improvement

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret project briefs
  - prepare and maintain media asset management documentation
  - provide verbal and written briefings to team members
  - work collaboratively as a member of a production team
  - provide advice and support to team members
- technical skills sufficient to track, maintain, record and archive information using accepted industry protocols
- initiative and flexibility in the context of anticipating and resolving problems with a media asset management system
- self-management and planning skills sufficient to:
  - set up and administer a file naming system
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance as required

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members in the relevant industry sector
  - sound understanding of the relationship between the technical and creative aspects and requirements of screen and media projects
  - issues and challenges that arise in the context of implementing media asset management systems
  - copyright and permissions
  - file and resource repository systems
  - industry or enterprise standard naming conventions
- OHS requirements as they relate to working on computers for periods of time

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• proficient use of information tracking and repository systems</li> <li>• accurate record keeping, updating and tracking</li> <li>• attention to detail</li> <li>• ability to work effectively as a member of a production team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to industry-standard technology and repository systems that permit file and resource management</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of at least two media asset management systems set up and managed by the candidate</li> <li>• written or verbal questioning to test knowledge of the processes followed to manage media assets and the respective roles and responsibilities of team members.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFDIG301A Prepare video assets</li> <li>• CUFDIG303A Produce and prepare photo images</li> <li>• CUFSSOU301A Prepare audio assets.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant personnel*** may include:

- artists
- author
- designers
- media asset creators
- producer
- programmer
- project manager
- supervisor
- other specialist creative and administrative staff.

***Projects*** may include or be included in:

- aspects or sections of film/video production:
  - feature
  - documentary
  - short film and/or video
  - animations
  - commercials
  - live or pre-recorded performances
  - music video
  - television production, e.g. music, drama, comedy, variety, sport
  - live or pre-recorded television productions
- e-commerce
- educational product
- game
- information product
- promotional product
- training product
- website.

***Information*** about assets may include:

- asset details
- copyright
- date of transfer
- default technical settings

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• reusability</li> <li>• transfer details</li> <li>• versions</li> <li>• other metadata as required.</li> </ul>
<i>Formal documents</i> may include:	<ul style="list-style-type: none"> <li>• agreed terms and conditions</li> <li>• assets rights clearances</li> <li>• confidentiality agreements</li> <li>• contracts with subcontractors</li> <li>• copyright permissions</li> <li>• final proposal</li> <li>• intermediate and final sign-offs</li> <li>• software licences</li> <li>• technical information.</li> </ul>
<i>Media assets</i> may include:	<ul style="list-style-type: none"> <li>• 3D models</li> <li>• animations (2D, 3D)</li> <li>• audio</li> <li>• code and scripts</li> <li>• graphics</li> <li>• photographs</li> <li>• text documents (PDF, MSWord, PowerPoint)</li> <li>• videos</li> <li>• other assets as required by the project.</li> </ul>

## CUFPPM404A Create storyboards

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to create storyboards.</p> <p>The creation of storyboards is a critical skill in the design and development of a broad range of digital content, including video, film, animation and interactive media.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Depending on the type and scale of production, a range of people could be responsible for creating storyboards, including storyboard artists, designers, producers and information architects. In the film and television industry, people creating storyboards work closely with directors to visualise productions.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Plan storyboards	<ol style="list-style-type: none"> <li>1. In consultation with <i>relevant personnel</i>, clarify storyboard requirements for <i>productions</i> with reference to scripts and stories</li> <li>2. Identify <i>factors</i> that affect type of storyboard to be created</li> <li>3. Contribute ideas in pre-production meetings to help refine storyboard requirements</li> <li>4. Research and select suitable amount of <i>storyboard tools</i> for a given purpose</li> <li>5. Obtain sign-off from relevant personnel on the type of storyboard to be created</li> </ol>
Draft storyboards	<ol style="list-style-type: none"> <li>6. Break down content, scripts and stories into <i>frames</i></li> <li>7. Specify <i>storyboard elements</i> for each frame</li> <li>8. Specify the logical linear or non-linear frame sequence, showing the connection between each frame</li> <li>9. Provide <i>descriptions</i> for each frame</li> <li>10. Seek feedback on work in progress from relevant personnel and incorporate ideas and feedback as appropriate</li> <li>11. Ensure draft storyboards are clear and legible and show sufficient detail for production teams to use</li> </ol>
Finalise storyboards	<ol style="list-style-type: none"> <li>12. Present draft storyboards to relevant personnel for discussion and feedback</li> <li>13. Refine storyboards as required to incorporate feedback</li> <li>14. Ensure that final storyboards present accurate visual interpretations of scripts, stories or text and meet all agreed specifications</li> <li>15. Make back-up copies of storyboards as required according to organisational procedures</li> <li>16. Submit storyboards to relevant personnel by agreed deadlines</li> <li>17. Review the process of creating storyboards and note areas for improvement</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - interpret scripts and specifications
  - work collaboratively in a team environment
  - present storyboards to team members for discussion or implementation
  - respond constructively to feedback received from other team members
- analytical skills sufficient to break down content, stories and scripts into discrete elements
- technical skills sufficient to use storyboard techniques
- initiative sufficient to visualise and interpret creative concepts
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members
  - sound understanding of the artistic elements of a production for which a storyboard is being created
  - issues and challenges that arise when creating storyboards
- drawing techniques, including drawing to scale
- OHS standards as they relate to working for periods of time on computers

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• creation of clear and logical storyboards that meet specified requirements</li> <li>• ability to visualise creative concepts</li> <li>• ability to work effectively as a member of a production team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to scripts, stories or texts that can be used as the basis for creating storyboards</li> <li>• access to current industry-standard software as listed in the range statement</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of at least two storyboards created by the candidate</li> <li>• observation of a candidate presenting his/her storyboard to team members and explaining how it meets agreed requirements</li> <li>• written or oral questioning to test knowledge of the process followed to create a storyboard and the respective roles and responsibilities of team members.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"><li>• BSBCRT402A Collaborate in a creative process</li><li>• CUFDIG402A Design user interfaces</li><li>• CUFDIG502A Design web environments</li><li>• CUFDIG503A Design e-learning resources</li><li>• CUFDIG504A Design games</li><li>• CUFDIG505A Design information architecture</li><li>• CUFDIG506A Design interaction</li><li>• CUFDIG507A Design digital simulations.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Relevant personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• asset creators</li> <li>• authors</li> <li>• clients</li> <li>• content experts</li> <li>• directors</li> <li>• graphic designers</li> <li>• information architects</li> <li>• navigation designers</li> <li>• other writers</li> <li>• producers</li> <li>• programmers</li> <li>• scriptwriters</li> <li>• user interface designers</li> <li>• other technical/specialist staff.</li> </ul>
<p><b><i>Productions</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animated films</li> <li>• animations</li> <li>• commercials</li> <li>• feature films</li> <li>• interactive media products, such as:             <ul style="list-style-type: none"> <li>• e-learning products</li> <li>• websites</li> <li>• games</li> <li>• promotional products</li> <li>• information products</li> </ul> </li> <li>• music videos</li> <li>• short films</li> <li>• television productions.</li> </ul>
<p><b><i>Factors</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animation requirements</li> <li>• availability of personnel</li> <li>• availability of resources</li> <li>• budget</li> <li>• delivery platform, including:</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• internet</li> <li>• CD/DVD</li> <li>• video</li> <li>• film</li> <li>• games console</li> <li>• kiosk</li> <li>• mobile telephone</li> <li>• personal digital assistant (PDA)</li> <li>• print media</li> <li>• graphic requirements</li> <li>• length of script or story</li> <li>• style of production, including:               <ul style="list-style-type: none"> <li>• comic</li> <li>• drama</li> <li>• educational</li> <li>• light entertainment</li> </ul> </li> <li>• target audience</li> <li>• timelines.</li> </ul>
<i>Storyboard tools</i> may include:	<ul style="list-style-type: none"> <li>• digital software, such as:               <ul style="list-style-type: none"> <li>• PowerPoint</li> <li>• Inspiration</li> <li>• StoryBoard Artist Studio</li> <li>• StoryBoard Pro</li> </ul> </li> <li>• paper and cards</li> <li>• pen and pencil</li> <li>• storyboard sheets</li> <li>• templates.</li> </ul>
<i>Frames</i> may include:	<ul style="list-style-type: none"> <li>• key frames for animation</li> <li>• moments for film and video</li> <li>• pages for websites</li> <li>• scenes</li> <li>• screens for interactive media</li> <li>• shots.</li> </ul>
<i>Storyboard elements</i> may include:	<ul style="list-style-type: none"> <li>• actor's movement</li> <li>• backgrounds</li> <li>• camera angles</li> <li>• camera shots, such as:               <ul style="list-style-type: none"> <li>• extreme close-up</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• close-up</li> <li>• medium shot</li> <li>• long shot</li> <li>• extreme long shot</li> <li>• decisions</li> <li>• directions</li> <li>• frame composition</li> <li>• lighting</li> <li>• props</li> <li>• sets.</li> </ul>
<p><i>Descriptions</i> for frames may include:</p>	<ul style="list-style-type: none"> <li>• dialogue</li> <li>• duration</li> <li>• media</li> <li>• narration</li> <li>• script elements</li> <li>• sequence number</li> <li>• shot composition, such as:               <ul style="list-style-type: none"> <li>• static</li> <li>• zoom</li> <li>• tilt</li> <li>• pan</li> <li>• dolly</li> <li>• track</li> </ul> </li> <li>• sound effects</li> <li>• speech bubbles</li> <li>• text content</li> <li>• transitions, such as:               <ul style="list-style-type: none"> <li>• simple cut</li> <li>• black</li> <li>• fade in and fade out.</li> </ul> </li> </ul>

## CUFSOU204A Perform basic sound editing

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to for basic digital sound editing.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Assistant sound editors and production personnel in the community broadcasting sector apply the skills and knowledge described in this unit. They are responsible for preparing, organising and digitally editing relatively simple sound sequences or programs for radio, television, film and interactive media.</p> <p>They are expected to contribute to creative outcomes, including selection and acquisition of sound materials.</p> <p>In a production house environment, they typically work under the supervision of a picture editor or senior sound editor, and are often involved in editing both sound and vision. Combined editing skills at a basic level are covered in:</p> <ul style="list-style-type: none"> <li>• CUFPOS201A Perform basic vision and sound editing.</li> </ul> <p>More complex skills associated with editing sound, including dialogue, are covered in:</p> <ul style="list-style-type: none"> <li>• CUSSOU403A Perform advanced sound editing.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Prepare for editing sound	<ol style="list-style-type: none"> <li>1. In consultation with relevant <i>production personnel</i>, clarify editing requirements, including creative and technical expectations of <i>productions</i></li> <li>2. Obtain and label <i>source materials</i> and <i>additional materials</i> as required and keep them in a safe, clean location with appropriate <i>documentation</i></li> <li>3. Organise transfer of source materials to appropriate equipment where necessary, ensuring sufficient <i>digital storage</i> capacity is available</li> <li>4. Check <i>editing equipment</i> is operational and suited to the designated editing processes and according to enterprise procedures</li> <li>5. Organise <i>additional equipment</i> and <i>consumables</i> needed to minimise interruptions during the editing process</li> <li>6. If required, obtain sign-off to proceed with edits</li> </ol>
Assemble sequences for editing	<ol style="list-style-type: none"> <li>7. Digitise <i>audio content</i> and additional sound materials in the specified <i>format</i>, ensuring format is compatible with available <i>software</i> and editing equipment</li> <li>8. Monitor digital output and arrange for problems to be fixed where necessary</li> <li>9. Identify <i>sound edit</i> positions using appropriate documentation and optimise quality where applicable</li> <li>10. Log and assess <i>sound sequences</i> according to <i>production requirements</i> and arrange digital back-up copies as insurance against editing errors</li> <li>11. Consider how materials may be edited efficiently to meet <i>technical and creative criteria</i></li> </ol>
Edit sound sequences	<ol style="list-style-type: none"> <li>12. Edit audio sequences according to production requirements and accurately document <i>details</i> of each edited sound sequence</li> <li>13. Generate an appropriate track list to facilitate subsequent stages of sound mixing processes</li> <li>14. Accurately chart positions and durations of sound sequences, noting requirements for transitions where applicable</li> <li>15. Apply effects and digital enhancements to maximise creative outcomes of sound sequences according to production requirements</li> <li>16. <i>Manipulate editing software and equipment</i> to produce</li> </ol>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>required sequences and to resolve identified problems</p> <p>17. Seek feedback on work in progress from relevant production personnel and refine edits as required</p> <p>18. Submit final edits by the agreed deadline in accordance with enterprise procedures</p>
Finalise sound edits	<p>19. Archive edited audio files and complete associated documentation according to enterprise procedures</p> <p>20. Advise relevant production personnel of editing equipment requiring maintenance and leave workstation in original or improved condition</p> <p>21. Participate in post-production debriefing sessions as required</p> <p>22. Evaluate own performance against technical and creative criteria and discuss with colleagues where appropriate</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, teamwork and organisational skills sufficient to:
  - arrange sound media logically and accurately
  - liaise with relevant production personnel
  - understand and follow instructions
- technical skills sufficient to:
  - edit a range of audio sequences and segments
  - digitise pre-recorded content, e.g. digital and analogue audio, sound effects
  - change audio from one format to another
  - follow relevant file management protocols for specified operating systems
  - identify faults that occur in audio production environments
- initiative and enterprise in the context of editing sound to meet creative production requirements
- aural discrimination skills in the context of listening critically to, and enhancing the quality of, sound elements and sequences
- self-management skills sufficient to:
  - prioritise work tasks and meet deadlines
  - seek expert assistance when problems arise
- literacy and numeracy skills sufficient to:
  - identify and label accurately source materials and copies
  - read and interpret sound documentation and plans
  - implement and record codes and timings
  - document sound components, e.g. maintenance of logging sheets

#### Required knowledge

- familiarity with basic sound editing conventions, practices and techniques
- editing and audio terminology
- understanding of the roles and skills associated with other post-production personnel
- sound editing software and equipment for both broadcast and non-broadcast
- varied characteristics of sound in a range of environments
- OHS standards in relation to:
  - using a computer and keyboard for periods of time
  - observing safe noise levels

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• a range of digitally edited sound sequences that meet production requirements</li> <li>• collaborative approach to work</li> <li>• attention to detail</li> <li>• ability to work to deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a range of pre-recorded sound footage</li> <li>• access to industry-current sound editing software as listed in the range statement</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a range of sound sequences edited by the candidate in response to instructions received from a supervising editor</li> <li>• observation of the candidate preparing and editing sound sequences</li> <li>• written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFPOS201A Perform basic vision and sound</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>editing</p> <ul style="list-style-type: none"><li>• CUFSOU301A Prepare audio assets</li><li>• CUFSOU302A Compile audio material for broadcast.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Production personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• assistant editor</li> <li>• broadcasters</li> <li>• CGI (computer generated imagery) personnel</li> <li>• director</li> <li>• musicians</li> <li>• producer</li> <li>• production manager</li> <li>• sound designer</li> <li>• sound editor</li> <li>• sound effects personnel</li> <li>• sound engineer</li> <li>• sound recording studio personnel</li> <li>• station manager</li> <li>• supervisor</li> <li>• technical director</li> <li>• volunteers coordinator</li> <li>• other technical/specialist personnel.</li> </ul>
<p><b><i>Productions</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animated productions</li> <li>• CD/DVD</li> <li>• commercials</li> <li>• documentaries</li> <li>• feature films</li> <li>• features - television and film</li> <li>• filmed events or performances</li> <li>• interactive media products</li> <li>• music</li> <li>• music videos</li> <li>• news and current affairs</li> <li>• podcasts</li> <li>• promotional trailers</li> <li>• radio broadcasts</li> <li>• short films</li> <li>• television programs, e.g.:</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• music</li> <li>• drama</li> <li>• comedy</li> <li>• variety</li> <li>• sport</li> <li>• websites.</li> </ul>
<i>Source materials</i> may include:	<ul style="list-style-type: none"> <li>• archival recordings</li> <li>• atmosphere</li> <li>• CD/DVD recordings</li> <li>• foley effects</li> <li>• live captured effects</li> <li>• music</li> <li>• SFX (sound effects)</li> <li>• synthesised sound</li> <li>• voice recordings/dialogue.</li> </ul>
<i>Additional materials</i> may include:	<ul style="list-style-type: none"> <li>• archival sound footage</li> <li>• file images</li> <li>• stock sound footage.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• assembly order</li> <li>• computer generated</li> <li>• duration print-outs</li> <li>• EDLs (edit decision lists)</li> <li>• fault reports</li> <li>• hire agreements</li> <li>• list of sequences with relevant shot numbers</li> <li>• log sheets for location</li> <li>• manually written</li> <li>• marked-up scripts</li> <li>• marked-up transcripts</li> <li>• memos of instruction</li> <li>• operational/project plan</li> <li>• production schedules</li> <li>• scripts</li> <li>• sound recordings</li> <li>• sound/audio reports</li> <li>• wild-line and sound effects log sheets.</li> </ul>

## CUFSOU301A Prepare audio assets

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to prepare audio assets for inclusion in interactive media.  No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>The size of an enterprise or project determines who undertakes the role described in this unit. In a large-scale environment, the person responsible for this task would typically be supervised by an audio asset creator or audio engineer and an audio programmer or interactive media author.</p> <p>In a radio station, the prime focus of the task involves converting radio programs into podcast material or in a form appropriate to streaming or downloading, and this may be a dedicated role under the supervision of a producer.</p> <p>In a smaller enterprise or project, an audio programmer, interactive author or audio/sound engineer would absorb this task into their role.</p> <p>In all cases, they are collaborating closely with other team members.</p> <p>Skills associated with other aspects of audio/sound production at this level are covered in:</p> <ul style="list-style-type: none"> <li>• CUSSOU201A Assist with sound recordings</li> <li>• CUFSOU204A Perform basic sound editing.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify audio assets	<ol style="list-style-type: none"> <li>1. Obtain analogue or digital sources of audio</li> <li>2. Identify the <i>source file formats</i></li> <li>3. Identify the output <i>purpose, destination</i> and <i>platform</i></li> <li>4. Discuss with <i>relevant personnel</i> the required <i>output file format</i> and <i>audio codecs</i> for specified bandwidths</li> <li>5. Discuss with relevant personnel the appropriate <i>audio encoding software</i></li> </ol>
Prepare audio assets	<ol style="list-style-type: none"> <li>6. Open appropriate audio encoding software and load audio file</li> <li>7. Eliminate or treat defects on sound recordings</li> <li>8. Equalise sound output levels where necessary</li> <li>9. Ensure duration of audio sequences meets that required by the specification, and adjust if necessary</li> <li>10. Determine and apply appropriate audio codecs</li> <li>11. Batch optimise audio files where possible</li> <li>12. Save files in appropriate output file format using standard naming conventions</li> </ol>
Package audio assets	<ol style="list-style-type: none"> <li>13. Assign <i>metadata tags</i> if required</li> <li>14. Group files logically in folder system using standard naming conventions</li> <li>15. Store in share drive or repository for production team access</li> </ol>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and literacy skills sufficient to interpret and clarify written or verbal instructions
- ability to work as a member of a production team, both independently on assignment and under direction
- technical skills sufficient to:
  - use audio software to prepare audio sequences for inclusion in interactive media
  - manage files using standard naming conventions
  - apply appropriate metadata tags to describe files
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise

#### Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
  - basic understanding of the relationship between the technical and creative aspects and requirements of interactive media projects
  - features of a range of delivery platforms
  - basic understanding of what happens when audio files are compressed for inclusion in interactive media products
  - appropriate codecs for various platforms and destinations
  - digital audio source and output formats
  - equalisation techniques
- techniques for saving and preparing digital audio output to optimise file size
- OHS standards as they relate to working for periods of time on computers
- OHS principles of safe listening (including safeguards against hearing loss)

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparation of a range of audio sequences to be included in interactive media products that meet appropriate technical specifications</li> <li>• proficient use of audio encoding software.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to industry-current audio encoding software</li> <li>• access to appropriate learning and assessment support when required</li> <li>• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of audio assets prepared by the candidate on a number of occasions</li> <li>• written or verbal questioning to test knowledge of codecs for various platforms and understanding of file compression.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFDIG301A Prepare video assets.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Source file formats</i> may include:	<ul style="list-style-type: none"> <li>• WAV</li> <li>• AIFF</li> <li>• AU</li> <li>• MP3</li> <li>• WMA</li> <li>• AAC (Apple lossless)</li> <li>• OGG.</li> </ul>
<i>Purposes</i> may include:	<ul style="list-style-type: none"> <li>• audio sequences, e.g.:             <ul style="list-style-type: none"> <li>• SFX (sound effects)</li> <li>• music</li> <li>• foley</li> <li>• atmospherics</li> <li>• dialogue</li> <li>• additional dialogue, e.g. rerecorded and narration</li> </ul> </li> <li>• audio sequences incorporated into a:             <ul style="list-style-type: none"> <li>• website</li> <li>• podcast</li> <li>• game</li> <li>• learning object</li> <li>• interactive application</li> <li>• animation.</li> </ul> </li> </ul>
<i>Destinations</i> may include:	<ul style="list-style-type: none"> <li>• computer-based playback software, e.g. iTunes</li> <li>• downloading server</li> <li>• internet audio players, e.g.:             <ul style="list-style-type: none"> <li>• Quicktime</li> <li>• Windows Media Player</li> <li>• RealPlayer</li> </ul> </li> <li>• progressive downloading (buffering) server</li> <li>• streaming server.</li> </ul>
<i>Platforms</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• digital audio players (e.g. iPod, MP3)</li> <li>• DVD</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• PDA (personal digital assistant).</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• audio engineer</li> <li>• clients</li> <li>• producer</li> <li>• programmers and technical support people</li> <li>• supervisor</li> <li>• other specialist creative and administrative personnel as appropriate.</li> </ul>
<i>Output file formats</i> include:	<ul style="list-style-type: none"> <li>• AAC (advanced audio coding)</li> <li>• AMR-NB</li> <li>• Apple lossless</li> <li>• MP3</li> <li>• RAM</li> <li>• WMA.</li> </ul>
<i>Audio codecs</i> may include:	<ul style="list-style-type: none"> <li>• bit depth</li> <li>• bit sampling rates</li> <li>• mono or stereo</li> <li>• standardised and preset codecs.</li> </ul>
<i>Audio encoding software</i> may include:	<ul style="list-style-type: none"> <li>• audio editing tools, e.g.: <ul style="list-style-type: none"> <li>• Audacity</li> <li>• Adobe Audition</li> <li>• Pro Tools</li> </ul> </li> <li>• specialised audio compression tools.</li> </ul>
<i>Metadata tags</i> may include:	<ul style="list-style-type: none"> <li>• album</li> <li>• artist</li> <li>• defaults</li> <li>• description</li> <li>• episode</li> <li>• resolution</li> <li>• track</li> <li>• version.</li> </ul>

<b>Co-requisite units</b>		

## CUSSOU302A Record and mix a basic music demo

### Modification History

Release	Comments
Release 2	Created to fix formatting errors only. Released with CUS09 Music Training Package version 1.2

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake the technical side of making a basic music demo. There are two stages to the process - making a multi-track recording of the music performance and then mixing the recording down to a stereo format. An ability to work collaboratively with musicians is essential, together with an ability to troubleshoot equipment problems.

### Application of the Unit

The skills and knowledge described in this unit would typically be applied in a home-based studio equipped with a digital audio workstation (DAW). The unit complements CUSMPF304A Make a music demo, which covers the process of making a demo from the perspective of performers.

More complex skills associated with mixing music are covered in:

- CUSSOU405A Mix recorded music

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

## Employability Skills Information

Not applicable

### Elements and Performance Criteria Pre-Content

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify music demo requirements	1.1 In consultation with <i>relevant personnel</i> confirm the <i>purpose</i> of the demo 1.2 Contribute to the development of a recording plan that takes into account a range of <i>factors</i> as required 1.3 Agree on <i>method</i> and <i>format</i> for final recording
2. Record performers	2.1 Position performers, musical instruments and equipment for optimum sound quality 2.2 Check that <i>equipment</i> is installed and aligned correctly 2.3 Ensure that microphones are operational at all times 2.4 Route test signals to the correct signal path and check that level of test signal is correct 2.5 Create a headphone mix for musicians 2.6 Capture sound sources according to the agreed method
3. Mix sound sources	3.1 Use appropriate panel controls to mix and balance sound sources to achieve required artistic effects 3.2 Produce transitions between sounds that are technically accurate and produce the required effect 3.3 Apply <i>sonic effects</i> and <i>signal processing</i> as required 3.4 Ensure that monitoring levels meet current safety standards 3.5 Ensure that the level of the composite signal is within technical limits and desired dynamic range
4. Finalise music demo	4.1 Assess the mix on speakers appropriate to the particular end use 4.2 Assess each track for correctness and quality and evaluate the mix in terms of meeting demo requirements 4.3 Listen to final mix with relevant personnel and agree on changes required to improve the quality of the mix 4.4 Incorporate final adjustments to the sound mix as required 4.5 Produce a master in the agreed format and make a backup 4.6 Keep <i>documentation</i> as required 4.7 Clean <i>work environment</i> after use and restore to pre-use condition

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- critical-listening and aural-discrimination skills
- literacy skills sufficient to:
  - log and label tracks
  - note and report faults and problems
  - read and understand mixing documentation
- numeracy skills sufficient to calculate duration of tracks
- communication and teamwork skills sufficient to:
  - liaise with sound-production personnel and performers
  - understand and follow instructions
- planning and organisational skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - seek expert assistance when problems arise
- problem-solving skills sufficient to identify faults that may occur in audio-production environments and refer problems to relevant personnel
- learning skills in the context of acting on constructive feedback about own work performance
- technology skills sufficient to operate:
  - a variety of mixing consoles
  - signal-processing and effects devices

### Required knowledge

- basic audio principles and practice, including:
  - range of microphones and contexts in which they are used
  - microphone characteristics, e.g. frequency response, sensitivity and polar patterns
  - effect of microphone placement on quality of sound
  - characteristics of sound in a range of environments
  - signal-to-noise ratio, signal phase and audio level/headroom control
  - audible defects in analogue and digital technologies
  - features of mixers, amplifiers, speakers and effects racks
  - signal distortion
- basic principles of acoustics, including:
  - frequency
  - pitch
  - amplitude

- loudness
- velocity
- wavelength
- acoustical phase
- timbre
- sound envelope
- basic understanding of psychoacoustic principles, including:
  - spatial hearing
  - direct sound
  - early sound
  - reverberant sound
  - room design
- characteristics of musical instruments in the context of recording and mixing
- techniques for manipulating input signals and gaining structure through use of:
  - equalisers
  - filters
  - compressors/expanders
  - faders and auxiliaries
  - effects devices
- issues and challenges that typically arise in the context of recording and mixing a basic music demo
- OHS requirements, including:
  - safe manual-handling techniques
  - working safely with electricity and hazardous substances
  - principles of safe listening, such as safeguards against hearing loss

## Evidence Guide

<p><i>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</i></p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>record and mix at least two basic music demos</li> <li>work cooperatively with performers to achieve the required effect.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to performers requiring a basic music demo</li> <li>access to industry-current sound mixing equipment</li> <li>use of culturally appropriate processes, and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>observation or video recording of the candidate during recording and mixing sessions</li> <li>evaluation of authenticated audio recordings where the candidate was responsible for recording and mixing music</li> <li>written or oral questioning to test industry knowledge as listed in the required knowledge section of this unit.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CUFSOU204A Perform basic sound editing</li> <li>CUSSOU201A Assist with sound recordings</li> <li>CUSSOU303A Set up and disassemble audio equipment.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Relevant personnel</b> may include:	<ul style="list-style-type: none"> <li>• artists, musicians and performers</li> <li>• audio and sound engineers</li> <li>• broadcasters</li> <li>• producers</li> <li>• post-production personnel</li> <li>• program managers</li> <li>• camera operators.</li> </ul>
<b>Purpose</b> may include:	<ul style="list-style-type: none"> <li>• pitching a product at record labels</li> <li>• pursuing work at live music venues</li> <li>• getting work via live music or advertising agencies</li> <li>• getting air play on media outlets</li> <li>• accompanying a funding application</li> <li>• uploading onto music and/or social networking websites</li> <li>• developing media for band or solo artist websites</li> <li>• supporting applications for study and/or remote auditions</li> <li>• expanding a music portfolio</li> <li>• documenting a music project or other creative body of work.</li> </ul>
<b>Factors</b> may include:	<ul style="list-style-type: none"> <li>• musical style</li> <li>• contractual arrangements</li> <li>• copyright</li> <li>• budget</li> <li>• timelines</li> <li>• availability of personnel, including: <ul style="list-style-type: none"> <li>• musicians</li> <li>• sound recordists</li> <li>• sound mixers</li> <li>• post-production personnel</li> </ul> </li> <li>• promotional materials</li> <li>• distribution strategies</li> </ul>

	<ul style="list-style-type: none"> <li>• recording location, including: <ul style="list-style-type: none"> <li>• live music venue</li> <li>• recording studio</li> <li>• private residence</li> </ul> </li> <li>• rehearsal requirements</li> <li>• number of recording sessions required</li> <li>• equipment requirements</li> <li>• hire of equipment or venue</li> <li>• instruments</li> <li>• props</li> <li>• costumes</li> <li>• make-up.</li> </ul>
<b>Method</b> may include:	<ul style="list-style-type: none"> <li>• live to two-track stereo</li> <li>• live multi-tracking</li> <li>• multi-tracking with click</li> <li>• combination live recording and prerecorded samples</li> <li>• recording to analogue tape</li> <li>• recording to hard disk or digital tape</li> <li>• remixing existing music</li> <li>• video</li> <li>• using music production software for mixing and mastering.</li> </ul>
<b>Format</b> may include:	<ul style="list-style-type: none"> <li>• compact disc (CD)</li> <li>• audio file formats for upload and distribution within virtual environments and/or onto relevant media players, such as: <ul style="list-style-type: none"> <li>• MP3</li> <li>• WAV</li> <li>• AIFF</li> </ul> </li> <li>• audiotape</li> <li>• video: <ul style="list-style-type: none"> <li>• digital (high resolution)</li> <li>• digital (compressed for online environment)</li> </ul> </li> <li>• analogue.</li> </ul>
<b>Equipment</b> may include:	<ul style="list-style-type: none"> <li>• digital audio workstation (DAW) with software, such as: <ul style="list-style-type: none"> <li>• Pro Tools</li> <li>• Logic</li> <li>• Cubase</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• Ableton Live</li> <li>• Reason</li> <li>• Nuendo</li> <li>• Garage Band</li> <li>• Digital Performer</li> <li>• Soundscape</li> <li>• Sonic Studio</li> <li>• hard disk recorders</li> <li>• multi-track recorder</li> <li>• stereo recorders</li> <li>• microphones, such as: <ul style="list-style-type: none"> <li>• dynamic</li> <li>• condenser</li> <li>• lavalier</li> <li>• shotgun</li> <li>• directional</li> <li>• radio</li> </ul> </li> <li>• microphone stands</li> <li>• microphone accessories</li> <li>• microphone windscreens</li> <li>• headphones</li> <li>• amplifiers</li> <li>• speakers</li> <li>• mixing console/desk, including: <ul style="list-style-type: none"> <li>• analogue</li> <li>• digital</li> <li>• digitally controlled analogue (hybrid)</li> </ul> </li> <li>• effects rack</li> <li>• sequence sampler</li> <li>• cables and connectors.</li> </ul>
<p><i>Sonic effects</i> may include:</p>	<ul style="list-style-type: none"> <li>• change in pitch</li> <li>• change in speed</li> <li>• echo</li> <li>• pan</li> <li>• fade in and fade out</li> <li>• filter</li> <li>• invert</li> <li>• normalise</li> <li>• repeat</li> <li>• reverb</li> <li>• modulation</li> </ul>

	<ul style="list-style-type: none"> <li>• wahwah.</li> </ul>
<i>Signal processing</i> may include:	<ul style="list-style-type: none"> <li>• amplification</li> <li>• compression</li> <li>• noise processing</li> <li>• spectrum signal processing</li> <li>• equalisation</li> <li>• time signal processing.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• pre-mix scripts</li> <li>• mixing sheets</li> <li>• track sheets</li> <li>• cue sheets</li> <li>• dubbing sheets</li> <li>• queries</li> <li>• notes</li> <li>• manuals.</li> </ul>
<i>Work environment</i> may include:	<ul style="list-style-type: none"> <li>• dubbing theatre</li> <li>• outside broadcast</li> <li>• post-production studio</li> <li>• recording studio</li> <li>• sound stage</li> <li>• home studio.</li> </ul>

## Unit Sector(s)

Media and entertainment production - audio/sound

## CUSSOU403A Perform advanced sound editing

### Modification History

Release	Comments
Release 2	Created to fix formatting errors only. Released with CUS09 Music Training Package version 1.2

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to perform advanced sound editing. This involves assessing the quality of original recorded sound against production requirements, determining the scope of the sound-editing project, preparing source materials for sound editing, editing sound in line with production requirements, and applying sound effects to enhance the final product.

### Application of the Unit

This unit applies to sound editors who edit music and sound effects for film, television, interactive media and music productions as well as to technicians who work in film and sound archives.

This work is undertaken with minimal supervision and guidance. Sound editors at this level could also be responsible for supervising others.

This unit builds on the skills covered in the imported unit:

- CUFSOU204A Perform basic sound editing.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

## Employability Skills Information

Not applicable

### Elements and Performance Criteria Pre-Content

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for sound editing	1.1 Participate in pre-production meetings with <i>relevant personnel</i> to discuss <i>production requirements and procedures</i> 1.2 Check that necessary copyright releases have been organised 1.3 Consider the impact of different <i>release sound formats</i> when planning editing work 1.4 Check sound <i>equipment</i> to ensure it is operational and appropriate for the task 1.5 Prepare a team work plan as required and brief relevant personnel accordingly 1.6 Obtain original <i>sound sources</i> and assess their quality against production requirements 1.7 Check any <i>documentation</i> in the receipt and preparation of original recordings and copies for <i>productions</i> 1.8 Advise where sound sources do not meet quality and production requirements and propose options to resolve issues as required 1.9 Anticipate problems that may arise during the editing process and plan accordingly
2. Edit complex sound sequences	2.1 Check the <i>format</i> of all sound sources, ensuring it is compatible with editing software, equipment and <i>media</i> output 2.2 Critically listen to sound sources to determine the extent and range of required edits 2.3 <i>Manipulate editing software</i> and equipment to produce required outcomes and to resolve identified problems 2.4 Work sensitively and constructively with relevant personnel to achieve best production outcomes
3. Create overall sound context	3.1 Determine the <i>purpose</i> for which sound is being used in productions 3.2 Identify, select and/or <i>produce</i> appropriate sound effects or elements 3.3 Apply knowledge and understanding of <i>sonic lexicon</i> to enhance final creative outcomes 3.4 Note sound effects and elements on spotting sheets 3.5 Incorporate sound effects and elements to meet creative requirements
4. Finalise editing	4.1 Participate in spotting sessions with relevant personnel

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
operations	and make adjustments to mix as required 4.2 Ensure that final files are in the correct format 4.3 Manage the quality check of the final sound mix in line with enterprise procedures and production requirements 4.4 Archive edited audio files and complete associated documentation according to enterprise procedures 4.5 Ensure that <i>work environment</i> is left clean and ready for the next user 4.6 In collaboration with support personnel, organise and maintain sound effects libraries for future productions 4.7 Provide feedback to other team members as required 4.8 Evaluate own performance against technical and creative criteria and note areas for improvement

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication and teamwork skills sufficient to:
  - work collaboratively with project team personnel and sound-production personnel
  - provide feedback to project personnel on appropriate editing techniques
  - provide critical feedback on problems with technical quality of masters and condition of equipment
- literacy skills sufficient to:
  - log and label recorded material
  - accurately note sound effects on spotting sheets
  - read and interpret an edit decision list (EDL)
- numeracy skills sufficient to calculate duration and capacity of media at various speed/sample rates
- initiative and enterprise skills in the context of:
  - finding creative solutions to sound-editing challenges
  - applying critical-listening skills to analyse sound recordings and finding solutions to creative and/or technical problems
- learning skills sufficient to maintain currency of knowledge of editing software and equipment upgrades
- planning and organisational skills sufficient to:
  - prioritise work tasks
  - meet deadlines
  - locate sound effects
- problem-solving skills sufficient to promptly and effectively rectify sound defects, system failures and mechanical breakdowns
- technology skills sufficient to:
  - use a variety of sound-editing equipment and software on both PC and MAC operating systems
  - manage file systems
  - make regular backups

### Required knowledge

- principles of sonic storytelling, e.g. using sound (or silence) to:
  - focus attention
  - intensify action
  - set pace
  - set mood
  - evoke feelings

- well-developed understanding of psychoacoustic principles, including:
  - spatial hearing
  - direct sound
  - early sound
  - reverberant sound
  - studio and control room design
  - ergonomics
- well-developed understanding of audio principles, including:
  - frequency
  - pitch
  - amplitude
  - loudness
  - velocity
  - wavelength
  - acoustical phase
  - timbre
  - sound envelope
- intellectual property implications in relation to sound design
- picture and sound synchronisation, including:
  - time codes
  - frame rates
  - sample rates
  - clock leader 2 pips
- principles and techniques of sound editing, including:
  - manipulating sound to achieve technical and creative outcomes
  - using effects to achieve a range of functional sound requirements
  - eliminating audible defects
  - compatibility of different digital standards
  - identification/logging requirements
  - file formats, technical standards and compression
- issues and challenges that typically arise in the context of performing complex sound edits
- OHS principles of:
  - safe listening, including safeguards against hearing loss
  - using a computer and keyboard for periods of time

## Evidence Guide

<p><i>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</i></p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use all features of a range of current industry sound-editing software and equipment</li> <li>• make critical editing decisions that enhance the quality and impact of the final sound</li> <li>• incorporate a range of sound effects into the final mix</li> <li>• work cooperatively in a team environment</li> <li>• meet deadlines.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to current industry-standard equipment as listed in the range statement</li> <li>• use of culturally appropriate processes, and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<p><b>Method of assessment</b></p>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of candidate undertaking complex sound edits, including the incorporation of sound effects</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by candidate</li> <li>• authenticated recordings of material edited by the candidate</li> <li>• case studies and scenarios as a basis for discussing issues and challenges that arise in the context of complex sound editing.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUSSOU404A Edit dialogues.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>Relevant personnel</b> may include:</p>	<ul style="list-style-type: none"> <li>• performer</li> <li>• composer</li> <li>• sound supervisor</li> <li>• supervising sound editor</li> <li>• preservation supervisor</li> <li>• archivist</li> <li>• effects editor</li> <li>• effects mixer</li> <li>• sound mixer</li> <li>• recordist</li> <li>• re-recording mixer</li> <li>• audio assistant</li> <li>• audio and sound engineer</li> <li>• director</li> <li>• producer</li> <li>• post-production picture editor</li> <li>• post-production manager</li> <li>• program manager</li> <li>• sound designer.</li> </ul>
<p><b>Production requirements and procedures</b> may include:</p>	<ul style="list-style-type: none"> <li>• creative</li> <li>• technical</li> <li>• file formats</li> <li>• agreement on file naming structures</li> <li>• work flow after capture</li> <li>• prerelease screenings to check quality of sound mix</li> <li>• technical checks</li> <li>• spotting sessions</li> <li>• attributions</li> <li>• audience</li> <li>• budget</li> <li>• confidentiality</li> <li>• content</li> <li>• contractual arrangements</li> </ul>

	<ul style="list-style-type: none"> <li>• copyright</li> <li>• deadlines</li> <li>• direct quotes</li> <li>• duration</li> <li>• intellectual property</li> <li>• interviews</li> <li>• location</li> <li>• purpose</li> <li>• schedule</li> <li>• style.</li> </ul>
<i>Release sound formats</i> may include:	<ul style="list-style-type: none"> <li>• IMAX multichannel system</li> <li>• 5.1 surround sound: <ul style="list-style-type: none"> <li>• cinema</li> <li>• television</li> </ul> </li> <li>• 4-track Dolby stereo</li> <li>• 2-track stereo</li> <li>• internet</li> <li>• games</li> <li>• radio.</li> </ul>
<i>Equipment</i> may include:	<ul style="list-style-type: none"> <li>• digital audio workstation (DAW) with software, such as: <ul style="list-style-type: none"> <li>• Pro Tools</li> <li>• Nuendo</li> <li>• Pyramix</li> <li>• Fairlight</li> <li>• Sound Forge</li> <li>• Adobe Audition</li> <li>• Final Cut Pro</li> <li>• Avid</li> <li>• EDL software</li> </ul> </li> <li>• mixing consoles</li> <li>• outboard gear, such as: <ul style="list-style-type: none"> <li>• re-verb unit</li> <li>• sub-base harmoniser</li> <li>• de-esser</li> <li>• compressor.</li> </ul> </li> </ul>
<i>Sound sources</i> may include:	<ul style="list-style-type: none"> <li>• dialogues and voice-overs</li> <li>• special effects</li> <li>• music</li> <li>• walla</li> </ul>

	<ul style="list-style-type: none"> <li>• ambient sound</li> <li>• atmospheric sound</li> <li>• foley.</li> </ul>
<b>Documentation</b> may include:	<ul style="list-style-type: none"> <li>• pre-mix scripts</li> <li>• mixing sheets</li> <li>• track sheets</li> <li>• de-noising documents</li> <li>• cue sheets</li> <li>• dubbing sheets</li> <li>• queries</li> <li>• notes</li> <li>• manuals.</li> </ul>
<b>Production</b> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• print advertisement</li> <li>• corporate video</li> <li>• feature film and/or video</li> <li>• filmed event and/or performance</li> <li>• interactive media product</li> <li>• internet production</li> <li>• electronic game production</li> <li>• music recording and/or video</li> <li>• promotional trailer</li> <li>• radio broadcast</li> <li>• short film and/or video</li> <li>• television program</li> <li>• training film and/or video</li> <li>• oral histories</li> <li>• voice-over.</li> </ul>
<b>Format</b> may include:	<ul style="list-style-type: none"> <li>• audio/sound, such as: <ul style="list-style-type: none"> <li>• DAT</li> <li>• AIF (AIFF)</li> <li>• WAV</li> <li>• broadcast WAV format (BWF)</li> <li>• WMA</li> <li>• MIDI</li> <li>• OGG</li> <li>• advanced audio coding (AAC)</li> <li>• Apple Lossless</li> <li>• magnetic tape</li> <li>• Real Audio</li> <li>• QuickTime</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• MP3</li> <li>• computerised data.</li> </ul>
<b>Media</b> may include:	<ul style="list-style-type: none"> <li>• radio</li> <li>• video</li> <li>• CD</li> <li>• DVD</li> <li>• DAT</li> <li>• computer hard drive</li> <li>• internet</li> <li>• mobile device</li> <li>• film.</li> </ul>
<b>Manipulating editing software</b> may include:	<ul style="list-style-type: none"> <li>• adjusting and normalising audio levels</li> <li>• inserting: <ul style="list-style-type: none"> <li>• transitions</li> <li>• sound effects</li> <li>• music</li> <li>• voice-overs</li> <li>• overlays</li> </ul> </li> <li>• manipulating audio clips, such as: <ul style="list-style-type: none"> <li>• cutting</li> <li>• pasting</li> <li>• copying</li> <li>• moving</li> <li>• splitting.</li> </ul> </li> </ul>
<b>Purpose</b> may include:	<ul style="list-style-type: none"> <li>• breaking the screen plane</li> <li>• defining space</li> <li>• focusing attention</li> <li>• establishing locale</li> <li>• creating environment</li> <li>• emphasising action</li> <li>• intensifying action</li> <li>• depicting identity</li> <li>• setting pace</li> <li>• providing counterpoint</li> <li>• creating humour</li> <li>• symbolising meaning</li> <li>• creating metaphor</li> <li>• unifying transition</li> <li>• creating silence.</li> </ul>
<b>Producing</b> sound effects may	<ul style="list-style-type: none"> <li>• creating and synchronising effects in a post-production studio</li> </ul>

involve:	<ul style="list-style-type: none"> <li>• recording during shooting</li> <li>• collecting in the field</li> <li>• generating effects electronically.</li> </ul>
<i>Sonic lexicon</i> may refer to genres, such as:	<ul style="list-style-type: none"> <li>• silent film</li> <li>• natural history</li> <li>• drama productions</li> <li>• animation</li> <li>• comedy</li> <li>• horror.</li> </ul>
<i>Work environment</i> may include:	<ul style="list-style-type: none"> <li>• dubbing theatre</li> <li>• on location, including interior and exterior</li> <li>• outside broadcast</li> <li>• post-production studio</li> <li>• recording studio</li> <li>• sound stage</li> <li>• cultural institution</li> <li>• archive.</li> </ul>

## Unit Sector(s)

Media and entertainment production - audio/sound

## CUSSOU502A Produce sound recordings

### Modification History

Release	Comments
Release 2	Created to fix formatting errors only. Released with CUS09 Music Training Package version 1.2

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce a musical recording.

### Application of the Unit

Music producers and sound engineers apply the skills and knowledge described in this unit. They are responsible for working collaboratively and creatively with artists and performers to produce musical recordings which can be distributed through record companies and in a range of media, such as television, film, video and the internet.

Even though their particular focus is on performers and their skills to produce a creative work, they are responsible also for the quality and balance of the final recording. In addition, they need a range of musical, technical, personal, business and management skills.

Skills associated with managing the process of sound recordings are covered in:

- CUSSOU602A Manage production of sound recordings.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

## Employability Skills Information

Not applicable

## Elements and Performance Criteria Pre-Content

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm concept for recording project	1.1 Apply knowledge of commercial music trends, market niches, new musical styles and artists to develop the musical vision and concept for a <b>recording project</b> 1.2 Establish and discuss <b>production requirements</b> with <b>relevant personnel</b> 1.3 Apply musicianship knowledge and awareness of sound design possibilities to develop the underlying artistic style and creative concept for the recording 1.4 Discuss and confirm vision for sound concepts with relevant personnel to achieve consensus on artistic values and agreed project outcomes 1.5 Address <b>copyright requirements</b> to ensure that the recording process and product comply with legislation
2. Confirm recording project arrangements	2.1 Confirm repertoire, artists, project vision and operational details in consultation with relevant personnel 2.2 In collaboration with artists, ensure that adequate time and facilities are provided to achieve the agreed performance standard within time and budget constraints 2.3 Plan and agree on communication processes and time schedules with artists and technical production personnel 2.4 Ensure that time schedules are drawn up and distributed to each artist for all proposed rehearsal and recording sessions 2.5 Liaise with technical staff regarding appropriate <b>recording sites</b>
3. Manage recording sessions	3.1 Confirm that sessions are scheduled to allow adequate rehearsal and sound testing prior to main recording sessions 3.2 Ensure recording site, <b>sound equipment</b> and recording <b>formats</b> are appropriate for the <b>media</b> and project requirements 3.3 Communicate criticism of performers' work in a balanced, constructive and supportive manner that includes positive and achievable options for meeting desired artistic goals 3.4 Ensure that individual perspectives are considered and conflicting requirements are recognised and constructively negotiated 3.5 Continuously monitor all aspects of the recording and

ELEMENT	PERFORMANCE CRITERIA
	<p>ensure that any necessary adjustments are made in line with creative and technical requirements</p> <p>3.6 Collaborate with relevant personnel to ensure that sound balances are artistically appropriate</p>
4. Evaluate the recording process and product	<p>4.1 Discuss and obtain agreement on <i>evaluation techniques</i> for evaluating the recording process and completed product</p> <p>4.2 Seek and obtain feedback from relevant personnel to assess the recording process and product</p> <p>4.3 Evaluate own role in the production of recordings and note areas for improvement</p> <p>4.4 Use evaluation results to improve future practice</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication and teamwork skills sufficient to:
  - interpret and clarify written proposals and creative briefs
  - understand artists' requirements
  - work effectively with artists and sound engineers
  - work constructively with group dynamics
  - identify and deal effectively with conflict
  - direct and monitor the work of others
- listening skills sufficient to:
  - use aural imagination to develop coherent and innovative artistic sound outcomes within the scope of planned artistic and commercial objectives
  - discriminate and enhance texture and tone colour in line with objectives
  - understand appropriate intonation, dynamics, phrasing, rhythm and expression to produce the required sound
  - listen critically to the creative and technical work of others
  - listen critically to and adjust performance of others to achieve the required sound
  - continuously evaluate and adjust the production of musical work
- planning and organisational skills sufficient to:
  - clarify roles
  - work within budgets and timeframes
  - plan recording projects
  - use time-management strategies to set priorities
  - develop systems for required documentation
- initiative, enterprise and creative skills sufficient to:
  - demonstrate artistic leadership
  - use innovative approaches to recording to enhance the interpretation and performance of music or to create new possibilities through artistic and technical effects
  - interpret music appropriately to ensure a sympathetic and appropriate approach to sound production
- technical skills sufficient to apply knowledge of acoustics:
  - in sound production to recording projects
  - to instruments/voices in placements and settings for sound balance in recording

### Required knowledge

- well-developed understanding of psychoacoustic principles, including:

- spatial hearing
- direct sound
- early sound
- reverberant sound
- studio and control room design
- ergonomics
- industry knowledge, including:
  - varied characteristics of sound in a range of recording and performance environments
  - musical repertoire, styles, forms, systems, practices and customs
  - appropriate styles of musical interpretation and sound production
  - relevant musical terminology
  - features and characteristics of a range of instruments
  - performance customs of music genres relevant to selected area of music recording
  - copyright law and permissions
  - issues and challenges that arise in the context of producing musical recordings
- sound understanding of recording techniques, such as:
  - microphone and instrument/voice placement
  - application of effects
  - mixing sound sources
- issues and challenges that typically arise in the context of producing sound recordings
- OHS principles of safe listening, including safeguards against hearing loss

## Evidence Guide

<p><i>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</i></p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce at least two sound recordings that demonstrate:             <ul style="list-style-type: none"> <li>• well-developed critical-listening and aural-discrimination skills</li> <li>• a creative and appropriate musical concept that demonstrates knowledge of musicianship, repertoire, recording techniques and an awareness of sound design possibilities</li> </ul> </li> <li>• work creatively, collaboratively and constructively with performers to produce a sound recording.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to:             <ul style="list-style-type: none"> <li>• relevant instruments and equipment</li> <li>• scores, charts or other written music resources</li> <li>• participants, such as performers and technical crew</li> <li>• appropriate recording facilities with adequate space and acoustic qualities</li> </ul> </li> <li>• use of culturally appropriate processes, and techniques appropriate to the language and literacy capacity of learners and the work being performed.</li> </ul>
<p><b>Method of assessment</b></p>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of a recording session where the candidate is the producer</li> <li>• written or oral questioning to test knowledge as listed in the required knowledge section of this unit</li> <li>• authenticated musical recordings where the candidate was the producer</li> <li>• authenticated samples of project plans prepared by the candidate</li> <li>• case studies and scenarios as a basis for discussion about issues and challenges that arise in the context of producing musical recordings.</li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"><li>• BSBPMG510A Manage projects</li><li>• CUFCMP501A Manage and exploit copyright arrangements</li><li>• CUSSOU504A Create a final sound balance</li><li>• CUSSOU603A Manage production of sound recordings.</li></ul>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Recording projects</b> may be for:	<ul style="list-style-type: none"> <li>• solo artists</li> <li>• solo artists with backing</li> <li>• groups/ensembles</li> <li>• vocal</li> <li>• vocal and instrumental</li> <li>• instrumental, acoustic and/or electronic.</li> </ul>
<b>Production requirements</b> may include:	<ul style="list-style-type: none"> <li>• technical</li> <li>• creative</li> <li>• artistic</li> <li>• attributions</li> <li>• audience</li> <li>• budget</li> <li>• confidentiality</li> <li>• content</li> <li>• contractual arrangements</li> <li>• copyright</li> <li>• deadlines</li> <li>• direct quotes</li> <li>• duration</li> <li>• intellectual property</li> <li>• interviews</li> <li>• location</li> <li>• purpose</li> <li>• schedule</li> <li>• style.</li> </ul>
<b>Relevant personnel</b> may include:	<ul style="list-style-type: none"> <li>• clients</li> <li>• artists, musicians and performers</li> <li>• directors</li> <li>• producers</li> <li>• post-production personnel</li> <li>• program managers</li> <li>• sound designers and editors</li> <li>• video and sound recorders</li> <li>• audio personnel:</li> </ul>

	<ul style="list-style-type: none"> <li>• sound engineers</li> <li>• sound technicians</li> <li>• sound editors</li> <li>• sound designers</li> <li>• sound effects personnel</li> <li>• recordists</li> <li>• re-recording mixers</li> <li>• broadcasters</li> <li>• broadcast engineers.</li> </ul>
<b>Copyright requirements</b> may include:	<ul style="list-style-type: none"> <li>• provisions of current Copyright Act</li> <li>• copyright permission procedures</li> <li>• attribution</li> <li>• moral rights and performer's rights</li> <li>• negotiating with copyright organisations, such as: <ul style="list-style-type: none"> <li>• owners of copyright: publishers, composers, etc.</li> <li>• Australasian Performing Rights Association (APRA)</li> <li>• Phonographic Performance Company of Australia Limited (PPCA)</li> <li>• Australasian Mechanical Copyright Owners Society (AMCOS)</li> <li>• Copyright Agency Limited (CAL)</li> <li>• archives.</li> </ul> </li> </ul>
<b>Recording site</b> may include:	<ul style="list-style-type: none"> <li>• dubbing theatre</li> <li>• on location, including interior and exterior</li> <li>• outside broadcast</li> <li>• post-production studio</li> <li>• recording studio</li> <li>• sound stage.</li> </ul>
<b>Sound equipment</b> and accessories may include:	<ul style="list-style-type: none"> <li>• amplifiers</li> <li>• analogue to digital converters</li> <li>• cables</li> <li>• compact disc (CD) and digital versatile disc (DVD) players and burners</li> <li>• computer technology and associated software</li> <li>• recording devices: <ul style="list-style-type: none"> <li>• hard disk recorder, e.g. digital audio workstation (DAW)</li> <li>• digital audiotape recorder, e.g. S-DAT and</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>R-DAT</li> <li>• digital videotape recorder (DVTR)</li> <li>• mini disc recorder (MD)</li> <li>• modular digital multi-track recorder (MDM)</li> <li>• digital audio players, such as: <ul style="list-style-type: none"> <li>• iPod</li> <li>• MP3</li> </ul> </li> <li>• headphones</li> <li>• microphones and accessories</li> <li>• mixing consoles and desks</li> <li>• monitors and speakers</li> <li>• signal processors and plug-ins.</li> </ul>
<b>Formats</b> may include:	<ul style="list-style-type: none"> <li>• quarter inch audiotape</li> <li>• WAV</li> <li>• AIFF</li> <li>• Apple Lossless</li> <li>• WMA</li> <li>• MP3</li> <li>• Vorbis</li> <li>• ATRAC</li> <li>• AAC.</li> </ul>
<b>Media</b> may include:	<ul style="list-style-type: none"> <li>• radio</li> <li>• video</li> <li>• CD</li> <li>• DVD</li> <li>• computer hard drive</li> <li>• internet</li> <li>• mobile device</li> <li>• film.</li> </ul>
<b>Evaluation techniques</b> may include:	<ul style="list-style-type: none"> <li>• interviews</li> <li>• surveys</li> <li>• questionnaires</li> <li>• focus groups</li> <li>• demographic data</li> <li>• feedback</li> <li>• reviews</li> <li>• evaluation may include: <ul style="list-style-type: none"> <li>• clients</li> <li>• record companies</li> <li>• stakeholders</li> </ul> </li> </ul>

	<ul style="list-style-type: none"><li>• audience</li><li>• project personnel</li><li>• specialists.</li></ul>

## **Unit Sector(s)**

Media and entertainment production - audio/sound

# CUVPHI504A Investigate and exploit innovative imaging options

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit describes the performance outcomes, skills and knowledge required to exploit creative and innovative options in the production of photoimages using a variety of imaging technologies and processes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Application of the Unit

**Application of the unit** The photoimaging practitioner is required to resolve complex visual communications problems and create innovative images. In creating these images, the practitioner must interact with a range of imaging technologies (analogue, digital, hybrid, traditional and emerging). These are part of the production workflow where images are captured, enhanced and output. The selection, application and adaptation of imaging technologies allow the practitioner to acquire unique and innovative images.

This work is usually undertaken independently (with guidance where required).

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

The following units or demonstrated equivalence are required prior to undertaking this unit:

- CUVPHI01A Source and apply photoimaging industry knowledge
- CUVPHI03A Research and apply information on the traditions which inform photoimaging practice
- CUVPHI05A Use a 35mm SLR camera or digital equivalent.

## Employability Skills Information

### Employability skills

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Research a range of imaging technologies.</b>	<p>1.1 Critique and review <i>historical, contemporary and emerging imaging technologies</i> with <i>appropriate person/s</i>.</p> <p>1.2 Examine and clarify <i>discipline, subject matter and themes</i> of photography/photoimaging and their related imaging technologies.</p> <p>1.3 Identify and review the connection between imaging technology and the <i>visual representation, attributes and opportunities</i> of an image's subject matter.</p> <p>1.4 Evaluate <i>specialised imaging technologies</i> and their corresponding imaging workflow.</p> <p>1.5 Evaluate currency/credibility of information gathered and ensure research scope is sufficiently broad.</p>
<b>2 Create test images and evaluate attributes of imaging technologies.</b>	<p>2.1 Acquire or gain access to specialised imaging technologies in cooperation with imaging specialists and suppliers.</p> <p>2.2 Identify and apply appropriate OHS processes and standards in use of specialised imaging technologies.</p> <p>2.3 Apply specialised imaging technologies and imaging workflow to create test images.</p> <p>2.4 Review personal performance in creation of test images.</p>

**ELEMENT****PERFORMANCE CRITERIA****3 Create body of work using imaging technologies.**

- 3.1 Select appropriate imaging technology to create a *body of work* with specific subject matter/theme.
- 3.2 Consider requirements of creative vision/product and adopt imaging workflow to create images.
- 3.3 Review and adapt imaging workflow to ensure consistency of creative vision and product.
- 3.4 Plan, prepare and organise body of work for presentation using appropriate technology/context.
- 3.5 Review personal performance in creation of body of work and identify concepts for future research.
- 3.6 Store and maintain reference journal of specialised imaging technologies.
- 3.7 Document imaging workflow, reinstate equipment and archive imaging products appropriately.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills:

- photoimaging skills sufficient to:
  - archive, maintain and manage analogue and/or digital assets
  - competently operate imaging technologies along with design and allied technologies used within the imaging environment
  - create/optmise files and film to photoimaging industry standards
  - implement OHS/quality control procedures as they apply to all aspects of the imaging process
- research skills sufficient to access and compare contemporary styles and conceptual/aesthetic approaches to photoimaging
- critical thinking skills sufficient to:
  - employ reflective questioning to analyse performance
  - recognise innovative imaging opportunities from research/testing processes
- literacy skills sufficient to:
  - interpret technical information relating to the imaging environment
  - obtain necessary permits and licences to operate ancillary equipment and work in special locations
- numeracy skills sufficient to determine mathematical problems arising from technical imaging processes
- communication skills sufficient to:
  - engage with subjects and professionals in a meaningful and respectful way
  - explain and describe work practices and methods
  - negotiate with models, creative teams and project stakeholders
- learning skills sufficient to:
  - learn the operation of ancillary equipment
  - review personal performance within project context
  - upgrade knowledge required to work in varied locations
- planning and organising skills sufficient to:
  - coordinate activities of models and assistants
  - organise shoots on location/in studio and prepare shoot management timelines
- technology skills sufficient to check and reinstate equipment, studio and props.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge:

- OHS procedures/standards associated with imaging technology
- selection, testing and evaluation of imaging technology to ascertain suitability for innovative and creative production purposes
- traditions/contemporary issues that inform imaging technology.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- ability to research, identify, test and apply innovative imaging concepts and technology
- ability to implement OHS/quality control procedures when applying imaging concepts and technology
- ability to review personal performance when applying imaging concepts and technology.

#### **Context of and specific resources for assessment**

Assessment must ensure:

- access to a range of technology and media used in the broad imaging environment
- access to sources of information on the historical and contemporary imaging environment
- opportunity for collaboration with or in allied industries
- access to appropriate learning and assessment support when required
- the use of culturally appropriate processes, and techniques appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

## EVIDENCE GUIDE

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by candidate
- direct observation of candidate applying imaging technology, implementing OHS/quality control processes and meeting deadlines
- case studies to assess candidate's ability to evaluate imaging technology and its suitability to historical and contemporary contexts and themes
- problem solving activities to assess candidate's critical thinking skills.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUVPHI501A Research role and use of the photoimage in visual communication
- CUVPHI502A Research and exploit photoimaging trends.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Historical, contemporary and emerging imaging technologies*** may include:
- camera-less imaging processes and devices:
    - digital scanners
    - photocopiers
    - photograms and chemigrams
  - cameras:
    - aerial
    - low-tech (toy and single-use)
    - panorama
    - pinhole cameras and camera obscura devices
    - rangefinder
    - SLR (35mm/120 film, digital capture/sensor)
    - underwater
    - view camera (4x5, 5x7, 10x8)
  - devices that produce books, magazines and newspapers
  - enhance technologies:
    - analogue/wet darkroom
    - digital darkroom and imaging software applications
  - historical cameras and techniques:
    - ambrotype
    - cyanotype
    - daguerreotype
    - vandyke brown and salted papers
    - wet plate
  - hybrid processes:
    - digital back on a pinhole camera
    - simulating/emulating analogue effects via digital software techniques

## RANGE STATEMENT

- using an inter-negative from digital capture for contact printing processes (e.g. cyanotype, palladiotype, platinotype)
- output technologies (including all kinds of print-making, presentation and projection devices):
  - analogue/digital enlargers and printers/papers
  - film writers
  - inkjet/laser/dye-sublimation/thermal printers and media
  - CMYK offset printing devices
  - monitor/television screen display and/or data projector images
  - screen printing and print-making processes
  - thermo-autochrome (e.g. picrograph).

*Appropriate persons* may include:

- critics, commentators and polemicists
- members of relevant professional associations
- mentors/peers
- practising photographers, photoimagers or members of allied fields.

## RANGE STATEMENT

*Discipline, subject matter and themes* may include:

- disciplines:
  - art photoimaging
  - commercial photoimages
  - domestic photoimages
  - illustrative photoimages
  - media photoimages
  - stock photoimages
  - technical photoimages
  - wedding clients
- subject matter and themes:
  - abstraction
  - advertising
  - beauty
  - culture
  - gender identity
  - landscape
  - nature
  - philosophical and classical themes
  - religion
  - reportage
  - science and technology
  - sexuality
  - social issues
  - the human condition
  - the nude
  - the photograph as truth
  - the portrait.

## RANGE STATEMENT

*Visual representation, attributes and opportunities* may include:

- controlling/displaying time
- imaging the passage of time
- integrating images into other technologies to provide a range of audio/sensory/tactile human experiences
- making images in which an emotive and emotional content is enabled by the selected imaging technology
- making images of subjects in environments that are too hot or cold, too dangerous or life threatening for human observation
- making images where abstract concepts are explained using the representational opportunities provided by selected imaging technologies
- making minute things visible to the naked eye
- making subjects of immense distance visible
- presenting images in ways which enhance the communicative quality of the work
- the pictorial representation of subjects normally beyond human vision, comprehension or understanding.

*Specialised imaging technologies* may include:

- 3D imaging devices and software applications
- aerial cameras
- high speed cameras
- non-visible electromagnetic spectrum:
  - ultraviolet and infrared imaging
  - x-ray and gamma ray
- microscopy
- photo finish cameras
- remote sensing devices
- scanning electron microscopes
- telescopes
- thermal imaging
- time/motion cameras
- ultrasound imaging.

**RANGE STATEMENT**

- Body of work* may include:
- electronic presentation
  - exhibition of images
  - magazine, newspaper or book
  - portfolio of work.

**Unit Sector(s)**

**Competency field**

**Competency field**            Design and Visual Communication - Photoimaging

## **CUVVSP14B Apply techniques to produce drawings**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit descriptor**

This unit describes the skills and knowledge required to use techniques, materials and tools for the production of drawings. As such the unit covers general knowledge and the application of basic techniques, which would generally be nominated by the supervisor.

It is a specialisation unit and refers to a specific art form. This work would usually be carried out under supervision. It therefore differs from the units which relate to core drawing techniques for concept representation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### **Application of the Unit**

Not Applicable

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

It is highly recommended that this unit be assessed in conjunction with:

- CUVCOR01B Source concept for own work or
- CUVCOR02B Develop and articulate concept for own work
- CUVCOR07B Use drawing techniques to represent the object or idea or
- CUVCOR08B Produce drawings to represent and communicate the concept.

It could also be assessed in conjunction with:

- CUVCOR11B Source information on history and theory and apply to own area of work.

Depending on the context, combined assessment and/or training with a range of other units would also be appropriate, e.g.:

- CUVCRS13B Store finished work.

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 <b>Prepare and maintain physical resources to produce drawings.</b>	<p>1.1 Correctly identify and select <i>tools</i> and <i>materials</i> required for the production of drawings.</p> <p>1.2 Prepare, clean and maintain tools and materials in accordance with relevant <i>workplace procedures</i> and safety requirements.</p> <p>1.3 <i>Organise and maintain</i> work space so that it remains clean and safe.</p> <p>1.4 Store tools and materials in accordance with relevant workplace procedures and safety requirements.</p>
2 <b>Use and test drawing techniques.</b>	<p>2.1 Safely use <i>techniques</i> for the production of drawings.</p> <p>2.2 Use and <i>test</i> nominated techniques to determine the capability of the technique and its application.</p>
3 <b>Produce the drawings.</b>	<p>3.1 Determine <i>concept for the proposed drawings</i> based on own ideas or supplied information.</p> <p>3.2 Correctly identify the steps and resources required to produce the proposed drawings.</p> <p>3.3 Select appropriate tools and materials for the specific drawings.</p> <p>3.4 Calculate correct quantities of materials required and minimise waste where possible.</p> <p>3.5 Use techniques, tools and materials safely to produce the final drawings.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills:

- literacy skills sufficient to read product safety labels
- numeracy skills sufficient to calculate quantities.

#### Required knowledge:

- general knowledge of physical properties and capabilities of the most commonly used materials and tools used in drawings
- general knowledge of different styles of drawing and the work of key practitioners
- overview knowledge of the formal elements and principles of design
- introductory knowledge of the historical and theoretical contexts for drawing
- typical work space and tool requirements for the production of different types drawings
- cleaning and maintenance techniques for tools used in drawing
- awareness of copyright, moral rights and intellectual property issues
- environmental issues associated with the tools and materials used in drawing
- organisational and legislative occupational health and safety procedures in relation to drawing.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The following evidence is critical to the judgement of competence in this unit:

- production of drawings which demonstrate a command of nominated techniques and which

## EVIDENCE GUIDE

reflect the concept

- general knowledge of tools and materials used in drawing.

### **Context of and specific resources for assessment**

The assessment context must provide for:

- evaluation of visual language and technical execution of work pieces produced by the candidate
- practical demonstration of skills using required tools, equipment and materials to produce a minimum of one drawing.

### **Method of assessment**

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of drawings in progress
- questioning and discussion of candidate's intentions and work
- written or verbal reports
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to produce drawings.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Tools*** may include:

- brushes
- digital equipment, software and printer, discs, CDs
- rags
- scrapers
- spatulas
- sponges
- sticks.

***Materials*** for drawing may include:

- charcoal
- ink and wash
- papers
- pastels, chalks and crayons
- pencils from B-6B
- watercolour.

***Workplace procedures*** may relate to such things as:

- cost control
- process-specific procedures
- recycling
- reporting
- safety
- use of materials.

***Organisation and maintenance*** of the work space may relate to:

- lighting
- ventilation
- wet and dry areas
- work tables, easels.

## RANGE STATEMENT

Within this unit the range of *techniques* used would generally be quite limited in nature and may include:

- digital drawing techniques
- linear marks of differing intensity and character, e.g. thick, sharp, thin, curvilinear, soft (side of pencil or crayon)
- linear marks to produce illusion of 3D form
- simple linear perspective through the use of a vanishing point
- tonal range to produce illusion of 3D form
- using mixed drawing media and a range of techniques to produce drawings.

*Testing* techniques may include:

- experimenting directly with work in progress
- exploring techniques by making practice pieces
- making samples applying nominated techniques.

The *concept for the proposed drawings* may be influenced by:

- elements and principles of design
- the subject matter or theme for the work, e.g. the body; identity; land and place; political, cultural, social issues; spiritual concerns.

## Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess digital camera qualities	1.1.Camera software compatibility with hardware system is assessed and the appropriate software is selected for the job 1.2.Pixel resolution of the camera is matched to the required quality and resolution of outcome 1.3.The RAM capacity of the camera is checked to be appropriate to the number of images required to be captured 1.4.Shutter speed, focal lengths and camera feature modes (eg flash, scrollage, icon menu, close-up, wide angle and telephoto capacity) are assessed suitable for the quality and use of photographic images required 1.5.Lithium batteries are handled and stored according to OHS requirements
2. Set up for image capture	2.1.Camera is set up for image composition according to job specifications 2.2. <b>Lighting</b> is arranged according to job specifications 2.3.Light intensity is set for the correct exposure
3. Preview image	3.1.Tone curves are adjusted according to job specifications 3.2.The neutral balance of the image is arranged and adjusted 3.3.Adjustments to image composition and exposure are made
4. Photograph and upload a digital image	4.1.The digital camera is loaded and operated according to manufacturer's specifications appropriate to the quality of image to be photographed 4.2.The computer card interface/disk is uploaded onto the relevant computer and the image saved on hard disk 4.3.Photographic image files are created and stored on the computer according to software procedures 4.4.Photographic images are enhanced, cropped and altered electronically to deliver the required image 4.5.Photographic images are checked for fitness of purpose and conformance to the job brief 4.6.Photographic images are assessed fit for the relevant delivery mode (eg print, CD-ROM) and delivered appropriately

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- OHS in relation to operating machinery such as safely switching off machinery before cleaning is started
- communication of ideas and information by consulting with supervisors over the processing of digital images
- collecting, analysing and organising information by assessing the suitability of shutter speed, focal lengths and camera feature modes (eg flash, scrollage, icon menu, close-up, wide angle and telephoto capacity) for the photographic image required
- planning and organising activities by planning and coordinating digital image capture sessions
- teamwork when maintaining the production process in association with others
- mathematical ideas and techniques by choosing the correct shutter speed and focal length to capture digital images
- problem-solving skills applied by identifying and correcting problems of image quality
- use of technology applied by using digital camera technology

#### Required knowledge

- digital camera use
- pixel resolution and how this affects the resolution of the image
- relevance of the RAM capacity of a digital camera
- importance of shutter speeds and focal lengths
- safety requirements for handling and storing lithium batteries
- uploading and processing digital images using a computer
- uploaded data to a computer from the computer card interface/disk
- process for filing and creating photographic image files on the computer
- enhancing, crop and altering photographic images electronically
- considerations that need to be made to assess a digital photograph suitable for a newspaper, glossy brochure and CD-ROM
- manuals, safety and other documentation that are relevant to this task and where are they kept and information that is included in these documents

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>photographed image meets the quality and look/ feel requirements of the brief. The digital camera functions are used to capture the required image</li> <li>underlying skills of capturing a digital image using a digital camera should be transferable across the associated sectors of the printing industry</li> <li>demonstrate an ability to find and use information relevant to the task from a variety of information sources</li> <li>assess the capacity of, and operate, a digital camera to upload and process THREE digital images using industry hardware and software to deliver a designated quality of image outcome</li> <li>evidence for assessment may be gathered from assessment of the unit of competency alone or through an integrated assessment activity.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>assessment may take place on the job, off the job or a combination of these. Off the job assessment must be undertaken in a closely simulated workplace environment.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment method is appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning/observation combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. <p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and describe formats of digital video	1.1.The distinguishing features and uses of a range of digital video software are determined 1.2.Current video software appropriate to a range of given outcomes is selected 1.3.Limiting factors of computer hardware on video production for a specified job are determined 1.4.Differences of image quality and image size required to deliver the desired outcome are determined 1.5.Data input, processing and output relevant to video are explained 1.6.The formats employed to create a given computer video sequence for a specified outcome are analysed
2. Design digital video	2.1.Appropriate digital video software for the job is assessed and selected 2.2.Digital video editing software is used to combine video assets 2.3.Variations in video frame rates are controlled as required for the job to be undertaken 2.4.Time stamping techniques are applied to the video frames as required for the job to be undertaken 2.5.Digital video is saved using the appropriate file techniques
3. Edit digital video	3.1.Single and multiple video tracks are edited to achieve a defined outcome 3.2.Multiple tracks of digital video are joined according to job specifications 3.3.Digital effects are employed to modify and integrate digital video tracks according to job specifications 3.4.Time encoding is applied to single and multiple edited digital video tracks according to job specifications 3.5.A video track is inserted into a multimedia production sequence according to job specifications
4. Present a digital video sequence	4.1.Digital video is tested and combined with other <b><i>digital imaging, sound</i></b> and/or animation to create a multimedia sequence 4.2.The multimedia sequence including video is saved and presented to the client

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- OHS in relation to operating machinery such as safely switching off machinery before cleaning is started
- collecting, analysing and organising information by analysing formats to create a video sequence
- planning and organising activities by determining limiting factors of computer hardware
- mathematical ideas and techniques by determining differences of image quality and image size
- problem-solving skills by determining limiting factors of computer hardware
- use of technology by incorporating video into multimedia presentations

#### Required knowledge

- digital video formats
- distinguishing features of a selected video software program
- limiting factors of video production on computer
- differences of image quality and image size obtained
- contemporary video software
- combining given video assets
- features and differences between current video software packages.
- principles of video production
- how variations in video frame rates are controlled
- why time stamping techniques are applied to video frames
- digital medium for video
- considerations when combining digital video with other digital imaging, sound and/or animation to create a multimedia sequence
- manuals, safety and other documentation that are relevant to this task and where are they kept and information that is included in these documents

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• design, compile, edit and test multimedia sequences incorporating video, according to job specifications and the Performance Criteria</li> <li>• design, compile, edit and test at least TWO multimedia sequences incorporating video, according to job specifications and the Performance Criteria</li> <li>• evidence for assessment may be gathered from assessment of the unit of competency alone or through an integrated assessment activity.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• assessment may take place on the job, off the job or a combination of these. Off the job assessment must be undertaken in a closely simulated workplace environment.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment method is appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• a range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CUFMEM06A Design a multimedia product</li> <li>• CUFMEM07A Apply principles of visual design and communication to the development of a multimedia product.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Digital imaging</i></b> may include:	<ul style="list-style-type: none"> <li>titles/text, graphic images, 2D and 3D animation, 3D modelling, opticals, transitions such as dissolves, fade ins, fade outs, supers, subtitles, special effects.</li> </ul>
<b><i>Sound</i></b> may include:	<ul style="list-style-type: none"> <li>sound effects, music, atmospherics, dialogue, additional dialogue, eg re-recorded and narration.</li> </ul>
<b><i>Multimedia products or presentations</i></b> may include:	<ul style="list-style-type: none"> <li>educational game, promotional information, training, e-commerce and a range of others.</li> </ul>
<b><i>Industry standard software</i></b> may include:	<ul style="list-style-type: none"> <li>a wide range of current programs examples of which are Adobe Premier, QuickTime, Media 100. Note: these programs are constantly being upgraded and replaced and appropriate up-to-date programs should be selected.</li> </ul>
<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>computer-generated manually written, scripts, production schedules, manufacturer's specifications/instructions, contracts, edit decision lists (EDLs), list of sequences with relevant shot numbers, assembly order, marked-up scripts, marked-up transcripts, sound sheets including timecode log sheets for location sound recordings, wild line and sound effects log sheets.</li> </ul>
<b><i>Visual effects</i></b> may include:	<ul style="list-style-type: none"> <li>keyers to combine, DVEs to move and distort, colour corrections to modify, texture generation to add blur, trackers to follow parts of the picture, production of titles, production of optical effects, graphic images, opticals, transitions such as dissolves, fade ins, fade outs, supers, subtitles, special effects.</li> </ul>
<b><i>Video format</i></b> may include:	<ul style="list-style-type: none"> <li>VHS</li> <li>SVHS</li> <li>DVC</li> <li>Umatic</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• SP</li> <li>• Beta-cam</li> <li>• Digital Beta-cam.</li> </ul>
<i>Editing equipment</i> may include:	<ul style="list-style-type: none"> <li>• computer hardware</li> <li>• non-linear digital editing and graphics software programs</li> <li>• monitors</li> <li>• keyboard and mouse</li> <li>• external hard drive</li> <li>• external disk drive</li> <li>• additional computer hardware</li> <li>• source and record machines</li> <li>• computer software programs</li> <li>• graphics computer program</li> <li>• digital video effects system (DVE)</li> <li>• digital disk recorder (DDR)</li> <li>• video transfer recorder (VTR).</li> </ul>
<i>Editing consumable materials</i> may include:	<ul style="list-style-type: none"> <li>• computer disks</li> <li>• paper for hardcopy</li> <li>• compact discs.</li> </ul>
<i>Memory</i> may include:	<ul style="list-style-type: none"> <li>• disk</li> <li>• hard drive</li> <li>• internal</li> <li>• external.</li> </ul>

Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to use optical measuring instruments	1.1. Obtain <i>relevant legislation, codes, regulations and standards</i> and prepare for the given work 1.2. Notify <i>customer</i> for site access, security arrangements and location details of <i>optical system</i> and test purpose 1.3. Identify site <i>hazards</i> and notify appropriate personnel to make site safe 1.4. Devise and implement risk control measures of hazards with handling optical fibres and lasers in consultation with appropriate personnel 1.5. Prepare a <i>testing plan</i> indicating the <i>type of measurement</i> at the nominated <i>wavelength</i> and seek approval from customer 1.6. Select the appropriate <i>tools</i> and <i>test instruments</i> according to the required measurement and enterprise practice
2. Conduct optical measurements	2.1. Set up test instrument according to manufacturer's instructions according to occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> 2.2. Perform measurement using knowledge of appropriate testing techniques and in a safe manner to assess the performance of optical system and component 2.3. Record test results and compare with standard test specifications from manufacturer and enterprise guidelines 2.4. Evaluate the test results and report on the functionality of the optical component or equipment and the performance of the optical system
3. Document measurement results	3.1. Document test results for future reference and make recommendations on optimising component and system performance 3.2. Clean work site and make safe according to the enterprise requirements and to customer satisfaction 3.3. Notify appropriate personnel of job completion for sign off and present test documentations

## Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to liaise with customers and enterprise staff
- literacy skills to read and interpret work instructions and document work
- numeracy skills to gather and record data from measurements
- planning and organisational skills to plan, prioritise and manage own work
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - clean an optical connector to an acceptable industry standard
  - safely inspect an optical connector for contamination and determine if cleaning is necessary
  - safely operate:
    - optical loss test set (OLTS)
    - optical time domain reflectometer (OTDR)
    - PON power meter

### Required knowledge

- consequences of mating contaminated optical connectors
- downstream and upstream signals
- DWDM metro and long haul system architecture
- HFC architecture (optical section)
- logarithmic power levels (decibels, dBm)
- optical connector types
- optical fibre safety, practices, handling and theory
- optical spectrum limits, wavelengths used in various applications and International Telecommunications Union (ITU) grid
- optical transmitters and receivers
- PON architecture
- safe handling procedures with optical fibres
- transmission system line rates:
  - optical Ethernet
  - synchronous digital hierarchy (SDH)
- wavelength division multiplexing (WDM), coarse wavelength division

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

multiplexing (CWDM) and DWDM principles and optical multiplexers
--

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• measure optical power level</li> <li>• measure insertion loss of a passive device</li> <li>• measure end-to-end fibre loss (bi-directional)</li> <li>• measure splice loss</li> <li>• measure distance to fault, event, end of fibre using OTDR</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which optical measurements can be conducted</li> <li>• tools and equipment required for measurements</li> <li>• manufacturer's documentation for test instruments and equipment under test.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate performing optical measurements</li> <li>• review of a written reports and test results completed by the candidate</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTBWN3100A Work safely with live fibre to test and commission a fibre to the x installation</li> <li>• ICTBWN3205A Use optical and radio frequency measuring instruments.</li> </ul>

**EVIDENCE GUIDE**

	<p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant legislation, codes, regulations and standards*** may include:

- appropriate licences:
  - crane
  - EWP
  - forklift
  - winch
- Australian Construction Industry Forum (ACIF) standards and codes
- AS Communications Cabling Manual (CCM)

<b>RANGE STATEMENT</b>	
	<p>Volume 1</p> <ul style="list-style-type: none"> <li>• AS/NZS 3000:2007</li> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS IEC 61935.1:2006</li> <li>• AS/NZS IEC 61935.2:2006</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• cabling security codes and regulations</li> <li>• Environmental Protection Acts</li> <li>• OHS</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>
<i>Customer</i> may be:	<ul style="list-style-type: none"> <li>• asset manager</li> <li>• installation manager</li> <li>• maintenance manager</li> <li>• nominated customer representative</li> <li>• outage manager</li> <li>• project manager.</li> </ul>
<i>Optical system</i> may contain:	<ul style="list-style-type: none"> <li>• add-drop multiplexer</li> <li>• DWDM system</li> <li>• fibre hub</li> <li>• HFC network</li> <li>• optical line termination (OLT)</li> <li>• optical network termination (ONT)</li> <li>• optical amplifier</li> <li>• optical splitter.</li> </ul>
<i>Hazards</i> may include:	<ul style="list-style-type: none"> <li>• building debris</li> <li>• earth potential rise</li> <li>• glass fibre</li> <li>• live power lines</li> <li>• manual handling</li> <li>• mud and water</li> <li>• natural gas and other gas build up</li> <li>• optical fibre cable may contain hazardous light</li> <li>• radio frequency (RF) equipment emitting radiation</li> <li>• remote power feeding services which operate</li> </ul>

<b>RANGE STATEMENT</b>	
	at above telecommunications network voltage <ul style="list-style-type: none"> <li>• vermin.</li> </ul>
<i>Testing plan</i> may include:	<ul style="list-style-type: none"> <li>• correct test set-up</li> <li>• recording and evaluation of measurements</li> <li>• test layout</li> <li>• test procedures</li> <li>• test purpose</li> <li>• test sites and location</li> <li>• type of measurements</li> <li>• use of appropriate test equipment.</li> </ul>
<i>Type of measurement</i> may include:	<ul style="list-style-type: none"> <li>• end-to-end continuity using visual fault locator</li> <li>• fibre loss (bi-directional)</li> <li>• insertion loss:               <ul style="list-style-type: none"> <li>• coupler</li> <li>• filter</li> <li>• optical splitter</li> <li>• WDM</li> </ul> </li> <li>• optical power level at:               <ul style="list-style-type: none"> <li>• drop terminal</li> <li>• OLT</li> <li>• ONT</li> <li>• optical transmitter</li> <li>• patch panel</li> </ul> </li> <li>• optical return loss (ORL)</li> <li>• splice loss</li> <li>• total end-to-end loss, including splices and connectors.</li> </ul>
<i>Wavelengths</i> may include:	<ul style="list-style-type: none"> <li>• 850 nm</li> <li>• 1310 nm</li> <li>• 1490 nm</li> <li>• 1550 nm.</li> </ul>
<i>Tools</i> may include:	<ul style="list-style-type: none"> <li>• alcohol swabs</li> <li>• dry type cleaning cassette for optical connectors</li> <li>• hand tools</li> <li>• lint-free dry wipes</li> <li>• microscope for examining optical connector with:               <ul style="list-style-type: none"> <li>• integral safety infra-red filter</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• video microscope display</li> <li>• optical connector adaptors               <ul style="list-style-type: none"> <li>• FC to LC</li> <li>• FC to SC</li> <li>• FC to ST</li> <li>• SC to ST</li> </ul> </li> <li>• optical reference cable</li> <li>• optical termination.</li> </ul>
<i>Test instruments</i> may include:	<ul style="list-style-type: none"> <li>• bi-directional automated optical loss test set</li> <li>• hand-held optical power meter</li> <li>• hand-held optical source</li> <li>• launch cable for OTDR</li> <li>• OFI-FTTx active ONT detector</li> <li>• OLTS</li> <li>• ORL test set</li> <li>• OTDR multimode</li> <li>• OTDR single mode</li> <li>• PON - OTDR</li> <li>• PON meter</li> <li>• visual fault locator (VFL).</li> </ul>
<i>OHS and environmental requirements</i> may include:	<ul style="list-style-type: none"> <li>• decommissioning and isolating worksite and lines prior to commencement</li> <li>• identifying other services, including power and gas</li> <li>• personal protective equipment:               <ul style="list-style-type: none"> <li>• earmuffs</li> <li>• gloves</li> <li>• head protection</li> <li>• masks</li> <li>• protective suits</li> <li>• safety boots</li> <li>• safety glasses</li> </ul> </li> <li>• safe working practices, such as the safe use and handling of:               <ul style="list-style-type: none"> <li>• chemicals</li> <li>• materials</li> <li>• tools and equipment</li> <li>• work platforms</li> </ul> </li> <li>• safety equipment:</li> </ul>

**RANGE STATEMENT**

### **Modification History**

Not Applicable

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to install optical fibre splitters in fibre distribution hubs (FDH) as part of a fibre to the premises (FTTP) network.</p> <p>Optical networks and FTTP are part of the strategies by service providers using wave division multiplexing (WDM) to deliver very high speed broadband capacity through the access network for the National Broadband Network (NBN) initiative.</p> <p>Assessment by a TITAB registered assessor is recommended.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Technicians and cable installers who install and maintain optical network cables and equipment in Access Networks apply the skills and knowledge in this unit to provide services in Next Generation Networks (NGN) using emerging technologies.</p> <p>NGN services include internet protocol TV (IPTV), video on demand (VoD), interactive TV, mesh networks and cloud computing.</p>
---------------------------------------	--

## Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up and prepare for installation	1.1. Obtain <i>relevant legislation, codes, regulations and standards</i> for compliance when conducting work 1.2. Scope the work by obtaining project plan from <i>appropriate personnel</i> and arrange for site access to comply with security arrangements 1.3. Notify appropriate personnel of identified <i>safety hazards</i> at the work site 1.4. Determine type of <i>FDH enclosure</i> and <i>optical splitter module</i> from project plan and identify splitter installation requirements using work instructions 1.5. Obtain <i>tools and safety equipment</i> and material to perform tasks safely and efficiently 1.6. Select and use required protective equipment and make site safe and secure for installation work 1.7. Obtain splitter module and visually inspect for <i>splitter module damage</i> and replace if necessary
2. Install splitter module in FDH	2.1. Follow occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> for the given work and identify and avoid <i>other services</i> 2.2. Open the enclosure and assess the suitability of the FDH according to the project plan 2.3. Locate next available slot in splitter module area of FDH for installation 2.4. Insert splitter module and secure according to manufacturer's specifications 2.5. Inspect installed splitter module and surrounding area for completeness of job
3. Prepare and connect splitter input fibres to feeder cable	3.1. Locate feeder port to be connected and remove protective cover in preparation 3.2. Use an optical power meter to verify feeder port is not active 3.3. Clean the adapter according to manufacturer's specifications and route splitter input fibre to correct feeder port 3.4. Remove dust cap and clean end face according to manufacturer's specifications to prevent possible damage from mating <i>contaminated connectors</i> 3.5. Connect input fibre to feeder port and record connection according to organisational policy
4. Connect output fibres	4.1. Determine output fibre to be connected and required

ELEMENT	PERFORMANCE CRITERIA
and test splitter	adapter in distribution field 4.2.Clean adapter and fibre end-face according to manufacturer's specifications 4.3.Route output fibre and connect with adapter in distribution field 4.4.Test operation of optical splitter for optical power levels at the operating <i>WDM optical wavelengths</i> 4.5.Record connections, test results and park unused fibre leads for safety reasons according to organisational policy
5. Clean up work site	5.1.Seal any internal enclosures and close FDH 5.2.Remove installation waste and debris from worksite and dispose of according to environmental requirements 5.3.Notify appropriate personnel of job completion and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to work effectively within a group
- literacy skills to interpret work instructions
- numeracy skills to gather and record data from measurements
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - clean optical end face
  - connect optical fibre to feeder port
  - operate WDM test equipment and optical power meter

**REQUIRED SKILLS AND KNOWLEDGE**

- recognise optical devices in a communication system

**Required knowledge**

- organisational policy and procedures
- personal safety issues
- propagation of light in optical communication systems
- role of transmitters and receivers in optical communication systems
- site engineering
- specific OHS requirements relating to the handling of optical fibre and the use of laser light sources
- WDM applications
- workplace and industry environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use optical power test equipment</li> <li>• measure optical signals at three WDM wavelengths</li> <li>• install splitter in the enclosure</li> <li>• connect input and out optical fibres to the splitter</li> <li>• test optical splitter</li> <li>• complete connection recording</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a telecommunications operations site where installation of optical fibre splitters in FDH may be conducted</li> <li>• a fibre distribution hub and relevant optical splitter</li> <li>• use of tools, equipment and personal protective equipment currently used in industry</li> <li>• relevant regulatory and equipment documentation that impacts on work activities.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate installing optical fibre splitters in FDH</li> <li>• direct observation of candidate applying all related OHS requirements and work practices</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, e.g.</p> <ul style="list-style-type: none"> <li>• ICTBWN3090A Install lead-in module and cable for fibre to the premises</li> <li>• ICTBWN3100A Work safely with live fibre to test</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>and commission a fibre to the x installation.</p> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Relevant legislation, codes, regulations and standards</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• AS Communications Cabling Manual (CCM) Volume 1</li> <li>• AS/NZS 3000:2007</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS IEC 61935.1:2006</li> <li>• AS/NZS IEC 61935.2:2006</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• cabling security codes and regulations</li> <li>• Environmental Protection Acts</li> <li>• ISO Draft 11801 (International)</li> <li>• OHS</li> <li>• regulated or industry codes of practice including appropriate Australian Communications and Media Authority (ACMA) standards</li> <li>• relevant Institute of Electrical and Electronics Engineers (IEEE) standards</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>
<i>Appropriate personnel</i> may be:	<ul style="list-style-type: none"> <li>• consultant</li> <li>• project engineer</li> <li>• project supervisor</li> <li>• site supervisor.</li> </ul>
<i>Safety hazards</i> may refer to:	<ul style="list-style-type: none"> <li>• access points that may contain:                             <ul style="list-style-type: none"> <li>• hazardous light (non-visible laser)</li> <li>• radio frequency (RF) emission</li> </ul> </li> <li>• active lasers with no safety labels</li> <li>• active optical fibres</li> <li>• contact with remote power feed</li> <li>• electrical supply that require mandatory separation from communications cable</li> <li>• exposed fibres</li> <li>• unsafe support structures</li> <li>• unsafe weather:                             <ul style="list-style-type: none"> <li>• heavy rains</li> <li>• high winds</li> <li>• severe heat or cold</li> <li>• thunderstorms.</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
<i>FDH enclosure</i> may include:	<ul style="list-style-type: none"> <li>• external cabinet</li> <li>• internal cabinet.</li> </ul>
<i>Optical splitter module</i> may include:	<ul style="list-style-type: none"> <li>• 4 port</li> <li>• 8 port</li> <li>• 16 port</li> <li>• 32 port.</li> </ul>
<i>Tools and safety equipment</i> may include:	<ul style="list-style-type: none"> <li>• personal protective equipment</li> <li>• safety equipment</li> <li>• test equipment: <ul style="list-style-type: none"> <li>• passive optical network (PON) meter</li> <li>• optical time domain reflectometer (OTDR)</li> </ul> </li> <li>• tools: <ul style="list-style-type: none"> <li>• fibre cleaning kit</li> <li>• fibre splicer</li> <li>• labeller</li> <li>• screw drivers</li> <li>• spanners</li> <li>• tagging tool.</li> </ul> </li> </ul>
<i>Splitter module damage</i> may include:	<ul style="list-style-type: none"> <li>• broken connector</li> <li>• kinks in fibre leads</li> <li>• no end caps on connectors</li> <li>• physical damage to module body.</li> </ul>
<i>OHS and environmental requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• identifying other services, including power and gas</li> <li>• personal protective equipment: <ul style="list-style-type: none"> <li>• earmuffs</li> <li>• gloves: <ul style="list-style-type: none"> <li>• leather</li> <li>• plastic</li> <li>• rubber</li> </ul> </li> <li>• head protection</li> <li>• masks</li> <li>• protective suits</li> <li>• safety boots</li> <li>• safety glasses</li> </ul> </li> <li>• safe working practices, such as the safe use and handling of: <ul style="list-style-type: none"> <li>• chemicals</li> </ul> </li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up and prepare for installation	1.1. Obtain <b>relevant legislation, codes, regulations and standards</b> for compliance when conducting work 1.2. Scope the work by obtaining project plan from <b>appropriate personnel</b> and arrange for site access to comply with security arrangements 1.3. Notify appropriate personnel of identified <b>safety hazards</b> at the work site 1.4. Determine type of <b>lead-in module</b> and cable from project plan and identify <b>installation requirements</b> using work instructions 1.5. Obtain <b>tools and safety equipment</b> and material to perform tasks safely and efficiently 1.6. Select and use required protective equipment and make site safe and secure for installation work 1.7. Obtain lead-in module and visually inspect for <b>lead-in module damage</b> and replace if necessary
2. Install lead-in module in enclosure	2.1. Follow occupational health and safety ( <b>OHS</b> ) and <b>environmental requirements</b> for the given work and identify and avoid <b>other services</b> 2.2. Identify position in <b>enclosure</b> to secure module and install mounting bracket according to manufacturer's specifications 2.3. Splice lead-in module tail to distribution joint 2.4. Attach lead-in module to mounting bracket and secure in position
3. Install optical fibre lead-in cable to premises	3.1. Unpack and prepare lead-in cable according to manufacturer's specifications 3.2. Haul optical fibre lead-in cable to premises observing <b>maximum strain</b> on cable for underground installation 3.3. Coil excess cable length within enclosure 3.4. Install aerial lead-in using catenary and bearer wire to meet relevant height and minimum sag requirements
4. Terminate the lead-in cable at the premises	4.1. Access the optical network terminating (ONT) unit to expose lead-in cable to retrieve fibre and connector 4.2. <b>Clean ONT adapter and connector</b> according to manufacturer's specifications 4.3. Mate fibre connector with ONT adapter ensuring

ELEMENT	PERFORMANCE CRITERIA
	<p>free of <i>contaminants</i></p> <p>4.4.Route fibre cable within ONT and secure in position</p> <p>4.5.Test operation of lead-in at the ONT for optical power levels at the designated operating <i>WDM optical wavelength</i></p> <p>4.6.Record connections, test results and park unused fibre leads for safety reasons according to organisational policy</p>
5. Clean up work site	<p>5.1.Seal ONT and enclosure</p> <p>5.2.Remove installation waste and debris from worksite and dispose of according to environmental requirements</p> <p>5.3.Notify appropriate personnel of job completion and obtain sign off</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to work effectively within a group
- literacy skills to interpret work instructions
- numeracy skills to gather and record data from measurements
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - clean optical end face
  - connect optical fibre to feeder port
  - operate WDM test equipment and optical power meter
  - recognise optical devices in a communication system
  - splice optical fibre lead in tail to distribution joint

**REQUIRED SKILLS AND KNOWLEDGE****Required knowledge**

- licence requirements for working at heights
- organisational policy and procedures
- personal safety issues
- propagation of light in optical communication systems
- role of transmitters and receivers in optical communication systems
- site engineering
- specific OHS requirements relating to the handling of optical fibre and the use of laser light sources
- WDM applications
- workplace and industry environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use optical power test equipment</li> <li>• measure optical signals at three WDM wavelengths</li> <li>• install lead-in module in the enclosure for both an aerial and underground installation</li> <li>• demonstrate successful completion of the procedures</li> <li>• complete connection recording</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to a telecommunications operations site where installation of lead-in module and cable for FTTP may be conducted</li> <li>• a fibre lead-in module, distribution pit, premises conduit and relevant ONT</li> <li>• use of tools, equipment and personal protective equipment currently used in industry</li> <li>• relevant regulatory and equipment documentation that impacts on work activities.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing lead-in module and cable for FTTP applying all related OHS requirements and work practices</li> <li>• direct observation of the candidate measuring optical signals at three WDM wavelengths</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplaces and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTBWN3088A Install optical fibre splitters in fibre</li> </ul>

**EVIDENCE GUIDE**

	<p>distribution hubs</p> <ul style="list-style-type: none"> <li>• ICTBWN3100A Work safely with live fibre to test and commission a fibre to the x installation.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant legislation, codes, regulations and standards*** may include:

- appropriate licences:
  - winch
  - crane

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• forklift</li> <li>• EWP</li> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• AS Communications Cabling Manual (CCM) Volume 1</li> <li>• AS/NZS 3000:2007</li> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS IEC 61935.1:2006</li> <li>• AS/NZS IEC 61935.2:2006</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• cabling security codes and regulations</li> <li>• Environmental Protection Acts</li> <li>• OHS</li> <li>• road and traffic control legislation and codes</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>

## **ICTBWN3100A Work safely with live fibre to test and commission a fibre to the x installation**

### **Modification History**

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to work safely on a live optical fibre installation to test and commission a wave division multiplexing (WDM) system or connect a splitter for fibre to the x (FTTx) deployment.</p> <p>Optical networks and FTTx are part of the strategies by service providers using WDM to deliver very high speed broadband capacity through the access network for the National Broadband Network (NBN) initiative.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>Technicians and cable installers who install and maintain optical network cables and equipment in Access Networks apply the skills and knowledge in this unit to provide services in Next Generation Networks (NGN) using emerging technologies.</p> <p>NGN services include internet protocol TV (IPTV), video on demand (VoD), interactive TV, mesh networks and cloud computing.</p>
--------------------------------	--

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units		
	ICTOHS2170A	Follow Occupational Health and Safety and environmental policy and procedures

## Employability Skills Information

Employability skills	
	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Set up and prepare for working with live fibre</p>	<p>1.1. Obtain <b>relevant legislation, codes, regulations and standards</b> for compliance when conducting work</p> <p>1.2. Scope the work by obtaining project plan from <b>appropriate personnel</b> and arrange for site access to comply with security arrangements</p> <p>1.3. Notify appropriate personnel of identified <b>safety hazards</b> at the worksite</p> <p>1.4. Determine type of <b>FTTx equipment, components of optical distribution network (ODN) and WDM components</b> from project plan for testing and commissioning</p> <p>1.5. Obtain <b>tools and safety equipment</b> and materials to perform tasks safely and efficiently</p> <p>1.6. Select and use required protective equipment and make site safe and secure for commissioning work</p> <p>1.7. Create a safe working environment by following <b>safe work practices</b> and identifying <b>optical fibre hazards</b> that could cause <b>possible injuries</b> when handling optical fibres and laser-based equipment</p>
<p>2. Connect a splitter input fibre to the feeder cable</p>	<p>2.1. Follow occupational health and safety (<b>OHS</b>) and <b>environmental requirements</b> for the given work and identify and avoid <b>other services</b></p> <p>2.2. Locate the feeder fibre port to be connected</p> <p>2.3. Determine the state (live or not) of the fibre port to be connected and notify transmitter to ensure that power is turned off at the source if the fibre port is live</p> <p>2.4. Connect up connectorised splitter input fibres as instructed by the manufacturer</p> <p>2.5. Arrange for power to be turned back on to the newly connected feeder port</p>
<p>3. Perform live WDM commission testing of a ODN installation used in FTTx network</p>	<p>3.1. Locate the appropriate test points in the ODN from manufacturer's instructions for WDM testing</p> <p>3.2. Test live wavelengths for the WDM tests following safety precautions</p> <p>3.3. Test the optical signal strengths for the <b>operating wavelengths</b> incoming into the optical network termination (ONT) and determine if signal strengths are within the <b>range of acceptable power levels</b></p> <p>3.4. Test the losses between the WDM outputs and the individual LM for each wavelength and determine if</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>within <i>maximum and minimum power losses</i></p> <p>3.5. Conduct all <i>acceptance tests</i> as specified by manufacturer</p> <p>3.6. Record and tabulate all tests results for commissioning requirements</p>
4. Clean up work site	<p>4.1. Seal and secure any enclosures and cabinets</p> <p>4.2. Remove waste and debris from worksite and dispose of according to environmental requirements</p> <p>4.3. Notify appropriate personnel of job completion and obtain sign off</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to work effectively within a group
- literacy skills to interpret work instructions
- numeracy skills to gather and record data from measurements
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - clean optical end face
  - connecting optical fibre to feeder port
  - operate WDM test equipment and optical power meter
  - recognise optical devices in a communication system

#### Required knowledge

- organisational policy and procedures
- personal safety issues
- propagation of light in optical communication systems

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

- |   |
|---|
| <ul style="list-style-type: none"><li>• role of transmitters and receivers in optical communication systems</li><li>• site engineering</li><li>• specific OHS requirements relating to the handling of optical fibre and the use of laser light sources</li><li>• WDM applications</li><li>• workplace and industry environment</li></ul> |

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use optical power test equipment</li> <li>• evaluate tests results</li> <li>• connect input and output optical fibres to the splitter</li> <li>• conduct live tests measuring optical signals at three WDM wavelengths on optical devices</li> <li>• conduct acceptance tests for commissioning</li> <li>• demonstrate successful completion of the procedures</li> <li>• complete connection recording</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a telecommunications operations site where an FTTP installation may be tested and commissioned</li> <li>• access to a WDM system and relevant optical splitter</li> <li>• use of tools, equipment and personal protective equipment currently used in industry</li> <li>• relevant regulatory and equipment documentation that impacts on work activities.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate using optical power test equipment applying all related OHS requirements and work practices</li> <li>• direct observation of the candidate conducting live tests measuring optical signals at three WDM wavelengths</li> <li>• direct observation of the candidate conducting acceptance tests for commissioning</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

## EVIDENCE GUIDE

### assessment

industry sector, workplace and job role is recommended, for example:

- ICTBWN3082A Perform tests on optical communication system and components
- ICTBWN3088A Install optical fibre splitters in fibre distribution hubs
- ICTBWN3090A Install lead-in module and cable for fibre to the premises.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

<b>RANGE STATEMENT</b>	
regional contexts) may also be included.

## **ICTCBL2065A Splice and terminate optical fibre cable for carriers and service providers**

### **Modification History**

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to splice and terminate optical fibre cable within an optical telecommunications transmission environment.</p> <p>This work is essential in provisioning of National Broadband Network (NBN) infrastructure for high speed and high bandwidth transmissions.</p> <p>Assessment by a TITAB registered assessor is recommended.</p> <p>All customer cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabler. All cablers are required to register with an Australian Communications and Media Authority (ACMA)-accredited registrar.</p>
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>Technical staff who splice and terminate optical fibre cable for telecommunications projects apply the skills and knowledge in this unit.</p> <p>They may carry out new installations, upgrade an optical backbone or access network provisioning for greater bandwidth and capacity required by emerging technology convergence for Next Generation Networks (NGN).</p> <p>This unit may be applied to commercial or industrial fibre to the premises (FTTP) installations.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for splicing	<p>1.1. Select safety equipment to protect self and public according to enterprise guidelines and occupational health and safety (<i>OHS practices</i>)</p> <p>1.2. Confirm layout of job using installation according to <i>physical conditions</i> at site and <i>relevant legislation, codes, regulations and standards</i></p> <p>1.3. Inform appropriate personnel of identified <i>hazards</i> on worksite</p> <p>1.4. Locate other services from <i>relevant authorities</i> according to enterprise guidelines and safe practices</p> <p>1.5. Test for <i>dangerous gases</i> and place <i>guards</i> around open manholes following <i>OHS and environmental requirements</i></p> <p>1.6. Obtain approval for alterations to the design according to enterprise guidelines</p>
2. Check existing optical fibre cable	<p>2.1. Verify that cable was installed according to the installation plan and visually inspect <i>cable</i> for signs of sheath damage</p> <p>2.2. Maintain minimum bend ratios according to manufacturer's specifications to prevent cable damage and signal degradation</p> <p>2.3. Secure cable according to safe industry practice to avoid cable and sheath damage</p>
3. Splice optical fibre cable	<p>3.1. Verify fibre is not live using <i>appropriate equipment</i> to maintain safe working practice and ensure correct fibre has been identified</p> <p>3.2. Prepare cable end to expose <i>optical fibres</i> according to splicing method and manufacturer's specifications</p> <p>3.3. Prepare and <i>splice fibres</i> using safe industry practice according to enterprise specifications</p> <p>3.4. Test the splice joint to manufacturer's and design requirements</p>
4. Terminate optical fibre cable	<p>4.1. Select connector unit to suit terminating frame according to design specifications</p> <p>4.2. Terminate the cable using the <i>type of termination</i> specified in the plan and according to manufacturer's specifications</p> <p>4.3. Test the termination for transmission loss and strength and re-terminate if the transmission loss exceeds the manufacturer's specifications</p>

ELEMENT	PERFORMANCE CRITERIA
	4.4. Install protection devices on connectors and fibres to protect from exposure and contaminants 4.5. Label and lay up cables in enclosure according to manufacturer's instructions and enterprise guidelines
5. Finish job and report	5.1. Remove waste and reinstate site according to enterprise guidelines 5.2. Prepare reports including test results and alterations to plans according to enterprise policy 5.3. Notify client of work completion and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - liaise with internal and external personnel on technical and operational matters
  - relate to work associates, supervisors, team members and clients
- literacy skills to interpret technical documentation such as equipment manuals, specifications and requirements for optical fibre cable installation
- numeracy skills to take and analyse measurements
- planning and organisational skills to organise and maintain equipment
- problem solving skills to solve equipment and logistics problems
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - apply work site OHS
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work safely with optical fibre and lasers
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - install customer access network (CAN) cable
  - operate test equipment to perform measurements on optical fibre
  - perform fault clearance

## **REQUIRED SKILLS AND KNOWLEDGE**

- use diagnostic equipment
- use optical fibre jointing techniques
- use specialised tools and test equipment
- use hand and power tools

### **Required knowledge**

- causes of signal strength loss in optical fibre
- colour coding of fibres
- detailed knowledge of AS/NZS 2211:2006 Safety of laser products (parts 1 and 2)
- features and operating requirements of test equipment for optical fibre cable
- industry and organisational policy and procedures when splicing optical fibre cable
- information required to operate equipment according to a test specification
- manufacturer's requirements for safe operation of optical fibre equipment
- safety precautions when working with laser based systems
- specific OHS requirements relating to the activity and site conditions
- techniques for types of termination including:
  - direct termination
  - fusion splicing
  - mechanical splicing
- test methods and performance requirements
- types of optical cable and termination
- workplace and industry environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• splice, terminate and test optical fibre cable applying safety precautions when working with laser -based systems</li> <li>• splice at least 12 fibres and house these in splicing cassettes and trays within industry recognised enclosures according to manufacturer's instructions</li> <li>• install a connector type for fusion, mechanical splicing and direct terminations</li> <li>• complete relevant documentation to manufacturer's and design requirements</li> <li>• provide report documenting the installation and test results to client</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites where splicing and termination of optical fibre cable may be conducted</li> <li>• use of optical fibre testing equipment currently used in industry</li> <li>• relevant regulatory and equipment documentation that impact on optical fibre cable installation activities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of a hands-on project completed by the candidate</li> <li>• review of an oral and written report, including installation and test results</li> <li>• direct observation of the candidate carrying out splicing of optical fibre within an optical communication system.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

## EVIDENCE GUIDE

### assessment

industry sector, workplace and job role is recommended, for example:

- ICTCBL3010A Install and terminate optical fibre cable on customer premises.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***OHS practices*** may relate to:

- determining that optical fibre cable is not live according to guidelines and standards

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• handling optical fibre cable in a safe manner to avoid risk of injury</li> <li>• labelling of fibre cable and laser devices</li> <li>• locating and identifying adjoining services according to enterprise guidelines and OHS practices</li> <li>• observing AS/NZS 2211:2006 Safety of laser products (parts 1 and 2)</li> <li>• testing for presence of dangerous gases according to enterprise guidelines.</li> </ul>
<i>Physical conditions</i> may relate to:	<ul style="list-style-type: none"> <li>• above ground</li> <li>• in cabinet</li> <li>• in joint enclosure.</li> </ul>
<i>Relevant legislation, codes, regulations and standards</i> may include:	<ul style="list-style-type: none"> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• AS Communications Cabling Manual (CCM) Volume 1</li> <li>• AS/NZS 2211:2006 Safety of laser products (parts 1 and 2)</li> <li>• AS/NZS 3000:2007</li> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• cabling security codes and regulations</li> <li>• OHS</li> <li>• regulated or industry codes of practice including ACMA technical standards</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>
<i>Hazards</i> may include:	<ul style="list-style-type: none"> <li>• earth potential rise (EPR)</li> <li>• optical cable: <ul style="list-style-type: none"> <li>• bare fibres</li> <li>• hazardous laser light</li> </ul> </li> <li>• remote power feeding.</li> </ul>
<i>Relevant authorities</i> may include:	<ul style="list-style-type: none"> <li>• cable location services (Dial Before you Dig)</li> <li>• environment protection</li> <li>• local government</li> <li>• private owners</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• utility providers such as:                             <ul style="list-style-type: none"> <li>• electricity</li> <li>• fire services</li> <li>• gas</li> <li>• other telecommunications providers</li> <li>• water.</li> </ul> </li> </ul>
<i>Dangerous gases</i> may include:	<ul style="list-style-type: none"> <li>• asphyxiating gas</li> <li>• carbon dioxide</li> <li>• carbon monoxide</li> <li>• combustible</li> <li>• natural gas</li> <li>• noxious gas.</li> </ul>
<i>Guards</i> may include:	<ul style="list-style-type: none"> <li>• barricades</li> <li>• plates</li> <li>• temporary fencing.</li> </ul>
<i>OHS and environmental requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• identifying other services, including power and gas</li> <li>• need to decommission and isolate worksite and lines prior to commencement</li> <li>• personal protective clothing:                             <ul style="list-style-type: none"> <li>• earmuffs</li> <li>• gloves:                                     <ul style="list-style-type: none"> <li>• leather</li> <li>• plastic</li> <li>• rubber</li> </ul> </li> <li>• head protection</li> <li>• kneepads</li> <li>• masks</li> <li>• protective suits</li> <li>• safety boots</li> <li>• safety glasses</li> </ul> </li> <li>• safe working practices, such as the safe use and handling of:                             <ul style="list-style-type: none"> <li>• asbestos</li> <li>• chemicals</li> <li>• materials</li> <li>• tools and equipment</li> <li>• work platforms</li> </ul> </li> <li>• safety equipment:</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• flashing lights</li> <li>• gas and other hazard detection equipment</li> <li>• safety barriers</li> <li>• trench guards</li> <li>• warning signs and tapes</li> <li>• witches hats</li> <li>• suitable light and ventilation</li> <li>• special access requirements</li> <li>• environmental considerations:                             <ul style="list-style-type: none"> <li>• clean-up protection</li> <li>• stormwater protection</li> <li>• waste management.</li> </ul> </li> </ul>
<i>Cable</i> may include:	<ul style="list-style-type: none"> <li>• air blown</li> <li>• armoured</li> <li>• external</li> <li>• internal</li> <li>• loose tube</li> <li>• tight buffered.</li> </ul>
<i>Appropriate equipment</i> may include:	<ul style="list-style-type: none"> <li>• hand-held optical power meter</li> <li>• OFI-fibre to the x (FTTx) active optical network terminal (ONT) detector</li> <li>• passive optical network (PON) meter</li> <li>• optical time domain reflectometer (OTDR).</li> </ul>
<i>Optical fibres</i> may include:	<ul style="list-style-type: none"> <li>• multi-mode</li> <li>• polymer</li> <li>• single mode.</li> </ul>
<i>Splice fibres</i> may relate to:	<ul style="list-style-type: none"> <li>• fusion splice</li> <li>• mechanical splice</li> <li>• preparing connection ends to a smooth flat surface to ensure no optical path redirection from joint</li> <li>• removing all coatings from exposed optical fibre and removing all possible contaminants.</li> </ul>
<i>Type of termination</i> may include:	<ul style="list-style-type: none"> <li>• direct termination</li> <li>• fusion splicing</li> <li>• mechanical splicing.</li> </ul>

<b>Co-requisite units</b>	

## Competency field

<b>Competency field</b>	Cabling
-------------------------	---------

## **ICTCBL2136A Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule**

### **Modification History**

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to safely install, maintain and modify customer premises communications cabling required according to Australian Communications and Media Authority's (ACMA) 'Restricted' Cabling Provider Rule.</p> <p>Restricted cabling is used in typical domestic premises, small offices, home offices and small business premises. Restricted cabling can install cable in large commercial and industrial premises provided the cabling is behind a compliant device and is not via jumperable distributors or patch panels.</p> <p>The telecommunications Cabling Provider Rules (CPRs) 2000 place various limitations on Restricted cabling. These include a prohibition on them performing cabling work where they may have access to a reticulated electrical supply that exceeds typical domestic single-phase and three-phase electrical supply voltages - nominally 240 volts AC (for single phase) or 415 volts AC (for three-phase).</p> <p>Assessment by a TITAB registered assessor is recommended.</p> <p>All customer cabling work in the telecommunications, fire, security and data industries must be performed by a registered cabling provider. All cabling providers are required to register with an ACMA-accredited registrar.</p>
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to customer cabling terminated on sockets and network termination devices (NTD). It applies to the installation, maintenance and modification of indoor and external cabling.</p> <p>Customer cabling, for the purpose of the 'Restricted' Cabling Provider Rule, may be used to connect devices for a range of applications including telecommunications, simple data and computer use, security alarm panels and fire control panels.</p>
--------------------------------	--

	<p>Cabling may be metallic or optical fibre and may be aerial or underground.</p> <p>The cabling task may be a new cable installation or upgrade of cable capacity for an existing network or subsystem for convergence to Next Generation Networks (NGN) applications.</p> <p>The cabling installer may provide services in telephony, voice over internet protocol (VoIP), internet protocol TV (IPTV) and computer data over a single metallic customer cable or optical fibre cable in a specific customer location.</p>
--	--

## Licensing/Regulatory Information

## Pre-Requisites

Prerequisite units		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Work within the constraints imposed by customer premises and ACMA regulatory environment</p>	<p>1.1. Prepare for <i>restricted cabling work</i> within the <i>regulatory environment, cabling environment, cable type, cable identification, termination systems, earthing and protection, records and relevant legislation, codes, regulations and standards</i></p> <p>1.2. Identify <i>building infrastructure</i> which places critical constraints on <i>cabling</i></p> <p>1.3. Develop <i>strategies to manage other infrastructure</i> in relation to cabling</p> <p>1.4. Notify appropriate personnel of <i>safety hazards</i> at the cabling work site</p>
<p>2. Manage remote power feed</p>	<p>2.1. Identify and avoid the risks posed by contact with remote power feeding services when performing cabling activity</p> <p>2.2. Make site safe by identifying remote power feeding services which operate at above telecommunications network voltage (TNV) inside customer premises</p>
<p>3. Install cables and protective earth wires</p>	<p>3.1. Install cables according to manufacturer's application specifications, including tension and bending stress requirements</p> <p>3.2. Identify and avoid sources of possible damage to cable, including hot pipes, sharp edges and cable burn</p> <p>3.3. Allow sufficient excess at cable ends to facilitate <i>termination</i></p> <p>3.4. Place and secure cable to maintain safety and interference segregation according to legislative and industry standards</p> <p>3.5. Install cable ties with correct tension to prevent cable sheath damage or transmission impairment and trimmed flush to prevent risk of personal damage</p> <p>3.6. Install underground cables to minimum depth of cover and segregation from hazardous electrical and other services according to AS/ACIF S009:200</p> <p>3.7. Install underground cables excluding blown fibre tube systems to incorporate a blocking agent within the cable to prevent the ingress of water</p> <p>3.8. Install aerial cables to minimum clearance, segregation from hazardous electrical and other services and minimum height requirements according to AS/ACIF S009:2006</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.9. Install over-voltage protection devices according to AS/ACIF S009:2006 to all cable pairs, where required, to suppress voltage surges and protect from earth potential rise (EPR) hazards and protectively earth the devices</p> <p>3.10. Protect earth wire insulation against damage and segregate protective earths according to relevant legislative and industry standards</p>
<p>4. Terminate and test cables and earth wires</p>	<p>4.1. Remove cable sheath to allow for correct termination length and without damage to underlying conductors and their insulation</p> <p>4.2. Install NTD terminating modules according to manufacturer's specifications and cable pairs neatly and sequentially fanned for termination</p> <p>4.3. Terminate conductors according to recommended colour code sequence using appropriate termination tools in the manufacturer's specified manner</p> <p>4.4. Earth cable shield, if applicable, to manufacturer's specifications, relevant industry codes of practice and AS/ACIF S009:2006</p> <p>4.5. Conduct visual inspection to confirm termination colour code sequence has been followed prior to end-to-end testing of wire and pair termination integrity</p> <p>4.6. Terminate earth wires with connectors recommended by manufacturers according to accepted industry codes of practice and AS/ACIF S009:2006</p> <p>4.7. Maintain earth wire continuity throughout and observe interface requirements with electrical systems</p> <p>4.8. Test earthing installation for continuity, insulation resistance and conductive resistance according to accepted industry standards including AS/ACIF S009:2006</p> <p>4.9. Confirm compatibility of alterations with existing systems and test new work both in isolation and when integrated with existing systems</p>
<p>5. Inspect cable route to ensure correct separations</p>	<p>5.1. Inspect <i>separations</i> along the entirety of the cable route and rectify separations which do not comply with regulations</p> <p>5.2. Install barriers to achieve separations where sufficient spatial separation cannot be met</p>

ELEMENT	PERFORMANCE CRITERIA
6. Create records	6.1. Provide the client with a job sign-off, telecommunications cabling advice form, at the completion of each cabling task 6.2. Complete NTD record cards for the work undertaken
7. Monitor work activity	7.1. Supervise cablers not holding appropriate registration for the task to ensure cabling activity is according to legislative requirements for safety and network integrity including AS/ACIF S008:2006 and AS/ACIF S009:2006

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with work associates, supervisors, team members and clients
- literacy skills to interpret:
  - related legislation, codes regulations and standards
  - technical documentation, such as equipment manuals and specifications
- numeracy skills to take and analyse measurements
- planning and organisational skills to organise and maintain equipment
- problem solving skills to solve equipment and logistics problems
- safety awareness skills to:
  - check environmental conditions are suitable for termination
  - make site safe and secure for cable installation
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- task management skills to:
  - apply work practices which avoid cable damage
  - conform to work specifications and relevant industry standards
- technical skills to:
  - check cable route for obstructions and make clear using suitable methods
  - handle cable according to manufacturer's specifications so that conductors, sheath and insulation are not damaged during installation
  - select cabling system to meet customer performance needs

## **REQUIRED SKILLS AND KNOWLEDGE**

- read and interpret drawings related to:
  - cable coding system, identifiers and distributor locations
  - cable layouts
  - outlet location
- terminate copper twisted pair, including indoor, external, aerial and underground cabling
- use diagnostic equipment
- use hand and power tools

## **Required knowledge**

- ACMA cabling provider rules, cabler registration rules, regulations and standards
- features and operating requirements of recognised cabling specific industry test equipment
- information required to operate equipment according to a test specification
- legislation, codes of practice and other formal agreements that impact on the work activity
- manufacturer's requirements for safe operation of equipment
- specific occupational health and safety (OHS) requirements relating to the activity and site conditions
- test methods and performance requirements
- typical issues and challenges that occur on site

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• complete a cabling installation and termination:                             <ul style="list-style-type: none"> <li>• three different types of telephone sockets:                                     <ul style="list-style-type: none"> <li>• Australian modular socket</li> <li>• United States modular socket</li> <li>• Mode 3 alarm socket</li> </ul> </li> <li>• one network termination device (NTD)</li> <li>• one alarm panel including completion of a TCA compliance form and NTD records</li> <li>• one Ethernet cable</li> </ul> </li> <li>• apply cable conductor identification codes</li> <li>• conduct and interpret cable test results</li> <li>• interpret and apply standards and regulations</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a site on which communications cabling activities may be carried out</li> <li>• use of cabling and field equipment currently used in industry</li> <li>• licensing requirements and other site related documentation.</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate undertaking cabling installations and tests, and applying cable conductor identification codes</li> <li>• oral or written questioning to assess knowledge of test results, standards requirements and specific technical procedures.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

## EVIDENCE GUIDE

	<ul style="list-style-type: none"> <li>ICTCBL2137A Install, maintain and modify customer premises communications cabling: ACMA Open Rule.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Restricted cabling work*** refers to:

- aerial and underground cabling work on private property
- cabling work that is performed only in relation to a customer's premises

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>customer cabling that terminates directly at the network boundary on a socket or network termination device.</li> </ul>
<b>Regulatory environment</b> refers to:	<ul style="list-style-type: none"> <li>accredited registrars and registration</li> <li>ACMA</li> <li>Certified Components List</li> <li>Communications Alliance</li> <li>labelling requirements</li> <li>Telecommunications Act 1997.</li> </ul>
<b>Cabling environment</b> may refer to:	<ul style="list-style-type: none"> <li>indoor environments, including concealed locations:                             <ul style="list-style-type: none"> <li>ceilings and false ceilings</li> <li>internal wall space</li> <li>modular workstations</li> <li>under floor</li> </ul> </li> <li>outdoor environments, including cable installations:                             <ul style="list-style-type: none"> <li>aerial telecommunications cabling for restricted cabling work but does not include installations on poles shared with low voltage (LV) or high voltage (HV) electrical power cables or terminations</li> <li>external walls</li> <li>underground cabling in an exclusive trench or shared trench with electrical LV cables and other utilities.</li> </ul> </li> </ul>
<b>Cable type</b> may include:	<ul style="list-style-type: none"> <li>aerial</li> <li>coaxial</li> <li>copper twisted pair</li> <li>data cables:                             <ul style="list-style-type: none"> <li>Category 5, 6, 6A, 7 or &amp;A</li> </ul> </li> <li>external</li> <li>indoor</li> <li>optic fibre cable</li> <li>underground.</li> </ul>
<b>Cable identification</b> refers to:	<ul style="list-style-type: none"> <li>cable conductor identification codes:                             <ul style="list-style-type: none"> <li>banded</li> <li>colour coded</li> <li>lettered</li> <li>numbered.</li> </ul> </li> </ul>
<b>Termination systems</b> must include:	<ul style="list-style-type: none"> <li>network termination device</li> <li>socket types:                             <ul style="list-style-type: none"> <li>Australian modular socket</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Mode 3 alarm socket</li> <li>• United States modular socket.</li> <li>• (Note: jumperable distributors are not included in this requirement).</li> </ul>
<b>Earthing and protection</b> must include:	<ul style="list-style-type: none"> <li>• earthing for protection</li> <li>• surge suppression.</li> </ul>
<b>Records</b> may include:	<ul style="list-style-type: none"> <li>• NTD record cards</li> <li>• telecommunication cabling advice forms TCA1 and TCA2.</li> </ul>
<b>Relevant legislation, codes, regulations and standards</b> include:	<ul style="list-style-type: none"> <li>• accredited registrars and registration</li> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• ACMA</li> <li>• AS/NZS 3000:2007</li> <li>• AS/ACIF S008:2006 and AS/ACIF S009:2006</li> <li>• Certified Components List (CCL)</li> <li>• AS Communications Cabling Manual (CCM) -restricted</li> <li>• labelling</li> <li>• Overview Telecommunications Act 1997.</li> </ul>
<b>Building infrastructure</b> may include:	<ul style="list-style-type: none"> <li>• availability and suitability of existing cabling trays and fixing systems</li> <li>• building hazards</li> <li>• elevated working</li> <li>• high voltage (HV) power</li> <li>• restricted access.</li> </ul>
<b>Cabling</b> may include:	<ul style="list-style-type: none"> <li>• aerial customer</li> <li>• external customer</li> <li>• indoor customer</li> <li>• underground customer.</li> </ul>
<b>Strategies to manage other infrastructure</b> may include:	<ul style="list-style-type: none"> <li>• appropriate separations</li> <li>• correct use of cable trays and support systems</li> <li>• fastening techniques.</li> </ul>
<b>Safety hazards</b> may refer to:	<ul style="list-style-type: none"> <li>• access points that may contain: <ul style="list-style-type: none"> <li>• hazardous light or non-visible laser</li> <li>• radio frequency (RF) emission</li> </ul> </li> <li>• electrical supply and areas of earth potential rise (EPR) that require mandatory separation from communications cable</li> <li>• hazardous conduit as according to AS 1345:1995</li> </ul>

<b>RANGE STATEMENT</b>	
	conduit colours associated with a hazardous service.
<i>Termination</i> may include:	<ul style="list-style-type: none"> <li>• Australian modular socket</li> <li>• Ethernet connectors terminated at both ends of an Ethernet cable and tested</li> <li>• Mode 3 alarm socket</li> <li>• NTD</li> <li>• United States modular socket</li> <li>• (Note: jumperable distributors are not included).</li> </ul>
<i>Separations</i> refer to:	<ul style="list-style-type: none"> <li>• correct separations between communications cable and other services:                             <ul style="list-style-type: none"> <li>• LV</li> <li>• HV single core</li> <li>• HV multi-core</li> <li>• open terminations</li> </ul> </li> <li>• separations covered by AS/ACIF S009:2006.</li> </ul>

## **ICTCBL2137A Install, maintain and modify customer premises communications cabling: ACMA Open Rule**

### **Modification History**

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to safely install, maintain and modify customer premises communications cabling required according to Australian Communications and Media Authority's (ACMA) 'Open' Cabling Provider Rule.</p> <p>This rule is associated with small installations connected to sockets and larger commercial and industry installations involving many lines, multi-pair cables, backbone cabling, multi-story buildings and more complicated termination modules and distributors.</p> <p>The cabling activity may be a new cable installation or upgrade of cable capacity for an existing network or subsystem, or cabling infrastructure for convergence to Next Generation Networks (NGN).</p> <p>Convergence in the telecommunications and IT areas is the emergence of a single infrastructure for a range of telephony and IT services. Telephone, voice over internet protocol (VoIP), internet protocol TV (IPTV) and computer data may all travel over a single metallic customer cable, optical fibre cable or wireless link in a specific location.</p> <p>Assessment by a TITAB registered assessor is recommended.</p> <p>This unit meets the minimum ACMA prescribed level of knowledge and skill that safeguards matters of health, safety, network integrity and addresses matters of interoperability where customer equipment and standard telephone service are involved only.</p> <p>Note:</p> <ul style="list-style-type: none"><li>• Completion of this unit does not imply industry competency using specialised cabling, such as coaxial, optical fibre and structured cabling.</li><li>• Completion of the following 6 cabling units: ICTCBL2005A, ICTCBL2006A, ICTCBL2008A, ICTCBL2012A, ICTCBL2017A and ICTCMP2022A</li></ul>
------------------------	--

	<p>exceed the requirements of this standard and fulfil the requirements for ACMA Cabling Provider Rules: Open Cabling Category for Cabler Registration</p> <ul style="list-style-type: none"> <li>To be permitted to work with lift cabling, cablers are required to have completed the relevant Electrotechnology qualification such as the Certificate III in Electrotechnology Electrician or equivalent.</li> </ul>
--	---

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to customer cabling terminated on distributors. It applies to installation, maintenance and modification of indoor, external, underground cabling on private and public property.</p> <p>Customer cabling, for the purpose of this standard, may be used to connect devices for a range of applications, including telecommunications, Ethernet, video and multimedia, security and alarms, and fire protection.</p> <p>The cabling task may be a new cable installation or upgrade of cable capacity for an existing network or subsystem for convergence to NGN applications.</p> <p>Cabling installers providing services in telephony, VoIP, IPTV and computer data over a single metallic customer cable or optical fibre cable in a specific customer location apply the skills and knowledge in this unit.</p>

	ICTCBL2136A	Install, maintain and modify customer premises

<b>Prerequisite units</b>		
		communications cabling: ACMA Restricted Rule

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Work within the constraints imposed by customer premises and ACMA regulatory environment</p>	<p>1.1. Prepare for <i>open cabling work</i> according to the <i>regulatory environment, cabling environment, cable type, cable identification, termination systems, earthing and protection, records and relevant legislation, codes, regulations and standards</i></p> <p>1.2. Identify <i>building infrastructure</i> which places critical constraints on <i>cabling</i></p> <p>1.3. Develop <i>strategies to manage other infrastructure</i> in relation to cabling</p> <p>1.4. Notify appropriate personnel of identified <i>safety hazards</i> at cabling worksite</p>
<p>2. Manage remote power feed</p>	<p>2.1. Identify and avoid the risks posed by contact with remote power feeding services when performing cabling activity</p> <p>2.2. Make site safe identifying remote power feeding services which operate at above telecommunications network voltage (TNV) inside customer premises</p>
<p>3. Install and modify cable support, earthing and termination infrastructure</p>	<p>3.1. Install fixings and <i>cable support structures</i> of adequate strength safely and aligned with the environment according to manufacturer's and customer's specifications</p> <p>3.2. Secure catenary supports to building structure and tension, where necessary, to ensure cable weight can be carried in operating conditions with interference and safety segregation maintained including adherence to AS/ACIF S009:2006</p> <p>3.3. Install protective earthing of metal work to industry standards where required</p> <p>3.4. Inspect installed support structure to ensure cable will not be exposed to damage during installation and general operation</p> <p>3.5. Position terminating equipment and fixing to accepted industry codes of practice, standards and customer requirements</p> <p>3.6. Inspect back-mount and outlet layout for compliance to manufacturer's specifications and allow adequate work space for ease of access and avoid overlaying</p> <p>3.7. Segregate incoming and outgoing cables for ease of access and avoid overlaying</p>
<p>4. Install cables and earth wires</p>	<p>4.1. Install cables according to manufacturer's application specifications, including tension and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>bending stress requirements</p> <p>4.2. Identify and avoid sources of possible damage to cable, including hot pipes, sharp edges and cable burn</p> <p>4.3. Allow sufficient excess at cable ends to facilitate <i>termination</i></p> <p>4.4. Label telecommunication outlet ends of cable uniquely to match identifier at originating location</p> <p>4.5. Place and secure cable to maintain safety and interference segregation according to legislative and industry standards</p> <p>4.6. Install cable ties with correct tension to prevent cable sheath damage or transmission impairment and trimmed flush to prevent risk of personal damage</p> <p>4.7. Install aerial cables supported by catenaries in external environment to meet minimum above ground clearances and clearances from hazardous electrical services according to AS/ACIF S009:2006</p> <p>4.8. Install underground cables to minimum depth of cover and segregation from hazardous electrical and other services according to AS/ACIF S009:200</p> <p>4.9. Install cables underground (excluding blown fibre tube systems) to incorporate a blocking agent within the cable to prevent the ingress of water</p> <p>4.10. Install over-voltage protection devices to all cable pairs, where required, according to AS/ACIF S009:2006, to suppress voltage surges with the devices protectively earthed</p> <p>4.11. Conduct a visual inspection to verify telecommunications reference conductor (TRC)/communications earthing system (CES)/earth wire insulation is protected against damage and TRC/CES/ protective earths segregated according to relevant industry and legislative standards and AS/ACIF S009:2006</p>
<p>5. Terminate and test cables and earth wires</p>	<p>5.1. Remove cable sheath to allow for correct termination length and without damage to underlying conductors and their insulation</p> <p>5.2. Install terminating modules according to manufacturer's specifications and cable pairs neatly and sequentially fanned for termination</p> <p>5.3. Terminate conductors according to recommended colour code sequence using appropriate termination</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>tools in the manufacturer's specified manner</p> <p>5.4. Earth cable shield, if applicable, to manufacturer's specifications, relevant industry codes of practice and AS/ACIF S009:2006</p> <p>5.5. Conduct visual inspection to confirm termination colour code sequence has been followed prior to end-to-end testing of wire and pair termination integrity</p> <p>5.6. Terminate TRC/CES/earth wires with connectors recommended by manufacturers according to accepted industry codes of practice and AS/ACIF S009:2006</p> <p>5.7. Maintain TRC/CES/earth wire continuity throughout to meet interface requirements with electrical systems</p> <p>5.8. Test TRC/CES/earthing installation for continuity, insulation resistance and conductive resistance according to accepted industry standards including AS/ACIF S009:2006</p> <p>5.9. Confirm compatibility of alterations with existing systems and test new work both in isolation and when integrated with existing systems</p> <p>5.10. Test cable according to performance specifications</p>
<p>6. Inspect cable route to ensure correct separations</p>	<p>6.1. Inspect <i>separations</i> along the entirety of the cable route and rectify separations which do not comply with regulations</p> <p>6.2. Install barriers to achieve separations where sufficient spatial separation cannot be met</p>
<p>7. Evaluate earthing needs for cable systems on customer premises</p>	<p>7.1. Locate existing earthing systems in customer premises and analyse the earthing needs of cable systems in a range of building types</p> <p>7.2. Calculate the upper and lower limits of resistance for a variety of cable system earths using relevant cable characteristics</p>
<p>8. Label earthing systems</p>	<p>8.1. Identify label requirements for all types of earthing systems</p> <p>8.2. Attach label to earthing systems according to industry regulations</p>
<p>9. Create or update cable plans and records</p>	<p>9.1. Document <i>installation details</i> on record sheets and plans and store according to customer requirements</p> <p>9.2. Label cable pairs clearly to provide an accurate</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>identification according to manufacturer's, industry and client standards</p> <p>9.3. Record <i>cabling details</i> in cable pair record books to provide an accurate record according to industry codes of practice and AS/ACIF S009:2006</p> <p>9.4. Complete telecommunications cabling advice (TCA) form</p>
10. Monitor work activity	10.1. Maintain close supervision of cabling not holding appropriate registration for the task to ensure installation and maintenance activity is strictly according to legislative requirements and industry standards for safety and network integrity including AS/ACIF S008:2006 and AS/ACIF S009:2006

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with on team members, supervisors and customers on technical and operational matters
- interpersonal skills related to work associates, supervisors, team members and clients
- literacy skills to interpret:
  - relevant legislation, codes, regulations and standards
  - technical documentation, such as equipment manuals and specifications
- numeracy skills to take and analyse measurements
- planning and organisational skills to organise and maintain equipment
- problem solving skills to solve equipment and logistics problems
- safety awareness skills to:
  - check environmental conditions are suitable for installation
  - make site safe and secure for cable installation
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- task management skills to:
  - apply work practices which avoid cable damage
  - conform to work specifications and relevant industry standards

## **REQUIRED SKILLS AND KNOWLEDGE**

- technical skills to:
  - check cable route for obstructions and make clear using suitable methods
  - handle cable according to manufacturer's specifications so that conductors, sheath and insulation are not damaged during installation
  - read and interpret drawings related to:
    - cable coding system, identifiers and distributor locations
    - cable layouts
    - outlet location
  - select cabling system to meet customer performance needs and conform to work specifications and relevant industry standards
  - terminate copper twisted pair, including indoor, external, aerial and underground cabling
  - use diagnostic equipment
  - use hand and power tools

### **Required knowledge**

- ACMA cabling provider rules, cabler registration rules, regulations and standards
- features and operating requirements of recognised cabling specific industry test equipment
- information required to operate equipment according to a test specification
- legislation, codes of practice and other formal agreements that impact on the work activity
- manufacturer requirements for safe operation of equipment
- protection earthing
- specific occupational health and safety (OHS) requirements relating to the activity and site conditions
- test methods and performance requirements
- typical issues and challenges that occur on site

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• terminate systems at both distributor and outlet locations</li> <li>• install and terminate one jumperable distributor (campus distributor or building distributor) with a capacity of 100 pair or greater</li> <li>• terminate one non-jumperable distributor (LD) and a patch panel</li> <li>• terminate at least one 50 pair, one 4 pair and one Ethernet cables including accurate completion of installation records, drawing alterations and compliance forms</li> <li>• place cables on support structures and building faces for both internal and external locations</li> <li>• secure methods for the above locations</li> <li>• demonstrate work practices which avoid cable damage</li> <li>• install the three common types of earthing system used in customer premises for cabling systems</li> <li>• read and interpret drawings related to cable layouts, outlet location, cable coding system, and identifiers and distributor locations</li> <li>• conduct and interpreting cable test results</li> <li>• interpret and apply relevant legislation, codes, regulations and standards</li> <li>• comply with all OHS requirements and work practices.</li> </ul>
<p><b>Context of, and specific resources for assessment</b></p>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a site on which communications cabling activities may be carried out</li> <li>• use of cabling and field equipment currently used in industry</li> <li>• licensing requirements and other site related documentation.</li> </ul>

<b>EVIDENCE GUIDE</b>	
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate terminating: <ul style="list-style-type: none"> <li>• systems at both distributor and outlet locations</li> <li>• one jumperable distributor (campus distributor or building distributor) with a capacity of 100 pair or greater</li> <li>• one non-jumperable distributor (LD) and a patch panel</li> <li>• at least one 50 pair, one 4 pair and one Ethernet cables</li> </ul> </li> <li>• review of completed documentation prepared by the candidate, including accurate completion of installation records, drawing alterations and compliance forms</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTCBL2138A Install, maintain and modify customer premises communications cabling: ACMA Lift Rule.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require</p>

<b>EVIDENCE GUIDE</b>	
	<p>language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Open cabling work</i></b> refers to:</p>	<ul style="list-style-type: none"> <li>• aerial and underground cabling work on private and public property</li> <li>• customer cabling that terminates directly at the network boundary on a socket, network termination device (NTD) or a distributor.</li> </ul>
<p><b><i>Regulatory environment</i></b> refers to:</p>	<ul style="list-style-type: none"> <li>• accredited registrars and registration</li> <li>• ACMA</li> <li>• Certified Components List</li> <li>• Communications Alliance</li> <li>• labelling requirements</li> <li>• Telecommunications Act 1997.</li> </ul>
<p><b><i>Cabling environment</i></b> may refer to:</p>	<ul style="list-style-type: none"> <li>• indoor environments, including concealed locations: <ul style="list-style-type: none"> <li>• ceilings and false ceilings</li> <li>• internal wall space</li> <li>• modular workstations</li> <li>• under floor</li> </ul> </li> <li>• outdoor environments, including cable installations: <ul style="list-style-type: none"> <li>• aerial telecommunications cabling for restricted cabling work but does not include installations on poles shared with low voltage (LV) or high voltage (HV) electrical power cables or terminations</li> <li>• external walls</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>underground cabling in an exclusive trench or shared trench with electrical LV cables and other utilities.</li> </ul>
<b>Cable type</b> may include:	<ul style="list-style-type: none"> <li>aerial</li> <li>coaxial</li> <li>copper twisted pair</li> <li>data cables: <ul style="list-style-type: none"> <li>Category 5, 6, 6A, 7 or 7A</li> </ul> </li> <li>external</li> <li>indoor</li> <li>optic fibre cable</li> <li>underground.</li> </ul>
<b>Cable identification</b> refers to:	<ul style="list-style-type: none"> <li>cable conductor identification codes: <ul style="list-style-type: none"> <li>banded</li> <li>colour coded</li> <li>lettered</li> <li>numbered.</li> </ul> </li> </ul>
<b>Termination systems</b> may include:	<ul style="list-style-type: none"> <li>jumperable distributor (campus distributor or building distributor)</li> <li>non-jumperable distributor (local distributor) and a patch panel.</li> </ul>
<b>Earthing and protection</b> may include:	<ul style="list-style-type: none"> <li>earthing of screened cable, barriers and cable trays for the reduction or elimination of interference from electromagnetic, radio frequency (RF) and power sources</li> <li>equi-potential bonding conductors to multiple earth neutral (MEN) and use of earth stakes</li> <li>functional earths, including (TRC) and (CES) types to provide customer switching system facilities</li> <li>protective earth barriers for segregation, cable tray, duct and metal equipment enclosures</li> <li>protective earths for over-voltage and surge or spike suppression according to AS/ACIF S009:2006.</li> </ul>
<b>Records</b> may include:	<ul style="list-style-type: none"> <li>building, cabling and equipment location plans</li> <li>labelling of: <ul style="list-style-type: none"> <li>distributor pairs</li> <li>distributor verticals</li> <li>equipment closets</li> <li>NTD record cards</li> <li>patch panels</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• rooms</li> <li>• telecommunication outlets</li> <li>• record books and cards:                             <ul style="list-style-type: none"> <li>• campus distributors (CD)</li> <li>• building distributors (BD)</li> <li>• floor distributors (FD)</li> <li>• local distributors (LD)</li> </ul> </li> <li>• TCA forms (TCA1 and TCA2).</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Build and test DC and AC circuits and telephone earthing</p>	<p>1.1. Identify any hazards and occupational health and safety (OHS) issues for a safe worksite and notify appropriate personnel</p> <p>1.2. Connect a series and a parallel <b>DC and AC circuit configuration</b> following <b>safe work practices</b></p> <p>1.3. Choose the appropriate <b>test equipment</b> and measure the values of electrical quantities of the circuits</p> <p>1.4. Use <b>calculations</b> to verify the measured values of the <b>electrical quantities</b> in a series and in a parallel circuit configuration</p> <p>1.5. Compare the measured values to the calculated values and determine the reasons for any variations</p> <p>1.6. Evaluate the results and determine the <b>probable faults</b> if relevant</p> <p>1.7. Measure the resistance of the telephone local loop</p> <p>1.8. Measure the voltages present on a telephone line and compare to exchange battery voltage</p> <p>1.9. Measure the resistance to earth ensuring an electrical earth in a telecommunications installation</p>
<p>2. Configure a safe ADSL circuit configuration with Mode 3 connection</p>	<p>2.1. Determine the effects of bandwidth, frequency and attenuation on <b>xDSL circuits</b> as used for broadband customer access</p> <p>2.2. Design and configure an <b>ADSL circuit</b> from the network boundary through to a Mode 3 socket for an alarm system connected to a monitoring station</p> <p>2.3. Configure the connection to ensure that an ADSL circuit is not disconnected for safety reasons when an alarm activation in conjunction with a Mode 3 socket disconnects the plain old telephone service (POTS) circuit</p> <p>2.4. Use a <b>level 3 tester</b> to verify correct termination and installation practices on a digital transmission line</p>
<p>3. Diagnose and rectify faults</p>	<p>3.1. Determine the urgency and impact of faults and required response timeframe for clearance</p> <p>3.2. Identify <b>type of fault</b> and determine most probable causes of fault from data and historical trends where available</p> <p>3.3. Select tools and test equipment relevant to the system and type of fault</p> <p>3.4. Diagnose fault in a methodical and safe manner</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>using suitable <i>fault-finding technique</i></p> <p>3.5. Isolate fault progressively to remove likely variables from diagnostic</p> <p>3.6. Determine options to rectify the fault and present to customer for decision on rectification</p> <p>3.7. Document test methods and results and file with other system installation records</p>
4. Alter existing services	<p>4.1. Identify existing and proposed cable systems for <i>altering services</i> to an existing installation</p> <p>4.2. Plan alterations to cause minimal disruption to ongoing client activity</p> <p>4.3. Use <i>appropriate tools</i> to safely <i>terminate telecommunications cables and outlets</i></p> <p>4.4. Identify and rectify any <i>cable fault</i></p> <p>4.5. Carry out alterations in a safe manner and according to both mandatory and recommended industry standards</p> <p>4.6. Identify the risks posed by contact with remote power feeding services</p> <p>4.7. Test alteration and obtain sign off with customer</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to listen and liaise with clients on technical and operational matters related to sign off for alteration of services
- literacy skills to interpret technical documentation and incorporate technical language into written tasks, such as reporting on recommendations to minimise recurrent fault occurrence
- numeracy skills to:
  - interpret technical data, such as specifications of telecommunications networks
  - perform mathematical problem solving in AC and DC tasks and fault-finding
- problem solving skills to apply AC and DC fault finding techniques to different situations
- research skills to access technical information and sources to understand

**REQUIRED SKILLS AND KNOWLEDGE**

fundamental principles of telecommunication networks

- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - select and use appropriate test equipment and practices to perform basic AC and DC testing
  - perform fault-finding tasks
  - alter services

**Required knowledge**

- application of binary number conversion and interpretation
- AC and DC electrical quantities, including SI units, OHS issues and the application of Ohm's law
- fault-finding techniques and use of testing equipment, including:
  - multimeter to measure DC voltage, current and resistance
  - continuity tester to check continuity wiring
  - testing of open circuits and short circuits
- overview of:
  - ADSL circuitry and configurations
  - digital transmission concepts, including installation practices and testing
  - procedures in altering existing services, including sign off
  - the distinction between analog and digital signals

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use concepts of ADSL application and design</li> <li>• use fault-finding techniques to locate cabling faults in telecommunications networks</li> <li>• use Ohm's law to solve DC and AC electrical problems</li> <li>• apply digital transmission principles and testing</li> <li>• use test equipment</li> <li>• alter existing customer services complying with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a site where altering existing services for a customer may be conducted</li> <li>• appropriate AC and DC testing equipment</li> <li>• manufacturer's documentation and equipment</li> <li>• correct tools and measuring equipment currently used in industry.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate undertaking AC and DC measurements and fault-finding</li> <li>• oral or written questioning to assess knowledge of fundamental concepts of telecommunications practices and recurrent fault-finding techniques</li> <li>• evaluation of written ADSL design concepts</li> <li>• direct observation of visual checks and evaluation of written procedures in altering existing services</li> <li>• direct observation of the candidate altering existing customer services.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

**EVIDENCE GUIDE**

- ICTOHS2170A Follow OHS and environmental policy and procedures
- ICTTEN2140A Use hand and power tools
- ICTTEN2136A Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b><i>DC and AC circuit configuration</i></b> may include:	<ul style="list-style-type: none"> <li>• DC circuit:               <ul style="list-style-type: none"> <li>• resistances</li> <li>• single DC voltage source:                   <ul style="list-style-type: none"> <li>• battery</li> <li>• DC voltage supply</li> <li>• solar panel</li> </ul> </li> </ul> </li> <li>• AC circuit:               <ul style="list-style-type: none"> <li>• inductors, capacitors and resistances</li> <li>• single AC voltage source:                   <ul style="list-style-type: none"> <li>• AC generator</li> <li>• AC voltage supply</li> <li>• alternator</li> <li>• low voltage (LV) AC source.</li> </ul> </li> </ul> </li> </ul>
<b><i>Safe work practices</i></b> may relate to:	<ul style="list-style-type: none"> <li>• component tolerances are not exceeded - fire risk</li> <li>• correct use of power supply and test equipment</li> <li>• identifying any electrical safety hazards</li> <li>• isolation from main supply</li> <li>• overdrawing of current</li> <li>• power down during set-up procedure</li> <li>• well laid out circuitry:               <ul style="list-style-type: none"> <li>• avoid contact with external sources</li> <li>• avoid shorting of components.</li> </ul> </li> </ul>
<b><i>Test equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• digital multimeter</li> <li>• multimeter</li> <li>• ohmmeter</li> <li>• voltmeter.</li> </ul>
<b><i>Calculations</i></b> may include:	<ul style="list-style-type: none"> <li>• application of Ohm's law</li> <li>• engineering notation</li> <li>• power calculations</li> <li>• power consumption and efficiencies</li> <li>• voltage dividers</li> <li>• voltage, resistance and current calculations.</li> </ul>
<b><i>Electrical quantities</i></b> may include:	<ul style="list-style-type: none"> <li>• current</li> <li>• power</li> <li>• voltage.</li> </ul>
<b><i>Probable faults</i></b> may include:	<ul style="list-style-type: none"> <li>• faulty component</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• faulty source voltage</li> <li>• open circuits</li> <li>• short circuits.</li> </ul>
<i>xDSL circuits</i> may include:	<ul style="list-style-type: none"> <li>• ADSL</li> <li>• ADSL2</li> <li>• ADSL2+.</li> </ul>
<i>ADSL circuit</i> may include:	<ul style="list-style-type: none"> <li>• ADSL filters connected at a main distribution frame (MDF)</li> <li>• central filters and splitters installed at a network termination device (NTD)</li> <li>• central filters and splitters installed internally</li> <li>• domestic installations and small shops that use a telecommunications outlet (TO) or NTD as a network boundary</li> <li>• DSL and Mode 3 connections.</li> </ul>
<i>Level 3 tester</i> may include:	<ul style="list-style-type: none"> <li>• continuity</li> <li>• F set</li> <li>• local area network (LAN) Cat tester</li> <li>• split pair</li> <li>• wire map.</li> </ul>
<i>Type of fault</i> may include:	<ul style="list-style-type: none"> <li>• cable</li> <li>• electrical</li> <li>• hardware</li> <li>• software</li> <li>• system.</li> </ul>
<i>Fault-finding technique</i> may include:	<ul style="list-style-type: none"> <li>• half term testing</li> <li>• isolation of sections</li> <li>• logical mapping</li> <li>• using testing equipment.</li> </ul>
<i>Altering services</i> may include:	<ul style="list-style-type: none"> <li>• changing cable installation</li> <li>• client interaction</li> <li>• identifying mission critical services</li> <li>• identifying remote power feeding</li> <li>• upgrading a service.</li> </ul>
<i>Appropriate tools</i> may include:	<ul style="list-style-type: none"> <li>• basic hand tools</li> <li>• F sets for cable identification</li> <li>• Krone termination tool</li> <li>• multimeter</li> <li>• wire strippers.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Terminate telecommunications cables and outlets</i> may include:	<ul style="list-style-type: none"> <li>• stripping a:               <ul style="list-style-type: none"> <li>• 2 pair internal rated</li> <li>• 3 pair external rated cable</li> <li>• 4 pair Category 5 unshielded twisted pair (UTP) cable</li> </ul> </li> <li>• terminating a TO</li> <li>• termination using screw terminals.</li> </ul>
<i>Cable fault</i> may include:	<ul style="list-style-type: none"> <li>• earth contact</li> <li>• foreign battery</li> <li>• no voltage</li> <li>• open circuit</li> <li>• short circuit</li> <li>• split pair.</li> </ul>

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to test optical communication systems and components using advanced optical test equipment. It involves using the optical time domain reflectometer (OTDR), optical spectrum analyser (OSA) and optical return loss (ORL) test set for performance testing and link budget calculation.</p> <p>Licensing, legislative, regulatory and certification requirements apply to working at heights. If an elevated work platform (EWP) is required, verify state or territory law requirements for a licence to operate an EWP. Users should confirm requirements with the relevant federal, state or territory authority.</p> <p>If working at heights, achievement of the unit 'CPCPCM2015A Work safely on roofs' from the CPC08 Construction and Plumbing Services Integrated framework training Package fulfils this requirement.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Installation contractors, technical staff and field officers from telecommunications carriers or other private and public organisations, or regulatory authorities apply the skills and knowledge in this unit.</p> <p>They combine technical skills with organisational and administrative skills to perform specialised testing of complex optical faults, optical network monitoring and link budget calculations on broadband passive optical network (PON), fibre to the x (FTTx) networks, hybrid fibre coaxial (HFC) networks and dense wavelength division multiplexing (DWDM) systems during installation, maintenance, commissioning and troubleshooting phases.</p>
---------------------------------------	---

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare to use advanced optical measuring instruments</p>	<p>1.1. Obtain <b>relevant legislation, codes, regulations and standards</b> for compliance when conducting work</p> <p>1.2. Notify <b>customer</b> for site access, security arrangements and location details of <b>optical system</b> and test purpose</p> <p>1.3. Identify site <b>hazards</b> and notify appropriate personnel to make site safe</p> <p>1.4. Devise and implement risk control measures of hazards with handling of optical fibres and lasers in consultation with appropriate personnel</p> <p>1.5. Prepare a <b>testing plan</b> indicating the <b>type of measurement</b>, procedures and nominated <b>wavelength</b> and seek approval from customer</p> <p>1.6. Select the appropriate <b>tools</b> and <b>test instruments</b> according to the required measurement and enterprise practice</p>
<p>2. Evaluate optical performance and link budget using advanced optical test equipment</p>	<p>2.1. Set up test instrument according to manufacturer's instructions and occupational health and safety (<b>OHS</b>) and <b>environmental requirements</b></p> <p>2.2. Perform measurement using knowledge of appropriate testing techniques and advanced test equipment in a safe manner to evaluate the performance of optical system and component</p> <p>2.3. Record test results and compare with standard test specifications from manufacturer's and enterprise guidelines</p> <p>2.4. Perform end-to-end measurements on an optical link to a customer and record test results and test points</p> <p>2.5. Calculate the optical losses for a link budget figure of an optical link to determine if within operational margins as specified in manufacturer's manual</p> <p>2.6. Evaluate the test results and report on the functionality of the optical component or equipment and the performance of the optical link</p>
<p>3. Document measurement results</p>	<p>3.1. Document test results for future reference and make recommendations on optimising component and system performance</p> <p>3.2. Clean worksite and make safe according to the enterprise requirements and to customer satisfaction</p> <p>3.3. Notify appropriate personnel of job completion for sign off and present test documentations</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with customers and enterprise staff
- literacy skills to read and interpret work instructions and document work
- numeracy skills to gather and record data from measurements
- planning and organisational skills to plan prioritise and manage own work
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - clean an optical connector to an acceptable industry standard
  - safely inspect an optical connector for contamination and determine if cleaning is necessary
  - safely operate:
    - optical loss test set (OLTS)
    - optical time domain reflectometer (OTDR)
    - PON power meter

#### Required knowledge

- consequences of mating contaminated optical connectors
- decibels, dBm
- downstream and upstream signals
- DWDM metro and long haul system architecture
- measurement of DWDM signals
- measurement of gain and gain flatness of optical amplifier
- measurement of laser spectral stability, drift and unexpected variation in spectral transmission characteristics
- non-linear effects, four-wave mixing
- optical connector types
- optical signal to noise ratio (OSNR)
- optical spectrum limits, wavelengths used in various applications and International

**REQUIRED SKILLS AND KNOWLEDGE**

- Telecommunications Union (ITU) grid
- optical transmitters and receivers
- ORL
- OTDR dead zones, dynamic range and launch cable
- reflectance
- safe handling procedures with optical fibres
- transmission system line rates:
  - optical Ethernet
  - optical transport network (OTN)
  - synchronous digital hierarchy (SDH)
- wavelength division multiplexing (WDM), coarse wavelength division multiplexing (CWDM) and DWDM principles and optical multiplexers

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to :</p> <ul style="list-style-type: none"> <li>• use OTDR, OSA and ORL advanced optical test equipment to:               <ul style="list-style-type: none"> <li>• measure optical power level</li> <li>• measure insertion loss of optical network</li> <li>• measure end-to-end fibre loss (bi-directional)</li> <li>• test and calculate optical link budget</li> <li>• comply with all related OHS requirements and work practices.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which optical measurements can be conducted</li> <li>• tools and equipment required for measurements</li> <li>• manufacturer's documentation for test instruments and equipment under test.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate performing optical measurements</li> <li>• review of a written report for the OTDR, the OSA and the ORL test set</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTOPN5118A Plan and configure dense wavelength division multiplexing systems</li> <li>• ICTOPN5119A Perform acceptance and commissioning tests on optical network</li> <li>• ICTOPN5120A Plan for an optical system upgrade</li> </ul>

**EVIDENCE GUIDE**

and cut over

- ICTOPN5121A Test and commission a dense wavelength division multiplexing transmission system
- ICTOPN5122A Test the performance of specialised optical devices
- ICTOPN5123A Analyse and integrate specialised optical devices in the network.

Aboriginal people and other people from a non-English speaking background may have second language issues.

- AS/NZS ISO/IEC 15018:2005
- AS/NZS ISO/IEC 24702:2007
- cabling security codes and regulations
- Environmental Protection Acts
- OHS
- technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.

**Customer** may be:

- asset manager
- installation manager
- maintenance manager
- nominated customer representative
- outage manager
- project manager.

**Optical system** may contain:

- add-drop multiplexer
- Bragg filters
- DWDM system
- fibre hub
- HFC network
- optical amplifier
- optical line termination (OLT)
- optical links
- optical network termination (ONT)
- optical splitter.

<b>RANGE STATEMENT</b>	
<i>Hazards</i> may include:	<ul style="list-style-type: none"> <li>• building debris</li> <li>• earth potential rise</li> <li>• glass fibre</li> <li>• live power lines</li> <li>• manual handling</li> <li>• mud and water</li> <li>• natural gas and other gas build up</li> <li>• optical fibre cable may contain hazardous light</li> <li>• radio frequency (RF) equipment emitting radiation</li> <li>• remote power feeding services which operate at above telecommunications network voltage (TNV)</li> <li>• vermin.</li> </ul>
<i>Testing plan</i> may include:	<ul style="list-style-type: none"> <li>• correct test set up</li> <li>• recording and evaluation of measurements</li> <li>• test layout</li> <li>• test procedures</li> <li>• test purpose</li> <li>• test sites and location</li> <li>• type of measurements</li> <li>• use of appropriate test equipment.</li> </ul>
<i>Type of measurement</i> may include:	<ul style="list-style-type: none"> <li>• dedicated ORL test set: <ul style="list-style-type: none"> <li>• optical power meter ORL</li> <li>• ORL versus wavelength.</li> <li>• OSA and ORL</li> <li>• PON splitter ORL</li> </ul> </li> <li>• OSA: <ul style="list-style-type: none"> <li>• bandwidth of a device (multiplexer)</li> <li>• central wavelength and channel spacing</li> <li>• device flatness</li> <li>• DWDM channel uniformity</li> <li>• insertion loss: <ul style="list-style-type: none"> <li>• coupler</li> <li>• filter</li> <li>• optical splitter</li> <li>• WDM</li> </ul> </li> <li>• non-linear effects (four-wave mixing)</li> <li>• optical power level: <ul style="list-style-type: none"> <li>• at drop terminal</li> <li>• at optical transmitter</li> </ul> </li> </ul> </li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• at patch panel</li> <li>• at the OLT</li> <li>• at the ONT</li> <li>• optical signal to noise ratio (OSNR)</li> <li>• ripple</li> <li>• spectral purity of a source</li> <li>• spectral stability and drift of a source</li> <li>• OTDR: <ul style="list-style-type: none"> <li>• break and fault location</li> <li>• certification of new cabling</li> <li>• characterisation of events in path</li> <li>• detailed event table</li> <li>• fibre attenuation</li> <li>• fibre attenuation rate</li> <li>• fibre attenuation uniformity</li> <li>• identification of 'gainers'</li> <li>• identification of 'ghost' events</li> <li>• insertion loss of connectors and splices</li> <li>• macro-bend detection</li> <li>• ORL</li> <li>• segment length.</li> </ul> </li> </ul>
<i>Wavelength</i> may include:	<ul style="list-style-type: none"> <li>• 850 nm</li> <li>• 1310 nm</li> <li>• 1490 nm</li> <li>• 1550 nm.</li> </ul>
<i>Tools</i> may include:	<ul style="list-style-type: none"> <li>• alcohol swabs</li> <li>• dry type cleaning cassette for optical connectors hand tools</li> <li>• launch cable for OTDR</li> <li>• lint-free dry wipes</li> <li>• microscope for examining optical connector with: <ul style="list-style-type: none"> <li>• integral safety infra-red filter</li> <li>• video microscope display</li> </ul> </li> <li>• optical connector adaptors <ul style="list-style-type: none"> <li>• FC to LC</li> <li>• FC to SC</li> <li>• FC to ST</li> <li>• SC to ST</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• optical fibre mandrel (single mode fibre low reflection termination)</li> <li>• optical termination</li> <li>• optical reference cable.</li> </ul>
<i>Test instruments</i> may include:	<ul style="list-style-type: none"> <li>• ORL test set</li> <li>• OSA</li> <li>• OTDR multimode</li> <li>• OTDR single mode</li> <li>• PON optimised OTDR.</li> </ul>

# ICTOPN5119A Perform acceptance and commissioning tests on optical network

## Modification History

Not Applicable

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to conduct acceptance tests and commissioning tests on optical networks, including the optical portion of broadband hybrid fibre coaxial (HFC) networks, fibre to the x (FTTx) passive optical networks (PONs) and metropolitan and long haul dense wavelength division multiplexing (DWDM) networks.</p> <p>It ensures readiness of the new system through the application of appropriate inspections and tests to confirm compliance and specified performance.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Technicians who install and maintain optical network equipment in access networks apply the skills and knowledge in this unit to provide services in Next Generation Networks (NGN) using emerging technologies.</p> <p>This unit applies to experienced field officers, technicians or technical supervisors working for telecommunications carriers, contractors or other service providers.</p> <p>NGN services include internet protocol TV (IPTV), video on demand (VoD), interactive TV, mesh networks and cloud computing.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to conduct acceptance tests	1.1. Obtain <i>installation and commissioning documents</i> and planning specifications from <i>appropriate personnel</i> to ensure the installed <i>optical network</i> is as planned and specified 1.2. Conduct visual inspection of new installation and verify compliance of the system against <i>relevant legislation, codes, regulations and standards</i> and accepted industry practice 1.3. Select and obtain required <i>test equipment</i> for suitability of acceptance testing 1.4. Prepare acceptance schedule and <i>test criteria</i> in consultation with appropriate personnel
2. Conduct acceptance testing	2.1. Conduct and evaluate <i>performance tests</i> to ensure measurements meet with predetermined specifications and approved operating margins 2.2. Verify performance levels to be within tolerance specifications set in manufacturer's instructions 2.3. Test <i>protection mechanisms</i> to ensure performance criteria meets the specified standard 2.4. Test <i>alarms</i> for satisfactory operation and refer identified problems to appropriate personnel for remedial action 2.5. Record all acceptance test procedures and results
3. Complete administrative tasks	3.1. Complete acceptance documentation including recommendations 3.2. Notify appropriate personnel and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to interpret test equipment settings and readings
- communication skills to:
  - liaise with customers and technical staff to ensure requirements are known and can be met within timeframes

**REQUIRED SKILLS AND KNOWLEDGE**

- prepare reports and technical documentation
- literacy skills to interpret technical specifications, standards documents and related documentation
- numeracy skills to make calculations and necessary calibration changes
- planning and organisation skills to develop activity plans to undertake inspections and tests in efficient manner
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to correctly handle, connect and calibrate test equipment

**Required knowledge**

- cabling, terminations and supporting structures that may be encountered in the system under inspection
- common performance levels and standards
- electrical and optical properties to be measured
- occupational health and safety (OHS) issues appropriate to the environment under inspection
- overview of typical network topologies, switching, routing and transmission techniques
- transmission type and signals that may be encountered
- various test equipment types suitable for tests to be made

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• verify 'as built' installation against installation plans</li> <li>• undertake acceptance and commissioning tests and analysis against specified performance criteria</li> <li>• complete report, including acceptance test procedures, results and recommendations</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which acceptance tests may be conducted</li> <li>• use of testing equipment currently used in industry</li> <li>• relevant regulatory and equipment documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate undertaking acceptance tests</li> <li>• oral or written questioning to assess knowledge of tests and inspections types of systems and applications</li> <li>• review of completed acceptance documentation for systems and equipment prepared by the candidate, including recommendations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN5059A Commission telecommunications network equipment</li> <li>• ICTTEN5092A Undertake outage management.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p>

<b>EVIDENCE GUIDE</b>	
	<p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Installation and commissioning documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• agreed modifications to original design plan</li> <li>• commissioning test results</li> <li>• preliminary test results</li> <li>• recommendations from commissioning procedures.</li> </ul>
<p><b><i>Appropriate personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• network manager</li> <li>• planning manager</li> <li>• project manager.</li> </ul>

<b>RANGE STATEMENT</b>	
<b><i>Optical network</i></b> may include:	<ul style="list-style-type: none"> <li>• 10 Gbps ethernet local area network (LAN) services over the emerging global standard called optical transport network (OTN)</li> <li>• DWDM long haul system</li> <li>• DWDM metro system</li> <li>• gigabit Ethernet</li> <li>• optical portion of HFC network.</li> </ul>
<b><i>Relevant legislation, codes, regulations and standards</i></b> include:	<ul style="list-style-type: none"> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• Australian Communications and Media Authority (ACMA) technical standards</li> <li>• International Standards ISO 9000 and 9001</li> <li>• ITU Standards</li> <li>• OHS</li> <li>• Privacy Act</li> <li>• private property law.</li> </ul>
<b><i>Test equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• advanced network tester - synchronous optical network (SONET)/synchronous digital hierarchy(SDH)</li> <li>• optical power meters</li> <li>• optical return loss test set</li> <li>• optical spectrum analyser</li> <li>• optical time domain reflectometer (OTDR)</li> <li>• protocol analyser.</li> </ul>
<b><i>Test criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• 24 - 72 hours test duration</li> <li>• live traffic tests</li> <li>• test environment</li> <li>• test margins and errors</li> <li>• testing at highest data rate: <ul style="list-style-type: none"> <li>• 10 Gbps</li> <li>• 40 Gbps</li> <li>• 100 GBps</li> </ul> </li> <li>• topology: <ul style="list-style-type: none"> <li>• point to point link</li> <li>• protected ring</li> </ul> </li> <li>• normal and extreme load tests</li> <li>• using installed optical fibre during test.</li> </ul>
<b><i>Performance tests</i></b> may include:	<ul style="list-style-type: none"> <li>• end-to-end bit error rate (BER) test: <ul style="list-style-type: none"> <li>• stressful pseudo random binary sequence (PRBS) pattern</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• forward error correction (FEC) testing</li> <li>• G.709 testing</li> <li>• receive interface specification:                             <ul style="list-style-type: none"> <li>• received optical power</li> </ul> </li> <li>• stability tests</li> <li>• transmit interface specification:                             <ul style="list-style-type: none"> <li>• optical output power.</li> </ul> </li> </ul>
<i>Protection mechanisms</i> may include:	<ul style="list-style-type: none"> <li>• 1:1 protection</li> <li>• 1+1 protection</li> <li>• optical channel path protection</li> <li>• path protection</li> <li>• wavelength protection.</li> </ul>
<i>Alarms</i> may include:	<ul style="list-style-type: none"> <li>• audible alarms</li> <li>• on-screen display and monitoring systems</li> <li>• visual indicators.</li> </ul>

## **ICTOPN5120A Plan for an optical system upgrade and cut over**

### **Modification History**

Not Applicable

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to plan the activities of a major upgrade of optical systems from specifications provided by the planning and design section. Major upgrades in enterprise networks or telecommunications service provider's networks involve cut over activities to integrate additional work into existing network.</p> <p>The exponential growth of internet protocol (IP) traffic is driving IP optical integration, in particular the convergence of IP and dense wavelength division multiplexing (DWDM) networks in Next Generation Networks (NGN), necessitating regular system upgrades.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Field officers, technicians or technical supervisors from carriers, contractors or other service providers whose work involves upgrading optical systems and equipment in enterprise networks and service providers' core and access networks apply the skills and knowledge in this unit.</p> <p>They are involved in maintenance, upgrades and cut overs of emerging technologies in IP based telecommunications networks.</p> <p>Relevant jobs roles include a supervisor in charge of installation and maintenance teams responsible for the new installations and upgrades of telecommunications networks.</p>
---------------------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather information to prepare upgrade activity plan	1.1. Obtain <i>relevant legislation, codes, regulations and standards</i> for compliance when conducting work 1.2. Obtain design specifications from the planning and design section to determine the scope and <i>nature</i> of the <i>upgrade</i> 1.3. Analyse the design specification and design plan and determine the accuracy of the design plan to site installation and requirements with <i>customer</i> 1.4. Determine the <i>network equipment</i> types and obtain installation details from manufacturer 1.5. Prepare an equipment and component list and source vendors for procurement
2. Prepare upgrade activity plans	2.1. Prepare a detailed <i>installation plan</i> of the upgrade for the installer 2.2. Prepare a detailed <i>installation procedure</i> to carry out the upgrade to minimise impact to the customer 2.3. Prepare pre-installation <i>optical tests</i> on existing equipment to determine benchmarks and performance levels prior to the upgrade 2.4. Prepare post-installation optical tests on upgrade to ensure upgraded system is achieving the desired results 2.5. Prepare monitoring schedule to progressively assess the <i>progress of the upgrade</i> 2.6. Prepare <i>contingency plan</i> for backing out if upgrade is not progressing according to schedule and disruptions to customer are excessive 2.7. Prepare cut over procedures
3. Complete documentation	3.1. Update and produce <i>documentation</i> for submission 3.2. Submit planning activity document to planning and design section for approval

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**REQUIRED SKILLS AND KNOWLEDGE****Required skills**

- analytical skills to evaluate impact of upgrades on customer, equipment and systems
- communication skills to provide advice and guidance and liaise with other technical staff on operational matters
- literacy skills to:
  - prepare:
    - installation plans
    - installation procedures
    - pre-installation tests
    - post-installation tests
    - contingency plans
    - cut over plan
  - read and interpret:
    - enterprise procedures, manuals and specifications
    - technical data, technical and non-technical information from a range of sources
    - test results
- numeracy skills to interpret technical data
- PC skills to monitor installed software
- planning and organisational skills to plan and prioritise own work
- problem solving skills to:
  - deal with unexpected situations on the basis of safety and specified work outcomes
  - prepare upgrade plan
  - troubleshoot common equipment and network problems
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards
  - follow enterprise occupational health and safety (OHS) procedures
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - analyse the impact of applications on traffic flow in the network
  - determine customer requirements and an upgrade plan
  - determine the impact of upgrading hardware and software on network functionality
  - identify the technical requirements, constraints and manageability issues for a given customer network requirement
  - implement upgrade of equipment and software

**REQUIRED SKILLS AND KNOWLEDGE**

- use test equipment and monitoring tools
- use tools and equipment to assemble and disassemble equipment

**Required knowledge**

- alarms
- backup systems
- computer knowledge
- escalation and outage procedures
- network management systems
- overview knowledge of telecommunications networks and equipment
- telecommunications monitoring tools
- telecommunications test equipment and test setups
- telecommunications wiring practices
- upgrade and post-upgrade routines

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare an upgrade plan incorporating the essential activities listed:               <ul style="list-style-type: none"> <li>• detailed installation plan and installation procedures</li> <li>• pre-installation and post-installation tests</li> <li>• monitoring schedule to assess progress of the upgrade</li> <li>• contingency plan.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where upgrade and cut over may be planned</li> <li>• use of equipment, software, test and monitoring equipment currently used in industry</li> <li>• relevant regulatory, equipment, enterprise and vendor documentation that impacts on work activities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate performing upgrade</li> <li>• direct observation of the candidate performing tests and monitoring alarms</li> <li>• review of documents prepared by the candidate providing upgrade plan and assessing impact of upgrade taking into consideration customer feedback</li> <li>• oral or written questioning to assess knowledge of upgrade, testing and monitoring procedures.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN4073A Cut over customer premises equipment major upgrades</li> <li>• ICTTEN4076A Complete equipment and software</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>upgrades</p> <ul style="list-style-type: none"> <li>• ICTTEN4086A Undertake routine maintenance of the telecommunications network</li> <li>• ICTTEN5061A Cut over new and replacement network equipment.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b><i>Relevant legislation, codes, regulations and standards</i></b> may include:	<ul style="list-style-type: none"> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• AS Communications Cabling Manual (CCM) Volume 1</li> <li>• AS/NZS 3000:2007</li> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS IEC 61935.1:2006</li> <li>• AS/NZS IEC 61935.2:2006</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• cabling security codes and regulations</li> <li>• Environmental Protection Acts</li> <li>• OHS Acts</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>
<b><i>Nature</i></b> of upgrade work may include:	<ul style="list-style-type: none"> <li>• commission of new system</li> <li>• installation of new additional equipment</li> <li>• installation of new software</li> <li>• integration of new equipment into existing system</li> <li>• provision of temporary service</li> <li>• removal of redundant equipment</li> <li>• test on new system.</li> </ul>
<b><i>Upgrade</i></b> may include:	<ul style="list-style-type: none"> <li>• introducing dispersion compensation devices</li> <li>• moving to 40 Gbps technology</li> <li>• network capacity upgrade: <ul style="list-style-type: none"> <li>• additional optical fibres to be added</li> <li>• additional DWDM wavelength channels and associated hardware to be added</li> <li>• increase data rate by changing transmitter and receiver cards</li> <li>• replace optical fibre with a type more suited towards 40 Gbps</li> </ul> </li> <li>• upgrading from erbium doped fibre amplifiers (EDFA) to Raman optical amplifiers</li> <li>• upgrading laser transmitter power.</li> </ul>
<b><i>Customer</i></b> may be:	<ul style="list-style-type: none"> <li>• asset manager</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• contractor</li> <li>• network planner</li> <li>• nominated customer representative</li> <li>• project manager</li> <li>• service provider.</li> </ul>
<i>Network equipment</i> may include:	<ul style="list-style-type: none"> <li>• asynchronous transfer mode (ATM) switch</li> <li>• dispersion compensation devices</li> <li>• enclosures</li> <li>• hubs</li> <li>• optical add drop multiplexer (OADM)</li> <li>• optical amplifier</li> <li>• optical filters</li> <li>• optical splitters</li> <li>• patch panels</li> <li>• regenerator</li> <li>• synchronous digital hierarchy (SDH) multiplexers</li> <li>• transponder shelf.</li> </ul>
<i>Installation plan</i> may include:	<ul style="list-style-type: none"> <li>• cable trays</li> <li>• detailed drawings and equipment layout</li> <li>• detailed list of equipment and types</li> <li>• earthing specifications</li> <li>• equipment locations</li> <li>• equipment mounting details</li> <li>• interconnecting cabling between racks</li> <li>• monitoring equipment</li> <li>• power feeds</li> <li>• rack positions</li> <li>• testing procedures</li> <li>• tools.</li> </ul>
<i>Installation procedures</i> may include:	<ul style="list-style-type: none"> <li>• setup procedures</li> <li>• monitoring progress according to plan</li> <li>• notification of network operations centre (NOC)</li> <li>• sourcing hardware and software</li> <li>• upgrade activity: <ul style="list-style-type: none"> <li>• installing optical equipment</li> <li>• post-upgrade testing</li> <li>• pre-update testing</li> <li>• shutdown installation</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• rectifying faults.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to test specialised optical devices	1.1. Obtain <i>relevant legislation, codes, regulations and standards</i> and follow occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> for the given work 1.2. Work safely according to relevant safety legislation and company work practices identifying <i>hazards</i> and using <i>personal protective equipment</i> 1.3. Determine the type of <i>optical device</i> using the design plan from <i>appropriate person</i> and obtain manufacturer's <i>specifications</i> for testing 1.4. Determine the test procedures and <i>test equipment</i> required to evaluate suitability of the optical device
2. Test the specialised optical device	2.1. Set up the test layout according to safe industry practice and connect the specialised optical device into the test set-up 2.2. Undertake a <i>test regime</i> to determine the performance characteristics of the specialised optical device 2.3. Analyse the test results to determine the suitability and compatibility of the optical device for integration into the network
3. Document the performance of the specialised optical device	3.1. Prepare an evaluation report with recommendations on the suitability of the specialised optical device 3.2. Present test results and evaluation report to appropriate person with copies filed for later reference according to organisation's policies

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to interpret test results
- communication skills to:
  - liaise with internal and external personnel on technical and operational matters
  - relate to work associates, supervisors, team members and clients

**REQUIRED SKILLS AND KNOWLEDGE**

- literacy skills to:
  - interpret technical documentation, such as equipment manuals, specifications and service orders
  - write reports using standard formats
- numeracy skills to interpret results and evaluate different types of technical data
- planning and organisational skills to plan, prioritise and monitor own work and that of others
- problem solving and contingency management skills to:
  - adapt testing procedures to requirements of particular situations
  - modify activities depending on operational contingencies, risk situations and environments
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities especially when dealing with infra-red laser light
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - backup and restore
  - clean optical fibre connector
  - examine optical fibre connector for contamination and assess whether cleaning is required
  - install software
  - measure optical power using hand-held optical power meter
  - measure DC and AC voltages
  - select and use appropriate test equipment
  - setup internet protocol (IP) addresses and subnet masks

**Required knowledge**

- amplified spontaneous emission (ASE)
- attenuation characteristics of optical fibres
- dense wavelength division multiplexing (DWDM) principles of operation
- features and operating requirements of test equipment including:
  - hand-held optical power meter
  - optical spectrum analyser
  - transmission test set
- dispersion characteristics of various fibres
- dispersion compensation devices

**REQUIRED SKILLS AND KNOWLEDGE**

- electrostatic discharge precaution
- functions of optical add drop multiplexer (OADM) and reconfigurable optical add-drop multiplexer (ROADM)
- gain equalisation
- International Telecommunications Union (ITU) wavelength grid for DWDM
- measurement of dispersion
- optical amplifier operation
- optical fibre connector types and characteristics
- optical fibre types and characteristics
- optical return loss (ORL)
- path protection and protection switching
- polarisation dependent loss (PDL)
- protocols used on optical DWDM systems
- reflectance
- ring topologies and linear network topologies
- specific OHS requirements that impact on the safe inspection of optical connectors and the safe measurement of optical power from laser transmission systems
- tunable laser sources and their characteristics

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and coordinate test activities and equipment</li> <li>• test specialised optical devices and determine suitability for integration into a network</li> <li>• analyse test results</li> <li>• report and make recommendations on suitability for integration</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which optical device testing may be conducted</li> <li>• use of test equipment currently used in industry</li> <li>• manufacturer's technical documentation, legislation, codes and standards.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate performing tests</li> <li>• review of test documentation and reports completed by the candidate</li> <li>• oral or written questioning to assess knowledge of testing procedures and required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTOPN5118A Plan and configure dense wavelength division multiplexing systems</li> <li>• ICTOPN5119A Perform acceptance and commissioning test on optical network</li> <li>• ICTOPN5120A Plan for an optical system upgrade and cut over</li> <li>• ICTOPN5123A Analyse and integrate specialised</li> </ul>

**EVIDENCE GUIDE**

	<p>optical devices in the network.</p> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant legislation, codes, regulations and standards*** may include:

- Australian Communications Industry Forum (ACIF) standards and codes
- AS Communications Cabling Manual (CCM)
- Australian building codes and regulations

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• compliance with appropriate Australian Communications and Media Authority (ACMA) technical standard requirements for underground, aerial, Category 5 or Category 6, 6A, 7 or 7A, and unshielded twisted pairs (UTP)</li> <li>• Environmental Protection Acts</li> <li>• fire regulations</li> <li>• Institute of Electrical and Electronics Engineers (IEEE) standards</li> <li>• OHS</li> <li>• relevant international standards</li> <li>• technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006.</li> </ul>
<i>OHS and environmental requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• decommissioning and isolating worksite and lines prior to commencement</li> <li>• flashing lights</li> <li>• gas and other hazard detection equipment</li> <li>• identifying other services, including power and gas</li> <li>• safety barriers</li> <li>• safety equipment</li> <li>• safe working practices such as the safe use and handling of: <ul style="list-style-type: none"> <li>• asbestos</li> <li>• chemicals</li> <li>• materials</li> <li>• tools and equipment</li> <li>• work platforms</li> </ul> </li> <li>• special access requirements</li> <li>• suitable light and ventilation</li> <li>• trench guards</li> <li>• warning signs and tapes</li> <li>• woggles hats</li> <li>• environmental considerations: <ul style="list-style-type: none"> <li>• clean-up protection</li> <li>• stormwater protection</li> <li>• waste management</li> <li>• noise, dust and clean-up management.</li> </ul> </li> </ul>
<i>Hazards</i> may include:	<ul style="list-style-type: none"> <li>• activating equipment without notifying other staff who may be working remotely on the</li> </ul>

**RANGE STATEMENT**

	<p>network</p> <ul style="list-style-type: none"> <li>• cleaning alcohol, epoxy resins and other solvents and chemicals may be carcinogenic, cause allergies or be dangerous to health in other ways</li> <li>• environmental hazards: <ul style="list-style-type: none"> <li>• air pollution</li> <li>• damage to natural or heritage precincts</li> <li>• dangerous gases</li> <li>• ground water contamination</li> <li>• heavy or noxious metals pollution</li> <li>• noise</li> <li>• petrochemical spillage</li> <li>• release of hydrochlorofluorocarbons (HCFC)</li> </ul> </li> <li>• flammable cleaning chemicals fluids and solvents</li> <li>• fibre offcut damage to eyes and skin</li> <li>• health hazards: <ul style="list-style-type: none"> <li>• dangerous or harmful substances</li> <li>• handling of optic fibres and lasers</li> <li>• risk of infection</li> <li>• risk of sustained injury from repetitive tasks</li> </ul> </li> <li>• inhalation of fibre offcuts and particles from vacuum cleaning of worksite</li> <li>• laser damage to eyes.</li> </ul>
<b>Personal protective equipment</b> may include:	<ul style="list-style-type: none"> <li>• inspection microscope with integral laser safety filter</li> <li>• safety glasses</li> <li>• video microscope.</li> </ul>
<b>Optical device</b> may include:	<ul style="list-style-type: none"> <li>• Bragg grating</li> <li>• coupler</li> <li>• dispersion compensation device (DCD)</li> <li>• DWDM multiplexer</li> <li>• erbium doped fibre amplifier (EDFA)</li> <li>• gain equaliser</li> <li>• Raman amplifier</li> <li>• ROADM.</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• network engineer</li> <li>• project engineer</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• project manager.</li> </ul>
<i>Specifications</i> may include:	<ul style="list-style-type: none"> <li>• bandwidth</li> <li>• insertion loss</li> <li>• operating wavelength</li> <li>• ORL</li> <li>• ripple.</li> </ul>
<i>Test equipment</i> may include:	<ul style="list-style-type: none"> <li>• broadband amplified spontaneous emissions (ASE) source</li> <li>• optical spectrum analyser</li> <li>• PDL controller</li> <li>• PDL meter</li> <li>• power meter</li> <li>• tunable laser source</li> <li>• variable attenuator.</li> </ul>
<i>Test regime</i> may include:	<ul style="list-style-type: none"> <li>• bandwidth</li> <li>• central wavelength and channel spacing</li> <li>• channel uniformity</li> <li>• insertion loss</li> <li>• ORL</li> <li>• PDL</li> <li>• ripple.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse specialised optical device and prepare for integration in the network</p>	<p>1.1. Obtain <i>relevant legislation, codes, regulations and standards</i> and follow occupational health and safety (<i>OHS</i>) and <i>environmental requirements</i> for the project work</p> <p>1.2. Work safely according to relevant safety legislation and company work practices identifying <i>hazards</i> and using <i>personal protective equipment</i></p> <p>1.3. Obtain plans and drawings of existing <i>optical network</i> from <i>appropriate person</i> and review potential locations for suitability of integrating additional hardware</p> <p>1.4. Analyse and evaluate a range of integration options using device <i>specifications</i> which satisfy the customer's network requirements</p> <p>1.5. Prepare and submit the business case for adopting the recommended integration solution</p> <p>1.6. Prepare design plan with interconnection details to existing system and <i>installation options</i> and seek approval to proceed from customer</p> <p>1.7. Undertake an impact risk assessment of the hardware integration with the network operations centre (NOC) and prepare for contingencies using contingency plan</p>
<p>2. Integrate the specialised optical device in the network</p>	<p>2.1. Install and integrate <i>specialised optical devices</i> into existing network according to design plan</p> <p>2.2. Test the network and evaluate the results to <i>verify optical network performance</i> with the integrated specialised optical devices in operation</p>
<p>3. Document the integration of the specialised optical device in dense wavelength division multiplexing (DWDM) network</p>	<p>3.1. Produce an updated design plan and submit to customer with copies filed for later reference according to organisation's policies</p> <p>3.2. Prepare an evaluation report on the performance of the network with specialised optical devices with recommendations for future enhancements</p> <p>3.3. Notify NOC of job completion and obtain sign off from appropriate person</p>

## Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- analytical skills to evaluate technical information and develop integration options
- communication skills to:
  - liaise with internal and external personnel on technical and operational matters
  - relate to work associates, supervisors, team members and clients
- literacy skills to:
  - interpret technical documentation, such as equipment manuals, specifications and service orders
  - write reports using standard formats
- numeracy skills to interpret results and evaluate different types of technical data
- planning and organisational skills to plan, prioritise and monitor own work and that of others
- problem solving and contingency management skills to:
  - adapt testing procedures to requirements of particular situations
  - modify activities depending on operational contingencies, risk situations and environments
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities especially when dealing with infra-red laser light
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - backup and restore
  - clean optical fibre connector
  - examine optical fibre connector for contamination and assess whether cleaning is required
  - install software
  - measure optical power using handheld optical power meter
  - measure DC and AC voltages
  - select and use appropriate test equipment
  - setup internet protocol (IP) addresses and subnet masks

### Required knowledge

- attenuation characteristics of optical fibres
- DWDM principles of operation

**REQUIRED SKILLS AND KNOWLEDGE**

- features and operating requirements of test equipment, including:
  - hand-held optical power meter
  - optical spectrum analyser
  - transmission test set
- dispersion characteristics of optical fibres
- dispersion compensation devices
- electrostatic discharge precaution
- functions of optical add drop multiplexer (OADM) and reconfigurable optical add-drop multiplexer (ROADM)
- gain equalisation
- International Telecommunications Union (ITU) wavelength grid for DWDM
- measurement of dispersion
- optical amplifier operation
- optical fibre connector types and characteristics
- optical fibre types and characteristics
- optical return loss (ORL)
- path protection and protection switching
- protocols used on optical DWDM systems
- reflectance
- ring topologies and linear network topologies
- specific OHS requirements that impact on the safe inspection of optical connectors and the safe measurement of optical power from laser transmission systems
- tunable laser sources and their characteristics

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage a project	1.1. Develop a project proposal, including specific <i>project management processes</i> 1.2. Determine the role of major stakeholders and implications for the project 1.3. Develop a risk management strategy and present to stakeholders for agreement 1.4. Check for technical compliance of project with relevant standards 1.5. Select project management computer software 1.6. Conduct a skills audit of personnel and identify additional training requirements
2. Apply project management processes	2.1. Determine participants' responsibilities using critical path method (CPM) to draw a network diagram 2.2. Sequence and coordinate <i>activities</i> required for a specific project 2.3. Determine the critical path to optimise timing of the project deliverables 2.4. Assess the viability of project estimates by preparing a budget 2.5. Perform risk analysis to determine factors that may hinder the project deliverables 2.6. Assess the progress of the project with <i>contingencies</i> to manage risks 2.7. Determine any updates and recommendations in agreement with the customer 2.8. Prepare contract variations if required
3. Complete work and document activities	3.1. Select procedures for commissioning if required and finish the project 3.2. Produce final documentation with recommendations and present to customer 3.3. Document and archive project documentation 3.4. Obtain sign off

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- analytical skills to evaluate risks
- communication skills to work effectively in a group, present information and negotiate contract variations
- information technology skills for word processing, desktop research and using project management software
- literacy skills to prepare reports and contract variations
- numeracy skills to:
  - calculate budget requirements
  - determine workforce requirements
- problem solving skills to anticipate and respond to issues in project progress
- research skills to gather data, observe and analyse project issues

### Required knowledge

- organisational project management policy and procedures
- safety management:
  - personal protective equipment conforming to industry and occupational health and safety (OHS) standards
  - precautions required to minimise, control or eliminate hazards that may exist during work activities
  - relevant legislation, codes, regulations and standards
- workplace and industry environment:
  - commissioning procedures
  - industrial issues
  - roles and responsibilities
  - skills audit
- telecommunication communication systems
- site engineering
- project management processes and software

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare and apply project management process to a telecommunications project using project management software</li> <li>• develop a plan to manage a telecommunication project with a risk management strategy, budget and contingencies</li> <li>• complete work and project documentation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a telecommunications site on which projects can be managed</li> <li>• computers and relevant computer software</li> <li>• relevant legislation, codes, regulations and standards.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• oral or written questioning to assess knowledge and skills in the project management process</li> <li>• direct observation of the candidate performing project management tasks</li> <li>• review of the candidate generated project documentation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTPMG8142A Manage telecommunications workplace</li> <li>• ICTPMG7145A Undertake a telecommunications project</li> <li>• ICTPMG8149A Evaluate and use telecommunications management networks.</li> </ul> <p>Aboriginal people and other people from a non-English</p>

**EVIDENCE GUIDE**

	<p>speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Project management processes***  
may include:

- calendaring
- constraints
- contingencies
- CPM
- critical paths
- Gantt chart
- PERT

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• project variables</li> <li>• reviews</li> <li>• salvage value</li> <li>• variations.</li> </ul>
<i>Activities</i> may include:	<ul style="list-style-type: none"> <li>• contracts and procurement</li> <li>• cost management</li> <li>• human resource (HR) management</li> <li>• project communications methods</li> <li>• project tracking</li> <li>• quality</li> <li>• risk</li> <li>• scope</li> <li>• time management.</li> </ul>
<i>Contingencies</i> may include:	<ul style="list-style-type: none"> <li>• increase staff numbers</li> <li>• reinstallation</li> <li>• replacement components</li> <li>• work amendments.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to evaluate and use telecommunications management network	1.1. Research and evaluate network management architectures in common carrier and extended models 1.2. Evaluate features and functionality of the Standards Committee International Telecommunications Union (ITU-T) TMN architecture and network models 1.3. Research and evaluate techniques for collecting management information from network nodes using interrupts and polling 1.4. Analyse configuration management problems and produce an assessment report on solutions by integrated network management systems
2. Analyse fault management and accountability procedures	2.1. Evaluate effectiveness of fault management processes from beginning to resolution, including automation of fault management 2.2. Analyse the reasons for alarm correlation with process analysis and apply <i>fault identification</i> to network problems
3. Plan for reliability and survivability	3.1. Research and produce a report on quality of service (QoS) in a telecommunications context, including relevant international standards and range and type of possible monitoring parameters for a QoS 3.2. Analyse the reasons for service levels in a telecommunications context 3.3. Perform linear and exponential trend analysis on real or simulated data for a single <i>monitoring parameter</i> 3.4. Research and assess reliability and survivability in a telecommunications context with reference to disaster and security management policies and procedures 3.5. Develop a disaster recovery plan for a telecommunications network
4. Research and report network management techniques	4.1. Research how accounting records are generated and used for both voice and data networks 4.2. Analyse the process of generating bills from accounting records, configuration and customer information 4.3. Research and report on network management <i>techniques and standards</i> used for the Internet

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Research and report on standards used in the simple network management protocol (SNMP) network management model and the global system for mobiles (GSM) network</p> <p>4.5. Analyse network management functions over a CNET network simulation or similar data network and produce a report on the findings</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to evaluate a range of complex technical data
- communication skills to work effectively within a group and present information
- information technology skills for word processing, using statistical data and desktop research
- literacy skills to prepare reports and read and interpret technical standards
- planning and organisational skills to manage own work in short timeframes
- research skills to gather data and information
- technical skills to use telecommunications management networks

#### Required knowledge

- administrative network management systems
- business model
- business processes
- enterprise solutions
- operations network management systems
- organisational policy and procedures
- workplace and industry environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• research and evaluate the architectural features and functions of network management systems</li> <li>• research and report               <ul style="list-style-type: none"> <li>• the major features, configuration and functions of management systems</li> <li>• on fault management and accountability procedures</li> <li>• the major features and functions of QoS agreements</li> <li>• on network management techniques</li> </ul> </li> <li>• analyse the major features of planning for reliability and survivability.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a telecommunications operations site with a network management system</li> <li>• networked computers with relevant software.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• oral or written questioning to assess knowledge of network management</li> <li>• direct observation of the candidate performing network management functions within a telecommunication system</li> <li>• review of research reports prepared by the candidate.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to install renewable energy system	1.1. Prepare for given work according to <i>relevant legislation, codes, regulations and standards</i> 1.2. Arrange access to site according to required procedure 1.3. Assess extent of system implementation using feasibility report and <i>organisational guidelines</i> 1.4. Produce a report to meet the <i>customer and organisational requirements</i> 1.5. Liaise with <i>appropriate person</i> to obtain approval for the plans with recommendations 1.6. Determine and source <i>renewable energy components</i> according to the agreed plan
2. Install and test renewable energy system	2.1. Install and configure components according to occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> , plan, manufacturer's and organisational requirements 2.2. Identify and resolve problems 2.3. Integrate the renewable system into the network 2.4. Test and enhance system performance to meet organisational requirements
3. Complete documentation and clean up worksite	3.1. Produce an evaluation report on the actual cost-benefits of implementing the renewable energy system to the organisation 3.2. Provide a support manual for the customer 3.3. Record all test results and records for the customer 3.4. Notify customer and obtain sign off

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>• analytical skills to evaluate information from reports</li> <li>• communication skills to liaise with internal and external personnel on technical, operational and business related matters</li> </ul>

**REQUIRED SKILLS AND KNOWLEDGE**

- literacy skills to:
  - interpret technical renewable energy systems' installation manuals
  - process and present written and verbal information to a diverse range of people
  - write reports, design solutions and recommendations in required formats
- numeracy skills to assess cost benefits and renewable energy options
- problem solving skills to resolve installation problems
- research skills to determine requirements
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to evaluate alternate energy systems and their compatibility with existing power sources

**Required knowledge**

- broad knowledge of systems diagnostic features
- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- current industry accepted hardware products and renewable energy system products
- customer and business liaison
- documenting technical specifications
- linkage between processes
- technologies:
  - alternate energy, such as solar, wind, chemical
  - areas of the hardware relevant to configuration and testing
  - installation procedures
  - renewable energy system relevant to configuration and testing
  - renewable energy systems' functionality
  - set-up and configuration procedures
- vendor specifications and requirements for component installation

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>ascertain and meet client requirements for installation of a renewable energy system hardware</li> <li>plan and connect the hardware components according to vendor and technical specifications.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>site on which renewable energy solutions can be implemented</li> <li>renewable energy system currently used in industry</li> <li>relevant documentation, feasibility studies, equipment manuals and other site related documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct observation of the candidate carrying out installation and testing activities</li> <li>review of plans completed by the candidate for different sites</li> <li>oral or written questioning to assess knowledge of legislation and safety procedures.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS5187A Implement server virtualisation for a sustainable ICT system</li> <li>ICTSUS4185A Install and test power management software</li> <li>ICTSUS4184A Install and test power saving hardware</li> <li>ICTSUS4186A Install thin client applications for Power over Ethernet.</li> </ul>

**EVIDENCE GUIDE**

	<p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to install and test power saving hardware	1.1. Arrange access to site according to required procedure 1.2. Assess extent of system implementation using feasibility report and <i>organisational guidelines</i> 1.3. Produce a report to meet the <i>customer</i> and <i>organisational requirements</i> 1.4. Liaise with <i>appropriate person</i> to obtain approval for the plans with recommendations 1.5. Determine and source <i>power saving hardware components</i> according to the agreed plan
2. Install, test and evaluate power saving hardware	2.1. Install and configure components and according to occupational health and safety (OHS) and environmental requirements, plan, manufacturer's and industry standards 2.2. Resolve identified problems 2.3. Test and enhance system performance to meet organisational requirements
3. Complete documentation and clean up worksite	3.1. Produce an evaluation report on the actual cost-benefits of implementing the power saving hardware to the organisation 3.2. Provide a support manual for the customer 3.3. Record all test results and records for the customer 3.4. Restore any changes made to the worksite to customer's satisfaction and obtain sign off

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>• communication skills to liaise with internal and external personnel on technical, operational and business related matters</li> <li>• literacy skills to:               <ul style="list-style-type: none"> <li>• read technical documentation</li> <li>• write reports with design solutions and recommendations in required formats</li> </ul> </li> </ul>

**REQUIRED SKILLS AND KNOWLEDGE**

- numeracy skills to assess cost benefits of power saving hardware
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving skills to resolve installation issues
- research skills to interrogate vendor databases and websites to identify solutions to meet client business specifications
- technical skills to evaluate low power devices and methodologies

**Required knowledge**

- broad knowledge of systems diagnostic features
- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- current industry accepted hardware products
- customer and business liaison
- documenting technical specifications
- linkage between processes
- set-up and configuration procedures
- technologies such as:
  - areas of the hardware relevant to configuration and testing
  - installation procedures
  - power saving hardware functionality
- vendor specifications and requirements for component installation

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>ascertain and meet client requirements for installation and testing of power saving hardware</li> <li>plan and connect the hardware components according to vendor and technical specifications.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>site on which energy saving solutions can be implemented</li> <li>use of current power saving hardware currently used in industry</li> <li>relevant documentation, feasibility studies, equipment manuals and other site related documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct observation of the candidate carrying out installation and testing activities</li> <li>review of feasibility report and plans completed by the candidate for different sites</li> <li>oral or written questioning to assess knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS4183A Install and test renewable energy system for ICT networks</li> <li>ICTSUS4185A Install and test power management software</li> <li>ICTSUS4186A Install thin client applications for Power over Ethernet</li> <li>ICTSUS5187A Implement server virtualisation for a sustainable ICT system.</li> </ul>

**EVIDENCE GUIDE**

	<p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Organisational guidelines*** may include:

- budget constraints
- communication methods
- dispute resolution
- documenting procedures and templates
- financial control mechanisms
- infrastructure

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>operational costs.</li> </ul>
<i>Customer</i> may include:	<ul style="list-style-type: none"> <li>department within the organisation</li> <li>government department</li> <li>person within a department</li> <li>private organisation</li> <li>third party.</li> </ul>
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> <li>preventative maintenance and diagnostic policy</li> <li>problem solution processes</li> <li>roles and technical responsibilities in the IT department</li> <li>vendor and product service level support agreements</li> <li>work environment.</li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>authorised business representative</li> <li>infrastructure administrator</li> <li>network administrator</li> <li>power systems manager</li> <li>property manager</li> <li>supervisor.</li> </ul>
<i>Power saving hardware components</i> may include:	<ul style="list-style-type: none"> <li>extremely low power motherboards</li> <li>memory devices: <ul style="list-style-type: none"> <li>compact flash</li> <li>electronic drives</li> <li>flash drives</li> <li>USB</li> </ul> </li> <li>power supply</li> <li>processor.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to install power management software	1.1. Arrange access to site according to required procedure 1.2. Assess extent of software implementation using feasibility report and <i>organisational guidelines</i> 1.3. Liaise with <i>appropriate person</i> to obtain approval for the plans 1.4. Determine and source new software required
2. Install software	2.1. Bench test software for performance utilising available technology 2.2. Install and configure software according to occupational health and safety (OHS) and environmental requirements, plan, installation procedures and <i>organisational requirements</i> 2.3. Resolve identified technical problems
3. Complete documentation and sign off procedures	3.1. Document the installation and configuration process according to organisational guidelines 3.2. Provide user documentation 3.3. Notify <i>customer</i> and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to use information to meet organisational needs in a defined range of areas
- communication skills to:
  - interact with others
  - present information
  - question and actively listen to customers and vendors
- literacy skills to:
  - interpret technical installation manuals for renewable energy systems
  - process and present written information to a diverse range of people
- problem solving skills to meet a defined range of unpredictable problems

**REQUIRED SKILLS AND KNOWLEDGE****Required knowledge**

- areas of the hardware relevant to configuration and testing
- current industry-accepted software products, with general features and capabilities
- installation procedures
- OHS requirements in relation to work safety, environmental factors and ergonomic considerations
- power saving software functionality
- set-up and configuration procedures
- systems diagnostic features
- vendor specifications and requirements for component installation

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>ascertain and meet client requirements for installation and testing of power management software</li> <li>plan and connect the software components according to vendor and technical specifications across a variety of situations.</li> </ul>
	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>site on which energy saving solutions can be implemented</li> <li>use of current power saving software currently used in industry</li> <li>relevant documentation, feasibility studies, equipment manuals and other site related documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct observation of the candidate carrying out installation and testing activities</li> <li>review of plans completed by the candidate for different sites</li> <li>oral or written questioning to assess methodology used.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS5187A Implement server virtualisation for a sustainable ICT system</li> <li>ICTSUS4183A Install and test renewable energy system for ICT networks</li> <li>ICTSUS4184A Install and test power saving hardware</li> <li>ICTSUS4186A Install thin client applications for</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to install thin client applications	1.1. Assess extent of applications to be implemented using feasibility report and <i>organisational guidelines</i> 1.2. Highlight issues associated with adoption of Web 2.0 applications 1.3. Produce an implementation plan and present to <i>customer</i> 1.4. Liaise with <i>appropriate person</i> to obtain approval for the plans with any recommendations 1.5. Notify customer for site access
2. Evaluate appropriate applications	2.1. Develop criteria for Web 2.0 applications to satisfy enterprise needs 2.2. Test and evaluate Web 2.0 applications according to agreed criteria 2.3. Present findings to the customer with recommendations on Web 2.0 applications
3. Install hardware components and applications	3.1. Follow occupational health and safety (OHS) and environmental requirements according to plan and manufacturer's specifications 3.2. Develop implementation plans with prioritised tasks and contingency arrangements for minimum disruption to customer 3.3. Install <i>hardware components</i> and <i>thin client software</i> needed for the work according to network and <i>organisational requirements</i> 3.4. Bench test performance of applications 3.5. Resolve identified problems
4. Complete work and document activities	4.1. Document the installation and integration process according to organisational guidelines 4.2. Provide user documentation 4.3. Notify customer and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**REQUIRED SKILLS AND KNOWLEDGE****Required skills**

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to:
  - interpret technical installation manuals
  - process and present written and verbal information to a diverse range of people
  - write reports, design solutions and recommendations in required formats
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving skills to resolve installation issues
- research skills to interrogate vendor databases and websites to identify solutions to meet client business specifications
- technical skills to evaluate thin client software and methodologies

**Required knowledge**

- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- customer and business liaison
- documenting technical specifications
- linkage between processes
- set-up and configuration procedures
- systems diagnostic features
- Web 2.0:
  - applications and functionality
  - areas of the Web 2.0 relevant to configuration and testing
  - current industry accepted Web 2.0 products
  - vendor specifications and requirements for Web 2.0 applications
  - Web 2.0 application procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>determine and meet client requirements for thin client applications</li> <li>install and configure the components according to vendor and technical specifications.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>site on which remote power feeding applications can be implemented</li> <li>relevant documentation, feasibility studies and equipment manuals.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct observation of the candidate carrying out installation and configuring</li> <li>review of plans completed by the candidate for different sites outlining resources required</li> <li>oral or written questioning to assess required knowledge and methodologies used.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS5187A Implement server virtualisation for a sustainable ICT system</li> <li>ICTSUS4183A Install and test renewable energy system for ICT networks</li> <li>ICTSUS4184A Install and test power saving hardware</li> <li>ICTSUS4185A Install and test power management software.</li> </ul> <p>Aboriginal people and other people from a non-English</p>

## ICTSUS5187A Implement server virtualisation for a sustainable ICT system

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to install and integrate a virtual server in a network to replace multiple physical servers. This is done to reduce power requirements of individual servers.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to ICT technical staff who install server networks with energy and cost-efficient systems to meet sustainability targets.</p>
--------------------------------	--

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to implement server virtualisation	1.1. Assess extent of virtualisation to be implemented using feasibility report and <i>organisational guidelines</i> 1.2. Analyse existing server infrastructure utilisation 1.3. Research and analyse alternative virtualisation scenarios including a risk analysis and relative comparisons of each consideration 1.4. Provide a brief report of proposed preferred plan and describe resources required 1.5. Liaise with <i>appropriate person</i> to obtain approval for the plans with any recommendations
2. Design virtual server specification	2.1. Confirm network operating system, <i>server applications</i> and server design with <i>customer</i> 2.2. Determine product and vendor architecture and <i>equipment</i> specifications 2.3. Determine technology and resources within <i>business requirements</i> and budget
3. Install virtual server	3.1. Follow occupational health and safety (OHS) and environmental requirements according to plan and manufacturer's specifications 3.2. Notify customer for site access 3.3. Create a detailed <i>task</i> list specifying stages and sequence of work required 3.4. Review hardware and <i>software</i> to ensure compatibility 3.5. Install the required operating system, additional tools or third-party software as specified in design 3.6. Patch the operating system and applications to ensure maximum security and reliability
4. Integrate and test virtual server	4.1. Determine tests to ensure virtual server <i>integration</i> 4.2. Develop the test plan referring to resources and network impact 4.3. Run the system tests according to test plan and record outcomes 4.4. Analyse the error report and make changes as required 4.5. Test required changes or additions 4.6. Validate changes or additions against specifications
5. Complete work and	5.1. Document the installation and integration process

ELEMENT	PERFORMANCE CRITERIA
document activities	according to organisational guidelines 5.2. Provide user documentation 5.3. Notify customer and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to:
  - interpret technical installation manuals
  - process and present written information to a diverse range of people
  - write reports, design solutions and recommendations in required formats
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving skills to resolve installation issues
- research skills to interrogate vendor databases and website to identify different solutions to meet client business specifications
- technical skills to evaluate virtual servers and methodologies

#### Required knowledge

- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- current industry-accepted products
- customer and business liaison
- documenting technical specifications
- linkage between processes
- systems diagnostic features
- technologies:
  - power supply requirements and management
  - registered random access memory (RAM)
  - server design and network architecture
  - set-up and configuration procedures

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to integrate sustainability into the planning and design stages of an ICT project	1.1. Evaluate suitable ICT <i>projects</i> into which sustainability can be integrated 1.2. Negotiate with the <i>stakeholders</i> to establish the extent to which sustainability is to be integrated 1.3. Research and identify suitable technology solutions applicable to the project 1.4. Gather power consumption data on <i>ICT equipment</i> required for an <i>energy audit</i> based on an <i>agreed standard</i>
2. Devise strategies for incorporating sustainability into an ICT project	2.1. Determine and oversee implementation of <i>short term technology solutions</i> to achieve reduction of power consumption 2.2. Initiate and progress <i>sustainable management principles</i> which result in reduced environmental impact 2.3. Establish, regularly review and improve <i>key performance indicators</i> (KPI) on sustainability performance 2.4. Incorporate innovative planning and design rules for ICT projects which foster sustainability and environmental best practice
3. Analyse energy audit data	3.1. Identify <i>energy usage</i> within the scope of the ICT project and provide a <i>detailed report</i> 3.2. Estimate potential energy savings and payback periods for recommended actions 3.3. Estimate the carbon dioxide (CO <sub>2</sub> ) emissions for the nominated project 3.4. Evaluate the estimated CO <sub>2</sub> emissions with comparable <i>benchmarks</i> 3.5. Make recommendations in order of priority and give estimates of implementation costs on integration of sustainability for other ICT projects

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- analytical skills to:
  - compare and evaluate effective technical solutions involving integration of sustainability
  - interpret technical specifications and related sustainability documentation
- communication skills to:
  - adjust communication to suit different audiences
  - liaise with customers to outline sustainability strategy benefits and how they can be incorporated into the project within specified timeframes
  - negotiate approvals and contract arrangements with suppliers and contractors
  - respond effectively to diversity
  - to consult on and validate policy
  - work as a member of a team
- literacy skills to:
  - document technical requirements and procedures
  - evaluate complex and formal documents such as policy and legislation
  - prepare written reports requiring precise expression, language and structures suited to the intended audience
- numeracy skills to:
  - analyse and confirm capacity requirements
  - calculate budget requirements and limitations
  - determine workforce requirements
  - estimate CO<sub>2</sub> emissions
- organisational skills to arrange relevant documentation and approvals
- planning and organisational skills to:
  - set out project requirements and priorities
  - make site access and equipment delivery arrangements
- problem solving skills to account for unexpected variations to requirements, and to effectively manage different points of view and dissenting stakeholders
- research skills to:
  - research and present information
  - gain and maintain relevant and current technical product knowledge
- technical skills to integrate sustainability into a technical project

### Required knowledge

- best practice approaches relevant to own work area
- environmental or sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and OHS safety

**REQUIRED SKILLS AND KNOWLEDGE**

- implications of policy being developed
- estimated CO<sub>2</sub> emissions
- ICT power consumption calculations
- policy development processes and practices
- power consumption audit methodology
- principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- quality assurance systems relevant to own organisation
- relevant industry competence
- relevant organisational policies, procedures and protocols
- systems and procedures to aid in the achievement of workplace sustainability

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and integrate sustainability into ICT projects by devising strategies to conserve resources</li> <li>• analyse energy audit data on enterprise resource consumption</li> <li>• develop and monitor policies for review and improvements, benchmarking against industry best practice and attempting new approaches continuously over time.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which planning, design and integration of sustainability may be carried out</li> <li>• relevant legislation, standards, guidelines, reports and equipment specifications and drawings</li> <li>• range of workplace documentation, personnel, information and resources:               <ul style="list-style-type: none"> <li>• compliance obligations</li> <li>• organisational plans</li> <li>• work responsibilities.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate analysing energy audit data</li> <li>• review of policy developed and procedural documentation completed by the candidate outlining the approach taken</li> <li>• review of implementation strategy, plans and work plans completed by the candidate</li> <li>• evaluation of methods used to involve stakeholders in policy development, implementation and review.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

**EVIDENCE GUIDE**

for example:

- ICTPMG6033A Develop project management plan
- ICTPMG6034A Prepare a detailed design brief
- ICTTEN6206A Produce an ICT network architecture design.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Projects* may include:

- advanced meter infrastructure (AMI)

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• alternative energy cellular base station sites</li> <li>• equipment upgrades</li> <li>• introduction of new technology</li> <li>• passive optical network (PON) technology for fibre to the premises (FTTP)</li> <li>• smart grid partnerships</li> <li>• software upgrade.</li> </ul>
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• competitors</li> <li>• customers</li> <li>• employees</li> <li>• investors</li> <li>• media</li> <li>• regulators</li> <li>• society.</li> </ul>
<i>ICT equipment</i> may include:	<ul style="list-style-type: none"> <li>• data storage</li> <li>• firewall</li> <li>• multiplexer</li> <li>• printer</li> <li>• router</li> <li>• server</li> <li>• switch</li> <li>• telephone system</li> <li>• workstation.</li> </ul>
<i>Energy audit</i> may refer to:	<ul style="list-style-type: none"> <li>• AS/NZ 3598:2000: <ul style="list-style-type: none"> <li>• Level 1 consumption benchmark</li> <li>• Level 2 preliminary assessment</li> <li>• Level 3 economic analysis.</li> </ul> </li> </ul>
<i>Agreed standard</i> may include:	<ul style="list-style-type: none"> <li>• AS/NZ 3598:2000 (or latest revision)</li> <li>• BS EN 16001:2009 Energy Management Systems</li> <li>• ISO 14001:2004 Environment.</li> </ul>
<i>Short term technology solutions</i> may include:	<ul style="list-style-type: none"> <li>• energy efficient hardware</li> <li>• hibernation of: <ul style="list-style-type: none"> <li>• hard drive</li> <li>• LCD monitor</li> <li>• workstation</li> </ul> </li> <li>• multifunction devices</li> <li>• remote energy management</li> <li>• replacing desktop PCs with thin clients</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• server virtualisation</li> <li>• use of videoconference technology.</li> </ul>
<i>Sustainable management principles</i> may include:	<ul style="list-style-type: none"> <li>• audit waste management procedures</li> <li>• improving the energy efficiency of ICT network equipment:               <ul style="list-style-type: none"> <li>• reducing the need for air conditioning</li> <li>• shutting down equipment during low demand</li> </ul> </li> <li>• supply chain:               <ul style="list-style-type: none"> <li>• driving ethical values through the supply chain</li> <li>• engaging supplier's involvement in emissions reporting and continual improvement</li> <li>• engaging suppliers who provide information on energy consumption and product lifecycles</li> <li>• influencing suppliers to provide energy efficient products and services</li> </ul> </li> <li>• procurement strategies:               <ul style="list-style-type: none"> <li>• assessment of suppliers' environmental policies and procedures</li> <li>• lowering of energy consumption or environmental impact of replacement products or services</li> <li>• managing the environmental impacts of electrical and electronic equipment</li> <li>• use of energy consumption and environmental impact as criteria in the process of awarding contracts.</li> </ul> </li> </ul>
<i>Key performance indicators (KPIs)</i> may include:	<ul style="list-style-type: none"> <li>• kg CO<sub>2</sub> emitted per floor area occupied in permanent buildings</li> <li>• kg CO<sub>2</sub> emissions from company car fleet</li> <li>• percentage of timber used in construction from well managed, sustainable sources</li> <li>• percentage volume of material from sustainable sources</li> <li>• reduction of quantity (in 1000's kg) of ozone depleting gases used in air-conditioning equipment.</li> </ul>
<i>Energy usage</i> may include:	<ul style="list-style-type: none"> <li>• a percentage of overall energy use in this</li> </ul>

<b>RANGE STATEMENT</b>	
	project <ul style="list-style-type: none"> <li>• individual equipment</li> <li>• location.</li> </ul>
<i>Detailed report</i> may include:	<ul style="list-style-type: none"> <li>• details of energy efficiency improvements</li> <li>• energy consumption records</li> <li>• energy saving practices and financial returns</li> <li>• energy use in graphical form</li> <li>• executive summary with recommendations</li> <li>• implementation costs</li> <li>• payback periods</li> <li>• review process</li> <li>• timelines.</li> </ul>
<i>Benchmarks</i> may include:	<ul style="list-style-type: none"> <li>• AccountAbility AA1000 Assurance Standard (2008)</li> <li>• BSI BenchMark</li> <li>• Carbon Disclosure Project (CDP)</li> <li>• Dow Jones Sustainability Index (DJSI)</li> <li>• Global Reporting Initiative (GRI) G3 guidelines (telecommunications sector supplement).</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare information for establishing a business case	1.1. Evaluate the proposed ICT project to determine the scope and potential of sustainability integration 1.2. Research <i>appropriate sources of information</i> relevant to the project to prepare the business case 1.3. Analyse and evaluate the <i>expected goals</i> of the project and relate the business case to broader organisational goals 1.4. Identify and consult with <i>stakeholders</i> to plan and validate options 1.5. Identify and report on any assumptions and known <i>constraints</i> that can impact on the project
2. Produce the Business Case for the ICT sustainability project	2.1. Evaluate the <i>critical success factors</i> to determine the vital strategy for the project to successfully implement sustainability and gain competitive advantage 2.2. Prepare a cost-benefit analysis and estimate <i>overall benefit</i> obtained by introducing or improving sustainability in the project 2.3. Prepare an <i>estimate of costs</i> over an appropriate time period and determine the potential the <i>return on investment (RoI)</i> 2.4. Evaluate and analyse <i>alternative options</i> to determine the benefits, disadvantages, costs and risks
3. Produce business case documentations	3.1. Validate the options with stakeholders and determine the recommended option 3.2. Prepare an implementation plan for the recommended option for the ICT project 3.3. Produce an <i>executive summary</i> of the proposal including the consequences of not implementing the sustainability activity

## Required Skills and Knowledge

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p>
<p>This section describes the skills and knowledge required for this unit.</p>
<p><b>Required skills</b></p>

## REQUIRED SKILLS AND KNOWLEDGE

- analytical skills to compare and evaluate effective technical solutions involving introduction or improvement of sustainability
- research and writing skills to research and present information, and to prepare written business cases requiring precise expression, language and structures suited to the intended audience
- communication skills to:
  - prepare a press release regarding the level of achievement of sustainability benchmarks, environmental targets and performance highlights
  - liaise with customers to outline the resulting sustainability benefits
  - adjust communication to suit different audiences
  - respond effectively to diversity
  - work as a member of a team
  - consult on and validate policy
- literacy skills to:
  - prepare a business case
  - evaluate complex and formal documents, such as government policy and legislation
  - interpret technical specifications and related sustainability documentation
  - document technical requirements and procedures
- numeracy skills to:
  - determine workforce requirements
  - analyse and confirm capacity requirements
  - calculate budget requirements and limitations
  - perform calculations related to life cycle assessment (LCA)
- organisational skills to arrange relevant documentation and approvals
- planning and organisational skills to:
  - set out project requirements and priorities
- problem solving skills to account for unexpected variations to requirements, and to effectively manage different points of view and dissenting stakeholders
- research skills to gain and maintain relevant and current technical product knowledge
- technical skills to utilise sustainability software tools
- project management skills to undertake or manage a complex project

### Required knowledge

- best practice approaches relevant to sustainability
- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and occupational health and safety (OHS) implications of policy being developed

## **REQUIRED SKILLS AND KNOWLEDGE**

- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the ICT industry
- quality assurance systems relevant to own organisation
- relevant industry competency
- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability
- ICT power consumption calculations
- energy consumption and energy audit methodology
- environmental impacts of products, processes, systems and services

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• candidate's involvement as a key person in establishing a business case to introduce or improve sustainability in an ICT project</li> <li>• implementation strategy, as part of the policy, that has been devised, implemented and reviewed showing a measurable improvement utilising the chosen benchmark indicators</li> <li>• communicating with stakeholders to discuss approaches to sustainability improvements development and implementation, and contributing to the resolution of disputes among stakeholders</li> <li>• using software systems for recording and filing documentation for measurement of current usage and using word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information</li> <li>• reviewing and improving policies by identifying improvements and benchmarking against industry best practice and attempting new approaches continuously over time.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which preparation of a business case for introducing or improving sustainability in an ICT project may be carried out</li> <li>• access to relevant legislation, standards, guidelines, reports and equipment specifications and drawings</li> <li>• access to a range of workplace documentation and personnel, information and resources, such as compliance obligations, organisational plans, work responsibilities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>portfolios of evidence and third-party workplace reports of on the job performance by the candidate</p> <ul style="list-style-type: none"> <li>• review of policy developed and procedural documentation outlining the approach taken</li> <li>• review of implementation strategy, plans and work plans</li> <li>• analysis of methods used to involve stakeholders in policy development, implementation and review</li> <li>• evaluation of participation in sustainability work practices and programs</li> <li>• observation over time in relation to review of work area relating to policy and procedures being developed to assess measurement of resources used, hazards and compliance.</li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTPMG6033A Develop project management plan</li> <li>• ICTPMG6034A Prepare a detailed design brief</li> <li>• ICTTEN6206A Produce an ICT network architecture design</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include</p>

**EVIDENCE GUIDE**

equipment modified for people with special needs.

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Appropriate sources of information*** may include:

- International standards for environmental management - Life cycle assessment
  - AS/NZS ISO 14040:1998
  - AS/NZS ISO 14041:1999
  - AS/NZS ISO 14042:2001
  - AS/NZS ISO 14043:2001
  - AS/NZS ISO 14048:2003
- AS/NZS 3598:2000
- BS EN 16001:2009
- United States Environmental Protection Agency (EPA) - Life Cycle Assessment: Principles and Practice EPA/600/R-06/060 May 2006
- Dow Jones Sustainability Index (DJSI).

***Expected goals*** may include:

- achieving best practice in products, processes or services while protecting the environment without sacrificing profitability
- enhancing company reputation
- guiding new product development to reduction of resources and emissions
- improving public perception
- providing information on trade-offs of alternative processes, products and materials.

***Stakeholders*** may include:

- business partners
- community
- customers
- government organisations

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• shareholders</li> <li>• staff</li> <li>• technical experts.</li> </ul>
<i>Constraints</i> may include:	<ul style="list-style-type: none"> <li>• existing business partnerships and arrangements</li> <li>• existing contracts or service level agreements</li> <li>• reluctance to accept change.</li> </ul>
<i>Critical success factors</i> may include:	<ul style="list-style-type: none"> <li>• customer satisfaction</li> <li>• increase in customers</li> <li>• new sources of business</li> <li>• positive cash flow</li> <li>• profit margin</li> <li>• quality of products and services</li> <li>• revenue growth.</li> </ul>
<i>Overall benefit</i> may include:	<ul style="list-style-type: none"> <li>• better use of workspace</li> <li>• employee satisfaction</li> <li>• enhanced brand value</li> <li>• enhanced company reputation</li> <li>• improved public perception</li> <li>• more reliable service to customers</li> <li>• tangible benefits and intangible benefits.</li> </ul>
<i>Estimate of costs</i> may include:	<ul style="list-style-type: none"> <li>• annual operating costs</li> <li>• capital costs</li> <li>• detailed breakdown of costs</li> <li>• recurring costs</li> <li>• summary of costs by category.</li> </ul>
<i>Return on investment (RoI)</i> may include	<ul style="list-style-type: none"> <li>• carbon trading</li> <li>• project life</li> <li>• rate of depreciation</li> <li>• simple RoI calculation.</li> </ul>
<i>Alternative options</i> may include:	<ul style="list-style-type: none"> <li>• a range of approaches</li> <li>• an option that achieves same result as preferred option</li> <li>• collaborative delivery</li> <li>• in-house delivery of the project</li> <li>• innovative approaches.</li> </ul>
<i>Executive summary</i> may include:	<ul style="list-style-type: none"> <li>• background to the proposal</li> <li>• introduction to the proposal</li> <li>• past and current environment</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"><li>• rationale for establishing the business case at this time.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design and manage a sustainability audit	<p>1.1. Use an audit tool reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.2. Define the scope, objectives and benchmarks for the audit in consultation with relevant stakeholders</p> <p>1.3. Use an <i>audit tool</i> to reflect criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.4. Document requirements for audit resources, timing, schedule and responsibilities consistent with industry best practice and relevant standards</p> <p>1.5. Ensure <i>collection strategies</i> are objective, systematic and that information and data is valid and reliable</p> <p>1.6. Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit report recommendations</p>
2. Monitor energy consumption and emissions	<p>2.1. Analyse requirements of the National Greenhouse and Energy Reporting System (NGERS) and other relevant <i>legislation</i> and industry standards in relation to a range of <i>industries</i> and the needs of specific organisations</p> <p>2.2. Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection</p> <p>2.3. Determine <i>hardware</i> and <i>software</i> required for collecting, collating, analysing and reporting emissions related information and data</p> <p>2.4. Factor requirement for an external audit into the monitoring proposal</p> <p>2.5. Critically evaluate energy consumption and emissions data</p> <p>2.6. Develop improvement strategies based on the review of data</p> <p>2.7. Use industry <i>best practice</i> as a quality benchmark</p>
3. Develop ICT solutions to improve sustainability outcomes	<p>3.1. Research and analyse <i>mitigation and adaptation strategies</i> appropriate for a range of industries</p> <p>3.2. Benchmark and document performance expectations in consultation with relevant stakeholders</p> <p>3.3. Develop and document technical specifications</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>including hardware, software, networking, interface and security requirements</p> <p>3.4. Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance</p> <p>3.5. Analyse the impact of ICT solution in relation to performance benchmarks</p> <p>3.6. Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes</p> <p>3.7. Present report for client sign off</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to read and evaluate complex and formal documents such as legislation and technical reports
- communication skills to consult with stakeholders and liaise with clients
- literacy skills to prepare written reports and other documentation requiring precision of expression and language and structures suited to the intended audience
- research skills to analyse and present information
- technical skills to:
  - conduct an ICT sustainability audit
  - quantify sustainability objectives, targets, achievements and measures
  - use relevant systems and procedures to aid in the achievement of emissions reduction

#### Required knowledge

- auditing sustainability processes and practices
- corporate social responsibility
- development processes and practices
- hazard identification and control
- industry standards
- legislation framework underpinning sustainability
- principles, practices and available tools and techniques of sustainability

**REQUIRED SKILLS AND KNOWLEDGE**

management relevant to a range of industries

- relevant ISO standards
- sustainability from a local, national and international perspective
- sustainability including ecological, economic and social issues
- technical performance measurement

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• audit and analyse patterns of energy use</li> <li>• develop monitoring and reporting systems that comply with regulatory requirements</li> <li>• develop a workable implementation strategy</li> <li>• formulate solutions using ICT to reduce emissions</li> <li>• develop benchmarks for reviewing and improving performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• relevant reports: <ul style="list-style-type: none"> <li>• government</li> <li>• Intergovernmental Panel on Climate Change (IPCC)</li> <li>• scientific</li> </ul> </li> <li>• conference papers</li> <li>• vendor white papers</li> <li>• resources, tools and networking equipment</li> <li>• suitable hardware and software</li> <li>• suitable bandwidth for internet connections</li> <li>• relevant legislation and regulations</li> <li>• manufacturers' technical specifications</li> <li>• relevant ISO standards.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate managing organisation sustainability</li> <li>• review of analyses, plans and reports completed by the candidate</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

**EVIDENCE GUIDE****assessment**

industry sector, workplace and job role is recommended, for example:

- ICTSUS7236A Manage improvements in ICT sustainability.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Stakeholders*** may include:

- clients and customers
- Federal Government

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• local government</li> <li>• management</li> <li>• non-government organisations (NGOs)</li> <li>• shareholders</li> <li>• staff</li> <li>• state government</li> <li>• suppliers.</li> </ul>

## ICTSUS7236A Manage improvements in ICT sustainability

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to reduce the sustainability related impacts of ICT operations through energy conservation, energy efficiency and changing user behaviour.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals employed as an ICT consultant or in an ICT related role in planning and design of networks in an organisation. Work normally involves a high degree of autonomy or is within a management team with a high level of responsibility.</p>
--------------------------------	---

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Critically analyse an organisation's ICT assets energy footprint	1.1. Audit and assess level and type of use across the range of <i>ICT devices, infrastructure</i> and <i>software</i> 1.2. Audit and establish baselines of ICT energy consumption and other elements contributing to the organisation's carbon footprint 1.3. Assess ICT usage in relation to its contribution to the organisation's business goals and priorities 1.4. Determine critical issues for the organisation relevant to ICT usage and carbon footprint 1.5. Assess current ICT usage in relation to sustainable <i>asset management</i> 1.6. Apply industry <i>best practice</i> where appropriate
2. Develop ICT sustainability strategies and policy	2.1. Include goals for reduction of <i>sustainability impacts</i> and equipment <i>life cycle management</i> approaches in organisational policy 2.2. Check policy scope is consistent with <i>industry standards and benchmarks</i> and amend where necessary 2.3. Ensure policy reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 2.4. Consult with <i>stakeholders</i> as an integral part of policy development, implementation and review processes 2.5. Recommend policy options based on effectiveness, timeframes and cost 2.6. Develop and produce strategies for implementation, monitoring, review and audit as part of the policy documentation.
3. Formulate technical and behavioural solutions to improve ICT sustainability	3.1. Determine and document hardware, software, network and interface requirements of solutions 3.2. Develop <i>strategies</i> to improve sustainability outcomes including for example energy efficiency and <i>alternative energy sources</i> 3.3. Develop guidelines for improving <i>sustainability</i> through asset management 3.4. Document requirements, resource allocations, training needs and implementation timelines for selected strategies and obtain sign off from relevant stakeholders

ELEMENT	PERFORMANCE CRITERIA
4. Monitor and evaluate sustainability data	4.1. Develop criteria for measuring performance improvement 4.2. Identify trends that may indicate the need for remedial action and use to promote continuous improvement of performance 4.3. Modify policy and technical solutions in response to data analysis to ensure improvements are made 4.4. Determine scope, frequency and method of monitoring and reporting in consultation with stakeholders 4.5. Review data to ensure compliance with the management of sustainability and legislative requirements 4.6. Document findings and present to stakeholders

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to research, analyse and present information
- communication skills to consult with stakeholders
- literacy skills to:
  - read and evaluate complex and formal documents, such as legislation and technical reports
  - prepare written reports and other documentation requiring precision of expression and language and structures suited to the intended audience
- safety awareness skills to implement enterprise occupational health and safety (OHS) policy and procedures
- technical skills to:
  - quantify sustainability objectives, targets, achievements and measures
  - use relevant systems and procedures to aid in the achievement of ICT sustainability

#### Required knowledge

- energy efficiency and alternative energy sources
- hazard identification and control

**REQUIRED SKILLS AND KNOWLEDGE**

- industry standards
- IT:
  - hardware
  - interfacing
  - networking
  - software
- legislation framework underpinning sustainability
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management in the ICT industry
- relevant ISO standards
- sustainability from a local, national and international perspective
- sustainability including ecological, economic and social issues

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse patterns of ICT use</li> <li>• develop policy that complies with regulatory requirements</li> <li>• develop a workable implementation strategy</li> <li>• formulate solutions to reduce ICT-based emissions</li> <li>• develop measurable criteria for reviewing improvement.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to reference materials, resources and equipment updated regularly to meet rapid changes to technology:</p> <ul style="list-style-type: none"> <li>• relevant reports: <ul style="list-style-type: none"> <li>• government</li> <li>• Intergovernmental Panel on Climate Change (IPCC)</li> <li>• scientific</li> </ul> </li> <li>• conference papers</li> <li>• vendor white papers</li> <li>• resources, tools and networking equipment</li> <li>• suitable hardware and software</li> <li>• suitable bandwidth for internet connections</li> <li>• relevant legislation and regulations</li> <li>• manufacturers' technical specifications</li> <li>• relevant ISO standards.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate formulating and carrying out sustainability measures in operations</li> <li>• review of analyses and solutions developed by the candidate</li> <li>• review of monitoring and evaluations completed by the candidate</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS7235A Use ICT to improve sustainability outcomes.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and</p>

<b>RANGE STATEMENT</b>	
regional contexts) may also be included.	
<i>ICT devices</i> may include:	<ul style="list-style-type: none"> <li>• copies or multi-functional devices (MFDs)</li> <li>• laptops</li> <li>• PC peripherals</li> <li>• PCs</li> <li>• printer.</li> </ul>
<i>Infrastructure</i> may include:	<ul style="list-style-type: none"> <li>• air-conditioned</li> <li>• cabling</li> <li>• data centre and IT facilities</li> <li>• data storage</li> <li>• power supply and distribution</li> <li>• router</li> <li>• server</li> <li>• switches.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• business systems software: <ul style="list-style-type: none"> <li>• customer relationship management (CRM)</li> <li>• environmental resource management (ERM)</li> </ul> </li> <li>• in-house software</li> <li>• operating system</li> <li>• sink wrapped applications</li> <li>• web services.</li> </ul>
<i>Asset management</i> may include:	<ul style="list-style-type: none"> <li>• deployment</li> <li>• disposal</li> <li>• operation</li> <li>• procurement: <ul style="list-style-type: none"> <li>• product evaluation</li> <li>• product specification</li> <li>• purchasing cycles</li> <li>• vendor selection..</li> </ul> </li> </ul>
<i>Best practice</i> information may be found in:	<ul style="list-style-type: none"> <li>• publications</li> <li>• reports</li> <li>• research papers</li> <li>• white papers.</li> </ul>
<i>Sustainability impacts</i> may include:	<ul style="list-style-type: none"> <li>• greenhouse gas emissions</li> <li>• resource consumption and disposal</li> <li>• social impacts.</li> </ul>
<i>Life cycle management</i> may	<ul style="list-style-type: none"> <li>• asset management:</li> </ul>

<b>RANGE STATEMENT</b>	
include:	<ul style="list-style-type: none"> <li>• product evaluation</li> <li>• product specification</li> <li>• purchasing cycles</li> <li>• vendor selection</li> <li>• supplier chain: <ul style="list-style-type: none"> <li>• design</li> <li>• manufacture</li> <li>• transportation.</li> </ul> </li> </ul>

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to plan, conduct and report on applied research to influence strategic practices on ICT sustainability and outcomes within an organisational context. The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.</p> <p>The competitive context and the evolution of technologies in the ICT sector mean that the capacity to innovate is important.</p> <p>Energy and climate change strategies, supply chain and product responsibility and innovation are key factors in achieving sustainability targets.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit applies to leaders or enterprise managers using applied research to enhance individual, team and organisational performance in sustainability.</p> <p>The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes. It involves leading a range of research activities and techniques that, in combination, can provide quality information to enhance the development of capabilities in an enterprise to reach sustainability targets.</p>
---------------------------------------	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1) Provide direction for the development of an applied research strategy for ICT sustainability	1.1 Provide vision for the <i>applied research strategy</i> to meet the sustainability requirements of the identified research purpose 1.2 Clarify and confirm <i>applied research purpose</i> and needs of the <i>target group</i> 1.3 Facilitate the development of policies and procedures in relation to conducting applied research for the enterprise 1.4 Guide the development of mechanisms for collecting and maintaining data in a systematic manner 1.5 Review <i>factors affecting the reliability and validity of data</i> 1.6 Review relevant research ethics and codes of conduct
2 Control the use of a range of applied research techniques and resources	2.1 Review and evaluate a range of <i>applied research methods and theories</i> and <i>data collection techniques</i> 2.2 Guide the selection of appropriate methods to gather and analyse data on sustainability relevant to the research project 2.3 Authorise access to <i>appropriate sources of information</i> relevant to the research project 2.4 Select <i>sustainable management principles</i> that will have the most sustainable impact on the project 2.5 Ensure <i>relevance of the research</i> through integrity of the data collected and analysis tools used
3 Promote findings	3.1 Ensure accuracy of data and research details and adherence to any <i>legal requirements</i> 3.2 Evaluate the relevance of collated and analysed data against the original applied research strategy 3.3 Evaluate the impact of findings 3.4 Recommend implementation strategies 3.5 Ensure documentation and presentation of <i>research findings</i> is in a clear and logical manner consistent with audience needs 3.6 Identify the need for and an appropriate approach to, further research 3.7 Promote research findings and the approach to further research

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to:
  - analyse and interpret structurally intricate information in the area being researched
  - evaluate effective technical solutions in sustainability implementation
- communication and teamwork skills to:
  - consult with target groups using a range of communication techniques
  - develop written texts which deal with complex ideas and concepts
  - present research findings creatively to meet audience needs
- literacy skills to:
  - document technical requirements and procedures
  - evaluate complex and formal documents such as policy and legislation
  - prepare written reports requiring precise formats and structures to suit target audience
- numeracy skills to:
  - analyse and confirm research findings such as carbon dioxide (CO<sub>2</sub>) emissions and carbon footprint
  - perform statistical analysis of trends and changes
- initiative and enterprise skills to discover and source appropriate information, and to identify future implication of information and data collected
- planning and organising skills to:
  - construct an applied research strategy
  - initiate and design research methodology
  - manage an applied research project
- problem solving skills to:
  - analyse research
  - check the integrity of data collected
  - collect, organise, analyse and present data
  - conduct trend analyses
  - develop and examine the validity of the applied research strategy using a range of applied research techniques
  - evaluate a range of sustainable management principles
- self-management and learning skills to:
  - conduct research to develop capabilities and learning related activities
  - manage own time and determine priorities

**REQUIRED SKILLS AND KNOWLEDGE**

- review and adhere to relevant ethics and codes of conduct
- store data to maintain privacy and confidentiality of information
- technical skills to:
  - select suitable technology and technical services
  - use a range of software tools to analyse technical data
  - use technology and web media to discover, access, collect and store data, information and research in a systematic manner
- leadership skills to:
  - set research directions, make decisions and solve problems
  - manage, guide and influence research team members
  - communicate, motivate and facilitate research team interactions

**Required knowledge**

- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- audit methodology on ICT energy, waste, product life cycles and CO<sub>2</sub> emissions
- principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- communication processes and methods
- data collection methods
- legislation, regulations, policies, procedures and guidelines relating to handling or storing data, including privacy and freedom of information
- presentation techniques
- reporting methods
- research ethics and codes of conduct
- research tools and methods
- selection of appropriate applied research techniques
- leadership strategies relevant to a research environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• lead the formulation of a research proposal or plan which includes:               <ul style="list-style-type: none"> <li>• specific research questions on sustainability</li> <li>• valid population or sample size</li> <li>• description of the geographical, cultural, social or institutional context within which the research will be carried out</li> <li>• full description of the data collection methods</li> <li>• analysis of the limitations to research design</li> </ul> </li> <li>• lead the design of an applied research project using appropriate tools and techniques</li> <li>• design a research report with analysis of data, and valid and reliable findings</li> <li>• evaluate relevance of the research results</li> <li>• apply knowledge of applied research techniques.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• research activity that relates to an actual workplace or simulated context and topic</li> <li>• range of tools and techniques appropriate to the given situations and research topic.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of projects relating to conducting applied research conducted by the candidate</li> <li>• direct observation of the candidate applying research skills</li> <li>• oral or written questioning to assess knowledge of applied research.</li> </ul>

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- ICTSUS8238A Conduct and manage a life cycle assessment for sustainability.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Applied research purpose*** may be • agreements

<b>RANGE STATEMENT</b>	
contained in documents such as:	<ul style="list-style-type: none"> <li>• research brief</li> <li>• research contracts</li> <li>• research guidelines</li> <li>• research statement.</li> </ul>
<i>Target group</i> may include:	<ul style="list-style-type: none"> <li>• community</li> <li>• content and media provider</li> <li>• end users</li> <li>• equipment vendor</li> <li>• government authority</li> <li>• investors</li> <li>• regulator</li> <li>• society</li> <li>• statutory authority</li> <li>• sustainability auditors</li> <li>• telecommunications service provider</li> <li>• user groups.</li> </ul>
<i>Factors affecting reliability and validity</i> may include:	<ul style="list-style-type: none"> <li>• access appropriate population</li> <li>• authenticity and reliability of data sources</li> <li>• capacity to generalise findings across the whole population</li> <li>• sample size</li> <li>• type or survey used to increase validity.</li> </ul>
<i>Applied research strategy</i> may cover:	<ul style="list-style-type: none"> <li>• analysis of industry specific trends, statistics and issues</li> <li>• collection of data to assist informed decision making, planning or risk management</li> <li>• data and information relating to strategy, policy, practices, or work processes developed and implemented by an organisation</li> <li>• formation of solutions to complex problems</li> <li>• information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers</li> <li>• information and analysis to conduct a strategic or community campaign or activity</li> <li>• relationship or relevance of a theory, principle or practice to an immediate practical problem, issue or to test a proposed solution.</li> </ul>
<i>Applied research methods and theories</i> may cover:	<ul style="list-style-type: none"> <li>• methods such as: <ul style="list-style-type: none"> <li>• action research</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• case study</li> <li>• experience and intuition</li> <li>• experiments</li> <li>• interviews</li> <li>• mathematical models and simulations</li> <li>• participant observation</li> <li>• surveys</li> <li>• statistical data analysis</li> <li>• statistical surveys</li> <li>• content, textual analysis, theories and techniques, which will vary upon consideration of: <ul style="list-style-type: none"> <li>• application of statistical methods</li> <li>• causal factors and dependant or independent variables</li> <li>• critical analysis</li> <li>• experimental, quasi-experimental, non-experimental</li> <li>• mathematical calculations</li> <li>• problem solving</li> <li>• qualitative or quantitative research</li> <li>• sampling and sample size.</li> </ul> </li> </ul>
<i>Data collection techniques</i> may include:	<ul style="list-style-type: none"> <li>• collaboration with other experts or mentors</li> <li>• desk research</li> <li>• document research</li> <li>• field study</li> <li>• observation</li> <li>• physical items analysis</li> <li>• interviews</li> <li>• questionnaires</li> <li>• surveys.</li> </ul>
<i>Appropriate sources of information</i> may include:	<ul style="list-style-type: none"> <li>• Carbon Pollution Reduction Scheme (CPRS)</li> <li>• discussions with current industry practitioners and manufacturers</li> <li>• energy and climate change reports and policies</li> <li>• government departments</li> <li>• industry associations and organisations</li> <li>• industry standards</li> <li>• AS/NZ3598:2000 (or latest revision):</li> </ul>

## ICTSUS8238A Conduct and manage a life cycle assessment for sustainability

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to conduct a life cycle assessment (LCA) to investigate and evaluate the human health and environmental impacts arising from the provision of a product, process or service.</p> <p>A LCA is a systematic process that provides an estimation of the cumulative impacts and trade-offs resulting from all stages in the entire life cycle of the product, process or service, thereby facilitating informed decision-making to improve performance.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>Technical managers, supervising technicians, project managers, consultants or contractors who have responsibility for conducting a LCA or managing those who conduct an LCA apply the skills and knowledge in this unit.</p>
---------------------------------------	---

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define and scope project goal	1.1. Access <b>appropriate sources of information</b> relevant to the LCA project 1.2. Define the <b>goal</b> of the project 1.3. Specify <b>information</b> needed to inform decision-makers 1.4. Determine required level of <b>specificity</b> 1.5. Determine <b>data organisation</b> and display of results 1.6. Define <b>scope of the study</b> 1.7. Determine <b>ground rules</b> for performing the work
2. Conduct a life cycle inventory (LCI)	2.1. Generate a life cycle <b>flow diagram</b> 2.2. Develop a <b>data collection plan</b> for the LCI 2.3. <b>Collect the actual data</b> 2.4. <b>Evaluate and document</b> the LCI results
3. Conduct a life cycle impact assessment (LCIA)	3.1. Select and define <b>impact categories</b> 3.2. <b>Classify LCI results</b> to the impact categories 3.3. Model LCI impacts within impact categories using science-based conversion factors 3.4. Normalise potential impacts in ways that can be compared 3.5. Assign impact categories by <b>grouping</b> into one or more sets to facilitate the interpretation of the results 3.6. Assign <b>weighting</b> factors to emphasise the most important potential impacts
4. Interpret and evaluate results from the LCI and the LCIA and communicate them	4.1. Identify the <b>significant issues</b> based on the LCI and the LCIA 4.2. Evaluate <b>completeness check, consistency check</b> and <b>sensitivity check</b> 4.3. Make recommendations for improving the product, process or service life cycle
5. Report results of the LCA study	5.1. Document the <b>results of the LCA study</b> 5.2. Finalise the report with a conclusion and make recommendations as a result of the LCA study

## Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- analytical skills to compare and evaluate effective technical solutions involving life cycle aspects of sustainability, and to critically evaluate data quality
- communication skills to:
  - prepare a press release regarding the level of achievement of sustainability benchmarks, environmental targets and performance highlights
  - liaise with customers to outline the resulting sustainability benefits
  - adjust communication to suit different audiences
  - respond effectively to diversity
  - work as a member of a team
  - consult on and validate policy
- literacy skills to:
  - evaluate complex and formal documents such as policy and legislation
  - interpret technical specifications and related sustainability documentation
  - document technical requirements and procedures
  - prepare written reports requiring precise expression, language and structures suited to the intended audience
- numeracy skills to:
  - determine workforce requirements
  - analyse and confirm capacity requirements
  - calculate budget requirements and limitations
  - perform calculations related to LCA
  - estimate carbon dioxide (CO<sub>2</sub>) emissions
- planning and organisational skills to:
  - set out project requirements and priorities
  - make site access and equipment delivery arrangements
  - arrange relevant documentation and approvals
- problem solving skills to account for unexpected variations to requirements, and to effectively manage different points of view and dissenting stakeholders
- research skills to:
  - research and present information
  - examine statistical databases
  - gain and maintain relevant and current technical product knowledge
- technical skills to utilise life cycle assessment software
- project management skills to undertake or manage a complex LCA project

### Required knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

- best practice approaches relevant to own work area
- environmental and sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and occupational health and safety (OHS) implications of policy being developed
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- quality assurance systems relevant to own organisation
- relevant industry competency
- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability
- ICT power consumption calculations
- power consumption and energy audit methodology
- CO2 emissions estimation
- environmental impacts of products, processes, systems and services

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• undertake a LCA for sustainability</li> <li>• undertake scoping and definition of goals of a LCA for sustainability</li> <li>• produce a LCI using relevant software and data collection strategies</li> <li>• use life cycle assessment and other software for researching and interpreting charts, flowcharts, graphs and other visual data and information</li> <li>• evaluate LCI and LCIA results, using completeness, consistency and sensitivity checks</li> <li>• make recommendations based on the results of the LCA study.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites on which planning, design and integration of sustainability may be carried out</li> <li>• relevant legislation, standards, guidelines, reports and equipment specifications and drawings</li> <li>• a range of workplace documentation and personnel, information and resources (such as compliance obligations, organisational plans, work responsibilities).</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of projects relating to conducting applied research conducted by the candidate</li> <li>• direct observation of candidate applying research skills</li> <li>• oral or written questioning to assess knowledge of applied research.</li> </ul>

<b>EVIDENCE GUIDE</b>	
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTSUS8237A Lead applied research in ICT sustainability.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Appropriate sources of</i></b>	<ul style="list-style-type: none"> <li>AS/NZS 3598:2000</li> </ul>

<b>RANGE STATEMENT</b>	
<b><i>information</i></b> may include:	<ul style="list-style-type: none"> <li>• BS EN 16001:2009</li> <li>• Dow Jones Sustainability Index (DJSI)</li> <li>• International standards for environmental management - Life cycle assessment               <ul style="list-style-type: none"> <li>• AS/NZS ISO 14040:1998</li> <li>• AS/NZS ISO 14041:1999</li> <li>• AS/NZS ISO 14042:2001</li> <li>• AS/NZS ISO 14043:2001</li> <li>• AS/NZS ISO 14048:2003</li> </ul> </li> <li>• United States Environmental Protection Agency (EPA) - Life Cycle Assessment: Principles and Practice EPA/600/R-06/060 May 2006.</li> </ul>
<b><i>Goal</i></b> may include:	<ul style="list-style-type: none"> <li>• establishing baseline information for a process</li> <li>• guiding new product development to reduction of resources and emissions</li> <li>• identifying gaps in data</li> <li>• providing information on trade-offs of alternative processes, products and materials</li> <li>• ranking relative contribution of individual processes</li> <li>• selecting best product, process or service with least effect on human health and the environment</li> <li>• supporting product certification.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• changes to be made to reduce specific environmental impacts</li> <li>• impacts relevant to stakeholders and interested parties</li> <li>• products or processes which cause the least environmental impact</li> <li>• technologies or processes which cause least detrimental impact:               <ul style="list-style-type: none"> <li>• smog</li> <li>• acid rain</li> <li>• particulates</li> <li>• aquatic pollution.</li> </ul> </li> </ul>
<b><i>Specificity</i></b> may relate to:	<ul style="list-style-type: none"> <li>• enterprise-specific versus generic products</li> <li>• internal enterprise use or public purposes</li> <li>• product-specific data versus generic data</li> <li>• product-specific versus generic study.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Data organisation</i> may include:	<ul style="list-style-type: none"> <li>• equivalent use as the basis for comparison</li> <li>• a functional unit that appropriately describes the function of the product or process being studied</li> <li>• volume or weight as the basis for comparison.</li> </ul>
<i>Scope of the study</i> may include:	<ul style="list-style-type: none"> <li>• manufacturing</li> <li>• materials manufacture</li> <li>• packaging and distribution</li> <li>• product fabrication</li> <li>• raw materials acquisition</li> <li>• recycling and waste management</li> <li>• use, re-use and maintenance</li> <li>• variants: <ul style="list-style-type: none"> <li>• cradle-to-grave</li> <li>• cradle-to-gate</li> <li>• economic input-output life cycle assessment (EIO-LCA)</li> <li>• gate-to-gate</li> <li>• well-to-wheel.</li> </ul> </li> </ul>
<i>Ground rules</i> may include:	<ul style="list-style-type: none"> <li>• define the systems analysed</li> <li>• documenting assumptions or decisions made throughout the project</li> <li>• methodology used</li> <li>• quality assurance procedures: <ul style="list-style-type: none"> <li>• available time and level of resources</li> <li>• internal review</li> <li>• external review</li> <li>• formal review process</li> </ul> </li> <li>• reporting requirements</li> <li>• setting of boundaries</li> <li>• software used for modelling: <ul style="list-style-type: none"> <li>• EcoLab</li> <li>• GaBi Software</li> <li>• SimaPro</li> </ul> </li> <li>• stating the basis for comparison.</li> </ul>
<i>Flow diagram</i> may include:	<ul style="list-style-type: none"> <li>• all alternatives under consideration: <ul style="list-style-type: none"> <li>• baseline system</li> <li>• alternative systems</li> </ul> </li> <li>• boundaries</li> <li>• mapping inputs and outputs (material and</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>energy) to a process or system</li> <li>• subsystems.</li> </ul>
<i>Data collection plan</i> may include	<ul style="list-style-type: none"> <li>• defining the data quality goals</li> <li>• developing a data collection worksheet or spreadsheet:                             <ul style="list-style-type: none"> <li>• data collection procedures</li> <li>• data quality measures</li> <li>• geographic scope</li> <li>• presentation of results</li> <li>• purpose of the inventory</li> <li>• system boundaries</li> <li>• types of data used</li> </ul> </li> <li>• identifying data sources and types:                             <ul style="list-style-type: none"> <li>• equipment and process specifications</li> <li>• equipment logs</li> <li>• journals</li> <li>• laboratory test results</li> <li>• meter readings from equipment</li> </ul> </li> <li>• identifying data types:                             <ul style="list-style-type: none"> <li>• measured</li> <li>• modelled</li> <li>• non-LCI data (data not intended for use in LCI)</li> <li>• non-site specific</li> <li>• sampled</li> <li>• vendor data</li> </ul> </li> <li>• identifying data quality indicators:                             <ul style="list-style-type: none"> <li>• completeness</li> <li>• consistency</li> <li>• precision.</li> </ul> </li> </ul>
<i>Collect the actual data</i> may include:	<ul style="list-style-type: none"> <li>• atmospheric emissions</li> <li>• conversion of fuel units into energy units</li> <li>• co-product allocation</li> <li>• data categories:                             <ul style="list-style-type: none"> <li>• CO<sub>2</sub> emissions</li> <li>• reporting emissions required by regulatory agencies</li> <li>• reporting of all emissions</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• direct contact with experts</li> <li>• efficiency of transportation mode: <ul style="list-style-type: none"> <li>• conversion of tonne-kilometres into fuel units <ul style="list-style-type: none"> <li>• litres (gallons) of diesel fuel</li> </ul> </li> </ul> </li> <li>• emissions generated from combustion of the fuels</li> <li>• energy input data</li> <li>• energy sources</li> <li>• illegal waste disposal included if data is available</li> <li>• industrial scrap</li> <li>• ISO 14041:6.5.3 (2004) allocation procedure</li> <li>• obtain non-specific inventory data</li> <li>• products</li> <li>• purchase LCI data</li> <li>• research</li> <li>• specific data versus composite data</li> <li>• site visits</li> <li>• solid wastes</li> <li>• transportation data: <ul style="list-style-type: none"> <li>• conversion to ton-miles or tonne-kilometres</li> <li>• distance shipped</li> <li>• weight of shipment</li> </ul> </li> <li>• waterborne wastes.</li> </ul>
<i>Evaluate and document</i> may include:	<ul style="list-style-type: none"> <li>• air emissions</li> <li>• data parameter groups within a category</li> <li>• data parameters within a group: <ul style="list-style-type: none"> <li>• carbon dioxide (CO<sub>2</sub>)</li> <li>• chlorine (Cl)</li> <li>• sulphur dioxide (SO<sub>2</sub>)</li> </ul> </li> <li>• define boundaries set</li> <li>• define systems analysed</li> <li>• describing the methodology used in analysis</li> <li>• presentation of information: <ul style="list-style-type: none"> <li>• graphical format</li> <li>• tabular format</li> </ul> </li> <li>• water borne waste solid wastes.</li> </ul>
<i>Impact categories</i> may include:	<ul style="list-style-type: none"> <li>• acidification</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• aquatic toxicity</li> <li>• global warming</li> <li>• resource depletion</li> <li>• stratospheric ozone depletion</li> <li>• terrestrial toxicity.</li> </ul>
<i>Classify LCI results</i> may include:	<ul style="list-style-type: none"> <li>• assigning LCI results to impact categories: <ul style="list-style-type: none"> <li>• CO<sub>2</sub> emissions attributed to global warming</li> <li>• NO<sub>2</sub> emissions attributed to ozone formation</li> <li>• SO<sub>2</sub> emissions attributed to acidification.</li> </ul> </li> </ul>
<i>Grouping</i> may include:	<ul style="list-style-type: none"> <li>• sorting of indicators by characteristics, such as: <ul style="list-style-type: none"> <li>• emissions: <ul style="list-style-type: none"> <li>• air</li> <li>• water</li> </ul> </li> <li>• location: <ul style="list-style-type: none"> <li>• global</li> <li>• local</li> <li>• regional</li> </ul> </li> </ul> </li> <li>• sorting of indicators by a ranking system, such as: <ul style="list-style-type: none"> <li>• high priority</li> <li>• medium priority</li> <li>• low priority.</li> </ul> </li> </ul>
<i>Weighting</i> may include:	<ul style="list-style-type: none"> <li>• determining weights to place on impacts</li> <li>• identifying the underlying values of the stakeholders</li> <li>• weighting methods: <ul style="list-style-type: none"> <li>• analytic hierarchy process</li> <li>• modified Delphi technique</li> <li>• decision analysis using multi-attribute theory.</li> </ul> </li> </ul>
<i>Evaluate and report LCIA results</i> may include:	<ul style="list-style-type: none"> <li>• definition of systems analysed</li> <li>• description of methodology used in the analysis</li> <li>• description of the boundaries that were set</li> <li>• documentation of limitations</li> <li>• verify accuracy of LCIA results.</li> </ul>
<i>Significant issues</i> may include:	<ul style="list-style-type: none"> <li>• essential contributions for life cycle stages to LCI or LCIA results: <ul style="list-style-type: none"> <li>• individual unit processes</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• groups of processes</li> <li>• impact category indicators:               <ul style="list-style-type: none"> <li>• emissions</li> <li>• resource use</li> <li>• waste</li> </ul> </li> <li>• inventory parameters:               <ul style="list-style-type: none"> <li>• emissions</li> <li>• energy use</li> <li>• waste.</li> </ul> </li> </ul>
<i>Completeness check</i> may include:	<ul style="list-style-type: none"> <li>• all relevant information and data needed for the interpretation are available and complete</li> <li>• develop checklist to indicate each significant area represented in results</li> <li>• organise data by:               <ul style="list-style-type: none"> <li>• life cycle stage</li> <li>• processes</li> <li>• type of data represented:                   <ul style="list-style-type: none"> <li>• environmental release to air</li> <li>• raw materials energy</li> <li>• transportation.</li> </ul> </li> </ul> </li> </ul>
<i>Consistency check</i> may include:	<ul style="list-style-type: none"> <li>• comparisons made on inconsistent data sources</li> <li>• comparisons made on data from different eras</li> <li>• data from plants using different technologies</li> <li>• data from technology based on different standards:               <ul style="list-style-type: none"> <li>• European</li> <li>• US.</li> </ul> </li> </ul>
<i>Sensitivity check</i> may include:	<ul style="list-style-type: none"> <li>• evaluation of the reliability of results using:               <ul style="list-style-type: none"> <li>• contribution analysis</li> <li>• sensitivity analysis</li> <li>• uncertainty analysis.</li> </ul> </li> </ul>
<i>Results of the LCA study</i> may include:	<ul style="list-style-type: none"> <li>• administrative Information</li> <li>• details of the practitioner who conducted the LCA study</li> <li>• date of report</li> <li>• definition of goal and scope</li> <li>• life cycle inventory analysis:               <ul style="list-style-type: none"> <li>• data collection</li> </ul> </li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• calculation procedures</li> <li>• life cycle impact assessment: <ul style="list-style-type: none"> <li>• methodology</li> <li>• results of the impact assessment performed</li> </ul> </li> <li>• life cycle interpretation: <ul style="list-style-type: none"> <li>• results</li> <li>• assumptions and limitations</li> <li>• data quality assessment</li> </ul> </li> <li>• critical review (internal and external): <ul style="list-style-type: none"> <li>• details of reviewers and their affiliation</li> <li>• critical review reports</li> <li>• responses to recommendations.</li> </ul> </li> </ul>

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to safely use hand and power tools in the workshop and on the worksite.</p> <p>It involves preparing for work, selecting, using and maintaining hand and power tools and cleaning up.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Technical staff who use hand and power tools apply the skills and knowledge in this unit. They may make use of safety equipment and workshop facilities.</p>
--------------------------------	---

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work activity	1.1. Identify the type of work to be performed from <i>work instructions</i> 1.2. Select appropriate <i>hand and power tools</i> for the work to be performed 1.3. <i>Set up and check tools</i> for use according to available <i>information</i> 1.4. Examine <i>work environment</i> and plan work with tools to maximise safety and productivity 1.5. Clear and clean work area to make it free of obstructions and allow clear access to tools
2. Prepare work piece for tool use	2.1. Mount, support or align <i>work piece</i> correctly to the tool or machine to be used 2.2. Anchor work piece securely where necessary to prevent movement
3. Operate hand and power tools	3.1. Use hand and power tools according to industry and enterprise <i>safe working practices</i> 3.2. Use <i>safety equipment</i> during tool operation according to industry and enterprise safe working practices 3.3. Monitor tool operation continuously and discontinue use if abnormal operation occurs 3.4. Clean the work area on completion of work
4. Maintain hand and power tools after use	4.1. Clean and store tools according to industry and enterprise safe working practices 4.2. Report abnormal tool operation or other problems according to established procedures 4.3. Perform programmed maintenance of tools according to work role 4.4. Arrange inspection of power tools according to <i>regulatory requirements</i>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**REQUIRED SKILLS AND KNOWLEDGE****Required skills**

- communication skills to:
  - liaise with colleagues on technical and operational matters
  - record and report procedures
- literacy skills to interpret and understand the information required for the preparation and application of hand and power tools including:
  - equipment
  - manufacturer's instructions
  - materials safety data sheets
  - quality assurance procedures
  - work instructions
- planning and organisational skills to manage time, organise priorities and plan work
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards associated with use of particular hand and power tools
  - select and use required personal protective equipment conforming to industry and occupational health and safety (OHS) standards
  - use relevant chemicals and cleaning agents and dispose of waste products
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- task management skills to work systematically with required attention to detail and adherence to all safety requirements
- technical skills to:
  - select and use appropriate hand and power tools
  - use technical information for tools, processes, materials and equipment

**Required knowledge**

- electrical and compressed air safety
- equipment types, characteristics, technical capabilities and limitations
- features and operating requirements of hand and power tools
- general housekeeping policies and procedures
- industry and work site terminology
- information required to operate equipment according to a test specification
- job safety analysis (JSA) or safe work method statement
- legislation, codes of practice and other formal agreements that impact on the work activity
- manufacturer's requirements for safe operation of equipment
- materials commonly used in the industry

**REQUIRED SKILLS AND KNOWLEDGE**

- material safety data sheets (MSDS) and materials handling methods
- operational, maintenance and basic diagnostic procedures
- power sources
- specific OHS requirements relating to the activity and site conditions
- typical issues and challenges that occur onsite

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• interpret work orders relevant to the selection and use of tools</li> <li>• interpret specifications and instructions relating to the materials and equipment on which the tools are to be used</li> <li>• prepare work environment and set up tools for safe and effective use</li> <li>• perform work processes following all relevant safety requirements applying to the use of hand and power tools</li> <li>• monitor tool operation for correct operation during use</li> <li>• inspect completed work to verify correct tool operation and use</li> <li>• document and communicate work related information including reporting of faults and other problems</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites where hand and power tools may be used</li> <li>• use of hand and power tools currently used in industry</li> <li>• relevant regulatory and equipment documentation that impact on the use of hand and power tools.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate setting and checking tools for use</li> <li>• direct observation of the candidate operating hand and power tools according to industry and enterprise safe working practices</li> <li>• oral or written questioning to assess required</li> </ul>

<b>EVIDENCE GUIDE</b>	
	knowledge.
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTOHS2170A Follow OHS and environmental policy and procedures.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and</p>

**RANGE STATEMENT**

regional contexts) may also be included.

*Work instructions* may include:

- charts and hand drawings
- diagrams or sketches
- MSDS
- memos
- plans
- quality requirements:
  - dimensions and tolerances
  - material standards
  - standards of work
- recording and reporting of work outcomes
- safe work procedures or equivalent related to using hand and power tools
- signage
- specifications
- verbal or written and graphical instructions
- work bulletins
- work schedules.

*Hand and power tools* may include:

- hand tools:
  - chisels
  - crowbars
  - files
  - hacksaws
  - hammers
  - measuring equipment
  - pliers
  - pop riveting machines
  - screwdrivers
  - shovels
  - spanners
  - wire strippers
- power tools:
  - angle grinders
  - circular saws
  - drills
  - grinders
  - hammer drills
  - jig saws

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>lifting and hoisting equipment.</li> </ul>
<i>Set up and check tools</i> may include:	<ul style="list-style-type: none"> <li>inspect tools for:               <ul style="list-style-type: none"> <li>damage</li> <li>missing components</li> <li>other defects prior to use</li> </ul> </li> <li>install operating components (bits or blades) in tools</li> <li>set or adjust tools .</li> </ul>
<i>Information</i> may relate to:	<ul style="list-style-type: none"> <li>Australian and enterprise quality standards and procedures</li> <li>enterprise or external personnel</li> <li>enterprise work orders and instructions</li> <li>industry codes and symbols</li> <li>job procedures</li> <li>product change policies and procedures</li> <li>tool manufacturers' specifications, operating procedures and setting instructions.</li> </ul>
<i>Work environment</i> may include:	<ul style="list-style-type: none"> <li>client site</li> <li>hazardous or exposed conditions</li> <li>operational indoor workplaces</li> <li>operational outdoor workplaces</li> <li>restricted or confined spaces.</li> </ul>
<i>Work piece</i> may include blocks of:	<ul style="list-style-type: none"> <li>aluminium</li> <li>bronze</li> <li>plastic</li> <li>stainless steel</li> <li>steel</li> <li>wood.</li> </ul>
<i>Safe working practices</i> may refer to:	<ul style="list-style-type: none"> <li>barriers or screens to control access and minimise dust and noise</li> <li>clearing route for safe placement of leads</li> <li>control of hazardous materials</li> <li>emergency procedures related to equipment operation:               <ul style="list-style-type: none"> <li>emergency shutdown and stopping</li> <li>evacuation</li> <li>extinguishing equipment fires</li> <li>organisational first aid requirements</li> </ul> </li> <li>handling of materials</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• identification of potential hidden hazards:               <ul style="list-style-type: none"> <li>• 'blind' drilling in walls</li> <li>• harmful gasses</li> <li>• non-visible laser emission</li> </ul> </li> <li>• place tools in safe positions when not in use</li> <li>• running electrical power leads to power supply so they are clear of traffic or covered where possible</li> <li>• use of fire fighting equipment</li> <li>• use of first aid equipment</li> <li>• use of tools and equipment</li> <li>• visually checking power leads for serviceability and safety</li> <li>• workplace environment and safety.</li> </ul>
<i>Safety equipment</i> may include:	<ul style="list-style-type: none"> <li>• earth leakage circuit breaker (ELCB)</li> <li>• personal protective clothing:               <ul style="list-style-type: none"> <li>• earmuffs</li> <li>• gloves:                   <ul style="list-style-type: none"> <li>• leather</li> <li>• plastic</li> <li>• rubber</li> </ul> </li> <li>• head protection</li> <li>• kneepads</li> <li>• masks</li> <li>• protective suits</li> <li>• safety boots</li> <li>• safety glasses</li> </ul> </li> <li>• rubber mats.</li> </ul>
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> <li>• environment protection legislation</li> <li>• Federal, state and territory legislation</li> <li>• OHS legislation relevant to workplace activities</li> <li>• workers' compensation legislation</li> <li>• workplace agreements and awards.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to locate and rectify a fault	1.1. Prepare for given work according to <i>relevant legislation, occupational health and safety (OHS), codes, regulations and standards</i> and identified <i>hazards</i> 1.2. Arrange access to the site according to required procedure 1.3. Obtain information on the <i>nature of fault</i> from the <i>customer</i> 1.4. Obtain suitable <i>testing tools and equipment</i> and specify <i>personal protective equipment</i> 1.5. Conduct fault finding using methodical and safe practices suitable for system and problem type
2. Locate and diagnose the fault	2.1. Conduct <i>appropriate test</i> to identify <i>type of fault</i> 2.2. Isolate the fault progressively to remove likely variables from assessment 2.3. Locate the fault without undue interruptions to the customer activity in the shortest possible time 2.4. Notify the customer of the findings
3. Rectify the fault	3.1. Determine the options to rectify the fault and present them to the customer 3.2. Advise the customer of costs of any repair not covered by service agreement 3.3. Rectify the fault if in agreement with the client 3.4. Conduct the work in a manner which is safe to the repairer and the customer 3.5. Refer any unresolved faults to other parties for resolution or escalation if required
4. Complete documentation and clean up worksite	4.1. Advise the customer of successful fault clearance and secure sign off 4.2. Complete all records 4.3. Complete reports to justify the fault diagnosis and rectification methodology if required 4.4. Remove all waste and debris from worksite and dispose them according to environmental requirements 4.5. Restore any changes made to the worksite during fault repair to the client's satisfaction

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with clients on technical and operational matters and raise OHS issues
- literacy skills to interpret technical documentation and standards and incorporate technical language into written tasks including report on recommendation to rectify fault
- numeracy skills to interpret technical data, such as specifications of equipment operations
- problem solving skills to apply methodology in fault diagnosis
- research skills to access technical information and sources to assist fault identification
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - select and use required personal protective equipment conforming to industry and OHS standards
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to select and use appropriate methods for fault identification and rectification

#### Required knowledge

- fault-finding techniques and test equipment
- safety requirements and standards
- various client's workplace environment and practices
- various types of networks and equipment
- various types of networks and equipment faults and rectification

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify different faults</li> <li>• establish context and background information and determine and rank likely causes of fault</li> <li>• obtain suitable tools and equipment and apply simple checks, tests and fault-finding methodology</li> <li>• apply recommended means to rectify fault</li> <li>• comply with all related OHS requirements and work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where fault identification and resolution may be conducted</li> <li>• use of test and related equipment currently used in industry</li> <li>• relevant technical specifications and requirements for telecommunications networks</li> <li>• regulatory and site-related documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate locating and rectifying faults following OHS requirements</li> <li>• oral or written questioning to assess knowledge of types of faults and implications</li> <li>• evaluation of written reports prepared by the candidate, outlining test result interpretation, fault rectification and recommendations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplaces and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTOPN4115A Install and test a dense wavelength division multiplexer system</li> <li>• ICTTEN4051A Install configuration programs on PC</li> </ul>

**EVIDENCE GUIDE**

	<p>based customer equipment</p> <ul style="list-style-type: none"> <li>• ICTTEN4198A Install, configure and test an internet protocol network</li> <li>• ICTTEN4199A Install, configure and test a router.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant legislation, OHS, codes, regulations and standards***

- Australian Communications Industry Forum (ACIF) standards and codes
- AS Communications Cabling Manual (CCM)

**RANGE STATEMENT**

may include:

Volume 1

- AS/NZS 3000:2007
- AS/NZS 3080:2003
- AS/NZS 3084:2003
- AS/NZS 3085.1:2004
- AS/NZS IEC 61935.1:2006
- AS/NZS IEC 61935.2:2006
- AS/NZS ISO/IEC 14763.3:2007
- AS/NZS ISO/IEC 15018:2005
- AS/NZS ISO/IEC 24702:2007
- cabling security codes and regulations
- contract law
- National Association of Testing Authorities (NATA) requirements
- regulated or industry codes of practice including appropriate Australian Communications and Media Authority (ACMA) technical standards
- technical standards AS/ACIF S008:2006 and AS/ACIF S009:2006
- Trade Practices Act
- OHS including specific OHS and environmental requirements:
  - decommissioning and isolating work site and lines prior to commencement
  - environmental considerations include:
    - clean-up protection
    - stormwater protection
    - waste management
    - noise, dust and clean-up management
  - identifying other services including power and gas
  - safety equipment:
    - flashing lights
    - gas and other hazard detection equipment
    - safety barriers
    - trench guards
    - warning signs and tapes
    - witches hats
- safe working practices such as the safe use

<b>RANGE STATEMENT</b>	
	<p>and handling of:</p> <ul style="list-style-type: none"> <li>• asbestos</li> <li>• chemicals</li> <li>• materials</li> <li>• tools and equipment</li> <li>• work platforms</li> <li>• special access requirements</li> <li>• suitable light and ventilation.</li> </ul>
<i>Hazards</i> may include:	<ul style="list-style-type: none"> <li>• building debris</li> <li>• earth potential rise (EPR): <ul style="list-style-type: none"> <li>• event at a site, such as an electrical distribution substation may expose telecommunications personnel, users or plant to hazardous voltages</li> </ul> </li> <li>• glass fibre</li> <li>• live power lines</li> <li>• manual handling</li> <li>• mud and water</li> <li>• natural gas and other gas build up</li> <li>• needle stick injury</li> <li>• optical fibre cable may contain hazardous light</li> <li>• radio frequency (RF) equipment emitting radiation</li> <li>• remote power feeding services which operate at above telecommunications network voltage (TNV)</li> <li>• vermin.</li> </ul>
<i>Nature of fault</i> may include:	<ul style="list-style-type: none"> <li>• cable fault</li> <li>• distortion</li> <li>• excessive latency</li> <li>• interference</li> <li>• intermittent</li> <li>• low signal level</li> <li>• network fault</li> <li>• no transmission</li> <li>• poor grade of service</li> <li>• poor signal quality.</li> </ul>
<i>Customer</i> may include:	<ul style="list-style-type: none"> <li>• fault centre</li> <li>• individual reporting the fault</li> <li>• network manager</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• network administrator</li> <li>• network operations centre staff</li> <li>• site manager.</li> </ul>
<i>Testing tools and equipment</i> may include:	<ul style="list-style-type: none"> <li>• cable locator</li> <li>• cable test set</li> <li>• LAN Cat tester</li> <li>• network management system</li> <li>• optical fault locator</li> <li>• optical time domain reflectometer (OTDR)</li> <li>• protocol analyser</li> <li>• pulse echo test set</li> <li>• sniffer</li> <li>• spectrum analyser.</li> </ul>
<i>Personal protective equipment</i> may include:	<ul style="list-style-type: none"> <li>• electrical isolators</li> <li>• gas detectors</li> <li>• personal protective clothing: <ul style="list-style-type: none"> <li>• earmuffs</li> <li>• gloves: <ul style="list-style-type: none"> <li>• leather</li> <li>• plastic</li> <li>• rubber</li> </ul> </li> <li>• head protection</li> <li>• kneepads</li> <li>• masks</li> <li>• protective suits</li> <li>• safety boots</li> <li>• safety glasses.</li> </ul> </li> </ul>
<i>Appropriate test</i> may include:	<ul style="list-style-type: none"> <li>• bit error rate test (BERT)</li> <li>• cable tests</li> <li>• distortion</li> <li>• frequency measurement</li> <li>• insertion loss</li> <li>• packet sniffing</li> <li>• ping</li> <li>• protocol analysis</li> <li>• return loss</li> <li>• route test</li> <li>• signal loss: <ul style="list-style-type: none"> <li>• optical</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• RF.</li> </ul>
<i>Type of fault</i> may include:	<ul style="list-style-type: none"> <li>• cable fault:               <ul style="list-style-type: none"> <li>• attenuation</li> <li>• cracked fibre</li> <li>• crossed wires</li> <li>• crosstalk</li> <li>• damaged coax</li> <li>• faulty splice</li> <li>• incorrect terminations</li> <li>• moisture ingress</li> <li>• open circuit</li> <li>• short circuit</li> </ul> </li> <li>• network fault:               <ul style="list-style-type: none"> <li>• customer equipment</li> <li>• drop out</li> <li>• latency</li> <li>• loss of addressing</li> <li>• packet loss</li> <li>• poor wireless connection</li> <li>• routing problems.</li> </ul> </li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install an IP network	1.1. Prepare for given work according to relevant legislation, occupational health and safety (OHS), codes, regulations and standards 1.2. Arrange access to the site according to required procedure 1.3. Review existing <i>network</i> design <i>documentation</i> to ensure it is current and complete 1.4. Select the <i>components</i> and <i>network elements</i> required to be installed to meet the technical <i>requirements</i> 1.5. Contact vendors and service suppliers to obtain specifications and availability of identified components 1.6. Develop plans, with prioritised tasks and contingency arrangements, for installation of components with minimum disruption to <i>client</i> 1.7. Liaise with <i>appropriate person</i> to obtain approval for the plans, including security clearance and timing
2. Install and configure an IP network	2.1. Install and configure server <i>hardware</i> and <i>software</i> according to organisational and industry <i>standards</i> , following plans 2.2. Install and configure <i>computer</i> , other hardware and software according to organisational and industry standards and plans 2.3. Install and configure other software required for the network to operate with security and integrity according to the plan
3. Test and reconfigure the IP network	3.1. Test the installed software and hardware, utilising available <i>technical tools</i> , to ensure that all components are functioning as expected 3.2. Test the network to ensure it is functioning according to specifications 3.3. Resolve problems identified in the modified network
4. Complete documentation and clean up worksite	4.1. Complete hardware and asset recording document in line with <i>organisational requirements</i> 4.2. Document installation, boot-up and configuration procedures according to organisational requirements 4.3. Tabulate test results and complete all user reports 4.4. Complete client report and notify of status of the network

ELEMENT	PERFORMANCE CRITERIA
	4.5.Clean up and restore worksite to client's satisfaction 4.6.Secure sign-off from appropriate person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports in required formats
- numeracy skills to take test measurements, interpret results and evaluate performance and interoperability of network
- planning and organisational skills to plan, prioritise and monitor own work and coordinate the process in liaison with others
- problem solving and contingency management skills to adapt configuration procedures to requirements of network and reconfigure depending on differing operational contingencies, risk situations and environments
- research skills to interrogate vendor databases and websites to implement different configuration requirements to meet security levels
- technical skills to select and use router test software and hardware to suit different network applications

#### Required knowledge

- client business domain, business function and organisation
- current industry-accepted hardware and software products
- data and voice transmission technologies and protocols
- networking technologies incorporating substantial depth in some areas
- router-based network architectures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and prepare for the IP network installation task</li> <li>• select network elements to meet the client business specifications</li> <li>• install, configure and test the network elements to ensure interoperability within the network</li> <li>• apply network topologies, protocols and security issues</li> <li>• apply solutions to defined network problems.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where network installation may be conducted</li> <li>• use of field measurement equipment currently used in industry</li> <li>• network design documentation</li> <li>• equipment specifications</li> <li>• network components</li> <li>• hardware and software</li> <li>• live network</li> <li>• organisational guidelines</li> <li>• networked (LAN) computers</li> <li>• WAN service point of presence.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing, configuring and testing a new or updated network</li> <li>• evaluation of report prepared by the candidate outlining testing procedures, test results, recommendation to network changes and completion records</li> <li>• oral or written questioning of required knowledge.</li> </ul>
<b>Guidance information for</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

**EVIDENCE GUIDE****assessment**

for example:

- ICTTEN4199A Install, configure and test a router
- ICTTEN5201A Install, configure and test a server.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Network*** may include:

- data
- internet
- internet protocol private branch exchange (IP)

<b>RANGE STATEMENT</b>	
	PBX) <ul style="list-style-type: none"> <li>• IPTV</li> <li>• large and small local area networks (LAN)</li> <li>• national wide area networks (WAN)</li> <li>• radio frequency identification (RFID)</li> <li>• storage area network (SAN)</li> <li>• voice</li> <li>• voice over internet protocol (VoIP)</li> <li>• virtual private network (VPN).</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• equipment inventory</li> <li>• ISO, IEC, AS standards</li> <li>• naming standards</li> <li>• project management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>

## ICTTEN4199A Install, configure and test a router

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to undertake router installation and configuration as part of the upgrade in an existing network or the implementation of a new network.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Officers who carry out installation, maintenance and upgrade of ICT networks apply the skills and knowledge in this unit. They would be employed by telecommunications companies and IT networking provisioning companies.</p> <p>They will gain knowledge of routing protocols and routing diagnostics required for integrating new and converging functionalities to the network.</p>
--------------------------------	--

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install a router	1.1. Prepare for given work according to relevant legislation, occupational health and safety (OHS), codes, regulations and standards 1.2. Arrange access to the site according to required procedure 1.3. Ascertain <i>network</i> topology from technical requirements 1.4. Determine the internet protocol (IP) addressing scheme for the network topology 1.5. Evaluate network management and security <i>requirements</i> , with reference to current and future requirements 1.6. Select a <i>router</i> with appropriate features according to technical requirements 1.7. Choose <i>cables</i> , wireless application protocol (WAP), wide area network (WAN) connectors and other <i>peripherals</i> according to network and router specification, and <i>WAN protocols</i>
2. Install and configure a router	2.1. Assemble router and peripherals according to manufacturer's requirements, enterprise guidelines and <i>protocols</i> 2.2. Connect communications cables and WAN connectors to the router and to the network 2.3. Configure router according to manufacturer's instructions and technical requirements, taking into account interoperability requirements with network components
3. Test the router and reconfigure the network	3.1. Test the router for connectivity across the network and for <i>routing protocol</i> functions 3.2. Adapt or modify the predetermined router configuration, depending on outcome of tests 3.3. Review router in line with organisational requirements 3.4. Test router and peripherals according to manufacturer's instructions and technical requirements 3.5. Test <i>hardware</i> and router to ensure full functionality and interoperability 3.6. Reconfigure additional hardware as required 3.7. Make adjustments to network depending on test

ELEMENT	PERFORMANCE CRITERIA
	results
4. Complete documentation and clean up worksite	4.1. Tabulate test results and complete all user reports 4.2. Complete report and notify client of status of the network 4.3. Clean up and restore worksite to client's satisfaction 4.4. Secure sign off from <i>appropriate person</i>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports in required formats
- numeracy skills to take test measurements, interpret results and evaluate performance and interoperability of network
- planning and organisational skills to plan, prioritise and monitor own work and coordinate the process in liaison with others
- problem solving and contingency management skills to adapt configuration procedures to requirements of network and reconfigure depending on differing operational contingencies, risk situations and environments
- research skills to interrogate vendor databases and websites to implement different configuration requirements to meet security levels
- technical skills to select and use router test software and hardware to suit different network applications

#### Required knowledge

- Australian Computer Society Code of Ethics
- effect of a router on delimiting broadcast traffic and on conserving bandwidth
- how dynamic routing algorithms or protocols create and maintain routing tables
- providing the network with redundant paths for reliability and the way routers manage these paths
- router:
  - basic router commands
  - configuration:

**REQUIRED SKILLS AND KNOWLEDGE**

- clock rate
- password protection of router
- routing protocol
- dynamic routing
- firewalls
- functions
- routing protocols and how they operate
- tables
- router-based network architectures
- use of routing tables in intelligent packet routing and switching

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and prepare for the router installation task</li> <li>• select a router to meet the client business specifications</li> <li>• install and test the router that ensures interoperability within the network and applying router principles and technologies</li> <li>• report on the status of the completed installation and seek sign off and customer satisfaction</li> <li>• use routers</li> <li>• apply solutions to defined routing problems.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where router installation may be conducted</li> <li>• use of field measurement equipment currently used in industry</li> <li>• relevant router specifications</li> <li>• technical requirements for a network</li> <li>• router</li> <li>• cabling</li> <li>• networked (LAN) computers</li> <li>• WAN service point of presence</li> <li>• relevant equipment and organisational documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing, configuring and testing a router</li> <li>• oral or written questioning of underpinning skills and knowledge</li> <li>• evaluation of report prepared by the candidate outlining testing procedures, results, recommendations to network changes and</li> </ul>

<b>EVIDENCE GUIDE</b>	
	completion records.
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN4198A Install, configure and test an internet protocol network.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

<b>RANGE STATEMENT</b>	
<i>Network</i> may include:	<ul style="list-style-type: none"> <li>• data</li> <li>• internet</li> <li>• internet protocol private branch exchange (IP PBX)</li> <li>• internet protocol TV (IPTV)</li> <li>• large and small LANs</li> <li>• national WANs</li> <li>• radio frequency identification (RFID)</li> <li>• storage area network (SAN)</li> <li>• voice</li> <li>• voice over internet protocol (VoIP)</li> <li>• virtual private network (VPN).</li> </ul>
<i>Requirements</i> may be in reference to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• employees in the organisation</li> <li>• system.</li> </ul>
<i>Router</i> may include:	<ul style="list-style-type: none"> <li>• 3Com OfficeConnect Remote 810 ADSL</li> <li>• 3Com SuperStack 400</li> <li>• Cisco 800 and ISR Series routers</li> <li>• Cisco uBR7200 universal broadband routers</li> <li>• Cisco wireless access points</li> <li>• D-Link routers</li> <li>• Intel Express series</li> <li>• Juniper routers</li> <li>• Linksys routers</li> <li>• Motorola Vanguard series</li> <li>• Netopia routers.</li> </ul>
<i>Cables</i> may include:	<ul style="list-style-type: none"> <li>• Category 5e, 6 or 7</li> <li>• crossover</li> <li>• fibre</li> <li>• shielded twisted pair (STP)</li> <li>• straight through</li> <li>• unshielded twisted pair (UTP).</li> </ul>
<i>Peripherals</i> may include:	<ul style="list-style-type: none"> <li>• Bluetooth devices</li> <li>• fax</li> <li>• Firewire (IEEE 1394)</li> <li>• input equipment: <ul style="list-style-type: none"> <li>• keyboard</li> <li>• mouse</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• pens</li> <li>• touch pad</li> <li>• laptops and desktop computers</li> <li>• mobile phones</li> <li>• modems</li> <li>• multimedia kits</li> <li>• palmtops and personal digital assistants (PDAs)</li> <li>• personal computer</li> <li>• printers</li> <li>• scanners</li> <li>• speakers</li> <li>• tape cartridges</li> <li>• universal serial bus (USB).</li> </ul>
<i>WAN protocols</i> may include:	<ul style="list-style-type: none"> <li>• advanced data communications protocol (ADCP)</li> <li>• binary synchronous control (BSC)</li> <li>• high-level data link control (HDLC)</li> <li>• point to point protocol (PPP)</li> <li>• synchronous data link control (SDLC)</li> <li>• transmission of IP datagrams over X.25, Frame Relay or ATM.</li> </ul>
<i>Protocols</i> may include:	<ul style="list-style-type: none"> <li>• AppleTalk protocol - Phase 2 (1989)</li> <li>• dynamic host configuration protocol (DHCP)</li> <li>• novell protocol suite: <ul style="list-style-type: none"> <li>• internetwork packet exchange (IPX)</li> <li>• NetBIOS emulator</li> <li>• netware core protocol</li> <li>• sequenced packet exchange (SPX)</li> </ul> </li> <li>• TCP/IP: <ul style="list-style-type: none"> <li>• internet control message protocol (ICMP) see router protocols above</li> <li>• Net BT</li> </ul> </li> <li>• WAN protocols (encapsulations): <ul style="list-style-type: none"> <li>• advanced data communications protocol (ADCP)</li> <li>• binary synchronous control (BSC)</li> <li>• high-level data link control (HDLC)</li> <li>• point-to-point protocol (PPP)</li> <li>• synchronous data link control (SDLC).</li> </ul> </li> </ul>
<i>Routing protocol</i> may include:	<ul style="list-style-type: none"> <li>• Cisco discovery protocol (CDP)</li> <li>• dynamic routing</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• enhanced interior gateway routing protocol (EIGRP)</li> <li>• exterior gateway protocol and border gateway protocol (superseded by BGP)</li> <li>• netWare link state protocol (NLSP)</li> <li>• open shortest-path first interior gateway protocol (OSPF)</li> <li>• routing information protocol (RIP)</li> <li>• static routing.</li> </ul>
<i>Hardware</i> may include:	<ul style="list-style-type: none"> <li>• DSL modems</li> <li>• modems and other connectivity devices</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install specified RFID system	1.1. Prepare for given work according to relevant legislation, occupational health and safety (OHS), codes, regulations and standards 1.2. Arrange access to the site according to required procedure 1.3. Choose the most suitable <b>RFID system</b> based on <b>specifications</b> and in consultation with <b>appropriate person</b> 1.4. Evaluate options for equipment installation siting and antenna positioning to include the effects of electromagnetic interference and shielding 1.5. Investigate causes of interference with RFID systems 1.6. Specify the <b>network element requirements</b> for the installation and any <b>training requirements</b> for <b>clients</b> 1.7. Create a deployment plan including down times and advise the <b>user group</b> 1.8. Obtain all components and devices required for the RFID system
2. Install specified RFID system and resolve any faults	2.1. Install interrogators or readers according to given plan 2.2. Install tags and document the correct procedures for locating and orienting tags 2.3. Install and undertake network <b>configuration</b> activities using relevant operating system and application upgrades to integrate RFID system into the overall network 2.4. Troubleshoot problems between interrogators or readers, tags and networks including tuning for <b>optimum performance</b> and rectify any faults
3. Test the RFID installation according to specification and standards	3.1. Test system installation according to design specifications and standards including optimum placement of tags and data transmission completeness and record outcomes 3.2. Carry out any changes 3.3. Validate changes or additions against specifications 3.4. Document the test results
4. Complete documentation in	4.1. Complete all <b>documentation</b> for users according to the design and customer requirements

ELEMENT	PERFORMANCE CRITERIA
compliance with customer requirements and clean up worksite	4.2. Complete report and notify client of status of the network and standards applying to the installation 4.3. Clean up and restore worksite to client's satisfaction 4.4. Secure sign off from appropriate person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports, user and training documentation in required formats
- numeracy skills to take test measurements, interpret results and evaluate performance and interoperability of RFID system
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt configuration procedures to requirements of RFID network and reconfigure depending on differing operational contingencies, risk situations and environments
- research skills to interrogate vendor databases and website to implement different configuration requirements to meet client design specifications
- technical skills to select and use RFID diagnostic test, application software and hardware to suit different RFID network applications

#### Required knowledge

- client business domain, business function and organisation
- common network cable types and connectors
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- current industry-accepted hardware and software products
- desktop applications and operating systems as required
- enterprise communication and training systems in relation to training and advising staff involved in the deployment
- network topologies
- RFID technologies incorporating substantial depth in network operating systems, protocols, interrogators and sensors, wireless technologies and cabling standards

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan installation</li> <li>• use basic research skills for adapting RFID technologies to specified plan and design</li> <li>• implement and verify RFID operations</li> <li>• implement RFID architecture across a secure environment</li> <li>• encode RFID tags and attach to items</li> <li>• integrate RFID information into business applications</li> <li>• configure the network with IP addressing</li> <li>• cable and test the RFID network</li> <li>• create technical and user documentation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where RFID installation may be conducted</li> <li>• use of field measurement equipment currently used in industry</li> <li>• relevant network element specifications</li> <li>• technical requirements for an RFID network</li> <li>• cabling</li> <li>• networked (LAN) computers</li> <li>• workstations</li> <li>• RFID diagnostic software</li> <li>• WAN service point of presence.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing and testing an RFID system</li> <li>• oral or written questioning of underpinning skills and knowledge</li> <li>• evaluation of report prepared by the candidate outlining testing procedures, test results and recommendation of network changes.</li> </ul>

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- ICTTEN4198A Install, configure and test an internet protocol network.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b><i>RFID system</i></b> may include:	<ul style="list-style-type: none"> <li>• antenna</li> <li>• cabling</li> <li>• databases</li> <li>• interrogators or readers</li> <li>• power supplies</li> <li>• tags</li> <li>• wireless units.</li> </ul>
<b><i>Specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• cable drops</li> <li>• device mounting locations</li> <li>• electrical specifications for:               <ul style="list-style-type: none"> <li>• adapters</li> <li>• interrogators</li> <li>• power units</li> <li>• readers</li> <li>• sensors</li> <li>• tags</li> <li>• wireless units</li> </ul> </li> <li>• interrogation zone locations</li> <li>• RFID network topology</li> <li>• site diagrams.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• IT support manager</li> <li>• network administrator</li> <li>• RFID network manager</li> <li>• small or medium enterprise (SME) customer</li> <li>• small office home office (SOHO) customer</li> <li>• supervisor.</li> </ul>
<b><i>Network element requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• drives</li> <li>• routers</li> <li>• servers</li> <li>• switches.</li> </ul>
<b><i>Training requirements</i></b> relate to:	<ul style="list-style-type: none"> <li>• education requirements for support staff</li> <li>• client requirements</li> <li>• relevant enterprise policies.</li> </ul>
<b><i>Clients</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individual people</li> <li>• internal departments</li> <li>• internal employees</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• logistic company</li> <li>• warehouse.</li> </ul>
<i>User group</i> may include:	<ul style="list-style-type: none"> <li>• administration</li> <li>• dispatch</li> <li>• inventory</li> <li>• stores</li> <li>• transport</li> <li>• warehouse.</li> </ul>
<i>Configuration</i> may include:	<ul style="list-style-type: none"> <li>• access control needs</li> <li>• hostnames</li> <li>• IP addresses</li> <li>• network connectivity issues</li> <li>• port numbers</li> <li>• server domains.</li> </ul>
<i>Optimum performance</i> may include:	<ul style="list-style-type: none"> <li>• antenna type</li> <li>• cable length or loss</li> <li>• equipment mounting and protection</li> <li>• interference considerations</li> <li>• latency</li> <li>• tag type               <ul style="list-style-type: none"> <li>• active</li> <li>• operating frequency</li> <li>• passive.</li> </ul> </li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• ISO, IEC, AS standards</li> <li>• naming standards</li> <li>• operational instructions</li> <li>• project management templates</li> <li>• report writing</li> <li>• training documentations</li> <li>• version control.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for implementation of network routers and switches	1.1. Prepare for given work according to occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> with <i>appropriate personnel</i> 1.2. Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3. Determine nature and scope of the network routers and network switches and <i>network resources</i> from job briefs or appropriate personnel 1.4. Select and obtain network services and network application requirements according to <i>enterprise procedures</i> 1.5. Obtain identified operating instructions, manuals, hardware and software testing methodologies 1.6. Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Implement network switches and routers	2.1. Configure routers and switches according to manufacturer's specifications and enterprise procedures 2.2. Determine <i>network addressing scheme</i> for network connectivity and verify using <i>calculations</i> 2.3. Activate and verify network WAN links to provide network connectivity 2.4. Enable <i>network services</i> and <i>network applications</i> to the network to complete network connectivity process 2.5. Set up traffic access and filtering according to enterprise procedures
3. Troubleshoot network switches and routers	3.1. Monitor network performance and isolate faults using diagnostic and analysis tools 3.2. Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Document configuration and troubleshooting records	4.1. Restore work site to safe condition according to established safety procedures 4.2. Record and store <i>essential implementation information</i> according to enterprise procedures 4.3. Notify appropriate personnel about the completion of the task according to enterprise procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with technical staff
- literacy skills to read and interpret enterprise procedures, manuals and specifications
- numeracy skills to interpret technical data and perform calculations
- planning and organisational skills to plan and prioritise own work
- problem solving skills to:
  - deal with unexpected situations on the basis of safety and specified work outcomes
  - troubleshoot common network problems
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - follow enterprise OHS procedures
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to :
  - configure and activate network access and security measures
  - configure switches and routers to enable LAN and WAN links
  - connect enterprise networks using WAN services and applications
  - connect the enterprise network to external services
  - maintain enterprise network documentation
  - troubleshoot network faults and implement recovery action
  - use a hierarchical internet protocol (IP) network address scheme
  - use tools and equipment to analyse enterprise network

#### Required knowledge

- access control lists
- correct use of tools and equipment
- enterprise:
  - features and applications
  - OHS procedures
  - record keeping procedures
  - switching and routing protocols and strategies:

**REQUIRED SKILLS AND KNOWLEDGE**

- hierarchical addressing
- multilayer switching
- routing protocols
- VLAN routing
- implement enterprise WAN links
- network diagnostic and troubleshooting techniques
- network modelling

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• determine customer networking requirements</li> <li>• configure routers and switches using hierarchical addressing over VLANs to meet network link requirements</li> <li>• enable and control access to network services and applications across the network</li> <li>• diagnose and rectify network hardware and device configuration faults</li> <li>• document configuration information, fault-finding history and remediation action.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a network facility and workstations</li> <li>• operating instructions, installation documents and manuals</li> <li>• hardware and software testing tools currently used in industry.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing and troubleshooting routers and switches</li> <li>• review documentation of implementation and troubleshooting prepared by the candidate</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example with:</p> <ul style="list-style-type: none"> <li>• ICTTEN2207A Install and configure a home or small office network</li> <li>• ICTTEN2208A Install and configure a small to medium business network</li> </ul>

**EVIDENCE GUIDE**

- ICTTEN2209A Build and maintain a secure network.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***OHS*** may include:

- awards provisions
- hazardous substances and dangerous goods codes
- legislation
- local safe operation procedures

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• material safety management systems</li> <li>• protective equipment.</li> </ul>
<i>Environmental requirements</i> may include:	<ul style="list-style-type: none"> <li>• dust</li> <li>• excessive energy and water use</li> <li>• excessive noise</li> <li>• fumes</li> <li>• gas</li> <li>• liquid waste</li> <li>• smoke emissions</li> <li>• solid waste</li> <li>• vapour.</li> </ul>
<i>Appropriate personnel</i> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• manager</li> <li>• network manager</li> <li>• site engineer</li> <li>• supervisor.</li> </ul>
<i>Network resources</i> may include:	<ul style="list-style-type: none"> <li>• domain name system (DNS) server</li> <li>• dynamic host configuration protocol (DHCP) server</li> <li>• files</li> <li>• software</li> <li>• web browser.</li> </ul>
<i>Enterprise procedures</i> may include:	<ul style="list-style-type: none"> <li>• instructions: <ul style="list-style-type: none"> <li>• designs</li> <li>• drawings</li> <li>• job sheets</li> <li>• plans</li> </ul> </li> <li>• manufacturer's specifications</li> <li>• operational procedures</li> <li>• reporting and communication</li> <li>• use of tools and equipment.</li> </ul>
<i>Network addressing scheme</i> may include:	<ul style="list-style-type: none"> <li>• dynamic</li> <li>• static</li> <li>• subnet.</li> </ul>
<i>Calculations</i> may include:	<ul style="list-style-type: none"> <li>• binary addition</li> <li>• binary conversion</li> <li>• binary division</li> <li>• binary multiplication</li> <li>• binary number system</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• binary subtraction.</li> </ul>
<i>Network services</i> may include:	<ul style="list-style-type: none"> <li>• authentication servers</li> <li>• collaborative services</li> <li>• DHCP</li> <li>• directory services</li> <li>• DNS</li> <li>• email</li> <li>• network file system</li> <li>• printing</li> <li>• web services.</li> </ul>
<i>Network applications</i> may include:	<ul style="list-style-type: none"> <li>• media player</li> <li>• spreadsheet</li> <li>• word-processor.</li> </ul>
<i>Essential implementation information</i> may include:	<ul style="list-style-type: none"> <li>• fault history</li> <li>• installation software</li> <li>• IP addressing schemes</li> <li>• logical and physical diagrams</li> <li>• network administrator codes</li> <li>• network recovery actions</li> <li>• passwords</li> <li>• router configuration details</li> <li>• security access codes</li> <li>• switch configuration details.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for the design and installation of an internetwork	1.1. Prepare for given work according to occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> with <i>appropriate personnel</i> 1.2. Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3. Determine nature and scope of the <i>internetwork</i> from job briefs and appropriate personnel 1.4. Obtain operating instructions, manuals, hardware and software testing methodologies 1.5. Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Design an enterprise internetwork	2.1. Produce enterprise <i>internetwork topology</i> after considering technical requirements, physical and financial constraints and expansion projections 2.2. Determine <i>network devices</i> and <i>network resources</i> according to enterprise procedures 2.3. Produce the internetwork design including network security and router and switch configurations to meet design specifications and <i>enterprise procedures</i>
3. Install and configure a designed internetwork	3.1. Install network hardware to network topology design plan according to enterprise procedures 3.2. Determine <i>network addressing scheme</i> for network connectivity and verify using <i>calculations</i> 3.3. Configure routers and switches to perform the logical connection of the internetwork 3.4. Conduct connectivity and performance tests to verify the network installation meets the design specification 3.5. Troubleshoot internetwork and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Complete and document network design and installation	4.1. Restore worksite to safe condition according to established safety procedures 4.2. Record and store <i>essential design and installation information</i> according to enterprise procedures 4.3. Notify appropriate personnel about the completion of the task according to enterprise procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise and negotiate with customers and peers to achieve design specifications
- literacy skills to:
  - develop network documentation and maintain network records
  - read and interpret enterprise procedures, manuals and specifications
- numeracy skills to interpret technical data
- planning and organisational skills to plan and prioritise own work
- problem solving skills to:
  - deal with unexpected situations on the basis of safety and specified work outcomes
  - troubleshoot common network problems according to help desk procedures
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - follow enterprise OHS procedures
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - analyse the impact of applications on traffic flow in the network
  - apply network design methodologies to design networks that provide a range of services and applications found in larger networks
  - conduct a wireless site survey
  - determine customer requirements and a design specification
  - determine the impact of upgrading hardware and software on network functionality
  - identify the technical requirements, constraints and manageability issues for a given customer network requirement
  - install a network design
  - use tools and equipment

#### Required knowledge

- enterprise OHS procedures
- open systems interconnect (OSI) layered communication model
- network requirements:
  - applications

**REQUIRED SKILLS AND KNOWLEDGE**

- lifecycle
- manageability
- quality of service
- network design concepts:
  - business requirements
  - network topologies
  - physical and financial constraints
  - security
  - wired or wireless options
- tool and equipment use
- troubleshooting:
  - impact of network failure
  - maintenance
  - troubleshooting methodology

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• determine customer requirements</li> <li>• design an internetwork that uses advanced routing and addressing techniques</li> <li>• install an internetwork according to design specification</li> <li>• configure network devices to meet design functionality</li> <li>• document internetwork design, installation and configuration.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a site where design and installation of an internetwork network may be conducted</li> <li>• use of tools, equipment and materials currently used in industry</li> <li>• relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</li> </ul>
<b>Methods of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate designing, installing and configuring an internetwork</li> <li>• review of documents prepared by the candidate detailing design and installation</li> <li>• oral or written questioning to assess required knowledge.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example with:</p> <ul style="list-style-type: none"> <li>• ICTTEN2207A Install and configure a home or small office network</li> <li>• ICTTEN2208A Install and configure a small to</li> </ul>

**EVIDENCE GUIDE**

	<p>medium business network</p> <ul style="list-style-type: none"> <li>• ICTTEN4210A Implement and troubleshoot enterprise routers and switches.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. ## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to work on a switched network	1.1.Prepare for given work according to occupational health and safety ( <i>OHS</i> ) and <i>environmental requirements</i> with <i>appropriate personnel</i> 1.2.Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3.Determine nature and scope of the network and network topology from job briefs or appropriate personnel 1.4.Select and obtain wireless and wired network components requirements according to <i>enterprise procedures</i> 1.5.Obtain operating instructions, manuals, hardware and software testing methodologies 1.6.Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Configure network switches	2.1.Set up and configure network switches according to manufacturer's specifications and enterprise procedures 2.2.Build and configure a routed network using remote access management 2.3.Establish multiple VLANs across the network to manage the access and traffic across the network
3. Troubleshoot network	3.1.Monitor network traffic and assess performance against manufacturer's specifications and established procedures 3.2.Troubleshoot network according to manufacturer's specifications and enterprise procedures 3.3.Identify and rectify faults according to enterprise procedures
4. Complete and document network installation and configuration	4.1.Restore worksite to safe condition according to established safety procedures 4.2.Record and store <i>essential configuration information</i> according to enterprise procedures 4.3.Notify appropriate personnel about the completion of the task according to enterprise procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with customers and peers to achieve outcomes
- literacy skills to read and interpret enterprise procedures, manuals and specifications
- numeracy skills to interpret technical data
- planning and organisational skills to plan and prioritise own work
- problem solving skills to:
  - deal with unexpected situations on the basis of safety and specified work outcomes
  - troubleshoot network malfunctions
- safety awareness skills to:
  - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
  - follow enterprise OHS procedures
  - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - configure a network to support multiple VLANS
  - configure a switch using VLAN trunking and spanning tree protocols
  - design and build a interVLAN switched network
  - establish LAN switching over a wireless network
  - install switch and remote access security
  - use tools and equipment

#### Required knowledge

- enterprise OHS procedures
- interVLAN routing
- spanning tree protocol
- switch and remote network security management
- tool and equipment correct usage
- troubleshooting procedures
- VLAN trunking protocol
- wireless LAN setup and access configuration

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to provide consultancy and technical support in the CPE sector	1.1. Obtain consultancy requirements from the client 1.2. Establish relationship with <i>industry</i> experts to maintain currency of latest industry innovations in the customer premises equipment (CPE) sector 1.3. Access sources of <i>product and technical information</i> relating to change and innovation 1.4. Access and evaluate latest data relating to change and innovation in the CPE sector for company use within an appropriate timeframe
2. Assess customer needs	2.1. Develop knowledge and understanding of the client's business to provide an accurate solution according to the requirements 2.2. Investigate communication requirements including <i>networks</i> , based on business needs and demands 2.3. Ascertain client's <i>physical and financial parameters</i> 2.4. Present reports and recommendations within client's timeframes
3. Provide consultancy and expert advice	3.1. Provide timely and accurate expert <i>consultancy</i> and advice to <i>company staff and clients</i> 3.2. Provide communication solutions that meet client's requirements and that meet <i>relevant legislation, codes, regulations and standards</i> 3.3. Provide alternative solutions for clients where their needs cannot be better met in an innovative way 3.4. Provide a report on advice and solutions that match both the physical and financial demands of the client 3.5. Consult with the client for an <i>agreed solution</i>
4. Control and manage product and technical information	4.1. Provide all relevant personnel with the latest product and technical information 4.2. Monitor the information flow process to ensure that appropriate personnel have access to the latest data 4.3. Provide the client with final consultancy reports and recommendations

## Required Skills and Knowledge

## **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### **Required skills**

- communication skills to liaise with customers to ensure requirements are known and can be met within timeframes
- literacy skills to interpret technical specifications and related documentation
- numeracy skills to make calculations for dimensioning, cost and financial considerations
- planning and organisation skills to make site access arrangements and plan and prioritise own work
- problem solving skills to develop communications solutions
- research skills to gain and maintain relevant and current technical product knowledge
- technical skills to:
  - interpret drawings related to customer's telecommunications equipment
  - provide expert advice on installation and upgrade
  - use databases and diagnostic equipment

### **Required knowledge**

- common customer telecommunications applications and related equipment
- connections to carrier infrastructure or equipment
- current legislation relating to installation of telecommunications equipment and connection to carrier services
- enterprise operations and policies
- IP networks
- new and emerging technologies
- overview knowledge of customer premise equipment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• provide consultancy advice related to full range of CPE products including: <ul style="list-style-type: none"> <li>• product models and equipment types</li> <li>• peripherals</li> <li>• facilities including network facilities</li> <li>• system features</li> </ul> </li> <li>• provide alternative solutions where customer's needs cannot be met precisely</li> <li>• prepare clear and concise reports to customers complete with recommendations and supporting data, including full financial considerations</li> <li>• provide regular updates to both company personnel and clients as to the latest product and technical information.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site with: <ul style="list-style-type: none"> <li>• network or computer layout documentation and premises plans</li> <li>• network components</li> <li>• equipment specifications</li> <li>• organisational guidelines</li> <li>• business plan or model</li> </ul> </li> <li>• relevant legislation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate undertaking a practical exercise</li> <li>• review of reports completed by the candidate for different test examples and situations</li> <li>• oral or written questioning to assess knowledge of planning, types of systems and applications.</li> </ul>

## EVIDENCE GUIDE

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example with:

- ICTTEN5204A Produce technical solutions from business specifications.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b>Industry</b> may include:	<ul style="list-style-type: none"> <li>• communications</li> <li>• information technology</li> <li>• multimedia industries.</li> </ul>
<b>Product and technical information</b> relates to:	<ul style="list-style-type: none"> <li>• CPE product</li> <li>• facilities including: <ul style="list-style-type: none"> <li>• network facilities</li> <li>• system features</li> </ul> </li> <li>• peripherals</li> <li>• product models and equipment types.</li> </ul>
<b>Networks</b> may be:	<ul style="list-style-type: none"> <li>• external</li> <li>• internal</li> <li>• in Australia</li> <li>• overseas.</li> </ul>
<b>Physical and financial parameters</b> may include:	<ul style="list-style-type: none"> <li>• physical parameters: <ul style="list-style-type: none"> <li>• building size</li> <li>• equipment inventory</li> <li>• new equipment requirement</li> <li>• power requirements</li> <li>• site access</li> <li>• size of organisation</li> <li>• staffing</li> </ul> </li> <li>• financial parameters: <ul style="list-style-type: none"> <li>• capital expenditure</li> <li>• current budget allocation</li> <li>• current return on investment</li> <li>• forecast fund allocation</li> <li>• future return on investment</li> <li>• operational costs.</li> </ul> </li> </ul>
<b>Consultancy</b> may be:	<ul style="list-style-type: none"> <li>• direct to a customer</li> <li>• through a third party considering provision of consultant's company product</li> <li>• supported by explanatory documentation.</li> </ul>
<b>Company staff and clients</b> may include:	<ul style="list-style-type: none"> <li>• own or partner company staff</li> <li>• sales and technical staff.</li> </ul>
<b>Relevant legislation, codes, regulations and standards</b> include:	<ul style="list-style-type: none"> <li>• Australian Communications Industry Forum (ACIF) standards and codes</li> <li>• Australian Communications and Media Authority (ACMA) technical standards</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• AS/NZS 3000:2007</li> <li>• AS/NZS 3080:2003</li> <li>• AS/NZS 3084:2003</li> <li>• AS/NZS 3085.1:2004</li> <li>• AS/NZS IEC 61935.1:2006</li> <li>• AS/NZS IEC 61935.2:2006</li> <li>• AS/NZS ISO/IEC 14763.3:2007</li> <li>• AS/NZS ISO/IEC 15018:2005</li> <li>• AS/NZS ISO/IEC 24702:2007</li> <li>• Australian building codes and regulations</li> <li>• Australian Standards AS 3901, 3902</li> <li>• fire regulations</li> <li>• heritage legislation</li> <li>• International Standards ISO 9000, 9001</li> <li>• OHS</li> <li>• Trade Practices Legislation.</li> </ul>
<i>Agreed solution</i> includes:	<ul style="list-style-type: none"> <li>• cost details</li> <li>• equipment requirements</li> <li>• procurements information</li> <li>• recommended vendors</li> <li>• return on investment (RoI) information.</li> </ul>

## ICTTEN5168A Design and implement an enterprise voice over internet protocol and a unified communications network

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design and implement the infrastructure for enterprise voice over internet protocol (VoIP) and unified communications (UC) systems to meet business requirements using converging network technologies.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Telecommunications or IT technicians with significant technical expertise apply the skills and knowledge in this unit. They combine technical expertise with a range of analytical, research and planning skills to develop and tailor IP convergence solutions for particular business needs.</p> <p>This unit applies to individuals working to design and implement the infrastructure to enable enterprises to use VoIP and other packet-based services.</p> <p>It also applies to enterprises outlaying capital looking for return on investment by reducing operating costs and improved unified internet protocol (IP) based communication systems.</p>
--------------------------------	---

### Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and design VoIP infrastructure to meet business requirements</p>	<p>1.1. Ascertain <i>end-user requirements</i> in consultation with client</p> <p>1.2. Select VoIP infrastructure in line with business and end-user requirements, within budget limitations</p> <p>1.3. Select <i>protocols for converged networks</i></p> <p>1.4. Select <i>hardware, software, network</i> and security <i>requirements</i> according to agreed business and end-user specifications</p> <p>1.5. Investigate <i>factors</i> affecting bandwidth and calculate bandwidth usage for various codecs, including considerations of overhead, connection quality and connection speeds</p>
<p>2. Install and configure VoIP infrastructure to meet business requirements</p>	<p>2.1. Implement telephone number mapping (ENUM), number portability, end point addressing, path selection, calling classes and overlapping number ranges</p> <p>2.2. Install, configure and test <i>gatekeepers</i></p> <p>2.3. Install and test <i>convergent terminal equipment</i> and software</p> <p>2.4. Install software and configure and test VoIP services</p> <p>2.5. Configure security access levels to safeguard data, making use of appropriate tools</p>
<p>3. Configure a UC network</p>	<p>3.1. Obtain the topology and components of a UC network</p> <p>3.2. Analyse the potential of IP multimedia subsystem (IMS) network architecture to enable the convergence of voice, video and data applications and various mobile network technologies over IP based layer</p> <p>3.3. Incorporate the use of a communications server to provide <i>real-time multimedia communications</i></p> <p>3.4. Select common videoconferencing codecs according to standards and practices</p> <p>3.5. Select <i>voice and video conferencing hardware</i></p> <p>3.6. Implement IP-private branch exchange (PBX) functionalities in the UC network</p>
<p>4. Test and evaluate the performance of convergent networks</p>	<p>4.1. Develop possible <i>network congestion solutions</i> for common network congestions to meet quality of service (QoS) specified</p> <p>4.2. Provide solutions for problems in contacting</p>

ELEMENT	PERFORMANCE CRITERIA
	emergency services 4.3. Analyse network traffic and resolve problems using packet sniffer, monitoring software and hardware solutions 4.4. Troubleshoot convergent communications over wireless networks 4.5. Analyse types and effects of <i>attacks</i> , including <i>man-in-the-middle attacks</i> 4.6. Plan ways to counteract denial of service (DoS) and distributed DoS (DDoS) attacks 4.7. Predict the impact of virtual local area network (VLAN) hopping, media access control (MAC) address movements, additions and changes on network
5. Test and verify the security access levels	5.1. Analyse types of intrusion detection 5.2. Monitor and evaluate capability and reliability of security systems 5.3. Make system alterations to ensure protection against known and potential threats 5.4. Verify and test that user settings conform to security policies 5.5. Backup, upgrade and scan systems to minimise attacks
6. Complete documentation and sign off procedures	6.1. Complete required records and notify customer 6.2. Remove installation waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions 6.3. Reinstate site according to customer and company requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to evaluate network traffic protocols and bandwidth considerations
- communications skills to liaise with clients and determine business requirements

## REQUIRED SKILLS AND KNOWLEDGE

- planning and organisational skills to plan, design and implement VoIP infrastructure
- project planning skills in relation to setting benchmarks and identifying scope
- problem solving skills in a predictable range of network problems
- research skills for identifying, analysing and evaluating broad features of a particular business domain and best practice in networking technologies
- technical skills to :
  - compare session initiation protocol (SIP), H323 and media gateway control protocol (MGCP) or media gateway control (Megaco)
  - configure a VoIP and a UC network and assess the performance of convergent networks and test and verify security access levels
  - define latency, jitter and wander and implement methods for reducing or eliminating them using jitter buffer, QoS, traffic shaping and VLANs
  - describe the format of a SIP uniform resource identifier (URI)
  - evaluate and implement SIP trunking to connect enterprise internet protocol (IP)-based communications systems over long distances
  - identify common G.7xx codes and describe the impact of compression on voice quality
  - identify the components of SIP
  - identify the functions of signalling protocols for converged networks

## Required knowledge

- broad knowledge of:
  - client business domain, business function and organisation
  - current and emerging industry accepted hardware and software products
  - current and emerging transmission technologies and protocols
  - networking technologies

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design and implement the infrastructure for enterprise VoIP and UC systems to meet business requirements using converged networks</li> <li>• apply knowledge of current networking, transmission technologies and protocols</li> <li>• evaluate network traffic protocols and bandwidth considerations</li> <li>• configure a UC network</li> <li>• assess the performance of convergent networks</li> <li>• test and verify security access levels.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• live network</li> <li>• networked computers</li> <li>• network design documentation</li> <li>• equipment specifications</li> <li>• network components.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of report prepared by the candidate outlining design process undertaken, including challenges faced and how these were addressed</li> <li>• direct observation of the candidate installing and configuring VoIP infrastructure and configuring a UC network</li> <li>• evaluation of system designed and implemented by the candidate in terms of performance and suitability of for business needs.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN5201A Install, configure and test a server.</li> </ul>

## EVIDENCE GUIDE

	<p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	---

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***End-user requirements*** may include:

- how and what the organisation wants in regard to:
  - preventative maintenance and diagnostic policy
  - problem solution processes
  - return on investment (RoI)

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• roles and technical responsibilities in the IT department</li> <li>• vendor and product service level support agreements</li> <li>• work environment.</li> </ul>
<p><i>Protocols for converged networks</i> may include:</p>	<ul style="list-style-type: none"> <li>• H225</li> <li>• H320</li> <li>• H323</li> <li>• H450</li> <li>• Megaco</li> <li>• MGCP</li> <li>• SIP.</li> </ul>
<p><i>Hardware</i> may include:</p>	<ul style="list-style-type: none"> <li>• cable or DSL modems</li> <li>• IP phones</li> <li>• modems</li> <li>• multi-layer switches</li> <li>• networks</li> <li>• other connectivity devices</li> <li>• personal computers</li> <li>• remote sites</li> <li>• routers</li> <li>• servers</li> <li>• switches</li> <li>• wireless devices</li> <li>• workstations.</li> </ul>
<p><i>Software</i> may include:</p>	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• communications software</li> <li>• in-house or customised software</li> <li>• networking device operating systems</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>
<p><i>Network</i> may include:</p>	<ul style="list-style-type: none"> <li>• data and voice</li> <li>• internet</li> <li>• large and small LANs</li> <li>• national wide area networks (WANs)</li> <li>• private lines</li> <li>• use of public switched telephone network (PSTN) for dial-up modems only</li> <li>• virtual private networks (VPNs).</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Requirements</b> may include:	<ul style="list-style-type: none"> <li>reference to the business, system, application, network or people in the organisation</li> <li>simple addition or upgrade to a major new installation.</li> </ul>
<b>Factors</b> may include:	<ul style="list-style-type: none"> <li>codec choice</li> <li>compression</li> <li>latency</li> <li>packet reordering</li> <li>protocol incompatibility</li> <li>QoS issues.</li> </ul>
<b>Gatekeepers</b> may include:	<ul style="list-style-type: none"> <li>call manager</li> <li>media gateway</li> <li>media gateway controller (call agent)</li> <li>signalling gateway (SG).</li> </ul>
<b>Convergent terminal equipment</b> may include:	<ul style="list-style-type: none"> <li>analogue telephone adapter (ATA)</li> <li>IP phones</li> <li>single line adapter</li> <li>soft phones:                             <ul style="list-style-type: none"> <li>personal digital assistant (PDA)</li> <li>wireless fidelity (WiFi).</li> </ul> </li> </ul>
<b>Real-time multimedia communications</b> may include:	<ul style="list-style-type: none"> <li>directory look-up</li> <li>email</li> <li>file exchange</li> <li>instant messaging (IM)</li> <li>presence</li> <li>video conferencing.</li> </ul>
<b>Voice and video conferencing hardware</b> may include:	<ul style="list-style-type: none"> <li>multi-point control unit (MCU)</li> <li>session border controller (SBC)</li> <li>set-top box.</li> </ul>
<b>Network congestion solutions</b> may include:	<ul style="list-style-type: none"> <li>changing configurations</li> <li>monitoring network traffic and protocols</li> <li>upgrades.</li> </ul>
<b>Attacks</b> may include:	<ul style="list-style-type: none"> <li>brute force and dictionary attacks</li> <li>illicit servers</li> <li>man-in-the-middle attacks</li> <li>unsolicited calls</li> <li>viruses</li> <li>voicemail compromises.</li> </ul>
<b>Man-in-the-middle attacks</b>	<ul style="list-style-type: none"> <li>packet sniffing</li> </ul>

<b>RANGE STATEMENT</b>	
include:	<ul style="list-style-type: none"><li>• registration hijacking</li><li>• TP connection hijacking.</li></ul>

### Unit Sector(s)

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install the network switch	1.1. Prepare for installation in line with site specific safety requirements and enterprise occupational health and safety (OHS) processes and procedures 1.2. Notify customer to arrange access to site 1.3. Document the <i>topology</i> of the LAN 1.4. Obtain current and future <i>network capacity</i> predictions according to current and future business requirements from the <i>appropriate person</i> 1.5. Specify the number and type of <i>switch</i> required, with reference to future network requirements 1.6. Specify the requirements for network management and security, as prescribed by organisational policy 1.7. Select the switch and switch operating system software version with the appropriate features according to required specifications
2. Install and configure the network switch	2.1. Assemble, rack mount and connect switch and <i>peripherals</i> according to manufacturer's requirements 2.2. Connect <i>user</i> to access points using <i>cable</i> that meets the appropriate <i>standard</i> 2.3. Establish a valid network connection with other network devices 2.4. Configure a network internet protocol (IP) address for the switch 2.5. Install or configure simple network management protocol (SNMP) agent software, on each switch, to collect network traffic data for the management information base (MIB) from that segment of the network and relay it to the management console 2.6. Install and configure SNMP management console software on a computer designated to be the network manager's main console, to collect network traffic data from the switch acting as agents 2.7. Manually configure the user access ports of the switch for speed and for full or half-duplex operation
3. Test the network switch and reconfigure the network	3.1. Test the switch and other network devices according to manufacturer's requirements and organisational guidelines 3.2. Test to ensure that there is connectivity across the network

ELEMENT	PERFORMANCE CRITERIA
	3.3.Modify the network to verify SNMP management software 3.4.Make adjustments to the network, depending on test and troubleshooting results
4. Complete documentation and clean up worksite	4.1.Tabulate test results and complete all user reports 4.2.Complete report and notify client of status of the network 4.3.Clean up and restore worksite to client's satisfaction 4.4.Secure sign off from appropriate person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research skills to interrogate vendor databases and websites to implement different configuration requirements to meet security levels
- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to read and interpret technical documentation and write reports in required formats
- numeracy skills to take test measurements, interpret results and evaluate performance and interoperability of network
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt configuration procedures to requirements of network and reconfigure depending on differing operational contingencies, risk situations and environments
- technical skills to:
  - install and configure network switch
  - select switch and switch operating system
  - specify requirements for network management and security
  - test switch and other network devices

#### Required knowledge

- advantages and disadvantages of switches over hubs
- Australian Computer Society Code of Ethics
- common network cable types and connectors

**REQUIRED SKILLS AND KNOWLEDGE**

- common network topologies
- differences between standard and intelligent (i.e. configurable) switches and between switches and hubs
- documentation skills for networks
- implementation and configuration of networks
- providing the network with redundant paths for reliability and the way routers and switches manage these paths

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and prepare for the LAN switch installation task</li> <li>• select a LAN Switch to meet the client business specifications</li> <li>• install switches without the network losing connectivity or failing</li> <li>• install and test the switch that ensures interoperability within the network</li> <li>• use a range of switch configurations</li> <li>• apply solutions to a variety of switch-related problems</li> <li>• report on the status of the completed installation and seek sign off and customer satisfaction</li> <li>• use switches</li> <li>• apply solutions to defined switching problems.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where switch installation must be may be conducted</li> <li>• use of field measurement equipment currently used in industry</li> <li>• relevant switch specifications, technical requirements for a network, switch, cabling, networked (LAN) computers, workstations, servers and WAN service point of presence.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing, configuring and testing a LAN switch</li> <li>• oral or written questioning of required skills and knowledge</li> <li>• evaluation of report prepared by the candidate outlining testing procedures, results and recommendations to network changes.</li> </ul>

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- ICTTEN4198A Install, configure and test an internet protocol network.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b>Topology</b> may include:	<ul style="list-style-type: none"> <li>• bus</li> <li>• hierarchical</li> <li>• hybrid</li> <li>• ring</li> <li>• star.</li> </ul>
<b>Network capacity</b> may include:	<ul style="list-style-type: none"> <li>• expandability: <ul style="list-style-type: none"> <li>• number of available uplink ports</li> </ul> </li> <li>• hardware reliability</li> <li>• LAN topology support: <ul style="list-style-type: none"> <li>• AppleTalk</li> <li>• Ethernet</li> <li>• FDDI</li> <li>• Token Ring</li> </ul> </li> <li>• port bandwidth capabilities <ul style="list-style-type: none"> <li>• 100 megabits per second)</li> </ul> </li> <li>• redundant power supply (AC/DC).</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• IT support manager</li> <li>• network Administrator</li> <li>• network manager</li> <li>• small or medium enterprise (SME) customer</li> <li>• small office home office (SOHO) customer</li> <li>• supervisor.</li> </ul>
<b>Switch</b> by vendors may include:	<ul style="list-style-type: none"> <li>• 3Com</li> <li>• Accton</li> <li>• Bay</li> <li>• Cisco</li> <li>• DLink</li> <li>• Intel</li> <li>• NetGear</li> <li>• System 3000 Ethernet.</li> </ul>
<b>Peripherals</b> may include:	<ul style="list-style-type: none"> <li>• Bluetooth devices</li> <li>• fax</li> <li>• Firewire (IEEE 1394)</li> <li>• input equipment may include: <ul style="list-style-type: none"> <li>• mouse</li> <li>• pens</li> <li>• touch pad</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• laptops and desktop computers</li> <li>• mobile phones</li> <li>• modems</li> <li>• multimedia kits</li> <li>• palmtops and personal digital assistants (PDAs)</li> <li>• personal computer</li> <li>• printers</li> <li>• scanners</li> <li>• speakers</li> <li>• tape cartridges</li> <li>• universal serial bus (USB).</li> </ul>
<i>User</i> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<i>Cable</i> may include:	<ul style="list-style-type: none"> <li>• Category 5e, 6 or 7</li> <li>• crossover</li> <li>• fibre</li> <li>• shielded twisted pairs (STP)</li> <li>• straight through</li> <li>• unshielded twisted pairs (UTP).</li> </ul>
<i>Standard</i> may include:	<ul style="list-style-type: none"> <li>• EIA/TIA 568A</li> <li>• EIA/TIA 568B.</li> </ul>

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install a server	1.1. Prepare for work in line with site specific safety requirements and enterprise occupational health and safety (OHS) processes and procedures 1.2. Notify customer to arrange access to site 1.3. Obtain <i>server applications</i> and features from <i>appropriate person</i> 1.4. Choose the most suitable <i>server</i> with reference to required server application and server features 1.5. Choose the most suitable <i>network operating system</i> features with reference to required server solution and technical <i>requirements</i> 1.6. Provide alternative server solutions with reference to required server application and server features 1.7. Review required installation options 1.8. Analyse data migration requirements 1.9. Apply backup and recovery requirements with reference to organisational policy 1.10. Analyse education and training requirements for support staff and in line with <i>client</i> , requirements and relevant enterprise policies 1.11. Create and document a deployment plan 1.12. Advise <i>user</i> group of deployment and potential down times
2. Install and configure the server	2.1. Backup and restore local data in preparation for installation 2.2. Install and configure the server as required by technical requirements and functional specifications 2.3. Install and undertake configuration activities using relevant operating system and application upgrades 2.4. Reconnect and reconfigure relevant connectivity devices
3. Test the server and reconfigure the network	3.1. Run the <i>system</i> testing for benchmarking against client specification and requirements according to test plan, and record outcomes 3.2. Analyse the error report and make changes as required 3.3. Test required changes or additions 3.4. Validate changes or additions against specifications
4. Complete	4.1. Make and document server <i>configuration</i> and

ELEMENT	PERFORMANCE CRITERIA
documentation and clean up work site	operational changes 4.2.Tabulate test results and complete all documentations for users 4.3.Complete client report and notify of status of the network 4.4.Clean up and restore worksite to client's satisfaction 4.5.Secure sign-off from appropriate person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports in required formats
- numeracy skills to take test measurements, interpret results and evaluate performance and interoperability of network
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt configuration procedures to requirements of network and reconfigure depending on differing operational contingencies, risk situations and environments
- research skills to interrogate vendor databases and websites to implement different configuration requirements to meet security levels
- technical skills to select and use server diagnostic test, application software and hardware to suit different network applications

#### Required knowledge

- Australian Computer Society Code of Ethics
- common network:
  - cable types and connectors
  - topologies
- compatibility issues and resolution procedures
- desktop applications and operating systems as required
- documentation skills for networks
- enterprise communication/training systems in relation to training and advising staff

**REQUIRED SKILLS AND KNOWLEDGE**

involved in the deployment

- features of:
  - current network operating systems (NOS)
  - current server applications compatibility issues and resolution procedures
- implementation and configuration of servers
- system backup procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse server and network operational issues</li> <li>• apply user applications and relate user needs when configuring a server</li> <li>• create technical and user documentation</li> <li>• install and configure server</li> <li>• test server and reconfigure network</li> <li>• troubleshoot server and network failures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• site where server installation may be conducted</li> <li>• relevant server specifications: <ul style="list-style-type: none"> <li>• cabling</li> <li>• networked (LAN) computers</li> <li>• server diagnostic software</li> <li>• switch</li> <li>• technical requirements for a network</li> <li>• WAN service point of presence</li> <li>• workstations</li> </ul> </li> <li>• relevant regulatory documentation that impacts on installation activities.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate installing or updating network</li> <li>• oral or written questioning of required skills and knowledge</li> <li>• evaluation of report prepared by the candidate outlining testing procedures, test results and recommendation to network changes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

**EVIDENCE GUIDE**

	<p>for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN4198A Install, configure and test an internet protocol network.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## ICTTEN5203A Dimension and design a radio frequency identification system

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to undertake a radio frequency identification (RFID) installation, configuration and testing. This could be part of the upgrade to an existing or the implementation of a new logistical or security network using RFID technology according to design specifications.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Officers in field work who carry out installation, maintenance and upgrade of ICT networks apply the skills and knowledge in this unit to integrate new and converging functionalities to a network. They would be employed by telecommunications and IT networking provisioning companies specialising in RFID technology.</p>
--------------------------------	--

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to dimension and design an RFID system	1.1. Obtain <i>business requirements</i> for the <i>client</i> from an <i>appropriate person</i> for the design of the <i>RFID system</i> 1.2. Research <i>RFID technologies</i> , their functionalities and the different implementations of configurations 1.3. Select suitable software and hardware types to ensure that the proposed system is designed to meet business requirements 1.4. Conduct a survey of available interrogators or readers, tags and wireless units
2. Dimension and design an RFID system	2.1. Select the most appropriate interrogators or readers for the given specification to ensure their compatibility with current network infrastructure if applicable 2.2. Minimise interrogator to interrogator interference 2.3. Verify that antenna geometry and footprint are consistent with the chosen design 2.4. Minimise sources of interference 2.5. Incorporate into the <i>RFID design</i> the use of anti-collision protocols 2.6. Customise appropriate <i>tag to client requirements</i> 2.7. Predict the performance for read distance, write distance and tag response time to confirm that these conform with client requirements 2.8. Select the <i>optimal locations</i> for an RFID tag to be placed on an item 2.9. Prepare a design proposal for the RFID system including <i>specifications</i> 2.10. Prepare a report containing design <i>solutions</i> and recommendations of preferred products, including the justification for recommendations 2.11. Submit report to client for approval
3. Document the specified design	3.1. Complete documentation according to client requirements 3.2. Inform client about standards applying to the design 3.3. Secure sign off of RFID design from appropriate person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports, design solutions and recommendations in required formats
- numeracy skills to interpret technical specifications and evaluate possible design solutions for optimum RFID system
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt configuration procedures to requirements of RFID network
- research skills to interrogate RFID vendor databases and website to implement different configuration requirements to meet client design specifications
- technical skills to:
  - evaluate and select RFID interrogators, readers and wireless units
  - evaluate antenna designs and protocols for design considerations to suit particular RFID system

#### Required knowledge

- business process design
- client business operations, business function and organisation
- compatibility issues with existing system and resolution procedures
- configuration of internet protocol (IP) networks
- customer and business liaison
- desktop applications and operating systems as required
- linkage between operational processes
- network protocols and operating systems
- network topologies
- radio spectrum and RFID frequencies
- RF interference
- RFID architecture
- RFID hardware and software
- RFID technologies incorporating substantial depth in network operating systems, protocols, interrogators and sensors, wireless technologies and cabling standards
- RFID vendor product knowledge
- security protocols, standards and data encryption

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adapt RFID technologies to specified plan and design</li> <li>• evaluate RFID client specifications against accepted industry practices</li> <li>• include RFID architecture across a secure environment</li> <li>• encode RFID tags</li> <li>• attach encoded RFID tags and track the movement of tagged items</li> <li>• integrate RFID information into business applications</li> <li>• produce design information in configuring the network with IP addressing</li> <li>• produce information that can be shared between businesses</li> <li>• make recommendations and offer optimum design solutions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites providing: <ul style="list-style-type: none"> <li>• client functional requirements</li> <li>• RFID equipment specifications</li> <li>• database software</li> <li>• simulation software</li> <li>• organisational guidelines</li> <li>• network or computer layout documentation and premises plans.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate undertaking an RFID installation, configuration and testing</li> <li>• oral or written questioning to assess required knowledge</li> <li>• evaluation of research methodologies and the final</li> </ul>

<b>EVIDENCE GUIDE</b>	
	design proposal prepared by the candidate outlining solutions and recommendations.
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN5204A Produce technical solutions from business specifications.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

<b>RANGE STATEMENT</b>	
<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• application of RFID</li> <li>• business inventory</li> <li>• network or people in the organisation</li> <li>• systems currently in use</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees</li> <li>• logistic company</li> <li>• security organisation</li> <li>• warehouse.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to produce technical solutions from business specifications	1.1. Obtain <i>business requirements</i> and <i>business specifications</i> for the <i>client</i> from <i>appropriate person</i> 1.2. Research and identify the business model of the client 1.3. Determine technical specifications for business 1.4. Clarify and confirm the business <i>problem</i> and key stakeholders' <i>requirements</i> with stakeholders 1.5. Document business objectives and problem and confirm details with appropriate person
2. Evaluate the impact of the technical requirements	2.1. Review and assess business problems, opportunities and objectives 2.2. Determine <i>technical requirements</i> in respect of input and output, interface, process flow or quality requirements 2.3. Analyse <i>hardware, software</i> and <i>network</i> requirements 2.4. Build business platform based on software solutions 2.5. Investigate processes to be changed by the business solution 2.6. Produce an evaluation document on the <i>impact</i> of the technical requirements on the business
3. Produce technical business solutions	3.1. Develop <i>technical solutions</i> in response to problems and business requirements 3.2. Determine costs involved to implement the technical business solution 3.3. Investigate a range of supplier products to determine which one best meets technical requirements 3.4. Produce a report document on the technical solutions addressing the business specifications and recommendations against business requirements
4. Document and validate the agreed solutions	4.1. Forward technical requirements and solution overview to appropriate person for feedback 4.2. Analyse feedback and incorporate change as required 4.3. Document changes and distribute to appropriate person 4.4. Obtain sign off on final business solution

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to interpret technical documentation and write reports, design solutions and recommendations in required formats
- numeracy skills to interpret business requirements and specifications and evaluate possible technical design scenarios for optimum solution
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt varied business procedures to requirements
- research skills to interrogate vendor databases and website to implement different solutions to meet client business specifications
- technical skills to:
  - determine technical specifications
  - evaluate optimum solutions
  - produce technical solutions

#### Required knowledge

- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- customer and business liaison
- desktop applications and operating systems as required
- documenting technical specifications
- linkage between processes
- security protocols, standards and data encryption
- technologies, such as:
  - ICT network topologies
  - network protocols and operating systems
  - radio frequency (RF) networks and principles
  - optical networks and principles
  - mobile cellular networks
  - core networks
  - access networks
  - radio frequency identification (RFID) hardware and software.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adapt technologies to specified technical solutions</li> <li>• use site design software and hardware</li> <li>• evaluate client specifications against accepted industry practices</li> <li>• produce technical solutions from business specifications</li> <li>• produce information that can be shared between businesses</li> <li>• apply design concepts to business solutions</li> <li>• produce technical reports</li> <li>• make recommendations and offer optimum design solutions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• client functional requirements</li> <li>• business specifications</li> <li>• database software</li> <li>• simulation software</li> <li>• organisational guidelines</li> <li>• network/computer layout</li> <li>• site design software and hardware</li> <li>• information on a range of ICT business solutions.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of evaluation document prepared by the candidate outlining the impact of technical requirements on the business</li> <li>• oral or written questioning assessing required knowledge</li> <li>• review of research methodologies and the final proposal prepared by the candidate outlining solutions and recommendations.</li> </ul>

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- ICTTEN5203A Dimension and design a radio frequency identification system
- ICTOPN6128A Design a dense wavelength division multiplexing system.

Aboriginal people and other people from a non-English speaking background may have second language issues.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.

In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.

Where applicable, physical resources should include equipment modified for people with special needs.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• business application</li> <li>• business plan</li> <li>• existing system</li> <li>• mission statement</li> <li>• nature of the business</li> <li>• network or people in the organisation.</li> </ul>
<b><i>Business specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• budget allocation</li> <li>• budget costs estimate</li> <li>• future plan</li> <li>• growth forecast</li> <li>• technical requirements</li> <li>• timeline.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• finance company</li> <li>• health industry</li> <li>• ICT company</li> <li>• individual people</li> <li>• internal departments</li> <li>• internal employees</li> <li>• manufacturing company</li> <li>• service industry.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• ICT network administrator</li> <li>• ICT network manager</li> <li>• ICT support manager</li> <li>• small or medium enterprise (SME) customer</li> <li>• small office home office (SOHO) customer</li> <li>• supervisor.</li> </ul>
<b><i>Problem</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• business need or opportunity that needs to be addressed</li> <li>• network or people in the organisation</li> <li>• system.</li> </ul>
<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsor</li> <li>• user.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Requirements</i> may be in reference to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• database</li> <li>• network</li> <li>• people in the organisation</li> <li>• platform</li> <li>• system.</li> </ul>
<i>Technical requirements</i> may refer to:	<ul style="list-style-type: none"> <li>• bandwidth</li> <li>• hardware problems</li> <li>• network growth</li> <li>• network security</li> <li>• network traffic congestions</li> <li>• new technologies</li> <li>• power usage</li> <li>• software problems</li> <li>• transmission dropouts</li> <li>• upgrades.</li> </ul>
<i>Hardware</i> may include:	<ul style="list-style-type: none"> <li>• cabling networks</li> <li>• internet protocol TV (IPTV)</li> <li>• multimedia</li> <li>• network elements: <ul style="list-style-type: none"> <li>• gateways</li> <li>• local area network (LAN) switches</li> <li>• routers</li> <li>• servers</li> <li>• wireless networks</li> </ul> </li> <li>• optical networks</li> <li>• radio networks</li> <li>• RFID equipment</li> <li>• switching equipment</li> <li>• transmission equipment</li> <li>• voice and data equipment.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• customised software</li> <li>• in-house</li> <li>• packaged.</li> </ul>
<i>Network</i> may include:	<ul style="list-style-type: none"> <li>• broadband</li> <li>• data</li> <li>• ICT networks</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• internet</li> <li>• intranet</li> <li>• media</li> <li>• radio</li> <li>• RFID</li> <li>• security</li> <li>• switching</li> <li>• telecommunications</li> <li>• transmission.</li> </ul>
<i>Impact</i> may refer to:	<ul style="list-style-type: none"> <li>• fewer downtimes</li> <li>• improved efficiency</li> <li>• improved response times</li> <li>• increased return on investment (RoI)</li> <li>• lower operational costs</li> <li>• more 'user friendly' network.</li> </ul>
<i>Technical solutions</i> may include:	<ul style="list-style-type: none"> <li>• audit requirements</li> <li>• changes to: <ul style="list-style-type: none"> <li>• network infrastructure</li> <li>• security or privacy provisions</li> </ul> </li> <li>• e-business or e-commerce solution</li> <li>• hardware upgrades</li> <li>• implementing a new system</li> <li>• inventory management</li> <li>• new hardware</li> <li>• new software</li> <li>• occupational health and safety (OHS) requirements</li> <li>• quality requirements</li> <li>• software upgrades</li> <li>• user training.</li> </ul>

## **ICTTEN5217A Plan a wireless mesh network**

### **Modification History**

Not Applicable

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to plan a wireless mesh network comprised of radio nodes organised in a mesh topology. Wireless mesh networks provide users with secure wireless roaming beyond traditional wireless local area network (LAN) boundaries and are readily deployed in areas that lack wired backhaul.</p> <p>The mesh topology and ad-hoc routing give mesh networks stability, offer redundancy and have the ability to self-form and self-heal. Mesh networks enable local communities and those in remote areas to participate in a distributed shared network without the need for centralised management.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>Technical staff who work with wireless networking equipment or radio communications equipment apply the skills and knowledge in this unit to design a scalable wireless access network using mesh technology for growing communities.</p> <p>This may include planning officers and field officers from private and public organisations.</p>
---------------------------------------	--

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research wireless mesh networks and formulate the system architecture	1.1. Confirm with regulatory spectrum management authority the <i>specific regulations</i> regarding radio characteristics 1.2. Contact customer to determine <i>wireless mesh network</i> design specifications 1.3. Evaluate the use of <i>frequency bands</i> for the operation of the WMN 1.4. Evaluate and select the <i>wireless technology, internet protocol (IP)</i> version and <i>mesh routing protocol</i> to satisfy design criteria 1.5. Specify and source the <i>hardware and software requirements</i>
2. Prepare a detailed plan for the mesh network	2.1. Evaluate the maximum line of sight distances achievable between backbone nodes and between mesh nodes 2.2. Plan the sites where mesh nodes will be located and plot to scale on a map 2.3. Estimate the quantity and length of the links required between mesh nodes to ensure design is within specifications 2.4. Design backbone links in the mesh topology for scalability of future deployments 2.5. Select the location of the internet <i>gateway</i> for the network 2.6. Allocate operating frequencies at mesh nodes, backbone nodes and wireless access points for optimum network performance with minimal interference from adjacent network routers
3. Plan the IP addresses and subnet mask	3.1. Produce an addressing scheme and allocate IP addresses and subnet mask to mesh nodes, backbone nodes and access points 3.2. Produce a configuration scheme to secure the network
4. Document the mesh network	4.1. Document the plans and drawings for the mesh network 4.2. Produce an <i>installation plan</i> for the building of the mesh network 4.3. Following installation, configuration and testing of the mesh network, incorporate 'as built' amendments if appropriate

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analysis skills to evaluate information and make recommendations
- communication skills to liaise with vendors and installation personnel on technical and operational matters
- literacy skills to interpret technical documentation and write reports in required formats
- numeracy skills to perform calculations, interpret results and evaluate different types of technical data
- planning and organisational skills to plan, prioritise and monitor own work and that of others
- problem solving and contingency management skills to adapt testing procedures to requirements of particular situations and modify activities depending on operational contingencies, risk situations and environments
- technical skills to:
  - configure and set up IP addresses and subnet masks
  - install software
  - select and specify appropriate performance tests and test equipment

#### Required knowledge

- antenna gain, polarisation
- cable loss
- calculation of effective isotropic radiated power (EIRP)
- calculation of line of site radio range
- decibels and related units
- IP addressing and subnet masks
- network security and firewalls
- network topologies
- radio frequency (RF) frequency bands
- routing protocols
- transmission control protocol (TCP)-IP protocols
- wireless networking hardware, access points, wireless routers and gateway
- wireless protocols

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate and select wireless technology and mesh routing protocol</li> <li>• plan a wireless mesh network from a project brief</li> <li>• produce an IP addressing scheme</li> <li>• prepare an installation plan.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites where planning a wireless mesh network may be conducted</li> <li>• design criteria and other site related documentation</li> <li>• equipment specifications and technical documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate planning a wireless mesh network</li> <li>• review of plan prepared by the candidate outlining recommendations for the customer</li> <li>• review of IP addressing scheme prepared by the candidate</li> <li>• oral or written questioning to assess knowledge of equipment and technologies as used within the mesh network.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTTEN4050A Install and configure a wireless mesh network</li> <li>• ICTRFN3055A Install a radio communications antenna and feedline.</li> </ul>

**EVIDENCE GUIDE**

	<p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## ICTTEN6172A Design and configure an IP-MPLS network with virtual private network tunnelling

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design an internet protocol-multiprotocol label switching (IP-MPLS) network, examine MPLS data flow and configure virtual private network (VPN) tunnelling.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to technical staff dimensioning an IP-MPLS Core Network for a carrier or an internet service provider (ISP). MPLS and VPNs are used to provide secure, reliable and fast IP services in technology convergence of data, voice and video.</p> <p>Relevant job roles include designer and installer of Next Generation Networks (NGN). These IP networks provide fast internet, voice over internet protocol (VoIP) and internet protocol TV (IPTV) services.</p>
--------------------------------	--

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units		

## Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and design a IP-MPLS network to meet business requirements</p>	<p>1.1. Determine the IP-MPLS <i>network design requirements</i> in consultation with <i>enterprise customer</i></p> <p>1.2. Optimise <i>factors</i> affecting design</p> <p>1.3. Use label stacking to route MPLS packets in the network to build of <i>MPLS services</i></p> <p>1.4. Dimension layer-3 generation of core backbone to allow MPLS IP-VPN to provide <i>MPLS convergence services</i></p> <p>1.5. Use MPLS control plane to set up wavelengths</p> <p>1.6. Produce the design topology of a MPLS <i>network</i> to include the location and types of edge label switch routers (LSR) and core LSRs in agreement with enterprise customer</p>
<p>2. Configure a MPLS network and verify traffic engineering (TE) considerations</p>	<p>2.1. Configure edge and core LSRs to provide secure methods of transporting IP packets in the MPLS network using <i>layer 2 protocols</i></p> <p>2.2. Configure the LSRs to provide toll bypass for convergence of voice and data over the IP network</p> <p>2.3. Classify traffic in MPLS terms and configure the Edge LSR to sort traffic into forward equivalent classes (FECs)</p> <p>2.4. Install and remove the two <i>standardised signalling protocols</i> for managing traffic engineering (TE) of MPLS paths</p> <p>2.5. Configure the MPLS-TE to provide routing on diverse paths to avoid congestion and guarantee bandwidth services</p>
<p>3. Configure a VPN and provide a virtual private LAN service (VPLS)</p>	<p>3.1. Configure a MPLS VPN tunnel for a customer network to provide multipoint-to-multipoint VPN connectivity</p> <p>3.2. Build a content hosting server into a MPLS based VPN to produce a media network</p> <p>3.3. Use virtual private LAN services (VPLS) as a VPN method for wide area network (WAN) multipoint-to-multipoint Ethernet connectivity spanning across multiple metropolitan areas</p> <p>3.4. Produce a VPLS topology using an internet protocol IP-MPLS cloud with provider edge (PE) routers connecting VPLS domains associated with enterprise customer</p>

ELEMENT	PERFORMANCE CRITERIA
4. Complete documentation	4.1. Produce a final design plan including network elements, configuration details and recommendations for design changes 4.2. Notify customer and obtain sign off

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to use complex technical data to develop network designs
- communication skills to consult with customers
- literacy skills to read and write reports
- numeracy skills to use binary systems
- project planning skills to set benchmarks and identify scope
- problem solving skills to solve a range of predictable network problems
- research skills to identify, analyse and evaluate broad features of a particular business domain and best practice in networking technologies including hardware and software to be installed
- technical skills to:
  - deploy multipoint-to-multipoint VPLS domains via IP-MPLS cloud
  - implement and verify routing information protocol (RIP), enhanced interior gateway routing protocol (EIGRP), open shortest path first (OSPF) and border gateway protocol (BGP) operations
  - implement MPLS architecture across a WAN environment
  - implement secure VPN tunnels across the MPLS network

#### Required knowledge

- current industry-accepted hardware and software products
- network operating systems and cabling standards
- networking technologies
- the customer business, domain, function and organisation effect on customer requirements and network equipment
- transmission technologies and protocols

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and design a MPLS network that meets business requirements</li> <li>• configure and test the MPLS network according to specified guidelines</li> <li>• produce appropriate documentation</li> <li>• implement secure VPN tunnelling.</li> </ul>

## ICTTEN6206A Produce an ICT network architecture design

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to compile, and evaluate the business specifications from a client and produce a set of architecture design solutions that will cater for present and future forecast demands.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Officers in field work who to carry out design and implementation of technical solutions of ICT networks apply the skills and knowledge in this unit for a practical solution in network design. They would be employed by telecommunications and IT networking provisioning companies specialising in integrating the converging and emerging technologies of ICT networks.</p>
--------------------------------	---

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to produce ICT architecture design	1.1. Obtain <i>business specifications</i> and <i>business requirements</i> for the <i>client</i> from <i>appropriate person</i> 1.2. Review specifications and requirements to identify the type of <i>ICT network</i> and network specifications required 1.3. Consult with key <i>stakeholders</i> to identify their requirements 1.4. Assess business problems, opportunities and objectives and confirm details with appropriate person
2. Produce the preliminary ICT network architecture design	2.1. Ascertain <i>technical requirements</i> , including <i>hardware</i> , <i>software</i> and <i>network elements</i> according to specifications 2.2. Select software solutions to suit business platform 2.3. Develop preliminary physical network diagrams as a preface to <i>architecture</i> blueprint 2.4. Produce a document on the possible <i>impact</i> of the network design on the business requirements
3. Evaluate preliminary design and likely performance using forecast demands	3.1. Predict forecast traffic demands and the impact on network design from current and future demand requirements 3.2. Benchmark the design using expected <i>performance parameters</i> 3.3. Review the design based on identification of the likely performance profile (best/worst) 3.4. Determine costs involved with a range of supplier products 3.5. Produce an evaluation report on predicted performance and costs of the network architecture design addressing the business specifications and recommendations
4. Finalise network design and obtain approval	4.1. Review the benchmarks and requirements and final design proposed 4.2. Determine the support and training requirements needed 4.3. Obtain the latest technical specifications and pricing by contacting possible vendors 4.4. Document the network design and present <i>documentation</i> to appropriate person for approval 4.5. Obtain sign off on final business solution

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business related matters
- literacy skills to read and interpret technical documentation and write reports, design solutions and recommendations
- numeracy skills to interpret business requirements and specifications and evaluate possible technical design scenarios for optimum solution
- planning and organisational skills to plan, prioritise and monitor own work
- problem solving and contingency management skills to adapt varied business procedures to requirements
- research skills to interrogate vendor databases and websites to implement different solutions to meet client business specifications
- technical skills to:
  - evaluate and make further recommendations for optimum solution
  - produce technical designs

#### Required knowledge

- broad technical knowledge of technologies:
  - Access Networks
  - Core Networks
  - ICT network topologies
  - mobile cellular networks
  - network protocols and operating systems
  - optical networks and principles
  - radio frequency (RF) technologies and principles
  - radio frequency identification (RFID) hardware and software
- business processes
- client business domain, business function and organisation
- compatibility issues and resolution procedures
- configuration of internet protocol (IP) networks
- customer and business liaison
- desktop applications and operating systems
- documenting technical specifications
- linkage between processes

<b>REQUIRED SKILLS AND KNOWLEDGE</b>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adapt technologies to specified technical solutions</li> <li>• use site design software and hardware</li> <li>• evaluate client specifications against accepted industry practices</li> <li>• produce technical designs from business specifications</li> <li>• analyse feedback from client and make adjustment to the proposal</li> <li>• produce information that can be shared between businesses</li> <li>• apply design concepts to business solutions</li> <li>• produce technical reports</li> <li>• make recommendations and offer optimum design solutions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• sites providing: <ul style="list-style-type: none"> <li>• client functional requirements</li> <li>• business specifications</li> <li>• database software</li> <li>• simulation software</li> <li>• organisational guidelines</li> <li>• network or computer layout</li> <li>• site design software and hardware</li> <li>• information on a range of ICT business solutions.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of evaluation report prepared by the candidate on predicted performance and costs of the network architecture design outlining the business specifications and recommendations</li> <li>• oral or written questioning on required knowledge</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>and skills</p> <ul style="list-style-type: none"> <li>evaluation of research methodologies and the final proposal prepared by the candidate outlining solutions and recommendations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>ICTOPN6128A Design a dense wavelength division multiplexing systems</li> <li>ICTRFN6171A Produce and evaluate architecture designs for WiMAX networks</li> <li>ICTTEN6169A Produce and evaluate architecture designs for convergent cellular mobile networks.</li> </ul> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

## Range Statement

### RANGE STATEMENT

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Business specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• budget allocation</li> <li>• budget costs estimate</li> <li>• current system functionality</li> <li>• future plan</li> <li>• growth forecast</li> <li>• technical requirements</li> <li>• timeline</li> <li>• user problem statement.</li> </ul>
<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• business application</li> <li>• business plan</li> <li>• existing system</li> <li>• mission statement</li> <li>• nature of the business</li> <li>• network or people in the organisation.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• ICT company</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees</li> <li>• service industry.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• ICT network administrator</li> <li>• ICT network manager</li> <li>• ICT support manager</li> <li>• small or medium enterprise (SME) customer</li> <li>• small office home office (SOHO) customer</li> <li>• supervisor.</li> </ul>
<b><i>ICT network</i></b> may include:	<ul style="list-style-type: none"> <li>• Access Network</li> <li>• broadband network</li> <li>• Core network</li> <li>• customer network</li> <li>• internet</li> <li>• intranet</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• multimedia</li> <li>• radio</li> <li>• RFID</li> <li>• security</li> <li>• switching</li> <li>• telecommunications</li> <li>• transmission</li> <li>• voice, video and data.</li> </ul>
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsor</li> <li>• user.</li> </ul>
<i>Technical requirements</i> may refer to:	<ul style="list-style-type: none"> <li>• bandwidth</li> <li>• hardware problems</li> <li>• network growth</li> <li>• network security</li> <li>• network traffic congestions</li> <li>• new technologies</li> <li>• power usage</li> <li>• software problems</li> <li>• transmission dropouts</li> <li>• upgrades.</li> </ul>
<i>Hardware</i> may include:	<ul style="list-style-type: none"> <li>• cabling network</li> <li>• cellular phone network</li> <li>• internet protocol TV (IPTV)</li> <li>• IT network elements: <ul style="list-style-type: none"> <li>• gateway</li> <li>• local area network (LAN) switch</li> <li>• router</li> <li>• server</li> <li>• wireless network</li> </ul> </li> <li>• multimedia</li> <li>• optical network</li> <li>• radio network</li> <li>• RFID equipment</li> <li>• switching equipment</li> <li>• transmission equipment</li> <li>• voice and data equipment.</li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• commercial</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• customised software</li> <li>• in-house</li> <li>• network management</li> <li>• operating system</li> <li>• packaged</li> <li>• patches</li> <li>• vendor propriety.</li> </ul>
<i>Network elements</i> may include:	<ul style="list-style-type: none"> <li>• add-drop multiplexer</li> <li>• antenna</li> <li>• base station</li> <li>• dense wavelength division multiplexing (DWDM) unit</li> <li>• encoder</li> <li>• IT network elements: <ul style="list-style-type: none"> <li>• gateway</li> <li>• LAN switch</li> <li>• router</li> <li>• server</li> <li>• wireless network</li> </ul> </li> <li>• laser module</li> <li>• optical unit</li> <li>• protocol analyser</li> <li>• receiver</li> <li>• RF unit</li> <li>• RFID unit</li> <li>• splitter</li> <li>• transmitter.</li> </ul>
<i>Architecture</i> may include but is not limited to:	<ul style="list-style-type: none"> <li>• carrier network architecture: <ul style="list-style-type: none"> <li>• Access</li> <li>• billing</li> <li>• broadband</li> <li>• broadcasting</li> <li>• Core</li> <li>• data</li> <li>• optical</li> <li>• wireless</li> </ul> </li> <li>• configuration: <ul style="list-style-type: none"> <li>• large memory model</li> <li>• requests per second</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• small memory model</li> <li>• database software:               <ul style="list-style-type: none"> <li>• Informix</li> <li>• Ingres, DB2</li> <li>• Microsoft SQL server</li> <li>• mSQL</li> <li>• MySQL</li> <li>• Oracle</li> <li>• SQL server</li> <li>• Sybase</li> </ul> </li> <li>• operating system:               <ul style="list-style-type: none"> <li>• Linux</li> <li>• Mac OS</li> <li>• Novell NetWare</li> <li>• Windows.</li> </ul> </li> </ul>
<i>Impact</i> may refer to:	<ul style="list-style-type: none"> <li>• fewer downtimes</li> <li>• improved efficiency</li> <li>• improved response times</li> <li>• increased return on investment</li> <li>• lower operational costs</li> <li>• more 'user friendly' network.</li> </ul>
<i>Performance parameters</i> may include:	<ul style="list-style-type: none"> <li>• attenuation</li> <li>• bandwidth</li> <li>• bit error rate (BER)</li> <li>• congestion</li> <li>• data security</li> <li>• distortion</li> <li>• dropouts</li> <li>• interference</li> <li>• latency</li> <li>• packet loss</li> <li>• phase jitter</li> <li>• polarisation</li> <li>• quality of service - QoS</li> <li>• transmission data rate.</li> </ul>
<i>Documentation</i> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training and satisfaction reports</li> <li>• costing details</li> <li>• design report</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• evaluation report and recommendations</li> <li>• implementation plan</li> <li>• international standards</li> <li>• International Electrotechnical Commission (IEC)</li> <li>• Institute of Electrical and Electronics Engineers (IEEE) standards</li> <li>• Internet Engineering Task Force (IETF) standards</li> <li>• International Telecommunications Union (ITU) standards</li> <li>• Australian standards</li> <li>• naming standards</li> <li>• version control.</li> </ul>

## ICTTEN8195A Evaluate and apply network security

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit describes the performance outcomes, skills and knowledge required to analyse the security features of an internet protocol (IP) based telecommunications network.</p> <p>This applies to IT networking and telecommunications networking topologies.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.</p>
-------------------------------	---

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>Telecommunication engineers apply the skills and knowledge in this unit to analyse and report on the security of an ICT network, particularly Internet security.</p> <p>They are responsible for the evaluation of security of ICT networks using converging switching and transmission technologies in local area networks (LAN) and wide area networks (WAN), broadband networks, internet protocol TV (IPTV) and virtual networks.</p>
---------------------------------------	--

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the operation of the Internet	1.1. Evaluate the interrelationship of IP to open systems interconnect (OSI) seven layer model and the impact on network topologies and <i>network elements</i> 1.2. Assess media access control (MAC) and IP addressing and their application in security 1.3. Report on transmission control protocol/internet protocol (TCP/IP) operations and the use of <i>transport protocols</i> for transmitting data over the network 1.4. Examine the various types of <i>routing protocols</i> and implication on security 1.5. Analyse forms of <i>label switching</i> as applied to data packets 1.6. Use software to simulate the <i>least cost algorithms</i>
2. Analyse internetwork protocols	2.1. Compare connection-oriented and connection-less networks in internetworking applications 2.2. Research the <i>design parameters</i> used in networks 2.3. Produce a report on IP multi-casting protocols and systems including IP <i>frame fields</i> of the data frames
3. Research and report internetwork operations	3.1. Analyse protocol considerations of voice over internet protocol (VoIP) 3.2. Research the protocols G723.1, G729 and G729A standards and evaluate their application in internetworking 3.3. Determine the format of JPEG and GIF files as applied to still pictures 3.4. Determine the format of MPEG-2 and H.32x series multimedia protocols for motion pictures 3.5. Evaluate the features of different of <i>multi-service protocols</i> and of different <i>email system protocols</i> in networking operations 3.6. Produce a report on the features the different <i>web-based protocols</i> used in internetworking operations
4. Analyse features and types of network security	4.1. Analyse procedures and processes used for security attacks and use of protection mechanisms 4.2. Research conventional <i>encryption algorithms</i> and determine possible locations of encryption devices 4.3. Produce a report on conventional encryption key distribution problems and how message

ELEMENT	PERFORMANCE CRITERIA
	<p>authentication and verification is achieved</p> <p>4.4. Research one-way hashing and secure <i>hashing functions</i></p> <p>4.5. Produce a report on digital signature standard (DSS) principles including <i>public key cryptography algorithms</i> for network security</p>
5. Research features of public key authentication and email network security protocols	<p>5.1. Research public key authentication using Kerberos</p> <p>5.2. Analyse how electronic mail security is achieved using pretty good privacy (PGP)</p> <p>5.3. Research and report on <i>IPSec</i> protocol security</p> <p>5.4. Produce a report on encapsulating security payload (ESP) including Internet <i>key management processes</i></p>
6. Research features of web, network management and system security	<p>6.1. Analyse how web threats and attacks occur in an IP network and determine system intruders and threats</p> <p>6.2. Research the operation of <i>transaction protocols</i></p> <p>6.3. Evaluate the processes used for selection and protection of system passwords</p> <p>6.4. Evaluate <i>system threats</i> and methods used to counteract the threats</p> <p>6.5. Produce a report on anti-virus protection strategies, including firewall design principles, types and configurations</p>
7. Document evaluation report	7.1. Present a final report to include research and evaluation of network security management principles and the application to the network in the workplace with enhancement recommendations

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to evaluate a range of complex technical data
- communication skills to work effectively within a group and present information
- information technology skills to use:
  - software for desktop research

**REQUIRED SKILLS AND KNOWLEDGE**

- statistical data
- word processing software
- literacy skills to prepare reports given a specific format and read and interpret technical standards
- planning and organisational skills to manage own work in specific time frames
- research skills to gather and record data from measurements
- technical skills to:
  - operate test equipment
  - use telecommunications management networks

**Required knowledge**

- administrative network management systems
- algorithms
- cryptography
- encapsulation
- encryption
- enterprise solutions
- firewalls
- network topologies
- operations network management systems
- organisational policy and procedures
- protocols
- routing theory
- system threats
- transaction protocols
- workplace and industry environment

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse the operation of the Internet</li> <li>• implement Internet technology</li> <li>• select Internetwork protocols</li> <li>• research and report various internetwork operations</li> <li>• analyse features and types of network security methods and their weaknesses</li> <li>• analyse features of various cryptography systems</li> <li>• research and report the features of public key authentication and email network security protocols</li> <li>• research and report the features of web, network management and system security.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• a telecommunications operations site with a mentor or supervisor appropriately experienced in relevant telecommunications technology and infrastructure</li> <li>• networked computers and relevant software.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• oral or written questioning to assess required knowledge</li> <li>• direct observation of the candidate carrying out relevant security checks within a networked communication system</li> <li>• review of reports completed by the candidate for different security breached scenarios.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplaces and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• ICTPMG8143A Manage a telecommunications project</li> <li>• ICTPMG8149A Evaluate and use</li> </ul>

**EVIDENCE GUIDE**

	<p>telecommunications management networks.</p> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Network elements* may include:

- bridges
- gateways
- routers
- servers
- switches.

<b>RANGE STATEMENT</b>	
<i>Transport protocols</i> may include:	<ul style="list-style-type: none"> <li>• Ethernet</li> <li>• point-to-point protocol (PPP)</li> <li>• synchronous data link control (SDLC)</li> <li>• synchronous optical network (SONET).</li> </ul>
<i>Routing protocols</i> may include:	<ul style="list-style-type: none"> <li>• adaptive</li> <li>• enhanced interior gateway routing protocol (EIGRP)</li> <li>• fixed</li> <li>• flooding</li> <li>• interior gateway routing protocol (IGRP)</li> <li>• open shortest path first (OSPF)</li> <li>• random</li> <li>• routing information protocol (RIP).</li> </ul>
<i>Label switching</i> may include:	<ul style="list-style-type: none"> <li>• cell switching routers (CSR)</li> <li>• IP</li> <li>• tag.</li> </ul>
<i>Least cost algorithms</i> may include:	<ul style="list-style-type: none"> <li>• Bellman-Ford's</li> <li>• Dijkstra's.</li> </ul>
<i>Design parameters</i> may include:	<ul style="list-style-type: none"> <li>• datagram lifetime</li> <li>• error and flow control techniques</li> <li>• fragmentation</li> <li>• reassembly</li> <li>• routing.</li> </ul>
<i>Frame fields</i> may include:	<ul style="list-style-type: none"> <li>• datagram format</li> <li>• internet control message protocol (ICMP)</li> <li>• IPv6 header and addressing</li> <li>• protocol data unit (PDU).</li> </ul>
<i>Multi-service protocols</i> may include:	<ul style="list-style-type: none"> <li>• border gateway protocol (BGP)</li> <li>• OSPF</li> <li>• resource reservation protocol (RSVP)</li> <li>• real time control protocol (RTCP)</li> <li>• real time protocol (RTP).</li> </ul>
<i>Email system protocols</i> may include:	<ul style="list-style-type: none"> <li>• data transparency: <ul style="list-style-type: none"> <li>• ASCII</li> <li>• binary</li> <li>• EBCDIC</li> <li>• radix64 coding</li> <li>• Unicode</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• multipurpose mail extensions (MIME)</li> <li>• simple mail transfer protocol (SMTP).</li> </ul>
<i>Web-based protocols</i> may include:	<ul style="list-style-type: none"> <li>• common gateway interface (CGI)</li> <li>• file transfer protocol (FTP)</li> <li>• hyper-text mark-up language protocol (HTML)</li> <li>• hyper-text transfer protocol (HTTP)</li> <li>• Java applets and application programmers interface (API).</li> </ul>
<i>Encryption algorithms</i> may include:	<ul style="list-style-type: none"> <li>• Blowfish</li> <li>• Data Encryption Standard (DES)</li> <li>• Feistel Cipher</li> <li>• International Data Encryption Algorithm (IDEA).</li> </ul>
<i>Hashing functions</i> may include:	<ul style="list-style-type: none"> <li>• hash message authentication checksum (HMAC)</li> <li>• Secure Hash (SHA-1).</li> </ul>
<i>Public key cryptography algorithms</i> may include:	<ul style="list-style-type: none"> <li>• Diffie-Hellman key exchange</li> <li>• Rivest Shamir Adleman (RSA).</li> </ul>
<i>IPSec</i> may include:	<ul style="list-style-type: none"> <li>• authentication header</li> <li>• internet protocol (IP) security</li> <li>• transport and tunnel modes of operation.</li> </ul>
<i>Key management processes</i> may include:	<ul style="list-style-type: none"> <li>• internet security association and key management protocol (ISAKMP)</li> <li>• Oakley key determination protocol (OKDP).</li> </ul>
<i>Transaction protocols</i> may include:	<ul style="list-style-type: none"> <li>• secure electronic transaction (SECT)</li> <li>• simple network management protocol (SNMP)</li> <li>• SNMPv1 (community facility and proxies)</li> <li>• SNMPv3 (message processing and the user security model)</li> <li>• secure socket layer (SSL).</li> </ul>
