Set up in-line bottom making machine for
sack or bag manufacture**

Release: 1

Assessment Requirements for ICPCBF398 Set up in-line bottom making machine for sack or bag manufacture

Modification History

| Release | Comments |
|-----------|--|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

Performance Evidence

Evidence of the ability to:

- correctly set up in-line bottom making machines for the manufacture of sacks or bags in accordance with job specifications, performance criteria, and with minimum downtime.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list common faults associated with folder gluer machines, the causes, and methods to correct them
- explain correct set-up procedures to meet work health and safety and enterprise requirements
- explain the procedure for blade setup.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the converting, binding and finishing field of work and include access to scoring, folding, and gluing machinery used in the manufacture of sacks and bags.

Assessors must satisfy NVR/AQTF assessor requirements.
