**Assessment Requirements for ICTTEN405
Install configuration programs on PC based
customer equipment**

Release: 1

Assessment Requirements for ICTTEN405 Install configuration programs on PC based customer equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare software configuration
- load software into customer equipment
- install security programs agreed with customer
- test program and program features including:
 - system facilities
 - product features
 - required peripherals associated with the product
 - system functionality
- notify customer of progress and obtain sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define channel allocations
- outline common operating systems and their impact on the configuration of, or version of software to be installed
- explain internet protocol (IP) addressing
- describe logon procedures
- outline numbering formats
- describe product or service functions to ensure correct operation of completed installation
- explain relevant regulatory and industry requirements.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site for installation of system programs
- equipment currently used in industry
- relevant regulatory and enterprise documentation impacting testing and installation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
