Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the design challenge	1.1. Determine and evaluate <i>user/client needs</i> 1.2. Clarify <i>specifications, parameters and constraints</i> of the design challenge in consultation with relevant stakeholders 1.3. Articulate the essence of the design challenge in an <i>appropriate format</i>
2. Undertake research to inform the design solution	2.1. Source, evaluate and acknowledge <i>information</i> that may assist in responding to the design challenge 2.2. Consider <i>historical, current and future perspectives and trends</i> that might inform design solutions 2.3. Consider relevant <i>social, economic, environmental, ethical and cultural issues</i> that may impact on design solutions 2.4. Analyse, distil and collate information to inform the development of the design solution
3. Communicate and collaborate with others	3.1. Establish and develop working relationships with <i>key stakeholders</i> 3.2. Seek and integrate input and ideas from others during the design process 3.3. Inform key stakeholders about progress of the design and related implications 3.4. Negotiate and agree on any changed requirements or modifications
4. Generate ideas and responses to the design challenge	4.1. Reflect on and integrate ideas generated from research and consultation 4.2. Use a range of <i>creative thinking techniques</i> to generate different options and ideas 4.3. Apply relevant principles of <i>functionality, ergonomics, aesthetics and sustainability</i> to the development of different options
5. Select a design solution	5.1. Develop and use a range of <i>criteria against which to evaluate different options and ideas</i> 5.2. Select a preferred solution against agreed criteria and in consultation with relevant key stakeholders 5.3. Adjust and refine proposed design solution based on research, testing and reflection 5.4. Present proposed design solution with appropriate <i>supporting documentation</i> according to project

ELEMENT	PERFORMANCE CRITERIA
	requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise, consult and negotiate with others on potentially complex issues
- creative, critical thinking and problem-solving skills to generate a range of ideas and solutions to a particular design challenge
- research skills to interpret and develop a wide range of visual and written information sources
- planning and organisational skills to collate information, and to coordinate liaison and consultation with others during the design process.

Required knowledge

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant context
- elements and principles of design and their application in the relevant design context
- features of the wider industry, economic, social and historical context in which design solutions are being generated
- other designs and the work of other design practitioners in the relevant context
- sources of information that support the development of technical and other knowledge
- technical knowledge of the area for which design solutions are being generated - in terms of materials, tools, equipment, techniques and industry processes and procedures.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of a design solution through research, reflection and the generation and refinement of ideas • effective collaboration with others in the design process • knowledge of design trends and technologies in the relevant industry context.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • interaction with others to reflect the collaborative nature of the design process • access to sources of information on design in the relevant industry context.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of a design solution generated by the candidate against an original brief, set of criteria or guiding objectives • evaluation of the process used to reach a design solution in terms of research and ideas generation/refinement • oral or written questioning to assess knowledge of technical and context issues that impact on design in a given industry context.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p> <p>Combined assessment with the following unit is appropriate:</p> <ul style="list-style-type: none"> • BSBCRT301A Develop and extend critical and

EVIDENCE GUIDE	
	creative thinking skills.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>User/client needs</i> may be:	<ul style="list-style-type: none"> • expressed in a brief: <ul style="list-style-type: none"> • diagrammatic • verbal • visual • written • expressed in other documentation such as research papers or workplace plans • informally articulated • in need of further research
<i>Specifications, parameters and constraints</i> may relate to:	<ul style="list-style-type: none"> • audience • budgeting and financing • cost of production • medium • purpose • technical issues • timeframes
<i>Appropriate format</i> may include:	<ul style="list-style-type: none"> • drawings or sketches - manual or computer aided design and drafting (CADD) • electronic presentation • verbal presentation • written notes with rationale or description
<i>Information</i> may include:	<ul style="list-style-type: none"> • codes of practice • contractual obligations • historical data • industry standards • legal requirements • specialist information • technological trends and developments
<i>Historical, current and future perspectives and trends</i> may relate to:	<ul style="list-style-type: none"> • industry context • materials • social or ethical issues • sustainability

RANGE STATEMENT	
	<ul style="list-style-type: none"> • technologies
<i>Social, economic, ethical and cultural issues</i> may include:	<ul style="list-style-type: none"> • availability of materials, tools or equipment • budgetary issues • community impact • cost of production • customer relationships • government policies • sponsorship opportunities • triple bottom line (people, planet, profit) • workforce relationships
<i>Environmental issues</i> may include:	<ul style="list-style-type: none"> • conservation of resources • energy efficiency • environmental consciousness/green design • recycling • use of renewable resources • waste/by products/emissions
<i>Key stakeholders</i> may include:	<ul style="list-style-type: none"> • client • employer • end user • peers • supervisor • technical experts • work colleagues
<i>Creative thinking techniques</i> may include:	<ul style="list-style-type: none"> • brainstorming: <ul style="list-style-type: none"> • bulletin board • buzz session • computer-aided • sequencing • stop and go • daydreaming and mental wandering • Edward de Bono's six thinking hats • ego alter or heroes • graphic organisers: <ul style="list-style-type: none"> • concept fans • visual maps • webbing • lateral thinking games • making associations • mind mapping

RANGE STATEMENT	
	<ul style="list-style-type: none"> • morphological analysis • storytelling • sub-culture surfing • trigger words • use of metaphors and analogies • vision circles • visualisation • wishful thinking • word salads
<i>Functionality, ergonomics, aesthetics and sustainability</i> may be related to:	<ul style="list-style-type: none"> • end use and users • production processes
<i>Criteria against which to evaluate different options and ideas</i> may relate to:	<ul style="list-style-type: none"> • access to resources - physical, human or financial • aesthetic appeal • consistency with original brief • desired level of originality and innovation • ease of manufacture or further development • environmental sustainability • ethical issues • health and safety requirements • impact upon client and community • industry standards and practice • legal issues • level of risk • personal affinity with medium and materials • technological considerations
<i>Supporting documentation</i> may include:	<ul style="list-style-type: none"> • drawings or plans • illustrations • material samples • models • photographs • specifications for production

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Acquire and develop technical skills	1.1. Plan <i>strategies</i> to ensure the development of appropriate <i>technical skills</i> in design practice 1.2. Plan and use opportunities to develop and assess technical skills 1.3. Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills 1.4. Develop and extend technical skills through <i>testing capabilities</i> of materials, tools and equipment 1.5. Identify and use <i>relevant media</i> to stimulate technical and professional development
2. Develop conceptual skills and ideas	2.1. Engage in ongoing experimentation and exploration of different ideas and techniques 2.2. Discuss ideas with others and apply knowledge gained to inform own work 2.3. Use work practice to gain experience in a range of genres and interpretations 2.4. Study the work of others to stimulate conceptual and technical skills development 2.5. Research and share ideas across a range of design disciplines 2.6. Identify and use a range of <i>opportunities to develop own skills</i> and keep informed about current design practice
3. Develop own voice	3.1. Explore and experiment with new ideas in making and/or interpreting design work 3.2. Explore and use technology, where appropriate, to develop <i>own voice</i> and expand practice 3.3. Demonstrate own voice through design project realisation
4. Evaluate own work	4.1. Seek and apply constructive criticism from others to improve own work 4.2. Evaluate own work against planned strategy for own practice 4.3. Evaluate own work in the context of work by others in order to extend own practice 4.4. Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes

ELEMENT	PERFORMANCE CRITERIA
5. Research work opportunities	5.1. Correctly identify <i>sources of information</i> relating to work opportunities for designers 5.2. Identify <i>networks</i> and <i>promotional opportunities</i> for designers which may be helpful in developing career opportunities 5.3. Incorporate research results and information into own work and career planning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss potentially complex ideas and concepts with others and to engage in critical discourse about own work
- creative thinking skills to explore and generate new ideas for design work
- comprehension skills to interpret and communicate a wide range of potentially complex information about design concepts and technologies
- problem-solving skills to explore and develop strategies and solutions to new design challenges and opportunities
- self-management skills to take pro-active responsibility for own professional development.

Required knowledge

- current and emerging copyright, moral rights and intellectual property issues and legislation, and their impact on designers
- current and emerging designers in the relevant design discipline
- current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- professional development information and resources available to designers
- sources of information relating to work opportunities and career planning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of own voice through exploring and experimenting with new ideas in making and/or interpreting work • application of planned strategies to develop appropriate skills in design practice • use of discussion and evaluation opportunities to inform and develop technical and conceptual skills.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to the materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of candidate diary or log detailing the ways in which different experiences and opportunities have been used to develop and extend skills • evaluation of bodies of work that demonstrate the progressive development of skills • evaluation of a presentation by the candidate addressing the ways in which a pro-active approach to skills development has been taken.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Strategies for developing self as a designer may include:

- being involved in a range of relevant design activities
- communicating with peers
- experimenting
- participating in professional development and other learning opportunities
- participating in relevant groups or associations
- practising
- undertaking training courses
- working effectively with supervisor
- working with a mentor or coach

Technical skills may include skills in:

- animation
- digital/electronic design
- entertainment design
- fashion/clothing/accessories design
- furnishings
- furniture design
- graphic design
- illustration/technical drawing
- interior design
- jewellery design
- object design
- photoimaging
- tableware design
- other design disciplines

Testing capabilities refers to:

- experimenting with innovative applications
- extending the possibilities of materials, tools and equipment towards their full potential

Relevant media may include:

- catalogues
- journals
- magazines

Opportunities to develop own

- competitions

RANGE STATEMENT	
<i>skills</i> may include participation in and/or attendance at, some of the following:	<ul style="list-style-type: none"> • exhibitions • floor talks at galleries • laboratories • lectures, seminars, conferences, symposiums • manufacturing sites • master classes • professional organisations • trade fairs, expositions
Developing <i>own voice</i> includes:	<ul style="list-style-type: none"> • analysing and researching the work of others relevant to selected area of specialisation • analysing conventions, practices and customs in design practice • developing repertoire and knowledge • exploring elements and principles of design
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> • design journals • employer listings • exhibition catalogues and programs • job advertisements • websites • word of mouth
<i>Networks</i> may include:	<ul style="list-style-type: none"> • alumni organisations • colleagues and teachers • consumer organisations • professional associations
<i>Promotional opportunities</i> may include:	<ul style="list-style-type: none"> • applications to funding bodies • competitions • demonstrations • exhibitions • performances • trade fairs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish design requirements	1.1. Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client 1.2. Identify and source information and references relevant to the design project 1.3. Undertake critical analysis of sources and extract key information to inform the design project 1.4. Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project 1.5. Pro-actively seek, review and act upon information needed to inform constructive communication with client 1.6. Build trust and respect between self and client through effective use of communication skills and demonstration of professional integrity
2. Develop and refine design brief	2.1. Develop concepts and ideas for inclusion in design brief that take account of overall objectives and parameters 2.2. Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs 2.3. Present ideas in an appropriate format/medium and seek feedback from key stakeholders 2.4. Use effective communication techniques to generate discussion, debate and critical analysis 2.5. Re-evaluate and refine options based on own analysis and discourse with others 2.6. Establish and agree on final nature and scope of design brief with client and accurately document details
3. Negotiate terms and conditions	3.1. Negotiate and agree terms and conditions of the brief in accordance with relevant organisational and professional standards 3.2. Clarify, agree and document roles and responsibilities of those involved in the project 3.3. Confirm agreements in writing in accordance with organisational requirements 3.4. Identify the need for and seek specialist advice in developing, formal agreements or contracts where

ELEMENT	PERFORMANCE CRITERIA
	appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, presentation and negotiation skills to work with clients to establish and refine design briefs
- creative thinking skills to generate and develop concepts and ideas for the design brief, including responses to situations where parameters may be quite broad and open or very restrictive
- literacy skills to research and evaluate a wide range of source materials for the development of ideas and concepts
- numeracy skills to develop realistic costings for realisation of design concept
- planning and organisational skills to guide and coordinate the process of negotiating and finalising a design brief
- problem-solving skills to pro-actively identify and develop effective solutions to complex challenges of a varied and unpredictable nature
- self-management skills to take responsibility for driving and guiding the brief negotiation process.

Required knowledge

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant work context
- legal issues that affect negotiations and contracts in the relevant work context
- scope, nature and potential variations within design briefs relevant to a specific context
- sources of information that inform the development of design concepts within a specific industry context.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • practical demonstration of skills through the development and finalisation of at least two design briefs for a specific industry purpose • effective collaboration and communication skills to work with others to develop and refine a design brief • knowledge of the design process within the specific industry context/design discipline.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate equipment and media to communicate and present ideas and concepts • access to sources of information relevant to the industry context • interaction with and involvement of others to reflect the collaborative nature of the work, and the communication and negotiation skills required.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of a design brief in which the candidate has played a significant development role • evaluation of reports prepared by the candidate detailing the processes undertaken for establishing and refining the design brief, including challenges faced and lessons learned for the future • observation of discussions and negotiations with client and other stakeholders • oral or written questioning to assess knowledge of the process and issues surrounding legislation, industry context, sources of information • evaluation of candidate response to different

EVIDENCE GUIDE	
	scenarios to assess ability to adapt approach to different client requirements and contexts.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none">• any specialised design unit.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Relevant stakeholders</i> in addition to the client may include:</p>	<ul style="list-style-type: none"> • authorities such as local council for outdoor event design • creative specialists • other designers • others involved in the project • production teams • technical specialists • venue managers
<p><i>Information and references relevant to the design project</i> may include:</p>	<ul style="list-style-type: none"> • environment • financial information • legislative and regulatory requirements • music and/or film/video • oral history • organisational information • photographs and other artworks • project team members • promotional material • technical reports/data • texts and other written references • work of other designers/artists
<p><i>Critical analysis</i> may involve:</p>	<ul style="list-style-type: none"> • considering how ideas may be adapted • considering how ideas may be challenged • drawing links between references and potential designs • evaluating work of other designers • making judgements about potential ideas in relation to the budget and available resources • making judgements about relevance of information and ideas
<p><i>Overall objectives and parameters</i> may relate to:</p>	<ul style="list-style-type: none"> • audience • availability of materials, tools, equipment and human resources • budget constraints

RANGE STATEMENT	
	<ul style="list-style-type: none"> • conflicting competing demands • environmental sustainability • organisational vision • presentation venue/context • sponsorship • timeframe • triple bottom line (people, planet, profit)
<i>Appropriate format/medium</i> for presentation of ideas may include:	<ul style="list-style-type: none"> • checklists • digital presentation • drawings • electronic presentations • graphic formats • models • paintings • photographs • plans • prototypes • verbal description/oral presentation • video • visual diagrams
<i>Terms and conditions</i> may relate to:	<ul style="list-style-type: none"> • conceptual parameters • contracts • deliverables • legal and financial issues such as processes to be used • ownership and copyright • reporting • technical requirements • time lines
<i>Organisational and professional standards</i> may include:	<ul style="list-style-type: none"> • industry-accepted fee schedules • industry standards for written agreements • requirements for written agreements
<i>Organisational requirements</i> for confirming agreements may include:	<ul style="list-style-type: none"> • approval and ongoing communication processes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan realisation of the design	1.1. Collect, analyse and maintain relevant information on the design 1.2. Discuss and agree on standards of work and monitoring requirements with appropriate stakeholders 1.3. Develop clear plan and schedule for design realisation, including key roles and responsibilities linked to time lines and budget
2. Implement and monitor realisation of the design	2.1. Organise and/or allocate resources to achieve the realisation of design within required standards, timeframes and budget 2.2. Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources 2.3. Maintain accurate, relevant and complete documentation in accordance with agreed standards 2.4. Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work 2.5. Promptly identify difficulties or problems that arise in relation to realisation of the design and take action to rectify the situation
3. Liaise and negotiate with stakeholders	3.1. Establish and maintain appropriate communication channels with relevant stakeholders 3.2. Pro-actively seek and provide information to facilitate effective design realisation 3.3. Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances 3.4. Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome
4. Complete design process	4.1. Finalise design outcomes in accordance with terms and conditions 4.2. Seek feedback from key stakeholders on finished design and make final adjustments as agreed 4.3. Evaluate completed design in relation to own work and overall process, to inform future practice

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and negotiation skills to lead and participate in effective client/principal, stakeholder and project team liaison during design realisation
- creative thinking skills to generate new or adapted ideas in response to realisation challenges
- literacy skills to research and evaluate a wide range of source materials on design and to complete relevant design documentation
- numeracy skills to manage budgets
- planning and organisational skills to coordinate and lead potentially complex processes involving a range of interrelated factors and challenges
- problem-solving and decision making skills to develop and implement solutions to unpredictable problems.

Required knowledge

- copyright, moral rights, intellectual property issues and legislation that impact on design work in the relevant industry context at a managerial level
- occupational health and safety requirements relevant to the particular work context/design discipline
- production/realisation processes as they apply to designs in a particular industry context or design discipline including materials, tools, equipment and processes
- quality assurance for design concept realisation applicable to the specific industry context/design discipline.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • planning and implementation of design realisation so that finished product or service meets the requirements of design brief • effective communication and negotiation skills in relation to working with others for design realisation • knowledge of the design process in the specific industry context/design discipline.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to resources, tools, materials and equipment for realisation of a design in specific context • access to a design concept that the candidate can take to realisation stage • interaction with and involvement of others to reflect the collaborative nature of the unit and the communication and negotiation skills required.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of finished products or services where the candidate has managed the realisation process • evaluation of progress reports or completion reports prepared by the candidate • evaluation of candidate reports on the realisation process highlighting different management techniques used, challenges in the process and how these were addressed.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Relevant information on the design</i> may include:</p>	<ul style="list-style-type: none"> • artwork • brief • checklists • financial data • models • production data • prototypes • specifications • technical data • visual diagrams • working drawings
<p><i>Standards of work and monitoring requirements</i> may relate to:</p>	<ul style="list-style-type: none"> • budget targets • creative issues • legal issues • reporting requirements • technical quality • timeframes
<p><i>Appropriate stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • client • community • others on whom the design will impact, for example technical or production personnel • others working on the design realisation process • supervisor/manager
<p><i>Resources</i> may include:</p>	<ul style="list-style-type: none"> • financial • human • physical
<p><i>Documentation</i> to be maintained may include:</p>	<ul style="list-style-type: none"> • digital records and presentations • financial reports • models • photographs • progress reports

RANGE STATEMENT	
	<ul style="list-style-type: none"> • prototypes • records of work • working drawings
<i>Difficulties or problems</i> may relate to:	<ul style="list-style-type: none"> • budgetary overruns • conceptual issues • legal issues • scheduling problems • technical quality
<i>Communication channels</i> may include:	<ul style="list-style-type: none"> • electronic updates • inspections • project meetings • telephone discussions

Co-requisite units

Co-requisite units		

BSBDES602A Research global design trends

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to research and critically evaluate global design trends.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Often the individual would be a designer, but the unit may also be relevant to those who work in related management, marketing and production areas.</p> <p>The unit focuses on research and analysis of information and ideas at a complex level, plus the evaluation and extension of one's own professional skills.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research design trends	1.1. Analyse and select <i>formal and informal research strategies</i> to source <i>information on global design trends</i> 1.2. Identify and explore <i>new and alternative sources</i> 1.3. Evaluate the credibility of information gathered and ensure research scope is sufficiently broad
2. Analyse design trends to inform own practice	2.1. Use information to challenge and extend own perspectives and ways of thinking 2.2. Examine and assess the implications and consequences of design trends on own work 2.3. Use <i>critical analysis</i> to identify creative or commercial opportunities presented by emerging trends and technologies 2.4. Develop systems to identify and respond to future opportunities
3. Develop and articulate positions and ideas	3.1. Develop <i>substantiated positions and ideas</i> in relation to global design trends 3.2. Generate informed discussion, debate and critical analysis with peers and colleagues 3.3. Use debate and feedback as a way of challenging and refining own positions
4. Extend own design skills	4.1. Pro-actively identify and use opportunities presented by research to extend own design skills 4.2. Re-evaluate and refine approaches to work in the context of current and emerging trends 4.3. Use practice, discussion and ongoing evaluation to continuously improve skills

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to articulate and debate conceptual or technical ideas
- critical thinking skills to distil and synthesise information from varied sources and to develop own positions and ideas on a complex range of issues
- literacy skills to research complex, varied and unfamiliar information sources
- planning and organisational skills to undertake the research process.

Required knowledge

- broad global design trends that apply to all design disciplines
- business implications/consequences of adopting trends and emergent technologies
- copyright/moral/intellectual property issues associated with research and with design more broadly
- design industry networks and professional development opportunities - local, national and international
- research methodologies and options
- sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- specific current and emerging design technologies and trends (at a global level) in at least one area of design.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> conducting research on a complex range of design issues, trends and ideas analysing, critiquing and synthesising complex sources to develop own positions and ideas design research knowledge of copyright/moral/intellectual property issues associated with research and with design more broadly.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> use of a current and varied range of familiar and unfamiliar information sources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of research undertaken by the candidate in terms of scope, depth and the level of critical thinking applied direct observation of candidate debating issues arising from research into global design trends oral or written questioning to assess knowledge of global design trends in terms of depth and complexity.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Formal and informal research strategies</i> may include:</p>	<ul style="list-style-type: none"> • formal study • participating actively in relevant industry associations • participating in, and contributing to, discussion through conferences, meetings, seminars, courses and journals • participating in professional development and other learning opportunities • reading current literature, including specialist journals and industry magazines • web research
<p><i>Information on global design trends</i> may relate to:</p>	<ul style="list-style-type: none"> • best practice examples • emerging and future technology • history • philosophy • role of design in the broader social, economic and political environment • sustainability
<p><i>New and alternative sources</i> may include:</p>	<ul style="list-style-type: none"> • inspirations from nature • work from other areas of community or business activity for example: <ul style="list-style-type: none"> • artists • authors • business people • entertainers • film makers • historians • philosophers • photographers • scientists
<p><i>Critical analysis</i> may include:</p>	<ul style="list-style-type: none"> • analysing and evaluating actions and policies • clarifying issues, values and standards

RANGE STATEMENT	
	<ul style="list-style-type: none"> • comparing analogous situations • comparing and contrasting ideals with practice • comparing and evaluating beliefs, interpretations and theories • developing criteria for evaluation • distinguishing relevant from irrelevant facts • examining and evaluating assumptions • exploring implications and consequences • generating and assessing solutions • making interdisciplinary connections • making plausible inferences and predictions • noting significant similarities and differences • reading and listening critically
<i>Substantiated positions and ideas</i> may be those which are:	<ul style="list-style-type: none"> • grounded in appropriate research • result of rational and logical thought • subjected to the analysis of others • supported by relevant information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain daily financial records	1.1. Correctly maintain daily financial records and in accordance with <i>organisational requirements</i> for accounting purposes 1.2. Identify and rectify or refer <i>discrepancies</i> or errors in <i>documentation</i> or transactions to <i>designated persons</i> in accordance with organisational requirements 1.3. Accurately credit and debit transactions and promptly enter into <i>journals</i> in accordance with organisational requirements
2. Maintain general ledger	2.1. Maintain general ledger in accordance with organisational requirements 2.2. Post <i>transactions</i> into general ledger in accordance with organisational reporting requirements 2.3. <i>Reconcile systems for accounts payable and receivable</i> with general ledger 2.4. Accurately prepare trial balance from general ledger in accordance with organisational requirements
3. Monitor cash control	3.1. Ensure cash flow is accurately accounted for in accordance with organisational requirements 3.2. Make and receive <i>payments</i> in accordance with organisational requirements 3.3. Collect or follow-up outstanding accounts within designated time lines 3.4. Check payment documentation for accuracy of information and despatch to creditors within <i>designated time line</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify financial information; to read and understand the organisation's accounting procedures; and to edit and proofread documents to ensure conformity and consistency of information
- communication skills to clarify information and to refer errors or discrepancies to appropriate people
- numeracy skills to read and interpret financial data and to prepare cash analysis sheets
- problem-solving skills to reconcile figures.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - financial legislation
 - occupational health and safety (OHS)
- organisational policies and procedures relating to maintaining financial records
- definition of credits/creditors and debits/debtors
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • identifying and responding to discrepancies and errors • transferring and recording financial data accurately • reconciling expenditures and revenue • knowledge of organisational policies and procedures relating to maintaining financial records.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of source documents relating to financial record keeping.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of identification and rectification or referral of discrepancies or errors in documentation or transactions • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of financial record keeping • examples of financial documentation.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • general administration units • other financial administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • designated time lines • guidelines for reconciling journals • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • procedures for totalling adjusted journals • quality assurance and/or procedures manuals • resolution procedures • security procedures
<i>Discrepancies</i> may relate to:	<ul style="list-style-type: none"> • bank charges • dishonoured cheques • errors in transposing between source documents and journals • interest
<i>Documentation</i> may include:	<ul style="list-style-type: none"> • purchase credit notes • purchase invoices • sales credit notes • sales invoices
<i>Designated persons</i> may include:	<ul style="list-style-type: none"> • bank • line management • organisation's authorisations department • statutory body • supervisor
<i>Journals</i> may include:	<ul style="list-style-type: none"> • cash payments • cash receipts • purchases and purchase returns • sales and sales returns
<i>Transactions</i> may include:	<ul style="list-style-type: none"> • commencing business entries • correction of posting errors • interest expense • interest receivable • non-cash transactions (e.g. writing-off

RANGE STATEMENT	
	depreciation, stock losses) <ul style="list-style-type: none"> • purchase of a fixed asset on credit • sale of a fixed asset on credit • withdrawal of stock/assets by owner • write-off a bad debt
<i>Reconciling systems for accounts payable and receivable</i> may include:	<ul style="list-style-type: none"> • checking accuracy of creditor account balances (e.g. cash payments journal, purchases journal, purchases returns journal, general journal) • checking accuracy of debtor account balances (e.g. cash receipts journal, sales return journal, general journal) • checking cash payments and receipt journals against bank statement • checking the total of the creditor's schedule equals the balance of the creditor's control account • checking the total of the debtor's schedule equals the balance of the debtor's control account
<i>Payments</i> may include:	<ul style="list-style-type: none"> • cash • cheque • credit card • direct debit
<i>Designated time lines</i> may include:	<ul style="list-style-type: none"> • by month end • monthly • within agreed period • within organisational deadline

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to continuous improvement systems and processes	<p>1.1. Actively encourage and support team members to participate in decision making processes and to assume responsibility and exercise initiative</p> <p>1.2. <i>Communicate</i> the organisation's <i>continuous improvement processes</i> to individuals and teams</p> <p>1.3. Effectively utilise <i>mentoring and coaching</i> to ensure that individuals/teams are able to support the organisation's continuous improvement processes</p>
2. Monitor and report on specified outcomes	<p>2.1. Utilise the organisation's <i>systems</i> and <i>technology</i> to monitor team progress and to identify ways in which planning and operations could be improved</p> <p>2.2. Apply continuous improvement techniques and processes to improve <i>customer service</i></p>
3. Support opportunities for further improvement	<p>3.1. Communicate <i>agreed recommendations</i> for improvements in achieving the business plan to team members</p> <p>3.2. Document and use work performance to identify opportunities for further improvement</p> <p>3.3. Maintain records, reports and recommendations for improvement within the organisation's systems and processes</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- functional literacy skills to access and use workplace information
- research, analysis, interpretation and reporting skills
- monitoring and evaluation skills
- communication skills to:
 - gain the commitment of individuals and teams to continuous improvement
 - deal with people openly and fairly
 - use consultation skills effectively
- skills to consolidate opportunities for improvement
- coaching and mentoring skills to provide support to colleagues

Required knowledge

- legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- principles and techniques of:
 - continuous improvement systems and processes
 - benchmarking
 - best practice
- benefits of continuous improvement
- quality approaches which the organisation may implement
- methods that can be used in continuous improvement
- barriers to continuous improvement
- recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • examples of actions taken by the candidate to support continuous improvement including: • use of work performance to identify improvement • adjusted plans to reflect changes • effective communication to all stakeholders • use of technology to monitor operational progress • application of suitable recordkeeping processes.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access by the learner and trainer to appropriate documentation and resources normally used in the workplace • that this unit is assessed in the workplace or in a closely simulated work environment.
Method of assessment	<p>A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • Review of records supporting the organisation's continuous improvement systems and processes, such as: <ul style="list-style-type: none"> • contributions to organisational policies and procedures • contributions to procedures and policies for dealing with continuous improvement processes, and related codes of conduct • actions taken to address information collection, retrieval and use in the workplace • actions taken to address issues and problems within work team • actions taken to address methods of reporting

EVIDENCE GUIDE	
	<p>information</p> <ul style="list-style-type: none"> • learning and development plans for team members • materials developed for coaching, mentoring and training • induction programs developed and/or delivered • actions taken to address internal and external information management issues • reviews of people management • advice and input into management decisions related to continuous improvement • records of people management lessons learned.
Guidance information for assessment	<p>This unit should be assessed with other frontline management units taken as part of this qualification, as applicable to the candidate's leadership role in a work team, and as part of a holistic assessment activity.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation, codes and national standards relevant to the workplace may include:	<ul style="list-style-type: none"> • award and enterprise agreements and relevant industrial instruments • relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination • relevant industry codes of practice.
<i>OHS considerations</i> may include:	<ul style="list-style-type: none"> • provision of information about OHS legislative requirements and guidelines, and the organisation's OHS policies, procedures and programs • participation in the regular update of OHS systems and procedures • implementation of the continuous improvement processes of the OHS management system • changes to work practices, procedures and the working environment which impact on OHS • organisation's responsibilities to customers and suppliers.
Methods used to <i>communicate</i> with individuals and team may include:	<ul style="list-style-type: none"> • verbal, written or electronic communications • on-the-job mentoring and coaching.
<i>Continuous improvement processes</i> may include:	<ul style="list-style-type: none"> • policies and procedures which allow an organisation to systematically review and improve the quality of its products, services and procedures • cyclical audits and reviews of workplace, team and individual performance • seeking and considering feedback from a range of stakeholders • modifications and improvements to systems,

RANGE STATEMENT	
	<p>processes, services and products</p> <ul style="list-style-type: none"> • evaluations and monitoring of effectiveness.
<i>Mentoring and coaching</i> may refer to:	<ul style="list-style-type: none"> • teaching another member of the team, usually focusing on a specific work task or skill • providing feedback, support and encouragement on a range of matters • providing assistance with problem solving.
<i>Systems</i> may include:	<ul style="list-style-type: none"> • organisation policies and procedures • web based communication devices • attendance at forums, meetings • newsletters and reports.
<i>Technology</i> may include:	<ul style="list-style-type: none"> • computerised systems and software such as databases, project management and word-processing • telecommunications devices • any other technology used to carry out work roles and responsibilities.
<i>Customer service</i> may be:	<ul style="list-style-type: none"> • internal or external, to existing or new clients • identifying needs and priorities in delivering a service to customers • understanding of different levels of customer satisfaction.
<i>Agreed recommendations</i> may be:	<ul style="list-style-type: none"> • identified improvements arising from the continuous improvement process • determined in accordance with organisational policies and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain information relevant to business issues	1.1. Review staff and customer feedback and business performance data 1.2. Identify, define and analyse business problems and issues 1.3. Identify information required to reach a decision on problems/issues 1.4. Source and gather reliable information 1.5. Test information for reliability and validity, and reject where contradictory or ambiguous 1.6. Utilise formal and informal networks to access corporate knowledge/memory not held in formal systems and review appropriately
2. Analyse information and knowledge	2.1. Ensure objectives for analyses are clear, relevant and consistent with the decisions required 2.2. Identify patterns and emerging trends correctly and interpret as to cause and effect 2.3. Utilise <i>statistical analyses</i> and interpretation where appropriate 2.4. Undertake <i>sensitivity analysis</i> on any proposed options 2.5. Ensure documentation reflects a logical approach to the evaluation of the evidence and conclusions drawn 2.6. Adjust <i>management information systems/decision support systems</i> to meet information processing objectives
3. Take decisions on business issues identified	3.1. Ensure sufficient valid and reliable information/evidence is available to support a decision 3.2. Utilise <i>risk management</i> plans to determine acceptable courses of action 3.3. Utilise appropriate <i>quantitative methods</i> to assist decision making 3.4. Consult specialists and other <i>relevant groups and individuals</i> 3.5. Ensure decisions taken are within the delegation/accountability of the group/individual responsible 3.6. Make decisions in accordance with organisational guidelines and procedures

ELEMENT	PERFORMANCE CRITERIA
	3.7.Ensure decisions taken are consistent with organisational objectives, values and standards 3.8.Ensure decisions are taken in a timely manner
4. Disseminate information to the organisation	4.1.Ensure advice/information needs are documented and are specific to location, format and time line requirements 4.2.Document information and update databases regularly 4.3.Design and test systems to meet information requirements of decision makers 4.4.Ensure information is up-to-date, accurate, relevant and sufficient for the recipient 4.5.Develop <i>communication plans</i> and disseminate information 4.6.Adhere to confidentiality/privacy policies in the transmission/release of information/advice 4.7.Review and update communication plans regularly 4.8.Utilise <i>technology</i> which provides optimum efficiency and quality 4.9.Maintain <i>corporate knowledge</i> and ensure security

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify improvement opportunities in relation to the services/products delivered internally or concepts/ideas in area of expertise
- communication and consultation skills to ensure all relevant groups and individuals are advised of what is occurring and are provided with an opportunity for input
- quantitative and qualitative research skills to locate and review relevant data and information
- technology skills to consider various software and hardware options for storing and accessing data and information.

Required knowledge

- new technologies and their suitability to knowledge and information management
- risk management.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> documentation which tracks a particular problem/issue through information gathering and analysis, decision making and taking, and dissemination to relevant groups and individuals development and utilisation of relevant information storage and retrieval systems, as well as accessing informal knowledge and information from informal networks within the organisation knowledge of new technologies and their suitability to knowledge and information management.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written reports on knowledge management and information management direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate oral or written questioning to assess knowledge of information management systems review of documentation identifying, defining and analysing business problems and issues evaluation of communication plans evaluation of the transmission/release of information/advice in terms of adhering to confidentiality/privacy policies.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other units from the Advanced Diploma of

EVIDENCE GUIDE	
	Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Statistical analyses</i> may include:	<ul style="list-style-type: none"> • correlation calculations • long-term trend analyses • probability assessment • regulation analyses • short to medium-term trend analyses
<i>Sensitivity analyses</i> means:	<ul style="list-style-type: none"> • applying 'what if' scenarios to available options
<i>Management information systems</i> means:	<ul style="list-style-type: none"> • formal systems for collecting, storing and synthesising information to be used in management decision making
<i>Decision support systems</i> are:	<ul style="list-style-type: none"> • management information systems which include some form of computer-based assistance to decision making (expert systems)
<i>Risk management</i> means:	<ul style="list-style-type: none"> • process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood or consequences of the negative event if it occurs
<i>Quantitative methods</i> may include:	<ul style="list-style-type: none"> • dynamic programming • linear programming • queuing theory • simulation • transportation methodology
<i>Relevant groups and individuals</i> means:	<ul style="list-style-type: none"> • those personnel who have knowledge about the issue being dealt with and the expertise to assist the decision making process
<i>Research</i> may include:	<ul style="list-style-type: none"> • focus groups • group interviews • individual interviews • surveys
<i>Communication plans</i> means:	<ul style="list-style-type: none"> • structured program for the dissemination of information and the receipt of feedback information from individuals relevant to the process or activity

RANGE STATEMENT	
<i>Technology</i> may include:	<ul style="list-style-type: none"> • audio-visual media • internet • intranet • print media • radio • telephone • television
<i>Corporate knowledge</i> may include:	<ul style="list-style-type: none"> • copyright • intellectual property • technology

Co-requisite units		

BSBINN201A Contribute to workplace innovation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to make a pro active and positive contribution to workplace innovation.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to individuals working in any industry or community context, in both small and large organisations. They take a pro active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, the nature of this process requires the application of discretion, judgement and effective interpersonal skills.</p> <p>The unit assumes that there is wider organisational and management support for innovation and for individuals at all levels to contribute to the innovation process.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify opportunities to do things better	1.1. Be aware of <i>own role</i> in workplace innovation 1.2. Pro-actively identify <i>opportunities for improvement</i> in own area of work 1.3. Gather and review <i>information which may be relevant to ideas</i> and which might assist in gaining support for ideas
2. Discuss and develop ideas with others	2.1. Identify <i>people who could provide input</i> into ideas for improvements 2.2. Select the <i>best way of approaching people</i> to begin sharing ideas 2.3. Seek <i>feedback</i> on improvement of ideas, and discuss and develop <i>options and possible variations</i> 2.4. Review and select ideas for follow-up based on feedback and further review
3. Address the practicalities of change	3.1. Take action to implement <i>routine changes</i> in consultation with others and within scope of own responsibility 3.2. Identify and articulate <i>issues and practical processes</i> for implementing proposed ideas 3.3. Present ideas and practical suggestions to the appropriate people about how improvements could be made

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise with other team members, to discuss a range of ideas and to be open to different opinions
- comprehension skills to review and interpret information from a wide range of sources
- organisational skills to articulate practical processes and actions for change
- problem-solving skills to identify and anticipate problems at a practical operational level and to develop possible solutions.

Required knowledge

- role and impact of innovation in the workplace at a practical operational level and the 'bigger picture' for innovation in the relevant work or community context
- role of individuals in suggesting and making improvements and the importance of pro-active involvement
- positive impacts and the challenges of change and innovation
- types of changes that can occur as a result of effective individual participation
- typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- ways in which improvements and change can be suggested to maximise likelihood of support.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • generation of practical ideas in response to a specific workplace situation • effective and open interaction with others to discuss and develop ideas • knowledge and understanding of the role of individuals in contributing to workplace innovation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • interaction with others to reflect the collaborative nature of the improvement/innovation process.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of the candidate participating in brainstorming, discussions and other collaborative activities to develop ideas • evaluation of candidate's ability to generate ideas to address a range of practical operational situations • evaluation of feedback from other people involved in the collaborative process about the candidate's communication approaches and abilities • oral or written questioning to assess knowledge of the role of innovation, the role of individuals in the innovation process and the types of techniques that can be used.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Own role</i> may relate to:</p>	<ul style="list-style-type: none"> • current organisational practice in relation to new ideas • knowledge of ways to suggest new ideas • scope of individual discretion and freedom in relation to new ideas • who needs to be involved in the process
<p><i>Opportunities for improvement</i> may relate to:</p>	<ul style="list-style-type: none"> • changes in the physical work environment • different storage or maintenance procedures • different ways of communicating within the team • introduction of new technology • job role changes • new customer base • new work practices or services • staffing changes • work processes and procedures
<p><i>Information which may be relevant to ideas</i> may include:</p>	<ul style="list-style-type: none"> • examples of similar approaches in other contexts or organisations • media articles about similar ideas • notes about how the idea could improve efficiency or service levels • pricing information
<p><i>People who could provide input</i> may include those who might:</p>	<ul style="list-style-type: none"> • challenge and test the ideas • have supervisory or management responsibility • promote the ideas to others • provide technical knowledge • resource the ideas going forward • review any budgetary implications • work in the same area
<p><i>Best way of approaching people</i> may be influenced by:</p>	<ul style="list-style-type: none"> • degree of formality required • location of people (e.g. may not be on-site) • need for any supporting documentation

RANGE STATEMENT	
	<ul style="list-style-type: none"> time pressures and priorities
<i>Feedback</i> could be gained in a range of ways and may include:	<ul style="list-style-type: none"> asking questions talking to colleagues or supervisors using brainstorming techniques using 'what if' scenarios
<i>Options and possible variations</i> development may occur by:	<ul style="list-style-type: none"> considering resources needed considering time required taking on board ideas from other people thinking through all aspects of the ideas whole new concepts that come out of discussions
<i>Routine changes</i> may include:	<ul style="list-style-type: none"> adjustments to work practices with minimal impact on others or within a small team changes that do not require management approvals changes that have the support of management and for which authority is given for immediate action to be taken
<i>Issues and practical processes</i> may relate to:	<ul style="list-style-type: none"> any approvals required cost of implementation internal politics need for a planned communication approach (internal or external) personalities and philosophies of others in the workplace relationship of the idea to organisation priorities

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Start computer, system information and features	1.1. Adjust workspace, furniture and equipment to suit user <i>ergonomic requirements</i> 1.2. Ensure <i>work organisation</i> meets organisational and <i>occupational health and safety (OHS) requirements</i> for computer operation 1.3. Start computer or log on according to user procedures 1.4. Identify basic functions and features using system information 1.5. Customise desktop configuration, if necessary, with assistance from appropriate persons 1.6. Use help functions as required
2. Navigate and manipulate desktop environment	2.1. Open, close and access features by selecting correct <i>desktop icons</i> 2.2. Open, resize and close desktop windows by using correct window functions and roles 2.3. Create shortcuts from the desktop, if necessary, with assistance from appropriate persons
3. Organise files using basic directory and folder structures	3.1. Create folders/subfolders with suitable names 3.2. Save files with suitable names in appropriate folders 3.3. Rename and move folders/subfolders and files as required 3.4. Identify folder/subfolder and <i>file attributes</i> 3.5. Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6. Save folders/subfolders and files to <i>appropriate media</i> where necessary 3.7. Search for folders/subfolders and files using appropriate software tools 3.8. Restore deleted folder/subfolders and files as necessary
4. Print information	4.1. Print information from installed printer 4.2. View progress of print jobs and delete as required 4.3. Change default printer if installed and required
5. Shut down computer	5.1. Close all open applications 5.2. Shut-down computer according to user procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements, to comprehend basic workplace documents, to interpret basic user manuals and to proofread simple documents
- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions and to receive feedback
- problem-solving skills to solve routine problems in the workplace, while under direct supervision
- technology skills to use equipment safely while under direction, basic keyboard and mouse skills and procedures relating to logging on and accessing a computer
- basic typing techniques and strategies.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - OHS
- basic ergonomics of computer use
- main types and parts of computers, and basic features of different operating systems
- suitable file naming conventions.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • navigation and manipulation of the desktop environment within the range of assigned workplace tasks • knowledge of organisational requirements for simple documents and filing conventions • application of simple keyboard functions to produce documents with a degree of speed and accuracy relevant to the level of responsibility required.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of workplace documentation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • demonstration of techniques • oral or written questioning to assess knowledge of computer operations and functions • review of shortcuts created • review of folders/subfolders created.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBITU102A Develop keyboard skills • other general administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Ergonomic requirements</i> may include:	<ul style="list-style-type: none"> • avoiding radiation from computer screens • chair height, seat and back adjustment • document holder • footrest • keyboard and mouse position • lighting • noise minimisation • posture • screen position • workstation height and layout
<i>Work organisation</i> may include:	<ul style="list-style-type: none"> • exercise breaks • mix of repetitive and other activities • rest periods • visual display unit (VDU) eye testing
<i>Occupational health and safety requirements</i> may include:	<ul style="list-style-type: none"> • OHS guidelines related to the use of the screen equipment, computing equipment and peripherals, ergonomic work stations, security procedures, customisation requirements • statutory requirements
<i>Desktop icons</i> include:	<ul style="list-style-type: none"> • directories/folders • files • network devices • recycle bin and waste basket
<i>File attributes</i> include:	<ul style="list-style-type: none"> • dates • size
<i>Appropriate media</i> may include:	<ul style="list-style-type: none"> • CDs • diskettes • local hard drive • other locations on a network • USB/ Flash/Thumb drives • zip disks

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and prepare resources	1.1. Select and use appropriate <i>technology</i> and <i>software</i> applications to produce required <i>business documents</i> 1.2. Select layout and style of publication according to information and <i>organisational requirements</i> 1.3. Ensure document design is consistent with company and/or client requirements, using basic design principles 1.4. Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1. Identify, open and generate files and records according to task and organisational requirements 2.2. Design document to ensure efficient entry of information and to maximise the presentation and appearance of information 2.3. Use a range of <i>functions</i> to ensure consistency of design and layout 2.4. Operate <i>input devices</i> within designated requirements
3. Produce document	3.1. Complete document production within designated time lines according to organisational requirements 3.2. Check document produced to ensure it meets task requirements for style and layout 3.3. Store document appropriately and save document to avoid loss of data 3.4. Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1. Proofread document for readability, accuracy and consistency in language, style and layout prior to final output 4.2. Make any modifications to document to meet requirements 4.3. <i>Name</i> and <i>store</i> document in accordance with organisational requirements and exit the application without data/loss damage 4.4. Print and present document according to requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding and computer skills to complete a range of formatting and layout tasks
- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread documents to ensure clarity of meaning and conformity to organisational requirements
- numeracy skills to access and retrieve data
- problem-solving skills to determine document design and production processes.

Required knowledge

- appropriate technology for production requirements
- functions and features of contemporary computer applications
- organisational policies, plans and procedures
- organisational requirements for document design e.g. style guide.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> designing and producing a minimum of 3 completed business documents, using at least 2 software applications in the production of each document using appropriate data storage options knowledge of the functions and features of contemporary computer applications.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to an actual workplace or simulated environment access to office equipment and resources access to examples of style guides and organisational procedures.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate review of final printed documents demonstration of techniques observation of presentations oral or written questioning to assess knowledge of software applications.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> general administration units other IT use units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Technology may include:

- computers
- photocopiers
- printers
- scanners

Software may include:

- accounting packages
- database packages
- presentation packages
- spreadsheet packages
- word processing packages

Business documents may include:

- accounts statements
- client databases
- newsletters
- project reviews
- proposals
- reports
- web pages

Organisational requirements may include:

- budgets
- correctly identifying and opening files
- legal and organisational policies, guidelines and requirements
- locating data
- log-on procedures
- manufacturers' guidelines
- occupational health and safety policies, procedures and programs
- quality assurance and/or procedures manuals
- saving and closing files
- security
- storing data

Functions may include:

- alternating headers and footers
- editing
- merging documents

RANGE STATEMENT	
	<ul style="list-style-type: none"> • spell checking • table formatting • using columns • using styles
<i>Input devices</i> may include:	<ul style="list-style-type: none"> • keyboard • mouse • numerical key pad • scanner
<i>Naming</i> documents may include:	<ul style="list-style-type: none"> • appropriate file type • authorised access • file names according to organisational procedure e.g. numbers rather than names • file names which are easily identifiable in relation to the content • file/directory names which identify the operator, author, section, date etc. • filing locations • organisational policy for backing up files • organisational policy for filing hard copies of documents • security
<i>Storing</i> documents may include:	<ul style="list-style-type: none"> • storage in directories and sub-directories • storage on CD-ROMs, disk drives or back-up systems • storing/filing hard copies of computer generated documents • storing/filing hard copies of incoming and outgoing facsimiles • storing/filing incoming and outgoing correspondence

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement operational plan	<p>1.1. Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers</p> <p>1.2. Implement operational plans to contribute to the achievement of organisation's performance/business plan</p> <p>1.3. Identify and use key performance indicators (KPIs) to monitor operational performance</p> <p>1.4. Undertake contingency planning and consultation processes</p> <p>1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1. Recruit and induct employees within organisation's policies, practices and procedures</p> <p>2.2. Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel</p>
3. Monitor operational performance	<p>3.1. Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets</p> <p>3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5. Present recommendations for variation to operational plans to the designated persons/groups and gain approval</p> <p>3.6. Implement systems, procedures and records associated with performance in accordance with organisation's requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
 - contingency planning
 - methods for monitoring and reporting on performance
 - monitoring and implementing operations and procedures
 - problem identification and methods of resolution
 - relevant budgeting and financial analysis, interpretation and reporting requirements
 - resource management systems at the tactical implementation level
 - resource planning and acquisition
 - tactical risk analysis including identification and reporting requirements.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required knowledge of principles and techniques associated with monitoring and implementing operations and procedures.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate review of documentation outlining contingency planning and consultation processes undertaken demonstration of techniques in managing performance evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Resource requirements</i> may refer to:</p>	<ul style="list-style-type: none"> • goods and services to be purchased and ordered • human, physical and financial resources - both current and projected • stock requirements and requisitions
<p><i>Relevant personnel, colleagues and specialist resource managers</i> may include:</p>	<ul style="list-style-type: none"> • colleagues and specialist resource managers • managers • occupational health and safety committees and other people with specialist responsibilities • other employees • people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities • supervisors
<p><i>Operational plans</i> may refer to:</p>	<ul style="list-style-type: none"> • organisational plans • tactical plans developed by the department or section to detail product and service performance
<p><i>Key performance indicators</i> may refer to:</p>	<ul style="list-style-type: none"> • measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements
<p><i>Contingency planning</i> may refer to:</p>	<ul style="list-style-type: none"> • contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour

RANGE STATEMENT	
	<ul style="list-style-type: none"> costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
<i>Consultation processes</i> may refer to:	<ul style="list-style-type: none"> • mechanisms used to provide feedback to the work team in relation to outcomes of consultation • meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans
<i>Organisation's policies, practices and procedures</i> may include:	<ul style="list-style-type: none"> • organisational culture • Standard Operating Procedures • organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • undocumented practices in line with organisational operations
<i>Performance systems and processes</i> may refer to:	<ul style="list-style-type: none"> • informal systems used by frontline managers for the work team in the place of existing organisation-wide systems • formal processes within the organisation to measure performance, such as: <ul style="list-style-type: none"> • feedback arrangements • individual and teamwork plans • KPIs • specified work outcomes
<i>Designated persons/groups</i> may include:	<ul style="list-style-type: none"> • other affected work groups or teams and groups designated in workplace policies and procedures • those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers
<i>Systems, procedures and records</i>	<ul style="list-style-type: none"> • databases and other recording mechanisms for ensuring records are kept in accordance with

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate organisational mission and goals	1.1. Clarify objectives, values and standards in accordance with organisation's strategic direction 1.2. Establish linkages between organisational objectives, values and standards and the responsibilities of relevant groups and individuals 1.3. Ensure media and language used is appropriate to individuals and group circumstances 1.4. State clear expectations of internal groups and individuals and explain in a manner which builds commitment to the organisation 1.5. Address <i>expectations of the organisation</i> 1.6. Investigate <i>incidents</i> promptly and communicate results clearly to relevant groups and individuals
2. Influence groups and individuals	2.1. Build trust, confidence and respect of diverse groups and individuals, through positive role modelling, and effective communication and consultation 2.2. Embrace, resource and effectively implement improvements to organisational and workplace culture 2.3. Demonstrate understanding of the global environment and new technology in work activities 2.4. Ensure actions convey flexibility and adaptability to change and accessibility 2.5. Ensure consultation and participation in decision making occurs with relevant groups and individuals where appropriate 2.6. Ensure decision making takes into account needs and expectations of both internal and external groups 2.7. Ensure decision making occurs in accordance with <i>risk management</i> plans for all options, and within appropriate timeframes 2.8. Ensure that the organisation is represented positively in the media and community
3. Build and support teams	3.1. Assign <i>accountabilities and responsibilities</i> to teams consistent with their competencies and operational plans 3.2. Ensure teams are resourced to allow them to achieve their objectives

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Empower teams and individuals through effective delegation and support for their initiatives</p> <p>3.4. Create and maintain <i>a positive work environment</i></p> <p>3.5. Encourage teams and individuals to develop innovative approaches to the performance of work</p>
4. Demonstrate personal and professional competence	<p>4.1. Model ethical conduct in all areas of work and encourage others to adopt business ethics</p> <p>4.2. Adapt appropriate interpersonal and leadership styles to meet particular circumstances and situations</p> <p>4.3. Set and achieve personal objectives and work program outcomes</p> <p>4.4. Ensure self performance and professional competence is continuously improved through engagement in a range of professional development activities</p> <p>4.5. Participate regularly in industry/professional networks and groups</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to communicate and inspire trust and confidence of others and to ensure their cooperation and support
- networking skills to ensure support from key groups and individuals for concepts/ideas/products/services
- risk management skills to analyse, identify and develop mitigation strategies for identified risks.

Required knowledge

- business ethics and their application
- leadership styles and their application
- legislation, codes and by-laws relevant to the organisation's operations
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- organisational change processes.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • input from a wide range of sources providing evidence in respect to a broad range of activities and application of business ethics • demonstration of personal competence that links to the organisation's requirements for managers • effective communication skills and an ability to win commitment to the organisation and its activities • knowledge of leadership styles and their application • knowledge of legislation, codes and by-laws relevant to the organisation's operations.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated leadership techniques • observation of presentations • review of media and language used when communicating with individuals and groups • evaluation of accountabilities and responsibilities assigned to teams • review of documentation outlining personal objectives and work program outcomes • review of professional development activities undertaken to improve self performance and professional competence.
Guidance information for	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

Co-requisite units

Co-requisite units	

BSBMGT608B Manage innovation and continuous improvement

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to people who have managerial responsibilities which include building a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

Links may be made between continuous improvement and formal quality systems such as International Standardization for Organization (ISO) or quality software. However it is not assumed that formal quality systems or software are in the workplace.

Innovation is seen as an important attitude and set of practices which should be fostered by people working at this level in teams and across the organisation.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review programs, systems and processes	1.1. Establish strategies to monitor and evaluate performance of key systems and processes 1.2. Undertake detailed analyses of supply chains , operational and product/service delivery systems 1.3. Identify performance measures, and assessment tools and techniques, and evaluate their effectiveness 1.4. Analyse performance reports and variance from plans for all key result areas of the organisation 1.5. Identify and analyse changing trends and opportunities relevant to the organisation 1.6. Seek advice from specialists , where appropriate, to identify technology and electronic commerce opportunities
2. Develop options for continuous improvement	2.1. Brief groups on performance improvement strategies and innovation as an essential element of competition 2.2. Foster creative climate and organisational learning through the promotion of interaction within and between work groups 2.3. Encourage, test and recognise new ideas and entrepreneurial behaviour where successful 2.4. Accept failure of an idea during trialling, and recognise, celebrate and embed success into systems 2.5. Undertake risk management and cost benefit analyses for each option/idea approved for trial 2.6. Approve innovations through agreed organisational processes
3. Implement innovative processes	3.1. Promote continuous improvement as an essential part of doing business 3.2. Address impact of change and consequences for people, and implement transition plans 3.3. Ensure objectives, timeframes, measures and communication plans are in place to manage implementation

	<p>3.4. Implement <i>contingency plans</i> in the event of non-performance</p> <p>3.5. Follow-up failure by prompt investigation and analysis of causes</p> <p>3.6. Manage emerging challenges and opportunities effectively</p> <p>3.7. Evaluate continuous improvement systems and processes regularly</p> <p>3.8. Communicate costs and benefits of innovations and improvements to all relevant groups and individuals</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify improvement opportunities in relation to the services/products delivered or concepts/ideas developed
- flexibility and creativity skills to think laterally
- leadership skills to foster a commitment to quality and an openness to innovation.

Required knowledge

- quality management and continuous improvement theories
- creativity/innovation theories/concepts
- risk management.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • documentation of consultation processes to introduce or evaluate an existing continuous improvement process or system, including suggested actions or an action plan • generation of an idea or concept which exhibits creative thinking and which offers the possibility of advantaging the organisation • how the concept or idea was introduced, tested and evaluated - the idea or concept does not have to have been shown to work or to be adopted by the business • knowledge of quality management and continuous improvement theories.
<p>Context of and specific resources for assessment</p>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
<p>Method of assessment</p>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • assessment of written reports • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of creativity/innovation theories/concepts • evaluation of strategies established to monitor and evaluate performance of key systems and processes • review of briefing of groups on performance improvement strategies and innovation

	<ul style="list-style-type: none">• review of documentation communicating costs and benefits of innovations and improvements to relevant groups and individuals.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none">• other units from the Advanced Diploma of Management.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Supply chains</i> includes:</p>	<ul style="list-style-type: none"> • network of facilities that procures raw materials, transforms them into intermediate products (or services) and then finished goods (or services), and delivers them through a distribution system • procurement, production and distribution, which are viewed as being interlinked not as discrete elements
<p><i>Performance reports</i> may include:</p>	<ul style="list-style-type: none"> • budget/cost variance • customer service • environmental • financial • occupational health and safety • quality • other operating parameters
<p><i>Specialists</i> refers to:</p>	<ul style="list-style-type: none"> • those people inside and outside the organisation who are expert in the application of technology to process systems and procedures, relevant to the organisation's business
<p><i>Creative climate</i> means:</p>	<ul style="list-style-type: none"> • climate of high motivation with extensive expertise, and deliberative and lateral thinking time to think through and test out ideas
<p><i>Organisational learning</i> refers to:</p>	<ul style="list-style-type: none"> • extent to which groups and individuals within an organisation are given the opportunity to learn from each other and encouraged to share their learning
<p><i>Risk management</i> means:</p>	<ul style="list-style-type: none"> • process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood of the negative event occurring and/or the consequences in the event it does occur
<p><i>Cost benefit analyses</i> means:</p>	<ul style="list-style-type: none"> • calculation to determine whether the results/outcomes of a particular course of action are sufficient to justify the costs and risks in taking that action

<i>Continuous improvement</i> means:	<ul style="list-style-type: none">consistently reviewing what we do in search of a better way and improving the organisation in every aspect of its activities
<i>Transition plan</i> means:	<ul style="list-style-type: none">process of communication and education to help people through major change programs which impact on the way they do their work or them personally
<i>Contingency plan</i> means:	<ul style="list-style-type: none">plan which will deal with the uncertainty of a proposal and will come into operation in the event of a failure or non-conformance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan promotional activities	1.1. Identify and assess <i>promotional activities</i> to ensure compatibility with <i>organisational requirements</i> 1.2. Plan and schedule promotional activities according to the marketing needs of the organisation 1.3. Determine overall promotional objectives in consultation with <i>designated individuals and groups</i> 1.4. Ensure that time lines and costs for promotion of activities are realistic and consistent with budget resources 1.5. Develop action plans to provide details of products and services being promoted
2. Coordinate promotional activities	2.1. Ensure <i>personnel and resources</i> to support promotional activities are identified and prepared to facilitate the achievement of promotional goals 2.2. Identify and agree <i>roles and responsibilities</i> for delivery of promotional services and allocate to relevant personnel 2.3. Establish and conduct relationships with targeted groups in a manner which enhances the positive image of the organisation 2.4. Use <i>networks</i> to assist in the implementation of promotional activities
3. Review and report on promotional activities	3.1. Analyse audience feedback and data to determine the impact of the promotional activity on the delivery of products and services 3.2. Assess effectiveness of planning processes to identify possible improvements in future activities 3.3. Collect <i>feedback</i> and provide to personnel and agencies involved in promotional activity 3.4. Analyse costs and time lines to evaluate the benefits accruing from the promotional activities 3.5. Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of promotional activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read a variety of texts; to prepare general information and papers; and to write formal and informal letters according to target audience
- technology skills to select and use technology appropriate to a task
- problem-solving skills to manage contingencies in promotional activities
- numeracy skills to analyse data and to compare time lines and promotional costs against budgets.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - occupational health and safety (OHS)
- planning processes for organising promotional activities
- organisational marketing plan and associated budgets.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • designing and delivering promotional presentations • evaluating promotional impacts • presenting and advocating promotional strategies within the organisation • assessing and reporting on customer satisfaction
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of products/services and promotional strategies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of action plans developed for products and services being promoted • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • assessment of written reports.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other marketing, sales or public relations units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Promotional activities</i> may include:</p>	<ul style="list-style-type: none"> • advertisements • client functions • employee functions • media announcements • product launches • web pages
<p><i>Organisational requirements</i> may include:</p>	<ul style="list-style-type: none"> • access and equity principles and practices • confidentiality and security requirements • defined resource parameters • ethical standards • filing and documentation storage processes • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • payment and delivery options • pricing and discount policies • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals • replacement and refund policy and procedures • who is responsible for products or services
<p><i>Designated individuals and groups</i> may include:</p>	<ul style="list-style-type: none"> • colleagues • committees • customers • external organisations • line management • supervisor
<p><i>Personnel and resources</i> may include:</p>	<ul style="list-style-type: none"> • management • marketing funds • organisational personnel • promotional products

RANGE STATEMENT	
	<ul style="list-style-type: none"> • samples • technology • time • venue
<i>Roles and responsibilities</i> may include:	<ul style="list-style-type: none"> • Code of Conduct • job description and employment arrangements • marketing plans • organisation's policy relevant to work role • skills, training and competencies • supervision and accountability requirements including OHS • team structures
<i>Networks</i> may include:	<ul style="list-style-type: none"> • company • customer • internal • media and promotional • professional • social
<i>Feedback</i> may include:	<ul style="list-style-type: none"> • customer/client response • employee data • sales orders • market share data • focus groups

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify marketing opportunities	1.1. Analyse <i>information on market and business needs</i> to identify <i>marketing</i> opportunities 1.2. Research potential <i>new markets</i> and assess opportunities to enter, shape or influence the market in terms of likely <i>contribution to the business</i> 1.3. Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities
2. Investigate marketing opportunities	2.1. Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities 2.2. <i>Evaluate</i> each opportunity to determine its impact on current business and customer base 2.3. Use an assessment of <i>external factors</i> , costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity 2.4. Determine probable return on investment and potential competitors 2.5. Describe and rank marketing opportunities in terms of their viability and likely contribution to the business
3. Evaluate required changes to current operations	3.1. Identify and document changes needed to current operations to take advantage of viable marketing opportunities 3.2. Ensure organisational changes to service an increased or different customer base include provision for continued quality of service to existing customers 3.3. Estimate <i>resource requirements</i> for changed operations 3.4. Determine and communicate viability of making changes to current operations to <i>key stakeholders</i> 3.5. Document newly identified marketing opportunities and required changes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to identify and interpret market information, to write in a range of styles for different audiences and to document outcomes and requirements
- numeracy skills to calculate and evaluate financial information on new marketing options
- research and evaluation skills to gain information on and interpret market trends to identify marketing opportunities.

Required knowledge

- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
 - anti-discrimination legislation and the principles of equal opportunity, equity and diversity
 - ethical principles
 - marketing codes of practice and conduct such as the Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice; Free TV Australia Commercial Television Industry Code of Practice; and the Australian E-commerce Best Practice Model
 - privacy laws
 - Trade Practices Act
- organisational marketing plan, structure, products and services
- principles of marketing and the marketing mix
- statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify strategic direction	<p>1.1. Confirm organisation's mission, vision, purpose and values from current organisational materials or from owners, directors or senior management</p> <p>1.2. Analyse <i>strategic organisational documents</i> to identify organisational directions and targets</p> <p>1.3. Complete a <i>situational analysis</i> that identifies factors impacting on the direction and performance of the business</p> <p>1.4. Identify <i>legal and ethical requirements</i> for the organisation</p> <p>1.5. Document and confirm the strategic direction of the organisation with owners, directors or senior management, and identify its impact on marketing activities</p>
2. Review marketing performance	<p>2.1. Evaluate the effectiveness of previous marketing and positioning strategies to identify lessons learned</p> <p>2.2. Analyse current key products or services and major markets for strengths, weaknesses, opportunities and threats</p> <p>2.3. Evaluate previous marketing opportunities captured by the organisation, and examine and document their profitability</p> <p>2.4. <i>Evaluate marketing performance</i> against previous objectives, targets to identify critical success factors, and areas for improvement</p>
3. Scope marketing opportunities	<p>3.1. Identify and analyse marketing opportunities in terms of their viability and likely contribution to the business</p> <p>3.2. Use an assessment of external factors, costs, benefits, risks and opportunities to determine the scope of each marketing opportunity</p> <p>3.3. Analyse opportunities in terms of their likely fit with organisational goals and capabilities</p> <p>3.4. Evaluate each opportunity to determine its likely impact on current business and customer base</p>
4. Formulate marketing objectives	<p>4.1. Develop objectives in consultation with <i>key internal stakeholders</i> that are attainable and measurable, and that identify the nature and extent of what is to be achieved</p> <p>4.2. Ensure objectives are consistent with the forecast</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>needs of the business and the market</p> <p>4.3. Ensure objectives are compatible with the organisation's projected capabilities, resources and financial position</p> <p>4.4. Ensure objectives are compatible with the organisation's direction and purpose, and meet legal and ethical requirements</p> <p>4.5. Formulate long term strategic objectives and related key performance indicators by product or service, market segment and overall</p> <p>4.6. Develop a risk management strategy to identify risks and manage contingencies, and to ensure that marketing objectives are met in accordance with overall organisational requirements</p> <p>4.7. Document marketing objectives</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to question, clarify and report
- information management skills to extract relevant details when conducting strategic analysis
- literacy skills to write in a range of styles for different audiences, and to interpret legal requirements and strategic organisational documents
- numeracy skills to analyse marketing performance data.

Required knowledge

- financial management techniques
- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
 - Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice
 - Australian E-commerce Best Practice Model
 - Australian Government Policy Framework for Consumer Protection in Electronic Commerce
 - confidentiality requirements
 - copyright laws
 - defamation laws
 - Free TV Australia Commercial Television Industry Code of Practice
 - anti-discrimination legislation and principles of equal opportunity, equity, and diversity
 - privacy laws
 - sweepstakes regulations
 - Trade Practices Act
- organisational structure, policies, procedures, products or services and overall strategic plans
- principles and concepts of marketing and evaluation methodologies
- strategic, operational and tactical analysis techniques.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise marketing strategies	<p>1.1. Evaluate marketing opportunity options that address organisational objectives, and evaluate their risks and returns in the selection process</p> <p>1.2. Develop marketing strategies that address strengths and opportunities within the organisation's projected capabilities and resources</p> <p>1.3. Develop strategies which increase resources or organisational expertise where gaps exist between current capability and marketing objectives</p> <p>1.4. Develop feasible marketing strategies and communicate reasons that justifies their selection</p> <p>1.5. Ensure strategies align with organisation's strategic direction</p> <p>1.6. Develop a marketing performance review strategy, incorporating appropriate marketing metrics to review of organisational performance against marketing objectives</p>
2. Plan marketing tactics	<p>2.1. Detail tactics to implement each marketing strategy in terms of scheduling, costing, accountabilities and persons responsible</p> <p>2.2. Identify coordination and monitoring mechanisms for scheduled activities</p> <p>2.3. Ensure tactics are achievable within organisation's projected capabilities and budget</p> <p>2.4. Ensure tactics meet legal and ethical requirements</p> <p>2.5. Ensure tactics provide for ongoing review of performance against objectives and budgets, and allow marketing targets to be adjusted if necessary</p>
3. Prepare and present a marketing plan	<p>3.1. Ensure marketing plan meets organisational, as well as marketing, objectives and incorporates marketing approaches and a strategic marketing mix</p> <p>3.2. Ensure marketing plan contains a rationale for objectives and information that supports the choice of strategies and tactics</p> <p>3.3. Present marketing plan for approval in the required format and timeframe</p> <p>3.4. Adjust marketing plan in response to feedback from key stakeholders and disseminate for implementation within the required timeframe</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of colleagues and clients
- literacy skills to identify company and product or service information, to interpret strategic reports, to write in a range of styles for different audiences and to interpret legal requirements, company policies and procedures
- numeracy skills to analyse, create and manage budgets for marketing activities
- organisational and time management skills to sequence tasks and meet time lines
- presentation and facilitation skills to present a marketing plan.

Required knowledge

- organisational structure, products and services, overall strategic and marketing objectives
- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
 - anti-discrimination legislation and principles of equal opportunity, equity, and diversity
 - Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice
 - Australian E-commerce Best Practice Model
 - Australian Government Policy Framework for Consumer Protection in Electronic Commerce
 - confidentiality requirements
 - copyright laws
 - defamation laws
 - Free TV Australia Commercial Television Industry Code of Practice
 - privacy laws
 - sweepstakes regulations
 - Trade Practices Act
- industry products and services knowledge.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> devising, documenting and presenting a marketing plan detailing approaches and the marketing mix to achieve organisational marketing objectives.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to office equipment and resources access to strategic plans and marketing objectives.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written marketing plans outlining marketing strategies and tactics to be used in achieving organisational marketing objectives demonstration of techniques used to develop marketing strategies in conjunction with relevant persons direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate observation of presentation of marketing plan to relevant persons oral or written questioning review of testimony from team members, colleagues, supervisors or managers.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> BSBMKG608A Develop organisational marketing objectives other marketing units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Marketing opportunity options</i> may include:</p>	<ul style="list-style-type: none"> • cooperative ventures • exports • extending, expanding or otherwise changing an existing business • franchising • joint ventures • new businesses • new products or services for existing markets • new products or services for new markets • potential for greater penetration of existing markets with existing products or services • strategic alliances • take-overs
<p><i>Marketing strategies</i> may include:</p>	<ul style="list-style-type: none"> • achieving lower costs of production and distribution than competitors • creating a very different product line or service so that the business becomes a class leader in the industry • distribution • pricing, presentation and display of products or services • product design and packaging • product range and mix • promotion and advertising • pursuing cost leadership or product differentiation within a specialist market segment
<p><i>Marketing performance review strategy</i> may include:</p>	<ul style="list-style-type: none"> • comparative analysis • competitive analysis • life cycle models • product portfolio analysis • strengths, weaknesses, opportunities, threats (SWOT) analysis

RANGE STATEMENT	
	<ul style="list-style-type: none"> • value chain analysis
<i>Legal and ethical requirements</i> may include:	<ul style="list-style-type: none"> • codes of practice • cultural expectations and influences • environmental issues • ethical principles • legislation • policies and guidelines • regulations • safety issues • security and privacy issues • social responsibilities • societal expectations
<i>Marketing approaches</i> may include:	<ul style="list-style-type: none"> • differentiated target marketing • direct marketing • direct response marketing • e-business • mass distribution • mass marketing • personal selling • product variety marketing • promotion marketing
<i>Marketing mix</i> may include:	<ul style="list-style-type: none"> • product or service variables such as: <ul style="list-style-type: none"> • technical features • design • quality • range • safety features • pricing • promotion • distribution • level of service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define project	1.1. Access <i>project scope and other relevant documentation</i> 1.2. Define project <i>stakeholders</i> 1.3. Seek clarification from <i>delegating authority</i> of any issues related to project and <i>project parameters</i> 1.4. Identify limits of own responsibility and reporting requirements 1.5. Clarify relationship of project to other projects and to the organisation's objectives 1.6. Determine and access available resources to undertake project
2. Develop project plan	2.1. Develop <i>project plan</i> including timelines, work breakdown structure, role and responsibilities and other details of how the project will be managed in relation to the project parameters 2.2. Identify and access appropriate <i>project management tools</i> 2.3. Formulate risk management plan for project, including occupational health and safety (OHS) 2.4. Develop and approve project budget 2.5. Consult team members and take their views into account in planning the project 2.6. Finalise project plan and gain any necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1. Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2. Provide <i>support for project team members</i> , especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3. Establish and maintain <i>required record keeping systems</i> throughout the project 3.4. Implement and monitor plans for managing project finances, resources (human, physical and technical) and quality 3.5. Complete and forward project reports as required to stakeholders 3.6. Undertake <i>risk management</i> as required to ensure

ELEMENT	PERFORMANCE CRITERIA
	project outcomes are met 3.7. Achieve project deliverables
4. Finalise project	4.1. Complete financial record keeping associated with project and check for accuracy 4.2. Assign staff involved in project to new roles or reassign to previous roles 4.3. Complete project documentation and obtain any <i>necessary sign offs</i> for concluding project
5. Review project	5.1. Review project outcomes and processes against the project scope and plan 5.2. Involve team members in the project review 5.3. Document lessons learnt from the project and report within the organisation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and negotiation skills to work with team members and other stakeholders to maintain project schedules
- literacy skills to read, write and review a range of documentation
- planning and organising skills to develop, monitor and maintain implementation schedules
- numeracy skills to analyse data, and to compare time lines and promotional costs against budgets
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities.

Required knowledge

- relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - OHS
- organisational structure, and lines of authority and communication within the organisation
- how the project relates to organisation's overall mission, goals, objectives and operations.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of a project plan • details of monitoring arrangement/s and evaluation of the project plan's efficacy to address time lines and budgets of project • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to workplace project documentation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of how the project relates to the organisation's overall mission, goals, objectives and operations • review of project risk management plan and project plan • evaluation of project reports forwarded to stakeholders • analysis of documentation reviewing project outcomes and processes against the project scope and plan • evaluation of documentation outlining lessons learnt from the project.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other project management units.

Range Statement

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain knowledge of products and services	1.1. Actively and regularly research knowledge and understanding of <i>industry products and services</i> using <i>authoritative sources</i> 1.2. Use available <i>product and service documentation</i> to identify and understand characteristics of products and services, and to make comparisons with other products and services 1.3. Accurately document and maintain <i>information</i> on products and services in a format consistent with <i>organisational requirements</i> 1.4. Apply acquired knowledge to improve quality within personal work areas
2. Recommend products and services	2.1. Ensure that recommendations on products and services are in line with organisational requirements 2.2. Provide recommendations that emphasise <i>product and service issues</i> relevant to client needs 2.3. Ensure that evidence in support of recommendations is verifiable and presented in a suitable format 2.4. Structure recommendations to identify clear benefits to clients and the organisation
3. Advise on promotional activities	3.1. Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements 3.2. Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services 3.3. Ensure that costs of promotional activities conform to budget resources 3.4. Estimate impact of <i>promotional activities</i> from <i>verifiable customer feedback sources</i> 3.5. Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread texts to ensure clarity of meaning, and accuracy of grammar and punctuation
- technology skills to select and use technology appropriate to a task
- communication skills to monitor and advise on customer service strategies
- problem-solving skills to deal with customer enquiries or complaints
- analytical skills to identify trends and positions of products and services.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisation's products and services
- organisational policies and procedures for customer service including handling customer complaints
- product and service standards and best practice models
- principles and techniques of public relations and product promotion
- mechanisms to obtain and analyse customer feedback.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records/information needs
- literacy skills to read and interpret nature of record content, functions and problems
- problem-solving and analysis skills to identify and manage records.

Required knowledge

- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
 - AS 5044.1:2002 AGLS Metadata element set
 - AS 5090:2003 Work process analysis for recordkeeping
 - AS ISO 15489:2004 Records management
 - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
 - Australian Stock Exchange(ASX) Principles of Good Corporate Governance
 - ethical principles
 - codes of practice
 - privacy and freedom of information
 - archives and records legislation
 - occupational health and safety
- general principles and processes of records management and records management systems, such as:
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
 - environmental context
 - records characteristics.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • complying with organisational procedures and workplace requirements • knowledge and understanding of business or records systems • accurately recording information.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated work environment • access to office equipment and resources • access to examples of records, recordkeeping systems and policies • access to workplace reference materials such as procedural manuals and company policies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of authenticated documents from the workplace or training environment • oral or written questioning to assess knowledge of general principles and processes of business or records systems.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • administration units • other knowledge management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Records</i> may be:</p>	<ul style="list-style-type: none"> • at different stages of use: <ul style="list-style-type: none"> • active • archival • digital: <ul style="list-style-type: none"> • remote drives • servers • CDs • DVDs • imaging systems • PC-based applications • mainframe • physical: <ul style="list-style-type: none"> • audio-visual or multimedia • graphic • microform • paper-based (acid free or multiple copies) • from a variety of sources: <ul style="list-style-type: none"> • already in the custody of the organisation • in the process of being transferred between organisations
<p><i>Information</i> may include:</p>	<ul style="list-style-type: none"> • customer relationship management • expenditure • human resources management • invoicing/sales • legislative/regulatory/licensing compliance • risk management • stock control • taxation, asset management
<p><i>Business or records systems</i> may be:</p>	<ul style="list-style-type: none"> • archival control systems • business systems • cash register-based systems

RANGE STATEMENT	
	<ul style="list-style-type: none"> • characteristics relating to: <ul style="list-style-type: none"> • aggregations • context • entities • metadata • current business or records systems • electronic records and document management system (ERDMS) • informal • paper-based accumulation and card systems • PC-based accounting systems, employee and tax records systems • proprietary recordkeeping package • storage facilities systems • systems unique to individual workplaces and organisations
<i>Security and access requirements</i> may relate to:	<ul style="list-style-type: none"> • individuals or positions of individuals • protection of privacy • security restrictions • trade secrets or commercial-in-confidence information
<i>Reports</i> may be:	<ul style="list-style-type: none"> • ad hoc • computer generated • hand prepared • part of a management solution for another support/operational function • regular records management reports • system management reports

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish risk context	1.1. Review organisational processes, procedures and requirements for undertaking <i>risk</i> management 1.2. Determine <i>scope</i> for risk management process 1.3. Identify internal and external stakeholders and their issues 1.4. Review political, economic, social, legal, technological and policy context 1.5. Review strengths and weaknesses of existing arrangements 1.6. Document critical success factors, goals or objectives for area included in scope 1.7. Obtain support for risk management activities 1.8. Communicate with <i>relevant parties</i> about the risk management process and invite participation
2. Identify risks	2.1. Invite relevant parties to assist in the identification of risks 2.2. <i>Research</i> risks that may apply to scope 2.3. Use <i>tools and techniques</i> to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1. Assess <i>likelihood</i> of risks occurring 3.2. Assess <i>impact or consequence</i> if risks occur 3.3. <i>Evaluate</i> and prioritise risks for treatment
4. Select and implement treatments	4.1. Determine and select most appropriate <i>options</i> for treating risks 4.2. Develop an <i>action plan</i> for implementing risk treatment 4.3. Communicate risk management processes to relevant parties 4.4. Ensure all documentation is in order and appropriately stored 4.5. Implement and monitor action plan 4.6. Evaluate risk management process

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and literacy skills to consult and negotiate, to prepare communications about risk management, and to encourage stakeholder involvement
- organisational and management skills to plan and implement risk management processes
- problem-solving and innovation skills to find practical ways to manage identified risks.

Required knowledge

- AS/NZS 4360:2004 Risk management.
- legislation, codes of practice and national standards, for example:
 - duty of care
 - company law
 - contract law
 - environmental law
 - freedom of information
 - industrial relations law
 - privacy and confidentiality
 - legislation relevant to organisation's operations
 - legislation relevant to operation as a business entity
- organisational policies and procedures, including:
 - risk management strategy
 - policies and procedures for risk management
- overall operations of organisation
- reasonable adjustment in the workplace for people with a disability
- types of available insurance and insurance providers.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • risk management plan which includes a detailed stakeholder analysis, explanation of the risk context, critical success factors, identified and analysed risks, and treatments for prioritised risks • details of monitoring arrangements for risk management plan and an evaluation of the risk management plan's efficacy in treating risks • knowledge of relevant legislation, codes of practice and national standards.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to workplace documentation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of risk management policies and procedures • review of documented critical success factors, and goals or objectives for area • review of risks prioritised for treatment • evaluation of action plan for implementing risk treatment • evaluation of documentation communicating risk management processes to relevant parties.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • financial management units, governance units, human resource management units, or technology

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and implement business legal requirements	1.1. Identify and research possible <i>options for the business legal structure</i> using <i>appropriate sources</i> 1.2. Determine <i>legislation and regulatory requirements</i> affecting the operations of the business under its chosen structure 1.3. Develop and implement procedures to ensure full compliance with relevant legislation and regulatory requirements
2. Comply with legislation, codes and regulatory requirements	2.1. Establish systems to ensure the <i>legal rights and responsibilities</i> of the business are identified and the business is adequately protected, specifically in relation to <i>occupational health and safety (OHS)</i> , business registration and environmental requirements 2.2. Identify <i>taxation principles and requirements</i> relative to the business and follow procedures to ensure compliance 2.3. Identify and carefully maintain <i>legal documents</i> and maintain and update relevant <i>records</i> to ensure their ongoing security and accessibility 2.4. Monitor the provision of products and services of the business to protect legal rights and to comply with legal responsibilities 2.5. Conduct investigations to identify areas of non-compliance with legal and regulatory requirements and take corrective action where necessary
3. Negotiate and arrange contracts	3.1. Seek legal advice on contractual rights and obligations, if required, to clarify business liabilities 3.2. Investigate and assess potential products/services to determine <i>procurement rights</i> and to ensure protection of business interests where applicable 3.3. Negotiate and secure contractual procurement rights for goods and services including <i>contracts with relevant people</i> , as required, in accordance with the business plan 3.4. Identify <i>insurance requirements</i> and acquire adequate cover 3.5. Identify options for leasing/ownership of business premises and complete contractual arrangements in accordance with the business plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, reporting, record keeping and consultation skills to operate the business
- literacy skills to interpret legal requirements, to develop policies and procedures and to analyse compliance information
- research skills to investigate legal structures, and taxation and insurance requirements
- time management skills to prioritise tasks and to meet key dates.

Required knowledge

- business registration and licensing requirements
- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to OHS and environmental issues, equal employment opportunity, industrial relations, anti-discrimination, taxation
- creation and termination of relevant legal contracts
- cultural differences and legal implications
- duty of care imposed by Law of Torts
- legal rights and obligations of alternative ownership structures
- record keeping to meet minimum legal and taxation requirements
- relevant consumer legislation
- relevant industry codes of practice
- relevant insurance requirements and products.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • implementation of a systematic approach to identifying, managing and meeting legal and business requirements within culturally appropriate contexts • interpreting compliance data and formulating appropriate action • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to relevant documentation • candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • portfolio of evidence including contracts negotiated and arranged • oral or written questioning to assess knowledge of relevant consumer legislation • review of procedures developed and implemented to ensure full compliance with relevant legislation and regulatory requirements • review of insurance cover acquired.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBSMB402A Plan small business finances • BSBSMB404A Undertake small business planning.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify costs, calculate prices and prepare profit statement	1.1. Identify and document <i>costs</i> associated with the production and delivery of the business' products/services 1.2. Calculate prices based on costs and profit margin, as an hourly charge out rate for labour or unit price for products 1.3. Calculate break-even sales point to establish business viability and profit margins 1.4. Identify appropriate <i>pricing strategies</i> in relation to market conditions to meet business profit targets 1.5. Prepare projected profit statement to supplement the business plan
2. Develop a FINANCIAL PLAN	2.1. Set <i>profit targets/goals</i> to reflect owner's desired returns 2.2. Identify working capital requirements necessary to attain profit projections 2.3. Identify non-current asset requirements and consider alternative asset management strategies 2.4. Prepare <i>cash flow projections</i> to enable business operation in accordance with business plan and <i>legal requirements</i> 2.5. Identify capital investment requirements accurately for each operational period 2.6. Select budget targets to enable ongoing monitoring of financial performance
3. Acquire finance	3.1. Identify start-up and ongoing financial requirements according to financial plan/budget 3.2. Identify <i>sources of finance</i> , including potential <i>financial backers</i> , to provide required liquidity for the business to complement business goals and objectives 3.3. Investigate cost of securing finance on optimal terms 3.4. Identify strategies to obtain finance as required to ensure financial viability of the business

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to interpret financial data
- communication skills to secure finance
- literacy skills to develop a financial plan and to interpret legal requirements and financial reports
- numeracy skills to calculate costs, prices, profit and other financial information
- research skills to identify costs and sources of finance.

Required knowledge

- break-even analysis
- costing for the business, including margin/mark-up, hourly charge out rates and unit costs
- financial decision making relevant to the business
- methods and relative costs of obtaining finance
- principles for preparation of balance sheets
- principles for preparation of cash flow forecasts
- principles for preparation of profit and loss statements
- purpose of financial reports
- relevant accounting terminology
- working capital cycles.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> development of a financial plan which identifies the financial requirements of the business, including profit targets, cash flow projections and strategies for the acquisition of finance knowledge of financial decision making relevant to the business.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to relevant documentation candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> portfolio of evidence including financial plan and records review of projected profit statement prepared to supplement the business plan review of cash flow projections oral or written questioning to assess knowledge of principles for preparation of cash flow forecasts.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> BSBSMB401A Establish legal and risk management requirements of small business BSBSMB404A Undertake small business planning BSBSMB405A Monitor and manage small business operations BSBSMB406A Manage small business finances.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Costs may include:

- direct/indirect costs
- fixed, variable, semi-variable costs
- overheads and employee costs

Pricing strategies may include:

- competitor analysis
- cost/volume/profit analysis
- cost factors
- cost plus pricing
- demand-based pricing
- discounting
- market conditions
- penetration pricing
- perceived value
- product mix
- skimming

Financial plan may include:

- analysis of sales by product/service, identifying where they were sold and to whom
- cash flow estimates for each forward period
- current financial state of the enterprise (or owner/operator)
- estimates of profit and loss projections for each forward period
- financial performance to date (if applicable)
- likely return on investment
- monthly, quarterly or annual returns
- non-recurrent assets calculations
- profit, turnover, capital and equity targets
- projected profit targets, pricing strategies, margins
- projections of likely financial results (budgeting)
- projections, which may vary depending on the importance of such information and the stage in the life of the business
- resources required to implement the proposed marketing and production strategies (staff,

RANGE STATEMENT	
	<ul style="list-style-type: none"> materials, plant and equipment) • review of financial inputs required (sources and forms of finance) • risks and measures to manage or minimise risks • working, fixed, debt and equity capital • working in conjunction with external consultants e.g. investment analysts, accountants, financiers
<i>Profit targets/goals</i> may include:	<ul style="list-style-type: none"> • break-even point • cost of goods/services sold • gross profit/net profit • desired actual/notional salary for owners/managers • desired return on investment • sales turnover/gross fees or income
<i>Cash flow projections</i> may include:	<ul style="list-style-type: none"> • anticipated payments • anticipated receipts • customer credit policy/debt recovery • taxation provisions

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop marketing strategies	1.1. Analyse the business and its key products or services to determine the focus of marketing activities, in accordance with the objectives of the business plan 1.2. Evaluate the customer base and target market for the small business as a basis for the marketing objectives and strategies 1.3. Determine marketing objectives and strategies that are ethically and culturally appropriate, in consultation with relevant people and in accordance with the business plan
2. Determine a marketing mix for the business	2.1. Balance product mix, volumes and pricing to optimise sales and profit 2.2. Evaluate the costs and benefits of using different distribution channels and/or providing different levels of customer service and consider the results in determining the marketing mix 2.3. Determine promotional activities to suit the target market 2.4. Consider customer needs and preferences in determining the marketing mix 2.5. Determine the marketing mix according to market and business needs
3. Implement marketing strategies	3.1. Brief persons involved in the marketing effort on their roles and responsibilities, to ensure the success of marketing strategies 3.2. Plan and implement promotional activities , in accordance with marketing objectives and budgetary requirements
4. Monitor and improve marketing performance	4.1. Monitor marketing activities and evaluate business performance according to the objectives and targets of the business plan 4.2. Analyse performance gaps and take corrective action or set new targets 4.3. Encourage all relevant people to propose ways to improve marketing performance 4.4. Seek and analyse customer reaction to all aspects of the marketing mix, using culturally appropriate processes, to improve targeting and outcomes 4.5. Conduct ongoing research of customer requirements to identify opportunities for change and

ELEMENT	PERFORMANCE CRITERIA
	improvement 4.6. Monitor and investigate changes in the market for new opportunities to aid business development

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to question, clarify and report
- literacy and numeracy skills to research information, to analyse data and to interpret market data.

Required knowledge

- industry market trends
- methods of analysing costs and benefits of marketing strategies
- methods of developing marketing objectives and marketing mix
- methods of monitoring customer satisfaction
- relevant market analysis and research
- relevant marketing concepts and methods.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • developing a marketing strategy and choosing a marketing mix for the small business that are culturally appropriate and that complement the business plan • implementing and monitoring the marketing strategy/plan to optimise the chances of small business success • knowledge of relevant marketing concepts and methods.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to relevant documentation • candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • portfolio of evidence including marketing strategy and monitoring of marketing performance • oral or written questioning to assess knowledge of industry market trends • review of analysis of performance gaps and corrective action taken or new targets set • review of promotional activities implemented.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBSMB404A Undertake small business planning.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Marketing objectives and strategies</i> may include:</p>	<ul style="list-style-type: none"> • achieving lower costs of production and distribution than competitors • creating a very different product line or service so that the business becomes a class leader in the industry • distribution • pricing, presentation and display of products/services • product design and packaging • product range and mix • promotion and advertising • pursuing cost leadership and/or product differentiation within a specialist market segment
<p><i>Relevant people</i> may include:</p>	<ul style="list-style-type: none"> • accountant or other specialist services • family members, work team members, sub-contractors, community members • franchise agency • financial backers, clients • owner/operator, partners, directors, shareholders • regulatory bodies • trade or industry associations
<p><i>Distribution channels</i> may include:</p>	<ul style="list-style-type: none"> • dealer, re-seller, franchisee • distributor, delivery service, mail order, telesales • self-access, wholesale, retail
<p><i>Levels of customer service</i> may include:</p>	<ul style="list-style-type: none"> • after sales service • one-on-one personal service • sales assistance for problems/queries only
<p><i>Marketing mix</i> may include:</p>	<ul style="list-style-type: none"> • distribution • level of service • pricing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • promotion • quality, range • safety features • technical features, design
<i>Promotional activities</i> may include:	<ul style="list-style-type: none"> • advertising in national, suburban or local newspapers • advertising on radio or television • canvassing • development of networks and strategic alliances • display posters • exhibitions, in-store promotions • involvement in community projects • mail drops • professional/industry journals • sponsorship • staff development programs to enhance customer service orientation • website • word of mouth, referral, testimonials
<i>Performance gaps</i> may include:	<ul style="list-style-type: none"> • over achievement of performance targets • under achievement of performance targets
<i>Customer reaction</i> may be determined through:	<ul style="list-style-type: none"> • customer meetings, focus groups • identification of new business opportunities • informal discussion • sales to contact ratio • survey/other feedback mechanisms • trend analysis

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify elements of the business plan	1.1. Identify purpose of the <i>business plan</i> 1.2. Identify and review the essential components of the business plan 1.3. Identify and document <i>business goals and objectives</i> as a basis for measuring business performance
2. Develop a business plan	2.1. Research resources, legal and compliance requirements, specifically in relation to <i>occupational health and safety (OHS)</i> , in accordance with business goals and objectives 2.2. Research market needs, and market size and potential 2.3. Identify sources and costs of finance, from the <i>financial plan</i> , to provide required liquidity and profitability for the business 2.4. Identify methods, from the <i>marketing strategies</i> , to promote the market exposure of the business 2.5. Identify methods/means of production/operation from the <i>production/operations plan</i> to conform with business goals and objectives 2.6. Identify <i>staffing requirements</i> to effectively produce/deliver products/services 2.7. Identify <i>specialist services</i> and sources of advice, where required, and cost in accordance with resources available
3. Develop strategies for minimising risks	3.1. Identify specific interests and objectives of <i>relevant people</i> and seek and confirm their support of the planned business direction 3.2. Identify and develop <i>risk management strategies</i> according to business goals and objectives, and relevant legal requirements 3.3. Develop <i>contingency plan</i> to address possible areas of non-conformance with the plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to assess business performance
- literacy skills to enable interpretation of business information
- numeracy skills to analyse data.

Required knowledge

- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to OHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- methods of evaluation
- OHS responsibilities and procedures for identifying hazards relevant to the business
- planning processes
- preparation of a business plan
- principles of risk management relevant to business planning
- reasons for and benefits of, business planning
- relevant industry codes of practice
- setting goals and objectives
- types of business planning - feasibility studies; strategic, operational, financial and marketing planning.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of a business plan which provides for finance, marketing and provision of products/services to facilitate the business goals and objectives • identification of and planning for, OHS and duty of care responsibilities • development of risk management strategies • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to relevant documentation • candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • portfolio of evidence including a business plan and risk management strategies • oral or written questioning to assess knowledge of OHS responsibilities and procedures for identifying hazards relevant to the business • demonstration of practical skills • review of documented business goals and objectives • review of contingency plans developed to address possible areas of non-conformance with the business plan.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBSMB401A Establish legal and risk management requirements of small business • BSBSMB402A Plan small business finances • BSBSMB403A Market the small business.

Range Statement

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop OPERATIONAL STRATEGIES AND PROCEDURES	1.1. Develop an action plan to provide a clear and coherent direction, in accordance with the <i>business goals and objectives</i> 1.2. Identify <i>occupational health and safety (OHS) and environmental issues</i> and implement strategies to minimise risk factors 1.3. Develop a <i>quality system</i> for the business in line with industry standards, compliance requirements and cultural criteria 1.4. Develop performance measures and <i>operational targets</i> to conform with the business plan 1.5. Develop strategies for innovation, including the utilisation of existing, new or emerging technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	2.1. Implement systems and key performance indicators/targets to monitor business performance and customer satisfaction 2.2. Implement systems to control stock, expenditure/cost, wastage/shrinkage and risks to health and safety in accordance with the business plan 2.3. Maintain staffing requirements, where applicable, within budget to maximise productivity 2.4. Carry out the provision of goods/services in accordance with established legal, ethical cultural and <i>technical standards</i> 2.5. Provide goods/services in accordance with time, cost and quality specifications, and customer requirements 2.6. Apply quality procedures to address product/service and customer requirements
3. Monitor business performance	3.1. Regularly monitor/review the achievement of operational targets to ensure optimum business performance, in accordance with the business plan goals and objectives 3.2. Review systems and structures, with a view to more effectively supporting business performance 3.3. Investigate and analyse operating problems to establish causes and implement changes as required as part of the business quality system

ELEMENT	PERFORMANCE CRITERIA
	3.4. Amend operational policies and procedures to incorporate corrective action
4. Review business operations	4.1. Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and objectives 4.2. Clearly record proposed changes to aid future planning and evaluation 4.3. Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to develop criteria and targets for the business plan
- communication skills to question, clarify and report
- literacy skills to interpret legal requirements, company policies and procedures
- numeracy skills to manage performance information and to control the finances
- technology skills to use relevant business equipment.

Required knowledge

- methods for developing and maintaining networks
- methods for implementing operation and revenue control systems
- methods for monitoring performance and implementing improvements
- OHS responsibilities and procedures for managing hazards
- principles of risk management relevant to the business, including risk assessment
- quality system principles and methods
- relevant industry codes of practice
- relevant marketing, sales and financial concepts
- relevant performance measures
- role of innovation
- systems to manage staff, stock, expenditure, services and customer service
- technical or specialist skills relevant to the business operation.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • developing strategies and procedures to successfully manage the operation of the business • making appropriate adjustments to the business operations as required • knowledge of quality system principles and methods.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop staffing plan	1.1. Determine <i>staffing requirements</i> to allow the business to run effectively, in accordance with the business requirements as outlined in the business plan 1.2. Identify and compare the existing skills/competencies of owner/s and staff with business requirements to identify any gaps 1.3. Develop <i>policies and procedures</i> for owner/s and staff, in accordance with the business plan
2. Recruit, induct, train and retain the team	2.1. Develop job/position descriptions, competencies required and selection criteria to meet the needs of the business 2.2. Judge information obtained from each candidate against specified selection criteria and decide selection in accordance with business needs and legal requirements 2.3. Induct new staff members in accordance with the policies and procedures of the business 2.4. Make team members aware of their responsibilities and performance requirements as soon as practicable and take opportunities to coach team members who are unfamiliar with the procedures of the business 2.5. Develop and implement a <i>staff development program and career paths</i> based on the requirements of business and staff competencies 2.6. <i>Advertise staff vacancies</i> appropriately in accordance with staffing plan
3. Comply with INDUSTRIAL RELATIONS obligations	3.1. Clarify workplace rights and obligations of employers and employees, in accordance with <i>legal requirements and codes of practice</i> 3.2. Counsel staff, if required, in a positive and constructive manner and record outcomes accurately
4. Maintain staff records	4.1. Develop <i>staff records system</i> to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements 4.2. Monitor and accurately maintain the system for recording and retrieving personnel and payroll information and seek specialist advice where required
5. Manage staff	5.1. Regularly review contribution and skills of self and

ELEMENT	PERFORMANCE CRITERIA
	<p>other team members to ensure performance is in line with agreed <i>performance measures</i></p> <p>5.2. Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business</p> <p>5.3. Support and encourage staff, and acknowledge and reward their contribution to the business</p> <p>5.4. Regularly provide opportunities for staff to discuss work related issues</p> <p>5.5. Develop <i>contingency plans</i> to cope with unexpected or extreme situations and take appropriate corrective action as required</p>
6. Review team performance	<p>6.1. Develop positive and constructive relationships with and between <i>team members</i></p> <p>6.2. Review and update team objectives in support of business goals on a regular basis in consultation with team members</p> <p>6.3. Identify strengths and weaknesses of team against current and expected work requirements</p> <p>6.4. Schedule time, on a regular basis, for team members to review work operations in order to maintain and improve operational efficiency</p> <p>6.5. Encourage team members to monitor their own performance, suggest improvements and to identify professional development needs, in accordance with personal and business requirements</p> <p>6.6. Monitor and review staff turnover rate</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify workplace skill gaps
- coaching skills
- communication skills to relate to staff
- conflict resolution skills
- literacy skills to interpret legal requirements, to compile reports and to prepare a job/position description
- team building and motivation skills.

Required knowledge

- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal employment opportunity (EEO), industrial relations and anti-discrimination
- OHS responsibilities and procedures for managing hazards
- relevant industry awards/enterprise agreements
- staff development and career planning
- staff counselling, grievance and disciplinary procedures
- unfair dismissal legislation and procedures.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> managing a small team including staff selection, staff records, induction, training and development developing and maintaining team performance to enhance business operations knowledge of relevant legislative requirements affecting business operation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to relevant documentation candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> portfolio of evidence including staff policies and records, and contingency plans oral or written questioning to assess knowledge of staff recruitment procedures, staff development and review programs review of job/position descriptions and selection criteria developed review of documentation monitoring and reviewing staff turnover rate.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> BSBSMB405A Monitor and manage small business operations.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Staffing requirements</i> may include:</p>	<ul style="list-style-type: none"> • full-time, part-time, permanent, temporary or casual • number of staff • responsibilities, competencies required • self, other owners, family and/or friends • sub-contractors or external advisors/consultants • time commitment, performance expectations
<p><i>Policies and procedures</i> must include:</p>	<ul style="list-style-type: none"> • complaint and grievance procedures • culturally appropriate entitlements e.g. funeral leave, national/religious days • culturally appropriate procedures e.g. how business will enact cultural requirements for relationships between owner/operator, employees and service providers • employment conditions, equal opportunity, anti-discrimination, cultural diversity • induction and training • OHS • recruitment and selection • performance measures • professional development
<p><i>Staff development program and career paths</i> may include</p>	<ul style="list-style-type: none"> • attendance at courses • career planning • coaching • flexible learning • job rotation • mentoring • on-the-job training • professional development • staff exchanges • succession planning
<p><i>Advertising staff vacancies</i> may</p>	<ul style="list-style-type: none"> • electronic (radio, television and internet)

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • noticeboards • print media • word-of-mouth
<i>Industrial relations</i> may include:	<ul style="list-style-type: none"> • awards and/or industrial agreements and relevant industrial instruments • counselling, dismissal procedures
<i>Legal requirements and codes of practice</i> may include:	<ul style="list-style-type: none"> • award and enterprise agreements and relevant industrial instruments • commonwealth, state/territory and local government legislative requirements affecting business operation, especially in regard to OHS and environmental issues, EEO, industrial relations and anti-discrimination • relevant industry codes of practice
<i>Staff records system</i> must include:	<ul style="list-style-type: none"> • disciplinary and grievance procedures • employee records (including tax file number, remuneration, leave and training records) • job/position descriptions • OHS record • records of taxation and superannuation payments made
<i>Performance measures</i> may include:	<ul style="list-style-type: none"> • overall staff productivity • percentage of chargeable hours/days per week • performance of key people • ratio of direct workers to those who support, supervise or manage them • ratio of sales dollars per employee • staff morale, work ethic, work satisfaction
<i>Contingency plans</i> may include:	<ul style="list-style-type: none"> • accidents or emergencies • environmental issues • fluctuating workloads • OHS • unpredicted customer demand/busy periods • unpredicted staff shortages
<i>Team members</i> may include:	<ul style="list-style-type: none"> • employees, trainees/apprentices, sub-contractors or external advisers/consultants • owner/s, partners, family members

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	1.1. Select appropriate <i>technology</i> and <i>software applications</i> to achieve the requirements of the task 1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.3. Use technology according to <i>organisational requirements</i> and in a way which promotes a safe work environment
2. Process and organise data	2.1. Identify, open, generate or amend files and records according to task and organisational requirements 2.2. Operate <i>input devices</i> according to organisational requirements 2.3. <i>Store data</i> appropriately and exit applications without damage to or loss of, data 2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications
3. Maintain technology	3.1. Identify and replace used <i>technology consumables</i> in accordance with manufacturer's instructions and organisational requirements 3.2. Carry out and/or arrange <i>routine maintenance</i> to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements 3.3. <i>Identify equipment faults</i> accurately and take action in accordance with manufacturer's instructions or report fault to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions
- communication skills to request advice, to receive feedback and to work with a team
- problem-solving skills to solve routine technology problems.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
- ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
- organisational IT procedures including back-up and virus protection procedures
- basic technical terminology in relation to reading help-files and manuals.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • selection and application of appropriate equipment and software applications in relation to assigned task/s • access, retrieval and storage of required data • performance of basic maintenance on a range of office equipment
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of files and data for storage • manuals and training booklets for equipment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of office equipment • evaluation of maintaining technology.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • IT use units • other industry capability units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Technology</i> may include:</p>	<ul style="list-style-type: none"> • computer technology, such as laptops and personal computers • digital cameras • modems • printers • scanners • zip drives • photocopiers • shredders • binders • laminators • cutters
<p><i>Software applications</i> may include:</p>	<ul style="list-style-type: none"> • email, internet • word processing, spreadsheet, database, accounting or presentation packages
<p><i>Organisational requirements</i> may include:</p>	<ul style="list-style-type: none"> • correctly identifying and opening files • legal and organisation policies, guidelines and requirements • locating data • log-on procedures • manufacturer's guidelines • OHS policies, procedures and programs • saving and closing files • storing data
<p><i>Input devices</i> may include:</p>	<ul style="list-style-type: none"> • keyboard • mouse • numerical key pad • scanner
<p><i>Storage of data</i> may include:</p>	<ul style="list-style-type: none"> • appropriate storage/filing of hard copies of computer generated documents • storage in directories and sub-directories • storage on CD-ROMs, hard and floppy disk drives or back-up systems

RANGE STATEMENT	
<i>Technology consumables</i> may include:	<ul style="list-style-type: none"> • back-up tapes • CD-ROM • floppy disks • print heads • printer ribbons and cartridges • toner cartridges • zip disks
<i>Routine maintenance</i> may include:	<ul style="list-style-type: none"> • in-house cleaning and servicing of equipment according to manufacturer's guidelines • periodic servicing by qualified or manufacturer approved, technician • regular checking of equipment • replacing consumables
<i>Identifying equipment faults</i> may include:	<ul style="list-style-type: none"> • checking repairs have been carried out • encouraging feedback from work colleagues • keeping a log book of detected faults • preparing a maintenance program • regular back-ups of data • regular OHS inspections • routine checking of equipment

CPCBC4037A Prepare drawings for heritage works

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to prepare drawings for heritage works associated with historic buildings and structures of cultural significance. To successfully prepare drawings requires a comprehensive understanding of architectural forms, specifically period architecture, and appropriate drafting techniques. The unit requires the ability to interpret specifications for drawings, measure and calculate dimensions accurately, and work to scale.

Application of the Unit

Application of the unit This unit of competency supports builders, project managers and related construction industry professionals responsible for heritage works during residential and commercial projects.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for drawing requirements.	<p>1.1. Specifications for drawing are identified from request or conservation authority requirements.</p> <p>1.2. Dimensions of the <i>historical or significant building</i> are determined in accordance with appropriate <i>methods</i>, taking into account the type of structure, access to details and previous drawings available, if applicable.</p> <p>1.3. Method of recording feature details is determined in accordance with nature of the feature, location and accessibility.</p> <p>1.4. Method and system of recording identification, location and dimensional information are determined and applied in accordance with requested drawing requirements.</p> <p>1.5. Equipment and instruments required are identified, listed and used in accordance with recording task requirements.</p>
2. Organise information for drawing preparation.	<p>2.1. Information is gathered and organised to determine overall dimensions of the building, structure or details to be drafted.</p> <p>2.2. Information is gathered to identify and group all recorded details associated with each area or section of the building or structure.</p> <p>2.3. Size of the drawing and scale to be used is determined in accordance with dimensions of building, structure or section.</p> <p>2.4. Sketches, tracings or photographs of recorded features are identified and located with other recorded information related to <i>feature work</i>.</p>
3. Draw or develop orthographic description.	<p>3.1. Block layout of views and designed spacings, where applicable, are drawn or developed to planned layout and scaled accurately to recorded or calculated dimensions.</p> <p>3.2. <i>Orthographic description</i> views are detailed to show visible lines of structure and elements as seen with each view to correct scale representation of recorded dimensions.</p> <p>3.3. Architectural drawing conventions, symbols and hatching, where applicable, are shown on drawings in accordance with AS1100.301 - 1985 Architectural Drafting.</p>

ELEMENT**PERFORMANCE CRITERIA**

ELEMENT	PERFORMANCE CRITERIA
	<p>3.4. Plans of large buildings are produced by use of grids, where applicable, to provide cross-referencing and dimensioning by coordinates.</p> <p>3.5. Dimensions and reference notations are located relevantly on drawings to provide full detailed descriptions as required with each view.</p> <p>3.6. Appendices and reference details of drawing are provided with drawing as required and in accordance with overall request.</p>
4. Draw or develop sectional detailed drawings.	<p>4.1. <i>Sectional detailed drawings</i> are drawn or <i>developed</i> to scale to show detailed structural description of relationship between elements in accordance with recorded dimensions.</p> <p>4.2. Architectural hatching is shown on drawings to represent materials, in accordance with relevant Australian standards.</p> <p>4.3. Dimensions and reference notation are located on drawings to provide full details of sectional description.</p>
5. Develop detailed drawings of feature work.	<p>5.1. Photographic recording of feature work shape and design is enlarged by photocopying to provide more realistic size for analysis and reproduction.</p> <p>5.2. Gridlines are determined in accordance with actual dimensions of the feature work shape and are reproduced to enlarged photocopy.</p> <p>5.3. Enlarged photocopy is closely examined for distortion from the photographing process and adjustments are made to the design, as necessary.</p> <p>5.4. Tracing recordings are examined in accordance with the whole feature or part thereof and linked with other tracings or sketches to ascertain the feature shape to be reproduced.</p> <p>5.5. Design shape drawings are developed to produce accurate design to scale with grid lines where applicable.</p> <p>5.6. Cross-sectional details are produced accurately to scale, to provide three-dimensional information.</p> <p>5.7. Dimensions, reference notation, specific location and appendices are produced for drawings in accordance with client request or design aims.</p>
6. Complete work.	<p>6.1. Drawings are checked for accuracy, clarity of line, completeness of drawing and associated dimensions and details.</p>

ELEMENT**PERFORMANCE CRITERIA**

-
- 6.2. Copies are made, where applicable, in accordance with original request.
 - 6.3. Production details and coded reference information are recorded.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to use instruments and equipment for measuring
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - documentation from a variety of sources
 - plans, specifications and drawings
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
 - written skills to record relevant information
- numeracy skills to calculate measurements
- organisational skills, including the ability to set out work
- work to scale.

Required knowledge

Required knowledge for this unit is:

- Australian standards - AS1100.101 and AS1100.301
- conservation processes, including good conservation practice arising from principles of Burra Charter
- finishing trade applications to materials
- methods and processes relating to historic building construction, including the range and use of building materials, structure of buildings and drafting techniques
- methods of measuring
- relevant architectural knowledge, including orders of architecture and the characteristics and features of period architecture

REQUIRED SKILLS AND KNOWLEDGE

- workplace and equipment safety requirements, including relevant statutory regulations, codes and standards.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by carrying out the necessary preparatory processes and developing at least two examples of each form of drawing specified, using sample or case study heritage projects for any of the buildings listed in the range statement.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- clearly understand conservation considerations and consultative processes associated with preservation of historic structures
- clearly appreciate preservation of fabric
- comply with OHS regulations applicable to workplace operations
- apply organisational quality procedures and processes within the context of preparing drawings to conservation requirements
- apply recording and identification system for measurements, locations and details
- select and use appropriate processes, instruments and equipment to measure and record information
- use appropriate and safe techniques to obtain measurements and details
- apply accurate techniques in preparing information for related drawings
- select and use appropriate techniques to ascertain accurate analysis of featured design shapes

EVIDENCE GUIDE

- apply techniques to ensure all relevant information is included in orthographic description
- select and use appropriate techniques to produce accurate, sharp and complete drawings.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- historic locations appropriate to competency range
- drafting and computer equipment
- equipment relevant to measuring processes.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over

EVIDENCE GUIDE

a period of time reflecting the scope of the role and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Historical or significant building includes:

- built or sculptured artefacts
- cathedrals and churches
- civic buildings
- commercial and retail buildings
- doors

RANGE STATEMENT

- external features
 - fences
 - government buildings
 - houses
 - mansions
 - out buildings
 - walls
 - wharves
 - windows.
- Methods** include:
- accurately trace shapes or features
 - calculate height by use of levelling equipment and/or trigonometry
 - physically tape and measure all internal and external measurement
 - scale proportion of roof, chimney and spire heights from photograph where wall height is determined.
- Feature work** includes:
- decorative tiling
 - mosaic tiling
 - ornamental mouldings
 - ornamental plasterwork
 - ornamental stonework.
- Orthographic description** includes:
- front, rear and side elevations
 - plans
 - sectional elevations
 - sectional plans.
- Sectional detailed drawings** include:
- ceiling and roof framing construction
 - ceiling construction
 - chimney construction
 - cladding details
 - external wall construction
 - fence construction
 - footings and foundation
 - internal wall construction
 - roofing details
 - sub-floor construction.
- Development** of drawings includes:
- computer aided drafting
 - drafting techniques
 - drawings developed in accordance with National Trust guidelines or in accordance with AS1100.101 - 1992 Technical Drawing -

RANGE STATEMENT

General Principles, and AS1100.301 - 1985
Architectural Drawing.

In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

Application of the Unit

This unit of competency assists in the safe and effective operation of electrical, hydraulic or mechanical EWPs. The unit does not cover powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. An OHS authority Certificate of Competency may be required to operate boom type EWPs of 11 metres or more in some jurisdictions.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan and prepare.	<p>1.1 Work planning and preparation are conducted using plans, specifications, quality requirements and operational details, obtained, confirmed and applied from relevant information .</p> <p>1.2 Safety (OHS) requirements for the types of EWP to be operated are followed in accordance with safety plans and policies.</p>

- 1.3 Signage and barricade requirements are identified and implemented.
 - 1.4 Plant, **tools and equipment** and **personal protective equipment** are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.
 - 1.5 Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
 - 1.6 **Environmental requirements** are identified for the project in accordance with environmental plans and **statutory and regulatory authority** obligations, and are applied.
- 2 Conduct routine checks of platform.
 - 2.1 Power source is determined and connected to platform equipment according to manufacturer specifications.
 - 2.2 Routine pre-operational equipment checks are carried out in accordance with checklist from operator's manual or manufacturer specifications.
 - 2.3 Equipment is switched on in accordance with start up procedures and controls are checked for correct operation and ease of movement.
 - 2.4 **Emergency safety devices** are checked to comply with instructions from operator's manual and checked for manual operation.
 - 2.5 Work location is checked for level ground or floor surface to determine stabilising and safe working area requirements.
 - 3 Locate equipment in place for work application.
 - 3.1 Platform is positioned for work application and stabilisers are engaged to set equipment base level into place according to **safe operating procedures** .
 - 3.2 Tools, equipment and materials are placed into bucket or on platform according to job application requirements.

- 4 Elevate platform to work location.
 - 4.1 **Harness** is fitted securely and lanyard connected to attachment point.
 - 4.2 **EWP operation** and controls are operated to manufacturer recommendations and platform is elevated to work position.
 - 4.3 Power is switched off where specified and locking devices are engaged according to operator's manual.
 - 4.4 Work is carried out to job specification and safety (OHS) requirements of operator's manual.
- 5 Lower platform and shut down.
 - 5.1 Controls are operated to manufacturer recommendations and platform is lowered to down position.
 - 5.2 Shut down procedures are carried out to operator's manual and equipment is switched off.
- 6 Clean up.
 - 6.1 Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
 - 6.2 Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.
 - 6.3 Work completion procedures are applied and relevant personnel notified that work is finished.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

communication skills to:

identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

numeracy skills to apply measurements and make calculations

organisational skills, including the ability to plan and set out work

teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

technological skills to:

determine requirements

enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

follow instructions

read and interpret:

report faults

use language and concepts appropriate to cultural differences

use and interpret non-verbal communication, such as hand signals

written skills to complete inspection log and handover

documentation from a variety of sources

drawings and specifications

use a range of mobile technology, such as two-way radio and mobile phones

voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

designs, functions and operational limitations of EWP equipment

EWP equipment types and OHS authority certification of competency requirements

EWP techniques

fault finding and identification

general construction terminology
job safety analysis (JSA) and safe work method statements
material safety data sheets (MSDS)
materials storage and environmentally friendly waste management
plans, specifications and drawings
processes for the calculation of load mass requirements
quality requirements
relevant Acts, regulations and codes of practice
safe working at heights
signalling methods and communications
types, characteristics, uses and limitations of plant, tools and equipment
workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications

- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations

- comply with organisational policies and procedures, including quality requirements

- safely and effectively use tools, plant and equipment

- communicate and work effectively and safely with others

- complete set up and operation of a range of EWPs as listed in the range statement, including all functions.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

realistic tasks or simulated tasks covering the mandatory task requirements

relevant specifications and work instructions

tools and equipment appropriate to applying safe work practices

support materials appropriate to activity

workplace instructions relating to safe work practices and addressing hazards and emergencies

material safety data sheets

research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Integrated Framework Training Package

include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

reinforce the integration of employability skills with workplace tasks and job roles

confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

where the assessment is part of a structured learning experience the evidence collected

must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Work planning and preparation** include:
- assessment of conditions and hazards
 - consideration that EWPs must not be operated anywhere with overhead powerlines above, or within specified clearance distances set out in documentation such as Electrical Safety - Power line NO GO Zones, unless permission has been obtained from the power authority and a JSA has been developed
 - determination of work requirements
 - equipment defect identification
 - work site inspection.
- Information** includes:
- diagrams or sketches
 - instructions issued by authorised organisational or external personnel
 - manufacturer specifications and instructions where specified
 - MSDS
 - memos
 - regulatory and legislative requirements pertaining to EWPs
 - relevant Australian standards
 - safe work procedures related to operating EWPs, including the safe working load written on the EWP which must be checked to ensure it is not exceeded
 - signage
 - verbal or written and graphical instructions
 - work bulletins
 - work schedules, plans and specifications.

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

procedures related to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements and evacuation

handling of materials

hazard control

hazardous materials and substances

organisational first aid

personal protective clothing and equipment

use of firefighting equipment

use of tools and equipment

workplace environment and safety.

Types of EWP :

EWPs include scissor lifts, boom and knuckle boom lifts with a boom length under 11 metres

EWPs are classified as:

trailer mounted boom lift (TL)

self-propelled boom lift (BL)

vertical lift (VL)

scissor lift (SL)

truck-mounted boom lift (TM), which is not covered by this unit of competency.

Tools and equipment include:

EWPs, extension leads, logbooks, service manuals, operation manuals, safety harnesses and lanyards

special attachments, which may have to be installed if equipment is to be shifted with the EWP, as lifting loads via cables and ropes from an EWP is not permitted.

Personal protective equipment includes:

that prescribed under legislation, regulations, codes of practice and workplace policies and practices.

Environmental requirements include:

clean-up protection

noise and dust

sedimentation control

vibration

	waste management.
Statutory and regulatory authorities include:	federal, state and local authorities administering applicable Acts, regulations and codes of practice.
Emergency safety devices include:	bleed valves electronic override emergency descent devices ground controls hydraulic accumulators.
Safe operating procedures include:	conduct of operational risk assessment and treatments associated with: not using slab terrain EWPs on any surface other than concrete or level asphalt. earth leakage boxes lighting power cables, including overhead service trays, cables and conduits restricted access barriers surrounding structures traffic control trip hazards work site visitors and the public working at heights working in confined spaces working in proximity to others working with dangerous materials
Harnesses include:	energy or shock absorbers that must be used with all fall arrest lanyard, harness and inertia reel systems full body rescue harness lanyards and inertia reels, which should be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is 2 metres.

EWP operation includes:

boom up and down
operate attachments
operate outriggers
slew left and right
telescope in and out.

CPCCOHS1001A Work safely in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1. Applicable <i>OHS legislative requirements</i> relevant to own work, role and responsibilities are identified and explained. 1.2. Duty of care requirements are identified. 1.3. Own responsibilities to comply with <i>safe work practices</i> are identified and explained.
2. Identify construction hazards and control measures.	2.1. Basic principles of risk management are identified. 2.2. <i>Common construction hazards</i> are identified and discussed. 2.3. <i>Measures for controlling</i> hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1. OHS communication processes, information and documentation are identified and discussed. 3.2. Role of <i>designated OHS personnel</i> is identified and explained. 3.3. <i>Safety signs and symbols</i> are identified and explained. 3.4. Procedures and <i>relevant authorities</i> for reporting hazards, <i>incidents</i> and injuries are identified.
4. Identify OHS incident response procedures.	4.1. <i>General procedures</i> for responding to incidents and <i>emergencies</i> are identified and explained. 4.2. Procedures for accessing first aid are identified. 4.3. Requirements for the selection and use of relevant <i>personal protective equipment</i> are identified and demonstrated. 4.4. <i>Fire safety equipment</i> is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - clarify OHS legislative requirements

REQUIRED SKILLS AND KNOWLEDGE

- verbally report construction hazards and risks
- ask effective questions
- relay information to others
- discuss OHS issues and information
- comprehension skills to:
 - explain the basic OHS legislative requirements which will be applicable to own work
 - explain the meaning of safety signs and symbols
 - identify common construction hazards
 - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own work, role and responsibilities
- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
 - persons in control of construction work/projects
 - employers and self-employed persons
 - supervisors
 - employees
 - designers
 - inspectors
 - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
 - housekeeping

REQUIRED SKILLS AND KNOWLEDGE

- identification of hazards
- preventing bullying or harassment
- smoking
- use of amenities
- use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge.

EVIDENCE GUIDE

Questioning will be undertaken in such a manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Method of assessment

Assessment methods may include more than one of the following:

- practical assessment
- oral questioning
- written test
- work-based activities
- simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
- OHS and welfare Acts and regulations
- safety codes of practice.

Duty of care requirements relate to:

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

RANGE STATEMENT

- Safe work practices* include:
- own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency
 - relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
 - access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.
- Risk* relates to:
- likelihood of a hazard causing injury or harm.
- Principles of risk management* include:
- assessing the risks involved
 - consulting and reporting ensuring the involvement of relevant workers
 - controlling the hazard
 - identifying hazards
 - reviewing to identify change or improvement.
- Hazard* relates to:
- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
- Common construction hazards* include:
- confined spaces
 - electrical safety
 - excavations, including trenches
 - falling objects
 - hazardous substances and dangerous goods
 - HIV and other infectious diseases
 - hot and cold working environments
 - manual handling
 - noise
 - plant and equipment

RANGE STATEMENT

Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.

OHS communication processes include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.
- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

OHS information and documentation includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.

Designated OHS personnel includes:

- first aid officers
- OHS committee members

RANGE STATEMENT

- Safety signs and symbols*** include:
- OHS representatives
 - supervisors.
 - emergency information signs (e.g. exits, equipment and first aid)
 - fire signs (e.g. location of fire alarms and firefighting equipment)
 - hazard signs (e.g. danger and warning)
 - regulatory signs (e.g. prohibition, mandatory and limitation or restriction)
 - safety tags and lockout (e.g. danger tags, out of service tags).
- Relevant authorities*** include:
- emergency services (e.g. police, ambulance, fire brigade and emergency rescue)
 - OHS regulatory authority
 - supervisor.
- Incidents*** include:
- accidents resulting in personal injury or damage to property
 - near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
 - breathing apparatus malfunctioning to the extent that the user's health is in danger
 - collapse of the floor, wall or ceiling of a building being used as a workplace
 - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
 - collapse or partial collapse of a building or structure
 - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
 - damage to or malfunction of any other major plant
 - electric shock.
 - electrical short circuit, malfunction or explosion
 - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
 - any other unintended or uncontrolled incident or event arising from operations carried on at a

RANGE STATEMENT

	workplace.
General procedures for responding to incidents and emergencies include:	<ul style="list-style-type: none"> • basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
Emergencies include:	<ul style="list-style-type: none"> • chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
Personal protective equipment includes:	<ul style="list-style-type: none"> • aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
Fire safety equipment includes:	<ul style="list-style-type: none"> • breathing apparatus • fire blankets • firefighting equipment.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify animation requirements	<ol style="list-style-type: none"> 1. With reference to <i>production documentation</i>, clarify <i>3D animation</i> requirements and <i>design specifications</i> in consultation with <i>relevant personnel</i> 2. Examine the models to be animated to determine the most appropriate <i>animation techniques</i> 3. Identify the <i>file format</i> and <i>delivery platform</i> for animated sequences 4. Identify <i>factors</i> that may influence animation design approach 5. In consultation with relevant personnel, clarify work flow sequences to ensure that production schedule deadlines are met
Plan approach	<ol style="list-style-type: none"> 6. Research animations, artworks and other creative sources that may inspire visual design ideas 7. Generate a range of animation ideas that are technically feasible, respond to briefs and provide creative solutions to all design issues 8. Present animation ideas to relevant personnel using appropriate <i>design techniques</i>. 9. Adjust approach to incorporate feedback and agree on final design concepts 10. Discuss and select <i>3D animation software</i> with relevant personnel to ensure that animated sequences meet specified outcomes 11. Analyse <i>audio assets</i> supplied for animations as required
Produce animated sequences for review	<ol style="list-style-type: none"> 12. Create 3D animations using animation techniques to suit design requirements 13. Apply basic <i>animation principles</i>, <i>screen principles</i>, <i>visual design principles</i> and <i>communication principles</i> 14. Apply real world camera techniques to virtual cameras used in 3D animation 15. Render completed animated sequences 16. Save and store animated sequences using appropriate output file formats, standard naming conventions and version control protocols 17. Present 3D animated sequences to relevant personnel for evaluation by agreed deadlines
Finalise animated	<ol style="list-style-type: none"> 18. Review animated sequences to assess creative solutions to design briefs, appropriateness to users/audience and

ELEMENT	PERFORMANCE CRITERIA
sequences	technical feasibility 19. Discuss and confirm with relevant personnel additional requirements or modifications and complete changes as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written or verbal instructions
 - work as a member of a production team, both independently on assignment and under direction
 - respond constructively to feedback received from other team members
 - complete workplace documentation
- conceptual and creative skills in the context of:
 - generating feasible ideas for animated sequences
 - having a feel for movement and timing in order to produce convincing animations
 - maintaining design integrity
- technical skills sufficient to:
 - use industry-current animation software to develop digitally animated sequences
 - apply the principles of basic screen, visual design and communication to produce 3D animated sequences
 - output 3D animated sequences in appropriate file formats for a range of delivery platforms
 - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital animations
- basic 3D digital animation techniques
- basic screen principles
- principles of animation
- principles of visual design and communication
- features of a range of delivery platforms

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to create 3D digital models.</p> <p>This unit is a prerequisite for:</p> <ul style="list-style-type: none">• CUFANM401A Prepare 3D digital models for production. <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

<p>Application of the unit</p>	<p>3D modellers working on relatively simple projects apply the skills and knowledge described in this unit. From reference material and established designs, they create 3D models using whatever software is applicable to the production.</p> <p>3D models need to meet technical and design specifications, as well as being efficient, reliable, to scale, and easy to rig and animate.</p> <p>Modellers need to appreciate what will be required of their models in later stages of production because this can affect the work they produce. Close liaison with other team members is, therefore, important. Even though a senior modeller or technical director supervises the creation of models, people at this level are expected to work autonomously within clear guidelines.</p> <p>More complex skills associated with 3D digital modelling are covered in:</p> <ul style="list-style-type: none"> • CUFANM401A Prepare 3D digital models for production.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> 1. With reference to <i>production documentation</i>, clarify <i>requirements</i> and <i>purpose</i> for 3D digital models 2. In consultation with <i>relevant personnel</i>, clarify work flow sequences to ensure that <i>production</i> schedule deadlines are met 3. Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which 3D digital models are being created 4. Gather and analyse <i>reference materials</i> to help with visualisation of 3D models
Create 3D digital models	<ol style="list-style-type: none"> 5. Use software features to block out models to determine correct proportions in relation to reference materials 6. Manipulate software features to apply basic lighting and shaders as required 7. Ensure that models' topology allows appropriate deformation, as required 8. <i>Progressively refine</i> and check <i>integrity</i> of models until they meet design requirements 9. Submit models to relevant personnel for comment on whether production requirements have been met and make final adjustments as required 10. Render and output models in required <i>format</i> and submit to relevant personnel by agreed deadlines 11. Make back-up copies of files and complete workplace documentation according to enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written or verbal instructions
 - work as a member of a production team, both independently on assignment and under direction
 - respond constructively to feedback received from other team members
 - complete workplace documentation
- technical skills sufficient to:
 - use industry-current software applications to create 3D models to specifications
 - manage files and directories using standard naming conventions and version control protocols
 - make back-up copies of files and store appropriately
- initiative and creativity in the context of visualising and accurately creating 3D digital models of a range of animate and inanimate objects
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital models
- 3D digital modelling techniques
- strong sense of scale, form, weight and volume
- geometry as it applies to the creation of realistic 3D digital models
- features of a range of delivery platforms
- OHS standards as they relate to working for periods of time on computers

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • creation of 3D digital models that: <ul style="list-style-type: none"> • demonstrate efficient use of geometry and attention to detail • meet design requirements • collaborative approach to work • ability to meet deadlines.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a selection of industry-current software as listed in the range statement • access to simulated or real production situations that require the creation of 3D digital models • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of a range of 3D digital models created by the candidate to determine ability to create models for different kinds of objects • written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUFANM302A Create 3D digital animations

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• CUVDSP11A Research and apply techniques for illustrative work• CUVVSP16A Research and experiment with techniques to produce drawings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Production documentation</i> may include:	<ul style="list-style-type: none"> • animatics • brief • storyboard • technical specifications.
<i>Requirements</i> may include:	<ul style="list-style-type: none"> • assets for integration • collaboration with other team members • creative expectations • design specifications • output format • technical specifications • timelines.
<i>Purpose</i> of 3D digital models may be for:	<ul style="list-style-type: none"> • animations • digital simulations, e.g.: <ul style="list-style-type: none"> • architectural models • e-learning resources • demonstration of processes and procedures.
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • 3D designer or concept artist • 3D modeller • art director • director • head of department • matte painter • producer • project manager • storyboard artist • supervisor • technical director • other technical/specialist personnel.
<i>Production</i> may include:	<ul style="list-style-type: none"> • animated productions • commercials • digital media products, e.g.: <ul style="list-style-type: none"> • simulations

RANGE STATEMENT	
	<ul style="list-style-type: none"> • games • e-learning resources • virtual worlds/environments • documentaries • feature films • filmed events or performances • music video • short films • television productions.
<i>Software</i> may include:	<ul style="list-style-type: none"> • 3D, e.g.: <ul style="list-style-type: none"> • 3D Studio Max • Maya • Softimage • graphics, e.g.: <ul style="list-style-type: none"> • Photoshop • Illustrator.
<i>Delivery platforms</i> may include:	<ul style="list-style-type: none"> • broadcast television • CD • DVD • film • internet • Kiosk • mobile phone • PDA (personal digital assistant) • other digital devices.
<i>Reference materials</i> may include:	<ul style="list-style-type: none"> • books • concept drawings and designs • direct observation of actions to be simulated in 3D models • real object on which models are to be based • still images • videos.
<i>Progressive refinements</i> may include:	<ul style="list-style-type: none"> • achieving required shape • achieving required topology.
Aspects to be checked for <i>integrity</i> may include:	<ul style="list-style-type: none"> • double faces • isolated vertices • pivot points • resetting transform • scale of models relative to other components in

RANGE STATEMENT	
	final sequences.
<i>Formats</i> may include:	<ul style="list-style-type: none"> • AVI • IFF • JPEG • MPEG • PNG • Quicktime • Targa • TIFF.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> 1. With reference to <i>production documentation</i>, determine <i>requirements</i> and <i>purpose</i> for 3D digital environments 2. In consultation with <i>relevant personnel</i>, determine work flow sequences to ensure that production schedule deadlines are met 3. Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which 3D digital environments are being created 4. Gather and analyse <i>reference materials</i> to help with visualisation of 3D environments
Create 3D digital environments	<ol style="list-style-type: none"> 5. Use software features to build a previsualisation of environments in relation to reference materials and submit to relevant personnel for approval 6. Build environment models and <i>progressively refine</i> models until they meet design requirements 7. Check <i>integrity</i> of models and ensure <i>spatial relationship</i> meets design requirements 8. Apply texture coordinates as required 9. Create and incorporate matte paintings as required 10. Manipulate software features to apply lighting and shaders as required 11. Experiment with different <i>lighting rigs</i> and select a rig that meets design requirements 12. Continuously refine all aspects of 3D digital environments until the required creative effect is achieved 13. Submit environments to relevant personnel for comment on whether production requirements have been met and make final adjustments as required
Finalise projects	<ol style="list-style-type: none"> 14. Render and output environments in required <i>format</i> and submit to relevant personnel by agreed deadlines 15. Finalise projects according to enterprise procedures, such as making back-up copies of files and completing workplace documentation 16. Participate in project evaluations and contribute ideas and suggestions about ways to improve future projects

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret creative concepts and briefs
 - interpret information in software user manuals and help features
 - work as a member of a production team, both independently on assignment and under direction
 - respond positively to constructive feedback from other team members
- initiative and enterprise in the context of:
 - visualising and accurately creating 3D digital environments
 - finding creative solutions to problems identified during the process of creating 3D digital environments
 - locating and using resources to broaden own creative experience
- technical skills sufficient to:
 - use appropriate software to develop 3D digital environments
 - create 3D digital environments in appropriate formats for required delivery platforms
 - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - plan the creation of 3D digital environments in a logical and cohesive way
 - meet deadlines
 - seek expert assistance as required
- learning in the context of improving performance/product through self-reflection and reworking after feedback

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members in the relevant industry sector
 - sound understanding of the relationship between the technical and creative aspects and requirements of productions for which 3D digital environments are being created
 - understanding of the stages in the production process from initial design through to the finished product
 - issues and challenges that arise in the context of creating 3D digital

REQUIRED SKILLS AND KNOWLEDGE

environments

- the features of a range of delivery platforms
- digital modelling techniques appropriate to the development of 3D environments
- demonstrated use of scale, form, weight and volume
- geometry as it applies to the creation of realistic 3D digital environments
- OHS standards as they relate to working for periods of time on computers

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Use scanner to capture photo images	<ol style="list-style-type: none"> 1. Source and select appropriate photographic images according to requirements of photographic <i>project</i> brief 2. Discuss selection of images with <i>relevant personnel</i> 3. Assess <i>scanner features</i> to ensure that outcomes will meet the requirements of brief 4. Operate scanner according to manufacturer specifications 5. Select <i>scanner settings</i> to ensure image capture meets production requirements 6. Transfer and store photographic image files to a computer using standard naming conventions
Use digital camera to create photo images	<ol style="list-style-type: none"> 7. Discuss photographic project brief with relevant personnel 8. Assess <i>digital camera features</i> to ensure that outcomes will meet the requirements of brief 9. Plan camera shots taking into account lighting, framing, composition and other <i>photographic techniques</i> 10. Load and operate digital camera according to manufacturer specifications 11. Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements 12. Check photographic images for fitness of purpose to comply with brief 13. Transfer and store photographic image files to a computer using standard naming conventions
Edit photo images	<ol style="list-style-type: none"> 14. Load <i>digital imaging software</i> and import photo image source files 15. <i>Manipulate</i> and save digital images using designated digital imaging software 16. Create photo images that incorporate <i>visual design</i> and <i>communication principles</i> using designated digital imaging software 17. Evaluate the outcome for visual impact, effectiveness and fitness for purpose 18. Confirm outcome with relevant personnel
Prepare photo image assets	<ol style="list-style-type: none"> 19. Save files in appropriate <i>output format</i> to meet <i>platform</i> requirements 20. Assign <i>metadata tags</i> if required

ELEMENT	PERFORMANCE CRITERIA
	21. Group files logically in a folder system using standard naming conventions 22. Store files in share drive or repository for production team access

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills sufficient to:
 - interpret and clarify written or verbal instructions
 - consult equipment operation manuals
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
 - proficiently use a scanner to reproduce photo images to specification
 - proficiently use a digital camera to create well-composed photo images
 - proficiently use digital imaging software to manipulate and prepare photo images
 - manage files using standard naming conventions
- self-management skills sufficient to:
 - work under pressure
 - meet deadlines
 - seek expert assistance when problems arise
- problem-solving skills sufficient to anticipate and resolve minor equipment set-up problems

Required knowledge

- basic photographic techniques
- basic principles of visual design and communication
- appropriate file formats for various platforms
- industry knowledge, including:
 - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
 - basic understanding of the relationship between technical and creative aspects and requirements of interactive media projects
 - basic knowledge of the features of a range of delivery platforms
- OHS regarding the use of scanners, cameras and computers, and handling and disposing of lithium batteries

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • ability to use digital imaging software to prepare high quality photo images that satisfy the requirements of a range of briefs • efficient operation of a scanner and digital camera to capture images.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a range of resources and equipment currently used by industry, including: <ul style="list-style-type: none"> • flatbed scanner • digital camera • industry-standard graphics software • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of photo images prepared by the candidate on a number of occasions • practical demonstration by the candidate of scanner and digital camera operation • written or oral questioning to test knowledge of file formats and OHS issues.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUFDIG304A Create visual design components.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Projects</i> may include:	<ul style="list-style-type: none"> • e-commerce • educational product • game • information product • promotional product • training product • website.
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • client • designer • graphic artist • interactive media author • programmer, coder and technical support people • supervisor • web manager • other specialist creative and administrative staff.
<i>Scanner features</i> may include:	<ul style="list-style-type: none"> • bit depth • dynamic range • optical resolution • output format (e.g. RGB, greyscale or CMYK) • platen size • reflective or transmissive (film) • range of film holders.
<i>Scanner settings</i> may include:	<ul style="list-style-type: none"> • bit depth • colour or greyscale • colour/target/working space • crop • destination • dust and scratch handling (e.g. ICE, FARE) • grain management (e.g. GEM) • multi-sampling

RANGE STATEMENT	
	<ul style="list-style-type: none"> • orientation • output dimension and resolution or file size • preferences/options • restoration of colour (e.g. ROC) • scaling • sharpening • source image type • tones, contrast, colour cast, saturation.
<i>Digital camera features</i> may include:	<ul style="list-style-type: none"> • aperture • automatic, program or manual settings • batteries • colour, target, working space • compatibility with hardware and digital imaging software • exposure compensation • file format • flash, fill flash • lens focal lengths, such as wide angle, close-up and telephoto • menu functions • resolution - megapixels • shutter speed • size and type of memory card(s) • subject modes • white balance.
<i>Photographic techniques</i> may include:	<ul style="list-style-type: none"> • composition • depth of field • dynamic range • field of view • framing • lighting.
<i>Digital imaging software</i> may include:	<ul style="list-style-type: none"> • a wide range of programs, e.g.: <ul style="list-style-type: none"> • Adobe Photoshop • Adobe Photoshop Elements • Adobe Photoshop Lightroom • Apple Aperture • Corel Paint Shop Pro • Corel PhotoPaint • GNU Image Manipulation Program (GIMP and GIMPshop).

RANGE STATEMENT	
<i>Manipulating</i> digital images may include:	<ul style="list-style-type: none"> • appending text/type for files and captions • brushing • creating artistic effects • cropping • editing • eliminating red eye • emulating photographic effects • image enhancement including tones, contrast, colour cast/tint, saturation • masking layers • retouching (i.e. cloning, rubber stamping, healing, patching) • sharpening • stitching (panoramic scenes) • using layers for composites • using pre-sets.
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> • balance • emphasis • movement • perspective • proportion • scale • unity.
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> • communicates message • conveys meaning • meets audience requirements • uses functional components.
<i>Output formats</i> may include:	<ul style="list-style-type: none"> • GIF • JPEG • PDF • PICT • PNG • PSD • TIFF.
<i>Platforms</i> may include:	<ul style="list-style-type: none"> • CD • DVD • games console • internet • kiosk • mobile phone

RANGE STATEMENT	
	<ul style="list-style-type: none"> • other video playback devices • personal digital assistant (PDA) • video player (iPods).
<i>Metadata tags</i> may include:	<ul style="list-style-type: none"> • author • copyright notice • date of capture/date created • description • EXIF and IPTC standards • file size • format • headline/caption • keywords/subject • location/GPS coordinates • resolution • rights usage terms • roll/identifier # • subject • time • title • version.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> 1. Clarify type of visual design <i>components</i> required, in consultation with <i>relevant personnel</i> 2. In discussion with relevant personnel, identify factors that may determine or affect visual design concepts, including <i>design techniques</i> 3. Clarify in discussion with relevant personnel the target user and audience, and determine <i>format</i> and <i>delivery platform</i>
Generate and assess ideas	<ol style="list-style-type: none"> 4. Review media products, designs, images, artwork and other creative sources that may inspire visual design ideas 5. Obtain other <i>relevant information</i> that may influence design ideas 6. Generate a range of visual design ideas that are technically feasible, respond to specifications and provide creative solutions to all design issues 7. Present visual design ideas to relevant personnel using design techniques
Plan approach	<ol style="list-style-type: none"> 8. Experiment with traditional and digital imaging techniques to create required visual design components 9. Explore range of <i>typographical</i> and <i>visual design elements</i> to create the components 10. Evaluate initial design ideas and specifications against findings and discuss with relevant personnel to select final design concept 11. Select design technique and discuss with relevant personnel to ensure appropriate output format meets delivery platform requirements
Produce visual design components	<ol style="list-style-type: none"> 12. Develop structure for components based on the final design concept using selected design techniques 13. Apply <i>visual design principles</i> and <i>communication principles</i> to produce components 14. Save visual design in an appropriate format that satisfies the technical parameters determined in consultation with relevant personnel
Finalise visual design components	<ol style="list-style-type: none"> 15. Review visual design components to assess whether creative solutions meet design and technical specifications 16. Discuss and confirm with relevant personnel additional requirements or modifications and undertake any

ELEMENT	PERFORMANCE CRITERIA
	necessary amendments

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written and verbal instructions
 - work as a member of a production team - both independently on assignment and under direction
 - respond constructively to feedback received from other team members
- initiative and enterprise in the context of generating a range of feasible ideas for visual designs
- technical skills sufficient to:
 - use a range of design techniques for creating visual designs, including industry-standard graphics software
 - apply visual design and communication principles to produce visual designs
 - create visual design components in appropriate formats for a range of delivery platforms
 - manage files and directories using standard naming conventions
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members
 - basic understanding of the relationship between technical and creative aspects and requirements of media projects
- basic design principles of layout and composition
- characteristics of digital and traditional imaging
- visual design and communication principles
- typography
- copyright clearance procedures
- OHS standards as they apply to the use of computer and keyboard for periods of time

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • creation of visual design components that respond effectively to specifications and demonstrate the application of visual design and communication principles • ability to apply a selection of the design techniques listed in the range statement • ability to work collaboratively in a team environment.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a range of resources, equipment and current industry-standard software as listed in the range statement • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of a range of visual design components created by the candidate • written or oral questioning to test knowledge of visual design principles, communication principles and responsibilities of different members of a project team.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUFDIG303A Produce and prepare photo images

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Components may include:

- 2D animation objects
- backgrounds
- banners
- basic user interfaces
- colours
- flow charts
- icons
- illustrations
- interactive buttons
- interactive controls
- logos
- simple 2D animation characters
- text
- titles
- other components required by the project.

Relevant personnel may include:

- art director
- asset creator
- client
- editor
- producer
- programmer
- supervisor
- technical director
- technical staff
- other specialist creative and administrative staff.

Design techniques may include:

- drawing freehand
- drawing on a tablet
- flow charts
- scanning drawings and photographs
- storyboards
- thumbnail sketches

RANGE STATEMENT	
	<ul style="list-style-type: none"> • using graphics software, such as: <ul style="list-style-type: none"> • Corel Draw • Corel Paint Shop Pro • Photoshop • Photoshop Elements • Illustrator • Paint.net • Fireworks.
<i>Format</i> may include:	<ul style="list-style-type: none"> • bitmap image • digital formats, such as: <ul style="list-style-type: none"> • GIF • JPEG • PDF • TIFF • PICT • PNG • PSD • HTML • hard copy • vector image.
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> • CD • DVD • film • games console • internet • kiosk • mobile phone • other wireless/mobile devices • personal digital assistant (PDA) • print media • television.
<i>Relevant information</i> may include:	<ul style="list-style-type: none"> • brands • logos • previous versions of components • printed materials • promotion materials • style guides • trademarks.

RANGE STATEMENT	
<i>Typographical design elements</i> may include:	<ul style="list-style-type: none"> • alignment • fonts and typefaces • kerning • leading • point and size • serif or sans serif • tracking.
<i>Visual design elements</i> may include:	<ul style="list-style-type: none"> • colour • form • line • shape • texture • tone.
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> • balance • emphasis • focal point • movement • perspective • proportion • scale • unity.
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> • communicates message • conveys meaning • meets audience requirements • uses functional components.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify project requirements	<ol style="list-style-type: none"> 1. Confirm objectives and desired outcomes of briefs in consultation with <i>relevant personnel</i> 2. Identify target audience and determine format and <i>delivery platform</i> of simulations through discussion with relevant personnel
Research and plan approach	<ol style="list-style-type: none"> 3. Investigate fully the <i>real world environment</i> that is to be simulated 4. Obtain designs, plans and other information that may assist in modelling the real world environment 5. Determine the <i>performance objectives</i>, task complexity and required levels of user skill 6. Determine the required depth of physical and functional fidelity, taking into account <i>production requirements</i> 7. Research and select appropriate simulation <i>authoring tools</i> 8. Discuss ideas and collaborate, as required, with relevant personnel to ensure contribution of a range of ideas and creative solutions
Draft simulation design documents	<ol style="list-style-type: none"> 9. Identify the <i>processes</i> that determine the functional behaviour and specify how this behaviour is to be represented by <i>control objects</i> 10. Define the underlying functionality in a model that specifies the essential settings, states, conditions and parameters 11. Specify the <i>user interface controls</i> that enable users to interact with simulations 12. Identify critical impacts, alerts or costs for incorrect user operation 13. Specify positive and negative user feedback 14. Specify the sequencing of levels of difficulty 15. Present draft <i>simulation design documents</i> for discussion with and feedback from other team members
Finalise simulation design documents	<ol style="list-style-type: none"> 16. Review designs against required project outcomes and performance objectives 17. Review designs to ensure they meet creative, technical and legislative requirements 18. Adjust designs as necessary after discussions with relevant personnel and incorporating user feedback 19. Save and archive user interface controls for other

ELEMENT	PERFORMANCE CRITERIA
	projects

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify project briefs
 - establish rapport with clients
 - work collaboratively in a team environment to find the best design solutions
 - clearly and concisely document specifications for the design of the digital simulation
- initiative and enterprise in the context of:
 - generating ideas for the design of digital simulations that meet the specified performance objectives
 - thinking laterally when developing ideas
 - maintaining design integrity
- technical skills sufficient to:
 - create storyboards, state-charts and other diagrams to specify the architecture and navigation of digital simulations
 - design simulations that represent a real world environment to the required level of fidelity
- self-management skills sufficient to:
 - meet deadlines
 - provide appropriate and timely documentation

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
 - issues and challenges that arise in the context of designing and developing digital simulations
- typical formats and techniques for documenting the design of digital simulations
- OHS standards as they relate to working for periods of time on computers
- way in which algorithms, laws, rules and mathematical formulas can represent real world processes
- intellectual property rights and copyright clearance procedures

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • design specifications for digital simulations that: <ul style="list-style-type: none"> • are well documented and clearly presented • meet performance requirements • are technically feasible • ability to work effectively as a member of a design team.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • practical demonstration of skills through the design of at least two digital simulations • access to briefs for digital simulations on which designs can be based • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of digital simulation designs documented by the candidate and of their quality in terms of meeting performance requirements • written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit • case studies to assess ability to develop digital simulations for a range of real world environments.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

Co-requisite units

Co-requisite units		

CULMS010B Contribute to the preservation of cultural material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability Skills The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| 1 Develop preservation skills and knowledge | <p>1.1 Seek and access <i>opportunities to develop, update and maintain knowledge of preservation</i> issues and concepts</p> <p>1.2 Integrate knowledge into work activities within scope of individual responsibility</p> |
| 2 Undertake basic preservation activities | <p>2.1 Undertake <i>basic preservation activities</i> within scope of responsibility as agreed with a conservator and in accordance with <i>organisational plans and policies</i></p> <p>2.2 Correctly apply techniques in a manner which</p> |

ELEMENT

PERFORMANCE CRITERIA

- maintains the integrity of the *cultural material*
- 2.3 Record data generated in the course of activities clearly and accurately in the appropriate format
- 2.4 Follow *health, safety and environmental requirements* at all times
- 2.5 Ensure that ethical and *cultural protocols* are adhered to at all times

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

Required knowledge

- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

Context of and specific resources for assessment

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.

Holistic assessment with other units relevant to the

EVIDENCE GUIDE

industry sector, workplace and job role is recommended, for example:

- CULMS009B Implement preventive conservation activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities to develop, update and maintain knowledge of preservation issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

Basic preservation activities will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.

RANGE STATEMENT

Organisational plans and policies vary in structure and name but may include:

- preservation plans
- conservation plans
- collection management policies
- disaster preparedness policies

Cultural material is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

Health, safety and environmental requirements may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

RANGE STATEMENT

Cultural protocols may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display

Competency field Preventive Conservation

CUVCOR04B Originate concept for own work and conduct critical discourse

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to originate the concept and conduct critical discourse about the concept for own work. The concept encompasses ideas, form and context for the work. The unit includes the need for research and analysis of ideas and references, plus the creation of innovative concepts. It also includes a requirement for critical and informed discourse with others about one's own work. This unit both encompasses and goes beyond unit CUVCOR03B Develop, refine and communicate concept for own work.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

This unit underpins many specialisation units and combined assessment and/or training with those units is highly recommended.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|----------------------------------|--|
| 1 Research concept ideas. | 1.1 Identify and <i>source</i> references which may inform concept development.
1.2 Critically analyse sources and references in the context of current work.
1.3 Collect, collate and analyse references to inform <i>concept</i> development. |
| 2 Generate concept. | 2.1 Develop a range of different, innovative and creative approaches for the concept based on the nature of own artistic practice.
2.2 Reflect on and integrate ideas generated from research.
2.3 Consider possible <i>constraints</i> for the concept, based on nature and purpose of work.
2.4 Continuously reflect on and appraise ideas for the concept.
2.5 Synthesise and refine concept based on research, reflection and relevant constraints. |

ELEMENT**PERFORMANCE CRITERIA**

- | | |
|--------------------------------------|---|
| 3 Conduct critical discourse. | <ul style="list-style-type: none">3.1 Identify <i>relevant individuals</i> to participate in critical <i>discourse</i> about work concepts.3.2 Identify potential ways in which discourse may be undertaken, and select the most appropriate.3.3 Provide key information on work concepts and concept <i>development</i> including influences, evaluation of options and <i>problem-solving strategies</i>.3.4 Use effective communication techniques to generate discussion, debate and critical analysis of the concept. |
| 4 Adjust and refine concept. | <ul style="list-style-type: none">4.1 Undertake own analysis of concept and challenge ideas and approaches taken.4.2 Seek input and comments from others about the concept.4.3 Re-evaluate and refine options for the concept based on own analysis and critical discourse with others. |

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to research and evaluate a wide range of source materials for the development of the concept for own work
- literacy skills sufficient to conduct a critical discourse about the concept for own work.

Required knowledge:

- a wide range of sources of information pertaining to the development of the concept
- in-depth appropriate communication methods to encourage critical discourse about the concept for own work
- the theoretical and philosophical context for concept development
- other artists/designers/curators/arts administrators and their development of concepts for their own work
- thorough knowledge of the elements and principles of design and how they may be used in the development of the concept for own work
- copyright, moral rights and intellectual property issues and legislation which assist the development and critical discourse of the concept for own work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- development of the concept through a process of selecting and critically analysing source material,

EVIDENCE GUIDE

then synthesising and refining the concept for own work

- effective participation in a critical discourse about the concept for own work which shows a command of relevant references, terminologies and ideas.

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through research and concept generation through multiple pieces of work
- interaction with others in a critical discourse about the concept for own work.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- participation in a critical discourse on the candidate's work concepts
- discussion and questioning about research and development processes
- written and/or verbal reports
- visual presentation, including diagrams, charts, slides, using digital technology
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities and people who may have literacy or numeracy difficulties e.g. speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials resources and equipment needed to source, organise and analyse information.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Source materials may include:

- company reports
- direct observation from the natural or built environment
- music and/or film/video
- myths and legends
- oral history
- photographs and other artworks
- promotional material
- range of texts/text types
- technical reports/data.

Critically analysing sources and references in the context of current work may involve:

- considering how ideas may be adapted
- considering how ideas may be challenged within work
- drawing links between references and own work
- making judgements about relevance of information and ideas.

The ***concept*** may include:

- the relationship of the work to a theoretical and historical/contemporary context
- the relationship of the work to new and emerging technology and its current and potential application
- the subject matter or theme for the work, e.g. the body; identity; land and place; political, cultural or social issues; spiritual concerns.

RANGE STATEMENT

Constraints for the concept may include:

- audience
- availability of materials, tools and equipment
- budgeting
- presentation venue/context
- sponsorship
- timeframe.

Relevant individuals may include:

- art critics and writers
- mentor
- other artists
- peer group
- supervisor.

Discourse may involve:

- electronic - video conference, Internet
- forum
- use of diagrams, charts
- visual and oral presentation
- written and visual presentation.

Influences on the *development* of the concept may include:

- discussion and debate about the concept with peers/supervisor
- the conceptual development of work by other artists/designers/curators/arts administrators
- theoretical and philosophical considerations.

Problem solving strategies may include:

- further evaluation of concept against personal affinity with the idea, social conventions and or significance and aesthetic considerations
- further reflection on concept
- innovation, thinking beyond established boundaries or conventions.

Unit Sector(s)

CUVCOR07B Use drawing techniques to represent the object or idea

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to visually represent objects or ideas. At this level, drawing techniques would be basic. This is a core unit which complements all specialisation units. It is different from the drawing specialisation units which focus on drawing as an art form. This work would usually be carried out under supervision.

This is a core unit which underpins many other specialisation units.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

This unit has linkages to all the specialisation units in the Visual Arts Craft and Design Training Package and to units from other Training Packages.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for drawing.	1.1 Correctly identify tools and materials required for basic drawing <i>techniques</i> . 1.2 Select appropriate <i>tools and materials</i> for basic drawing techniques.
2 Use basic drawing techniques.	2.1 Apply a limited range of techniques to represent the <i>object or idea</i> . 2.2 Handle tools and materials <i>safely</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product labels and instructions
- numeracy skills sufficient to deal with basic scaling and layout issues.

Required knowledge:

- general knowledge of the physical properties and capabilities of the most commonly used materials and tools for drawing
- general knowledge of different approaches to drawing and the work of other practitioners in relation to using drawing to represent an object or idea
- awareness of copyright, moral rights and intellectual property issues and legislation in relation to drawing
- overview knowledge of the elements and principles of design
- environmental and occupational health and safety issues associated with the tools and materials used in drawing work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of more than one drawing which represents the object or idea and which shows command of the basic technique/s used.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through the production of drawings.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of work in progress
- questioning and discussion of the candidate's intentions and work
- verbal or written reports
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities and people who may have literacy or numeracy difficulties e.g. speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials and resources needed to apply basic drawing techniques.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The ***object or idea*** may include a:

- ceramic piece
- design solution
- developing concept
- fibre/textile work
- movement sequence/s
- mural
- piece of jewellery or other wearable object
- prop/set/costume
- room layout
- sculpture
- stage setup
- story or narrative
- technical solution.

Techniques may include:

- application of pigment
- linear marks of differing character
- linear marks to produce illusion of form in space
- simple linear perspective
- tonal ranges to produce illusion of form in space.

RANGE STATEMENT

Materials and tools may include:

- a range of graphite pencils
- a range of papers
- board
- charcoal
- colour pencils
- drafting equipment
- measuring tools
- natural ochres
- pastels and chalks
- pigments
- rags
- sticks
- wood/bark.

Safely means:

- in accordance with relevant occupational health and safety practices and legislation.

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to produce drawings which represent and communicate the concept. This is a core unit which complements all the specialisation units. It is different from the drawing specialisation units which focus on drawing as an art form. This unit goes beyond the scope of CUVCOR07B Use drawing techniques to represent the object or idea in terms of the complexity of techniques and representation. This work would usually be carried out under supervision.

This is a core unit which underpins many other specialisation units.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

This unit has linkages to all specialisation units in the Visual Arts Craft and Design Training Package, and to units from other Training Packages.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 **Prepare to use a range of drawing techniques.**

1.1 Identify suitable techniques to represent the ***concept***.

1.2 Select tools and ***materials*** required for the identified ***techniques***.

1.3 Consider ***presentation context*** for the drawings in selecting techniques, tools and materials.

2 **Produce drawings.**

2.1 Apply a range of techniques to explore ways of representing the concept.

2.2 Assess techniques and select those which best suit representation of the concept.

2.3 Draw the concept using selected techniques.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product labels and instructions
- numeracy skills sufficient to deal with basic scaling and layout issues.

Required knowledge:

- general knowledge of the physical properties and capabilities of a range of commonly used drawing tools and materials
- general knowledge of different approaches to drawing and how other practitioners use drawing to represent the concept
- awareness of copyright, moral rights and intellectual property issues and legislation in relation to drawing
- overview knowledge of the elements and principles of design
- environmental and occupational health and safety issues associated with the tools and materials used for drawing.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of more than one drawing which demonstrate a command of the techniques and are appropriate for the presentation context.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills using a range of tools and materials to produce drawings which represent and communicate the concept.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of work in progress
- evaluation of drawings
- questioning and discussion of candidate's intentions and work
- verbal or written reports
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment of this unit requires access to the materials, resources and equipment needed to apply a number of drawing techniques.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The ***concept*** may relate to an object or idea and may include:

- crafted objects
- design concepts
- digital work
- installations
- movement sequence
- paintings or prints
- performance
- sculptures
- story, narrative
- technical solutions for a design or work.

Techniques may include:

- digital drawing techniques
- integration of text and drawing
- linear marks of differing intensity and character
- linear marks to produce illusion of form in space
- linear perspective
- scaling techniques
- tonal range to produce illusion of form in space
- use of positive/negative space.

RANGE STATEMENT

Materials may include:

- a range of graphite pencils
- a range of papers
- bark/wood
- boards
- charcoal
- colour pencils
- crayons
- inks
- natural ochres
- pastels and chalks
- pigments
- solvents
- watercolour.

The *presentation context* may include:

- design proposal
- proposal for product or work development
- proposals in response to a brief
- visualisation of a concept.

Equipment may include:

- blades
- brushes
- digital technology
- drawing and design applications
- measuring tools
- printer
- rags
- scanner
- sponges
- sticks.

| <p>2 Determine purpose for drawings.</p> | <p>2.1 Identify purpose, scope and presentation context of <i>drawing</i> requirements.</p> <p>2.2 Identify any technical requirements or specifications.</p> <p>2.3 Select a range of possible techniques taking into account communication of the concept and the presentation context.</p> |
| <p>3 Explore drawing techniques and produce drawings.</p> | <p>3.1 Select appropriate materials and tools for drawing.</p> <p>3.2 Draw the concept using the range of selected techniques.</p> <p>3.3 Evaluate suitability of each technique in terms of its success in communicating the concept within the presentation context.</p> <p>3.4 Select the drawing/s which best communicate/s the concept within the presentation context.</p> <p>3.5 Prepare drawing/s for the identified presentation context.</p> |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product safety labels and instructions and to prepare drawings for presentation
- numeracy skills sufficient to determine layout issues and to deal with scaling.

Required knowledge:

- physical properties and capabilities of a wide range of materials and tools used in drawing
- general knowledge of the elements and principles of design and their specific application to drawing
- general knowledge of different approaches to drawing and how other practitioners use drawing to represent the concept
- awareness of copyright, moral rights and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety issues associated with the tools and materials used for drawing.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of a series of drawings which demonstrate a command of the selected techniques and which successfully communicate the concept.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills using selected tools and materials to produce and present drawings which represent and communicate the concept.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of the production of drawings
- evaluation of drawings
- questioning and discussion about candidate's intentions and the work outcome
- verbal or written reports
- review of portfolios of evidence
- third party workplace reports of performances by the candidate.

Assessment of this unit requires access to the materials, resources and equipment needed to apply drawing techniques to represent and communicate the concept.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The ***concept*** may relate to an object or idea and may include:

- crafted objects
- design concepts
- digital work
- installations
- movement sequence
- paintings or prints
- performance
- sculptures
- story, narrative
- technical solutions for a work or design.

Sources of information may be:

- catalogues
- colour charts and boards
- nature
- stories or narratives
- technical texts
- the work of other artists and designers.

Techniques may include:

- digital drawing techniques
- integration of text and drawing
- linear marks of differing intensity and character
- linear marks to produce illusion of form in space
- linear perspective
- positive/negative space
- scaling techniques
- tonal range to produce illusion of form in space
- washes.

RANGE STATEMENT

Materials may include:

- a range of graphite pencils
- a range of papers
- bark/wood
- boards
- charcoal
- colour pencils
- crayons
- inks
- natural ochres
- pastels and chalks
- pigments
- solvents
- watercolour.

The *presentation context* may include:

- exhibition proposals
- grant applications
- projections
- proposals for product development
- proposals in response to a brief
- publications
- visualisation of a object, product or idea.

Preparing *drawings* for presentation may involve:

- adding captions, text to drawings
- cleaning drawings
- mounting drawings
- preparing drawings for printing/reproducing
- scanning drawings and preparing them for electronic storage or transmissions.

The purpose and scope of the *drawings*:

- relate to their presentation context.

RANGE STATEMENT

Equipment may include:

- air brush
- blades
- brushes
- computer
- digital camera
- drawing and design applications
- printer
- rags
- scanner
- sponges
- sticks.

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to use a range of CADD program functions and features to produce drawings. People working in many industries require the skills and knowledge in this unit, and the unit is written to allow for contextualisation to a particular industry context. Within the cultural industries this unit is relevant for people working across multiple sectors. The focus of this unit is on the technical skills required to operate CADD, and design skills are found in other units within the Visual Arts Craft and Design Training Package.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

This unit has linkages to a wide range of other units in various Training Packages and combined assessment and/or training with those units would be appropriate.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Determine drawing requirements. | 1.1 Review relevant documentation/concept <i>information</i> to determine requirements and processes based on project objectives and parameters.
1.2 Liaise with relevant colleagues to confirm and clarify requirements. |
| 2 Select and set up CADD package. | 2.1 Correctly identify required hardware, software, tools and equipment for the specific project.
2.2 Correctly set up hardware and software in accordance with operating instructions and organisational procedures.
2.3 Identify and retrieve digitised information relevant to the project. |

ELEMENT	PERFORMANCE CRITERIA
3 Gather object parameters and/or measurements.	3.1 Accurately establish and record critical dimensions and data for the required <i>design</i> . 3.2 Correctly identify the requirements in relation to accuracy, tolerances and other critical information.
4 Prepare plots or drawings.	4.1 Correctly access and use <i>CADD functions and features</i> in accordance with operating instructions. 4.2 Correctly access and use <i>peripheral equipment</i> required for the project. 4.3 Prepare and review preliminary drawings in consultation with relevant colleagues.
5 Check drawings and save files.	5.1 Check designs against the project objectives and specifications in accordance with organisational procedures. 5.2 Identify and make required adjustments to designs based on review and consultation with relevant colleagues. 5.3 Store data files in accordance with operating instructions and organisational procedures.

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret and use digital information, including instructions required for the production of computer aided drawings
- numeracy skills sufficient for calculations and measurements required for the production of computer aided drawings.

Required knowledge:

- the ways in which CADD is used within a specific industry context
- basic principles of CADD
- typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing
- occupational health and safety issues associated with the use of hardware and software
- awareness of copyright, moral rights and intellectual property issues and legislation associated with the use of CADD.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- ability to use the standard features and functions of a CADD program to produce drawings
- knowledge of CADD capabilities and uses in relation to the specific industry context.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills using an industry-current CADD program to develop drawings for a specific workplace purpose.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of drawings produced by the candidate
- oral or written questioning to assess knowledge of CADD features and functions
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties e.g. speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials resources and equipment needed to produce computer-aided drawings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information required for the project may include:

- creative objectives
- measurements/dimensions, e.g. objects, space
- relevant statutory requirements, e.g. safety
- scope for making adjustments
- technical objectives.

Computer-aided ***designs*** may be required for a large range of work situations and may include:

- costume/fashion designs
- lighting plots
- object or product design
- room/site/stage layouts
- stage and set design
- visual art works and/or projects, e.g. community installations, public art, performance.

CADD functions and features to be used must include:

- drawing tools (methods for drawing lines, arcs, polylines, texts, dimensions)
- edit functions
- plotting and printing
- view displays
- working with layers.

CADD functions and feature to be used may include:

- 3D techniques, e.g. entering coordinates, displaying 3D views
- how CADD works in an integrated environment
- isometrics and perspectives
- macros
- use of attributes to make project reports.

RANGE STATEMENT

Peripheral equipment required for the project may include:

- plotters
- printers
- scanners.

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 **Determine technical drawing requirements.**

1.1 Review relevant documentation/concept information to determine ***technical drawing*** requirements.

1.2 Where appropriate, liaise with relevant colleagues to confirm and clarify technical drawing requirements.

2 **Select techniques.**

2.1 Identify and select appropriate ***materials, tools*** and ***equipment*** suitable for technical drawing.

2.2 Safely follow procedures to ***test*** and practise a range of technical drawing ***techniques***.

ELEMENT	PERFORMANCE CRITERIA
3 Produce technical drawings.	3.1 Select the most appropriate technical drawing technique for the work to be produced. 3.2 Select the materials, tools and equipment appropriate to the technique. 3.3 Use technical drawing techniques correctly to production drawings which are consistent with <i>concept</i> /purpose of the drawing.

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret material required to produce technical drawings
- numeracy skills sufficient for calculations and measurements required to produce technical drawings.

Required knowledge:

- physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- knowledge about technical drawing techniques and their application to a range of contexts and subject matter
- technical drawing practices, their history and theory
- awareness of copyright, moral rights and intellectual property issues and legislation
- organisational and legislative occupational health and safety procedures in relation to technical drawing work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of technical drawings which show a command of the selected techniques and meet the required purpose/objectives
- knowledge of technical drawing techniques and their application to specific contexts.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills using required materials, tools and equipment to produce technical drawings consistent with the concept/work requirements.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of the drawing in progress
- evaluation of technical drawings produced by the candidate
- questioning and discussion of the candidate's intentions and work outcome
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to produce technical drawings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Technical drawings may be:

- circuits
- diagrams
- elevations
- flow charts
- illustrations
- plans
- sections
- sketches.

Materials may include:

- acetate sheets
- chalks
- drafting film
- erasers
- inks and wet mediums
- markers
- paper
- pencils
- pens
- tape.

RANGE STATEMENT

Tools and *equipment* may include:

- computer, software applications
- cutting knives, scissors
- drafting instruments
- drafting table
- light box
- photo copier
- plotter
- printer
- rulers
- scanner
- templates.

Testing processes may involve:

- exploring techniques and materials by making practice pieces, test pieces or samples.

Techniques may include:

- computer-aided drawing
- drafting using drafting instruments
- drawing orthogonal projection
- drawing to represent scale, perspective, dimension, volume
- freehand drawing
- geometric drawing
- lettering
- rendering.

The *concept* for the technical drawing may encompass:

- aesthetic considerations
- choice of technique and materials
- presentation context.

RANGE STATEMENT

The subject matter or object to be represented may include:

- architectural structure
- electronics
- furniture
- landscape scheme
- lighting and sound set ups
- mechanics
- objects and products
- theatre, film props
- theatre, film set.

Particular safety or environmental issues may include:

- Federal, State and Territory legislation, regulations and standards
- personal protection.

1 Examine information on colour theory	<ul style="list-style-type: none">1.1 Identify and access sources of information on colour theory relevant to the brief1.2 Use knowledge of colour theory to inform work as required by the brief
2 Apply colour theories to produce samples	<ul style="list-style-type: none">2.1 Select materials, tools and equipment required for the production of colour theory samples2.2 Follow appropriate and safe procedures to apply instances of colour theory2.3 Consider outcomes in relation to colour theory and the requirements of the brief, and make adjustments accordingly2.4 Produce a range of samples which demonstrate the appropriate application of colour theory to a brief2.5 Present and store work in a format which takes account of the need for professional presentation and potential need for the samples in future work

Required Skills and Knowledge

Not applicable.

Evidence Guide

Underpinning skills and knowledge

Assessment must include evidence of the following knowledge and skills:

general knowledge of the role and nature of a brief within the design process, including different types of brief and how designers use them

awareness of the notion of individual interpretation and choice within the design process, and the potential limitations of theory

knowledge about the materials, tools and equipment required to apply colour theory

workspace organisation and maintenance including environmental and safety issues

colour attributes and colour relationships

knowledge about how other artists and designers use colour in their work

awareness of different colour theories and their applications to different contexts

awareness of emotional, cultural and situational aspects of colour

copyright, moral rights and intellectual property issues and legislation and their impact on aspects of design

literacy skills sufficient to interpret a brief

numeracy skills sufficient to calculate quantities and proportions and to determine layout issues.

Linkages to other units

This unit underpins many specialisation units, both within the Visual Arts Craft and Design Training Package, and other Training Packages, e.g. Entertainment. It is highly recommended that this unit be assessed in conjunction with those units.

Critical aspects of evidence

The following evidence is critical to the judgement of competence in this unit:

production of a range of samples which apply colour theory in accordance with the requirements of the brief

fundamental understanding of colour theory.

Method and context of assessment

The assessment context must provide for:

project or work activities that allow the candidate to access and apply colour theory knowledge to a specific context.

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

evaluation of samples

questioning and discussion

review of portfolios of evidence

third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Resource requirements

Assessment of this unit requires access to the materials resources and equipment needed to apply colour theory to a brief.

Key competencies in this unit

Key competencies are built into all workplace competencies. The table below describes those applicable to this unit. Trainers and assessors should ensure that they are addressed in training and assessment.

Level 1 = Perform

Level 2 = Administer and Manage

Level 3 = Design and Evaluate

Collecting, organising and analysing information (2)

Identifying and accessing sources of information on colour theory.

Communicating ideas and information (2)

Producing a range of samples which apply colour theory.

Planning and organising activities (1)

Following procedures to apply colour theory.

Working with others and in teams (1)

Discussing work with colleagues.

Using mathematical ideas and techniques (1)

Working out proportions for colour mixing.

Solving problems (1)

Working out colour schemes.

Using technology (1)

Using tools and equipment.

Underpinning skills and knowledge

Assessment must include evidence of the following knowledge and skills:

general knowledge of the role and nature of a brief within the design process, including different types of brief and how designers use them

awareness of the notion of individual interpretation and choice within the design process, and the potential limitations of theory

knowledge about the materials, tools and equipment required to apply colour theory

workspace organisation and maintenance including environmental and safety issues

colour attributes and colour relationships

knowledge about how other artists and designers use colour in their work

awareness of different colour theories and their applications to different contexts

awareness of emotional, cultural and situational aspects of colour

copyright, moral rights and intellectual property issues and legislation and their impact on aspects of design

literacy skills sufficient to interpret a brief

numeracy skills sufficient to calculate quantities and proportions and to determine layout issues.

Linkages to other units

This unit underpins many specialisation units, both within the Visual Arts Craft and Design Training Package, and other Training Packages, e.g. Entertainment. It is highly recommended that this unit be assessed in conjunction with those units.

Critical aspects of evidence

The following evidence is critical to the judgement of competence in this unit:

production of a range of samples which apply colour theory in accordance with the requirements of the brief

fundamental understanding of colour theory.

Method and context of assessment

The assessment context must provide for:

project or work activities that allow the candidate to access and apply colour theory knowledge to a specific context.

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

evaluation of samples

questioning and discussion

review of portfolios of evidence

third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Resource requirements

Assessment of this unit requires access to the materials resources and equipment needed to apply colour theory to a brief.

Key competencies in this unit

Key competencies are built into all workplace competencies. The table below describes those applicable to this unit. Trainers and assessors should ensure that they are addressed in training and assessment.

Level 1 = Perform

Level 2 = Administer and Manage

Level 3 = Design and Evaluate

Collecting, organising and analysing information (2)

Identifying and accessing sources of information on colour theory.

Communicating ideas and information (2)

Producing a range of samples which apply colour theory.

Planning and organising activities (1)

Following procedures to apply colour theory.

Working with others and in teams (1)

Discussing work with colleagues.

Using mathematical ideas and techniques (1)

Working out proportions for colour mixing.

Solving problems (1)

Working out colour schemes.

Using technology (1)

Using tools and equipment.

Range Statement

The following explanations identify how this unit may be applied in different workplaces, sectors and circumstances.

The brief:

describes and specifies the work to be completed

is usually prepared by commissioning body or organisation (could be supervisor, client, community organisation)

may be written, diagrammatic, visual, verbal.

Sources of information on colour theory may include:

books and magazines

art and design work

scientific texts

anecdotal sources, personal observation

characteristics of materials, e.g. paints, pigments.

Materials may include:

a range of papers

cardboard

gouache, watercolour, acrylic

pastels, colour pencils, crayons

glue

lighting materials.

Tools and equipment may include:

a range of brushes

receptacles

spray gun

air brushes

sponges

rulers

measuring tools

digital equipment

software

light sources/equipment.

Colour theory samples may be exercises in response to a brief and may involve:

colour grading

colour scales

colour attributes in hue, chroma, value

effective colour relationships, e.g. harmonies and discords

colour schemes

colour models (emotional, physical and psychological effects of colour)

the application of light, e.g. in a theatrical context.

Colour samples may be:

colour wheels

colour swatches

sample boards

photographs

digital output

transitory, e.g. natural and artificial lighting effects

drawn, painted, printed.

Producing samples may also involve the application of colour theory to a work in progress. Safe procedures are in accordance with Federal, State and Territory legislation, regulations and standards.

The following explanations identify how this unit may be applied in different workplaces, sectors and circumstances.

The brief:

describes and specifies the work to be completed

is usually prepared by commissioning body or organisation (could be supervisor, client, community organisation)

may be written, diagrammatic, visual, verbal.

Sources of information on colour theory may include:

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to research and apply techniques for application to graphic design. The focus of the unit is on a general knowledge of graphic design techniques and the practical application of those techniques. This is a specialisation unit and refers to a specific design form. This work requires some guidance.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed with or after the following units:

- CUVDES05B Interpret and respond to a brief
- Core Design
- At least one of the drawing units relating to the representation of the concept.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 **Interpret the graphic design brief.**

1.1 Correctly interpret the specifications of ***the brief***.

1.2 Determine the user or client for the ***graphic design*** to inform design decisions.

1.3 Clarify ***specifications, parameters or constraints*** of the brief in consultation with relevant colleagues.

1.4 Source and evaluate ***information pertinent*** to the brief.

2 **Organise resources for graphic design.**

2.1 Correctly identify the resources required for the graphic design, including ***work space, materials, tools and equipment***.

2.2 Prepare and care for resources in accordance with ***safety requirements*** and organisational requirements.

2.3 Follow storage and inventory procedures in accordance with organisational procedures.

ELEMENT**PERFORMANCE CRITERIA****3 Test design approaches for graphic design.**

- 3.1 Produce a preliminary visual representation of the brief.
- 3.2 Identify possible approaches to the design and establish *criteria for the selection* of the final *approach*.
- 3.3 Select appropriate materials, tools and equipment for the testing of approaches and techniques.
- 3.4 *Test and experiment* with a range of *techniques* and materials which might meet the requirements of the brief.
- 3.5 Evaluate testing processes against selection criteria and select the preferred approach based on the requirements of the brief.
- 3.6 *Refine* and accurately *document* the design approach based on testing processes.

4 Produce the graphic design.

- 4.1 Select and organise materials, tools and techniques for the graphic design in accordance with the design approach.
- 4.2 Produce the graphic design ensuring consistency with the selected approach and the brief.
- 4.3 Present the work in accordance with the brief specifications.

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret a brief and communicate design ideas
- numeracy skills sufficient to deal with cost, layout, resolution issues, timetabling issues.

Required knowledge:

- work and ideas of other designers
- formal elements and principles of design in relation to graphic design
- techniques, materials, tools and equipment and their application to graphic design
- types of graphic design briefs
- history and theory of design in relation to graphic design
- copyright, moral rights and intellectual property issues and legislation and their relevance to graphic design.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of graphic design work demonstrating the application of selected techniques and consistency with the requirements of the brief.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through the production of a graphic design which meets the requirements of a brief.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of graphic designs produced by the candidate
- questioning and discussion
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to safely produce graphic design work.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The brief:

- describes and specifies the work to be completed
- is usually prepared by the commissioning body or organisation, e.g. supervisor, client, community organisation
- may be written, diagrammatic, visual, verbal.

The ***graphic design*** work may be:

- advertising
- annual reports
- banners
- book design
- corporate presentations
- corporate stationery
- invitation
- logos
- posters
- visual merchandising
- web design.

Specifications would be articulated in the brief and may refer to:

- audience
- medium
- purpose
- style.

RANGE STATEMENT

Parameters or constraints may refer to:

- cost
- legal, contractual, ethical and copyright considerations
- material characteristics
- quantity
- technology
- time frame.

Information pertinent to the brief may be about:

- client's organisational background
- health and safety considerations
- legal, contractual, ethical and copyright considerations
- product characteristics and statistics
- style considerations
- subject matter.

Work space needs may include:

- drafting table
- electronic equipment
- lighting and power requirements
- process-specific needs.

Materials may include:

- drawing implements
- inks
- range of papers of differing weights and textures
- wet mediums
- wood, board, fabrics, perspex, metal surfaces.

RANGE STATEMENT

Tools and equipment may include:

- a range of brushes
- air brush
- appropriate software, e.g. Adobe Photoshop, Illustrator, CAD, Quark Express, Powerpoint
- brushes
- computer
- digital camera
- drafting table and equipment
- hand tools
- light box
- nibs and pens
- printer
- projection equipment and screens
- scanner
- scrapers
- spatulas
- sponges
- spray cans
- spray gun
- storage devices.

Safety requirements are in accordance with:

- Federal, State and Territory legislation, regulation and standards.

Preliminary visual representation may involve:

- computer-aided drawing
- sketching
- technical drawing.

Criteria for the selection of the approach may include:

- access to materials, tools and equipment required for the production of the graphic design
- access to specialist support services
- consistency with the brief for the graphic design
- ease of application
- personal affinity with medium and materials.

RANGE STATEMENT

The *approach* may encompass:

- aesthetic considerations
- choice of medium and materials
- design solutions
- the parameters of the brief.

Testing and experimenting may involve:

- exploring techniques by making practice pieces, test pieces, mock-ups or samples
- testing materials and their application.

Techniques may include:

- digital imaging
- hand building (displays, installations, mock-ups)
- hand drawn illustration, lettering
- preparing work for printing processes.

Refining the approach may involve:

- adjustment to consideration of elements and principles of design
- adjustment to content
- adjustment to utilise the extended capabilities of the technique
- no change.

Documenting the approach may involve:

- final drawings, plans,
- illustrations, photographs
- written rationale or description.

- At least one of the drawing units relating to the representation of the concept.

There is also a strong link between this unit and the following unit:

- CUVCRS04B Produce technical drawings.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 **Interpret the brief for the illustrative work.**

- 1.1 Correctly interpret the specifications of ***the brief***.
- 1.2 Determine the user or client for the ***illustrative work*** to inform design decisions.
- 1.3 Clarify ***specifications, parameters or constraints*** of the brief in consultation with relevant colleagues.
- 1.4 Source and evaluate ***information pertinent*** to the brief.

2 **Organise resources for illustrative work.**

- 2.1 Correctly identify the resources required for the development of illustrative work, including ***work space, materials, tools and equipment***.
- 2.2 Prepare and care for resources in accordance with ***safety requirements*** and organisational requirements.
- 2.3 Follow storage and inventory procedures in accordance with organisational procedures.

ELEMENT	PERFORMANCE CRITERIA
3 Test design approaches for illustrative work.	<p>3.1 Produce a preliminary visual representation of the brief.</p> <p>3.2 Identify possible approaches to the work and establish <i>criteria for the selection</i> of the final approach.</p> <p>3.3 Select appropriate materials, tools and equipment for the testing of approaches and <i>techniques</i>.</p> <p>3.4 <i>Test and experiment</i> with a range of techniques and materials which might meet the requirements of the brief.</p> <p>3.5 Evaluate testing processes against selection criteria and select the preferred <i>approach</i> based on the requirements of the brief.</p> <p>3.6 <i>Refine</i> and accurately <i>document</i> approach to the illustrative work based on testing processes.</p>
4 Produce the illustrative work.	<p>4.1 Select and organise materials, tools and techniques for the production of the illustrative work in accordance with the preferred approach.</p> <p>4.2 Develop the illustrative work ensuring consistency with the selected approach and the brief.</p> <p>4.3 Present the illustrative work in accordance with the brief specifications.</p>

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret a brief and to communicate ideas for illustrative work
- numeracy skills sufficient to calculate quantities, costs, layout issues.

Required knowledge:

- techniques, materials, tools and equipment and their application to illustrative work
- types of briefs for illustrative work
- formal elements and principles of design in relation to illustrative work
- general knowledge about illustrators, their ideas, techniques and work
- history and theory of design in relation to illustrative work
- copyright, moral rights and intellectual property issues and legislation and their relevance to illustrative work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of illustrative work which demonstrates the application of selected techniques and which is consistent with the requirements of the brief.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through the production of illustrative work to meet the requirements of a brief.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of illustrative work produced by the candidate
- questioning and discussion
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to safely produce illustrative work.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The brief:

- describes and specifies the work to be completed
- is usually prepared by commissioning body or organisation, e.g. supervisor, client, community organisation
- may be written, diagrammatic, visual, verbal.

Illustrative work may be for:

- advertisement
- architectural illustration
- book cover
- caricature, cartoon
- illustration for urban planning
- poster
- story board for animation
- story book, children's book
- technical, anatomical, botanical illustration.

Specifications would be articulated in the brief and may refer to:

- audience
- medium
- purpose
- style.

RANGE STATEMENT

Parameters or constraints may refer to:

- cost
- finished art requirement
- legal, contractual, ethical and copyright considerations
- material characteristics
- quantity
- technology
- time frame.

Information pertinent to the brief may be about:

- client's organisational background
- health and safety considerations
- legal, contractual, ethical and copyright considerations
- product characteristics and statistics
- style considerations
- subject matter.

Work space needs may include:

- drafting table
- electronic equipment
- lighting and power requirements
- process-specific needs.

Materials may include:

- found surfaces
- glues
- inks
- marker pens
- pastels, crayons
- pencils, graphite, charcoal
- range of papers of different weights and textures
- vellum
- water based and oil based paints and mediums
- wood, board, canvas, fabrics.

RANGE STATEMENT

Tools and equipment may include:

- a range of brushes
- air brush
- computer and software applications for illustration
- digital camera
- photocopier (black and white and colour)
- printer
- scanner
- self made pen from bamboo, feather (quill)
- spatulas, scrapers, sponges, sticks
- spray cans
- steel nibs in pen holders.

Safety requirements are in accordance with:

- Federal, State and Territory legislation, regulation and standards.

Preliminary visual representation may involve:

- computer-aided exploration
- sketching.

Criteria for the selection of the approach may include:

- access to materials, tools and equipment required for the production of the illustrative work
- access to specialist support services
- consistency with the brief for the illustrative work
- ease of application
- personal affinity with medium and materials.

Techniques may include:

- cartooning
- collage
- digital imaging
- drawing for animation
- lettering, calligraphy
- line drawing
- mixed media
- stencilling
- tonal drawing
- water colouring, gouache or oil painting.

RANGE STATEMENT

Testing and experimenting may involve:

- exploring techniques by making practice pieces, test pieces, mock-ups, roughs or samples
- testing materials and their application.

The *approach* may encompass:

- aesthetic considerations
- choice of medium and materials
- solutions in terms of illustration
- the parameters of the brief.

Refining the approach may involve:

- adjustment to consideration of elements and principles of design
- adjustment to content
- adjustment to utilise the extended capabilities of the technique
- no change.

Documenting the approach may involve:

- final sketches
- material samples
- photographs
- written rationale or description.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 **Interpret the brief for the spatial design.**

- 1.1 Correctly interpret the specifications of ***the brief***.
- 1.2 Determine the user or client for the proposed ***design*** to inform design decisions.
- 1.3 Clarify ***specifications, parameters or constraints*** of the brief in consultation with relevant colleagues.
- 1.4 Source and evaluate ***information pertinent*** to the brief.

2 **Organise resources for spatial design.**

- 2.1 Correctly identify the resources required for the design, including ***work space, tools*** and ***equipment***.
- 2.2 Prepare and care for resources in accordance with ***safety requirements*** and organisational requirements.
- 2.3 Follow storage and inventory procedures in accordance with organisational procedures.

ELEMENT	PERFORMANCE CRITERIA
3 Test design approaches for spatial design.	<p>3.1 Produce a preliminary visual representation of the brief.</p> <p>3.2 <i>Identify possible approaches</i> to the design and establish <i>criteria</i> for the selection of the final <i>approach</i>.</p> <p>3.3 Select appropriate tools and equipment for the testing of approaches and <i>techniques</i>.</p> <p>3.4 Test and experiment with a range of techniques and <i>materials</i> which might meet the requirements of the brief.</p> <p>3.5 Evaluate <i>testing processes</i> against selection criteria and select the preferred approach based on the requirements of the brief.</p> <p>3.6 <i>Refine</i> and accurately <i>document</i> the design approach based on testing processes.</p>
4 Fabricate a model or aspect of the design.	<p>4.1 Evaluate the need for fabrication and the scope of work required.</p> <p>4.2 Select and organise materials, tools and techniques for fabrication in accordance with the design approach.</p> <p>4.3 Safely make the model or maquette ensuring consistency with the selected approach and the brief.</p> <p>4.4 Present the work in accordance with the brief specifications.</p>

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret a brief and to communicate design ideas
- numeracy skills sufficient to calculate quantities, costs, proportions.

Required knowledge:

- formal elements and principles of design in relation to spatial design
- techniques, materials, tools and equipment and their application to different areas of spatial design
- common formats and features of spatial design briefs
- general knowledge about other designers, their ideas, techniques and work
- history and theory of design in relation to spatial design
- copyright, moral rights and intellectual property issues and legislation and their relevance to spatial design.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit in this unit

The following evidence is critical to the judgement of competence in this unit:

- testing and use of a range of approaches and techniques for spatial design which are suited to the requirements of the brief
- knowledge of the processes and techniques used for spatial design in different contexts.

EVIDENCE GUIDE

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through the development of a spatial design to meet the requirements of a brief.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of visual documentation of the spatial design
- evaluation of plans/ models produced by the candidate
- questioning and discussion
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to safely produce a spatial design or representation of a spatial design.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The brief:

- describes and specifies the work to be completed
- is usually prepared by commissioning body or organisation, e.g. supervisor, client, community organisation
- may be written, diagrammatic, visual, verbal.

The spatial ***design*** work may include:

- exhibition design
- fit-outs for exterior spaces or environments
- foyer design
- installation for specific event
- office fit-outs
- set design.

Specifications would be articulated in the brief and may refer to:

- client needs
- dimensions
- purpose
- style.

Parameters or constraints may refer to:

- cost
- legal, contractual, ethical and copyright considerations
- material characteristics
- technology
- timeframe.

RANGE STATEMENT

- Information pertinent*** to the brief may be about:
- client's organisational background
 - health and safety considerations
 - legal, contractual, ethical and copyright considerations
 - style considerations
 - subject matter.
- Work space*** needs may include:
- drafting table
 - electronic equipment
 - lighting and power requirements
 - process-specific space needs.
- Tools and equipment*** may include:
- brushes, containers
 - camera, scanner
 - computer
 - hand tools
 - ladders
 - lighting equipment
 - power tools
 - printer
 - relevant software.
- Safety requirements*** are in accordance with:
- Federal, State and Territory legislation, regulation and standards.
- Preliminary visual representation*** may include:
- CADD
 - colour boards
 - photography/digital imaging
 - plan drawing
 - sample boards
 - sketching.

RANGE STATEMENT

Identifying possible approaches includes:

- identifying possible design solutions
- identifying possible realisation options, e.g. by means of a model, maquette, or by fabricating an aspect of the design.

Criteria may include:

- access to materials, tools and equipment required to realise the design
- consistency with the brief for the spatial design
- ease of manufacture
- personal affinity with medium and materials.

The *approach* to the brief encompasses:

- aesthetic considerations
- choice fabrication options
- design solutions
- the parameters of the brief.

Techniques would depend on design solutions and realisation options selected and may include:

- carpentry
- digital work
- glass work
- lighting
- modelling
- painting and decoration
- photography
- projection
- surface decoration
- textile/fibre work.

RANGE STATEMENT

Materials may include:

- cardboards, paper
- clays, modelling pastes
- fibres
- glass
- manufactured materials, e.g. tiles, panels, carpeting, textiles
- metals
- natural elements, e.g. water, light, wind, plants
- paints, glazes, stains
- plastics
- wood and/or wood products.

Testing processes may involve:

- exploring techniques by making practice pieces, test pieces, mock-ups or samples
- testing materials by applying stress tests, colour tests etc.

Refining the approach may include:

- adjustment to consideration of elements and principles of design
- adjustment to design solution
- adjustment to utilise the capabilities of the techniques
- no change.

Documenting the approach may involve:

- final drawings, plans, elevations
- illustrations, photographs
- models
- specifications for fabrication.

Unit Descriptor

<p>Unit descriptor</p>	<p>The standard describes the skills and knowledge required for working with and developing a concept to that stage where it becomes the basis of a creative and effective product, service or process. It covers both the response to a brief or the development of a self-initiated proposal. It does not describe the skills needed for presentation of the proposal which are covered by other units.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This standard has been developed for people whose job specifically involves designing products or services, concepts or outcomes in any sector of the cultural industries. It might be used by someone designing a new event concept, a concept for public art, a new graphic design package for a hotel/resort, a concept for multi-media installation, a concept for sound sampling, a marketing campaign, a concept for new gallery space and so on.</p> <p>The standard relates to specialist positions in enterprises such as the community development office of local government organisations, design studios, event management/promotion firms, artist-run co-operatives, theatres and galleries and museums.</p> <p>Examples of how this unit works in practice can be found in the Supporting Information section of the Training Package.</p>

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Interpret the brief or clarify need or opportunity</p>	<p>1.1. The brief, need or opportunity for innovation is explored. The context for the new product or service is investigated and clarified and the audience/user is determined.</p> <p>1.2. The purpose, desired outcome or end product, broad content, style, cost, intended audience and other relevant factors of the brief, need or opportunity are clarified.</p> <p>1.3. The purpose, goals, constraints and requirements of the final product/service/process are specified.</p>
<p>2. Develop a range of creative approaches</p>	<p>2.1. A range of different, innovative and creative approaches and concepts is generated.</p> <p>2.2. Different approaches/concepts are reviewed for feasibility, innovation, creativity, and acceptability to client or audience.</p> <p>2.3. Possible constraints are identified and the approaches/concepts are checked against these to determine feasibility.</p> <p>2.4. The social, ethical and environmental impacts of the approaches/concepts are taken into consideration.</p> <p>2.5. The effects and advantages of various combinations of activities, systems, processes, staff, materials for achieving a creative, innovative and appropriate outcome are investigated.</p> <p>2.6. The concept(s) or approach(es) that achieve the required outcome in an innovative and feasible way are selected and draft proposals representing those approaches are documented in an appropriate format.</p>
<p>3. Seek opinions of colleagues and a range of creative and technical experts/specialists</p>	<p>3.1. Proposals are discussed with colleagues and specialists.</p> <p>3.2. Creative and technical aspects of the proposals are clarified and expert advice sought where required.</p> <p>3.3. Proposals are compared with best practice examples of similar products, services or processes.</p>
<p>4. Adjust and refine proposal on the basis of advice received and evaluation</p>	<p>4.1. Determine advantages and disadvantages of each approach/strategy based on criteria such as creativity, appropriateness to the user/audience, cost-effectiveness, level of risk, potential benefits and technical feasibility.</p> <p>4.2. Proposals are evaluated and the approach which will</p>

ELEMENT	PERFORMANCE CRITERIA
	result in achieving the desired outcome is selected.
5. Develop the concept to an operational level	5.1. A detailed <i>specification</i> for the product in terms of creativity, the audience/user, budget, and technical requirements is developed. 5.2. The detailed specification is presented to the relevant parties for approval, funding or endorsement.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- the ability to use creative techniques to generate a range of innovative ideas
- the ability to communicate with a wide range of people
- research skills
- relevant technical knowledge
- appropriate ways of documenting creative proposals.

Required knowledge

- knowledge of past history of work in related areas
- knowledge of the social and environmental effects of possible approaches
- specialist knowledge relating to issues within the specific work contexts within cultural industries
- technical principles and knowledge appropriate to the area covered by the concept
- communication principles
- the variety of methods and materials available.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • generation and evaluation of creative and effective concepts • translation of an original idea into a concrete proposal which is documented and reviewed using appropriate methods.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • interaction with others to reflect the collaborative nature of the development process.
Method of assessment	<p>Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of the candidate participating in discussions and other collaborative activities to evaluate ideas or solutions • oral or written questioning to assess knowledge of the social and environmental impacts of relevant products, services or processes.
Guidance information for assessment	<p>This competency standard could be assessed on its own or in combination with other competencies relevant to the job function within the cultural industries work context.</p> <p>The other standards would probably most appropriately be at AQF level 4 and above and may include:</p> <ul style="list-style-type: none"> • CUVADM11B Work within an arts organisation context • CUVDES04B Integrate colour theory and design processes in response to a brief • CUVCON06B Develop concepts for arts

EVIDENCE GUIDE	
	<p>organisations or projects</p> <p>Please note: the above is a generic list which may apply across the cultural industries. Some of the units may not be included in this particular Training Package.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Products might include:	<ul style="list-style-type: none"> • commissioned art work • fabric designs • furniture design • marketing campaigns • new gallery concepts • photoimaging assignments.
Purposes of the product may include:	<ul style="list-style-type: none"> • provision of services to clients within the cultural industries.
Factors to be considered may include:	<ul style="list-style-type: none"> • access to technology • audience/user characteristics • cost effectiveness • level of skill and understanding required for implementation • need for additional staff training • resource requirements • technical feasibility.
Constraints to the project may include:	<ul style="list-style-type: none"> • availability of skilled experts and personnel • cost • equipment • finance • technical difficulty

RANGE STATEMENT	
	<ul style="list-style-type: none"> time.
<p><i>Formats</i> for documentation may include:</p>	<ul style="list-style-type: none"> briefs for a consultant descriptions of a creative proposal for in-house consideration proposals to be submitted to a funding body or sponsor.
<p>Appropriate <i>colleagues and specialists</i> to discuss proposals with may include:</p>	<ul style="list-style-type: none"> any staff who may be involved in the design or the implementation of the process creative and administrative staff personnel external to the organisation technical specialists.
<p>Project <i>specifications</i> may include:</p>	<ul style="list-style-type: none"> audience budget operational plan ownership of final product purpose resources, e.g.: <ul style="list-style-type: none"> human plant and equipment time.
<p>Resources and equipment may include:</p>	<ul style="list-style-type: none"> computers, e.g.: <ul style="list-style-type: none"> hardware software specialist staff required for successful development of the proposed product or service others resources or equipment depending on the outcome required.

CUVVSP01B Produce calligraphy

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to produce calligraphic work through the exploration and application of a range of techniques, tools and materials. As such the range of techniques could be quite varied and broad in nature. It is a specialisation unit and refers to a specific art form. This work would usually be carried out under limited supervision.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed in conjunction with the following units:

- CUVVCR03B Develop, refine and communicate concept for own work
- CUVCOR08B Produce drawing to represent and communicate the concept
- CUVCOR12B Review history and theory for application to artistic practice.

Depending on the context, combined assessment and/or training with a range of other units would also be appropriate, e.g.:

- CUVCRS08B Document the work progress
- CUVCRS14B Prepare, store and maintain finished work.

Employability Skills Information

Employability skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare and maintain resources for calligraphic work.	1.1 Correctly identify and select <i>tools</i> and <i>materials</i> required for the production of calligraphic work. 1.2 Prepare, clean and maintain tools and materials in accordance with relevant <i>workplace procedures</i> and <i>safety requirements</i> . 1.3 <i>Organise and maintain</i> work space so that it remains clean and safe. 1.4 Store tools and materials in accordance with relevant workplace and safety requirements.
2 Explore calligraphic techniques to plan work.	2.1 Assess the <i>capabilities of techniques</i> , tools, and materials for different types of calligraphic work. 2.2 Use and/or combine different <i>techniques</i> , tools, and materials to determine and extend capabilities. 2.3 Determine the <i>conceptual vision</i> for the proposed calligraphic work based on exploration of different techniques or from supplied information. 2.4 Establish criteria for the selection of techniques to meet the conceptual vision. 2.5 Select techniques based on the conceptual vision. 2.6 Plan work, identifying work processes and resource requirements.
3 Realise the calligraphic work.	3.1 Organise the resources required for the production of the proposed calligraphic work based on the plan of work. 3.2 Safely use and adapt techniques, tools and materials appropriately to realise the conceptual vision. 3.3 Identify potential different approaches that may enhance the final work and incorporate these into the work process.

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product safety labels
- numeracy skills sufficient to calculate quantities and determine layout issues.

Required knowledge:

- the physical properties and capabilities of the range of materials and tools used in calligraphic work
- work space requirements for calligraphic work, including ways of organising and maintaining space
- ways of exploring, adapting and combining techniques and materials to achieve different effects in calligraphic work
- general knowledge of the formal elements and principles of design and their specific application to the production of calligraphic work
- cleaning and maintenance techniques for tools used in calligraphic work
- general knowledge of the historical and theoretical contexts for calligraphic work
- awareness of copyright, moral rights and intellectual property issues
- environmental issues associated with the tools and materials used in calligraphic work
- organisational and legislative occupational health and safety procedures in relation to calligraphic work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence

The following evidence is critical to the judgement of competence in this unit:

EVIDENCE GUIDE

required to demonstrate competency in this unit

- production of calligraphy which demonstrates a command of selected techniques and which is consistent with the conceptual vision
- knowledge of materials and tools and how they are used and extended in calligraphic work.

Context of and specific resources for assessment

The assessment context must provide for:

- evaluation of visual language and technical execution of work pieces produced by the candidate
- practical demonstration of skills using required tools, equipment and materials to produce multiple examples of calligraphic work or a single major work.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of work
- direct observation of calligraphic work in progress
- questioning and discussion of the candidate's intentions
- verbal and written reports
- review of portfolios of evidence.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to apply and extend calligraphy techniques.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tools may include:

- disposable calligraphy pens
- range of paint brushes
- self made pen from bamboo, feather (as quill), reed
- steel nibs in pen holders
- tools adapted for a specific purpose.

Materials may include:

- fabric e.g. cotton, linen or silk
- gold leaf
- gouache
- inks
- papers of differing weights and textures
- perspex, glass
- vellum
- watercolour
- wood.

Workplace procedures may relate to such things as:

- cost control
- process-specific procedures
- recycling
- reporting
- safety
- use of materials.

Safety requirements would be in accordance with:

- Federal, State and Territory legislation, regulations and standards.

RANGE STATEMENT

Organisation and maintenance of the work space may relate to:

- light
- ventilation
- wet and dry areas.

Assessing the *capabilities of the techniques*, tools and materials may involve:

- producing test pieces or samples
- systematically testing a range of processes.

Extending *capabilities of techniques* refers to:

- discovering new ways of using them
- exploring the potential of techniques.

Within this unit the candidate would generally extend, build upon and combine a range of *techniques* which may include:

- application of decoration to pen and drawn letterform
- application of pen skills for a purpose e.g. loosen up movements of the pen to make linear marks of differing intensity and character - thick sharp, thin curvilinear
- penning a range of letterforms, e.g. Roman, Uncial, Carolingian, Gothic, Italic, Foundational, Copperplate
- variation of weight and size of letterform.

The *conceptual vision* may be determined by:

- elements and principles of design
- the relationship of the work to a theoretical and historical context
- the subject matter or theme for the calligraphy, e.g. the body; identity, land and place; political, cultural, social issues; spiritual concerns.

Criteria for the selection of techniques may relate to:

- access to materials, tools and equipment for the techniques
- consistency with the conceptual vision for the proposed calligraphy
- ease of application of the techniques
- personal affinity with the techniques.

Unit Sector(s)

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to research and experiment with various techniques and media for the realisation of calligraphic work. It outlines the way calligraphic works are produced through the use of experimentation and ongoing refinement. It is a specialisation unit and refers to a specific art form. This work would usually be carried out independently, although guidance would be available if required.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed in conjunction with the following units:

- CUVCOR04B Originate concept for own work and conduct critical discourse
- CUVCOR09B Select and apply drawing techniques and media to represent and communicate the concept
- CUVCOR13B Research and critically analyse history and theory to inform artistic practice.

Depending on the context, combined assessment and/or training with a range of other units would also be appropriate, e.g.:

- CUVCRS14B Prepare, store and maintain finished work
- CUVCRR08B Document the work progress.

Employability Skills Information

Employability skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Inform work through experimentation with calligraphic techniques and media. | <ul style="list-style-type: none">1.1 Evaluate the potential for new approaches to calligraphic work based on <i>capabilities</i> of <i>techniques</i> already used.1.2 Select, adapt or introduce new <i>materials</i> and <i>tools</i> for the achievement of different effects.1.3 Extend the capabilities of <i>calligraphic</i> techniques through experimentation to inform practice.1.4 Take account of <i>particular safety or environmental issues</i> associated with the use of different techniques and media.1.5 <i>Research</i>, adapt and use relevant ideas and approaches from other practitioners with consideration of <i>intellectual property, moral rights and copyright requirements</i>. |
| 2 Develop and refine a conceptual vision for calligraphic work. | <ul style="list-style-type: none">2.1 Develop a <i>conceptual vision</i> for work based on knowledge and understanding of different calligraphic techniques.2.2 Consider the criteria for selecting techniques, material and tools based on results of experimentation.2.3 Establish criteria which are most likely to facilitate the achievement of the conceptual vision.2.4 Select approach to work which meets established criteria.2.5 <i>Refine the conceptual vision</i> based on ongoing experimentation and analysis of calligraphic techniques. |

ELEMENT**PERFORMANCE CRITERIA**

- 3 **Determine and organise resource requirements for new work.**
- 3.1 Assess specific resource requirements which arise from the use of techniques and experimental approaches.
 - 3.2 Research and access potential *sources of supply* for calligraphic resources.
 - 3.3 Evaluate *cost or other constraints* which may impact on the development of work.
 - 3.4 Set up or coordinate resource requirements in accordance with safety or other *workplace requirements*.
- 4 **Realise calligraphic work.**
- 4.1 Realise the calligraphic work using techniques and media selected from research and experimentation to meet the conceptual vision.
 - 4.2 Evaluate and respond to the potential for changes in the use of techniques, materials and tools.
 - 4.3 Refine the conceptual vision based on ongoing experiences with the production of work.
 - 4.4 Use safe working practices throughout the production of calligraphic work.
 - 4.5 Consider issues of presentation and take action accordingly.

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- research skills and sources of information to inform experimentation in calligraphic work
- literacy skills sufficient to interpret information and material about the work of other calligraphers
- numeracy skills sufficient to evaluate resource costs and to calculate layout issues.

Required knowledge:

- the role of experimentation in developing and refining concepts for calligraphy work
- detailed knowledge of physical properties and capabilities of the range of materials and tools used in calligraphic work
- the characteristics of different materials under different treatments and the potential of these characteristics to achieve different effects
- the formal elements and principles of design and how these may be used, adapted and challenged in the development of concepts for calligraphy work
- the historical and theoretical contexts for calligraphic work and how this may be used to inform own artistic practice
- copyright, moral rights and intellectual property issues and legislation associated with calligraphic work
- sources of raw, part-processed and processed materials and other resources for calligraphic work
- work space requirements for calligraphic work including selection and set up of work space for particular types of work
- environmental issues associated with the tools and materials used in calligraphic work, including the potential issues associated with new approaches
- organisational and legislative occupational health and safety procedures in relation to calligraphic work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of calligraphic work which demonstrates a highly developed command of the selected techniques and which is consistent with the conceptual vision
- in depth knowledge of techniques, materials and tools and the ways they may be adapted and extended.

Context of and specific resources for assessment

The assessment context must provide for:

- evaluation of visual language and technical execution of work pieces produced by the candidate
- practical demonstration of skills using required tools, equipment and materials to produce multiple examples of calligraphic work or a single major work.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of calligraphic work in progress, including exploration of and experimentation with techniques
- evaluation of completed work
- questioning and discussion about candidate's intentions and the work outcome
- verbal and written reports
- review of portfolios of evidence.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

EVIDENCE GUIDE

Assessment of this unit requires access to the materials and resources needed to apply calligraphy techniques and to extend them through exploration and experimentation.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Extending *capabilities* through

- experimentation encourages the exploration of the full potential of the art form and involves innovation.

Within this unit the candidate would generally demonstrate a command of a broad range of techniques as the basis for experimentation and innovation. *Techniques* may include:

- lettering fully integrated with decorated elements, e.g. a letter of the alphabet intertwined with illustrated plant
- letters formed with illusion of depth
- letters formed with linear perspective (vanishing points)
- overlay of text in translucent materials
- text over collaged imagery in a range of styles.

RANGE STATEMENT

Materials may include:

- fabric, e.g. cotton, linen or silk
- gesso, impasto
- gold leaf
- gouache
- inks
- papers of differing weights and textures
- perspex, glass
- vellum
- watercolour
- wood.

Tools may include:

- air brushes
- Asian brushes
- disposable calligraphy pens
- self made pen from bamboo, feather (as quill)
- steel nibs in pen holders
- tools adapted for specific purposes.

Techniques for **calligraphy** may also include extending, building upon and combining the following techniques:

- application of decoration to pen and drawn letterform
- application of pen skills for a purpose, e.g. loosen up movements of the pen to make linear marks of differing intensity and character thick sharp, thin curvilinear
- penning a range of letterforms, e.g. Roman, Uncial, Carolingian, Gothic, Italic, Foundational, Copperplate
- variation in weight and size of letterform.

Particular safety or environmental issues may include:

- Federal, State and Territory legislation, regulations and standards
- personal protection
- recycling
- safe disposal of waste.

RANGE STATEMENT

- Research*** may involve:
- approaching individuals with relevant expertise
 - attending lectures and talks
 - conducting material and technical experiments and tests
 - seeking out information in books, journals, newspapers
 - visiting exhibitions, museums.
- Intellectual property, moral rights and copyright requirements*** may relate to:
- extent to which the work may be used
 - procedures for seeking permission to use the work of others, including systems for the administration of copyright
 - protocols for the adaptation of work by others.
- The ***conceptual vision*** may be determined by:
- elements and principles of design
 - the relationship of the work to a theoretical and historical context
 - the subject matter or theme for the ceramic work, e.g. the body; identity; land and place; political, cultural, social issues; spiritual concerns.
- Refining the conceptual vision*** may include:
- adjustment to consideration of elements and principles of design
 - adjustment to subject matter or theme
 - adjustment to utilise the extended capabilities of the technique
 - no change.
- Sources of supply*** may include:
- commercial outlets
 - found objects or materials
 - manufacturing or factory waste
 - nature.
- Cost and other constraints*** may relate to:
- availability of materials and tools
 - budgeting
 - sponsorship
 - timeframe.

RANGE STATEMENT

Workplace requirements may include:

- drying space
- lighting
- ventilation
- wet and dry areas.

Issues of presentation may include:

- cost
- practical considerations
- presentation context
- timeframe.

Taking action may involve:

- deciding on presentation method
- seeking external assistance (framing, bookbinding, printing)
- selecting and preparing work for presentation.

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to use techniques, materials and tools for the production of drawings. As such the unit covers general knowledge and the application of basic techniques, which would generally be nominated by the supervisor.

It is a specialisation unit and refers to a specific art form. This work would usually be carried out under supervision. It therefore differs from the units which relate to core drawing techniques for concept representation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed in conjunction with:

- CUVCOR01B Source concept for own work or
- CUVCOR02B Develop and articulate concept for own work
- CUVCOR07B Use drawing techniques to represent the object or idea or
- CUVCOR08B Produce drawings to represent and communicate the concept.

It could also be assessed in conjunction with:

- CUVCOR11B Source information on history and theory and apply to own area of work.

Depending on the context, combined assessment and/or training with a range of other units would also be appropriate, e.g.:

- CUVCRS13B Store finished work.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare and maintain physical resources to produce drawings.	<p>1.1 Correctly identify and select <i>tools</i> and <i>materials</i> required for the production of drawings.</p> <p>1.2 Prepare, clean and maintain tools and materials in accordance with relevant <i>workplace procedures</i> and safety requirements.</p> <p>1.3 <i>Organise and maintain</i> work space so that it remains clean and safe.</p> <p>1.4 Store tools and materials in accordance with relevant workplace procedures and safety requirements.</p>
2 Use and test drawing techniques.	<p>2.1 Safely use <i>techniques</i> for the production of drawings.</p> <p>2.2 Use and <i>test</i> nominated techniques to determine the capability of the technique and its application.</p>
3 Produce the drawings.	<p>3.1 Determine <i>concept for the proposed drawings</i> based on own ideas or supplied information.</p> <p>3.2 Correctly identify the steps and resources required to produce the proposed drawings.</p> <p>3.3 Select appropriate tools and materials for the specific drawings.</p> <p>3.4 Calculate correct quantities of materials required and minimise waste where possible.</p> <p>3.5 Use techniques, tools and materials safely to produce the final drawings.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product safety labels
- numeracy skills sufficient to calculate quantities.

Required knowledge:

- general knowledge of physical properties and capabilities of the most commonly used materials and tools used in drawings
- general knowledge of different styles of drawing and the work of key practitioners
- overview knowledge of the formal elements and principles of design
- introductory knowledge of the historical and theoretical contexts for drawing
- typical work space and tool requirements for the production of different types drawings
- cleaning and maintenance techniques for tools used in drawing
- awareness of copyright, moral rights and intellectual property issues
- environmental issues associated with the tools and materials used in drawing
- organisational and legislative occupational health and safety procedures in relation to drawing.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- production of drawings which demonstrate a command of nominated techniques and which

EVIDENCE GUIDE

reflect the concept

- general knowledge of tools and materials used in drawing.

Context of and specific resources for assessment

The assessment context must provide for:

- evaluation of visual language and technical execution of work pieces produced by the candidate
- practical demonstration of skills using required tools, equipment and materials to produce a minimum of one drawing.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of drawings in progress
- questioning and discussion of candidate's intentions and work
- written or verbal reports
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to produce drawings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tools may include:

- brushes
- digital equipment, software and printer, discs, CDs
- rags
- scrapers
- spatulas
- sponges
- sticks.

Materials for drawing may include:

- charcoal
- ink and wash
- papers
- pastels, chalks and crayons
- pencils from B-6B
- watercolour.

Workplace procedures may relate to such things as:

- cost control
- process-specific procedures
- recycling
- reporting
- safety
- use of materials.

Organisation and maintenance of the work space may relate to:

- lighting
- ventilation
- wet and dry areas
- work tables, easels.

RANGE STATEMENT

Within this unit the range of *techniques* used would generally be quite limited in nature and may include:

- digital drawing techniques
- linear marks of differing intensity and character, e.g. thick, sharp, thin, curvilinear, soft (side of pencil or crayon)
- linear marks to produce illusion of 3D form
- simple linear perspective through the use of a vanishing point
- tonal range to produce illusion of 3D form
- using mixed drawing media and a range of techniques to produce drawings.

Testing techniques may include:

- experimenting directly with work in progress
- exploring techniques by making practice pieces
- making samples applying nominated techniques.

The *concept for the proposed drawings* may be influenced by:

- elements and principles of design
- the subject matter or theme for the work, e.g. the body; identity; land and place; political, cultural, social issues; spiritual concerns.

Unit descriptor

This unit describes the skills and knowledge required to produce drawings through the exploration and application of a range of techniques, tools, equipment and materials. As such the range of techniques could be quite varied and broad in nature.

It is a specialisation unit and refers to a specific art form statement. This work would usually be carried out under limited supervision. It therefore differs from the units which relate to core drawing techniques for concept representation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed in conjunction with the following units:

- CUVCOR03B Develop, refine and communicate concept for own work
- CUVCOR08B Produce drawings to represent and communicate the concept
- CUVCOR12B Review history and theory for application to artistic practice.

Depending on the context, combined assessment and/or training with a range of other units would also be appropriate, e.g.:

- CUVCRS08B Document the work progress
- CUVCRS14B Prepare, store and maintain finished work.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Prepare and maintain resources to produce drawings. | <ul style="list-style-type: none">1.1 Correctly identify and select <i>tools</i>, and <i>materials</i> required for the production of drawings.1.2 Prepare, clean and maintain tools and materials in accordance with relevant <i>workplace procedures</i> and <i>safety requirements</i>.1.3 <i>Organise and maintain</i> work space so that it remains clean and safe.1.4 Store tools and materials in accordance with relevant workplace and safety requirements. |
| 2 Explore drawing techniques to plan work. | <ul style="list-style-type: none">2.1 <i>Assess the capabilities of techniques</i>, tools and materials for different types of drawings.2.2 Use and/or combine different <i>techniques</i>, tools and materials to determine and extend capabilities.2.3 Determine the <i>conceptual vision</i> for the proposed drawings based on exploration of different techniques or from supplied information.2.4 Establish <i>criteria for the selection of techniques</i> to meet the conceptual vision.2.5 Select techniques based on the conceptual vision.2.6 Plan work, identifying work processes and resource requirements. |
| 3 Realise drawings. | <ul style="list-style-type: none">3.1 Organise the resources required for the production of the proposed drawings based on the plan of work.3.2 Safely use and adapt techniques, tools and materials appropriately to realise the conceptual vision.3.3 Identify potential different approaches that may enhance the final work and incorporate these into the work process. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to read product safety labels
- numeracy skills sufficient to calculate quantities.

Required knowledge:

- the physical properties and capabilities of the range of materials and tools used in drawing
- work space requirements for drawing, including ways of organising and maintaining space
- ways of exploring, adapting and combining techniques and materials to achieve different effects in drawing
- general knowledge of the formal elements and principles of design and their specific application to the production of drawings
- cleaning and maintenance techniques for tools used in drawing
- general knowledge of the historical and theoretical contexts for drawing
- awareness of copyright, moral rights and intellectual property issues
- environmental issues associated with the tools and materials used in drawing
- organisational and legislative occupational health and safety procedures in relation to drawing.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate

The following evidence is critical to the judgement of competence in this unit:

EVIDENCE GUIDE

competency in this unit

- production of drawings which demonstrates a command of selected techniques and which is consistent with the conceptual vision
- knowledge of materials and tools and how they are used and extended in drawing.

Context of and specific resources for assessment

The assessment context must provide for:

- evaluation of visual language and technical execution of work pieces produced by the candidate
- practical demonstration of skills using required tools, equipment and materials to produce multiple drawings or a single major work.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- direct observation of drawings in progress
- questioning and discussion of the candidate's intentions and work outcome
- verbal and written reports
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials and resources needed to produce drawings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tools may include:

- blades
- brushes
- computer, scanner, printer and relevant software
- discs, CDs
- rags
- scrapers
- spatulas
- sponges
- sticks.

Materials may include:

- charcoal
- graphite
- ink and wash
- pastels and chalks
- pencils from H-HB, B-9B
- range of papers of differing weights and textures
- watercolour
- wood, board, fabrics of differing weights and textures, glass, perspex or metal surfaces.

Workplace procedures may relate to such things as:

- cost control
- process-specific procedures
- recycling
- reporting
- safety
- use of materials.

RANGE STATEMENT

Safety requirements would be in accordance with:

- Federal, State and Territory legislation, regulations and standards.

Organisation and maintenance of the work space may relate to:

- lighting
- wet and dry areas
- working tables, easels.

Assessing the capabilities of the techniques, tools and materials may involve:

- experimenting directly with work in progress
- producing test pieces or samples
- systematically testing a range of processes.

Within this unit the candidate would generally extend, build upon and combine a range of ***techniques*** which may include:

- combination of erasing and layering of marks in a range of media
- digital drawing techniques
- layering of marks in a range of media
- overlapping or superimposing translucent marks over other translucent imagery
- using mixed drawing media and a range of techniques to produce drawings, e.g. 'wet' techniques over 'dry' techniques.

Techniques may also include extending and building upon the following techniques:

- linear marks of differing intensity and character, e.g. thick, sharp, thin, curvilinear, soft (side of pencil or crayon)
- linear marks to produce illusion of 3D form
- simple linear perspective through the use of a vanishing point
- tonal range to produce illusion of 3D form.

The ***conceptual vision*** may be determined by:

- elements and principles of design
- the relationship of the work to a theoretical and historical context
- the subject matter or theme for the drawings, e.g. the body; identity; land and place; political, cultural, social issues; spiritual concerns.

RANGE STATEMENT

Criteria for the selection of techniques may relate to:

- access to materials, tools and equipment for the techniques
- consistency with the conceptual vision for the proposed drawings
- ease of application of the techniques
- personal affinity with the techniques.

Unit Sector(s)

Not Applicable

HLTFA301B Apply first aid

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	<p>1.1 Identify assess and minimise hazards in the situation that may pose a risk of injury or illness to self and others</p> <p>1.2 Minimise immediate risk to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements</p> <p>1.3 Assess casualty and identify injuries, illnesses and conditions</p>
2 Apply first aid procedures	<p>2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness</p> <p>2.2 Use available resources and equipment to make the casualty as comfortable as possible</p> <p>2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner</p> <p>2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort</p> <p>2.5 Seek consent from casualty prior to applying first aid management</p> <p>2.6 Provide first aid management in accordance with established first aid principles and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements</p> <p>2.7 Seek first aid assistance from others in a timely manner and as appropriate</p> <p>2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures</p>

- 2.9 Use safe manual handling techniques as required
- 2.1 Monitor **casualty's condition** and respond in accordance with effective first aid principles and procedures
- 2.1 Finalise casualty management according to casualty's needs and first aid principles
- 3 Communicate details of the incident
 - 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant **communication media and equipment**
 - 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
 - 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
 - 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
 - 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate own performance
 - 4.1 Seek feedback from **appropriate clinical expert**
 - 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
 - 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

ARC Guidelines relating to provision of first aid as outlined

Working knowledge of:

basic principles and concepts underlying the practice of first aid

procedures for dealing with major and minor injury and illness

priorities of management in first aid when dealing with life threatening conditions

basic occupational health and safety requirements in the provision of first aid

infection control principles and procedures, including use of standard precautions

chain of survival

first Aiders' skills and limitations

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

First aid management of:

abdominal injuries

allergic reactions

altered and loss of consciousness

bleeding

burns - thermal, chemical, friction, electrical

cardiac arrest

casualty with no signs of life

chest pain

choking/airway obstruction

injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

envenomation - snake, spider, insect and marine bites

environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke

fractures

medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

near drowning

poisoning and toxic substances (including chemical contamination)

respiratory distress

seizures

shock

stroke

substance misuse - common drugs and alcohol, including illicit drugs

Awareness of stress management techniques and available support

Social/legal issues:

duty of care

need to be culturally aware, sensitive and respectful

importance of debriefing

confidentiality

own skills and limitations

Essential skills:

Ability to:

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit **HLTCPR201A Perform CPR**)

Apply first aid principles

Infection control, including use of standard precautions

Follow OH&S guidelines

Demonstrate:

safe manual handling

consideration of the welfare of the casualty

ability to call an ambulance

site management to prevent further injury

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions

Administer medication in line with state/territory regulations, legislation and policies

Prepare a written incident report or provide information to enable preparation of an incident report

Communicate effectively and assertively in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evaluate own response and identify appropriate improvements where required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:	Preserve life Prevent illness, injury and condition(s) becoming worse Promote recovery Protect the unconscious casualty
Vital signs include:	Consciousness Breathing Circulation
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	Physical hazards Biological hazards Chemical hazards Hazards associated with manual handling
Risks may include:	Risks from equipment, machinery and substances Risks from first aid equipment Environmental risks Exposure to blood and other body substances Risk of further injury to the casualty Risks associated with the proximity of other workers and bystanders Risks from vehicles

Casualty's condition is managed for:

Abdominal injuries
Airway obstruction
Allergic reactions
Altered and loss of consciousness
Bleeding
Burns - thermal, chemical, friction, electrical
Chest pain/cardiac arrest
Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
Near drowning
Envenomation - snake, spider, insect and marine bites
Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
Fractures
Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
No signs of life
Poisoning and toxic substances (including chemical contamination)
Respiratory distress/arrest
Seizures
Shock
Stroke
Substance misuse - common drugs and alcohol, including illicit drugs.

First aid management must take into account applicable aspects of:

The setting in which first aid is provided, including:

workplace policies and procedures
industry/site specific regulations, codes etc.

OHS requirements

state and territory workplace health and safety legislative requirements

location and nature of the incident

situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents

location of emergency services personnel.

The use and availability of first aid equipment and resources

Infection control

Legal and social responsibilities of first aider

Resources and equipment are used appropriate to the risk to be met and may include:

AED

First aid kit

Auto-injector

Puffer/inhaler

Resuscitation mask or barrier

Spacer device

Communication media and equipment may include but are not limited to:

Telephones, including landline, mobile and satellite phones

HF/VHF radio

Flags

Flares

Two way radio

Email

Electronic equipment

Hand signals

Appropriate clinical expert may include:

Supervisor/manager

Ambulance officer/paramedic

Other medical/health worker

Documentation may include:

Injury report forms

Workplace documents as per organisation requirements

Documentation may include recording:

Time

Location

Description of injury

First aid management

Fluid intake/output, including fluid loss via:

blood

vomit

faeces

urine

Administration of medication including:

time

date

person administering

dose

Vital signs

Unit Sector(s)

LMTTF2014A Weld plastic materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to weld plastic materials within the safe operating parameters of the equipment used.

Application of the Unit

Application of the Unit

This unit applies to hot air and hot wedge welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as:

- operational indoor workplaces
- operational outdoor workplaces
- hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with planning and organising for the safe and effective use of welding processes and technology. This unit also requires an ability to interpret and communicate job related information, check the quality of outcomes and identify and address problems relating to own work. Self management skills are applied to ensure workplace and quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select welding process and plan the work	1.1 Nature of <i>material</i> to be welded is determined and an appropriate welding process is selected 1.2 Work is planned to maximise safety and productivity 1.3 Suitable electrical power outlets, if required, are identified 1.4 Safe working environment is established 1.5 Workplace procedures and instructions are read and interpreted
2 Prepare welding equipment	2.1 Appropriate hand-held or stationary manual <i>welding equipment</i> is selected 2.2 Welding equipment is checked for serviceability 2.3 Correct 'power on' procedures are followed
3 Select, use and store tools	3.1 Appropriate supplementary <i>hand and power tools</i> are selected for the job 3.2 Tools are examined for damage, missing components or other defects (including frayed power cords where applicable) 3.3 Extension power cables are checked for knots and insulation damage 3.4 Electrical tools are connected safely to power supply 3.5 Safety equipment is used during tool operation in accordance with <i>OHS practices</i> 3.6 Required tasks are performed using tools in accordance with OHS practices 3.7 Tools are located in a safe position when not in use 3.8 Tools and extension cords are cleaned and stored in accordance with industry and workplace OHS practices
4 Perform welding	4.1 Surfaces of material are prepared for welding 4.2 Material is laid out on working table or other suitable surface 4.3 Material is anchored to prevent movement 4.4 Equipment temperature is adjusted to prescribed settings 4.5 Screens or barriers, where fitted, are lowered prior to welding process 4.6 Welding equipment is operated in accordance with standard practice 4.7 Weld area is examined or tested for correct fusion of materials 4.8 Work piece is removed 4.9 Knowledge of welding processes are applied to perform required tasks
5 Inspect quality, labelling and	5.1 Completed weld is informally inspected to verify that it appears to be of an acceptable standard

ELEMENT	PERFORMANCE CRITERIA
documentation	5.2 Completed product is labelled or tagged and any necessary documentation completed in accordance with workplace procedures
6 Clean up and maintain equipment	6.1 Work area is cleaned and tools and electrical equipment are stowed away

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

- specific OHS requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources such as single phase, three phase and weather protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- apply work instructions and established procedures
- understand relevant technical information about plastic welding processes, materials and equipment
- use relevant hand and power tools
- use relevant chemicals and cleaning agents and dispose of waste products
- maintain work area
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe use of plastic welding equipment, hand and power tools and electrical equipment.
- follow work orders
- understand equipment and materials specifications and instructions needed for the plastic welding process
- prepare material to be welded and set up welding equipment
- perform a variety of welds with a satisfactory degree of quality consistency
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- document and communicate work related information including reporting of faults and other problems

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents
- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment

Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment

This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

Material may include

- PVC
- vinyls
- clear plastics

Welding equipment may include

- foot controlled welder
- hand welder
- hot air welder
- hot wedge welder

Hand and power tools may include

- hammers
- rasps
- files
- portable sanders

OHS practices OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:

- manual handling techniques
- standard operating procedures
- personal protective equipment
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

LMTTF3004A Perform advanced welding of plastic materials

Modification History

ELEMENT	PERFORMANCE CRITERIA
	procedures
5 Clean up and maintain equipment	5.1 Work area is cleaned and tools and electrical equipment are stowed away

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

- specific OHS requirements associated with high frequency welding equipment
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources such as single phase, three phase and weather protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- apply work instructions and established procedures
- understand relevant technical information about plastic welding processes, materials and equipment
- use relevant hand and power tools
- use relevant chemicals and cleaning agents and dispose of waste products
- maintain work area
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe use of high frequency welding equipment, hand and power tools and electrical equipment.
- follow work orders
- understand equipment and materials specifications and instructions needed for the plastic welding process
- prepare material to be welded and set up welding equipment
- perform a variety of welds with a satisfactory degree of quality consistency
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- document and communicate work related information including reporting of faults and other problems

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents
- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment

Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment

This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements	All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.
Material may include	<ul style="list-style-type: none"> • PVC • vinyls • clear plastics
Welding equipment may include	<ul style="list-style-type: none"> • high frequency welder
Hand and power tools may include	<ul style="list-style-type: none"> • hammers • rasps • files • portable sanders
OHS practices	<p>OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:</p> <ul style="list-style-type: none"> • manual handling techniques • standard operating procedures • personal protective equipment • safe materials handling • taking of rest breaks • ergonomic arrangement of workplaces • following marked walkways • safe storage of equipment • housekeeping • reporting accidents and incidents • other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

MEM05003B Perform soft soldering

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit applies to performing soft soldering applications of ferrous and non-ferrous materials, using straightforward techniques, where heat damage to components or finish of soldered joint is not critical.
------------------------	--

Application of the Unit

Application of the unit	<p>All work is undertaken to predetermined standards of quality, safety and procedures.</p> <p>Techniques of applying soft solder may include the use of soldering irons (all types) and direct flame or other heating devices. Preparation of materials includes cleaning, deburring, twisting of conductors and fluxing.</p> <p>Depending on the actual soldering job, hand and power tools and drawing and interpretation skills may be required. These are covered by units MEM18001C (Use hand tools), MEM18002B (Use power tools/hand held operations) and MEM12023A (Perform engineering measurements).</p> <p>This unit should not be selected if Unit MEM05001B (Perform manual soldering/desoldering - electrical/electronic components) or Unit MEM10002B (Terminate and connect electrical wiring) has already been selected.</p> <p>Band: A</p> <p>Unit Weight: 2</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify job requirements	1.1. Soldering requirements are identified and correctly understood from job sheets or instructions.
2. Undertake soft soldering	2.1. Tools, equipment and consumables appropriate to the task are assembled and prepared for use as required. 2.2. Materials to be soldered are prepared, arranged and checked as required, to ensure solder joint meets specifications. 2.3. Correct techniques are used to apply soft solder to standard operating procedures. 2.4. Solder joint is cleaned and checked for conformance to specifications using standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- using soldering irons
- using direct flame and other heating devices
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction

Required knowledge

Look for evidence that confirms knowledge of:

- the effect of material to be soft soldered on the selection of consumables
- the reasons for preparing surfaces prior to soldering
- the procedures for rectifying defects in soldered joints
- use and application of personal protective equipment for soft soldering
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform soft soldering.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication materials handling, recording and reporting associated with performing soft soldering or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tools	Soldering irons (all types) and direct flame or other heating devices
Materials	Ferrous and non-ferrous

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification. 2.9. Shape/size/length is to accepted workplace standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings

REQUIRED SKILLS AND KNOWLEDGE

- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment
- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Correct electrodes are selected to suit application and settings.
4. Perform routine welding using MMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

Required knowledge

Look for evidence that confirms knowledge of:

- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties

REQUIRED SKILLS AND KNOWLEDGE

- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use hand tools and formers	1.1. Hand tools and formers are correctly selected for specific forging techniques. 1.2. Hand tools and formers used correctly.
2. Apply hand forging techniques	2.1. Knowledge of drawing, swaging, bending, upsetting, spreading, punching and drifting techniques is applied to produce articles to specification. 2.2. Forging temperatures and heat specifications are adhered to for various materials. 2.3. Allowance is made for material shrinkage and oxidation 2.4. Appropriate forging technique is selected and applied.
3. Operate heating equipment	3.1. Heating equipment is set up and operated correctly. 3.2. Equipment is operated in a manner that minimises oxidation. 3.3. Heat is controlled to specified areas.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: <ul style="list-style-type: none"> • selecting and using hand tools and formers • applying hand forging techniques • determining correct forging temperatures • setting up and operating heating equipment
Required knowledge
Look for evidence that confirms knowledge of: <ul style="list-style-type: none"> • range of hand tools, formers used in hand forging • hand forging techniques (drawing, swaging, bending, upsetting, spreading, punching, drifting) • how to calculate mean diameter, length, circumference

REQUIRED SKILLS AND KNOWLEDGE

- source of information on forging temperatures
- heat specifications for various materials
- effects of and allowances for material shrinkage and oxidation
- the application, set up, and means of adjustment of a range of heating equipment
- use and application of personal protective equipment
- safe work practices and procedures
- hazards and control measures associated with hand forging, including housekeeping

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to use hand tools and formers, apply hand forging techniques and operate heat treatment equipment. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with hand forging of low to medium carbon and alloy steels using a variety of techniques, tools formers and heating devices or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select correct technical drawing	1.1. Drawing is checked and validated against job requirements or equipment. 1.2. Drawing version is checked and validated.
2. Interpret technical drawing	2.1. Components, assemblies or objects are recognised as required. 2.2. Dimensions are identified as appropriate to field of employment. 2.3. Instructions are identified and followed as required. 2.4. Material requirements are identified as required. 2.5. Symbols are recognised in the drawing as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- checking the drawing against job requirements/related equipment in accordance with standard operating procedures
- confirming the drawing version as being current in accordance with standard operating procedures
- where appropriate, obtaining the current version of the drawing in accordance with standard operating procedures
- reading, interpreting information on the drawing, written job instructions, specifications, standard operating procedures, charts, lists and other applicable reference documents
- checking and clarifying task related information
- undertaking numerical operations, geometry and calculations/formulae within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- application of AS1100.101 in accordance with standard operating procedures
- relationship between the views contained in the drawing

REQUIRED SKILLS AND KNOWLEDGE

- objects represented in the drawing
- units of measurement used in the preparation of the drawing
- dimensions of the key features of the objects depicted in the drawing
- understanding of the instructions contained in the drawing
- the actions to be undertaken in response to those instructions
- the materials from which the object(s) are made
- any symbols used in the drawing as described in range statement
- hazard and control measures associated with interpreting technical drawings, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	A person who demonstrates competency in this unit must be able to interpret technical drawings as described.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interpreting technical drawings or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interpret technical drawing

AS1100.101 is an extensive work and the candidate is not required to have complete familiarity with all its contents, the application of AS1100 would usually be in line with standard operating procedures; interpretation may require guidance particularly in respect to any geometric tolerancing

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take samples	1.1. Difference between population and sample is understood and various sampling schemes are applied in accordance with standard operating procedures.
2. Apply statistical process to monitor production	2.1. Concept of variation in terms of average and spread is understood. Data is used to produce relevant statistical information. 2.2. Data is interpreted accurately and information is presented to appropriate authority according to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, standard operating procedures, charts, lists, drawings and other applicable reference documents
- applying statistical process control procedures in accordance with instructions to a given production process
- obtaining data from samples including average, range and random or assignable causes
- producing tally, run or control charts from sampling data
- reporting information from sampling data
- checking and clarifying task-related information
- completing proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- the difference between population and sample, and the concept of variation in terms of average and range, random and assignable causes
- numerical operations and statistical calculations/formulae within the scope of this unit

REQUIRED SKILLS AND KNOWLEDGE

- statistical process control procedures, which may include Six Sigma etc. and the sampling procedures to be followed
- the types of charts that can be produced to assist monitoring of products including run charts, tally charts, histograms, control charts
- procedures for reporting sample data information
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform basic statistical quality control.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access information and/or records	<p>1.1. Information requirements of tasks are determined and relevant information is accessed from a range of sources.</p> <p>1.2. Workplace terminology is correctly recognised.</p>
2. Organise and analyse information	<p>2.1. Information is interpreted and organised in accordance with enterprise and work requirements.</p> <p>2.2. Information is analysed according to enterprise and work requirements.</p>
3. Communicate organised information using established workplace methods	<p>3.1. Information is communicated using established workplace methods.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- accessing relevant information from a range of sources
- recording, where appropriate, the accessed information
- recognising and using workplace terms
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information

Required knowledge

Look for evidence that confirms knowledge of:

- types of information
- available sources of information
- information analysis techniques
- methods of categorising and organising information
- methods of recording and communicating information

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Range of sources

Job instructions, specifications, standard operating procedures, charts, lists, documents, computer data, drawings, sketches, tables, technical manuals and/or charts and other applicable reference material

Workplace terminology

Terminology - referring to equipment, processes, workplace areas, staff and procedures - specific to the processes and equipment used in the workplace

Analyse

Analysis for this unit involves simple determinations of relevance and implication for the employee's immediate work requirements

Established workplace methods

- Proforma reports
- Data entry e.g. bar coding and simple keyboard operations
- Verbal
- Drawings

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify roles and responsibilities	1.1. Own role and responsibilities are identified. 1.2. Relationships within immediate group and with employees performing related/interdependent activities are identified.
2. Plan activities	2.1. Common goals, objectives and task requirements are identified and clarified with appropriate persons. 2.2. Individual tasks are determined and agreed on according to workplace procedures.
3. Work with others	3.1. Effective interpersonal skills are applied to interact with others and to contribute to activities and objectives. 3.2. Assigned or agreed tasks are performed in accordance with agreed requirements, specifications and workplace procedures. 3.3. Work progress is reviewed and modified as agreed to complement the work of others. 3.4. Agreed reporting lines are followed using standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- contributing to planning and allocation of work
- performing assigned tasks
- coordinating work effort with others
- following agreed reporting lines
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- applying effective interpersonal skills

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Look for evidence that confirms knowledge of:

- effective interpersonal strategies and skills:
 - effective listening
 - basic speaking skills
 - use of terminology and jargon
 - giving and receiving feedback
 - checking and clarifying task-related information
 - interpreting instructions
 - basic conflict resolution
 - selecting modes and methods of communication
 - identifying and resolving communication breakdowns and barriers
 - principles of effective communication
- relationships and roles within immediate group and with interdependent others
- reporting relationships and procedures
- own responsibilities with respect to products/services to be provided
- skills and competencies of the individual and other employees performing interdependent activities
- common goals, objectives and task requirements
- sources of technical expertise/assistance
- appropriate forms of communication
- hazards and control measures associated with workplace activities, including housekeeping
- safe work practices and procedures

Unit Descriptor

Unit descriptor	This unit covers an individual effectively participating in a highly developed and self-directed team.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to participation in a formally established, developed or developing self-directed team.</p> <p>Examples are engineering production teams responsible for a product or process, maintenance teams and special-purpose project teams.</p> <p>Typically, team parameters, constraints and objectives would be determined by sources external to the team.</p> <p>The team would be responsible for all aspects of its designated function and members would have day-to-day responsibility for managing themselves and their work.</p> <p>Typical team tasks might include planning and scheduling activities, making production-related decisions and acting on problems.</p> <p>Where team parameters require adjustment as a result of team discussions or planning, then appropriate authorisation and approvals are established using standard operating procedures. Individual team participants would already be competent with technical aspects of team activities.</p> <p>This unit is intended to apply to participation within a formally established and recognised team. Where an individual works with others, such as within a section or department, unit MEM16007A (Work with others in a manufacturing, engineering or related environment) should be regarded as sufficient.</p> <p>This unit may be included in a Certificate II in Engineering - Production Technology or higher qualification.</p> <p>Band: This unit has dual status and is to be regarded as both a Specialisation band A unit and Specialisation band B unit for progression to C5 (AQF level V).</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify team function and composition	1.1. Team purpose and scope are identified and understood. 1.2. Team composition, including role of self and team members, is understood. 1.3. Established parameters, rules and team norms are identified and understood.
2. Participate in team planning	2.1. Significant contribution is made to planning the team activities, based on the individual's technical skills, knowledge and competence. 2.2. Contribution is made to the allocation and performance of team tasks.
3. Function effectively as a team member	3.1. Interaction with team members is in accordance with established rules, conventions and procedures. 3.2. Tasks and responsibilities are performed effectively and in accordance with team objectives. 3.3. Real or perceived issues are resolved by effective and appropriate contributions from team member. 3.4. Significant contribution is made to team performance, based on member's own technical skills and application of established principles and practices for effective teamwork.
4. Monitor and review team performance	4.1. The team member participates effectively in the planning and development of team review process. 4.2. Relevant performance data is collected and analysed on an individual and team basis using standard enterprise procedures and methodology. 4.3. Results are used to evaluate own and team performance against established performance indicators and to assist determination of improvement requirements. 4.4. Principles/techniques for effective team development are used to identify own/team improvement strategies.
5. Implement team performance improvements	5.1. Performance improvement processes and strategies are implemented on an individual and collective basis using standard enterprise procedures. 5.2. Individual and team performance improvements are evaluated using standard enterprise procedures. 5.3. Adjustments to improvement strategies are made in accordance with team requirements and standard

ELEMENT	PERFORMANCE CRITERIA
	enterprise procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- identifying team goals and objectives
- participating in team planning - shared and individual
- allocating tasks and sequencing activities
- communicating and interacting effectively with team members
- solving problems individually and with others
- resolving conflict
- performing various team behavioural functions - task and maintenance focused
- making individual and joint decisions
- coordinating effort with others to achieve common objectives
- collecting team performance data
- reviewing performance against indicators
- identifying strategies to improve team performance
- implementing performance improvement processes
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- checking and clarifying task-related information
- checking for conformance to specifications

Required knowledge

Look for evidence that confirms knowledge of:

- team objectives
- team targets/goals, performance indicators
- team member roles - task and behavioural
- team processes, rules and conventions
- scope of work for which the team is responsible
- methods for planning team activities
- team member technical skills, knowledge and competence, relevant to the tasks

REQUIRED SKILLS AND KNOWLEDGE

- being planned
- the person(s) responsible for team planning
- impact of planning decisions on other teams, personnel and/or resources
- procedures for obtaining resources
- structure, formation and operation of teams
- characteristics of effective teams
- strategies for effective team development/functioning
- effective team communication
- forms of team leadership and decision-making
- strategies for resolving conflict
- techniques for team problem-solving
- issues that may affect team performance
- the sources of data relevant team performance indicators
- reasons for reviewing team performance
- methods/procedures to evaluate team performance
- where appropriate, source(s) of approval to change team performance parameters
- processes/strategies for improving team performance
- hazards and control measures associated with operating in a self-directed team environment, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to operate within a self-directed team. Competency in this unit cannot be claimed until all prerequisites have been satisfied.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
<p>Context of and specific resources for assessment</p>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with operating within a self-directed team or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<p>Method of assessment</p>	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>

EVIDENCE GUIDE**Guidance information for assessment****Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Team

- A highly developed and cohesive work group in which the individuals have a common aim, and in which the jobs and skills of each member fit in with those of others
- Team members manage day-to-day activities within operating parameters and constraints
- The team is typically characterised by interdependent and complementary effort, high cohesion and culture, conjunctive tasks, effective use of team resources and a focus on continuous improvement
- The team may have a single leader or shared leadership

Principles and practices for effective teamwork

- Relating to:
- goals
 - problem solving
 - resolving conflict
 - team leadership
 - team decision making
 - team rules and norms
 - team roles and behaviours
 - team maintenance

MEM18001C Use hand tools

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand tools for a variety of general engineering applications.
------------------------	---

Application of the Unit

Application of the unit	<p>Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools.</p> <p>This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used.</p> <p>When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations).</p> <p>Band: A</p> <p>Unit Weight: 2</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: <ul style="list-style-type: none"> • reading and following information on standard operating procedures • following verbal instructions • selecting hand tools appropriate to the task • using hand tools safely • identifying hand tool defects and marking for repair • maintaining/sharpening hand tools using appropriate techniques • storing hand tools in accordance with manufacturers'/standard operating procedures
Required knowledge
Look for evidence that confirms knowledge of: <ul style="list-style-type: none"> • applications of different hand tools in a general engineering context • common faults and/or defects in hand tools

REQUIRED SKILLS AND KNOWLEDGE

- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hand tools	Hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and types
Job specifications	Finish, tension, size or shape etc.
Routine maintenance	Cleaning, lubricating, tightening, simple tool repairs, hand sharpening and adjustments using engineering principles, tools, equipment and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the CAD environment	1.1. All relevant manuals, instructions and operating procedures for the CAD software are obtained in accordance with workplace procedures. 1.2. The CAD package is booted up in accordance with workplace procedures. 1.3. Screen display areas and basic parameters are set in accordance with instructions.
2. Produce a basic drawing	2.1. Basic CAD drawings are created and guidance is sought as required. 2.2. Drawings are prepared in accordance with AS 1100 or equivalent or in accordance with standard operating procedures. 2.3. As required, CAD drawings are reviewed with supervisor and/or other designated staff in accordance with company procedures.
3. Modify existing CAD drawings	3.1. Existing CAD drawings are located and modified by adding, deleting or changing drawing elements within that drawing.
4. Produce output	4.1. Drawing files are saved in the appropriate format in accordance with standard operating procedures. 4.2. Drawing files are printed out using plotter or equivalent devices.
5. Perform exit and shut-down procedures	5.1. Programs and computer are shut down in accordance with workplace procedures.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up a three dimensional environment	1.1. Set up a three dimensional environment on the screen to allow multiple viewing.
2. Create three dimensional views	2.1. Three dimensional views are created on the screen by manipulation of drawing planes and insertion of three dimensional geometric shapes. 2.2. Any plane of the three dimensional view is drawn on. 2.3. Editing functions are used to modify three dimensional geometric shapes in creating three dimensional views.
3. Display three dimensional views	3.1. Wire line, surface and solid face displays are produced in isometric, perspective and orthographic projections.
4. Extract mass and area properties of a 3D model	4.1. The mass and surface area of a given solid model made from a nominated material is extracted.
5. Apply basic rendering techniques to a 3D model	5.1. A solid model is rendered to a specified set of criteria.
6. Save completed drawing file in various formats	6.1. File is saved in an appropriate format to enable retrieval and use in a CAD system. 6.2. File is saved in other formats to enable retrieval in other software applications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and interpreting engineering specifications
- organising information
- using computer and peripherals

REQUIRED SKILLS AND KNOWLEDGE

- using CAD program
- saving 3D modes in various file formats
- preparing drawings in plane orthogonal, isometric projection or equivalent

Required knowledge

Look for evidence that confirms knowledge of:

- region modelling techniques.
- solid modelling techniques
- development of sectioned models
- use of cutting plane
- use of cross hatching
- use of pre-drawn library files and primitives to produce a 3D model
- use of third level software to produce 3D models
- how to extract mass and area properties
- how to extract area properties from region models
- application of basic rendering techniques to a 3D model

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and apply quality standards and procedures	1.1. Quality standards and procedures are interpreted and applied to individual and teamwork in accordance with standard operating procedures.
2. Monitor and report on quality	2.1. Quality of all received, in-work and finished materials and products is monitored as required in accordance with standard operating procedures. 2.2. Designated process improvement tools are used either individually or in a team to identify and solve design, development and production quality problems. 2.3. Designated analytical tools are used to evaluate principal causes of process variation in consultation with the team or other subject experts. 2.4. Further action to improve quality is recommended, where required, using standard operating procedures.
3. Assist in implementing approved improvement strategy or strategies	3.1. Key indicators and performance measures are established and agreed in consultation with the team or other subject experts. 3.2. Process, product output is measured against key indicators in consultation with the team or other subject experts. 3.3. Steps are taken to lock in improvements in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: <ul style="list-style-type: none"> • undertaking problem solving • undertaking basic arithmetic calculations • interpreting known data • using standard texts and references • undertaking simple report writing

REQUIRED SKILLS AND KNOWLEDGE

- reading and interpreting engineering specifications

Required knowledge

Look for evidence that confirms knowledge of:

- the importance of quality
- the key principles of quality improvement programs
- the influence of variation
- use and application of Australian standards/ ISO 9000 etc.
- quality policy
- quality manuals
- quality procedures
- quality definitions
- purpose of quality audits
- simple sampling techniques and possible sources of sampling error and bias
- simple statistical tools
- problem solving techniques including:
 - process flow charts, interpretation and construction of simple case
 - cause and effect diagrams, fault trees etc.
 - root cause analysis
 - Pareto diagrams

MSACMC210A Manage the impact of change on own work

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills needed by an employee in a competitive manufacturing organisation which requires the employee to participate in and manage the impact of the implementation of competitive manufacturing initiatives on their own work life.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, an employee in a competitive manufacturing organisation is required to positively participate in ongoing and continuous change in order for them to be implemented successfully. The employee will be expected to deal with these changes as part of a team and to give feedback from their own perspective.</p> <p>This unit requires the application of skills associated with problem solving, planning and organising and self management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Examine the impact of change on own work practices	1.1. Examine changes to work flow 1.2. Examine changes to equipment/process/physical environment 1.3. Examine changes to work relationship with team members and other teams 1.4. Examine changes to data collection needs 1.5. Examine changed work for impacts on health, safety and environment 1.6. Examine changes to quality requirements 1.7. Identify any additional individual skill needs 1.8. Identify other areas requiring assistance 1.9.
2. Implement change	2.1. Review changes which may have adverse impact with team leader 2.2. Adopt changes to individual work practice 2.3. Seek assistance in gathering/processing data as required 2.4. Implement the data collection/processing and take actions on resulting information in accordance with <i>procedures</i> 2.5. Seek assistance/training to meet needs caused by change
3. Implement continuous improvement	3.1. Critically examine all changes 3.2. Identify impacts of changes both up and down the immediate <i>value chain</i> 3.3. Identify areas for improvement 3.4. Make recommendations for improvement in accordance with procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- communication
- problem solving
- reading and interpreting
- teamwork

Required knowledge

- current process and principles of operation
- sources of data on the process/plant and possible applications to information
- methods of determining own skill needs and developing skills required
- health, safety and environment (HSE) principles as relevant to own job
- basic continuous improvement principles

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the training package.	
Overview of assessment requirements	The employee will respond readily to each initiative, making its implementation easier and recommending improvements.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of commitment to a range of initiatives should be available.
What are the specific resource requirements for this unit?	Access to an organisation using competitive manufacturing.
In what context should assessment occur?	Assessment will need to occur in a workplace following competitive manufacturing.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with any other relevant unit which relates to making a change in the workplace.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>

EVIDENCE GUIDE

What evidence is required for demonstration of consistent performance?

If evidence is provided from an initial move to competitive manufacturing, then sufficient evidence may come from this initial adjustment. Where evidence is provided from a series of improvements, then it will need to be gathered from a range of initiatives to provide sufficient evidence.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Managing impact of change

All Elements may be undertaken individually or as part of a team and may require assistance from the team leader for areas outside the employee's range of responsibility and authority.

Competitive manufacturing

Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:

- lean manufacturing
- agile manufacturing
- preventative and predictive maintenance approaches
- monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP
- statistical process control systems including six sigma and three sigma
- Just In Time (JIT), kanban and other pull related manufacturing control systems
- supply, value, and demand chain monitoring and analysis
- other continuous improvement systems.

Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.

Procedures

Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.

For the purposes of this Training Package, 'procedures'

RANGE STATEMENT	
	also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Continuous improvement	Continuous improvement (also called kaizen) - the philosophy of continual improvement, that every process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.

MSACMC614A Develop a communications strategy to support production

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to develop and implement a communications strategy to support production in a competitive manufacturing environment.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, a person (who may be a manager, technical specialist or other person) is required to analyse a situation to determine the required communication strategies from a wide range of possibilities and then implement that strategy or modify an existing strategy.</p> <p>This unit primarily requires the application of skills associated with developing effective communication strategies. Problem solving, initiative and enterprise, and planning and organising are required to ensure communications are targeted and meet the needs of stakeholders. This unit also requires aspects of self management and learning to ensure improvement of own communication effectiveness.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
---------------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine information needs of employees and manufacturing systems	1.1. Examine <i>competitive manufacturing</i> strategy and determine broad information framework 1.2. Examine the production process and its requirements and determine the information needs of production employees 1.3. Examine the maintenance strategy and determine the information needed by maintenance employees 1.4. Examine the office, logistics, sales, marketing and other areas supporting production and determine the information needs of employees 1.5. Discuss information used and desired with employees at all relevant levels, and involve team and other key personnel in strategy development to ensure awareness, learning and commitment 1.6. Examine control systems to determine their data needs
2. Select communication strategy	2.1. Analyse required information flows 2.2. Determine <i>access requirements</i> by information users 2.3. Evaluate suitability of <i>communication media</i> for required information flows and access 2.4. Discuss possible strategy with relevant stakeholders 2.5. Select an appropriate strategy or strategies.
3. Implement strategy	3.1. Develop list of what needs to be done 3.2. Determine resources required to implement strategy 3.3. Obtain authority for communication media to be developed 3.4. Monitor development of communication media and take appropriate corrective action as required 3.5. Deploy developed communication media
4. Monitor ongoing situation	4.1. Determine relevant indicators for communication strategy 4.2. Monitor indicators 4.3. Re-evaluate communication needs on a regular basis

ELEMENT	PERFORMANCE CRITERIA
	4.4. Make improvements to the communication strategy as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- negotiating
- communication
- team work
- problem solving
- planning and organising

Required knowledge

- knowledge of communication media
- communication needs of the organisation and its individuals

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment requirements</p>	<p>Assessment should aim to demonstrate that the person being assessed can develop a communication strategy which will meet the information needs of a competitive manufacturing organisation and its employees.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a workplace implementing competitive manufacturing strategies is required. No other specific resources are required.</p>
<p>What critical aspects of evidence is required to demonstrate competency in this unit?</p>	<p>Evidence of developing/improving a communications strategy.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a competitive manufacturing organisation and where the individual is responsible for the communication strategy or by case study.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p>

EVIDENCE GUIDE	
	The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available from an extended period of time and may be historic if the person has been in this role for some time.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive manufacturing</p>	<p><i>Competitive manufacturing</i> is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems control and data acquisition software (SCADA), enterprise resource planning systems (ERP), Manufacturing resource planning (MRP), and proprietary systems such as SAP • statistical process control systems, including six sigma and three sigma • Just In Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.</p>
<p>Access requirements</p>	<p>Access requirements include:</p> <ul style="list-style-type: none"> • occasional access • periodic access • continual access • visual/auditory/tactile access • online/hard copy access • specific location • many or generalised locations
<p>Communication media</p>	<p>Communication media include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • manuals such as SOPs, OHS and training manuals • aide memoir • verbal • signage • instruction displays • tags, isolations/lockouts • permits to work/clearances • operator reporting • visual factory type displays • painted walkways • tools/keys/buttons with a specific feel
Stakeholders	Includes team members, personnel officers, industrial officers, union delegates, production management, human relations management, financial management, engineering/ technical personnel.

MSACMS200A Apply competitive manufacturing practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills needed to implement basic improvement practices within a competitive manufacturing organisation. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to manufacturing. It would typically be carried out working as part of a team.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, an organisation has embarked on the competitive manufacturing path. This requires certain critical skills and principles to be practised in order for competitive manufacturing to succeed. These skills are to be used within the scope of the individual's job and authority.</p> <p>This unit requires the application of skills associated with planning and organising own role within a competitive manufacturing framework. Initiative and enterprise and problem solving is also required to identify the contributions of self and others in the value chain and identify opportunities for improvement.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
---------------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Focus on the basic competitive manufacturing concepts	1.1. Identify <i>customers</i> and their needs/requirements 1.2. Identify <i>suppliers</i> 1.3. Identify value contributions along the chain 1.4. Identify and recommend methods of increasing own contribution to the value chain
2. Improve the product/process value	2.1. Identify customer features/benefits in the product 2.2. Identify items which contribute to those features/benefits 2.3. Identify things which do not contribute to customer benefits/features 2.4. Recommend methods of increasing features/benefits
3. Use competitive manufacturing tools	3.1. Select appropriate tools for the job/process 3.2. Apply the tool to the job/process 3.3. Monitor the job/process and make adjustments to improve it in accordance with <i>procedures</i> 3.4. Identify own skill requirements and seek skill development if required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- communication
- planning
- teamwork
- problem solving

Required knowledge

- the customers and the benefits they derive from the products
- the suppliers and their capabilities
- product waste
- relevant tools for their job and how to apply them
- factors impacting on the product, process and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person will work effectively in a competitive manufacturing environment, making continual positive contributions to the improvement of the business within the scope of their job.
What are the specific resource requirements for this unit?	Access is required to an organisation implementing competitive manufacturing.
What critical aspects of evidence are required to demonstrate competency in this unit?	There should be evidence of the individual's contribution to the value chain and willing application of competitive manufacturing to their job.
In what context should assessment occur?	Assessment should occur in an organisation implementing competitive manufacturing.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to all other units at this level in that it is the general implementation of competitive manufacturing. It could be assessed concurrently with any unit dealing with the <i>tools</i> of competitive manufacturing.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMS400A Implement a competitive manufacturing system</i> which covers the intermediate skill levels in CM.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p>

EVIDENCE GUIDE	
	The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	This should be a routine part of the operator's job and there should be evidence that these skills are practised routinely.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive manufacturing</p>	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP • statistical process control systems including six sigma and three sigma • Just In Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the size of the enterprise, the work organisation, culture, regulatory environment and manufacturing sector.</p>
<p>Customer</p>	<p>Customer may be interpreted to be an internal customer, but typically the benefits to the final customer should be used as the basis for the identification of waste. The operator does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and features.</p> <p>Supplier may be interpreted to be an internal supplier, but typically the external supplier and their abilities should be known. The operator does not need to interface directly with the external supplier, but should</p>

RANGE STATEMENT	
	be provided with sufficient information to enable them to identify supplier abilities.
Tools	Tools are used in this unit to mean the tools of competitive manufacturing such as 5S, 6 s , continuous improvement, cause effect diagrams
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMS201A Sustain process improvements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills needed to prevent implemented process improvements slipping back to former practices or digression to less efficient practices.
------------------------	---

Application of the Unit

Application of the unit	<p>The unit covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements.</p> <p>Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees.</p> <p>This unit applies to an environment where continuous improvement in a manufacturing enterprise is being undertaken. The identification of the improvement may occur independently of the application of this unit. The unit can be applied to all areas of a manufacturing enterprise including production, maintenance, logistics and office functions.</p> <p>This unit requires the application of skills associated with problem solving, initiative and enterprise and self management in order to understand, implement and monitor improvement practices with the operation of plant, equipment and manufacturing processes. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
---------------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement corrective actions	1.1. Identify impact of process improvements on systems in own work area 1.2. Examine process improvements to equipment, processes or products 1.3. Clarify changes to process improvements as required 1.4. Identify any additional, personal skill gaps and seek skill development 1.5. Adopt improved process
2. Check changes	2.1. Identify claimed <i>improvements</i> 2.2. Identify methods of observing claimed improvements 2.3. Check if claimed improvements are occurring and report problems in accordance with procedures
3. Check for further improvements	3.1. Look for areas of possible further improvement 3.2. Discuss further improvements with peers and supervisors 3.3. Take action to make improvements in accordance with procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<ul style="list-style-type: none"> • technical competence to perform job • problem solving • teamwork • communication
Required knowledge
<ul style="list-style-type: none"> • existing procedures • modified procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

<p>Overview of assessment requirements</p>	<p>The person will be able to demonstrate their willing adoption of new equipment, processes, procedures and practices as well as their expertise at implementing them and making critical reviews of their performance in line with their level of competence and authority.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of having sustained improvements in their own job and of assessing these improvements for their real impact.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a workplace implementing competitive manufacturing strategies or appropriate simulated environment is required. No other specific resources are required.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a workplace where improvements are occurring which impact on the operator's job and they are required to implement changes which sustain these improvements.</p> <p>The unit may also be assessed on a project basis in a simulated environment.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.</p> <p>This unit relates to improvements in a person's own area of responsibility. <i>MSACMS401A Ensure process improvements are sustained</i> is an intermediate skill level unit in the CM.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p>

EVIDENCE GUIDE	
	<p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be available from multiple small changes, or from a large change which has had multiple facets implemented over a period of some months.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Performance	<p>Performance may be thought of as the rate of output of the plant compared to the rate required to meet demand.</p> <p>Performance might also be thought of in terms of takt where takt time is the allowable time to produce one product at the rate customers are demanding it. This is NOT the same as cycle time, which is the normal time to complete an operation on a product (which should be less than or equal to takt time).</p>
Procedures	<p>All work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Improvements	<p>Improvement procedures in some enterprises is also known by baka-yoke which is a manufacturing technique of preventing mistakes by designing the manufacturing process, equipment and tools so that an operation literally cannot be performed incorrectly. An attempt to perform incorrectly, as well as being prevented, is usually met with a warning signal of some sort; the term poka-yoke is sometimes referred to as a system where only a warning is provided.</p>

MSACMS601A Analyse and map a value chain

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the skills needed to analyse and map a value chain, including the clear identification of the place of a manufacturing enterprise in the value chain and its contribution to the value chain. The unit will cover the identification of enterprises in a value chain, including their relationships and the activities undertaken by value chain enterprises. The identification skills include identification at the virtual or information level, the technical or process level and at the physical or logistic level.</p> <p>The unit includes the analysis of value adding and non-value adding activities and the information needs for successful value chain mapping, including information technology (IT) needs.</p> <p>This unit covers the analysis of the supply chain, the demand chain as well as the overall value chain.</p>
------------------------	---

Application of the Unit

Application of the unit	In a typical scenario, the person (who may be a production/plant manager, purchasing/technical officer or similar) needs to analyse a value chain, a supply chain or a demand chain in order to understand the interactions between all members and determine the value added/potential value added by each member. This is the basis for the design of <i>Just in Time (JIT)</i> and for the determination of <i>waste</i> . Value chain analysis is not just a one off activity but rather an ongoing activity of re-analysis as the value chain changes as its members progress towards truly competitive manufacturing.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	MSACMT631A	<i>Undertake value analysis of product costs in terms of customer requirements.</i>
---------------------------	------------	---

Employability Skills Information

Employability skills	This unit contains employability skills
-----------------------------	---

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Map the value stream	1.1. Select a product/product group for analysis 1.2. Identify ultimate customer/s 1.3. Identify ultimate supplier/s 1.4. Identify all organisations between ultimate supplier and ultimate customer 1.5. Identify all steps in own organisation
2. Define customer need	2.1. Determine the features/benefits obtained by customers from product/s 2.2. Determine methods of measuring the contribution to each features/benefits 2.3. Identify possible data sources for required measures 2.4. Implement measurement of contribution to features/benefits
3. Assess the value added at each step	3.1. Identify value contributed by each external organisation 3.2. Determine value added by each internal step 3.3. Determine method of measuring value added
4. Reduce waste	4.1. Compare value added to customer benefit/feature 4.2. Identify activities which do not add to customer benefit/features 4.3. Liaise with external value chain members to determine methods to reduce overall waste 4.4. Take required actions to reduce waste

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- problem solving
- communication
- calculations
- negotiation

Required knowledge

- purpose of value chain analysis
- methods of value chain analysis
- types of waste and methods of reducing it
- process used to make product
- processes employed by other members of the value chain sufficient to have meaningful dialog with them

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment requirements	The person will have a current value map and will be continuously updating the analysis of the value chain to drive further improvement both in their own organisation and also others in the value chain.
What are the specific resource requirements for this unit?	Access to an organisation following competitive manufacturing.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of a current analysis of the value chain should be available, along with the waste reductions which flow from it.
In what context should assessment occur?	Assessment needs to occur in an organisation pursuing competitive manufacturing, or by use of a project or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other units related to development and improvements of systems for competitive manufacturing.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed</p>

EVIDENCE GUIDE	
	with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Where evidence is provided from an initial value chain analysis, then this may provide sufficient evidence. Where evidence is from an ongoing updating of an analysis then evidence is required from a range of analyses/products.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the <i>customer</i> , and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
Value added	Value added is measured against its contribution to the customer benefits/features and may be in the form of: <ul style="list-style-type: none"> • technical benefits/features • location benefits/features • aesthetic benefits/features • information benefits/features.
Just in time (JIT)	Just in time (JIT) is a production scheduling concept that calls for any item needed at a production operation - whether raw material, finished item, or anything in between, to be produced and available precisely when needed, neither a moment earlier nor a moment later.
Waste	Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include: <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process

RANGE STATEMENT

	<ul style="list-style-type: none">• making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate the value chain	1.1. Identify all members in the value chain for product/s in area of responsibility 1.2. Identify <i>value added</i> by each member of the chain 1.3. Identify acute and chronic issues which impact on the value chain 1.4. Develop priority list of items for improvement
2. Liaise regularly with chain members	2.1. Establish and maintain regular liaison with all chain members 2.2. Identify current and forecast issues with each member 2.3. Work with members to help them address their issues 2.4. Build trust and confidence in the relationship 2.5. Develop a priority list of items for improvement 2.6. Negotiate with all chain members to ensure improvements benefit chain members and improve the benefits/features perceived by the ultimate customer
3. Monitor the value added at each step	3.1. Identify changes in value added by each chain member 3.2. Identify areas where changes to value added are required 3.3. Develop a priority list of items for improvement 3.4. Work with chain member to bring about improvements to value added
4. Continue to reduce waste	4.1. Identify <i>waste</i> in value chain 4.2. Work with chain members to continually reduce waste

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- liaison
- negotiation
- communication
- planning
- basic value analysis

Required knowledge

- purpose of value chain analysis
- methods of value chain analysis
- types of waste and methods of reducing it
- process used to make product
- processes employed by other members of the value chain sufficient to have meaningful dialog with them
- methods of value analysis

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person will be continuously monitoring the value chain to drive further improvement both in their own organisation and also others in the value chain.
What are the specific resource requirements for this unit?	Access to an organisation following competitive manufacturing.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of ongoing improvements in the value chain should be available, along with the waste reductions which flow from it.
In what context should assessment occur?	Assessment needs to occur in an organisation pursuing competitive manufacturing or by a suitable project or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other units related to development and improvements of systems for competitive manufacturing.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the</p>

EVIDENCE GUIDE	
	assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be from an ongoing monitoring and improvement of the supply chain.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Value chain</p>	<p>Competitive manufacturing organisations encompass the entire supply system, beginning product design, raw material mining and processing and all tiers of the value chain. Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.</p>
<p>Value added</p>	<p>Value added is measured against its contribution to the customer benefits/features and may be in the form of:</p> <ul style="list-style-type: none"> • technical benefits/features • location benefits/features • aesthetic benefits/features • information benefits/features.
<p>Waste</p>	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>

Functional Area	
------------------------	--

MSACMS603A Develop manufacturing related business plans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to develop business plans in a competitive manufacturing environment.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, the person (who may be a production/plant manager, purchasing/technical officer or similar) is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value chain and other critical competitive manufacturing factors. Due competitive pressures in manufacturing, this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop effective and measurable business plan. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into competitive manufacturing strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine purpose of plan	1.1. Confirm reason for developing plan and expected outcomes from plan 1.2. Confirm purpose of plan with all relevant stakeholders 1.3. Check expected outcomes from plan with overall strategic plan for organisation 1.4. Identify any potential areas for conflict between proposed plan and strategic directions 1.5. Negotiate with relevant stakeholders to resolve issues
2. Develop objectives and strategies	2.1. Draft objectives for business plan 2.2. Draft strategies to achieve these objectives 2.3. Determine implications for value chain 2.4. Determine capital or workplace layout/organisation implications for objectives and strategies
3. Develop plans to meet objectives and strategies	3.1. Negotiate with relevant stakeholders over implications for objectives and strategies 3.2. In liaison with relevant stakeholders, develop plans to meet objectives 3.3. Determine relevant Key Performance Indicators (KPIs) for plan 3.4. Check Key Performance Indicators (KPIs) are appropriate for purpose of plan 3.5. Check plan will deliver planned purpose 3.6. Map plan to changed value chain 3.7. Adjust plan to optimise value chain 3.8. Validate plan with relevant stakeholders
4. Monitor the implementation of the plan	4.1. Release plan for implementation 4.2. Check the key progress points against the key stages of the plan 4.3. Note any discrepancies 4.4. Take appropriate action to ensure correct implementation of plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning
- communication
- negotiating
- prioritising
- numeracy/calculation
- problem solving
- organising information

Required knowledge

- knowledge of organisation strategic directions
- planning methods and types of plans
- contingency planning and other risk mitigating planning tools
- the organisation's value chain
- analysis of value chain
- competitive manufacturing practices
- application of quality principles
- human resources and Industrial Relations
- OHS

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person will be able to develop a plan which successfully delivers plan objectives.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies is required. No other specific resources are required.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of having developed a plan which meets its objectives.
In what context should assessment occur?	Assessment will need to occur in a competitive manufacturing organisation and where the individual is undertaking business planning or by project or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>

EVIDENCE GUIDE	
What evidence is required for demonstration of consistent performance?	Evidence from one significant plan should be sufficient, or alternatively from several smaller business plans.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive manufacturing</p>	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP • statistical process control systems including six sigma and three sigma • Just in Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.</p>
<p>Plan</p>	<p>Plan may include any sort of business plan and may emphasise any of the areas for sub-plans over the others.</p>
<p>Objectives</p>	<p>Objectives may include:</p> <ul style="list-style-type: none"> • quality • occupational health and safety (OHS) • environment • competitive manufacturing practices • human, physical, financial and environmental/resource.

RANGE STATEMENT	
Objectives and strategies	Objectives and strategies may include: <ul style="list-style-type: none"> • human and industrial relations • material/component and resources • sustainable environmental practices • sales and marketing • financial.
Relevant stakeholders	Relevant stakeholders may include: <ul style="list-style-type: none"> • other team members • other workers • management • technical specialists • other members of the value chain.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for changeover	1.1. Determine when changeover will be required 1.2. Obtain all required tools/parts/materials for changeover 1.3. Organise process, and tools/parts/materials ready for changeover 1.4. Identify role of others in quick changeover
2. Make quick changeover	2.1. Plan changeover according to quick changeover principles 2.2. Liaise and work with relevant people in quick changeover 2.3. Complete changeover according to <i>procedures</i> 2.4. Check output meets specification 2.5. Debrief with all relevant stakeholders 2.6. Note any steps which cause a problem 2.7. Recommend changes to problematic steps
3. Improve Occupational Health and Safety (OHS)	3.1. Identify hazards to self or others in all steps/actions 3.2. Determine risks from each hazard 3.3. Identify actions which may be performed in a more ergonomic manner 3.4. Recommend changes to improve OHS

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to determine/predict when a changeover will occur
- communication
- teamwork
- appropriate tools/process skills for set-up

Required knowledge

- principles of quick changeover
- relevant procedures
- purposes/requirements of changeover
- methods of recommending changes
- quality requirements for products
- minimisation of changeover scrap

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will effectively and routinely carry out quick changeovers, in liaison with other relevant personnel, and will make recommendations for improving the changeover.
What are the specific resource requirements for this unit?	Access to an organisation using quick changeovers.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of routine positive participation in quick changeover.
In what context should assessment occur?	Assessment will need to occur in an organisation using quick changeover or a suitable simulation, for example, in a workshop.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with relevant technical process units.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT620A Develop quick changeover procedures</i> which covers the manager/design area for quick changeover.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed</p>

EVIDENCE GUIDE	
	with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available of routinely participating in quick changeovers.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Changeover

Changeover may refer to an exchange of dies/tools (traditional), or a change between batches, or between campaigns. It may be any quantum equipment/process change to produce a different product.

Changeover is sometimes referred to as ***SMED*** which is a more extreme form where SMED is an abbreviation for Single Minute Exchange of Die; literally, changing a die on a forming or stamping machine in a minute or less; broadly, the ability to perform any ***set-up activity*** in a minute or less of machine or process downtime; the key to doing this is frequently the capability to convert ***internal set-up time*** to ***external set-up time***; variations on SMED include:

- Single-digit set-up: performing a set-up activity in a single-digit number of minutes, i.e. fewer than ten.
- OTED: One Touch Exchange of Die; literally, changing a die with one physical motion such as pushing a button; broadly, an extremely simple procedure for performing a set-up activity.

Set-up time - work required to change over a machine or process from one item or operation to the next item or operation ; can be divided into two types:

- ***internal set-up*** work that can be done only when the machine or process is not actively engaged in production; OR
- ***external set-up*** work that can be done concurrently with the machine or process performing production duties.

While the term die is the traditional term, competitive manufacturers who require changeover, but where dies are not used or are less significant, have applied this to a range of other changeovers.

This unit may not be applicable to a totally continuous operation producing only the one product, or

RANGE STATEMENT	
	simultaneous range of products. This is not applicable to a maintenance/ PVI shutdown as experienced by the continuous process manufacturers. However, where there is continuous manufacturing on a campaign basis, it may be applied to the changeover between campaigns or similar changeovers.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

EVIDENCE GUIDE	
	<p>available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>This competency should be a routine part of the job and there should be evidence of it being consistently and routinely applied.</p>

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Just in time (JIT)	Just in time (JIT) is a production scheduling concept that calls for any item needed at a production operation - whether raw material, finished item, or anything in between, to be produced and available precisely when needed, neither a moment earlier nor a moment later.
Flow authorisation	A system which authorises the worker to make a product without reference to another authority.
Indicator of demand	An indicator of demand may be kanban bin, ticket or similar, or may be some other indicator of demand pull. In some plants, this may also include authorisation using SCADA software.
Ticket	A ticket may be a kanban or some other record, paper or electronic which constitutes the whole or part of the flow authorising system. Where kanban bins are used, there may be no other record.
Kanban	<p>Kanban is a card or sheet used to authorize production or movement of an item. When fully implemented, kanban operates according to the following rules:</p> <ul style="list-style-type: none"> • all production and movement of parts and material take place only as required by a downstream operation, ie all manufacturing and procurement are ultimately driven by the requirements of final assembly or the equivalent • the specific tool which authorizes production or movement is called a kanban. The word literally means card or sign, but it can legitimately refer to a container or other authorizing device. Kanban have various formats and content as appropriate for their usage (eg kanban for a vendor is different than a kanban for an internal machining operation). <p>Kanban is typically applied to batch type operation and the production is measured in units produced. In continuous manufacturing organisations, production is</p>

RANGE STATEMENT	
	measured in terms of production rate (eg kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (eg ticket, order from a supplier) or may be a SCADA signal from a remote facility (eg customer tank) saying that resupply is required or similar.
SCADA	System Control and Data Acquisition (SCADA) is a general term applied to a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information personnel for action.
Pull system	A pull system is a manufacturing planning system based on making on demand as opposed to a push system based on making for stock using a sales forecast.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMT230A Apply cost factors to work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed for an individual to identify cost components and to be able to determine in general terms the cost impacts of alternative actions.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a person is required to contribute to and be involved in the assessment of cost factors in their work. This may be done individually or in a team environment.</p> <p>The person is able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.</p> <p>This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self management to apply cost effective practices.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify in own work area major cost components of product or process	1.1. Identify <i>cost components</i> in the product or <i>process</i> in own work area 1.2. Recognise the impact of current or alternative actions on costs
2. Identify constraints to cost efficiency	2.1. Identify required production/process rate and major costs 2.2. Identify costs factors under the control of the individual or team 2.3. Relate identified costs factors to impact on <i>overall cost</i> of production/process 2.4. Identify cost factors that are a constraint to cost efficiency in own work area
3. Apply cost efficient work practices	3.1. Express the implications of possible actions/changes to improve cost efficiency in simple financial terms 3.2. Identify non-financial implications of proposed changes in discussion with relevant people 3.3. Select actions which minimise overall costs 3.4. Monitor actions to ensure cost efficiency in own work area is maintained

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- basic numeracy
- problem solving
- communication

Required knowledge

- cost components of products made
- costs concepts such as expense and income
- major cost contributors to product (eg energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

<p>Overview of assessment requirements</p>	<p>The person will as part of their routine decision making aim to minimise costs. There should be evidence of their doing so.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of being able to identify costs factors relevant to an individual's job.</p> <p>Evidence of having made appropriate decisions to minimise overall costs.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a workplace or by use of a work based case study.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units on continuous improvement.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement</p>

EVIDENCE GUIDE	
	of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available over a period of time or from more than one process or product.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Cost components	Cost components include fixed and variable costs such as power/energy, materials, plant and equipment, production or process time including impact on salary and wages, office expenses such as telephone and government taxes and charges.
Process	Process may include a production, maintenance, logistics or office process in a manufacturing environment.
Overall cost	Overall cost may include the assessment of negative and positive financial implications. It also includes negative long term issues, such as Occupational Health and Safety (OHS), environmental and regulatory issues.

MSACMT240A Apply 5S procedures in a manufacturing environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed for an employee to apply 5S procedures (a structured approach to housekeeping) to their own job and work area.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, an organisation has decided to embark on a competitive manufacturing strategy and as part of this has adopted the philosophy of 5S as one of the tools to move down this path. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.</p> <p>This unit requires the application of skills associated with planning and organising, problem solving and self management, in order to identify and implement 5S housekeeping practices.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Sort needed from un-needed	1.1. Identify all <i>items</i> in the work area 1.2. Distinguish between essential and non-essential items 1.3. Place any non-essential item in a appropriate place, not in the work area 1.4. Regularly check that only essential items are in the work area
2. Set the workplace in order	2.1. Identify the best location for each essential item 2.2. Place each essential item in its assigned location 2.3. After use immediately return each essential item to its assigned location 2.4. Regularly check that each essential item is in its assigned location
3. Shine the work area	3.1. Keep the work area clean and tidy at all times 3.2. Conduct regular housekeeping activities during shift 3.3. Ensure the work area is neat, clean and tidy at both beginning and end of shift
4. Standardise activities	4.1. Follow <i>procedures</i> 4.2. Follow checklists for activities where available 4.3. Keep the work area to specified standard
5. Sustain the 5S system	5.1. Clean up after completion of job and before commencing next job or end of shift 5.2. Identify situations where compliance to standards is unlikely and take actions specified in procedures 5.3. Inspect work area regularly for compliance to specified standard 5.4. Recommend improvements to lift the level of compliance in the workplace

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication
- planning
- organising
- prioritising
- reading and interpretation
- recording
- problem solving

Required knowledge

- meaning and application of 5S to their job
- principles of efficient workplace organisation
- purposes of 5S
- procedures relevant to job
- methods of making/recommending improvements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	There should be evidence that the employee is routinely applying 5S principles in their routine work and that they are aware of why 5S is important.
What are the specific resource requirements for this unit?	Access to a plant implementing/practising 5S. No other specific resources re required.
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of routine practice of 5S as part of their job.
In what context should assessment occur?	This unit needs to be assessed in a workplace practising, or beginning to implement, 5S.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit could be assessed concurrently with a unit on continuous improvement, or in conjunction with a technical unit related to the process.</p> <p>This unit differs from <i>MSACMT440A Lead 5S in a manufacturing environment</i> which applies to those who also need to help others apply 5S.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with</p>

EVIDENCE GUIDE	
	the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	There needs to be evidence that this is a consistent part of their routine work life, and as such, evidence is needed over an extended period.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

5S	<p>5S is a system of work organisation originally developed in Japan based around housekeeping principles.</p> <p>A close translation of the five stages in the housekeeping approach is:</p> <ul style="list-style-type: none"> • sort • set in order • shine • standardise • sustain
Sort	<p>Sort involves keeping only what is absolutely necessary for the production process on the production floor. As a first step, clear the work area of all non-essential equipment and materials. Remove anything either not required to produce the product or adjust the machine during the process. This helps to get rid of a 'just in case' mentality.</p>
Items in work area	<p>Items in work area include tools, jigs/fixtures, materials/components, plant and equipment, manuals, personal items (such as bags, lunch boxes, posters), safety equipment and personal protective equipment, and any other item which happens to be in the work area.</p>
Set in order	<p>After removing unnecessary materials, the remaining materials must be those that are required immediately for either the machine or the job at hand. All of these materials/change/parts etc must have an assigned location on the production floor. Locations should be clearly marked and labelled to show what belongs where.</p>
Shine	<p>The work area should be kept clean at all times. Cleaning must be carried out to a regular daily schedule against allowed time and, on most occasions, at the end</p>

RANGE STATEMENT	
	of a job.
Standardise	Once 5S is established, standardising activities help maintain the order and the housekeeping standards. Standardising may use procedures and checklists developed from a procedure.
Sustain	Sustain means making sure that daily activities are completed every day regardless of circumstance. A job should always be cleaned up once finished regardless of the urgency of the next job. Informal inspections should be done often, at least weekly. Formal inspections of each area should be carried out at least monthly. Specific actions should be followed up. This will generate continuous improvement.
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the operation of the plant. They may be written, verbal, computer based or in some other form. For the purposes of CM, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

------------------------	--

MSACMT250A Monitor process capability

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario an organisation has adopted either <i>six sigma</i> or statistical process control/ <i>three sigma</i> as a means of determining and improving the capability of their process. The team member is involved in this in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a specified computer program). The information is typically presented to the team member in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.</p> <p>This unit requires the application of skills associated with entering and monitoring production information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and process data	1.1. Take specified measurements/readings as required 1.2. Enter data onto log/into computer or other record 1.3. Manipulate and/or chart data as required by <i>procedures</i> 1.4.
2. Identify variations that are not random and take action	2.1. Examine chart and/or reliability information 2.2. Distinguish between <i>random variations</i> and those with an identifiable cause 2.3. Take action specified in <i>procedures</i> when a variation with an <i>identifiable cause</i> occurs
3. Assist in process improvement	3.1. Collect data for process capability improvement trials as directed 3.2. Make recommendations for improvement as required 3.3. Implement revised capability monitoring <i>procedures</i> as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- problem solving
- statistical control
- planning
- communication

Required knowledge

- data collection methods
- data processing techniques required
- basic variability and normal distribution
- recognition of identifiable causes in accordance with procedures
- causes of different types of identifiable causes as defined by procedures
- actions to be taken for the different causes

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The person performing this unit would be expected to collect the correct data at the required frequency, perform the required manipulations on the data and then recognise assignable causes and take the required action (which may just be reporting).</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a work place utilising either 6 sigma or 3 sigma is required. Where it is necessary to use synthetic information for assessment purposes, then a bank of such information should be created.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence should be available of data collected and processed. There may also be evidence of assignable causes recognised and action taken. There should not be evidence of assignable causes ignored.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a workplace implementing either 3 sigma or 6 sigma.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with a continuous improvement or a quality unit.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT450A Undertake process capability improvements</i>, and • <i>MSACMT650A Determine and improve process capability</i> <p>which apply to the intermediate and highest skill levels in CM respectively.</p> <p>It may also be appropriate to relate this unit to <i>MEM15001B Perform basic statistical quality control</i> and possibly also <i>MEM15008B Perform advanced statistical quality control</i> where the person is required to perform statistical manipulations (i.e. where these are not done automatically for the person eg by a computer system).</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined</p>

EVIDENCE GUIDE

	<p>by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
<p>What evidence is required for demonstration of consistent performance?</p>	<p>Evidence of the routine collection and processing of data should be available from the workplace. Consistent interpretation of information should also be available from the workplace, although this may need to be supplemented with synthetic data as above. The interpretation of multiple assignable causes is more important than the consistent interpretation of one type of assignable cause.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Six sigma</p>	<p>Six sigma is a process improvement methodology based on statistical process control with six sigma limits which equates to 3.4 defects per million opportunities for each product or service transaction.</p> <p>Six sigma is also often used as a general term covering a competitive manufacturing approach. Six sigma training typically covers several units of competency in this Training Package.</p>
<p>Three sigma</p>	<p>Three sigma includes statistical process control with three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction.</p>
<p>Procedures</p>	<p>Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
<p>Random variation</p>	<p>Random variation is the term used in statistical control to refer to those variations for which no cause can be found.</p>
<p>Identifiable cause</p>	<p>Also referred to as an 'assignable cause' or a 'special cause' are those variations for which a cause can be found and so the cause of the variation eliminated.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess own work	1.1. Continuously check completed work against workplace standards relevant to the operation being undertaken 1.2. Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products concerned 1.3. Identify and isolate faulty pieces/components or final products/batches 1.4. Record and/or report the faults and any identified causes to the supervisor concerned where required in accordance with workplace <i>procedures</i>
2. Assess quality of received component parts/materials	2.1. Continuously check received materials, component parts or final products against workplace standards and specifications for conformance 2.2. Demonstrate an understanding of how the received materials or component parts relate to the current operation and how they contribute to the final quality of the product 2.3. Identify and isolate faulty material or component parts related to the operator's work 2.4. Record and/or report the faults and any identified causes to the supervisor concerned where required, in accordance with workplace procedures 2.5. Identify causes of any identified faults and take corrective action specified in the workplace procedures
3. Measure parts/materials	3.1. <i>Measure</i> materials, component parts or products, as required, using the appropriate measuring instruments in accordance with workplace procedures
4. Record information on production indicator	4.1. Record basic information on the quality and other <i>indicators of production performance</i> in accordance with workplace procedures
5. Investigate causes of quality deviations	5.1. <i>Investigate and report</i> causes of deviations from specified quality standards for materials, component parts or final products, as required, using the appropriate measuring techniques in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with workplace procedures</p> <p>5.2.Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials, component parts or final products</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpret work instructions, specifications, standards and patterns appropriate to the assessee's work
- carry out relevant visual inspections of materials, component parts and final products
- carry out relevant physical/chemical measurements or tests
- maintain accurate work records in accordance with procedures
- carry out work in accordance with OHS policies and procedures
- meet work specifications
- communicate effectively within defined workplace procedures
- interpret and apply defined procedures

Required knowledge

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

<p>Overview of assessment requirements</p>	<p>Competence should be demonstrated in the appropriate work context dependent on the level of responsibility being exercised.</p> <p>Work is assessed in accordance with enterprise quality standards, relevant statutory requirements, organisation insurance requirements, OHS legislation, manual handling procedures and relevant health regulations.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to real or appropriately simulated production situations including areas, materials, equipment, and information on work specifications/patterns, relevant safety procedures and regulations, quality standards, organisation procedures and customer requirements.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Assessment must confirm appropriate knowledge and skills to:</p> <ul style="list-style-type: none"> • interpret, relevant work instructions, standards and specifications appropriate to the assessee's work • check and measure the relevant quality parameters • interpret the results of quality checks in terms of specifications, patterns and work standards • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
<p>In what context should assessment occur?</p>	<p>Assessment may occur on the job or in an appropriately simulated environment.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed in conjunction with the other relevant units.</p> <p>In some contexts it may be necessary to use specific measuring equipment to check the quality and this may require competence in using that equipment. Where that is the case, it is appropriate to assess this unit in conjunction with that other relevant unit.</p>
<p>What method of assessment should</p>	<p>Assessors must be satisfied that the person can</p>

EVIDENCE GUIDE	
apply?	<p>consistently perform the unit as a whole, as defined by the elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>Applies underpinning knowledge and skills when:</p> <ul style="list-style-type: none"> • interpreting work instructions, specifications, standards and patterns appropriate to the assessee's work • describing consequences • completing tasks • identifying improvements within defined procedures • applying safety precautions relevant to the task • assessing operational capability of specified equipment used and work processes. <p>Shows evidence of application of relevant workplace procedures including:</p> <ul style="list-style-type: none"> • quality procedures • hazard policies and procedures including codes of practice relevant to their job within defined procedures • job procedures and work instructions • waste, pollution and recycling management processes within defined procedures • action taken promptly, accidents and incidents reported in accordance with statutory requirements and enterprise procedures • recognises and adapts appropriately to cultural

EVIDENCE GUIDE	
	<p>differences in the workplace, including modes of behaviour and interactions among staff and others in accordance with workplace procedures</p> <ul style="list-style-type: none"> • work completed systematically with attention to detail without damage to goods, equipment or personnel.
What evidence is required for demonstration of consistent performance?	<p>Applies underpinning knowledge and skills when:</p> <ul style="list-style-type: none"> • interpreting work instructions, specifications, standards and patterns appropriate to the assessee's work • describing consequences • completing tasks • identifying improvements within defined procedures • applying safety precautions relevant to the task • assessing operational capability of specified equipment used and work processes. <p>Shows evidence of application of relevant workplace procedures including:</p> <ul style="list-style-type: none"> • quality procedures • hazard policies and procedures including codes of practice relevant to their job within defined procedures • job procedures and work instructions • waste, pollution and recycling management processes within defined procedures • action taken promptly, accidents and incidents reported in accordance with statutory requirements and enterprise procedures • recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others in accordance with workplace procedures • work completed systematically with attention to detail without damage to goods, equipment or personnel.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work site environment	Work may be conducted in a large scale production or small business situation.
Quality parameters	Quality parameters may include: <ul style="list-style-type: none"> • finish • size • durability • product variations • materials • alignment • colour • damage and imperfections.
Quality checks	Quality checks may include: <ul style="list-style-type: none"> • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides.
Measure	Measure includes those measurements which may be taken by the employee in the work place/at their work station.
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the operation of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Indicators of production	Indicators of production performance include things like

RANGE STATEMENT	
performance	number of items/production rate, delays and causes of delays (where known) and other information as specified in the procedures.
Data entry/recording	Data entry/recording may include: <ul style="list-style-type: none"> • keyboard • written (including ticks or signs) • verbal.
Sources of information/documents	Sources of information/documents may include: <ul style="list-style-type: none"> • quality and Australian standards and procedures • work instructions, patterns, designs and recipes • organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements.
Investigate and report	Investigate and report in this unit is used to mean following set procedures defined for such investigations. These procedures could include verbal instructions, documented procedures or other quality procedures as implemented within an enterprise or work environment.
Workplace context	Work organisation procedures and practices relating to the manufacture and quality outcomes for products. Conditions of service, legislation and industrial agreements including: <ul style="list-style-type: none"> • workplace agreements and awards • Federal or State/Territory legislation • standard work practice.
Reporting/communication	Reporting/communication may include verbal and written communication in accordance with organisational policies and procedures. Communication may be oral, written or visual and can include simple data.
Being responsible for the maintenance of own work quality	Being responsible for the maintenance of own work quality may include being required to contribute to the quality improvement of team or section output, where necessary, in accordance with workplace procedures. Safety, environmental, housekeeping and quality are as

RANGE STATEMENT	
	specified by materials/machine/equipment manufacturers, regulatory authorities and the enterprise.
Applicable regulations and legislation	Applicable regulations and legislation may include: <ul style="list-style-type: none"> • Occupational Health and Safety (OHS) legislation relevant to workplace activities • workers' compensation legislation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use interface	1.1. Use keyboards, track ball/mouse and monitor and/or other peripherals to access system 1.2. Navigate through the system and the screens 1.3. Acknowledge messages 1.4. Input and output information in the required format
2. Access information	2.1. Obtain relevant data and information from the system 2.2. Identify the status of items in the <i>value chain</i> 2.3. Access historical data and information 2.4. Interpret information and prioritise actions
3. Take appropriate actions in accordance with procedures	3.1. Take actions in response to information 3.2. Follow up as appropriate to ensure anticipated results have occurred 3.3. Record adjustments and variations according to procedures 3.4. Identify any learning needs to use planning software and seek appropriate support

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding/mousing
- communication
- teamwork
- problem solving

Required knowledge

- technical knowledge and skills needed to operate process
- hierarchy of planning software system and operation
- information available from and business activities exercised by/through the planning software system

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The employee will routinely use the relevant parts of the planning software system for their job.
What are the specific resource requirements for this unit?	Access to an organisation using a planning software system.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of routine use of planning software as part of their job is required.
In what context should assessment occur?	Assessment needs to occur in a workplace using a planning software system or a simulation system.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit should be assessed concurrently with relevant technical units for the process.</p> <p>This unit covers the lower skill levels of using planning software. <i>MSACMT460A Use planning software systems in manufacturing</i> and <i>MSACMT660A Develop the application of enterprise systems in manufacturing</i> cover the intermediate and highest skill levels in the CM respectively.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the</p>

EVIDENCE GUIDE	
	assessment.
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. Planning software systems will typically log all interactions with it. Interrogation of the planning software system will therefore provide evidence of the operator's use of it. Actions taken may also be accessible from the planning software system itself, or may need other evidence available from the process.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Planning software	Planning software is a general term applied to a number of software systems which integrate a range of business information such as finance, logistics maintenance and production. It is frequently referred to by names such as ERP, SAP, MRP/MRP II.
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the <i>value chain</i> (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
Procedures	Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

MSACMT261A Use SCADA systems in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed by an employee to interact with a System Control and Data Acquisition (SCADA) system as part of their job.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, an organisation has introduced a SCADA system which employees now must interface with. The employee will need to access this system as part of their routine and take actions based on the information they get from the SCADA system in accordance with procedures.</p> <p>This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
---------------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use operator interface	1.1. Use keyboards, track ball, monitor and/or stand alone controllers to access/interrogate system 1.2. Find all relevant screens and information 1.3. Acknowledge messages 1.4. Input and output information
2. Use information	2.1. Obtain data and information from the SCADA as required, including process, <i>supply</i> and <i>product</i> chain data 2.2. Interpret data and information as required by own job 2.3. Find and use relevant historical data and information 2.4. Use manufacturer manuals or specifications as required to expand knowledge of SCADA system relevant to own work 2.5. Determine and prioritise required actions
3. Make required changes in accordance with procedures	3.1. Adjust production/process in response to SCADA information 3.2. Record adjustments and variations to specifications/ schedules and report to appropriate personnel 3.3. Seek feedback and information on adjustments to further improve procedures where required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding/mousing
- communication
- teamwork
- problem solving

Required knowledge

- technical knowledge and skills needed to operate process
- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The employee will routinely use the relevant parts of the SCADA system for their job.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to an organisation using a SCADA system.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of routine use of SCADA as part of their job is required.</p>
<p>In what context should assessment occur?</p>	<p>Assessment needs to occur in a workplace using a SCADA system or using a SCADA simulation program.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit should be assessed concurrently with relevant technical units for the process.</p> <p>This unit covers the lowest skill level aspects of SCADA. <i>MSACMT461A Facilitate SCADA systems in manufacturing team or work area</i> and <i>MSACMT660A Develop the application of enterprise systems in manufacturing</i> cover the intermediate and highest skill levels of SCADA in CM respectively.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which</p>

EVIDENCE GUIDE	
	<p>would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>Evidence of routine use over an extended period should be available. SCADA systems will typically log all interactions with it. Interrogation of the SCADA system will therefore provide evidence of the operator's use of it. Actions taken may also be accessible from the SCADA system itself, or may need other evidence available from the process.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

System Control and Data Acquisition (SCADA)

System Control and Data Acquisition (SCADA) is a general term applied to a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action.

In the continuous manufacturing sector, the SCADA system is sometimes integrated into other sophisticated computer control systems such as Distributed Control System (DCS) and indeed these systems do merge in advanced systems. These organisations may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system).

SCADA systems may provide information from outside of the process, such as stock/material levels in a customer plant and/or available supply, supply rates and pricing from a supplier plant. This information may all be accessed by the SCADA system and the employee using it in order to make production rate and other control decisions (either automatically or human assisted) about their own process.

Supply and product chains

The supply chain is all suppliers in the chain from the initial raw material up to the current step in the manufacturing process.

The product chain is all steps after the current step up to the final customer.

Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential

RANGE STATEMENT	
	without including the entire 'enterprise' in its planning.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify energy use	1.1. Identify energy consuming processes in relation to own work 1.2. Recognise the type/source of <i>energy</i> consumed
2. Follow energy conservation plans	2.1. Check energy use in accordance with conservation plans 2.2. Identify most efficient or appropriate equipment or procedures to comply with conservation plans 2.3. Identify any uses which do not comply with conservation plans 2.4. Take action in accordance with procedures to bring energy use back in line with conservation plans
3. Improve energy use	3.1. Note any waste of energy use 3.2. Recommend improvements to energy use

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- basic mathematics
- communication
- problem solving

Required knowledge

- types and sources of energy relevant to the process
- basic principles of energy efficiency
- process needs for energy

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The team member will be able to identify the energy use of any/all parts of the process and recommend better ways of using it.
What are the specific resource requirements for this unit?	Access to an organisation seeking to improve its energy usage.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of conformance to energy usage plans and suggestions for improvement should be available.
In what context should assessment occur?	Assessment needs to be conducted in an organisation where energy is a significant cost component or by use of a project, simulation or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT271A Use sustainable environmental practices</i> - which covers general environmental practices, and • <i>MSACMT670A Develop and manage sustainable energy practices</i> - which covers higher level aspects.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the</p>

EVIDENCE GUIDE	
	assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available from the daily routine of the job to show that there is consistent performance.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Waste</p>	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
<p>Energy</p>	<p>Energy is used to mean all sources of energy used by the process be it electricity, gas or mobile transport fuel. The uses of the energy will also be potentially wide and include heating and cooling, lighting, moving materials (including pumps and conveyors), modifying materials (including cutting, forming, weaving, knitting, reacting, moulding, extruding, mixing), generating pressure/vacuum or providing motive power for equipment and transport.</p>

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify resource use	1.1. Identify resources used by processes in area of responsibility 1.2. Recognise the type/source of resource used 1.3. Identify sources of information to expand knowledge and understanding of resources used
2. Comply with environmental obligations	2.1. Follow procedures to ensure there is no breach of environmental regulations/licence conditions 2.2. Identify situations related to job which may lead to a breach of regulations/licence conditions
3. Follow resource conservation plans	3.1. Identify resource conservation plan/section of plan relevant to area of responsibility 3.2. Identify most efficient or appropriate equipment or processes to comply with conservation plans 3.3. Check resource use is in accordance with plan 3.4. Sort/recycle waste according to procedures 3.5. Note any uses which do not comply with plan 3.6. Take appropriate action specified in plan to bring resource use back in line with plans 3.7. Apply energy conservation plans to the use of equipment and tools
4. Improve resource use	4.1. Identify waste of resource use 4.2. Recommend improvements to resource use

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- basic mathematics
- communication
- problem solving

Required knowledge

- the '3 Rs' - reduce, re-use, recycle
- regulatory/licensing requirements relevant to the process/plant
- types and sources of resource
- basic principles of resource efficiency
- process needs for resource

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The competent team member will be able to identify the resource use of any/all part/s of the process and recommend better ways of using it.
What are the specific resource requirements for this unit?	Access to an organisation seeking to improve its resource usage.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of conformance to resource usage plans and suggestions for improvement should be available.
In what context should assessment occur?	Assessment needs to be conducted in an organisation where resource is a significant cost component or by project, simulation or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT270A Use sustainable energy practices - which covers energy specifically, and</i> • <i>MSACMT671A Develop and manage sustainable environmental practices - which covers the higher skill levels.</i>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed</p>

EVIDENCE GUIDE	
	with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available from the daily routine of the job to show that there is consistent performance.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Waste</p>	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
<p>Necessary waste</p>	<p>Necessary waste is any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (for example regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed.</p>
<p>Unnecessary waste</p>	<p>Unnecessary waste is any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical.</p>
<p>Resource</p>	<p>Resource is used to mean resources used by the process be it raw materials, components, process water, cooling water, cleaning water and so on.</p>
<p>Recognise</p>	<p>Recognition of type of resource is at an appropriate level for the person and the area and includes things like recognising steam/electric heating, cooling water/refrigerated cooling, raw materials waste</p>

MSACMT280A Undertake root cause analysis

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed to undertake root cause analysis (RCA) by any person. This will often be done by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, the employee works in an organisation which is applying competitive manufacturing strategies. This involves the operator 'owning' their process, taking responsibility for it, undertaking root cause analysis of problems and generally contributing to increasing the <i>uptime</i> and general <i>Overall Equipment Efficiency (OEE)</i>.</p> <p>This unit requires an ability to seek and apply information from a variety of sources in order to inform problem solving analyses. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recognise problems	1.1. Identify equipment/plant characteristics indicative of a problem 1.2. Identify process conditions/product characteristics indicative of a problem 1.3. Use appropriate techniques/charts to define the problem
2. Implement quick fix	2.1. Recommend/implement a quick fix within the scope of competency and authority 2.2. Use technology or processes relevant to the problem to implement quick fix
3. Determine root cause	3.1. Identify a range of possible causes 3.2. Gather information to eliminate/confirm causes 3.3. Construct a cause and effect diagram from available data 3.4. Seek assistance as required 3.5. Identify root cause
4. Develop permanent solution	4.1. Identify a range of methods of eliminating the root cause/ breaking the <i>cause tree</i> 4.2. Select the most appropriate solution 4.3. Liaise with relevant people 4.4. Recommend or implement solution within the limits of competency and authority 4.5. Monitor impact of solution and make further recommendations as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- problem solving
- communication
- documenting

Required knowledge

- root cause analysis methodology
- indicators of a problem
- principles of the process sufficient to undertake a RCA and propose solutions
- use of relevant analysis tools (eg cause/effect diagrams, Pareto charts, 4W)

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide describes the underpinning knowledge and skills that must be demonstrated to prove competence. It is essential for assessment and must be read in conjunction with the performance criteria, the range statement and the assessment guidelines of the relevant training package

Overview of assessment requirements	The competent operator will be able to recognise problems in their process and undertake a root cause analysis, either alone or with assistance and propose permanent solutions.
What are the specific resource requirements for this unit?	Access to an organisation using root cause analysis.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of root cause analyses undertaken should be available.
In what context should assessment occur?	Assessment will need to occur in an organisation implementing root cause analysis or by simulation or project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit could be assessed concurrently with other units dealing with the improvement of the process.</p> <p>This unit could be co-assessed (and delivered) with:</p> <ul style="list-style-type: none"> • <i>MSAPMSUP390A Use structured problem solving tools</i> • <i>MEM15001B Perform basic statistical quality control.</i> <p>This unit is related to <i>MSACMT281A Implement a predictive maintenance strategy</i> as root cause analysis is one tool used in predictive maintenance.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include</p>

EVIDENCE GUIDE	
	<p>direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Generally a range of root cause analysis activities will be required in order to generate sufficient evidence.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Root cause	<p>There are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.</p>
Cause tree	<p>The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree in such a way that the problem cannot recur is an acceptable alternative.</p> <p>Not all situations can wait for the <i>root cause analysis</i> and eventual elimination of the root cause as there are serious current impacts. The <i>quick fix</i> will control these immediate impacts, but does not eliminate the root cause.</p>
Uptime	<p>Uptime refers to the overall availability of the plant - it is the inverse of downtime - or the unavailability of the plant. Ideal uptime is 100%.</p>
Appropriate techniques/charts	<p>Appropriate techniques/charts may include the following:</p> <ul style="list-style-type: none"> • control charts • Pareto charts • run charts • flow charts • cause and effect diagrams • tree diagrams • 4W analysis.
Overall Equipment Efficiency (OEE)	<p>Overall Equipment Efficiency (OEE) is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p>

RANGE STATEMENT

	<p><i>OEE = availability x performance x quality rate</i></p> <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account losses due to rejects, re-works and start up waste.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain equipment/ plant	1.1. Keep equipment/plant within area of responsibility clean 1.2. Ensure equipment/plant is serviced and adjusted as required in accordance with <i>procedures</i> and own level of responsibility 1.3. Access manufacturer manuals/specifications where required to expand knowledge on the maintenance of equipment/plant 1.4. Access and update documentation on equipment/plant operation and maintenance as appropriate to workplace procedures
2. Monitor operation of equipment/plant	2.1. Regularly check key conditions of the equipment/plant as defined in the procedures 2.2. Regularly check equipment/plant Overall Equipment Efficiency (OEE) 2.3. Note any deviation from conditions specified in procedures 2.4. Identify any previous occurrences of this deviation
3. Identify deviations and patterns	3.1. Identify any previous occurrences of a deviation 3.2. Identify any related deviations which have occurred 3.3. Identify any unusual occurrence which may be related to a deviation
4. Take action appropriate to competency and authority on deviation	4.1. Liaise with relevant people regarding the deviation and the solution 4.2. Implement solution/assist with the implementation of the solution as appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- mathematical literacy
- analysis
- problem solving
- communication

Required knowledge

- normal behaviour of the equipment/plant
- indicators of abnormal performance
- principles of operation sufficient to recognise problems and propose solutions
- appropriate cleaning and adjusting for the equipment/plant/area as required by procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The employee should 'own' their plant/equipment and take a lead role in ensuring that it is always operating in peak condition and with high and increasing OEE.
What are the specific resource requirements for this unit?	Access to a plant using a proactive maintenance strategy.
What critical aspects of evidence are required to demonstrate competency in this unit?	There should be evidence of deviations recognised and appropriate solutions implemented.
In what context should assessment occur?	Assessment needs to occur in an organisation using a predictive maintenance strategy.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with other units dealing with maintenance.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT280A Undertake root cause analysis which is one of the analysis tools, and</i> also to • <i>MSACMT481A Undertake proactive maintenance analyses, and</i> • <i>MSACMT681A Develop a proactive maintenance strategy</i> <p>which cover the intermediate and high skill levels respectively.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures,</p>

EVIDENCE GUIDE	
	<p>information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be required from a range of activities indicating that the maintenance and monitoring elements are a routine part of the job and that the identification of patterns and taking action has occurred in a range of situations.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Uptime	Uptime refers to the overall availability of the plant - it is the inverse of downtime or the unavailability of the plant. Ideal uptime is 100%.
Overall Equipment Efficiency (OEE)	<p>Overall Equipment Efficiency (OEE) is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> <p><i>OEE = availability x performance x quality rate</i></p> <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account t losses due to rejects, re-works and start up waste.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMT430A Improve cost factors in work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to evaluate the product or process outcomes of a team in terms of their cost components and to be able to determine in general terms the cost impacts of alternative actions.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a person is able to assess the relative costs of alternatives and use this as one of the key factors in decision making. Typical decisions include the efficient organisation of work within a team and the improvement of throughput and cycle times.</p> <p>Decisions are made within the scope of the team's authority and according to procedures</p> <p>This unit primarily requires the application of skills associated with communication and information gathering, teamwork and problem solving to analyse the cost components of team processes. Initiative, enterprise, planning and organising are also required identify opportunities for improved cost efficiency. This unit also requires a degree of self management and learning to effectively operate and maintain skills and performance.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse cost components of team's function	1.1. Identify <i>cost components</i> in the product or <i>process</i> 1.2. Identify costs factors under control of the team 1.3. Identify causes of variability in costs 1.4. Analyse impact of costs on production or process activities undertaken by team
2. Improve cost efficiency of team processes	2.1. Identify methods of improving productivity and/or reducing costs within team's area of responsibility 2.2. Determine cost/ <i>benefit</i> ratio of alternative methods improving productivity and/or reducing costs 2.3. Consult with all relevant stakeholders regarding possible changes 2.4. Recommend changes which will increase productivity and reduce cost and variability 2.5. Implement recommended changes in consultation with relevant stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
<ul style="list-style-type: none"> • basic numeracy.
Required knowledge:
<ul style="list-style-type: none"> • cost components of products made • costs concepts such as expense, income and cost benefit • major cost contributors to product (e.g. energy) • the difference between internally and externally controlled costs • difference between overhead, labour and consumables.

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The person will as part of their routine decision making aim to maximise the cost efficiency of their work team within their scope of authority. There should be evidence of their doing so.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of routinely analysing cost factors relevant to their team's operation and implementing improvements to the team's cost efficiency.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a workplace or by use of a work based case study.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units on continuous improvement.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
<p>What evidence is required for demonstration of consistent</p>	<p>Evidence should be available over a period of time or from more than one process or product.</p>

EVIDENCE GUIDE	
performance?	
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Cost components	<p>Cost components may include fixed and variable costs such as power/energy, materials, plant and equipment, salary and wages, office expenses such as telephone, and government taxes and charges.</p>
Process	<p>Process may include a production, maintenance, logistics or office process in a manufacturing environment.</p>
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Benefits	<p>Benefits should include positive benefits as well as negative benefits such as quality, safety, reliability and similar issues which may be impacted by a cost saving.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain required data	1.1. Identify process for study 1.2. Obtain/organise to obtain required data/information
2. Analyse information	2.1. Analyse past data and determine assignable causes 2.2. Develop possible improvements to eliminate assignable causes 2.3. Incorporate own experience and learning into proposed process improvements
3. Improve process capability	3.1. Liaise with relevant people to implement improvements 3.2. Obtain required authorities to implement improvements 3.3. Obtain/organise to obtain required data for improved process 3.4. Recalculate process capability 3.5. Implement revised data collection/processing and new capability information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- mathematical
- statistical methods
- communication
- negotiation
- planning
- analysis
- problem solving
- teamwork
- computer operation.

Required knowledge:

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes as relevant
- random and non-random results - recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.	
Overview of assessment requirements	The person should be able to analyse a process and recalculate process capability/trial limits after changes have been made.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence should be available of the analysis of process information and the recalculation of process capability/trial limits. The improvements made may be as a result of continuous improvement with the process capability being recalculated periodically, or the improvement may be as a result of an improvement project with the process capability recalculated as part of that project.
In what context should assessment occur?	Assessment may occur in an organisation which uses process capability to monitor its process and as a tool for improving its process or may occur using a specific project/projects to improve process capability.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with a continuous improvement unit.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT250A Monitor process capability</i>, and • <i>MSACMT650A Determine and improve process capability</i> which apply to the lower and higher skill levels in CM respectively. <p>It may also be appropriate to relate this unit to <i>MEM15008B Perform advanced statistical quality control</i> where the person is required to perform statistical manipulations (i.e. where these are not done automatically for the operator e.g. by a computer system).</p>
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.

EVIDENCE GUIDE	
	<p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>This should normally be a routine part of the team leader's job. Where improvements result from a continuous improvement/kaizen process, then a few rounds of improvement and capability recalculation should be required as evidence of competence. Where the improvements results from an improvement project, and this is a complex project and includes the recalculation and implementation of the revised process capability, then one project may be provide sufficient evidence.</p>
What are the specific resource requirements for this unit?	<p>Access to an organisation using process capability to control and improve its process.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Six sigma (6s)	Six sigma is a statistical tool for recording defects and determining capability. Six sigma limits equate to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also used as a general term covering a competitive manufacturing approach. Six sigma training typically covers several units of competency in this Training Package.
Three sigma (3s)	Traditional statistical process control uses three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction.
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

MSACMT452A Apply statistics to processes in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required to apply statistical theory and principles to the analysis and control of processes in manufacturing.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, statistical process control is being used on a process in a manufacturing organisation. Usually this will be to monitor the process and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.</p> <p>To do this the person will apply their knowledge of frequency distribution and variation to the data/chart to distinguish between random and non-random variation and their understanding of the process and/or equipment to help interpret those results.</p> <p>This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self management to solve problems and manage processes.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect process data.	1.1. Interpret sampling scheme 1.2. Obtain measurements in accordance with standard procedures 1.3. Handle data as required.
2. Interpret data	2.1. Plot data on appropriate control chart 2.2. Distinguish between random and non-random patterns of results 2.3. Identify results outside the control limits 2.4. Recognise situations requiring action 2.5. Take appropriate action in accordance with standard procedures 2.6. Determine cost of non-conformance
3. Calculate control limits.	3.1. Consult relevant stakeholders to determine appropriate limits 3.2. Use relevant methods to calculate/revise control limits 3.3. Plot limits on control chart 3.4. Explain impact of limit to relevant stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- analysis
- problem solving
- communication
- documenting
- calculations
- use of statistics

Required knowledge:

- sampling techniques
- purpose of sampling and measurement
- random, systematic, stratified sampling
- relevance, reliability and representativeness of samples/data collected
- purpose of replication of data for statistical control
- samples, populations, finite and infinite populations and the differences
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- the causes of variation in a process
- the meaning of broad/ narrow frequency distributions/ range/standard deviations and skewed distributions in process terms
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (eg measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process
- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide describes the underpinning knowledge and skills that must be demonstrated to prove competence. It is essential for assessment and must be read conjunction with the performance criteria, the range statement and the assessment guidelines of the relevant Training Package

Overview of assessment requirements	The competent person will be able to apply statistical theory to a process to interpret and reduce its variation.
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of the application of statistical theory to a process should be available
In what context should assessment occur?	Assessment will need to occur in an organisation implementing statistical process control or by project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other units dealing with process capability and/or change management.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of</p>

EVIDENCE GUIDE	
What evidence is required for demonstration of consistent performance?	Generally the application of statistics over a period of time would be required to generate sufficient evidence
What are the specific resource requirements for this unit?	Access to an organisation using statistical control.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Sampling scheme	Sampling scheme may include: <ul style="list-style-type: none"> • sampling for attributes or sampling for variables • batch, continuous or custom made products • number of items/samples • size of sample • timing of sampling • location of sampling points • type of sample • number/type of measurements to be done on each sample • sampling equipment • measurement/testing equipment/methods
Procedures	Procedures includes all work instructions, standard operating procedures, formulas/ recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Handle data	Handle data may include: <ul style="list-style-type: none"> • calculating means, ranges, mean of means, standard deviation (using appropriate calculation aids) • entering data into a software package • recording data either in writing or electronically • other required manipulations of the data.
Control chart	Control charts may include: <ul style="list-style-type: none"> • run • tally

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mean/range • attributes • other relevant charts
Random	Random variation is the term used in statistical control to refer to those variations for which no cause can be found.
Non-random	Non-random, also called identifiable cause, or assignable cause or special cause are those variations for which a cause can be found and so the cause of the variation eliminated. Non-random variation may also be used to predict possible breaches of the control limits.
Control limits	Control limits, also referred to as process capability are those limits within which the process will operate if it is 'under control'.
Cost of non-conformance	<p>Cost of non-conformance includes:</p> <ul style="list-style-type: none"> • reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs
Appropriate limits	<p>Appropriate limits may include:</p> <ul style="list-style-type: none"> • 1 sigma warning limits • 2 sigma warning limits • 3 sigma control limits • 6 sigma limits

MSACMT630A Optimise cost of product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to take a global view of the costs of a product and determines methods of reducing costs overall.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a product is selected and analysed by its cost components to determine the best method of lowering the cost overall. This unit differs from <i>MSACMT631A Undertake value analysis of product costs in terms of customer requirements</i> in that it looks at all costs and takes a holistic approach to the cost of the product.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to calculate cost components and determine cost optimisation strategies. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into costing methods.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	<i>MSACMT631A</i>	<i>Undertake value analysis of product costs in terms of customer requirements</i>
---------------------------	-------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse total cost components of product	1.1. Identify all cost components of product 1.2. Allocate cost components to major categories such as overhead, depreciation, energy, consumables and labour 1.3. Distinguish between costs which directly deliver customer features/benefits and <i>waste</i>
2. Optimise costs	2.1. Analyse causes of costs which lead to customer features/benefit 2.2. Determine methods of increasing the customer benefit/cost ratio 2.3. Analyse causes of waste costs 2.4. Determine methods of reducing/eliminating waste costs 2.5. Analyse interactions between cost components 2.6. Check that one method of reducing costs does not cause an increase in another cost/reduction in consumer benefit 2.7. Check that cost reduction plans do not reduce required levels of regulatory compliance or Occupational Health and Safety (OHS)
3. Implement cost optimisation	3.1. Develop cost optimisation plans 3.2. Negotiate with relevant people to agree on implementation plans 3.3. Take actions to implement the cost optimisation 3.4. Monitor the implementation of the cost optimisation 3.5. Make adjustments to the plan as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- analysis
- problem solving
- planning

Required knowledge

- cost components of product
- major costs which are controllable (and how to control them)
- types of waste
- interrelationship of cost components and costs and benefits

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person will select a product to analyse and determine cost components. Costs will be identified as waste or otherwise as an aid to determining their treatment. The cost reduction plans will optimise the cost of the product overall in terms of benefit delivered.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence from a single optimisation may be adequate, although generally analyses of a few products with different cost structures or customer benefit structures would be

EVIDENCE GUIDE	
	required.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>

MSACMT631A Undertake value analysis of product costs in terms of customer requirements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills required by an employee who is required to analyse products and processes to determine the factors that most impact on meeting customer requirements. The analysis is in terms of cost factors and include options for improving cost efficiency. The unit also includes implementing identified changes that increase cost efficiency. The unit may be applied individually or in a team environment.</p> <p>In this unit an employee uses an analysis of the benefits/features which a customer perceives to be in a product/products as a basis for determining waste and so reducing waste.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, an employee will choose a product, analyse the features/benefits obtained by customers from this product and the cost components relating to those benefits. From this waste will be determined and actions taken to reduce waste.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost efficiencies. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into costing methods.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse customer benefits and determine waste	1.1. Determine features/benefits perceived by customer in product 1.2. Analyse cost components and determine those which deliver customer features/benefits and those which don't 1.3. Analyse waste cost components 1.4. Determine alternative ways of reducing waste costs 1.5. Select actions which maximise customer benefits and minimise costs
2. Analyse production performance variance	2.1. Analyse required performance to meet customer <i>pull</i> 2.2. Determine actual <i>cycle time</i> /s and variability of cycle time 2.3. Analyse cause of waste in throughput 2.4. Analyse costs and determine methods of reducing costs/waste 2.5. Take actions required to achieve cost/waste reduction/s

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- communication
- problem solving
- analysis
- numeracy
- literacy
- planning and organising

Required knowledge

- customer benefits from products
- performance and cycle times for products made
- major costs which are controllable (and how to control them)
- types of waste (muda)
- methods of reducing waste (muda)
- methods of reducing cycle time
- desirability of improving performance and methods of reducing cycle time

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The employee will select a product/range of products to analyse and determine waste in terms of any cost which does not contribute directly to an identified customer benefit/feature and then proceed to determine and implement methods of reducing this waste.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a workplace.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>

EVIDENCE GUIDE	
What evidence is required for demonstration of consistent performance?	Evidence should be available from a number of minor changes or from a single large change which had multiple facets and which was implemented over a period of months.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Performance	Performance may be thought of as the rate of output of the plant compared to the rate required to meet demand.
Cycle time	Cycle time is the normal time to complete an operation on a product.
Pull	Pull is the concept of producing to demand, rather than for stock or some forecast.

MSACMT650A Determine and improve process capability

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit covers the knowledge and skills needed to determine the actual (as distinct from design) capability of a process and then to analyse that process to remove assignable causes and reduce random causes. This would typically be done by a manager or technical expert support person either working in a team, or in close liaison with key stakeholders. Process capability is typically calculated using standard deviations.</p>
-------------------------------	--

Application of the Unit

<p>Application of the unit</p>	<p>In a typical scenario a person (who may be a production manager, plant/process engineer, technical specialist or similar) will be responsible for developing plans to improve process capability and following agreement the implementation of the plans to improve process capability. The organisation may use either a 6 sigma or 3 sigma process.</p> <p>This unit primarily requires the application of skills associated with communication in gathering and analysing data and consulting with relevant personnel. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to determine causes to variations and implement solutions. This is done in an environment using computer technology and also requires aspects of self management and learning to ensure feedback and new learning is integrated into process improvements.</p>
---------------------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain data for process capability study	1.1. Identify the process requiring capability analysis 1.2. Obtain process capability data
2. Analyse data	2.1. Identify assignable causes of variation in liaison with relevant personnel 2.2. Develop solutions to eliminate variation due to assignable causes in liaison with relevant people 2.3. Analyse random variations for possible causes in liaison with relevant people 2.4. Confirm cause/s of random variation 2.5. Develop solutions to reduce random variations in liaison with relevant people
3. Take action to improve process capability	3.1. Develop plans to implement solutions 3.2. Liaise with relevant people to implement solutions 3.3. Gain necessary approvals as required 3.4. Monitor implementation and make adjustments as required 3.5. Determine new/revised process capability 3.6. Implement revised process capability regime

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- mathematical
- statistical methods
- communication
- negotiation
- planning
- analysis
- problem solving
- teamwork
- computer operation

Required knowledge

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes as relevant
- random and non-random results - recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person should be able to implement and review a process capability system and make improvements to the process using process capability as a tool.
What are the specific resource requirements for this unit?	Access to an organisation using process capability.
In what context should assessment occur?	Assessment needs to occur in an organisation using process capability as a tool for process monitoring and improvement. It may also be assessed using a suitable project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT250A Monitor process capability</i>, and • <i>MSACMT450A Undertake process capability improvements</i> <p>which cover the lowest and intermediate skill levels in CM respectively.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required	One complex project, or several simpler projects will be

EVIDENCE GUIDE	
for demonstration of consistent performance?	needed to gain sufficient evidence.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Six sigma	<p>Six sigma is a statistical tool for recording defects and determining capability which equates to only 3.4 defects per million opportunities for each product or service transaction.</p> <p>Six sigma is also used as a general term covering a competitive manufacturing approach. Six sigma training typically covers several units of competency in this Training Package.</p>
Three sigma	<p>Traditional statistical process control uses three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction.</p>
Procedures	<p>Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMT661A Determine and establish information collection requirements and processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required to determine what information is needed to support decision making in a competitive manufacturing environment and then to set about establishing required information collection systems. This would usually be done as part of a team and would require consultation with all key stakeholders.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit covers the determination of data needs and collection methods for a manufacturing organisation or specific plant or process. This will typically be done in liaison with a wide range of people, each of whom will have their own specific information requirements. There will need to be balanced and interpreted into a workable set of data to be collected.</p> <p>This unit primarily requires the application of communication and problem solving skills associated with determining information requirements and processes of information collection. Initiative and enterprise, and planning and organising are also required to ensure information targets specific factors. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into the development of processes.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse decision to be made	1.1. Identify person/s to be included in the analysis process 1.2. Determine the consequences of the decision in liaison with relevant people 1.3. Determine the variables which can be controlled 1.4. Determine the variables which cannot be controlled 1.5. Determine the consequences of a change in these variables in liaison with affected person/s
2. Define the factors which cause the variables to change	2.1. Identify factors which are able to be controlled 2.2. Identify factors which are not able to be controlled 2.3. Identify means of measuring these factors, or indicators for the values of these factors 2.4. Compile a list of measurements/indicators required. 2.5. Communicate with team members and involve them in development of factors and changes to ensure awareness and facilitate learning
3. Develop data collection protocols	3.1. Determine methods of making measurements 3.2. Determine methods of quantifying indicators 3.3. Determine the benefit/cost of automated (or other) collection of this data
4. Develop systems to produce required information	4.1. Identify user of information and their needs and abilities 4.2. Determine data processing needs to produce required information 4.3. Determine information distribution channels 4.4. Determine skill development need for recipients of information 4.5. Implement systems to produce information 4.6. Monitor implementation and make adjustments as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication
- analysis
- problem solving
- negotiation
- mathematics
- teamwork
- planning and organising

Required knowledge

- business needs of the organisation/section
- information needs of individuals within the organisation
- possible data available/potentially available to the organisation
- relationship between data available and information required
- methods of converting data into useful information

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The person will be able to determine information and data requirements for any activity, and, in liaison with others, implement the collection of the data and distribution of the information.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to an organisation which makes conscious decisions about its information needs.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in an organisation which makes conscious decisions about its information needs.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>There are no related units. Concurrent assessment may be undertaken with appropriate units.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. EVIDENCE GUIDE	
-----------------------	--

performance?	changes will be needed to provide sufficient evidence. Where evidence is provided from a complex information requirements project, then a single project may provide sufficient evidence.
---------------------	---

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Determining data needs

This unit is focused more on those decisions which are non-routine and so need specific collection of data, or for those decisions which are routine, the establishment of a routine data collection protocol to allow for the decisions to be made based on appropriate, reliable data.

Competitive manufacturing

Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:

- lean manufacturing
- agile manufacturing
- preventative and predictive maintenance approaches
- monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull related manufacturing control systems
- supply, value, and demand chain monitoring and analysis
- other continuous improvement systems.

Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.

Decision

This unit potentially applies to all organisations that are pursuing competitive manufacturing.

A decision can be a change, improvement, new/alterred process or system which requires data in order to monitor it or where data is required to make a decision

MSACMT675A Facilitate the development of a new product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency covers the knowledge and skills required to develop a new/evolutionary product within an existing range of products and encompasses design for manufacture and the facilitation of its initial production. This unit is based on <i>PMBTECH601A Develop a new product</i>
------------------------	--

Application of the Unit

<p>Application of the unit</p>	<p>This competency applies to people who develop new products to meet a specified end use. This will involve working closely with a range of management and operations personnel and requires balancing the business and technical sides of the new product and would typically be done as part of a cross functional team. This unit of competency applies to the technical expert. Critical aspects for success include:</p> <ul style="list-style-type: none"> • ensuring the technical performance meets the customer's needs • making sure the market needs of cost, timeliness and quality are appropriately balanced • designing a product and process which can be efficiently made by the company • liaising with the required people to ensure tooling design and manufacture and equipment modification is correct • optimising the process for the new product at the completion of the development phase. <p>This competency is typically performed by high level staff, working as part of a product design, development and implementation team and taking a lead technical role.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Team work, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into competitive manufacturing strategies.</p> <p>This unit of competency assumes the knowledge component included in the following unit of competency. Evidence must be available that the specified knowledge has been acquired and is able to be applied: <i>MSACMT452 Apply statistics to processes in manufacturing</i></p>
---------------------------------------	---

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm design brief of new product in consultation with relevant people	1.1. Communicate with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements 1.2. Determine regulatory/industry code/intellectual property requirements for product 1.3. Identify possible <i>tooling/process/equipment</i> needs 1.4. Develop design brief, including relevant drawings, to meet needs 1.5. Obtain 'sign off' on total design brief from all relevant persons
2. Determine material requirements for product	2.1. Select appropriate materials/combination of materials/ components in liaison with key stakeholders 2.2. Determine material/component testing and evaluation regime required to meet product end use requirements, including <i>regulatory</i> /industry code requirements 2.3. Arrange for, testing and evaluation of trial materials/ components 2.4. Guide material trial process and interpret material trial results 2.5. Determine final materials/components specifications and details of value chain
3. Determine process requirements for product	3.1. Select appropriate process to make product in liaison with key stakeholders and based on <i>relevant factors</i> 3.2. Determine any special process/equipment requirements for this product 3.3. Communicate with production personnel to determine their concerns and/or training or other needs 3.4. Adjust the design as required to satisfy customer and production needs
4. Ensure process needs for new product have been met	4.1. Liaise with equipment design/procurement personnel 4.2. Interpret hardware specifications and ensure they are appropriate for the job required 4.3. Liaise with process personnel to ensure

ELEMENT	PERFORMANCE CRITERIA
	<p>appropriate draft procedures for new product have been developed</p> <p>4.4. Validate product cost and design meets objectives</p>
5. Trial new product through the process	<p>5.1. Design trialing procedure to deliver required information</p> <p>5.2. Liaise with relevant stakeholders</p> <p>5.3. Ensure health safety and environment (HSE) requirements are stringently observed</p> <p>5.4. Coordinate the trialing of the new product</p> <p>5.5. Interpret product trial results and guide product trial process</p> <p>5.6. Tune process to optimise production of new product</p>
6. Determine process capability	<p>6.1. Plot appropriate statistical process control charts</p> <p>6.2. Determine confidence limits</p> <p>6.3. Compare confidence limits with product specification</p>
7. Coordinate product trials	<p>7.1. Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements</p> <p>7.2. Arrange for testing and evaluation of trial product/prototype</p> <p>7.3. Interpret product trial results and guide product trial process</p> <p>7.4. Determine final product specification in liaison with key stakeholders</p> <p>7.5. Make required changes to materials, process and equipment</p>
8. Implement standard procedures for new product	<p>8.1. Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to requirements</p> <p>8.2. Ensure process specifications are updated and reflect the optimised operation developed</p> <p>8.3. Ensure standard operating procedures are correct for the new product</p> <p>8.4. Ensure equipment and other hardware records are updated to reflect additions/changes</p> <p>8.5. Ensure project records are complete and all required reports have been completed and</p>

ELEMENT	PERFORMANCE CRITERIA
	submitted 8.6. Archive records according to company procedure

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Competence includes the ability for the practical completion of the job to:

- select and justify the selection of:
 - type of material/material specification
 - appropriate process for a range of product/market applications
 - material and product testing procedures
- apply theoretical principles to predict:
 - properties of product based on materials selected
 - effects of processes and processing on the final properties of the product
- mathematically determine:
 - product cost estimates
- interpret and make recommendations based on:
 - field test results
 - market analysis data
 - trailing data.

Required knowledge

- Knowledge and understanding of the materials, equipment and process sufficient to choose an appropriate combination of materials and process to achieve the end use function of the product.
- Knowledge of the enterprise's procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	There should be evidence of successfully designed products.
What are the specific resource requirements for this unit?	Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.
What critical aspects of evidence are required to demonstrate competency in this unit?	The critical aspect for this unit of competency is the ability to apply a thorough understanding of materials and components, their grades and properties and the effects of processing to a new situation and use this understanding to predict likely solutions to the new product design specification challenge. This understanding of material/component and process interactions should also be able to be applied in interpreting data and making adjustments to materials/components and process to achieve the desired outcomes.
Language, literacy and numeracy requirements:	This unit requires high levels of numeracy and literacy with the ability to write and interpret technical specifications and reports. Advanced numeracy allowing the calculation and interpretation of statistics, product formulae and process conditions is also required.
In what context should assessment occur?	<p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by observation of an actual product development project where the assessee takes a lead technical role • by use of a suitable product development project where arrangements are made to also assess the implementation aspects. <p>The development must be of a product which is new to the organisation and not just a modification of an existing product. It is possible that a major redesign of an existing product may encompass all the aspects of a new product design to an appropriate breadth and depth. Where the only available product design projects are the major redesign of an existing project, normally several such projects will be required to</p>

EVIDENCE GUIDE	
	<p>match the breadth and depth of skills which can be demonstrated by the development of a totally new product.</p> <p>In all cases it is expected that practical assessment will be supported by targeted questioning to assess the underpinning knowledge and theoretical assessment will be supported by appropriate practical/simulation or similar assessment.</p>
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed with other relevant units.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence from one major product design or a number of product improvements should be available.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Processes and policies</p>	<p>This competency unit is for the design of a new product 'from scratch'. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally.</p> <p>The competency assumes a working knowledge of all main processes and materials so that an informed choice can be made between them.</p> <p>All operations are performed in accordance with standard procedures and policies.</p>
<p>Tools and equipment include</p>	<ul style="list-style-type: none"> • understanding of use of all standard processing equipment • relevant personal protective equipment.
<p>Typical regulatory requirements include:</p>	<ul style="list-style-type: none"> • Occupational Health and Safety (OHS) • environmental regulations • structural codes • product/industry specific requirements.
<p>Typical problems include:</p>	<ul style="list-style-type: none"> • defining product end use requirements in terms meaningful to the product design and manufacture • matching suitable materials and processes to the product needs and company expertise and facilities • matching (and improving) process capability to product tolerances.
<p>Relevant factors may include:</p>	<ul style="list-style-type: none"> • type of material • dimensional precision of product • length of run/number of products • required aesthetics • size and complexity of product • available capital funding • process equipment available • HSE.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use and environmental issues.	1.1. Identify workplace <i>environmental and resource efficiency issues</i> . 1.2. Identify resources used in own work role. 1.3. <i>Measure</i> and record current usage of resources using <i>appropriate techniques</i> . 1.4. Identify and report workplace environmental hazards to appropriate personnel.
2. Comply with environmental regulations.	2.1. Follow <i>procedures</i> to ensure <i>compliance</i> . 2.2. Report environmental incidents to appropriate personnel.
3. Seek opportunities to improve environmental practices and resource efficiency.	3.1. Follow <i>enterprise plans</i> to improve environmental practices and resource efficiency. 3.2. Make <i>suggestions</i> for improvements to workplace practices in own work area.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include the ability to:

- report as required by procedures
- follow procedures and instructions and respond to change
- ask questions and seek clarifications relating to work requirements

Reading and writing is required in order to interpret required procedures and complete required workplace forms/reports.

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Required knowledge

Competency includes sufficient knowledge to:

- have a basic understanding of sustainability
- know the environmental hazards/risks, resource use and inefficiencies associated with own workplace (at an appropriate level)
- know the relevant environmental and resource efficiency systems and procedures for own work area
- know the impact of laws and regulations to a level relevant to the work context

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to follow workplace procedures according to instructions given and to participate in the improvement of environmental and resource efficient work practices at own level of responsibility. Evidence must be strictly relevant to the particular workplace role.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- identify and measure resources used in their job
- identify situations likely to lead to an environmental incident
- follow procedures related to environmental performance.

Consistent performance should be demonstrated. For example, look to see that:

- work is routinely to procedures
- the minimum of resources is used consistent with the job requirements, good practice and the procedures.

Context of and specific resources for assessment

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Depending on the selected methods of assessment access may be required to:

- workplace procedures and plans
- documentation in relation to production, waste, overheads, hazard control/management
- reports from supervisors/managers
- case study/scenarios

Method of assessment

A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by demonstration in the workplace

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • using targeted questioning for appropriate portions • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
Guidance information for assessment	Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Procedures

All operations are performed in accordance with procedures including all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Environmental and resource efficiency issues

Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient production and consumption of natural resources, for example by:

- minimisation of waste, through implementation of the waste management hierarchy
- efficient and effective use of energy and other resources
- seeking alternative sources of energy
- efficient use of materials and appropriate disposal of waste
- use of controls to minimise the risk of environmental damage from hazardous substances
- efficient water use
- reducing emissions
- life cycle analysis applied to issues such as energy supply, materials, transport, production

Measure

Measure should be interpreted in a manner consistent with the scope of the job and may include things like:

- counting the number of items entering/leaving a work area
- reading indicators in the work area
- obtaining relevant information from support

RANGE STATEMENT	
	<p>personnel</p> <ul style="list-style-type: none"> • other simple means
Appropriate techniques	<p>Appropriate techniques include:</p> <ul style="list-style-type: none"> • material fed to/consumed by plant/equipment • plant meters and gauges • job cards including kanbans • examination of invoices from suppliers • measurements made under different conditions • examination of relevant information and data.
Compliance	<p>Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and mandated codes of practice. It also includes any codes and standards that the enterprise applies voluntarily.</p>
Incidents	<p>Incidents include:</p> <ul style="list-style-type: none"> • breaches or potential breaches of regulations • occurrences outside of standard procedure which may lead to lower environmental performance.
Enterprise plans	<p>Enterprise plans include:</p> <ul style="list-style-type: none"> • documented policies and procedures • work plans to minimise waste, increase efficiency of water/energy use, minimise environmental hazards
Suggestions	<p>Suggestions include ideas that help to:</p> <ul style="list-style-type: none"> • prevent and minimise environmental risks and maximise opportunities • reduce emissions of greenhouse gases • reduce use of non-renewable resources • improve energy efficiency • increase use of renewable, recyclable, reusable and recoverable resources • reduce waste • increasing the reusability/recyclability of wastes/products • reduce water usage and/or water wastage.

Co-requisite units

Co-requisite units		

MSAENV472A Implement and monitor environmentally sustainable work practices

Modification History

Unit Descriptor

This competency covers the outcomes required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

This unit is based on the sustainability guideline standard GCSSUS02A Implement and monitor environmentally sustainable work practices.

Application of the Unit

This competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes:

Identifying areas for improvement

Developing plans to make improvements

Implementing and monitoring improvements in environmental performance.

Competency field

Competitive manufacturing tools

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Investigate current practices in relation to resource usage.	<ul style="list-style-type: none">1.1 Identify environmental regulations applying to the enterprise.1.2 Assess procedures for assessing compliance with environmental regulations.1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate.1.4 Measure and record current resource usage by members of the work group.1.5 Analyse and record current purchasing strategies.1.6 Analyse current work processes to access information and data and assist in identifying areas for improvement.
2 Set targets for improvements.	<ul style="list-style-type: none">2.1 Seek input from stakeholders, key personnel and specialist.2.2 Access external sources of information and data as required.2.3 Evaluate alternative solutions to workplace environmental issues.2.4 Set efficiency targets.

- 3 Implement performance improvement strategies.
 - 3.1 Source techniques/tools to assist in achieving targets.
 - 3.2 Apply continuous improvement strategies to own work area of responsibility and communicate ideas and possible solutions to the work group and management.
 - 3.3 Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them.
 - 3.4 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate.
 - 3.5 Implement costing strategies to fully value environmental assets.
- 4 Monitor performance.
 - 4.1 Document outcomes and communicate reports on targets to key personnel and stakeholders.
 - 4.2 Evaluate strategies.
 - 4.3 Set new targets and investigate and apply new tools and strategies.
 - 4.4 Promote successful strategies and reward participants where possible.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competency includes sufficient knowledge to:

know how to access and use relevant environmental and resource efficiency systems and procedures

know best practice approaches relevant to own area of responsibility

know and apply strategies to maximise opportunities and minimise impacts relevant to own work area

know relevant environmental and resource efficiency issues specific to industry practices. and the skill to

be able to access and use relevant environmental and resource efficiency systems and procedures

be able to apply quality assurance systems relevant to own work area

be able to apply relevant supply chain procedures.

Language, literacy and numeracy requirements

This unit requires communication/consultation skills to ensure information is supplied to the work group.

Writing is required to comprehend documentation and interpret environmental and energy efficiency requirements.

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and procedures within an enterprise. The review of the policy after implementation will also need to be evidenced.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit.

These may include the ability to:

- monitor and investigate current resource usage
- develop plans to improve sustainability
- implement environmental improvements.

Consistent performance should be demonstrated. For example, look to see that: environmental performance is routinely monitored and investigated areas for improvements are followed through and the implemented changes are in turn monitored and investigated.

Assessment method and context

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge. A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by demonstration in the workplace
- using targeted questioning for appropriate portions through use of specific project(s)
- by use of a suitable simulation and/or a range of case studies/scenarios
- by a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the range of variables for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including office, warehouse etc. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Environmental and resource efficiency issues

Environmental and resource efficiency issues include:

addressing environmental and resource sustainability initiatives such as Environmental Management Systems, action plans, surveys and audits

reference to standards, guidelines and approaches such as:

ISO 14001 Environmental Management Systems

Life Cycle Analyses

Global Reporting Initiative

Ecological footprinting

Triple Bottom Line reporting

Product Stewardship

determining enterprise's most appropriate waste treatment including waste to landfill, recycling, re-use and wastewater treatment

applying the waste management hierarchy in the workplace

initiating and/or maintaining appropriate enterprise procedures for operational energy consumption, including stationary energy and non stationary (transport).

Appropriate techniques

Appropriate techniques include:

material fed to/consumed by plant/equipment

plant meters and gauges

job cards including kanbans

examination of invoices from suppliers

measurements made under different conditions

examination of relevant information and data

others as appropriate to the specific industry contexts.

Compliance

Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and codes of practice.

Incidents

Incidents include:

breaches or potential breaches of regulations
occurrences outside of standard procedure which may lead to lower environmental performance.

Purchasing strategies

Purchasing strategies include:

influencing suppliers to take up environmental sustainability
selecting materials/components with a lower environmental profile.

Stakeholders, key personnel and specialists

Stakeholders, key personnel and specialists include individuals and groups both inside and outside the organisation that have some direct interest in the enterprise's conduct, actions, products and services, including:

employees at all levels of the organisation

customers

suppliers

other organisations

key personnel within the organisation, and specialists outside it who may have particular technical expertise

Suggestions

Suggestions includes ideas that help to:

prevent and minimise environmental risks and maximise opportunities

reduce emissions of greenhouse gases

reduce use of non-renewable resources

make more efficient use of energy

maximising opportunities to re use and recycle materials

identifying strategies to offset or mitigate environmental impacts. e.g. purchasing of carbon credits

expressing purchasing power through the selection of suppliers with improved environmental performance. e.g. purchasing renewable energy

eliminating the use of hazardous and toxic materials increasing the reusability/recyclability of wastes/products.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	1.1 Identify environmental regulations applying to the enterprise. 1.2 Assess procedures for assessing <i>compliance</i> with environmental regulations. 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate. 1.4 Measure and record current resource usage by members of the work group. 1.5 Analyse and record current purchasing strategies. 1.6 Analyse current work processes to access information and data and assist in identifying areas for improvement.
2. Set targets for improvements.	2.1 Seek input from stakeholders, key personnel and specialists. 2.2 Access external sources of information and data as required. 2.3 Evaluate alternative solutions to workplace environmental issues. 2.4 Set efficiency targets.
3. Implement performance improvement strategies.	3.1 Source <i>techniques/tools</i> to assist in achieving targets. 3.2 Apply continuous improvement strategies to own work area of responsibility and communicate ideas and possible solutions to the work group and management. 3.3 Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them. 3.4 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate. 3.5 Implement costing strategies to fully value environmental assets.
4. Monitor performance.	4.1 Document outcomes and communicate reports on targets to key personnel and stakeholders. 4.2 Evaluate strategies. 4.3 Set new targets and investigate and apply new tools and strategies. 4.4 Promote successful strategies and reward participants where possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using relevant environmental and resource efficiency systems, tools and procedures
- applying quality assurance systems relevant to own work area
- applying relevant supply chain procedures
- measurement and calculation techniques
- communication/consultation skills to ensure information is supplied to the work group

Reading and writing is required to comprehend documentation and interpret environmental and energy efficiency requirements and to document and maintain records

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Required knowledge

Required knowledge includes:

- how to access and use relevant environmental and resource efficiency systems, tools and procedures
- understanding of best practice approaches relevant to own area of responsibility
- strategies to maximise opportunities and minimise impacts relevant to own work area
- relevant environmental and resource efficiency issues specific to industry practices
- methods for measuring and calculating resource usage

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy.	1.1 Define <i>scope of sustainability policy</i> . 1.2 Identify and consult <i>stakeholders</i> as a key component of the policy development process. 1.3 Review environmental sustainability <i>strategies</i> relevant to all stages of work covered by the policy 1.4 Make recommendations for policy options based on likely effectiveness, timeframes and cost. 1.5 Develop policy is that reflects the organisation's commitment to sustainability as an integral part of the business planning and as a business opportunity. 1.6 Agree upon appropriate methods of implementation.
2. Communicate the policy.	2.1 Promote the policy, including its expected outcome to key stakeholders. 2.2 Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned.
3. Implement the policy.	3.1 Develop and communicate procedures to help implement the policy. 3.2 Implement <i>strategies</i> for continuous improvement in resource efficiency. 3.3 Establish record systems for tracking continuous improvements in sustainability approaches and assign responsibilities.
4. Review policy implementation	4.1 Record outcomes and provide feedback to key personnel and stakeholders. 4.2 Investigate success or otherwise of policy. 4.3 Monitor records to identify trends that may require remedial action, and use to promote continuous improvement of performance. 4.4 Modify policy and or <i>procedures</i> as required to ensure improvements are made.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- developing and implementing systems and procedures to aid in the achievement of sustainability in the workplace
- applying quality assurance systems relevant to own enterprise
- accessing and applying other relevant enterprise policies, procedures and protocols
- relevant industry competency
- interpreting business/strategic plans

This unit requires the ability to:

- read and evaluate complex and formal documents such as policy and legislation
- research, analyse and present information
- prepare written reports requiring precision of expression and language and structures suited to the intended audience
- adjust communication to suit different audiences
- deal with different points of view and dissenting stakeholders.

Required knowledge

Required knowledge includes:

- understanding of relevant policy development and implementation processes and practices
- understanding of the principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- best practice approaches relevant to own work area
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and procedures within an enterprise. The review of the policy after implementation will also need to be evidenced.</p>

Co-requisite units

Co-requisite units		

MSAPMOHS100A Follow OHS procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to recognise hazards commonly occurring at the workplace and follow health and safety instructions and procedures in the workplace.

Application of the Unit

Application of this unit

This competency applies to workers who are required to follow OHS instructions and procedures relating to the work being undertaken. Workers will be aware of the importance of maintaining their own health and safety and the health and safety of others in the workplace. Individual workers will also be capable of dealing with incidents and emergencies within their own scope of responsibility and under the direction of the supervisor.

While the instructions and procedures must be derived from the relevant organisation OHS policies, the worker is not required to understand or interpret these policies. This interpretation should be undertaken by the supervisor when informing workers of the OHS requirements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Recognise hazards.	1.1 Identify hazards commonly found in the workplace. 1.2 Check work area routinely before and during work. 1.3 Describe causes of identified hazards.
2. Follow procedures for hazard control.	2.1 Follow procedures to remove or minimise hazards, within the scope of responsibilities and competencies. 2.2 Use required personal protective and other safety equipment. 2.3 Describe the potential consequences of failing to follow these procedures and instructions.
3. Follow emergency procedures.	3.1 Recognise emergency/emergency alarm. 3.2 Go to muster point following procedure. 3.3 Follow instructions related to the emergency.
4. Report problems.	4.1 Report to appropriate people in accordance with workplace procedures when hazards arise.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding is required of the workplace occupational health and safety (OHS) system sufficient to recognise situations affecting OHS and to take the appropriate action to rectify the situation.

Awareness is required that OHS issues are regulated by State/Territory Acts, regulations, codes of practice and industry standards.

Employees need to be able to follow OHS procedures.

Competence includes the ability to apply and describe procedures for:

- recognising hazards in the workplace
- recognising safety signs and symbols
- recognising hazards commonly found in the workplace and standard controls
- reporting hazards identified to the designated person/according to procedure.

Competence also includes the ability to:

- describe the rights and responsibilities of employees under the OHS legislation
- use and maintain appropriate PPE where required
- communicate OHS issues
- locate and follow OHS procedures under direct supervision.

Language, literacy and numeracy requirements

This unit requires the ability to recognise and interpret safety signs and other basic safety information. It also requires the ability to report hazards in an appropriate way and to follow emergency instructions.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- describe the workplace OHS system and know the importance of critical procedures
- recognise potential situations requiring action
- implement appropriate corrective action.

Emphasis should be on the ability to avoid a critical incident rather than on recovery from a disaster.

Consistent performance should be demonstrated. For example, look to see that:

- hazards and application of appropriate risk controls are known
- other hazards in the workplace that may arise are known and reporting/taking actions are according to procedure.

Assessment method and context

Assessment for this unit of competency will be on a manufacturing site or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual work environment and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit requires a body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the work environment (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

Assessment will require access to a manufacturing plant or working environment over an extended period of time, or a suitable method of gathering evidence of knowledge and understanding over a range of situations. A bank of scenarios, case studies, and 'what ifs' will be required, as will a bank of questions which will be used to check the reasoning behind the 'observable actions.'

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency describes OHS requirements applicable for all workers whose work involves the use of workplace policies and procedures to maintain a safe work environment for themselves and others.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards and hazard causes

Known hazards, such as those identified in procedures or training, are recognised. The underlying causes of these identified hazards are also described, eg *the identified hazard is slipping, the cause is spilled granules.*

Tools and equipment

This competency includes use of and checks on equipment and tools such as:

- housekeeping checks, such as obstructions on the floor which may create slip/trip hazard
- guards in place
- equipment in safe condition
- work area clear and organised
- nothing unusual/different
- emergency equipment available
- PPE is functional.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Problems

Reporting problems means 'apply procedures to recognise and report hazards'.

Typical problems may include:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of OHS policies and procedures.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives
- other personnel with OHS responsibilities.
-

MSAPMOHS200A Work safely

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to identify Occupational Health and Safety (OHS) hazards, and assess risk, as well as follow instructions and procedures in the workplace with minimal supervision. The worker will also be capable of participating in and contributing to OHS management issues.

Application of the Unit

Application of this unit

This competency applies to all workers as they carry out their normal day to day activities in a safe manner in compliance with legislative requirements and their duty of care.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA
	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify hazards and assess risk.	1.1 Identify hazards in the work area before and during work. 1.2 Assess risks for the identified hazards. 1.3 Identify controls for these hazards from procedures. 1.4 Review effectiveness of controls within the scope of authority. 1.5 Identify and report remaining risk.
2. Follow procedures for risk control.	2.1 Control risks when working under minimal supervision by following workplace procedures. 2.2 Select, use and maintain relevant personal protective equipment (PPE). 2.3 Handle and store hazardous materials safely.
3. Follow emergency procedures	3.1 Recognise emergency situations. 3.2 Take appropriate initial emergency action. 3.3 Follow procedures for dealing with a range of emergencies.

ELEMENT ELEMENT	PERFORMANCE CRITERIA
	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
4. Initiate suggestions to enhance task/job-specific safety.	4.1 Raise OHS issues with designated personnel in accordance with workplace procedures and relevant requirements of OHS legislation. 4.2 Contribute to participative arrangements for OHS management in the workplace within organisation procedures and the scope of responsibilities and competencies. 4.3 Provide input to minimise hazards in work area in line with organisation OHS procedures. 4.4 Provide input to opportunities for development of work group's competencies in relation to OHS. 4.5 Support the implementation of procedures to control

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	risks using the hierarchy of control and in accordance with organisation procedures. 4.6 Report to appropriate people in accordance with workplace procedures when non-routine hazards arise.
5. Apply knowledge of OHS legislation and the organisation OHS policies and procedures	5.1 Follow workplace procedures to achieve a safe working environment in accordance with all relevant OHS legislation, including codes of practice relating to particular hazards within the workplace or industry. 5.2 Identify the rights and responsibilities of employees and employers under the relevant OHS legislation. 5.3 Complete (personally or with assistance) hazard, accident or incident reports as required by workplace procedures and relevant sections of OHS legislation.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding is required of the workplace OHS system and relevant industry standards, sufficient to participate in OHS activities and within the scope of work responsibilities and competencies.

Competence includes the ability to apply and describe:

- the identification of hazards and hazardous areas
- methods for assessing risk
- the identification of standard controls for the hazards
- a simple evaluation of the effectiveness of the controls
- an awareness of the need for further action
- the rights and responsibilities of employees under the OHS legislation
- management systems and procedures for OHS
- the hierarchy of control
- hazard policies, procedures and information
- safety procedures
- emergency, fire and accident procedures
- emergency procedures for handling hazardous materials
- consequences of inappropriate handling of hazardous materials.

Competence also requires the ability to:

- locate, understand and follow workplace OHS procedures
- identify and interpret signs and symbols, including emergency alarms
- recognise hazards common to the industry and in their own workplace
- locate sources of OHS information within the workplace
- select and use personal protective clothing and equipment
- correctly use equipment for handling of chemicals/materials
- interpret and apply relevant Material Safety Data Sheets (MSDS).

Language, literacy and numeracy requirements

This unit requires the ability to read and apply hazard information in the workplace and make suggestions to enhance safety.

Writing is required to the level of completing required safety/incident reports.

Numeracy is required to complete incident reports and interpret hazard information.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Consistent safe working is the critical aspect for which evidence should be sought. It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- recognise potential situations requiring action
- implement appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that relevant workplace procedures are understood, in particular:

- hazard policies and procedures
- emergency, fire and accident procedures
- procedures for the use of personal protective clothing and equipment
- hazard identification and risk assessment procedures.

The following should also be known and understood:

- the hazards and potential risks in the workplace
- the consultation processes, either general or specific to OHS
- OHS information (what is there and how to access it)
- specific hazard policies procedures.

These aspects may be best assessed using a range of scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new, unusual and extreme situations, which may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities and similar sources.

Assessment method and context

Assessment for this unit of competency will be on a manufacturing site or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to a manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies and 'what ifs' will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency describes OHS requirements applicable for all workers whose work involves the use of workplace policies and procedures to maintain a safe work environment for themselves and others.

It is expected that workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant State/Territory OHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Identify hazards

Hazard identification is the identification of known hazards in the workplace such as might be included in procedures, training and other workplace methods of identifying hazards.

Assess risks

Risk assessment is used in compliance with the relevant OHS acts and regulations.

Assessment is to the extent required by the acts and regulations and is as relevant to the job.

Identify hazard controls

Identification of hazard controls is identifying the controls specified in the procedures or similar. Reviewing their effectiveness includes checking that they are in place and operational in accordance with standard procedure.

Tools and equipment

This competency includes use of equipment and tools such as:

- PPE
- handling aids
- other safety equipment.

Personal Protective Equipment (PPE)

Typical PPE includes:

- hard hats
- goggles/glasses/face shields
- hearing protection (ear muffs, plugs)
- dusk masks/canister masks/ SCBA/ long range breathers
- gloves/gauntlets
- safety boots
- antistatic equipment
- overalls/aprons/acid jackets/pants.

Selecting and using PPE includes:

- outlining the functions for each type of PPE used in the work environment
- identifying the situations in which specific types of PPE would be used

- using PPE correctly as required in a working environment.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights,
- confined spaces
- heat
- noise
- dusts or vapours
- fire and explosion
- dangerous goods.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives
- other personnel with OHS responsibilities.

OHS Issues

OHS issues which may need to be raised by workers with designated personnel may include:

- recognition of hazards/methods of identifying hazards
- problems encountered in controlling risks associated with hazards (any of the controls as per the hierarchy of control which are relevant)
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of OHS policies and procedures.

Recognise emergency situation

Recognition of emergency situations is from alarms, signals or other obvious mechanisms in the workplace.

Unit Sector(s)

Not applicable.

MSAPMOHS300A Facilitate the implementation of OHS for a work group

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to implement and monitor defined OHS policies and procedures for a work group or area, within their scope of responsibilities.

Application of the Unit

Application of this unit

This competency applies to operators who are capable of coaching the team in participating and contributing to OHS management issues. The worker will be able to perform duties that are required of a safety committee member or safety representative in an organisation.

Typically this worker might be a team leader or on the OHS committee.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has the prerequisite of *MSAOHS200A Work safely*.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Communicate OHS information for co-workers in team.	1.1 Accurately and clearly explain to the work group basic OHS rights, responsibilities and requirements. 1.2 Provide, in a readily accessible manner, information on the relevant organisation OHS policies, procedures and programs, and accurately and clearly explain them to the work group. 1.3 Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group.
2. Coach co-workers in team.	2.1 Establish mutual support groups, eg buddy system, to encourage effective development of individual and group competencies in OHS. 2.2 Provide personal encouragement and assistance to team members to contribute to the management of OHS at the workplace.
3. Facilitate the consultative process.	3.1 Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures. 3.2 Seek input from work group on OHS issues and proposed changes to process, procedures or work place. 3.3 Encourage and use feedback from individuals and teams to identify and implement improvements in the management of OHS. 3.4 Promptly inform the work group of the outcomes of consultation over OHS issues.
4. Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk.	4.1 Implement and monitor adherence to work procedures to identify hazards and assess and control risk. 4.2 Monitor existing risk control measures and report results regularly. 4.3 Access internal and external sources of relevant OHS information. 4.4 Evaluate and identify inadequacies in existing risk

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	<p>control measures in accordance with the hierarchy of control, and report to designated personnel.</p> <p>4.5 Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel.</p> <p>4.6 Identify actual/potential inadequacies in procedures and report to designated personnel.</p> <p>4.7 Identify actual/potential inadequacies in individual or team competency and report to designated personnel.</p>
5. Maintain and use OHS records.	<p>5.1 Accurately and legibly complete OHS records for work area, in accordance with workplace requirements for OHS records and legal requirements for the maintenance of records of occupational injury and disease.</p> <p>5.2 Use aggregated information from the area OHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding of the workplace OHS system and State OHS legislative requirements, codes of practice and relevant industry standards sufficient to implement and monitor OHS activities for a work group or area within the scope of their responsibilities and competencies.

In these industries which are characterised by high potential hazard, employees need to exercise their duty of care responsibilities not only within the general OHS Acts and regulations, but also within those State and national standards applying to hazardous substances, dangerous goods and major hazards.

Competence includes the ability to apply and describe the:

- identification of hazards in the workplace and standard controls
- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under OHS legislation
- obligations of employers under the OHS legislation
- legislative requirements for information and consultation
- arrangements for consultation within the workplace
- management systems and procedures for OHS
- the hierarchy of control
- hazard policies and procedures
- safety procedures
- emergency, fire and accident procedures.

Competence also requires the ability to:

- locate, understand and follow workplace OHS procedures
- identify and communicate with all key personnel in the organisation
- identify and access relevant sources of information
- interpret OHS data such as tables of numbers and graphs
- select, recommend and use personal protective clothing and equipment.

Language, literacy and numeracy requirements

This unit requires the ability to communicate with members of the work team/area and also management. It also requires the ability to interpret and apply OHS procedures and explain them to work team members.

Writing is required to the level of being able to keep records as required and also keep notes from meetings.

Numeracy is required to interpret incident statistics and hazard data.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Where the assessee does not currently possess evidence of competency in *MSAOHS200A Work safely*, it may be co-assessed with this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- communicate effectively with the work group(s)
- proactively promote consultation and participation in the OHS processes
- participate in decisions which impact on OHS for their workgroup.

Consistent performance should be demonstrated. In particular look for knowledge and understanding of:

- specific hazard policies and the use of hazard procedures (eg identify, assess, control)
- the consultation processes, either general or specific to OHS
- OHS information
- OHS record keeping
- counselling, disciplinary and issue resolution processes.

These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new, unusual and extreme situations that may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities and similar sources.

Assessment method and context

Assessment for this unit of competency will be on a processing plant or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to an operating plant or manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions that will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit describes OHS requirements applicable for all workers who are responsible for the organisation of OHS arrangements for a work group or area, including coaching.

It is expected that workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant State/Territory OHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives
- other personnel with OHS responsibilities.

Participative arrangements

Participative arrangements for OHS management may involve:

- making safety suggestions
- information sessions on existing or new issues
- meetings between employer and employees or representatives
- access to relevant workplace information
- use of clear and understandable language.

OHS Issues

OHS issues which may need to be raised by workers with designated personnel may include:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- clarification of understanding of OHS policies and procedures.

OHS Records

OHS records include:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records.

OHS Information Sources

Relevant sources of OHS information include:

- OHS legislation and codes of practice
- industry standards for materials, process, equipment etc
- SA/ISO standards
- OHS authorities
- unions and industry associations
- internet, journals, magazines
- manufacturer/supplier manuals/specifications
- policies and procedures
- JSA, risk assessments, HAZOPs
- hazard, incident and injury records
- training resources
- employee information brochures, newsletters etc
- OHS reports such as inspections, technical reports.
-

Unit Sector(s)

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify appropriate measurements.	1.1 Select appropriate measuring equipment. 1.2 Identify units to be used, and the detail required. 1.3 Check measuring equipment is in calibration.
2. Perform measurements	2.1 Explain range of results that may be obtained 2.2 Identify and take account of relevant external factors. 2.3 Perform measurements using appropriate techniques 2.4 Compare measurements against the range of expected results 2.5 Self-check numerical information for accuracy and correctness. 2.6 Explain the need for calibration and use calibrated equipment to make measurements.
3. Record measurements as required.	3.1 Accurately record the result in the appropriate format. 3.2 Record the result to the appropriate level of detail.
4. Respond to routine problems in accordance with procedures	4.1 Recognise known faults that occur during the measurement. 4.2 Identify and take action on causes of routine faults. 4.3 Log problems as required. 4.4 Identify non-routine problems and report to designated person.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the process sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines. For example, in gel coating, a coating less than 5 mils thick may wrinkle, especially when brush marks are present. Thickness is checked using a gel coat thickness gauge.

Knowledge and the ability to implement the organisation's procedures and relevant regulatory requirements, within appropriate time constraints and work standards.

Application of approved hazard control and safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup.

Knowledge in measurement sufficient for consistent performance to specifications including:

- basic units of measurement (eg kilogram, metre, second)
- correct selection and use of measuring devices
- application of relevant mathematical calculations and procedures, including additions, subtractions, division, fractions, percentages
- use of dial, scale and digital readouts
- the need for calibration and methods of checking equipment is within calibration.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided.

Writing is required to the level of completing workplace forms.

Numeracy is required to the level of basic arithmetical manipulations and the interpretation of the significance of numbers and variations of readings.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to

- take accurate measures using the appropriate measuring device
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that

- standards in taking measurements are met consistently
- all safety procedures are followed.

Assessment method and context

Assessment will occur over a range of situations requiring the taking of measurements and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation or questioning to indicate understanding and knowledge
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all routine measurements within a manufacturing environment.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- measuring devices, including gauges, dip-sticks, thermometers, weighing scales, length/thickness measuring
- calculators
- computers for recording results

- relevant personal protective equipment.

Hazards

Typical hazards include:

- dusts/vapour
- temperature
- hazardous substances
- manual handling hazards.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'.

Typical problems may include:

- measuring instrument not fit for use (eg not within calibration)
- appropriate measuring device not available
- deviations from normal range of readings
- effect of temperature on material properties.

Appropriate action for non-routine problems may be reporting to designated person or other action specified in the procedures.

Variables

Key variables to be monitored include:

- extent
- dimension
- quantity
- mass
- capacity
- capability.
-

Unit Sector(s)

MSAPMOPS363A Organise on site work

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers organising of work in a field situation. This unit typically applies to operators who are preparing to do work in remote mine sites, or large industrial complexes where extensive permit or clearance systems exist.

This unit covers the organising and preparation for on site work. Refer to other competency units depending on the nature of the work to be done on site.

Application of the Unit

Application of this unit

The emphasis is on the planning of the work, the arrangements that are required to allow the on-site work to proceed and the set-up of tools, equipment and materials at the site. It includes the scoping, planning, communication and hazard controls required for the job. The work may be to do with conveyor systems, tanks, pipelines, equipment or other work in situ.

The worker will:

- plan the job
- arrange all permissions and permits
- select and arrange all equipment and materials to the site
- set up tools, equipment and materials on site
- identify any hazards and take appropriate action.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan the work.	1.1 Review the requirements of the work 1.2 Arrange all necessary permits and permissions for site inspections and work. 1.3 Examine the site where the work will take place. 1.4 Identify plant and equipment isolations. 1.5 Identify hazards and risk controls. 1.6 Plan to minimise downtime, economically use materials and meet quality specifications. 1.7 Plan work, including sequences, times, process stages, engineering controls and personal protection requirements. 1.8 Prepare all necessary documentation and finalise the permissions and approvals for conducting the work.
2. Prepare equipment, tools and materials.	2.1 Identify equipment, tools and materials required. 2.2 Arrange for supply of all tools, equipment and materials. 2.3 Arrange for transport to site of all equipment, tools and materials.
3. Set up work location.	3.1 Assemble and check materials and tools for suitability for purpose. 3.2 Establish a safe work area. 3.3 Establish isolations and tag/lock out as required. 3.4 Check tools, equipment and materials against site situation and conditions.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge of the materials, equipment and process sufficient to recognise material and equipment conditions which may lead to out-of-specification production. For example, consumables for use in the work are within recommended shelf life.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls.

Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and clean up. This may include the preparation of Job Hazard Analysis (JHA) or similar hazard management and planning techniques.

Competence includes the ability, for the practical completion of the job, to apply and/or explain:

- interpretation of specifications, designs and/or work orders
- understanding of the operation, equipment principles and details of construction
- production workflow sequences and inherent hazards with on-site work
- design requirements and details of the work to enable the planning to and the work to be completed as required
- planning process, including breaking the work down into steps and stages
- correct selection and use of equipment, materials, processes and procedures
- products, materials and material characteristics.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical work specifications, job sheets and material labels as provided to operators.

Writing is required to the level of completing workplace forms, plans and job reports.

Numeracy is also required, eg to determine quantities of materials for the work.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

This unit may be co-assessed with units concerned with the nature of the work being undertaken.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- identify critical materials properties and operating characteristics in relation to the condition of the equipment
- plan work process within organisational procedures and explain the reasons for the steps in the process
- take appropriate action to observe site conditions, equipment configuration, possible work-site difficulties, hazards and identify problems to be reported.

Consistent performance should be demonstrated. For example, look to see that:

- production needs are interpreted and met
- problems are anticipated from observations
- problems are efficiently resolved
- the repair runs consistently and smoothly.

Assessment method and context

Assessment will occur using industrial scenarios and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to on-site work environments and sectors typically within manufacturing or heavy industries. It covers, but may not be limited to, the preparation for on-site work.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, manufacturer specifications and procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

On-site work

On-site work covered by this competency may include (but may not be limited to):

- conveyor belt splicing and repairs
- rubber lagging of conveyor drums
- rubber lining of tanks
- polymer piping systems installation or repairs
- polymer constructions (eg fume cupboards or signs)
- refractory lining
- concrete casting
- other work to be done on-site, and not in a factory or workshop.

Work requirements

Work requirements may be determined from:

- work orders
- specifications
- job descriptions
- designs
- other documents.

Isolations

Isolations include:

- power supply
- tag locations
- process materials
- energy sources and
- equipment isolation system.

Safe work area

Safe work area includes area(s) for:

- scaffolding
- lifting gear
- lay down area

- work area
- other equipment in appropriate locations.

Tools and equipment

This competency includes planning and set-up of equipment and tools such as:

- manual handling aids
- hand winches
- portable power generators and vulcanising equipment
- knives and other cutting instruments
- portable hoists/lifting equipment not requiring any special permits or licences
- spanners, wrenches, hammers etc
- power operated hand tools such as drills, cutting disks, sanders
- specialised tools for the job
- relevant personal protective equipment.

Hazards

Typical hazards include:

- manual handling hazards
- working at heights
- dust, process liquids, process materials
- hand tools and hand held power tools (eg knife, cutting and grinding disk hazards).

Problems

Anticipate and solve problems means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- lack of accessibility
- equipment isolations
- logistics of materials and equipment to work site
- variations in materials and/or contamination of materials.

Variables

Key variables to be monitored include:

- environmental conditions
- lock-out/isolation of equipment
- worksite location, remoteness, accessibility
- job variations, changes.
-

Unit Sector(s)

Not applicable.

MSAPMPER200B Work in accordance with an issued permit

Modification History

Not applicable.

Unit Descriptor

This unit aims to ensure that people working under a permit to work understand the system, know the limitations of the permit under which they are working and comply with all the requirements of the permit. The people to whom this unit applies may be called 'permit recipients' or 'permit holders' by some organisations. Some organisations call 'permits' 'clearances'

This unit covers the basic competency of working under a permit. Where entry to a confined space is required, then *MSAPMPER205B Enter confined space* is also required. The safety observer (standby person) competencies are covered by *MSAPMPER202A Observe permit work*. The issuing of permits is covered by *MSAPMPER300B Issue work permits*.

Application of the Unit

This competency applies to persons who are required to conduct work activities under the authority of an issued permit to work and within the context and requirements of that permit. This typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. It includes:

- identifying the range and scope of work covered by the permit
- checking that the right type of permit has been issued for the type of work
- adequately preparing to undertake the work, including obtaining all necessary safety equipment and PPE
- undertaking the work strictly in accordance with the provisions of the permit
- maintaining correct housekeeping with permit activities
- completing work in accordance with the permit requirements
- querying or raising matters about the permit if the scope of work/nature of the tools to be used varies from that covered by the permit
- handing back the permit in accordance with procedures and obtaining appropriate sign off as required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Apply for permit(s)</p>	<p>1.1. Confirm the scope and location of the work to be done 1.2. Identify the need for a work permit(s) for the work to be carried out. 1.3. Identify the type of work permit required. 1.4. Collate information required for the issue of the permit 1.5. Apply for the permit following the organisations requirements</p>
<p>2. Identify the scope of the permit.</p>	<p>2.1. Check that work to be done complies with the permit type. 2.2. Check that the scope and location of work comply with the permit issued 2.3. Check that the hazard controls specified on the permit are consistent with the hazard analysis 2.4. Check that preparations specified on the permit have been completed 2.5. Sign onto/receive the permit.</p>
<p>3. Prepare for permitted work.</p>	<p>3.1. Maintain safe working conditions and environment by using available isolation procedures, safety equipment and emergency procedures. 3.2. Monitor plant conditions and hazards to ensure work under the permit remains safe. 3.3. Ensure that appropriate safety equipment and clothing are selected and worn as required by the permit and relevant procedures. 3.4. Inspect work area to ensure safety and compliance with permit requirements and procedures.</p>
<p>4. Work in accordance with an issued permit.</p>	<p>4.1. Use required hazard reduction/control measures. 4.2. Comply with requirements of the permit including safety observer if required. 4.3. Ensure compliance with scope, location and timeframe specified in the permit or seek re-authorisation as required 4.4. Suspend job and make work site safe before leaving job. 4.5. Formally seek and receive authorised extensions to the permit when required. 4.6. Give end of day status report to permit issuer.</p>
<p>5. Complete permit(s) to work.</p>	<p>5.1. Obtain new permit(s) or have existing permit(s) revalidated before work is recommenced. 5.2. Check the work conducted against the issued permit(s) to ensure that all the nominated work requirements have been satisfied. 5.3. Monitor general housekeeping to ensure that the site has been</p>

	<p>left in a clean and safe condition.</p> <p>5.4. Ensure personal lockouts/tag outs/isolations are removed in accordance with procedures</p> <p>5.5. Communicate status of the work conducted and the results of the permit to relevant personnel.</p> <p>5.6. Complete documentation as required and have permit signed off when job is completed.</p>
--	--

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Competence includes the ability to:

- access and interpret information relevant to specific tasks (eg labels, MSDSs hazchem signs)
- identify changes to conditions which may lead to the permit being revoked before the job is completed
- describe and/or explain hazards associated with tasks covered by the permit, types of tests required for the issue of work permits – the types of tests to include, atmospheric/oxygen/breathability, flammability/explosivity, toxicity/TWA, temperature, humidity
- the impact of the regulatory framework and organisation procedures under which the permit operates upon the particular job(s) requiring the permit.

Language, literacy and numeracy requirements

- This unit may require the ability to read and correctly interpret complex P&ID's; speak clearly and unambiguously in English; and to explain, describe and verify sometimes complex needs and issues.
- Writing is required to the level of completing workplace forms.
- Numeracy is required to the level of being able to correctly differentiate between high and low pressures and temperatures, voltages or masses.

Required knowledge:

Knowledge and understanding of the relevant OHS and environmental requirements, in particular those relating to various situations requiring work permits, with an ability to implement the requirements in a manner that is relevant to the job. Knowledge of the organisation's standard procedures and work instructions and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

Sufficient knowledge of all types of permits is required to ensure work is not carried out without the correct permit. This includes recognizing hot work and confined spaces.

Knowledge of regulatory frameworks should include:

- licence requirements for the job,
- company policy and procedures
- permit control systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment. The unit will be assessed in a holistic manner as is practical and may be integrated with the assessment of other relevant units of competency.

Simulation may be required to allow for assessment of parts of this unit. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to distinguish between situations requiring the major types of permit and to list the major requirements of each type of permit. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide reasons for a permit system
- recognise the importance of different work permits
- comply with permit conditions including the wearing of appropriate personal protective equipment (PPE)
- take appropriate action to resolve faults or report faults to appropriate personnel
- explain and implement incident response procedures.

Consistent performance should be demonstrated, e.g. look to see that:

- communications are timely and effective
- deviations from permit conditions are recognised, reported, corrected and re-authorization arranged
- actions specified in the permit/standard procedures are carried out
- all safety procedures are followed.

Context of and specific resources for assessment

A holistic approach should be taken to the assessment.

Assessment will occur over a range of situations which may include disruptions to normal, smooth operation.

Competence in this unit may be assessed:

- on a plant/in the work place/a work situation
- by using a suitable simulation based on the actual plant and including walk throughs of the relevant competency components and/or a range of case studies/scenarios and role plays
- by questioning and using ‘what if’ scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant
- through a combination of these techniques.

These aspects may be best assessed using a range of simulations/scenarios/case studies and ‘what ifs’ as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new or unusual situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed. In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

While oral assessments may be appropriate there needs to be a written record for audit purposes.

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions which will be used to probe the reasoning behind the observable actions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Method of assessment

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources

Guidance information for assessment	should include equipment modified for people with disabilities. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.
--	--

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.</p>	
<p>Codes of practice/ standards</p>	<p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.</p>
<p>Context</p>	<p>This unit typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. All work is to be conducted using the appropriate personal protective equipment.</p> <p>The types of work permits may include:</p> <ul style="list-style-type: none"> • cold work/general permit to work • excavation • hot work • vehicle entry • minor repairs • working at heights • other special permits. <p>Note that entry to a confined space is covered by <i>PMPPER205B Enter confined space</i>. The Australian Standard (AS2865) definition given for confined space entry is used in this Training Package.</p> <p>All operations are performed in accordance with standard operating procedures (SOPs).</p> <p>Checks to ensure a workplace is safe may include:</p> <ul style="list-style-type: none"> • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
<p>Procedures</p>	<p>All operations are performed in accordance with procedures.</p> <p>Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include:</p>

	<ul style="list-style-type: none"> • legislation/codes • OHS legislation, codes of practice and guidance material • EPA • National and Australian standards • licence and certification requirements • internal permit control system. • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
Information required for permit	<p>Information required for a permit includes:</p> <ul style="list-style-type: none"> • work description • tools to be used • process/methods of work/SOPs • MSDSs • JHA/JSA/SWMSs

Unit Descriptor

Unit descriptor

This unit of competency covers receiving, relaying and recording written and oral messages and providing relevant information in response to requests, within time lines.

Application of the Unit

Application of this unit

This competency applies to operators who are required to receive, relay and record work related information as well as respond to information requests in the workplace.

The operator will:

- record received messages
- seek clarification, when necessary
- access needed information, as required
- relay the correct information to appropriate person/s.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Receive and relay messages	1.1 Confirm understanding of the message is correct. 1.2 Accurately record the message. 1.3 Relay message accurately to appropriate person or section within designated timelines.
2. Interpret messages.	2.1 Clarify message if necessary. 2.2 Take appropriate action.
3. Respond to information.	3.1 Acknowledge and understand the request for information. 3.2 Access information from appropriate sources. 3.3 Relay information to appropriate person or section.
4. Complete workplace forms.	4.1 Select appropriate form. 4.2 Assemble information required for form. 4.3 Complete form as required. 4.4 Submit form as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and ability to implement organisation policies and procedures on workplace communication, including:

- types, purpose and importance of workplace documentation
- workplace codes, including numbers, symbols, signs, colours and other codes.

Competence also includes the ability to:

- listen attentively
- formulate questions to clarify work requirements or instructions
- establish effective workplace relationship with colleagues
- adapt communication to a range of social, cultural and ethnic backgrounds.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand information contained in typical workplace documents such as standard operating procedures, material safety data sheets, job cards, maintenance logs. Everyday workplace language is used, including some technical terms and mathematical language.

Writing is required to the level of completing workplace forms and records. Types of text may include short sentences, symbols, codes, signs, sketches and may be conveyed in printed form or screen based.

Basic numeracy is needed to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

In all cases it may be appropriate to assess this unit concurrently with relevant team work and communication units.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide and assess all required information and that the information provided both verbally and in writing is completed in a clear and concise manner that is easily understood by others and in accordance with workplace requirements.
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that:

- all information is provided in an efficient, effective, courteous and timely manner.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- by observation and questioning to indicate understanding
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Reasonable adjustment of assessment tasks will be undertaken as required.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments.

Procedures

All operations are performed in accordance with procedures. Procedures include:

- all relevant workplace procedures
- work instructions
- temporary instructions
- relevant industry and government codes and standards
- telephone protocol , including industry timelines in answering calls.

Messages

Messages includes the following as appropriate to workplace requirements:

- written
- oral
- electronic.

Tools and equipment

This competency includes use of equipment and tools such as:

- two way radio
- computer
- telephone.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems may include:

- missing/lost messages
- required information not available
- required equipment not available
- conflict of work priorities.

Appropriate action for non-routine problems may be reporting to designated person or other action specified in the procedures.

Unit Sector(s)

Not applicable.

MSAPMSUP106A Work in a team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the organisation of team activities to fit in with the scheduling of work to meet operational guidelines.

Application of the Unit

Application of this unit

This competency is typically performed by people who work within a team structure with limited discretionary powers

The worker will:

- plan and organise activities in accordance with instructions
- use appropriate interpersonal skills to contribute to effective teamwork
- seek assistance from other team members where appropriate
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Individual organisations may choose to add prerequisites and corequisites relevant to their processes.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify work activities.	1.1 Identify task requirements of the team. 1.2 Identify individual tasks that are part of the team requirement. 1.3 Prioritise team and individual activities as directed.
2. Organise daily work plan.	2.1 Break work activities down into small achievable components. 2.2 Record activities as required by procedures/work instructions. 2.3 Seek assistance from other team members when difficulties in achieving allocated tasks arise.
3. Participate in a team.	3.1 Use interpersonal skills appropriate to the effective teamwork of the shift/crew/section within the workplace. 3.2 Acknowledge information and feedback provided by other team members in work group. 3.3 Acknowledge team roles and support team members in achieving their role. 3.4 Practise teamwork within and between groups to contribute to the achievement of company work standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of organisation information systems, procedures and equipment sufficient to plan daily work activities in order to meet timelines.

Knowledge of organisation standard procedures and work instructions and relevant regulatory requirements, along with the ability to implement them within appropriate time constraints and in a manner relevant to the operation of the system.

Competence also includes the ability to:

- use effective communication techniques
- identify where teams fit into the organisational structure
- apply organisation quality and safety procedures
- complete required workplace documentation
- distinguish between urgent and non-urgent tasks.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand typical product specifications, job sheets, procedures and work instructions, material labels and safety information as provided.

Writing is required to the level of completing workplace forms.

Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to identify work activities and prioritise work in order to meet timelines, whilst interacting as a member of a group.

Consistent performance should be demonstrated. For example, look to see that:

- activities are planned in accordance with instructions
- willingness to participate as part of a team is demonstrated
- relevant procedures are accessed and utilised in completing activities
- timelines are adhered to
- assistance is sought from relevant personnel when difficulties arise.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- by observation over time on a processing plant or in a manufacturing environment
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors in the manufacturing industries.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as PPE.

Hazards

Typical workplace hazards include:

- chemicals and hazardous materials
- gases and liquids under pressure
- moving machinery
- materials handling

- working at heights, in confined spaces, or in environments subjected to heat, noise, dust or vapours.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems include:

- required information/materials not available
- required tool/equipment not available
- conflict of work priorities
- interpersonal conflict within the team.

Appropriate action for non-routine problems may be reported to designated person or other action specified in the procedures.

Unit Sector(s)

Not applicable.

MSAPMSUP201A Receive or despatch goods

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the handling of materials by an operator as an adjunct to the job of making product. It applies to a limited range of materials. It is NOT intended to be an alternative warehousing competency.

This competency is typically performed by operators working either independently or as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who receive, process despatch orders, despatch products/materials and maintain records. The key factors are correctly identifying and selecting the goods to be despatched and ensuring they are despatched to the correct location. It includes:

- checking order requests/consignment note documentation for products/materials to be despatched
- identifying and selecting the correct products/materials
- organising products/materials to be moved into the right place by the right time, using the appropriate handling equipment
- preparing products/materials for despatch
- completing and checking all documentation
- updating records.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify work requirements.	1.1 Read and interpret documentation. 1.2 Identify required schedules for receipt or despatch. 1.3 Identify correct product/material. 1.4 Plan work sequence using workplace and product knowledge. 1.5 Select appropriate materials handling equipment as required. 1.6 Identify OH&S requirements.
2. Move materials into/out of storage or from production.	2.1 Check paperwork and identity of materials. 2.2 Check for completeness and/or damage. 2.3 Take action on non-conforming products/materials. 2.4 Handle and move products/materials into/out of storage safely. 2.5 Store materials safely as necessary.
3. Prepare goods for despatch.	3.1 Identify and read workplace procedures for assembling and completing orders. 3.2 Select and check goods for despatch. against product/material knowledge, labels and other identification systems. 3.3 Sort, assemble and consolidate products as necessary. 3.4 Secure order and place in storage areas, in accordance with schedule. 3.5 Check order against despatch schedule and order form.
4. Complete materials movement records.	4.1 Complete materials movement records (in or out). 4.2 Update records as required. 4.3 Complete other paperwork and records as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding of the materials handling processes and requirements sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines is required.

Knowledge is required of the product/material, its properties and uses sufficient for correct receipt, storage and despatching. Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to the materials handled.

Competence includes the ability to apply and/or describe:

- product/material knowledge
- inventory and ordering systems
- transport requirements and restrictions for products/materials
- correct OHS procedures
- storage/handling principles and procedures
- material hazard properties and their implications for safe handling and storage
- significance of material to customers; transport requirements and restrictions for materials
- plan own work, including predicting consequences and identifying improvements
- identify and describe own role and role of others involved directly in the processing of orders and despatching of products
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as product requirements and job priority as relevant to the practical completion of the job.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, e.g. to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- packaging standards are met consistently
- procedures and work instructions are read and interpreted correctly
- potential problems are recognised and action is taken (ie, the problem is fixed or reported)
- action is taken to ensure problems are dealt with in a timely manner
- problems caused by product/material issues are recognised and an appropriate contribution made to a solution
- items initiated are followed through until final resolution has occurred.
- effective communication between team members, supervisors and other staff is maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

Assessment method and context

Assessment will occur using industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation over time on a processing plant
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency covers the handling of a limited range of products/materials and their moving into and out of a plant/storage. It is NOT intended for people who, as a major function, operate a warehouse. The appropriate Transport and Distribution competencies should be used here.

This competency may require the operation of forklift trucks or other regulated load shifting devices which are NOT included in this competency, and so would be a co-requisite competency.

The terms order request, documentation, labels, transportation requirements 'paperwork' and 'records' mean any and all relevant information and data whether it is manual, paper based, electronic or verbal, either in person or by phone/radio.

This competency does not imply that moving materials into and from storage/plant are conducted equally, or even using similar techniques. Customers may be internal or external and the loading/unloading of products/materials may mean getting them onto/off a truck or simply from/to the next department.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment.
- computers, bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, including A-frames, stillages, containers, elevated platforms and communication equipment.

Hazards

Typical hazards include:

- inappropriate movements and postures
- physical and atmospheric hazards of materials
- height or depth of storage receptacles
- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat
- manual handling hazards.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)
- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork.
- product requirements
- job priority
- product/material variations.

Variables

Key variables to be monitored include:

- types of products or materials to be received/despached
- handling heights
- types of equipment
- types of workplace documentation
- atmospheric conditions.
-

Unit Sector(s)

Not applicable.

MSAPMSUP240A Undertake minor maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to operators who are involved in providing basic maintenance and the resolving of routine problems to procedures. It does not cover activities normally requiring traditional trade training.

Application of the Unit

Application of this unit

In a typical scenario a plant operator does minor maintenance activities on the plant and equipment being operated. For instance the pressure drop across a filter unit may be high, indicating the filter cartridge needs changing. The operator takes the filter unit out of operation, cleans the unit, uses the correct spanner to open the lid, installs a fresh cartridge, closes the unit using the spanner again, then cleans up the area and disposes of the spent cartridge. Typically this sort of maintenance will be done on the plant and will not require workshop type facilities.

The operator will:

- be aware of and contribute to a safe working environment
- identify and check equipment for faults
- perform basic maintenance to procedures
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify maintenance requirements.	1.1 Identify equipment variations/irregularities using observed data and plant records. 1.2 Assess the urgency/priority of the situation. 1.3 Identify appropriate corrective action. 1.4 Identify correct tools and materials. 1.5 Assess the impact of the maintenance activity and communicate to appropriate personnel. 1.6 Identify hazards and risk controls. 1.7 Identify work permit requirements.
2. Prepare for maintenance activity.	2.1 Ensure equipment is turned off and isolated as required. 2.2 Clear the area of obstructions and hazardous materials. 2.3 Obtain appropriate tools, parts, materials and procedures. 2.4 Obtain the appropriate work permits and adhere to the requirements. 2.5 Communicate the impending maintenance activity to the appropriate personnel.
3. Perform maintenance activity.	3.1 Access all relevant information. 3.2 Undertake maintenance activity according to procedures. 3.3 Use tools and maintenance techniques correctly. 3.4 Restore equipment to normal working condition. 3.5 Leave the work area in a clean and safe condition. 3.6 Ensure permits are signed off as appropriate.
4. Test equipment.	4.1 Test equipment according to procedures. 4.2 Return equipment to service. 4.3 Ensure equipment meets normal operating requirements.
5 Record maintenance activity.	5.1 Complete maintenance logs/plant history records. 5.2 Report maintenance activity to relevant personnel. 5.3 Identify and report outstanding maintenance requirements to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required. Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards. Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving maintenance problems, including:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults
- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- urgency and timeliness factors in maintenance
- maintenance planning/scheduling/records systems
- identification of tools, materials and spare parts
- basic techniques for using and handling tools
- physical measurement, alignment and clearance principles.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to interpret plant data and maintenance schedules.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Where the completion of this unit requires working under a permit/clearance, then competency must also be established in *PMAAPER200C Work in accordance with an issued permit*, or other appropriate unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate equipment tests are undertaken and analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- maintenance activities are completed safely and to procedures.

Assessment method and context

Assessment will occur on industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Maintenance activities

This competency unit includes minor maintenance such as the following:

- operational maintenance (eg connection-disconnection of hoses, greasing, lubrication and lubricant systems, adjusting sealing glands, cleaning and changing filters, 'nipping up' flanges)
- general cleaning
- removal and replacement (eg gland packing, changing blades or cutters, replacing gaskets, replacing /maintaining seals, changing filter elements, servicing strainers).

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools
- specialised tools
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, liquids and gases under pressure or flowing
- hot surfaces or materials
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out of specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations
- equipment in need of maintenance.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures
- manufacturer specifications, instructions, service manuals and other information.
-

Unit Sector(s)

MSAPMSUP273A Handle goods

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the handling of materials by an operator as an adjunct to the job of making product. It applies to a limited range of materials. It is NOT intended to be an alternative warehousing competency.

Application of the Unit

Application of this unit

This competency applies to operators who receive or despatch goods from either internal or external sources. The key factors are checking and inspecting goods for conformity to documentation. This competency is typically performed by operators working either independently or as part of a work team. It includes:

- reading and interpreting receipt documentation
- identifying and following procedures for checking goods
- identifying and reporting non-conforming goods
- completing workplace documentation.

This unit does not cover the use of forklift trucks or other load shifting devices. See *PMSUP205A Transfer loads* or *TDTD1097 Operate a forklift* as appropriate.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Identify requirements.	1.1 Interpret order/paperwork. 1.2 Check and take action on special requirements as needed. 1.3 Check identity of materials. 1.4 Check for completeness and damage. 1.5 Take action on non-conforming materials/loads.
2. Move materials to/from storage/production.	2.1 Select items to be moved based on job requirements and procedures/work instructions. 2.2 Load materials according to standard procedures. 2.3 Move materials as needed. 2.4 Store/place materials safely.
3. Complete documentation.	3.1 Complete material movement records. 3.2 Update stock records as required. 3.3 Complete other paperwork and records as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge of goods and materials sufficient to recognise variance from specifications and then determine appropriate action that is consistent with operating guidelines.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Competence includes the ability for the practical completion of the job to:

- apply and/or explain procedures for receiving/despatch of goods, and reconciliation of orders and invoices
- apply and/or describe:
 - storage/handling principles and procedures
 - material hazard properties and their implications for safe handling and storage
 - significance of material to customers
 - transport requirements and restrictions for materials.
- plan own work, including predicting consequences and identifying improvements
- identify when the operator is able to rectify problems, when assistance is required and who is the appropriate source for assistance
- identify and describe own role and role of others involved directly in the receiving of goods
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as incorrect/incomplete paperwork; wrong goods.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, eg to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to

- recognise the importance of material properties and qualities
- apply approved procedures
- take appropriate action to resolve problems or report problems to appropriate personnel.

Consistent performance should be demonstrated. For example, look to see that

- upstream and downstream communication is timely and effective
- procedures and work instructions are read and interpreted correctly
- problems are identified and appropriate action is taken (ie, the problem is fixed or reported)
- all safety procedures are followed.

Assessment method and context

Assessment will occur using industrial goods and will be undertaken in a work-like environment

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to operators working either independently or as part of a work team.

Procedures

All operations are performed in accordance with procedures.

Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- goods identification numbers and codes
- manifests
- picking slips, merchandising transfers, stock requisitions and bar codes
- manufacturer specifications
- supplier and/or client instructions.

Hazards

Typical hazards include:

- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- incorrect goods delivered
- incomplete orders and shipments
- inappropriate packaging
- wrong or incomplete labling
- incomplete or incorrect paperwork
- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)
- handling of materials which do not meet specifications
- resolving conflicting priorities
- ensuring the correct material arrives at the correct place at the right time.

Variables

Key variables to be monitored include:

- compliance with 'receiving' procedures
- appropriate handling of incoming goods
- completion of documentation
- condition of packaging and lifting or moving locations
- availability of lifting/moving equipment
- unloading practices
- variations in provider documentation.
-

MSAPMSUP383A Facilitate a team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the identification of team's goals and timelines, negotiating with the team to allocate tasks and ensuring the goals and timelines are met.

Application of the Unit

Application of this unit

This competency is typically performed by team leaders/operators who work within a team structure and are responsible for coordinating team functions within designated goals. It also requires the use of a range of well developed skills requiring some discretion and judgement to recognise and resolve a range of problems/conflict.

The team leader will:

- collect, analyse and organise information
- communicate ideas and information
- plan and organise activities
- work within a team
- use mathematical ideas and techniques
- solve problems
- use technology.
-

This unit of competency has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify tasks to achieve team goals.	1.1 Identify and agree on team goals, with team members input. 1.2 Identify tasks required to achieve team goals. 1.3 Identify team and individual safety responsibilities. 1.4 Allocate responsibilities of individuals within the team. 1.5 Ensure designated team goals are met by identifying strategies and timelines required to complete each task.
2. Organise allocation of tasks.	2.1 Estimate time and resources needed to complete tasks. 2.2 Identify competencies of individual team member and allocate/negotiate individual responsibilities. 2.3 Agree timelines for completion of each task. 2.4 Identify resources and support necessary for completion of job.
3. Monitor completion of allocated tasks.	3.1 Measure team performance against its goals. 3.2 Monitor individual compliance with procedures and take action as required. 3.3 Check at regular intervals that agreed timelines for completion of tasks are being met. 3.4 Negotiate alternative strategies to achieve allocated tasks when designated timelines are not being met. 3.5 Provide support to colleagues to ensure completion of allocated tasks.
4. Resolve conflicts between team members.	4.1 Identify conflict situations between team members. 4.2 Identify causes of conflict. 4.3 Implement conflict resolution procedures relevant to the level of conflict and to established practices. 4.4 Seek assistance as required to ensure conflict resolution.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Application of knowledge and understanding of the system sufficient to indicate understanding and knowledge of negotiating with team members to allocate and complete tasks to achieve team goals.

Knowledge of organization procedures, quality requirements and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risk using the hierarchy of controls applied to the manufacture of products. Application of approved hazard control and safety procedures and the use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving problems, including:

- effective use of teamwork
- impact of individual team member strengths/weaknesses/competencies on the allocation of responsibilities
- OHS roles and responsibilities of the individual and the team
- effective use of workplace documentation
- teamwork strategies
- working to timelines
- allocation of tasks
- health, safety and environment obligations of employers and employees imposed by the relevant legislation.

Competence includes the ability to:

- plan own work, including predicting consequences and identifying improvement
- identify and describe own role and role of others involved in the team
- identify team and individual goals relevant to the practical operation of the system
- identify team, section and organisation goals relevant to the practical operation of the system.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand typical procedures and work instructions, plant drawings and safety information as provided to operators.

Writing is required to the level of completing workplace forms, quality assurance records and production reports.

Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit.

These may include the ability to:

- identify and prioritise work activities
- negotiate and monitor work activities
- understand the impact of individual tasks on the completion of team objectives
- allocate and oversee that tasks are completed safely and within timelines
- ensure relevant procedures are followed and used when completing activities
- identify and take appropriate action on problems or potential problems.

Consistent performance should be demonstrated. For example, look to see that:

- willingness to participate as part of a group is demonstrated
- support is sought from and given to colleagues to achieve team objectives
- all safety procedures are always followed.

Assessment method and context

Assessment will occur in work-like environment.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors in the industries.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Problems

Anticipate and solve problems means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution / a solution recorded in the procedures.

Typical problems may include:

- required information/materials not available
- required tool/equipment not available
- conflicting priorities
- short timeframe.

Variables

This competency unit may vary according to organization use of the following information sources and documentation:

- procedures/work instructions
- materials safety data sheets
- job cards
- maintenance logs
- plant drawings.

Key variables to be monitored include:

- type of communication used within each organisation
- established work practices/policies
- size and structure of the team/organisation
- group goals - individual, team and organisation
- organisation specific conflict resolution procedures.
-

Unit Sector(s)

Not applicable.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor. Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA
1. Identify the problem.	<p>Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.</p> <p>1.1 Identify variances from normal operating parameters and product quality.</p> <p>1.2 Define the extent, cause and nature of the problem by observation and investigation.</p> <p>1.3 State and specify the problem clearly.</p>
2. Determine fundamental cause of problem.	<p>2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques.</p> <p>2.2 Develop possible cause statements.</p> <p>2.3 Identify fundamental cause.</p>
3. Determine corrective action.	<p>3.1 Consider all possible options for resolution of the problem.</p> <p>3.2 Consider strengths and weaknesses of possible options.</p> <p>3.3 Determine corrective action to remove the problem and possible future causes.</p> <p>3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures.</p> <p>3.5 Develop recommendations for ongoing monitoring and testing.</p>
4. Communicate recommendations.	<p>4.1 Prepare report on recommendations.</p> <p>4.2 Present recommendations to appropriate personnel.</p> <p>4.3 Follow up recommendations if required.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units. In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures. Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non- routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Manage the transition to a new contract	1.1 The requirements of the contract are discussed, clarified, and agreed by all parties 1.2 Responsibilities for establishing and carrying out

- procedures are assigned to achieve contract outcomes
- 1.3 Transition arrangements are confirmed and implemented
 - 1.4 Effective communication strategies and processes are established and implemented to assist ongoing communication between stakeholders and suppliers
 - 1.5 Effective performance measures are established
 - 1.6 Risk management plan is updated in accordance with organisational policy and procedures
- 2 Manage the performance of the contract
- 2.1 Progress of the contract is monitored against set targets and performance measures to ensure success of the procurement activity
 - 2.2 Should monitoring find that set targets and performance measures are not being met, action is taken to rectify performance in a timely manner
 - 2.3 Advice and support are provided to solve problems, make improvements and maintain progress
 - 2.4 Opportunities to improve procurement outcomes are sought and negotiated with suppliers
 - 2.5 Any contract variation is negotiated in accordance with the terms of the contract and organisational policy and procedures
 - 2.6 Contract variations agreed between the parties are documented and approvals gained
 - 2.7 Opportunities are provided for stakeholders and suppliers to have input to and receive feedback on progress during the performance of the contract
- 3 Manage the evaluation of the contract
- 3.1 Evaluation of contract performance is undertaken relative to planned performance measures and in consultation with stakeholders and suppliers
 - 3.2 Conclusions are detailed against agreed criteria and provide a complete picture of performance of the supplier, the organisation's procurement processes and value for money
 - 3.3 Evaluation outcomes are documented in

accordance with organisational requirements to assist improvement in future procurement activities

- 3.4 Suppliers and stakeholders are advised of evaluation outcomes in a timely manner in accordance with organisational guidelines

Required Skills and Knowledge

Not applicable.

Evidence Guide

This Evidence Guide must be read in conjunction with the Assessment Guidelines for the National Public Services Training Package.

Critical aspects of evidence

integrated demonstration of all elements and their related performance criteria; and transition, performance and evaluation of contracts
relevant legislation and procedures applied to the procurement process

Interdependent assessment of units

Pre-requisite units: Nil

Co-requisite units: Nil

Co-assessed units: This unit may be co-assessed with any of the generalist public sector specific units at Diploma level or above. It is recommended that co-assessment occurs with some or all of the following units: PSPETHC501A Promote the Values and Ethos of Public Service; PSPLEGN501A Promote Compliance with Legislation in the Public Sector; PSPPOLI501A Manage Policy Implementation; PSPGOV501A Apply Knowledge of Government Systems; and PSPMNGT605A Manage Diversity

Underpinning knowledge

Commonwealth, State/Territory, Local Government procurement guidelines
procurement policies and practices
government procurement environment
financial rules and regulation requirements
legal requirements of government contracting
implications of particular contracting agreements
whole-of-life considerations
disposals considerations
procurement approval processes
strategic planning processes
procurement management processes
Law of contract
Trade practices law
Commercial law and relevant legislation
equal employment opportunity, equity and diversity principles
financial and accounting issues relevant to the contract

Underpinning skills

project management skills
financial and other resources management skills
communication skills, orally and in writing
cross-cultural competency, including gender and disability
research skills
analytical skills
problem solving using conceptual and reasoning skills
networking skills with clients, suppliers, stakeholders and end users

Resource implications

assessment may involve reports from supervisors and/or managers, reports from team members and references from clients

Consistency of performance

evidence to be gathered over time across a range of variables

Context/s of assessment

this competency may be assessed on-the-job or in a simulated work environment; holistic assessment; assessment by way of documented information and/or examples of personal work
This Evidence Guide must be read in conjunction with the Assessment Guidelines for the National Public Services Training Package.

Critical aspects of evidence

integrated demonstration of all elements and their related performance criteria; and transition, performance and evaluation of contracts
relevant legislation and procedures applied to the procurement process

Interdependent assessment of units

Pre-requisite units: Nil

Context/s of assessment

this competency may be assessed on-the-job or in a simulated work environment; holistic assessment; assessment by way of documented information and/or examples of personal work

Range Statement

The Range of Variables provides information about the context in which the unit of competency is carried out. It allows for differences between States and Territories and the Commonwealth, and between organisations and workplaces. It allows for different work requirements, work practices, and knowledge. The Range of Variables also provides a focus for assessment and relates to the unit as a whole.

Stakeholders may include:

- end users, customers or clients and sponsors
- potential providers or suppliers
- current providers/suppliers
- technical or functional experts or advisers
- federal, state/territory and/or local government
- the organisation
- other public sector organisations
- employees
- unions or staff associations
- industry bodies
- local communities and society as a whole
- lobby groups, special user groups

Monitoring may involve:

- progress meetings
- visits to the supplier's premises
- provision of samples
- regular progress reports from the supplier
- independent audit
- end user feedback

Evaluation of supplier performance may include:

- strengths and weaknesses
- client acceptance of service delivery (client satisfaction)
- achievements in meeting delivery and completion dates
- compliance with other contractual requirements
- performance in relation to relevant policy objectives such as industry development, care for the environment, occupational health and safety, and affirmative action
- achievement of the supplier in developing Australian and New Zealand supply networks
- general relationships including effectiveness of communication at all levels
- performance of key technical personnel
- acceptability and cost of whole of life technical support including lead times and availability of spares and maintenance services
- achievements in innovation and quality improvement programs
- acceptability and suitability for future agreements including potential status as an approved supplier

Evaluation of the organisation's procurement processes may focus on:

- effectiveness of project management including the project plan and the responsibilities and accountabilities set out in it
- quality of the business case, as indicated by the achievement of planned outcome and the contribution to program objectives
- effectiveness of supplier qualification processes

value obtained in bid clarification and post-tender negotiation
effectiveness of project management systems focusing particularly on management information
effectiveness of risk management
methods for controlling variations in cost, time, quality and performance from the initial planning to completion
adequacy of safeguards against fraud, error and impropriety
incidence of material losses due to waste or inefficiency
overall performance in terms of cost, time, service and quality

Contract variation may include:

modification of targets, performance measures, procurement plans, resourcing, monitoring and evaluation processes

Value for money must reflect:

whole of life program benefits
residual values
costs of parts
servicing and maintenance
industry benchmarks

The Range of Variables provides information about the context in which the unit of competency is carried out. It allows for differences between States and Territories and the Commonwealth, and between organisations and workplaces. It allows for different work requirements, work practices, and knowledge. The Range of Variables also provides a focus for assessment and relates to the unit as a whole.

Stakeholders may include:

end users, customers or clients and sponsors

SIRRMER009A Produce perspective drawing, plans and elevations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to produce perspective drawings, plans and elevations in retail or exhibition environments in response to client briefs.

Application of the Unit

Application of the unit This unit requires the team member to demonstrate knowledge of manual or software-based drafting techniques to develop and present a folio of perspective drawings, plans and elevations in response to a client brief. Frontline visual merchandisers and visual merchandiser supervisors and managers are responsible for this role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Produce one-point perspective visuals from a given plan and elevation.	1.1 Interpret plan and elevation and determine suitable scale.
	1.2 Construct one-point grid of interior space delineating scale representations of floor, walls and ceiling using appropriate <i>manual drafting tools and equipment</i> or <i>computer software</i> .
	1.3 Position objects correctly in given space according to the given plan.
	1.4 Determine correct heights of objects within the space from provided elevations.
2 Produce two-point perspective visuals from a given plan and elevation.	2.1 Construct two-point grid of interior space, indicating scale representations of floor, walls and ceiling.
	2.2 Produce visuals of walls and ceiling to specified proportions according to given plans and elevations.
	2.3 Draw accurate scale heights of objects and architectural details according to specifications in elevations.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4 Position objects to match plans.</p> <p>2.5 Render interiors produced in a colour finish scheme suitable for the presentation of the organisation and product.</p>
<p>3 Produce multi-point perspective from given industry briefs.</p>	<p>3.1 Determine suitable view of plan and elevation for <i>client</i> presentation and to best represent requirements of the brief.</p> <p>3.2 Draft perspective and rendered interior views according to given plans and elevations.</p> <p>3.3 Produce alternative design solutions to meet client needs.</p> <p>3.4 Present progress solutions to client for feedback.</p> <p>3.5 Draft design modifications and present portfolio of finished visuals for client sign-off.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - present verbally to client through clear and direct communication
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- use and maintenance of retail drafting tools and equipment
- manual drafting and drawing
- the application of computer software as an aid in the production of finished visuals
- developing written reports
- compiling a portfolio.

The following knowledge must be assessed as part of this unit:

- elements and principles of design and trends in retail visual merchandising design
- perspective in visual merchandising design applications
- relevant organisation or industry standards
- organisation merchandising policy.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- utilises relevant research on visual merchandising and architectural design trends
- negotiates and confirms client requirements for a range of visual merchandising design briefs
- consistently selects and applies appropriate drafting and drawing tools
- compiles portfolios, including alternative solutions offered via written reports and finished visuals
- makes verbal presentations to support the presentation of concept visuals
- plans, coordinates and implements activities associated with the brief in order to meet client timelines
- evaluates client feedback and makes modifications as required
- documentary evidence of consultative and liaison processes with business partners.

Context of and specific resources for assessment

Assessment must ensure access to:

- real or simulated retail outlets or exhibition environments
- drafting equipment and facilities
- relevant documentation, such as:
 - real or simulated client briefs
 - texts and visual merchandising and architectural periodicals.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- review of a portfolio of perspective drawings plans and elevations developed in response to a brief
- third-party reports from a supervisor
- client feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

RANGE STATEMENT

Manual drafting tools and equipment may include:

- T-square
- scale rule
- set squares
- blades
- HB and harder pencils
- coloured pencils
- dry pastels
- Copic markers
- fine-line pens.

Computer software may include:

- Illustrator
- DesignCAD products.

Clients may include:

- Customers may include retail managers within the organisation or external businesses.

SIRRMER020A Create and implement exhibition space

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to design and implement displays in exhibition spaces.

Application of the Unit

Application of the unit This unit requires the team member to apply knowledge of project planning to negotiate client requirements, assess the specific design requirements of exhibitions, develop sketches and concept drawings, arrange relevant suppliers, and install and bump out exhibition displays.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess the specific design requirements of exhibitions.	1.1 Interpret and negotiate the <i>client</i> brief.
	1.2 Assess the requirements of the exhibition according to the final brief and develop an <i>event checklist</i> .
2 Produce sketches and rendered concept drawings.	2.1 Produce and refine sketches drawings, including rendered perspectives, elevations and in situ illustrations of the exhibition.
	2.2 Develop finished plans providing solutions to given briefs via a series of design variations.
	2.3 Develop the exhibition proposal, including a detailed report and recommendations.
	2.4 Negotiate and adjust the final exhibition design to the satisfaction of the client.
	2.5 Develop working construction and detail drawings to match job specifications.

ELEMENT	PERFORMANCE CRITERIA
	2.6 Incorporate <i>safety and risk assessments</i> into all planning.
3 Source audio and lighting suppliers and products.	3.1 Research suppliers and contractors required to fulfil the exhibition design. 3.2 Brief contractors and suppliers on precise requirements. 3.3 Coordinate supply of products and services to ensure timely and successful completion of the exhibit.
4 Design, install and bump out display.	4.1 Assess and arrange staffing requirements for each phase according to the designated event checklist. 4.2 Determine <i>specific operations for installation</i> from construction, packing, transportation, on-site and installation services. 4.3 Identify strategic objectives and time schedules, and delegate display installation and bump out according to the display plan and designated event checklist. 4.4 Coordinate bump out of display according to the designated event checklist.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - negotiate client brief and final design
 - brief contractors and suppliers through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- creative thinking skills
- planning skills
- team skills
- collaboration and negotiation skills
- design application
- illustrative and model making skills
- verbal presentation skills.

The following knowledge must be assessed as part of this unit:

- merchandising styles and layouts
- the differences between retail and exhibition merchandising
- venue regulations regarding exhibition merchandising
- national and global trends in exhibition design, product presentation and promotional techniques
- relevant support services and suppliers
- design personnel roles
- space planning, colour and lighting
- the impact of exhibition traffic flow patterns
- presentation standards
- OHS issues and safe handling requirements
- site storage arrangements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- demonstrated ability to negotiate with an exhibitor and develop alternative designs for exhibition merchandising
- demonstrated ability to work in a team and install and bump out an exhibition display
- consistent application of relevant OHS requirements
- answers to questions on exhibition merchandising.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - legislation and statutory requirements
 - OHS requirements
 - industry codes of practice
 - information and performance data on existing business model and IT infrastructure
- information on:
 - client requirements
 - organisation or product image
 - products and services
 - retail design trends
 - materials.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated exhibition design project
- third-party reports from a supervisor
- a folio of personally developed designs
- client feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Clients may include:

- internal managers
- external organisations.

RANGE STATEMENT

Event checklist may include:

- exhibitor brief
- venue information
- venue regulations
- merchandise design.
- customer and exhibition profiles
- handling
- loading and transport logistics
- height, weight and other imposed restrictions
- audiovisual, electrics and other services.
- health and safety issues
- safety equipment
- site storage arrangements.

Safety and risk assessments may include:

- different venue safety regulations
- compliance with occupational health and safety regulations/legislation
- industry safety codes of practice
- traffic flow patterns
- size, type ,location, weight and stability of exhibit
- manual/mechanical handling requirements.

Specific operations for installation may include:

- construction
- packing
- transportation
- on-site installation services.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Research store product range.	<p>1.1 Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p> <p>1.2 Identify <i>store product range</i> according to relevant product information.</p>
2 Recommend home and home improvement products.	<p>2.1 Identify relevant products to meet expressed <i>customer requirements</i> to assist their buying decisions.</p> <p>2.2 Demonstrate <i>features and benefits of products</i> to <i>customers</i> to create a buying environment.</p> <p>2.3 Convey technical features and benefits as outlined in manufacturer specifications.</p>
3 Advise on product warranties.	<p>3.1 Clearly explain comparisons between product and manufacturer warranty terms to customers.</p> <p>3.2 Confirm individual product warranty terms and by accessing relevant sources of information and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>accurately conveying to customers.</p> <p>3.3 Provide customers with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to store policy and procedures.</p>
<p>4 Estimate quantities and order product.</p>	<p>4.1 <i>Estimate area and product quantities</i>, where required, based on manufacturer specifications, plan provided or customer needs.</p> <p>4.2 Arrange for area measurement where indicated by product type and according to store procedures.</p> <p>4.3 Calculate cost to customers and prepare quotes according to <i>store policy and procedures</i>.</p> <p>4.4 Order product and arrange customer pick-up and delivery or installation where required.</p> <p>4.5 Provide customers with accurate information regarding product availability, delivery and installation procedures as required, including date and time of delivery.</p> <p>4.6 Notify customers promptly of any undue delays regarding completion, supply or installation of products.</p>
<p>5 Negotiate price and payment options.</p>	<p>5.1 Convey store recommended retail pricing for various brand options accurately conveyed to customers according to legislative requirements.</p> <p>5.2 Negotiate individual product prices according to store policy where necessary to achieve sales.</p> <p>5.3 Convey store payment options to customers and negotiate preferred option following store procedures.</p>
<p>6 Advise on and arrange product service and repair.</p>	<p>6.1 Diagnose problem in terms of operator and equipment faults by observation, customer questioning and accessing manufacturer information.</p> <p>6.2 Offer solutions according to nature of problem, available product information and store policy.</p> <p>6.3 Identify and accurately describe service and repair process to customers, as required, according to store policy.</p>

ELEMENT

PERFORMANCE CRITERIA

- 6.4 Prepare and supply quotations and timelines to customers for basic service and repairs.
- 6.5 Identify and accurately transcribe customer details to repair form according to store procedures.
- 6.6 Label and securely store items for repair according to store policy.
- 6.7 Notify customers without undue delay on completion of service and repair.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - apply product knowledge by providing information and advice to customers and staff, including advice on warranties and product service and repair
 - make recommendations and advise on services through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- handling customers with special needs, including difficult or abusive customers
- demonstrating product features and operation
- negotiation skills
- using and applying technology required to demonstrate operation of store product range
- literacy skills in the following areas:
 - reading and understanding product information
 - reading and understanding product warranties and guarantees
- numeracy skills in regard to:
 - advising and negotiating price and payment options
 - measuring and estimating accurately
 - metric and imperial measuring scales
 - techniques and procedures for measuring surface areas
 - estimating from architects or builders plans.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - sales and customer service
 - methods of dealing with special needs and requests of customers
 - customer complaints
 - store pricing and payment and warranty terms and conditions
 - store product service and repair policy and procedures
- store home and home improvement product range
- design and technical information and features and function and operation of store product range

REQUIRED SKILLS AND KNOWLEDGE

- quality, energy efficiency and environmental considerations of products
- pricing procedures, including GST requirements
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- continually updates and applies product knowledge to provide comprehensive advice to customers and other sales team members
- understands and applies available product information when providing advice to customers
- consistently applies store policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs other sales team members on store home and home improvement products in the store merchandise range. Advises customers and other sales team members on store merchandise range warranties and store pricing and payment options.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - store policy and procedures manuals
 - industry codes of practice and relevant legislation
 - OHS legislation and codes of practice
- an appropriate range of home and home improvement products
- a range of customers with different requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Product knowledge*** may include:
- function
 - brand and product options
 - warranties
 - quality
 - accessories
 - component parts
 - storage and operation
 - design features
 - style
 - available colour range
 - manufacturing process
 - price
 - partner or complementary products
 - country of manufacture
 - energy efficiency
 - safety features, including flammability
 - environmental considerations
 - materials and fibre types
 - construction of products
 - care and maintenance requirements
 - stain and dirt resistance
 - product performance
 - colour fastness, colour fading properties
 - availability.

RANGE STATEMENT

Relevant sources of information may include:

- supplier product leaflets
- store product manuals
- energy rating information
- warranty information
- internet
- trade shows
- customer feedback
- consulting store information
- designated staff members
- contacting suppliers direct.

Store product range may include:

- home and home improvement products
- furniture products
- floor covering products and services
- kitchen and bathroom renovation products
- hardware products
- home gardening products
- soft furnishings
- manchester
- haberdashery.

Customer requirements may include:

- usage requirements
- lifestyle
- price range.

RANGE STATEMENT

Features and benefits of products may include:

- product type
- product performance features
- product durability
- function
- warranties
- quality
- design aspects of colour and texture feel
- thickness and weight of furnishing fabrics
- acoustic and thermal insulation properties of materials
- manufacturing process
- price
- country of manufacture
- energy efficiency
- environmental considerations.

Customers may include:

- new and existing customers
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- customers with routine or special needs.

Estimating area and product quantities may include:

- using measuring tools
- using a calculator
- estimating from builders' and architects' plans
- on-site measuring
- estimating based on measurements provided by customer
- making allowances for pattern matching
- estimating linear or volume-based quantities.

Store policy and procedures may include:

- policy and procedures relating to sales, payment and credit options, store reward schemes and customer service.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Monitor receipt and dispatch of goods	<p>1.1 Delegate responsibility for receipt and dispatch of goods to <i>appropriate staff</i>.</p> <p>1.2 Implement store procedures in regard to receipt, dispatch and secure storage of goods.</p> <p>1.3 Observe <i>staff</i> functions to ensure store procedures are followed and documentation is completed correctly.</p> <p>1.4 Implement store procedures to ensure goods inspected for quantity and quality on receipt.</p> <p>1.5 Act upon variations to quantity and quality of delivered goods according to <i>store policy and procedures</i>.</p> <p>1.6 Supervise safe <i>handling and storage of goods</i> according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Maintain stock records.	2.1 Monitor and maintain stock levels at required levels. 2.2 Maintain, monitor and adjust stock reorder cycles as required. 2.3 Inform team members of their individual responsibilities in regard to recording of stock. 2.4 Maintain stock storage and movement <i>records</i> according to store policy. 2.5 Record stock discrepancies and follow procedures according to store policy. 2.6 Monitor stock performance and identify and <i>report</i> fast and slow selling items according to store policy.
3 Coordinate stocktake or cyclical count.	3.1 Interpret policy and procedures in regard to <i>stocktaking</i> and cyclical counts and explain to team members. 3.2 <i>Roster</i> staff according to allocated budget and time constraints. 3.3 Allocate stocktaking tasks to individual team members. 3.4 Provide team members with clear directions for the performance of each task. 3.5 Allocate team members to ensure effective use of staff resources to complete task. 3.6 Produce accurate reports on stocktake data, including discrepancies, for management.
4 Identify stock losses.	4.1 Identify, record and assess losses against potential loss forecast on a regular basis. 4.2 Identify avoidable losses and establish reasons. 4.3 Recommend and implement possible solutions.
5 Process orders.	5.1 Process and raise orders for stock as requested according to store policy and procedures. 5.2 Maintain <i>ordering and recording system</i> . 5.3 Ensure availability of sample range according to buying plan.

ELEMENT	PERFORMANCE CRITERIA
	5.4 Order pricing materials as required.
	5.5 Record negotiated purchase and supply agreements and file for retrieval.
6 Follow up orders.	6.1 Monitor delivery process to meet agreed deadlines.
	6.2 Handle routine supply problems or refer to management as required by store policy.
	6.3 Maintain ongoing liaison with buyers, store or departments, warehouse and <i>suppliers</i> to ensure continuity of supply.
	6.4 Distribute stock according to store or department allocation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- store stocktaking systems
- use of electronic recording equipment
- interpersonal communication skills to:
 - inform team members of their responsibilities and give instructions
 - explain policies and procedures to staff
 - allocate tasks and provide directions for performance of tasks
 - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- time management
- negotiation skills
- report preparation and presentation
- literacy and numeracy skills in regard to:
 - stock control reports and documentation
 - processing orders
 - maintaining delivery and supply records
 - stock distribution records
 - maintaining stock ordering and recording systems.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - stock control
 - store merchandising system
 - current and future stock levels
 - bar codes, labels and price tags
 - store stock recording system
 - stock replenishment and reorder procedures
 - inter- and intra-store and department transfers
 - reporting of stock discrepancies and damage
 - identifying and recording stock losses
 - identifying and recording discrepancies

REQUIRED SKILLS AND KNOWLEDGE

- existing suppliers
- quality control procedures and requirements
- receipt and dispatch of goods, including inspection for quality and quantity
- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant OHS legislation and codes of practice
- principles and techniques for interpersonal communication skills.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently implements and monitors store policy and procedures regarding receipt, dispatch and secure storage of goods
- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store policy and procedures
- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures for receipt and dispatch of goods
 - store procedures for stocktake
 - OHS legislation and codes of practice
 - industry codes of practice
 - legislation and statutory requirements
 - store merchandising and marketing policy and procedures
 - inter- and intra-store and department transfer procedures
 - store quality control procedures and requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Appropriate staff*** may include:
- frontline staff
 - relevant managers
 - supervisor
 - team leader
 - specialist staff.

- Staff*** may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.

- Store policy and procedures*** in regard to:
- stock control
 - stock control system
 - recording procedures
 - procedures for investigating discrepancies
 - store merchandise and marketing
 - pricing, labelling and packaging requirements
 - quality control policy and procedures.

- Handling and storage of goods*** may vary according to:
- stock characteristics
 - industry codes of practice.

- Records*** may be:
- manual
 - digital.

RANGE STATEMENT

Reports for management may include:

- financial reports
- business documents
- informal reports
- stocktake reports.

Stocktaking may be:

- cyclical
- compliance driven.

Roster may include:

- varying levels of staff training
- staffing levels
- routine or busy trading conditions
- full-time, part-time or casual staff
- range of staff responsibilities.

Ordering and recording system may be:

- manual
- digital.

Suppliers may include:

- existing contacts
- new contacts
- local suppliers
- overseas supplies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish rapport with customers.	<p>1.1 Establish rapport and relationship with <i>customer</i> and express a genuine interest in <i>customer needs and requirements</i> to enhance customer commitment, trust and credibility of store and to build return customer base.</p> <p>1.2 Maintain <i>professional ethics</i> with the customer to promote store image and credibility.</p> <p>1.3 Accurately clarify <i>customer needs and preferences</i> to maximise sales opportunities.</p> <p>1.4 Maximise sales opportunities by use of add-on and complementary <i>sales techniques</i>.</p> <p>1.5 Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Apply expert knowledge.	<p>1.6 Use effective methods to close sales.</p> <p>2.1 Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to legislative requirements.</p> <p>2.2 Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.</p> <p>2.3 Evaluate product range, accurately demonstrate features and benefits of products or services where appropriate and make recommendations to the customer to maximise sales potential.</p> <p>2.4 Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to store policy.</p> <p>2.5 Accurately calculate prices and discounts according to pricing determinants and store policy.</p>
3 Provide post sales support.	<p>3.1 Accurately provide evidence of ongoing support as sale is concluded.</p> <p>3.2 Accurately explain back-up service and reassure customer according to legislative requirements and store policy.</p> <p>3.3 Provide customer with store or salesperson's contact details to provide line of contact and customer followed up according to store policy.</p> <p>3.4 Accurately enter customer and transaction details into customer database.</p>
4 Plan sales presentations.	<p>4.1 Plan presentation to complement product characteristics.</p> <p>4.2 Select client group according to product characteristics and store merchandising policy.</p> <p>4.3 Access promotional materials where required and distribute to client group.</p> <p>4.4 Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
5 Implement sales presentation.	<p>5.1 Ensure sufficient numbers of adequately briefed support staff, where required for a presentation.</p> <p>5.2 Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.</p> <p>5.3 Demonstrate products or services to create a buying environment.</p> <p>5.4 Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future <i>sales presentations</i> according to store sales policy.</p>
6 Maintain and utilise a customer database.	<p>6.1 Maintain customer confidentiality as required by store policy and legislative requirements.</p> <p>6.2 Develop and maintain accurate <i>customer records</i> and store securely according to store policy and procedures.</p> <p>6.3 Accurately identify and follow up regular customers according to store marketing policy.</p> <p>6.4 Accurately utilise customer records to advise customers on products and services of possible interest.</p> <p>6.5 Implement <i>customer loyalty schemes</i> where required according to store promotional activities.</p>
7 Deal with difficult customers.	<p>7.1 Acknowledge customer complaints and problems and reassuringly support <i>difficult customers</i> to produce positive outcome.</p> <p>7.2 Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.</p> <p>7.3 Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store.</p> <p>7.4 Establish mutually acceptable resolution of complaint.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- selling techniques, including:
 - opening and closing techniques
 - identifying buying signals
 - strategies to focus customer on specific merchandise
 - add-ons and complementary sales
 - overcoming customer objections
- presentation skills
- conflict resolution
- verbal and non-verbal interpersonal communication
- accessing relevant product information
- literacy and numeracy skills in regard to:
 - reading and understanding product information
 - reading and understanding store policies and procedures
 - recording client and sales information
 - calculating prices and discounts.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - establishing, maintaining and utilising customer records
 - updating and maintaining customer mailing lists
 - methods of maintaining customer confidentiality and secure storage of customer details
 - pricing, including GST requirements
 - price negotiation and payment and credit options
 - resolving customer complaints
- store and area merchandise and service range
- relevant legislation and statutory requirements
- relevant industry codes of practice
- OHS requirements such as:
 - manual handling
 - plant and equipment

REQUIRED SKILLS AND KNOWLEDGE

- hazardous substances and dangerous goods
- workers compensation
- customer types and needs, including:
 - customer buying motives, customer behaviour and cues
 - individual and cultural differences, demographics, lifestyle and income
 - types of customer needs, e.g. functional, psychological.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations and providing after sales support
- consistently applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- consistently develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and accurately discerning customer buying motives and customer needs and requirements
- consistently maximises sales opportunities by using effective selling techniques, applying detailed product knowledge and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- consistently and accurately applies detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
- consistently uses effective questioning, listening and observation skills to accurately determine customer requirements
- consistently and effectively plans, prepares and conducts sales presentations and briefs support staff where required, to create a buying environment and maximise sales performance
- consistently evaluates personal and or team sales performance to maximise future sales
- consistently and accurately establishes, records and maintains customer records and details, maintains customer confidentiality, ensures secure storage of data and uses customer records to maximise customer interest and create a buying atmosphere
- consistently resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - policy and procedures manuals
 - industry codes of practice and relevant legislation
 - OHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- a single customer, couples, families or groups.

Customer needs and requirements may be clarified through:

- observation
- appropriate questioning
- active listening
- empathy
- reassurance and confirmation.

Maintaining ***professional ethics*** with the customer may include:

- honesty
- positive statements
- confirmed appraisals of products and services.

Customer needs and preferences may include:

- product type
- brand
- size
- product characteristics
- customer physical needs
- price.

RANGE STATEMENT

Sales techniques will include:

- add-on and complementary products and services
- selling up or down
- suggestive selling
- variety of methods of closing sales.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- environmental protection legislation
- OHS
- transport, storage and handling of goods
- pricing procedures, including GST requirements
- privacy laws
- liquor laws
- tobacco laws
- sale of second-hand goods
- health and welfare law specific to local government, state and federal legislation.

Store policy and procedures in regard to:

- selling products and services
- maintaining and utilising client records
- promotional, marketing, discounting and reward programs
- dealing with difficult customers
- resolving customer complaints.

Back-up service may include:

- delivery specifications
- warranties and guarantees
- returns policies
- technical support
- installation
- financial products and services.

Customer database may be:

- manual
- computer-based.

RANGE STATEMENT

Product characteristics may include:

- features and benefits
- price range
- supplier or manufacturer information
- target group.

Promotional materials may include:

- brochures
- pamphlets
- posters
- promotional merchandise
- business cards
- vouchers.

Sales presentations may be:

- in-house
- at client site
- visual
- verbal.

Customer records may include:

- name and contact details
- transaction records
- personal preferences
- anniversaries and special dates
- details of items bought or returned.

Customer loyalty schemes may include:

- customer clubs
- customer reward schemes
- credit or discount facilities
- special offers.

TDTD297B Shift a load using manually-operated equipment

Modification History

Not applicable.

Unit Descriptor

Field D Load handling

This unit involves the skills and knowledge required to shift loads using manually-operated mechanical equipment, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation with the aid of the equipment in accordance with the plan.

Persons achieving competence in this unit will need to fulfil all of the relevant State/Territory OHS regulatory requirements concerning the safe lifting and handling of a load using manually-operated load-shifting equipment. It should be noted that the use of the term 'SWL' (Safe Working Load) is under review by Standards Australia and may be replaced in the future by the term 'Rated Capacity'.

Field D Load handling

This unit involves the skills and knowledge required to shift loads using manually-operated mechanical equipment, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation with the aid of the equipment in accordance with the plan.

Persons achieving competence in this unit will need to fulfil all of the relevant State/Territory OHS regulatory requirements concerning the safe lifting and handling of a load using manually-operated load-shifting equipment. It should be noted that the use of the term 'SWL' (Safe Working Load) is under review by Standards Australia and may be replaced in the future by the term 'Rated Capacity'.

Application of the Unit

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess risks arising from the relocation of the load	1.1 Products, goods or materials to be relocated are identified
	1.2 Location for storage is determined
	1.3 Routes to be followed are identified
	1.4 Points of balance are estimated
	1.5 Effect of moving contents which may be loose, liquid, dangerous or hazardous are considered
	1.6 Potential risks in route(s) which may be followed are considered
	1.7 Lifting equipment to minimise potential risks is identified
	1.8 Appropriate personal protective equipment is worn
2 Plan load relocation	2.1 Load shifting equipment is selected in accordance with workplace procedures
	2.2 Safe procedures for using lifting equipment are identified, including the calculation of Safe Working Load (SWL) and/or Working Load Limit (WLL) for weight of goods to be moved
	2.3 Process for relocating load is proposed including predicting and planning for potential difficulties
	2.4 Proposed process is checked against relevant code of practice and workplace procedures for compliance

- 2.5 Lifting equipment and accessories are checked for safe operation in accordance with manufacturer's instructions and workplace procedures
- 3 Relocate load
 - 3.1 Any unsafe equipment is reported to appropriate personnel in accordance with workplace procedures
 - 3.2 Planned process and route are followed using equipment within necessary range of limitations
 - 3.3 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
 - 3.4 Relocation is checked to see that it meets work requirements, and any variances are reported
 - 3.5 Equipment is returned to storage area in accordance with workplace procedures

Required Skills and Knowledge

Not applicable.

Evidence Guide

Critical aspects of evidence to be considered

- a. Assessment must confirm appropriate knowledge and skills to:
 - a.1. use manually-operated equipment to shift loads
 - a.2. identify risks to self, others and equipment when using manually-operated equipment to shift loads and take appropriate precautions to minimise the risks
 - a.3. estimate effect of load and operating limitations of equipment
 - a.4. locate, interpret and apply relevant information
 - a.5. maintain workplace records
 - a.6. use workplace colloquial and technical language and communication technologies in the workplace context

Interdependent assessment of units

- a. This unit of competency may be assessed in conjunction with other units that form part of a worker's job function

Required knowledge and skills

- a. Relevant OHS and procedures and guidelines concerning the use of manually-operated equipment to shift loads
- b. Risks when using manually-operated equipment to shift loads and related precautions to control the risk
- c. Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment
- d. Housekeeping standards procedures required in the workplace
- e. Site layout and obstacles
- f. Ability to modify activities depending on differing workplace contexts, risk situations and environments
- g. Ability to read and comprehend simple statements in English
- h. Ability to identify containers and goods coding, IMDG markings and where applicable emergency information panels
- i. Ability to estimate the size shape and special requirements of loads

Resource implications

- a. Access is required to opportunities to:
 - a.1. participate in a range of exercises, case studies and other simulated practical and knowledge assessments that demonstrate the skills and knowledge to shift materials safely using manually-operated equipment, and/or
 - a.2. shift materials safely using manually-operated equipment in an appropriate range of operational situations

Consistency in performance

- a. Applies underpinning knowledge and skills when:
 - a.1. using manually-operated equipment to shift loads
 - a.2. identifying risks to self, others and equipment when using manually-operated equipment to shift loads and taking appropriate precautions to minimise the risks
 - a.3. estimating effect of load and operating limitations of equipment
 - a.4. locating, interpreting and applying relevant information
 - a.5. maintaining workplace records
 - a.6. using workplace colloquial and technical language and communication technologies in the workplace context
- b. Shows evidence of application of relevant workplace procedures including:

- b.1. OHS regulations and hazard prevention policies and procedures
- b.2. workplace procedures and work instructions concerning the use of manually-operated equipment to shift loads
- b.3. obtaining assistance from other team members when required
- b.4. housekeeping procedures
- b.5. environmental protection procedures when shifting materials
- c. Action is taken promptly to report and/or rectify any potential difficulties in safely shifting a load using manually-operated equipment in accordance with OHS requirements and workplace procedures
- d. Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- e. Work is completed systematically with required attention to detail without damage to goods, equipment or personnel

Context for assessment

- a. Assessment of this unit must be undertaken by a Registered Training Organisation:
 - a.1. As a minimum, assessment of knowledge must be conducted through appropriate oral and/or written questioning
 - a.2. Appropriate practical assessment must occur:
 - a.2.1. at the Registered Training Organisation, and/or
 - a.2.2. in an appropriate work situation

Critical aspects of evidence to be considered

- a. Assessment must confirm appropriate knowledge and skills to:
 - a.1. use manually-operated equipment to shift loads
 - a.2. identify risks to self, others and equipment when using manually-operated equipment to shift loads and take appropriate precautions to minimise the risks
 - a.3. estimate effect of load and operating limitations of equipment
 - a.4. locate, interpret and apply relevant information
 - a.5. maintain workplace records
 - a.6. use workplace colloquial and technical language and communication technologies in the workplace context

Interdependent assessment of units

- a. This unit of competency may be assessed in conjunction with other units that form part of a worker's job function

Required knowledge and skills

- a. Relevant OHS and procedures and guidelines concerning the use of manually-operated equipment to shift loads
- b. Risks when using manually-operated equipment to shift loads and related precautions to control the risk
- c. Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment
- d. Housekeeping standards procedures required in the workplace
- e. Site layout and obstacles
- f. Ability to modify activities depending on differing workplace contexts, risk situations and environments
- g. Ability to read and comprehend simple statements in English
- h. Ability to identify containers and goods coding, IMDG markings and where applicable emergency information panels
- i. Ability to estimate the size shape and special requirements of loads

Resource implications

- a. Access is required to opportunities to:
 - a.1. participate in a range of exercises, case studies and other simulated practical and knowledge assessments that demonstrate the skills and knowledge to shift materials safely using manually-operated equipment, and/or
 - a.2. shift materials safely using manually-operated equipment in an appropriate range of operational situations

Consistency in performance

- a. Applies underpinning knowledge and skills when:
 - a.1. using manually-operated equipment to shift loads
 - a.2. identifying risks to self, others and equipment when using manually-operated equipment to shift loads and taking appropriate precautions to minimise the risks
 - a.3. estimating effect of load and operating limitations of equipment
 - a.4. locating, interpreting and applying relevant information
 - a.5. maintaining workplace records
 - a.6. using workplace colloquial and technical language and communication technologies in the workplace context
- b. Shows evidence of application of relevant workplace procedures including:
 - b.1. OHS regulations and hazard prevention policies and procedures
 - b.2. workplace procedures and work instructions concerning the use of manually-operated equipment to shift loads
 - b.3. obtaining assistance from other team members when required
 - b.4. housekeeping procedures
 - b.5. environmental protection procedures when shifting materials
- c. Action is taken promptly to report and/or rectify any potential difficulties in safely shifting a load using manually-operated equipment in accordance with OHS requirements and workplace procedures
- d. Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- e. Work is completed systematically with required attention to detail without damage to goods, equipment or personnel

Context for assessment

- a. Assessment of this unit must be undertaken by a Registered Training Organisation:
 - a.1. As a minimum, assessment of knowledge must be conducted through appropriate oral and/or written questioning
 - a.2. Appropriate practical assessment must occur:
 - a.2.1. at the Registered Training Organisation, and/or
 - a.2.2. in an appropriate work situation

Range Statement

General context

- a. Work must be carried out in compliance with the relevant OHS regulations concerning the shifting and movement of loads using manually-operated equipment
- b. Work is performed under some supervision generally within a team environment
- c. Work involves the application of the basic principles for the safe shifting of loads using manually-operated equipment

Worksite environment

- a. The shifting operations may be conducted in a range of work environments by day or night
- b. Customers may be internal or external
- c. Workplaces may comprise large, medium or small worksites
- d. Work may be conducted in:
 - d.1. restricted spaces
 - d.2. exposed conditions
 - d.3. controlled or open environments
- e. Materials to be shifted may include:
 - e.1. goods
 - e.2. equipment and tools
 - e.3. cleaning materials
 - e.4. components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
 - e.5. materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
- f. Loads to be shifted may be:
 - f.1. irregularly shaped
 - f.2. packaged or unpackaged
 - f.3. labelled or unlabelled
 - f.4. palletted or unpalletted
- g. Hazards in the work area may include exposure to:
 - g.1. chemicals
 - g.2. dangerous or hazardous substances
 - g.3. movements of equipment, goods and materials
- h. Personnel in the work area may include:
 - h.1. workplace personnel
 - h.2. site visitors
 - h.3. contractors
 - h.4. official representatives
- i. Communication in the work area may include:
 - i.1. phone
 - i.2. electronic data interchange
 - i.3. fax
 - i.4. e-mail
 - i.5. Internet
 - i.6. radio
 - i.7. oral, aural or signed communications
- j. Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
 - j.1. company procedures
 - j.2. enterprise procedures

- j.3. organisational procedures
- j.4. established procedures
- k. Personal protection equipment may include:
 - k.1. gloves
 - k.2. safety headwear and footwear
 - k.3. safety glasses
 - k.4. two-way radios
 - k.5. high visibility clothing

Sources of information/documents

- a. Information/documents may include:
 - a.1. goods identification numbers and codes
 - a.2. manifests, bar codes, goods and container identification
 - a.3. manufacturer's instructions concerning the use and servicing of manually-operated load shifting equipment
 - a.4. workplace procedures and policies
 - a.5. supplier and/or client instructions
 - a.6. material safety data sheets
 - a.7. codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - a.8. relevant legislation, regulations and related documentation
 - a.9. award, enterprise bargaining agreement, other industrial arrangements
 - a.10. standards and certification requirements
 - a.11. quality assurance procedures
 - a.12. emergency procedures

Applicable regulations and legislation

- a. Applicable regulations and legislation may include:
 - a.1. relevant State/Territory OHS legislation
 - a.2. relevant State/Territory environmental protection legislation
 - a.3. workplace relations regulations
 - a.4. workers compensation regulations
 - a.5. licence, patent or copyright arrangements
 - a.6. dangerous goods and air freight regulations
 - a.7. export/import/quarantine/bond requirements
 - a.8. marine orders

General context

- a. Work must be carried out in compliance with the relevant OHS regulations concerning the shifting and movement of loads using manually-operated equipment
- b. Work is performed under some supervision generally within a team environment
- c. Work involves the application of the basic principles for the safe shifting of loads using manually-operated equipment

Worksite environment

- a. The shifting operations may be conducted in a range of work environments by day or night
- b. Customers may be internal or external
- c. Workplaces may comprise large, medium or small worksites
- d. Work may be conducted in:
 - d.1. restricted spaces
 - d.2. exposed conditions
 - d.3. controlled or open environments

e. Materials to be shifted may include:

- e.1. goods
- e.2. equipment and tools
- e.3. cleaning materials
- e.4. components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
- e.5. materials used in the course of work such as drums of fuel, raw materials, packaging, etc.

f. Loads to be shifted may be:

- f.1. irregularly shaped
- f.2. packaged or unpackaged
- f.3. labelled or unlabelled
- f.4. palletted or unpalletted

g. Hazards in the work area may include exposure to:

- g.1. chemicals
- g.2. dangerous or hazardous substances
- g.3. movements of equipment, goods and materials

h. Personnel in the work area may include:

- h.1. workplace personnel
- h.2. site visitors
- h.3. contractors
- h.4. official representatives

i. Communication in the work area may include:

- i.1. phone
- i.2. electronic data interchange
- i.3. fax
- i.4. e-mail
- i.5. Internet
- i.6. radio
- i.7. oral, aural or signed communications

j. Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- j.1. company procedures

TLIA1107C Package goods

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements including selecting materials, packing and unwrapping products, and labelling packaged products/loads to the required labelling standards.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the packaging of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the packaging of goods as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select materials and pack and unwrap products	1.1 Packaging specifications and order packaging documentation are correctly interpreted
	1.2 Appropriate packaging technology suitable for the goods to be packed is selected
	1.3 Packaging materials are identified and matched to specifications
	1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage
	1.5 Work is planned in accordance with OH&S requirements
	1.6 Completed packed goods are stacked to minimise damage from within and outside
2 Label packaged products/loads	2.1 Workplace labelling standards are identified
	2.2 Appropriate goods handling, labelling and other identification symbols are utilised
	2.3 Invoices and picking slips are attached (where required)
	2.4 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the packaging of goods

Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods

Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems

Documentation requirements for the packaging of goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when packaging goods

Read and interpret instructions, procedures and labels relevant to the packaging of goods

Complete documentation related to work activities when packaging goods

Work collaboratively with others when packaging goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur when packaging goods

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment when packaging goods

Check operation of packaging equipment in terms of service schedule and standard operating procedures

Select and use relevant communications, computing equipment and materials when packaging goods

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Goods may involve:	special handling, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials oil or water on floor a fire or explosion damaged packaging or pallets debris on floor faulty racking poorly stacked pallets faulty equipment
Consultative processes may involve:	other employees and supervisors suppliers, customers and clients relevant authorities and institutions management and union representatives industrial relations and OH&S specialists other maintenance, professional or technical staff

Communication in the work area may include:

phone
electronic data interchange (EDI)
fax
email
internet
radio
oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Personal protective equipment may include:

gloves
safety headwear and footwear
safety glasses
two-way radios
high visibility clothing

Information/documents may include:

goods identification numbers and codes
manifests, picking slips, merchandise transfers, stock requisitions and bar codes
codes of practice and regulations relevant to the packaging of goods
Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
operations manuals, job specifications and induction documentation
manufacturers specifications for equipment
workplace procedures and policies
supplier and/or client instructions
dangerous goods declarations and material safety data sheets (where applicable)
award, enterprise bargaining agreement, other industrial arrangements
relevant Australian standards and

certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may include:

relevant codes and regulations for the packaging of goods

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian and International Explosives Codes

licence, patent or copyright arrangements
water and road use and licence arrangements
export/import/quarantine/bond requirements
marine orders

relevant state/territory OH&S and environmental protection legislation
workplace relations regulations
workers compensation regulations

Competency Field

A - Handling Cargo/Stock

TLIA1307C Receive goods

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements, including identifying workplace procedures and documentation requirements for the receipt of goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, packing and storing stock.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the receiving of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the receiving of goods as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify workplace procedures and documentation requirements for the receipt of goods	1.1 Workplace procedures for receipt of goods are identified
	1.2 Purpose of documents associated with the receipt of goods is interpreted
	1.3 Workplace documentation requirements for the receipt of goods and reporting of damage are identified
2 Check and inspect goods on arrival and complete workplace documentation	2.1 Procedures for checking of goods in comparison with orders or manifests are identified and followed
	2.2 Discrepancies and/or damaged goods are reported
	2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures
3 Unload, unpack and store stock	3.1 Appropriate manual handling techniques and equipment are identified
	3.2 Safe work procedures are used when unloading, unpacking and storing stock
	3.3 Advice on appropriate storage locations and requirements for particular products is sought
	3.4 Goods are unloaded and unpacked in accordance with workplace procedures
	3.5 Assistance from others is sought when required to maintain safe and effective work
	3.6 Directions are followed to store stock in appropriate areas

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the receiving of goods including the ADG Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the receiving of goods

Focus of operation of work systems, equipment, management and site operating systems for the receiving of goods

Problems that may occur when receiving goods and appropriate action that can be taken to resolve the problems

Specifications and standards for the checking and inspection of received goods

Documentation requirements for the receiving of goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when receiving goods

Read and comprehend simple statements in English

Read and interpret instructions, procedures, information, labels and signs relevant to receiving goods

Complete documentation related to the receipt of goods

Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels

Work collaboratively with others when receiving goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when receiving goods in accordance

with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events when receiving goods

Apply precautions and required action to minimise, control or eliminate hazards that may exist when receiving goods

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use relevant load handling equipment when receiving goods

Select and use required personal protective equipment conforming to industry and OH&S standards

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Received goods may involve:	special handling and storage requirements, including temperature controlled goods and dangerous goods
Problems that may occur when receiving goods may include:	damaged stock damaged pallets or packaging wrong stock error in paperwork poorly stacked stock incorrect quantity
Aspects of goods to be checked when receiving goods may include:	correct type number condition quality packaging labelling dangerous goods declarations and markings (where applicable)
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials

	oil or water on floor
	fire or explosion
	damaged packaging or pallets
	debris on floor
	poorly stacked pallets
	faulty equipment
Consultative processes may involve:	other employees and supervisors
	suppliers, customers and clients
	drivers and agents
	relevant authorities and institutions
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Information/documents may include:	goods identification numbers and codes
	manifests, picking slips, merchandise transfers, stock requisitions and bar codes

codes of practice and regulations relevant to the receiving of goods

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

operations manuals, job specifications and induction documentation

manufacturers specifications for equipment

workplace procedures and policies

supplier and/or client instructions

dangerous goods declarations and material safety data sheets (where applicable)

award, enterprise bargaining agreement, other industrial arrangements

relevant Australian standards and certification requirements

quality assurance procedures

emergency procedures

Applicable regulations and legislation may include:

relevant codes and regulations for the receiving of goods

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air Regulations

Australian and international explosives codes

licence, patent or copyright arrangements

water and road use and licence arrangements

export/import/quarantine/bond requirements

marine orders

relevant state/territory OH&S and

environmental protection legislation
workplace relations regulations
workers compensation regulations

Unit Sector(s)

Competency Field

A - Handling Cargo/Stock

TLIA1607C Use inventory systems to organise stock control

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with workplace requirements including identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts, and reporting discrepancies or variances.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the use of inventory systems to organise stock control. Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when using inventory systems to organise stock control as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify inventory and stock control systems in use in the workplace	1.1 Workplace inventory and stock control equipment, software and systems are identified
	1.2 Reasons for common database approach to inventory records and documentation in the warehouse are explained
	1.3 Procedures for identification and reporting of discrepancies or variances are identified
2 Use re-order procedures to maintain stock levels	2.1 Stock level maintenance checking is conducted
	2.2 Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures
	2.3 Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
3 Organise cyclical stock counts and report discrepancies or variances	3.1 Process for cyclical stock count is planned and work allocated to team members
	3.2 Clear directions on tasks to be performed are given
	3.3 Stocktake activities are conducted in accordance with workplace procedures
	3.4 Types and causes of records discrepancies are identified
	3.5 Procedures for noting and correcting minor discrepancies are used
	3.6 Major discrepancies are reported in accordance with workplace procedures
	3.7 Workplace documentation is completed
4 Produce reports on record keeping and inventory functions	4.1 Types of reports to be produced from inventory records systems are identified
	4.2 Reports are produced in accordance with workplace procedures and relevant regulatory

requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the organisation of stock control

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the use of inventory systems to organise stock control

Focus of operation of inventory systems, equipment, management and site operating systems for the control of stock

Principles of operation and functions of inventory systems

Applications of different types of inventory systems and stock management approaches

Workplace processes for records management and the production of inventory reports

Principles of operation and functions of inventory systems

Computer records and documentation requirements for stock control, including forms, checklists and inventory reports

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when using inventory systems to organise stock control

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the use of inventory systems for the organisation of stock control

Complete documentation related to the use of inventory systems to organise stock control

Work collaboratively with others when using inventory systems to organise stock control

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when using inventory systems to organise stock control in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Select and use relevant communications, computing and office equipment when using inventory systems to organise stock control

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Competency Field

A - Handling Cargo/Stock

TLIA2107C Despatch stock

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to despatch stock in accordance with workplace requirements including analysing orders to identify work requirements, following workplace order picking processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the despatch of goods.

Work is performed under some supervision generally within a team environment. It involves the application of regulatory requirements and workplace procedures to despatch operations in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Analyse order to identify work requirements	1.1 Order request and consignment note documentation is interpreted 1.2 Required schedules for despatch are identified 1.3 Product(s) in order are identified 1.4 Workplace and product knowledge is used to plan sequence of work 1.5 Appropriate materials handling equipment is selected within required OH&S regulations and timeframe for the despatch
2 Follow workplace order picking processes to prepare goods for despatch	2.1 Goods for despatch are selected, checking against product knowledge, labels and other identification systems 2.2 Products are sorted, assembled and consolidated 2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule 2.4 Order is checked against despatch schedule and order form
3 Complete despatch following workplace procedures and schedules	3.1 Workplace records are completed, and labels and appropriate documentation attached 3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and ADG Code (where applicable) 3.3 Final check of load labels and documentation is completed in accordance with requirements 3.4 Transportation requirements are described to driver where appropriate

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the organising of despatch operations

Focus of operation of work systems, equipment, management and site operating systems for despatching goods

Problems that may occur when despatching goods and appropriate action that can be taken to resolve the problems

Documentation and record requirements for despatch operations

Equipment used during despatch operations and the precautions and procedures that should be followed in its use

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when organising despatch operations

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the organising of despatch operations

Complete documentation related to the organising of despatch operations

Work collaboratively with others when organising despatch operations

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when organising despatch operations in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in goods and equipment in accordance with standard operating procedures

Select and use relevant equipment and communications technology when organising despatch operations

Select and use required personal protective equipment conforming to industry and OH&S standards

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Goods to be despatched may involve:	special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances
Problems that may occur when despatching an order include:	wrong stock is despatched wrong carton for order incorrect location damaged stock no stock at location incorrect quantity failing to meet a special order requirement failing to meet customers delivery requirements
Special order requirements may include:	pricing special packing specific size of carton special categories of stock
Hazards in the work area may include:	chemicals dangerous or hazardous substances movements of equipment, goods and materials

	oil or water on floor
	a fire or explosion
	damaged packaging or pallets

Competency Field

A - Handling Cargo/Stock

TLID1007C Operate a forklift

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority.

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check forklift condition	<p>1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task</p> <p>1.2 Attachments are checked to ensure appropriate adjustment and operation</p> <p>1.3 Mirrors and seats are adjusted for safe operation by the driver</p> <p>1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements</p>
2 Drive the forklift	<p>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions</p> <p>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques</p> <p>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures</p>
3 Operate a forklift to handle loads	<p>3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected</p> <p>3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures</p>

- 4 **Monitor site conditions**
 - 4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made
 - 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

- 5 **Monitor and maintain forklift performance**
 - 5.1 Performance and efficiency of vehicle operation is monitored during use
 - 5.2 Defective/irregular performance and malfunctions reported to relevant personnel
 - 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements pertaining to the operation of a forklift

Relevant OH&S and environmental procedures and regulations

Workplace operating procedures

Forklift controls, instruments and indicators and their use

Forklift handling procedures

Procedures to be followed in the event of an operational emergency

Engine power management and safe operating strategies

Efficient driving techniques

Operating hazards and related defensive driving and hazard control techniques

Pre-operational checks carried out on forklift and related action

Principles of stress management when driving a forklift

Site layout and obstacles

Required skills:

Communicate effectively with others when operating a forklift

Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

Interpret and follow operational instructions and prioritise work

Complete documentation related to the operation of a forklift

Operate electronic communication equipment to required protocol

Work collaboratively with others when operating a forklift

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events when operating a forklift

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)

Monitor performance of forklift and its equipment and take appropriate action where required

Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks

Operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Loads to be shifted may require:

- special precautions

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palletted or unpalletted

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Forklift handling procedures may include:	<ul style="list-style-type: none">starting a forkliftsteering and manoeuvring a forkliftaccelerating and brakingpositioning and stopping a forkliftreversing a forkliftoperating forklift controls, instruments and indicatorsusing defensive driving techniquesmanaging engine performance
Pre-operational checks may include:	<ul style="list-style-type: none">visual check of forkliftchecking and topping up of fluid levelschecks of tyreschecks of operation of forklift lights and indicatorschecks of brakes
Hazards may include (examples only):	<ul style="list-style-type: none">wet and iced operating surfacesoil on operating surfacefaulty brakesworkplace obstacles and other operational equipment and vehiclesdamaged loads and palletsother personnel in work area

TLID207C Shift a load using manually-operated equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manually-operated mechanical equipment, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation with the aid of the equipment in accordance with the plan.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the shifting and movement of loads using manually-operated equipment.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles for the safe shifting of loads using manually-operated equipment.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess risks arising from the relocation of the load	<ul style="list-style-type: none">1.1 Products, goods or materials to be relocated are identified1.2 Location for storage is determined1.3 Routes to be followed are identified1.4 Points of balance are estimated1.5 Effect of moving contents which may be loose, liquid, dangerous or hazardous are considered1.6 Potential risks in route(s) which may be followed are considered1.7 Lifting equipment to minimise potential risks is identified1.8 Appropriate personal protective equipment is worn
2 Plan load relocation	<ul style="list-style-type: none">2.1 Load shifting equipment is selected in accordance with workplace procedures2.2 Safe procedures for using lifting equipment are identified, including the calculation of Safe Working Load (SWL) and/or Working Load Limit (WLL) for weight of goods to be moved2.3 Process for relocating load is proposed including predicting and planning for potential difficulties2.4 Proposed process is checked against relevant code of practice and workplace procedures for compliance2.5 Lifting equipment and accessories are checked for safe operation in accordance with manufacturers instructions and workplace procedures
3 Relocate load	<ul style="list-style-type: none">3.1 Any unsafe equipment is reported to appropriate personnel in accordance with workplace procedures3.2 Planned process and route are followed using

equipment within necessary range of limitations

- 3.3 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.4 Relocation is checked to see that it meets work requirements, and any variances are reported
- 3.5 Equipment is returned to storage area in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the use of manually-operated equipment to shift loads

Risks when using manually-operated equipment to shift loads and related precautions to control the risk

Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment

Problems that may arise when using manually-operated equipment to shift loads and actions that should be taken to prevent or solve them

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when using manually-operated equipment to shift loads

Read and interpret instructions, procedures, information and signs relevant to the shifting of loads using manually-operated equipment

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Work collaboratively with others when using manually-operated equipment to shift loads

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when using manually-operated equipment to shift loads in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using manually-operated equipment

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

- a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

- access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and/or equipment, and/or

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

- through appropriately simulated activities at the registered training organisation, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Materials to be shifted may include:	goods equipment and tools cleaning materials components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc. materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
Loads to be shifted may be:	irregularly shaped packaged or unpackaged labelled or unlabelled palletted or unpalletted
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Communication in the work area may	phone

include:	electronic data interchange fax email internet radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Information/documents may include:	goods identification numbers and codes manifests, bar codes, goods and container identification manufacturers instructions concerning the use and servicing of manually-operated load shifting equipment workplace procedures and policies supplier and/or client instructions material safety data sheets codes of practice including the National Standards for Manual Handling and the Industry Safety Code relevant legislation, regulations and related documentation award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements quality assurance procedures emergency procedures

Applicable regulations and legislation may include:

relevant state/territory OH&S legislation
relevant state/territory environmental protection legislation
workplace relations regulations
workers compensation regulations
licence, patent or copyright arrangements
dangerous goods and air freight regulations
export/import/quarantine/bond requirements
marine orders

Unit Sector(s)

Not applicable.

Competency Field

D - Load Handling

TLID307E Handle dangerous goods/hazardous substances

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances, including identifying requirements for working with dangerous goods and/or hazardous substances; confirming site incident procedures; and selecting handling techniques. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit covers anyone working in the transport, warehousing, distribution and storage industries who may handle dangerous goods and/or hazardous substances.

Work must be carried out in compliance with the relevant Occupational Health&Safety (OH&S) regulations concerning the safe handling of dangerous goods and hazardous substances.

Work is performed under general supervision. It involves the application of the codes of practice and established procedures for the safe handling of dangerous goods and hazardous substances.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify requirements for working with dangerous goods and/or hazardous substances	<p>1.1 Dangerous goods and/or hazardous substances are identified from information including class labels, manifests and other documentation</p> <p>1.2 Storage requirements for hazardous substances and/or dangerous goods are identified and applied</p> <p>1.3 Legislative requirements for hazardous substances and/or dangerous goods are known and used to plan work activities</p> <p>1.4 Handling procedures for different classes and characteristics of goods are observed</p> <p>1.5 Confirmation is sought from relevant personnel where dangerous goods or hazardous materials do not appear to be appropriately marked</p>
2 Confirm site incident procedures	<p>2.1 Incident reporting processes are identified</p> <p>2.2 Emergency equipment is located and checked according to workplace procedures and statutory regulations</p> <p>2.3 Emergency procedures are identified and confirmed</p>
3 Select handling techniques	<p>3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods</p> <p>3.2 Handling equipment is checked for conformity with workplace requirements and manufacturers guidelines</p> <p>3.3 Where relevant, suitable signage is checked for compliance with workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

All relevant regulations and codes concerning the handling of dangerous goods and hazardous substances

Application of relevant aspects of current Australian Dangerous Goods Code and relevant Australian Standards

Permit and licence requirements

Workplace procedures for handling and storing dangerous goods/hazardous substances

Problems that may arise during the handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve them

Risks when handling dangerous goods and hazardous substances and related precautions to control the risk

Equipment applications, capacities, configurations, safety hazards and control mechanisms

Housekeeping standards procedures required in the workplace

Required skills:

Communicate effectively with others when handling dangerous goods and hazardous substances

Read and interpret instructions, procedures, regulations, information and signs relevant to the handling of dangerous goods and hazardous substances

Identify containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport storage selected

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when handling dangerous goods and hazardous substances

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when handling dangerous goods and hazardous substances in accordance with regulatory requirements and workplace procedures

Plan own work including predicting consequences and identifying improvements

Implement contingency plans for unanticipated situations that may arise when handling dangerous goods and hazardous substances

Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling of dangerous goods and hazardous substances

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of :

identifying dangerous goods/hazardous substances (from labels, International Maritime Dangerous Goods (IMDG) markings, HAZCHEM signs and other relevant identification criteria)

identifying and selecting the safety requirements for handling dangerous goods/hazardous substances

maintaining workplace records and documentation

determining (any) required permits

identifying job and site hazards and planning work to minimise risks

selecting appropriate equipment and work systems including personal protection equipment

estimating weight and dimensions of load and any special requirements

identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments,

access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The dangerous goods may be handled in a range of work environments by day or night and may be:	for short-term storage for long-term storage in transit
Customers may be:	internal or external
Workplace environment may include:	movement of equipment movement of goods materials and vehicular traffic
Requirements for work may include:	site restrictions and procedures use of safety and personal protective equipment communications equipment specialised lifting and/or handling equipment incident breakdown procedures authorities and permits hours of operations noise restrictions additional gear and equipment segmentation procedures emergency procedures, including response to spillage/leaks, evacuation and firefighting
Hazards may include:	hazardous or dangerous materials contamination of, or from, materials being handled noise, light, energy sources stationary and moving machinery, parts or components service lines spills, leakages, ruptures fire or ignition

	dust/vapours
Hazard management is:	consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Consultative processes may involve:	other employees and supervisors suppliers, potential customers and existing clients representatives of regulatory authorities with jurisdiction over OH&S, dangerous goods and hazardous substances management and union representatives industrial relations and OH&S specialists other maintenance, professional or technical staff
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Identification of goods may be from:	material safety data sheets packaging labels manifests stock lists HAZCHEM interpretative advice
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses mask and respirator protective clothing

Information/documents may include:

breathing apparatus

goods identification numbers and codes
manifests, stock lists, packaging labels, bar codes, stock lists

goods and container identification

workplace procedures and policies concerning the handling of dangerous goods and hazardous substances

supplier and/or client instructions

material safety data sheets (MSDS)

current Australian Dangerous Goods Code

HAZCHEM interpretative advice

relevant legislation, codes, regulations and related documentation concerning the handling of dangerous goods and hazardous substances

award, enterprise bargaining agreement, other industrial arrangements

standards and certification requirements

quality assurance procedures

emergency procedures pertaining to dangerous goods and hazardous substances

Applicable regulations and legislation may include:

relevant Australian and state/territory regulations relating to the handling of dangerous goods and hazardous substances

current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

International Air Transport Association (IATA) Dangerous Goods by Air regulations

Australian and International Explosives Codes

all relevant Australian Standards
relevant state/territory OH&S legislation
workplace relations regulations
equal employment opportunity and
affirmative action legislation
equal opportunity legislation
relevant state/territory environmental
protection legislation

Unit Sector(s)

Not applicable.
