Manage compliance with environmental  
management legislation**

**Release: 1**

# Assessment Requirements for MARJ005 Manage compliance with environmental management legislation

## Modification History

Release 1. This is the first release of this unit of competency in the MAR Maritime Training Package Release 3.0.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying legislative and organisational requirements and procedures
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- developing effective planning documents
- developing procedures for monitoring operations that comply with legislative requirements
- ensuring currency of relevant legislative and regulatory knowledge
- identifying fully and promptly, potential non-compliance
- interpreting technical information, rules, procedures and regulations
- planning for the renewal and extension of certificates to ensure continued validity of surveyed items and equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- environmental:
  - hazard identification processes
  - risk assessment processes
  - risk treatment processes
  - management reporting and recording procedures
  - management system documentation methods
- hazards (sources of potential harm or situations with the potential to cause loss)
- international maritime law embodied in international agreements and conventions
- methods and aids to prevent pollution of the marine environment by ships
- relevant marine environmental issues

- responsibilities under the International Convention for the Prevention of Pollution from Ships (MARPOL), as amended
- WHS/OHS requirements and work practices.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicate workplace conditions.

Resources for assessment include access to:

- relevant legislation, Australian standards, workplace procedures, regulations, codes of practice and operation manuals
- emission control equipment, pumps and valves, waste storage and recycling equipment, personal protective equipment and water management equipment, including cooling and ballast water and bilge systems.
- 

Performance should be demonstrated consistently over time and in a suitable range of contexts.
