**Assessment Requirements for MSFGG3018
Prepare and install architectural engineered
glazing**

Release: 2

Assessment Requirements for MSFGG3018 Prepare and install architectural engineered glazing

Modification History

Release 2 - Update of Australian Standards codes. Statement regarding currency of Australian Standards included in Range of Conditions and Performance Evidence.

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Measure glass for curtain walls, balustrades, suspended and/or overhead glazing
- Select glass to comply with AS 1288:2006 Glass in buildings - Selection and installation, and cut and process glass in accordance with AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass
 - *Note, wherever Australia Standards are listed they apply at the time of publication, but the most current version (including amendments) or replacement versions are to be used.*
- Identify and erect appropriate ladders and scaffolding to comply with the relevant regulations and standards
- Identify and apply glazing, structural sealants and tapes, and install glazing materials and weatherproofing
- Calculate the cost of glass, fittings, materials and labour
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Types, qualities and characteristics of glass and acrylic glazing products, including hazards and handling requirements
- Techniques, methods, materials and process of preparing and installing structural glazing
- Relevant Australian Standards
- Work flow requirements in relation to the preparation and installation of structural glazing
- Correct application and operation of tools and equipment used
- Identification of equipment, processes and procedures
- Workplace safety system requirements related to the preparation and installation of structural glazing

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to frames, glass and acrylic glazing products, fixing material, sealants, workplace operating procedures and work orders, personal protective equipment and an appropriate work area/site.
