

Australian Government

MSF Furnishing Training Package

Release: 1.2

CONTENTS

MSF10113 Certificate I in Furnishing	28
MSF20113 Certificate II in Furnishing.....	31
MSF20213 Certificate II in Furniture Finishing.....	39
MSF20313 Certificate II in Furniture Making.....	42
MSF20413 Certificate II in Glass and Glazing.....	46
MSF30113 Certificate III in Furniture Finishing	49
MSF30213 Certificate III in Furniture Making	53
MSF30313 Certificate III in Timber and Composites Machining.....	57
MSF30413 Certificate III in Glass and Glazing	63
MSF30513 Certificate III in Picture Framing.....	69
MSF30613 Certificate III in Soft Furnishing	73
MSF30713 Certificate III in Upholstery	77
MSF30813 Certificate III in Flooring Technology.....	81
MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles	88
MSF31013 Certificate III in Interior Decoration Retail Services.....	94
MSF31113 Certificate III in Cabinet Making	98
MSF31213 Certificate III in Piano Technology.....	104
MSF31313 Certificate III in Kitchens and Bathrooms - Retail Services	108
MSF40113 Certificate IV in Interior Decoration.....	111
MSF40213 Certificate IV in Furniture Design and Technology	115
MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces	121
MSF40413 Certificate IV in Glass and Glazing	125
MSF50113 Diploma of Stained Glass and Leadlighting	129
MSF50213 Diploma of Interior Design and Decoration	133
MSF50313 Diploma of Furniture Design and Technology.....	139
MSF60113 Advanced Diploma of Interior Design	144
AHCLSC308A Install metal structures and features	150
BSBADM311A Maintain business resources.....	155
BSBCCO304C Provide sales solutions to customers	161
BSBCMM301B Process customer complaints.....	167
BSBCRT401A Articulate, present and debate ideas.....	173
BSBCRT402A Collaborate in a creative process	180
BSBCRT403A Explore the history and social impact of creativity	187
BSBCRT501A Originate and develop concepts	193
BSBCUS201B Deliver a service to customers.....	202
BSBCUS301B Deliver and monitor a service to customers.....	208
BSBCUS402B Address customer needs	215
BSBCUS501C Manage quality customer service	221
BSBDES201A Follow a design process	227
BSBDES202A Evaluate the nature of design in a specific industry context.....	234
BSBDES301A Explore the use of colour	240
BSBDES302A Explore and apply the creative design process to 2D forms.....	246
BSBDES303A Explore and apply the creative design process to 3D forms.....	253
BSBDES304A Source and apply design industry knowledge	260
BSBDES305A Source and apply information on the history and theory of design	267
BSBDES401A Generate design solutions.....	273
BSBDES403A Develop and extend design skills and practice	282
BSBDES502A Establish, negotiate and refine a design brief.....	289
BSBDES601A Manage design realisation	297

BSBDES602A Research global design trends.....	304
BSBFIA301A Maintain financial records	311
BSBFLM303C Contribute to effective workplace relationships	318
BSBFLM309C Support continuous improvement systems and processes.....	325
BSBINM501A Manage an information or knowledge management system	333
BSBINN201A Contribute to workplace innovation.....	340
BSBITU101A Operate a personal computer	347
BSBITU306A Design and produce business documents.....	353
BSBMGT401A Show leadership in the workplace	360
BSBMGT402A Implement operational plan	365
BSBMKG413A Promote products and services.....	372
BSBMKG501B Identify and evaluate marketing opportunities.....	379
BSBOHS404B Contribute to the implementation of strategies to control OHS risk.....	386
BSBPMG409A Apply project scope-management techniques.....	395
BSBPMG522A Undertake project work.....	401
BSBPRO301A Recommend products and services.....	408
BSBPRO401A Develop product knowledge	415
BSBRKG304B Maintain business records.....	420
BSBSLS408A Present, secure and support sales solutions.....	427
BSBSMB303A Organise finances for the micro business.....	435
BSBSMB305A Comply with regulatory, taxation and insurance requirements for the micro business	441
BSBSMB401A Establish legal and risk management requirements of small business	447
BSBSMB402A Plan small business finances.....	455
BSBSMB403A Market the small business	462
BSBSMB404A Undertake small business planning	469
BSBSMB405B Monitor and manage small business operations.....	478
BSBSMB406A Manage small business finances.....	484
BSBSMB407A Manage a small team	491
BSBWHS401A Implement and monitor WHS policies, procedures and programs to meet legislative requirements.....	499
BSBWHS504A Manage WHS hazards and risks.....	507
BSBWOR204A Use business technology	514
BSBWOR301B Organise personal work priorities and development.....	521
BSBWOR402A Promote team effectiveness	528
CPCCBC4005A Produce labour and material schedules for ordering	535
CPCCBC4012B Read and interpret plans and specifications	542
CPCCBC4037A Prepare drawings for heritage works	550
CPCCCM2001A Read and interpret plans and specifications	560
CPCCCM2002A Carry out excavation.....	569
CPCCCM2006B Apply basic levelling procedures	579
CPCCCM2010B Work safely at heights	589
CPCCCM3001C Operate elevated work platforms.....	597
CPCCCO2013A Carry out concreting to simple forms	608
CPCCCO3046A Repair and rectify concrete	619
CPCCOHS1001A Work safely in the construction industry	628
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry	639
CPCCWP3002A Apply waterproofing process to internal wet areas	653
CUFANM302A Create 3D digital animations.....	666
CUFANM303A Create 3D digital models.....	677
CUFANM502A Create 3D digital environments.....	685
CUFDIG303A Produce and prepare photo images	694

CUFDIG304A Create visual design components	704
CUFDIG507A Design digital simulations	713
CULMS010B Contribute to the preservation of cultural material	722
CUVACD101A Use basic drawing techniques	729
CUVACD201A Develop drawing skills to communicate ideas	734
CUVACD301A Produce drawings to communicate ideas.....	739
CUVACD302A Produce computer-aided drawings.....	746
CUVACD303A Produce technical drawings	751
CUVCAL301A Produce calligraphy	757
CUVCAL401A Experiment with techniques to produce calligraphy	763
CUVDES405A Research and apply techniques in spatial design	771
CUVDRA201A Develop drawing skills.....	779
CUVGRD401A Research and apply graphic design techniques	785
CUVICS04B Originate and develop a concept.....	792
CUVILL401A Research and apply techniques for illustrative work	800
CUVPRP405A Develop and discuss ideas for own creative work	807
HLTAID003 Provide first aid	812
Assessment Requirements for HLTAID003 Provide first aid.....	815
ICPPR384A Set up and produce basic digital print	819
ICPSU455C Supervise and schedule work of others	828
LMTGN2005B Perform minor maintenance	834
LMTGN4012A Fabricate or machine tooling	839
LMTTF2009A Identify and select canvas and sail materials.....	844
LMTTF2014A Weld plastic materials	850
LMTTF2016A Install products on and off site.....	857
LMTTF3004A Perform advanced welding of plastic materials	865
MEM05003B Perform soft soldering	872
MEM05007C Perform manual heating and thermal cutting.....	877
MEM05012C Perform routine manual metal arc welding.....	883
MEM07001B Perform operational maintenance of machines/equipment.....	888
MEM14003B Undertake basic production scheduling	894
MEM15001B Perform basic statistical quality control	900
MEM16006A Organise and communicate information	906
MEM16007A Work with others in a manufacturing, engineering or related environment.....	912
MEM16008A Interact with computing technology	918
MEM16013A Operate in a self-directed team.....	924
MEM18001C Use hand tools.....	932
MEM30017A Use basic preventative maintenance techniques and tools	938
MEM30024A Participate in quality assurance techniques	944
MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements	950
MEM30033A Use computer-aided design (CAD) to create and display 3-D models.....	957
MSAENV272B Participate in environmentally sustainable work practices	962
MSAENV472B Implement and monitor environmentally sustainable work practices.....	970
MSAENV672B Develop workplace policy and procedures for environmental sustainability.....	979
MSAPMOHS100A Follow OHS procedures	987
MSAPMOHS200A Work safely.....	993
MSAPMOHS300A Facilitate the implementation of OHS for a work group	1001
MSAPMOPS101A Make measurements.....	1009
MSAPMOPS212A Use organisation computers or data systems	1015
MSAPMOPS363A Organise on site work.....	1022
MSAPMPER200C Work in accordance with an issued permit.....	1029
MSAPMSUP102A Communicate in the workplace.....	1039

MSAPMSUP106A Work in a team	1044
MSAPMSUP201A Receive or despatch goods	1049
MSAPMSUP240A Undertake minor maintenance	1056
MSAPMSUP273A Handle goods	1063
MSAPMSUP390A Use structured problem solving tools	1069
MSFAH4001 Advise on security technology, hardware and services	1075
Assessment Requirements for MSFAH4001 Advise on security technology, hardware and services	1081
MSFAH4002 Prepare architectural door hardware schedules	1083
Assessment Requirements for MSFAH4002 Prepare architectural door hardware schedules	1092
MSFBA1001 Construct a basic roll-up blind	1094
Assessment Requirements for MSFBA1001 Construct a basic roll-up blind	1098
MSFBA2001 Use blinds, awnings, security screens and grilles hand and power tools	1100
Assessment Requirements for MSFBA2001 Use blinds, awnings, security screens and grilles hand and power tools	1106
MSFBA2002 Set up, operate and maintain blinds and awnings sector static machines .	1108
Assessment Requirements for MSFBA2002 Set up, operate and maintain blinds and awnings sector static machines	1114
MSFBA2003 Select and apply blinds and awnings hardware and fixings	1117
Assessment Requirements for MSFBA2003 Select and apply blinds and awnings hardware and fixings	1122
MSFBA2004 Construct roll-up and pull-down style blinds and awnings	1124
Assessment Requirements for MSFBA2004 Construct roll-up and pull-down style blinds and awnings	1130
MSFBA2005 Construct vertical-style blinds	1133
Assessment Requirements for MSFBA2005 Construct vertical-style blinds	1138
MSFBA2006 Construct textiles for canopy-style awnings	1141
Assessment Requirements for MSFBA2006 Construct textiles for canopy-style awnings	1146
MSFBA2007 Construct plastic and timber Venetian-style blinds	1149
Assessment Requirements for MSFBA2007 Construct plastic and timber Venetian-style blinds	1154
MSFBA2008 Construct aluminium Venetian-style blinds	1156
Assessment Requirements for MSFBA2008 Construct aluminium Venetian-style blinds	1161
MSFBA2009 Construct metal louvre and canopy-hooded style awnings	1163
Assessment Requirements for MSFBA2009 Construct metal louvre and canopy-hooded style awnings	1167
MSFBA2010 Construct aluminium roll-up style awnings	1169
Assessment Requirements for MSFBA2010 Construct aluminium roll-up style awnings	1174
MSFBA3001 Install interior blinds	1176
Assessment Requirements for MSFBA3001 Install interior blinds	1181
MSFBA3002 Install exterior blinds and awnings	1183
Assessment Requirements for MSFBA3002 Install exterior blinds and awnings	1188
MSFBA3003 Install timber shutters	1190
Assessment Requirements for MSFBA3003 Install timber shutters	1195
MSFBA3004 Construct folding-arm style awnings	1197
Assessment Requirements for MSFBA3004 Construct folding-arm style awnings	1202
MSFBA3005 Construct framework for canopy-style awnings	1204
Assessment Requirements for MSFBA3005 Construct framework for canopy-style awnings	1209
MSFBA3006 Construct pleated-style blinds	1211
Assessment Requirements for MSFBA3006 Construct pleated-style blinds	1216
MSFBA3007 Construct wood weave-style blinds	1218

Assessment Requirements for MSFBA3007 Construct wood weave-style blinds	1222
MSFBA3008 Construct pelmets.....	1224
Assessment Requirements for MSFBA3008 Construct pelmets	1229
MSFBA3009 Provide advice to customers on blinds and awnings.....	1231
Assessment Requirements for MSFBA3009 Provide advice to customers on blinds and awnings	1236
MSFBA3010 Assess suitability of blinds or awnings	1238
Assessment Requirements for MSFBA3010 Assess suitability of blinds or awnings	1242
MSFCP2001 Use coopering sector hand and power tools	1244
Assessment Requirements for MSFCP2001 Use coopering sector hand and power tools.....	1249
MSFCP2002 Produce barrels using non-fired processes.....	1251
Assessment Requirements for MSFCP2002 Produce barrels using non-fired processes	1258
MSFCP2003 Produce barrels using fired processes	1261
Assessment Requirements for MSFCP2003 Produce barrels using fired processes.....	1268
MSFCP2004 Maintain and repair barrels.....	1271
Assessment Requirements for MSFCP2004 Maintain and repair barrels	1277
MSFDN4001 Produce drawings from design concepts.....	1279
Assessment Requirements for MSFDN4001 Produce drawings from design concepts ...	1283
MSFDN4002 Produce line and component production drawings	1285
Assessment Requirements for MSFDN4002 Produce line and component production drawings.....	1288
MSFDN4003 Produce patterns and templates	1290
Assessment Requirements for MSFDN4003 Produce patterns and templates.....	1294
MSFDN4004 Design, construct and test jigs.....	1296
Assessment Requirements for MSFDN4004 Design, construct and test jigs	1299
MSFDN4005 Work within a furniture design team.....	1301
Assessment Requirements for MSFDN4005 Work within a furniture design team	1305
MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.....	1307
Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications	1311
MSFFDT4001 Apply finishing techniques to custom furniture.....	1313
Assessment Requirements for MSFFDT4001 Apply finishing techniques to custom furniture.....	1318
MSFFDT4002 Assemble custom furniture	1320
Assessment Requirements for MSFFDT4002 Assemble custom furniture.....	1324
MSFFDT4003 Assess and record the lifecycle of a product.....	1326
Assessment Requirements for MSFFDT4003 Assess and record the lifecycle of a product.....	1332
MSFFDT4004 Assess environmental impact of a design.....	1334
Assessment Requirements for MSFFDT4004 Assess environmental impact of a design	1340
MSFFDT4005 Construct and evaluate furniture prototypes and samples.....	1343
Assessment Requirements for MSFFDT4005 Construct and evaluate furniture prototypes and samples	1350
MSFFDT4006 Determine work health and safety (WHS) implications of designs.....	1352
Assessment Requirements for MSFFDT4006 Determine work health and safety (WHS) implications of designs.....	1358
MSFFDT4007 Prepare and present furniture design information.....	1360
Assessment Requirements for MSFFDT4007 Prepare and present furniture design information.....	1367
MSFFDT4008 Produce and evaluate developmental furniture models to scale	1369
Assessment Requirements for MSFFDT4008 Produce and evaluate developmental furniture models to scale	1375
MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs	1377

Assessment Requirements for MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs	1381
MSFFDT4010 Research and select furniture finishes	1383
Assessment Requirements for MSFFDT4010 Research and select furniture finishes	1389
MSFFDT4011 Research and select furniture materials and technology	1391
Assessment Requirements for MSFFDT4011 Research and select furniture materials and technology	1398
MSFFDT4012 Research furniture styles and movements	1400
Assessment Requirements for MSFFDT4012 Research furniture styles and movements	1405
MSFFDT4013 Select, use and maintain hand tools for the creation of custom furniture	1407
Assessment Requirements for MSFFDT4013 Select, use and maintain hand tools for the creation of custom furniture	1411
MSFFDT4014 Set up and operate a wood-turning lathe to produce off-centre work	1413
Assessment Requirements for MSFFDT4014 Set up and operate a wood-turning lathe to produce off-centre work	1417
MSFFDT4015 Produce templates and jigs for custom-made furniture	1419
Assessment Requirements for MSFFDT4015 Produce templates and jigs for custom-made furniture	1424
MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product	1426
Assessment Requirements for MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product	1431
MSFFDT5002 Assess and resolve technical integrity of a design	1434
Assessment Requirements for MSFFDT5002 Assess and resolve technical integrity of a design	1440
MSFFDT5003 Develop self as a furniture designer	1442
Assessment Requirements for MSFFDT5003 Develop self as a furniture designer	1447
MSFFDT5004 Construct custom furniture using advanced techniques	1449
Assessment Requirements for MSFFDT5004 Construct custom furniture using advanced techniques	1455
MSFFDT5005 Design a batch or limited production item of furniture	1458
Assessment Requirements for MSFFDT5005 Design a batch or limited production item of furniture	1464
MSFFDT5006 Design a furniture product using high volume technology services (HVTs) in production	1466
Assessment Requirements for MSFFDT5006 Design a furniture product using high volume technology services (HVTs) in production	1472
MSFFDT5007 Design a one-off item of furniture	1475
Assessment Requirements for MSFFDT5007 Design a one-off item of furniture	1480
MSFFDT5008 Research and recommend alternative manufacturing processes	1483
Assessment Requirements for MSFFDT5008 Research and recommend alternative manufacturing processes	1488
MSFFDT5009 Research and recommend machine technology	1490
Assessment Requirements for MSFFDT5009 Research and recommend machine technology	1496
MSFFDT5010 Evaluate furniture design proposals and concepts	1498
Assessment Requirements for MSFFDT5010 Evaluate furniture design proposals and concepts	1504
MSFFDT5011 Assess economic impact of a design	1506
Assessment Requirements for MSFFDT5011 Assess economic impact of a design	1511
MSFFDT5012 Design for mass production	1513
Assessment Requirements for MSFFDT5012 Design for mass production	1517
MSFFDT5013 Evaluate and participate in design industry networks	1520

Assessment Requirements for MSFFDT5013 Evaluate and participate in design industry networks.....	1524
MSFFDT5014 Investigate legal requirements for design.....	1526
Assessment Requirements for MSFFDT5014 Investigate legal requirements for design.....	1531
MSFFDT5015 Work collaboratively on a design project.....	1533
Assessment Requirements for MSFFDT5015 Work collaboratively on a design project.....	1539
MSFFF1001 Complete a basic furniture finishing project.....	1541
Assessment Requirements for MSFFF1001 Complete a basic furniture finishing project.....	1546
MSFFF2001 Use furniture finishing sector hand and power tools.....	1548
Assessment Requirements for MSFFF2001 Use furniture finishing sector hand and power tools	1552
MSFFF2002 Dismantle and re-assemble furniture.....	1554
Assessment Requirements for MSFFF2002 Dismantle and re-assemble furniture	1558
MSFFF2003 Remove surface coatings	1560
Assessment Requirements for MSFFF2003 Remove surface coatings.....	1564
MSFFF2004 Prepare surfaces for finishing.....	1566
Assessment Requirements for MSFFF2004 Prepare surfaces for finishing	1570
MSFFF2005 Maintain spray equipment and booth.....	1572
Assessment Requirements for MSFFF2005 Maintain spray equipment and booth	1576
MSFFF2006 Apply surface coatings by spray gun	1578
Assessment Requirements for MSFFF2006 Apply surface coatings by spray gun.....	1582
MSFFF2007 Apply stains, fillers and bleach	1584
Assessment Requirements for MSFFF2007 Apply stains, fillers and bleach	1588
MSFFF2008 Apply surface coatings by hand.....	1590
Assessment Requirements for MSFFF2008 Apply surface coatings by hand	1594
MSFFF3001 Match and make up colours.....	1596
Assessment Requirements for MSFFF3001 Match and make up colours	1600
MSFFF3002 Set up, operate and maintain mechanical coating systems	1602
Assessment Requirements for MSFFF3002 Set up, operate and maintain mechanical coating systems.....	1606
MSFFF3003 Apply plural component coatings.....	1608
Assessment Requirements for MSFFF3003 Apply plural component coatings	1612
MSFFF3004 Apply soft rubber techniques.....	1614
Assessment Requirements for MSFFF3004 Apply soft rubber techniques	1618
MSFFF3005 Enhance finishes.....	1620
Assessment Requirements for MSFFF3005 Enhance finishes	1624
MSFFF3006 Repair and touch up surfaces	1626
Assessment Requirements for MSFFF3006 Repair and touch up surfaces.....	1631
MSFFF3007 Apply graining and decorative finishes.....	1633
Assessment Requirements for MSFFF3007 Apply graining and decorative finishes	1637
MSFFF3008 Apply traditional French polishing techniques.....	1639
Assessment Requirements for MSFFF3008 Apply traditional French polishing techniques.....	1644
MSFFF3009 Set up, operate and maintain computer numerically controlled (CNC) coating systems.....	1646
Assessment Requirements for MSFFF3009 Set up, operate and maintain computer numerically controlled (CNC) coating systems.....	1650
MSFFL1001 Complete simple floor covering installation.....	1652
Assessment Requirements for MSFFL1001 Complete simple floor covering installation.....	1657
MSFFL2001 Use flooring technology sector hand and power tools	1659
Assessment Requirements for MSFFL2001 Use flooring technology sector hand and power tools	1665
MSFFL2002 Receive and prepare floor covering materials for installation	1667

Assessment Requirements for MSFFL2002 Receive and prepare floor covering materials for installation	1672
MSFFL2003 Select, operate and maintain floor covering cutting machine	1674
Assessment Requirements for MSFFL2003 Select, operate and maintain floor covering cutting machine	1678
MSFFL2004 Moisture test timber and concrete floors.....	1680
Assessment Requirements for MSFFL2004 Moisture test timber and concrete floors ...	1684
MSFFL2005 Remove existing floor coverings	1686
Assessment Requirements for MSFFL2005 Remove existing floor coverings.....	1690
MSFFL2006 Prepare, select and apply smoothing and patching compounds.....	1692
Assessment Requirements for MSFFL2006 Prepare, select and apply smoothing and patching compounds.....	1696
MSFFL2007 Select and apply appropriate compounds and additives.....	1698
Assessment Requirements for MSFFL2007 Select and apply appropriate compounds and additives	1702
MSFFL2008 Prepare concrete sub-floors using wet cleaning methods	1704
Assessment Requirements for MSFFL2008 Prepare concrete sub-floors using wet cleaning methods	1708
MSFFL2009 Select, prepare and apply moisture barriers and damp proof membranes to concrete sub-floors	1710
Assessment Requirements for MSFFL2009 Select, prepare and apply moisture barriers and damp proof membranes to concrete sub-floors	1714
MSFFL2010 Prepare walls for coverings.....	1716
Assessment Requirements for MSFFL2010 Prepare walls for coverings	1720
MSFFL2011 Select, operate and maintain grinding equipment.....	1722
Assessment Requirements for MSFFL2011 Select, operate and maintain grinding equipment	1726
MSFFL2012 Select, operate and maintain shot blasting equipment.....	1728
Assessment Requirements for MSFFL2012 Select, operate and maintain shot blasting equipment	1732
MSFFL2013 Select, operate and maintain demolition equipment	1734
Assessment Requirements for MSFFL2013 Select, operate and maintain demolition equipment	1738
MSFFL2014 Select, operate and maintain scarifying equipment.....	1740
Assessment Requirements for MSFFL2014 Select, operate and maintain scarifying equipment	1744
MSFFL2015 Coarse sand timber flooring	1746
Assessment Requirements for MSFFL2015 Coarse sand timber flooring.....	1751
MSFFL2016 Install hard underlays	1753
Assessment Requirements for MSFFL2016 Install hard underlays.....	1757
MSFFL2017 Install carpet cushion underlays and gripper accessories.....	1759
Assessment Requirements for MSFFL2017 Install carpet cushion underlays and gripper accessories.....	1763
MSFFL2018 Install unpatterned tufted and bonded carpet floor coverings	1765
Assessment Requirements for MSFFL2018 Install unpatterned tufted and bonded carpet floor coverings	1769
MSFFL2019 Install carpet tiles using standard installation procedures	1771
Assessment Requirements for MSFFL2019 Install carpet tiles using standard installation procedures	1775
MSFFL2020 Install unpatterned tufted and bonded carpet floor coverings to stairs	1777
Assessment Requirements for MSFFL2020 Install unpatterned tufted and bonded carpet floor coverings to stairs	1781
MSFFL2021 Install lay flat vinyl floor coverings.....	1783

Assessment Requirements for MSFFL2021 Install lay flat vinyl floor coverings	1787
MSFFL2022 Install resilient tiles using standard installation procedures	1789
Assessment Requirements for MSFFL2022 Install resilient tiles using standard installation procedures	1793
MSFFL2023 Install laminate timber and bamboo flooring	1795
Assessment Requirements for MSFFL2023 Install laminate timber and bamboo flooring	1800
MSFFL2024 Install engineered timber flooring	1803
Assessment Requirements for MSFFL2024 Install engineered timber flooring	1808
MSFFL2025 Install impact and sound absorption underlay	1811
Assessment Requirements for MSFFL2025 Install impact and sound absorption underlay	1815
MSFFL2026 Nail strip timber flooring	1817
Assessment Requirements for MSFFL2026 Nail strip timber flooring	1822
MSFFL2027 Install expansion joints	1824
Assessment Requirements for MSFFL2027 Install expansion joints	1829
MSFFL2028 Install mouldings and edge trims to timber flooring	1831
Assessment Requirements for MSFFL2028 Install mouldings and edge trims to timber flooring	1836
MSFFL3001 Plan and cost flooring technology work	1838
Assessment Requirements for MSFFL3001 Plan and cost flooring technology work	1844
MSFFL3002 Establish and maintain a safe flooring technology work environment	1846
Assessment Requirements for MSFFL3002 Establish and maintain a safe flooring technology work environment	1851
MSFFL3003 Inspect sub-floors	1853
Assessment Requirements for MSFFL3003 Inspect sub-floors	1857
MSFFL3005 Install carpet tiles using custom designs	1859
Assessment Requirements for MSFFL3005 Install carpet tiles using custom designs	1863
MSFFL3006 Install adhesive fixed carpet floor coverings	1865
Assessment Requirements for MSFFL3006 Install adhesive fixed carpet floor coverings	1870
MSFFL3007 Install commercial carpet floor coverings	1873
Assessment Requirements for MSFFL3007 Install commercial carpet floor coverings	1877
MSFFL3008 Install patterned carpet floor coverings	1880
Assessment Requirements for MSFFL3008 Install patterned carpet floor coverings	1884
MSFFL3009 Install custom design carpet and decorative finishes	1886
Assessment Requirements for MSFFL3009 Install custom design carpet and decorative finishes	1891
MSFFL3010 Install synthetic floor coverings to sports facilities and outdoor spaces	1894
Assessment Requirements for MSFFL3010 Install synthetic floor coverings to sports facilities and outdoor spaces	1899
MSFFL3011 Install carpet floor coverings to custom design stairs	1902
Assessment Requirements for MSFFL3011 Install carpet floor coverings to custom design stairs	1907
MSFFL3012 Install linoleum floor coverings	1910
Assessment Requirements for MSFFL3012 Install linoleum floor coverings	1915
MSFFL3013 Install commercial vinyl floor coverings	1917
Assessment Requirements for MSFFL3013 Install commercial vinyl floor coverings	1922
MSFFL3014 Install resilient floor coverings using custom designs and decorative finishes	1924
Assessment Requirements for MSFFL3014 Install resilient floor coverings using custom designs and decorative finishes	1929
MSFFL3015 Install resilient tiles using custom designs and decorative finishes	1931
Assessment Requirements for MSFFL3015 Install resilient tiles using custom designs and decorative finishes	1935
MSFFL3016 Install rubber floor coverings	1938
Assessment Requirements for MSFFL3016 Install rubber floor coverings	1943

MSFFL3017 Install resilient sheet to walls	1945
Assessment Requirements for MSFFL3017 Install resilient sheet to walls	1950
MSFFL3018 Install resilient sheet to bench and counter tops.....	1952
Assessment Requirements for MSFFL3018 Install resilient sheet to bench and counter tops	1957
MSFFL3019 Install anti-static resilient floor coverings	1959
Assessment Requirements for MSFFL3019 Install anti-static resilient floor coverings..	1964
MSFFL3020 Install conductive resilient floor coverings.....	1966
Assessment Requirements for MSFFL3020 Install conductive resilient floor coverings	1971
MSFFL3021 Cut and install resilient floor coverings to stairs	1973
Assessment Requirements for MSFFL3021 Cut and install resilient floor coverings to stairs.....	1978
MSFFL3022 Mix and apply epoxy and seamless floor coverings	1980
Assessment Requirements for MSFFL3022 Mix and apply epoxy and seamless floor coverings	1984
MSFFL3023 Apply solvent-based coatings to timber flooring	1986
Assessment Requirements for MSFFL3023 Apply solvent-based coatings to timber flooring.....	1990
MSFFL3024 Apply water-based coatings to timber flooring.....	1992
Assessment Requirements for MSFFL3024 Apply water-based coatings to timber flooring	1996
MSFFL3025 Apply oil-based coatings to timber flooring	1998
Assessment Requirements for MSFFL3025 Apply oil-based coatings to timber flooring	2002
MSFFL3026 Apply composite-based coatings to timber flooring	2004
Assessment Requirements for MSFFL3026 Apply composite-based coatings to timber flooring.....	2008
MSFFL3027 Apply emulsion wax to timber flooring	2010
Assessment Requirements for MSFFL3027 Apply emulsion wax to timber flooring.....	2014
MSFFL3028 Apply stains and fillers to timber flooring	2016
Assessment Requirements for MSFFL3028 Apply stains and fillers to timber flooring	2021
MSFFL3029 Adapt and apply custom designs to timber flooring.....	2023
Assessment Requirements for MSFFL3029 Adapt and apply custom designs to timber flooring.....	2027
MSFFL3030 Cut and install timber flooring materials to stairs	2029
Assessment Requirements for MSFFL3030 Cut and install timber flooring materials to stairs.....	2034
MSFFL3031 Install direct stick timber flooring	2036
Assessment Requirements for MSFFL3031 Install direct stick timber flooring	2041
MSFFL3032 Inspect defective timber flooring.....	2043
Assessment Requirements for MSFFL3032 Inspect defective timber flooring	2047
MSFFL3033 Install block parquetry flooring	2049
Assessment Requirements for MSFFL3033 Install block parquetry flooring.....	2054
MSFFL3034 Install cork tiles.....	2056
Assessment Requirements for MSFFL3034 Install cork tiles	2060
MSFFL3035 Install patterned parquetry flooring.....	2062
Assessment Requirements for MSFFL3035 Install patterned parquetry flooring	2067
MSFFL3036 Install mosaic parquetry flooring.....	2069
Assessment Requirements for MSFFL3036 Install mosaic parquetry flooring	2074
MSFFL3037 Install sprung timber flooring	2076
Assessment Requirements for MSFFL3037 Install sprung timber flooring.....	2081
MSFFL3038 Install strip timber flooring onto battens	2083
Assessment Requirements for MSFFL3038 Install strip timber flooring onto battens...	2088
MSFFL3039 Install strip timber flooring onto plywood	2090
Assessment Requirements for MSFFL3039 Install strip timber flooring onto plywood.	2095

MSFFL3040 Repair timber flooring	2097
Assessment Requirements for MSFFL3040 Repair timber flooring	2102
MSFFL3041 Maintain timber, laminate and engineered flooring.....	2104
Assessment Requirements for MSFFL3041 Maintain timber, laminate and engineered flooring.....	2110
MSFFL3042 Fine sand timber flooring.....	2113
Assessment Requirements for MSFFL3042 Fine sand timber flooring	2118
MSFFL3043 Edge sand timber flooring	2120
Assessment Requirements for MSFFL3043 Edge sand timber flooring	2124
MSFFL3044 Sand cork flooring	2126
Assessment Requirements for MSFFL3044 Sand cork flooring	2131
MSFFL3045 Sand and fill parquetry flooring.....	2133
Assessment Requirements for MSFFL3045 Sand and fill parquetry flooring	2140
MSFFL3046 Apply finishes to cork flooring	2142
Assessment Requirements for MSFFL3046 Apply finishes to cork flooring	2146
MSFFL3047 Polish concrete floors using planetary machines	2148
Assessment Requirements for MSFFL3047 Polish concrete floors using planetary machines	2153
MSFFL3048 Select and fit diamond tools for concrete surface preparation and polishing.....	2155
Assessment Requirements for MSFFL3048 Select and fit diamond tools for concrete surface preparation and polishing.....	2160
MSFFL3049 Apply densifiers and sealers to concrete surfaces.....	2162
Assessment Requirements for MSFFL3049 Apply densifiers and sealers to concrete surfaces	2166
MSFFL3050 Provide advice to customers on floor coverings.....	2169
Assessment Requirements for MSFFL3050 Provide advice to customers on floor coverings.....	2173
MSFFM1001 Construct a basic timber furnishing product.....	2175
Assessment Requirements for MSFFM1001 Construct a basic timber furnishing product.....	2180
MSFFM1002 Operate basic woodworking machines	2182
Assessment Requirements for MSFFM1002 Operate basic woodworking machines.....	2186
MSFFM2001 Use furniture making sector hand and power tools	2188
Assessment Requirements for MSFFM2001 Use furniture making sector hand and power tools	2192
MSFFM2002 Assemble furnishing components.....	2194
Assessment Requirements for MSFFM2002 Assemble furnishing components	2198
MSFFM2003 Select and apply hardware	2200
Assessment Requirements for MSFFM2003 Select and apply hardware	2204
MSFFM2004 Apply sheet laminates by hand.....	2206
Assessment Requirements for MSFFM2004 Apply sheet laminates by hand	2210
MSFFM2005 Join solid timber	2212
Assessment Requirements for MSFFM2005 Join solid timber	2216
MSFFM2006 Hand make timber joints	2218
Assessment Requirements for MSFFM2006 Hand make timber joints.....	2222
MSFFM2007 Follow plans to assemble production furniture	2224
Assessment Requirements for MSFFM2007 Follow plans to assemble production furniture.....	2229
MSFFM2008 Bend and form cane.....	2231
Assessment Requirements for MSFFM2008 Bend and form cane	2235
MSFFM2009 Construct cane furniture	2237
Assessment Requirements for MSFFM2009 Construct cane furniture	2242
MSFFM2010 Set up and operate basic static machines	2244
Assessment Requirements for MSFFM2010 Set up and operate basic static machines	2249
MSFFM2011 Apply manufactured board conversion techniques.....	2251

Assessment Requirements for MSFFM2011 Apply manufactured board conversion techniques	2255
MSFFM2012 Set up, operate and maintain pressure and clamping machines	2257
Assessment Requirements for MSFFM2012 Set up, operate and maintain pressure and clamping machines.....	2261
MSFFM3001 Construct chair and couch frames.....	2263
Assessment Requirements for MSFFM3001 Construct chair and couch frames.....	2268
MSFFM3002 Construct furniture using leg and rail method	2270
Assessment Requirements for MSFFM3002 Construct furniture using leg and rail method.....	2275
MSFFM3003 Produce angled and curved furniture using manufactured board	2277
Assessment Requirements for MSFFM3003 Produce angled and curved furniture using manufactured board.....	2282
MSFFM3004 Produce angled and curved furniture using solid timber	2284
Assessment Requirements for MSFFM3004 Produce angled and curved furniture using solid timber.....	2289
MSFFM3005 Fabricate custom furniture.....	2291
Assessment Requirements for MSFFM3005 Fabricate custom furniture	2296
MSFFM3006 Install furnishing products	2298
Assessment Requirements for MSFFM3006 Install furnishing products.....	2303
MSFFM3007 Prepare and apply decorative surfaces for furniture.....	2305
Assessment Requirements for MSFFM3007 Prepare and apply decorative surfaces for furniture.....	2309
MSFFM3008 Select timbers for furniture production	2311
Assessment Requirements for MSFFM3008 Select timbers for furniture production....	2314
MSFFM3009 Produce manual and computer-aided production drawings.....	2316
Assessment Requirements for MSFFM3009 Produce manual and computer-aided production drawings.....	2319
MSFFM3010 Prepare cutting list from plans and job specifications.....	2321
Assessment Requirements for MSFFM3010 Prepare cutting list from plans and job specifications	2324
MSFFM3011 Measure and draw site layout for manufactured furniture products.....	2326
Assessment Requirements for MSFFM3011 Measure and draw site layout for manufactured furniture products	2330
MSFFM3012 Set up, operate and maintain sawing machines.....	2332
Assessment Requirements for MSFFM3012 Set up, operate and maintain sawing machines.....	2336
MSFFM3013 Set up, operate and maintain drilling machines	2338
Assessment Requirements for MSFFM3013 Set up, operate and maintain drilling machines	2342
MSFFM3014 Set up, operate and maintain joining machines.....	2344
Assessment Requirements for MSFFM3014 Set up, operate and maintain joining machines	2348
MSFFM3015 Set up, operate and maintain planing and finishing machines.....	2350
Assessment Requirements for MSFFM3015 Set up, operate and maintain planing and finishing machines	2354
MSFFM3016 Set up, operate and maintain multi-head planing and moulding machines.....	2356
Assessment Requirements for MSFFM3016 Set up, operate and maintain multi-head planing and moulding machines.....	2360
MSFFM3017 Set up, operate and maintain routing and shaping machines	2362
Assessment Requirements for MSFFM3017 Set up, operate and maintain routing and shaping machines	2366
MSFFM3018 Set up, operate and maintain mechanical wood-turning lathes	2368
Assessment Requirements for MSFFM3018 Set up, operate and maintain mechanical wood-turning lathes	2372

MSFFM3019 Set up, operate and maintain automated edge banding machines	2374
Assessment Requirements for MSFFM3019 Set up, operate and maintain automated edge banding machines	2378
MSFFM3020 Fabricate synthetic solid surface products	2380
Assessment Requirements for MSFFM3020 Fabricate synthetic solid surface products	2384
MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines	2386
Assessment Requirements for MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines	2390
MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	2392
Assessment Requirements for MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	2396
MSFFM3023 Produce and maintain cutting tools	2398
Assessment Requirements for MSFFM3023 Produce and maintain cutting tools	2402
MSFFM3024 Construct jigs and fixtures	2404
Assessment Requirements for MSFFM3024 Construct jigs and fixtures	2409
MSFFM4001 Hand carve wood to custom design	2411
Assessment Requirements for MSFFM4001 Hand carve wood to custom design	2416
MSFFM4002 Construct joints for custom furniture	2418
Assessment Requirements for MSFFM4002 Construct joints for custom furniture	2422
MSFFM4003 Produce curved and shaped components for custom furniture	2424
Assessment Requirements for MSFFM4003 Produce curved and shaped components for custom furniture	2429
MSFFM4004 Produce timber veneered components for custom furniture	2431
Assessment Requirements for MSFFM4004 Produce timber veneered components for custom furniture	2437
MSFFT4001 Coordinate on-site installation of furnishing products	2439
Assessment Requirements for MSFFT4001 Coordinate on-site installation of furnishing products	2443
MSFFT4002 Customise stock lines	2445
Assessment Requirements for MSFFT4002 Customise stock lines	2448
MSFFT4003 Organise production processes	2450
Assessment Requirements for MSFFT4003 Organise production processes	2454
MSFFT4004 Establish and monitor production inventory requirements	2456
Assessment Requirements for MSFFT4004 Establish and monitor production inventory requirements	2460
MSFFT4005 Install and commission computer numerically controlled (CNC) software	2462
Assessment Requirements for MSFFT4005 Install and commission computer numerically controlled (CNC) software	2465
MSFFT4006 Construct prototypes and samples	2467
Assessment Requirements for MSFFT4006 Construct prototypes and samples	2471
MSFFT4007 Sample, inspect and test products to specifications	2473
Assessment Requirements for MSFFT4007 Sample, inspect and test products to specifications	2477
MSFFT4008 Interpret and use workplace information	2479
Assessment Requirements for MSFFT4008 Interpret and use workplace information	2482
MSFFT4009 Match furnishing style and materials to customer requirements	2484
Assessment Requirements for MSFFT4009 Match furnishing style and materials to customer requirements	2487
MSFFT4010 Identify and calculate production costs	2489
Assessment Requirements for MSFFT4010 Identify and calculate production costs	2493
MSFFT4011 Purchase materials and consumables	2495

Assessment Requirements for MSFFT4011 Purchase materials and consumables	2499
MSFFT4012 Prepare a tender submission.....	2501
Assessment Requirements for MSFFT4012 Prepare a tender submission	2505
MSFFT5001 Evaluate and select production materials and equipment	2507
Assessment Requirements for MSFFT5001 Evaluate and select production materials and equipment	2511
MSFFT5002 Establish and develop production processes and area layout.....	2513
Assessment Requirements for MSFFT5002 Establish and develop production processes and area layout.....	2517
MSFFT5003 Manage installation and commissioning of equipment	2519
Assessment Requirements for MSFFT5003 Manage installation and commissioning of equipment	2523
MSFFT5004 Develop and document procedures and specifications	2525
Assessment Requirements for MSFFT5004 Develop and document procedures and specifications	2528
MSFFT5005 Organise enterprise maintenance programs	2530
Assessment Requirements for MSFFT5005 Organise enterprise maintenance programs.....	2534
MSFFT5006 Plan production.....	2536
Assessment Requirements for MSFFT5006 Plan production	2540
MSFFT5007 Optimise computer numerically controlled (CNC) operations	2542
Assessment Requirements for MSFFT5007 Optimise computer numerically controlled (CNC) operations	2546
MSFFT5008 Develop, trial and evaluate prototypes	2548
Assessment Requirements for MSFFT5008 Develop, trial and evaluate prototypes	2552
MSFFT5009 Determine production feasibility of designs	2554
Assessment Requirements for MSFFT5009 Determine production feasibility of designs.....	2558
MSFFT5010 Develop products and related processes	2560
Assessment Requirements for MSFFT5010 Develop products and related processes.....	2563
MSFGG1001 Complete a basic glass and glazing project	2565
Assessment Requirements for MSFGG1001 Complete a basic glass and glazing project.....	2569
MSFGG2001 Use glass and glazing sector hand and power tools	2571
Assessment Requirements for MSFGG2001 Use glass and glazing sector hand and power tools	2575
MSFGG2002 Use, handle and store glass and glazing products and consumables	2577
Assessment Requirements for MSFGG2002 Use, handle and store glass and glazing products and consumables	2583
MSFGG2003 Operate glass freefall rack and table	2585
Assessment Requirements for MSFGG2003 Operate glass freefall rack and table.....	2588
MSFGG2004 Process thin glass by hand	2590
Assessment Requirements for MSFGG2004 Process thin glass by hand.....	2595
MSFGG2005 Apply basic glass handling.....	2597
Assessment Requirements for MSFGG2005 Apply basic glass handling	2601
MSFGG2006 Move single glass sheets by mechanical means	2603
Assessment Requirements for MSFGG2006 Move single glass sheets by mechanical means.....	2607
MSFGG2007 Process glass by basic machines	2609
Assessment Requirements for MSFGG2007 Process glass by basic machines.....	2614
MSFGG2008 Glaze and re-glaze residential windows and doors.....	2616
Assessment Requirements for MSFGG2008 Glaze and re-glaze residential windows and doors.....	2622
MSFGG2009 Fabricate and assemble frames	2625
Assessment Requirements for MSFGG2009 Fabricate and assemble frames.....	2630
MSFGG2010 Fabricate and install insect and security screens.....	2632

Assessment Requirements for MSFGG2010 Fabricate and install insect and security screens	2637
MSFGG3001 Store and handle glass	2639
Assessment Requirements for MSFGG3001 Store and handle glass	2644
MSFGG3002 Assess glass and glazing requirements	2646
Assessment Requirements for MSFGG3002 Assess glass and glazing requirements	2649
MSFGG3003 Move block and bulk glass sheet by mechanical means	2651
Assessment Requirements for MSFGG3003 Move block and bulk glass sheet by mechanical means	2655
MSFGG3004 Process thick glass	2657
Assessment Requirements for MSFGG3004 Process thick glass	2662
MSFGG3005 Process glass by semi-automatic machines	2664
Assessment Requirements for MSFGG3005 Process glass by semi-automatic machines	2669
MSFGG3006 Process glass by automatic machines	2671
Assessment Requirements for MSFGG3006 Process glass by automatic machines	2676
MSFGG3007 Apply and handle films and coated glass	2678
Assessment Requirements for MSFGG3007 Apply and handle films and coated glass	2683
MSFGG3008 Form glass	2685
Assessment Requirements for MSFGG3008 Form glass	2689
MSFGG3009 Apply patterns and designs to glass	2691
Assessment Requirements for MSFGG3009 Apply patterns and designs to glass	2695
MSFGG3010 Set up and operate glass laminating equipment	2697
Assessment Requirements for MSFGG3010 Set up and operate glass laminating equipment	2702
MSFGG3011 Set up and operate glass toughening equipment	2704
Assessment Requirements for MSFGG3011 Set up and operate glass toughening equipment	2709
MSFGG3012 Set up and operate glass mirroring equipment	2711
Assessment Requirements for MSFGG3012 Set up and operate glass mirroring equipment	2716
MSFGG3013 Set up and operate insulated glass unit (IGU) manufacturing equipment	2718
Assessment Requirements for MSFGG3013 Set up and operate insulated glass unit (IGU) manufacturing equipment	2723
MSFGG3014 Construct and repair leadlight panels	2725
Assessment Requirements for MSFGG3014 Construct and repair leadlight panels	2729
MSFGG3015 Fabricate and install shower screens and wardrobe doors	2731
Assessment Requirements for MSFGG3015 Fabricate and install shower screens and wardrobe doors	2736
MSFGG3016 Fabricate and install residential windows and doors	2738
Assessment Requirements for MSFGG3016 Fabricate and install residential windows and doors	2743
MSFGG3017 Fabricate and install commercial glazing	2746
Assessment Requirements for MSFGG3017 Fabricate and install commercial glazing	2752
MSFGG3018 Prepare and install architectural engineered glazing	2754
Assessment Requirements for MSFGG3018 Prepare and install architectural engineered glazing	2759
MSFGG3019 Conduct commercial and structural re-glazing	2761
Assessment Requirements for MSFGG3019 Conduct commercial and structural re-glazing	2767
MSFGG3020 Use static machines for aluminium and unplasticised polyvinyl chloride (uPVC) fabrication	2769
Assessment Requirements for MSFGG3020 Use static machines for aluminium and unplasticised polyvinyl chloride (uPVC) fabrication	2774
MSFGG3021 Prepare and install mirrors and glass splashbacks	2776

Assessment Requirements for MSFGG3021 Prepare and install mirrors and glass splashbacks.....	2781
MSFGG4001 Apply standards and codes of practice for the glass industry	2783
Assessment Requirements for MSFGG4001 Apply standards and codes of practice for the glass industry.....	2787
MSFGG4002 Use glass industry data systems.....	2789
Assessment Requirements for MSFGG4002 Use glass industry data systems	2793
MSFGG4003 Manage glass industry production scheduling.....	2795
Assessment Requirements for MSFGG4003 Manage glass industry production scheduling.....	2799
MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.....	2802
Assessment Requirements for MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings	2806
MSFGG4005 Set up, configure, upgrade and troubleshoot glass and glazing plant and ancillary equipment	2808
Assessment Requirements for MSFGG4005 Set up, configure, upgrade and troubleshoot glass and glazing plant and ancillary equipment.....	2812
MSFGG4006 Operate complex glass processing plant control systems.....	2814
Assessment Requirements for MSFGG4006 Operate complex glass processing plant control systems	2820
MSFGG4007 Manage glass processing plant shutdown and re-start	2823
Assessment Requirements for MSFGG4007 Manage glass processing plant shutdown and re-start	2827
MSFGG4008 Undertake planning and coordination for commercial glazing installation operations	2829
Assessment Requirements for MSFGG4008 Undertake planning and coordination for commercial glazing installation operations	2834
MSFGN2001 Make measurements and calculations	2836
Assessment Requirements for MSFGN2001 Make measurements and calculations	2840
MSFGN2002 Move and store materials and products	2842
Assessment Requirements for MSFGN2002 Move and store materials and products	2846
MSFGN3001 Read and interpret work documents	2848
Assessment Requirements for MSFGN3001 Read and interpret work documents	2851
MSFGN3002 Estimate and cost job.....	2853
Assessment Requirements for MSFGN3002 Estimate and cost job	2856
MSFID1001 Plan the decoration of a simple space	2858
Assessment Requirements for MSFID1001 Plan the decoration of a simple space	2863
MSFID3001 Source and specify decoration products.....	2865
Assessment Requirements for MSFID3001 Source and specify decoration products	2870
MSFID3002 Style a retail display	2872
Assessment Requirements for MSFID3002 Style a retail display.....	2877
MSFID4001 Research, analyse and apply colour for interior spaces.....	2879
Assessment Requirements for MSFID4001 Research, analyse and apply colour for interior spaces	2888
MSFID4002 Decorate residential interiors	2890
Assessment Requirements for MSFID4002 Decorate residential interiors	2899
MSFID4003 Prepare a materials board for client presentation	2902
Assessment Requirements for MSFID4003 Prepare a materials board for client presentation	2908
MSFID4004 Research and recommend furniture and accessories.....	2910
Assessment Requirements for MSFID4004 Research and recommend furniture and accessories.....	2918
MSFID4005 Research and recommend soft furnishings for interiors	2920

Assessment Requirements for MSFID4005 Research and recommend soft furnishings for interiors.....	2927
MSFID4006 Research and recommend hard materials and finishes for interiors	2929
Assessment Requirements for MSFID4006 Research and recommend hard materials and finishes for interiors.....	2936
MSFID4007 Identify materials, construction techniques and methods used in building interiors.....	2938
Assessment Requirements for MSFID4007 Identify materials, construction techniques and methods used in building interiors	2941
MSFID4008 Assess interior light and recommend light fittings.....	2943
Assessment Requirements for MSFID4008 Assess interior light and recommend light fittings	2950
MSFID4009 Research architectural styles and movements.....	2952
Assessment Requirements for MSFID4009 Research architectural styles and movements.....	2958
MSFID4010 Research interior decoration and design influences.....	2960
Assessment Requirements for MSFID4010 Research interior decoration and design influences	2965
MSFID4011 Determine work health and safety (WHS) implications of interior effects.....	2967
Assessment Requirements for MSFID4011 Determine work health and safety (WHS) implications of interior effects	2973
MSFID5001 Design residential interiors.....	2975
Assessment Requirements for MSFID5001 Design residential interiors	2983
MSFID5002 Develop a decoration proposal for a complex site	2985
Assessment Requirements for MSFID5002 Develop a decoration proposal for a complex site.....	2991
MSFID5003 Evaluate site for interior design brief.....	2993
Assessment Requirements for MSFID5003 Evaluate site for interior design brief	3000
MSFID5004 Specify structural elements, systems and services for interior spaces.....	3002
Assessment Requirements for MSFID5004 Specify structural elements, systems and services for interior spaces	3007
MSFID5005 Explore and apply creative design methodology to interior space	3009
Assessment Requirements for MSFID5005 Explore and apply creative design methodology to interior space.....	3013
MSFID5006 Design interior lighting	3015
Assessment Requirements for MSFID5006 Design interior lighting.....	3021
MSFID5007 Decorate for events.....	3023
Assessment Requirements for MSFID5007 Decorate for events	3032
MSFID5008 Design for people with disabilities and the elderly	3034
Assessment Requirements for MSFID5008 Design for people with disabilities and the elderly.....	3044
MSFID5009 Research and recommend colour and applied finishes.....	3046
Assessment Requirements for MSFID5009 Research and recommend colour and applied finishes	3053
MSFID5010 Provide interior styling service	3055
Assessment Requirements for MSFID5010 Provide interior styling service	3062
MSFID5011 Specify soft furnishings for complete interior solution	3065
Assessment Requirements for MSFID5011 Specify soft furnishings for complete interior solution.....	3071
MSFID5012 Research and recommend artwork.....	3073
Assessment Requirements for MSFID5012 Research and recommend artwork	3080
MSFID5013 Design for small to medium scale commercial or institutional interiors.....	3082
Assessment Requirements for MSFID5013 Design for small to medium scale commercial or institutional interiors	3090

MSFID5014 Use CAD applications to complete models and documentation for interior design projects.....	3092
Assessment Requirements for MSFID5014 Use CAD applications to complete models and documentation for interior design projects	3098
MSFID5015 Decorate interiors for restoration projects	3100
Assessment Requirements for MSFID5015 Decorate interiors for restoration projects.....	3108
MSFID6001 Resolve complex spatial design problems through modelling.....	3110
Assessment Requirements for MSFID6001 Resolve complex spatial design problems through modelling.....	3114
MSFID6002 Apply 3-D visualisation techniques to represent interior designs.....	3116
Assessment Requirements for MSFID6002 Apply 3-D visualisation techniques to represent interior designs.....	3121
MSFID6003 Design for large scale commercial or institutional interiors	3123

MSF10113 Certificate I in Furnishing

Modification History

Release 1 - New qualification.

Qualification Description

This qualification describes the skills and knowledge required to perform basic furnishing industry tasks used in a range of industry job roles involving given routines and procedures and limited accountability for the quality of outcomes while supporting others.

This qualification is typically used to develop skills and knowledge in basic furnishing techniques that include a variety of employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF10113 Certificate I in Furnishing, competency must be achieved in **eight (8)** units of competency.

- **five (5)** core units of competency
- **three (3)** elective units of competency.

CORE UNITS

Complete all **five (5)** units from this list:

Unit code	Unit title
-----------	------------

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS100A	Follow OHS procedures
MSAPMOPS101A	Make measurements
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team

ELECTIVE UNITS

Select a maximum of **three (3)** elective units from Group A or B.

Group A

Select up to **three (3)** elective units from Group A.

Unit code	Unit title
BSBDES201A	Follow a design process
BSBDES202A	Evaluate the nature of design in a specific industry context
BSBDES301A	Explore the use of colour
MSFBA1001	Construct a basic roll up blind
MSFFF1001	Complete a basic furniture finishing product
MSFFL1001	Complete simple floor covering installation
MSFFM1001	Construct a basic timber furnishing product
MSFFM1002	Operate basic woodworking machines
MSFGG1001	Complete a basic glass and glazing project
MSFGG2010	Fabricate and install insect and security screens
MSFID1001	Plan the decoration of a simple space
MSFPF1001	Frame a simple artwork
MSFSF1001	Produce basic soft furnishing accessories

Unit code**Unit title**

MSFUP1001

Complete a basic upholstery project

Group B

Two (2) units may be chosen from units available in this Training Package or from other endorsed Training Packages and accredited courses. The units must be aligned at Certificate I or II level.

Qualification Mapping Information

Supersedes and is based on LMF10108 Certificate I in Furnishing. Outcomes are not equivalent.

MSF20113 Certificate II in Furnishing

Modification History

Release 2 - Two unit titles corrected for MSFFM2010 and MSFSF2014. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform basic furnishing industry tasks used in a range of industry job roles involving known routines and procedures and some accountability for the quality of outcomes.

This qualification is typically used to develop skills and knowledge in basic furnishing techniques that include employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF20113 Certificate II in Furnishing, competency must be achieved in **fourteen (14)** units of competency.

- **five (5)** core units of competency
- **nine (9)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list:

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFGN2001	Make measurements and calculations

ELECTIVE UNITS

Select up to **nine (9)** elective units from Groups A and B as specified below.

Group A**Security screens and grilles**

Unit code	Unit title
MSFBA2001	Use blinds, awnings, security screens and grilles hand and power tools
MSFFM2010	Set up and operate basic static machines
MSFGG2009	Fabricate and assemble frames
MSFGG2010	Fabricate and install insect and security screens
MSFSS2001	Rectify faults in product
MSFSS2003	Undertake surface preparation

Picture framing

Unit code	Unit title
MSFPF2001	Use picture framing sector hand and power tools
MSFPF2002	Cut mouldings to length

Unit code	Unit title
MSFPPF2003	Join mouldings
MSFPPF2004	Mount artwork
MSFPPF2005	Cut mat boards
MSFPPF2006	Cut and handle glazing materials for framing
MSFPPF2007	Assemble basic artwork package

Soft furnishings production

Unit code	Unit title
MSFSF2001	Cut single layer fabrics
MSFSF2002	Machine sew materials
MSFSF2003	Machine sew specialised sewn products
MSFSF2004	Hand sew soft furnishings
MSFSF2005	Operate a steam press
MSFSF2006	Calculate fabric quantities for window coverings
MSFSF2007	Construct unlined curtains and drapes
MSFSF2008	Construct lined curtains and drapes
MSFSF2009	Construct padded pelmets
MSFSF2014	Use soft furnishing sector hand and power tools

Blinds, awnings and shade sail - production

Unit code	Unit title
LMTTF2009A	Identify and select canvas and sail materials
LMTTF2014A	Weld plastic materials
MSFBA2001	Use blinds, awnings, security screens and grilles hand and power tools
MSFBA2002	Set up, operate and maintain blinds and awnings sector static machines

Unit code	Unit title
MSFBA2004	Construct roll-up and pull-down style blinds and awnings
MSFBA2005	Construct vertical-style blinds
MSFBA2006	Construct textiles for canopy-style awnings
MSFBA2007	Construct plastic and timber Venetian-style blinds
MSFBA2008	Construct aluminium Venetian-style blinds
MSFBA2009	Construct metal louvre and canopy-hooded style awnings
MSFBA2010	Construct aluminium roll-up style awnings

Blinds, awnings and shade sail - installation

Unit code	Unit title	Prerequisites
AHCLSC308A	Install metal structures and features	
CPCCCM2002A	Carry out excavation	*
CPCCCO2013A	Carry out concreting to simple forms	*
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	
LMTGN2005B	Perform minor maintenance	
LMTTF2016A	Install products on and off-site	
MSFBA3002	Install exterior blinds and awnings	

Window coverings installation

Unit code	Unit title
MSFBA2003	Select and apply blinds and awnings sector hardware and fixings
MSFSF2010	Make up tracks for window coverings
MSFSF2011	Fit and adjust curtain hardware
MSFSF2012	Fit and adjust interior blinds

Unit code**Unit title**

MSFSF2013

Dress windows

MSFSF2014

Use soft furnishing sector hand and power tools

Upholstery**Unit code****Unit title**

MSFUP2001

Use upholstery sector hand and power tools

MSFUP2002

Fit upholstery components

MSFUP2003

Apply contemporary foundations to upholstered furniture

MSFUP2004

Machine sew basic upholstery final cover materials

MSFUP2005

Develop cutting plan and cut single layer upholstery fabric

MSFUP2006

Dismantle and re-assemble furniture for upholstering

Flooring technology**Unit code****Unit title**

MSFFL2001

Use flooring technology sector hand and power tools

MSFFL2002

Receive and prepare floor covering materials for installation

MSFFL2003

Select, operate and maintain floor covering cutting machine

MSFFL2004

Moisture test timber and concrete floors

MSFFL2005

Remove existing floor coverings

MSFFL2006

Prepare, select and apply smoothing and patching compounds

MSFFL2007

Select and apply appropriate compounds and additives

MSFFL2008

Prepare concrete sub-floors using wet cleaning methods

MSFFL2009

Select, prepare and apply moisture barriers and damp proof membranes to concrete sub-floors

MSFFL2010

Prepare walls for covering

Unit code	Unit title
MSFFL2011	Select, operate and maintain grinding equipment
MSFFL2012	Select, operate and maintain shot blasting equipment
MSFFL2013	Select, operate and maintain demolition equipment
MSFFL2014	Select, operate and maintain scarifying equipment
MSFFL2015	Coarse sand timber flooring
MSFFL2016	Install hard underlays
MSFFL2017	Install carpet cushion underlays and gripper accessories
MSFFL2018	Install unpatterned tufted and bonded carpet floor coverings
MSFFL2019	Install carpet tiles using standard installation procedures
MSFFL2020	Install unpatterned tufted and bonded carpet floor coverings to stairs
MSFFL2021	Install lay flat vinyl floor coverings
MSFFL2022	Install resilient tiles using standard installation procedures
MSFFL2023	Install laminate timber and bamboo flooring
MSFFL2025	Install impact and sound absorption underlay
MSFFL2026	Nail strip timber flooring
MSFFL2027	Install expansion joints
MSFFL2028	Install mouldings and edge trims to timber flooring

Mattress and base making

Unit code	Unit title
MSFMB2001	Prepare and assemble base unit
MSFMB2002	Assemble mattress components
MSFMB2003	Cut mattress and base fabrics
MSFMB2004	Assemble springs for mattresses
MSFMB2005	Make springs for mattresses and bases

Unit code	Unit title
MSFMB2006	Set up, operate and maintain a tape edging machine
MSFMB2007	Set up, operate and maintain a quilting machine
MSFSF2014	Use soft furnishing sector hand and power tools

Coopering

Unit code	Unit title
MSFCP2001	Use coopering sector hand and power tools
MSFCP2002	Produce barrels using non-fired processes
MSFCP2003	Produce barrels using fired processes
MSFCP2004	Maintain and repair barrels
MSFFM2006	Hand make timber joints
MSFFM2012	Set up, operate and maintain pressure and clamping machines
MEM05007C	Perform manual heating and thermal cutting
MEM05012C	Perform routine manual metal arc welding

Group B

A maximum of **three (3)** relevant units may be selected from:

- units not previously selected from Group A
- units from Group B, below
- relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II or Certificate III level.

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Unit code	Unit title
BSBCUS201B	Deliver a service to customers
BSBINN201A	Contribute to workplace innovation

Unit code	Unit title
BSBITU101A	Operate a personal computer
BSBITU306A	Design and produce business documents
HLTAID003	Apply first aid
MSFGN2002	Move and store materials and products
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402010A	Manage the impact of change on own work
MSS402020A	Apply quick changeover procedures
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
TLIA2011A	Package goods
TLIA2013A	Receive goods
TLID2003A	Handle dangerous goods/hazardous substances

Qualification Mapping Information

No equivalent qualification

MSF20213 Certificate II in Furniture Finishing

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform a range of finishing techniques for furniture and covers basic dismantling and assembly of furniture items for surface finishing involving known routines and procedures and some accountability for the quality of outcomes. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF20213 Certificate II in Furniture Finishing, competency must be achieved in **thirteen (13)** units of competency.

- **eight (8)** core units of competency
- **five (5)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **eight (8)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS100A	Follow OHS procedures
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFF2001	Use furniture finishing sector hand and power tools
MSFFF2003	Remove surface coatings
MSFGN2001	Make measurements and calculations
TLID2003A	Handle dangerous goods/hazardous substances

ELECTIVE UNITS

Select **five (5)** units from Groups A and B as specified below.

Group A

Select a minimum of **three (3)** units from Group A.

Unit code	Unit title
MSFFF2002	Dismantle and reassemble furniture
MSFFF2004	Prepare surfaces for finishing
MSFFF2005	Maintain spray equipment and booth
MSFFF2006	Apply surface coatings by spray gun
MSFFF2007	Apply stains, fillers and bleach
MSFFF2008	Apply surface coatings by hand

Group B

A maximum of **two (2)** relevant units may be chosen from other units not selected in Group A, or units available in this Training Package, other endorsed Training Packages and accredited courses. The units must be aligned at Certificate II or III level.

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF20202 Certificate II in Furniture Finishing. Outcomes are equivalent.

MSF20313 Certificate II in Furniture Making

Modification History

Release 2 - Unit title corrected for MSFFM2010. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform the manufacture of free-standing furniture or built-in cabinets, and provide on-site assistance in the installation of furniture or cabinets involving known routines and procedures and some accountability for the quality of outcomes. It reflects vocational outcomes for those performing assistant cabinet maker, assistant installer of built-in cabinets, and production operator within a cabinet making enterprise. Cabinets include free-standing and built-in furniture or fitted cabinets, such as those used in kitchens and bathrooms. Skills are also included that cover assisting in the installation or renovation of kitchens and bathrooms and other fitted cabinets, which involves collaboration with others through members of a group or team. This qualification does not cover shopfitting.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF20313 Certificate II in Furniture Making, competency must be achieved in **thirteen (13)** units of competency.

- **five (5)** core units of competency
- **eight (8)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFM2001	Use furniture making sector hand and power tools
MSFGN2001	Make measurements and calculations

ELECTIVE UNITS

Select **eight (8)** unit from Groups A, B or C as specified below.

Group A

Select at least **one (1)** unit from Group A.

Unit code	Unit title
CPCCOHS1001A	Work safely in the construction industry
MSAPMOHS200A	Work safely

NB: Unit *CPCCOHS1001A Work safely in the construction industry* above is necessary to achieve a National Construction Safety Card required for all on-site work access.

Group B

Select a minimum of **four (4)** units from Group B with a maximum of **two (2)** units coded MSS.

Unit code	Unit title
MEM16008A	Interact with computing technology
MSAPMSUP201A	Receive or despatch goods

Unit code	Unit title
MSAPMSUP240A	Undertake minor maintenance
MSAPMSUP273A	Handle goods
MSFFF2004	Prepare surfaces for finishing
MSFFF2006	Apply surface coatings by spray gun
MSFFM2002	Assemble furnishing components
MSFFM2003	Select and apply hardware
MSFFM2004	Apply sheet laminates by hand
MSFFM2005	Join solid timber
MSFFM2006	Hand make timber joints
MSFFM2007	Follow plans to assemble production furniture
MSFFM2008	Bend and form cane
MSFFM2009	Construct cane furniture
MSFFM2010	Set up and operate basic static machines
MSFFM2011	Apply manufactured board conversion techniques
MSFFM2012	Set up, operate and maintain pressure and clamping machines
MSFKB2001	Prepare for cabinet installation
MSFKB2002	Provide assistance in cabinet installation
MSS402001A	Apply competitive manufacturing practices
MSS402002A	Sustain process improvements
MSS402020A	Apply quick changeover procedures
MSS402010A	Manage the impact of change on own work
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402081A	Contribute to the application of a proactive maintenance strategy

Group C

Up to **three (3)** relevant units may be chosen from other or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 3 units) or Certificate III level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF20309 Certificate II in Furniture Making. Outcomes are equivalent.

MSF20413 Certificate II in Glass and Glazing

Modification History

Release 2 - Unit title corrected for MSFGG3020. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform basic glass and glazing job roles, such as safely processing and moving thin glass. It may include assembly/repair of leadlight and stained glass involving known routines and procedures and some accountability for the quality of outcomes.

This qualification is typically used to develop skills and knowledge in basic glass and glazing techniques that include employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF20413 Certificate II in Glass and Glazing, competency must be achieved in **thirteen (13)** units of competency.

- **five (5)** core units of competency
- **eight (8)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS100A	Follow OHS procedures
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFGN2001	Make measurements and calculations

ELECTIVE UNITS

Complete **eight (8)** elective units of competency from Groups A, B and C as specified below.

Group A

Select a minimum of **five (5)** units from this Group.

Unit code	Unit title
HLTAID003	Apply first aid
MSFGG2001	Use glass and glazing sector hand and power tools
MSFGG2002	Use, handle and store glass and glazing products and consumables
MSFGG2003	Operate glass freefall rack and table
MSFGG2004	Process thin glass by hand
MSFGG2005	Apply basic glass handling
MSFGG2006	Move single glass sheets by mechanical means
MSFGG2007	Process glass by basic machines
MSFGG2008	Glaze and re-glaze residential windows and doors
MSFSL2001	Assemble leadlight and stained glass components

Group B

Select a maximum of **three (3)** units from this Group.

Unit code	Unit title
CUVACD101A	Use basic drawing techniques
CUVDRA201A	Develop drawing skills
MSFFM3024	Construct jigs and fixtures
MSFGG2009	Fabricate and assemble frames
MSFGG2010	Fabricate and install insect and security screens
MSFGG3014	Construct and repair leadlight panels
MSFGG3020	Use static machines for aluminum and unplasticised polyvinyl chloride (uPVC) fabrication
MSFSS2003	Undertake surface preparation

Group C

Up to **three (3)** relevant units may be chosen from this Training Package, other endorsed Training Packages and accredited courses, where those units are aligned at Certificate II level (maximum 3 units) or Certificate III level (maximum 2 units).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF20411 Certificate II in Glass and Glazing. Outcomes are equivalent.

MSF30113 Certificate III in Furniture Finishing

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform a wide range of tasks associated with the preparation of surfaces and applying stains, coatings and finishes to furniture in manufacture or repair. Participation in teams, including group or team coordination, may be required.

A specialisation in French polishing can be recognised in this qualification where the following elective units are achieved:

MSFFF2003 Remove surface coatings

MSFFF2004 Prepare surfaces for finishing

MSFFF2007 Apply stains, fillers and bleach

MSFFF2008 Apply surface coatings by hand

MSFFF3001 Match and make up colours

MSFFF3007 Apply graining and decorative finishes

MSFFF3008 Apply traditional French polishing techniques

Where this specialisation is achieved, RTOs should identify this as follows:

MSF30113 Certificate III in Furniture Finishing

(specialising in French Polishing)

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30113 Certificate III in Furniture Finishing, competency must be achieved in **twenty-three (23)** units of competency.

- **ten (10)** core units of competency
- **thirteen (13)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **ten (10)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFF2001	Use furniture finishing sector hand and power tools
MSFFF2002	Dismantle and re-assemble furniture
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
TLID2003A	Handle dangerous goods/hazardous substances

ELECTIVE UNITS

Select **thirteen (13)** units from Groups A, B and C as specified below.

Group A

Select a minimum of **eight (8)** units from Group A.

Unit code	Unit title
MSFFF2003	Remove surface coatings

Unit code	Unit title
MSFFF2004	Prepare surfaces for finishing
MSFFF2005	Maintain spray equipment and booth
MSFFF2006	Apply surface coatings by spray gun
MSFFF2007	Apply stains, fillers and bleach
MSFFF3001	Match and make up colours
MSFFF3003	Apply plural component coatings
MSFFF3004	Apply soft rubber techniques
MSFFF3006	Repair and touch up surfaces

Group B

Select at least **one (1)** unit from Group B.

Unit code	Unit title
MSFFF2008	Apply surface coatings by hand
MSFFF3002	Set up, operate and maintain mechanical coatings systems
MSFFF3005	Enhance finishes
MSFFF3007	Apply graining and decorative finishes
MSFFF3008	Apply traditional French polishing techniques
MSFFF3009	Set up, operate and maintain computer numerically controlled (CNC) coating systems

Group C

Up to **four (4)** relevant units may be chosen from units not already selected from Groups A and B, or units available in this Training Package or other endorsed Training Packages and accredited courses. Units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 4 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF30202 Certificate III in Furniture Finishing. Outcomes are equivalent.

MSF30213 Certificate III in Furniture Making

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform a wide range of tasks in furniture making, including interpretation of specifications drawings, use of specialised machines and hand techniques.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30213 Certificate III in Furniture Making, competency must be achieved in **twenty-eight (28)** units of competency.

- **fifteen (15)** core units of competency
- **thirteen (13)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **fifteen (15)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace

Unit code	Unit title
MSAPMSUP106A	Work in a team
MSFFF2004	Prepare surfaces for finishing
MSFFM2001	Use furniture making sector hand and power tools
MSFFM2002	Assemble furnishing components
MSFFM2006	Hand make timber joints
MSFFM2010	Set up, operate and maintain basic static machines
MSFFM2011	Apply manufactured board conversion techniques
MSFFM3009	Produce manual and computer-aided production drawings
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
TLID2003A	Handle dangerous goods/hazardous substances

ELECTIVE UNITS

Select **thirteen (13)** units from Groups A or B as specified below.

Group A

Select a minimum of **seven (7)** units from Group A.

Unit code	Unit title
MSFFM2003	Select and apply hardware
MSFFM2004	Apply sheet laminates by hand
MSFFM2005	Join solid timber
MSFFM2007	Follow plans to assemble production furniture
MSFFM2008	Bend and form cane
MSFFM2009	Construct cane furniture

Unit code	Unit title
MSFFM2012	Set up, operate and maintain pressure and clamping machines
MSFFM3001	Construct chair and couch frames
MSFFM3002	Construct furniture using leg and rail method
MSFFM3003	Produce angled and curved furniture using manufactured board
MSFFM3004	Produce angled and curved furniture using solid timber
MSFFM3005	Fabricate custom furniture
MSFFM3006	Install furnishing products
MSFFM3007	Prepare and apply decorative surfaces for furniture
MSFFM3008	Select timbers for furniture production
MSFFM3010	Prepare cutting list from plans and job specifications
MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFFM3012	Set up, operate and maintain sawing machines
MSFFM3013	Set up, operate and maintain drilling machines
MSFFM3014	Set up, operate and maintain joining machines
MSFFM3015	Set up, operate and maintain planing and finishing machines
MSFFM3016	Set up, operate and maintain multi-head planing and moulding machines
MSFFM3017	Set up, operate and maintain routing and shaping machines
MSFFM3018	Set up, operate and maintain mechanical wood-turning lathes
MSFFM3019	Set up, operate and maintain automated edge banding machines
MSFFM3020	Fabricate synthetic solid surface products
MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres
MSFFM3023	Produce and maintain cutting tools

Unit code**Unit title**

MSFFM3024

Construct jigs and fixtures

Group B

Up to **six (6)** relevant units may be chosen from units not already selected from Group A, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 6 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF30302 Certificate III in Furniture Making. Outcomes are equivalent.

MSF30313 Certificate III in Timber and Composites Machining

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform timber and composites machining for the manufacture of furniture, cabinetry, windows and doors, and other components utilising a range of specialist machinery, and includes preparing and working from drawings and cutting lists. The skills include static and computer numerically controlled (CNC) machine set up, operation maintenance and basic troubleshooting.

There are three possible specialist streams embedded in this qualification:

Stream 1 -- Flat Panel Machining

Stream 2 – Solid Timber Machining

Stream 3 – Machining Technician

Units may be chosen from the specialist stream elective groups to achieve any of the three specialisations or a broad combination of competencies can be selected from all electives with no identified specialisation.

Where specialisation is achieved, RTOs should identify this as follows:

MSF30313 Certificate III in Timber and Composites Machining

(Flat Panel Machining)

or

MSF30313 Certificate III in Timber and Composites Machining

(Solid Timber Machining)

or

MSF30313 Certificate III in Timber and Composites Machining

(Machining Technician)

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30313 Certificate III in Timber and Composites Machining, competency must be achieved in **twenty-seven (27)** units of competency.

- **eleven (11)** core units of competency
- **sixteen (16)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **eleven (11)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFM2001	Use furniture making sector hand and power tools
MSFFM2010	Set up and operate basic static machines
MSFFM3009	Produce manual and computer-aided production drawings
MSFFM3010	Prepare cutting list from plans and job specifications
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job

ELECTIVE UNITS

Select **sixteen (16)** units from Groups A, B, C, D or E as specified below.

Group A

Select a minimum of **seven (7)** units from Group A for a specialisation in **Stream 1 - Flat Panel Machining**

Unit code	Unit title
MSFFF2004	Prepare surfaces for finishing
MSFFM2002	Assemble furnishing components
MSFFM2004	Apply sheet laminates by hand
MSFFM2007	Follow plans to assemble production furniture
MSFFM2011	Apply manufactured board conversion techniques
MSFFM3012	Set up, operate and maintain sawing machines
MSFFM3013	Set up, operate and maintain drilling machines
MSFFM3019	Set up, operate and maintain automated edge banding machines
MSFFM3020	Fabricate synthetic solid surface products

Group B

Select a minimum of **seven (7)** units from Group B for a specialisation in **Stream 2 – Solid Timber Machining**

Unit code	Unit title
MSFFDT4009	Set up, operate and maintain basic static woodworking machines for furniture designs
MSFFM2005	Join solid timber
MSFFM3008	Select timbers for furniture production
MSFFM3014	Set up, operate and maintain joining machines
MSFFM3015	Set up, operate and maintain planing and finishing machines
MSFFM3016	Set up, operate and maintain multi-head planing and moulding machines

MSFFM3017	Set up, operate and maintain routing and shaping machines
MSFFM3018	Set up, operate and maintain mechanical wood-turning lathes
MSFFM3024	Construct jigs and fixtures

Group C

Select a minimum of **seven (7)** units from Group C for a specialisation in **Stream 3 –Machining Technician**

Unit code	Unit title	Prerequisites
LMTGN4012A	Fabricate or machine tooling	
MEM07001B	Perform operational maintenance of machines/equipment	*
MEM14003B	Undertake basic production scheduling	
MEM18001C	Use hand tools	
MEM30017A	Use basic preventative maintenance techniques and tools	
MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines	
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	
MSFFM3023	Produce and maintain cutting tools	
MSFFT4005	Install and commission computer numerically controlled (CNC) software	
MSS402001A	Apply competitive manufacturing practices	
MSS402020A	Apply quick changeover procedures	
MSS402060A	Use planning software systems in operations	
MSS402081A	Contribute to the application of a proactive maintenance strategy	
MSS403051A	Mistake proof an operational process	

UEENEEH166A Fault find microcontroller based hardware

Group D

Select up to **five (5)** units from Group D.

Unit code	Unit title
MEM30031A	Operate computer-aided design (CAD) system to produce basic drawing elements
MSFDN4003	Produce patterns and templates
MSFFM2012	Set up, operate and maintain pressure and clamping machines
MSFFM3007	Prepare and apply decorative surfaces for furniture
MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFFT4007	Sample, inspect and test products to specifications
MSS402010A	Manage the impact of change on own work
MSS402021A	Apply Just in Time procedures
MSS402051A	Apply quality standards
TLID2003A	Handle dangerous goods/hazardous substances

Group E

Up to **five (5)** relevant units may be chosen from units not already selected from Groups A, B, C, or D or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 5 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group E must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF30502 Certificate III in Furniture Making (Wood Machining). Outcomes are not equivalent.

MSF30413 Certificate III in Glass and Glazing

Modification History

Release 3 - Unit codes corrected for MSFFM3024 and HLTAID003. Unit titles corrected for MSFGG3020 and MSFGG4003. No change in outcomes

Release 2 - Two unit titles corrected - no change in outcomes

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform a range of glass and glazing job roles, including safely manufacturing, processing, moving and installing various types of glass and handling glazing materials and components.

The MSF30413 Certificate III in Glass and Glazing reflects vocational outcomes for those performing glass processing, glazing or architectural glass functions in residential and commercial operations and could include manufacturing, processing, installation and stained glass and leadlighting design. Job roles would be in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Specialisation is possible in this qualification depending on the electives chosen. A specialisation can be identified on the testamur where a minimum of six (6) elective units of competency are achieved in one of the three elective groups and units chosen must include those marked with ‘#’ in each specialist group:

- Group B - Glass Processing
- Group C - Glazing
- Group D - Architectural Stained Glass

Where specialisation is achieved, RTOs should identify this as follows:

MSF30413 Certificate III in Glass and Glazing

(specialising in Glass Processing/Glazing/Architectural Stained Glass)

Depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Licensing of glazing work applies in Queensland, NSW and South Australia. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30413 Certificate III in Glass and Glazing, competency must be achieved in **twenty-four (24)** units of competency:

- **eleven (11)** core units of competency
- **thirteen (13)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all of the following **eleven (11)** units of competency.

Unit code	Unit title
HLTAID003	Apply first aid
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFGG2001	Use glass and glazing sector hand and power tools
MSFGG2003	Operate glass freefall rack and table
MSFGG2004	Process thin glass by hand
MSFGG2005	Apply basic glass handling
MSFGG2006	Move single glass sheets by mechanical means
MSFGG2007	Process glass by basic machines
MSFGN2001	Make measurements and calculations

ELECTIVE UNITS

Select **thirteen (13)** units from Groups A, B, C, D, E and F as specified below.

Group A

Select a minimum of **one (1)** unit from Group A.

Unit code	Unit title
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
MSAPMOHS200A	Work safely

Select a minimum of **seven (7)** units from Groups B, C or D (at least **six (6)** units must be selected from one group to achieve that specialisation and chosen units must include those marked with ‘#’ in each specialist group)

Group B – Glass Processing

Unit code	Unit title
MEM30031A	Operate computer-aided design (CAD) system to produce basic drawing elements
MSFFM3024	Construct jigs and fixtures
MSFGG3001	Store and handle glass
MSFGG3003	Move block and bulk glass sheet by mechanical means #
MSFGG3004	Process thick glass #
MSFGG3005	Process glass by semi-automatic machines
MSFGG3006	Process glass by automatic machines
MSFGG3007	Apply and handle films and coated glass
MSFGG3008	Form glass
MSFGG3009	Apply patterns and designs to glass
MSFGG3010	Set up and operate glass laminating equipment
MSFGG3011	Set up and operate glass toughening equipment

MSFGG3012	Set up and operate glass mirroring equipment
MSFGG3013	Set up and operate insulated glass unit manufacturing equipment

Group C – Glazing

Unit code	Unit title
MSFGG2002	Use, handle and store glass and glazing products and consumables
MSFGG2008	Glaze and re-glaze residential windows and doors #
MSFGG2009	Fabricate and assemble frames
MSFGG2010	Fabricate and install insect and security screens
MSFGG3002	Assess glass and glazing requirements #
MSFGG3015	Fabricate and install shower screens and wardrobe doors
MSFGG3016	Fabricate and install residential windows and doors
MSFGG3017	Fabricate and install commercial glazing
MSFGG3018	Prepare and install architectural engineered glazing
MSFGG3019	Conduct commercial and structural re-glazing
MSFGG3020	Use static machines for aluminium and unplasticised polyvinyl chloride (uPVC) fabrication
MSFGG3021	Prepare and install mirrors and glass splashbacks

Group D – Architectural Stained Glass

Unit code	Unit title
MSFGG3014	Construct and repair leadlight panels
MSFSL2001	Assemble leadlight and stained glass components #
MSFSL3001	Apply product and material knowledge to leadlight and stained glass operations

MSFSL3002	Protect stained glass and leadlighting
MSFSL3003	Fabricate and install residential leadlight and stained glass windows and doors
MSFSL3004	Prepare and install architectural engineered leadlight and stained glass
MSFSL3005	Paint and fire glass #

Group E

A maximum of **four (4)** units, may be selected from:

- units not previously selected from Groups A, B, C or D
- a maximum of **three (3)** units from Group F, below
- a maximum of **four (4)** relevant units from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate II level (maximum 1 unit), Certificate III level (maximum 4 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Group F

Unit code	Unit title	Prerequisites
BSBWHS401A	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	
CPCCCM2001A	Read and interpret plans and specifications	
CPCCCM2006B	Apply basic levelling procedures	*
CPCCCM2010B	Work safely at heights	*
CPCCOHS1001A	Work safely in the construction industry	
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	
CUVACD301A	Produce drawings to communicate ideas	
CUVACD201A	Develop drawing skills to communicate ideas	
CUVCAL301A	Produce calligraphy	

MSAPMSUP201A	Receive or despatch goods
MSFBA2009	Construct metal louvre and canopy-hooded style awnings
MSFFM3009	Produce manual and computer-aided production drawings
MSFGG4003	Manage glass industry production scheduling
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
TAEDEL404A	Mentor in the workplace
TLID2003A	Handle dangerous goods/hazardous substance
TLILIC2001A	License to operate a forklift truck

Qualification Mapping Information

Supersedes and is based on LMF30611 Certificate III in Glass and Glazing. Outcomes are not equivalent.

MSF30513 Certificate III in Picture Framing

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to prepare design requirements for framing and use mouldings and mat to frame pictures, artwork, and textiles, including use of glass and glazing materials, where required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30513 Certificate III in Picture Framing, competency must be achieved in **twenty-one (21)** units of competency.

- **fourteen (14)** core units of competency
- **seven (7)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **fourteen (14)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace

Unit code	Unit title
MSAPMSUP106A	Work in a team
MSFGN2001	Make measurements and calculations
MSFPPF2001	Use picture framing sector hand and power tools
MSFPPF2002	Cut mouldings to length
MSFPPF2003	Join mouldings
MSFPPF2004	Mount artwork
MSFPPF2005	Cut mat boards
MSFPPF2006	Cut and handle glazing materials for framing
MSFPPF3001	De-frame artwork
MSFPPF3005	Recognise and handle artwork for framing
MSFPPF3006	Prepare design requirements for framing

ELECTIVE UNITS

Select **seven (7)** units from Groups A, B and C as specified below.

Group A

Select a minimum of **four (4)** units from Group A.

Unit code	Unit title
ICPPR384A	Set up and produce basic digital print
MSFPPF2007	Assemble a basic artwork package
MSFPPF2008	Recognise and repair finishes of framing materials
MSFPPF3002	Decorate mat boards
MSFPPF3003	Set up and operate computer numerically controlled (CNC) machines for picture framing work
MSFPPF3004	Prepare textiles for framing

Unit code	Unit title
MSFPF3007	Apply frame finishes
MSFPF3008	Assemble a complex artwork package
MSFPF3009	Install artwork

Group B

Select up to **three (3)** units from Group B.

Unit code	Unit title
BSBCCO304C	Provide sales solutions to customers
BSBCUS301B	Deliver and monitor a service to customers
BSBITU306A	Design and produce business documents
BSBSMB303A	Organise finances for the micro business
BSBSMB305A	Comply with regulatory, taxation and insurance requirements for the micro business
BSBWOR301B	Organise personal work priorities and development
MSAPMSUP201A	Receive or despatch goods
MSFGN3002	Estimate and cost job

Group C

Up to **three (3)** relevant units may be chosen from units not already selected from Groups A and B, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 3 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF30802 Certificate III in Picture Framing. Outcomes are equivalent.

MSF30613 Certificate III in Soft Furnishing

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform soft furnishing sewing, selection, manufacture and installation of curtains and drapes and/or blinds with required fittings and may include production administration, quality assurance, sales and manufacture of bedspreads, linen and soft furnishing accessories.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30613 Certificate III in Soft Furnishing, competency must be achieved in **twenty (20)** units of competency.

- **six (6)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **six (6)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely

MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFSF2014	Use soft furnishing sector hand and power tools
MSFSF3008	Measure up and calculate fabric quantities for window coverings

ELECTIVE UNITS

Select **fourteen (14)** units from Groups A, B and C as specified below.

Select a minimum of **ten (10)** units from Groups A and B.

Group A - Manufacture

Unit code	Unit title
MSFSF2001	Cut single layer fabrics
MSFSF2002	Machine sew materials
MSFSF2003	Machine sew specialised sewn products
MSFSF2004	Hand sew soft furnishings
MSFSF2005	Operate a steam press
MSFSF2007	Construct unlined curtains and drapes
MSFSF2008	Construct lined curtains and drapes
MSFSF2009	Construct padded pelmets
MSFSF3001	Operate drop cutting machines
MSFSF3002	Use automated curtain pleating equipment
MSFSF3003	Follow patterns to produce window toppings
MSFSF3004	Construct Roman-style blinds
MSFSF3005	Construct Austrian festoon-style blinds
MSFSF3006	Chemically join textiles

MSFSF3007	Lay out patterns and cut fabrics
MSFSF3009	Manufacture bedspreads, bed linen and table cloths
MSFSF3012	Follow patterns to produce soft furnishing accessories

Group B - Installation

Unit code	Unit title
MSFSF2010	Make up tracks for window coverings
MSFSF2011	Fit and adjust curtain hardware
MSFSF2012	Fit and adjust interior blinds
MSFSF2013	Dress windows
MSFSF3011	Install motorised curtains and blinds

Group C

Up to **four (4)** relevant units may be chosen from:

- units not already selected from Groups A and B
- Group C units, below
- other units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 4 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Unit code	Unit title
BSBCUS301B	Deliver and monitor a service to customers
BSBITU306A	Design and produce business documents
BSBMKG413A	Promote products and services
MSAPMOPS212A	Use enterprise computer or data systems
MSAPMSUP201A	Receive or despatch goods

MSFFT4009	Match furnishing style materials to customer requirements
MSFFT4011	Purchase materials and consumables
MSFGN3002	Estimate and cost job
MSFSF3010	Advise customers on interior decoration
MSFSF3013	Provide technical advice to customers
MSS402020A	Apply quick changeover procedures
MSS402021A	Apply Just in Time procedures
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
TAEDEL301A	Provide work skill instruction
TLIA4032A	Organise transport of freight or goods

Qualification Mapping Information

Supersedes and is based on LMF30902 Certificate III in Soft Furnishing. Outcomes are equivalent.

MSF30713 Certificate III in Upholstery

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform upholstery, including dismantling and reassembling furniture; selecting, cutting, sewing and fitting fabric and leather upholstery materials; and producing loose covers. There is a specialist stream in production upholstery.

Specialisation is possible in this qualification depending on the electives chosen. A specialisation can be identified on the testamur where a minimum of two (2) Group A elective units of competency are achieved in production upholstery.

Where the production upholstery specialisation is achieved, RTOs should identify this as follows:

MSF30713 Certificate III in Upholstery
(specialising in Production Upholstery)

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30713 Certificate III in Upholstery, competency must be achieved in **twenty-five (25)** units of competency.

- **fourteen (14)** core units of competency
- **eleven (11)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **fourteen (14)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
MSFUP2001	Use upholstery sector hand and power tools
MSFUP2002	Fit upholstery components
MSFUP2004	Machine sew basic upholstery final cover materials
MSFUP2005	Develop cutting plan and cut single layer upholstery fabric
MSFUP2006	Dismantle and reassemble furniture for upholstering
MSFUP3002	Fit and apply final cover materials to furniture using basic techniques
TLID2003A	Handle dangerous goods/hazardous substances

ELECTIVE UNITS

Select **eleven (11)** units from Groups A, B and C as specified below.

Group A

Select a minimum of **two (2)** units from Group A.

Unit code	Unit title
-----------	------------

Production Upholstery Stream

MSFUP2003	Apply contemporary foundations to upholstered furniture
-----------	---

Unit code	Unit title
MSFUP3008	Apply finishing techniques to upholstered furniture

Upholstery Stream

MSFUP3010	Cut, sew and fit skirts to upholstered furniture
MSFUP3011	Cut, sew and fit or fill cushions

Group B

Select up to **nine (9)** units from Groups B and C.

Unit code	Unit title
MSFSF3010	Advise customers on interior decoration
MSFUP3001	Apply traditional foundations to upholstered furniture
MSFUP3003	Fit and apply final cover materials to furniture using decorative techniques
MSFUP3004	Lay out patterns and cut leather
MSFUP3005	Machine sew complex upholstery final cover materials
MSFUP3006	Fit and apply leather to furniture
MSFUP3007	Manufacture and fit loose covers
MSFUP3009	Develop cutting plan and cut multiple layer upholstery fabric
MSFUP3012	Apply marine sewing and installation techniques
MSFUP3013	Cut and sew canvas and acrylics
MSFUP3014	Set up, operate and maintain computer numerically controlled (CNC) cutting machines

Group C

Up to **six (6)** relevant units may be chosen from units not already selected from Groups A or B, or from units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 6 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF31002 Certificate III in Upholstery and LMF31102 Certificate III in Production Upholstery. Outcomes are equivalent. Additional elective units available.

MSF30813 Certificate III in Flooring Technology

Modification History

Release 3 - Two unit titles corrected for MSFFL3027 and MSFFL3039. No change in outcomes.

Release 2 - One imported elective unit updated with current release. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform flooring technology tasks, including preparing flooring surfaces, including polished concrete floors; and installing and finishing carpet, resilient, vinyl and timber flooring materials and polished concrete floors.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30813 Certificate III in Flooring Technology, competency must be achieved in **twenty-five (25)** units of competency.

- **eleven(11)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **eleven (11)** units from this list.

Unit code

Unit title

MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFL2001	Use flooring technology sector hand and power tools
MSFFL2002	Receive and prepare floor covering materials for installation
MSFFL3001	Plan and cost flooring technology work
MSFFL3002	Establish and maintain a safe flooring technology work environment
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
TLID2003A	Handle dangerous goods/hazardous substances

ELECTIVE UNITS

Select **fourteen (14)** units from Groups A, B and C as specified below.

Group A

Select a minimum of **nine (9)** units from Groups A and B with at least **four (4)** units being coded MSFFL****

Unit code	Unit title
-----------	------------

Carpets

MSFFL2017	Install carpet cushion underlays and gripper accessories
MSFFL2018	Install unpatterned tufted and bonded carpet floor coverings
MSFFL2019	Install carpet tiles using standard installation procedures
MSFFL2020	Install unpatterned tufted and bonded carpet floor coverings to stairs
MSFFL3005	Install carpet tiles using custom designs
MSFFL3006	Install adhesive fixed carpet floor coverings

Unit code	Unit title
MSFFL3007	Install commercial carpet floor coverings
MSFFL3008	Install patterned carpet floor coverings
MSFFL3009	Install custom design carpet and decorative finishes
MSFFL3010	Install synthetic floor coverings to sports facilities and outdoor spaces
MSFFL3011	Install carpet floor coverings to custom design stairs
Resilient	
MSFFL2021	Install lay flat vinyl floor coverings
MSFFL2022	Install resilient tiles using standard installation procedures
MSFFL3012	Install linoleum floor coverings
MSFFL3013	Install commercial vinyl floor coverings
MSFFL3014	Install resilient floor coverings using custom designs and decorative finishes
MSFFL3015	Install resilient tiles using custom design and decorative finishes
MSFFL3016	Install rubber floor coverings
MSFFL3017	Install resilient sheet to walls
MSFFL3018	Install resilient sheet to bench and countertops
MSFFL3019	Install anti-static resilient floor coverings
MSFFL3020	Install conductive resilient floor coverings
MSFFL3021	Cut and install resilient floor coverings to stairs
Coatings	
MSFFF3001	Match and make up colours
MSFFL3022	Mix and apply epoxy and seamless floor coverings
MSFFL3023	Apply solvent-based coatings to timber floors
MSFFL3024	Apply water-based coatings to timber floors
MSFFL3025	Apply oil-based coatings to timber floors

Unit code	Unit title
MSFFL3026	Apply composite-based coatings to timber flooring
MSFFL3027	Apply emulsion wax to timber flooring
MSFFL3028	Apply stains and fillers to timber flooring

Timber

MSFFL2004	Moisture test timber and concrete floors
MSFFL2015	Coarse sand timber flooring
MSFFL2023	Install laminate timber and bamboo flooring
MSFFL2024	Install engineered timber flooring
MSFFL2026	Nail strip timber flooring
MSFFL2027	Install expansion joints
MSFFL2028	Install mouldings and edge trims to timber floors
MSFFL3029	Adapt and apply custom designs to timber flooring
MSFFL3030	Cut and install timber flooring to stairs
MSFFL3031	Install direct stick timber flooring
MSFFL3032	Inspect defective timber flooring
MSFFL3033	Install block parquetry flooring
MSFFL3034	Install cork tiles
MSFFL3035	Install patterned parquetry flooring
MSFFL3036	Install mosaic parquetry flooring
MSFFL3037	Install sprung timber flooring
MSFFL3038	Install strip timber flooring onto battens
MSFFL3039	Install strip timber flooring onto plywood
MSFFL3040	Repair timber flooring
MSFFL3041	Maintain timber, laminate and engineered flooring

Sanding and Finishing

Unit code	Unit title
MSFFL3042	Fine sand timber flooring
MSFFL3043	Edge sand timber flooring
MSFFL3044	Sand cork flooring
MSFFL3045	Sand and fill parquet flooring
MSFFL3046	Apply finishes to cork flooring

Concrete Polishing	Prerequisites
CPCCCO3046A	Repair and rectify concrete *
MSFFL2008	Prepare concrete sub-floors using wet cleaning methods
MSFFL2011	Select, operate and maintain grinding equipment
MSFFL3047	Polish concrete floors using planetary machines
MSFFL3048	Select and fit diamond polishing tools for concrete surface preparation and polishing
MSFFL3049	Apply densifiers and sealers to concrete surfaces

Group B

Unit code	Unit title
BSBCUS301B	Deliver and monitor a service to customers
BSBSMB406A	Manage small business finances
CPCCOHS1001A	Work safely in the construction industry
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
CPCCW3002A	Apply waterproofing process to internal wet areas
MEM30031A	Operate computer-aided design (CAD) system to produce basic design elements

MSFFL2003	Select, operate and maintain floor covering cutting machine
MSFFL2005	Remove existing floor coverings
MSFFL2006	Prepare, select and apply smoothing and patching compounds
MSFFL2007	Select and apply appropriate compounds and additives
MSFFL2010	Prepare walls for covering
MSFFL2016	Install hard underlays
MSFFL2025	Install impact and sound absorption underlay
MSFFL3003	Inspect sub-floors
MSFFL3050	Provide advice to customers on flooring products
MSFFT4009	Match furnishing styles to customer requirements
MSS402051A	Apply quality standards
TAEDEL301A	Provide work skill instruction
TAEDEL404A	Mentor in the workplace

Group C

Up to **five (5)** relevant units may be chosen from units not already selected from Groups A or B, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 2 units), Certificate III level (maximum 5 units) or Certificate IV level (maximum 2 units).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF31208 Certificate III in Flooring Technology. Outcomes are not equivalent.

MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to design, construct, install and repair interior and exterior blinds and awnings and security screens and grilles using a range of materials, fixtures and fittings for residential and commercial premises.

Work is usually performed in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Specialisation is possible in this qualification depending on the electives chosen. A specialisation can be identified on the testamur where a minimum of five (5) Group A elective units of competency are achieved in blinds and awnings or a minimum of five (5) Group B elective units of competency are achieved in security screens and grilles.

Where a specialisation is achieved, RTOs should identify this as follows:

MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles
(specialising in Blinds and Awnings) or (specialising in Security Screens and Grilles)

Licensing applies in some jurisdictions for installation of blinds, awnings, security screens/grilles and shade sails. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles competency must be achieved in **twenty-five (25)** units of competency.

- **ten (10)** core units of competency
- **fifteen (15)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **ten (10)** units from this list.

Unit code	Unit title
BSBFLM303C	Contribute to effective workplace relationships
BSBPRO401A	Develop product knowledge
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSFBA2001	Use blinds, awnings, security screens and grilles sector hand and power tools
MSFGN2001	Make measurements and calculations
MSFGN2002	Move and store materials and products
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job

ELECTIVE UNITS

Select **fifteen (15)** units from Groups A, B, C and D as specified below.

Select a minimum of **five (5)** units from Groups A or B.

Group A – Blinds and Awnings

Unit code	Unit title
-----------	------------

MSFBA2002	Set up, operate and maintain blinds and awnings sector static machines
MSFBA2003	Select and apply blinds and awnings sector hardware and fixings
MSFBA2004	Construct roll-up and pull-down style blinds and awnings
MSFBA2005	Construct vertical-style blinds
MSFBA2006	Construct textiles for canopy-style awnings
MSFBA3001	Install interior blinds
MSFSF2001	Cut single layer fabrics
MSFSF2002	Machine sew materials

Group B – Security Screens and Grilles

Unit code	Unit title
HLTAID003	Apply first aid
MSFGG2001	Use glass and glazing hand and power tools
MSFGG2008	Glaze and re-glaze residential windows and doors
MSFGG2010	Fabricate and install insect and security screens
MSFSS2002	Prepare product for Australian Standards testing
MSFSS2003	Undertake surface preparation
MSFSS3001	Install security screens and grilles
MSFSS3002	Apply patterns and designs to security screens and grilles
MSFSS3003	Resolve quality and compliance issues

Group C

Select a minimum of **five (5)** units from Group C.

Blinds, Awnings and Shade Sail Installation

Unit code	Unit title	Prerequisites
AHCLSC308A	Install metal structures and features	
CPCCCM2002A	Carry out excavation	*
CPCCCO2013A	Carry out concreting to simple forms	*
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	
MSFBA3002	Install exterior blinds and awnings	
LMTGN2005B	Perform minor maintenance	
LMTTF2016A	Install products on and off-site	

Group D

Up to **five (5)** relevant units may be chosen from:

- units not already selected from Groups A, B and C
- units in Group D, below
- units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 2 units), Certificate III level (maximum 5 units) or Certificate IV level (maximum 2 units).

Units selected from other Training Packages and accredited courses via Group D must be relevant to the qualification outcome and not duplicate units available within this qualification.

Unit code	Unit title
BSBADM311A	Maintain business resources
BSBCUS301B	Deliver and monitor a service to customers
BSBFLM309C	Support continuous improvement systems and processes
BSBINN201A	Contribute to workplace innovation
BSBITU306A	Design and produce business documents
BSBPRO301A	Recommend products and services
BSBRKG304B	Maintain business records

Unit code	Unit title
CPCCCM3001C	Operate elevated work platforms
CPCCOHS1001A	Work safely in the construction industry
LMTTF3004A	Perform advanced welding of plastic materials
MSFBA2007	Construct plastic and timber Venetian-style blinds
MSFBA2008	Construct aluminium Venetian-style blinds
MSFBA2009	Construct metal louvre and canopy-hooded style awnings
MSFBA2010	Construct aluminium roll-up style awnings
MSFBA3003	Install timber shutters
MSFBA3004	Construct folding-arm style awnings
MSFBA3005	Construct framework for canopy-style awnings
MSFBA3006	Construct pleated-style blinds
MSFBA3007	Construct wood-weave style blinds
MSFBA3008	Construct pelmets
MSFBA3009	Provide advice to customers on blinds and awnings
MSFBA3010	Assess suitability of blinds or awnings
MSFFM2010	Set up, operate and maintain basic static machines
MSFSF3004	Construct Roman-style blinds
TLIA2011A	Package goods
TLIA2013A	Receive goods
TLIA3016A	Use inventory systems to organise stock control
TLIA2021A	Despatch stock
TLILIC2001A	Licence to operate a forklift truck
TLID2003A	Handle dangerous goods/hazardous substances
TLID1002A	Shift a load using manually operated equipment

Qualification Mapping Information

New qualification that supersedes and is based on LMF31608 Certificate III in Security Screens and Grilles and LMF31808 Certificate III in Blinds and Awnings. Outcomes are not equivalent.

MSF31013 Certificate III in Interior Decoration Retail Services

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to provide practical assistance and advice to customers on interior decorating in a retail, showroom or domestic environment.

The qualification reflects vocational outcomes for job roles in retailers/department stores and showrooms that provide products for interior decoration. It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF31013 Certificate III in Interior Decoration Retail Services, competency must be achieved in **thirteen (13)** units of competency.

- **four (4)** core units of competency
- **nine (9)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **four (4)** units from this list.

Unit code

Unit title

MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team

ELECTIVE UNITS

Select **nine (9)** units from Groups A, B and C as specified below.

Group A

Select **one (1)** unit from Group A.

Unit code	Unit title
MSFGN2001	Make measurements and calculations
MSFFL3001	Plan and cost flooring technology work
MSFSF3008	Measure up and calculate fabric quantities for window coverings

Group B

Select a minimum of **five (5)** units from Group B.

Unit code	Unit title
BSBCCO304C	Provide sales solutions to customers
BSBCMM301B	Process customer complaints
BSBCUS301B	Deliver and monitor a service to customers
BSBDES202A	Evaluate the nature of design in a specific industry context
BSBDES301A	Explore the use of colour
BSBDES305A	Source and apply information on the history and theory of design
BSBFIA301A	Maintain financial records
CPCCOHS1001A	Work safely in the construction industry

CUFDIG304A	Create visual design components
CUVACD301A	Produce drawings to communicate ideas
CUVACD302A	Produce computer-aided drawings
MSAPMSUP201A	Receive or despatch goods
MSFBA3009	Provide advice to customers on blinds and awnings
MSFFL2004	Moisture test timber and concrete floors
MSFFL3003	Inspect sub-floors
MSFFL3050	Provide advice to customers on floor coverings
MSFFT4009	Match furnishing styles and materials to customer requirements
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
MSFID3001	Source and specify decoration products
MSFID3002	Style a retail display
MSFSF3010	Advise customers on interior decoration
MSFSF3013	Provide technical advice to customers
MSS402051A	Apply quality standards
SIRRRPK010A	Recommend home and home improvement products and services
SIRXINV002A	Maintain and order stock
SIRXSLS201	Sell products and services
SIRXSLS303	Build relationships with customers
SITXMPR403	Plan and implement sales activities

Group C

Up to **three (3)** relevant units may be chosen from units not already selected in Groups A and B or units available in this Training Package or in other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III (maximum 3 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on, but extends, LMF31908 Certificate III in Interior Decoration (Retail Services). Outcomes are not equivalent.

MSF31113 Certificate III in Cabinet Making

Modification History

Release 2 - One unit title corrected for MSFFM3010. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification covers the skills and knowledge required to perform a range of skills at trade-level for those working in furniture making and those involved in the manufacture and installation of fitted furniture typically in a kitchen, bathroom and related context. Installation skills may be applied to new or renovation work. The work is in a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

There are two pathways offered within the Certificate III in Cabinet Making targeting the skill requirements of free-standing furniture makers and kitchen and bathroom cabinet makers and installers.

Qualification descriptors for this qualification will depend on the pathway selection. Those completing Pathway 1 will achieve a **MSF31113 Certificate III in Cabinet Making (Furniture)** and those completing Pathway 2 will achieve a **MSF31113 Certificate III in Cabinet Making (Kitchens and Bathrooms)**.

The MSS30312 Certificate III in Competitive Systems and Practices is available for employees at this level who already possess technical skills and who require additional manufacturing practice skills above those available in this qualification.

Depending on the state and territory where work is undertaken licensing may relate to this qualification where the candidate is required to work on-site assisting in kitchen and bathroom installation. The licensing requirement will usually involve construction induction training. Where licensing is required the unit *CPCCOHS1001A Work safely in the construction industry* should be selected. If no licensing requirement exists e.g. where all work will be off-site then the unit *MSAPMOHS200A Work safely* should be selected.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF31113 Certificate III in Cabinet Making, competency must be achieved in **twenty-eight (28)** units of competency.

- **six (6)** core units of competency
- **twenty-two (22)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **six (6)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFFM2001	Use furniture making hand and power tools
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents

ELECTIVE UNITS

Select **twenty-two (22)** units from Groups A to F as specified below.

Group A

Select a minimum of **one (1)** unit from Group A.

Unit code	Unit title
CPCCOHS1001A	Work safely in the construction industry
MSAPMOHS200A	Work safely

Group B

Select a minimum of **eight (8)** units from Groups B and D for **Pathway 1 - Furniture**

Unit code	Unit title
MSFFF2004	Prepare surfaces for finishing
MSFFM2002	Assemble furnishing components
MSFFM2005	Join solid timber
MSFFM2006	Hand make timber joints
MSFFM3002	Construct furniture using leg and rail method
MSFFM3005	Fabricate custom furniture
MSFFM3006	Install furnishing products

Group C

Select a minimum of **eight (8)** units from Group C and D for **Pathway 2 - Kitchens and Bathrooms**

Unit code	Unit title
MSFKB2001	Prepare for cabinet installation
MSFKB3001	Identify processes in kitchen and bathroom projects
MSFKB3002	Determine requirements for installation of cabinets
MSFKB3003	Check and measure fit of cabinets
MSFKB3004	Conduct on-site adjustments to cabinets and components
MSFKB3005	Fabricate cabinets for the built-in environment
MSFKB3006	Install fitted cabinets and components

Group D

Unit code	Unit title
BSBCUS301B	Deliver and monitor a service to customers

Unit code	Unit title
MSFFM2003	Select and apply hardware
MSFFM2010	Set up, operate and maintain basic static machines
MSFFM2011	Apply manufactured board conversion techniques
MSFFM3010	Prepare cutting list from plans and job specifications
MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres
MSFGN3002	Estimate and cost job
MSS402030A	Apply cost factors to work practices

Group E

Select a minimum of **eight (8)** units from Group E.

Unit code	Unit title
CUVACD302A	Produce computer-aided drawings
MSAPMOPS363A	Organise on-site work
MSAPMPER200C	Work in accordance with an issued permit
MSAPMSUP390A	Use structured problem solving tools
MSFFF2006	Apply surface coatings by spray gun
MSFFM2012	Set up, operate and maintain pressure and clamping machines
MSFFM3001	Construct chair and couch frames
MSFFM3003	Produce angled and curved furniture using manufactured board
MSFFM3004	Produce angled and curved furniture using solid timber
MSFFM3007	Prepare and apply decorative surfaces for furniture
MSFFM3008	Select timbers for furniture production

Unit code	Unit title
MSFFM3009	Produce manual and computer-aided production drawings
MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFFM3012	Set up, operate and maintain sawing machines
MSFFM3013	Set up, operate and maintain drilling machines
MSFFM3014	Set up, operate and maintain joining machines
MSFFM3015	Set up, operate and maintain planing and finishing machines
MSFFM3016	Set up, operate and maintain multi-head planing and moulding machines
MSFFM3017	Set up, operate and maintain routing and shaping machines
MSFFM3018	Set up, operate and maintain mechanical wood-turning lathes
MSFFM3019	Set up, operate and maintain automated edge banding machines
MSFFM3020	Fabricate synthetic solid surface products
MSFFM3023	Produce and maintain cutting tools
MSFFM3024	Construct jigs and fixtures
MSFFT4001	Coordinate on-site installation of furnishing products
MSFFT4007	Sample, inspect and test products to specifications
MSFFT4008	Interpret and use workplace information
MSFFT4009	Match furnishing style and materials to customer requirements
MSS402001A	Apply competitive manufacturing practices
MSS402002A	Sustain process improvements
MSS402010A	Manage the impact of change on own work
MSS402020A	Apply quick changeover procedures
MSS402021A	Apply Just in Time procedures
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability

Unit code	Unit title
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
TLID2003A	Handle dangerous goods/hazardous substances

Group F

Up to **five (5)** relevant units may be chosen from units not already selected from Groups A to E, or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 1 unit), Certificate III level (maximum 5 units) or Certificate IV level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group F must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF32109 Certificate III in Cabinet Making. Outcomes are equivalent.

MSF31213 Certificate III in Piano Technology

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to repair, rebuild, re-pin, re-string and tune upright and grand pianos.

Credit can be granted towards this qualification by those who have completed a relevant Certificate II Furnishing qualification, such as MSF20213 Certificate II in Furniture Finishing or achieved equivalent industry experience.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF31213 Certificate III in Piano Technology, competency must be achieved in **twenty-five (25)** units of competency.

- **five (5)** core units of competency
- **twenty (20)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices

Unit code	Unit title
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team
MSFGN2001	Make measurements and calculations

ELECTIVE UNITS

Select **twenty (20)** units from Groups A, B and C as specified below.

Group A

Select a minimum of **twelve (12)** units from Group A.

Unit code	Unit title	Prerequisites
MSFPT3001	Apply piano industry knowledge and work techniques	
MSFPT3002	Select materials for piano actions and key repairs	
MSFPT3003	Repair upright and grand piano actions, keys and pedals	
MSFPT3004	Rebuild upright and grand piano actions, keys and pedals	
MSFPT3005	Re-string and re-pin a piano	
MSFPT3006	Regulate actions, keys and pedals of upright pianos	
MSFPT3007	Regulate actions, keys and pedals of grand pianos	
MSFPT3008	Apply piano tuning theory and basic acoustics	
MSFPT3009	Develop control of tuning hammers	
MSFPT3010	Pitch raise a piano	
MSFPT3011	Tune unisons aurally to a beatless condition	
MSFPT3012	Tune octaves aurally to appropriate stretch	
MSFPT3013	Tune a temperament octave to produce an equally	

	tempered scale
MSFPT3014	Tune a piano aurally and electronically within time and accuracy constraints *
MSFPT3015	Voice a piano
MSFPT3016	Provide advice to customers on piano tuning and repairs

Group B

Select a minimum of **three (3)** units from Group B.

Unit code	Unit title
MSFFF2008	Apply surface coatings by hand
MSFFF3005	Enhance finishes
MSFFF3006	Repair and touch up surfaces
MSFFF3008	Apply traditional French polishing techniques
MSFFM2002	Assemble furnishing components
MSFFM2006	Hand make timber joints
MSFFM2010	Set up, operate and maintain basic static machines
MSFGN2002	Move and store materials and products
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job
TLID1002A	Shift a load using manually-operated equipment
TLID2003A	Handle dangerous goods/hazardous substances

Group C

Up to **five (5)** relevant units may be chosen from units not already selected from Groups A and B or units available in this Training Package or other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate II level (maximum 2 units), Certificate III level (maximum 5 units) or Certificate IV level (maximum 2 units).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF31508 Certificate III in Piano Technology. Outcomes are equivalent.

MSF31313 Certificate III in Kitchens and Bathrooms - Retail Services

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required by those working in the kitchen or bathroom industry providing limited technical advice to customers within a showroom or domestic environment. Advice will relate to a standardised range of kitchen or bathroom designs and fittings to meet client design requirements. It reflects vocational outcomes for those working in a sales environment providing technical and design information and advice on kitchen, bathroom, laundry or related products and design packages. Job roles, such as showroom sales assistants, customer liaison, and marketing officers, use sales and other customer liaison techniques with limited technical information on kitchen and bathroom products and services.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF31313 Certificate III in Kitchens and Bathrooms - Retail Services, competency must be achieved in **thirteen (13)** units of competency.

- **four (4)** core units of competency
- **nine (9)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **four (4)** units from this list.

Unit code	Unit title
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMOHS200A	Work safely
MSAPMSUP102A	Communicate in the workplace
MSAPMSUP106A	Work in a team

ELECTIVE UNITS

Select **nine (9)** units from Group A and B as specified below.

Group A

Select a minimum of **six (6)** units from Group A.

Unit code	Unit title
BSBCCO304C	Provide sales solutions to customers
BSBCMM301B	Process customer complaints
BSBCUS301B	Deliver and monitor a service to customers
BSBDES202A	Evaluate the nature of design in a specific industry context
BSBDES301A	Explore the use of colour
BSBDES305A	Source and apply information on the history and theory of design
BSBFIA301A	Maintain financial records
CPCCOHS1001A	Work safely in the construction industry
CUVACD301A	Produce drawings to communicate ideas
MEM16008A	Interact with computing technology
MSAPMSUP201A	Receive or despatch goods
MSFFT4009	Match furnishing styles and materials to customer requirements
MSFGN3001	Read and interpret work documents
MSFGN3002	Estimate and cost job

Unit code	Unit title
MSFID3001	Source and specify decoration products
MSFID3002	Style a retail display
MSFID4009	Research architectural styles and movements
MSFKB3001	Identify processes in kitchen and bathroom projects
MSFKB3007	Provide advice on cabinet design features
MSFKB3008	Identify cabinet construction and installation methods
MSS402051A	Apply quality standards
SIRRRPK010A	Recommend home and home improvement products and services
SIRXINV002A	Maintain and order stock
SIRXSLS303	Build relationships with customers

Group B

Up to **three (3)** relevant units may be chosen from units not already selected in Group A, or units available in this Training Package or in other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III level or Certificate IV level (maximum 1 Certificate IV unit).

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF32009 Certificate III in Kitchens and Bathrooms (Client Services). Outcomes are equivalent.

MSF40113 Certificate IV in Interior Decoration

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to provide advice and practical assistance on the finishing and furnishing of existing interior spaces to meet client requirements. Decoration at this level includes residential or commercial environments and involves working directly with the client or with associated professionals, such as architects, builders, retailers, interior designers and suppliers required to implement a project. It reflects vocational outcomes in retail, consulting and building businesses as interior decorators or colour consultants performing a broad range of skilled applications in furnishing, including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills.

This qualification is typically used to develop skills and a breadth, depth and complexity of knowledge in a range of decoration advice and services, including:

- research and analysis of the client's goals and requirements
- planning, designing and arranging space
- interior styling
- specifying finishes and furnishings
- selection of colours
- specifications and purchasing.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit *CPCCOHS1001A Work safely in the construction industry*. Local regulations should also be checked for requirements.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF40113 Certificate IV in Interior Decoration, competency must be achieved in **nineteen (19)** units of competency.

- **eight (8)** core units of competency
- **eleven (11)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **eight (8)** units from this list.

Unit code	Unit title
BSBDES302A	Explore and apply the creative design process to 2D forms
BSBDES303A	Explore and apply the creative design process to 3D forms
CUVACD301A	Produce drawings to communicate ideas
CUVACD303A	Produce technical drawings
MSAENV272B	Participate in environmentally sustainable work practices
MSFID4001	Research, analyse and apply colour for interior spaces
MSFID4002	Decorate residential interiors
MSFID4011	Determine work health and safety (WHS) implications of interior effects

ELECTIVE UNITS

Select **eleven (11)** units from Groups A and B as specified below.

Group A

Select a minimum of **seven (7)** units from Group A.

Unit code	Unit title
BSBCRT401A	Articulate, present and debate ideas

Unit code	Unit title
BSBCRT402A	Collaborate in a creative process
BSBDES301A	Explore the use of colour
BSBDES305A	Source and apply information on the history and theory of design
BSBDES401A	Generate design solutions
BSBDES403A	Develop and extend design skills and practice
BSBMGT402A	Implement operational plan
BSBSMB405B	Monitor and manage small business operations
BSBWOR204A	Use business technology
CPCCOHS1001A	Work safely in the construction industry
CUFDIG303A	Produce and prepare photo images
CUFDIG304A	Create visual design components
CUVACD302A	Produce computer-aided drawings
CUVDES405A	Research and apply techniques in spatial design
CUVILL401A	Research and apply techniques for illustrative work
MEM16006A	Organise and communicate information
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSFDN4001	Produce drawings from design concepts
MSFID3001	Source and specify decoration products
MSFID4003	Prepare a materials board for client presentation
MSFID4004	Research and recommend furniture and accessories
MSFID4005	Research and recommend soft furnishings for interiors
MSFID4006	Research and recommend hard materials and finishes for interiors
MSFID4007	Identify materials, construction techniques and methods used in building interiors
MSFID4008	Assess interior light and recommend light fittings

Unit code	Unit title
MSFID4009	Research architectural styles and movements
MSFID4010	Research interior decoration and design influences

Group B

Up to **four (4)** relevant units can be chosen from units not already selected from Group A, or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III level (maximum 1 unit), Certificate IV level (maximum 4 units) or Diploma level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group B must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF40408 Certificate IV in Interior Decoration. Outcomes are equivalent.

Links

Companion Volume implementation guides are found in VETNet -

MSF40213 Certificate IV in Furniture Design and Technology

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform design of furniture and the application of the design into a finished furniture product. This qualification is streamlined to reflect three complementary occupational outcomes in the areas of:

1. Fine furniture making - with a focus on skills required to design and produce individual fine furniture for display or custom production.
2. Furniture design - with a focus on skills required to design furniture for volume production.
3. Furniture production - with a focus on purchasing, quality assurance and specialist techniques

This is a senior qualification with scope for entry from relevant trade and non-trade backgrounds.

This qualification is typically used to develop skills and a breadth, depth and complexity of knowledge in a range of furniture making, design and production techniques. The work would cover a broad range of varied activities or applications in a wide variety of contexts, most of which are complex and non-routine. Leadership and guidance would be involved when organising self and others as well as contributing to technical solutions of a non-routine or contingency nature.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF40213 Certificate IV in Furniture Design and Technology, competency must be achieved in **nineteen (19)** units of competency.

- **five (5)** core units of competency

- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MEM16006A	Organise and communicate information
MEM16007A	Work with others in a manufacturing, engineering or related environment
MSAENV272B	Participate in environmentally sustainable work practices
MSFFDT4011	Research and select furniture materials and technology
MSFFDT4012	Research furniture styles and movements

ELECTIVE UNITS

Select **fourteen (14)** units from Groups A to E as specified below.

Group A

Select **one (1)** unit from Group A.

Unit code	Unit title
-----------	------------

Stream 1: Fine Furniture Making and Furniture Production

BSBOHS404B	Contribute to the implementation of strategies to control OHS risk
------------	--

Stream 2: Furniture Design

MSFFDT4006	Determine work health and safety (WHS) implications of designs
------------	--

Select a minimum of **eight (8)** units from Group B, C or D with at least **five (5)** units being coded MSF*****

Group B – Fine Furniture Making

Unit code	Unit title
BSBDES301A	Explore the use of colour
BSBPMG522A	Undertake project work
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
CUFDIG303A	Produce and prepare photo images
CUVACD303A	Produce technical drawings
MSFDN4003	Produce patterns and templates
MSFFDT4001	Apply finishing techniques to custom furniture
MSFFDT4002	Assemble custom furniture
MSFFDT4005	Construct and evaluate furniture prototypes and samples
MSFFDT4008	Produce and evaluate developmental furniture models to scale
MSFFDT4009	Set up, operate and maintain basic static woodworking machines for furniture designs
MSFFDT4013	Select, use and maintain hand tools for the creation of custom furniture
MSFFDT4014	Set up and operate a wood-turning lathe to produce off-centre work
MSFFDT4015	Produce templates and jigs for custom-made furniture
MSFFM4001	Hand carve wood to custom design
MSFFM4002	Construct joints for custom furniture
MSFFM4003	Produce curved and shaped components for custom furniture
MSFFM4004	Produce timber veneered components for custom furniture
MSFFT4010	Identify and calculate production costs

Group C – Furniture Design

Unit code	Unit title	Prerequisites
BSBCRT401A	Articulate, present and debate ideas	
BSBCRT402A	Collaborate in a creative process	
BSBCRT403A	Explore the history and social impact of creativity	
BSBCRT501A	Originate and develop concepts	
BSBDES303A	Explore and apply the creative design process to 3D forms	
BSBDES305A	Source and apply information on the history and theory of design	
BSBDES401A	Generate design solutions	
BSBDES403A	Develop and extend design skills and practice	
BSBDES502A	Establish, negotiate and refine a design brief	
BSBSMB407A	Manage a small team	
CUFDIG304A	Create visual design components	
CULMS010B	Contribute to the preservation of cultural material	
CUVACD302A	Produce computer-aided drawings	
MEM15001B	Perform basic statistical quality control	
MEM16006A	Organise and communicate information	
MEM16007A	Work with others in a manufacturing, engineering or related environment	
MEM16008A	Interact with computing technology	
MEM16013A	Operate in a self-directed team	*
MEM30024A	Participate in quality assurance techniques	*
MEM30031A	Operate computer-aided design (CAD) system to produce basic drawing elements	

MEM30033A	Use computer-aided design (CAD) to create and display 3-D models	*
MSFDN4001	Produce drawings from design concepts	
MSFFDT4003	Assess and record the lifecycle of a product	
MSFFDT4004	Assess environmental impact of a design	
MSFFDT4007	Prepare and present furniture design information	
MSFFDT4010	Research and select furniture finishes	
MSFFT4009	Match furnishing style and materials to customer requirements	
MSS402030A	Apply cost factors to work practices	
MSS403030A	Improve cost factors in work practices	

Group D – Furnishing Technology

Unit code	Unit title
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSFAH4001	Advise on security technology, hardware and services
MSFAH4002	Prepare door hardware schedules
MSFDN4002	Produce line and component production drawings
MSFDN4004	Design, construct and test jigs
MSFDN4005	Work within a furniture design team
MSFFT4001	Coordinate on-site installation of furnishing products
MSFFT4002	Customise stock lines
MSFFT4003	Organise production processes
MSFFT4004	Establish and monitor production inventory requirements
MSFFT4005	Install and commission computer numerically controlled (CNC) software

MSFFT4006	Construct prototypes and samples
MSFFT4007	Sample, inspect and test products to specifications
MSFFT4008	Interpret and use workplace information
MSFFT4011	Purchase materials and consumables
MSFFT4012	Prepare a tender submission
MSFPPF4001	Design and construct ornamental frames
MSFPPF4002	Determine and apply gilding techniques

Group E

Up to **five (5)** relevant units can be chosen from other units not already selected from Groups B, C or D, or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III level (maximum 1 unit), Certificate IV level (maximum 5 units) or Diploma level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group E must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF40508 Certificate IV in Furniture Design and Technology and LMF40202 Certificate IV in Furnishing Technology. Outcomes are not equivalent.

MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to design kitchens, bathrooms and interior spaces to meet client requirements. It targets those designing kitchens, bathrooms and other interior spaces that typically feature built-in cabinetry and furniture. Employment outcomes include small business operators in kitchen and bathroom design or product supply, and specialist design personnel. Work involves a broad range of skilled applications, including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills.

This qualification is typically used to develop specialist kitchen and bathroom design skills. However, units in the qualification also support the application of design skills to other interior spaces. It is suitable for those working in the kitchens and bathroom industries, or with furnishing, joinery or cabinet making skills, in order to prepare them for providing a design service in these industries.

Work may require access to construction sites and require construction induction training and certification covered by the unit *CPCCOHS1001A Work safely in the construction industry*. Local regulations should also be checked for requirements.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces, competency must be achieved in **twenty (20)** units of competency:

- **thirteen (13)** core units of competency
- **seven (7)** elective units of competency

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Select all **thirteen (13)** units from this list.

Unit code	Unit title
BSBDES401A	Generate design solutions
CPCCOHS1001A	Work safely in the construction industry
MSFDN4001	Produce drawings from design concepts
MSFFDT4004	Assess environmental impact of a design
MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFID4001	Research, analyse and apply colour for interior spaces
MSFID4007	Identify materials, construction techniques and methods used in building interiors
MSFID5005	Explore and apply creative design principles to interior space
MSFKB3001	Identify processes in kitchen and bathroom projects
MSFKB3008	Identify cabinet construction and installation methods
MSFKB4003	Identify and document services required to support fitted furniture designs
MSFKB4006	Prepare quotation and contract documentation for design project
MSFKB4007	Design ancillary residential cabinetry

ELECTIVE UNITS

Select **seven (7)** units of competency:

- **two (2)** units must be chosen from **either** Group A **or** Group B
- **five (5)** units may be selected from Group A, B or C

Group A - Kitchen Specialisation

Unit code	Unit title
-----------	------------

Unit code	Unit title
MSFKB4001	Determine spatial planning considerations for kitchen designs
MSFKB4002	Research and recommend materials, components and finishes for kitchen designs

Group B - Bathroom Specialisation

Unit code	Unit title
MSFKB4004	Determine spatial planning considerations for bathroom design
MSFKB4005	Research and recommend materials, components and finishes for bathroom designs

Group C

Unit code	Unit title
BSBCRT401A	Articulate, present and debate ideas
BSBCUS402B	Address customer needs
BSBDES305A	Source and apply information on the history and theory of design
CUVDES405A	Research and apply techniques in spatial design
MEM16006A	Organise and communicate information
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSAPMSUP390A	Use structured problem solving tools
MSFFM3009	Produce manual and computer-aided production drawings
MSFFT4007	Sample, inspect and test products to specifications
MSFFT4008	Interpret and use workplace information
MSFFT4009	Match furnishing style and materials to customer requirements
MSFID4003	Prepare a materials board for client presentation

Unit code	Unit title
MSFID4008	Assess interior light and recommend light fittings
MSFID4009	Research architectural styles and movements
MSFID4011	Determine work, health and safety (WHS) implications of interior effects
MSFKB3003	Check and measure fit of cabinets
MSFKB3007	Provide advice on cabinet design features
MSFKB4008	Determine layout for laundry components

Group D

Up to **three (3)** relevant units can be chosen from units not already selected from Group A, B or C or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III level (maximum 1 unit), Certificate IV level (maximum 3 units) or Diploma level (maximum 1 unit).

Units selected from other Training Packages and accredited courses via Group D must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF40609 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces. Outcomes are equivalent.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

MSF40413 Certificate IV in Glass and Glazing

Modification History

Release 2 - One unit title corrected for MSF40407. Prerequisite for MSS404050A identified and included in elective Group D. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform in a range of specialist and/or leadership roles, including sales, scheduling, design, production control and quality assurance functions, in a glass and glazing enterprise. This is a senior qualification with scope for entry from trade and non-trade backgrounds with relevant glass industry experience.

Leadership job roles include higher tradesperson (post-trade), factory-based leading hands/supervisors or site supervisors in glass processing, glazing or architectural glass functions in residential and commercial operations. The roles could include requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of leadership and guidance to others in the application and planning of glass and glazing skills. The qualification has elective options in sales and estimating, production planning, scheduling, stock control and procurement.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

This qualification may be accessed by direct entry and it is an industry expectation that it will be undertaken primarily by those who have completed the MSF30413 Certificate III in Glass and Glazing qualification or achieved equivalent industry experience.

Packaging Rules

To be awarded the MSF40413 Certificate IV in Glass and Glazing, competency must be achieved in **eighteen (18)** units of competency.

- **four (4)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **four (4)** units from this list.

Unit code	Unit title
-----------	------------

BSBMGT401A	Show leadership in the workplace
------------	----------------------------------

BSBWHS401A	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
------------	--

MSAENV472B	Implement and monitor environmentally sustainable work practices
------------	--

MSFGG4001	Apply standards and codes of practice for the glass industry
-----------	--

ELECTIVE UNITS

Select a minimum of **ten (10)** units from Groups A, B, C, D and E as specified below.

Group A – Sales and Estimating

Unit code	Unit title
-----------	------------

BSBCUS402B	Address customer needs
------------	------------------------

BSBCUS501C	Manage quality customer service
------------	---------------------------------

BSBPMG409A	Apply project scope management techniques
------------	---

BSBPRO401A	Develop product knowledge
------------	---------------------------

BSBSLS408A	Present, secure and support sales solutions
------------	---

CPCCBC4012B	Read and interpret plans and specifications
-------------	---

MSFFT4012	Prepare a tender submission
-----------	-----------------------------

MSFGG4002	Use glass industry data systems
-----------	---------------------------------

MSS402031A	Interpret product costs in terms of customer requirements
------------	---

Group B – Production and Scheduling

Unit code	Unit title
CPCCBC4005A	Produce labour and material schedules for ordering
MSAPMSUP201A	Receive or despatch goods
MSFFT4007	Sample, inspect and test products to specifications
MSFFT4010	Identify and calculate production costs
MSFFT4011	Purchase materials and consumables
MSFGG4003	Manage glass industry production scheduling
TLIA4028A	Assess and monitor optimum stock levels
TLIA4032A	Organise transport of freight or goods

Group C - Technical

Unit code	Unit title
MEM16006A	Organise and communicate information
MEM16008A	Interact with computing technology
MEM30031A	Operate computer-aided design (CAD) system to produce basic design elements
MSFDN4003	Produce patterns and templates
MSFDN5001	Generate and transfer complex computer-aided drawings and specifications
MSFFM3009	Produce manual and computer-aided production drawings
MSFGG4004	Perform laser measurement and levelling for glass windows and doors in buildings
MSFGG4005	Set up, configure, upgrade and troubleshoot glass and glazing plant and ancillary equipment
MSFGG4006	Operate complex glass industry control systems

MSFGG4007 Manage glass processing plant shutdown and re-start

Group D – Leading and Supervising

Unit code	Unit title
BSBWOR402A	Promote team effectiveness
ICPSU455C	Supervise and schedule the work of others
MSFGG4008	Undertake planning and coordination for commercial glazing installation operations
MSS403021A	Facilitate a Just in Time system
MSS404050A	Undertake process capability improvements*
MSS404052A	Apply statistics to operational processes
TAEDEL404A	Mentor in the workplace
TAEDEL402A	Plan, organise and facilitate learning in the workplace

Group E

Up to **four (4)** relevant units can be chosen from other units not already selected from Groups A to D or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate III level (maximum 1 unit), Certificate IV level (maximum 4 units) or Diploma level (maximum 1 unit).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

No equivalent qualification

MSF50113 Diploma of Stained Glass and Leadlighting

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform advanced design manufacture, repair and installation of stained glass and leadlighting, including heritage conservation. It reflects vocational outcomes for those performing design and manufacture of stained glass and leadlighting job roles, including heritage conservation. Work involves self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF50113 Diploma of Stained Glass and Leadlighting, competency must be achieved in **twenty-five (25)** units of competency.

- **eleven (11)** core units of competency
- **fourteen (14)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **eleven (11)** units from this list.

Unit code	Unit title
HLTAID003	Apply first aid

Unit code	Unit title
MEM05003B	Perform soft soldering
MSAENV272B	Participate in environmentally sustainable work practices
MSFGG2001	Use glass and glazing sector hand and power tools
MSFGG3001	Store and handle glass
MSFGG3014	Construct and repair leadlight panels
MSFGG4001	Apply standards and codes of practice for the glass industry
MSFSL2001	Assemble leadlight and stained glass components
MSFSL3002	Protect stained glass and leadlighting
MSFSL3003	Fabricate and install residential leadlight and stained glass windows and doors
MSFSL3004	Prepare and install architectural engineered leadlight and stained glass

ELECTIVE UNITS

Select **fourteen (14)** units from Groups A, B, C and D as specified below.

Group A

At least **one (1)** unit must be selected from Group A.

Unit code	Unit title
MSFSL5001	Assess conservation requirements
MSFSL5002	Remove heritage leadlight and stained glass
MSFSL5003	Conserve heritage leadlight and stained glass
MSFSL5004	Install heritage leadlight and stained glass
MSFSL5005	Apply innovation in contemporary leadlight and stained glass

Group B

At least **four (4)** units must be selected from Group B.

Unit code	Unit title
CULMS010B	Contribute to the preservation of cultural material
CUVACD301A	Produce drawings to communicate ideas
CUVCAL401A	Experiment with techniques to produce calligraphy
CUVDES405A	Research and apply techniques in spatial design
CUVGRD401A	Research and apply graphic design techniques
CUVICS04B	Originate and develop a concept
CUVPRP405A	Develop and discuss ideas for own creative work
MSFDN4001	Produce drawings from design concepts
MSFDN4002	Produce line and component production drawings
MSFDN4003	Produce patterns and templates
MSFDN5001	Generate and transfer complex computer-aided drawings and specifications

Group C

At least **four (4)** units must be selected from Group C.

Unit code	Unit title
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBSMB407A	Manage a small team
MSAENV472B	Implement and monitor environmentally sustainable work practices

Group D

Up to **five (5)** relevant units may be chosen from units in Groups A, B and C not already selected, or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate IV level (maximum 2 units), Diploma level (maximum 5 units) or Advanced Diploma level (maximum 3 units).

Units selected from other Training Packages and accredited courses via Group D must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF50311 Diploma of Stained Glass and Lead Lighting.
Outcomes are equivalent.

MSF50213 Diploma of Interior Design and Decoration

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required to perform design and decoration advice for building interiors. Design and decoration at this level covers the development of complete decorative schemes for the effective use of residential and commercial or institutional interior spaces, working with a client brief and within project parameters. It may also include specialist design areas, such as facilities for people with disabilities and the aged. Vocational outcomes include:

- self-employment as an interior decorator, colour consultant or interior stylist
- in-house interior designer or decorator for design and decoration consultancies, furniture, furnishings and fabric suppliers, furnishing departments of retail stores or shop fitters.

This qualification is typically used to develop a breadth, depth and complexity of skills and knowledge covering furnishings, finishes and aesthetic presentation to meet the purpose, efficiency and comfort of the space and encourage the principles of environmental sustainability. It covers a detailed understanding of the application and effect of colour and pattern in interior space and the application of historic furnishing styles and their relationship to architectural periods and heritage projects to provide a full range of decoration services, consultation and design advice, including:

- researching and analysing the client's goals and requirements
- planning, arranging and styling the space, and preparing detailed client presentations
- selecting and specifying colour schemes, furniture, fabrics and fixtures, including layouts and detailed specifications
- preparing design documentation for specialty floor coverings, fabrics and wall finishes
- working with builders, architects and service contractors to advise on changes to the interior structure
- producing documentation for shop fitters, cabinet makers, furniture suppliers and materials suppliers
- preparing documentation for power and communications locations, reflected ceiling plans and lighting designs that reflect an understanding of basic building protocols
- providing contract documentation for the pricing, procurement and installation of materials and furniture
- organising the purchasing of materials, accessories, artwork and furnishings
- contracting and supervising tradespeople required to implement a project.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit *CPCCOHS1001A Work safely in the construction industry*. Local regulations should also be checked for requirements.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF50213 Diploma of Interior Design and Decoration, competency must be achieved in **twenty-nine (29)** units of competency.

- **ten (10)** core units of competency
- **nineteen (19)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **ten (10)** units from this list.

Unit code	Unit title
BSBDES302A	Explore and apply the creative design process to 2D forms
BSBDES303A	Explore and apply the creative design process to 3D forms
BSBDES502A	Establish, negotiate and refine a design brief
CUVACD301A	Produce drawings to communicate ideas
CUVACD303A	Produce technical drawings
MSAENV272B	Participate in environmentally sustainable work practices
MSFID4001	Research, analyse and apply colour for interior spaces
MSFID4002	Decorate residential interiors

MSFID4011	Determine work, health and safety (WHS) implications of interior effects
MSFID5003	Evaluate site for interior design brief

ELECTIVE UNITS

Select **nineteen (19)** units from Groups A, B, C and D as specified below.

Group A

Select **one (1)** unit from Group A.

Unit code	Unit title
MSFID5001	Design residential interiors
MSFID5002	Develop a decoration proposal for a complex site

Group B

Select a minimum of **five (5)** units from Group B.

Unit code	Unit title	Prerequisites
CPCCBBC4037A	Prepare drawing for heritage works	
BSBCRT501A	Originate and develop concepts	
BSBDES304A	Source and apply design industry knowledge	
BSBPMG522A	Undertake project work	
CUFANM303A	Create digital 3D models	
CUFDIG507A	Design digital simulations	
MSFFDT5003	Develop self as a furniture designer	
MSFID5004	Specify structural elements, systems and services for interior spaces	*
MSFID5005	Explore and apply creative design methodology to interior space	

Unit code	Unit title	Prerequisites
MSFID5006	Design interior lighting	*
MSFID5007	Decorate for events	
MSFID5008	Design for people with disabilities and the elderly	
MSFID5009	Research and recommend colour and applied finishes	
MSFID5010	Provide interior styling service	
MSFID5011	Specify soft furnishings for complete interior solution	
MSFID5012	Research and recommend artwork	
MSFID5013	Design for small to medium scale commercial or institutional interiors	
MSFID5014	Use CAD applications to complete models and documentation for interior design projects	
MSFID5015	Decorate interiors for restoration projects	
MSS015002A	Develop strategies for more sustainable use of resources	
SIRRMER512	Produce perspective drawings, plans and elevations	
SIRRMER020A	Create and implement exhibition space	

Group C

Select a minimum of **eight (8)** units from Group C.

Unit code	Unit title
BSBCRT401A	Articulate, present and debate ideas
BSBCRT402A	Collaborate in a creative process
BSBDES301A	Explore the use of colour
BSBDES305A	Source and apply information on the history and theory of design
BSBDES401A	Generate design solutions
BSBDES403A	Develop and extend design skills and practice

BSBMGT402A	Implement operational plan
BSBSMB405B	Monitor and manage small business operations
BSBWOR204A	Use business technology
CPCCOHS1001A	Work safely in the construction industry
CUFDIG303A	Produce and prepare photo images
CUFDIG304A	Create visual design components
CUVACD302A	Produce computer-aided drawings
CUVDES405A	Research and apply techniques in spatial design
CUVILL401A	Research and apply techniques for illustrative work
MEM16006A	Organise and communicate information
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSFDN4001	Produce drawings from design concepts
MSFFDT4012	Research furniture styles and movements
MSFID3001	Source and specify decoration products
MSFID4003	Prepare a materials board for client presentation
MSFID4004	Research and recommend furniture and accessories
MSFID4005	Research and recommend soft furnishings for interiors
MSFID4006	Research and recommend hard materials and finishes for interiors
MSFID4007	Identify materials, construction techniques and methods used in building interiors
MSFID4008	Assess interior light and recommend light fittings
MSFID4009	Research architectural styles and movements
MSFID4010	Research interior decoration and design influences

Group D

Up to **five (5)** relevant units can be chosen from other units not already selected from Groups A, B and C, or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate IV level (maximum 2 units), Diploma level (maximum 5 units) or Advanced Diploma level (maximum 2 units).

Units selected from other Training Packages and accredited courses via Group D must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF50408 Diploma of Interior Design and Decoration. Outcomes are equivalent.

MSF50313 Diploma of Furniture Design and Technology

Modification History

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required where the design of furniture and the application of the design into a finished furniture product is the central focus. This qualification reflects two primary occupational outcomes in the areas of furniture design and technology - with a potential to focus on skills required to design and produce furniture for custom or volume production.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF50313 Diploma of Furniture Design and Technology, competency must be achieved in **twenty-three (23)** units of competency.

- **five (5)** core units of competency
- **eighteen (18)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MSAENV472B	Implement and monitor environmentally sustainable work practices

Unit code	Unit title
MSFFDT4011	Research and select furniture materials and technology
MSFFDT4012	Research furniture styles and movements
MSFFDT5003	Develop self as a furniture designer
MSFFDT5010	Evaluate furniture design proposals and concepts

ELECTIVE UNITS

Select **eighteen (18)** units from Groups A, B or C as specified below.

Group A

Select at least **eight (8)** units from Group A, including a minimum of **five (5)** units coded MSF*****

Unit code	Unit title	Prerequisites
BSBCRT501A	Originate and develop concepts	
BSBDES403A	Develop and extend design skills and practice	
BSBDES502A	Establish, negotiate and refine a design brief	
BSBDES601A	Manage design realisation	
BSBMKG501B	Evaluate marketing opportunities	
BSBPMG522A	Undertake project work	
CUFANM303A	Create digital 3D models	
MSFFDT4006	Determine work health and safety (WHS) implications of designs	
MSFFDT5001	Apply ergonomics, anthropometrics and proxemic considerations to a product	
MSFFDT5002	Assess and resolve technical integrity of a design	
MSFFDT5004	Construct custom furniture using advanced techniques	
MSFFDT5005	Design a batch or limited production item of furniture	

MSFFDT5006	Design a furniture product using high volume technology services (HVTs) in production	
MSFFDT5007	Design a one-off item of furniture	
MSFFDT5008	Research and recommend alternative manufacturing processes	
MSFFDT5009	Research and recommend machine technology	
MSFFDT5011	Assess economic impact of a design	
MSFFDT5012	Design for mass production	
MSFFDT5013	Evaluate and participate in design industry networks	
MSFFDT5014	Investigate legal requirements for design	
MSFFDT5015	Work collaboratively on a design project	
MSFFT5001	Evaluate and select production materials and equipment	
MSFFT5004	Develop and document procedures and specifications	
MSFFT5008	Develop, trial and evaluate prototypes	
MSFFT5009	Determine production feasibility of designs	
MSS015002A	Develop strategies for more sustainable use of resources	
MSS402030A	Apply cost factors to work practices	
MSS404050A	Undertake process capability improvements	*
MSS404052A	Apply statistics to processes in manufacturing	
MSS405031A	Undertake value analysis of product costs in terms of customer requirements	

Group B

Select at least **four (4)** units from Group B. A minimum of **two (2)** units must be units coded MSF*****

Unit code	Unit title	Prerequisites
BSBCRT401A	Articulate, present and debate ideas	
BSBCRT402A	Collaborate in a creative process	
BSBINM501A	Manage an information or knowledge management system	
BSBWHS504A	Manage WHS hazards and risks	
MEM15001B	Perform basic statistical quality control	
MEM16006A	Organise and communicate information	
MEM16007A	Work with others in a manufacturing, engineering or related environment	
MEM16008A	Interact with computing technology	
MEM16013A	Operate in a self-directed team	*
MEM30024A	Participate in quality assurance techniques	*
MEM30031A	Operate computer-aided design (CAD) system to produce basic design elements	
MEM30033A	Use computer-aided design (CAD) to create and display 3-D models	*
MSFDN5001	Generate and transfer complex computer-aided drawings and specifications	
MSFFT5002	Establish and develop production processes and area layout	
MSFFT5003	Manage installation and commissioning of equipment	
MSFFT5005	Organise enterprise maintenance programs	
MSFFT5006	Plan production	
MSFFT5007	Optimise computer numerically controlled (CNC) operations	
MSFFT5010	Develop products and related processes	
PSPPROC506A	Plan to manage a contract	

Unit code	Unit title	Prerequisites
PSPPROC503B	Manage contract performance	

Group C

Up to **six (6)** relevant units can be chosen from other units not already selected from Groups A and B, or units available in this Training Package, other endorsed Training Packages and accredited courses. Those units must be aligned at Certificate IV level (maximum 2 units), Diploma level (maximum 6 units) or Advanced Diploma level (maximum 2 units).

Units selected from other Training Packages and accredited courses via Group C must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF50508 Diploma of Furniture Design and Technology and LMF50202 Diploma of Furnishing Technology. Outcomes are not equivalent.

MSF60113 Advanced Diploma of Interior Design

Modification History

Release 2 - Unit title for MSFID6001 corrected. No change in outcomes.

Release 1 - New qualification

Qualification Description

This qualification describes the skills and knowledge required for creative and technical solutions for built interior environments. Interior design at this level covers the planning and detailing of complex residential, commercial and institutional design projects with an emphasis on space creation, space planning and the factors that affect peoples' responses to living and working environments. It may also include specialist design areas, such as facilities for people with disabilities, institutional design, exhibitions, the aged and adaptive re-use projects. Vocational outcomes include interior designers for interior design and architectural practices, self-employed design consultants, design project administrators and design managers. Work involves using a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specified functions. Accountability and responsibility for self and others in achieving outcomes is involved.

This qualification is typically used to develop a breadth, depth and complexity of skills and knowledge for interior design processes which follow a systematic and coordinated methodology, including research, analysis and integration of knowledge into the creative process, and knowledge of the principles of interior design and building technologies. Designs must meet the purpose, efficiency, comfort, safety and aesthetic requirements of interior spaces, adhere to regulatory requirements and encourage the principles of environmental sustainability.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit *CPCCOHS1001A Work safely in the construction industry*. Local regulations should also be checked for requirements.

Entry Requirements

Not applicable

Packaging Rules

To be awarded the MSF60113 Advanced Diploma of Interior Design, competency must be achieved in **thirty-nine (39)** units of competency.

- **fourteen (14)** core units of competency
- **twenty-five (25)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

CORE UNITS

Complete all **fourteen (14)** units from this list.

Unit code	Unit title
BSBDES302A	Explore and apply the creative design process to 2D forms
BSBDES303A	Explore and apply the creative design process to 3D forms
BSBDES502A	Establish, negotiate and refine a design brief
BSBDES601A	Manage design realisation
CUVACD301A	Produce drawings to communicate ideas
CUVACD303A	Produce technical drawings
MSAENV272B	Participate in environmentally sustainable work practices
MSFID4001	Research, analyse and apply colour for interior spaces
MSFID4011	Determine work, health and safety (WHS) implications of interior effects
MSFID5001	Design residential interiors
MSFID5003	Evaluate site for interior design brief
MSFID5013	Design for small to medium scale commercial or institutional interiors
MSFID6001	Resolve complex spatial design problems through modelling
MSFID6002	Apply 3-D visualisation techniques to represent interior designs

ELECTIVE UNITS

Select **twenty-five (25)** units from Groups A, B, C and D as specified below.

Group A

Select at least **five (5)** units from Group A.

Unit code	Unit title	Prerequisites
BSBDES602A	Research global design trends	
CUFANM302A	Create 3D animations	
CUFANM502A	Create digital 3D environments	
MSFFDT5013	Evaluate and participate in design industry networks	
MSFFDT5014	Investigate legal requirements for design	
MSFID5002	Develop a decoration proposal for a complex site	
MSFID6003	Design for large scale commercial or institutional interiors	
MSFID6004	Design interiors for hospitality environments	
MSFID6005	Design for retail interiors	
MSFID6006	Design for conservation and restoration projects	
MSFID6007	Select and instruct contractors and consultants	
MSFID6008	Evaluate design project outcomes	
MSFID6009	Produce digital presentations for commercial projects	*

Group B

Select at least **six (6)** units from Group B.

Unit code	Unit title	Prerequisites
BSBCRT501A	Originate and develop concepts	
BSBDES304A	Source and apply design industry knowledge	

Unit code	Unit title	Prerequisites
BSBPMG522A	Undertake project work	
CPCCBC4037A	Prepare drawing for heritage works	
CUFANM303A	Create digital 3D models	
CUFDIG507A	Design digital simulations	
MSFFDT5003	Develop self as a furniture designer	
MSFID5004	Specify structural elements, systems and services for interior spaces	*
MSFID5005	Explore and apply creative design methodology to interior space	
MSFID5006	Design interior lighting	*
MSFID5007	Decorate for events	
MSFID5008	Design for people with disabilities and the elderly	
MSFID5009	Research and recommend colour and applied finishes	
MSFID5010	Provide interior styling service	
MSFID5011	Specify soft furnishings for complete interior solution	
MSFID5012	Research and recommend artwork	
MSFID5014	Use CAD applications to complete models and documentation for interior design projects	
MSFID5015	Decorate interiors for restoration projects	
MSS015002A	Develop strategies for more sustainable use of resources	
SIRRMER020A	Create and implement exhibition space	
SIRRMER512	Produce perspective drawings, plans and elevations	

Group C

Select at least **seven (7)** units from Group C.

Unit code	Unit title
BSBCRT401A	Articulate, present and debate ideas
BSBCRT402A	Collaborate in a creative process
BSBDES301A	Explore the use of colour
BSBDES305A	Source and apply information on the history and theory of design
BSBDES401A	Generate design solutions
BSBDES403A	Develop and extend design skills and practice
BSBMGT402A	Implement operational plan
BSBSMB405B	Monitor and manage small business operations
BSBWOR204A	Use business technology
CPCCOHS1001A	Work safely in the construction industry
CUFDIG303A	Produce and prepare photo images
CUFDIG304A	Create visual design components
CUVACD302A	Produce computer-aided drawings
CUVILL401A	Research and apply techniques for illustrative work
CUVDES405A	Research and apply techniques in spatial design
MSFID3001	Source and specify decoration products
MSFID4003	Prepare a materials board for client presentation
MSFID4004	Research and recommend furniture and accessories
MSFID4005	Research and recommend soft furnishings for interiors
MSFID4006	Research and recommend hard materials and finishes for interiors
MSFID4007	Identify materials, construction techniques and methods used in building interiors
MSFID4008	Assess interior light and recommend light fittings
MSFID4009	Research architectural styles and movements

Unit code	Unit title
MSFID4010	Research interior decoration and design influences
MEM16006A	Organise and communicate information
MSAENV672B	Develop workplace policy and procedures for sustainability

Group D

Up to **seven (7)** relevant units can be chosen from other units not already selected from Groups A, B and C; units available in this Training Package; other endorsed Training Packages and accredited courses. Those units must be aligned at Diploma level (maximum 3 units) or Advanced Diploma level (maximum 7 units).

Units selected from other Training Packages and accredited courses via Group D must be relevant to the qualification outcome and not duplicate units available within this qualification.

Qualification Mapping Information

Supersedes and is based on LMF60208 Advanced Diploma of Interior Design. Outcomes are equivalent.

AHCLSC308A Install metal structures and features

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of installing metal structures and features as a component of landscape project works and defines the standard required to: plan and set out a site for the installation; prepare and cut metal components; assemble and erect structure; check quality of work and clean up site.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to the installation of metal structures and features as a component of landscape project works.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare work	<p>1.1.Plans and specifications are interpreted and clarified with the supervisor.</p> <p>1.2.The quantity and quality of materials are checked to ensure they conform to design drawings and specifications.</p> <p>1.3.Tools and equipment are selected and checked for serviceability according to enterprise guidelines.</p> <p>1.4.Occupational Health and Safety (OHS) hazards are identified, risks assessed and controls implemented.</p> <p>1.5.Environmental implications of installing metal structures are identified and reported to the supervisor.</p>
2. Set out the site for the structure	<p>2.1.Services are determined and located from site plans.</p> <p>2.2.The position of the structure or feature is marked out according to design drawings and specifications.</p> <p>2.3.Profiles are established to conform to the tolerances nominated within the design drawings and specifications.</p> <p>2.4.Footings are excavated and prepared according to the type of structure or feature to be installed.</p>
3. Prepare and cut metal components	<p>3.1.Components are laid out ready for assembly to the requirements contained in the design drawings and specifications.</p> <p>3.2.The length of components and the positions of joins are marked out according to designated specifications in design drawings.</p> <p>3.3.Cutting tools are selected, used and maintained</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to manufacturer's recommendations and OHS specifications.</p> <p>3.4. Components are cut and joined in preparation for assembly.</p>
4. Assemble and erect structure	<p>4.1. Metal components are assembled into position and fixed into place according to design drawings and specifications.</p> <p>4.2. Remaining components are installed and fixed into position according to design drawings and specifications.</p> <p>4.3. Structure is finished off to ensure all components are secure and complete.</p> <p>4.4. Coatings are applied according to specifications, manufacturer's recommendations and OHS guidelines.</p>
5. Check quality of work and clean up site	<p>5.1. Quality of finished work is inspected to ensure the standard of the finished structure or feature is in accordance with design drawings and specifications.</p> <p>5.2. Debris is cleaned from structure and site according to enterprise guidelines.</p> <p>5.3. Waste material is disposed of in an environmentally aware and sensitive manner.</p> <p>5.4. Unused metal components are stored for future re-use according to enterprise guidelines.</p> <p>5.5. Tools and equipment are cleaned and stored according to enterprise guidelines.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- measure and mark lengths of metal components accurately
- join and cut metal components using different techniques and methods
- use some surveyor's instruments
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible

REQUIRED SKILLS AND KNOWLEDGE

- information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
 - use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- surveying principles and techniques
- the correct use of hand and power tools and other OHS requirements associated with installing structures and features
- comparative environmental implications associated with excavation and construction activity.

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- plan and set out a site for the installation
- prepare and cut metal components
- assemble and erect structure
- check quality of work and clean up site.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Installation may include:

- fences
- handrails
- screens
- seats
- bollards
- playground equipment
- rubbish bins
- plant surrounds
- sculptures
- other ornamental features.

BSBADM311A Maintain business resources

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to determine, administer and maintain resources and equipment to complete a variety of tasks.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of business resources and their maintenance to provide technical advice and support to a team.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Advise on resource requirements	<p>1.1. Calculate estimates of future and present <i>business resource needs</i> in accordance with <i>organisational requirements</i></p> <p>1.2. Ensure advice is clear, concise and relevant to achievement of organisational requirements</p> <p>1.3. Provide information on the most economical and effective choice of equipment, materials and suppliers</p> <p>1.4. Identify resource shortages and possible impact on operations</p>
2. Monitor resource usage and maintenance	<p>2.1. Ensure resource handling is in accordance with established organisational requirements including <i>occupational health and safety requirements</i></p> <p>2.2. Use <i>business technology</i> to monitor and identify the effective use of resources</p> <p>2.3. Use consultation with individuals and teams to facilitate effective decision making on the appropriate allocation of resources</p> <p>2.4. Identify and adhere to relevant <i>policies regarding resource use</i> in the performance of operational tasks</p> <p>2.5. Routinely monitor and compare resource usage with estimated requirements in budget plans</p>
3. Acquire resources	3.1. Ensure acquisition and storage of resources is in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with organisational requirements, is cost effective and consistent with organisational timelines</p> <p>3.2. Acquire resources within available time lines to meet identified requirements</p> <p>3.3. Review <i>resource acquisition processes</i> to identify improvements in future resource acquisitions</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and understand organisation's policies and procedures; to write simple instructions for a particular routine task
- evaluation skills to diagnose faults and to monitor resource usage
- problem-solving skills to determine appropriate fault repair actions
- numeracy skills to calculate resource expenditure
- technology skills to select and use technology appropriate to a task.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational resource acquisition policies, plans and procedures
- functions of a range of business equipment
- organisational procedures for record keeping/filing systems, security and safe recording practices.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> collecting and recording data on resource use observing resource use over defined and operational timeframes carrying out routine maintenance knowledge of organisational resource acquisition policies, plans and procedures.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to an actual workplace or simulated environment access to office equipment and resources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate review of documentation estimating future and present business resource needs analysis of responses to case studies and scenarios demonstration of techniques oral or written questioning to assess knowledge of equipment maintenance procedures review of information provided on the most economical and effective choice of equipment, materials and suppliers evaluation of documentation reviewing resource acquisition processes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other general administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Business resources</i> may include:	<ul style="list-style-type: none"> • equipment • facilities • human resources • raw materials • software • stock and supplies
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • access and equity principles and practice • business and performance plans • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • management and accountability channels • manufacturer's and operational specifications • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals • security and confidentiality requirements
<i>Occupational health and safety requirements</i> may include:	<ul style="list-style-type: none"> • decision making delegations • equipment use • first aid kit • medical attention • reporting requirements • site access
<i>Business technology</i> may include:	<ul style="list-style-type: none"> • computer applications • computers • modems • personal schedules • photocopiers
<i>Policies regarding resource use</i>	<ul style="list-style-type: none"> • budgeting limits

RANGE STATEMENT	
may include:	<ul style="list-style-type: none"> • ordering procedures • purchasing authorities • recruitment and personnel • time management • transport/travel policies
<i>Resource acquisition processes</i> may include:	<ul style="list-style-type: none"> • contracted supplier ordering • internal approvals • non-tendered processes • periodic forecasts • tendered processes

BSBCCO304C Provide sales solutions to customers

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures. Escalation of contact incorporated in range statement.</p> <p>Replaces BSBCCO304B Provide sales solutions to customers.</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to process sales enquiries requiring complex solutions and to follow up to ensure customer satisfaction.

Competence in this unit requires effective customer service and sales skills, and the provision of the required levels of sales support for customers. It may involve performing credit checks and using systems and technology at varying levels.

Application of the Unit

This unit applies in inbound and outbound customer contact environments where sales are an element of the role.

The work is undertaken with some supervision and guidance.

Sales may include up-sell or cross-sell activities, as well as new sales or retention activities, such as re-contracting or applying loyalty programs.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Identify customer needs	1.1 Question customers in detail and listen actively to determine product and service requirements 1.2 Verify and agree customer needs with the customer 1.3 Access existing customer records and offer technical and specialist advice to customer, where such advice is considered beneficial to the closing of the sale and customer understanding and decision making 1.4 Identify customer's financial limitations 1.5 Discuss estimates and quotes with team and specialist staff if necessary, prior to submission to customer
2. Respond to customer needs	2.1 Prepare, present and discuss estimates and quotes with customer, as the role permits 2.2 Explain fully benefits of the various options and pricing structures to the customer 2.3 Give customer the opportunity to question options and quotes provided 2.4 Promote advantages of dealing with the organisation 2.5 Manage customer objections effectively by promoting specific benefits
3. Close sales	3.1 Agree on product or service to be purchased with the customer 3.2 Establish customer's preferred purchase and payment arrangements 3.3 Finalise documentation relating to sale and forward to customer

	for agreement and signature 3.4 Negotiate and arrange payment method with customer 3.5 Conduct appropriate credit checks 3.6 Clearly record delivery/installation arrangements as agreed with customer 3.7 Comply with relevant legislation, codes, regulations and standards during the contact and sale
4. Input sales records	4.1 Fully record details of sale 4.2 Amend existing customer records where appropriate 4.3 Initiate invoices according to organisational policy 4.4 Organise delivery/installation according to organisational policy
5. Provide sales support where required	5.1 Verify customer satisfaction after delivery/installation 5.2 Identify additional action to satisfy customer needs 5.3 Initiate action in an efficient and timely manner

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to communicate with internal and external customers
- customer service and sales skills to operate within sales environment
- literacy skills to clearly articulate information and advice
- negotiation skills to work with difficult contacts or situations
- numeracy skills to accurately analyse and validate data
- planning and organising skills to manage own tasks within required timeframes
- problem-solving skills to apply a range of problem-solving strategies
- self-management skills to:
 - comply with policies and procedures
 - evaluate and monitor own performance
 - have confidence in own ideas
 - seek learning and development opportunities
 - work in a team environment.

Required knowledge

- estimate and quote procedures
- marketing and sales principles and practices
- organisational pricing policies
- organisational protocols associated with customer service and sales
- statutory, regulatory and legislative requirements relating to providing sales solutions to customers.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • match product or service to customer need • clearly explain prices relating to product or service offered • apply appropriate credit checks • arrange customer payments • reach agreement with customers as to payment and delivery arrangements • record sales, payments and delivery arrangements.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • relevant standards, guidelines and legislation • workplace information and data • relevant resources • work environment or simulated customer contact centre to observe interaction with customers.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • direct observation of interaction with customers • review of record of sale and customer satisfaction • review of agreed payment methods and credit checks • oral and/or written questioning to assess knowledge of security and operational systems and organisational requirements.

Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBCCO301B Use multiple information systems • BSBCUS301B Deliver and monitor a service to customers.

BSBCMM301B Process customer complaints

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCMM301A Process customer complaints</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to handle formal and informal negative feedback and complaints from customers. Operators may exercise discretion and judgement using appropriate knowledge of products, customer service systems and organisational policies to provide technical advice and support to a team.

Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various customer service contexts.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Respond to complaints	<p>1.1 Process <i>customer complaints</i> using <i>effective communication</i> according to organisational procedures established under organisational policies, legislation or codes of practice</p> <p>1.2 Obtain, <i>document and review reports relating to customer complaints</i></p> <p>1.3 Make decisions about customer complaints, taking into account applicable legislation, organisational policies and codes</p> <p>1.4 Negotiate resolution of the complaint and obtain agreement where possible</p> <p>1.5 Maintain a register of complaints/disputes</p> <p>1.6 Inform customer of the outcome of the investigation</p>
2. Refer complaints	<p>2.1 Identify complaints that require referral to other personnel or external bodies</p> <p>2.2 Make <i>referrals</i> to appropriate personnel for follow-up in accordance with individual level of responsibility</p> <p>2.3 Forward all documents and investigation reports</p> <p>2.4 Follow-up appropriate personnel to gain prompt decisions</p>
3. Exercise judgement to resolve customer service issues	<p>3.1 Identify implications of issues for customer and organisation</p> <p>3.2 Analyse, explain and negotiate appropriate options for resolution with customer</p> <p>3.3 Propose viable options in accordance with appropriate legislative requirements and enterprise policies</p> <p>3.4 Ensure matters for which a solution cannot be negotiated are referred to appropriate personnel</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to:
 - interpret customer complaints
 - monitor and advise on customer service strategies and resolutions
- communication skills to:
 - people with diverse abilities
 - relate to people from culturally diverse backgrounds
- literacy skills to:
 - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
 - prepare general information and papers according to target audience
 - read and understand a variety of texts
- problem-solving skills to:
 - apply organisational procedures to a range of situations
 - deal with customer enquiries or complaints
 - exercise judgement in this application
- self-management skills to:
 - comply with policies and procedures
 - consistently evaluate and monitor own performance
 - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- importance of good communication skills and the individual's role in processing customer complaints
- organisational procedures and standards for processing complaints and recommending appropriate action.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • applying judgement in the application of industry and/or organisational procedures • working with customer complaints • knowledge of organisational procedures and standards for processing complaints.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of customer complaints • examples of documents relating to customer complaints policies and procedures.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • oral or written questioning to assess knowledge of individual's role in processing customer complaints • review of documentation outlining necessary reports relating to customer complaints • review of complaints/disputes register.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse ideas for communication to others	1.1. Distil <i>key themes, messages and positions</i> to aid in clarity of thought and presentation 1.2. Reflect on <i>different ways of communicating ideas</i> for different purposes and to different people 1.3. Identify the enabling skills and attributes of <i>individuals</i> who can effectively participate in discussions about ideas
2. Provoke response and reaction	2.1. Explore and use <i>different techniques to engage, fascinate and involve others</i> in the process of communication and exchange 2.2. Explore the ways that storytelling can be used to communicate ideas 2.3. Create <i>innovative approaches to different communication challenges</i> 2.4. Be prepared to take <i>risks</i> in the way ideas are

ELEMENT	PERFORMANCE CRITERIA
	presented 2.5. Identify <i>specific ways to provoke and encourage response</i> in particular individuals or groups
3. Debate and discuss ideas	3.1. Present and argue <i>substantiated positions</i> on ideas 3.2. Be open to critical analysis of own ideas and to the ideas of others 3.3. Identify and participate in conversations that challenge and explore different concepts and approaches, and generate new ideas 3.4. Respond to questions about ideas with confidence and relevant information 3.5. Reflect on and appraise the views of others, and use to refine ideas and to embrace new ideas

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to present ideas in ways that engage and provoke response, and to debate and discuss potentially complex concepts
- creative thinking skills to develop responses and new ideas in response to feedback
- learning and self-management skills to actively seek feedback and to learn from others
- literacy skills to develop and interpret information dealing with complex ideas.

Required knowledge

- creative and different ways of expressing and communicating ideas, and of making an opportunity pitch
- different ways in which individuals receive and respond to ideas and information, and what influences their response
- nature and role of risk taking in the presentation and debate of ideas
- role of storytelling in communicating ideas and key storytelling techniques
- techniques to tailor comments to particular audiences.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> creative and articulate presentations that provoke interest and response active and confident participation in critical debate and discussion of ideas.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> presentations to others about ideas discussion and debate with others about ideas.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

RANGE STATEMENT

conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Key themes, messages and positions may relate to:

- essence of the idea
- influences on the idea
- relationship of idea to established tradition or practice
- relationship of idea to new and emerging technology
- problems and challenges with the idea
- reasons why the idea should be supported
- selling a creative team
- selling creative ideas
- selling self as a creative person
- way the idea was developed
- who had developed the idea and why

Different ways of communicating ideas may be:

- aural
- group presentation/pitch
- in a forum
- in elevators
- one-on-one discussion
- on planes
- oral
- remote (e.g. video conferencing)
- visual

Individuals may be:

- colleagues
- community members
- friends
- gallery owners
- interviewers (media)
- investors
- mentors
- panels
- peers
- students
- supervisors or managers

Different techniques to engage, fascinate and involve others may include:

- blogging
- media releases
- multimedia presentations
- music

RANGE STATEMENT	
	<ul style="list-style-type: none"> • photography • storytelling • viral marketing • visual depictions
<i>Innovative approaches to communication challenges</i> may involve ability to:	<ul style="list-style-type: none"> • get across all key messages in a short time • present on unfamiliar topic • respond to impromptu situations • structure information quickly and effectively
<i>Specific ways to provoke and encourage response</i> may include:	<ul style="list-style-type: none"> • use of engaging objects to explain idea
<i>Risks</i> may involve:	<ul style="list-style-type: none"> • acknowledging own limits and difficulties • asking for help • breaking out of accepted norms • divulging personal information or vulnerabilities • failing and learning from it • incorporating humour • taking a fun approach with a potentially serious audience
<i>Substantiated positions</i> may be positions which are:	<ul style="list-style-type: none"> • grounded in appropriate research • result of rational and logical thought • subjected to the analysis of others (e.g. peer review) • supported by relevant information

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Enter into a collaborative creative process	<p>1.1. Adopt a <i>personal philosophy of trustworthy and ethical behaviour</i></p> <p>1.2. Maximise the possibilities of sustaining creative partnerships through trustworthy and ethical behaviour</p> <p>1.3. Use <i>professional discretion and judgement</i> in dealing with others</p> <p>1.4. Acknowledge and respect the <i>different ways that different people may contribute</i> to the creative process</p> <p>1.5. Acknowledge and work within the legal framework that applies to creative content as part of individual commitment to an ethical approach</p> <p>1.6. Respect collaborative efforts by relinquishing individual ownership of ideas</p>
2. Engage in a collaborative creative	2.1. Maintain a <i>belief in personal ideas</i> , combined with a willingness to move on as ideas are discarded and

ELEMENT	PERFORMANCE CRITERIA
process	<p>others evolve</p> <p>2.2. Be prepared to let go of own vanity and ego to allow new ideas to emerge</p> <p>2.3. Use <i>language</i> and adopt a <i>demeanour</i> that demonstrates respect and trust for others</p> <p>2.4. Listen to, value, respect and trust the contributions of others as material to work with rather than positions to argue against</p> <p>2.5. Challenge, test and share ideas in a supportive way as part of the creative process</p> <p>2.6. Move on from initial positions and preconceptions to accept and embrace new and unpredictable ideas as they emerge during the creative process</p> <p>2.7. Play a role that encourages the <i>movement and shift of ideas</i> within the group towards a well-conceived solution</p>
3. Reflect on own role in the collaborative creative process	<p>3.1. Reflect on own level of participation, relationships with others and personal behaviour in the collaborative process</p> <p>3.2. Identify ways to do better next time and follow up on any issues that need to be resolved</p> <p>3.3. Identify and seek opportunities to refine and expand own skills and knowledge, including learning from failing</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to nurture trust, to model open and supportive communication, and to articulate potentially complex ideas
- creative thinking skills to generate and explore ideas
- learning and self-management skills to reflect on and enhance own ability to contribute effectively to a collaborative creative process
- problem-solving skills to continually be evaluating and challenging ideas and moving them forward towards solutions.

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

- concept of shared intellectual property from collaborative creativity
- concepts of trust and ethical behaviour in the context of creative endeavour
- different roles people may play in a collaborative creative process and how this contributes to the overall effort
- how the creative process works in different situations (e.g. as an individual, as part of a group)
- how the potential for creativity can be maximised within a team
- legal framework that affects copyright, moral rights and intellectual property issues
- what stops creativity in a group environment.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- positive and full participation in a collaborative creative process that generates, expands and develops ideas into a well-conceived solution
- communication and creative-thinking skills that make a positive contribution to the collaborative effort
- knowledge and understanding of the ethical framework in which any type of creative endeavour operates.

Context of and specific resources for assessment

Assessment must ensure:

- involvement of a team of people in the collaborative creative process.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • direct observation of the candidate participating in collaborative creative activity • interviews with others participating in the process to determine the nature and quality of the candidate's participation and interactions • evaluation of candidate presentation (verbal or written) on the collaborative process, including challenges, benefits and key learning for the future • oral or written questioning to assess knowledge of concepts of trust and ethical behaviour in the context of creative endeavour.
Guidance information for assessment	<p>A collaborative creative effort always occurs in a specific context. Therefore holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended. Assessors must, however, retain a strong focus on the key aspects of collaboration and creativity detailed in this unit. Combined assessment with the following unit would also be appropriate:</p> <ul style="list-style-type: none"> • BSBCRT301A Develop and extend critical and creative thinking skills.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Personal philosophy of trustworthy and ethical behaviour</i> may relate to:</p>	<ul style="list-style-type: none"> • acknowledging discomfort or anger • being prepared to fully participate • communicating in an open way • honesty • honouring commitments • sensitivity to social, cultural, personal situations and dynamics • showing respect • understanding of the consequences of actions

RANGE STATEMENT	
<i>Professional discretion and judgement</i> may relate to:	<ul style="list-style-type: none"> • assessing when to keep quiet • being aware of and responding to different personality types • knowing when it is appropriate or inappropriate to share information • knowing with whom information should be shared
<i>Different ways that different people may contribute</i> may relate to:	<ul style="list-style-type: none"> • different approaches to expressing opinions or ideas • inclinations to lead or follow • influence with others • interpersonal skills • networks • past experience • technical skills and expertise
<i>Belief in personal ideas</i> may be demonstrated by:	<ul style="list-style-type: none"> • backing ideas up with information and rationale • being prepared to argue for own ideas • confidence in own ability to create many ideas • confidence to share ideas • confident articulation of ideas • spending time developing and refining own ideas
<i>Language</i> that demonstrates respect for others may involve:	<ul style="list-style-type: none"> • acknowledging new ideas and effort • avoiding negative words • avoiding personal negatives like 'you cannot' or 'you should not' • choosing words wisely • listening • making differentiations between ideas and people • managing tone • speaking at a level appropriate to the listener
<i>Demeanour</i> that demonstrates respect for others may relate to:	<ul style="list-style-type: none"> • avoiding intellectual bullying • encouraging others to express ideas • facial expression • keeping a positive mindset • listening before speaking • physical position • refraining from blame or accusation

RANGE STATEMENT	
	<ul style="list-style-type: none"> • other non-verbal behaviour • understanding the balance between constructive comment and attention seeking
<i>Movement and shift of ideas</i> may involve:	<ul style="list-style-type: none"> • building in 'what if' scenarios • encouraging a stocktake before moving forward • making connections between seemingly disparate ideas • refining ideas that seem positive • returning to earlier ideas • returning to key objectives • suggesting new processes • turning ideas 'on their head' to resolve blockages

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate the history of creativity	1.1. Identify relevant <i>sources of information</i> on the history of creativity 1.2. Investigate and review different definitions of creativity and how these relate in an historical context 1.3. Assess the ways that individuals and collaborative groups have demonstrated creativity 1.4. Explore the relationship between creativity and different cultures and relate these to current contexts
2. Assess the impacts of creativity	2.1. Explore the <i>impacts of creativity</i> on the ways that people live and work 2.2. Explore the ways in which creativity has occurred in <i>different fields of human endeavour</i> 2.3. Determine and evaluate the <i>factors that affect the presence or extent of creativity</i> in a given situation
3. Evaluate the potential for enhancing	3.1. Extract key information and ideas from the history of creativity for possible relevance to own life and

ELEMENT	PERFORMANCE CRITERIA
creativity in own life	<p>work</p> <p>3.2. Discuss and explore ideas with others</p> <p>3.3. Reflect on how creativity or creative thinking might be integrated into own life and work</p> <p>3.4. Identify and access <i>opportunities to build own creative thinking skills</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss and explore ideas about creativity with others
- comprehension skills to interpret information dealing with potentially complex ideas.

Required knowledge

- impact of creativity at different points in history, including contemporary perspectives
- potential links between the history of creativity and current individuals and communities
- sources of information on the history and social impact of creativity
- ways in which different factors impact on creativity and how it is demonstrated in various cultural contexts.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate

Evidence of the following is essential:

- knowledge and understanding of the history and

EVIDENCE GUIDE	
competency in this unit	social impact of creativity, including its contemporary relevance to individuals and communities.
Context of and specific resources for assessment	Assessment must ensure: <ul style="list-style-type: none"> access to sources of information on the history of creativity.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of candidate's exploration of creativity and its impact, demonstrated through oral or written presentation oral or written questioning to assess knowledge of creativity in an historical and contemporary context review of identification of opportunities to build own creative thinking skills.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> artistic works (visual, aural, oral) arts co-operatives clubs friends and family internet printed references and texts production teams

RANGE STATEMENT	
<i>Impacts of creativity</i> may include:	<ul style="list-style-type: none"> • archaeological discoveries • botanical/anthropological discoveries • change in nature of communication between individuals and communities • changed relationships between gender and generations • changes in style • conservative versus adventurous culture and social mindset • improvement in living conditions • new products and services • reduced costs • scientific discoveries • sudden or gradual political change • totally new ways of undertaking tasks
<i>Different fields of human endeavour</i> may be:	<ul style="list-style-type: none"> • agriculture • arts • science • subsistence - primitive societies • technology
<i>Factors that affect the presence or extent of creativity</i> may include:	<ul style="list-style-type: none"> • culture • economic • environmental • family • friends • political • right time and place • social
<i>Opportunities to build own creative thinking skills</i> may include:	<ul style="list-style-type: none"> • attendance at seminars • participation in creative activities • reviewing and adapting own communication skills • using new approaches to work • working in creative communities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to individuals who originate and develop concepts of some complexity and progress that concept to the point where it can be implemented. Individuals may be employed by organisations, be sub contractors or consultants brought in by companies to work on specific projects, or be individuals or part of a team working independently.</p> <p>Concepts could be developed for any business or community activity or process such as marketing campaigns, staff development programs, information technology and communication systems. This unit is also highly relevant to practitioners in the creative industries who develop products such as advertising campaigns, radio and television programs, entertainment events, films, exhibitions and digital media products.</p> <p>A person undertaking this role would operate with a high degree of autonomy and at a senior level if working within an organisation. However, the process of generating concepts and ideas is collaborative in nature.</p> <p>Skills associated with writing proposals to support concept development are covered in BSBWRT401A Write complex documents.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate and explore needs and opportunities	<p>1.1. Research and evaluate <i>existing information that informs new concept development</i></p> <p>1.2. Where appropriate, identify and use gaps in current range of <i>products, programs, processes or services</i> as the catalyst for generating new ideas or concepts</p> <p>1.3. Expand the potential of new ideas through <i>exploration of opportunities beyond the obvious</i></p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4. Identify factors that could have an impact on ideas or concepts to be developed, including potential for commercialisation</p> <p>1.5. Determine whether other players are filling identified gaps or investigating similar opportunities</p> <p>1.6. Develop preliminary ideas on innovative and different ways to address needs and opportunities</p> <p>1.7. In consultation with relevant stakeholders, agree on broad parameters for developing ideas and concepts to meet market requirements</p>
2. Develop a range of creative approaches	<p>2.1. Use a range of creative thinking techniques to generate innovative and creative concepts to address identified needs</p> <p>2.2. Challenge, test and experiment with different concepts and ideas as part of a collaborative process</p> <p>2.3. Evaluate concepts in terms of their suitability for the target audience or purpose, their feasibility and their commercial potential</p> <p>2.4. Take account of social, ethical and environmental issues as concepts and ideas are generated and discussed</p> <p>2.5. Identify resources required to achieve desired creative and innovative outcomes</p> <p>2.6. Evaluate the effectiveness of different strategies for achieving desired outcomes</p> <p>2.7. Select concepts or approaches that achieve required outcomes in an innovative and feasible way</p> <p>2.8. Present proposed concepts or approaches in an appropriate format</p>
3. Refine concepts	<p>3.1. Ensure concept development process is open to ongoing refinement and testing</p> <p>3.2. Seek input and feedback on concepts from relevant stakeholders</p> <p>3.3. Seek specialist advice on creative and technical aspects of proposals as required</p> <p>3.4. Compare concepts with best practice examples of similar products, programs, processes or services</p> <p>3.5. Use a range of creative and practical criteria to determine the advantages and disadvantages of different concepts</p> <p>3.6. Evaluate constraints on the realisation of concepts or ideas</p>

ELEMENT	PERFORMANCE CRITERIA
	3.7.Refine proposals based on analysis and feedback
4. Develop concepts to an operational level	<p>4.1.Use refined concepts as the basis for developing detailed <i>implementation specifications</i></p> <p>4.2.Present specifications to relevant parties for approval, funding or endorsement</p> <p>4.3.Reflect on methodology used to generate concepts and ideas and note ways of improving this in the future</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and teamwork skills to work collaboratively on ideas and to articulate the rationale for concepts in ways that promote constructive discussion with others
- creative thinking skills to generate a range of innovative concepts and ideas, to use lateral thinking and to take a visionary approach to developing concepts and ideas
- initiative and enterprise skills to pro-actively identify market requirements
- planning and organising skills to take account of practical issues for concept implementation
- self-management skills to meet deadlines.

Required knowledge

- broad context in which concepts are being developed
- cultural, social and environmental issues and impacts to be considered in developing new concepts
- issues and requirements to commercialise the concept
- legal requirements that affect work in a given industry context
- practical and operational issues to be considered in a specific work or community context
- range of broad practical and operational issues that determine whether a concept can be implemented (in any context)
- techniques for generating creative ideas and solutions, and for translating these ideas into workable concepts.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of at least two concepts, substantiated and supported with sufficient information to allow for implementation to occur • generation of concepts and ideas that provide innovative solutions to identified issues • knowledge of legal requirements that affect work in a given industry context.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to the full range of background information required to evaluate the operational factors that will affect the implementation of concepts • interaction with others to reflect the collaborative nature of the concept development process.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of concepts generated by the candidate, of the processes used to generate and test the ideas and the material developed to support the concept • debate and discussion with the candidate to assess knowledge of the operational context and the broader factors that impact on concept development • evaluation of presentation or 'pitch' made by the candidate in relation to a particular concept • oral or written questioning to assess knowledge of cultural, social and environmental issues and impacts to be considered in developing new concepts.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Existing information that informs new concept development</i> may include:</p>	<ul style="list-style-type: none"> • creative brief • market research • organisational vision • personal vision and creative aspiration
<p><i>Products, programs, processes or services</i> may include:</p>	<ul style="list-style-type: none"> • art and craft works • advertising campaigns • business services and processes • designs • festivals • films • interactive digital media products • live entertainment productions or events • manufactured products • marketing and promotional campaigns • museum and gallery exhibitions • photoimaging services • radio or television programs
<p><i>Exploration of opportunities beyond the obvious</i> may involve:</p>	<ul style="list-style-type: none"> • challenging existing assumptions and preconceptions • considering radical change to the way things are done • exploring practice in a totally different industry context • investigating the use of new media • making connections between seemingly unrelated activities
<p><i>Factors</i> may include:</p>	<ul style="list-style-type: none"> • codes of practice • content • cost effectiveness • features of interactive digital media products:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • delivery platform • level of interactivity • look and feel • navigation • Indigenous laws and protocols • length of program or film • level of skill and understanding required for implementation • nature and size of target audience • organisational charter and policies • purpose: <ul style="list-style-type: none"> • advertising or marketing • commercial • educational • entertainment • game • information • relevant legislation, such as: <ul style="list-style-type: none"> • copyright and intellectual property • privacy • results of market research • revenue raised by existing market share • technical feasibility
<i>Relevant stakeholders</i> may include:	<ul style="list-style-type: none"> • administrative staff • clients/customers • designers and other creative personnel • directors • external suppliers • information technology personnel • management • program producers • technical specialists • writers
<i>Creative thinking techniques</i> may include:	<ul style="list-style-type: none"> • brainstorming: <ul style="list-style-type: none"> • bulletin board • buzz session • computer-aided • sequencing • stop and go

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Edward de Bono's six thinking hats • ego alter or heroes • graphic organisers: <ul style="list-style-type: none"> • concept fans • visual maps • webbing • lateral thinking games • making associations • mind mapping • morphological analysis • sub-culture surfing • trigger words • use of metaphors and analogies • vision circles • word salads • visualisation
Resources may include:	<ul style="list-style-type: none"> • computer hardware and software • facilities • printed material • specialist equipment • specialist staff • training
Formats may include:	<ul style="list-style-type: none"> • application forms to funding bodies or sponsors • briefs for consultants • concept maps • electronic presentations to promote the concept • in-house proposal forms
Creative and practical criteria may include:	<ul style="list-style-type: none"> • cost-effectiveness • evaluation against competing priorities • fit with personal vision and aspirations • fit with strategic directions of organisation • fit with target market needs • how innovative the concept is • level of risk • potential benefits • technical feasibility • time to realise the concept
Constraints may include:	<ul style="list-style-type: none"> • availability of resources and equipment

RANGE STATEMENT	
	<ul style="list-style-type: none"> • availability of skilled experts and personnel • cost • level of technical difficulty • limited funding sources • limited potential for commercialisation • time
<i>Implementation specifications</i> may include:	<ul style="list-style-type: none"> • briefs for work • detailed specification of concept including purpose and content • operational plan with responsibilities and time lines • resources breakdown (financial, human and physical)

BSBCUS201B Deliver a service to customers

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS201A Deliver a service to customers</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

Application of the Unit

This unit applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Establish contact with customers	<p>1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational requirements</p> <p>1.2 Maintain personal dress and presentation in line with organisational requirements</p> <p>1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information</p> <p>1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences</p> <p>1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements</p>
2. Identify customer needs	<p>2.1 Use appropriate questioning and active listening to determine customer needs</p> <p>2.2 Assess customer needs for urgency to identify priorities for service delivery</p> <p>2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s</p> <p>2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required</p>
3. Deliver service to customers	<p>3.1 Provide prompt customer service to meet identified needs according to organisational requirements</p> <p>3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary</p> <p>3.3 Communicate with customers in a clear, concise and courteous manner</p> <p>3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever</p>

	possible
4. Process customer feedback	<p>4.1 Promptly recognise customer feedback and handle sensitively according to organisational requirements</p> <p>4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures</p> <p>4.3 Identify any unmet customer needs and discuss suitability of other products/services</p> <p>4.4 Support customers to make contact with other services according to organisational policies and procedures</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to convey meaning clearly, concisely and coherently
- literacy skills to communicate with customers and to develop required product knowledge
- numeracy skills to interpret customer requirements and to meet customer needs
- problem-solving skills to deal with customer enquiries or complaints
- self-management skills to:
 - comply with policies and procedures
 - seek learning and development opportunities.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies and procedures relating to customer service and the customer service process.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • demonstrating all stages of customer service interactions • responding to customer feedback • demonstrating a range of interpersonal skills • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of customer complaints and policies relating to customer service.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • oral or written questioning to assess knowledge of customer service and communication techniques • review of information provided to customers about problems and delays, and customer follow-up • review of documentation recording feedback and communication between customers and the organisation.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Customers</i> may include:	<ul style="list-style-type: none"> • contacts from other organisations • external customers • internal customers • members of the public • patients • service users.
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • access and equity principles and practice • anti-discrimination and related policy • following OHS procedures for dealing with customers • legal and organisational policies, guidelines and requirements • quality and continuous improvement processes and standards • quality assurance and/or procedures manual.
<i>Interpersonal skills</i> may include:	<ul style="list-style-type: none"> • listening actively to what the customer is communicating • providing an opportunity for the customer to confirm their request • questioning to clarify and confirm customer needs • seeking feedback from the customer to confirm understanding of needs • summarising and paraphrasing to check understanding of customer's message • using appropriate body language.
<i>Designated persons</i> may include:	<ul style="list-style-type: none"> • manager, supervisor or team leader • more experienced personnel with specific knowledge or information • staff from other work areas with particular product or service knowledge.
<i>Opportunities</i> may include:	<ul style="list-style-type: none"> • advice about warranties, guarantees or support services • packaging options • pricing options • procedures for delivery of goods or service • provision of product knowledge • systems for recording complaints.

<i>Customer feedback</i> may be about:	<ul style="list-style-type: none">• damaged goods or delivery problems• delays• invoicing errors• quality of customer service• quality of service provision.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to monitor and advise on customer service strategies
- literacy skills to:
 - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
 - prepare general information and papers according to target audience
 - read and understand a variety of texts
- problem-solving skills to deal with customer enquiries or complaints
- technology skills to select and use technology appropriate to a task
- self-management skills to:
 - comply with policies and procedures
 - consistently evaluate and monitor own performance
 - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - financial legislation
 - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none">• identifying needs and priorities of customers• distinguishing between different levels of customer satisfaction• treating customers with courtesy and respect• responding to and reporting on, customer feedback• knowledge of organisational policy and procedures for customer service.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none">• access to an actual workplace or simulated environment• access to office equipment and resources• examples of customer complaints• examples of documents relating to customer service standards and policies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none">• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate• review of reports on customer service delivery• analysis of responses to case studies and scenarios• demonstration of techniques• oral or written questioning to assess knowledge of customer service strategies.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Appropriate interpersonal skills</i> may include:	<ul style="list-style-type: none"> • listening actively to what the customer is communicating • providing an opportunity for the customer to confirm their request • questioning to clarify and confirm customer needs • seeking feedback from the customer to confirm understanding of needs • summarising and paraphrasing to check understanding of customer message • using appropriate body language.
<i>Customers</i> may include:	<ul style="list-style-type: none"> • corporate customers • individual members of the organisation • individual members of the public • internal or external • other agencies.
<i>Customer needs and expectations</i> may include:	<ul style="list-style-type: none"> • accuracy of information • advice or general information • complaints • fairness/politeness • further information • making an appointment • prices/value • purchasing organisation's products and services • returning organisation's products and services • specific information.
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • access and equity principles and practice • anti-discrimination and related policy • defined resource parameters • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • payment and delivery options • pricing and discount policies • quality and continuous improvement processes and

	<p>standards</p> <ul style="list-style-type: none"> • quality assurance and/or procedures manuals • replacement and refund policy and procedures • who is responsible for products or services.
Effective communication may include:	<ul style="list-style-type: none"> • giving customers full attention • maintaining eye contact, except where eye contact may be culturally inappropriate • speaking clearly and concisely • using active listening techniques • using appropriate language and tone of voice • using clear written information/communication • using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions) • using open and/or closed questions.
Designated individuals may include:	<ul style="list-style-type: none"> • colleagues • customers • line management • supervisor.
Customer complaints may include:	<ul style="list-style-type: none"> • administrative errors such as incorrect invoices or prices • customer satisfaction with service quality • damaged goods or goods not delivered • delivery errors • product not delivered on time • service errors • warehouse or store room errors such as incorrect product delivered.
Specific needs of customers may relate to:	<ul style="list-style-type: none"> • age • beliefs/values • culture • disability • gender • language • religious/spiritual observances.
Opportunities to promote and enhance services and products may include:	<ul style="list-style-type: none"> • extending time lines • packaging procedures • procedures for delivery of goods • returns policy • system for recording complaints • updating customer service charter.
Verifiable evidence may include:	<ul style="list-style-type: none"> • customer satisfaction questionnaires • audit documentation and reports

	<ul style="list-style-type: none">• quality assurance data• returned goods• lapsed customers• service calls• complaints.

BSBCUS402B Address customer needs

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS402A Address customer needs</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage the ongoing relationship with a customer, which includes assisting the customer to articulate their needs, meeting customer needs and managing networks to ensure customer needs are addressed. The customer relationship would typically involve direct interaction a number of times over an extended period.

This unit is appropriate to workers who are expected to have detailed product knowledge in order to recommend customised solutions. They would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

Application of the Unit

This unit applies to workers required to be familiar with a product and service that varies widely and is capable of significant customisation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2. Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3. Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer, and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with

	<i>organisational procedures</i>
--	----------------------------------

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to relate to people from diverse backgrounds and people with diverse abilities.
- information management skills to summarise information verbally and non-verbally
- literacy and numeracy skills to:
 - interpret product and service features or sales data
 - read a variety of texts to prepare general information and papers
 - summarise information obtained from a variety of verbal and non-verbal sources
 - write formal and informal text
- numeracy skills to analyse data, and to compare time lines and promotional costs against budgets
- problem-solving skills to develop solutions unique to a customer
- self-management skills to:
 - comply with policies and procedures
 - seek learning and development opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - occupational health and safety
- organisational procedures and standards for customer service relationships
- detailed product and service knowledge which may:
 - be of significant breadth so as to propose alternative products and services, or
 - of significant depth so as to propose variations within a limited product and service range.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • assisting customers to articulate their needs • documenting processes used and customer satisfaction with the products/services offered • assisting customers to address their needs.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of products/services and promotional strategies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation prioritising preferred actions • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • assessment of written reports • evaluation of communication established with customers • review of customer interaction records.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Customers</i> may include:	<ul style="list-style-type: none"> • customers with routine or specific requests • in person, computer-based and telephone customers • internal and external customers • people from a range of social, cultural or ethnic backgrounds • people who may be unwell, drug affected or emotionally distressed • people with varying physical and mental abilities • regular and new customers.
<i>Rights and responsibilities of customers</i> may include:	<ul style="list-style-type: none"> • fulfilment of external obligations • informed consent.
<i>Effective regular communication</i> may include:	<ul style="list-style-type: none"> • giving customers full attention • handling sensitive and confidential issues • maintaining eye-contact (for face-to-face interactions), except where eye-contact may be culturally inappropriate • speaking clearly and concisely • using active listening techniques • using appropriate language and tone of voice • using clearly written information/communication • using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions) • using open and/or closed questions.
<i>Products and services</i> may include:	<ul style="list-style-type: none"> • either products or services • goods • ideas • infrastructure • private or public sets of benefits.
<i>Organisational procedures</i> may include:	<ul style="list-style-type: none"> • procedural manuals • quality systems, standards and guidelines.

BSBCUS501C Manage quality customer service

Modification History

Release	Comments
Release 1	New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i> . Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

Operators may have staff involved in delivering customer service and are responsible for the quality of their work. In many instances the work will occur within the organisation's policies and procedures framework. At this level, the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies, will be required.

Application of the Unit

Many managers are involved in ensuring that products and services are delivered and maintained to standards agreed by the organisation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Plan to meet internal and external customer requirements	<p>1.1 Investigate, identify, assess, and include the needs of customers in planning processes</p> <p>1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers</p>
2. Ensure delivery of quality products and services	<p>2.1 Deliver products and services to customer specifications within organisation's business plan</p> <p>2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards</p> <p>2.3 Assist colleagues to overcome difficulty in meeting customer service standards</p>
3. Monitor, adjust and review customer service	<p>3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards</p> <p>3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services</p> <p>3.3. Develop, procure and use resources effectively to provide quality products and services to customers</p> <p>3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups</p> <p>3.5 Manage records, reports and recommendations within the organisation's systems and processes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to:
 - coach and mentor staff and colleagues
 - monitor and advise on customer service strategies
- literacy skills to:
 - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
 - prepare general information and papers according to target audience
 - read and understand a variety of texts
- problem-solving skills to:
 - deal with customer enquiries or complaints
 - deal with complex and non-routine difficulties
- technology skills to select and use technology appropriate to a task
- self-management skills to:
 - comply with policies and procedures
 - consistently evaluate and monitor own performance
 - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - Australian consumer law
 - ethical principles
 - codes of practice
 - privacy laws
 - financial legislation
 - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs
- techniques for solving complaints including the principles and techniques involved in the management and organisation of:
 - customer behaviour
 - customer needs research
 - customer relations
 - ongoing product and/or service quality

- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • plans, policies or procedures for delivering quality customer service • demonstrated techniques in solving complex customer complaints and system problems that lead to poor customer service • knowledge of techniques for solving complaints.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • assessment of written reports • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • evaluation of leadership, supervision, coaching and mentoring used to assist colleagues to overcome difficulty in meeting customer service standards • review of strategies developed and used to monitor progress in achieving product and/or service targets and standards • review of records, reports and recommendations about managing customer service.

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
--	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Customers</i> may be:	<ul style="list-style-type: none"> • Board members • clients, purchasers of services • co-workers, peers and fellow frontline managers • members of the general public who make contact with the organisation, such as prospective purchasers of services • potential funding bodies • supervisors • suppliers of goods and services and contractors providing goods and services.
<i>Quality</i> may refer to:	<ul style="list-style-type: none"> • characteristics of a product, system, service or process that meet the requirements of customers and interested parties.
<i>Products and services</i> may include:	<ul style="list-style-type: none"> • either products or services • goods • ideas • infrastructure • private or public sets of benefits.
<i>Strategies</i> may refer to:	<ul style="list-style-type: none"> • databases and other controls to record and compare data over time • electronic feedback mechanisms using intranet, internet and email • feedback forms and other devices to enable communication from customers • long-term or short-term plans for monitoring achievement and evaluating effectiveness • policies and procedures • questionnaires, survey and interviews • training and development activities.

<i>Resources</i> may include:	<ul style="list-style-type: none">• buildings/facilities• equipment• finance• information• people• power/energy• technology• time.

BSBDES201A Follow a design process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to follow a design process at a basic level.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to any individual who follows a design process to respond to specific issues or challenges, including product and service requirements arising from particular business or community needs.</p> <p>The unit acknowledges the need to encourage the development of skills, which are sometimes called 'design thinking' or 'design consciousness'. In essence, the unit is about purposeful problem solving - defining the challenge, coming up with ideas, working with others to develop ideas, reflecting on progress, presenting an idea so it can be implemented and, of course, evaluating whether an idea has met the original challenge.</p> <p>Designers use the processes described in this unit but at a much more sophisticated and complex level. This unit is not about being a designer.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify the challenge	1.1. Confirm the <i>nature and scope of the challenge</i> with <i>stakeholders</i> 1.2. Agree on specific objectives with <i>stakeholders</i> 1.3. Identify any <i>constraints</i> that may impact on the design process 1.4. Identify and source <i>relevant supporting information and assistance</i>
2. Explore different ideas and solutions	2.1. Generate a range of ideas to respond to the challenge 2.2. Explore <i>different options and ideas</i> for meeting objectives 2.3. Involve others in the process of developing ideas and solutions
3. Select and present a	3.1. Reflect on different ideas and feedback, and select a

ELEMENT	PERFORMANCE CRITERIA
solution	<p>preferred solution</p> <p>3.2. Summarise the key ideas in the solution and present to stakeholders in <i>appropriate format</i></p> <p>3.3. Obtain any required approvals to take the solution to the next stage</p>
4. Implement the solution	<p>4.1. Schedule key tasks and organise <i>resources to support implementation</i></p> <p>4.2. Carry out <i>testing, prototyping or trialling</i> of the proposed solution</p> <p>4.3. Maintain any required <i>documentation</i></p> <p>4.4. Identify problems and seek <i>advice and guidance</i> from others</p>
5. Evaluate the solution	<p>5.1. Check the success of the solution based on original objectives</p> <p>5.2. Seek feedback from appropriate stakeholders</p> <p>5.3. Review both the solution and the process undertaken to develop the solution as part of an ongoing learning process</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise with others, to share ideas, and to present information and ideas clearly and concisely
- creative thinking skills to generate ideas in response to a defined problem or need in a familiar context
- literacy skills to analyse and interpret information dealing with concepts and ideas from own area of work
- problem-solving skills to identify problems and to work with others to develop solutions
- self-management skills to take responsibility for own work as part of an overall collaborative process.

Required knowledge

- context for the challenge, including any specific factors that impact on work

REQUIRED SKILLS AND KNOWLEDGE

- creative thinking techniques that can be used to generate ideas in any context
- key features and steps in the design process as a way of thinking and solving problems
- legal framework that impacts on activities in a particular context
- potential sources of information for new ideas, relevant to the specific context.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- active participation in a project which uses the design process to develop solutions to a given challenge
- effective communication skills to be a member of a collaborative team
- knowledge of the design process, and how it can be used in developing solutions to different issues and challenges.

Context of and specific resources for assessment

Assessment must ensure:

- access to materials, tools and equipment required to implement solutions in the given work context
- interaction with others to reflect the collaborative nature of the design process.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- direct observation of the candidate participating in collaborative processes
- evaluation of documentation maintained by the candidate to support different ideas
- evaluation of a presentation made by the candidate

EVIDENCE GUIDE	
	<p>outlining proposed solutions and processes used to develop those solutions</p> <ul style="list-style-type: none"> oral or written questioning to assess knowledge of parameters and context for work in a given industry context.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other technical or specialist units from particular areas of work.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Nature and scope of the challenge</i> could be very varied, and may relate to new or improved:</p>	<ul style="list-style-type: none"> applications of materials or equipment processes products or services systems uses of technology
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> client end users friends and family supervisor or manager work colleagues (working in the same or different areas)
<p><i>Constraints</i> may relate to:</p>	<ul style="list-style-type: none"> availability of materials, equipment or tools boundaries about what can and cannot be changed legal restrictions time and budget
<p><i>Relevant supporting information</i></p>	<ul style="list-style-type: none"> drawings, specifications or other technical data

RANGE STATEMENT	
<i>and assistance</i> may include:	<ul style="list-style-type: none"> • ideas from colleagues • industry associations or organisations • personal experience • policy and procedures manuals • print or electronic media (including internet) • reference manuals • technical experts
<i>Different options and ideas</i> may be generated by:	<ul style="list-style-type: none"> • brainstorming: <ul style="list-style-type: none"> • stop and go • sequencing • buzz session • bulletin board • computer-aided • daydreaming and mental wandering • Edward de Bono's six thinking hats • ego alter or heroes • graphic organisers: <ul style="list-style-type: none"> • visual maps • webbing • concept fans • lateral thinking games • making associations • mind mapping • morphological analysis • storytelling • sub-culture surfing • trigger words • use of metaphors and analogies • vision circles • visualisation • wishful thinking • word salads
<i>Appropriate format</i> may be:	<ul style="list-style-type: none"> • checklists • digital presentation • drawings/sketches • models • plans • verbal presentation
<i>Resources to support</i>	<ul style="list-style-type: none"> • equipment

RANGE STATEMENT	
<i>implementation</i> may include:	<ul style="list-style-type: none"> • financial resources • human resources • information technology support • materials • tools
<i>Testing, prototyping or trialling</i> may involve:	<ul style="list-style-type: none"> • creating a physical model or sample • testing the solution against different scenarios • using a small group to test the solution
<i>Documentation</i> may include:	<ul style="list-style-type: none"> • diary showing progress of work • progress reports • records of communication (e.g. emails) • working drawings
<i>Advice and guidance</i> may involve:	<ul style="list-style-type: none"> • facilitating access to networks or contacts • facilitating access to resources • providing technical expertise

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Source information on design in a given industry context	1.1. Investigate the <i>nature, history, role and importance of design</i> in the industry 1.2. Evaluate the roles played by designers and <i>other contributors</i> in the design process 1.3. Source information on the <i>impacts of technology</i> on design in the industry
2. Examine links between design and own work	2.1. Investigate <i>impacts of design on own work</i> 2.2. Consider <i>role of individual workers</i> across the industry in affecting future design directions
3. Keep up to date with industry design trends	3.1. Identify and access <i>opportunities to maintain currency of knowledge</i> about industry design trends 3.2. Evaluate how design trends affect the overall industry and the way it operates 3.3. Share information and pro-actively discuss emerging trends with work colleagues 3.4. Identify trends that will impact on own work and

ELEMENT	PERFORMANCE CRITERIA
	seek opportunities to develop appropriate skills

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss design in a particular industry context with others
- research and literacy skills to source and interpret a wide range of information sources on design in a particular industry context
- self-management and learning skills to take responsibility for identifying and accessing professional development opportunities.

Required knowledge

- consumer/end-user expectations
- current and emerging technologies and their effects on design in the industry
- current and past designers of influence in the industry
- current trends in use of design in a given industry context
- different definitions of design, and the differences and similarities between design and product development
- major design trends in the industry
- role of design in a given industry context.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sourcing and interpreting a range of information sources on design and applying concepts to own work situation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Source information on colour and colour theory	1.1. Identify and access <i>sources of information on colour and colour theory</i> 1.2. Evaluate and collate information to build a knowledge of colour and its application in different contexts
2. Experiment with colour	2.1. Test different colours and colour combinations through <i>experimentation</i> 2.2. Use own ideas as a way of testing, challenging or confirming colour theory 2.3. Ensure safe use of <i>materials, tools and equipment</i> during experimentation with colour
3. Communicate concepts and ideas through use of colour	3.1. Investigate how colour might be used to communicate a particular <i>idea or concept</i> 3.2. Select materials, tools and equipment relevant to the idea or concept 3.3. Apply colour in a way that communicates the concept or idea based on own knowledge of colour and colour theory 3.4. Review and reflect on own use of colour and what it communicates 3.5. Seek and obtain feedback from others about the way colour has been used and its success in communicating the concept or idea

ELEMENT	PERFORMANCE CRITERIA
	3.6. Present and store work any <i>samples</i> in a way which takes account of the need for professional presentation and potential relevance for future work

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and interpret information about colour and colour theory
- numeracy skills to calculate quantities and proportions of different colours
- visual literacy skills to make judgements about the way that different colours work together and in conjunction with other elements.

Required knowledge

- colour attributes and colour relationships
- different colour theories and their applications to different contexts
- emotional, cultural and situational aspects of colour
- individual interpretation and choice in relation to the use of colour, and the potential limitations of theory
- materials, tools and equipment required to experiment with colour in relevant contexts
- ways in which other practitioners use colour in their work.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- effective use of colour to communicate a concept or idea

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> knowledge of colour theory, the effects of colour and its potential use in different contexts.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to materials, resources and equipment needed to apply colour in the relevant work context.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of colour samples produced by the candidate to communicate a concept or idea oral or written questioning to assess knowledge of colour theory and use of colour by different practitioners.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Sources of information on colour and colour theory</i> may include:</p>	<ul style="list-style-type: none"> anecdotal sources, personal observation art and design work books and magazines characteristics of materials, for example paints, pigments scientific texts web-based resources
<p><i>Experimentation</i> may involve playing with:</p>	<ul style="list-style-type: none"> application of light, for example in a theatrical context

RANGE STATEMENT	
	<ul style="list-style-type: none"> • colour attributes in hue, chroma, value • colour grading • colour models (emotional, physical and psychological effects of colour) • colour scales • colour schemes • effective colour relationships, for example harmonies and discords
<i>Materials, tools and equipment</i> may include:	<ul style="list-style-type: none"> • air brushes • brushes • cardboard • digital equipment • fabrics/textiles/plastics • glue • gouache, watercolour, acrylic • hand tools • light sources/equipment • lighting gels • measuring tools • pastels, colour pencils, crayons • range of papers • receptacles • rulers • software • sponges • spray gun
<i>Idea or concept</i> to be communicated may relate to a huge range of activities such as:	<ul style="list-style-type: none"> • advertising and promotion • artistic works • exhibitions or events • fashion designs • interactive digital media products • interior designs • jewellery design • lighting designs • object or product design • sign making • theatrical props, sets or scenic art
<i>Samples</i> may be:	<ul style="list-style-type: none"> • colour wheels • colour swatches • constructed

RANGE STATEMENT	
	<ul style="list-style-type: none"> • digital output • drawn, painted, printed • photographs • sample boards • transitory, for example natural and artificial lighting effects

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Source information on 2-dimensional design	1.1. Identify and access relevant <i>sources of information</i> on 2-dimensional design 1.2. Evaluate and collate information to build a knowledge of 2-dimensional design
2. Explore the creative design process for 2-dimensional forms	2.1. Use <i>creative thinking techniques</i> to generate a range of ideas and options 2.2. Use <i>experimentation</i> to explore and challenge a range of different ideas 2.3. Challenge assumptions, reflect on ideas and refine approaches 2.4. Consciously change perspective, and evaluate ideas and situations in new ways
3. Communicate concepts or ideas through application of design processes to 2-dimensional forms	3.1. Investigate and reflect on how a particular <i>concept or idea</i> might be communicated in a 2-dimensional form 3.2. Select <i>materials, tools and equipment</i> relevant to the realisation of the concept or idea 3.3. Apply a creative design process to produce a range of 2-dimensional concept realisations 3.4. Reflect on own application of design process and success in communicating the concept or idea 3.5. Seek and obtain feedback from others about the 2-dimensional form and its success in

ELEMENT	PERFORMANCE CRITERIA
	<p>communicating the concept or idea</p> <p>3.6. Present and store <i>concept realisations or samples</i> in a format which takes account of the need for professional presentation and potential value for future work</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain ideas and to have discussions about design concepts with others
- literacy skills to read and interpret information about 2-dimensional design
- visual literacy skills to make judgements about the application of the design process to 2-dimensional forms.

Required knowledge

- copyright, moral rights, intellectual property issues and legislation, and their impact on aspects of design
- creative thinking techniques that can be used as part of the design process
- elements and principles of design as applied to 2-dimensional forms
- materials, tools and equipment required for the design of 2-dimensional forms in the relevant work context
- notion of individual interpretation and choice within the design process
- particular challenges and issues in the design of 2-dimensional forms.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> production of a range of samples or concept realisations which show the creative application of processes to 2-dimensional forms knowledge of the design process as it applies to 2-dimensional work.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to the materials resources and equipment needed to apply design processes to 2-dimensional forms.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of samples or concept realisations produced by the candidate and interrogation of the creative process used oral or written questioning to assess knowledge of 2-dimensional design.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> anecdotal sources, personal observation art and design work books and magazines

RANGE STATEMENT	
	<ul style="list-style-type: none"> • natural and manufactured forms, objects and/or structures • optics, including single and multiple vanishing points • scientific texts • web-based resources
<i>Creative thinking techniques</i> may include:	<ul style="list-style-type: none"> • brainstorming: <ul style="list-style-type: none"> • bulletin board • buzz session • computer-aided • sequencing • stop and go • daydreaming and mental wandering • Edward de Bono's six thinking hats • ego alter or heroes • graphic organisers: <ul style="list-style-type: none"> • concept fans • visual maps • webbing • lateral thinking games • making associations • mind mapping • morphological analysis • storytelling • sub-culture surfing • trigger words • use of metaphors and analogies • vision circles • visualisation • wishful thinking • word salads
<i>Experimentation</i> may involve consideration of:	<ul style="list-style-type: none"> • contrast • direction • exploring tonal range to produce illusion of 3-dimensionality • harmony • linear perspective • mark making • modelling volume through marks and tone • pattern

RANGE STATEMENT	
	<ul style="list-style-type: none"> • positive and negative shape • proportion • rhythm • shape • size • texture • tone

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Source and apply information on the structure and operation of the design industry	1.1. Identify and access <i>information on the design industry</i> and professional design practice 1.2. Use and analyse knowledge of the design industry appropriately, to inform own design practice and work
2. Source and apply knowledge on employment obligations and opportunities that impact on designers	2.1. Obtain information on <i>employment obligations and opportunities</i> in the design industry 2.2. Apply knowledge of employment obligations and opportunities appropriately, within day-to-day work activities
3. Seek information on new design technology	3.1. Correctly identify sources of <i>information on new technology</i> affecting different areas of design practice

ELEMENT	PERFORMANCE CRITERIA
	3.2. Investigate relevant technologies to assist effective work performance
4. Update industry knowledge	<p>4.1. Identify and use a range of <i>opportunities to update knowledge of the design industry</i> and monitor current <i>issues of concern</i> to the industry</p> <p>4.2. Share updated knowledge with colleagues and peer group as appropriate, and incorporate into day-to-day work activities</p>
5. Apply information on ethical and legal work practices	<p>5.1. Source <i>information on ethical and legal work practices</i> in the context of design</p> <p>5.2. Share updated knowledge on ethical and legal work practice in day-to-day work activities</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to share industry information in day-to-day activities
- learning and self-management skills to take responsibility for ongoing learning and development
- research and literacy skills to source and interpret industry information.

Required knowledge

- concept of a design industry, what it means, the typical questions and issues about whether a design industry exists, and how a design industry relates to other industries
- copyright, moral rights and intellectual property issues and legislation, and their impact on the design industry
- current and emerging technologies used within the design industry
- design industry including different sectors and their interrelationships, plus the historical development of the industry
- etiquette and ethics as they apply to key design disciplines within the industry
- global nature of design activity
- impact of convergence in the design industry
- key design disciplines, how they interrelate and key roles and responsibilities
- key design industry terminology
- nature, role and functions of unions and employer associations, including rights

REQUIRED SKILLS AND KNOWLEDGE

- and responsibilities of employers and employees
- obligations of employees, including attendance, ethical behaviour, taking directions, confidentiality, work performance, safety and care
- obligations of employers, including safe system of work and non-discrimination
- sources of information on the design industry and ways of maintaining current industry knowledge.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- knowledge of the design industry, design as a profession and the relationship between design and other industries
- application of industry knowledge to work activities, maximising effective performance
- knowledge of ways to maintain currency in design industry trends and practice.

Context of and specific resources for assessment

Assessment must ensure:

- access to sources of information on the design industry.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- oral or written questioning to assess knowledge of different aspects of the design industry.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information on the design industry should relate to:

- different sectors, and products and services available
- economic and social significance of the industry
- industry structure
- prominent design practitioners, companies and practices
- relationship between design and allied industries such as:
 - film, television, radio, digital media
 - journalism
 - manufacturing
 - music
 - photoimaging
 - retail
 - scientific/medical
 - sport
 - tourism
 - visual arts and craft

Employment obligations and opportunities may relate to:

- best practice models
- career opportunities
- professional associations
- roles, responsibilities and employment rights of contracted workers
- unions and employer bodies

Information on new technology may relate to:

- advances in technology and equipment
- likely effects of new technology on current work practices and the structure of the industry
- sources of technical advice and support
- ways of upgrading skills to allow for the use of new technology

RANGE STATEMENT	
<i>Opportunities to update knowledge of the design industry</i> may relate to:	<ul style="list-style-type: none"> • conferences, symposiums, workshops, master classes • discussions with industry practitioners and colleagues • exhibitions/events • expositions • industry associations and organisations • industry functions • industry journals • internet • media • personal observations and experience • policy and procedures manuals • reference manuals • seminars and other professional development opportunities • unions and other sources of industrial relations information
<i>Issues of concern</i> to the industry may be related to:	<ul style="list-style-type: none"> • changing nature of the marketplace • convergence • government initiatives • industry expansion • labour issues
<i>Information on ethical and legal work practices</i> may relate to:	<ul style="list-style-type: none"> • contracts • copyright, moral rights and intellectual property issues • legal requirements • permits

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect information on history and theory of design	1.1. Identify and access relevant <i>sources of information</i> on design history and theory 1.2. <i>Organise research material</i> and findings for current or future use in design practice, in a manner which facilitates easy access and cross-referencing
2. Apply information to own area of work	2.1. <i>Evaluate information</i> in the context of current design practice 2.2. Assess ways in which aspects of information on design history and theory could be used or adapted to inform current practice 2.3. Use relevant information in a culturally appropriate way to develop an understanding of own area of work
3. Update and maintain knowledge of design trends	3.1. Identify and use opportunities to update and expand knowledge of design trends and developments 3.2. Incorporate and integrate knowledge into design activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

The following skills must be assessed as part of this unit:

- research and comprehension skills to source, understand and apply information on design history and theory
- research skills to source readily available information on design history and theory.

Required knowledge

- copyright, moral rights, intellectual property issues and legislation as it relates to using information in own work
- current trends in design
- evolution of design
- organisational information practices and their application
- sources of information on design history and theory relevant to own design work.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- knowledge of the history and theory of design and how this may be applied in design practice
- application of research and evaluation skills.

Context of and specific resources for assessment

Assessment must ensure:

- access to information sources on design history and theory.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples

EVIDENCE GUIDE	
	<p>are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of how history and theory have been integrated into a design project undertaken by the candidate • evaluation of a presentation made by the candidate about how design history or theory has influenced work • oral or written questioning to assess knowledge of design history, trends and theory.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> • cultural, historical, scientific texts • film, video, internet • images, objects • journal articles • oral histories • performances/presentations • philosophical texts • religious and spiritual texts • stories • technical or medium specific information
<i>Information</i> may relate to:	<ul style="list-style-type: none"> • aesthetics • criticism • cultural issues • gender and identity issues

RANGE STATEMENT	
	<ul style="list-style-type: none"> • histories of art, craft and design • histories of performances/presentations and related skills • land and place • new technologies • politics • spiritual concerns • world histories
<i>Organising research material</i> may include:	<ul style="list-style-type: none"> • databases • diagrams, charts • digital storage systems • files, scrapbooks, diaries • mind maps • sketches
<i>Evaluating information</i> may include:	<ul style="list-style-type: none"> • comparing • considering merit • contrasting • critiquing • discussing and debating • reflecting

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the design challenge	1.1. Determine and evaluate <i>user/client needs</i> 1.2. Clarify <i>specifications, parameters and constraints</i> of the design challenge in consultation with relevant stakeholders 1.3. Articulate the essence of the design challenge in an <i>appropriate format</i>
2. Undertake research to inform the design solution	2.1. Source, evaluate and acknowledge <i>information</i> that may assist in responding to the design challenge 2.2. Consider <i>historical, current and future perspectives and trends</i> that might inform design solutions 2.3. Consider relevant <i>social, economic, environmental, ethical and cultural issues</i> that may impact on design solutions 2.4. Analyse, distil and collate information to inform the development of the design solution
3. Communicate and	3.1. Establish and develop working relationships with

ELEMENT	PERFORMANCE CRITERIA
collaborate with others	<p><i>key stakeholders</i></p> <p>3.2. Seek and integrate input and ideas from others during the design process</p> <p>3.3. Inform key stakeholders about progress of the design and related implications</p> <p>3.4. Negotiate and agree on any changed requirements or modifications</p>
4. Generate ideas and responses to the design challenge	<p>4.1. Reflect on and integrate ideas generated from research and consultation</p> <p>4.2. Use a range of <i>creative thinking techniques</i> to generate different options and ideas</p> <p>4.3. Apply relevant principles of <i>functionality, ergonomics, aesthetics and sustainability</i> to the development of different options</p>
5. Select a design solution	<p>5.1. Develop and use a range of <i>criteria against which to evaluate different options and ideas</i></p> <p>5.2. Select a preferred solution against agreed criteria and in consultation with relevant key stakeholders</p> <p>5.3. Adjust and refine proposed design solution based on research, testing and reflection</p> <p>5.4. Present proposed design solution with appropriate <i>supporting documentation</i> according to project requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise, consult and negotiate with others on potentially complex issues
- creative, critical thinking and problem-solving skills to generate a range of ideas and solutions to a particular design challenge
- research skills to interpret and develop a wide range of visual and written information sources
- planning and organisational skills to collate information, and to coordinate liaison and consultation with others during the design process.

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant context
- elements and principles of design and their application in the relevant design context
- features of the wider industry, economic, social and historical context in which design solutions are being generated
- other designs and the work of other design practitioners in the relevant context
- sources of information that support the development of technical and other knowledge
- technical knowledge of the area for which design solutions are being generated - in terms of materials, tools, equipment, techniques and industry processes and procedures.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- development of a design solution through research, reflection and the generation and refinement of ideas
- effective collaboration with others in the design process
- knowledge of design trends and technologies in the relevant industry context.

Context of and specific resources for assessment

Assessment must ensure:

- interaction with others to reflect the collaborative nature of the design process
- access to sources of information on design in the relevant industry context.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of a design solution generated by the candidate against an original brief, set of criteria or guiding objectives • evaluation of the process used to reach a design solution in terms of research and ideas generation/refinement • oral or written questioning to assess knowledge of technical and context issues that impact on design in a given industry context.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p> <p>Combined assessment with the following unit is appropriate:</p> <ul style="list-style-type: none"> • BSBCRT301A Develop and extend critical and creative thinking skills.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>User/client needs</i> may be:	<ul style="list-style-type: none"> • expressed in a brief: <ul style="list-style-type: none"> • diagrammatic • verbal • visual • written • expressed in other documentation such as research papers or workplace plans • informally articulated • in need of further research

RANGE STATEMENT	
<i>Specifications, parameters and constraints</i> may relate to:	<ul style="list-style-type: none"> • audience • budgeting and financing • cost of production • medium • purpose • technical issues • timeframes
<i>Appropriate format</i> may include:	<ul style="list-style-type: none"> • drawings or sketches - manual or computer aided design and drafting (CADD) • electronic presentation • verbal presentation • written notes with rationale or description
<i>Information</i> may include:	<ul style="list-style-type: none"> • codes of practice • contractual obligations • historical data • industry standards • legal requirements • specialist information • technological trends and developments
<i>Historical, current and future perspectives and trends</i> may relate to:	<ul style="list-style-type: none"> • industry context • materials • social or ethical issues • sustainability • technologies
<i>Social, economic, ethical and cultural issues</i> may include:	<ul style="list-style-type: none"> • availability of materials, tools or equipment • budgetary issues • community impact • cost of production • customer relationships • government policies • sponsorship opportunities • triple bottom line (people, planet, profit) • workforce relationships
<i>Environmental issues</i> may include:	<ul style="list-style-type: none"> • conservation of resources • energy efficiency • environmental consciousness/green design • recycling • use of renewable resources • waste/by products/emissions

RANGE STATEMENT	
<i>Key stakeholders</i> may include:	<ul style="list-style-type: none"> • client • employer • end user • peers • supervisor • technical experts • work colleagues
<i>Creative thinking techniques</i> may include:	<ul style="list-style-type: none"> • brainstorming: <ul style="list-style-type: none"> • bulletin board • buzz session • computer-aided • sequencing • stop and go • daydreaming and mental wandering • Edward de Bono's six thinking hats • ego alter or heroes • graphic organisers: <ul style="list-style-type: none"> • concept fans • visual maps • webbing • lateral thinking games • making associations • mind mapping • morphological analysis • storytelling • sub-culture surfing • trigger words • use of metaphors and analogies • vision circles • visualisation • wishful thinking • word salads
<i>Functionality, ergonomics, aesthetics and sustainability</i> may be related to:	<ul style="list-style-type: none"> • end use and users • production processes
<i>Criteria against which to evaluate different options and ideas</i> may relate to:	<ul style="list-style-type: none"> • access to resources - physical, human or financial • aesthetic appeal • consistency with original brief

RANGE STATEMENT	
	<ul style="list-style-type: none"> • desired level of originality and innovation • ease of manufacture or further development • environmental sustainability • ethical issues • health and safety requirements • impact upon client and community • industry standards and practice • legal issues • level of risk • personal affinity with medium and materials • technological considerations
<i>Supporting documentation</i> may include:	<ul style="list-style-type: none"> • drawings or plans • illustrations • material samples • models • photographs • specifications for production

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Acquire and develop technical skills	1.1. Plan <i>strategies</i> to ensure the development of appropriate <i>technical skills</i> in design practice 1.2. Plan and use opportunities to develop and assess technical skills 1.3. Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills 1.4. Develop and extend technical skills through <i>testing capabilities</i> of materials, tools and equipment 1.5. Identify and use <i>relevant media</i> to stimulate technical and professional development
2. Develop conceptual skills and ideas	2.1. Engage in ongoing experimentation and exploration of different ideas and techniques 2.2. Discuss ideas with others and apply knowledge gained to inform own work 2.3. Use work practice to gain experience in a range of genres and interpretations 2.4. Study the work of others to stimulate conceptual and technical skills development 2.5. Research and share ideas across a range of design disciplines 2.6. Identify and use a range of <i>opportunities to develop</i>

ELEMENT	PERFORMANCE CRITERIA
	<i>own skills</i> and keep informed about current design practice
3. Develop own voice	3.1. Explore and experiment with new ideas in making and/or interpreting design work 3.2. Explore and use technology, where appropriate, to develop <i>own voice</i> and expand practice 3.3. Demonstrate own voice through design project realisation
4. Evaluate own work	4.1. Seek and apply constructive criticism from others to improve own work 4.2. Evaluate own work against planned strategy for own practice 4.3. Evaluate own work in the context of work by others in order to extend own practice 4.4. Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes
5. Research work opportunities	5.1. Correctly identify <i>sources of information</i> relating to work opportunities for designers 5.2. Identify <i>networks</i> and <i>promotional opportunities</i> for designers which may be helpful in developing career opportunities 5.3. Incorporate research results and information into own work and career planning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss potentially complex ideas and concepts with others and to engage in critical discourse about own work
- creative thinking skills to explore and generate new ideas for design work
- comprehension skills to interpret and communicate a wide range of potentially complex information about design concepts and technologies
- problem-solving skills to explore and develop strategies and solutions to new design challenges and opportunities
- self-management skills to take pro-active responsibility for own professional

REQUIRED SKILLS AND KNOWLEDGE
development.
Required knowledge
<ul style="list-style-type: none"> • current and emerging copyright, moral rights and intellectual property issues and legislation, and their impact on designers • current and emerging designers in the relevant design discipline • current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent • professional development information and resources available to designers • sources of information relating to work opportunities and career planning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of own voice through exploring and experimenting with new ideas in making and/or interpreting work • application of planned strategies to develop appropriate skills in design practice • use of discussion and evaluation opportunities to inform and develop technical and conceptual skills.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to the materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of candidate diary or log detailing the

EVIDENCE GUIDE	
	<p>ways in which different experiences and opportunities have been used to develop and extend skills</p> <ul style="list-style-type: none"> • evaluation of bodies of work that demonstrate the progressive development of skills • evaluation of a presentation by the candidate addressing the ways in which a pro-active approach to skills development has been taken.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Strategies</i> for developing self as a designer may include:</p>	<ul style="list-style-type: none"> • being involved in a range of relevant design activities • communicating with peers • experimenting • participating in professional development and other learning opportunities • participating in relevant groups or associations • practising • undertaking training courses • working effectively with supervisor • working with a mentor or coach
<p><i>Technical skills</i> may include skills in:</p>	<ul style="list-style-type: none"> • animation • digital/electronic design • entertainment design • fashion/clothing/accessories design • furnishings • furniture design • graphic design

RANGE STATEMENT	
	<ul style="list-style-type: none"> • illustration/technical drawing • interior design • jewellery design • object design • photoimaging • tableware design • other design disciplines
<i>Testing capabilities</i> refers to:	<ul style="list-style-type: none"> • experimenting with innovative applications • extending the possibilities of materials, tools and equipment towards their full potential
<i>Relevant media</i> may include:	<ul style="list-style-type: none"> • catalogues • journals • magazines
<i>Opportunities to develop own skills</i> may include participation in and/or attendance at, some of the following:	<ul style="list-style-type: none"> • competitions • exhibitions • floor talks at galleries • laboratories • lectures, seminars, conferences, symposiums • manufacturing sites • master classes • professional organisations • trade fairs, expositions
Developing <i>own voice</i> includes:	<ul style="list-style-type: none"> • analysing and researching the work of others relevant to selected area of specialisation • analysing conventions, practices and customs in design practice • developing repertoire and knowledge • exploring elements and principles of design
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> • design journals • employer listings • exhibition catalogues and programs • job advertisements • websites • word of mouth
<i>Networks</i> may include:	<ul style="list-style-type: none"> • alumni organisations • colleagues and teachers • consumer organisations • professional associations
<i>Promotional opportunities</i> may	<ul style="list-style-type: none"> • applications to funding bodies

RANGE STATEMENT

include:

- competitions
- demonstrations
- exhibitions
- performances
- trade fairs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish design requirements	<p>1.1. Identify and make appropriate contact with <i>relevant stakeholders</i> for the design project, in addition to the client</p> <p>1.2. Identify and source <i>information and references relevant to the design project</i></p> <p>1.3. Undertake <i>critical analysis</i> of sources and extract key information to inform the design project</p> <p>1.4. Liaise with client and other key stakeholders to determine <i>overall objectives and parameters</i> for the design project</p> <p>1.5. Pro-actively seek, review and act upon information needed to inform constructive communication with client</p> <p>1.6. Build trust and respect between self and client</p>

ELEMENT	PERFORMANCE CRITERIA
	through effective use of communication skills and demonstration of professional integrity
2. Develop and refine design brief	<p>2.1. Develop concepts and ideas for inclusion in design brief that take account of overall objectives and parameters</p> <p>2.2. Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs</p> <p>2.3. Present ideas in an <i>appropriate format/medium</i> and seek feedback from key stakeholders</p> <p>2.4. Use effective communication techniques to generate discussion, debate and critical analysis</p> <p>2.5. Re-evaluate and refine options based on own analysis and discourse with others</p> <p>2.6. Establish and agree on final nature and scope of design brief with client and accurately document details</p>
3. Negotiate terms and conditions	<p>3.1. Negotiate and agree <i>terms and conditions</i> of the brief in accordance with relevant <i>organisational and professional standards</i></p> <p>3.2. Clarify, agree and document roles and responsibilities of those involved in the project</p> <p>3.3. Confirm agreements in writing in accordance with <i>organisational requirements</i></p> <p>3.4. Identify the need for and seek specialist advice in developing, formal agreements or contracts where appropriate</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, presentation and negotiation skills to work with clients to establish and refine design briefs
- creative thinking skills to generate and develop concepts and ideas for the design brief, including responses to situations where parameters may be quite broad and open or very restrictive

REQUIRED SKILLS AND KNOWLEDGE

- literacy skills to research and evaluate a wide range of source materials for the development of ideas and concepts
- numeracy skills to develop realistic costings for realisation of design concept
- planning and organisational skills to guide and coordinate the process of negotiating and finalising a design brief
- problem-solving skills to pro-actively identify and develop effective solutions to complex challenges of a varied and unpredictable nature
- self-management skills to take responsibility for driving and guiding the brief negotiation process.

Required knowledge

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant work context
- legal issues that affect negotiations and contracts in the relevant work context
- scope, nature and potential variations within design briefs relevant to a specific context
- sources of information that inform the development of design concepts within a specific industry context.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- practical demonstration of skills through the development and finalisation of at least two design briefs for a specific industry purpose
- effective collaboration and communication skills to work with others to develop and refine a design brief
- knowledge of the design process within the specific industry context/design discipline.

Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate equipment and media to communicate and present ideas and concepts
- access to sources of information relevant to the

EVIDENCE GUIDE	
	<p>industry context</p> <ul style="list-style-type: none"> interaction with and involvement of others to reflect the collaborative nature of the work, and the communication and negotiation skills required.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of a design brief in which the candidate has played a significant development role evaluation of reports prepared by the candidate detailing the processes undertaken for establishing and refining the design brief, including challenges faced and lessons learned for the future observation of discussions and negotiations with client and other stakeholders oral or written questioning to assess knowledge of the process and issues surrounding legislation, industry context, sources of information evaluation of candidate response to different scenarios to assess ability to adapt approach to different client requirements and contexts.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> any specialised design unit.

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

RANGE STATEMENT	
<i>Relevant stakeholders</i> in addition to the client may include:	<ul style="list-style-type: none"> • authorities such as local council for outdoor event design • creative specialists • other designers • others involved in the project • production teams • technical specialists • venue managers
<i>Information and references relevant to the design project</i> may include:	<ul style="list-style-type: none"> • environment • financial information • legislative and regulatory requirements • music and/or film/video • oral history • organisational information • photographs and other artworks • project team members • promotional material • technical reports/data • texts and other written references • work of other designers/artists
<i>Critical analysis</i> may involve:	<ul style="list-style-type: none"> • considering how ideas may be adapted • considering how ideas may be challenged • drawing links between references and potential designs • evaluating work of other designers • making judgements about potential ideas in relation to the budget and available resources • making judgements about relevance of information and ideas
<i>Overall objectives and parameters</i> may relate to:	<ul style="list-style-type: none"> • audience • availability of materials, tools, equipment and human resources • budget constraints • conflicting competing demands • environmental sustainability • organisational vision • presentation venue/context • sponsorship • timeframe • triple bottom line (people, planet, profit)

RANGE STATEMENT	
<i>Appropriate format/medium</i> for presentation of ideas may include:	<ul style="list-style-type: none"> • checklists • digital presentation • drawings • electronic presentations • graphic formats • models • paintings • photographs • plans • prototypes • verbal description/oral presentation • video • visual diagrams
<i>Terms and conditions</i> may relate to:	<ul style="list-style-type: none"> • conceptual parameters • contracts • deliverables • legal and financial issues such as processes to be used • ownership and copyright • reporting • technical requirements • time lines
<i>Organisational and professional standards</i> may include:	<ul style="list-style-type: none"> • industry-accepted fee schedules • industry standards for written agreements • requirements for written agreements
<i>Organisational requirements</i> for confirming agreements may include:	<ul style="list-style-type: none"> • approval and ongoing communication processes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan realisation of the design	<p>1.1. Collect, analyse and maintain <i>relevant information on the design</i></p> <p>1.2. Discuss and agree on <i>standards of work and monitoring requirements</i> with <i>appropriate stakeholders</i></p> <p>1.3. Develop clear plan and schedule for design realisation, including key roles and responsibilities linked to time lines and budget</p>
2. Implement and monitor realisation of the design	<p>2.1. Organise and/or allocate <i>resources</i> to achieve the realisation of design within required standards, timeframes and budget</p> <p>2.2. Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Maintain accurate, relevant and complete documentation in accordance with agreed standards</p> <p>2.4. Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work</p> <p>2.5. Promptly identify difficulties or problems that arise in relation to realisation of the design and take action to rectify the situation</p>
3. Liaise and negotiate with stakeholders	<p>3.1. Establish and maintain appropriate communication channels with relevant stakeholders</p> <p>3.2. Pro-actively seek and provide information to facilitate effective design realisation</p> <p>3.3. Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances</p> <p>3.4. Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome</p>
4. Complete design process	<p>4.1. Finalise design outcomes in accordance with terms and conditions</p> <p>4.2. Seek feedback from key stakeholders on finished design and make final adjustments as agreed</p> <p>4.3. Evaluate completed design in relation to own work and overall process, to inform future practice</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and negotiation skills to lead and participate in effective client/principal, stakeholder and project team liaison during design realisation
- creative thinking skills to generate new or adapted ideas in response to realisation challenges
- literacy skills to research and evaluate a wide range of source materials on design and to complete relevant design documentation
- numeracy skills to manage budgets

REQUIRED SKILLS AND KNOWLEDGE

- planning and organisational skills to coordinate and lead potentially complex processes involving a range of interrelated factors and challenges
- problem-solving and decision making skills to develop and implement solutions to unpredictable problems.

Required knowledge

- copyright, moral rights, intellectual property issues and legislation that impact on design work in the relevant industry context at a managerial level
- occupational health and safety requirements relevant to the particular work context/design discipline
- production/realisation processes as they apply to designs in a particular industry context or design discipline including materials, tools, equipment and processes
- quality assurance for design concept realisation applicable to the specific industry context/design discipline.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- planning and implementation of design realisation so that finished product or service meets the requirements of design brief
- effective communication and negotiation skills in relation to working with others for design realisation
- knowledge of the design process in the specific industry context/design discipline.

Context of and specific resources for assessment

Assessment must ensure:

- access to resources, tools, materials and equipment for realisation of a design in specific context
- access to a design concept that the candidate can take to realisation stage
- interaction with and involvement of others to reflect the collaborative nature of the unit and the communication and negotiation skills required.

EVIDENCE GUIDE	
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of finished products or services where the candidate has managed the realisation process • evaluation of progress reports or completion reports prepared by the candidate • evaluation of candidate reports on the realisation process highlighting different management techniques used, challenges in the process and how these were addressed.
Guidance information for assessment	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • any specialised design unit.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Relevant information on the design</i> may include:	<ul style="list-style-type: none"> • artwork • brief • checklists • financial data • models • production data • prototypes • specifications • technical data

RANGE STATEMENT	
	<ul style="list-style-type: none"> • visual diagrams • working drawings

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to research and critically evaluate global design trends.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Often the individual would be a designer, but the unit may also be relevant to those who work in related management, marketing and production areas.</p> <p>The unit focuses on research and analysis of information and ideas at a complex level, plus the evaluation and extension of one's own professional skills.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research design trends	1.1. Analyse and select <i>formal and informal research strategies</i> to source <i>information on global design trends</i> 1.2. Identify and explore <i>new and alternative sources</i> 1.3. Evaluate the credibility of information gathered and ensure research scope is sufficiently broad
2. Analyse design trends to inform own practice	2.1. Use information to challenge and extend own perspectives and ways of thinking 2.2. Examine and assess the implications and consequences of design trends on own work 2.3. Use <i>critical analysis</i> to identify creative or commercial opportunities presented by emerging trends and technologies 2.4. Develop systems to identify and respond to future opportunities
3. Develop and articulate positions	3.1. Develop <i>substantiated positions and ideas</i> in

ELEMENT	PERFORMANCE CRITERIA
and ideas	<p>relation to global design trends</p> <p>3.2. Generate informed discussion, debate and critical analysis with peers and colleagues</p> <p>3.3. Use debate and feedback as a way of challenging and refining own positions</p>
4. Extend own design skills	<p>4.1. Pro-actively identify and use opportunities presented by research to extend own design skills</p> <p>4.2. Re-evaluate and refine approaches to work in the context of current and emerging trends</p> <p>4.3. Use practice, discussion and ongoing evaluation to continuously improve skills</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to articulate and debate conceptual or technical ideas
- critical thinking skills to distil and synthesise information from varied sources and to develop own positions and ideas on a complex range of issues
- literacy skills to research complex, varied and unfamiliar information sources
- planning and organisational skills to undertake the research process.

Required knowledge

- broad global design trends that apply to all design disciplines
- business implications/consequences of adopting trends and emergent technologies
- copyright/moral/intellectual property issues associated with research and with design more broadly
- design industry networks and professional development opportunities - local, national and international
- research methodologies and options
- sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- specific current and emerging design technologies and trends (at a global level) in at least one area of design.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> conducting research on a complex range of design issues, trends and ideas analysing, critiquing and synthesising complex sources to develop own positions and ideas design research knowledge of copyright/moral/intellectual property issues associated with research and with design more broadly.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> use of a current and varied range of familiar and unfamiliar information sources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of research undertaken by the candidate in terms of scope, depth and the level of critical thinking applied direct observation of candidate debating issues arising from research into global design trends oral or written questioning to assess knowledge of global design trends in terms of depth and complexity.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Formal and informal research strategies may include:

- formal study
- participating actively in relevant industry associations
- participating in, and contributing to, discussion through conferences, meetings, seminars, courses and journals
- participating in professional development and other learning opportunities
- reading current literature, including specialist journals and industry magazines
- web research

Information on global design trends may relate to:

- best practice examples
- emerging and future technology
- history
- philosophy
- role of design in the broader social, economic and political environment
- sustainability

New and alternative sources may include:

- inspirations from nature
- work from other areas of community or business activity for example:
 - artists
 - authors
 - business people
 - entertainers
 - film makers
 - historians
 - philosophers
 - photographers
 - scientists

Critical analysis may include:

- analysing and evaluating actions and policies
- clarifying issues, values and standards

RANGE STATEMENT	
	<ul style="list-style-type: none"> • comparing analogous situations • comparing and contrasting ideals with practice • comparing and evaluating beliefs, interpretations and theories • developing criteria for evaluation • distinguishing relevant from irrelevant facts • examining and evaluating assumptions • exploring implications and consequences • generating and assessing solutions • making interdisciplinary connections • making plausible inferences and predictions • noting significant similarities and differences • reading and listening critically
<i>Substantiated positions and ideas</i> may be those which are:	<ul style="list-style-type: none"> • grounded in appropriate research • result of rational and logical thought • subjected to the analysis of others • supported by relevant information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain daily financial records	<p>1.1. Correctly maintain daily financial records and in accordance with <i>organisational requirements</i> for accounting purposes</p> <p>1.2. Identify and rectify or refer <i>discrepancies</i> or errors in <i>documentation</i> or transactions to <i>designated persons</i> in accordance with organisational requirements</p> <p>1.3. Accurately credit and debit transactions and promptly enter into <i>journals</i> in accordance with organisational requirements</p>
2. Maintain general ledger	<p>2.1. Maintain general ledger in accordance with organisational requirements</p> <p>2.2. Post <i>transactions</i> into general ledger in accordance with organisational reporting requirements</p> <p>2.3. <i>Reconcile systems for accounts payable and receivable</i> with general ledger</p> <p>2.4. Accurately prepare trial balance from general ledger in accordance with organisational requirements</p>
3. Monitor cash control	<p>3.1. Ensure cash flow is accurately accounted for in accordance with organisational requirements</p> <p>3.2. Make and receive <i>payments</i> in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>organisational requirements</p> <p>3.3. Collect or follow-up outstanding accounts within designated time lines</p> <p>3.4. Check payment documentation for accuracy of information and despatch to creditors within <i>designated time line</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify financial information; to read and understand the organisation's accounting procedures; and to edit and proofread documents to ensure conformity and consistency of information
- communication skills to clarify information and to refer errors or discrepancies to appropriate people
- numeracy skills to read and interpret financial data and to prepare cash analysis sheets
- problem-solving skills to reconcile figures.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - financial legislation
 - occupational health and safety (OHS)
- organisational policies and procedures relating to maintaining financial records
- definition of credits/creditors and debits/debtors
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> identifying and responding to discrepancies and errors transferring and recording financial data accurately reconciling expenditures and revenue knowledge of organisational policies and procedures relating to maintaining financial records.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to an actual workplace or simulated environment access to office equipment and resources examples of source documents relating to financial record keeping.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate review of identification and rectification or referral of discrepancies or errors in documentation or transactions analysis of responses to case studies and scenarios demonstration of techniques oral or written questioning to assess knowledge of financial record keeping examples of financial documentation.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> general administration units other financial administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> designated time lines guidelines for reconciling journals legal and organisational policies, guidelines and requirements OHS policies, procedures and programs procedures for totalling adjusted journals quality assurance and/or procedures manuals resolution procedures security procedures
<i>Discrepancies</i> may relate to:	<ul style="list-style-type: none"> bank charges dishonoured cheques errors in transposing between source documents and journals interest
<i>Documentation</i> may include:	<ul style="list-style-type: none"> purchase credit notes purchase invoices sales credit notes sales invoices

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Seek, receive and communicate information and ideas	1.1. Collect <i>information</i> associated with the achievement of work responsibilities from appropriate <i>sources</i> 1.2. Communicate ideas and information to <i>diverse audiences</i> in an appropriate and sensitive manner 1.3. Seek contributions from internal and external sources to develop and refine new ideas and approaches in accordance with organisational processes 1.4. Facilitate <i>consultation processes</i> to allow employees to contribute to issues related to their work, and promptly communicate outcomes of consultation to the work team 1.5. Promptly deal with and resolve issues raised, or refer them to <i>relevant personnel</i>
2. Encourage trust and	2.1. Treat people with integrity, respect and empathy

ELEMENT	PERFORMANCE CRITERIA
confidence	<p>2.2. Encourage effective relationships within the framework of <i>the organisation's social, ethical and business standards</i></p> <p>2.3. Gain and maintain the trust and confidence of <i>colleagues, customers and suppliers</i> through competent performance</p> <p>2.4. Adjust interpersonal styles and methods in relation to the organisation's social and cultural environment</p>
3. Identify and use networks and relationships	<p>3.1. Identify and utilise <i>workplace networks</i> to help build relationships</p> <p>3.2. Identify and describe the value and benefits of networks and other work relationships for the team and the organisation</p>
4. Contribute to positive outcomes	<p>4.1. Identify difficulties and take action to rectify the situation within own level of responsibility according to organisational and legal requirements</p> <p>4.2. Support colleagues in resolving work difficulties</p> <p>4.3. Regularly review <i>workplace outcomes</i> and implement improvements in consultation with relevant personnel</p> <p>4.4. Identify and resolve <i>poor work performance</i> within own level of responsibility and according to organisational policies</p> <p>4.5. Deal constructively with conflict, within the organisation's established processes</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- coaching and mentoring skills to provide support to colleagues
- functional literacy skills to access and use workplace information
- relationship management and communication skills to:
 - interpret information from a variety of people
 - respond to unexpected demands from a range of people

REQUIRED SKILLS AND KNOWLEDGE

- gain the trust and confidence of colleagues
- deal with people openly and fairly
- forge effective relationships with internal and/or external people.

Required knowledge

- principles and techniques associated with relationship management, including:
 - developing trust and confidence
 - behaving consistently in work relationships
 - identifying the cultural and social environment
 - identifying and assessing interpersonal styles
 - establishing networks
 - identifying and resolving problems
 - handling conflict
 - managing poor work performance
 - monitoring and improving work relationships
 - using anti-discrimination/bias strategies and making contributions
- relevant legislation from all levels of government that may affect business operation, especially in regard to:
 - occupational health and safety and environmental issues
 - equal opportunity
 - industrial relations
 - anti-discrimination.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- using culturally appropriate communication techniques to share work-based information with teams and individuals in accordance with organisation policies
- developing networks and building team relationships

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> regularly reviewing workplace outcomes to identify and resolve issues and implement improvements within own level of responsibility and according to organisational policies.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to continuous improvement systems and processes	<p>1.1. Actively encourage and support team members to participate in decision making processes and to assume responsibility and exercise initiative</p> <p>1.2. <i>Communicate</i> the organisation's <i>continuous improvement processes</i> to individuals and teams</p>

ELEMENT	PERFORMANCE CRITERIA
	1.3. Effectively utilise <i>mentoring and coaching</i> to ensure that individuals/teams are able to support the organisation's continuous improvement processes
2. Monitor and report on specified outcomes	2.1. Utilise the organisation's <i>systems</i> and <i>technology</i> to monitor team progress and to identify ways in which planning and operations could be improved 2.2. Apply continuous improvement techniques and processes to improve <i>customer service</i>
3. Support opportunities for further improvement	3.1. Communicate <i>agreed recommendations</i> for improvements in achieving the business plan to team members 3.2. Document and use work performance to identify opportunities for further improvement 3.3. Maintain records, reports and recommendations for improvement within the organisation's systems and processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- functional literacy skills to access and use workplace information
- research, analysis, interpretation and reporting skills
- monitoring and evaluation skills
- communication skills to:
 - gain the commitment of individuals and teams to continuous improvement
 - deal with people openly and fairly
 - use consultation skills effectively
- skills to consolidate opportunities for improvement
- coaching and mentoring skills to provide support to colleagues

Required knowledge

- legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal

REQUIRED SKILLS AND KNOWLEDGE

- opportunity, industrial relations and anti-discrimination
- principles and techniques of:
 - continuous improvement systems and processes
 - benchmarking
 - best practice
- benefits of continuous improvement
- quality approaches which the organisation may implement
- methods that can be used in continuous improvement
- barriers to continuous improvement
- recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- examples of actions taken by the candidate to support continuous improvement including:
- use of work performance to identify improvement
- adjusted plans to reflect changes
- effective communication to all stakeholders
- use of technology to monitor operational progress
- application of suitable recordkeeping processes.

Context of and specific resources for assessment

Assessment must ensure:

- access by the learner and trainer to appropriate documentation and resources normally used in the workplace
- that this unit is assessed in the workplace or in a closely simulated work environment.

Method of assessment

A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • Review of records supporting the organisation's continuous improvement systems and processes, such as: <ul style="list-style-type: none"> • contributions to organisational policies and procedures • contributions to procedures and policies for dealing with continuous improvement processes, and related codes of conduct • actions taken to address information collection, retrieval and use in the workplace • actions taken to address issues and problems within work team • actions taken to address methods of reporting information • learning and development plans for team members • materials developed for coaching, mentoring and training • induction programs developed and/or delivered • actions taken to address internal and external information management issues • reviews of people management • advice and input into management decisions related to continuous improvement • records of people management lessons learned.
Guidance information for assessment	This unit should be assessed with other frontline management units taken as part of this qualification, as applicable to the candidate's leadership role in a work team, and as part of a holistic assessment activity.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording, if used in the performance criteria, is detailed below. Essential operating

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Legislation, codes and national standards relevant to the workplace may include:	<ul style="list-style-type: none"> • award and enterprise agreements and relevant industrial instruments • relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination • relevant industry codes of practice.
<i>OHS considerations</i> may include:	<ul style="list-style-type: none"> • provision of information about OHS legislative requirements and guidelines, and the organisation's OHS policies, procedures and programs • participation in the regular update of OHS systems and procedures • implementation of the continuous improvement processes of the OHS management system • changes to work practices, procedures and the working environment which impact on OHS • organisation's responsibilities to customers and suppliers.
Methods used to <i>communicate</i> with individuals and team may include:	<ul style="list-style-type: none"> • verbal, written or electronic communications • on-the-job mentoring and coaching.
<i>Continuous improvement processes</i> may include:	<ul style="list-style-type: none"> • policies and procedures which allow an organisation to systematically review and improve the quality of its products, services and procedures • cyclical audits and reviews of workplace, team and individual performance • seeking and considering feedback from a range of stakeholders • modifications and improvements to systems, processes, services and products • evaluations and monitoring of effectiveness.
<i>Mentoring and coaching</i> may refer to:	<ul style="list-style-type: none"> • teaching another member of the team, usually focusing on a specific work task or skill • providing feedback, support and

RANGE STATEMENT	
	encouragement on a range of matters <ul style="list-style-type: none"> • providing assistance with problem solving.
<i>Systems</i> may include:	<ul style="list-style-type: none"> • organisation policies and procedures • web based communication devices • attendance at forums, meetings • newsletters and reports.
<i>Technology</i> may include:	<ul style="list-style-type: none"> • computerised systems and software such as databases, project management and word-processing • telecommunications devices • any other technology used to carry out work roles and responsibilities.
<i>Customer service</i> may be:	<ul style="list-style-type: none"> • internal or external, to existing or new clients • identifying needs and priorities in delivering a service to customers • understanding of different levels of customer satisfaction.
<i>Agreed recommendations</i> may be:	<ul style="list-style-type: none"> • identified improvements arising from the continuous improvement process • determined in accordance with organisational policies and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise learning to use information or knowledge management system	1.1. Identify learning needs of <i>relevant personnel</i> and <i>stakeholders</i> for input into, and use of, <i>an information or knowledge management system</i> 1.2. Identify and secure human, financial and physical resources required for <i>learning activities</i> to use an information or knowledge management system 1.3. Organise and facilitate learning activities 1.4. Promote and support use of the system throughout the organisation 1.5. Monitor and document effectiveness of learning activities
2. Manage use of information or knowledge management system	2.1. Ensure implementation of <i>policies and procedures for the information or knowledge management system</i> are monitored for compliance, effectiveness and efficiency 2.2. Address implementation issues and problems as they arise

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Monitor integration and alignment with data and information systems</p> <p>2.4. Collect information on achievement of <i>performance measures</i></p> <p>2.5. Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required</p>
3. Review use of information or knowledge management system	<p>3.1. Analyse effectiveness of system and report on strengths and limitations of the system</p> <p>3.2. Review business and operational plan and determine how effectively the system is contributing to intended outcomes</p> <p>3.3. Make recommendations for improvement to system, policy or work practices</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem-solving skills to ensure the system is working in accordance with organisational expectations and to deal with contingencies
- technology skills to work with and manage the use of the information or knowledge management system.

Required knowledge

- legislation, codes of practice and national standards, for example:
 - privacy and confidentiality legislation
 - freedom of information legislation
 - AS 5037:2005 Knowledge management - A guide
- organisational policies and procedures, for example:
 - records management
 - information management
 - customer service
 - commercial confidentiality
- organisational operations, and existing data and information systems.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> analysis of the strengths and weaknesses of information or knowledge management system/s and evaluation of suitability for a particular work or organisational context knowledge of relevant legislation, codes of practice and national standards.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to system access to system user feedback.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written reports reviewing and evaluating information or knowledge management systems direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate observation of presentations oral or written questioning to assess knowledge of relevant organisational policies and procedures review of identified learning needs personnel and stakeholders regarding the information or knowledge management system evaluation of monitoring and documentation about the effectiveness of learning activities analysis documentation reporting on the strengths and limitations of the system review of recommendations made for improvements to the system, policy or work practices.
Guidance information for	Holistic assessment with other units relevant to the

EVIDENCE GUIDE**assessment**

industry sector, workplace and job role is recommended, for example:

- other units from the Diploma of Management.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant personnel include:

- managers, leaders, supervisors and coordinators
- owners
- staff, team members and colleagues

Stakeholders include:

- clients and customers
- employee representatives
- funding bodies
- industry, professional and trade associations
- regulatory bodies and authorities
- sponsors
- tenderers, suppliers and contractors

Information or knowledge management is defined as:

- equipment, strategies, methods, activities and techniques used formally and informally by individuals and the organisation to identify, collect, organise, store, retrieve, analyse, share and draw on information and knowledge valuable to the work of the organisation

An information or knowledge management system:

- comprises policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders

Learning activities include:

- coaching and mentoring programs
- help desks
- information sessions, briefings, workshops and training programs
- paper-based or electronic (including intranet)

RANGE STATEMENT	
	learning opportunities <ul style="list-style-type: none"> • use of expert workers such as coaches and mentors to help other personnel use the system
<i>Policies and procedures for the information or knowledge management system</i> cover:	<ul style="list-style-type: none"> • complying with legislative requirements (such as privacy, confidentiality and defamation requirements) and other policies and procedures • content guidelines • ensuring accuracy and relevance of knowledge input into the system • mechanisms, formats and styles of input to system, including appropriate alternative formats for people with a disability • permissions for input • removing out-of-date, inaccurate and content that is no longer relevant • selecting, maintaining and disposing of knowledge in the system • sharing knowledge in the system
<i>Performance measures</i> include:	<ul style="list-style-type: none"> • key performance indicators • other systems and measures to enable assessment of how, when, where and why outcomes are being achieved • performance objectives • performance standards (including codes of conduct) • qualitative or quantitative mechanisms to measure individual performance

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify opportunities to do things better	1.1. Be aware of <i>own role</i> in workplace innovation 1.2. Pro-actively identify <i>opportunities for improvement</i> in own area of work 1.3. Gather and review <i>information which may be relevant to ideas</i> and which might assist in gaining support for ideas
2. Discuss and develop ideas with others	2.1. Identify <i>people who could provide input</i> into ideas for improvements 2.2. Select the <i>best way of approaching people</i> to begin sharing ideas 2.3. Seek <i>feedback</i> on improvement of ideas, and discuss and develop <i>options and possible variations</i> 2.4. Review and select ideas for follow-up based on feedback and further review
3. Address the	3.1. Take action to implement <i>routine changes</i> in

ELEMENT	PERFORMANCE CRITERIA
practicalities of change	<p>consultation with others and within scope of own responsibility</p> <p>3.2. Identify and articulate <i>issues and practical processes</i> for implementing proposed ideas</p> <p>3.3. Present ideas and practical suggestions to the appropriate people about how improvements could be made</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to liaise with other team members, to discuss a range of ideas and to be open to different opinions
- comprehension skills to review and interpret information from a wide range of sources
- organisational skills to articulate practical processes and actions for change
- problem-solving skills to identify and anticipate problems at a practical operational level and to develop possible solutions.

Required knowledge

- role and impact of innovation in the workplace at a practical operational level and the 'bigger picture' for innovation in the relevant work or community context
- role of individuals in suggesting and making improvements and the importance of pro-active involvement
- positive impacts and the challenges of change and innovation
- types of changes that can occur as a result of effective individual participation
- typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- ways in which improvements and change can be suggested to maximise likelihood of support.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • generation of practical ideas in response to a specific workplace situation • effective and open interaction with others to discuss and develop ideas • knowledge and understanding of the role of individuals in contributing to workplace innovation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • interaction with others to reflect the collaborative nature of the improvement/innovation process.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of the candidate participating in brainstorming, discussions and other collaborative activities to develop ideas • evaluation of candidate's ability to generate ideas to address a range of practical operational situations • evaluation of feedback from other people involved in the collaborative process about the candidate's communication approaches and abilities • oral or written questioning to assess knowledge of the role of innovation, the role of individuals in the innovation process and the types of techniques that can be used.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Own role</i> may relate to:	<ul style="list-style-type: none"> • current organisational practice in relation to new ideas • knowledge of ways to suggest new ideas • scope of individual discretion and freedom in relation to new ideas • who needs to be involved in the process
<i>Opportunities for improvement</i> may relate to:	<ul style="list-style-type: none"> • changes in the physical work environment • different storage or maintenance procedures • different ways of communicating within the team • introduction of new technology • job role changes • new customer base • new work practices or services • staffing changes • work processes and procedures
<i>Information which may be relevant to ideas</i> may include:	<ul style="list-style-type: none"> • examples of similar approaches in other contexts or organisations • media articles about similar ideas • notes about how the idea could improve efficiency or service levels • pricing information
<i>People who could provide input</i> may include those who might:	<ul style="list-style-type: none"> • challenge and test the ideas • have supervisory or management responsibility • promote the ideas to others • provide technical knowledge • resource the ideas going forward • review any budgetary implications • work in the same area
<i>Best way of approaching people</i> may be influenced by:	<ul style="list-style-type: none"> • degree of formality required • location of people (e.g. may not be on-site) • need for any supporting documentation

RANGE STATEMENT	
	<ul style="list-style-type: none"> time pressures and priorities
<i>Feedback</i> could be gained in a range of ways and may include:	<ul style="list-style-type: none"> asking questions talking to colleagues or supervisors using brainstorming techniques using 'what if' scenarios
<i>Options and possible variations</i> development may occur by:	<ul style="list-style-type: none"> considering resources needed considering time required taking on board ideas from other people thinking through all aspects of the ideas whole new concepts that come out of discussions
<i>Routine changes</i> may include:	<ul style="list-style-type: none"> adjustments to work practices with minimal impact on others or within a small team changes that do not require management approvals changes that have the support of management and for which authority is given for immediate action to be taken
<i>Issues and practical processes</i> may relate to:	<ul style="list-style-type: none"> any approvals required cost of implementation internal politics need for a planned communication approach (internal or external) personalities and philosophies of others in the workplace relationship of the idea to organisation priorities

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Start computer, system information and features	1.1. Adjust workspace, furniture and equipment to suit user <i>ergonomic requirements</i> 1.2. Ensure <i>work organisation</i> meets organisational and <i>occupational health and safety (OHS) requirements</i> for computer operation 1.3. Start computer or log on according to user procedures 1.4. Identify basic functions and features using system information 1.5. Customise desktop configuration, if necessary, with assistance from appropriate persons 1.6. Use help functions as required
2. Navigate and manipulate desktop environment	2.1. Open, close and access features by selecting correct <i>desktop icons</i> 2.2. Open, resize and close desktop windows by using correct window functions and roles 2.3. Create shortcuts from the desktop, if necessary, with assistance from appropriate persons
3. Organise files using basic directory and folder structures	3.1. Create folders/subfolders with suitable names 3.2. Save files with suitable names in appropriate folders 3.3. Rename and move folders/subfolders and files as required 3.4. Identify folder/subfolder and <i>file attributes</i> 3.5. Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6. Save folders/subfolders and files to <i>appropriate</i>

ELEMENT	PERFORMANCE CRITERIA
	<p><i>media</i> where necessary</p> <p>3.7. Search for folders/subfolders and files using appropriate software tools</p> <p>3.8. Restore deleted folder/subfolders and files as necessary</p>
4. Print information	<p>4.1. Print information from installed printer</p> <p>4.2. View progress of print jobs and delete as required</p> <p>4.3. Change default printer if installed and required</p>
5. Shut down computer	<p>5.1. Close all open applications</p> <p>5.2. Shut-down computer according to user procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements, to comprehend basic workplace documents, to interpret basic user manuals and to proofread simple documents
- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions and to receive feedback
- problem-solving skills to solve routine problems in the workplace, while under direct supervision
- technology skills to use equipment safely while under direction, basic keyboard and mouse skills and procedures relating to logging on and accessing a computer
- basic typing techniques and strategies.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - OHS
- basic ergonomics of computer use
- main types and parts of computers, and basic features of different operating systems
- suitable file naming conventions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- navigation and manipulation of the desktop environment within the range of assigned workplace tasks
- knowledge of organisational requirements for simple documents and filing conventions
- application of simple keyboard functions to produce documents with a degree of speed and accuracy relevant to the level of responsibility required.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of workplace documentation.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- demonstration of techniques
- oral or written questioning to assess knowledge of computer operations and functions
- review of shortcuts created
- review of folders/subfolders created.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBITU102A Develop keyboard skills
- other general administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Ergonomic requirements</i> may include:	<ul style="list-style-type: none"> • avoiding radiation from computer screens • chair height, seat and back adjustment • document holder • footrest • keyboard and mouse position • lighting • noise minimisation • posture • screen position • workstation height and layout
<i>Work organisation</i> may include:	<ul style="list-style-type: none"> • exercise breaks • mix of repetitive and other activities • rest periods • visual display unit (VDU) eye testing
<i>Occupational health and safety requirements</i> may include:	<ul style="list-style-type: none"> • OHS guidelines related to the use of the screen equipment, computing equipment and peripherals, ergonomic work stations, security procedures, customisation requirements • statutory requirements
<i>Desktop icons</i> include:	<ul style="list-style-type: none"> • directories/folders • files • network devices • recycle bin and waste basket
<i>File attributes</i> include:	<ul style="list-style-type: none"> • dates • size
<i>Appropriate media</i> may include:	<ul style="list-style-type: none"> • CDs • diskettes • local hard drive • other locations on a network • USB/ Flash/Thumb drives • zip disks

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and prepare resources	1.1. Select and use appropriate <i>technology</i> and <i>software</i> applications to produce required <i>business documents</i> 1.2. Select layout and style of publication according to information and <i>organisational requirements</i> 1.3. Ensure document design is consistent with company and/or client requirements, using basic design principles 1.4. Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1. Identify, open and generate files and records according to task and organisational requirements 2.2. Design document to ensure efficient entry of information and to maximise the presentation and appearance of information 2.3. Use a range of <i>functions</i> to ensure consistency of design and layout 2.4. Operate <i>input devices</i> within designated requirements
3. Produce document	3.1. Complete document production within designated time lines according to organisational requirements 3.2. Check document produced to ensure it meets task requirements for style and layout 3.3. Store document appropriately and save document to

ELEMENT	PERFORMANCE CRITERIA
	avoid loss of data 3.4. Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1. Proofread document for readability, accuracy and consistency in language, style and layout prior to final output 4.2. Make any modifications to document to meet requirements 4.3. <i>Name</i> and <i>store</i> document in accordance with organisational requirements and exit the application without data/loss damage 4.4. Print and present document according to requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding and computer skills to complete a range of formatting and layout tasks
- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread documents to ensure clarity of meaning and conformity to organisational requirements
- numeracy skills to access and retrieve data
- problem-solving skills to determine document design and production processes.

Required knowledge

- appropriate technology for production requirements
- functions and features of contemporary computer applications
- organisational policies, plans and procedures
- organisational requirements for document design e.g. style guide.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- designing and producing a minimum of 3 completed business documents, using at least 2 software applications in the production of each document
- using appropriate data storage options
- knowledge of the functions and features of contemporary computer applications.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- access to examples of style guides and organisational procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of final printed documents
- demonstration of techniques
- observation of presentations
- oral or written questioning to assess knowledge of software applications.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- general administration units
- other IT use units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Technology</i> may include:	<ul style="list-style-type: none"> • computers • photocopiers • printers • scanners
<i>Software</i> may include:	<ul style="list-style-type: none"> • accounting packages • database packages • presentation packages • spreadsheet packages • word processing packages
<i>Business documents</i> may include:	<ul style="list-style-type: none"> • accounts statements • client databases • newsletters • project reviews • proposals • reports • web pages
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • budgets • correctly identifying and opening files • legal and organisational policies, guidelines and requirements • locating data • log-on procedures • manufacturers' guidelines • occupational health and safety policies, procedures and programs • quality assurance and/or procedures manuals • saving and closing files • security • storing data
<i>Functions</i> may include:	<ul style="list-style-type: none"> • alternating headers and footers • editing • merging documents

RANGE STATEMENT	
	<ul style="list-style-type: none"> • spell checking • table formatting • using columns • using styles
Input devices may include:	<ul style="list-style-type: none"> • keyboard • mouse • numerical key pad • scanner
Naming documents may include:	<ul style="list-style-type: none"> • appropriate file type • authorised access • file names according to organisational procedure e.g. numbers rather than names • file names which are easily identifiable in relation to the content • file/directory names which identify the operator, author, section, date etc. • filing locations • organisational policy for backing up files • organisational policy for filing hard copies of documents • security
Storing documents may include:	<ul style="list-style-type: none"> • storage in directories and sub-directories • storage on CD-ROMs, disk drives or back-up systems • storing/filing hard copies of computer generated documents • storing/filing hard copies of incoming and outgoing facsimiles • storing/filing incoming and outgoing correspondence

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement operational plan	<p>1.1. Collate, analyse and organise details of <i>resource requirements</i> in consultation with <i>relevant personnel, colleagues and specialist resource managers</i></p> <p>1.2. Implement <i>operational plans</i> to contribute to the achievement of organisation's performance/business plan</p> <p>1.3. Identify and use <i>key performance indicators</i> (KPIs) to monitor operational performance</p> <p>1.4. Undertake <i>contingency planning</i> and <i>consultation processes</i></p> <p>1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1. Recruit and induct employees within <i>organisation's policies, practices and procedures</i></p> <p>2.2. Implement plans for acquisition of physical</p>

ELEMENT	PERFORMANCE CRITERIA
	resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	<p>3.1. Monitor <i>performance systems and processes</i> to assess progress in achieving profit/productivity plans and targets</p> <p>3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5. Present recommendations for variation to operational plans to the <i>designated persons/groups</i> and gain approval</p> <p>3.6. Implement <i>systems, procedures and records</i> associated with performance in accordance with organisation's requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
 - contingency planning
 - methods for monitoring and reporting on performance
 - monitoring and implementing operations and procedures
 - problem identification and methods of resolution

REQUIRED SKILLS AND KNOWLEDGE

- relevant budgeting and financial analysis, interpretation and reporting requirements
- resource management systems at the tactical implementation level
- resource planning and acquisition
- tactical risk analysis including identification and reporting requirements.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required
- knowledge of principles and techniques associated with monitoring and implementing operations and procedures.

Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of documentation outlining contingency planning and consultation processes undertaken
- demonstration of techniques in managing performance
- evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.

EVIDENCE GUIDE**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the Certificate IV in Frontline Management.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Resource requirements may refer to:

- goods and services to be purchased and ordered
- human, physical and financial resources - both current and projected
- stock requirements and requisitions

Relevant personnel, colleagues and specialist resource managers may include:

- colleagues and specialist resource managers
- managers
- occupational health and safety committees and other people with specialist responsibilities
- other employees
- people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities
- supervisors

Operational plans may refer to:

- organisational plans
- tactical plans developed by the department or section to detail product and service performance

Key performance indicators may refer to:

- measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements

RANGE STATEMENT	
<i>Contingency planning</i> may refer to:	<ul style="list-style-type: none"> • contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
<i>Consultation processes</i> may refer to:	<ul style="list-style-type: none"> • mechanisms used to provide feedback to the work team in relation to outcomes of consultation • meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans
<i>Organisation's policies, practices and procedures</i> may include:	<ul style="list-style-type: none"> • organisational culture • Standard Operating Procedures • organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • undocumented practices in line with organisational operations
<i>Performance systems and processes</i> may refer to:	<ul style="list-style-type: none"> • informal systems used by frontline managers for the work team in the place of existing organisation-wide systems • formal processes within the organisation to measure performance, such as: <ul style="list-style-type: none"> • feedback arrangements • individual and teamwork plans

RANGE STATEMENT	
	<ul style="list-style-type: none"> • KPIs • specified work outcomes
<i>Designated persons/groups</i> may include:	<ul style="list-style-type: none"> • other affected work groups or teams and groups designated in workplace policies and procedures • those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers
<i>Systems, procedures and records</i> may include:	<ul style="list-style-type: none"> • databases and other recording mechanisms for ensuring records are kept in accordance with organisational requirements • individual and team performance plans • organisational policies and procedures relative to performance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan promotional activities	1.1. Identify and assess <i>promotional activities</i> to ensure compatibility with <i>organisational requirements</i> 1.2. Plan and schedule promotional activities according to the marketing needs of the organisation 1.3. Determine overall promotional objectives in consultation with <i>designated individuals and groups</i> 1.4. Ensure that time lines and costs for promotion of activities are realistic and consistent with budget resources 1.5. Develop action plans to provide details of products and services being promoted
2. Coordinate promotional activities	2.1. Ensure <i>personnel and resources</i> to support promotional activities are identified and prepared to facilitate the achievement of promotional goals 2.2. Identify and agree <i>roles and responsibilities</i> for delivery of promotional services and allocate to relevant personnel 2.3. Establish and conduct relationships with targeted groups in a manner which enhances the positive image of the organisation 2.4. Use <i>networks</i> to assist in the implementation of promotional activities
3. Review and report on	3.1. Analyse audience feedback and data to determine

ELEMENT	PERFORMANCE CRITERIA
promotional activities	<p>the impact of the promotional activity on the delivery of products and services</p> <p>3.2. Assess effectiveness of planning processes to identify possible improvements in future activities</p> <p>3.3. Collect <i>feedback</i> and provide to personnel and agencies involved in promotional activity</p> <p>3.4. Analyse costs and time lines to evaluate the benefits accruing from the promotional activities</p> <p>3.5. Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of promotional activities</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read a variety of texts; to prepare general information and papers; and to write formal and informal letters according to target audience
- technology skills to select and use technology appropriate to a task
- problem-solving skills to manage contingencies in promotional activities
- numeracy skills to analyse data and to compare time lines and promotional costs against budgets.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - occupational health and safety (OHS)
- planning processes for organising promotional activities
- organisational marketing plan and associated budgets.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- designing and delivering promotional presentations
- evaluating promotional impacts
- presenting and advocating promotional strategies within the organisation
- assessing and reporting on customer satisfaction

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of products/services and promotional strategies.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of action plans developed for products and services being promoted
- analysis of responses to case studies and scenarios
- demonstration of techniques
- observation of presentations
- assessment of written reports.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other marketing, sales or public relations units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Promotional activities may include:

- advertisements
- client functions
- employee functions
- media announcements
- product launches
- web pages

Organisational requirements may include:

- access and equity principles and practices
- confidentiality and security requirements
- defined resource parameters
- ethical standards
- filing and documentation storage processes
- goals, objectives, plans, systems and processes
- legal and organisational policies, guidelines and requirements
- OHS policies, procedures and programs
- payment and delivery options
- pricing and discount policies
- quality and continuous improvement processes and standards
- quality assurance and/or procedures manuals
- replacement and refund policy and procedures
- who is responsible for products or services

Designated individuals and groups may include:

- colleagues
- committees
- customers
- external organisations
- line management
- supervisor

Personnel and resources may include:

- management
- marketing funds
- organisational personnel
- promotional products

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify marketing opportunities	<p>1.1. Analyse <i>information on market and business needs</i> to identify <i>marketing</i> opportunities</p> <p>1.2. Research potential <i>new markets</i> and assess opportunities to enter, shape or influence the market in terms of likely <i>contribution to the business</i></p> <p>1.3. Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities</p>
2. Investigate marketing opportunities	<p>2.1. Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities</p> <p>2.2. <i>Evaluate</i> each opportunity to determine its impact on current business and customer base</p> <p>2.3. Use an assessment of <i>external factors</i>, costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Determine probable return on investment and potential competitors</p> <p>2.5. Describe and rank marketing opportunities in terms of their viability and likely contribution to the business</p>
3. Evaluate required changes to current operations	<p>3.1. Identify and document changes needed to current operations to take advantage of viable marketing opportunities</p> <p>3.2. Ensure organisational changes to service an increased or different customer base include provision for continued quality of service to existing customers</p> <p>3.3. Estimate resource requirements for changed operations</p> <p>3.4. Determine and communicate viability of making changes to current operations to key stakeholders</p> <p>3.5. Document newly identified marketing opportunities and required changes</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to identify and interpret market information, to write in a range of styles for different audiences and to document outcomes and requirements
- numeracy skills to calculate and evaluate financial information on new marketing options
- research and evaluation skills to gain information on and interpret market trends to identify marketing opportunities.

Required knowledge

- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
 - anti-discrimination legislation and the principles of equal opportunity, equity

REQUIRED SKILLS AND KNOWLEDGE

- and diversity
- ethical principles
- marketing codes of practice and conduct such as the Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice; Free TV Australia Commercial Television Industry Code of Practice; and the Australian E-commerce Best Practice Model
- privacy laws
- Trade Practices Act
- organisational marketing plan, structure, products and services
- principles of marketing and the marketing mix
- statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- identifying and evaluating marketing opportunities to determine whether they will meet organisational objectives
- documenting how current business operations will need to be modified and what resources will be required to take advantage of newly identified and evaluated opportunities.

Context of and specific resources for assessment

Assessment must ensure:

- access to office equipment and resources
- access to organisational strategic and marketing plans.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • assessment of written reports on identified marketing opportunities and evaluation activities • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations on opportunity identification, evaluation and required resources to capitalise on new marketing opportunities • oral or written questioning to assess knowledge and understanding • review of authenticated documents from the workplace or training environment • review of testimony from team members, colleagues, supervisors or managers.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop option/s for risk control	1.1. Review <i>hazard register</i> , outcomes of incident investigations and risk assessments to identify <i>hazards</i> requiring control action 1.2. Apply knowledge of OHS legislation and standards to develop a range of options to control specific <i>risks</i> in the workplace 1.3. Apply the <i>principles of the hierarchy of control</i> when developing risk control options 1.4. Seek input from <i>stakeholders</i> and <i>key personnel</i> 1.5. Seek advice from <i>OHS specialists</i> and <i>technical advisors</i> where required
2. Select appropriate option/s to control risks	2.1. Review outcomes of risk assessments to inform the process of selecting option/s to control risks 2.2. Prioritise appropriate interventions when selecting risk controls 2.3. Identify potential <i>factors that may limit effectiveness of controls</i> 2.4. Consult with and involve workplace stakeholders in selecting appropriate control options 2.5. Communicate recommendations for risk control to stakeholders
3. Contribute to implementation of	3.1. Seek appropriate authority and relevant resources to implement controls

ELEMENT	PERFORMANCE CRITERIA
controls	<p>3.2. Identify and document <i>actions required to achieve change</i></p> <p>3.3. Consult with and involve workplace stakeholders in implementation of change</p> <p>3.4. Provide advice on the fitting, use, maintenance and storage of <i>personal protective equipment</i> (PPE)</p>
4. Contribute to monitoring and evaluation of effectiveness of controls	<p>4.1. Monitor and evaluate the extent of change as a consequence of new controls, in consultation with stakeholders</p> <p>4.2. Monitor and document compliance with new procedures</p> <p>4.3. Access <i>workplace sources of information and data</i> to evaluate effectiveness of risk controls and to check for new hazards introduced as a result of controls</p> <p>4.4. Identify areas for further improvement in consultation with stakeholders and action as appropriate</p> <p>4.5. Develop and document an improvement plan</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- consultation and negotiation skills to develop risk management plans and implement risk controls effectively
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities across all levels of an organisation
- evaluation skills to analyse the effectiveness of own performance in implementing strategies chosen to control OHS risks
- information management skills to evaluate OHS data
- interpersonal skills to establish rapport and build networks with a range of internal and external stakeholders
- literacy skills to prepare reports for a range of target groups
- organisational and time management skills to sequence tasks and meet timelines
- research and data analysis skills to assess resources required to systematically manage OHS and to analyse relevant workplace information and data

REQUIRED SKILLS AND KNOWLEDGE

- research and data analysis skills to evaluate interactions between employees, their activities, equipment, environment and work systems
- technology skills to access internal and external OHS data.

Required knowledge

- appropriate data collection methods for OHS purposes
- characteristics, mode of action and measurement of major hazard types
- concepts of risks, factors that affect risk and difference between a hazard and a risk
- internal and external sources for OHS information and data
- legislative requirements for:
 - consultation and communication
 - information and data collection
 - notification of incidents
 - record keeping
 - reporting of incidents
 - specific hazards
- organisational culture as it impacts on the workgroup
- organisational policies and procedures for managing OHS
- organisational work processes and structure
- principles and practices of systematic approaches to managing OHS
- principles of incident causation and injury processes
- principles of the hierarchy of control
- principles, tools and techniques to identify and control workplace hazards and manage risks in the OHS context
- relevant state/territory and commonwealth OHS legislation, codes of practice and standards
- requirements for individual fitting, use, maintenance and storage of a range of PPE items
- roles and responsibilities of personnel as specified in relevant OHS legislation
- sources of OHS data
- standard industry controls for a range of hazards.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • contribution to the development and implementation of risk control options to control risks associated with hazards in the workplace or simulated environment • contribution to the monitoring and evaluation of the effectiveness of risk controls implemented and the making of appropriate adjustments where necessary • knowledge of the principles of the hierarchy of control.

EVIDENCE GUIDE

risks.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazard register may include:

- a list of hazards
- location of hazards
- range of possible scenarios or circumstances under which hazards may cause injury or damage
- results of the risk analysis related to the hazards

Hazards may include:

- sources of potential harm in terms of human injury, ill health, damage to property, damage to the environment, or a combination of these, including:
 - biological
 - chemical
 - environment
 - mechanical and/or electrical
 - physical
 - psychosocial
 - radiological
 - nuclear

Risks may include:

- the chance of something occurring that will result in injury or damage measured in terms of consequences (injury or damage) and likelihood of the consequence

Principles of the hierarchy of control may include:

- eliminating hazards
- and where this is not practicable, minimising risk by:
 - substitution

RANGE STATEMENT	
	<ul style="list-style-type: none"> • isolating hazard from personnel • using engineering controls • using administrative controls (such as procedures, training) • using PPE
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • community • employees • health and safety, and other employee representatives • managers • OHS committees • supervisors
<i>Key personnel</i> may include:	<ul style="list-style-type: none"> • managers from other areas • people involved in OHS decision making or who are impacted by decisions
<i>OHS specialists</i> may include:	<ul style="list-style-type: none"> • ergonomists • health professionals • injury management advisors • occupational hygienists
<i>Technical advisors</i> may include:	<ul style="list-style-type: none"> • engineers (design, acoustic, safety, mechanical, civil) • legal practitioners • maintenance and tradespeople • workplace trainers and assessors
<i>Factors that may limit effectiveness of controls</i> may include:	<ul style="list-style-type: none"> • cultural diversity • language • literacy and numeracy • shift work and rostering arrangements • training required • workplace culture related to OHS, including commitment by managers and supervisors, and compliance with procedures and training • workplace organisational structures (for example geographic, hierarchical)
<i>Actions required to achieve change</i> may include:	<ul style="list-style-type: none"> • development of new procedures or revision of existing procedures • purchase of equipment or modification of equipment • training
<i>Personal protective equipment</i>	<ul style="list-style-type: none"> • equipment designed to be worn by a person to

RANGE STATEMENT	
may include:	provide protection from hazards such as: <ul style="list-style-type: none"> • clothing and footwear • face and eye protection • hand protection • head protection • hearing protection • respiratory protection
<i>Workplace sources of information and data</i> may include:	<ul style="list-style-type: none"> • audits • Australian Standards • hazard and incident reports • incident investigations • manufacturers' manuals and specifications • material safety data sheets (MSDSs) and registers • minutes of meetings • OHS legislation • reports • workplace inspections

BSBPMG409A Apply project scope-management techniques

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Services Training Package Version 8.0</i>.</p> <p>Replaces BSBPMG401A Apply project scope management techniques.</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the control of a project's scope by assisting with identifying its objectives, deliverables, constraints, assumptions and outcomes; and by applying controls once the project has commenced.

Application of the Unit

This unit applies to a project practitioner working in a project support role.

The individual may be operating in a large or small organisation and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale self-directed team.

This unit has generic application to a range of industries and organisations and a range of projects, from simple to complex.

In the context of this unit a project is defined as involving:

- a practical and comprehensive project plan
- a documented communications strategy
- a detailed project budget
- strategic engagement with stakeholders

- a risk, issues and change-management methodology
- a quality plan with assurance and control processes
- a supportive team-based environment.

The functions performed in project work, where formal project management methodology is not the main focus, are covered by BSBPMG522A Undertake project work.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Contribute to defining project scope	1.1 Review <i>project initiation documentation</i> and assist in identifying <i>project objectives and requirements</i> 1.2 Contribute to identifying <i>project deliverables</i> 1.3 Contribute to identifying measurable outcomes to enable evaluation of project performance 1.4 Contribute to developing and documenting the <i>scope-management plan</i> 1.5 Assist in obtaining agreement to scope from <i>relevant project</i>
---	--

	<i>authority</i>
2. Apply project scope controls	<p>2.1 Undertake work according to agreed project scope-management plan and by using established <i>change-control procedures</i> and <i>performance-measurement procedures</i></p> <p>2.2 Communicate instances of non-compliance with overall scope to the project manager and other team members</p>
3. Contribute to review of scope controls	<p>3.1 Measure progress to determine potential, perceived and actual scope changes</p> <p>3.2 Appropriately report scope changes</p> <p>3.3 Assist in the review of project outcomes to determine the effectiveness of initial and subsequent scope-management approaches</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
 - document agreed components of scope-management plan
 - interpret potentially complex project plans and documentation
 - report on project progress as required
- numeracy skills to:
 - measure and control project scope
 - review project timeframes and deliverables
- learning skills to identify training requirements necessary for effective consultation and scope management
- planning and organising skills to:
 - measure progress against agreed objectives
 - monitor and respond to compliance issues
- self-management skills to manage multiple tasks and ensure project progresses on time
- teamwork and communication skills to liaise with other members of the project team on a range of project scope-management issues and challenges.

Required knowledge

- components of a project scope-management plan
- factors likely to impact on project scope
- formal change-control processes
- methods for measuring work outcomes and progress against plans
- methods for segmenting and documenting a work breakdown structure
- procedures for reporting scope change
- types of project initiation documentation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • contributing to monitoring and control of project scope • recording project scope-management plan • interpreting project initiation documentation for the purposes of documenting project scope.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to project documentation, which includes information about project scope.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • analysis of responses addressing different project scope-management scenarios • oral or written questioning to assess knowledge of strategies for managing project scope and their application to different situations.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Project initiation documentation</i> may include:	<ul style="list-style-type: none"> • approved project charter or mandate • business case • changes to internal or external organisations, legislation and/or regulations • documentation accessed through various accessibility modes • feasibility study • minutes of management or executive decisions • organisation strategic and business plans • outcomes and recommendations of associated projects.
<i>Project objectives and requirements</i> may include:	<ul style="list-style-type: none"> • specifications for products and/or services • statements in measurable format.
<i>Project deliverables</i> may include:	<ul style="list-style-type: none"> • discrete products, outputs and services defined in the project scope • high-level aggregations in the work breakdown structure.
<i>Scope-management plan</i> may include:	<ul style="list-style-type: none"> • activities and tasks in the work breakdown structure • constraints, assumptions and exclusions • deliverables • high-level risk identification • key personnel • preferred work organisation • project benefits and outcomes • project objectives.
<i>Relevant project authority</i> may include:	<ul style="list-style-type: none"> • other body or person with delegated authority under project governance arrangements • project manager • project steering committee
<i>Change-control procedures</i> may include:	<ul style="list-style-type: none"> • adjusting project scope documentation in response to scope changes approved by relevant authority • identifying and monitoring designated elements of the project scope likely to change

	<ul style="list-style-type: none">• identifying and monitoring pressures that may influence scope creep• maintaining scope change documentation for project audit.
<i>Performance-measurement procedures</i> may include:	<ul style="list-style-type: none">• using tools and techniques to manage and measure project progress in terms of time and resources.

Unit Sector(s)

Management and Leadership – Project Management

BSBPMG522A Undertake project work

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Services Training Package Version 8.0</i>.</p> <p>Replaces BSBPMG510A Manage projects.</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake a straightforward project or a section of a larger project. This unit addresses the management of projects, including developing a project plan, administering and monitoring the project, finalising the project, and reviewing the project to identify lessons learned for application to future projects.

Application of the Unit

The unit focuses on the application of project-management skills and the requirement to meet timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Define project	1.1 Access <i>project scope and other relevant documentation</i> 1.2 Define project stakeholders 1.3 Seek clarification from <i>delegating authority</i> of issues related to project and <i>project parameters</i> 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop <i>project plan</i> in line with the project parameters 2.2 Identify and access appropriate <i>project-management tools</i> 2.3 Formulate risk-management plan for project, including work health and safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide <i>support for project team members</i> , especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain <i>required record-keeping systems</i> throughout the project 3.4 Implement and monitor plans for managing project finances,

	<p>resources and quality</p> <p>3.5 Complete and forward project reports as required to stakeholders</p> <p>3.6 Undertake risk management as required to ensure project outcomes are met</p> <p>3.7 Achieve project deliverables</p>
4. Finalise project	<p>4.1 Complete financial record keeping associated with project and check for accuracy</p> <p>4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles</p> <p>4.3 Complete project documentation and obtain necessary sign-offs for concluding project</p>
5. Review project	<p>5.1 Review project outcomes and processes against the project scope and plan</p> <p>5.2 Involve team members in the project review</p> <p>5.3 Document lessons learned from the project and report within the organisation</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and negotiation skills to work with team members and other stakeholders to maintain project schedules
- communication skills to relate to people with diverse abilities and from diverse backgrounds in a culturally appropriate way
- literacy skills to read, write and review a range of documentation
- numeracy skills to:
 - analyse data
 - compare time lines and promotional costs against budgets
- planning and organising skills to develop, monitor and maintain implementation schedules.

Required knowledge

- organisation's mission, goals, objectives and operations and how the project relates to them
- organisational structure, and lines of authority and communication in the organisation
- relevant legislation and codes from all levels of government that may affect aspects of business operations, including:
 - anti-discrimination legislation
 - codes of practice
 - environmental issues
 - ethical principles
 - WHS
 - privacy laws.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • developing a project plan • examples of monitoring arrangements and evaluation of the efficacy of the project plan in addressing project time lines and budget • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to workplace project documentation • demonstration of all required skills, knowledge and performance in a workplace-based project.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • observation of presentations

	<ul style="list-style-type: none"> oral or written questioning to assess knowledge of the organisation's mission, goals, objectives and operations and how the project relates to them review of project risk-management plan and project plan evaluation of project reports forwarded to stakeholders analysis of documentation reviewing project outcomes and processes against the project scope and plan evaluation of documentation outlining lessons learned from the project.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other project management units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Project scope and other relevant documentation</i> may include:	<ul style="list-style-type: none"> contract or other agreement project brief project plan or summary other documents outlining: <ul style="list-style-type: none"> expected outcomes of the project inclusions and exclusions from project project resources quality standards for project timeframes for project.
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> clients or customers (internal and external) funding bodies management, employees and relevant key personnel (internal and external) with special responsibilities project sponsor.
<i>Delegating authority</i> may include:	<ul style="list-style-type: none"> customer or client funding body manager or management representative

	<ul style="list-style-type: none"> project sponsor.
<i>Project parameters</i> may include:	<ul style="list-style-type: none"> project finances or budget integration of project within organisation legislative and quality standards physical, human and technical resources available or required for project procurement requirements associated with project reporting requirements risks associated with project, including WHS scope of project time lines.
<i>Project plan</i> may include:	<ul style="list-style-type: none"> details of how the project will be managed roles and responsibilities time lines work breakdown structure.
<i>Project management tools</i> may include:	<ul style="list-style-type: none"> cost schedule control system Critical Path Method Gantt and bar charts life cycle cost analysis logistics support analysis PERT charts project management software risk and issues logs spreadsheets technical resources required for the project, for example WHS management-system tools.
<i>Support for project team members</i> may include:	<ul style="list-style-type: none"> additional physical, human and technical resources (within allocated budget) if and as required encouragement feedback learning and development regular project team meetings supervision, mentoring and coaching.
<i>Required record-keeping systems</i> may include systems for:	<ul style="list-style-type: none"> correspondence financial data, including costs, expenditure, income generated and purchases project outcomes quality data, including any test results recording of time spent on project and progress in completing project samples, prototypes and models.

Resources may include:	<ul style="list-style-type: none">• human• physical• technical.
Risk management may include:	<ul style="list-style-type: none">• changing roles and responsibilities in project team• negotiating an extension of deadline, or redefining completion or quantity or quality of outcomes• outsourcing some aspects of the project• reducing costs• researching and applying more efficient methods for completing project tasks• seeking further resources to meet deadline• sharing ideas to gain improvements to work undertaken in the project.
Necessary sign-offs may be required by:	<ul style="list-style-type: none">• clients• funding body• management• project sponsor.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain knowledge of products and services	<p>1.1. Actively and regularly research knowledge and understanding of <i>industry products and services</i> using <i>authoritative sources</i></p> <p>1.2. Use available <i>product and service documentation</i> to identify and understand characteristics of products and services, and to make comparisons with other products and services</p> <p>1.3. Accurately document and maintain <i>information</i> on products and services in a format consistent with <i>organisational requirements</i></p> <p>1.4. Apply acquired knowledge to improve quality within personal work areas</p>
2. Recommend products and services	<p>2.1. Ensure that recommendations on products and services are in line with organisational requirements</p> <p>2.2. Provide recommendations that emphasise <i>product and service issues</i> relevant to client needs</p> <p>2.3. Ensure that evidence in support of recommendations is verifiable and presented in a suitable format</p> <p>2.4. Structure recommendations to identify clear benefits to clients and the organisation</p>
3. Advise on promotional activities	<p>3.1. Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2.Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services</p> <p>3.3.Ensure that costs of promotional activities conform to budget resources</p> <p>3.4.Estimate impact of <i>promotional activities</i> from <i>verifiable customer feedback sources</i></p> <p>3.5.Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread texts to ensure clarity of meaning, and accuracy of grammar and punctuation
- technology skills to select and use technology appropriate to a task
- communication skills to monitor and advise on customer service strategies
- problem-solving skills to deal with customer enquiries or complaints
- analytical skills to identify trends and positions of products and services.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisation's products and services
- organisational policies and procedures for customer service including handling customer complaints
- product and service standards and best practice models
- principles and techniques of public relations and product promotion
- mechanisms to obtain and analyse customer feedback.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • assessing and reporting on customer satisfaction • identifying commercial characteristics of products and services • knowledge of product and service standards and best practice models. • preparing and structuring advice on products and services • researching market availability of products and services.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of promotional strategies • examples of documents relating to customer service standards and policies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of promotional activities plans • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of promotional strategies and sources of product

EVIDENCE GUIDE	
	information <ul style="list-style-type: none"> • review of documentation outlining information on products and services • review of products and services recommendations.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none"> • sales and/or customer service units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to maintain the records of a business or records system in good order on a day to day basis.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to individuals requiring some understanding of relevant theoretical knowledge relating to recordkeeping functions. It is not assumed that individuals at this level would have responsibility for supervising the work of others; however it is assumed that as a recordkeeping practitioner their work will support effective recordkeeping and governance practices across the organisation.</p> <p>The application is in relation to the maintenance of records from an existing business or records system that has guidelines and processes to assist in the process. Work carried out in the interest of system maintenance will be performed under supervision or in consultation with more senior staff or users of the system.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collate business records	1.1. Identify individual <i>records</i> or <i>information</i> which should be incorporated into <i>business or records system</i> according to organisational criteria 1.2. Sort records in accordance with workplace requirements 1.3. Adhere to <i>security and access requirements</i> in accordance with organisational procedures
2. Update business or records system	2.1. Identify and record control information for describing new records to be incorporated into business or records system 2.2. Update control information describing movement or use of records within business or records system 2.3. Accurately record and update control information in business or records system 2.4. Identify and remove records of completed business

ELEMENT	PERFORMANCE CRITERIA
	activities from current system for disposal
3. Prepare reports from the business or records system	3.1. Interpret requests for <i>reports</i> and clarify the content and frequency sought, where necessary 3.2. Prepare reports from business or records system in accordance with instructions or request 3.3. Prepare reports in accordance with organisational security and access procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records/information needs
- literacy skills to read and interpret nature of record content, functions and problems
- problem-solving and analysis skills to identify and manage records.

Required knowledge

- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
 - AS 5044.1:2002 AGLS Metadata element set
 - AS 5090:2003 Work process analysis for recordkeeping
 - AS ISO 15489:2004 Records management
 - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
 - Australian Stock Exchange(ASX) Principles of Good Corporate Governance
 - ethical principles
 - codes of practice
 - privacy and freedom of information
 - archives and records legislation
 - occupational health and safety
- general principles and processes of records management and records management systems, such as:
 - systems of control
 - records continuum theory

REQUIRED SKILLS AND KNOWLEDGE

- mandate and ownership of business process
- environmental context
- records characteristics.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- complying with organisational procedures and workplace requirements
- knowledge and understanding of business or records systems
- accurately recording information.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated work environment
- access to office equipment and resources
- access to examples of records, recordkeeping systems and policies
- access to workplace reference materials such as procedural manuals and company policies.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- demonstration of techniques
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of authenticated documents from the workplace or training environment
- oral or written questioning to assess knowledge of

EVIDENCE GUIDE	
	general principles and processes of business or records systems.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • administration units • other knowledge management units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Records</i> may be:	<ul style="list-style-type: none"> • at different stages of use: <ul style="list-style-type: none"> • active • archival • digital: <ul style="list-style-type: none"> • remote drives • servers • CDs • DVDs • imaging systems • PC-based applications • mainframe • physical: <ul style="list-style-type: none"> • audio-visual or multimedia • graphic • microform • paper-based (acid free or multiple copies) • from a variety of sources: <ul style="list-style-type: none"> • already in the custody of the organisation • in the process of being transferred between organisations

RANGE STATEMENT	
<i>Information</i> may include:	<ul style="list-style-type: none"> • customer relationship management • expenditure • human resources management • invoicing/sales • legislative/regulatory/licensing compliance • risk management • stock control • taxation, asset management
<i>Business or records systems</i> may be:	<ul style="list-style-type: none"> • archival control systems • business systems • cash register-based systems • characteristics relating to: <ul style="list-style-type: none"> • aggregations • context • entities • metadata • current business or records systems • electronic records and document management system (ERDMS) • informal • paper-based accumulation and card systems • PC-based accounting systems, employee and tax records systems • proprietary recordkeeping package • storage facilities systems • systems unique to individual workplaces and organisations
<i>Security and access requirements</i> may relate to:	<ul style="list-style-type: none"> • individuals or positions of individuals • protection of privacy • security restrictions • trade secrets or commercial-in-confidence information
<i>Reports</i> may be:	<ul style="list-style-type: none"> • ad hoc • computer generated • hand prepared • part of a management solution for another support/operational function • regular records management reports • system management reports

Release 2	New release of this Unit with <i>version 6.0 of BSB07 Business Services Training Package</i> . Outdated advice removed
Release 1	Initial release of this Unit.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to present sales solutions that respond to the specific buying needs of a client, and to use sales processes associated with securing prospect commitment to proceed with a sale. The unit also includes attending to post-sales activities that build and strengthen the partnership between a salesperson and the client, and enhance the prospect of future sales.

Application of the Unit

This unit applies to individuals working in a sales-related position in a small, medium or large enterprise in a wide variety of industries who use specific sales techniques to present a sales solution to meet buyer needs, secure a prospect's commitment to purchase a product or service, and build post-sale and long-term relationships to establish an ongoing relationship with clients. They may provide sales solutions individually, or provide advice and support about aspects of sales solutions to support a sales team.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Prepare for a sales presentation	1.1 Obtain and organise products, ideas and services for use within a sales presentation 1.2 Review product information to ensure familiarity with products 1.3 Identify sales tactic options, and assess and choose them in terms of their ability to meet the needs and preferences of the prospect 1.4 Consider a variety of sales solutions and prepare to meet buyer needs 1.5 Identify and select <i>sales aids</i> 1.6 Identify alternatives for prospects and assess them in relation to anticipated buyer needs
2. Present a sales solution	2.1 Use gestures, posture, body language, facial expressions and voice to create a supportive selling environment 2.2 Use listening skills and open-ended questions to identify

	<p>buyer needs, preferences, motives and objections</p> <p>2.3 Adjust presentation to match the needs and preferences of the buyer</p> <p>2.4 Use persuasive communication techniques to secure buyer interest</p> <p>2.5 Ensure the presentation demonstrates and communicates the key features of the product and emphasises benefits in relation to identified buyer needs</p> <p>2.6 Obtain and present <i>proof of benefits</i> through product purchase</p> <p>2.7 Use sales aids to build buyer understanding of how the product is aligned with needs</p>
3. Respond to buyer signals	<p>3.1 Identify and assess <i>verbal</i> and <i>non-verbal buying signals</i></p> <p>3.2 Use probing to identify <i>source of buyer resistance</i></p> <p>3.3 Identify the strengths and limitations of <i>buyer resistance strategies</i></p> <p>3.4 Select and implement a strategy for managing buyer resistance</p> <p>3.5 Use trial closes strategically during different stages of the sales process</p>
4. Negotiate and finalise the sale	<p>4.1 Initiate <i>formal close</i> to the sales process following one or more trial closes</p> <p>4.2 Select a strategy to close the sale and use supportive and confirming language to support the closure of the sales process</p> <p>4.3 Negotiate <i>conditions</i> of the agreement, outline a summary of the agreement to the buyer, and confirm the buyer's decision</p> <p>4.4 Provide advice on financing arrangements if required</p> <p>4.5 Prepare and complete sales documents, and process and monitor client order</p> <p>4.6 Identify and present cross-selling opportunities to the buyer</p>
5. Support post-sale activities	<p>5.1 Ensure contact is made with the buyer post-sale to ensure agreed expectations have been met</p> <p>5.2 Provide technical assistance or advice and assist clients to access appropriate after-sales support</p> <p>5.3 Use <i>feedback solicitation methods</i> on the sales process and product satisfaction</p> <p>5.4 Address and resolve service problems and difficulties identified through feedback</p>

	<p>5.5 Develop and implement <i>client loyalty strategies</i> to secure buyer loyalty and facilitate ongoing contact</p> <p>5.6 Offer and implement additional sales solutions and benefits to clients when opportunities arise</p>
--	---

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to develop and maintain knowledge of products, ideas and services for use within a sales presentation
- literacy and numeracy skills to:
 - prepare sales documentation
 - process sales transactions
 - calculate financing arrangements
 - keep client sales records
 - use sales statistics to support a verbal argument
- organisational and time-management skills to schedule follow-up contacts
- verbal communication skills to:
 - demonstrate how product benefits and key features fulfil buyers' needs
 - develop rapport and build relationships with clients
 - manage conflict and customer dissatisfaction
 - negotiate to manage buyer resistance
 - question clients to determine client needs and preferences
 - use persuasive and assertive language in promoting product features and benefits
- technological skills to use equipment to assist in presenting sales information.

Required knowledge

- detailed product knowledge, including product:
 - advantages and disadvantages
 - features
 - service benefits
- identification and overview knowledge of key provisions of relevant legislation and codes of practice that relate to sales, for example:
 - anti-discrimination

- ethical principles
- consumer protection
- contract law
- privacy laws
- materials and aids that support presentations
- Competition and Consumer Act 2010
- organisational policies and procedures relating to orders and client services
- principles of achieving an effective sales presentation mix
- statistical methods to demonstrate sales performance
- strategies to manage client accounts, to build client goodwill and to develop client loyalty.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • demonstration of principles of effective sales presentation mix and sales closure techniques through presentation of a sales solution • demonstration of support for post-sale activities.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • a workplace or simulated work environment • product information and sales records and documentation • office equipment, machines and sales support materials to make a presentation.
Method of assessment	<p>The following assessment method is appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • observations of presentations of sales solutions • direct questioning combined with portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of sales tactic options, proposed sales solutions and ways to

	<p>overcome buyer resistance</p> <ul style="list-style-type: none"> • observation of persuasive communication techniques and listening skills used when presenting a sales solution and closing a sale • review of sales aids identified, selected and used • evaluation of strategies implemented to manage buyer resistance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Sales aids</i> may include:	<ul style="list-style-type: none"> • drawings • electronic media • graphs • models • photographs • printed materials • products • product samples • transparencies • whiteboards.
<i>Proof of benefits</i> may include:	<ul style="list-style-type: none"> • anecdotes and examples • comparisons • statistics • testimonials.
<i>Verbal buying signals</i> of the prospect may include:	<ul style="list-style-type: none"> • confirmations • questions • statements of requirement.
<i>Non-verbal buying signals</i> of the prospect may include:	<ul style="list-style-type: none"> • close examination of the product • moving closer to where a product is to be installed • smiling and nodding.

Source of buyer resistance may include:	<ul style="list-style-type: none"> • company resistance • no perceived need • price resistance • salesperson resistance • service dissatisfaction • timing issues • uncertainty about the product.
Buyer resistance strategies may include:	<ul style="list-style-type: none"> • assertive messages • boomerang • checking perceptions • direct denial • incentives offer • indirect denial • requesting additional information from buyers • open and closed questions • superior benefit • trial offer.
Formal close may include:	<ul style="list-style-type: none"> • inducement • narrative close • offering alternative choices • salesperson request to the prospect to agree to purchase the product or service • summary of product benefits.
Conditions may include:	<ul style="list-style-type: none"> • client loyalty • delivery • length of contract • payment options • price.
Feedback solicitation methods may include:	<ul style="list-style-type: none"> • email dialogue • focus groups • one-on-one interviews • surveys • telephone interviews.
Client loyalty strategies may include:	<ul style="list-style-type: none"> • client clubs • client reward schemes • credit or discount facilities • formal letter of thanks • handwritten note thanking the client • offering promotional items • phone call thanking the client for the business.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ascertain own financial position and the ability to provide capital/equity for the business	1.1. Realistically detail <i>personal, family or community financial situation</i> in terms of funds available and commitments already incurred 1.2. Determine equity finance and assets available for micro business from personal, family or community sources
2. Determine projected cash flow for the business	2.1. Determine the level of forecast business activity over a year and the business mix 2.2. Estimate <i>establishment costs</i> for the business and repayment schedule for borrowings 2.3. Calculate the monthly variable and fixed costs needed to conduct business activity over a year 2.4. Estimate personal drawings needed to be taken from the business 2.5. Estimate the monthly income generated by the business for a year based on price per unit item or hourly charge rate for labour 2.6. Develop a cash flow budget for the first year of business operation 2.7. Seek <i>professional advice</i> to estimate goods and services tax and operating finance required for the business
3. Source the required	3.1. Estimate required funding to establish and run the

ELEMENT	PERFORMANCE CRITERIA
funds to establish the business	<p>business based on expected sales and activity levels, available finances and commitments</p> <p>3.2. Investigate methods of accessing alternative <i>sources of finance</i></p> <p>3.3. Identify strategies for meeting financial obligations</p> <p>3.4. Implement plans to access available funds as required</p>
4. Monitor profitability of the business	<p>4.1. Maintain and review monthly expenditure and income records</p> <p>4.2. Compare equity at beginning and end of a year to estimate business performance</p> <p>4.3. Assess the <i>financial viability</i> of the business after a year of operation</p> <p>4.4. Seek professional advice on depreciation, insurance and tax implications of the business</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to determine the viability of the business
- literacy skills to interpret financial reports and to complete relevant forms requested by financial bodies
- numeracy skills to calculate basic revenue and expense forecasts, and to estimate the funding needed to establish and run the business
- research skills to source financial information.

Required knowledge

- basic budgeting
- basic costing for the business
- financial commitments and requirements
- financial reports and terminology
- methods and relative costs of obtaining finance
- own financial position
- sources of advice and assistance.

Determine <i>legislation and regulatory requirements</i> affecting the operations of the business under its chosen structure</p> <p>1.3. Develop and implement procedures to ensure full compliance with relevant legislation and regulatory requirements</p>
2. Comply with legislation, codes and regulatory requirements	<p>2.1. Establish systems to ensure the <i>legal rights and responsibilities</i> of the business are identified and the business is adequately protected, specifically in relation to <i>occupational health and safety (OHS)</i>, business registration and environmental requirements</p> <p>2.2. Identify <i>taxation principles and requirements</i> relative to the business and follow procedures to ensure compliance</p> <p>2.3. Identify and carefully maintain <i>legal documents</i> and maintain and update relevant <i>records</i> to ensure their ongoing security and accessibility</p> <p>2.4. Monitor the provision of products and services of the business to protect legal rights and to comply with legal responsibilities</p> <p>2.5. Conduct investigations to identify areas of</p>

ELEMENT	PERFORMANCE CRITERIA
	non-compliance with legal and regulatory requirements and take corrective action where necessary
3. Negotiate and arrange contracts	<p>3.1. Seek legal advice on contractual rights and obligations, if required, to clarify business liabilities</p> <p>3.2. Investigate and assess potential products/services to determine procurement rights and to ensure protection of business interests where applicable</p> <p>3.3. Negotiate and secure contractual procurement rights for goods and services including contracts with relevant people, as required, in accordance with the business plan</p> <p>3.4. Identify insurance requirements and acquire adequate cover</p> <p>3.5. Identify options for leasing/ownership of business premises and complete contractual arrangements in accordance with the business plan</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, reporting, record keeping and consultation skills to operate the business
- literacy skills to interpret legal requirements, to develop policies and procedures and to analyse compliance information
- research skills to investigate legal structures, and taxation and insurance requirements
- time management skills to prioritise tasks and to meet key dates.

Required knowledge

- business registration and licensing requirements
- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to OHS and environmental issues, equal employment opportunity, industrial relations, anti-discrimination, taxation
- creation and termination of relevant legal contracts

REQUIRED SKILLS AND KNOWLEDGE

- cultural differences and legal implications
- duty of care imposed by Law of Torts
- legal rights and obligations of alternative ownership structures
- record keeping to meet minimum legal and taxation requirements
- relevant consumer legislation
- relevant industry codes of practice
- relevant insurance requirements and products.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- implementation of a systematic approach to identifying, managing and meeting legal and business requirements within culturally appropriate contexts
- interpreting compliance data and formulating appropriate action
- knowledge of relevant legislation.

Context of and specific resources for assessment

Assessment must ensure:

- access to relevant documentation
- candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- portfolio of evidence including contracts negotiated and arranged
- oral or written questioning to assess knowledge of relevant consumer legislation
- review of procedures developed and implemented to ensure full compliance with relevant legislation and regulatory requirements

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • review of insurance cover acquired.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBSMB402A Plan small business finances • BSBSMB404A Undertake small business planning.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Options for the business legal structure</i> may include:	<ul style="list-style-type: none"> • company • cooperative • corporation • government owned enterprise • partnership • profit or not-for-profit legal structure • sole trader • trust

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify costs, calculate prices and prepare profit statement	1.1. Identify and document <i>costs</i> associated with the production and delivery of the business' products/services 1.2. Calculate prices based on costs and profit margin, as an hourly charge out rate for labour or unit price for products 1.3. Calculate break-even sales point to establish business viability and profit margins 1.4. Identify appropriate <i>pricing strategies</i> in relation to market conditions to meet business profit targets 1.5. Prepare projected profit statement to supplement the business plan
2. Develop a FINANCIAL PLAN	2.1. Set <i>profit targets/goals</i> to reflect owner's desired returns 2.2. Identify working capital requirements necessary to attain profit projections 2.3. Identify non-current asset requirements and consider alternative asset management strategies 2.4. Prepare <i>cash flow projections</i> to enable business operation in accordance with business plan and <i>legal requirements</i> 2.5. Identify capital investment requirements accurately for each operational period 2.6. Select budget targets to enable ongoing monitoring of financial performance
3. Acquire finance	3.1. Identify start-up and ongoing financial requirements according to financial plan/budget

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Identify <i>sources of finance</i>, including potential <i>financial backers</i>, to provide required liquidity for the business to complement business goals and objectives</p> <p>3.3. Investigate cost of securing finance on optimal terms</p> <p>3.4. Identify strategies to obtain finance as required to ensure financial viability of the business</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to interpret financial data
- communication skills to secure finance
- literacy skills to develop a financial plan and to interpret legal requirements and financial reports
- numeracy skills to calculate costs, prices, profit and other financial information
- research skills to identify costs and sources of finance.

Required knowledge

- break-even analysis
- costing for the business, including margin/mark-up, hourly charge out rates and unit costs
- financial decision making relevant to the business
- methods and relative costs of obtaining finance
- principles for preparation of balance sheets
- principles for preparation of cash flow forecasts
- principles for preparation of profit and loss statements
- purpose of financial reports
- relevant accounting terminology
- working capital cycles.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- development of a financial plan which identifies the financial requirements of the business, including profit targets, cash flow projections and strategies for the acquisition of finance
- knowledge of financial decision making relevant to the business.

Context of and specific resources for assessment

Assessment must ensure:

- access to relevant documentation
- candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- portfolio of evidence including financial plan and records
- review of projected profit statement prepared to supplement the business plan
- review of cash flow projections
- oral or written questioning to assess knowledge of principles for preparation of cash flow forecasts.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBSMB401A Establish legal and risk management requirements of small business
- BSBSMB404A Undertake small business planning
- BSBSMB405A Monitor and manage small business operations
- BSBSMB406A Manage small business finances.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Costs</i> may include:	<ul style="list-style-type: none"> • direct/indirect costs • fixed, variable, semi-variable costs • overheads and employee costs
<i>Pricing strategies</i> may include:	<ul style="list-style-type: none"> • competitor analysis • cost/volume/profit analysis • cost factors • cost plus pricing • demand-based pricing • discounting • market conditions • penetration pricing • perceived value • product mix • skimming
<i>Financial plan</i> may include:	<ul style="list-style-type: none"> • analysis of sales by product/service, identifying where they were sold and to whom • cash flow estimates for each forward period • current financial state of the enterprise (or owner/operator) • estimates of profit and loss projections for each forward period • financial performance to date (if applicable) • likely return on investment • monthly, quarterly or annual returns • non-recurrent assets calculations • profit, turnover, capital and equity targets • projected profit targets, pricing strategies, margins • projections of likely financial results (budgeting) • projections, which may vary depending on the importance of such information and the stage in the life of the business • resources required to implement the proposed marketing and production strategies (staff,

RANGE STATEMENT	
	materials, plant and equipment) <ul style="list-style-type: none"> • review of financial inputs required (sources and forms of finance) • risks and measures to manage or minimise risks • working, fixed, debt and equity capital • working in conjunction with external consultants e.g. investment analysts, accountants, financiers

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop marketing strategies	<p>1.1. Analyse the business and its key products or services to determine the focus of marketing activities, in accordance with the objectives of the business plan</p> <p>1.2. Evaluate the customer base and target market for the small business as a basis for the <i>marketing objectives and strategies</i></p> <p>1.3. Determine marketing objectives and strategies that are ethically and culturally appropriate, in consultation with <i>relevant people</i> and in accordance with the business plan</p>
2. Determine a marketing mix for the business	<p>2.1. Balance product mix, volumes and pricing to optimise sales and profit</p> <p>2.2. Evaluate the costs and benefits of using different <i>distribution channels</i> and/or providing different <i>levels of customer service</i> and consider the results in determining the <i>marketing mix</i></p> <p>2.3. Determine promotional activities to suit the target market</p> <p>2.4. Consider customer needs and preferences in determining the marketing mix</p> <p>2.5. Determine the marketing mix according to market and business needs</p>
3. Implement marketing	<p>3.1. Brief persons involved in the marketing effort on their roles and responsibilities, to ensure the success</p>

ELEMENT	PERFORMANCE CRITERIA
strategies	of marketing strategies 3.2. Plan and implement <i>promotional activities</i> , in accordance with marketing objectives and budgetary requirements
4. Monitor and improve marketing performance	4.1. Monitor marketing activities and evaluate business performance according to the objectives and targets of the business plan 4.2. Analyse <i>performance gaps</i> and take corrective action or set new targets 4.3. Encourage all relevant people to propose ways to improve marketing performance 4.4. Seek and analyse <i>customer reaction</i> to all aspects of the marketing mix, using culturally appropriate processes, to improve targeting and outcomes 4.5. Conduct ongoing research of customer requirements to identify opportunities for change and improvement 4.6. Monitor and investigate changes in the market for new opportunities to aid business development

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to question, clarify and report
- literacy and numeracy skills to research information, to analyse data and to interpret market data.

Required knowledge

- industry market trends
- methods of analysing costs and benefits of marketing strategies
- methods of developing marketing objectives and marketing mix
- methods of monitoring customer satisfaction
- relevant market analysis and research
- relevant marketing concepts and methods.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- developing a marketing strategy and choosing a marketing mix for the small business that are culturally appropriate and that complement the business plan
- implementing and monitoring the marketing strategy/plan to optimise the chances of small business success
- knowledge of relevant marketing concepts and methods.

Context of and specific resources for assessment

Assessment must ensure:

- access to relevant documentation
- candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- portfolio of evidence including marketing strategy and monitoring of marketing performance
- oral or written questioning to assess knowledge of industry market trends
- review of analysis of performance gaps and corrective action taken or new targets set
- review of promotional activities implemented.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBSMB404A Undertake small business planning.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. BSBSMB405B Monitor and manage small business operations

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Required knowledge and Range Statement changed to include environmentally sustainable practices</p> <p>Replaces BSBSMB405A Monitor and manage small business operations</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a small business and to implement a business plan. The strategies involve monitoring, managing and reviewing operational procedures.

Specific legal requirements apply to the management of a small business.

Application of the Unit

This work is undertaken by individuals who operate a small business.

The unit is suitable for existing micro and small businesses or a department in a larger organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Develop <i>operational strategies and procedures</i>	<p>1.1 Develop an action plan to provide a clear and coherent direction, in accordance with the <i>business goals and objectives</i></p> <p>1.2 Identify <i>occupational health and safety (OHS) and environmental issues</i> and implement strategies to minimise risk factors</p> <p>1.3 Develop a <i>quality system</i> for the business in line with industry standards, compliance requirements and cultural criteria</p> <p>1.4 Develop performance measures and <i>operational targets</i> to conform with the business plan</p> <p>1.5 Develop strategies for innovation, including the utilisation of existing, new or emerging technologies, where practicable, to optimise business performance</p>
2. Implement operational strategies and procedures	<p>2.1 Implement systems and key performance indicators/targets to monitor business performance and customer satisfaction</p> <p>2.2 Implement systems to control stock, expenditure/cost, wastage/shrinkage and risks to health and safety in accordance with the business plan</p> <p>2.3 Maintain staffing requirements, where applicable, within budget to maximise productivity</p> <p>2.4 Carry out the provision of goods/services in accordance with established legal, ethical cultural and <i>technical standards</i></p> <p>2.5 Provide goods/services in accordance with time, cost and quality specifications, and customer requirements</p> <p>2.6 Apply quality procedures to address product/service and customer requirements</p>
3. Monitor business performance	<p>3.1 Regularly monitor/review the achievement of operational targets to ensure optimum business performance, in accordance</p>

	<p>with the business plan goals and objectives</p> <p>3.2 Review systems and structures, with a view to more effectively supporting business performance</p> <p>3.3 Investigate and analyse operating problems to establish causes and implement changes as required as part of the business quality system</p> <p>3.4 Amend operational policies and procedures to incorporate corrective action</p>
4. Review business operations	<p>4.1 Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and objectives</p> <p>4.2 Clearly record proposed changes to aid future planning and evaluation</p> <p>4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to develop criteria and targets for the business plan
- communication skills to question, clarify and report
- literacy skills to interpret legal requirements, company policies and procedures
- numeracy skills to manage performance information and to control the finances
- technology skills to use relevant business equipment.

Required knowledge

- methods for developing and maintaining networks
- methods for implementing operation and revenue control systems
- methods for monitoring performance and implementing improvements
- OHS responsibilities and procedures for managing hazards
- principles of risk management relevant to the business, including risk assessment
- quality system principles and methods
- relevant industry codes of practice
- relevant marketing, sales and financial concepts
- relevant performance measures

- role of innovation
- systems to manage staff, stock, expenditure, services and customer service
- environmentally sustainable business practice and operation
- technical or specialist skills relevant to the business operation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: <ul style="list-style-type: none">• developing strategies and procedures to successfully manage the operation of the business• making appropriate adjustments to the business operations as required• knowledge of quality system principles and methods.
Context of and specific resources for assessment	Assessment must ensure: <ul style="list-style-type: none">• access to relevant documentation• candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: <ul style="list-style-type: none">• portfolio of evidence including operational strategies and procedures• oral or written questioning to assess knowledge of principles of risk management relevant to the business, including risk assessment• review of analysis of operating problems (establishing causes and implementing changes as required as part of the business quality system)• review of records proposing changes to the business operations.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none">• BSBSMB406A Manage small business finances

	<ul style="list-style-type: none"> • BSBSMB407A Manage a small team.
--	---

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Operational strategies and procedures</i> may be determined by:	<ul style="list-style-type: none"> • business premises (size, location, layout) • financial control systems and procedures • management and administrative systems and procedures • methods/techniques/technology • physical and natural resources • plant and equipment , including OHS requirements • premises, plant and equipment, which may be new or previously owned • purchase (sole or shared ownership) or leasing • raw materials • requirements, which may be one-off requirements or recurrent requirements (such as equipment maintenance) specific to the nature of the business • technology • environmentally sustainable principles of business operation • use of existing, new and emerging technologies including e-commerce.
<i>Business goals and objectives</i> may include:	<ul style="list-style-type: none"> • customer needs/marketing projections • family or community benefits • financial projections • goals, objectives, plans, systems and processes • lifestyle issues • proposed size and scale of the business, market focus of the business • short-, medium- or long-term goals • social responsibility.
<i>Occupational health and safety and environmental issues</i> must include:	<ul style="list-style-type: none"> • controls, which may include instructions to workplace personnel concerning site hazards and controls, material safety data sheets, use of personal protective equipment,

	<p>vehicle access, signs and barricades, traffic control, outside contractors</p> <ul style="list-style-type: none"> • establishment and maintenance of procedures for assessing and controlling risks • establishment and maintenance of procedures for identifying risks to health and safety • environmentally sustainable purchase and supply of goods and services • waste and by-products.
<i>Quality system</i> may include:	<ul style="list-style-type: none"> • manual or computer quality control systems • quality assurance/management approaches • random inspections and assessments of goods and services against predetermined standards • random inspections and assessments of processes against predetermined standards • random sampling and follow-up of customers.
<i>Operational targets</i> may include:	<ul style="list-style-type: none"> • external targets, which may relate to market share and positioning and may involve exploring new markets, building national or international trade links • internal targets, which may relate to size, quality, quantity and diversity, wages to sales, sales to area/stock levels/stock turnover/average debtor payment periods and levels • staffing level and skills mix • targets, which may be short-, medium- or long-term.
<i>Technical standards</i> may include:	<ul style="list-style-type: none"> • current and generally agreed descriptions of what the product/service is, how it should be produced/delivered and the environmental sustainability, quality, safety, efficiency or other measures to determine the activity is done effectively.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement financial plan	<p>1.1. Identify <i>financial information</i> requirements and obtain <i>specialist services</i>, as required, to profitably operate and extend the business in accordance with the business plan</p> <p>1.2. Produce financial budgets/projections, including <i>cash flow</i> estimates, as required for each forward period, and distribute to <i>relevant people</i> in accordance with legal requirements</p> <p>1.3. Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet the requirements of <i>financial backers</i></p> <p>1.4. Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5. Develop, monitor and maintain client <i>credit policies</i>, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6. Select key performance indicators to enable ongoing monitoring of financial performance</p> <p>1.7. Record and communicate financial procedures to relevant people to facilitate implementation of the business plan</p>
2. Monitor financial performance	2.1. Regularly monitor and report on financial performance targets and analyse data to establish the

ELEMENT	PERFORMANCE CRITERIA
	<p>extent to which the <i>financial plan</i> has been met</p> <p>2.2. Monitor marketing and operational strategies for their effects on the financial plan</p> <p>2.3. Calculate and evaluate <i>financial ratios</i> according to own/industry benchmarks</p> <p>2.4. Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to interpret financial data
- communication skills to negotiate capital and to report on performance
- literacy skills to interpret legal requirements and financial reports
- numeracy skills to calculate costs, prices, profit and other financial information.

Required knowledge

The following knowledge must be assessed as part of this unit:

- benchmarking
- financial decision making relevant to the business
- financial indicators
- purpose of financial reports
- preparation and interpretation of budget/actual reports
- principles for preparation of balance sheets and their interpretation
- principles for preparation of profit and loss statements and their interpretation
- stock records/stock control relevant to the business.

BSBWHS401A Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces BSBOHS407A Monitor a safe workplace.</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

Application of the Unit

This unit applies to workers with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area.

The unit applies to individuals with a broad knowledge of WHS policies who contribute well-developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. These workers provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Provide information to the work team about WHS policies and procedures	<p>1.1 Accurately explain to the work team, relevant provisions of <i>WHS Acts, regulations and codes of practice</i></p> <p>1.2 Provide information about the <i>organisation's WHS policies, procedures and programs</i>, and ensure it is readily accessible to and understandable by the work team</p> <p>1.3 Regularly provide and clearly explain to the work team, <i>information</i> about identified hazards and the outcomes of risk assessment and control</p>
2. Implement and monitor participation arrangements for managing WHS	<p>2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace</p> <p>2.2 Apply <i>consultation procedures</i> to facilitate participation of the work team in managing work area hazards</p> <p>2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements</p> <p>2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues</p>
3. Implement and monitor organisational	3.1 Identify WHS training needs according to organisational requirements, and WHS legislative and regulatory requirements

procedures for providing WHS training	<p>3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals</p> <p>3.3 Provide workplace learning opportunities, and coaching and mentoring assistance, to facilitate team and individual achievement of identified WHS training needs</p> <p>3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans</p>
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	<p>4.1 Identify and report on hazards in work area according to WHS policies and procedures, and WHS legislative and regulatory requirements</p> <p>4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements</p> <p>4.3 Implement <i>procedures to control risks</i> using the hierarchy of control, according to organisational and WHS legislative requirements</p> <p>4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements</p> <p>4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response</p>
5. Implement and monitor organisational procedures for maintaining WHS records for the team	<p>5.1 Accurately complete and maintain <i>WHS records</i> of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem solving skills to:
 - identify hazards
 - assess risks in the work area

- review information relating to monitoring and evaluating incidents, and the effectiveness of risk controls
- coaching and mentoring skills to provide support to colleagues
- literacy skills to understand and interpret documentation, and to interpret WHS requirements.

Required knowledge

- hazards and associated risks in the workplace
- key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business
- organisational policies and procedures relating to hazard management, fire, emergency, evacuation, incident investigation and reporting
- relevance of consultation and participation as key mechanisms for improving WHS and culture
- WHS legislative responsibilities, duties and obligations of managers, supervisors, persons conducting businesses or undertakings (PCBUs) or their officers, and workers in the workplace.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • applying organisational WHS management systems and procedures in the work team area • applying procedures for assessing and controlling risks to health and safety associated with those hazards, according to the hierarchy of control and as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice • providing specific, clear and accurate information and advice on workplace hazards to work team • knowledge of legal responsibilities of managers, supervisors, PCBUs or their officers and workers in the workplace.
Context of and specific resources	Assessment must ensure access to:

for assessment	<ul style="list-style-type: none"> • an actual workplace or simulated environment • office equipment and resources • examples of documentation relating to hazards in the workplace • examples of documents relating to workplace safety, hazard identification and risk assessment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of records communicating the outcomes of consultation over WHS issues to the work team • analysis of responses to case studies and scenarios • review of reports to management on the costs associated with providing training for the work team • oral or written questioning to assess knowledge of workplace safety and hazards • examples of risk assessments • evaluation of actioning of team member hazard reports • review of WHS records of occupational injury and disease incidents in work area.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>WHS Acts, regulations and codes of practice</i> may include:</p>	<ul style="list-style-type: none"> • applicable commonwealth and state or territory WHS Acts, regulations and codes of practice • common law duties to meet general duty of care requirements • duty holders, as specified in WHS Acts: <ul style="list-style-type: none"> • PCBU's or their officers • workers • other persons at a workplace • WHS legislative and regulatory requirements for effective management of hazards • WHS legislative and regulatory requirements for establishing consultation arrangements, including those for health and safety representatives and health and safety committees • WHS legislative and regulatory requirements for providing information and training, including: <ul style="list-style-type: none"> • training in safe operating procedures • procedures for workplace hazards • hazard identification • risk assessment and risk control • emergency and evacuation procedures • WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease.
<p><i>Organisation's WHS policies, procedures and programs</i> may address:</p>	<ul style="list-style-type: none"> • acquisition, use, storage and disposal of hazardous chemicals • alcohol and other drug intoxication • consultation arrangements for workers in work area • emergency and evacuation procedures • family-friendly environment • first aid provision and medical treatment • hazard reporting procedures • incident investigation • life-work balance strategies • maintenance and use of plant and equipment • procedures for hazard identification • procedures for risk assessment, and selection and implementation of risk controls • purchasing policy and procedures • requirements of applicable commonwealth and state or territory WHS Acts, regulations and codes of practice • safe operating procedures and instructions

	<ul style="list-style-type: none"> • site access and egress • transport and storage of dangerous goods • use and care of personal protective equipment • WHS arrangements for on-site contractors and subcontractors, visitors and members of the public • WHS audits and inspections.
Information may result from:	<ul style="list-style-type: none"> • examining commonwealth and state or territory WHS Acts, regulations and codes of practice • checking equipment before and during work • consulting work team members through daily informal worker consultation and regular formal meetings • housekeeping • reviewing health and safety records, including hazard reports, hazardous substances and dangerous goods registers, and injury records • WHS audits and review of audit reports • workplace inspections in area of responsibility.
Consultation procedures may include:	<ul style="list-style-type: none"> • attendance of health and safety representatives at management and WHS planning meetings • early response to worker suggestions, requests, reports and concerns put forward to management • election of health and safety representatives according to legislative requirements • formal and informal meetings • health and safety committees • individual performance management processes • other committees, for example planning and purchasing • requirements as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice.
Procedures to control risks may include:	<ul style="list-style-type: none"> • as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice • consultation with workers and their representatives • redesign of job, process or workplace, for example: <ul style="list-style-type: none"> • introducing mechanical handling equipment • raising or lowering work platforms • rearranging material flow, timing and/or scheduling • removing the cause of a risk at its source (eliminating the hazard), for example removing stored goods permanently from emergency exit

	<p>passageways</p> <ul style="list-style-type: none"> selecting controls according to the hierarchy of risk control, for example working through the hierarchy from the most effective to least effective control.
WHS records may include:	<ul style="list-style-type: none"> any record of alcohol or drug use as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice audit and inspection reports consultation, for example: <ul style="list-style-type: none"> meetings of health and safety committees work team meeting agendas, including WHS items and actions first aid/medical post records hazardous chemicals registers induction, instruction and training manufacturer and supplier information, including dangerous goods storage lists plant and equipment maintenance and testing reports workers' compensation and rehabilitation records workplace environmental monitoring records.

Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

BSBWHS504A Manage WHS hazards and risks

Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces but is not equivalent to BSBOHS505C Manage hazards in the work environment AND BSBOHS507B Facilitate the application of principles of occupational health to control OHS risk.</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage work health and safety (WHS) hazards and risks.

Application of the Unit

This unit applies to individuals who contribute to the management of WHS hazards and risks. This management is based on the organisation's WHS management system (WHSMS), WHS information system (WHSIS) and risk-management approach (as covered in BSBWHS503A Contribute to the systematic management of WHS risk).

The unit applies to people who work in a range of WHS roles across all industries and who apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Access information and data on WHS hazards and risks	<p>1.1 Identify <i>sources of information and data</i></p> <p>1.2 Obtain information and data to determine the nature and scope of <i>hazards and risks</i>, the range of harms they may cause, and how these harms happen</p> <p>1.3 Obtain information and data to determine techniques, tools and processes to assess risk associated with identified hazards and risk control options</p>
2. Prepare to manage WHS hazards and risks	<p>2.1 Apply knowledge of the organisation's WHSMS and WHSIS to identify requirements for managing WHS hazards and risks</p> <p>2.2 Apply knowledge of <i>WHS legislation</i> to identify <i>duty holders</i> and legislative requirements for managing WHS hazards and risks</p>
3. Develop and implement WHS hazard and risk-management processes	<p>3.1 Apply techniques, tools and processes to assess risks associated with hazards and risk control options</p> <p>3.2 Apply knowledge of hazards and risks to develop appropriate risk controls</p> <p>3.3 Develop and implement a risk control plan and evaluate risk controls</p> <p>3.4 Carry out hazard identification and risk management according to organisational and legal requirements, adopting a</p>

	risk-management approach
--	--------------------------

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - analyse relevant workplace information and data
 - contribute to the assessment of resources needed to manage risk and where appropriate access these resources
 - identify areas for WHS improvement
- communication skills to:
 - conduct effective formal and informal meetings and communicate effectively with personnel at all levels of the organisation
 - use language appropriate to the work team and the task
- consultation and negotiation skills to:
 - develop plans
 - implement and monitor designated actions
- information technology skills to:
 - access and download internal and external information and data on WHS
 - use a range of communication media
- literacy skills to prepare plans and reports for a range of target groups, including health and safety committees, health and safety representatives, managers, supervisors, and persons conducting businesses or undertakings (PCBUs) or their officers
- organisational skills to manage own tasks within a timeframe
- project-management skills to achieve change in WHS matters
- research skills to:
 - access relevant WHS information and data
 - identify areas for improvement
 - interpret information and data.

Required knowledge

- basic principles of incident causation and injury processes
- difference between hazard and risk

- formal and informal communication and consultation processes, and key personnel related to communication
- how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
 - communication skills
 - cultural background and diversity
 - gender
 - labour market changes
 - language, literacy and numeracy levels of the workforce
 - structure and organisation of the workforce, including part time, casual and contract workers; shift rosters; and geographical location
 - workers with specific needs and limitations
 - workplace culture towards alcohol and other drug use
- internal and external sources of WHS information and data, and how to access them
- limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- methods for providing evidence of compliance with WHS legislation
- nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- organisational culture as it impacts on the work team
- organisational WHS policies, procedures, processes and systems
- other functional areas that impact on the management of WHS
- principles and practices of a systematic approach to managing WHS
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- risk as the effect of uncertainty on objectives
- risk management as a duty of PCBU's or their officers under WHS legislation
- roles and responsibilities of individuals and parties under WHS legislation
- standard industry controls for a range of hazards
- techniques, tools and processes for identifying and controlling health and safety hazards and risks, including:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk throughs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • complete risk assessment using a range tools and processes • outline risk factors and recommended risk controls for a hazard • action plan to implement risk controls and risk-management processes, including positive performance indicators to monitor implementation • knowledge of relevant WHS Acts, regulations, codes of practice, standards and guidance material.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • a workplace or simulated workplace • workplace documentation • office equipment and resources • relevant Acts, regulations, codes of practice, standards and guidelines relating to risks found in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • assessment of written reports on the effectiveness of hazard identification, risk assessment, and control and management actions taken • demonstration of techniques used to identify hazards, to assess associated risks, and to control, monitor and evaluate risks • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • observation of performance in role plays

	<ul style="list-style-type: none"> • observation of presentations • oral or written questioning to assess knowledge • review of action plans • written reports on hazard-identification and risk-management activities.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBWHS503A Contribute to the systematic management of WHS risk • BSBWHS506A Contribute to developing, implementing and maintaining WHS management systems • BSBWHS507A Contribute to managing WHS information systems • BSBWHS508A Manage WHS hazards associated with plant.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Sources of information and data</i> may include:	<ul style="list-style-type: none"> • Australian and international standards • industry bodies and groups • unions • websites, journals and newsletters • WHS Acts, regulations, codes of practice, guidelines and other information issued by WHS regulators • WHS specialists • workers' compensation insurance agents • workplace policies, procedures, processes and systems.
<i>Hazards and risks</i> may include:	<ul style="list-style-type: none"> • hazards and risks associated with particular industries and/or occupations

	<ul style="list-style-type: none"> hazards and risks determined by: <ul style="list-style-type: none"> needs of the workplace, local industry and regional contexts how common they are or could be how big a problem they are or could be, in terms of severity of actual or potential harm, and numbers of workers they may harm potential or actual costs, impacts on the organisation/industry, and requirements to comply with hazard and industry-specific WHS regulations and codes of practice commonly occurring hazards: <ul style="list-style-type: none"> biological hazards, such as viruses, bacteria, hepatitis, legionnaires' disease, Q fever, brucellosis, leptospirosis, HIV and fungi electrical extreme temperature hazardous chemicals ionising and non-ionising radiation machinery and equipment manual tasks noise and vibration psychosocial hazards, such as work-related stress and fatigue, bullying and violence working at height, falling objects, falls, slips and trips.
WHS legislation may include:	<ul style="list-style-type: none"> Acts regulations codes of practice.
Duty holders may include:	<ul style="list-style-type: none"> as specified in WHS Acts: <ul style="list-style-type: none"> PCBUs or their officers workers other persons at a workplace.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	1.1. Select appropriate <i>technology</i> and <i>software applications</i> to achieve the requirements of the task 1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.3. Use technology according to <i>organisational requirements</i> and in a way which promotes a safe work environment
2. Process and organise data	2.1. Identify, open, generate or amend files and records according to task and organisational requirements 2.2. Operate <i>input devices</i> according to organisational requirements 2.3. <i>Store data</i> appropriately and exit applications without damage to or loss of, data 2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications
3. Maintain technology	3.1. Identify and replace used <i>technology consumables</i> in accordance with manufacturer's instructions and organisational requirements 3.2. Carry out and/or arrange <i>routine maintenance</i> to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	3.3. <i>Identify equipment faults</i> accurately and take action in accordance with manufacturer's instructions or report fault to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions
- communication skills to request advice, to receive feedback and to work with a team
- problem-solving skills to solve routine technology problems.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
- ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
- organisational IT procedures including back-up and virus protection procedures
- basic technical terminology in relation to reading help-files and manuals.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • selection and application of appropriate equipment and software applications in relation to assigned task/s • access, retrieval and storage of required data • performance of basic maintenance on a range of office equipment
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of files and data for storage • manuals and training booklets for equipment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of office equipment • evaluation of maintaining technology.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • IT use units • other industry capability units.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

RANGE STATEMENT

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Technology</i> may include:	<ul style="list-style-type: none"> • computer technology, such as laptops and personal computers • digital cameras • modems • printers • scanners • zip drives • photocopiers • shredders • binders • laminators • cutters
<i>Software applications</i> may include:	<ul style="list-style-type: none"> • email, internet • word processing, spreadsheet, database, accounting or presentation packages
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • correctly identifying and opening files • legal and organisation policies, guidelines and requirements • locating data • log-on procedures • manufacturer's guidelines • OHS policies, procedures and programs • saving and closing files • storing data
<i>Input devices</i> may include:	<ul style="list-style-type: none"> • keyboard • mouse • numerical key pad • scanner
<i>Storage of data</i> may include:	<ul style="list-style-type: none"> • appropriate storage/filing of hard copies of computer generated documents • storage in directories and sub-directories • storage on CD-ROMs, hard and floppy disk drives or back-up systems
<i>Technology consumables</i> may include:	<ul style="list-style-type: none"> • back-up tapes • CD-ROM • floppy disks

RANGE STATEMENT	
	<ul style="list-style-type: none"> • print heads • printer ribbons and cartridges • toner cartridges • zip disks
<i>Routine maintenance</i> may include:	<ul style="list-style-type: none"> • in-house cleaning and servicing of equipment according to manufacturer's guidelines • periodic servicing by qualified or manufacturer approved, technician • regular checking of equipment • replacing consumables
<i>Identifying equipment faults</i> may include:	<ul style="list-style-type: none"> • checking repairs have been carried out • encouraging feedback from work colleagues • keeping a log book of detected faults • preparing a maintenance program • regular back-ups of data • regular OHS inspections • routine checking of equipment

BSBWOR301B Organise personal work priorities and development

Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria and required skills updated to focus on learning and development practices, KPIs and compliance with policy and procedures.</p> <p>Replaces BSBWOR301A Organise personal work priorities and development</p>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance, and to maintain required levels of competence. Operators may exercise discretion and judgement using appropriate theoretical knowledge of work scheduling and performance improvement to provide technical advice and support to a team.

Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Organise and complete own work schedule	<p>1.1 Ensure that work goals, objectives or KPIs are understood, negotiated and agreed in accordance with organisational requirements</p> <p>1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes</p> <p>1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans</p> <p>1.4 Use business technology efficiently and effectively to manage and monitor scheduling and completion of tasks</p>
2. Monitor own work performance	<p>2.1 Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs</p> <p>2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of and products and services according to organisational requirements</p> <p>2.4 Identify signs of stress and effects on personal wellbeing</p> <p>2.5 Identify sources of stress and access appropriate supports and resolution strategies</p>
3. Coordinate personal skill development and learning	<p>3.1 Identify personal learning and professional development needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3 Access, complete and record professional development</p>

	<p>opportunities to facilitate continuous learning and career development</p> <p>3.4 Incorporate formal and informal feedback into review of further learning needs</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to give and receive constructive feedback relating to development needs
- literacy skills to read and understand the organisation's procedures
- planning skills to organise work priorities according to work goals and objectives
- problem-solving skills to solve routine problems
- self-management skills to:
 - comply with policies and procedures
 - consistently evaluate and monitor own performance
 - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparing work plans • scheduling and prioritising work objectives and tasks • knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of work schedules and performance improvement plans.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of self-assessment documentation outlining learning and development needs • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs • evaluation of planning for personal skill development activities and professional development opportunities.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work goals and objectives may include:	<ul style="list-style-type: none"> • budgetary targets • production targets • reporting deadlines • sales targets • team and individual learning goals • team participation.
KPIs may include:	<ul style="list-style-type: none"> • key performance indicators on customer satisfaction • key performance indicators on customer effort • monitoring time taken to answer calls • operating within reporting protocols • score tools such as net promoter • understanding metrics.
Organisational requirements may include:	<ul style="list-style-type: none"> • access and equity principles and practice • business and performance plans • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals.
Factors affecting the achievement of work objectives may include:	<ul style="list-style-type: none"> • budget constraints • competing work demands • environmental factors such as time, weather • resource and materials availability • technology/equipment breakdowns • unforeseen incidents • workplace hazards, risks and controls.
Business technology may include:	<ul style="list-style-type: none"> • computer applications • computers • email

	<ul style="list-style-type: none"> • facsimile machines • internet/extranet/intranet • modems • personal schedulers • photocopiers • printers • scanners.
Feedback on performance may include:	<ul style="list-style-type: none"> • formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery.
Products and services may include:	<ul style="list-style-type: none"> • either products or services • goods • ideas • infrastructure • private or public sets of benefits.
Signs of stress may include:	<ul style="list-style-type: none"> • absence from work • alcohol or other substance abuse • conflict • poor work performance.
Personal wellbeing may include:	<ul style="list-style-type: none"> • cultural • emotional • social • spiritual.
Sources of stress may include:	<ul style="list-style-type: none"> • complex tasks • cultural issues • work and family conflict • workloads.
Supports and resolution strategies may include:	<ul style="list-style-type: none"> • awareness raising • counselling • employee assistance programs (EAP) • family support • group activities • job design • mediation • sharing load • time off • training.
Professional development	<ul style="list-style-type: none"> • career planning/development

<i>opportunities</i> may include:	<ul style="list-style-type: none">• coaching, mentoring and/or supervision• formal/informal learning programs• internal/external training provision• performance appraisals• personal study• quality assurance assessments and recommendations• recognition of current competence/skills recognition• work experience/exchange/opportunities• workplace skills assessment.

Application of the Unit

Application of the unit	<p>Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to achieve team outcomes	<p>1.1. Identify, establish and document <i>team purpose, roles, responsibilities, goals, plans and objectives</i> in <i>consultation</i> with team members</p> <p>1.2. Support team members in meeting expected outcomes</p>
2. Develop team cohesion	<p>2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team</p> <p>2.2. Encourage and support team members to take <i>responsibility for own work</i> and to assist each other in undertaking required roles and responsibilities</p> <p>2.3. Provide <i>feedback</i> to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4. Recognise and address issues, concerns and problems identified by team members or refer to <i>relevant persons</i> as required</p>

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	<p>3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes</p> <p>3.2. Give the team support to identify and resolve problems which impede its performance</p> <p>3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers</p>
4. Liaise with management	<p>4.1. Maintain open <i>communication</i> with <i>line manager/management</i> at all times</p> <p>4.2. Communicate information from line manager/management to the team</p> <p>4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken</p> <p>4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - boost team morale
 - deal with team conflict
 - deliver messages from management
 - facilitate discussion
 - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
 - delegation and work allocation
 - goal setting
 - group dynamics and processes
 - individual behaviour and difference
 - leadership
 - motivation
 - negotiation
 - planning.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met
- techniques in communicating information, dealing with team conflict and resolving issues
- knowledge of organisational goals, objectives and plans.

Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in working with team dynamics • observation of performance in role plays • oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes • evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team • review of feedback provided to team members • review of teamwork plan.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Team purpose, roles, responsibilities, goals, plans and objectives</i> may include:	<ul style="list-style-type: none"> • action plans, business plans and operational plans linked to strategic plans • expected outcomes and outputs • goals for individuals and the work team • individual and team performance plans and key performance indicators • occupational health and safety (OHS) responsibilities
<i>Consultation</i> may include:	<ul style="list-style-type: none"> • attending meetings, interviews, brainstorming sessions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • using email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual effectiveness • using mechanisms to provide feedback to the work team in relation to consultation outcomes
Responsibility for own work may involve:	<ul style="list-style-type: none"> • individual and joint actions • individuals and teams
Feedback may refer to:	<ul style="list-style-type: none"> • formal/informal gatherings between team members where there is communication on work related matters • informal communication of ideas and thoughts on specific tasks, outcomes, decisions, issues or behaviours
Relevant persons may include:	<ul style="list-style-type: none"> • colleagues • direct superior or other management representatives • OHS committees and other people with specialist responsibilities
Communication may include:	<ul style="list-style-type: none"> • face-to-face • formal/informal interaction • verbal, written or electronic communication
Line manager/management may refer to:	<ul style="list-style-type: none"> • direct superior or other management representatives

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and apply all contract conditions to the schedules.	<p>1.1. All contractual requirements are included in the schedules.</p> <p>1.2. <i>Local government and regulatory bodies</i> ' conditions of approval are included in the schedules.</p> <p>1.3. Schedules include colour selections.</p> <p>1.4. Variations to contracts, raised by the client or the builder, are included in the schedules.</p>
2. Produce material and labour schedules, overlays and orders.	<p>2.1. Nominated suppliers and contractors are detailed in work schedules.</p> <p>2.2. Relevant overlay drawings are produced.</p> <p>2.3. Orders include contract details and instructions.</p> <p>2.4. Contract rates are applied to material and labour schedules.</p>
3. Prepare site files.	<p>3.1. All necessary site documents are included, including approved <i>plans and specifications</i>.</p> <p>3.2. Call forward sheets are prepared detailing all orders.</p>
4. Monitor and report on project costs.	<p>4.1. <i>Project costs</i> are analysed against estimates during construction.</p> <p>4.2. Approved variation costs are analysed.</p> <p>4.3. Final project cost analysis is provided.</p>
5. Maintain data files of	<p>5.1. Approved variation cost increases are incorporated</p>

ELEMENT**PERFORMANCE CRITERIA**

standard costs.

into site files.

5.2. Changes to standard plans, specifications and cost files are included in site files.

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - communicate information effectively within the organisation and to external agencies and the client
 - read and interpret:
 - contracts
 - drawings and specifications
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to:
 - prepare and maintain site files
 - produce schedules and orders
- identify and analyse relevant information
- numeracy skills to apply calculations.

Required knowledge

Required knowledge for this unit is:

- operation and structure of the organisation's costing and contracting system
- state or territory building and construction codes, standards and regulations relevant to the form of building or construction being undertaken
- types of building or construction drawings and specifications commonly used in the industry
- types, scope and usage of labour through the employee and contractor systems.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by the preparation of schedules for materials and labour for a building project.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- identify materials required for the project and gather supply information effectively
- plan and allocate human and physical resources
- produce documentation that meets the timeframes and quality standards established by the organisation
- communicate information effectively within the organisation and to external agencies and the client, as required.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in a building or construction office

EVIDENCE GUIDE

- relevant codes, standards and regulations
- office equipment, including calculators, photocopiers and telephone systems
- computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies
- a technical reference library with current publications on measurement, design, building construction and manufacturers' product literature
- a suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with

EVIDENCE GUIDE

a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Local government and regulatory bodies include:

- electricity regulatory authorities
- environmental authorities
- health departments
- shire or municipal councils
- water corporations.

Plans and specifications include:

- building codes
- colour selections
- contract requirements
- material and labour schedules
- materials specifications
- plans, sketches and drawings

RANGE STATEMENT

Project costs include:

- statements of requirements.
- building or construction materials
- communications costs
- fuels, lubricants and other consumables
- organisational and subcontract labour costs
- overheads
- professional indemnity and other insurance costs
- project administration costs
- site facilities, such as toilets and storage sheds.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify types of drawings and their purposes.	1.1	Purpose and advantage of different <i>types of drawings</i> are identified.
		1.2	Different <i>aspects of drawings</i> are identified.
2	Apply commonly used symbols and abbreviations.	2.1	Commonly used symbols and abbreviations on drawings are identified, understood and applied
		2.2	Common building and construction terms used on drawings are identified, understood and applied
3	Locate and identify key features on a site plan.	3.1	Building site is identified from location drawings.
		3.2	True north and building orientation are identified from details provided on site plan.
		3.3	Key features of site plan are identified.
4	Identify and locate key features on drawings.	4.1	Key features of plans, elevations and sections are identified.
		4.2	Client requested variations to standard plans are identified on drawings.
5	Correctly read and interpret specifications.	5.1	Provisional sum (PS) and prime cost (PC) values are identified and correctly applied.
		5.2	Customer variations to standard specifications are identified.
		5.3	Correct interpretations of essential elements are applied to estimation, planning and supervisory tasks and are communicated.
		5.4	Building codes or standards affecting the work to be undertaken are identified, including references to Australian standards and the National Construction Code (NCC).

- | | | | |
|---|---|-----|---|
| 6 | Identify non-structural aspects to the specification. | 6.1 | Key features of products included in the <i>specification</i> are identified, including the design, purpose, aesthetics and cost relationships. |
|---|---|-----|---|

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - consult with industry professionals
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - interact effectively by telephone, facsimile, email and in writing with clients, organisational personnel and appropriate local authorities
 - read and interpret:
 - tender documentation
 - other relevant workplace documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written communication skills to produce required documentation
- identify and analyse relevant information
- numeracy skills to calculate labour hours and costs and material quantities and costs
- translation of documented requirements into on-site activities and site and structural features from two-dimensional to three-dimensional formats.

Required knowledge

Required knowledge for this unit is:

- building and construction practices
- internal documentation systems
- regulatory approvals processes and timeframes
- relevant state or territory building and construction codes, standards and regulations
- types of building and construction drawings and drawing perspectives
- types of building and construction industry contracts.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by correctly interpreting a range of plans and specifications for activities relating to low rise residential and commercial construction projects.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- read and interpret plans and specifications including identification of key features, levels, contours, sections, service entry points, site features to be removed or retained and other details pertinent to the construction process
- identify the characteristics and features of sites and structures pertinent to a construction project, including:
 - determine correct orientation of structures on site
 - establish location of key on-site features in relation to building or other structures
- identify and incorporate customer variations to agreed plans and specifications
- correctly interpret essential elements and apply these to estimation, planning and supervisory tasks
- effectively communicate specification changes to organisational personnel and confirm variations with the client.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- documentation that should normally be available in either a building or construction office
- relevant codes, standards and government regulations
- office equipment, including calculators, photocopiers and telephone systems
- computers with appropriate software to view 2-D CAD drawings, run costing programs and print copies
- technical reference library with current publications on measurement, design, building construction and manufacturer's product literature
- suitable work area appropriate to the construction process.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and

environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Types of drawings include:

- CAD drawings
- construction information
- detailed amendment drawings
- details of:
 - roads and pathways
 - parking areas
 - boundaries and landscaping
- initial sketches

- preliminary and final drawings and plans
- presentation drawings
- service details, such as:
 - wiring
 - piping
 - ducts and waste disposal
- sketch plans
- working drawings.

Aspects of drawings include:

- elevations
- plans
- sections
- views in isometric projection and perspective.

Key features of site plan include:

- access and egress
- contours and slopes
- drainage lines
- easements
- existing dwellings, buildings or other structures
- location and situation
- major geological and topographical features
- paving
- retaining walls
- service connection points
- set backs
- stormwater disposal
- trees and vegetation.

Specification includes:

- levels and survey information
- materials lists
- performance data and material technical data
- schedules of quantities
- stress, load and bearing calculations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for drawing requirements.	<p>1.1. Specifications for drawing are identified from request or conservation authority requirements.</p> <p>1.2. Dimensions of the <i>historical or significant building</i> are determined in accordance with appropriate <i>methods</i>, taking into account the type of structure, access to details and previous drawings available, if applicable.</p> <p>1.3. Method of recording feature details is determined in accordance with nature of the feature, location and accessibility.</p> <p>1.4. Method and system of recording identification, location and dimensional information are determined and applied in accordance with requested drawing requirements.</p> <p>1.5. Equipment and instruments required are identified, listed and used in accordance with recording task requirements.</p>
2. Organise information for drawing preparation.	<p>2.1. Information is gathered and organised to determine overall dimensions of the building, structure or details to be drafted.</p> <p>2.2. Information is gathered to identify and group all recorded details associated with each area or section of the building or structure.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Draw or develop orthographic description.	2.3. Size of the drawing and scale to be used is determined in accordance with dimensions of building, structure or section.
	2.4. Sketches, tracings or photographs of recorded features are identified and located with other recorded information related to <i>feature work</i> .
	3.1. Block layout of views and designed spacings, where applicable, are drawn or developed to planned layout and scaled accurately to recorded or calculated dimensions.
	3.2. Orthographic description views are detailed to show visible lines of structure and elements as seen with each view to correct scale representation of recorded dimensions.
	3.3. Architectural drawing conventions, symbols and hatching, where applicable, are shown on drawings in accordance with AS1100.301 - 1985 Architectural Drafting.
	3.4. Plans of large buildings are produced by use of grids, where applicable, to provide cross-referencing and dimensioning by coordinates.
4. Draw or develop sectional detailed drawings.	3.5. Dimensions and reference notations are located relevantly on drawings to provide full detailed descriptions as required with each view.
	3.6. Appendices and reference details of drawing are provided with drawing as required and in accordance with overall request.
	4.1. Sectional detailed drawings are drawn or <i>developed</i> to scale to show detailed structural description of relationship between elements in accordance with recorded dimensions.
5. Develop detailed drawings of feature work.	4.2. Architectural hatching is shown on drawings to represent materials, in accordance with relevant Australian standards.
	4.3. Dimensions and reference notation are located on drawings to provide full details of sectional description.
	5.1. Photographic recording of feature work shape and design is enlarged by photocopying to provide more realistic size for analysis and reproduction.
	5.2. Gridlines are determined in accordance with actual dimensions of the feature work shape and are reproduced to enlarged photocopy.

ELEMENT**PERFORMANCE CRITERIA**

	<p>5.3. Enlarged photocopy is closely examined for distortion from the photographing process and adjustments are made to the design, as necessary.</p> <p>5.4. Tracing recordings are examined in accordance with the whole feature or part thereof and linked with other tracings or sketches to ascertain the feature shape to be reproduced.</p> <p>5.5. Design shape drawings are developed to produce accurate design to scale with grid lines where applicable.</p> <p>5.6. Cross-sectional details are produced accurately to scale, to provide three-dimensional information.</p> <p>5.7. Dimensions, reference notation, specific location and appendices are produced for drawings in accordance with client request or design aims.</p>
6. Complete work.	<p>6.1. Drawings are checked for accuracy, clarity of line, completeness of drawing and associated dimensions and details.</p> <p>6.2. Copies are made, where applicable, in accordance with original request.</p> <p>6.3. Production details and coded reference information are recorded.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to use instruments and equipment for measuring
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - documentation from a variety of sources
 - plans, specifications and drawings
 - use and interpret non-verbal communication

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- written skills to record relevant information
- numeracy skills to calculate measurements
- organisational skills, including the ability to set out work
- work to scale.

Required knowledge

Required knowledge for this unit is:

- Australian standards - AS1100.101 and AS1100.301
- conservation processes, including good conservation practice arising from principles of Burra Charter
- finishing trade applications to materials
- methods and processes relating to historic building construction, including the range and use of building materials, structure of buildings and drafting techniques
- methods of measuring
- relevant architectural knowledge, including orders of architecture and the characteristics and features of period architecture
- workplace and equipment safety requirements, including relevant statutory regulations, codes and standards.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by carrying out the necessary preparatory processes and developing at least two examples of each form of drawing specified, using sample or case study heritage projects for any of the buildings listed in the range statement.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and

EVIDENCE GUIDE

	procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • clearly understand conservation considerations and consultative processes associated with preservation of historic structures • clearly appreciate preservation of fabric • comply with OHS regulations applicable to workplace operations • apply organisational quality procedures and processes within the context of preparing drawings to conservation requirements • apply recording and identification system for measurements, locations and details • select and use appropriate processes, instruments and equipment to measure and record information • use appropriate and safe techniques to obtain measurements and details • apply accurate techniques in preparing information for related drawings • select and use appropriate techniques to ascertain accurate analysis of featured design shapes • apply techniques to ensure all relevant information is included in orthographic description • select and use appropriate techniques to produce accurate, sharp and complete drawings.
Context of and specific resources for assessment	<p>This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> • historic locations appropriate to competency range

EVIDENCE GUIDE

- drafting and computer equipment
- equipment relevant to measuring processes.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language,

EVIDENCE GUIDE

literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Historical or significant building includes:

- built or sculptured artefacts
- cathedrals and churches
- civic buildings
- commercial and retail buildings
- doors
- external features
- fences
- government buildings
- houses
- mansions
- out buildings
- walls
- wharves
- windows.

Methods include:

- accurately trace shapes or features
- calculate height by use of levelling equipment and/or trigonometry
- physically tape and measure all internal and external measurement
- scale proportion of roof, chimney and spire heights from photograph where wall height is

RANGE STATEMENT

	determined.
<i>Feature work</i> includes:	<ul style="list-style-type: none"> • decorative tiling • mosaic tiling • ornamental mouldings • ornamental plasterwork • ornamental stonework.
<i>Orthographic description</i> includes:	<ul style="list-style-type: none"> • front, rear and side elevations • plans • sectional elevations • sectional plans.
<i>Sectional detailed drawings</i> include:	<ul style="list-style-type: none"> • ceiling and roof framing construction • ceiling construction • chimney construction • cladding details • external wall construction • fence construction • footings and foundation • internal wall construction • roofing details • sub-floor construction.
<i>Development</i> of drawings includes:	<ul style="list-style-type: none"> • computer aided drafting • drafting techniques • drawings developed in accordance with National Trust guidelines or in accordance with AS1100.101 - 1992 Technical Drawing - General Principles, and AS1100.301 - 1985 Architectural Drawing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify types of drawings and their functions.	<p>1.1. Main types of <i>plans and drawings</i> used in the construction sector of the industry are identified.</p> <p>1.2. <i>Key features</i> and functions of each type of drawing are identified.</p> <p>1.3. <i>Quality requirements</i> of company operations are recognised and adhered to.</p> <p>1.4. <i>Environmental requirements</i> and controls are identified from job plans, specifications and environmental plan.</p>
2. Recognise amendments.	<p>2.1. Title panel of <i>project documentation</i> is checked to verify latest amendments to drawing.</p> <p>2.2. Amendments to <i>specifications</i> are checked to ensure currency of <i>information</i> and conveyed to others where appropriate.</p>
3. Recognise commonly used symbols and abbreviations.	<p>3.1. Construction symbols and abbreviations are recognised.</p> <p>3.2. Legend is located on project drawings, and symbols and abbreviations are correctly interpreted.</p>
4. Locate and identify key features on a site plan.	<p>4.1. Orientation of the plan with the site is achieved.</p> <p>4.2. Key features of the site are identified and located.</p> <p>4.3. Access to site is gained and services, main features, contours and datum are identified.</p>

ELEMENT	PERFORMANCE CRITERIA
5. Identify project requirements.	5.1. Dimensions for project and nominated locations are identified. 5.2. Construction types and dimensions for nominated locations are identified. 5.3. Environmental controls and locations are identified. 5.4. Location, dimensions and tolerances for ancillary works are identified.
6. Read and interpret job specifications.	6.1. Job specifications are identified from drawings, notes and descriptions. 6.2. Standards of work, finishes and tolerances are identified from the project specifications. 6.3. Material attributes are identified from specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations, including heights, areas, volumes and grades
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

REQUIRED SKILLS AND KNOWLEDGE

- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- basic calculations of heights, areas, volumes and grades
- commonly used construction symbols and abbreviations
- construction terminology
- drawing conventions
- features of plans and elevations, including direction, scale, key, contours, symbols and abbreviations
- job safety analysis (JSA) and safe work method statements
- key features of formal job specifications
- processes for application of scales in plan preparation and interpretation
- project quality requirements
- site and equipment safety (OHS) requirements
- techniques for orienting/confirming the orientation of a plan.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications

EVIDENCE GUIDE

-
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
 - comply with organisational policies and procedures, including quality requirements
 - communicate and work effectively and safely with others
 - for a minimum of two different projects, read and interpret the project plans, including:
 - confirmation of amendment status and drawings confirmed 'for construction'
 - orientation of plans to the ground
 - six key features on both the plan and the site
 - confirmation of six items of information from the title block of the project plans
 - six construction dimensions, levels and locations from the project plans
 - six ancillary works dimensions, levels and locations from the project plans
 - for a minimum of two formal specifications, identify the dimensions, material requirements and processes to be followed.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies

EVIDENCE GUIDE

- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language,

EVIDENCE GUIDE

literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Plans and drawings include:

- construction plans
- cross-sectional plans
- dimensions and notes
- illustrations
- longitudinal plans
- project specifications
- site plans
- structural detail and specification providing illustrations and dimensions.

Key features of plans and specifications include:

- characteristics
- compatibility
- construction
- location
- pattern dimension
- quantities
- sizes
- type of product or service.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications, where specified
- workplace operations and procedures.

RANGE STATEMENT

<i>Environmental requirements</i> include:	<ul style="list-style-type: none">• clean-up management• waste management.
<i>Project documentation</i> includes:	<ul style="list-style-type: none">• contracts• drawings• schedule of rates• specifications• standard procedures and practices• supplementary specifications• work schedules.
<i>Specifications</i> include:	<ul style="list-style-type: none">• detail relating to materials and quality of work, quality assurance, nominated subcontractors, and provision of site access/facilities• details relating to performance, including:<ul style="list-style-type: none">• characteristics• material types• standards of work• tolerances• treatments and finishes.
<i>Information</i> includes:	<ul style="list-style-type: none">• diagrams or sketches and graphics• instructions issued by authorised organisational or external personnel• manufacturer specifications and instructions• maps• material safety data sheets (MSDS)• memos• organisation work specifications and requirements.• plans and specifications• regulatory and legislative requirements pertaining to operations and the environment• relevant Australian standards• safe work procedures related to construction site operations• signage• verbal or written and graphical instructions• work bulletins• work schedules.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained, confirmed and applied from relevant <i>information</i> for <i>planning and preparation</i>.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <i>Tools and equipment</i> selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.</p> <p>1.5. Material quantity requirements are calculated in accordance with plans and specifications.</p> <p>1.6. <i>Materials</i> appropriate to the work application and <i>quality requirements</i> are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and <i>statutory and regulatory authority</i> obligations, and are applied.</p>
2. Locate excavation site and erect safety equipment.	<p>2.1. Excavation route is located, and line and depth are established from site plans and instructions.</p> <p>2.2. Site pegs/profiles are used to identify service</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>markers and to <i>set out</i> service points and the excavation limits are marked.</p> <p>2.3. Safety barricades and signs appropriate to the project are erected in positions as required by site safety plan.</p> <p>2.4. Temporary drainage system is established to divert surface and sub-surface water from excavation.</p> <p>2.5. Service markers or taped areas are identified and damage or interference with underground services avoided.</p>
3. Dig excavations.	<p>3.1. Excavations are safely dug with hand tools to ensure correct route, line and depth, and that procedures are used to minimise risk to self and others.</p> <p>3.2. Machine operator is assisted with excavation to ensure correct route, line and depth, and that correct procedures are used to minimise risk to self and others.</p> <p>3.3. Trench/excavation support is installed where specified by job specifications and regulations.</p> <p>3.4. Excavation is cleaned free from loose material with hand tools and according to job requirements and instructions.</p>
4. Clean up.	<p>4.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>4.2. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:

REQUIRED SKILLS AND KNOWLEDGE

- assist machine operator
- determine requirements
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- follow instructions
- read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
- report faults
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- commonly used in-ground services and identification by relevant markers
- construction terminology
- excavation materials
- excavation techniques
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- regulatory requirements for excavation support for safe access
- safe work with common plant used on construction industry sites
- types, characteristics, uses and limitations of tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- determine from an existing set out, a mark out and then excavate site as part of an overall project to job specifications without damaging services.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

EVIDENCE GUIDE

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and

EVIDENCE GUIDE

separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- maps
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications

RANGE STATEMENT

Planning and preparation include:

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- regulatory and legislative requirements pertaining to carrying out excavations
- relevant Australian standards
- safe work procedures related to carrying out excavations
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.
- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment

RANGE STATEMENT

Tools and equipment include:

- use of tools and equipment
- workplace environment and safety.
- automatic levels
- brooms
- buckets
- crow bars
- hammers
- hoses
- laser levels
- levels
- measuring tapes and rules
- picks
- profiles
- saws
- set out pegs
- shovels
- staff
- straight edges
- string lines
- wheelbarrows.

Materials include:

- nails
- pegs
- sheet material shoring (timber and metal)
- timber.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications, where specified
- workplace operations and procedures.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Set out includes:

- identification of services that can be damaged or impede excavation
- marking out of the project.

Excavations include:

- extension of existing structures, to provide provisions for new services and to modify or

RANGE STATEMENT

- repair existing services
- provisions for footings/slabs to new structures
- shoring (timber, metal or piling)
- those being undertaken on sloping ground, flat ground, wet ground, dry ground, loose ground or any type of foundation material, with mechanical assistance possibly required for rock
- trench/excavation support using sheet material.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|----------------------------------|-----|---|
| 1 | Plan and prepare. | 1.1 | Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant information to prepare for basic levelling activities . |
| | | 1.2 | Safety (OHS) requirements are followed in accordance with safety plans and policies. |
| | | 1.3 | Signage and barricade requirements are identified and implemented. |
| | | 1.4 | Tools and equipment selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. |
| | | 1.5 | Environmental requirements are identified for the project in accordance with environmental plans and statutory and regulatory authority obligations, and are applied. |
| 2 | Set up and use levelling device. | 2.1 | Heights or levels to be transferred/established are identified from project plans or instructions for levelling procedures . |
| | | 2.2 | Levelling devices are set up and tested in accordance with manufacturer instructions, including levelling device tolerance checks . |
| | | 2.3 | Levelling staffs are accurately applied. |
| | | 2.4 | Levels are shot and heights transferred to required location and marked and/or recorded to job requirements. |
| | | 2.5 | Results of levelling procedure are documented to organisational requirements. |
| 3 | Clean up. | 3.1 | Work area is cleared and materials disposed of, reused |

or recycled in accordance with legislation, regulations, codes of practice and job specification.

- 3.2 Tools and equipment are cleaned, checked, maintained, including *levelling device operator maintenance*, and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- application and requirements for line, level and plumb in construction projects

- basic construction processes
- basic mathematical techniques associated with levelling
- construction terminology
- job safety analysis (JSA) and safe work method statements
- levelling device types, characteristics, technical capabilities and limitations
- levelling techniques related to essential tasks
- processes for interpreting engineering drawings and sketches
- processes for setting out
- project quality requirements
- site and equipment safety (OHS) requirements
- site isolation and traffic control responsibilities and authorities
- symbols and construction terminology of construction plans.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others
- transfer levels and record differences in height on

one project to job specifications using:

- a spirit level and straight edge
- levelling with water technique
- laser levelling devices
- optical levelling devices
- confirm accuracy of the readings taken for all above, including set-up and movement of device in two locations
- conduct a two peg test with an automatic level to confirm that instrument meets manufacturers' tolerances
- accurately record the results of each levelling procedure to organisational requirements.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present

with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- maps
- material safety data sheets (MSDS)
- memos
- organisation work specifications and requirements.
- plans and specifications
- relevant Australian standards
- safe work procedures related to performing levelling
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Basic levelling activities may include:

- setting up of devices
- recording of heights or level and the transfer of data points
- transferring levels/heights for formwork
- shooting levels for concrete slabs
- recording ground levels at respective critical set out points
- recording slab or pad levels for placement of steel columns or masonry piers
- recording or checking levels in drainage
- positioning offsets and recovery pegs for construction projects.

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes

- lighting
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment may include:

- chalk lines
- hammers
- marking equipment
- measuring tapes and rules, spirit levels and straight edges
- plumb bobs
- saws, bolt cutters and saw stools
- signage for laser levelling
- string lines and laser targets
- water levels, laser levels, optical levels and automatic levels
- wooden and steel pegs.

Environmental requirements include:

- clean-up management
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Heights or levels may be indicated by:

- chalk or nail mark and marks on vertical surface
- datum and survey peg
- drawing or sketch
- verbal or written instructions.

Levelling procedures:

- include open or closed traverse using height of instrument or rise and fall methods of reduction
- may be completed in a team arrangement.

Levelling devices may include:

- automatic level
- inclinometers
- laser level
- levelling staff
- levelling using water
- optical level
- string line
- survey pegs
- tape measure
- batter pegs or boards
- plumb bob.

Levelling device tolerance checks may include:

- reverse readings for spirit level
- two peg test for automatic level.

Levelling device operator maintenance:

- includes:
 - authorised servicing
 - cleaning
 - monitoring, recording and reporting of faults
- may include conduct of authorised minor replacements.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|----------------------------------|-----|---|
| 1 | Identify work area requirements. | 1.1 | Site of proposed <i>work at heights</i> is identified from relevant <i>information</i> . |
| | | 1.2 | Method of accessing work area is identified. |
| | | 1.3 | Tasks to be completed are identified from work orders and supervisor instructions. |
| | | 1.4 | Fall protection equipment is identified if required by site job <i>workplace health and safety (WHS)</i> analysis and <i>statutory and regulatory</i> requirements. |
| | | 1.5 | Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations. |
| 2 | Access work area. | 2.1 | Fall protection equipment where required is correctly fitted, adjusted and anchored. |
| | | 2.2 | Arrangements are made to appropriately install required equipment taking account of all potential <i>hazards</i> . |
| | | 2.3 | Appropriate methods are used to access work area for self, <i>tools and equipment</i> , and <i>materials</i> . |
| | | 2.4 | Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down. |
| 3 | Conduct work tasks. | 3.1 | Work is conducted following workplace approved procedures. |
| | | 3.2 | Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work. |
| | | 3.3 | Scaffold components and fall barriers are kept in place during work. |
| | | 3.4 | Egress from work area is completed following work site supervisor approved methods for self, tools, materials |

and *environmental requirements*.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
 - manual handling risks
 - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work at heights includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Workplace health and safety is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - photovoltaic (solar) panels
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
 - AS6001 - 1999 Working platforms for domestic application
 - AS1576 - Scaffolding
 - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

Tools and equipment include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

Materials include:

- materials used on the construction work site.

Environmental requirements
include:

- clean-up management
- noise and dust
- vibration
- waste management.

Unit sector Construction

Custom Content Section

Not applicable.

CPCCCM3001C Operate elevated work platforms

Modification History

Prerequisite unit identifier code updated

Equivalent to CPCCCM3001B

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to safely and effectively operate some types of elevated work platforms (EWPs) in a variety of different terrains and situations to access isolated work areas. The unit includes locating, setting up, operating and shutting down EWPs.

In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

Application of the Unit

Application of the unit

This unit of competency assists in the safe and effective operation of electrical, hydraulic or mechanical EWPs. The unit does not cover powered telescoping devices, hinged devices or articulate d devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. An OHS authority Certificate of Competency may be required to operate boom type EWPs of 11 metres or more in some jurisdictions.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<ul style="list-style-type: none">1.1. <i>Work planning and preparation</i> are conducted using plans, specifications, quality requirements and operational details, obtained, confirmed and applied from relevant <i>information</i>.1.2. <i>Safety (OHS)</i> requirements for the <i>types of EWP</i> to be operated are followed in accordance with safety plans and policies.1.3. Signage and barricade requirements are identified and implemented.1.4. Plant, <i>tools and equipment</i> and <i>personal protective equipment</i> are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.6. Environmental requirements are identified for the project in accordance with environmental plans and statutory and regulatory authority obligations, and are applied.</p>
2. Conduct routine checks of platform.	<p>2.1. Power source is determined and connected to platform equipment according to manufacturer specifications.</p> <p>2.2. Routine pre-operational equipment checks are carried out in accordance with checklist from operator's manual or manufacturer specifications.</p> <p>2.3. Equipment is switched on in accordance with start up procedures and controls are checked for correct operation and ease of movement.</p> <p>2.4. Emergency safety devices are checked to comply with instructions from operator's manual and checked for manual operation.</p> <p>2.5. Work location is checked for level ground or floor surface to determine stabilising and safe working area requirements.</p>
3. Locate equipment in place for work application.	<p>3.1. Platform is positioned for work application and stabilisers are engaged to set equipment base level into place according to safe operating procedures.</p> <p>3.2. Tools, equipment and materials are placed into bucket or on platform according to job application requirements.</p>
4. Elevate platform to work location.	<p>4.1. Harness is fitted securely and lanyard connected to attachment point.</p> <p>4.2. EWP operation and controls are operated to manufacturer recommendations and platform is elevated to work position.</p> <p>4.3. Power is switched off where specified and locking devices are engaged according to operator's manual.</p> <p>4.4. Work is carried out to job specification and safety (OHS) requirements of operator's manual.</p>
5. Lower platform and shut down.	<p>5.1. Controls are operated to manufacturer recommendations and platform is lowered to down position.</p> <p>5.2. Shut down procedures are carried out to operator's manual and equipment is switched off.</p>

ELEMENT	PERFORMANCE CRITERIA
6. Clean up.	<p>6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p> <p>6.3. Work completion procedures are applied and relevant personnel notified that work is finished.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to complete inspection log and handover
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:

REQUIRED SKILLS AND KNOWLEDGE

- use a range of mobile technology, such as two-way radio and mobile phones
- voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- designs, functions and operational limitations of EWP equipment
- EWP equipment types and OHS authority certification of competency requirements
- EWP techniques
- fault finding and identification
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of load mass requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training

EVIDENCE GUIDE

staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work planning and preparation include:

- assessment of conditions and hazards
- consideration that EWPs must not be operated anywhere with overhead powerlines above, or within specified clearance distances set out in documentation such as Electrical Safety - Power line NO GO Zones, unless permission has been obtained from the power authority and a JSA has been developed
- determination of work requirements
- equipment defect identification
- work site inspection.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to EWPs
- relevant Australian standards
- safe work procedures related to operating EWPs, including the safe working load written on the EWP which must be checked to ensure it is not exceeded
- signage
- verbal or written and graphical instructions
- work bulletins

RANGE STATEMENT

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- work schedules, plans and specifications.
- procedures related to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- organisational first aid
- personal protective clothing and equipment
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Types of EWP:

- EWPs include scissor lifts, boom and knuckle boom lifts with a boom length under 11 metres
- EWPs are classified as:
 - trailer mounted boom lift (TL)
 - self-propelled boom lift (BL)
 - vertical lift (VL)
 - scissor lift (SL)
 - truck-mounted boom lift (TM), which is not covered by this unit of competency.

Tools and equipment include:

- EWPs, extension leads, logbooks, service manuals, operation manuals, safety harnesses and lanyards
- special attachments, which may have to be installed if equipment is to be shifted with the EWP, as lifting loads via cables and ropes from an EWP is not permitted.

Personal protective equipment includes:

- that prescribed under legislation, regulations, codes of practice and workplace policies and practices.

Environmental requirements include:

- clean-up protection
- noise and dust
- sedimentation control
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

RANGE STATEMENT

- Emergency safety devices*** include:
- bleed valves
 - electronic override
 - emergency descent devices
 - ground controls
 - hydraulic accumulators.
- Safe operating procedures*** include:
- conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
 - not using slab terrain EWPs on any surface other than concrete or level asphalt.
- Harnesses*** include:
- energy or shock absorbers that must be used with all fall arrest lanyard, harness and inertia reel systems
 - full body rescue harness
 - lanyards and inertia reels, which should be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is 2 metres.
- EWP operation*** includes:
- boom up and down
 - operate attachments
 - operate outriggers
 - slew left and right
 - telescope in and out.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained using relevant <i>information</i>, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. Plant, <i>tools and equipment</i> selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5. Materials quantity requirements are calculated in accordance with plans, specifications and <i>quality requirements</i>.</p> <p>1.6. <i>Materials</i> appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and regulatory obligations and applied.</p>
2. Erect and strip simple	<p>2.1. Subgrade is prepared.</p>

ELEMENT	PERFORMANCE CRITERIA
formwork.	<p>2.2. Formwork design is identified from drawings.</p> <p>2.3. Formwork is erected safely on commencement.</p> <p>2.4. Form release agent is applied to erected formwork where specified.</p> <p>2.5. Timber components are de-nailed following stripping of formwork.</p> <p>2.6. Components are cleaned, stacked and stored for reuse or bundled for removal.</p> <p>2.7. Formwork components are removed from site.</p>
3. Place and tie reinforcement.	<p>3.1. Reinforcing components are handled and positioned safely.</p> <p>3.2. Reinforcing bars and mesh are positioned.</p> <p>3.3. Bar chairs and spacers are positioned, with minimum edge cover.</p>
4. Place concrete.	<p>4.1. Formwork or excavation is cleaned of excess material and debris prior to concrete placement.</p> <p>4.2. Concrete is safely transported by wheelbarrow.</p> <p>4.3. Pump line/chute is controlled and concrete placed.</p> <p>4.4. Concrete is placed in formwork to specified depth.</p> <p>4.5. Concrete is screeded to the alignment of formwork and project specified datums.</p> <p>4.6. Surface of concrete is finished in accordance with specifications.</p>
5. Clean up.	<p>5.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations and codes of practice and job specification.</p> <p>5.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- concrete materials
- concreting techniques
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- levelling techniques
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements
- quality requirements
- simple formwork and reinforcing componentry

REQUIRED SKILLS AND KNOWLEDGE

- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- prepare subgrade; erect formwork; cut, place and tie reinforcement; place and hand screed concrete for a slab of (4 square metres is recommended) and a minimum depth of 100mm to the required finished level and job specification.

Context of and specific resources

This competency is to be assessed using standard and authorised work practices, safety requirements

EVIDENCE GUIDE

for assessment

and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

EVIDENCE GUIDE

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions,

RANGE STATEMENT

	where specified
	<ul style="list-style-type: none"> • MSDS • memos • regulatory and legislative requirements pertaining to concreting • relevant Australian standards • safe work procedures relating to concreting • signage • verbal, written and graphical instructions • work bulletins • work schedules, plans and specifications.
<i>Planning and preparation</i> include:	<ul style="list-style-type: none"> • assessment of conditions and hazards • determination of work requirements and safety plans and policies • equipment defect identification • work site inspection.
<i>Safety (OHS)</i> is to be in accordance with state and territory legislation and regulations and project safety plan and may include:	<ul style="list-style-type: none"> • emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation • handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor • hazard control • hazardous materials and substances • organisational first aid • PPE prescribed under legislation, regulations and workplace policies and practices • safe operating procedures, including the conduct of operational risk assessment and treatments associated with: <ul style="list-style-type: none"> • earth leakage boxes • lighting • power cables, including overhead service trays, cables and conduits • restricted access barriers • surrounding structures • traffic control • trip hazards • work site visitors and the public • working at heights

RANGE STATEMENT

	<ul style="list-style-type: none">• working in confined spaces• working in proximity to others• use of firefighting equipment• use of tools and equipment• workplace environmental requirements and safety.
<i>Tools and equipment:</i>	<ul style="list-style-type: none">• include:<ul style="list-style-type: none">• brooms• chutes• edging tools• shovels• trowels• wheelbarrows• may include:<ul style="list-style-type: none">• bull floats• hand floats• kibbles• line pumps• stipple devices• trowelling machines.
<i>Quality requirements</i> include:	<ul style="list-style-type: none">• internal company quality policy and standards• manufacturer specifications where specified• relevant regulations, including Australian standards• workplace operations and procedures.
<i>Materials:</i>	<ul style="list-style-type: none">• include:<ul style="list-style-type: none">• bar chairs• bracing• edge form/boards• fabric sheet mesh• pegs• spacers• may include reinforcing bars.
<i>Environmental requirements</i> include:	<ul style="list-style-type: none">• clean-up management• dust and noise• stormwater management• vibration• waste management.

RANGE STATEMENT

- Simple *formwork* includes:
- timber or steel edge form to a maximum of 100mm in depth.
- Simple *reinforcing*:
- includes:
 - bar chairs
 - fabric sheet mesh
 - spacers
 - may include:
 - reinforcing bars
 - trench mesh.
- Simple forms of *concrete*:
- include slabs (not requiring internal beams and piers)
 - may include:
 - beam thickeners
 - channels
 - garden edges
 - pathways
 - post holes
 - simple concrete aprons.
- Concreting* includes:
- finishing of concrete
 - floating of the concrete
 - placing of concrete
 - screeding, limited to include a hand screed.
- Placing of concrete* involves movement of concrete from the truck to the work and:
- includes:
 - chutes
 - wheelbarrows
 - may include:
 - kibbles
 - pump lines.
- Finishing of concrete* includes:
- broomed
 - hand floating
 - power floating
 - sponged
 - stipple device finish
 - trowelled
 - trowelling machine finish
 - wood floated
 - other project specified finish.

CPCCCO3046A Repair and rectify concrete

Modification History

This version first released CPC08 Construction, Plumbing and Services Training Package Version 9.

- Changes to unit title, performance criteria, required skills and knowledge, range statement, critical aspects for assessment, and methods of assessment
- Range of other minor editorial changes

Not equivalent to CPCCCO3026A Carry out repair and rectification of concrete

Unit Descriptor

This unit of competency specifies the outcomes required to repair and rectify minor and major defects in concrete work in order to fix damaged areas.

The unit includes patching, refinishing, sealing and colouring concrete. It may also include working with others and as a member of a team.

Application of the Unit

This unit of competency supports the role of concreters working on residential, commercial or civil construction sites to repair damaged concrete on surfaces that could include driveways, foundations and footpaths.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements apply to concreting work in different states and territories. Candidates are advised to consult with the relevant regulatory authorities.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--------------------------|--|
| 1 | Plan and prepare. | <p>1.1 Work instructions, <i>work health and safety (WHS) requirements</i> and other <i>information</i> relevant to the work are identified, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2 Plant, <i>tools and equipment</i> consistent with job requirements are selected and checked for serviceability, and faults are rectified and reported before work begins.</p> <p>1.3 Material quantity requirements are identified and calculated according to plans, specifications and <i>quality requirements</i>.</p> <p>1.4 <i>Materials</i> appropriate to the work application are obtained, prepared, safely handled and located ready for use.</p> <p>1.5 <i>Environmental requirements</i> are identified for the project according to environmental plans and regulatory requirements.</p> |
| 2 | Carry out minor repairs. | <p>2.1 <i>Types of surfaces that may require repair</i> are identified and <i>repair work</i> is categorised as <i>major repairs</i> or <i>minor repairs</i>.</p> <p>2.2 Colour variations are repaired by applying a concrete staining agent.</p> <p>2.3 Effects of dusting are repaired by applying an appropriate surface hardener/dust inhibiting agent or removing the weak top layer.</p> |

- | | | |
|---|--|---|
| | 2.4 | <i>Damaged or blistered concrete</i> is repaired either by grinding or topping. |
| | 2.5 | Repair mortars and self-levelling floor compounds are applied according to manufacturer specifications. |
| | 2.6 | Sealers and coloured paints are applied to concrete surfaces according to manufacturer specifications. |
| 3 | Repair cracks and other major defects. | |
| | 3.1 | Root cause of defect is determined and rectified. |
| | 3.2 | Concrete is prepared and flexible epoxy resins are applied to manufacturer specification. |
| | 3.3 | Toppings are applied to concrete using correct materials and techniques. |
| | 3.4 | Acid etching and cleaning are applied safely according to manufacturer requirements. |
| 4 | Clean up. | |
| | 4.1 | Work area is cleared and materials disposed of, reused or recycled according to regulations, codes of practice and job specification. |
| | 4.2 | Plant, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to:
 - evaluate own actions and make judgments about performance and necessary improvements
 - respond to change, such as differences in work site, and environmental and quality requirements
- numeracy skills to:
 - calculate and confirm correct quantities of materials for work tasks

- estimate time required for repair and rectification of concrete
- oral communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, and share information
 - report work site hazards to appropriate personnel, including faults in tools, equipment or materials
 - use language and concepts appropriate to cultural differences
- reading skills to:
 - interpret documentation, including drawings and specifications
 - understand written instructions, procedures and signage
 - interpret manufacturer instructions for safely handling tools, equipment and materials
- writing skills to complete equipment fault forms

Required knowledge

- types, location and use of relevant safety resources and information:
 - job safety analyses (JSA) and safe work method statements (SWMS)
 - safety data sheets (SDS)
 - signage and barricades
- principles and processes for general concreting work:
 - materials and techniques for repairing concrete
 - preparation and placement of formwork and reinforcement
 - use of control joints
 - levelling techniques
 - mortar mix composition and additives
 - placing and finishing of concrete to ensure timely completion of job within quality requirements and specifications
- general construction terminology
- processes for material storage and environmentally friendly waste management
- processes for calculating material requirements
- quality requirements relevant to the repair and rectification of concrete
- types, characteristics, uses and limitations of concreting plant, tools and equipment:
 - safe operating procedures
 - operational, maintenance and basic diagnostic procedures
 - workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment This unit of competency could be assessed by undertaking a range of tasks in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit A person should demonstrate the ability to:

- identify and apply the correct repair method and top coat to a minimum of one square metre of affected area for three minor repairs and one major repair listed in the range statement
- remove a section or whole defective area of concrete, cleaning and preparing the affected area and applying the necessary bonding
- locate, interpret and apply relevant information, standards and specifications relating to repairing and rectifying concrete
- comply with site safety plans and procedures
- comply with organisational policies and procedures relating to repairing and rectifying concrete while maintaining quality requirements
- safely and effectively operate and use plant, tools and equipment required to repair and rectify concrete
- communicate and work effectively and safely with others at each stage of the process to repair concrete.

Context of and specific resources for assessment Assessment of this unit:

- must be in the context of the work environment
- may be conducted in an off-site context, provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills
- must meet relevant compliance requirements.

Resource implications for assessment include:

- an induction procedure
- realistic tasks or simulated tasks covering the mandatory task requirements
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- safety data sheets.

Method of assessment	<p>Assessment for this unit must verify the practical application of the required skills and knowledge, using a combination of the following methods:</p> <ul style="list-style-type: none">• direct observation of tasks in real or simulated work conditions• questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application• review of relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.
Guidance information for assessment	<p>This unit could be assessed on its own or in combination with other units relevant to the job function.</p> <p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Work health and safety (WHS) requirements</i> must comply with state and territory legislation and regulations and project safety plan, and may include:	<ul style="list-style-type: none">• assistance of others or the use of manual or mechanical lifting devices with handling activities where size, weight or other issues, such as disability, are a factor• emergency procedures, including extinguishing fires, organisational first aid requirements, and evacuation procedures• hazard control• hazardous materials and substances• personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
---	--

- earth leakage boxes
- lighting
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- working outdoors in warm climates
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.
- instructions issued by authorised organisational and external personnel
- memos
- regulatory and legislative requirements relating to repairing concrete
- relevant Australian standards
- safe work procedures relating to repairing concrete
- safety data sheets
- signage
- verbal, written and diagrammatical instructions, including manufacturer specifications and instructions where specified
- work bulletins
- work schedules, plans and specifications.
- assessing conditions and hazards
- determining work requirements and safety plans and procedures
- identifying equipment defects
- inspecting work sites.

Information may include:

Planning and preparation must include:

Tools and equipment may include:

- brooms
- concrete mixers
- floats
- grinders
- hoses
- polishers
- rollers

	<ul style="list-style-type: none">• screeds• shovels• trowels, including power trowels• water blasters• wheelbarrows.
Quality requirements must include:	<ul style="list-style-type: none">• internal organisational quality policy and standards• manufacturer specifications where specified• relevant regulations and Australian standards• workplace operations and procedures.
Materials:	<ul style="list-style-type: none">• must include concrete• may include:<ul style="list-style-type: none">• bonding agents• acrylic co-polymers• resin based compounds• silicate compounds• curing compounds• retardants.
Environmental requirements may include:	<ul style="list-style-type: none">• clean-up management• dust and noise control• stormwater management• vibration management• waste management.
Types of surfaces that may require repair may include:	<ul style="list-style-type: none">• beams• columns• concrete aprons• pathways• ramps• slabs• stairs• walls.
Repair work may include:	<ul style="list-style-type: none">• dowelling• drilling• formwork• patching• replacing concrete• resurfacing• self-levelling compounds.
Major repairs may include:	<ul style="list-style-type: none">• cracks (wet, live and dormant)• non-bonding of new to old interfaces• non-compliant surfaces• subsidence.

Minor repairs may involve:

- acid etching and cleaning
- bonded toppings
- levelling compounds
- mortars
- slippery surfaces
- topping existing concrete
- unbonded toppings.

Damaged or blistered concrete may include:

- blow holes
- dusting
- rain damage
- spalling
- stamped concrete defects
- stencilled concrete defects
- wavy or uneven surfaces.

CPCCOHS1001A Work safely in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1.Applicable <i>OHS legislative requirements</i> relevant to own work, role and responsibilities are identified and explained. 1.2.Duty of care requirements are identified. 1.3.Own responsibilities to comply with <i>safe work practices</i> are identified and explained.
2. Identify construction hazards and control measures.	2.1.Basic principles of risk management are identified. 2.2. <i>Common construction hazards</i> are identified and discussed. 2.3. <i>Measures for controlling</i> hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1.OHS communication processes, information and documentation are identified and discussed. 3.2.Role of <i>designated OHS personnel</i> is identified and explained.

ELEMENT	PERFORMANCE CRITERIA
4. Identify OHS incident response procedures.	3.3. <i>Safety signs and symbols</i> are identified and explained.
	3.4. Procedures and <i>relevant authorities</i> for reporting hazards, <i>incidents</i> and injuries are identified.
	4.1. <i>General procedures</i> for responding to incidents and <i>emergencies</i> are identified and explained.
	4.2. Procedures for accessing first aid are identified.
	4.3. Requirements for the selection and use of relevant <i>personal protective equipment</i> are identified and demonstrated.
	4.4. <i>Fire safety equipment</i> is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - clarify OHS legislative requirements
 - verbally report construction hazards and risks
 - ask effective questions
 - relay information to others
 - discuss OHS issues and information
- comprehension skills to:
 - explain the basic OHS legislative requirements which will be applicable to own work
 - explain the meaning of safety signs and symbols
 - identify common construction hazards
 - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
 - persons in control of construction work/projects
 - employers and self-employed persons
 - supervisors
 - employees
 - designers
 - inspectors
 - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
 - housekeeping
 - identification of hazards
 - preventing bullying or harassment
 - smoking
 - use of amenities
 - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

EVIDENCE GUIDE

	manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.
Method of assessment	<p>Assessment methods may include more than one of the following:</p> <ul style="list-style-type: none"> • practical assessment • oral questioning • written test • work-based activities • simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>OHS legislative requirements</i> relate to:	<ul style="list-style-type: none"> • Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards • OHS and welfare Acts and regulations • safety codes of practice.
<i>Duty of care requirements</i> relate to:	<ul style="list-style-type: none"> • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

RANGE STATEMENT

	<ul style="list-style-type: none"> • own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency • relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
<i>Safe work practices</i> include:	<ul style="list-style-type: none"> • access to site amenities, such as drinking water and toilets • general requirements for safe use of plant and equipment • general requirements for use of personal protective equipment and clothing • housekeeping to ensure a clean, tidy and safer work area • no drugs and alcohol at work • preventing bullying and harassment • smoking in designated areas • storage and removal of debris.
<i>Risk</i> relates to:	<ul style="list-style-type: none"> • likelihood of a hazard causing injury or harm.
<i>Principles of risk management</i> include:	<ul style="list-style-type: none"> • assessing the risks involved • consulting and reporting ensuring the involvement of relevant workers • controlling the hazard • identifying hazards • reviewing to identify change or improvement.
<i>Hazard</i> relates to:	<ul style="list-style-type: none"> • any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
<i>Common construction hazards</i> include:	<ul style="list-style-type: none"> • confined spaces • electrical safety • excavations, including trenches • falling objects • hazardous substances and dangerous goods • HIV and other infectious diseases • hot and cold working environments • manual handling • noise • plant and equipment

RANGE STATEMENT

Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.

OHS communication processes include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.
- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

OHS information and documentation includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.

Designated OHS personnel includes:

- first aid officers
- OHS committee members

RANGE STATEMENT

	<ul style="list-style-type: none"> • OHS representatives • supervisors.
<i>Safety signs and symbols</i> include:	<ul style="list-style-type: none"> • emergency information signs (e.g. exits, equipment and first aid) • fire signs (e.g. location of fire alarms and firefighting equipment) • hazard signs (e.g. danger and warning) • regulatory signs (e.g. prohibition, mandatory and limitation or restriction) • safety tags and lockout (e.g. danger tags, out of service tags).
<i>Relevant authorities</i> include:	<ul style="list-style-type: none"> • emergency services (e.g. police, ambulance, fire brigade and emergency rescue) • OHS regulatory authority • supervisor.
<i>Incidents</i> include:	<ul style="list-style-type: none"> • accidents resulting in personal injury or damage to property • near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example: • breathing apparatus malfunctioning to the extent that the user's health is in danger • collapse of the floor, wall or ceiling of a building being used as a workplace • collapse or failure of an excavation more than 1.5 metres deep (including any shoring) • collapse or partial collapse of a building or structure • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment • damage to or malfunction of any other major plant • electric shock. • electrical short circuit, malfunction or explosion • uncontrolled explosion, fire or escape of gas, hazardous substance or steam • any other unintended or uncontrolled incident or event arising from operations carried on at a

RANGE STATEMENT

	workplace.
General procedures for responding to incidents and emergencies include:	<ul style="list-style-type: none"> • basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
Emergencies include:	<ul style="list-style-type: none"> • chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
Personal protective equipment includes:	<ul style="list-style-type: none"> • aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
Fire safety equipment includes:	<ul style="list-style-type: none"> • breathing apparatus • fire blankets • firefighting equipment.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and assess risks.	<p>1.1. <i>Hazards</i> in the work area are identified, assessed and reported to <i>designated personnel</i>.</p> <p>1.2. Safety risks in the work area are identified, assessed and reported to designated personnel.</p> <p>1.3. <i>Safe work practices, duty of care</i> requirements and safe work instructions are followed for controlling risks.</p> <p>1.4. OHS, hazard, accident or <i>incident</i> reports are contributed to according to workplace procedures and <i>Australian government and state or territory OHS legislation</i> and relevant <i>information</i>.</p>
2. Identify hazardous materials and other	<p>2.1. <i>Hazardous materials</i> on a work site are correctly identified and, if appropriate, handled and used</p>

ELEMENT

PERFORMANCE CRITERIA

hazards on work sites.	<p>according to company and legislated procedures.</p> <p>2.2. Measures for controlling risks and construction hazards are applied effectively and immediately.</p> <p>2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate signs and symbols.</p> <p>2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.</p>
3. Plan and prepare for safe work practices.	<p>3.1. Correct personal protective equipment and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures.</p> <p>3.2. Selection of tools, equipment and materials, and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures.</p> <p>3.3. Required barricades and signage are determined and erected at the appropriate site location.</p> <p>3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.</p>
4. Apply safe work practices.	<p>4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures.</p> <p>4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable.</p> <p>4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used.</p> <p>4.4. Prohibited tools and equipment in areas with identified asbestos are recognised and not used.</p> <p>4.5. Work site safety signs and symbols are identified and followed.</p> <p>4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet environmental requirements.</p>
5. Follow emergency procedures.	<p>5.1. Designated personnel are identified in the event of an emergency for communication purposes.</p> <p>5.2. Safe workplace procedures for dealing with accidents,</p>

ELEMENT

PERFORMANCE CRITERIA

various *types of fire* and other emergencies are followed, including identification or use, if appropriate, of *fire equipment* within scope of responsibilities.

5.3. *Emergency response and evacuation procedures* are known, practised and carried out effectively when required.

5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
 - determine and report hazards and risks
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - MSDS, JSA and safe work method statements
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

RANGE STATEMENT

Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- working at heights.
- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

Safe work practices:

- include:
 - day to day observation of OHS policies and procedures
 - emergency procedures
 - risk assessment
 - use of basic firefighting equipment
- relate to:
 - access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.

Duty of care requirements:

- relate to:
 - legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
 - relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
 - own responsibilities to comply with safe work practices, including activities that

RANGE STATEMENT

	require licences, tickets or certificates of competency.
<i>Incidents</i> include:	<ul style="list-style-type: none">• accidents resulting in personal injury or damage to property• near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:<ul style="list-style-type: none">• breathing apparatus malfunctioning to the extent that the user's health is in danger• collapse of the floor, wall or ceiling of a building being used as a workplace• collapse or failure of an excavation more than 1.5 metres deep (including any shoring)• collapse or partial collapse of a building or structure• collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment• damage to or malfunction of any other major plant• electric shock• electrical short circuit, malfunction or explosion• uncontrolled explosion, fire or escape of gas, hazardous substance or steam• any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.
<i>Australian government and state or territory OHS legislative requirements</i> include:	<ul style="list-style-type: none">• Australian standards• construction industry OHS standards and guidelines• duty of care• health and safety representatives, committees and supervisors• JSA and safe work method statements• licences, tickets or certificates of competency• National Code of Practice for Induction Training for Construction Work• national safety standards

RANGE STATEMENT

Information includes:

- OHS and welfare Acts and regulations
- safety codes of practice.
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Hazardous materials include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

Signs and symbols include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and

RANGE STATEMENT

	<ul style="list-style-type: none"> firefighting equipment) hazard identification, facility or location signs regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning) safety tags and lockout (danger tags, out of service tags) site safety, directional, traffic and warning signs and symbols.
<i>Asbestos-containing materials are identified:</i>	<ul style="list-style-type: none"> includes recognising common types of ACM that may be found in construction materials and buildings covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
<i>Asbestos-containing materials are reported to:</i>	<ul style="list-style-type: none"> person in control of the workplace as set out in the relevant Asbestos Management Code.
<i>Personal protective equipment is to include:</i>	<ul style="list-style-type: none"> aprons arm guards caps dust mask/respirators ear muffs/plugs gloves hard hats high visibility retro reflective vests jackets overalls safety glasses/goggles steel capped boots UV protective clothing and sunscreen.
<i>Tools and equipment include:</i>	<ul style="list-style-type: none"> firefighting equipment first aid kit ladders and work platforms personal protective equipment.
<i>Materials include:</i>	<ul style="list-style-type: none"> first aid materials suitable for emergency first aid treatment of minor injuries.
<i>Prohibited tools and equipment that cannot be used near identified</i>	<ul style="list-style-type: none"> high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed

RANGE STATEMENT

ACM include:	<ul style="list-style-type: none">air or abrasive blastingany vacuum cleaning equipment not specifically designed for safe work with asbestos.
<i>Environmental requirements</i> are to cover workplace quality management and include:	<ul style="list-style-type: none">clean-up protectionstormwater protectionwaste management.
<i>Types of fire</i> includes:	<ul style="list-style-type: none">electrical, chemical, gas, mechanical, paper, wood or natural fire.
<i>Fire equipment</i> includes:	<ul style="list-style-type: none">breathing apparatusfire extinguishersfire hydrant and hosesfire reelfire truckmanual firefighting instruments, such as fire blankets.
<i>Emergency response and evacuation procedures</i> include:	<ul style="list-style-type: none">emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnelextinguishing fires, organisational first aid requirements and evacuation.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained using relevant <i>information</i>, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <i>Tools and equipment</i> selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5. Material quantity requirements are calculated in accordance with plans and specifications and <i>quality requirements</i>.</p> <p>1.6. <i>Materials</i> appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and regulatory obligations and applied.</p>
2. Identify waterproofing system.	<p>2.1. Internal area to be waterproofed is <i>identified</i> from job drawings and specifications.</p> <p>2.2. Area of structure to be waterproofed is inspected for</p>

ELEMENT**PERFORMANCE CRITERIA**

	defects and soundness in accordance with job and manufacturer specifications.
	2.3. Appropriate waterproofing systems and products are identified, analysed and selected for water exclusion in accordance with job and manufacturer specifications, and with material safety data sheet (MSDS) directions.
	2.4. Range of waterproofing materials is checked for product suitability; conformity to specification; and compatibility with surface material, preparation and waterproofing installation technique.
	2.5. Termination detailing is determined.
	2.6. Type of waterproofing material is identified in accordance with job specification, state of structure , and job safety requirements with MSDS directions.
3. Prepare for waterproofing installation.	<p>3.1. Internal wet area and wet area fitment or fixtures are checked for specific measurements and set out in accordance with drawings and specifications.</p> <p>3.2. Substrate is checked for soundness of fit, curing compounds, moisture content and other contaminants, and reported or remedied as required.</p> <p>3.3. Flooring installation levels and falls to waste outlets are checked for conformity to specification.</p> <p>3.4. Corner flashing is installed in accordance with manufacturer recommendations.</p> <p>3.5. Points of connection, termination detailing and over flashings as required are checked to be in place and secure.</p> <p>3.6. Rebates for baths and basins are checked for compliance with standards.</p>
4. Prepare substrate.	<p>4.1. Defects are corrected and made good in accordance with manufacturer specifications, to bring substrate to a smooth and uniform finish.</p> <p>4.2. Surface of structure to be waterproofed is prepared to manufacturers' specification, including fixings and belling out around taps.</p> <p>4.3. Water stops and hobs are installed in required location in compliance with standards and good building practice.</p> <p>4.4. Prepared surface of structure is prime coated to manufacturers' specification, where applicable.</p>
5. Apply	5.1. Waterproofing membrane is applied to primed

ELEMENT	PERFORMANCE CRITERIA
waterproofing.	<p>surface of structure to correct thickness and in accordance with manufacturers' job specification.</p> <p>5.2. Appropriate bond breakers and fillets are applied as required in accordance with manufacturer specifications.</p> <p>5.3. Waterproofing membrane is cured in accordance with manufacturers' specification and workplace requirements.</p> <p>5.4. Flood testing of installation is conducted if required.</p> <p>5.5. Waterproofing system and materials are protected using methods and materials consistent with manufacturers' specification, workplace requirements and good building practice.</p> <p>5.6. Final inspection of site is undertaken in accordance with certifying authority's requirements and sign-off and handover of work is carried out in accordance with workplace requirements.</p>
6. Clean up.	<p>6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - recognise procedures

REQUIRED SKILLS AND KNOWLEDGE

- report faults
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- written skills to record results of checks and tests and relevant work completion procedures
- evaluate own actions and make judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks and management systems
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- assessment and appreciation of moisture content in substrate materials
- characteristics and applications of waterproofing materials and adhesives
- construction systems and waterproofing considerations
- general construction terminology
- internal waterproofing materials, processes and techniques
- job safety analysis (JSA) and safe work method statements
- materials storage and environmentally friendly waste management
- MSDS
- plans, drawings and specifications
- plant, tools and equipment types, characteristics, uses and limitations
- principles and considerations of water exclusion
- processes for the calculation of material requirements
- quality requirements
- termination and flashing principals
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- as a minimum:
 - waterproof a bathroom incorporating:
 - lap up a wall
 - appropriate penetrations
 - wastes and hobs
 - install and detail a hobless frame shower enclosure and a bath that abuts a masonry connection wall, ensuring:
 - correct identification of requirement and installation of the waterproofing
 - correct selection and use of appropriate processes, tools and equipment
 - completing all work to specification
 - correct termination and overflashing.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements

EVIDENCE GUIDE

and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- workplace location or simulated workplace
- materials relevant to waterproofing internal wet areas
- hand and power tools, plant and equipment appropriate to waterproofing internal wet areas
- realistic activities covering the mandatory task requirements
- specifications and work instructions.

Assessment of this unit of competency may be in conjunction with assessment of other units commonly performed at the same time in normal job roles.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role

EVIDENCE GUIDE

and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- MSDS
- memos
- regulatory and legislative requirements

RANGE STATEMENT

Planning and preparation include:

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- pertaining to waterproofing internal wet areas
- relevant Australian standards
- safe work procedures relating to waterproofing internal wet areas
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances, including cement and curing agents
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others

RANGE STATEMENT

Tools and equipment include:

- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

- angle grinders
- brooms
- brushes
- buckets
- caulking guns
- chisels, including cold chisels
- cutting blades
- electric drills and screwdrivers
- fans
- floor scrapers
- hammers
- heat welders
- hot air welders
- lights
- measuring tapes and rules
- moisture meters
- nylon rollers
- pressure rollers
- fusion rollers
- scissors
- seam probes
- solvent applicators
- spirit levels
- straight edges
- vacuum cleaners.

Quality requirements include relevant regulations, including:

- Australian standards
- internal company quality policy and standards
- manufacturer specifications
- workplace operations and procedures.

Materials for internal application include:

- adhesives
- drainage cell
- liquid applied, including:
 - acrylic
 - cementitious-based
 - injection
 - polyurethane

RANGE STATEMENT

	<ul style="list-style-type: none"> • protection board • sheet, including: <ul style="list-style-type: none"> • bentonite composites • butanol • ethylene cop bitumen (ECB) • ethylene propylene diene monomer rubber (EPDM) • polyvinyl chloride (PVC) • substrate primer.
Environmental requirements include:	<ul style="list-style-type: none"> • clean-up management • dust and noise • vibration • waste management.
Identification of the waterproofing system includes:	<ul style="list-style-type: none"> • preparation of the substrate and waterproofing material • application to an internal wet area. • process: <ul style="list-style-type: none"> • testing • drainage • protection of the membrane system.
Waterproofing systems include:	<ul style="list-style-type: none"> • cement-based waterproofing systems. • hot mix bituminous felt material membranes • liquid sealants • sealant devices • sheet and sprayed material membranes.
Considerations in water exclusion include:	<ul style="list-style-type: none"> • capillary action • causes of water penetration, including: <ul style="list-style-type: none"> • leakage through wall and floor finishes • penetration at joints and junctions • movement from shrinkage • accumulated drainage • failure of or damage to waterproofing system corners and terminations • curing times of compounds and their applications • damp proof courses and flashings • direction of fall of substrate or decorative finish • hydrostatic pressure

RANGE STATEMENT

	<ul style="list-style-type: none">• impact of environmental conditions• joining• perimeter treatment, including:<ul style="list-style-type: none">• pressure seals and over flashing• thermal shrinkage (expansion and contraction)• shelf life of waterproofing products• surface applications and protection requirements• use of bond breakers• use of sealants• waste allowances.
Structural considerations include:	<ul style="list-style-type: none">• design principles• drainage requirements• environmental factors, including:<ul style="list-style-type: none">• water run-off and impact on adjoining property• allowing water flow• slope, fall and grade of surfaces• hydrostatic pressures• movement• substrate type and condition• waterproofing protection.
Internal wet area applications include:	<ul style="list-style-type: none">• bathrooms• en suites• laundries• showers• other wet process areas.
Wet area fixtures include:	<ul style="list-style-type: none">• bidets• pre-cast baths• shower bases• sink units• trough units• urinals• vanity units• water closets.
Substrates include:	<ul style="list-style-type: none">• aerated autoclaved concrete materials:<ul style="list-style-type: none">• Hebel• Thermolite• blockwork

RANGE STATEMENT

- brickwork
- cement render
- ferrous and non-ferrous piping
- fibrous cement sheeting
- pre-cast concrete
- PVC
- reinforced in situ concrete
- timber and timber-based products
- wet area plasterboard.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify animation requirements	<ol style="list-style-type: none"> 1. With reference to <i>production documentation</i>, clarify <i>3D animation</i> requirements and <i>design specifications</i> in consultation with <i>relevant personnel</i> 2. Examine the models to be animated to determine the most appropriate <i>animation techniques</i> 3. Identify the <i>file format</i> and <i>delivery platform</i> for animated sequences 4. Identify <i>factors</i> that may influence animation design approach 5. In consultation with relevant personnel, clarify work

ELEMENT	PERFORMANCE CRITERIA
	flow sequences to ensure that production schedule deadlines are met
Plan approach	6. Research animations, artworks and other creative sources that may inspire visual design ideas 7. Generate a range of animation ideas that are technically feasible, respond to briefs and provide creative solutions to all design issues 8. Present animation ideas to relevant personnel using appropriate <i>design techniques</i> . 9. Adjust approach to incorporate feedback and agree on final design concepts 10. Discuss and select 3D <i>animation software</i> with relevant personnel to ensure that animated sequences meet specified outcomes 11. Analyse <i>audio assets</i> supplied for animations as required
Produce animated sequences for review	12. Create 3D animations using animation techniques to suit design requirements 13. Apply basic <i>animation principles, screen principles, visual design principles</i> and <i>communication principles</i> 14. Apply real world camera techniques to virtual cameras used in 3D animation 15. Render completed animated sequences 16. Save and store animated sequences using appropriate output file formats, standard naming conventions and version control protocols 17. Present 3D animated sequences to relevant personnel for evaluation by agreed deadlines
Finalise animated sequences	18. Review animated sequences to assess creative solutions to design briefs, appropriateness to users/audience and technical feasibility 19. Discuss and confirm with relevant personnel additional requirements or modifications and complete changes as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written or verbal instructions
 - work as a member of a production team, both independently on assignment and under direction
 - respond constructively to feedback received from other team members
 - complete workplace documentation
- conceptual and creative skills in the context of:
 - generating feasible ideas for animated sequences
 - having a feel for movement and timing in order to produce convincing animations
 - maintaining design integrity
- technical skills sufficient to:
 - use industry-current animation software to develop digitally animated sequences
 - apply the principles of basic screen, visual design and communication to produce 3D animated sequences
 - output 3D animated sequences in appropriate file formats for a range of delivery platforms
 - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital animations
- basic 3D digital animation techniques
- basic screen principles
- principles of animation
- principles of visual design and communication
- features of a range of delivery platforms
- OHS standards as they relate to working for periods of time on computers

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • creation of 3D digital animated sequences that: <ul style="list-style-type: none"> • demonstrate the principles of basic screen, visual design and communication • meet the technical requirements of specific platforms • satisfy the design brief and client requirements • collaborative approach to work • attention to detail • ability to meet production deadlines.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a range of resources, equipment and current industry-current software as listed in the range statement • where sound is integrated in animated sequences, access to a range of suitable software to support the integration of sound and visual elements • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence, authenticated show reels and third-party workplace reports of on-the-job performance • critical analysis of a range of 3D digital animated sequences created by the candidate to determine

EVIDENCE GUIDE	
	<p>ability to meet design requirements</p> <ul style="list-style-type: none"> written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit informal questioning and discussion, including response to feedback and diagnostics.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> CUFANM303A Create 3D digital models CUFDIG303A Produce and prepare photo images CUFDIG304A Create visual design components CUFSOU301A Prepare audio assets.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Production documentation</i> may include	<ul style="list-style-type: none"> animatics brief storyboard technical specifications.
<i>3D animations</i> may include:	<ul style="list-style-type: none"> 3D elements 3D panoramas basic games buttons characters illustrations logos models morphs/blend shapes puzzles simulated sequences

RANGE STATEMENT	
	<ul style="list-style-type: none"> • text • titles and credits.
<i>Design specifications</i> may include:	<ul style="list-style-type: none"> • characters and objects • key frames • objects • references • samples • script • storyboard • technical specifications, including: <ul style="list-style-type: none"> • output file format • version control protocols • output file size • operating system • hardware specifications, including memory size, RAM • delivery platform • media form.
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • 3D modeller • 3D producer • animation director • audio asset creator • director • graphic artist/designer • instructional designer • lead animator • matte painter • system support personnel • other technical and specialist personnel.
<i>Animation techniques</i> may include:	<ul style="list-style-type: none"> • acceleration/deceleration • audio integration • dynamic simulation • hierarchies • hinges and pivot points • hybrid method • key frames • layered animation • looping backgrounds • morphing/object exaggeration

RANGE STATEMENT

	<ul style="list-style-type: none"> • motion capture • motion paths • pose to pose animation • registration points • rotation • scripted animation • speed/motion blur • straight-ahead animation.
<i>File formats</i> may include:	<ul style="list-style-type: none"> • AAS • ACT • ANI • ANM • ANS • AVI • AWA • AWM • CEL • CFT • CMV • DIR/DCR • FLA/SWF • FLC • FLI • FLX • GIF • HTML • IFF • JPEG • LWOB • M3D • MMM • MOV • MPEG • MWF • PNG • QTVR • SEC • TIFF • VAN • VUE.

RANGE STATEMENT	
<i>Delivery platforms</i> may include:	<ul style="list-style-type: none"> • CD • DVD • film • games console • internet • kiosk • mobile phone or device • PDA (personal digital assistant) • video.
<i>Factors</i> may include:	<ul style="list-style-type: none"> • budget • purpose of animation • resources • target audience • timelines.
<i>Design techniques</i> may include:	<ul style="list-style-type: none"> • digitally generated illustrations of objects and/or characters • freehand sketches • fully rendered hand-drawn illustrations • story trees • storyboards.
<i>Animation software</i> may include:	<ul style="list-style-type: none"> • 3D Studio Max • Cinema 4D • Houdini • Lightwave • Maya • Motionbuilder • Soft Image - XSI.
<i>Audio assets</i> may include:	<ul style="list-style-type: none"> • music • narration • sound effects.
<i>Animation principles</i> may include:	<ul style="list-style-type: none"> • anticipation • asymmetry in body and facial poses • balanced poses • exaggeration • movement in arcs • overlapping actions and follow-through • pacing/timing • secondary actions • singularity of message

RANGE STATEMENT	
	<ul style="list-style-type: none"> • squash and stretch • staging • strong silhouette in poses • weight.
<i>Screen principles</i> may include:	<ul style="list-style-type: none"> • camera techniques • editing, including basic transitions • framing • lighting • montage • narrative • story-telling • style/genre.
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> • balance • composition • emphasis • movement • perspective • proportion • scale • unity.
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> • communicating the message • conveying meaning • meeting audience requirements • using functional components.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to create 3D digital models.</p> <p>This unit is a prerequisite for:</p> <ul style="list-style-type: none">CUFANM401A Prepare 3D digital models for production. <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>3D modellers working on relatively simple projects apply the skills and knowledge described in this unit. From reference material and established designs, they create 3D models using whatever software is applicable to the production.</p> <p>3D models need to meet technical and design specifications, as well as being efficient, reliable, to scale, and easy to rig and animate.</p> <p>Modellers need to appreciate what will be required of their models in later stages of production because this can affect the work they produce. Close liaison with other team members is, therefore, important. Even though a senior modeller or technical director supervises the creation of models, people at this level are expected to work autonomously within clear guidelines.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work	1. With reference to <i>production documentation</i> , clarify

ELEMENT	PERFORMANCE CRITERIA
requirements	<p><i>requirements</i> and <i>purpose</i> for 3D digital models</p> <ol style="list-style-type: none"> 2. In consultation with <i>relevant personnel</i>, clarify work flow sequences to ensure that <i>production</i> schedule deadlines are met 3. Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which 3D digital models are being created 4. Gather and analyse <i>reference materials</i> to help with visualisation of 3D models
Create 3D digital models	<ol style="list-style-type: none"> 5. Use software features to block out models to determine correct proportions in relation to reference materials 6. Manipulate software features to apply basic lighting and shaders as required 7. Ensure that models' topology allows appropriate deformation, as required 8. <i>Progressively refine</i> and check <i>integrity</i> of models until they meet design requirements 9. Submit models to relevant personnel for comment on whether production requirements have been met and make final adjustments as required 10. Render and output models in required <i>format</i> and submit to relevant personnel by agreed deadlines 11. Make back-up copies of files and complete workplace documentation according to enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written or verbal instructions
 - work as a member of a production team, both independently on assignment and under direction
 - respond constructively to feedback received from other team members
 - complete workplace documentation
- technical skills sufficient to:

REQUIRED SKILLS AND KNOWLEDGE

- use industry-current software applications to create 3D models to specifications
- manage files and directories using standard naming conventions and version control protocols
- make back-up copies of files and store appropriately
- initiative and creativity in the context of visualising and accurately creating 3D digital models of a range of animate and inanimate objects
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- roles and responsibilities of project team members in the relevant industry sector
- basic understanding of the stages in the production process from initial design through to finished product
- issues and challenges that arise in the context of creating 3D digital models
- 3D digital modelling techniques
- strong sense of scale, form, weight and volume
- geometry as it applies to the creation of realistic 3D digital models
- features of a range of delivery platforms
- OHS standards as they relate to working for periods of time on computers

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- creation of 3D digital models that:
 - demonstrate efficient use of geometry and attention to detail
 - meet design requirements
- collaborative approach to work
- ability to meet deadlines.

EVIDENCE GUIDE	
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a selection of industry-current software as listed in the range statement • access to simulated or real production situations that require the creation of 3D digital models • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of a range of 3D digital models created by the candidate to determine ability to create models for different kinds of objects • written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUFANM302A Create 3D digital animations • CUVDSP11A Research and apply techniques for illustrative work • CUVVSP16A Research and experiment with techniques to produce drawings.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret creative concepts and briefs

REQUIRED SKILLS AND KNOWLEDGE

- interpret information in software user manuals and help features
- work as a member of a production team, both independently on assignment and under direction
- respond positively to constructive feedback from other team members
- initiative and enterprise in the context of:
 - visualising and accurately creating 3D digital environments
 - finding creative solutions to problems identified during the process of creating 3D digital environments
 - locating and using resources to broaden own creative experience
- technical skills sufficient to:
 - use appropriate software to develop 3D digital environments
 - create 3D digital environments in appropriate formats for required delivery platforms
 - manage files and directories using standard naming conventions and version control protocols
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - plan the creation of 3D digital environments in a logical and cohesive way
 - meet deadlines
 - seek expert assistance as required
- learning in the context of improving performance/product through self-reflection and reworking after feedback

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members in the relevant industry sector
 - sound understanding of the relationship between the technical and creative aspects and requirements of productions for which 3D digital environments are being created
 - understanding of the stages in the production process from initial design through to the finished product
 - issues and challenges that arise in the context of creating 3D digital environments
 - the features of a range of delivery platforms
- digital modelling techniques appropriate to the development of 3D environments
- demonstrated use of scale, form, weight and volume
- geometry as it applies to the creation of realistic 3D digital environments
- OHS standards as they relate to working for periods of time on computers

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- creation of 3D digital environments that:
 - demonstrate efficient use of geometry and attention to detail
 - meet design requirements
- collaborative approach to work
- ability to meet deadlines.

Context of and specific resources for assessment

Assessment must ensure:

- access to a selection of industry-current software as listed in the range statement
- access to simulated or real production situations that require the creation of 3D digital environments
- access to appropriate learning and assessment support when required
- use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance
- evaluation of a range of 3D digital environments created by the candidate to determine ability to create different kinds of environments
- written or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBCRT402A Collaborate in a creative process

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • CUFANM401A Prepare 3D digital models for production • CUVDSP11A Research and apply techniques for illustrative work • CUVVSP16A Research and experiment with techniques to produce drawings.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Production documentation may include:

- storyboard
- animatics
- technical specifications
- creative documentation
- top-down drawings/maps
- concept drawings
- architectural drawings.

Requirements may include:

- technical specifications
- design specifications
- creative expectations
- output format
- assets for integration
- timelines
- collaboration with other team members.

Purpose of 3D digital environments may be for:

- animations
- digital simulations, e.g.:
 - architectural models
 - e-learning resource
 - demonstration of processes and procedures
- games
- film/television productions.

RANGE STATEMENT	
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • 3D modeller • matte painter • 3D designer or concept artist • art director • project manager • director • producer • supervisor • technical director • head of department • storyboard artist • other technical/specialist personnel.
<i>Software</i> may include:	<ul style="list-style-type: none"> • graphics, e.g.: <ul style="list-style-type: none"> • Photoshop • Illustrator • 3D, e.g.: <ul style="list-style-type: none"> • 3D Studio Max • Maya • Softimage.
<i>Delivery platforms</i> may include:	<ul style="list-style-type: none"> • feature film • broadcast television • games • internet • CD • mobile phone • kiosk • DVD • PDA (personal digital assistant) • other digital devices.
<i>Reference materials</i> may include:	<ul style="list-style-type: none"> • real environments that are to be reproduced digitally • videos • still images • books • direct observation of actions to be simulated in 3D environments • concept drawings and designs.
<i>Progressive refinements</i> may include:	<ul style="list-style-type: none"> • achieving required shape • achieving required topology.

RANGE STATEMENT	
Aspects to be checked for <i>integrity</i> may include:	<ul style="list-style-type: none"> • pivot points • scale of models relative to other components in final sequences • isolated vertices • double faces • resetting transform.
Aspects to be checked for <i>spatial relationship</i> may include:	<ul style="list-style-type: none"> • relevant design principles, e.g.: <ul style="list-style-type: none"> • balance • proportion • accuracy • functionality • game-play requirements.
<i>Lighting rigs</i> may include:	<ul style="list-style-type: none"> • light domes • global illumination • radiosity • standard lights.
<i>Formats</i> may include:	<ul style="list-style-type: none"> • TIFF • JPEG • IFF • Quicktime • AVI • MPEG • Targa • PNG.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Use scanner to capture photo images	<ol style="list-style-type: none"> 1. Source and select appropriate photographic images according to requirements of photographic <i>project</i> brief 2. Discuss selection of images with <i>relevant personnel</i> 3. Assess <i>scanner features</i> to ensure that outcomes will meet the requirements of brief 4. Operate scanner according to manufacturer specifications 5. Select <i>scanner settings</i> to ensure image capture meets production requirements 6. Transfer and store photographic image files to a computer using standard naming conventions
Use digital camera to create photo images	<ol style="list-style-type: none"> 7. Discuss photographic project brief with relevant personnel

ELEMENT	PERFORMANCE CRITERIA
	8. Assess <i>digital camera features</i> to ensure that outcomes will meet the requirements of brief 9. Plan camera shots taking into account lighting, framing, composition and other <i>photographic techniques</i> 10. Load and operate digital camera according to manufacturer specifications 11. Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements 12. Check photographic images for fitness of purpose to comply with brief 13. Transfer and store photographic image files to a computer using standard naming conventions
Edit photo images	14. Load <i>digital imaging software</i> and import photo image source files 15. <i>Manipulate</i> and save digital images using designated digital imaging software 16. Create photo images that incorporate <i>visual design</i> and <i>communication principles</i> using designated digital imaging software 17. Evaluate the outcome for visual impact, effectiveness and fitness for purpose 18. Confirm outcome with relevant personnel
Prepare photo image assets	19. Save files in appropriate <i>output format</i> to meet <i>platform</i> requirements 20. Assign <i>metadata tags</i> if required 21. Group files logically in a folder system using standard naming conventions 22. Store files in share drive or repository for production team access

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills sufficient to:

REQUIRED SKILLS AND KNOWLEDGE

- interpret and clarify written or verbal instructions
- consult equipment operation manuals
- ability to work as a member of a production team - both independently on assignment and under direction
- technical skills sufficient to:
 - proficiently use a scanner to reproduce photo images to specification
 - proficiently use a digital camera to create well-composed photo images
 - proficiently use digital imaging software to manipulate and prepare photo images
 - manage files using standard naming conventions
- self-management skills sufficient to:
 - work under pressure
 - meet deadlines
 - seek expert assistance when problems arise
- problem-solving skills sufficient to anticipate and resolve minor equipment set-up problems

Required knowledge

- basic photographic techniques
- basic principles of visual design and communication
- appropriate file formats for various platforms
- industry knowledge, including:
 - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
 - basic understanding of the relationship between technical and creative aspects and requirements of interactive media projects
 - basic knowledge of the features of a range of delivery platforms
- OHS regarding the use of scanners, cameras and computers, and handling and disposing of lithium batteries

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • ability to use digital imaging software to prepare high quality photo images that satisfy the requirements of a range of briefs • efficient operation of a scanner and digital camera to capture images.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to a range of resources and equipment currently used by industry, including: <ul style="list-style-type: none"> • flatbed scanner • digital camera • industry-standard graphics software • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of photo images prepared by the candidate on a number of occasions • practical demonstration by the candidate of scanner and digital camera operation • written or oral questioning to test knowledge of file formats and OHS issues.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUFDIG304A Create visual design components.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Projects</i> may include:	<ul style="list-style-type: none"> • e-commerce • educational product • game • information product • promotional product • training product • website.
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • client • designer • graphic artist • interactive media author • programmer, coder and technical support people • supervisor • web manager • other specialist creative and administrative staff.
<i>Scanner features</i> may include:	<ul style="list-style-type: none"> • bit depth • dynamic range • optical resolution • output format (e.g. RGB, greyscale or CMYK) • platen size • reflective or transmissive (film) • range of film holders.
<i>Scanner settings</i> may include:	<ul style="list-style-type: none"> • bit depth • colour or greyscale • colour/target/working space • crop • destination • dust and scratch handling (e.g. ICE, FARE) • grain management (e.g. GEM) • multi-sampling • orientation • output dimension and resolution or file size

RANGE STATEMENT	
	<ul style="list-style-type: none"> • preferences/options • restoration of colour (e.g. ROC) • scaling • sharpening • source image type • tones, contrast, colour cast, saturation.
<i>Digital camera features</i> may include:	<ul style="list-style-type: none"> • aperture • automatic, program or manual settings • batteries • colour, target, working space • compatibility with hardware and digital imaging software • exposure compensation • file format • flash, fill flash • lens focal lengths, such as wide angle, close-up and telephoto • menu functions • resolution - megapixels • shutter speed • size and type of memory card(s) • subject modes • white balance.
<i>Photographic techniques</i> may include:	<ul style="list-style-type: none"> • composition • depth of field • dynamic range • field of view • framing • lighting.
<i>Digital imaging software</i> may include:	<ul style="list-style-type: none"> • a wide range of programs, e.g.: <ul style="list-style-type: none"> • Adobe Photoshop • Adobe Photoshop Elements • Adobe Photoshop Lightroom • Apple Aperture • Corel Paint Shop Pro • Corel PhotoPaint • GNU Image Manipulation Program (GIMP and GIMPshop).
<i>Manipulating</i> digital images may	<ul style="list-style-type: none"> • appending text/type for files and captions

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • brushing • creating artistic effects • cropping • editing • eliminating red eye • emulating photographic effects • image enhancement including tones, contrast, colour cast/tint, saturation • masking layers • retouching (i.e. cloning, rubber stamping, healing, patching) • sharpening • stitching (panoramic scenes) • using layers for composites • using pre-sets.
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> • balance • emphasis • movement • perspective • proportion • scale • unity.
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> • communicates message • conveys meaning • meets audience requirements • uses functional components.
<i>Output formats</i> may include:	<ul style="list-style-type: none"> • GIF • JPEG • PDF • PICT • PNG • PSD • TIFF.
<i>Platforms</i> may include:	<ul style="list-style-type: none"> • CD • DVD • games console • internet • kiosk • mobile phone • other video playback devices

RANGE STATEMENT	
	<ul style="list-style-type: none"> • personal digital assistant (PDA) • video player (iPods).
<i>Metadata tags</i> may include:	<ul style="list-style-type: none"> • author • copyright notice • date of capture/date created • description • EXIF and IPTC standards • file size • format • headline/caption • keywords/subject • location/GPS coordinates • resolution • rights usage terms • roll/identifier # • subject • time • title • version.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Clarify work requirements	<ol style="list-style-type: none"> Clarify type of visual design <i>components</i> required, in consultation with <i>relevant personnel</i> In discussion with relevant personnel, identify factors

ELEMENT	PERFORMANCE CRITERIA
	<p>that may determine or affect visual design concepts, including <i>design techniques</i></p> <p>3. Clarify in discussion with relevant personnel the target user and audience, and determine <i>format</i> and <i>delivery platform</i></p>
Generate and assess ideas	<p>4. Review media products, designs, images, artwork and other creative sources that may inspire visual design ideas</p> <p>5. Obtain other <i>relevant information</i> that may influence design ideas</p> <p>6. Generate a range of visual design ideas that are technically feasible, respond to specifications and provide creative solutions to all design issues</p> <p>7. Present visual design ideas to relevant personnel using design techniques</p>
Plan approach	<p>8. Experiment with traditional and digital imaging techniques to create required visual design components</p> <p>9. Explore range of <i>typographical</i> and <i>visual design elements</i> to create the components</p> <p>10. Evaluate initial design ideas and specifications against findings and discuss with relevant personnel to select final design concept</p> <p>11. Select design technique and discuss with relevant personnel to ensure appropriate output format meets delivery platform requirements</p>
Produce visual design components	<p>12. Develop structure for components based on the final design concept using selected design techniques</p> <p>13. Apply <i>visual design principles</i> and <i>communication principles</i> to produce components</p> <p>14. Save visual design in an appropriate format that satisfies the technical parameters determined in consultation with relevant personnel</p>
Finalise visual design components	<p>15. Review visual design components to assess whether creative solutions meet design and technical specifications</p> <p>16. Discuss and confirm with relevant personnel additional requirements or modifications and undertake any necessary amendments</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify written and verbal instructions
 - work as a member of a production team - both independently on assignment and under direction
 - respond constructively to feedback received from other team members
- initiative and enterprise in the context of generating a range of feasible ideas for visual designs
- technical skills sufficient to:
 - use a range of design techniques for creating visual designs, including industry-standard graphics software
 - apply visual design and communication principles to produce visual designs
 - create visual design components in appropriate formats for a range of delivery platforms
 - manage files and directories using standard naming conventions
- self-management and planning skills sufficient to:
 - prioritise work tasks
 - meet deadlines
 - seek expert assistance when problems arise

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members
 - basic understanding of the relationship between technical and creative aspects and requirements of media projects
- basic design principles of layout and composition
- characteristics of digital and traditional imaging
- visual design and communication principles
- typography
- copyright clearance procedures
- OHS standards as they apply to the use of computer and keyboard for periods of time

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- creation of visual design components that respond effectively to specifications and demonstrate the application of visual design and communication principles
- ability to apply a selection of the design techniques listed in the range statement
- ability to work collaboratively in a team environment.

Context of and specific resources for assessment

Assessment must ensure:

- access to a range of resources, equipment and current industry-standard software as listed in the range statement
- access to appropriate learning and assessment support when required
- use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance
- evaluation of a range of visual design components created by the candidate
- written or oral questioning to test knowledge of visual design principles, communication principles and responsibilities of different members of a project team.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CUFDIG303A Produce and prepare photo images

EVIDENCE GUIDE

- CUFANM301A Create 2D digital animations.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Components may include:

- 2D animation objects
- backgrounds
- banners
- basic user interfaces
- colours
- flow charts
- icons
- illustrations
- interactive buttons
- interactive controls
- logos
- simple 2D animation characters
- text
- titles
- other components required by the project.

Relevant personnel may include:

- art director
- asset creator
- client
- editor
- producer
- programmer
- supervisor
- technical director
- technical staff
- other specialist creative and administrative staff.

RANGE STATEMENT	
<i>Design techniques</i> may include:	<ul style="list-style-type: none"> • drawing freehand • drawing on a tablet • flow charts • scanning drawings and photographs • storyboards • thumbnail sketches • using graphics software, such as: <ul style="list-style-type: none"> • Corel Draw • Corel Paint Shop Pro • Photoshop • Photoshop Elements • Illustrator • Paint.net • Fireworks.
<i>Format</i> may include:	<ul style="list-style-type: none"> • bitmap image • digital formats, such as: <ul style="list-style-type: none"> • GIF • JPEG • PDF • TIFF • PICT • PNG • PSD • HTML • hard copy • vector image.
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> • CD • DVD • film • games console • internet • kiosk • mobile phone • other wireless/mobile devices • personal digital assistant (PDA) • print media • television.
<i>Relevant information</i> may	<ul style="list-style-type: none"> • brands

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • logos • previous versions of components • printed materials • promotion materials • style guides • trademarks.
<i>Typographical design elements</i> may include:	<ul style="list-style-type: none"> • alignment • fonts and typefaces • kerning • leading • point and size • serif or sans serif • tracking.
<i>Visual design elements</i> may include:	<ul style="list-style-type: none"> • colour • form • line • shape • texture • tone.
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> • balance • emphasis • focal point • movement • perspective • proportion • scale • unity.
<i>Communication principles</i> may include:	<ul style="list-style-type: none"> • communicates message • conveys meaning • meets audience requirements • uses functional components.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Identify project requirements	<ol style="list-style-type: none"> 1. Confirm objectives and desired outcomes of briefs in consultation with <i>relevant personnel</i> 2. Identify target audience and determine format and <i>delivery platform</i> of simulations through discussion with relevant personnel
Research and plan	<ol style="list-style-type: none"> 3. Investigate fully the <i>real world environment</i> that is to be simulated

ELEMENT	PERFORMANCE CRITERIA
approach	<ol style="list-style-type: none"> 4. Obtain designs, plans and other information that may assist in modelling the real world environment 5. Determine the <i>performance objectives</i>, task complexity and required levels of user skill 6. Determine the required depth of physical and functional fidelity, taking into account <i>production requirements</i> 7. Research and select appropriate simulation <i>authoring tools</i> 8. Discuss ideas and collaborate, as required, with relevant personnel to ensure contribution of a range of ideas and creative solutions
Draft simulation design documents	<ol style="list-style-type: none"> 9. Identify the <i>processes</i> that determine the functional behaviour and specify how this behaviour is to be represented by <i>control objects</i> 10. Define the underlying functionality in a model that specifies the essential settings, states, conditions and parameters 11. Specify the <i>user interface controls</i> that enable users to interact with simulations 12. Identify critical impacts, alerts or costs for incorrect user operation 13. Specify positive and negative user feedback 14. Specify the sequencing of levels of difficulty 15. Present draft <i>simulation design documents</i> for discussion with and feedback from other team members
Finalise simulation design documents	<ol style="list-style-type: none"> 16. Review designs against required project outcomes and performance objectives 17. Review designs to ensure they meet creative, technical and legislative requirements 18. Adjust designs as necessary after discussions with relevant personnel and incorporating user feedback 19. Save and archive user interface controls for other projects

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

- communication, teamwork and literacy skills sufficient to:
 - interpret and clarify project briefs
 - establish rapport with clients
 - work collaboratively in a team environment to find the best design solutions
 - clearly and concisely document specifications for the design of the digital simulation
- initiative and enterprise in the context of:
 - generating ideas for the design of digital simulations that meet the specified performance objectives
 - thinking laterally when developing ideas
 - maintaining design integrity
- technical skills sufficient to:
 - create storyboards, state-charts and other diagrams to specify the architecture and navigation of digital simulations
 - design simulations that represent a real world environment to the required level of fidelity
- self-management skills sufficient to:
 - meet deadlines
 - provide appropriate and timely documentation

Required knowledge

- industry knowledge, including:
 - roles and responsibilities of project team members, e.g. designers, content creators, information architects, programmers and coders
 - issues and challenges that arise in the context of designing and developing digital simulations
- typical formats and techniques for documenting the design of digital simulations
- OHS standards as they relate to working for periods of time on computers
- way in which algorithms, laws, rules and mathematical formulas can represent real world processes
- intellectual property rights and copyright clearance procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the

Co-requisite units

Co-requisite units		

CULMS010B Contribute to the preservation of cultural material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability Skills The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Develop preservation skills and knowledge	<p>1.1 Seek and access <i>opportunities to develop, update and maintain knowledge of preservation</i> issues and concepts</p> <p>1.2 Integrate knowledge into work activities within scope of individual responsibility</p>
2 Undertake basic preservation activities	<p>2.1 Undertake <i>basic preservation activities</i> within scope of responsibility as agreed with a conservator and in accordance with <i>organisational plans and policies</i></p> <p>2.2 Correctly apply techniques in a manner which</p>

ELEMENT**PERFORMANCE CRITERIA**

maintains the integrity of the *cultural material*

- 2.3 Record data generated in the course of activities clearly and accurately in the appropriate format
- 2.4 Follow *health, safety and environmental requirements* at all times
- 2.5 Ensure that ethical and *cultural protocols* are adhered to at all times

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

Required knowledge

- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

Context of and specific resources for assessment

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.

EVIDENCE GUIDE

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CULMS009B Implement preventive conservation activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities to develop, update and maintain knowledge of preservation issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

Basic preservation activities will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.

Organisational plans and policies vary in structure and

- preservation plans
- conservation plans

RANGE STATEMENT

name but may include:

- collection management policies
- disaster preparedness policies

Cultural material is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

Health, safety and environmental requirements may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

Cultural protocols may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display

Modification History

Version	Comments
CUVACD101A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create a basic visual representation of objects or ideas. It does not relate to drawing as an art form.

Application of the Unit

This unit is introductory in nature and applies to any context where a basic sketch or drawing of objects, ideas or layouts is required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required</i>

	<i>skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

Elements and Performance Criteria

1. Prepare for drawing	1.1 Clarify purpose of drawings with <i>appropriate people</i> 1.2 Identify tools and materials required for basic drawing <i>techniques</i> 1.3 Select appropriate <i>tools and materials</i> for basic drawing techniques
2. Produce basic drawings	2.1 Apply a limited range of techniques to represent <i>objects or ideas</i> 2.2 Handle tools and materials safely 2.3 Seek feedback on drawings from relevant people and refine drawings as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - clarify purpose of drawings
 - seek feedback to refine drawings
- learning skills to respond to feedback from others to improve own drawing skills
- literacy skills to read basic safety information
- numeracy skills to deal with basic scaling and layout issues

Required knowledge

- materials and tools commonly used for drawing
- different types of drawing
- ways of minimising waste in drawing projects
- OHS issues associated with tools and materials used in drawing work

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • produce more than one drawing that represents an object or idea • apply a range of basic drawing techniques.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • materials and tools used in drawing work.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of work in progress • review of drawings produced by the candidate • oral or written questioning to assess knowledge of drawing techniques and materials • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Appropriate people</i> may include:	<ul style="list-style-type: none"> • colleagues • mentors • supervisors • teachers.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • application of pigment • linear marks of differing character • linear marks to produce illusion of form in space • simple linear perspective • tonal ranges to produce illusion of form in space.
<i>Tools and materials</i> may include:	<ul style="list-style-type: none"> • board • charcoal • coloured pencils • drafting equipment • graphite pencils • measuring tools • natural ochres • pastels and chalks • pigments • rags • range of papers • sticks • wood or bark.
<i>Objects or ideas</i> may include:	<ul style="list-style-type: none"> • artwork of any type, 2-D or 3-D • costume or wearable object • design solution • movement sequences • props • room layout • sets • stage setup • story or narrative • technical solution.

Unit Sector(s)

Visual communication – art, craft and design

CUVACD201A Develop drawing skills to communicate ideas

Modification History

Version	Comments
CUVACD201A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop simple drawing techniques for representing and communicating ideas. It does not relate to drawing as an art form. In a work or learning context this unit may relate to visually communicating ideas about objects, as well as the use of space, narratives or the steps in a process.

Application of the Unit

People working in many industries apply the skills and knowledge in this unit.

At this level, a limited range of techniques would be expected, and work would normally be completed under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
---------	----------------------

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

Elements and Performance Criteria

1. Prepare to use a range of drawing techniques	1.1 Clarify purpose of drawings with <i>appropriate people</i> 1.2 Identify suitable techniques to represent <i>ideas</i> 1.3 Select <i>tools</i> and <i>materials</i> required for selected techniques 1.4 Take <i>presentation context</i> into account when selecting techniques, tools and materials
2. Produce simple drawings	2.1 Explore ways of representing ideas through application of different techniques 2.2 Seek feedback from others on different drawing techniques 2.3 Select techniques best suited to represent ideas 2.4 Draw ideas using selected techniques 2.5 Respond positively to feedback from others on own work and take action to improve own skills as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to confirm and discuss purpose of drawings
- learning skills to:
 - improve techniques for producing drawings through practice
 - respond appropriately to feedback on own work
- literacy skills to read product labels and instructions
- numeracy skills to deal with basic scaling and layout issues

- planning and organising skills to organise resources for simple drawing projects.

Required knowledge

- physical properties and capabilities of tools and materials commonly used for drawing
- different approaches to drawing and how other practitioners use drawing to represent ideas
- elements and principles of design
- intellectual property issues and legislation in relation to drawing
- ways of minimising waste in drawing projects
- OHS issues associated with tools and materials used for drawing.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • produce multiple drawings that: <ul style="list-style-type: none"> • demonstrate a basic command of nominated techniques • communicate ideas • are appropriate for the presentation context.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • equipment and materials used to produce drawings.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of work in progress • evaluation of drawings • oral or written questioning to assess knowledge of drawing techniques and materials • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English,</p>

	remote communities and those with interrupted schooling).
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Appropriate people</i> may include:	<ul style="list-style-type: none"> • colleagues • mentors • supervisors • teachers.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • digital drawing techniques • integration of text and drawing • linear marks of differing intensity and character • linear marks to produce illusion of form in space • linear perspective • scaling techniques • tonal range to produce illusion of form in space • use of positive and negative space.
<i>Ideas</i> may relate to:	<ul style="list-style-type: none"> • crafted objects • design concepts • digital work • installations • movement sequences • narrative • paintings and prints • performance • sculptures • story • technical solutions for a design or work.
<i>Tools</i> may include:	<ul style="list-style-type: none"> • blades • brushes • digital technology

	<ul style="list-style-type: none">• drawing and design applications• measuring tools• printer• rags• scanner• sponges• sticks.
Materials may include:	<ul style="list-style-type: none">• boards• charcoal• coloured pencils• crayons• graphite pencils• inks• natural ochres• pastels and chalks• pigments• range of papers• solvents• watercolour• wood or bark.
Presentation context may include:	<ul style="list-style-type: none">• design proposal• proposal for product or work development• proposal in response to a brief• visualisation of an idea.

Unit Sector(s)

Visual communication – art, craft and design

CUVACD301A Produce drawings to communicate ideas

Modification History

Version	Comments
CUVACD301A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form.

Application of the Unit

People working in many industries apply the skills and knowledge in this unit.

Ideas for communication are diverse and may include design concepts for objects, processes or spaces, or movement sequences for performances or screen productions. Drawings may be for personal use or for presentation in exhibitions, tender bid proposals or publications.

Drawing may be electronic or hand drawn.

At this level, the individual would take some responsibility for experimentation with a range of drawing techniques and be expected to show some command of those techniques.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Plan drawing work	<p>1.1 Explore <i>drawing requirements</i> with reference to relevant <i>reference material</i> and <i>appropriate people</i> when required</p> <p>1.2 Identify <i>factors</i> that may impact on how drawing work is undertaken</p> <p>1.3 Gather information about drawing <i>techniques, materials</i> and <i>equipment</i> from a range of <i>sources</i> and determine how they may be used to communicate <i>ideas</i></p> <p>1.4 Evaluate information for its application to specific drawing briefs</p>
2. Experiment to represent ideas	<p>2.1 Assess the capabilities of techniques, materials and equipment through exploration</p> <p>2.2 Select approaches that best suit the purpose of drawings and their <i>presentation context</i></p> <p>2.3 Follow safety procedures for particular techniques, materials and equipment</p>
3. Create drawings	<p>3.1 Organise materials, tools and equipment for selected techniques</p> <p>3.2 Produce preliminary drawings and discuss their effectiveness with relevant people</p> <p>3.3 Finalise drawings, incorporating feedback on work in progress as required</p> <p>3.4 <i>Prepare</i> drawings for the presentation context</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to impart information through drawing
- learning skills to improve own drawing technique through feedback and experimentation
- literacy skills to interpret varied information about drawing as a visual representation tool
- numeracy skills to:
 - determine layout issues
 - calculate measurements
- planning and organising skills to:
 - organise resources
 - prepare drawings for presentation
- problem-solving skills to select drawing techniques that best meet project needs
- technical skills to use a range of drawing techniques.

Required knowledge

- physical properties and capabilities of the range of materials, tools and equipment used in drawing
- different approaches to drawing and how other practitioners use drawing to represent ideas
- cleaning and maintenance techniques for tools used in drawing
- elements and principles of design and their specific application to drawing
- intellectual property issues and legislation in relation to drawing
- ways to minimise waste in drawing projects
- OHS issues associated with tools and materials used for drawing.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none">• produce a series of drawings that:<ul style="list-style-type: none">• show a command of selected techniques• successfully communicate the required ideas.

Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • equipment and materials required to produce drawings.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of the development of drawings • evaluation of drawings in terms of their effectiveness in communicating ideas • questioning and discussion about candidate's intentions and the work outcome • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Drawing requirements</i> may include:	<ul style="list-style-type: none"> • diagrams • illustrations • sketches.
<i>Reference material</i> may include briefs or specifications with information, such as:	<ul style="list-style-type: none"> • audience • background information about clients • budget • clients' needs <ul style="list-style-type: none"> • considerations, such as: • contractual

	<ul style="list-style-type: none"> • copyright • ethical • legal • creative objectives • materials • personnel involved in the project • purpose • technology • timeframe.
<i>Appropriate people</i> may include:	<ul style="list-style-type: none"> • clients • colleagues • industry practitioners • managers • mentors • supervisors • teachers.
<i>Factors</i> may include:	<ul style="list-style-type: none"> • aesthetic considerations • availability of personnel • availability of resources • available budget • complexity of project • expectations of target users of drawings • own level of skill • presentation context • technical requirements • timelines.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • digital drawing techniques • integration of text and drawing • linear marks of differing intensity and character • linear marks to produce illusion of form in space • linear perspective • positive and negative space • scaling techniques • tonal range to produce illusion of form in space • washes.
<i>Materials</i> may include:	<ul style="list-style-type: none"> • boards • charcoal • coloured pencils • crayons • graphite pencils • inks

	<ul style="list-style-type: none"> • natural ochres • pastels and chalks • pigments • range of papers • solvents • watercolour • wood or bark.
Equipment may include:	<ul style="list-style-type: none"> • blades • computer • digital camera • drawing and design applications • printer • rags • range of brushes, including air brushes • scanner • sponges • sticks.
Sources may include:	<ul style="list-style-type: none"> • catalogues • colour charts and boards • nature • stories or narratives • technical texts • work of other artists and designers.
Ideas may relate to:	<ul style="list-style-type: none"> • crafted objects • design concepts • digital work • installations • movement sequences • narrative • paintings or prints • performance • sculptures • story • technical solutions for a work or design.
Presentation contexts may include:	<ul style="list-style-type: none"> • exhibition proposals • grant applications • projections • proposals for product development • proposals in response to a brief • publications • visualisation of an object, product or idea.

<i>Preparing</i> drawings for presentation may include:	<ul style="list-style-type: none">• adding captions or text to drawings• cleaning drawings• mounting drawings• preparing drawings for printing or reproducing• scanning drawings and preparing them for electronic storage or transmission.

Visual communication – art, craft and design

CUVACD302A Produce computer-aided drawings

Modification History

Version	Comments
CUVACD302A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use a range of computer-aided design and drafting (CADD) program functions to produce drawings.

The focus of this unit is on the technical skills required to operate CADD, not on design skills which are covered in other units in CUV11 Visual Arts, Craft and Design Training Package.

Application of the Unit

People working in many industries apply the skills and knowledge outlined in this unit.

In the cultural industries, computer-aided drawing skills are required in many design disciplines, and in contexts such as stage and set design. In the visual arts, computer-aided drawings could be used to develop concepts for artworks or for mounting installations and exhibitions.

At this level, work is undertaken independently but within established parameters. Supervision or guidance is available as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Prepare for computer-aided drawing work	1.1 Clarify drawing requirements with reference to concept or project <i>information</i> 1.2 Identify hardware, software, tools and equipment required for <i>computer-aided design</i> and drafting projects 1.3 Set up hardware and software according to operating instructions and organisational procedures 1.4 Identify and retrieve digitised information relevant to projects
2. Gather object parameters and/or measurements	2.1 Establish and record critical dimensions and data for required designs 2.2 Identify requirements in relation to accuracy, tolerances and other critical information
3. Prepare plots or drawings	3.1 Access and use <i>CADD functions and features</i> according to operating instructions 3.2 Access and use <i>peripheral equipment</i> required for projects 3.3 Prepare and review preliminary drawings in consultation with relevant colleagues as required
4. Finalise drawings	4.1 Check designs against project objectives and specifications according to organisational procedures 4.2 Identify and make required adjustments to designs based on review and consultation with relevant colleagues as required 4.3 Store data files according to operating instructions and organisational procedures 4.4 Submit final drawings within agreed time parameters

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to improve own skills through feedback and review
- literacy skills to interpret and use digital information, including instructions required for the production of computer-aided drawings
- numeracy skills to interpret and correctly apply calculations and measurements required for the production of computer-aided drawings
- planning and organising skills to plan work tasks in a logical sequence
- problem-solving skills to identify and respond to the need for adjustments in drawings
- self-management skills to complete work within agreed timeframes
- technology skills to use a range of features of CADD software.

Required knowledge

- ways in which CADD is used within specific industry contexts
- basic principles of CADD
- typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing
- intellectual property issues and legislation associated with the use of CADD
- OHS issues associated with the use of computers.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none">• use the standard features and functions of a CADD program to produce drawings for a specific workplace purpose• apply knowledge of CADD capabilities and uses in a specific industry context.
Context of and specific resources for assessment	Assessment must ensure access to: <ul style="list-style-type: none">• CADD equipment and software.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are

	<p>appropriate for this unit:</p> <ul style="list-style-type: none"> • evaluation of drawings produced by the candidate • oral or written questioning to assess knowledge of CADD features and functions • direct observation of the candidate undertaking CADD work • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information may relate to:	<ul style="list-style-type: none"> • creative objectives • measurements/dimensions of objects or space • scope for making adjustments • statutory requirements • technical objectives • timelines.
Computer-aided design may be required for a wide range of work situations which may include:	<ul style="list-style-type: none"> • costume or fashion design • layouts: <ul style="list-style-type: none"> • rooms • sites • stage • lighting plots • object or product design • set design • visual arts projects:

	<ul style="list-style-type: none">• artworks in any form• community installations• public art.
<i>CADD functions and features</i> must include:	<ul style="list-style-type: none">• drawing tools to support methods for drawing:<ul style="list-style-type: none">• lines• arcs• polylines• texts• dimensions• edit functions• plotting and printing• view displays• working with layers.
<i>CADD functions and features</i> may include:	<ul style="list-style-type: none">• three-dimensional (3-D) techniques:<ul style="list-style-type: none">• displaying 3-D views• entering coordinates• how CADD works in an integrated environment• isometrics and perspectives• macros• use of attributes to make project reports.
<i>Peripheral equipment</i> may include:	<ul style="list-style-type: none">• plotters• printers• scanners.

CUVACD303A Produce technical drawings

Modification History

Version	Comments
CUVACD303A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply a range of techniques to produce technical drawings that meet required standards and conventions.

Application of the Unit

People working in many industries apply the skills and knowledge outlined in this unit.

In the cultural industries, technical drawing skills to produce visual representations of objects, processes or spaces are required in sectors such as stage and set design for live theatre and events, as well as film and television productions. In the visual arts, technical drawings could be required in preparation for exhibitions, or as part of the process for designing artworks.

At this level, work is undertaken independently but within established parameters. Supervision or guidance is available as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Prepare for technical drawing work	1.1 Clarify <i>technical drawing requirements</i> with reference to relevant <i>documentation</i> and in consultation with <i>appropriate people</i> 1.2 Identify <i>factors</i> that may impact on technical drawing work 1.3 Review the <i>purpose</i> of drawings and select appropriate <i>techniques</i> 1.4 Prepare <i>equipment</i> and <i>materials</i> according to relevant <i>workplace procedures</i> and safety requirements
2. Create technical drawings	2.1 Apply appropriate conventions and standards to technical drawings 2.2 Prepare and review preliminary drawings in consultation with relevant people and confirm required amendments 2.3 Produce technical drawings that are consistent with concept and purpose of drawings 2.4 Finalise and submit technical drawings within agreed timeframes

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to improve own skills in technical drawing
- literacy skills to interpret material required to produce technical drawings
- numeracy skills to interpret and apply calculations and measurements in technical drawing
- planning and organising skills to plan work tasks in a logical sequence
- problem-solving skills to select technical drawing techniques that best suit the purpose and make adjustments as required

- self-management skills to complete work within agreed timeframes.

Required knowledge

- physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- technical drawing techniques and their application to a range of contexts and subject matter
- technical drawing practices, history and theory, including current standards and conventions
- intellectual property issues and legislation associated with technical drawing work
- OHS procedures for technical drawing work.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • produce a number of technical drawings which: <ul style="list-style-type: none"> • show a command of selected techniques • adhere to technical drawing standards and conventions • apply knowledge of technical drawing practice, history and theory.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • equipment and materials required to produce technical drawings.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of technical drawing in progress • evaluation of technical drawings produced by the candidate • questioning and discussion to determine candidate's understanding of technical drawing techniques • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy</p>

	difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Technical drawing requirements may include:	<ul style="list-style-type: none"> • circuits • diagrams • elevations • flow charts • illustrations • plans • sections • sketches.
Documentation may include briefs or specifications with information, such as:	<ul style="list-style-type: none"> • background information about clients • budget • clients' needs • considerations, such as: <ul style="list-style-type: none"> • contractual • copyright • ethical • legal • creative objectives • diagrams indicating, for example: <ul style="list-style-type: none"> • colours • measurements • scale • style • materials • personnel involved in the project • purpose

	<ul style="list-style-type: none"> • relevant statutory requirements, e.g. health and safety considerations • sponsorship • technical objectives • technology • timeframe.
<i>Appropriate people</i> may include:	<ul style="list-style-type: none"> • clients • colleagues • industry practitioners • managers • mentors • supervisors.
<i>Factors</i> may include:	<ul style="list-style-type: none"> • aesthetic considerations • availability of personnel • availability of resources • available budget • complexity of project • expectations of target users of technical drawings • own level of skill • presentation context • timelines.
<i>Purpose of technical drawings</i> may be to represent:	<ul style="list-style-type: none"> • architectural structures • electronics • furniture • landscape scheme • lighting and sound set-ups • mechanics • objects and products • theatre and film props and sets.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • computer-aided drawing • drafting using drafting instruments • drawing orthogonal projection • drawing to represent: <ul style="list-style-type: none"> • scale • perspective • dimension • volume • freehand drawing • geometric drawing • lettering • rendering.

<i>Equipment</i> may include:	<ul style="list-style-type: none">• computer• cutting knives• drafting instruments• drafting table• light box• photocopier• plotter• printer• rulers• scanner• scissors• software applications• templates.
<i>Materials</i> may include:	<ul style="list-style-type: none">• acetate sheets• chalks• drafting film• erasers• inks and wet mediums• markers• paper• pencils• pens• tape.
<i>Workplace procedures</i> may relate to:	<ul style="list-style-type: none">• cost control• process-specific procedures• recycling• reporting• safety• use of materials.

CUVCAL301A Produce calligraphy

Modification History

Version	Comments
CUVCAL301A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce calligraphy through the exploration and application of a range of techniques, tools, equipment and materials.

Application of the Unit

People still developing their calligraphy expertise apply the skills and knowledge in this unit. They produce finished calligraphy extending and combining a range of techniques to support the ideas of the work.

At this level, work is usually undertaken under supervision, though some autonomy and judgement can be expected within established parameters.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

of a unit of competency.	performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
--------------------------	--

Elements and Performance Criteria

1. Plan calligraphy work through exploration	<p>1.1 Explore calligraphy <i>ideas</i> and <i>techniques</i>, in consultation with <i>key people</i> as required</p> <p>1.2 Review historical and contemporary calligraphy practice as potential sources of ideas</p> <p>1.3 Clarify ideas for calligraphy based on exploration</p> <p>1.4 <i>Assess</i> the capabilities of calligraphy techniques through practice and adaptation</p> <p>1.5 Select techniques that best support the ideas for the work</p>
2. Prepare, maintain and store calligraphy resources	<p>2.1 Select and organise calligraphy <i>tools</i>, equipment and <i>materials</i> suited to the chosen work</p> <p>2.2 Prepare and maintain resources based on the <i>needs of the work</i></p> <p>2.3 Take responsibility for the safe and sustainable use of resources</p> <p>2.4 Store resources according to the needs of different items</p>
3. Create finished calligraphic work	<p>3.1 Safely use and adapt calligraphy techniques to create desired effects</p> <p>3.2 Review work in progress and make adjustments as required to produce final work</p> <p>3.3 Add value to the current work process and future work by documenting the work progress</p> <p>3.4 Liaise with others to obtain feedback on work in terms of its technical proficiency and success in communicating ideas</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss ideas for calligraphy with others
- learning skills to:
 - improve calligraphy techniques through practice and some experimentation
 - respond constructively to feedback
- literacy skills to read product safety labels and instructions on use
- numeracy skills to calculate quantities of materials
- planning and organising skills to organise resources required to produce calligraphy
- self-management skills to take responsibility for the process of creating work.

Required knowledge

- physical properties and capabilities of the range of materials and tools used in calligraphic work
- ways of exploring, adapting and combining techniques and materials to achieve different effects in calligraphic work
- historical and theoretical contexts for calligraphic work
- work space requirements for calligraphic work
- cleaning and maintenance techniques for tools used in calligraphic work
- elements and principles of design and their particular application to calligraphy work
- intellectual property issues associated with calligraphic work
- sustainability issues associated with the tools and materials used in calligraphic work
- organisational and legislative OHS procedures in relation to calligraphic work.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none">• produce multiple pieces of calligraphic work that show some technical proficiency in chosen techniques• work with ideas and techniques and bring them together in finished work• adapt and extend the capabilities of calligraphic techniques and resources.

Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • equipment and tools used to produce calligraphic work.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • evaluation of technical execution of work pieces produced by the candidate • direct observation of calligraphy in progress • questioning and discussion of the candidate's intentions and work outcome • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUVPRP301A Produce creative work.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Ideas may be influenced by:	<ul style="list-style-type: none"> • current capability with techniques • historical and theoretical context • subject matter or theme for the work, such as: <ul style="list-style-type: none"> • built environment • land and place • natural world
------------------------------------	--

	<ul style="list-style-type: none"> • political, cultural and social issues • the body • spiritual concerns.
Techniques may include:	<ul style="list-style-type: none"> • application of decoration to pen and drawn letterform • application of pen skills for a purpose, such as to loosen up movements of the pen to make linear marks of differing intensity and character (e.g. thick sharp, thin curvilinear) • penning a range of letterforms, such as: <ul style="list-style-type: none"> • Carolingian • Copperplate • Foundational • Gothic • Italic • Roman • Uncial • variation of weight and size of letterform.
Key people may include:	<ul style="list-style-type: none"> • mentors • other artists • peers • supervisors • teachers.
Strategies used to assess the capabilities of techniques may involve:	<ul style="list-style-type: none"> • producing test pieces or samples • systematically testing a range of processes.
Tools may include:	<ul style="list-style-type: none"> • brushes, including: <ul style="list-style-type: none"> • air brushes • Asian brushes • disposable calligraphy pens • paint brushes • handmade pen from materials, such as: <ul style="list-style-type: none"> • bamboo • feather • reed • steel nibs in pen holders • tools adapted for specific purposes.
Materials may include:	<ul style="list-style-type: none"> • fabric, such as: <ul style="list-style-type: none"> • cotton • linen • silk

	<ul style="list-style-type: none">• gesso and impasto• glass• gold leaf• gouache• inks• papers of differing weights and textures• perspex• vellum• watercolour• wood.
<i>Needs of the work</i> may relate to:	<ul style="list-style-type: none">• availability of different resources• budget and cost control• creative goals• preparation time• process-specific procedures and requirements• recycling• reporting• safety• sustainable use of materials.

Visual communication – calligraphy

CUVCAL401A Experiment with techniques to produce calligraphy

Modification History

Version	Comments
CUVCAL401A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to proactively experiment and innovate with various calligraphy techniques and ideas to develop an individual style or voice.

Application of the Unit

People with a command of calligraphy techniques apply the skills and knowledge in this unit. They often produce work at a pre-professional level for sale in a range of outlets, such as markets and fairs.

At this level, work is undertaken independently with supervision and guidance as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
---------	----------------------

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

Elements and Performance Criteria

1. Develop proficiency with a range of calligraphy techniques and media	<p>1.1 Evaluate the potential for new approaches to calligraphy based on capabilities of <i>techniques</i> already used</p> <p>1.2 Adapt or introduce new <i>tools, equipment and materials</i> to achieve different effects</p> <p>1.3 <i>Extend</i> the capabilities of calligraphy techniques through experimentation</p> <p>1.4 Take account of the <i>safety and sustainability considerations</i> for different techniques and media</p>
2. Develop ideas for calligraphy	<p>2.1 Discuss creative and other goals of proposed calligraphic work with others</p> <p>2.2 <i>Research</i>, adapt and use relevant ideas and approaches from other practitioners with consideration of <i>intellectual property requirements</i></p> <p>2.3 Apply knowledge of different calligraphy techniques to inform <i>ideas</i></p> <p>2.4 Allow techniques and ideas to work together to inform each other</p> <p>2.5 Consider the <i>professional potential</i> and other <i>criteria</i> of work when developing ideas</p> <p>2.6 <i>Refine</i> and confirm ideas based on experimentation, research and collaboration with others</p>
3. Organise calligraphy resources	<p>3.1 Assess specific resource requirements for the chosen work</p> <p>3.2 Research and access potential <i>sources of supply</i> for calligraphy resources</p> <p>3.3 Evaluate <i>cost and other constraints</i> that impact on the development of work</p> <p>3.4 Evaluate and respond to <i>presentation considerations</i> for</p>

	<p>finished calligraphic work</p> <p>3.5 Set up or coordinate resource requirements according to safety and/or other workplace requirements</p>
4. Realise finished calligraphic work	<p>4.1 Create calligraphic work, using techniques and media selected from research and experimentation</p> <p>4.2 Review and refine ideas and approaches based on ongoing experiences with the production of work</p> <p>4.3 Use safe and sustainable work practices throughout the production of calligraphic work</p> <p>4.4 Document and record the development of the work and the research and ideas that inform it</p>
5. Evaluate own calligraphic work	<p>5.1 Reflect on own work in terms of conceptual development and technical execution</p> <p>5.2 Identify areas for future improvement especially in terms of own skill development</p> <p>5.3 Discuss completed work with others and respond positively to feedback</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - discuss creative work from a technical and conceptual perspective
 - create a record of the calligraphic work
- initiative and enterprise skills to:
 - experiment with calligraphy techniques to enhance final calligraphic work
 - apply critical thinking and analytical skills when developing ideas for calligraphic work
- learning skills to:
 - refine and improve a range of techniques
 - evaluate quality of own work and identify ways to enhance own practice
- literacy skills to undertake research about the work of other calligraphy artists and arts practitioners
- numeracy skills to:
 - evaluate resource costs

- calculate material requirements
- planning and organising skills to plan work tasks and resources so that all deadlines are met
- problem-solving skills to identify and resolve technical and conceptual issues in calligraphy work
- technology skills to use the internet as a research tool.

Required knowledge

- role of experimentation in developing and refining ideas for calligraphy and how this relates to the development of an individual style or voice
- ways to adapt, extend and combine the capabilities of a wide range of calligraphy materials and techniques
- physical properties and capabilities of an extended range of materials and tools used in calligraphy
- characteristics of different materials under different treatments and the potential of these characteristics to achieve different effects
- formal elements and principles of design and how they may be used, adapted and challenged
- research methodologies used by artists
- historical and theoretical contexts for calligraphy and how they may be used to inform individual practice
- sources of raw, part-processed and processed calligraphy materials
- sources of other resources needed in a professional calligraphy practice
- intellectual property issues and legislation to be considered by independent arts practitioners
- sustainability considerations for the professional operation of a calligraphy practice
- OHS requirements for the set-up and operation of a calligraphy work space.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none">• develop ideas and techniques through a process of research and experimentation• produce multiple finished calligraphic works or a single major work that demonstrate a command of techniques

	<ul style="list-style-type: none"> • apply knowledge of calligraphy techniques, equipment and materials and the ways they may be adapted and combined.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • equipment and tools used to produce calligraphic work.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • evaluation of technical execution of work pieces produced by the candidate • direct observation of calligraphy in progress, including exploration of, and experimentation with, techniques • questioning and discussion about candidate's intentions and the work outcome • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUVPRP401A Realise a creative project.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Techniques may include:	<ul style="list-style-type: none"> • application of decoration to pen and drawn letterform • application of pen skills for a purpose, such as to loosen up movements of the pen to make linear marks of differing
--------------------------------	---

	<p>intensity and character (e.g. thick sharp, thin curvilinear)</p> <ul style="list-style-type: none"> • penning a range of letterforms: <ul style="list-style-type: none"> • Carolingian • Copperplate • Foundational • Gothic • Italic • Roman • Uncial • variation in weight and size of letterform.
<i>Tools and equipment</i> may include:	<ul style="list-style-type: none"> • brushes, including: <ul style="list-style-type: none"> • air brushes • Asian brushes • disposable calligraphy pens • paint brushes • handmade pen from materials, such as: <ul style="list-style-type: none"> • bamboo • feather • reed • steel nibs in pen holders • tools adapted for specific purposes.
<i>Materials</i> may include:	<ul style="list-style-type: none"> • fabric: <ul style="list-style-type: none"> • cotton • linen • silk • gesso and impasto • glass • gold leaf • gouache • inks • papers of differing weights and textures • perspex • vellum • watercolour • wood.
Strategies used to <i>extend</i> capabilities involve:	<ul style="list-style-type: none"> • developing expertise in a broad range of techniques: <ul style="list-style-type: none"> • lettering fully integrated with decorated elements, e.g. a letter of the alphabet intertwined with illustrated plant • letters formed with illusion of depth

	<ul style="list-style-type: none"> • letters formed with linear perspective (vanishing points) • overlay of text in translucent materials • exploring the full potential of the art form • innovation • text over collaged imagery in a range of styles.
<i>Safety and sustainability considerations</i> may include:	<ul style="list-style-type: none"> • federal, state and territory legislation, regulations and standards • personal protection • recycling • safe disposal of waste.
<i>Research</i> may involve:	<ul style="list-style-type: none"> • approaching individuals with relevant expertise • attending lectures and talks • conducting material and technical experiments and tests • searching the internet • seeking out information in a range of print and electronic media • visiting exhibitions and museums.
<i>Intellectual property requirements</i> may relate to:	<ul style="list-style-type: none"> • extent to which the work may be used • form of acknowledgement or credit • procedures for seeking permission to use the work of others, including systems for the administration of copyright • protocols for the adaptation of work by others.
<i>Ideas</i> may be influenced by:	<ul style="list-style-type: none"> • artistic aspirations • current capability with techniques • historical and theoretical contexts • subject matter or theme for the work, such as: <ul style="list-style-type: none"> • built environment • land and place • natural world • political, cultural and social issues • the body • spiritual concerns.
<i>Professional potential</i> may relate to:	<ul style="list-style-type: none"> • cost of production • existence of an established market • how to promote or sell the work • market trends • professional development.
<i>Criteria</i> may relate to:	<ul style="list-style-type: none"> • client and user expectations • environment in which final product will be used or viewed

	<ul style="list-style-type: none"> • legibility • materials • quality of final product • quantity • techniques • timelines • tools.
Process followed to refine ideas may include:	<ul style="list-style-type: none"> • adjustment to subject matter or theme • adjustment to take account of elements and principles of design • adjustment to use extended capabilities of techniques.
Sources of supply may include:	<ul style="list-style-type: none"> • commercial outlets • found objects and materials • manufacturing or factory waste • nature.
Cost and other constraints may relate to:	<ul style="list-style-type: none"> • availability of materials and tools • budgeting • sponsorship • timeframe.
Presentation considerations may include:	<ul style="list-style-type: none"> • availability of space • cost • practical considerations • presentation context • need for external assistance: <ul style="list-style-type: none"> • bookbinding • framing • printing • timeframe.

CUVDES405A Research and apply techniques in spatial design

Modification History

Version	Comments
CUVDES405A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research and apply techniques for application to spatial design. It involves interpreting work briefs, organising resources, testing ideas, and refining approaches to a range of design challenges. The unit covers the design process to the point of producing models or maquettes for spatial designs.

Application of the Unit

Individuals who generate ideas and solutions for the layout of spaces apply the skills and knowledge in this unit. Spatial design solutions are required for exhibitions, fit-outs for exterior spaces or environments, fit-outs for building foyers and offices, special events and theatre sets.

Skills associated with producing final designs can be found in units related to specific disciplines, such as set and exhibition design which are contained in Training Packages, such as CUE03 Entertainment and CUL04 Museum and Library/Information Services.

At this level, research, experimentation and ongoing refinement are used to produce a range of design work where individuals are beginning the process of finding their individual style. Work is undertaken independently with supervision and guidance as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Interpret spatial design briefs	1.1 Interpret the <i>specifications</i> of design <i>briefs</i> 1.2 Take user or client requirements into account when making decisions about <i>spatial design work</i> 1.3 Clarify issues about specifications, <i>parameters and constraints</i> with relevant people as required 1.4 Source and evaluate information pertinent to briefs
2. Organise resources for spatial design	2.1 Identify resources required to develop spatial design models, including <i>work space, tools and equipment</i> 2.2 Prepare and care for resources according to requirements 2.3 Follow storage and inventory procedures
3. Test spatial design approaches	3.1 Produce <i>preliminary visual representations</i> 3.2 <i>Identify possible approaches</i> and establish <i>criteria</i> for selecting final approach 3.3 Select appropriate <i>materials</i> , tools and equipment and <i>test</i> approaches and <i>techniques</i> 3.4 Evaluate testing processes against criteria and select the approach that best meets the requirements of briefs 3.5 Critique own work and seek feedback as required 3.6 <i>Refine</i> and <i>document the approach</i> to spatial design work

	based on testing and evaluation
4. Fabricate spatial design models or maquettes	<p>4.1 Evaluate the need for fabrication and the scope of work required</p> <p>4.2 Select and organise materials, tools and equipment for fabrication according to design approach</p> <p>4.3 Safely make models or maquettes ensuring consistency with design concepts and briefs</p> <p>4.4 Respond positively to feedback and refine work as required</p> <p>4.5 Present models or maquettes within agreed timeframes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to engage with others about approaches to spatial design
- initiative and enterprise skills to experiment with techniques to produce effects that enhance the design of spaces
- learning skills to refine and improve a range of spatial design techniques
- literacy skills to interpret design briefs and research information about spatial design
- numeracy skills to calculate proportions, measurements and costs
- self-management and planning skills to plan work tasks
- technical skills to evaluate, adapt and integrate a range of techniques into the design and fabrication of models and maquettes.

Required knowledge

- role of experimentation in designing spaces
- formal elements and principles of design and their application to spatial design
- techniques, materials, tools and equipment and their application to different areas of spatial design
- common formats and features of spatial design briefs
- work and ideas of other designers specialising in spatial design
- history and theory of design in relation to spatial design
- intellectual property issues and legislation and their relevance to spatial design
- sustainability considerations for spatial design
- OHS requirements relevant to the design of spaces.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> test and use a range of approaches and techniques for the design of spaces in response to a brief produce a model or maquette for at least one spatial design apply knowledge of the processes and techniques used for spatial design in different contexts.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> briefs on which to base the design of spaces equipment and tools used to produce models or maquettes of spatial designs.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct observation of design or model making work in progress, including exploration of, and experimentation with, techniques evaluation of visual documentation of spatial designs evaluation of plans and models produced by the candidate questioning and discussion about the candidate's intentions and the work outcome review of portfolios of evidence review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> BSBDES401A Generate design solutions BSBDES402A Interpret and respond to a design brief.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Specifications</i> may refer to:	<ul style="list-style-type: none"> • client needs • dimensions • purpose • style.
<i>Briefs</i> are usually prepared by a commissioning body or organisation and may be:	<ul style="list-style-type: none"> • diagrammatic • verbal • visual • written.
<i>Spatial design work</i> may include:	<ul style="list-style-type: none"> • exhibition design • fit-outs for exterior spaces or environments • foyer design • installation for specific event • office fit-outs • set design.
<i>Parameters and constraints</i> may refer to:	<ul style="list-style-type: none"> • considerations, such as: <ul style="list-style-type: none"> • client's organisational background • contractual • copyright • ethical • health and safety • legal • subject matter • cost • material characteristics • technology • timeframe.
<i>Relevant people</i> may include:	<ul style="list-style-type: none"> • clients • colleagues • industry practitioners • managers • mentors • supervisors.

Work space needs may include:	<ul style="list-style-type: none"> • drafting table • electronic equipment • lighting and power requirements • process-specific space needs.
Tools and equipment may include:	<ul style="list-style-type: none"> • brushes • camera • computer • hand tools • ladders • lighting equipment • power tools • printer • relevant software • scanner.
Preliminary visual representations may include:	<ul style="list-style-type: none"> • computer-aided design and drafting (CADD) • colour boards • photography and digital imaging • plan drawing • sample boards • sketching.
Identifying possible approaches includes:	<ul style="list-style-type: none"> • identifying possible design solutions • identifying possible realisation options, such as by: <ul style="list-style-type: none"> • fabricating an aspect of the design • means of a model or maquette.
Approaches may encompass:	<ul style="list-style-type: none"> • aesthetic considerations • choice of fabrication options • design solutions • parameters of the brief.
Criteria may include:	<ul style="list-style-type: none"> • access to materials, tools and equipment required to realise designs • consistency with spatial design briefs • ease of manufacture • personal affinity with medium and materials.
Materials may include:	<ul style="list-style-type: none"> • cardboards • clays • fibres • glass • manufactured materials: <ul style="list-style-type: none"> • tiles • panels • carpeting

	<ul style="list-style-type: none"> • textiles • metals • modelling pastes • natural elements: <ul style="list-style-type: none"> • water • light • wind • plants • glazes • paints • paper • plastics • stains • wood and/or wood products.
Strategies to <i>test</i> techniques may involve:	<ul style="list-style-type: none"> • exploring techniques by making practice pieces, test pieces, mock-ups or samples • testing materials by applying stress and colour tests.
<i>Techniques</i> would depend on design solutions and realisation options and may include:	<ul style="list-style-type: none"> • carpentry • digital work • glasswork • lighting • modelling • painting and decoration • photography • projection • surface decoration • textile work.
Process followed to <i>refine</i> the design approach may involve:	<ul style="list-style-type: none"> • adjustment to design solution • adjustment to take account of elements and principles of design • adjustment to use the extended capabilities of techniques.
Process used to <i>document the approach</i> may involve:	<ul style="list-style-type: none"> • elevations • final drawings • illustrations • models • photographs • plans • specifications for fabrication.

Unit Sector(s)

Design – design process

CUVDRA201A Develop drawing skills

Modification History

Version	Comments
CUVDRA201A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use basic drawing techniques to produce creative work. This unit relates to drawing as an art form and therefore differs from units that focus on drawing as a visual representation tool.

Application of the Unit

People with little or no drawing experience apply the skills and knowledge outlined in this unit. Typically they are embarking on a career in visual arts or a related area of creative practice and may have acquired general design or drawing skills either at school or through self-directed learning and experimentation.

At this level, they are applying basic techniques to produce drawings from simple ideas. Supervision and guidance would usually be provided.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
---------	----------------------

<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

Elements and Performance Criteria

1. Prepare drawing resources	<p>1.1 Identify and obtain drawing <i>tools, equipment and materials</i></p> <p>1.2 Prepare tools, equipment and materials according to <i>workplace procedures</i> and safety requirements</p> <p>1.3 Set up a safe work space with guidance from <i>key people</i></p>
2. Use and test drawing techniques	<p>2.1 View a range of drawings in different styles and discuss with others how effects are achieved</p> <p>2.2 Match potential techniques to the <i>ideas</i> for the work with the assistance of key people</p> <p>2.3 <i>Test</i> nominated <i>techniques</i> to determine the effects they achieve</p> <p>2.4 Safely use selected techniques to produce drawings</p> <p>2.5 Calculate correct quantities of materials required and minimise waste where possible</p> <p>2.6 Clean and store tools, equipment and materials according to safety requirements and specific needs of different items</p>
3. Make plans to develop skills	<p>3.1 Seek feedback on drawing work from key people</p> <p>3.2 Respond positively to feedback and identify key areas for improvement</p> <p>3.3 Review different opportunities to build own skills and select suitable options</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - discuss the process for producing drawings with others
 - understand and follow instructions
- learning skills to:
 - improve techniques for producing drawings through practice
 - respond appropriately to feedback
- literacy skills to read product and equipment safety labels
- numeracy skills to calculate quantities of materials
- planning and organising skills to prepare and set up resources and work space.

Required knowledge

- materials, tools and equipment commonly used for drawing
- major styles of drawing and the work of key practitioners relevant to individual area of interest
- typical work space and equipment requirements for the production of different types of drawings
- cleaning and maintenance techniques for tools and equipment used in drawing
- elements and principles of design – what they are and what they mean
- intellectual property considerations for any person making creative work
- ways of minimising waste in the use of drawing tools, equipment and materials
- OHS procedures that apply to drawing work.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none">• produce drawings where the techniques and materials support the ideas for the work• apply knowledge of drawing tools, equipment and materials.
Context of and specific resources for	Assessment must ensure access to:

assessment	<ul style="list-style-type: none"> • equipment and materials used to produce drawings.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of drawings in progress • questioning and discussion of the candidate's intentions and work outcome • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUVPRP201A Make simple creative work.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Tools and equipment</i> may include:	<ul style="list-style-type: none"> • brushes • crayons • electronic equipment and accessories • pencils • pens • rags • scrapers • spatulas • sponges • sticks.
--	---

Materials may include:	<ul style="list-style-type: none"> • chalks • charcoal • crayons • ink and wash • papers • pastels • watercolour.
Workplace procedures may relate to such things as:	<ul style="list-style-type: none"> • cost control • process-specific procedures • recycling • reporting • safety • use of materials.
Key people may include:	<ul style="list-style-type: none"> • arts practitioners • mentors • supervisors • teachers.
Ideas may be influenced by:	<ul style="list-style-type: none"> • elements and principles of design • subject matter or theme for the work, such as: <ul style="list-style-type: none"> • built environment • identity • land and place • natural world • political, cultural and social issues • the body • spiritual concerns.
Process used to test techniques may include:	<ul style="list-style-type: none"> • experimenting directly with work in progress • exploring techniques by making practice pieces • making samples using nominated techniques.
Techniques would generally be quite limited in nature and may include:	<ul style="list-style-type: none"> • digital drawing techniques • basic use of: <ul style="list-style-type: none"> • linear marks of differing intensity and character • linear marks to produce illusion of three-dimensional (3-D) form • simple linear perspective through the use of a vanishing point • tonal range to produce illusion of a 3-D form.

CUVGRD401A Research and apply graphic design techniques

Modification History

Version	Comments
CUVGRD401A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research and apply techniques to produce graphic design work. It involves interpreting work briefs, organising resources, testing ideas, and refining approaches to a range of design challenges.

Application of the Unit

Individuals still developing a full repertoire of graphic design skills apply the skills and knowledge in this unit. Research, experimentation and refinement are used to produce a range of design work, which is likely to be generalist in nature. Work is carried out independently, with guidance and supervision as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate</i>

	<i>achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
--	---

Elements and Performance Criteria

1. Interpret graphic design briefs	<p>1.1 Interpret the <i>specifications</i> of graphic design <i>briefs</i></p> <p>1.2 Take user or client requirements into account when making decisions about <i>graphic design work</i></p> <p>1.3 Clarify issues about specifications, <i>parameters and constraints</i> with <i>relevant people</i> as required</p> <p>1.4 Research and evaluate information pertinent to briefs</p>
2. Organise resources	<p>2.1 Identify resources required for graphic design work, including <i>work space, materials, tools and equipment</i></p> <p>2.2 Prepare and care for resources according to requirements</p> <p>2.3 Follow storage and inventory procedures</p>
3. Test graphic design approaches	<p>3.1 Produce <i>preliminary visual representations</i></p> <p>3.2 Identify possible design <i>approaches</i> and establish criteria for selecting final approach</p> <p>3.3 Select materials, tools and equipment and test approaches and <i>techniques</i></p> <p>3.4 Evaluate testing processes against criteria and select the approach that best meets the requirements of briefs</p> <p>3.5 Critique own work and seek feedback as required</p> <p>3.6 <i>Refine</i> and <i>document</i> the design approach based on testing and evaluation</p>
4. Produce graphic design work	<p>4.1 Create graphic designs using selected approach</p> <p>4.2 Respond positively to feedback and refine graphic design work as required</p> <p>4.3 Present finished work within agreed work parameters</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to engage with others about approaches to graphic design work
- initiative and enterprise skills to experiment with graphic design techniques to produce effects that enhance the final product
- learning skills to refine and improve a range of techniques
- literacy skills to interpret design briefs and research information to support graphic design work
- numeracy skills to work with technical issues, such as layouts and image resolution
- self-management and planning skills to plan graphic design work
- technical skills to evaluate, adapt and integrate a range of graphic design techniques
- technology skills to use a range of digital imaging and design software.

Required knowledge

- role of experimentation in developing and refining graphic design work
- work and ideas of other graphic designers
- formal elements and principles of design and their application to graphic design
- techniques, materials, tools and equipment used in graphic design
- types of graphic design briefs
- history and theory of graphic design
- intellectual property issues and legislation and their relevance to graphic design
- OHS requirements for graphic design work.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none">• produce multiple examples of graphic design work that meet the requirements of briefs• demonstrate a command of selected graphic design techniques.

Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • briefs on which to base graphic design work • equipment and tools used to produce graphic design work.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • evaluation of graphic designs produced by the candidate • questioning and discussion about the candidate's intentions and the work outcome • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBDES401A Generate design solutions • BSBDES402A Interpret and respond to a design brief.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Specifications</i> may refer to:	<ul style="list-style-type: none"> • audience • medium • purpose • style.
<i>Briefs</i> are usually prepared by a commissioning body or	<ul style="list-style-type: none"> • diagrammatic • verbal • visual

organisation and may be:	<ul style="list-style-type: none"> written.
Graphic design work may be:	<ul style="list-style-type: none"> advertising annual reports banners book designs corporate presentations corporate stationery invitation logos posters visual merchandising web design.
Parameters and constraints may refer to:	<ul style="list-style-type: none"> considerations, such as: <ul style="list-style-type: none"> client's organisational background legal contractual ethical copyright health and safety subject matter cost material characteristics product characteristics and statistics quantity technology timeframe.
Relevant people may include:	<ul style="list-style-type: none"> clients colleagues industry practitioners managers mentors supervisors.
Work space needs may include:	<ul style="list-style-type: none"> drafting table electronic equipment lighting and power requirements process-specific needs.
Materials may include:	<ul style="list-style-type: none"> board drawing implements fabrics inks

	<ul style="list-style-type: none"> • metal surfaces • perspex • range of papers of differing weights and textures • wet mediums • wood.
<i>Tools and equipment</i> may include:	<ul style="list-style-type: none"> • computer • digital camera • drafting table and equipment • hand tools • light box • nibs and pens • printer • projection equipment and screens • range of brushes, including air brushes • scanner • scrapers • software • spatulas • sponges • spray cans • spray guns • storage devices.
<i>Preliminary visual representations</i> may involve:	<ul style="list-style-type: none"> • computer-aided drawing • sketching • technical drawing.
<i>Approaches</i> may encompass:	<ul style="list-style-type: none"> • aesthetic considerations • choice of medium and materials • design solutions • parameters of the brief.
<i>Criteria</i> may include:	<ul style="list-style-type: none"> • access to materials, tools and equipment required for graphic design • access to specialist support services • consistency with briefs • ease of application of techniques • personal affinity with medium and materials.
Strategies to <i>test</i> techniques may involve:	<ul style="list-style-type: none"> • exploring techniques by making practice pieces, test pieces, mock-ups or samples • testing materials and their application.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • digital imaging • handbuilding: <ul style="list-style-type: none"> • displays

	<ul style="list-style-type: none">• installations• mock-ups• hand drawn illustration• lettering• preparing work for printing processes.
Process followed to <i>refine</i> the design approach may involve:	<ul style="list-style-type: none">• adjustment to content• adjustment to take account of elements and principles of design• adjustment to use extended capabilities of techniques.
Process used to <i>document</i> the approach may involve:	<ul style="list-style-type: none">• final drawings• illustrations• photographs• plans• written rationale or description.

Unit Descriptor

Unit descriptor	<p>The standard describes the skills and knowledge required for working with and developing a concept to that stage where it becomes the basis of a creative and effective product, service or process. It covers both the response to a brief or the development of a self-initiated proposal. It does not describe the skills needed for presentation of the proposal which are covered by other units.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This standard has been developed for people whose job specifically involves designing products or services, concepts or outcomes in any sector of the cultural industries. It might be used by someone designing a new event concept, a concept for public art, a new graphic design package for a hotel/resort, a concept for multi-media installation, a concept for sound sampling, a marketing campaign, a concept for new gallery space and so on.</p> <p>The standard relates to specialist positions in enterprises such as the community development office of local government organisations, design studios, event management/promotion firms, artist-run co-operatives, theatres and galleries and museums.</p> <p>Examples of how this unit works in practice can be found in the Supporting Information section of the Training</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret the brief or clarify need or opportunity	1.1. The brief, need or opportunity for innovation is explored. The context for the new <i>product</i> or service is investigated and clarified and the audience/user is

ELEMENT	PERFORMANCE CRITERIA
	<p>determined.</p> <p>1.2. The <i>purpose</i>, desired outcome or end product, broad content, style, cost, intended audience and other relevant <i>factors</i> of the brief, need or opportunity are clarified.</p> <p>1.3. The purpose, goals, <i>constraints</i> and requirements of the final product/service/process are specified.</p>
2. Develop a range of creative approaches	<p>2.1. A range of different, innovative and creative approaches and concepts is generated.</p> <p>2.2. Different approaches/concepts are reviewed for feasibility, innovation, creativity, and acceptability to client or audience.</p> <p>2.3. Possible constraints are identified and the approaches/concepts are checked against these to determine feasibility.</p> <p>2.4. The social, ethical and environmental impacts of the approaches/concepts are taken into consideration.</p> <p>2.5. The effects and advantages of various combinations of activities, systems, processes, staff, materials for achieving a creative, innovative and appropriate outcome are investigated.</p> <p>2.6. The concept(s) or approach(es) that achieve the required outcome in an innovative and feasible way are selected and draft proposals representing those approaches are documented in an appropriate <i>format</i>.</p>
3. Seek opinions of colleagues and a range of creative and technical experts/specialists	<p>3.1. Proposals are discussed with <i>colleagues and specialists</i>.</p> <p>3.2. Creative and technical aspects of the proposals are clarified and expert advice sought where required.</p> <p>3.3. Proposals are compared with best practice examples of similar products, services or processes.</p>
4. Adjust and refine proposal on the basis of advice received and evaluation	<p>4.1. Determine advantages and disadvantages of each approach/strategy based on criteria such as creativity, appropriateness to the user/audience, cost-effectiveness, level of risk, potential benefits and technical feasibility.</p> <p>4.2. Proposals are evaluated and the approach which will result in achieving the desired outcome is selected.</p>
5. Develop the concept to an operational level	<p>5.1. A detailed <i>specification</i> for the product in terms of creativity, the audience/user, budget, and technical requirements is developed.</p>

ELEMENT	PERFORMANCE CRITERIA
	5.2. The detailed specification is presented to the relevant parties for approval, funding or endorsement.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- the ability to use creative techniques to generate a range of innovative ideas
- the ability to communicate with a wide range of people
- research skills
- relevant technical knowledge
- appropriate ways of documenting creative proposals.

Required knowledge

- knowledge of past history of work in related areas
- knowledge of the social and environmental effects of possible approaches
- specialist knowledge relating to issues within the specific work contexts within cultural industries
- technical principles and knowledge appropriate to the area covered by the concept
- communication principles
- the variety of methods and materials available.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and

Evidence of the following is essential:

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • generation and evaluation of creative and effective concepts • translation of an original idea into a concrete proposal which is documented and reviewed using appropriate methods.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • interaction with others to reflect the collaborative nature of the development process.
Method of assessment	<p>Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of the candidate participating in discussions and other collaborative activities to evaluate ideas or solutions • oral or written questioning to assess knowledge of the social and environmental impacts of relevant products, services or processes.
Guidance information for assessment	<p>This competency standard could be assessed on its own or in combination with other competencies relevant to the job function within the cultural industries work context.</p> <p>The other standards would probably most appropriately be at AQF level 4 and above and may include:</p> <ul style="list-style-type: none"> • CUVADM11B Work within an arts organisation context • CUVDES04B Integrate colour theory and design processes in response to a brief • CUVCON06B Develop concepts for arts organisations or projects <p>Please note: the above is a generic list which may apply across the cultural industries. Some of the units may not be included in this particular Training Package.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Products</i> might include:	<ul style="list-style-type: none"> • commissioned art work • fabric designs • furniture design • marketing campaigns • new gallery concepts • photoimaging assignments.
<i>Purposes</i> of the product may include:	<ul style="list-style-type: none"> • provision of services to clients within the cultural industries.
<i>Factors</i> to be considered may include:	<ul style="list-style-type: none"> • access to technology • audience/user characteristics • cost effectiveness • level of skill and understanding required for implementation • need for additional staff training • resource requirements • technical feasibility.
<i>Constraints</i> to the project may include:	<ul style="list-style-type: none"> • availability of skilled experts and personnel • cost • equipment • finance • technical difficulty • time.
<i>Formats</i> for documentation may include:	<ul style="list-style-type: none"> • briefs for a consultant • descriptions of a creative proposal for in-house consideration • proposals to be submitted to a funding body or sponsor.
Appropriate <i>colleagues and specialists</i> to discuss proposals with may include:	<ul style="list-style-type: none"> • any staff who may be involved in the design or the implementation of the process • creative and administrative staff • personnel external to the organisation • technical specialists.

RANGE STATEMENT	
Project <i>specifications</i> may include:	<ul style="list-style-type: none"> • audience • budget • operational plan • ownership of final product • purpose • resources, e.g.: <ul style="list-style-type: none"> • human • plant and equipment • time.
Resources and equipment may include:	<ul style="list-style-type: none"> • computers, e.g.: <ul style="list-style-type: none"> • hardware • software • specialist staff required for successful development of the proposed product or service • others resources or equipment depending on the outcome required.

CUVILL401A Research and apply techniques for illustrative work

Modification History

Version	Comments
CUVILL401A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research and apply techniques for application to any type of illustrative work.

Application of the Unit

Illustrators still developing a full repertoire of professional skills apply the skills and knowledge in this unit. They could be employed in graphic design studios, architectural practices, book and magazine publishers or the media. Illustrators frequently offer their services on a freelance basis from a home-based business. Illustrations could appear in print publications, on storyboards for screen productions, on promotional banners or online.

At this level research, experimentation and ongoing refinement are required to produce a range of illustrative work where an individual is beginning the process of finding an individual style. Work is carried out independently with supervision and guidance as required.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Interpret briefs for illustrative work	1.1 Interpret the <i>specifications</i> of illustration <i>briefs</i> 1.2 Take user or client requirements into account when making decisions about <i>illustrative work</i> 1.3 Clarify issues about specifications, <i>parameters and constraints</i> with <i>relevant people</i> as required 1.4 Source and evaluate information pertinent to briefs
2. Organise resources	2.1 Identify resources required for the development of illustrative work, including <i>work space, materials, tools and equipment</i> 2.2 Prepare and care for resources according to requirements 2.3 Follow storage and inventory procedures
3. Test design approaches for illustrative work	3.1 Produce <i>preliminary visual representations</i> 3.2 Identify possible illustrative <i>approaches</i> and establish <i>criteria</i> for selecting final approach 3.3 Select appropriate materials, tools and equipment and <i>test</i> approaches and <i>techniques</i> 3.4 Evaluate testing processes against criteria and select the approach that best meets the requirements of briefs 3.5 Critique own work and seek feedback as required 3.6 <i>Refine</i> and accurately <i>document</i> the illustrative approach based on testing processes
4. Produce illustrative work	4.1 Create illustrations using the selected approach 4.2 Respond positively to feedback and refine illustrative work

	as required
	4.3 Present finished work within agreed work parameters

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to engage with others about illustrative work
- initiative and enterprise skills to experiment with illustration techniques to produce different effects
- learning skills to refine and improve a range of techniques
- literacy skills to interpret illustration briefs and research information about illustration
- numeracy skills to deal with technical illustration concepts
- self-management and planning skills to plan work tasks
- technical skills to evaluate, adapt and integrate a range of illustration techniques
- technology skills to use industry-standard illustration software.

Required knowledge

- role of experimentation in developing and refining illustrative work
- techniques, materials, tools and equipment and their application to illustrative work
- types of briefs for illustrative work
- formal elements and principles of design and their application to illustrative work
- ideas, techniques and work of other illustrators
- history and theory of design in relation to illustrative work
- elements and principles of design and how they may be used, adapted and challenged in the creation of illustrations
- intellectual property issues and legislation and their relevance to illustrative work
- OHS requirements for illustrative work.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

CUVPRP405A Develop and discuss ideas for own creative work

Modification History

Version	Comments
CUVPRP405A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and discuss ideas for creative work.

The unit includes research and analysis, as well as the ability to participate in critical and informed discussion with others about creative work

Application of the Unit

People working across all areas of creative practice apply the skills and knowledge described in this unit. The ability to research, generate and discuss ideas is an integral part of the creative process, and sits alongside the technical skills specific to particular art forms.

This work would usually be carried out under mentored supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

Elements and Performance Criteria

1. Research ideas	<p>1.1 Identify and source information that supports the development of ideas for creative work</p> <p>1.2 Critically analyse information in the context of current and potential work</p>
2. Generate ideas	<p>2.1 Develop a range of different, innovative and creative ideas based on the nature of own creative practice</p> <p>2.2 Reflect on and integrate ideas generated from research</p> <p>2.3 Consider possible constraints on ideas</p> <p>2.4 Select ideas based on research, reflection and relevant constraints</p>
3. Discuss ideas with others	<p>3.1 Identify and seek out people who can provide valuable input to discussions about work ideas</p> <p>3.2 Evaluate different communication options and select the most appropriate</p> <p>3.3 Present key information on ideas and their process of development</p> <p>3.4 Use effective communication techniques to generate discussion, debate and critical analysis of ideas</p>
4. Adjust and refine ideas	<p>3.5 Reflect on the views and contributions of others</p> <p>3.6 Make own analysis of ideas based on individual aspirations and goals</p> <p>3.7 Refine ideas based on own analysis and interactions with others</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills
<ul style="list-style-type: none"> communication skills to engage in informed discussion about potentially abstract ideas critical thinking skills to evaluate, distil and select ideas from research learning skills to learn from discussion with others literacy skills to interpret a wide range of source materials for the development of ideas
Required knowledge
<ul style="list-style-type: none"> historical and contemporary references in chosen area of practice different ways to communicate and collaborate in creative practice intellectual property issues and legislation that affect the development of ideas for creative work in the relevant context

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> generate ideas for creative work grounded in research and reflection engage in informed discussion about ideas in own work apply knowledge of historical and contemporary references in own area of creative work.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> interaction with others about ideas for work.
Method of assessment	<p>Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:</p> <ul style="list-style-type: none"> evaluation of presentation by the candidate questioning about research and development processes

	<ul style="list-style-type: none"> • review of portfolios of evidence • review of third-party reports from experienced practitioners. <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • CUVPRP401A Realise a creative project.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information may include:	<ul style="list-style-type: none"> • direct observation of the natural or built environment • music, film and video • myths and legends • oral history • photographs and other artworks • promotional material • range of texts and text types • technical reports and data.
Way to <i>critically analyse</i> information may involve:	<ul style="list-style-type: none"> • considering how ideas may be adapted and challenged within work • drawing links between references and own work • making judgements about relevance of information and ideas.
Constraints may include:	<ul style="list-style-type: none"> • audience • availability of materials, tools and equipment • budgeting • own skills • presentation venue/context • sponsorship • timeframe.
People may include:	<ul style="list-style-type: none"> • critics and writers • mentors

	<ul style="list-style-type: none">• other creative practitioners• peer groups• supervisors• teachers.
<i>Communication options</i> may include:	<ul style="list-style-type: none">• blog• informal discussions• electronic forums• oral presentation• visual presentation• written presentation• wiki.

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 4.0	Updated mapping information. Equivalent outcome.
Release 3.0	Updated mapping information.
Release 2.0	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1.0	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit</p>

Application

This unit of competency describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, include community and workplace settings.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond in an emergency situation

1.1 Recognise an emergency situation

1.2 Identify, assess and manage immediate hazards to health and safety of self and others

1.3 Assess the casualty and recognise the need for first

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

aid response

1.4 Assess the situation and seek assistance from emergency response services where required

2. Apply appropriate first aid procedures

2.1 Perform cardiopulmonary resuscitation (CPR)

2.2 Provide first aid in accordance with established first aid principles

2.3 Display respectful behaviour towards casualty

2.4 Obtain consent from casualty where possible

2.5 Use available resources and equipment to make the casualty as comfortable as possible

2.6 Operate first aid equipment according to manufacturer's instructions

2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

3.1 Accurately convey incident details to emergency response services

3.2 Report details of incident to workplace supervisor as appropriate

3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills described those required skills (language, literacy and numeracy) that are essential to performance.

- Oral communication – in order to make an accurate verbal report to emergency response services and workplace supervisor

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID003 Provide first aid

Modification History

Release	Comments
Release 1.1	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1.0	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a hazard assessment and identified strategies to minimise risk
- demonstrated safe manual handling techniques
- assessed airway, breathing and responsiveness of casualty
- performed at least four minutes of uninterrupted CPR on both an infant resuscitation manikin and an adult resuscitation manikin placed on the floor, demonstrating the following techniques on each:
 - checking for response and normal breathing
 - recognising abnormal breathing
 - opening and clearing the airway
 - using correct hand location, compression depth rate in line with the ARC recommended ratio of compressions and ventilations
 - acting in the event of regurgitation or vomiting
 - following single rescuer procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- conducted a verbal secondary survey

- applied first aid procedures for the following:
 - allergic reactions
 - anaphylaxis
 - asthma
 - basic wound care
 - severe bleeding
 - burns
 - cardiac arrest
 - choking and airway obstruction
 - convulsions
 - envenomation (using pressure immobilisation)
 - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation techniques)
 - poisoning
 - respiratory distress
 - shock
- provided an accurate verbal report of the incident
- responded to at least two simulated emergency scenarios contextualised to the candidate's workplace/community setting.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position

- appropriate duration and cessation of CPR
- appropriate use of an AED
- standard precautions and infection control
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reactions
 - anaphylaxis
 - bleeding control
 - burns
 - cardiac conditions
 - choking and airway obstruction
 - cold and crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact (including hypothermia, hyperthermia, dehydration and heat stroke)
 - epilepsy
 - eye and ear injuries
 - fractures
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma and other respiratory conditions
 - seizures
 - severe allergic and anaphylactic reactions
 - shock
 - soft tissue injuries
 - unconsciousness, abnormal breathing or not breathing
- basic anatomy and physiology relating to:
 - absence of normal breathing
 - anatomy of the external chest
 - physiology relating to response/consciousness
 - upper airway anatomy and effect of positional change
 - anatomy and physiology considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually:

- in an environment that provides realistic in-depth, industry-validated scenarios and simulations to enable assessment of candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- first aid equipment including
 - roller bandages
 - triangular bandages cloth
 - trauma dressings
 - placebo bronchodilator and spacer device
 - adrenalin auto-injector training device
 - an AED training device
 - emergency rescue blanket
 - workplace first aid kit.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold:

- a current advanced first aid certificate

OR

- at least three years' experience as a health professional, nurse or emergency services provider.
-

ICPPR384A Set up and produce basic digital print

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to set up for and produce basic digitally printed product. This unit incorporates the use of raster image processor (RIP) technology when outputting to digital devices including wide format.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to the production of basic digitally printed products in the instant print and copy shop business environment.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check components and functions of a digital print system	<p>1.1. All areas of user replaceable <i>consumables</i> are checked and replacements made</p> <p>1.2. <i>Substrate</i> feeding mechanisms and transport units are checked and cleared of any misfeeds</p> <p>1.3. Correct set-up for data and electrical power is completed</p> <p>1.4. Shutdown and restart procedures are performed according to manufacturer's specifications</p> <p>1.5. Print driver and/or job download software are correctly installed and set-up on workstation computer and/or digital front-end processor</p>
2. Maintain digital printing system to maximise productivity and quality	<p>2.1. Routine maintenance tasks are performed according to <i>manufacturer's specifications</i></p> <p>2.2. Substrate transport and <i>inking systems</i> are cleaned to ensure optimum productivity and quality</p> <p>2.3. Temperature and humidity conditions are checked to ensure even flow of substrate</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Substrate registration mechanisms are checked to ensure alignment of printed images</p> <p>2.5. Ink density calibration is performed on a digital print system to meet job specifications</p> <p>2.6. Basic maintenance solutions to minimise ink residue, substrate misfeed, paper particle dust, uncalibrated systems and ink coverage are implemented</p>
3. Maintain and perform optimum substrate handling procedures	<p>3.1. A paper handling and storage system for a digital print environment are developed that maintains substrate integrity and digital image quality</p> <p>3.2. Machine status is checked, print counters and consumable levels are reviewed and time estimated for reordering, servicing and reporting purpose</p>
4. Confirm job specifications	<p>4.1. Print job specifications are read and interpreted from job documentation or production control system</p> <p>4.2. Availability of all job components is checked according to enterprise procedures</p> <p>4.3. Finishing requirements of job are checked and internal workflow and/or outsource arrangements are coordinated according to enterprise procedures</p> <p>4.4. Run time of job is calculated and completion time is estimated, allowing consideration for other production demands</p>
5. Set up reel system	<p>5.1. Unwind reel is adjusted according to job specifications</p> <p>5.2. Rewind reel is set up and adjusted according to job specifications</p> <p>5.3. Minor in-line processes are set up and adjusted according to job specifications</p>
6. Set up sheet transportation system on sheet-fed machine	<p>6.1. Substrate is loaded into correct feeding mechanism and all substrate properties are correctly specified in the user control interface</p> <p>6.2. Adjustments to the delivery unit are identified and made using the user control interface according to job specifications</p> <p>6.3. On-line finishing unit is adjusted using the user control interface according to job specifications</p>
7. Use RIP or front-end processor to set up job	<p>7.1. Electronic data files are located and retrieved according to job specifications</p> <p>7.2. RIP or front-end processor parameters are set</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to job specifications</p> <p>7.3. Preview or preflight check of electronic data files is performed to verify correct job set-up according to job specifications</p> <p>7.4. Basic troubleshooting methods are applied to identify and rectify unverified data files, file errors and job requirement inconsistencies according to manufacturer's specifications</p>
8. Submit data files to a digital print machine	<p>8.1. Job priority is determined according to job specifications and production schedules</p> <p>8.2. Data file is submitted to print and image quality and machine productivity checks are performed</p>
9. Produce digital proof and run digital print job	<p>9.1. A proof run is conducted to confirm proof conforms to job specifications and/or for client approval if required</p> <p>9.2. Entire print run is conducted according to job specifications ensuring that machine productivity and quality are monitored and rectified throughout the duration of the print job</p>
10. Coordinate and/or perform document finishing and client delivery	<p>10.1. Steps required for document finishing are identified if not performed on in-line finishing units on a reel or sheet-fed system according to job specifications</p> <p>10.2. Finished print work is packaged in a manner to prevent damage and to conform to delivery requirements according to job specifications</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- occupational health and safety (OHS) skills for operating machinery, such as safely switching off machinery before cleaning is started
- communication skills for interpreting job tickets and requirements
- collecting, analysing and organising skills for collecting and assessing data about coating process and machine specifications and characteristics and how these interact

REQUIRED SKILLS AND KNOWLEDGE

- planning and organising skills for identifying and providing information about time and materials requirements for set-up, production and finishing to ensure efficient operation
- teamwork skills for maintaining the production process in association with other workers
- numeracy skills for calculating substrate properties and production speeds to determine run length
- problem-solving skills for recognising proofing faults and determining adjustments to correct them
- technical skills for using computerised technology to access and adjust data files

Required knowledge

- workplace job ticket procedures
- pre-printing set-up checks and procedures
- file transfer actions, problems and solutions
- OHS issues relating to ink/toner
- determining the selection of specific ink/toner for varied printed products
- how to ensure the quality of ink/toner
- what to do if the required substrate was unavailable
- maximum weight of a substrate that can be printed on a specific machine
- minimum weight of a substrate that can be printed on a specific machine
- possible faults of printing on lightweight paper
- availability of pre-prepared substrates for specific machine
- maximum delivery quantity for specific machine
- possible problems regarding incorrect feeding and delivery
- data formats that can be used in digital print
- the benefits of using electronic data rather than scanning hard copy
- ways to submit a PDF file to the digital printer
- OHS procedures relating to setting up in-line processes
- in-line options that are available on specific machine
- on-line finishing options that are available on specific machine
- setting up in-line/on-line processes
- circumstances when a job would be modified before printing
- the steps involved for a client approval of the print
- proof check procedures
- processes involved for gaining final approval of a basic job
- various types of binding
- procedures followed if the binding method required by the client was not available at the workplace
- alternative options if the document size was too thick to staple
- importance of packing finished print work

REQUIRED SKILLS AND KNOWLEDGE

- location of machine manuals, safety and other documentation relevant to the set up and production of digitally printed products

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- set up a reel, sheet-fed or wide format digital printer
- access data and conduct a digital proof run
- adjust settings and ensure production speeds are attained
- use a RIP or front-end processor
- find and use information relevant to the task from a variety of information sources
- demonstrate all safety devices on machine
- perform preventive maintenance according to manufacturer's specifications
- set up and print four basic digital printing jobs according to manufacturer's specifications and enterprise procedures.

Context of and specific resources for assessment

Assessment must ensure:

- that conditions are typical ambient conditions found in the workplace
- access to relevant facilities, equipment and materials used for digital printing, such as production digital presses or wide format printers
- use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of

EVIDENCE GUIDE	
	portfolios of evidence <ul style="list-style-type: none"> • third party workplace reports of on-the-job performance by the candidate • practical demonstration by the candidate when setting up and producing a basic digitally printed product.
Guidance information for assessment	Holistic assessment with other digital production units relevant to the workplace and job role is recommended. For valid and reliable assessment of this unit, evidence should be gathered over a period of time through a range of methods for assessment to indicate consistent performance.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Consumables</i> may include:	<ul style="list-style-type: none"> • ink • toner • developer • waste toner • cleaning web • fuser • various substrates.
<i>Substrates</i> may include:	<ul style="list-style-type: none"> • range of print media and paper, such as: <ul style="list-style-type: none"> • coated • uncoated • card • canvas • vinyl and plastic.
<i>Manufacturer's specifications</i> may include:	<ul style="list-style-type: none"> • technical, administrator and user specifications documented by a manufacturer for a range of printing machines.

RANGE STATEMENT	
<i>Inking systems</i> may include:	<ul style="list-style-type: none"> commonly used inking systems in colour printing, such as: <ul style="list-style-type: none"> toner inkjet liquid toner-based.
<i>Calibration</i> may include:	<ul style="list-style-type: none"> mechanical and/or electronic and/or visual controls used to identify and correct ink coverage and density inconsistencies in a range of printing equipment.
<i>Machines</i> may include:	<ul style="list-style-type: none"> non-impact printing machines, including: <ul style="list-style-type: none"> inkjet laser wide format with computerised monitoring and/or control.
<i>Enterprise procedures</i> may include:	<ul style="list-style-type: none"> rules standards OHS guidelines communication protocols and behaviour codes of a range of workplace environments.
<i>In-line processes</i> may include:	<ul style="list-style-type: none"> stapling punching perforating cutting numbering or date coding.
<i>RIP or front-end processor</i> may include:	<ul style="list-style-type: none"> computerised monitoring and data entry device used to enter: <ul style="list-style-type: none"> machine settings job specification settings monitor machine status perform machine productivity enhancements.

	individuals
4. Monitor the application of OHS in the work area	<p>4.1. Implementation of standards, both OHS and environmental, is monitored to determine safety in the work area requirements</p> <p>4.2. Strategies for prevention or correction of problems are determined from the monitoring process</p> <p>4.3. Recommendations for prevention or correction are made in order to achieve established standards</p>
5. Communicate with management, work teams and individuals	<p>5.1. All information affecting work is explained logically and in an easily understood manner to team coordinators, teams or individuals where appropriate</p> <p>5.2. Effective and appropriate information provision is carried out with management and/or external personnel</p> <p>5.3. Written reports are concise and conform to enterprise procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- OHS in relation to operating machinery such as safely switching off machinery before cleaning is started
- communication of ideas and information by effectively communicating with management and/or external personnel
- collecting, analysing and organising information by accessing data about production processes and abilities of workers and customer demands and using these effectively in scheduling
- planning and organising activities by monitoring the performance of tasks and adjusting scheduling
- teamwork when establishing procedures that enable feedback from workers and encouraging suggestions that might enhance production
- mathematical ideas and techniques by calculating job times and manipulating scheduling to make most efficient use of personnel and equipment
- problem-solving skills by adjusting schedules to meet contingencies
- use of technology by using production scheduling and office software

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- OHS standards
- responsible person for OHS standards in the workplace
- reporting procedures that are necessary with OHS matters
- planning and implementing work schedules
- determining priority of jobs
- work scheduling procedures that are used within the organisation
- scheduling changes
- standards monitoring
- information that is reported in performance monitoring
- responsibility for providing instruction to achieve the required standard
- staff and workforce development
- performance monitoring of teams or individuals on performance
- enhancing individual performance
- changes that can be made to enhance team performance
- advantage of providing written reports to management

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- effective scheduling and supervision of a team or individuals
- produce a portfolio that demonstrates that each element has been carried out. This can include rosters, schedules, quality related documentation and testimonials from superiors and workers being supervised
- evidence for assessment may be gathered from assessment of the unit of competency alone or through an integrated assessment activity.

Context of and specific resources for

Assessment must ensure:

EVIDENCE GUIDE	
assessment	<ul style="list-style-type: none"> assessment may take place on the job, off the job or a combination of these. Off the job assessment must be undertaken in a closely simulated workplace environment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> ICPSU351C Undertake basic production scheduling.

Range Statement

RANGE STATEMENT

Co-requisite units

Co-requisite units		

LMTGN2005B Perform minor maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge to provide minor maintenance of production machines.

Application of the Unit

Application of the Unit The unit applies to the checking of machine performance and the undertaking minor adjustments to production machines.

Work involves limited discretion, initiative and judgement on the job in own work, including liaison with specialist mechanics and technicians.

Work may be conducted in a variety of environments, such as operational workplace activities, restricted space and hazardous, controlled or exposed conditions.

Work may be undertaken on a range of machines that may include microprocessor or computer controls.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires apply problem solving skills and initiative and enterprise to identify and act on minor machine faults within area of own responsibility. This unit also requires planning and organising to safely and efficiently use, check and clean and lubricate machines and technology used in TCF industries. Communication skills are also required to document and report faults and maintenance information.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate machine and assess performance	1.1 Machine is started and stopped according to manufacturer requirements. 1.2 Machine operation is monitored to ensure correct procedures are assessed and product meets quality standards. 1.3 Problem with machine is identified and reported.
2 Rectify minor machine fault	2.1 Minor machine and associated equipment and tool faults are identified and addressed where necessary to meet specified requirements, and are reported. 2.2 Major machine or product faults are identified and documented, and appropriate personnel informed.

ELEMENT	PERFORMANCE CRITERIA
	2.3 Machine maintenance records and other documentation are accurately completed.
3 Clean and lubricate machine	3.1 Machine is cleaned according to <i>OHS practices</i> and schedules, and manufacturer cleaning instructions. 3.2 Machine is lubricated according to workplace requirements and schedules, and manufacturer lubricating instructions.
4 Check machine operation	4.1 Machine is checked to ensure correct operation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Demonstrates knowledge of:

- procedures and guidelines for safe operation of machines
- typical fault conditions and related fault finding procedures
- basic machine maintenance and repair techniques
- technical specifications manuals
- quality standards and practices
- OHS practices, including hazard identification and control measures
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- assess operating performance of machine
- start and stop machines according to specifications
- monitor machine operations, including machine production readings
- recognise fault conditions
- rectify minor machine faults or problems as required
- read, interpret and follow information on work specifications, standard operating procedures and work instructions, and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence	<p>Demonstrates skills and knowledge to:</p> <ul style="list-style-type: none"> • operate machines correctly • monitor machine performance against machine specifications • make minor adjustments • complete records accurately and completely • apply OHS practices in work operations
Consistency in performance	<p>Consistently applies skills and knowledge when:</p> <ul style="list-style-type: none"> • organising work • completing tasks according to instructions • working systematically with attention to detail • identifying improvements and avoiding damage • using workplace practices • using OHS practices • recording and reporting accidents and incidents • assessing operational readiness of equipment • recognising and adapting to cultural differences in the workplace, • including modes of behaviour and interactions
Resource implications	<p>Access is required to real or appropriately simulated situations, including work areas, materials and equipment, and to information on workplace practices and OHS practices.</p>
Context for assessment	<p>Assessment may occur on the job or in an appropriately simulated environment.</p>
Interdependent assessment	<p>This unit may be assessed independently or in combination with other relevant units.</p>

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions

that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

OHS practices OHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may relate to:

- manual handling techniques
- standard operating procedures
- personal protective equipment
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

Unit Sector(s)

Sector All

LMTGN4012A Fabricate or machine tooling

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to fabricate and machine tooling for applications within an enterprise.

Application of the Unit

Application of the Unit This unit applies to activities associated with the forming and shaping of tools. Discretion and judgement may be required, for both self and others, in planning and selecting processes, procedures or outcomes.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

This unit is applied according to workplace and OHS practices of the enterprise, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team/section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with communication, in interpreting tool specifications and planning and organising for safe and effective use of specialised tool technology and operations.

This unit also requires an ability to check the quality of outcomes

and to identify and address problems relating to own work.

Initiative, enterprise and problem solving will be used to combine materials and processes to achieve desired design outcomes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine tooling requirements	1.1 Tooling requirements, measurements and limitations are determined relative to design specifications provided 1.2 Clarification related to tooling application is sought, where required
2 Select and set up equipment for operation	2.1 Appropriate machines and equipment are selected for the tasks 2.2 Machines and equipment are prepared and adjusted as necessary for operation according to standard operating procedures
3 Form or shape tool	3.1 Tooling material is selected, marked or otherwise prepared for fabrication and machining 3.2 Allowances are made for shrinkage, thicknesses, templates, gauges and inside or outside measurements where required 3.3 Fabrication or machining procedures are assessed in accordance with OHS practices and workplace procedures

ELEMENT**PERFORMANCE CRITERIA**

3.4 Completed tooling is checked for conformance to design specifications

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

Demonstrates knowledge of:

- procedures for set up and operation of machinery
- procedures for forming and shaping
- relevant standards
- quality requirements
- materials used in footwear production
- safety and environmental aspects of relevant enterprise activities
- workplace procedures and reporting processes
- relevant OHS legislation and codes of practice
- OHS practices, including hazard identification and control measures
- recording and reporting practices

Demonstrates skills to:

- apply appropriate technical skills
- check outcomes against quality standards and specifications
- monitor performance
- apply relevant safety practices when working in the industry
- maintain records, document and transfer information
- read, interpret and follow information on work specifications, , standard operating procedures and work instructions and other reference material
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence to be considered	<p>Demonstrates skills and knowledge to:</p> <ul style="list-style-type: none"> • establish tooling requirements • operate machines or equipment appropriately • fabricate or machine tooling accurately • liaise with engineer or external supplier • communicate effectively with design team, customers, etc. • apply workplace health and safety policies in work operations • maintain accurate records
Consistency in performance	<p>Consistently applies skills and knowledge when:</p> <ul style="list-style-type: none"> • organising work • completing tasks • identifying improvements • using workplace practices • using OHS practices • recording and reporting accidents and incidents • assessing operational readiness of equipment used and work processes • recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions • completing work systematically with attention to detail without damage to goods and equipment
Resource implications	Access is required to real or appropriately simulated situations, including work areas, materials and equipment, and to information on workplace practices and OHS practices.
Context for assessment	Assessment may occur on the job or in an appropriately simulated environment.
Interdependent assessment	This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

Tooling may include:

- cutting knives
- punch dies

OHS practices OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:

- manual handling techniques
- standard operating procedures
- personal protective equipment
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector All

LMTTF2009A Identify and select canvas and sail materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to identify and select appropriate materials for use in the manufacture of canvas or sail products.

Application of the Unit

Application of the Unit This unit applies to the identification, selection and handling of materials and checking of stock availability. Work may involve interaction with other people in the workplace including supervisors and production personnel. Work may be conducted in a variety of environments, such as:

- operational indoor workplaces
- operational outdoor workplaces

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with problem

solving to identify materials and determine appropriateness for job specifications. This unit also requires planning and organising for efficient material use. Communication skills are applied to interpreting labelling and identification information of material. Self management skills are applied to ensure workplace and quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify materials	<p>1.1 Materials are identified by appearance, texture, density, stock labels and product codes</p> <p>1.2 Stock labels or tags are checked against product codes and manufacturer specifications to confirm correct identification</p> <p>1.3 Workplace procedures and instruction are read and interpreted</p>
2 Select materials	<p>2.1 Materials are selected in accordance with job specifications, fitness for purpose and work order instructions</p> <p>2.2 Materials stocks are checked to ensure availability of sufficient quantities of materials to meet job requirements</p> <p>2.3 Materials are checked to ensure they conform to specifications, descriptions and relevant quality standards</p>

ELEMENT	PERFORMANCE CRITERIA
3 Handle and store materials	2.4 Knowledge of materials are applied to perform required tasks
	3.1 Appropriate <i>OHS practices</i> and work practices are followed when examining stock in racks or shelves
	3.2 Safe working practices are followed when handling or moving stock
	3.3 Appropriate lifting equipment is used to lift heavy or awkward loads
	3.4 Appropriate posture and lifting techniques are used for manual handling of materials
	3.5 Assistance in handling materials is sought when necessary
	3.6 Materials are stored in accordance with workplace practices and manufacturer recommendations

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

- product construction principles and methods
- characteristics of a wide range of materials used in the canvas and sail industry
- industry applications of various materials
- relative advantages and disadvantages of various materials for particular applications
- joining characteristics of various materials
- materials labelling principles and practices including 'care' labelling
- standard industry practices for storage and handling of materials
- relevant materials quality standards
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- locate and interpret technical information about materials used in the canvas and sail industry
- identify materials by appearance, texture, density and other relevant characteristics
- use relevant chemicals and cleaning agents and dispose of waste products

This describes the essential skills and knowledge and their level required for this unit.

- maintain work area
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe handling and storage of materials
- interpret work orders
- interpret materials specifications and instructions for storage, handling and use
- correctly identify a range of materials used in the industry
- correctly handle a range of materials used in the industry
- select appropriate materials to meet specified job requirements
- perform normal operator maintenance of work area to enable identification selection and storage of materials to be undertaken safely and efficiently
- document and communicate work related information including reporting of shortages, stock irregularities and other problems

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

Materials may include

- fibres and yarns used in canvas and sail making
- ropes
- dacron, nylon and composite sail cloths
- attachments (metal and on metal)
- adhesives

OHS practices OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:

- manual handling techniques
- standard operating procedures
- personal protective equipment

- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

LMTTF2014A Weld plastic materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to weld plastic materials within the safe operating parameters of the equipment used.

Application of the Unit

Application of the Unit This unit applies to hot air and hot wedge welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as:

- operational indoor workplaces
- operational outdoor workplaces
- hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with planning and organising for the safe and effective use of welding processes and technology. This unit also requires an ability to interpret and

communicate job related information, check the quality of outcomes and identify and address problems relating to own work. Self management skills are applied to ensure workplace and quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select welding process and plan the work	1.1 Nature of <i>material</i> to be welded is determined and an appropriate welding process is selected 1.2 Work is planned to maximise safety and productivity 1.3 Suitable electrical power outlets, if required, are identified 1.4 Safe working environment is established 1.5 Workplace procedures and instructions are read and interpreted
2 Prepare welding equipment	2.1 Appropriate hand-held or stationary manual <i>welding equipment</i> is selected 2.2 Welding equipment is checked for serviceability 2.3 Correct 'power on' procedures are followed
3 Select, use and store tools	3.1 Appropriate supplementary <i>hand and power tools</i> are selected for the job

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2 Tools are examined for damage, missing components or other defects (including frayed power cords where applicable)</p> <p>3.3 Extension power cables are checked for knots and insulation damage</p> <p>3.4 Electrical tools are connected safely to power supply</p> <p>3.5 Safety equipment is used during tool operation in accordance with <i>OHS practices</i></p> <p>3.6 Required tasks are performed using tools in accordance with OHS practices</p> <p>3.7 Tools are located in a safe position when not in use</p> <p>3.8 Tools and extension cords are cleaned and stored in accordance with industry and workplace OHS practices</p>
4 Perform welding	<p>4.1 Surfaces of material are prepared for welding</p> <p>4.2 Material is laid out on working table or other suitable surface</p> <p>4.3 Material is anchored to prevent movement</p> <p>4.4 Equipment temperature is adjusted to prescribed settings</p> <p>4.5 Screens or barriers, where fitted, are lowered prior to welding process</p> <p>4.6 Welding equipment is operated in accordance with standard practice</p> <p>4.7 Weld area is examined or tested for correct fusion of materials</p> <p>4.8 Work piece is removed</p> <p>4.9 Knowledge of welding processes are applied to perform required tasks</p>
5 Inspect quality, labelling and documentation	<p>5.1 Completed weld is informally inspected to verify that it appears to be of an acceptable standard</p> <p>5.2 Completed product is labelled or tagged and any necessary documentation completed in accordance with workplace procedures</p>
6 Clean up and maintain equipment	<p>6.1 Work area is cleaned and tools and electrical equipment are stowed away</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

This describes the essential skills and knowledge and their level required for this unit.

- specific OHS requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources such as single phase, three phase and weather protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- apply work instructions and established procedures
- understand relevant technical information about plastic welding processes, materials and equipment
- use relevant hand and power tools
- use relevant chemicals and cleaning agents and dispose of waste products
- maintain work area
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe use of plastic welding equipment, hand and power tools and electrical equipment.
- follow work orders
- understand equipment and materials specifications and instructions needed for the plastic welding process
- prepare material to be welded and set up welding equipment
- perform a variety of welds with a satisfactory degree of quality consistency
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- document and communicate work related information including reporting of faults and other problems

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents
- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment

Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment

This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

Material may include

- PVC
- vinyls
- clear plastics

Welding equipment may include

- foot controlled welder
- hand welder
- hot air welder
- hot wedge welder

Hand and power tools may include

- hammers
- rasps
- files
- portable sanders

OHS practices OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:

- manual handling techniques
- standard operating procedures
- personal protective equipment
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

LMTTF2016A Install products on and off site

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to install canvas and sail products both on site and off site.

Application of the Unit

Application of the Unit This unit applies to the installation, operation and maintenance of canvas and sail products and equipment both on and off site. Work may be conducted in a variety of environments, such as:

- operational indoor workplaces
- operational outdoor workplaces
- restricted or confined spaces
- hazardous or exposed conditions including working aloft using scaffolding, cherry picker and bosun's chair

Work may require independence, discretion, judgement and acceptance of responsibility for overall work outcomes. Work may involve planning and coordination of tasks and processes, interaction with other enterprise personnel, enterprise clients, manufacturers' representatives and other external personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output

- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with planning and organising for the safe and effective installation of canvas and sail products, as well as the application of installation technology. This unit also requires the ability to apply problem solving strategies to identify and rectify installation problems, interpret and complete workplace documentation and communicate product information to customers. Self management skills are applied to ensure workplace and quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Prerequisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare site	1.1 Workplace procedures and instructions are read and interpreted, including interpretation of drawings and technical information to guide installation 1.2 Sequence of task operations is planned 1.3 Suitable electrical power outlets are identified 1.4 Ladders, steps or bosun's chair are set up as required

ELEMENT	PERFORMANCE CRITERIA
2 Select, use and store tools	1.5 Additional assistance, if required, is arranged
	1.6 Site for service provision is prepared
	2.1 Appropriate tools are selected for the job
	2.2 Tools are inspected for damage, missing components or other defects (including frayed power cords where applicable) prior to use
	2.3 Safe working environment for tool use is established
	2.4 Extension power cables are checked for knots and insulation damage and are safely supported when working overhead
	2.5 Electrical tools are safely connected to power supply
	2.6 Safety equipment is used in accordance with OHS practices
	2.7 Tools are used in accordance with OHS practices
	2.8 Tools are located in a safe position when not in use
3 Use ladder, steps, bosun's chair or other device	2.9 Tools and extension cords are cleaned and stored in accordance with industry and workplace OHS practices
	3.1 Ladders or other devices such as steps or bosun's chair are appropriately selected for the tasks
	3.2 Ladder or other device is secured and adequately supported
	3.3 Appropriate barriers and signs are erected when working overhead
4 Fit products	3.4 Assistance is used as necessary when working above the ground or deck
	4.1 Appropriate marking tools and measuring equipment are used to mark out fitting positions
	4.2 Products to be installed are checked to ensure they meet specifications and are fit for their intended purpose
	4.3 Appropriate ladders or other devices are used to gain height advantage
	4.4 Appropriate tools are used to drill and prepare locating holes
	4.5 Products are safely lifted or lowered into position
	4.6 Appropriate fastenings are used to attach or anchor product
	4.7 Pulleys or sheave blocks are fitted
	4.8 Ropes or cables are threaded or attached as necessary and stays or other fastenings are fitted
	4.9 Work area is cleaned up after fitting
	4.10 Appropriate OHS precautions are applied during all phases of the task
	4.11 Knowledge of fitting products are applied to perform required tasks
	4.12 Work is conducted in cooperation with other team members as

ELEMENT	PERFORMANCE CRITERIA
	required
5 Inspect and check quality	5.1 Completed work is inspected to verify that the products and installation work meet job specifications and relevant workplace and industry quality standards 5.2 Products are checked for correct fit, correct installation and correct operation after installation 5.3 Rework or rectification requirements are determined 5.4 Rework or rectification is performed or other appropriate action is taken
6 Demonstrate and provide customer information	6.1 Product use and operating information is supplied to customer 6.2 Product is demonstrated to customer 6.3 Customer questions are answered
7 Clean up	7.1 Work area is cleaned up 7.2 Tools, ladders, bosun's chair or other equipment is cleaned and stowed away 7.3 Project documentation is completed 7.4 Customer signature is obtained, if required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

- electrical and general workplace hazards and means of identifying them
- operating principles of products and associated equipment to be installed
- the range of hand tools, power tools, measuring devices and other equipment used in the installation process, and their operating principles and appropriateness for particular applications
- power sources such as single phase, three phase and weather protected outlets
- format of product and equipment specifications
- setting and adjustment principles and processes for products and equipment being installed
- comprehensive knowledge of typical problems of products and associated equipment and their rectification procedures
- relevant product quality standards for products and equipment installed
- environmental requirements of relevant industry and workplace procedures including use of equipment for working aloft

This describes the essential skills and knowledge and their level required for this unit.

- general housekeeping policies and procedures
- mathematical processes used in the installation and checking processes
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- locate and interpret technical information about products and their installation
- read an engineering plan for the installation of shade sail structures, plan site schedule and lay out site
- use relevant hand and power tools
- use equipment for working aloft such as extension ladders, scaffolding, cherry picker and bosun's chair
- use lubricants, adhesives, sealants, chemicals and cleaning agents and dispose of waste products
- maintain work area
- identify electrical and workplace hazards
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe use of ladders, bosun's chair, load hoisting equipment and electrical equipment
- interpret work orders, drawings and installation instruction

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

- unit**
- interpret product, and equipment specifications needed for installation and operation
 - perform normal installation and setting of products and equipment
 - inspect and test operation of installed products and equipment
 - specify any rectification necessary
 - perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
 - document and communicate work related information including reporting of faults and other problems which do not fall within the operator's province

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents
- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.

Products may include

- blinds
- awnings
- annexes
- sails

Tools may include

- hand tools such as:
- hammers
- punches
- hand drills
- saws
- hacksaws
- rasps
- wire brushes
- pop-rivets
- expanding bolts
- power tools such as:
- portable electric drills
- routers
- portable sanders
- abrasive disk cutting equipment
- electric punches

OHS practices OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:

- manual handling techniques
- standard operating procedures
- personal protective equipment
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

LMTTF3004A Perform advanced welding of plastic materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit covers the skills and knowledge required to perform high frequency welding of plastic materials using equipment within the safe operating parameters of the equipment used.

Application of the Unit

Application of the Unit This unit applies to the welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as:

- operational indoor workplaces
- operational outdoor workplaces
- hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

The application of this unit is according to OHS practices of the enterprise and workplace practices, which may include:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling

This unit requires the application of skills associated with planning and organising for the safe and effective use of advanced welding

processes and technology. This unit also requires the ability to read and interpret workplace instructions, inspect and check the quality of outcomes, complete workplace records and identify and address problems relating to own work. Self management skills are applied to ensure workplace and quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites LMTTF2014A

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for welding	1.1 Material to be welded is examined and prepared for welding 1.2 Work is planned to maximise safety and productivity 1.3 Suitable electrical power outlets, if required, are identified 1.4 Safe working environment is established and welding equipment checked for serviceability 1.5 Workplace procedures and instructions are read and interpreted
2 Select and prepare tools	2.1 Appropriate supplementary hand and power tools are selected and prepared for the job 2.2 Extension power cables are checked for knots and insulation damage 2.3 Electrical tools are checked for safe connection to power supply

ELEMENT	PERFORMANCE CRITERIA
3 Perform high frequency welding	2.4 Tools are examined for damage, missing components or other defects (including frayed power cords where applicable)
	2.5 Safety equipment is used during tool operation in accordance with <i>OHS practices</i>
	2.6 Required tasks are performed using tools in accordance with OHS practices
	2.7 Tools are located in a safe position when not in use
	2.8 Tools and extension cords are cleaned and stored in accordance with industry and <i>OHS practices</i>
	3.1 Surfaces of material are prepared for welding
	3.2 Material is laid out on working table or other suitable surface and anchored to prevent movement
	3.3 Equipment temperature or operating frequency is adjusted to prescribed settings
	3.4 Screens or barriers, where fitted, are lowered prior to welding process
4 Inspect quality, labelling and documentation	3.5 Operator and bystanders are kept at an appropriate distance or suitably protected when high frequency welding is being undertaken
	3.6 Welding equipment is operated in accordance with OHS practices
	3.7 Weld area is examined or tested for correct fusion of materials
	3.8 Problems or faults are identified and addressed
	3.9 Work piece is removed
5 Clean up and maintain equipment	4.1 Completed weld is informally inspected to verify that it appears to be of an acceptable standard
	4.2 Completed product is labelled or tagged and any necessary documentation completed in accordance with workplace procedures
5 Clean up and maintain equipment	5.1 Work area is cleaned and tools and electrical equipment are stowed away

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Demonstrates knowledge of:

This describes the essential skills and knowledge and their level required for this unit.

- specific OHS requirements associated with high frequency welding equipment
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources such as single phase, three phase and weather protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- OHS practices, including hazard identification and control measures
- quality practices
- workplace practices
- recording and reporting practices

Demonstrates skills to:

- apply work instructions and established procedures
- understand relevant technical information about plastic welding processes, materials and equipment
- use relevant hand and power tools
- use relevant chemicals and cleaning agents and dispose of waste products
- maintain work area
- read, interpret and follow information on work specifications, standard operating procedures and work instructions and other reference material
- maintain accurate records
- communicate within the workplace
- sequence operations
- meet specifications
- clarify and check task-related information
- carry out work according to OHS practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrates skills and knowledge to:

- comply with all relevant safety requirements including safe use of high frequency welding equipment, hand and power tools and electrical equipment.
- follow work orders
- understand equipment and materials specifications and instructions needed for the plastic welding process
- prepare material to be welded and set up welding equipment
- perform a variety of welds with a satisfactory degree of quality consistency
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- document and communicate work related information including reporting of faults and other problems

Consistently applies skills and knowledge when:

- organising work
- completing tasks
- identifying improvements
- using workplace practices
- using OHS practices
- recording and reporting accidents and incidents
- assessing operational readiness of equipment used and work processes
- recognising and adapting to cultural differences in the workplace, including modes of behaviour and interactions
- completing work systematically with attention to detail without damage to goods and equipment

Context and specific resources for assessment

Assessment may occur on the job or in an appropriately simulated environment and requires access to work areas, materials and equipment, and to information on workplace practices and OHS practices.

Guidance information for assessment

This unit may be assessed independently or in combination with other relevant units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative/regulatory requirements	All work must comply with relevant Federal and State or Territory legislative or regulatory requirements.
Material may include	<ul style="list-style-type: none"> • PVC • vinyls • clear plastics
Welding equipment may include	<ul style="list-style-type: none"> • high frequency welder
Hand and power tools may include	<ul style="list-style-type: none"> • hammers • rasps • files • portable sanders
OHS practices	<p>OHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and may include:</p> <ul style="list-style-type: none"> • manual handling techniques • standard operating procedures • personal protective equipment • safe materials handling • taking of rest breaks • ergonomic arrangement of workplaces • following marked walkways • safe storage of equipment • housekeeping • reporting accidents and incidents • other OHS practices relevant to the job and enterprise

Unit Sector(s)

Sector Textile Fabrication

MEM05003B Perform soft soldering

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit applies to performing soft soldering applications of ferrous and non-ferrous materials, using straightforward techniques, where heat damage to components or finish of soldered joint is not critical.
------------------------	--

Application of the Unit

Application of the unit	<p>All work is undertaken to predetermined standards of quality, safety and procedures.</p> <p>Techniques of applying soft solder may include the use of soldering irons (all types) and direct flame or other heating devices. Preparation of materials includes cleaning, deburring, twisting of conductors and fluxing.</p> <p>Depending on the actual soldering job, hand and power tools and drawing and interpretation skills may be required. These are covered by units MEM18001C (Use hand tools), MEM18002B (Use power tools/hand held operations) and MEM12023A (Perform engineering measurements).</p> <p>This unit should not be selected if Unit MEM05001B (Perform manual soldering/desoldering - electrical/electronic components) or Unit MEM10002B (Terminate and connect electrical wiring) has already been selected.</p> <p>Band: A</p> <p>Unit Weight: 2</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify job requirements	1.1.Soldering requirements are identified and correctly understood from job sheets or instructions.
2. Undertake soft soldering	2.1.Tools, equipment and consumables appropriate to the task are assembled and prepared for use as required. 2.2.Materials to be soldered are prepared, arranged and checked as required, to ensure solder joint meets specifications.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Correct techniques are used to apply soft solder to standard operating procedures.</p> <p>2.4. Solder joint is cleaned and checked for conformance to specifications using standard operating procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- using soldering irons
- using direct flame and other heating devices
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction

Required knowledge

Look for evidence that confirms knowledge of:

- the effect of material to be soft soldered on the selection of consumables
- the reasons for preparing surfaces prior to soldering
- the procedures for rectifying defects in soldered joints
- use and application of personal protective equipment for soft soldering
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform soft soldering.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication materials handling, recording and reporting associated with performing soft soldering or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tools	Soldering irons (all types) and direct flame or other heating devices
Materials	Ferrous and non-ferrous

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification.

ELEMENT	PERFORMANCE CRITERIA
	2.9.Shape/size/length is to accepted workplace standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment

REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.

EVIDENCE GUIDE**Method of assessment**

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Guidance information for assessment**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Correct electrodes are selected to suit application and settings.
4. Perform routine welding using MMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

Required knowledge

Look for evidence that confirms knowledge of:

- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties
- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take samples	1.1. Difference between population and sample is understood and various sampling schemes are applied in accordance with standard operating procedures.
2. Apply statistical process to monitor production	2.1. Concept of variation in terms of average and spread is understood. Data is used to produce relevant statistical information. 2.2. Data is interpreted accurately and information is presented to appropriate authority according to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, standard operating procedures, charts, lists, drawings and other applicable reference documents
- applying statistical process control procedures in accordance with instructions to a given production process
- obtaining data from samples including average, range and random or assignable causes
- producing tally, run or control charts from sampling data
- reporting information from sampling data
- checking and clarifying task-related information
- completing proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- the difference between population and sample, and the concept of variation in terms of average and range, random and assignable causes
- numerical operations and statistical calculations/formulae within the scope of this unit
- statistical process control procedures, which may include Six Sigma etc. and the sampling procedures to be followed
- the types of charts that can be produced to assist monitoring of products including run charts, tally charts, histograms, control charts
- procedures for reporting sample data information
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must

EVIDENCE GUIDE	
	be able to perform basic statistical quality control.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing basic statistical quality control or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access information and/or records	1.1.Information requirements of tasks are determined and relevant information is accessed from a range of sources. 1.2.Workplace terminology is correctly recognised.
2. Organise and analyse information	2.1.Information is interpreted and organised in accordance with enterprise and work requirements. 2.2.Information is analysed according to enterprise and work requirements.
3. Communicate organised information using established workplace methods	3.1.Information is communicated using established workplace methods.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- accessing relevant information from a range of sources
- recording, where appropriate, the accessed information
- recognising and using workplace terms
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information

Required knowledge

Look for evidence that confirms knowledge of:

- types of information
- available sources of information
- information analysis techniques
- methods of categorising and organising information
- methods of recording and communicating information

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify roles and responsibilities	1.1. Own role and responsibilities are identified. 1.2. Relationships within immediate group and with employees performing related/interdependent activities are identified.
2. Plan activities	2.1. Common goals, objectives and task requirements are identified and clarified with appropriate persons. 2.2. Individual tasks are determined and agreed on according to workplace procedures.
3. Work with others	3.1. Effective interpersonal skills are applied to interact with others and to contribute to activities and objectives. 3.2. Assigned or agreed tasks are performed in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with agreed requirements, specifications and workplace procedures.</p> <p>3.3. Work progress is reviewed and modified as agreed to complement the work of others.</p> <p>3.4. Agreed reporting lines are followed using standard operating procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- contributing to planning and allocation of work
- performing assigned tasks
- coordinating work effort with others
- following agreed reporting lines
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- applying effective interpersonal skills

Required knowledge

Look for evidence that confirms knowledge of:

- effective interpersonal strategies and skills:
 - effective listening
 - basic speaking skills
 - use of terminology and jargon
 - giving and receiving feedback
 - checking and clarifying task-related information
 - interpreting instructions
 - basic conflict resolution
 - selecting modes and methods of communication
 - identifying and resolving communication breakdowns and barriers
 - principles of effective communication

REQUIRED SKILLS AND KNOWLEDGE

- relationships and roles within immediate group and with interdependent others
- reporting relationships and procedures
- own responsibilities with respect to products/services to be provided
- skills and competencies of the individual and other employees performing interdependent activities
- common goals, objectives and task requirements
- sources of technical expertise/assistance
- appropriate forms of communication
- hazards and control measures associated with workplace activities, including housekeeping
- safe work practices and procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent
---	---

	with the evidence guide.
--	--------------------------

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify team function and composition	1.1. Team purpose and scope are identified and understood. 1.2. Team composition, including role of self and team members, is understood. 1.3. Established parameters, rules and team norms are identified and understood.
2. Participate in team planning	2.1. Significant contribution is made to planning the team activities, based on the individual's technical skills, knowledge and competence. 2.2. Contribution is made to the allocation and performance of team tasks.
3. Function effectively as a team member	3.1. Interaction with team members is in accordance with established rules, conventions and procedures. 3.2. Tasks and responsibilities are performed effectively and in accordance with team objectives. 3.3. Real or perceived issues are resolved by effective and appropriate contributions from team member. 3.4. Significant contribution is made to team performance, based on member's own technical skills and application of established principles and practices for effective teamwork.
4. Monitor and review team performance	4.1. The team member participates effectively in the planning and development of team review process. 4.2. Relevant performance data is collected and analysed on an individual and team basis using standard enterprise procedures and methodology. 4.3. Results are used to evaluate own and team performance against established performance indicators and to assist determination of improvement requirements. 4.4. Principles/techniques for effective team development are used to identify own/team improvement strategies.
5. Implement team performance	5.1. Performance improvement processes and strategies are implemented on an individual and collective basis

ELEMENT	PERFORMANCE CRITERIA
improvements	<p>using standard enterprise procedures.</p> <p>5.2. Individual and team performance improvements are evaluated using standard enterprise procedures.</p> <p>5.3. Adjustments to improvement strategies are made in accordance with team requirements and standard enterprise procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- identifying team goals and objectives
- participating in team planning - shared and individual
- allocating tasks and sequencing activities
- communicating and interacting effectively with team members
- solving problems individually and with others
- resolving conflict
- performing various team behavioural functions - task and maintenance focused
- making individual and joint decisions
- coordinating effort with others to achieve common objectives
- collecting team performance data
- reviewing performance against indicators
- identifying strategies to improve team performance
- implementing performance improvement processes
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- checking and clarifying task-related information
- checking for conformance to specifications

Required knowledge

Look for evidence that confirms knowledge of:

- team objectives
- team targets/goals, performance indicators

REQUIRED SKILLS AND KNOWLEDGE

- team member roles - task and behavioural
- team processes, rules and conventions
- scope of work for which the team is responsible
- methods for planning team activities
- team member technical skills, knowledge and competence, relevant to the tasks being planned
- the person(s) responsible for team planning
- impact of planning decisions on other teams, personnel and/or resources
- procedures for obtaining resources
- structure, formation and operation of teams
- characteristics of effective teams
- strategies for effective team development/functioning
- effective team communication
- forms of team leadership and decision-making
- strategies for resolving conflict
- techniques for team problem-solving
- issues that may affect team performance
- the sources of data relevant team performance indicators
- reasons for reviewing team performance
- methods/procedures to evaluate team performance
- where appropriate, source(s) of approval to change team performance parameters
- processes/strategies for improving team performance
- hazards and control measures associated with operating in a self-directed team environment, including housekeeping
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to operate within a self-directed team. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with operating within a self-directed team or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Team

- A highly developed and cohesive work group in which the individuals have a common aim, and in which the jobs and skills of each member fit in with those of others
- Team members manage day-to-day activities within operating parameters and constraints
- The team is typically characterised by interdependent and complementary effort, high cohesion and culture, conjunctive tasks, effective use of team resources and a focus on continuous improvement
- The team may have a single leader or shared leadership

Principles and practices for effective teamwork

Relating to:

- goals
- problem solving
- resolving conflict
- team leadership
- team decision making
- team rules and norms
- team roles and behaviours
- team maintenance

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use hand tools	<p>1.1. Hand tools are selected appropriate to the task requirements.</p> <p>1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use.</p> <p>1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Guidance information for assessment

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Hand tools	Hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and types
Job specifications	Finish, tension, size or shape etc.
Routine maintenance	Cleaning, lubricating, tightening, simple tool repairs, hand sharpening and adjustments using engineering principles, tools, equipment and procedures

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret enterprise maintenance strategy	1.1.Objectives and details of enterprise maintenance strategy are obtained in accordance with enterprise procedures. 1.2.Major techniques and tools for monitoring are confirmed in consultation with key stakeholders and supervisor.
2. Use preventative maintenance techniques and tools	2.1.Techniques and tools are selected and confirmed in consultation with key stakeholders and supervisor in accordance with enterprise requirements. 2.2.Key information and performance indicators required are identified in consultation with key stakeholders and supervisor. 2.3.Data collection is undertaken as required.
3. Interpret results	3.1.Actual information/performance indicators are compared with target levels set by supervisors and/or equipment manufacturers. 3.2.Required adjustments are developed in consultation with key stakeholders and supervisor.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- conducting root cause analysis
- identifying mean time between failures
- basic analysis of the effects of failures
- conducting condition monitoring
- analysing
- assessing
- communicating
- problem solving
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking for conformance to specifications
- checking and clarifying task-related information

Required knowledge

Look for evidence that confirms knowledge of:

- characteristics and strengths of different types of strategies
- characteristics and strengths of different types of techniques and tools
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them
- hazard and control measures associated with using basic preventative maintenance techniques and tools, including housekeeping
- use and application of personal protective equipment
- safe work practices and procedures

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and apply quality standards and procedures	1.1. Quality standards and procedures are interpreted and applied to individual and teamwork in accordance with standard operating procedures.
2. Monitor and report on quality	2.1. Quality of all received, in-work and finished materials and products is monitored as required in accordance with standard operating procedures. 2.2. Designated process improvement tools are used either individually or in a team to identify and solve design, development and production quality problems. 2.3. Designated analytical tools are used to evaluate principal causes of process variation in consultation with the team or other subject experts. 2.4. Further action to improve quality is recommended, where required, using standard operating procedures.
3. Assist in implementing approved improvement strategy or strategies	3.1. Key indicators and performance measures are established and agreed in consultation with the team or other subject experts. 3.2. Process, product output is measured against key indicators in consultation with the team or other subject experts. 3.3. Steps are taken to lock in improvements in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- undertaking problem solving
- undertaking basic arithmetic calculations
- interpreting known data
- using standard texts and references
- undertaking simple report writing
- reading and interpreting engineering specifications

Required knowledge

Look for evidence that confirms knowledge of:

- the importance of quality
- the key principles of quality improvement programs
- the influence of variation
- use and application of Australian standards/ ISO 9000 etc.
- quality policy
- quality manuals
- quality procedures
- quality definitions
- purpose of quality audits
- simple sampling techniques and possible sources of sampling error and bias
- simple statistical tools
- problem solving techniques including:
 - process flow charts, interpretation and construction of simple case
 - cause and effect diagrams, fault trees etc.
 - root cause analysis
 - Pareto diagrams

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to participate in quality assurance techniques - basic. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with participating in quality assurance techniques - basic, or other units requiring the exercise of the skills and knowledge covered by this unit.

Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply functions of computer-aided design (CAD) software programs that are typically used in the production of detail drawings.

Application of the Unit

This unit is suitable for those working within a CAD or drafting work environment and may be applied across engineering and manufacturing environments. It covers competent use of a CAD program to perform basic drawing tasks used in the development of detail drawings. Drawings may include plans, diagrams, charts, circuits, systems or schematics.

This unit includes using computer equipment and selecting software functions in order to generate basic drawing elements.

Work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm drawing requirements	1.1	Confirm purpose, scope, and information and presentation requirements for drawing
		1.2	Review available information relevant to project and work requirements, and identify and address further information needs
		1.3	Identify computing equipment and software used in the organisation
		1.4	Identify work flow and procedures for work supervision
		1.5	Examine requirements for presentation of drawings
2	Identify key features of CAD software	2.1	Describe types of CAD software used for detail drafting, their key features and suitability for producing specific drawing outcomes
		2.2	Describe types of CAD software used for design drafting, their key features and suitability for producing specific drawing outcomes
		2.3	Identify differences in CAD process to generate 2-D drawings and 3-D models, and reasons for each presentation
		2.4	Identify differences in CAD process to generate single and multiple view drawings, and reasons for each presentation
		2.5	Identify CAD software used in the organisation and confirm compatibility with other software programs and peripheral equipment
		2.6	Identify software features for linked specifications, catalogues or materials ordering
3	Access software and set up for	3.1	Open software and navigate organisational filing and library system

	drawing work	3.2	Identify organisational and software templates and determine uses
		3.3	Identify organisational symbols, codes and standards to be applied in drafting work and how these are accessed and applied
		3.4	Apply workplace procedures to retrieve and manipulate required information and navigate computing technology
		3.5	Set up working environment
4	Produce basic drawing elements	4.1	Use CAD functions to produce basic drawing elements
		4.2	Use editing and transfer tools and methods to modify drawing elements
		4.3	Apply dimensions, text and symbols to drawing elements
		4.4	Import and export files into/out of working space
		4.5	Generate different views and perspectives
		4.6	Organise presentation of work
5	Complete CAD operations	5.1	Save and file drawing elements according to organisational procedures
		5.2	Print drawing elements and evaluate presentation
		5.3	Evaluate work and identify areas for improvement
		5.4	Close applications, perform CAD housekeeping and maintain organisational filing system

Required Skills and Knowledge

Required skills

Required skills include:

- literacy skills sufficient to read instructions for drawings work

- using computer technologies and navigating software
- numeracy skills sufficient to interpret technical information and determine scaling and layout issues
- navigating software to:
 - manipulate drawing entities
 - modify dimension styles
 - create and use layers
 - manipulate the drawing origin
 - define and utilise symbol libraries
 - utilise grids/grid snaps and object snaps
 - display views at multiple scales
 - add title blocks/frame to layout a drawing for printing
 - prepare advanced drawings in plane orthogonal or equivalent
 - set up prototype drawings
 - define and extract attribute data
 - create bills of materials (BOM) utilising attribute data and third-party application software

Required knowledge

Required knowledge includes:

- general knowledge of different approaches to drawing
- awareness of copyright and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety (OHS) issues associated with the tools and materials used for drawing
- quality assurance procedures
- CAD program capabilities and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to use CAD software to produce graphics commonly used in drafting work.
Critical aspects for assessment and evidence required to demonstrate competency in this	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required

unit	<p>knowledge, and be capable of applying the competency in new and different situations and contexts.</p> <p>Specifically the candidate must be able to:</p> <ul style="list-style-type: none">• work within typical site/teamwork structures and methods• apply worksite communication procedures• comply with organisational policies and procedures, including quality requirements• participate in work meetings• comply with quality requirements• use industry terminology• apply appropriate safety procedures• identify drawing work requirements and determine appropriate software functions and features• identify features and uses of CAD software used in detail and design drafting• access and use computing equipment and CAD software functions to produce drawing elements.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with drafting or other units requiring the exercise of the skills and knowledge covered by this unit.</p>

Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways, including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

MEM30033A Use computer-aided design (CAD) to create and display 3-D models

Modification History

Release 1 - New unit of competency

Unit Descriptor

This unit of competency covers using a computer-aided design (CAD) program to produce and plot basic 3-D view drawings.

Application of the Unit

This unit applies to the production of 3-D models using CAD software and associated equipment. This will include the use of region and solid modelling techniques, section views and pre-drawn library files. Work also includes extraction of properties and application of basic rendering techniques.

All work is conducted under supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-Requisites

MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm drawing requirements	1.1	Confirm purpose, scope and information and presentation requirements for drawing
		1.2	Identify, interpret and analyse available information relevant to project and work requirements, and identify and address further information needs
		1.3	Identify computing equipment and software used in the organisation
		1.4	Identify work flow and procedures for work supervision and confirm communication requirements through project
		1.5	Examine requirements for presentation of drawings
2	Create and display 3-D views	2.1	Set up a 3-D environment on the screen to allow multiple viewing
		2.2	Create 3-D views on the screen by manipulation of drawing planes and insertion of 3-D geometric shapes
		2.3	Draw on any plane of the 3-D view
		2.4	Use editing functions to modify 3-D geometric shapes in creating 3-D views
		2.5	Produce wire line, surface and solid face displays in isometric, perspective and orthographic projections
3	Detail 3-D model	3.1	Extract the mass and surface area of a given solid model made from a nominated material
		3.2	Apply basic rendering techniques to render solid model to a specified set of criteria
4	Save completed	4.1	Save file in an appropriate format to enable retrieval and

drawing file in
various formats

- 4.2 use in a CAD system
- 4.2 Save file in other formats to enable retrieval in other software applications

Required Skills and Knowledge

Required skills

Required skills include:

- reading and interpreting engineering specifications
- organising information
- using computer and peripherals
- using CAD program
- saving 3-D modes in various file formats
- preparing drawings in plane orthogonal, isometric projection or equivalent

Required knowledge

Required knowledge includes:

- region modelling techniques
- solid modelling techniques
- development of sectioned models
- use of cutting plane
- use of cross hatching
- use of pre-drawn library files and primitives to produce a 3-D model
- use of third level software to produce 3-D models
- how to extract mass and area properties
- how to extract area properties from region models
- application of basic rendering techniques to a 3-D model

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use and environmental issues.	1.1. Identify workplace <i>environmental and resource efficiency issues</i> . 1.2. Identify resources used in own work role. 1.3. <i>Measure</i> and record current usage of resources using <i>appropriate techniques</i> .

ELEMENT	PERFORMANCE CRITERIA
	1.4. Identify and report workplace environmental hazards to appropriate personnel.
2. Comply with environmental regulations.	2.1. Follow <i>procedures</i> to ensure <i>compliance</i> . 2.2. Report environmental incidents to appropriate personnel.
3. Seek opportunities to improve environmental practices and resource efficiency.	3.1. Follow <i>enterprise plans</i> to improve environmental practices and resource efficiency. 3.2. Make <i>suggestions</i> for improvements to workplace practices in own work area.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include the ability to:

- report as required by procedures
- follow procedures and instructions and respond to change
- ask questions and seek clarifications relating to work requirements

Reading and writing is required in order to interpret required procedures and complete required workplace forms/reports.

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Required knowledge

Competency includes sufficient knowledge to:

- have a basic understanding of sustainability
- know the environmental hazards/risks, resource use and inefficiencies associated with own workplace (at an appropriate level)
- know the relevant environmental and resource efficiency systems and procedures for own work area
- know the impact of laws and regulations to a level relevant to the work context

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to follow workplace procedures according to instructions given and to participate in the improvement of environmental and resource efficient work practices at own level of responsibility. Evidence must be strictly relevant to the particular workplace role.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- identify and measure resources used in their job
- identify situations likely to lead to an environmental incident
- follow procedures related to environmental performance.

Consistent performance should be demonstrated. For example, look to see that:

- work is routinely to procedures
- the minimum of resources is used consistent with the job requirements, good practice and the procedures.

Context of and specific resources for assessment

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Depending on the selected methods of assessment access may be required to:

- workplace procedures and plans
- documentation in relation to production, waste, overheads, hazard control/management
- reports from supervisors/managers
- case study/scenarios

Method of assessment

A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by demonstration in the workplace

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • using targeted questioning for appropriate portions • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
Guidance information for assessment	Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Procedures	All operations are performed in accordance with procedures including all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.
Environmental and resource efficiency issues	<p>Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient production and consumption of natural resources, for example by:</p> <ul style="list-style-type: none"> • minimisation of waste, through implementation of the waste management hierarchy

RANGE STATEMENT	
	<ul style="list-style-type: none"> • efficient and effective use of energy and other resources • seeking alternative sources of energy • efficient use of materials and appropriate disposal of waste • use of controls to minimise the risk of environmental damage from hazardous substances • efficient water use • reducing emissions • life cycle analysis applied to issues such as energy supply, materials, transport, production
Measure	<p>Measure should be interpreted in a manner consistent with the scope of the job and may include things like:</p> <ul style="list-style-type: none"> • counting the number of items entering/leaving a work area • reading indicators in the work area • obtaining relevant information from support personnel • other simple means
Appropriate techniques	<p>Appropriate techniques include:</p> <ul style="list-style-type: none"> • material fed to/consumed by plant/equipment • plant meters and gauges • job cards including kanbans • examination of invoices from suppliers • measurements made under different conditions • examination of relevant information and data.
Compliance	<p>Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and mandated codes of practice. It also includes any codes and standards that the enterprise applies voluntarily.</p>
Incidents	<p>Incidents include:</p> <ul style="list-style-type: none"> • breaches or potential breaches of regulations • occurrences outside of standard procedure which may lead to lower environmental performance.
Enterprise plans	<p>Enterprise plans include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • documented policies and procedures • work plans to minimise waste, increase efficiency of water/energy use, minimise environmental hazards
Suggestions	<p>Suggestions include ideas that help to:</p> <ul style="list-style-type: none"> • prevent and minimise environmental risks and maximise opportunities • reduce emissions of greenhouse gases • reduce use of non-renewable resources • improve energy efficiency • increase use of renewable, recyclable, reusable and recoverable resources • reduce waste • increasing the reusability/recyclability of wastes/products • reduce water usage and/or water wastage.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	1.1 Identify environmental regulations applying to the enterprise. 1.2 Assess procedures for assessing <i>compliance</i> with environmental regulations. 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate. 1.4 Measure and record current resource usage by members of the work group.

ELEMENT	PERFORMANCE CRITERIA
	1.5 Analyse and record current purchasing strategies. 1.6 Analyse current work processes to access information and data and assist in identifying areas for improvement.
2. Set targets for improvements.	2.1 Seek input from stakeholders, key personnel and specialists. 2.2 Access external sources of information and data as required. 2.3 Evaluate alternative solutions to workplace environmental issues. 2.4 Set efficiency targets.
3. Implement performance improvement strategies.	3.1 Source <i>techniques/tools</i> to assist in achieving targets. 3.2 Apply continuous improvement strategies to own work area of responsibility and communicate ideas and possible solutions to the work group and management. 3.3 Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them. 3.4 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate. 3.5 Implement costing strategies to fully value environmental assets.
4. Monitor performance.	4.1 Document outcomes and communicate reports on targets to key personnel and stakeholders. 4.2 Evaluate strategies. 4.3 Set new targets and investigate and apply new tools and strategies. 4.4 Promote successful strategies and reward participants where possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

REQUIRED SKILLS AND KNOWLEDGE

- using relevant environmental and resource efficiency systems, tools and procedures
- applying quality assurance systems relevant to own work area
- applying relevant supply chain procedures
- measurement and calculation techniques
- communication/consultation skills to ensure information is supplied to the work group

Reading and writing is required to comprehend documentation and interpret environmental and energy efficiency requirements and to document and maintain records

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

Required knowledge

Required knowledge includes:

- how to access and use relevant environmental and resource efficiency systems, tools and procedures
- understanding of best practice approaches relevant to own area of responsibility
- strategies to maximise opportunities and minimise impacts relevant to own work area
- relevant environmental and resource efficiency issues specific to industry practices
- methods for measuring and calculating resource usage

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to implement and monitor integrated environmental and resource efficiency management policies and procedures within an organisation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • monitor and investigate current resource usage • develop plans to improve sustainability • implement environmental improvements. <p>Consistent performance should be demonstrated. For example, look to see that:</p> <ul style="list-style-type: none"> • environmental performance is routinely monitored and investigated • areas for improvements are followed through and the implemented changes are in turn monitored and investigated.
Context of and specific resources for assessment	<p>This section should be read in conjunction with the range of variables for this unit of competency. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.</p> <p>Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation.</p> <p>A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p>
Method of assessment	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by demonstration in the workplace • using targeted questioning for appropriate portions • through use of specific project(s) • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or</p>

EVIDENCE GUIDE	
	similar assessment.
Guidance information for assessment	<p>Assessors need to be aware of any cultural issues that may affect responses to questions.</p> <p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Procedures	<p>All operations are performed in accordance with procedures.</p> <p>Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.</p> <p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.</p>
Environmental and resource efficiency issues	<p>Environmental and resource efficiency issues include:</p> <ul style="list-style-type: none"> addressing environmental and resource sustainability initiatives such as Environmental Management Systems, action plans, surveys and audits reference to standards, guidelines and approaches such as: <ul style="list-style-type: none"> ISO 14001 Environmental Management Systems Life Cycle Analyses

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Cradle to cradle • Global Reporting Initiative • Ecological footprinting • Triple Bottom Line reporting • Product Stewardship • determining enterprise's most appropriate waste treatment including waste to landfill, recycling, re-use and wastewater treatment • applying the waste management hierarchy in the workplace • initiating and/or maintaining appropriate enterprise procedures for operational energy consumption, including stationary energy and non stationary (transport) • efficient use of water • minimising greenhouse gas emissions • use of controls to minimise the risk of environmental damage from hazardous substances
Measure	<p>Measuring techniques include:</p> <ul style="list-style-type: none"> • material fed to/consumed by plant/equipment • plant meters and gauges • job cards including kanbans • examination of invoices from suppliers • measurements made under different conditions • examination of relevant information and data • others as appropriate to the specific industry contexts.
Techniques and tools	<p>Techniques and tools may includeÂ :</p> <ul style="list-style-type: none"> • visual workplace concepts • measurement, display and/or recording devices • changed work practices/procedures • competence development and awareness training • process and equipment items
Compliance	<p>Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and codes of practice.</p>
Incidents	<p>Incidents include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • breaches or potential breaches of regulations • occurrences outside of standard procedure which may lead to lower environmental performance
Purchasing strategies	<p>Purchasing strategies include:</p> <ul style="list-style-type: none"> • influencing suppliers to take up environmental sustainability • selecting materials/components with a lower environmental profile.
Stakeholders, key personnel and specialists	<p>Stakeholders, key personnel and specialists include individuals and groups both inside and outside the organisation that have some direct interest in the enterprise's conduct, actions, products and services, including:</p> <ul style="list-style-type: none"> • employees at all levels of the organisation • customers • suppliers • other organisations • key personnel within the organisation, and specialists outside it who may have particular technical expertise
Suggestions	<p>Suggestions includes ideas that help to:</p> <ul style="list-style-type: none"> • prevent and minimise environmental risks and maximise opportunities • reduce emissions of greenhouse gases • reduce use of non-renewable resources • make more efficient use of energy, water and other resources • maximise opportunities to re use and recycle materials • identify strategies to offset or mitigate environmental impacts. e.g. purchasing of carbon credits • express purchasing power through the selection of suppliers with improved environmental performance. e.g. purchasing renewable energy and materials with lower embedded carbon • eliminate the use of hazardous and toxic materials increasing the reusability/recyclability of wastes/products.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy.	1.1 Define <i>scope of sustainability policy</i> . 1.2 Identify and consult <i>stakeholders</i> as a key component of the policy development process. 1.3 Review environmental sustainability <i>strategies</i> relevant to all stages of work covered by the policy 1.4 Make recommendations for policy options based on likely effectiveness, timeframes and cost. 1.5 Develop policy is that reflects the organisation's commitment to sustainability as an integral part of the

ELEMENT	PERFORMANCE CRITERIA
	business planning and as a business opportunity. 1.6 Agree upon appropriate methods of implementation.
2. Communicate the policy.	2.1 Promote the policy, including its expected outcome to key stakeholders. 2.2 Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned.
3. Implement the policy.	3.1 Develop and communicate procedures to help implement the policy. 3.2 Implement <i>strategies</i> for continuous improvement in resource efficiency. 3.3 Establish record systems for tracking continuous improvements in sustainability approaches and assign responsibilities.
4. Review policy implementation	4.1 Record outcomes and provide feedback to key personnel and stakeholders. 4.2 Investigate success or otherwise of policy. 4.3 Monitor records to identify trends that may require remedial action, and use to promote continuous improvement of performance. 4.4 Modify policy and or <i>procedures</i> as required to ensure improvements are made.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- developing and implementing systems and procedures to aid in the achievement of sustainability in the workplace
- applying quality assurance systems relevant to own enterprise
- accessing and applying other relevant enterprise policies, procedures and protocols
- relevant industry competency
- interpreting business/strategic plans

This unit requires the ability to:

REQUIRED SKILLS AND KNOWLEDGE

- read and evaluate complex and formal documents such as policy and legislation
- research, analyse and present information
- prepare written reports requiring precision of expression and language and structures suited to the intended audience
- adjust communication to suit different audiences
- deal with different points of view and dissenting stakeholders.

Required knowledge

Required knowledge includes:

- understanding of relevant policy development and implementation processes and practices
- understanding of the principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- best practice approaches relevant to own work area
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and procedures within an enterprise. The review of the policy after implementation will also need to be evidenced.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- develop relevant policy and procedures that comply with the regulatory requirements and business plans
- develop a workable implementation strategy
- include measurable criteria for reviewing improvement.

Consistent performance should be demonstrated. For

EVIDENCE GUIDE	
	<p>example, look to see that:</p> <ul style="list-style-type: none"> • policy implementation is reviewed • policy is developed to become part of the routine practices of the organisation.
Context of and specific resources for assessment	<p>This section should be read in conjunction with the range of variables for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation.</p> <p>A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p>
Method of assessment	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.</p> <p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by demonstration in the workplace • using targeted questioning for appropriate portions • through use of specific project(s) • by use of a suitable simulation and/or a range of case studies/scenarios • by a combination of these techniques. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
Guidance information for assessment	<p>Assessors need to be aware of any cultural issues that may affect responses to questions.</p> <p>Assessment processes and techniques must be culturally</p>

EVIDENCE GUIDE

	appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.
--	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Scope of sustainability policy

Scope of sustainability policy include:

- The area/s of environmental sustainability to be targeted and whether social and economic sustainability will be incorporated
- The parts of the enterprise to which it is to apply, including whether it is for the whole enterprise, one site, one work area or combinations of these
- An investigation of the particular business and market context of the industry/ enterprise
- Addressing sustainability initiatives through reference to standards, guidelines and approaches such as:
 - ISO 14001 Environmental Management Systems
 - Life Cycle Analyses

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Cradle to grave/cradle to cradle • Global Reporting Initiative • Ecological Footprint Assessment • Triple Bottom Line reporting • Product Stewardship.
Stakeholders	<p>Stakeholders include individuals and groups both inside and outside the organisation that have some direct interest in the enterprise's conduct, actions, products and services, including:</p> <ul style="list-style-type: none"> • employees at all levels of the organisation • customers • suppliers • regulators • other organisations.
Strategies	<p>Implementation strategies include:</p> <ul style="list-style-type: none"> • awareness raising among stakeholders • training of staff in principles and techniques of sustainability • promotional activities. <p>Continuous improvement strategies include ongoing measuring, improving and monitoring such as:</p> <ul style="list-style-type: none"> • Plan, do, check, act cycles • Kaizen (continuous improvement) • Kaizen blitz (breakthrough improvement event) • Six sigma approaches <p>Environmental sustainability strategies include:</p> <ul style="list-style-type: none"> • reducing toxic material and hazardous chemical use • minimising resource use through changes in processes, facility design and management • supply chain and life cycle management approaches • sourcing renewable energy and low carbon footprint materials • reducing, re-using, recycling and waste

RANGE STATEMENT

	reduction <ul style="list-style-type: none"> • product and process improvements • carbon offsets • reducing greenhouse gas and other emissions

Co-requisite units

Co-requisite units		

MSAPMOHS100A Follow OHS procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to recognise hazards commonly occurring at the workplace and follow health and safety instructions and procedures in the workplace.

Application of the Unit

Application of this unit

This competency applies to workers who are required to follow OHS instructions and procedures relating to the work being undertaken. Workers will be aware of the importance of maintaining their own health and safety and the health and safety of others in the workplace. Individual workers will also be capable of dealing with incidents and emergencies within their own scope of responsibility and under the direction of the supervisor.

While the instructions and procedures must be derived from the relevant organisation OHS policies, the worker is not required to understand or interpret these policies. This interpretation should be undertaken by the supervisor when informing workers of the OHS requirements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Recognise hazards.	1.1 Identify hazards commonly found in the workplace. 1.2 Check work area routinely before and during work. 1.3 Describe causes of identified hazards.
2. Follow procedures for hazard control.	2.1 Follow procedures to remove or minimise hazards, within the scope of responsibilities and competencies. 2.2 Use required personal protective and other safety equipment. 2.3 Describe the potential consequences of failing to follow these procedures and instructions.
3. Follow emergency procedures.	3.1 Recognise emergency/emergency alarm. 3.2 Go to muster point following procedure. 3.3 Follow instructions related to the emergency.
4. Report problems.	4.1 Report to appropriate people in accordance with workplace procedures when hazards arise.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding is required of the workplace occupational health and safety (OHS) system sufficient to recognise situations affecting OHS and to take the appropriate action to rectify the situation.

Awareness is required that OHS issues are regulated by State/Territory Acts, regulations, codes of practice and industry standards.

Employees need to be able to follow OHS procedures.

Competence includes the ability to apply and describe procedures for:

- recognising hazards in the workplace
- recognising safety signs and symbols
- recognising hazards commonly found in the workplace and standard controls
- reporting hazards identified to the designated person/according to procedure.

Competence also includes the ability to:

- describe the rights and responsibilities of employees under the OHS legislation
- use and maintain appropriate PPE where required
- communicate OHS issues
- locate and follow OHS procedures under direct supervision.

Language, literacy and numeracy requirements

This unit requires the ability to recognise and interpret safety signs and other basic safety information. It also requires the ability to report hazards in an appropriate way and to follow emergency instructions.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- describe the workplace OHS system and know the importance of critical procedures
- recognise potential situations requiring action
- implement appropriate corrective action.

Emphasis should be on the ability to avoid a critical incident rather than on recovery from a disaster.

Consistent performance should be demonstrated. For example, look to see that:

- hazards and application of appropriate risk controls are known
- other hazards in the workplace that may arise are known and reporting/taking actions are according to procedure.

Assessment method and context

Assessment for this unit of competency will be on a manufacturing site or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual work environment and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit requires a body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the work environment (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

Assessment will require access to a manufacturing plant or working environment over an extended period of time, or a suitable method of gathering evidence of knowledge and understanding over a range of situations. A bank of scenarios, case studies, and 'what ifs' will be required, as will a bank of questions which will be used to check the reasoning behind the 'observable actions.'

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency describes OHS requirements applicable for all workers whose work involves the use of workplace policies and procedures to maintain a safe work environment for themselves and others.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards and hazard causes

Known hazards, such as those identified in procedures or training, are recognised. The underlying causes of these identified hazards are also described, eg *the identified hazard is slipping, the cause is spilled granules*.

Tools and equipment

This competency includes use of and checks on equipment and tools such as:

- housekeeping checks, such as obstructions on the floor which may create slip/trip hazard
- guards in place
- equipment in safe condition
- work area clear and organised
- nothing unusual/different
- emergency equipment available
- PPE is functional.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Problems

Reporting problems means 'apply procedures to recognise and report hazards'.

Typical problems may include:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of OHS policies and procedures.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives
- other personnel with OHS responsibilities.
-

Unit Sector(s)

Not applicable.

MSAPMOHS200A Work safely

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to identify Occupational Health and Safety (OHS) hazards, and assess risk, as well as follow instructions and procedures in the workplace with minimal supervision. The worker will also be capable of participating in and contributing to OHS management issues.

Application of the Unit

Application of this unit

This competency applies to all workers as they carry out their normal day to day activities in a safe manner in compliance with legislative requirements and their duty of care.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify hazards and assess risk.	1.1 Identify hazards in the work area before and during work. 1.2 Assess risks for the identified hazards. 1.3 Identify controls for these hazards from procedures. 1.4 Review effectiveness of controls within the scope of authority. 1.5 Identify and report remaining risk.
2. Follow procedures for risk control.	2.1 Control risks when working under minimal supervision by following workplace procedures. 2.2 Select, use and maintain relevant personal protective equipment (PPE). 2.3 Handle and store hazardous materials safely.
3. Follow emergency procedures	3.1 Recognise emergency situations. 3.2 Take appropriate initial emergency action. 3.3 Follow procedures for dealing with a range of emergencies.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
4. Initiate suggestions to	4.1 Raise OHS issues with designated personnel in

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
enhance task/job-specific safety.	accordance with workplace procedures and relevant requirements of OHS legislation. 4.2 Contribute to participative arrangements for OHS management in the workplace within organisation procedures and the scope of responsibilities and competencies. 4.3 Provide input to minimise hazards in work area in line with organisation OHS procedures. 4.4 Provide input to opportunities for development of work group's competencies in relation to OHS. 4.5 Support the implementation of procedures to control risks using the hierarchy of control and in accordance with organisation procedures. 4.6 Report to appropriate people in accordance with workplace procedures when non-routine hazards arise.
5. Apply knowledge of OHS legislation and the organisation OHS policies and procedures	5.1 Follow workplace procedures to achieve a safe working environment in accordance with all relevant OHS legislation, including codes of practice relating to particular hazards within the workplace or industry. 5.2 Identify the rights and responsibilities of employees and employers under the relevant OHS legislation. 5.3 Complete (personally or with assistance) hazard, accident or incident reports as required by workplace procedures and relevant sections of OHS legislation.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding is required of the workplace OHS system and relevant industry standards, sufficient to participate in OHS activities and within the scope of work responsibilities and competencies.

Competence includes the ability to apply and describe:

- the identification of hazards and hazardous areas

- methods for assessing risk
- the identification of standard controls for the hazards
- a simple evaluation of the effectiveness of the controls
- an awareness of the need for further action
- the rights and responsibilities of employees under the OHS legislation
- management systems and procedures for OHS
- the hierarchy of control
- hazard policies, procedures and information
- safety procedures
- emergency, fire and accident procedures
- emergency procedures for handling hazardous materials
- consequences of inappropriate handling of hazardous materials.

Competence also requires the ability to:

- locate, understand and follow workplace OHS procedures
- identify and interpret signs and symbols, including emergency alarms
- recognise hazards common to the industry and in their own workplace
- locate sources of OHS information within the workplace
- select and use personal protective clothing and equipment
- correctly use equipment for handling of chemicals/materials
- interpret and apply relevant Material Safety Data Sheets (MSDS).

Language, literacy and numeracy requirements

This unit requires the ability to read and apply hazard information in the workplace and make suggestions to enhance safety.

Writing is required to the level of completing required safety/incident reports.

Numeracy is required to complete incident reports and interpret hazard information.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Consistent safe working is the critical aspect for which evidence should be sought.

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- recognise potential situations requiring action
- implement appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that relevant workplace procedures are understood, in particular:

- hazard policies and procedures
- emergency, fire and accident procedures
- procedures for the use of personal protective clothing and equipment
- hazard identification and risk assessment procedures.

The following should also be known and understood:

- the hazards and potential risks in the workplace
- the consultation processes, either general or specific to OHS
- OHS information (what is there and how to access it)
- specific hazard policies procedures.

These aspects may be best assessed using a range of scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new, unusual and extreme situations, which may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities and similar sources.

Assessment method and context

Assessment for this unit of competency will be on a manufacturing site or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to a manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies and 'what ifs' will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency describes OHS requirements applicable for all workers whose work involves the use of workplace policies and procedures to maintain a safe work environment for themselves and others.

It is expected that workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant State/Territory OHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Identify hazards

Hazard identification is the identification of known hazards in the workplace such as might be included in procedures, training and other workplace methods of identifying hazards.

Assess risks

Risk assessment is used in compliance with the relevant OHS acts and regulations. Assessment is to the extent required by the acts and regulations and is as relevant to the job.

Identify hazard controls

Identification of hazard controls is identifying the controls specified in the procedures or similar. Reviewing their effectiveness includes checking that they are in place and operational in accordance with standard procedure.

Tools and equipment

This competency includes use of equipment and tools such as:

- PPE
- handling aids
- other safety equipment.

Personal Protective Equipment (PPE)

Typical PPE includes:

- hard hats
- goggles/glasses/face shields

- hearing protection (ear muffs, plugs)
- dusk masks/canister masks/ SCBA/ long range breathers
- gloves/gauntlets
- safety boots
- antistatic equipment
- overalls/aprons/acid jackets/pants.

Selecting and using PPE includes:

- outlining the functions for each type of PPE used in the work environment
- identifying the situations in which specific types of PPE would be used
- using PPE correctly as required in a working environment.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights,
- confined spaces
- heat
- noise
- dusts or vapours
- fire and explosion
- dangerous goods.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives
- other personnel with OHS responsibilities.

OHS Issues

OHS issues which may need to be raised by workers with designated personnel may include:

- recognition of hazards/methods of identifying hazards
- problems encountered in controlling risks associated with hazards (any of the controls as per the hierarchy of control which are relevant)
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of OHS policies and procedures.

Recognise emergency situation

Recognition of emergency situations is from alarms, signals or other obvious mechanisms in the workplace.

Unit Sector(s)

Not applicable.

MSAPMOHS300A Facilitate the implementation of OHS for a work group

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

On completion of this unit, the worker will be able to implement and monitor defined OHS policies and procedures for a work group or area, within their scope of responsibilities.

Application of the Unit

Application of this unit

This competency applies to operators who are capable of coaching the team in participating and contributing to OHS management issues. The worker will be able to perform duties that are required of a safety committee member or safety representative in an organisation. Typically this worker might be a team leader or on the OHS committee.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has the prerequisite of *MSAOHS200A Work safely*.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Communicate OHS information for co-workers in team.	1.1 Accurately and clearly explain to the work group basic OHS rights, responsibilities and requirements. 1.2 Provide, in a readily accessible manner, information on the relevant organisation OHS policies, procedures and programs, and accurately and clearly explain them to the work group. 1.3 Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group.
2. Coach co-workers in team.	2.1 Establish mutual support groups, eg buddy system, to encourage effective development of individual and group competencies in OHS. 2.2 Provide personal encouragement and assistance to team members to contribute to the management of OHS at the workplace.
3. Facilitate the consultative process.	3.1 Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures. 3.2 Seek input from work group on OHS issues and proposed changes to process, procedures or work place. 3.3 Encourage and use feedback from individuals and teams to identify and implement improvements in the

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	management of OHS. 3.4 Promptly inform the work group of the outcomes of consultation over OHS issues.
4. Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk.	4.1 Implement and monitor adherence to work procedures to identify hazards and assess and control risk. 4.2 Monitor existing risk control measures and report results regularly. 4.3 Access internal and external sources of relevant OHS information. 4.4 Evaluate and identify inadequacies in existing risk control measures in accordance with the hierarchy of control, and report to designated personnel. 4.5 Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel. 4.6 Identify actual/potential inadequacies in procedures and report to designated personnel. 4.7 Identify actual/potential inadequacies in individual or team competency and report to designated personnel.
5. Maintain and use OHS records.	5.1 Accurately and legibly complete OHS records for work area, in accordance with workplace requirements for OHS records and legal requirements for the maintenance of records of occupational injury and disease. 5.2 Use aggregated information from the area OHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the workplace OHS system and State OHS legislative requirements, codes of practice and relevant industry standards sufficient to implement and monitor OHS activities for a work group or area within the scope of their responsibilities and competencies.

In these industries which are characterised by high potential hazard, employees need to exercise their duty of care responsibilities not only within the general OHS Acts and regulations, but also within those State and national standards applying to hazardous substances, dangerous goods and major hazards.

Competence includes the ability to apply and describe the:

- identification of hazards in the workplace and standard controls
- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under OHS legislation
- obligations of employers under the OHS legislation
- legislative requirements for information and consultation
- arrangements for consultation within the workplace
- management systems and procedures for OHS
- the hierarchy of control
- hazard policies and procedures
- safety procedures
- emergency, fire and accident procedures.

Competence also requires the ability to:

- locate, understand and follow workplace OHS procedures
- identify and communicate with all key personnel in the organisation
- identify and access relevant sources of information
- interpret OHS data such as tables of numbers and graphs
- select, recommend and use personal protective clothing and equipment.

Language, literacy and numeracy requirements

This unit requires the ability to communicate with members of the work team/area and also management. It also requires the ability to interpret and apply OHS procedures and explain them to work team members.

Writing is required to the level of being able to keep records as required and also keep notes from meetings.

Numeracy is required to interpret incident statistics and hazard data.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Where the assessee does not currently possess evidence of competency in *MSAOHS200A Work safely*, it may be co-assessed with this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- communicate effectively with the work group(s)
- proactively promote consultation and participation in the OHS processes
- participate in decisions which impact on OHS for their workgroup.

Consistent performance should be demonstrated. In particular look for knowledge and understanding of:

- specific hazard policies and the use of hazard procedures (eg identify, assess, control)
- the consultation processes, either general or specific to OHS
- OHS information
- OHS record keeping
- counselling, disciplinary and issue resolution processes.

These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new, unusual and extreme situations that may have been generated from the past incident history of the workplace, incidents on similar plants around the world, hazard analysis activities and similar sources.

Assessment method and context

Assessment for this unit of competency will be on a processing plant or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to an operating plant or manufacturing environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions that will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit describes OHS requirements applicable for all workers who are responsible for the organisation of OHS arrangements for a work group or area, including coaching.

It is expected that workers will be provided with clear directions, information, instruction, training and appropriate supervision regarding the relevant State/Territory OHS legislation, codes of practice, relevant industry standards, workplace procedures and work instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Personnel

Appropriate personnel for OHS referrals may include:

- employer
- supervisor
- employees elected as OHS representatives

- other personnel with OHS responsibilities.

Participative arrangements

Participative arrangements for OHS management may involve:

- making safety suggestions
- information sessions on existing or new issues
- meetings between employer and employees or representatives
- access to relevant workplace information
- use of clear and understandable language.

OHS Issues

OHS issues which may need to be raised by workers with designated personnel may include:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- clarification of understanding of OHS policies and procedures.

OHS Records

OHS records include:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records.

OHS Information Sources

Relevant sources of OHS information include:

- OHS legislation and codes of practice
- industry standards for materials, process, equipment etc
- SA/ISO standards
- OHS authorities
- unions and industry associations
- internet, journals, magazines
- manufacturer/supplier manuals/specifications
- policies and procedures
- JSA, risk assessments, HAZOPs
- hazard, incident and injury records
- training resources
- employee information brochures, newsletters etc
- OHS reports such as inspections, technical reports.
-

Unit Sector(s)

Not applicable.

MSAPMOPS101A Make measurements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the making or taking of measurements in a variety of sites and locations.

Application of the Unit

Application of this unit

This unit applies to people who are required to apply basic knowledge and skills in performing routine measurements for industry related operations. It is typically performed by people working either independently or as part of a work team.

The worker will:

- make measurements using physical and/or chemical measuring equipment
- record results using either a manual or computer system
- identify problems and take required action
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify appropriate measurements.	1.1 Select appropriate measuring equipment. 1.2 Identify units to be used, and the detail required. 1.3 Check measuring equipment is in calibration.
2. Perform measurements	2.1 Explain range of results that may be obtained 2.2 Identify and take account of relevant external factors. 2.3 Perform measurements using appropriate techniques 2.4 Compare measurements against the range of expected results 2.5 Self-check numerical information for accuracy and correctness. 2.6 Explain the need for calibration and use calibrated equipment to make measurements.
3. Record measurements as required.	3.1 Accurately record the result in the appropriate format. 3.2 Record the result to the appropriate level of detail.
4. Respond to routine problems in accordance with procedures	4.1 Recognise known faults that occur during the measurement. 4.2 Identify and take action on causes of routine faults. 4.3 Log problems as required. 4.4 Identify non-routine problems and report to

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	designated person.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the process sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines. For example, in gel coating, a coating less than 5 mils thick may wrinkle, especially when brush marks are present. Thickness is checked using a gel coat thickness gauge.

Knowledge and the ability to implement the organisation's procedures and relevant regulatory requirements, within appropriate time constraints and work standards.

Application of approved hazard control and safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup.

Knowledge in measurement sufficient for consistent performance to specifications including:

- basic units of measurement (eg kilogram, metre, second)
- correct selection and use of measuring devices
- application of relevant mathematical calculations and procedures, including additions, subtractions, division, fractions, percentages
- use of dial, scale and digital readouts
- the need for calibration and methods of checking equipment is within calibration.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided.

Writing is required to the level of completing workplace forms.

Numeracy is required to the level of basic arithmetical manipulations and the interpretation of the significance of numbers and variations of readings.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to

- take accurate measures using the appropriate measuring device
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that

- standards in taking measurements are met consistently
- all safety procedures are followed.

Assessment method and context

Assessment will occur over a range of situations requiring the taking of measurements and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation or questioning to indicate understanding and knowledge
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all routine measurements within a manufacturing environment.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- measuring devices, including gauges, dip-sticks, thermometers, weighing scales, length/thickness measuring
- calculators
- computers for recording results
- relevant personal protective equipment.

Hazards

Typical hazards include:

- dusts/vapour
- temperature
- hazardous substances
- manual handling hazards.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'.

Typical problems may include:

- measuring instrument not fit for use (eg not within calibration)
- appropriate measuring device not available
- deviations from normal range of readings
- effect of temperature on material properties.

Appropriate action for non-routine problems may be reporting to designated person or other action specified in the procedures.

Variables

Key variables to be monitored include:

- extent
- dimension
- quantity
- mass
- capacity
- capability.
-

Unit Sector(s)

Not applicable.

MSAPMOPS212A Use organisation computers or data systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the use of organisation computers or data systems in order to work effectively. The operator is familiar with the system, can locate and use the appropriate data and is able to accurately record data into the system as required. This competency covers the use of computer equipment and company software programs, including selecting the correct programs for use and identifying minor faults in equipment or software.

This competency is typically performed by operators working either independently or as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who are required to store and retrieve data, and produce documents, spreadsheets relevant to operational or administrative functions within the organisation. It includes:

- inputting data to the systems as required
- locating and accessing data as required for production support/problem solving
- using data to support business objectives
- producing construction documents, reports and spreadsheets
- running system checks and virus scans manually if automated systems fail
- producing required documentation within the security limits imposed by the company.
-

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify applications of computer or data system for work role.	1.1 Identify data and information available from the system and its application to work role. 1.2 Identify data from work role which needs to be entered in the system.
2. Use the computer/data system.	2.1 Adjust work station equipment to meet ergonomic requirements and use appropriate posture. 2.2 Log-on according to procedures. 2.3 Navigate system as required. 2.4 Input data or make changes as required. 2.5 Check entered or edited data is correct. 2.6 Access required data/information. 2.7 Output data as required. 2.8 Use 'Help' as needed.
3. Save file and exit system.	3.1 Save and store data in appropriate directory or folder. 3.2 Close file and exit applications programs without loss of data.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	3.3 Back-up data if required in accordance with procedures.
4. Respond to routine problems with the system	4.1 Recognise known faults that occur during the operation. 4.2 Identify and take action on causes of routine faults. 4.3 Log problems as required. 4.4 Identify non-routine process and quality problems and take appropriate action.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Competence includes an understanding of the organisation data system to the level needed to use the system and recognise and resolve problems. In particular it includes the ability to:

- demonstrate the operation of and access to data from the system
- describe the scope and range of data required from the system, in order to support the solution of problems
- describe the nature of the scope and range of available data
- describe the causes and remedies of common problems such as those selected in the Range Statement
- describe principles of operation of the equipment and software, hazard policies and procedures, job procedures and work instructions
- explain the application of software in relation to work role.

Competence also includes the ability to isolate the causes of problems to a component of the organisation data system and to distinguish between causes of problems such as:

- incorrect or misleading data
- system software faults
- system equipment faults.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of completing workplace forms

Numeracy is also required to the extent of requiring competence in essential mathematical functions including $+$ $-$ \times and \div .

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The reasoning process behind the problem analysis and determining the required actions should be assessed.

Consistent performance should be demonstrated. For example, look to see that:

- in-plant computer programs are correctly utilised
- software problems are recognised and solved effectively and efficiently
- documents are completed to the standard required
- the operation and access to data from the system can be demonstrated
- data can be input and output from the system as required
- obvious problems in related to operation of the system are recognised and an appropriate contribution made to their solution.

Assessment method and context

Assessment will occur using industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency includes organisation computer and data systems. This may include systems which cover (select relevant items):

- Word and Excel documents
- safety, safety data and injury reporting
- orders, purchasing, stock levels and scheduling
- stock control, stores, warehousing and logistics
- materials hazards, labelling, materials identification, materials safety data sheets (MSDSs)
- batch data, schedules, production planning and operations planning
- product quality, statistical control, production trends and quality control
- maintenance, maintenance planning, procedures and spare parts.

The organisation systems will usually be computerised, but may include data sheets, paper or hard copy records, manuals and instructions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- computers - stand alone and/or networked
- mobile terminals and hand held devices
- printers
- mouse, keyboard
- facsimile equipment
- onboard terminals
- scanners
- bar coders.

Software applications may include:

- CC mail and email
- Internet or intranet
- word processing, database and spreadsheet programs
- company/process specific software
- word processing, database and spreadsheet programs.

Documents may include:

- work orders
- work instructions/standard operating procedures
- email or CC mail
- faxes
- memos
- tables
- standard letters
- standard reports.

Hazards

Typical hazards include:

- repetition strain injuries
- glare from monitor screens
- damages cables or connections
- strains or injuries moving computer equipment.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- software problems, such as unable to access file, find correct page or send CC mail, input data.

- loose or disconnected cables
- 'frozen' screens
- faulty monitors
- key board problems.

Variables

Key variables to be monitored include:

- types of hardware systems
- access and log on procedures
- types of software packages
- Internet/intranet systems
- types of data to be stored and retrieved.
-

MSAPMOPS363A Organise on site work

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers organising of work in a field situation. This unit typically applies to operators who are preparing to do work in remote mine sites, or large industrial complexes where extensive permit or clearance systems exist.

This unit covers the organising and preparation for on site work. Refer to other competency units depending on the nature of the work to be done on site.

Application of the Unit

Application of this unit

The emphasis is on the planning of the work, the arrangements that are required to allow the on-site work to proceed and the set-up of tools, equipment and materials at the site. It includes the scoping, planning, communication and hazard controls required for the job. The work may be to do with conveyor systems, tanks, pipelines, equipment or other work in situ.

The worker will:

- plan the job
- arrange all permissions and permits
- select and arrange all equipment and materials to the site
- set up tools, equipment and materials on site
- identify any hazards and take appropriate action.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan the work.	1.1 Review the requirements of the work 1.2 Arrange all necessary permits and permissions for site inspections and work. 1.3 Examine the site where the work will take place. 1.4 Identify plant and equipment isolations. 1.5 Identify hazards and risk controls. 1.6 Plan to minimise downtime, economically use materials and meet quality specifications. 1.7 Plan work, including sequences, times, process stages, engineering controls and personal protection requirements. 1.8 Prepare all necessary documentation and finalise the permissions and approvals for conducting the work.
2. Prepare equipment, tools and materials.	2.1 Identify equipment, tools and materials required. 2.2 Arrange for supply of all tools, equipment and materials. 2.3 Arrange for transport to site of all equipment, tools

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and materials.
3. Set up work location.	3.1 Assemble and check materials and tools for suitability for purpose. 3.2 Establish a safe work area. 3.3 Establish isolations and tag/lock out as required. 3.4 Check tools, equipment and materials against site situation and conditions.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge of the materials, equipment and process sufficient to recognise material and equipment conditions which may lead to out-of-specification production. For example, consumables for use in the work are within recommended shelf life.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls.

Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and clean up. This may include the preparation of Job Hazard Analysis (JHA) or similar hazard management and planning techniques.

Competence includes the ability, for the practical completion of the job, to apply and/or explain:

- interpretation of specifications, designs and/or work orders
- understanding of the operation, equipment principles and details of construction
- production workflow sequences and inherent hazards with on-site work
- design requirements and details of the work to enable the planning to and the work to be completed as required
- planning process, including breaking the work down into steps and stages
- correct selection and use of equipment, materials, processes and procedures
- products, materials and material characteristics.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements

- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical work specifications, job sheets and material labels as provided to operators.

Writing is required to the level of completing workplace forms, plans and job reports.

Numeracy is also required, eg to determine quantities of materials for the work.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

This unit may be co-assessed with units concerned with the nature of the work being undertaken.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- identify critical materials properties and operating characteristics in relation to the condition of the equipment
- plan work process within organisational procedures and explain the reasons for the steps in the process
- take appropriate action to observe site conditions, equipment configuration, possible work-site difficulties, hazards and identify problems to be reported.

Consistent performance should be demonstrated. For example, look to see that:

- production needs are interpreted and met
- problems are anticipated from observations
- problems are efficiently resolved
- the repair runs consistently and smoothly.

Assessment method and context

Assessment will occur using industrial scenarios and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to on-site work environments and sectors typically within manufacturing or heavy industries. It covers, but may not be limited to, the preparation for on-site work.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, manufacturer specifications and procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

On-site work

On-site work covered by this competency may include (but may not be limited to):

- conveyor belt splicing and repairs
- rubber lagging of conveyor drums
- rubber lining of tanks
- polymer piping systems installation or repairs
- polymer constructions (eg fume cupboards or signs)
- refractory lining
- concrete casting
- other work to be done on-site, and not in a factory or workshop.

Work requirements

Work requirements may be determined from:

- work orders
- specifications
- job descriptions
- designs
- other documents.

Isolations

Isolations include:

- power supply
- tag locations
- process materials
- energy sources and
- equipment isolation system.

Safe work area

Safe work area includes area(s) for:

- scaffolding
- lifting gear
- lay down area
- work area
- other equipment in appropriate locations.

Tools and equipment

This competency includes planning and set-up of equipment and tools such as:

- manual handling aids
- hand winches
- portable power generators and vulcanising equipment

- knives and other cutting instruments
- portable hoists/lifting equipment not requiring any special permits or licences
- spanners, wrenches, hammers etc
- power operated hand tools such as drills, cutting disks, sanders
- specialised tools for the job
- relevant personal protective equipment.

Hazards

Typical hazards include:

- manual handling hazards
- working at heights
- dust, process liquids, process materials
- hand tools and hand held power tools (eg knife, cutting and grinding disk hazards).

Problems

Anticipate and solve problems means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- lack of accessibility
- equipment isolations
- logistics of materials and equipment to work site
- variations in materials and/or contamination of materials.

Variables

Key variables to be monitored include:

- environmental conditions
- lock-out/isolation of equipment
- worksite location, remoteness, accessibility
- job variations, changes.
-

Unit Sector(s)

MSAPMPER200C Work in accordance with an issued permit

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	<p>This unit aims to ensure that people working under a permit to work understand the system, know the limitations of the permit under which they are working and comply with all the requirements of the permit. The people to whom this unit applies may be called 'permit recipients' or 'permit holders' by some organisations. Some organisations call 'permits' 'clearances'</p> <p>This unit covers the basic competency of working under a permit. Where entry to a confined space is required, then <i>MSAPMPER205B Enter confined space</i> is also required. The safety observer (standby person) competencies are covered by <i>MSAPMPER202A Observe permit work</i>. Atmospheric testing is covered by <i>MSAPMOHS217A Gas test atmospheres</i>. The issuing of permits is covered by <i>MSAPMPER300B Issue work permits</i>.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This competency applies to persons who are required to conduct work activities under the authority of an issued permit to work and within the context and requirements of that permit. This typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. It includes:</p> <ul style="list-style-type: none">• identifying the range and scope of work covered by the permit• checking that the right type of permit has been issued for the type of work• adequately preparing to undertake the work, including obtaining all necessary safety equipment and PPE• undertaking the work strictly in accordance with the provisions of the permit• maintaining correct housekeeping with permit activities• completing work in accordance with the permit requirements• querying or raising matters about the permit if the scope of work/nature of the tools to be used varies from that covered by the permit• handing back the permit in accordance with procedures and obtaining appropriate sign off as required.

Employability Skills Information

Employability Skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply for permit(s)	1.1. Confirm the scope and location of the work to be done 1.2. Identify the need for a work permit(s) for the work to be carried out. 1.3. Identify the type of work permit required. 1.4. Collate information required for the issue of the permit 1.5. Apply for the permit following the organisations requirements
2. Identify the scope of the permit.	2.1. Check that work to be done complies with the permit type. 2.2. Check that the scope and location of work comply with the

ELEMENT	PERFORMANCE CRITERIA
	<p>permit issued</p> <p>2.3. Check that the hazard controls specified on the permit are consistent with the hazard analysis</p> <p>2.4. Check that preparations specified on the permit have been completed</p> <p>2.5. Sign onto/receive the permit.</p>
3. Prepare for permitted work.	<p>3.1. Maintain safe working conditions and environment by using available isolation procedures, safety equipment and emergency procedures.</p> <p>3.2. Monitor plant conditions and hazards to ensure work under the permit remains safe.</p> <p>3.3. Ensure that appropriate safety equipment and clothing are selected and worn as required by the permit and relevant procedures.</p> <p>3.4. Inspect work area to ensure safety and compliance with permit requirements and procedures.</p>
4. Work in accordance with an issued permit.	<p>4.1. Use required hazard reduction/control measures.</p> <p>4.2. Comply with requirements of the permit including safety observer if required.</p> <p>4.3. Display issued permit on work site as required</p> <p>4.4. Ensure compliance with scope, location and timeframe specified in the permit or seek re-authorisation as required</p> <p>4.5. Suspend job and make work site safe before leaving job.</p> <p>4.6. Formally seek and receive authorised extensions to the permit when required.</p> <p>4.7. Give end of day status report to permit issuer.</p>
5. Complete permit(s) to work.	<p>5.1. Obtain new permit(s) or have existing permit(s) revalidated before work is recommenced.</p> <p>5.2. Check the work conducted against the issued permit(s) to ensure that all the nominated work requirements have been satisfied.</p> <p>5.3. Monitor general housekeeping to ensure that the site has been left in a clean and safe condition.</p> <p>5.4. Ensure personal lockouts/tag outs/isolations are removed in accordance with procedures</p> <p>5.5. Communicate status of the work conducted and the results of the permit to relevant personnel.</p> <p>5.6. Complete documentation as required and have permit signed off when job is completed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Competence includes the ability to:

- access and interpret information relevant to specific tasks (eg labels, MSDSs hazchem signs)
- identify changes to conditions which may lead to the permit being revoked before the job is completed
- describe and/or explain hazards associated with tasks covered by the permit, types of tests required for the issue of work permits - the types of tests to include, atmospheric/oxygen/breathability, flammability/explosivity, toxicity/TWA, temperature, humidity
- the impact of the regulatory framework and organisation procedures under which the permit operates upon the particular job(s) requiring the permit.

Language, literacy and numeracy requirements

- This unit may require the ability to read and correctly interpret complex P&ID's; speak clearly and unambiguously in English; and to explain, describe and verify sometimes complex needs and issues.
- Writing is required to the level of completing workplace forms.
- Numeracy is required to the level of being able to correctly differentiate between high and low pressures and temperatures, voltages or masses.

Required knowledge:

Knowledge and understanding of the relevant OHS and environmental requirements, in particular those relating to various situations requiring work permits, with an ability to implement the requirements in a manner that is relevant to the job. Knowledge of the organisation's standard procedures and work instructions and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

Sufficient knowledge of all types of permits is required to ensure work is not carried out without the correct permit. This includes recognizing hot work and confined spaces.

Knowledge of regulatory frameworks should include:

- licence requirements for the job,
- company policy and procedures
- permit control systems

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

Simulation may be required to allow for assessment of parts of this unit. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to distinguish between situations requiring the types of permit and to list the major requirements of each type of permit. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide reasons for a permit system
- recognise the importance of different work permits
- comply with permit conditions including the wearing of appropriate personal protective equipment (PPE)
- take appropriate action to resolve faults or report faults to appropriate personnel
- explain and implement incident response procedures.

Consistent performance should be demonstrated, e.g. look to see that:

- communications are timely and effective
- deviations from permit conditions are recognised, reported, corrected and re-authorization arranged
- actions specified in the permit/standard procedures are carried out
- all safety procedures are followed.

Context of and specific resources

A holistic approach should be taken to the assessment.

EVIDENCE GUIDE**for assessment**

Assessment will occur over a range of situations which may include disruptions to normal, smooth operation.

Competence in this unit may be assessed:

- on a plant/in the work place/a work situation
- by using a suitable simulation based on the actual plant and including walk throughs of the relevant competency components and/or a range of case studies/scenarios and role plays
- by questioning and using 'what if' scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant
- through a combination of these techniques.

These aspects may be best assessed using a range of simulations/scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new or unusual situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed. In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

While oral assessments may be appropriate there needs to be a written record for audit purposes.

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions which will be used to probe the reasoning behind the observable actions will also be required to the extent that they form part of the assessment method.

EVIDENCE GUIDE

Method of assessment	Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.
Guidance information for assessment	Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed and the safety standard required.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version/version specified by the local regulatory authority must be used.
Context	<p>This unit typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. All work is to be conducted using the appropriate personal protective equipment.</p> <p>The types of work permits may include:</p> <ul style="list-style-type: none"> • cold work/general permit to work • excavation • hot work • vehicle entry • minor repairs • working at heights • other special permits. <p>Note that entry to a <u>confined space</u> is covered by <i>MSAPMPER205C Enter confined space</i>. The Australian Standard (AS2865) definition given for</p>

RANGE STATEMENT	
	<p>confined space entry is used in this Training Package.</p> <p>All operations are performed in accordance with standard operating procedures (SOPs).</p> <p>Checks to ensure a workplace is safe may include:</p> <ul style="list-style-type: none"> • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
Procedures	<p>All operations are performed in accordance with procedures.</p> <p>Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include:</p> <ul style="list-style-type: none"> • legislation/codes • OHS legislation, codes of practice and guidance material • EPA • National and Australian standards • licence and certification requirements • internal permit control system. • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
Information required for permit	<p>Information required for a permit includes:</p> <ul style="list-style-type: none"> • work description • tools to be used • process/methods of work/SOPs • MSDSs • JHA/JSA/SWMSs
Tools and equipment	<p>This competency includes use of safety equipment and tools such as:</p> <ul style="list-style-type: none"> • eye protection (eg goggles) • ear protection • gloves

RANGE STATEMENT	
	<ul style="list-style-type: none"> • clothing • respiratory protection • helmets • safety footwear.
Hazards	<p>Typical hazards include:</p> <ul style="list-style-type: none"> • heat, smoke, dust or other atmospheric hazards • sharp edges, protrusions or obstructions • limited head spaces or overhangs • equipment or product mass • slippery surfaces, spills or leaks • noise, rotational equipment or vibration.
Display issued permit	<p>Display issued permit on work site means to have the permit on the worksite and displayed/ready to be shown as required by the site/job requirements and may include:</p> <ul style="list-style-type: none"> • displaying it in a provided mounting • having it accessible in a folder which is on the work site • having it folded in overall pockets in a manner which allows it to be readily shown on request.
Problems	<p>'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical problems may include:</p> <ul style="list-style-type: none"> • provision of the wrong permit • incorrect information being supplied with the permit • errors being made in the understanding of permit data • failure to correctly correspond to the requirements of the permit • failure to seek clarification when anomalies occur.
Variables	<p>Key variables to be monitored include:</p> <ul style="list-style-type: none"> • sites under which permit activities must be applied • type of permit to be executed • types of tools and equipment to be employed • size of work team • scope and urgency of work.
Health, safety and environment (HSE)	<p>All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.</p>

MSAPMSUP102A Communicate in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit of competency covers receiving, relaying and recording written and oral messages and providing relevant information in response to requests, within time lines.

Application of the Unit

Application of this unit

This competency applies to operators who are required to receive, relay and record work related information as well as respond to information requests in the workplace.

The operator will:

- record received messages
- seek clarification, when necessary
- access needed information, as required
- relay the correct information to appropriate person/s.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Receive and relay messages	1.1 Confirm understanding of the message is correct. 1.2 Accurately record the message. 1.3 Relay message accurately to appropriate person or section within designated timelines.
2. Interpret messages.	2.1 Clarify message if necessary. 2.2 Take appropriate action.
3. Respond to information.	3.1 Acknowledge and understand the request for information. 3.2 Access information from appropriate sources. 3.3 Relay information to appropriate person or section.
4. Complete workplace forms.	4.1 Select appropriate form. 4.2 Assemble information required for form. 4.3 Complete form as required. 4.4 Submit form as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and ability to implement organisation policies and procedures on workplace communication, including:

- types, purpose and importance of workplace documentation
- workplace codes, including numbers, symbols, signs, colours and other codes.

Competence also includes the ability to:

- listen attentively
- formulate questions to clarify work requirements or instructions
- establish effective workplace relationship with colleagues
- adapt communication to a range of social, cultural and ethnic backgrounds.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand information contained in typical workplace documents such as standard operating procedures, material safety data sheets, job cards, maintenance logs. Everyday workplace language is used, including some technical terms and mathematical language.

Writing is required to the level of completing workplace forms and records. Types of text may include short sentences, symbols, codes, signs, sketches and may be conveyed in printed form or screen based.

Basic numeracy is needed to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

In all cases it may be appropriate to assess this unit concurrently with relevant team work and communication units.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide and assess all required information and that the information provided both verbally and in writing is completed in a clear and concise manner that is easily understood by others and in accordance with workplace requirements.
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that:

- all information is provided in an efficient, effective, courteous and timely manner.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- by observation and questioning to indicate understanding
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Reasonable adjustment of assessment tasks will be undertaken as required.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments.

Procedures

All operations are performed in accordance with procedures. Procedures include:

- all relevant workplace procedures
- work instructions
- temporary instructions
- relevant industry and government codes and standards
- telephone protocol , including industry timelines in answering calls.

Messages

Messages includes the following as appropriate to workplace requirements:

- written
- oral
- electronic.

Tools and equipment

This competency includes use of equipment and tools such as:

- two way radio
- computer
- telephone.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems may include:

- missing/lost messages
- required information not available
- required equipment not available
- conflict of work priorities.

Appropriate action for non-routine problems may be reporting to designated person or other action specified in the procedures.

Unit Sector(s)

MSAPMSUP106A Work in a team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the organisation of team activities to fit in with the scheduling of work to meet operational guidelines.

Application of the Unit

Application of this unit

This competency is typically performed by people who work within a team structure with limited discretionary powers

The worker will:

- plan and organise activities in accordance with instructions
- use appropriate interpersonal skills to contribute to effective teamwork
- seek assistance from other team members where appropriate
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Individual organisations may choose to add prerequisites and corequisites relevant to their processes.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify work activities.	1.1 Identify task requirements of the team. 1.2 Identify individual tasks that are part of the team requirement. 1.3 Prioritise team and individual activities as directed.
2. Organise daily work plan.	2.1 Break work activities down into small achievable components. 2.2 Record activities as required by procedures/work instructions. 2.3 Seek assistance from other team members when difficulties in achieving allocated tasks arise.
3. Participate in a team.	3.1 Use interpersonal skills appropriate to the effective teamwork of the shift/crew/section within the workplace. 3.2 Acknowledge information and feedback provided by other team members in work group. 3.3 Acknowledge team roles and support team members in achieving their role. 3.4 Practise teamwork within and between groups to contribute to the achievement of company work

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of organisation information systems, procedures and equipment sufficient to plan daily work activities in order to meet timelines.

Knowledge of organisation standard procedures and work instructions and relevant regulatory requirements, along with the ability to implement them within appropriate time constraints and in a manner relevant to the operation of the system.

Competence also includes the ability to:

- use effective communication techniques
- identify where teams fit into the organisational structure
- apply organisation quality and safety procedures
- complete required workplace documentation
- distinguish between urgent and non-urgent tasks.

Language, literacy and numeracy requirements

This unit requires the ability to read and understand typical product specifications, job sheets, procedures and work instructions, material labels and safety information as provided.

Writing is required to the level of completing workplace forms.

Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to identify work activities and prioritise work in order to meet timelines, whilst interacting as a member of a group.

Consistent performance should be demonstrated. For example, look to see that:

- activities are planned in accordance with instructions
- willingness to participate as part of a team is demonstrated
- relevant procedures are accessed and utilised in completing activities
- timelines are adhered to
- assistance is sought from relevant personnel when difficulties arise.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- by observation over time on a processing plant or in a manufacturing environment
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors in the manufacturing industries.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as PPE.

Hazards

Typical workplace hazards include:

- chemicals and hazardous materials
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in confined spaces, or in environments subjected to heat, noise, dust or vapours.

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical problems include:

- required information/materials not available
- required tool/equipment not available
- conflict of work priorities
- interpersonal conflict within the team.

Appropriate action for non-routine problems may be reported to designated person or other action specified in the procedures.

Unit Sector(s)

Not applicable.

MSAPMSUP201A Receive or despatch goods

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the handling of materials by an operator as an adjunct to the job of making product. It applies to a limited range of materials. It is NOT intended to be an alternative warehousing competency.

This competency is typically performed by operators working either independently or as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who receive, process despatch orders, despatch products/materials and maintain records. The key factors are correctly identifying and selecting the goods to be despatched and ensuring they are despatched to the correct location.

It includes:

- checking order requests/consignment note documentation for products/materials to be despatched
- identifying and selecting the correct products/materials
- organising products/materials to be moved into the right place by the right time, using the appropriate handling equipment
- preparing products/materials for despatch
- completing and checking all documentation
- updating records.
-

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify work requirements.	1.1 Read and interpret documentation. 1.2 Identify required schedules for receipt or despatch. 1.3 Identify correct product/material. 1.4 Plan work sequence using workplace and product knowledge. 1.5 Select appropriate materials handling equipment as required. 1.6 Identify OH&S requirements.
2. Move materials into/out of storage or from production.	2.1 Check paperwork and identity of materials. 2.2 Check for completeness and/or damage. 2.3 Take action on non-conforming products/materials. 2.4 Handle and move products/materials into/out of storage safely. 2.5 Store materials safely as necessary.
3. Prepare goods for	3.1 Identify and read workplace procedures for

ELEMENT	PERFORMANCE CRITERIA

despatch.	assembling and completing orders. 3.2 Select and check goods for despatch. against product/material knowledge, labels and other identification systems. 3.3 Sort, assemble and consolidate products as necessary. 3.4 Secure order and place in storage areas, in accordance with schedule. 3.5 Check order against despatch schedule and order form.
4. Complete materials movement records.	4.1 Complete materials movement records (in or out). 4.2 Update records as required. 4.3 Complete other paperwork and records as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the materials handling processes and requirements sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines is required.

Knowledge is required of the product/material, its properties and uses sufficient for correct receipt, storage and despatching. Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to the materials handled.

Competence includes the ability to apply and/or describe:

- product/material knowledge
- inventory and ordering systems
- transport requirements and restrictions for products/materials
- correct OHS procedures
- storage/handling principles and procedures
- material hazard properties and their implications for safe handling and storage
- significance of material to customers; transport requirements and restrictions for materials
- plan own work, including predicting consequences and identifying improvements

- identify and describe own role and role of others involved directly in the processing of orders and despatching of products
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as product requirements and job priority as relevant to the practical completion of the job.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, e.g. to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- packaging standards are met consistently
- procedures and work instructions are read and interpreted correctly
- potential problems are recognised and action is taken (ie, the problem is fixed or reported)
- action is taken to ensure problems are dealt with in a timely manner
- problems caused by product/material issues are recognised and an appropriate contribution made to a solution
- items initiated are followed through until final resolution has occurred.
- effective communication between team members, supervisors and other staff is maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

Assessment method and context

Assessment will occur using industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation over time on a processing plant
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency covers the handling of a limited range of products/materials and their moving into and out of a plant/storage. It is NOT intended for people who, as a major function, operate a warehouse. The appropriate Transport and Distribution competencies should be used here.

This competency may require the operation of forklift trucks or other regulated load shifting devices which are NOT included in this competency, and so would be a co-requisite competency.

The terms order request, documentation, labels, transportation requirements 'paperwork' and 'records' mean any and all relevant information and data whether it is manual, paper based, electronic or verbal, either in person or by phone/radio.

This competency does not imply that moving materials into and from storage/plant are conducted equally, or even using similar techniques. Customers may be internal or external and the loading/unloading of products/materials may mean getting them onto/off a truck or simply from/to the next department.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment.
- computers, bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, including A-frames, stillages, containers, elevated platforms and communication equipment.

Hazards

Typical hazards include:

- inappropriate movements and postures
- physical and atmospheric hazards of materials
- height or depth of storage receptacles
- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat
- manual handling hazards.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)

- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork.
- product requirements
- job priority
- product/material variations.

Variables

Key variables to be monitored include:

- types of products or materials to be received/despached
- handling heights
- types of equipment
- types of workplace documentation
- atmospheric conditions.
-

Unit Sector(s)

Not applicable.

MSAPMSUP240A Undertake minor maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to operators who are involved in providing basic maintenance and the resolving of routine problems to procedures. It does not cover activities normally requiring traditional trade training.

Application of the Unit

Application of this unit

In a typical scenario a plant operator does minor maintenance activities on the plant and equipment being operated. For instance the pressure drop across a filter unit may be high, indicating the filter cartridge needs changing. The operator takes the filter unit out of operation, cleans the unit, uses the correct spanner to open the lid, installs a fresh cartridge, closes the unit using the spanner again, then cleans up the area and disposes of the spent cartridge. Typically this sort of maintenance will be done on the plant and will not require workshop type facilities.

The operator will:

- be aware of and contribute to a safe working environment
- identify and check equipment for faults
- perform basic maintenance to procedures
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify maintenance requirements.	1.1 Identify equipment variations/irregularities using observed data and plant records. 1.2 Assess the urgency/priority of the situation. 1.3 Identify appropriate corrective action. 1.4 Identify correct tools and materials. 1.5 Assess the impact of the maintenance activity and communicate to appropriate personnel. 1.6 Identify hazards and risk controls. 1.7 Identify work permit requirements.
2. Prepare for maintenance activity.	2.1 Ensure equipment is turned off and isolated as required. 2.2 Clear the area of obstructions and hazardous materials. 2.3 Obtain appropriate tools, parts, materials and procedures. 2.4 Obtain the appropriate work permits and adhere to the requirements. 2.5 Communicate the impending maintenance activity to the appropriate personnel.

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
3. Perform maintenance activity.	3.1 Access all relevant information. 3.2 Undertake maintenance activity according to procedures. 3.3 Use tools and maintenance techniques correctly. 3.4 Restore equipment to normal working condition. 3.5 Leave the work area in a clean and safe condition. 3.6 Ensure permits are signed off as appropriate.
4. Test equipment.	4.1 Test equipment according to procedures. 4.2 Return equipment to service. 4.3 Ensure equipment meets normal operating requirements.
5 Record maintenance activity.	5.1 Complete maintenance logs/plant history records. 5.2 Report maintenance activity to relevant personnel. 5.3 Identify and report outstanding maintenance requirements to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving maintenance problems, including:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults

- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- urgency and timeliness factors in maintenance
- maintenance planning/scheduling/records systems
- identification of tools, materials and spare parts
- basic techniques for using and handling tools
- physical measurement, alignment and clearance principles.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to interpret plant data and maintenance schedules.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Where the completion of this unit requires working under a permit/clearance, then competency must also be established in *PMAPER200C Work in accordance with an issued permit*, or other appropriate unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate equipment tests are undertaken and analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- maintenance activities are completed safely and to procedures.

Assessment method and context

Assessment will occur on industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Maintenance activities

This competency unit includes minor maintenance such as the following:

- operational maintenance (eg connection-disconnection of hoses, greasing, lubrication and lubricant systems, adjusting sealing glands, cleaning and changing filters, 'nipping up' flanges)
- general cleaning
- removal and replacement (eg gland packing, changing blades or cutters, replacing gaskets, replacing /maintaining seals, changing filter elements, servicing strainers).

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools
- specialised tools
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, liquids and gases under pressure or flowing
- hot surfaces or materials
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out of specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations

- equipment in need of maintenance.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures
- manufacturer specifications, instructions, service manuals and other information.
-

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Identify requirements.	1.1 Interpret order/paperwork. 1.2 Check and take action on special requirements as needed. 1.3 Check identity of materials. 1.4 Check for completeness and damage. 1.5 Take action on non-conforming materials/loads.
2. Move materials to/from storage/production.	2.1 Select items to be moved based on job requirements and procedures/work instructions. 2.2 Load materials according to standard procedures. 2.3 Move materials as needed. 2.4 Store/place materials safely.
3. Complete documentation.	3.1 Complete material movement records. 3.2 Update stock records as required. 3.3 Complete other paperwork and records as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge of goods and materials sufficient to recognise variance from specifications and then determine appropriate action that is consistent with operating guidelines.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Competence includes the ability for the practical completion of the job to:

- apply and/or explain procedures for receiving/despatch of goods, and reconciliation of orders and invoices
- apply and/or describe:
 - storage/handling principles and procedures
 - material hazard properties and their implications for safe handling and storage
 - significance of material to customers
 - transport requirements and restrictions for materials.
- plan own work, including predicting consequences and identifying improvements
- identify when the operator is able to rectify problems, when assistance is required and who is the appropriate source for assistance
- identify and describe own role and role of others involved directly in the receiving of goods
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as incorrect/incomplete paperwork; wrong goods.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, eg to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to

- recognise the importance of material properties and qualities
- apply approved procedures
- take appropriate action to resolve problems or report problems to appropriate personnel.

Consistent performance should be demonstrated. For example, look to see that

- upstream and downstream communication is timely and effective
- procedures and work instructions are read and interpreted correctly
- problems are identified and appropriate action is taken (ie, the problem is fixed or reported)
- all safety procedures are followed.

Assessment method and context

Assessment will occur using industrial goods and will be undertaken in a work-like environment

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to operators working either independently or as part of a work team.

Procedures

All operations are performed in accordance with procedures.

Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- goods identification numbers and codes
- manifests
- picking slips, merchandising transfers, stock requisitions and bar codes
- manufacturer specifications
- supplier and/or client instructions.

Hazards

Typical hazards include:

- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- incorrect goods delivered
- incomplete orders and shipments
- inappropriate packaging
- wrong or incomplete labelling
- incomplete or incorrect paperwork
- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)
- handling of materials which do not meet specifications
- resolving conflicting priorities

- ensuring the correct material arrives at the correct place at the right time.

Variables

Key variables to be monitored include:

- compliance with 'receiving' procedures
- appropriate handling of incoming goods
- completion of documentation
- condition of packaging and lifting or moving locations
- availability of lifting/moving equipment
- unloading practices
- variations in provider documentation.

Unit Sector(s)

Not applicable.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non- routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Unit Sector(s)

Not applicable.

MSFAH4001 Advise on security technology, hardware and services

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers the application of architectural hardware product and service knowledge to provide advice to customers/clients and other sales staff with regard to design, technical features and uses of architectural hardware products, ancillary products, prices and warranties. It applies to architectural hardware specifiers who provide advice to clients on product selection, price, services and warranties in regards to architectural hardware. Clients include those requiring architectural hardware schedules and products for construction and renovation projects.

This unit requires the ability to source relevant information, determine client requirements and use appropriate techniques to accurately identify architectural hardware requirements to meet client needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Architectural hardware

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Research architectural hardware product

1.1 Job requirements are correctly identified according to relevant product information

1.2 Suitable architectural hardware products are identified by

	range		accessing relevant sources of information
		1.3	Hardware components are identified to suit client specifications and applicable legislation, codes and national standards
		1.4	Available product options and features are evaluated for suitability and value
		1.5	Operation of architectural hardware products and equipment is safely and accurately demonstrated according to organisational requirements
		1.6	Knowledge of measurement systems used in architectural hardware product range is demonstrated
2	Recommend door and window hardware products	2.1	Customer/client needs are accurately identified
		2.2	Detailed manufacturer product specifications are provided, when applicable, and explained to customer/client to assist buying decisions according to legislative requirements
		2.3	Features and benefits of products are demonstrated to customer/client using appropriate interpersonal techniques
3	Identify hardware quantities	3.1	Quantities of architectural hardware products required are accurately determined from customer/client specifications
		3.2	Measuring tools are accurately used to determine imperial or metric measures relevant to job requirements
		3.3	Customer/client is provided with accurate quotation for quantities estimated
4	Advise on hardware product warranties	4.1	Comparisons between architectural hardware manufacturer's warranty terms are clearly explained to customer
		4.2	Individual product warranty terms and conditions are confirmed from relevant sources of information, including Regulation 90, and accurately conveyed to customer/client
		4.3	Customer/client is provided with written information regarding individual product warranty terms and conditions, especially extended or promotional

			warranties, according to organisational requirements
5	Negotiate price and payment options	5.1	Store recommended retail pricing for various brand options is accurately conveyed to customer/client according applicable legislation, codes and national standards
		5.2	Individual product prices are negotiated, where necessary, according to organisational requirements to achieve sales
		5.3	Store payment options are accurately conveyed to customer/client and a preferred option negotiated following organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Job requirements include:

- instructions from supervisor/management
- work schedules and completion dates
- specific client requirements
- site requirements
- security clearance and access requirements
- reporting and documentation requirements
- budget allocations
- National Construction Code (NCC)
- AS 1428 (Set)-2010 Design for access and mobility Set
- AS 1905.1-2005 Components for the protection of openings in fire-resistant walls – Fire-resistant door sets
- AS 4145.2-2008 Locksets and hardware for doors and

windows – Mechanical locksets for doors and windows in buildings

- AS 1670.1-2004 Fire detection, warning, control and intercom systems – System design, installation and commissioning – Fire
- AS 1530.1-1994 Methods for fire tests on building materials, components and structures – Combustibility test for materials

Information includes:

- value or importance of assets
- insurance policy agreements
- special rooms or areas requiring higher level of protection
- current/proposed operating environments
- assets and systems
- activities and functions
- existing security systems/equipment
- existing management strategies
- business and operational plans
- incident history

Architectural hardware includes:

- hinges
- pivots
- door track
- locks
- handles
- door furniture
- door closers
- exit devices
- sequence selectors
- cylinders
- keying and master keying
- bolts
- door stops
- door seals
- kick plates
- door protection
- sundry hardware
- sanitary hardware
- automatic operators
- access control devices

Relevant sources of information include:

- product catalogues
- reference manuals
- technical specifications
- product instructions

Applicable legislation, codes and national standards include:

- drawings and illustrations
- technical sales staff
- relevant Commonwealth and state/territory legislation
- work health and safety (WHS) and environmental issues
- equal employment opportunity (EEO)
- industrial relations
- anti-discrimination and diversity
- licensing arrangements
- Australian standards
- quality assurance and certification requirements
- relevant industry codes of practice
- trade practices
- award and enterprise agreements
- privacy related legislation

Organisational requirements include:

- legal and organisational operational policies and procedures
- operations manuals
- induction and training materials
- insurance policy agreements
- client and organisational confidentiality requirements
- organisational goals/objectives/plans/systems/processes
- employer and employee rights and responsibilities
- own role, responsibility and delegation
- quality and continuous improvement processes and standards
- client service standards
- defined resource parameters
- WHS policies/procedures/programs
- emergency and evacuation procedures
- duty of care, code of conduct, code of ethics, access and equity policy, principles and practice
- records and information systems and processes
- communication channels
- reporting procedures

Customers or clients include:

- owner
- property/other agent
- tenant
- building supervisor
- manager
- project manager
- government and legal instruments/agencies

Interpersonal techniques

- verbal or non-verbal language
- two-way interaction

include:

- constructive feedback
- active listening
- questioning to clarify and confirm understanding
- interpreting non-verbal and verbal messages
- observation techniques
- use of positive, confident and cooperative language
- control of tone of voice and body language
- use of language and concepts appropriate to cultural differences
- use of clear presentations of options and consequences
- demonstrating flexibility and willingness to compromise

Measuring tools include:

- tape measures
- callipers
- vernier
- steel rule

Assessment Requirements for MSFAH4001 Advise on security technology, hardware and services

Modification History

Release 1 - New unit of competency

Performance Evidence

- Match architectural hardware products to a client brief or specification identifying suitable architectural hardware brands, prices and warranty conditions
- Ensure selected architectural hardware products comply with relevant legislation, codes and standards
- Explain and demonstrate architectural hardware products to clients
- Undertake imperial and metric measurements of job requirements and matching to architectural hardware measuring systems
- Estimate quantities of required architectural hardware products
- Supply accurate quotes for architectural hardware products and services and negotiate prices
- Arrange service and repairs
- Read and interpret plans, designs and specifications
- Apply basic numeracy techniques
- Apply safe and efficient work practices
- Relate to people from different social and cultural backgrounds
- Deal with customers/clients that may be difficult or abusive
- Deal with customers/clients that have special needs
- Enter data using basic keyboarding skills

Knowledge Evidence

- Organisational policies and procedures, in relation to:
 - sales/customer services
 - methods of dealing with special needs/requests of customers
 - customer complaints
 - price negotiation
- Available architectural hardware/keying system options and basic requirements for installation
- Types and functions of architectural hardware/keying system
- Building construction methods and types
- Organisational and client confidentiality requirements
- Basic problem-solving strategies
- Operational principles of information technology

- Principles of effective communication
- Documentation requirements and processes

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to tools, equipment, materials and documentation, relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials, safety procedures, regulations and all necessary facilities.

MSFAH4002 Prepare architectural door hardware schedules

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers examining and assessing door hardware and keying requirements across commercial, industrial and residential applications. It requires the ability to source relevant information, determine client requirements and use appropriate assessment methods to ensure an accurate determination of architectural hardware equipment/system options to meet client needs. The unit also includes compiling equipment and system requirements keying into schedules for clients.

Where estimates and quotes specifically for security systems are required, *CPPSEC3047A Provide estimate and quote on security system* should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Architectural hardware

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------------|-----|---|
| 1 | Obtain brief from clients | 1.1 | Job requirements are reviewed and clarified with appropriate persons in accordance with organisational requirements |
| | | 1.2 | Discussions with customer/client are conducted to establish and clarify scope of work |

- | | | | |
|---|--|-----|--|
| | | 1.3 | Effective interpersonal techniques are applied when interacting with clients |
| | | 1.4 | Specific site requirements are identified and details are correctly documented |
| | | 1.5 | Architectural hardware requirements are discussed and applicable legislation, codes and national standards are clarified and agreed upon |
| | | 1.6 | Brief documents and architectural plans are arranged in accordance with organisational requirements or company policies |
| 2 | Gather, interpret and review information for preparation of hardware schedules | 2.1 | Site restrictions, regulations and requirements are identified and complied with in accordance with applicable legislation, codes and national standards, and organisational requirements |
| | | 2.2 | Information is gathered from identified sources and is relevant to assignment requirements in accordance with applicable legislation, codes and national standards, client and organisational requirements |
| | | 2.3 | An assessment is carried out to identify door and frame types and locations to facilitate the accurate determination of architectural hardware requirements |
| | | 2.4 | Clients activities and existing architectural hardware arrangements are reviewed to ensure uniformity throughout project |
| | | 2.5 | Inconsistency and environmental factors affecting the architectural hardware of the site are identified and assessed in accordance with organisational policies and procedures |
| 3 | Produce architectural door hardware schedules | 3.1 | Information is recorded and documented in accordance with computer program and/or organisational template requirements |
| | | 3.2 | Architectural hardware is integrated to reflect building security and electronic requirements |
| | | 3.3 | An architectural hardware schedule is prepared in accordance with industry and organisational standards of style, format and accuracy |
| | | 3.4 | Recommendations for architectural hardware and |

			alternative options are made in accordance with organisational requirements
		3.5	Documentation is processed in accordance with applicable legislation, codes and national standards, assignment and organisational requirements
		3.6	A comprehensive assessment of client architectural hardware requirements is completed within designated timeframes and presented for review to appropriate person
4	Prepare and review keying schedules	4.1	Principles of master keying are applied in accordance with industry practice and organisational requirements
		4.2	Keying matrix is developed to client requirements, allowing for future system expansion and mechanical capabilities of system
		4.3	Client keying requirements are confirmed and clarified according to organisational procedures
		4.4	Appropriate levels of security/access are reviewed with respect to clients assets, activities and existing security arrangements
		4.5	Information is recorded and documented in accordance with computer program and/or organisational template requirements
		4.6	Client requirements are matched to the mechanical possibilities and limitations of master key systems
		4.7	Options are identified and client is advised on options and alternatives
		4.8	Sources of assistance in assessing requirements for key systems and master key systems are identified and assistance is sought from appropriate person in accordance with organisational procedures
5	Finalise documentation for submission to client	5.1	Final architectural hardware and/or keying requirements are reviewed and confirmed with client in accordance with organisational requirements
		5.2	Documentation is accurately prepared and processed and stored in accordance with client, legislative and organisational requirements

- 5.3 Architectural hardware and keying schedules and other documentation are prepared according to organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Job requirements include:

 - visual inspections
 - review of client floor plans and supporting documentation
 - questioning policy/insurance companies/other bodies
- Site assessment includes:**
 - type and condition of building structures
 - identification of risk areas/weak points
 - site restrictions, regulations and requirements
 - access and egress patterns
 - floor plan
 - existing security equipment/systems
- Door types include:**
 - solid core doors
 - hollow core doors
 - fire rated doors
 - acoustic doors
 - glazed doors
 - sliding doors
 - folding doors
 - frameless doors
 - glass doors
 - automatic doors
 - blast doors
 - ballistic doors
 - security screens
 - other door types

- Frame types include:**
- steel frames
 - aluminium frames
 - timber frames
 - frameless doors
 - cavity frames
 - sliding frames
 - other frames
- Environmental factors include:**
- physical environment (e.g. climate proximity to salt water, pools, chemical and dusty environments)
- Computer programs include:**
- general and propriety software programs
- Organisational templates include:**
- enterprise specific schedules
 - documents or proformas used to document or record schedules or information
- Documentation includes:**
- checklists
 - reports
 - floor plans
 - client briefs
 - specifications
 - schedules
 - site survey
- Key systems include:**
- key to differ (KD)
 - key to alike (KA)
 - master keyed (MK)
 - grand master key (GMK)
 - great grand master key (GGMK)
- Master key systems include:**
- cylinders operated by more than one key, including:
 - restricted, semi-restricted and non-restricted system numbers
 - manufacturer restricted
 - factory restricted
 - locksmith restricted/managed
 - association restricted

Unit Mapping Information

Supersedes and is equivalent to LMFAH4002A Prepare architectural door hardware schedules

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFAH4002 Prepare architectural door hardware schedules

Modification History

Release 1 - New unit of competency

Performance Evidence

- Identify site requirements through inspection, discussion with clients and identification of relevant legislation, codes and standards
- Accurately identify door and frame locations, existing architectural hardware, current or future client use patterns and environmental considerations
- Match architectural hardware products and systems to a client brief or specification and make recommendations, including alternative options
- Preparation of keying schedules that match to security, access, and current and future use requirements of client and identifying architectural hardware needs
- Observe and assess technical hardware and keying requirements
- Read and interpret plans, designs and specifications
- Apply basic numeracy techniques
- Apply safe and efficient work practices
- Communicate in a clear and concise manner
- Relate to people from different social and cultural backgrounds
- Prepare schedules and other required documentation
- Plan and sequence work tasks
- Enter data using basic keyboarding skills

Knowledge Evidence

- Risk assessment methods and procedures
- Available architectural hardware/keying system options and basic requirements for installation
- Types and functions of architectural hardware/keying system
- Building construction methods and types
- Organisational and client confidentiality requirements
- Basic problem-solving strategies
- Operational principles of information technology
- Principles of effective communication
- Documentation requirements and processes

Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

MSFBA1001 Construct a basic roll-up blind

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing a basic roll-up blind ready for installation.

Applications may include a variety of employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Prepare for work	1.1	Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.2	Work orders are checked and confirmed with appropriate personnel
		1.3	Tools and equipment suitable for construction are identified and checked for safe and effective operation
		1.4	Materials are selected and checked

		1.5	Hardware is selected according to work instructions
2	Complete construction	2.1	Allowances for hardware, joins and hems are calculated and recorded
		2.2	Material is laid out laid out flat and square on a cutting table large enough to take full width of material and marked using chalk, markers or pencil according to work instructions
		2.3	Fabric is cut according to work order
		2.4	Bottom and side hems are finished
		2.5	Spline is selected, cut and attached to top of blind
		2.6	Roller is cut to length and attached to spline
		2.7	Control mechanism and pin end are attached
		2.8	Lath and pull ring are attached
		2.9	Child safety mechanisms are selected and attached
3	Apply quality checks	3.1	Finished blind is checked against work order and tested within limits of normal operation for correct operation
		3.2	Parts of the work that do not comply with work order are repaired or re-worked
4	Finalise operation and maintain equipment	4.1	Completed work is cleaned, packaged and stored
		4.2	Tools and equipment are cleaned, maintained and stored and any faulty tools and equipment are reported to supervisor
		4.3	Work area is cleaned and waste is disposed of according to workplace practices

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state/territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Personal protection needs include:

- safety glasses/goggles
- hearing protection
- safety footwear
- protective clothing and head wear
- respiratory protection

Work orders include:

- quotations for work, job cards and customer orders
- specifications, including design, size, colour and quantity

Appropriate personnel include:

- assessor
- trainer
- supervisor
- manager or any other person responsible for the work activity

Tools and equipment include:

- cutting bench
- shears
- knives
- cut off saws
- sewing machines
- needles
- staple gun
- double sided tape dispenser
- file
- mallet and hammer

Materials include:

- polyester blend
- metalised
- PVC coated fibreglass

Hardware includes:	<ul style="list-style-type: none">• twill weave• flock coated• roller• lath• control mechanism• pin end• pull ring• cassette head boxes• side guides• side channels• motors and chains (plastic and stainless steel)
Work instructions include:	<ul style="list-style-type: none">• instructions for constructing a basic roll-up blind
Child safety mechanisms include:	<ul style="list-style-type: none">• those required by legislation or codes of practice
Waste includes:	<ul style="list-style-type: none">• textiles, metal and timber• waste removal should be in accordance with workplace practices and environmental legislation covering disposal of industrial waste
Workplace documentation includes:	<ul style="list-style-type: none">• time sheets• customer care cards• work orders• reports

Unit Mapping Information

Supersedes and is equivalent to LMFBA1001A Construct a basic roll up blind

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFBA1001 Construct a basic roll-up blind

Modification History

Release 1 - New unit of competency

Performance Evidence

- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing a basic roll-up blind
- Select, set up and maintain equipment in accordance with manufacturer instructions and workplace practices
- Communicate with workplace supervisor to:
 - confirm work orders and instructions
 - report work outcomes
- Report process for materials faults, damaged products or equipment
- Cut fabrics accurately according to work orders
- Construct at least one (1) basic roll-up blind
- Use pre-checking and inspection techniques to anticipate production problems, avoid re-working and wastage
- Adapt to new situations
- Collect and organise information
- Plan tasks and identify task outcomes
- Use tools and equipment
- Set up and start equipment

Knowledge Evidence

- Types, characteristics, uses and limitations of roll-up blind materials
- Identification of equipment, processes and procedures
- Workflow in relation to constructing a basic roll-up blind
- State/territory WHS legislation, regulations, standards and codes of practice relevant to constructing a basic roll-up blind
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Terms used to describe components of a roll-up blind

- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to constructing a basic roll-up blind, and documentation on workplace practices, including standard operating procedures for constructing a basic roll-up blind.

MSFBA2001 Use blinds, awnings, security screens and grilles hand and power tools

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers using hand and power tools in applications relating to the blinds and awnings, and security screens and grilles sectors of the furnishing industry. It applies in workplaces and on-site environments and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings, security screens and grilles

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify hand and power tools	1.1	Types of hand and power tools and their functions are identified
		1.2	Sources of power supply are recognised
		1.3	Work health and safety (WHS), legislative requirements and workplace practices for using hand and power tools are recognised and adhered to
2	Select hand tools	2.1	Appropriate personal protective equipment is selected, correctly fitted and used

- | | | | |
|---|------------------------------|-----|---|
| | | 2.2 | Hand tools are selected consistent with the needs of the task |
| | | 2.3 | Tools are checked for safe operation and any faults are corrected or tagged and reported to appropriate personnel |
| | | 2.4 | Equipment is selected to hold or support material for hand tool operation |
| 3 | Use hand tools | 3.1 | Material is located and held in position for hand tool operation |
| | | 3.2 | Hand tools are held correctly for safe operation |
| | | 3.3 | Hand tools are used according to manufacturer instructions and safe work practices |
| | | 3.4 | Hand tools are safely located when not in immediate use |
| 4 | Select power tools | 4.1 | Power tools are selected consistent with the needs of the task |
| | | 4.2 | Power tools are checked for serviceability and safe operation in accordance with WHS requirements |
| | | 4.3 | Power tool faults are corrected or tagged and reported to appropriate personnel |
| | | 4.4 | Equipment is selected to hold or support materials for power tool operation |
| 5 | Use power tools | 5.1 | Material is held in position for power tool operation |
| | | 5.2 | Power tools are set up for use according to manufacturer instructions and safe working practices |
| | | 5.3 | Power tools are held correctly for safe and efficient use |
| | | 5.4 | Power tools are used according to manufacturer instructions and safe work practices |
| | | 5.5 | Power tools are safely located when not in immediate use |
| 6 | Clean up work area and tools | 6.1 | Hand and power tools are cleaned after use |
| | | 6.2 | Operator maintenance is carried out following completion of task. |

- 6.3 Hand and power tools are stored following completion of task
- 6.4 Equipment is cleaned, maintained and stored
- 6.5 Work area is cleared and waste removed
- 6.6 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Hand tools include:**
- calculators
 - pop rivet gun
 - screwdrivers
 - combination saw
 - panel saws
 - hack saws
 - socket set
 - hand grinder
 - hammers
 - files
 - tin snips
 - spanners
 - level
 - square
 - measuring tape
 - hex keys

- caulking gun
- markers
- tensioning devices
- G clamps
- string lines
- scissors
- eyelet punches
- laser level
- stud finder
- pipe bender
- knives
- sheers
- measuring device
- straight edge
- rollers
- metal press
- tap and die sets

Power tools include:

- bench grinders
- hammer drills
- cordless screwdriver/drill
- air drills
- jig saws
- drop saw
- docking saw
- circular saw
- press-stud machine
- hot knives
- staple gun
- hollow wall anchor gun
- planer

Power supply includes:

- battery, mains, electricity and pneumatic

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- use of personal protective equipment
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation

- award and enterprise agreements
 - industrial relations
 - Australian Standards
 - confidentiality and privacy
 - WHS
 - the environment
 - equal employment opportunity (EEO)
 - anti-discrimination
 - relevant industry codes of practice
 - duty of care and heritage
 - legal, organisational and site guidelines
 - policies and procedures relating to own role and responsibility
 - quality assurance
 - procedural manuals
 - quality and continuous improvement processes and standards
 - emergency and evacuation
 - ethical standards
 - recording and reporting
 - access and equity principles and practices
 - equipment use
 - maintenance and storage
 - environmental management (waste disposal, recycling and re-use guidelines)
 - tolerances
 - following manufacturer instructions and specifications
 - safety glasses/goggles
 - hearing protection
 - safety footwear
 - protective clothing and head wear
 - respiratory protection
 - trainer
 - assessor
 - supervisor
 - team leader
 - maintenance officer
 - manager or any person responsible for the activities in the workplace/worksite
 - clamps, jigs, braces and ladders
 - textiles (canvas, acrylic, PVC, clear PVC, mesh and
- Workplace practices include:**
- Personal protective equipment includes:**
- Appropriate personnel include:**
- Equipment includes:**
- Material includes:**

- binding)
- metals (aluminium and steel)
- timber
- steel or aluminium material in extruded or sheet form
- synthetic, aluminium or steel screen material
- Safe operation includes:** • safe work practices followed in accordance with industry and enterprise specific policies and procedures
- Waste includes:** • textiles, metals, timber, metal off-cuts and shavings
- waste removal should be in accordance with enterprise policies and environmental legislation covering disposal of industrial waste
- Workplace documentation includes:** • time sheets
- customer care cards
- work orders and reports, such as machining method, product type, size, inspection, grading and labelling outcomes, storage locations, quality outcomes, hazards, and incidents or equipment malfunctions

Assessment Requirements for MSFBA2001 Use blinds, awnings, security screens and grilles hand and power tools

Modification History

Release 1 - New unit of competency

Performance Evidence

- Communicate with workplace/worksite supervisor to:
 - confirm work orders and instructions
 - identify problems
- Apply safe handling practices for equipment, products and materials and minimise the risk of injury to self and others
- Prevent damage to goods, tools, equipment or products and maintain required production output and product quality
- Comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for use of hand and power tools
- Identify, select and safely use hand and power tools for manufacturing and fitting blinds, awnings, security screens and grilles in the workplace/worksite
- Report outcomes of hand and power tool use and maintenance problems
- Use pre-checking and inspection techniques to anticipate problems, avoid re-working and wastage
- Participate in establishing new ideas and work specifications for selecting and using hand and power tools
- Plan and organise own work, including the preparation and layout of the work area, and obtaining equipment and materials to avoid back tracking

Knowledge Evidence

- State/territory WHS legislation, regulations, standards and codes of practice relevant to hand and power tool use
- Workplace and worksite, requirements, policies and procedures for hand and power tool use
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and workplace/worksite protocols
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Procedures for the reporting, recording and maintenance of workplace records and information
- Procedures for reporting and recording faulty hand and power tools

- Characteristics of steel and/or aluminium, steel and/or aluminium products and defects
- Industry standard cross-sections and lengths
- Relevant storage systems and labelling

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location, and standard operating procedures for using blinds, awnings security screens and grilles hand and power tools relevant to manufacturing or fitting blinds, awnings, security screens and grilles.

MSFBA2002 Set up, operate and maintain blinds and awnings sector static machines

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers set up, operation and maintenance of static machines used for the production of blinds and awnings. It applies in a workplace environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements, workplace practices and personal protection needs are identified and observed throughout the work
		1.2	Work orders are checked and confirmed
		1.3	Machines, cutting tools and templates are identified, selected and checked for safe operation
		1.4	Material for machining is selected and inspected for quality

- | | | | |
|---|------------------------------|-----|---|
| | | 1.5 | Procedures are determined for minimising waste and maximising energy efficiency while completing the job |
| 2 | Set up machines | 2.1 | Safety equipment, including emergency stops, gauges, guards and controls are checked |
| | | 2.2 | Machine settings and adjustments are made in accordance with job requirements and machine and tool manufacturer instructions |
| | | 2.3 | Trial runs are conducted to check machine operation, accuracy and quality of finished work |
| | | 2.4 | Necessary adjustments are made to machine settings |
| 3 | | 3.1 | Pre-start up checks are carried out on equipment following workplace practices |
| | | 3.2 | Material is fed into machine in accordance with manufacturer instructions, safe handling procedures and workplace practices |
| | | 3.3 | Machine is operated in accordance with its designed capacity and purpose, tooling requirements and to manufacturer specifications |
| | | 3.4 | Machine operation is monitored to ensure product quality and output |
| | | 3.5 | Waste quantities are checked and minimised |
| | | 3.6 | Items that do not meet quality requirements are repaired, recycled or discarded according to workplace practices |
| | | 3.7 | Machining process and equipment faults are recorded and reported to the appropriate personnel |
| 4 | Conduct operator maintenance | 4.1 | Equipment lock out procedures are followed in accordance with WHS legislation and workplace practices |
| | | 4.2 | Cutting tools are checked for blunt or damaged condition following workplace practices |
| | | 4.3 | Cutting tools are removed and replaced in accordance with manufacturer specifications |
| | | 4.4 | Machining area is kept clear of dust, off-cuts and debris in accordance with WHS requirements |

- | | | | |
|---|---|-----|--|
| 5 | Clean up work area and maintain equipment | 5.1 | Material that can be re-used is collected and stored |
| | | 5.2 | Waste and scrap are removed following workplace practices |
| | | 5.3 | Equipment and work area are cleaned, maintained and stored following workplace practices |
| | | 5.4 | Operator maintenance is completed in accordance with manufacturer specifications and workplace practices |
| | | 5.5 | Unserviceable equipment is tagged and reported to appropriate personnel |
| | | 5.6 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Assessment Requirements for MSFBA2002 Set up, operate and maintain blinds and awnings sector static machines

Modification History

Release 1 - New unit of competency

Performance Evidence

- Accurately interpret work orders and job specifications to prepare for setting up and operating static machines
- Apply safe handling requirements for equipment, machines, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Communicate with site supervisor to:
 - confirm work orders and instructions
 - identify problems
- Identify materials used in static machines
- Select and set up static machines following manufacturer instructions and workplace practices
- Operate static machines following manufacturer specifications and safe work practices, including the use of safety equipment and personal protective equipment
- Maintain static machines following manufacturer specifications and workplace practices
- Report outcomes of setting up, operating and maintaining static machines
- Use pre-checking and inspection techniques to anticipate production problems, avoid re-working and wastage
- Identify problems and equipment faults and demonstrate appropriate response procedures
- Participate in establishing new ideas and work specifications for setting up, operating and maintaining static machines
- Plan and organise own work, including the preparation and layout of the work area, and obtaining equipment and materials to avoid backtracking
- Accurately plan and organise work activities
- Efficiently manage own responsibilities and timelines for completion of work
- Use workplace technology related to the production task, including specified tools, equipment, calculators and measuring devices

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for using static machines
- Organisational and workplace requirements, policies and procedures for using static machines

- Interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of machines and equipment and procedures for their safe use, operation and maintenance
- Set up and operation of static machines
- Characteristics of materials processed using static machines
- Cutting patterns and sequences
- Identification of cutting tool condition and fault reporting
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Procedures for reporting machinery faults and material defects
- Mathematical procedures for estimation and measurement
- The range, characteristics, uses and limitations of blinds and awnings sector static machines
- General workplace quality standards and procedures
- Workplace guidelines regarding acceptable tolerance levels
- Workplace safety policies and procedures

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to setting up, operating and maintaining static machines; specifications and standard operating procedures.

MSFBA2003 Select and apply blinds and awnings hardware and fixings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers selecting hardware and other fixings in the manufacture and installation of blinds and awnings. It applies in workplace and on-site environments and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan and prepare work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are identified and followed
		1.2	Personal protective equipment is used correctly throughout the work
		1.3	Types of hardware and fixings are identified and selected for the work
		1.4	Tools and equipment for application are identified and checked for safe operation
2	Apply and/or fit	2.1	Hardware items are laid out ready for application

	and finish	2.2	Hardware and fixings are applied as required according to work instructions and workplace practices
		2.3	Work is checked against required quality standards
3	Finalise operation and maintain equipment	3.1	Work area is cleaned and waste removed
		3.2	Unused hardware is collected and stored for re-use or disposal following workplace practices
		3.3	Waste and scrap materials are dealt with following workplace practices
		3.4	Hand and power tools and equipment are cleaned, maintained and stored in accordance with workplace practices
		3.5	Machinery is cleaned and left in safe mode
		3.6	Faulty and/or defective equipment is tagged and reported to appropriate personnel
		3.7	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment

Legislative requirements include:	<ul style="list-style-type: none">• first aid equipment• hazard and risk control and elimination of hazardous materials and substances• manual handling, including lifting and carrying• applicable legislation from all levels of government that affect organisational operation• award and enterprise agreements• industrial relations• Australian Standards• confidentiality and privacy• the environment• equal employment opportunity (EEO)• anti-discrimination• relevant industry codes of practice• duty of care and heritage
Workplace practices include:	<ul style="list-style-type: none">• legal, organisational and site guidelines• policies and procedures relating to own role and responsibility• quality assurance• procedural manuals• quality and continuous improvement processes and standards• emergency and evacuation• ethical standards• recording and reporting• access and equity principles and practices• equipment use, maintenance and storage• environmental management (waste disposal, recycling and re-use guidelines)
Personal protective equipment includes:	<ul style="list-style-type: none">• safety glasses/goggles• hearing protection• safety footwear• protective clothing• respiratory protection
Hardware includes:	<ul style="list-style-type: none">• screws• nails• pop rivets• plugs• tek screws• loxons• dynabolts• split pins

	<ul style="list-style-type: none">• nuts and bolts• cord locks• wands• head rails• head boxes
Fixings include:	<ul style="list-style-type: none">• chemical anchors• hollow wall anchors• spring brackets• mongo plugs• masking tape• silicone spray and silastic
Tools and equipment include:	<ul style="list-style-type: none">• pop rivet guns• screwdriver (hand, power and cordless)• hammer• drills (hand, powered and cordless)• hollow wall anchor gun• caulking gun
Work instructions include:	<ul style="list-style-type: none">• instructions for the application of hardware components
Quality standards include:	<ul style="list-style-type: none">• standards set at workplace level
Waste includes:	<ul style="list-style-type: none">• textiles• metals• timber• masonry• plaster• plastic and paper packaging• broken hardware and fixings• tape rolls• spray cans
Workplace documentation includes:	<ul style="list-style-type: none">• time sheets• customer care cards• work orders

Unit Mapping Information

Supersedes and is equivalent to LMF2004A Select and apply blinds and awnings hardware and fittings

Assessment Requirements for MSFBA2003 Select and apply blinds and awnings hardware and fixings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work orders, locate materials and use information to select and apply hardware and fixings
- Communicate with site supervisor to:
 - confirm work orders and instructions
 - identify problems
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in applying hardware and fixings
- Select, set up and maintain tools and equipment in accordance with manufacturer instructions and workplace practices
- Communicate and work with others in the work area
- Report process for materials faults, damaged products or equipment
- Identify, select and apply hardware and fixings to at least four (4) different styles of blinds and awnings
- Work with others and in a team to select and apply hardware and fixings
- Use pre-checking and inspection techniques to anticipate production problems, avoid reworking and wastage
- Participate in establishing new ideas and work specifications for selecting and applying hardware and fixings
- Plan and organise activities, including the preparations and layout of the worksite, and the obtaining of equipment and materials to avoid backtracking
- Follow workplace induction principles
- Accurately plan and organise own work activities
- Use workplace technology related to selecting and applying hardware and fixings including specified tools, equipment, calculators and measuring devices

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for selecting and applying hardware and fixings
- Organisational and site standards, requirements, policies and procedures for applying hardware and fixings

- Workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to apply hardware and fixings and procedures for their safe use, operation and maintenance
- Characteristics of hardware and fixings and their use
- Set up and operation of tools and equipment used for applying hardware and fixings
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required a location for the application of hardware and fixings for blinds and awnings construction and installation and standard operating procedures for selecting and applying hardware and fixings.

MSFBA2004 Construct roll-up and pull-down style blinds and awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing roll-up and pull-down style blinds and awnings for interior and exterior applications. It applies in a workplace environment and may be conducted in a small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements, and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used correctly
		1.3	Work orders are checked and confirmed
		1.4	Material and hardware are selected and checked against work orders
		1.5	Material is checked for flaws

- | | | | |
|---|-------------------------------------|-----|---|
| 2 | Join, lay out, mark and cut fabrics | 2.2 | Allowances are calculated and recorded |
| | | 2.3 | Materials are joined to make required width |
| | | 2.4 | Cutting equipment is checked for safe operation |
| | | 2.5 | Materials are cut making allowances for hardware |
| | | 2.6 | Material is laid out flat and square and marked according to workplace practices |
| | | 2.7 | Decorative edges, gimps and fringes are selected, measured and cut according to work order |
| | | 2.8 | Measurements are checked against work order |
| 3 | Construct product | 3.1 | Material edges are hemmed making allowances for hardware |
| | | 3.2 | Decorative edging, gimps and fringes are attached to bottom edge |
| | | 3.3 | Hardware is prepared according to work order |
| | | 3.4 | Hardware is fitted to skin |
| | | 3.5 | Product is constructed according to work instructions |
| | | 3.6 | Child safety mechanisms are selected and attached |
| 4 | Apply quality checks | 4.1 | Completed product is checked ensuring finished product matches work order |
| | | 4.2 | Finished product is tested within limits of normal operation for correct operation |
| | | 4.3 | Parts of the work that do not comply with work order are repaired or reworked |
| 5 | Complete work | 5.1 | Finished work is cleaned, protected and stored following workplace practices |
| | | 5.2 | Tools and equipment are cleaned, maintained and stored |
| | | 5.3 | Faulty tools and equipment are reported to appropriate personnel |
| | | 5.4 | Work area is cleaned and waste is disposed in accordance with enterprise policies and environmental legislation covering disposal of industrial waste |

5.5 Workplace documentation or reporting is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility

	<ul style="list-style-type: none">• quality assurance• procedural manuals• quality and continuous improvement processes and standards• emergency and evacuation• ethical standards• recording and reporting• access and equity principles and practices• equipment use, maintenance and storage• environmental management (waste disposal, recycling and re-use guidelines)• tolerances• following manufacturer instructions and specifications
Personal protective equipment includes:	<ul style="list-style-type: none">• safety glasses/goggles• hearing protection• safety footwear• protective clothing• respiratory protection
Work orders include:	<ul style="list-style-type: none">• quotations for work• job cards• customer orders• worksheets
Material includes:	<ul style="list-style-type: none">• canvas• acrylic• PVC• clear PVC• mesh• binding• woven fibreglass PVC
Hardware includes:	<ul style="list-style-type: none">• rollers• battens• running assemblies• spring• rope edge• rivets• tek screws• screws• guide rails head boxes

Assessment Requirements for MSFBA2004 Construct roll-up and pull-down style blinds and awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing roll-up and pull-down style blinds and awnings
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - Minimise the risk of injury to self or others
 - Prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing roll-up and pull-down style blinds and awnings
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Report process for materials faults, damaged products or equipment
- Cut textiles accurately according to work orders
- Construct a minimum of two (2) roll-up and two (2) pull-down style blinds or awnings. Task is to include identifying and selecting hardware; measuring and joining materials; fitting hardware; and cleaning, packaging and storing completed products
- Communicate with site supervisor and others to:
 - confirm work orders and instructions
 - identify problems
- Report outcomes of constructing textile roll-up and pull-down style awnings
- Use pre-checking and inspection techniques to anticipate production problems, avoid re-working and wastage
- Participate in establishing new ideas and work specifications for constructing roll-up and pull-down style blinds and awnings
- Plan and organise own work, including preparation and layout of work area and obtaining equipment and materials to avoid backtracking
- Accurately plan and organise own work activities
- Adapt to new skill requirements
- Use workplace technology related to constructing roll-up and pull-down style blinds and awnings, including specified tools, equipment, calculators and measuring devices

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing roll-up and pull-down style blinds and awnings

- Organisational and workplace standards, requirements, policies and procedures for constructing roll-up and pull-down style blinds and awnings
- Interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established line of communication and protocols
- Types of tools and equipment used to construct roll-up or pull-down style blinds and awnings and procedures for their safe use, operation and maintenance
- Characteristics of textiles and hardware used in the construction of roll-up and pull-down style blinds and awnings
- Set up and operation of sewing and welding equipment
- Computer programs
- Cutting patterns and sequences
- Cutting tool condition, including sharpness, straightness and suitability for task
- Industry standard textile roll widths
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical procedures for estimation and measurement of materials and hardware

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a relevant location to construct roll-up and pull-down style blinds and awnings, and workplace practices, including standard operating procedures for constructing roll-up and pull-down style blinds and awnings.

MSFBA2005 Construct vertical-style blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing vertical-style blinds. It applies to a workplace environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used correctly
		1.3	Work orders are checked and confirmed
		1.4	Material is selected from stock and checked against work order
		1.5	Tools and equipment are selected and checked for safe operation
		1.6	Hardware is selected and checked against work order

- | | | | |
|---|---------------------------------|-----|--|
| 2 | Lay out, mark and cut materials | 2.1 | Correct side of materials and pattern direction are identified |
| | | 2.2 | Allowances for hardware, joins and hems are calculated and recorded |
| | | 2.3 | Material is laid out flat and square on a cutting table large enough to take full width of material and marked using chalk, markers or pencil |
| | | 2.4 | Cutting equipment is checked for safe operation |
| | | 2.5 | Material is cut following workplace practices |
| 3 | Construct blind | 3.1 | Headline and spline shaft is identified, selected and cut to manufacturer specifications |
| | | 3.2 | Hardware is selected for headrail and assembled to manufacturer specifications |
| | | 3.3 | Slats are finished according to workplace practices |
| | | 3.4 | Finishing hardware is attached according to work instructions |
| | | 3.5 | Child safety mechanisms required by legislation or code of practice are selected and attached |
| 4 | Apply quality checks | 4.1 | Finished blinds are checked ensuring finish and final length of blinds match work order |
| | | 4.2 | Finished blind is tested within limits of normal operation for correct operation |
| | | 4.3 | Parts of the work that do not comply with work order are repaired or re-worked |
| 5 | Complete work | 5.1 | Completed work is cleaned, protected and stored |
| | | 5.2 | Tools and equipment are cleaned, maintained and stored |
| | | 5.3 | Faulty tools and equipment are reported to appropriate personnel |

Assessment Requirements for MSFBA2005 Construct vertical-style blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing vertical-style blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing vertical-style blinds
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Follow operating procedures to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Maintain equipment to ensure production output and product quality
- Communicate effectively and work safely with others in the work area
- Modify activities to cater for variations in workplace contexts and environment
- Report process or materials faults, damaged products or equipment
- Cut fabrics accurately according to work orders
- Construct a minimum of two (2) vertical-style blinds using two (2) different tracking systems. The task is to include selecting components, making headbox, cutting and sewing/welding/gluing fabric and assembly
- Communicate with site supervisor to:
 - confirm work orders and instructions
 - identify problems
- Report outcomes of cutting fabric and constructing and finishing vertical-style blinds
- Use pre-checking and inspection techniques to anticipate production problems, avoid re-working and wastage
- Participate in establishing new ideas and work specifications for constructing vertical-style blinds
- Plan and organise activities, including the preparations and layout of the worksite, and the obtaining of equipment and materials to avoid backtracking
- Use workplace technology related to constructing vertical-style blinds, including specified tools, equipment, calculators and measuring devices

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing vertical-style blinds
- Organisational and workplace standards, requirements, policies and procedures for constructing vertical-style blinds
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct vertical-style blinds and procedures for their safe use, operation and maintenance
- Terms used to describe components of a vertical-style blind
- Characteristics of materials used in the construction of vertical-style blinds
- Set-up and operation of basic static machines
- Computer programs for blinds and awnings manufacture
- Cutting patterns and sequences
- Cutting tool condition including sharpness, straightness and suitability for task
- Industry standard fabric widths
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.

- Access is required to a location relevant to constructing vertical-style blinds, and standard operating procedures for constructing vertical-style blinds.

MSFBA2006 Construct textiles for canopy-style awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing the textile components of canopy-style awnings. It applies in a workplace environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used correctly
		1.3	Work order is reviewed, confirmed and clarified with appropriate personnel
		1.4	Frame, which will vary according to customer requirements for Dutch hoods (with end style variations), Florentines or cupola is measured and quantities of materials calculated

		1.5	Textiles are selected and checked for flaws according to workplace practices
		1.6	Tools and equipment are selected and used according to workplace practices and manufacturer instructions
2	Lay out, mark and cut textiles	2.1	Correct side of textile, naps, direction of patterns and pattern matches are identified
		2.2	Textiles are laid over frame and measured and marked to fit frame leaving joining allowances
		2.3	Panels and scallops, whose number and shape will vary according to size and shape of canopy frame, are marked and cut
		2.4	Textiles are cut
		2.5	Measurements are checked against work order
3	Join textiles	3.1	Textiles are joined according to workplace practices
		3.2	Textiles are laid over frame and perimeter pockets marked
		3.3	Pockets are sewn
		3.4	Scallop edging is attached
4	Construct awning	4.1	Method of fixing skin to frame is determined
		4.2	Textile skin is constructed according to work instructions
		4.3	Skin is attached to frame according to work instructions
		4.4	Aluminium framed canopy-style awning frame is braced
5	Apply quality checks	5.1	Completed awnings are checked ensuring finish and final size match work requirements
		5.2	Parts of the work that do not comply with work order are repaired or re-worked
		5.3	Frame is checked for damage and repairs made if necessary according to workplace practices
6	Complete work	6.1	Finished work is cleaned, protected and stored following workplace practices

- 6.2 Tools and equipment are cleaned, maintained and stored
- 6.3 Faulty tools and equipment are reported to appropriate personnel
- 6.4 Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste
- 6.5 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

Assessment Requirements for MSFBA2006 Construct textiles for canopy-style awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete construct textiles for canopy-style awnings
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing canopy-style awnings
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Report process for materials faults, damaged products or equipment
- Construct a minimum of three (3) different textile canopy-style awnings. Task is to include measuring, cutting, joining and fixing the skin to the frame with a tight drum-like finish
- Communicate with site supervisor to:
 - confirm work orders and instructions
 - identify problems
- Report outcomes of constructing textiles for canopy-style awnings
- Work with others and in a team to construct textiles for canopy-style awnings
- Use pre-checking and inspection techniques to anticipate production problems, avoid re-working and wastage
- Participate in establishing new ideas and work specifications for constructing textiles for canopy-style awnings
- Plan and organise own work, including preparation and layout of work area and obtaining equipment and materials to avoid backtracking
- Use workplace technology related to constructing canopy-style awnings, including specified tools, equipment, calculators and measuring devices

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing textiles for canopy-style awnings
- Organisational and workplace standards, requirements, policies and procedures for constructing canopy-style awnings

- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct textiles for canopy-style awnings and procedures for their safe use, operation and maintenance
- Terms used to describe components of canopy-style awnings
- Characteristics of textiles used for canopy-style awnings
- Set up and operation of static machines
- Cutting patterns and sequences
- Cutting tool condition, including sharpness, straightness and suitability for task
- Industry standard cross-sections and lengths for framing materials
- Industry standard textile widths
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a relevant location for constructing textiles for canopy-style awnings, and standard operating procedures for constructing textiles for canopy-style awnings.

MSFBA2007 Construct plastic and timber Venetian-style blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing plastic and timber Venetian-style blinds. It applies to small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Work order is reviewed, confirmed and clarified with appropriate personnel
		1.4	Materials, hardware and fixings are selected and checked against work orders
2	Measure, mark and cut slats	2.1	Slats are measured to length, marked and cut
		2.2	Cord holes are accurately punched in slats

- | | | | |
|---|---------------------|------|--|
| | | 2.3 | Slats are finished as required according to work order |
| 3 | Assemble blind | 3.1 | Head rail components, bottom rails and tilt rod are selected and cut |
| | | 3.2 | Head rails are assembled according to manufacturer instructions or workplace practices |
| | | 3.3 | Correct spacing according to spacing charts for Venetian-style blind slats is determined |
| | | 3.4 | Cords and ladder braids are selected and attached to head rail components |
| | | 3.5 | Hardware is attached according to work instructions |
| | | 3.6 | Slats are threaded through ladder tapes |
| | | 3.7 | Measuring tape is used to confirm final size and blind adjusted |
| | | 3.8 | Bottom rail is attached to blind |
| | | 3.9 | Cords are threaded through slats and attached |
| | | 3.10 | Child safety mechanisms as required by legislation or codes of practice are selected and attached |
| 4 | Make quality checks | 4.1 | Finished blind is checked ensuring length, width, slat size and colour match work order |
| | | 4.2 | Finished blind is tested within limits of correct operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked |
| 5 | Complete work | 5.1 | Finished work is cleaned, protected and stored following workplace practices |
| | | 5.2 | Tools and equipment are cleaned, maintained and stored |
| | | 5.3 | Faulty tools and equipment are reported to appropriate personnel |
| | | 5.4 | Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste |
| | | 5.5 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and

Assessment Requirements for MSFBA2007 Construct plastic and timber Venetian-style blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work orders, locate materials and use information to complete tasks in constructing plastic and timber Venetian-style blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Construct a minimum of two (2) plastic Venetian-style blinds and two (2) timber Venetian-style blinds. Task is to include selecting materials and hardware; cutting slats; punching and finishing slats; assembling blind, including head and bottom rail components and tilt mechanisms; cleaning, packaging and storing finished blinds; and reporting materials faults, damaged products or equipment
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing plastic and timber Venetian-style blinds
- Organisational and workplace standards, requirements, policies and procedures for constructing plastic and timber Venetian-style blinds
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct plastic and timber Venetian-style blinds and procedures for their safe use, operation and maintenance
- Set-up, operation and maintenance of static machines used in blinds manufacture
- Terms used to describe components of plastic and timber Venetian-style blinds
- Characteristics of plastic and timber used in the construction of Venetian-style blinds
- Storage systems and labelling

- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a relevant location for constructing plastic and timber Venetian-style blinds; workplace practices, including standard operating procedures and spacing charts for constructing plastic and timber Venetian-style blinds.

MSFBA2008 Construct aluminium Venetian-style blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing aluminium Venetian-style blinds. It applies in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Work orders are checked and confirmed
		1.4	Tools and equipment are selected and checked for safe operation
		1.5	Aluminium solid or perforated coil stock, hardware and fixings are selected and checked against work order
2	Assemble blind	2.1	Head and bottom rails are selected, measured and cut

- | | | | |
|---|---------------------|-----|---|
| | | 2.2 | Cords and ladder braids are selected, cut and attached to head rail |
| | | 2.3 | Hardware is attached to head and bottom rails |
| | | 2.4 | Venetian blind machine is set up according to manufacturer instructions |
| | | 2.5 | Headrail is attached to Venetian blind machine and the machine run to cut, punch and attach slats to head rail |
| | | 2.6 | Blind is placed on hoist and bottom rail installed |
| | | 2.7 | Ladders are crimped to final blind size |
| | | 2.8 | Finishing hardware is installed |
| | | 2.9 | Child safety mechanisms as required by legislation or code of practice are selected and attached |
| 3 | Make quality checks | 3.1 | Finished blinds are checked ensuring length and width match work order |
| | | 3.2 | Finished blind is tested within limits of normal operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked |
| 4 | Complete work | 4.1 | Finished work is cleaned, protected and stored following workplace practices |
| | | 4.2 | Tools and equipment are cleaned, maintained and stored |
| | | 4.3 | Faulty tools and equipment are reported to appropriate personnel |
| | | 4.4 | Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste |
| | | 4.5 | Workplace documentation or reporting is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Assessment Requirements for MSFBA2008 Construct aluminium Venetian-style blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing aluminium Venetian-style blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing aluminium Venetian-style blinds
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Set up, operate and maintain static machines used in the construction of aluminium Venetian-style blinds
- Construct a minimum of two (2) aluminium Venetian-style blinds using two (2) different head box assemblies. Task to include selecting materials and hardware; setting up and operating Venetian blind machine; assembling blind; cleaning, packaging and storing finished blind; cleaning work area; and completing workplace documentation and reports, such as reporting material faults, damaged products or equipment
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing aluminium Venetian-style blinds
- Organisational and workplace standards, requirements, policies and procedures for constructing aluminium Venetian-style blinds
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct aluminium Venetian-style blinds and procedures for their safe use, operation and maintenance

- Terms used to describe components of aluminium Venetian-style blinds
- Characteristics of aluminium used for constructing Venetian-style blinds
- Set-up, operation and maintenance of static machines used in the construction of aluminium Venetian-style blinds
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing aluminium Venetian-style blinds; and workplace practices, including standard operating procedures for constructing aluminium Venetian-style blinds.

MSFBA2009 Construct metal louvre and canopy-hooded style awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing metal louvre and canopy-hooded style awnings. It applies to small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan and prepare work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Work orders are checked and confirmed
		1.4	Materials and hardware are selected and checked against work requirements
		1.5	Tools and equipment are selected and checked for safe operation
2	Cut stock and	2.1	Metal stock is cut to manufacturer recommendations

	assemble awning	2.2	Metal is bent to form shape of awning
		2.3	Awning is assembled to manufacturer specifications
3	Make quality checks	3.1	Completed awnings are checked ensuring finished product matches work order
		3.2	Completed awning is tested within limits of normal operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked
4	Complete work	4.1	Finished work is cleaned, protected and stored following workplace practices
		4.2	Tools and equipment are cleaned, maintained and stored
		4.3	Faulty tools and equipment are reported to appropriate personnel
		4.4	Work area is cleaned and waste is disposed of according to workplace practices
		4.5	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

		1.4	Tools and equipment are selected and checked for safe operation
		1.5	Aluminium stock and hardware are selected and checked against work requirements.
2	Cut materials	2.1	Head box, roller and bottom rail are cut

	ready for assembly	2.2	Spring is selected according to manufacturer specifications
		2.3	Aluminium panels are cut
		2.4	Measurements are checked against work order
3	Construct awning	3.1	Aluminium panels are joined to form awning skin
		3.2	Roller and bottom rail are installed to skin
		3.3	Spring and pin end are fitted to roller
		3.4	End caps and pull ring are installed to bottom rail
4	Make quality checks	4.1	Completed awnings are checked ensuring finished product matches work order
		4.2	Finished blind is tested within limits of correct operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked
5	Complete work	5.1	Arms and fittings are selected ready for installation
		5.2	Finished work is cleaned, packaged with installation hardware and stored following workplace practices
		5.3	Tools and equipment are cleaned, maintained and stored
		5.4	Faulty tools and equipment are reported to appropriate personnel
		5.5	Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation
- ethical standards
- recording and reporting
- access and equity principles and practices
- equipment use, maintenance and storage
- environmental management (waste disposal, recycling and re-use guidelines)
- tolerances
- following manufacturer instructions

Personal protective

- safety glasses/goggles

equipment includes:	<ul style="list-style-type: none">• hearing protection• safety footwear• protective clothing• respiratory protection
Work orders include:	<ul style="list-style-type: none">• quotations for work• job cards• customer orders• worksheets• specifications, including design, size, colour and quantity

Assessment Requirements for MSFBA2010 Construct aluminium roll-up style awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing aluminium roll-up style awnings
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing aluminium roll-up style awnings
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Construct a minimum of two (2) aluminium roll-up style awnings. Task is to include selecting materials; cutting aluminium panels; preparing hardware; constructing awning skin; applying hardware; cleaning, packaging and storing completed awning; cleaning work area; maintaining and storing tools and equipment; and completing workplace documentation, such as reporting material faults, damaged products or equipment
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing aluminium roll-up style awnings
- Organisational and workplace standards, requirements, policies and procedures for constructing aluminium roll up style awnings
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct aluminium roll-up style awnings and procedures for their safe use, operation and maintenance
- Terms used to describe components of aluminium roll-up style awnings
- Characteristics of aluminium used in the construction of roll-up style awnings

- Set-up, operation and maintenance of static machines used in the construction of aluminium roll-up style awnings
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing aluminium roll-up style awnings; and workplace practices, including standard operating procedures for constructing aluminium roll-up style awnings

MSFBA3001 Install interior blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installation of interior blinds. It applies in an on-site residential or commercial environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify products, fittings and attachments to be used	1.1	Type of blind to be fitted and work order requirements are identified
		1.2	Type of installation and access to site where restrictions on access may determine equipment used are identified from work order or site inspection
		1.3	Mounting brackets, materials and tools are identified from work instructions and site inspection conducted in consultation with customer
2	Plan process for installing blinds	2.1	Customer is consulted to determine suitable day and time for installation
		2.2	Equipment is identified to minimise risk of damage to

- customer's premises or injuries to self
- 2.3 Work sequence is planned in a logical order
 - 2.4 Attachment process is planned to conform to quality requirements, maximise the appearance of the finished work and provide for the most economical use of materials and labour
 - 2.5 Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition
 - 2.6 Blind operating mechanism is set up and checked against manufacturer specifications and work instructions
- 3 Complete installation
- 3.1 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
 - 3.2 Blinds are fitted and tested within limitations of normal operation for correct operation
 - 3.3 Pellets, cord brackets and pulleys are fitted using appropriate hardware and adjusted to suit blind operation
 - 3.4 Blind is checked for correct operation and adjusted or repaired if necessary
 - 3.5 Customer is advised on correct operation of blind
- 4 Complete job and clean work area
- 4.1 Worksite is cleaned and equipment is cleaned and stored according to workplace practices
 - 4.2 Rubbish is cleared and waste collected for disposal in accordance with workplace practices and environmental legislation covering disposal of industrial waste or recycling, as appropriate, in accordance with workplace practices
- 5 Settle payment
- 5.1 Customer is presented with invoice, payment collected and receipt issued
 - 5.2 Workplace documentation is completed and filed according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation

	<ul style="list-style-type: none">• ethical standards• recording and reporting• access and equity principles and practices• equipment use, maintenance and storage• environmental management (waste disposal, recycling and re-use guidelines)• tolerances• following manufacturer instructions

Assessment Requirements for MSFBA3001 Install interior blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in installing interior blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in installing interior blinds
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Install a minimum of four (4) different styles of interior blinds in a range of on-site or simulated locations
- Report process for materials faults, damaged products or equipment
- Deal effectively with customers by:
 - speaking clearly and directly
 - applying effective listening techniques
 - asking questions to gain information
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for installing interior blinds
- Organisational and workplace requirements, policies and procedures for installing interior blinds
- Reading and interpreting workplace documents, including work orders, work instructions and manufacturer specifications
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used for installing interior blinds and procedures for their safe use, operation and maintenance

- Types, uses, limitations and operating mechanisms of interior blinds
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials
- Procedures for presentation of invoices, collection and receipting of payments

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to installing interior blinds; and workplace practices, including standard operating procedures for installing interior blinds.

MSFBA3002 Install exterior blinds and awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installation of exterior blinds and awnings. It applies in an on-site residential or commercial environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify products, fittings and attachments for installation	1.1	Type of blind or awning to be installed is identified
		1.2	Installation hardware, tools and equipment are identified from work instructions and site inspection conducted in consultation with customer
		1.3	Customer is consulted to determine day and time for installation
		1.4	Local government regulations regarding installation of exterior blinds and awnings are checked and adhered to
2	Plan installation process	2.1	Work health and safety (WHS) requirements and personal protection needs are observed throughout the work

		2.2	Work order is read and interpreted and installation sequence is planned in a logical order to suit job
		2.3	Worksite is checked to determine access and special equipment requirements
3	Install exterior blind or awning	3.1	Public and property is protected and product to be installed is laid out and checked against work order
		3.2	Fixing hardware is installed to manufacturer specifications
		3.3	Blind or awning is installed to manufacturer specifications
4	Complete the installation	4.1	Operation of product is tested within limitations of normal operation and adjusted if necessary
		4.2	Customer is shown correct use of product
5	Clean work area	5.1	Tools and equipment are cleaned and stored according to workplace practices
		5.2	Work area is cleaned and left in a safe condition
		5.3	Waste and scrap are removed and disposed of be in accordance with workplace practices and environmental legislation covering disposal of industrial waste or recycled, as appropriate, following workplace procedures
6	Settle payment	6.1	Invoice is issued to customer and payment received and receipted
		6.2	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation
- ethical standards
- recording and reporting
- access and equity principles and practices
- equipment use, maintenance and storage
- environmental management (waste disposal, recycling and re-use guidelines)
- tolerances
- following manufacturer instructions

Blinds include:	<ul style="list-style-type: none">• roll-up style exterior blinds• pull-down style exterior blinds
Awnings include:	<ul style="list-style-type: none">• metal louvre style awnings• textile canopy-style awnings• metal hooded canopy-style awnings• aluminium roll-up style awnings• folding-arm style awnings

Assessment Requirements for MSFBA3002 Install exterior blinds and awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in installing exterior blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in installing exterior blinds
- Select, set up and maintain equipment in accordance with manufacturer instructions and workplace practices
- Install a minimum of four (4) different styles of exterior blinds or awnings in a range of on-site or simulated locations
- Report process for materials faults, damaged products or equipment
- Deal effectively with customers by:
 - speaking clearly and directly
 - applying effective listening techniques
 - asking questions to gain information
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for installing exterior blinds and awnings
- Organisational and site standards, requirements, policies and procedures for installing exterior blinds and awnings
- Reading and interpreting workplace documents, including work orders, work instructions and manufacturer specifications
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols

- Types of tools and equipment used to install exterior blinds and awnings and procedures for their safe use, operation and maintenance
- Types, uses, limitations and operating mechanisms of exterior blinds and awnings, including special application brackets
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials
- Procedures for presentation of invoices, collection and receipting of payments

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to installing exterior blinds and awnings; and workplace practices, including standard operating procedures for installing exterior blinds and awnings.

MSFBA3003 Install timber shutters

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installation of timber shutters. It applies in an on-site residential or commercial environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify products, fittings and attachments for installation	1.1	Type of timber shutter to be installed is identified
		1.2	Installation hardware, tools and equipment are identified from work instructions and site inspection conducted in consultation with customer
		1.3	Customer is consulted to determine day and time for installation
2	Plan installation process	2.1	Work health and safety (WHS) requirements and personal protection needs are observed throughout the work
		2.2	Work order is read and interpreted and work sequence is planned in a logical order to suit job

		2.3	Worksite is checked to determine access and special equipment requirements
		2.4	Product to be installed is laid out and checked against work order
		2.5	Product to be installed is protected and transported to worksite without damage
3	Install timber shutters	3.1	Public and property is protected, if necessary, and fixing hardware is installed to manufacturer specifications
		3.2	Timber shutter is installed to manufacturer specifications
4	Complete the installation	4.1	Operation of product is tested within limitations of normal operation and adjusted if necessary
		4.2	Customer is shown correct use of product
5	Clean work area	5.1	Tools and equipment are cleaned and stored according to workplace practices
		5.2	Work area is cleaned and left in a safe condition
		5.3	Waste and scrap are removed and disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste or recycled, as appropriate, following workplace practices
6	Settle payment	6.1	Invoice is issued to customer and payment received and receipted
		6.2	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation
- ethical standards
- recording and reporting
- access and equity principles and practices
- equipment use, maintenance and storage
- environmental management (waste disposal, recycling and re-use guidelines)
- tolerances
- following manufacturer instructions

Hardware includes:	<ul style="list-style-type: none">• screws• masonry anchors• dynabolts• nuts and bolts• mounting brackets• hinges• filler strips• cover strips• track systems
Tools and equipment include:	<ul style="list-style-type: none">• screwdrivers• docking saws• ladders• tape measure• power drill• scissors• caulking gun
Work instructions include:	<ul style="list-style-type: none">• instructions for the installation of different styles of timber shutters for both internal and external applications
Customers include:	<ul style="list-style-type: none">• home owners• real estate agents• tenants• body corporate representatives• business owners
Personal protection needs include:	<ul style="list-style-type: none">• safety glasses• hearing protection• safety boots• sunscreen and hats
Work orders include:	<ul style="list-style-type: none">• quotations for work• job cards• customer orders

 - asking questions to gain information
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for installing timber shutters
- Organisational and workplace requirements, policies and procedures for installing timber shutters
- Reading and interpreting workplace documents, including work orders, work instructions and manufacturer specifications
- Types of tools and equipment used to install timber shutters and procedures for their safe use, operation and maintenance
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Storage systems and labelling

- Types, uses and limitations of timber shutters
- Characteristics of timber and hardware used to construct and install timber shutters
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials
- Procedures for presentation of invoices, collection and receipting of payments

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to installing timber shutters; and workplace practices, including standard operating procedures and work instructions for installing timber shutters.

MSFBA3004 Construct folding-arm style awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing folding-arm style awnings. It applies in a workplace environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Work order requirements are checked and confirmed
		1.4	Tools and equipment are selected and checked for safe operation
		1.5	Material and hardware is selected and checked against work requirements with material checked for flaws
2	Cut materials ready for assembly	2.1	Folding arms are selected following work order and workplace practices

- | | | | |
|---|---------------------|-----|---|
| | | 2.2 | Roller, front rail and square head rail are cut |
| | | 2.3 | Correct side of material and pattern direction is identified |
| | | 2.4 | Material for skin is laid out laid out flat and square on a cutting table large enough to take full width of material, marked using chalk, markers or pencil and cut |
| | | 2.5 | Material is joined to form awning skin |
| | | 2.6 | Measurements are checked against work order |
| 3 | Construct awning | 3.1 | Arm assembly is constructed following manufacturer instructions |
| | | 3.2 | Roller and front rail are attached to skin |
| | | 3.3 | Skin is fitted to arm assembly |
| 4 | Make quality checks | 4.1 | Completed awnings are checked ensuring finished product matches work order |
| | | 4.2 | Completed awning is tested within the limitations of normal operation to ensure correct and safe operation and parts of the work that do not comply with work order are repaired or re-worked |
| 5 | Complete work | 5.1 | Finished work is cleaned, packaged with installation hardware and stored following workplace practices |
| | | 5.2 | Tools and equipment are cleaned, maintained and stored |
| | | 5.3 | Faulty tools and equipment are reported to appropriate personnel |
| | | 5.4 | Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste |
| | | 5.5 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation

	<ul style="list-style-type: none">• ethical standards• recording and reporting• access and equity principles and practices• equipment use, maintenance and storage• environmental management (waste disposal, recycling and re-use guidelines)• tolerances• following manufacturer instructions

Assessment Requirements for MSFBA3004 Construct folding-arm style awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing folding-arm style awnings
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing folding-arm style awnings
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Construct a minimum of two (2) folding-arm style awnings. Task is to include constructing the arm assembly; preparing skin; assembling awning; cleaning, packaging and storing completed awning; cleaning work area; and completing workplace documentation, such as reporting material faults, damaged products or equipment
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing folding-arm style awnings
- Organisational and site standards, requirements, policies and procedures for constructing folding-arm style awnings
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Terms used to describe components of folding-arm style awnings
- Characteristics of materials used to construct folding-arm style awnings

- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing folding-arm style awnings; and workplace practices, including standard operating procedures and work instructions, for constructing folding-arm style awnings.

MSFBA3005 Construct framework for canopy-style awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing steel or aluminium framework for canopy-style awnings. It applies in a workplace and residential and commercial on-site environments and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Tools and equipment are selected and checked for safe operation
		1.4	Work order requirements are checked and confirmed
2	Fabricate framework	2.1	Material and hardware are selected and checked against work order
		2.2	Frame is fabricated according to work instructions

		2.3	Fixing points are incorporated into frame fabrication
		2.4	Measurements are checked against work order
3	Assemble framework	3.1	Frame is assembled according to manufacturer instructions and workplace practices
		3.2	Frame is braced and finished according to work order and workplace practices
		3.3	Splines for attaching cloth are cut
4	Apply quality checks	4.1	Completed framework is checked ensuring finished product matches work order
		4.2	Completed framework is tested to ensure correct and safe operation and parts of the work that do not comply with work order are repaired or re-worked
5	Complete work	5.1	Finished work is cleaned, packaged and stored following workplace practices
		5.2	Tools and equipment are cleaned, maintained and stored
		5.3	Faulty tools and equipment are reported to appropriate personnel
		5.4	Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste
		5.5	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential

operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

Assessment Requirements for MSFBA3005 Construct framework for canopy-style awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing framework for canopy-style awnings
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing framework for canopy-style awnings
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Construct a minimum of two (2) frameworks for canopy-style awnings. Task is to include selecting tools, equipment and materials; fabricating and/or assembling to framework; finishing the framework; applying quality checks; packaging and storing framework; maintaining and storing tools and equipment; cleaning work area; and completing workplace documentation, such as reporting material faults, damaged products or equipment
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing canopy-style awning frames
- Organisational and workplace standards, requirements, policies and procedures for constructing framework for canopy-style awnings
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communications and workplace protocols
- Relevant problem identification and resolution
- Types of tools and equipment used in constructing frameworks for canopy-style awnings and procedures for their safe use, operation and maintenance

- Characteristics of aluminium and steel used in constructing framework for canopy-style awnings
- Cutting patterns and sequences
- Cutting tool condition including sharpness, straightness and suitability for task
- Industry standards for framing steel and aluminium
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing framework for canopy-style awnings; and workplace practices, including standard operating procedures and work instructions for constructing canopy-style awnings.

MSFBA3006 Construct pleated-style blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing pleated-style blinds. It applies in a workplace environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and checked
		1.3	Work order requirements are checked and confirmed
		1.4	Tools and equipment are selected and checked for safe operation
		1.5	Fabric is selected from stock and checked against work order and for any flaws
		1.6	Hardware is selected and checked against work order

- | | | | |
|---|-------------------------------|-----|---|
| 2 | Lay out, mark and cut fabrics | 2.1 | Correct side of fabric, naps, direction of pattern and pattern matches are identified |
| | | 2.2 | Allowances for hardware, joins and hems are calculated and recorded |
| | | 2.3 | Fabric is laid out laid out flat and square on a cutting bench large enough to take the full width of the fabric, marked using chalk, markers or pencil and cut following workplace practices |
| 3 | Construct blind | 3.1 | Fabric is joined or trimmed to required width |
| | | 3.2 | Pleats are formed in fabric according to workplace practices |
| | | 3.3 | Cord holes are punched in fabric |
| | | 3.4 | Bottom of blind is finished according to work order |
| | | 3.5 | Head and bottom rail are cut to required length |
| | | 3.6 | Blind is assembled according to work instructions |
| | | 3.7 | Cords are cut and attached following work instructions |
| | | 3.8 | Child safety mechanisms as required by legislation or code of practice are selected and attached |
| 4 | Make quality checks | 4.1 | Finished blinds are checked to ensure end finishing and final length of finished blinds match work requirements |
| | | 4.2 | Finished blind is tested within limits of normal operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked |
| 5 | Complete work | 5.1 | Finished work is cleaned, packaged and stored following workplace practices |
| | | 5.2 | Tools and equipment are cleaned, maintained and stored |
| | | 5.3 | Faulty tools and equipment are reported to appropriate personnel |
| | | 5.4 | Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste |
| | | 5.5 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Assessment Requirements for MSFBA3006 Construct pleated-style blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing pleated-style blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing pleated-style blinds
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Report material faults, damaged products or equipment
- Cut fabrics accurately according to work order and construct a minimum of two (2) pleated-style blinds
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing pleated-style blinds
- Organisational and workplace standards, requirements, policies and procedures for constructing pleated-style blinds
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and workplace/worksites protocols
- Relevant problem identification and resolution
- Types of tools and equipment used in the construction of pleated-style blinds and procedures for their safe use, operation and maintenance
- Characteristics of fabrics used to construct pleated-style blinds
- Cutting patterns and sequences
- Cutting tool condition, including sharpness, straightness and suitability for task
- Industry standards for fabric widths

- Terms used to describe components of pleated-style blinds
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing pleated-style blinds; and workplace practices, including standard operating procedures and work instructions for constructing pleated-style blinds.

MSFBA3007 Construct wood weave-style blinds

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing wood weave-style blinds. It applies in a workplace environment and may be conducted in small to large scale enterprises

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, legislative requirements, and workplace practices are observed throughout the work
		1.2	Personal protective equipment is selected and used
		1.3	Style of blind is identified from work order
		1.4	Tools and equipment are selected and checked for safe operation
		1.5	Materials are selected from stock and checked against work requirements
2	Lay out, mark and	2.1	Material is laid out flat and square on a cutting bench large enough to take the full width of the wood and

	cut materials		marked
		2.2	Material is cut
3	Construct blind	3.1	Wood is woven to form skin of blind
		3.2	Head and bottom rails are attached to blind
		3.3	Cords are attached to blind
		3.4	Blind is finished according to work instructions
		3.5	Child safety mechanisms as required by legislation or code of practice are selected and attached
4	Apply quality checks	4.1	Finished blinds are checked to ensure end finishing and final length of finished blinds match work requirements
		4.2	Finished blind is tested within limits of normal operation for correct operation and parts of the work that do not comply with work order are repaired or re-worked
5	Complete work	5.1	Finished work is cleaned, packaged and stored following workplace practices
		5.2	Tools and equipment are cleaned, maintained and stored
		5.3	Faulty tools and equipment are reported to appropriate personnel
		5.4	Work area is cleaned and waste is disposed of in accordance with workplace practices and environmental legislation covering disposal of industrial waste
		5.5	Workplace documentation or reporting is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements include:

- Commonwealth, state or territory legislation and regulations
- organisational safety policies and procedures
- the use of personal protective equipment and clothing
- firefighting equipment
- first aid equipment
- hazard and risk control and elimination of hazardous materials and substances
- manual handling, including lifting and carrying

Legislative requirements include:

- applicable legislation from all levels of government that affect organisational operation
- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- the environment
- equal employment opportunity (EEO)
- anti-discrimination
- relevant industry codes of practice
- duty of care and heritage

Workplace practices include:

- legal, organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- emergency and evacuation
- ethical standards
- recording and reporting
- access and equity principles and practices
- equipment use, maintenance and storage
- environmental management (waste disposal, recycling and re-use guidelines)
- tolerances
- following manufacturer instructions

Personal protective

Assessment Requirements for MSFBA3007 Construct wood weave-style blinds

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order, locate materials and use information to complete tasks in constructing wood weave-style blinds
- Apply safe handling practices and safe operating procedures for equipment, products and materials to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- Identify materials and equipment used in constructing wood weave-style blinds
- Select, set up and maintain equipment in accordance with manufacturer specifications and workplace practices
- Reporting material faults, damaged products or equipment
- Cut wood accurately according to work order and construct a minimum of two (2) wood weave-style blinds; one Roman-style, one roll-up style
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for constructing wood weave-style blinds
- Organisational and workplace standards, requirements, policies and procedures for constructing wood weave-style blinds
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Environmental protection requirements relating to the disposal of waste material
- Established lines of communication and protocols
- Types of tools and equipment used to construct wood weave-style blinds and procedures for their safe use, operation and maintenance
- Terms used to describe components of wood weave-style blinds
- Characteristics of timber used in wood weave-style blinds
- Storage systems and labelling

- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to constructing wood weave-style blinds; and workplace practices, including standard operating procedures and work instructions for constructing wood weave-style blinds.

MSFBA3008 Construct pelmets

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers cutting, preparing and assembling pelmet components for internal blind installations. It applies in a workplace and on-site residential and commercial environment and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------------|-----|--|
| 1 | Plan and prepare for work | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices are observed throughout the work |
| | | 1.2 | Personal protective equipment is selected and used |
| | | 1.3 | Type of pelmet to be constructed is identified from work order |
| | | 1.4 | Tools and equipment are selected and checked for safe operation |
| | | 1.5 | Materials and hardware are identified and selected |

		1.6	Work sequence is planned to conform with quality requirements, minimise time and economically use materials
2	Prepare and assemble pelmet components	2.1	Components are measured and cut to specification and laid out ready for assembly
		2.2	Components are assembled according to work instructions
		2.3	Problems occurring during work operations are identified and reported following workplace practices
3	Complete work	3.1	Completed work is cleaned, packaged and stored according to workplace practices
		3.2	Tools and equipment are cleaned, maintained and stored
		3.3	Faulty tools and equipment are tagged and reported to appropriate personnel
		3.4	Work area is cleaned and waste is disposed of in accordance with industry and enterprise specific policies and procedures
		3.5	Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

WHS requirements

- Commonwealth, state or territory legislation and regulations

- include:**
- organisational safety policies and procedures
 - the use of personal protective equipment and clothing
 - firefighting equipment
 - first aid equipment
 - hazard and risk control and elimination of hazardous materials and substances
 - manual handling, including lifting and carrying
- Legislative requirements include:**
- applicable legislation from all levels of government that affect organisational operation
 - award and enterprise agreements
 - industrial relations
 - Australian Standards
 - confidentiality and privacy
 - the environment
 - equal employment opportunity (EEO)
 - anti-discrimination
 - relevant industry codes of practice
 - duty of care and heritage
- Workplace practices include:**

MSFBA3009 Provide advice to customers on blinds and awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers providing advice to customers on blinds and awnings products and services. It applies in workplaces and on-site residential and commercial environments and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Develop and maintain knowledge of products and services	1.1	A comprehensive knowledge of industry products and services is actively and regularly researched from authoritative sources
		1.2	Characteristics of products and services are identified and understood using available product and service documentation
		1.3	Sample materials, products and visual aids are collected and organised for easy use
2	Prepare for work	2.1	A range of materials and products are selected to match customer requirements and suitability for purpose
		2.2	An appointment is arranged with the customer and an

			appropriate schedule is agreed
3	Confirm customer requirements	3.1	Questioning and active listening techniques are used to clarify customer requirements
		3.2	Customer requirements are identified professionally, courteously and with tact
		3.3	Assumptions are documented in accordance with workplace practices
		3.4	Customer requirements are fed back accurately in language that can be understood by the customer and other workplace staff
		3.5	Customer requirements are documented in accordance with workplace practices
4	Provide advice on blinds and awnings	4.1	Viable options for colour, material and style that are relevant to the customer's requirements are presented
		4.2	Options for colour, materials and style are explained to, and discussed with, the customer to facilitate customer understanding of available products and services
		4.3	Material samples and visual aids are made available to the customer to facilitate customer understanding of available products and services
		4.4	Benefits and approximate costs of each option are explained to the customer to facilitate informed decision making
5	Confirm selection with customer	5.1	Customer selection including agreed delivery timeframe, is determined
		5.2	Customer commitment to agreed selection is gained in accordance with workplace practices
		5.3	Documentation is completed following workplace practices, including specification sheets for products selected and drawings
		5.4	Customer is informed of rights and obligations regarding product or service
6	Complete work	6.1	Sample products are returned to storage as required
		6.2	Documentation is submitted to appropriate personnel in accordance with workplace practices

- 6.3 Contact is maintained with customer throughout the manufacturing and installation process

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for MSFBA3009 Provide advice to customers on blinds and awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Identify products and materials used in blinds and awnings manufacturing
- Conduct meetings and presentations
- Assess and report on customer satisfaction
- Analyse sales and product development data
- Complete workplace documentation
- Deal effectively with customers by:
 - speaking clearly and directly
 - applying effective listening techniques
 - asking questions to gain information
- Advise customers on at least three (3) occasions involving a range of material, style and colour selections
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to blinds and awnings manufacturing and installation
- Organisational and site standards, requirements, policies and procedures for providing advice to customers
- Interpretation of plans and work sheets
- Colour coordination and matching
- Fabric and material types and their application
- Suitable applications of the various styles of blinds and awnings
- Organisation's products and services
- Principles and techniques of public relations and product promotion
- Strategies for planning and monitoring activities
- Consultation methods, techniques and protocols
- Terms used to describe components of blinds and awnings

- Procedures for the recording, reporting and maintenance of workplace records and information
- Mathematical techniques for estimation and measurement of materials

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a location relevant to providing advice to customers; and workplace practices, including standard documentation and procedures for customer service.

MSFBA3010 Assess suitability of blinds or awnings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers assessing the suitability of blinds and awnings in a range of environments taking into account building structure, natural environmental constraints, regulations and legislation. It applies in a workplace and on-site residential and commercial environments and may be conducted in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Blinds and awnings

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Develop and maintain knowledge of products	1.1	Characteristics of blind and awnings products and components are recognised
		1.2	Sample materials, products and visual aids are collected and organised for use in presentations
		1.3	Building styles, building codes, regulations and legislation are recognised
2	Assess suitability of customer requirements for building and	2.1	Questioning and active listening techniques are used to identify and clarify customer needs and requirements
		2.2	Location for product is inspected observing work health

	location		and safety (WHS) requirements
		2.3	Restrictions and limitations of building and natural environment are assessed
		2.4	Restrictions and limitations of blinds and awnings are assessed
3	Provide advice to customer following assessment	3.1	Characteristics of products are explained using sample materials, visual aids and product specifications
		3.2	Building covenant and other regulations and legislative requirements are explained to the customer
		3.3	Range of styles and materials are presented to the customer for evaluation
		3.4	Customer queries are discussed and responded to using examples to illustrate advice on finished products
4	Finalise assessment	4.1	Sample products are returned to storage
		4.2	Reports are prepared for the purpose of estimating and costing
		4.3	Relevant assessment and costing information is presented to customer

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Products and components include:	<ul style="list-style-type: none">• Holland-style blinds• Roman-style blinds• vertical-style blinds• timber, plastic and aluminium Venetian-style blinds• pleated-style blinds• wood weave-style blinds• canopy-style awnings• metal louvre-style awnings• aluminium roll-up style awnings• folding-arm style awnings• hardware and fixings

Assessment Requirements for MSFBA3010 Assess suitability of blinds or awnings

Modification History

Release 1 - New unit of competency

Performance Evidence

- Locate, interpret and apply information relevant to assessing suitability of blinds and awnings to a range of building and locations
- Greet customer in an appropriate manner, use appropriate questioning techniques and provide feedback to customer to satisfy customer needs and requirements
- Identify and select practical solutions to problems using analytical skills and monitor and evaluate solutions
- Resolve conflict through negotiation
- Show independence and initiative in making decisions
- Use information technology (IT) to organise information
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for assessing suitability of blinds and awnings for situations
- Organisational and site standards, requirements, policies and procedures for assessing suitability of blinds and awnings for situations
- Reading and interpreting workplace documents, including work orders, work instructions and operator instructions
- Established lines of communication and protocols
- Types of tools and equipment used for assessing suitability of blinds and awnings for situations and procedures for their safe use, operation and maintenance
- Types and styles of buildings and legislation that applies to their construction and modification/decoration
- Terms used to describe components of blinds and awnings
- Characteristics of materials used in the construction and installation of blinds and awnings
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information

- Mathematical techniques for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to assessing suitability of blinds and awnings for situations.

MSFCP2001 Use coopering sector hand and power tools

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers use of coopering hand and power tools, including their identification, selection, preparation, use and storage. It may apply to a factory or an on-site environment and involves application of skills and knowledge at both the production worker and trade skills level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Coopering

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify hand and power tools	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to coopering operations are verified and complied with
		1.2	Types of hand and power tools and their functions are identified
		1.3	WHS requirements, including personal protection needs, are observed throughout the work
2	Select and use hand tools	2.1	Hand tools selected are consistent with needs of the job
		2.2	Selected hand tools are checked for serviceability and safety and any faults rectified or reported

- | | | | |
|---|-------------------------------------|-----|---|
| | | 2.3 | Equipment is selected to hold or support material for hand tools application where applicable |
| | | 2.4 | Material is located and held in position for hand tool application |
| | | 2.5 | Hand tools are safely and effectively used according to their intended use |
| | | 2.6 | Hand tools are safely located when not in immediate use |
| 3 | Select and use power tools | 3.1 | Power tools are selected consistent with needs of the job in accordance with conventional work practice |
| | | 3.2 | Power tools are visually checked for serviceability/safety in accordance with WHS requirements and any faults rectified or reported |
| | | 3.3 | Equipment is selected to hold or support materials for power tool application as applicable |
| | | 3.4 | Material is located and held in position for power tool application as applicable |
| | | 3.5 | Power tools are safely and effectively used in application processes |
| | | 3.6 | Power tools are safely located when not in use |
| 4 | Clean work areas and maintain tools | 4.1 | Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures |
| | | 4.2 | Waste and scrap are removed following workplace procedures |
| | | 4.3 | Tools used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures |
| | | 4.4 | Equipment and work area clean-up is maintained in accordance with workplace procedures |
| | | 4.5 | Records and reports are completed to workplace requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures, or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem-solving skills

Tools and equipment include:

- hand tools:
 - hand plane
 - chisels
 - hand saws
 - spokeshave
 - hammer
 - mallet
 - auger
 - croze
 - driver
 - knives (belly, crum, heading and hollow)
 - cooper's hammer
 - maul
 - bradawl
 - adze(s)
 - shaves (hoop, inside and heading)
 - swift

- marking-out tools
- files
- rasps
- scraper
- screwdrivers
- hand drill
- power tools:
 - bench grinder
 - presses (hoops)
 - head making machine
 - drop saw
 - circular power saw
 - planer
 - double sided planer
 - drill
 - jig saw
 - computer numeric controlled (CNC) router
 - laser cutter
 - trimmer
 - biscuit machine
 - brad/nail and staple gun
 - sanders (long belt, disk and machine)

Waste includes:

- off-cuts
- shavings
- sawdust

Records and reports include:

- the machining method
- product type
- size
- inspection
- grading and labelling outcomes
- storage locations
- quality outcomes
- hazards
- incidents
- equipment malfunctions

Personal protective equipment includes:

- that prescribed under legislation, regulations and enterprise policies and practices

Information and

- workplace procedures relating to the use of tools and equipment

procedures include:

- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFCP2001A Use coopering sector hand and power tools

Assessment Requirements for MSFCP2001 Use coopering sector hand and power tools

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Select appropriate hand or power tools set out in the Range of Conditions for common coopering work and demonstrate their safe and effective use to complete coopering tasks
- Conduct operator maintenance on hand and power tools, including the grinding of:
 - shaves
 - specialised hand tools
 - drill bits
- Store tools correctly
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for coopering operation
- Basic barrel construction terminology and techniques
- Basic barrel repair terminology and techniques
- Coopering tools, their characteristics, uses, limitations and operator maintenance requirements
- Coopering hand tool application techniques

- Coopering power tool set-up and application techniques
- Coopering components standard shapes and forms
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and protocols
- Relevant problem identification and resolution
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to the full range of routinely used coopering hand and power tools.

MSFCP2002 Produce barrels using non-fired processes

Modification History

Release 1 - New unit of competency

Application

Pre-requisite Unit

Competency Field

Unit Sector

Coopering

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify and respond to timber and material properties	1.1	Types of timber and inherent characteristics are analysed to select the optimum timber for the product
		1.2	Characteristics and properties of oak are identified and considered
		1.3	Properties and impacts of metals are identified and considered
2	Respond to the impact of the barrel properties on wine product	2.1	Cause and effects on the product of controlled oxidation is considered and responded to
		2.2	Cause and effects on the product of barrel maturation is considered and responded to
		2.3	Cause and effect of the fermentation in barrel is considered and responded to
		2.4	Impact of seasoning on the barrel timber components and the product are considered as a factor in determination of seasoning requirements
3	Prepare for	3.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to coopering

	production		operations are verified and complied with
		3.2	Work order is reviewed, confirmed and clarified with appropriate personnel
		3.3	Barrel production sequence is planned
		3.4	Procedures are determined for checking quality at each stage of the process
		3.5	Suitable work area is selected for the task
		3.6	Tools and equipment suitable for the work are selected and checked for safe operation
4	Select and prepare components	4.1	Materials, hardware, fittings and attachments are collected
		4.2	Fixing and joining devices are selected in accordance with work instructions and type of materials to be joined
		4.3	Jigs are selected and checked for suitability of purpose
		4.4	Components, including staves and heads, are machined and prepared to specification
5	Assemble components	5.1	Components are laid out and joined using jigs, appropriate fastenings and clamping devices
		5.2	Hand and/or power tools and equipment are used as required
		5.3	Assembled components are checked for compliance with specifications
		5.4	Components are prepared, assembled, fitted and checked in accordance with specification
6	Finish the product	6.1	Product is lined in accordance with specification
		6.2	Product is tested for leakage and faults are repaired
		6.3	Decorative features or fittings are fitted and secured to specification
		6.4	Product is sanded and prepared for coating
		6.5	Product is coated in accordance with specification and intended commercial application

7	Clean work area/s and maintain equipment	7.1	Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures
		7.2	Finished products are organised and stored in holding area
		7.3	Waste and scrap are removed following workplace procedures
		7.4	Tools and equipment used are cleaned; inspected for serviceable condition and stored appropriately in accordance with workplace procedures
		7.5	Equipment and work area clean-up is maintained in accordance with workplace procedures
		7.6	Records and reports are completed to workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures, or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

	<ul style="list-style-type: none">• work requires individuals to demonstrate some discretion, judgement and problem-solving skills
Work order includes:	<ul style="list-style-type: none">• design• tolerances• process• materials• finish• quantity
Appropriate personnel include:	<ul style="list-style-type: none">• supervisors• suppliers• clients• colleagues• managers
Barrels include:	<ul style="list-style-type: none">• traditional barrel or equivalent products, such as:<ul style="list-style-type: none">• vats• casks• tubs• bars• baths

 - jig saw
 - computer numerically controlled (CNC) router
 - laser cutter
 - trimmer
 - biscuit machine
 - brad/nail and staple gun
 - sanders (long belt, disk and machine)
- Materials include:**
- solid timber
 - caulking cotton
 - wedges
 - workhole pegs
 - tooth picks
 - metal wedges
- Jigs include:**
- shaped templates for routing
- Coopering components include:**
- heads
 - staves and hoops
 - decorative features or fittings in steel, stainless steel or copper
- Checking includes:**
- fitting
 - correct number and fitting of staves
 - hoop and hardware, fittings and attachments
 - conformity to work instruction and quality requirements
- Lining includes:**
- plastics
 - foil
 - sealing coating
- Testing includes:**
- standard hot water leakage testing
- Repair of leakage faults include:**
- plugging
 - caulking
 - re-machining
- Decorative features or fittings include:**
- final hoops and taps which may be steel, stainless steel or copper
- Coating includes:**
- paint
 - lacquer
 - polyurethane
 - varnish

Waste includes:	<ul style="list-style-type: none">• off-cuts• shavings• sawdust

Assessment Requirements for MSFCP2002 Produce barrels using non-fired processes

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Identify a range of timber types, including oak, and detail their uses and limitations and the properties of American and French oak
- Consider the likely effects of controlled oxidation, barrel maturation and in-barrel fermentation on products
- Complete a minimum of two (2) non-fired and fully finished barrel or equivalent products to specification
- Effectively conduct operator maintenance on tools and equipment
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or Territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for coopering operation
- Basic barrel construction terminology and techniques
- Basic barrel repair terminology and techniques
- Organisational and site standards, requirements, policies and procedures for coopering
- Types of coopering tools and equipment and procedures for their safe use, operation and maintenance

- Types of timbers used in the coopering industry, their characteristics, properties, uses and limitations
- Types and sources of oak and the advantage/disadvantages of each
- The effects of the structure of timber, including:
 - parts of the tree and tree cell structure
 - optimum stave production techniques
 - types of seasoning and the impacts of techniques, including combination techniques, on the cell structure
- The effects of the barrel properties on the wine and spirit product
- Coopering components standard shapes and forms
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and protocols
- Relevant problem identification and resolution
- Set-up and operation of machining equipment
- Cutting patterns and sequences
- Cutting tool condition assessment
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, including examples of timber, samples of oak and equipment, relevant to producing a coopering product and specifications.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify and respond to timber and material properties	1.1	Types of timber and inherent characteristics are analysed to select the optimum timber for the product
		1.2	Characteristics and properties of oak are identified and considered
		1.3	Properties and impacts of metals are identified and considered
2	Respond to the impact of the barrel properties on wine product	2.1	Cause and effects on the product of controlled oxidation is considered and responded to
		2.2	Cause and effects on the product of barrel maturation is considered and responded to
		2.3	Cause and effect of the fermentation in barrel is considered and responded to
		2.4	Impact of toasting on the barrel and the product are responded to as a factor in the toasting operation
		2.5	Impact of seasoning on the barrel timber components

			and the product are considered as a factor in determination of seasoning requirements
3	Prepare for production	3.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to coopering operations are verified and complied with
		3.2	Work order is reviewed, confirmed and clarified with appropriate personnel
		3.3	Barrel production sequence is planned
		3.4	Procedures are determined for checking quality at each stage of the process
		3.5	Suitable work area is selected for the task
		3.6	Tools and equipment suitable for the work are selected and checked for safe operation
4	Select and prepare components	4.1	Materials, hardware, fittings and attachments are collected
		4.2	Fixing and joining devices are selected in accordance with work instructions and type of materials to be joined
		4.3	Jigs are selected and checked for suitability of purpose
		4.4	Components, including staves and heads, are machined and prepared to specification
5	Pre-assemble barrel components	5.1	Components are laid out inspected and selected for use and joined using jigs
		5.2	Heads are joined and clamped
		5.3	Staves are fitted and hooped
		5.4	Hand and/or power tools and equipment are used as required
		5.5	Assembled components are checked for compliance with specifications
6	Fire the barrel	6.1	Barrel's intended use and related technical instructions are analysed to determine the toasting technique and timing
		6.2	Barrel interior is toasted to specification

		6.3	Tensioning processes are applied
		6.4	Hoops are fitted
		6.5	Crozing is completed to specification
		6.6	Heads are cut, bevelled to size and fitted
7	Finish the product	7.1	Barrel is finished using belt, disk or machine sander and hand tools
		7.2	Final hoops and decorative features or fittings are fitted and secured to specification
		7.3	Barrel is tested for leakage and faults are repaired
8	Clean work area and maintain equipment	8.1	Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures
		8.2	Finished products are organised and stored in holding area
		8.3	Waste and scrap are removed following workplace procedures
		8.4	Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures
		8.5	Equipment and work area clean-up is maintained in accordance with workplace procedures Records and reports are completed to workplace requirements
		8.6	Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Assessment Requirements for MSFCP2003 Produce barrels using fired processes

Modification History

Release 2 - Mapping corrected. Supersedes and is not equivalent to LMFCP3003A

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Identify a range of timber types, including oak, and detail their uses and limitations and the properties of American and French oak
- Consider the likely effects of controlled oxidation, barrel maturation and in-barrel fermentation on products
- Complete a fired and fully finished barrel or equivalent product to specification
- Conduct operator maintenance on tools and equipment
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for coopering operation
- Barrel construction terminology and techniques
- Barrel firing/toasting techniques
- Barrel repair terminology and techniques
- The impact of firing on barrel content characteristics
- Organisational and site standards, requirements, policies and procedures for coopering

- Types of coopering tools and equipment and procedures for their safe use, operation and maintenance
- Types of timbers used in the coopering industry, their characteristics, properties, uses and limitations
- Types and sources of oak and the advantage/disadvantages of each
- The effects of the structure of timber, including:
 - parts of the tree and tree cell structure
 - optimum stave production techniques
 - types of seasoning and the impacts of techniques, including combination techniques, on the cell structure
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and protocols
- Relevant problem identification and resolution
- Set-up and operation of machining equipment
- Cutting patterns and sequences
- Cutting tool condition assessment
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to producing a fired coopering product and specifications.

MSFCP2004 Maintain and repair barrels

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers preparing, inspecting, disassembling, cleaning, repairing and restoring barrels. It may apply to a factory or an on-site environment

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Coopering

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Identify and confirm maintenance requirements	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to coopering operations are verified and complied with
		1.2	Work order is reviewed, confirmed and clarified with appropriate personnel
		1.3	Barrel is disassembled, as necessary, to provide inspection access
		1.4	Barrel is cleaned of build-up materials or other matter which may inhibit inspection
		1.5	Barrel is tested, inspected and evaluated for faults
		1.6	Further maintenance and repair requirements are

			identified and/or confirmed
2	Prepare for maintenance and repair	2.1	Maintenance and repair requirements are analysed and procedures are determined for checking quality at each stage of the process
		2.2	Tools, equipment, materials and components required for the maintenance and repair are selected, sourced and prepared for use
		2.3	Disassembly required for maintenance and repair is completed
		2.4	Barrel and components are cleaned internally and externally
3	Complete maintenance and repair activities	3.1	Faulty parts and components are replaced
		3.2	Leakage faults are repaired by the appropriate means
		3.3	Barrel is re-assembled and refired
		3.4	Barrel is tested and inspected to confirm the effectiveness of repairs
		3.5	Cleaning and sterilisation processes relevant to the work circumstances are selected and applied
		3.6	Barrel is finished, fully restored and prepared for use
4	Clean work area and maintain equipment	4.1	Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures
		4.2	Waste and scrap are removed following workplace procedures
		4.3	Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures
		4.4	Equipment and work area clean-up is maintained in accordance with workplace procedures
		4.5	Records and reports are completed to workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|---------------------------------------|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate some discretion, judgement and problem solving |
| Work order includes: | <ul style="list-style-type: none">• design• tolerances• process• materials• finish• quantity |
| Appropriate personnel include: | <ul style="list-style-type: none">• supervisors• suppliers• clients• colleagues• managers |
| Barrels include: | <ul style="list-style-type: none">• traditional barrel or equivalent products, such as:<ul style="list-style-type: none">• vats• casks• tubs• bars• baths |

- Barrel cleaning includes:**
- hand and machine shaving of build-up
 - the application of authorised cleaning materials
- Faults and blemishes include:**
- material faults:
 - knots
 - sapwood
 - splits and shakes
 - rot and decay
 - insect infestation
 - mineral streak or brown stripe
 - broken chime
 - split staves
 - acetic or volatile barrel
 - mouldy barrel
 - water contamination
 - manufacturing faults:
 - head joint
 - stave and chime leakage
 - wear, tear and deterioration faults:
 - handling damage
 - discolouration
 - broken staves
 - buckled heads
 - burst heads
 - build-up of fermentation products
 - contamination
- Maintenance and repair requirements include:**
- component repair and replacement
 - detailed cleaning and sterilisation
 - testing
- Tools and equipment include:**
- hand tools:
 - hand plane
 - chisels
 - hand saws
 - spokeshave
 - hammer
 - mallet
 - auger
 - croze
 - driver
 - knives (belly, crum, heading and hollow)

- cooper's hammer
- maul
- bradawl
- adze(s)
- shaves (hoop, inside and heading)
- swift
- marking-out tools
- files
- rasps
- scraper
- screwdrivers
- hand drill
- power tools:
 - bench grinder
 - presses (hoops)
 - head making machine
 - drop saw
 - circular power saw
 - planer
 - double sided planer
 - drill
 - jig saw
 - computer numerically controlled (CNC) router
 - laser cutter
 - trimmer
 - biscuit machine
 - brad/nail and staple gun
 - sanders (long belt, disk and machine)

Materials include:

- solid timber
- caulking cotton
- wedges
- workhole pegs
- tooth picks
- metal wedges

Coopering components include:

- heads
- staves and hoops
- decorative features or fittings in steel, stainless steel or copper

Repair of leakage faults include:	<ul style="list-style-type: none">• plugging• caulking• re-machining
Testing includes:	<ul style="list-style-type: none">• standard hot water leakage testing
Waste includes:	<ul style="list-style-type: none">• off-cuts• shavings• sawdust
Records and reports include:	<ul style="list-style-type: none">• the machining method• product type• size• inspection• grading and labelling outcomes• storage locations• quality outcomes• hazards• incidents• equipment malfunctions
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• workplace procedures relating to the use of tools and equipment• work instructions, including job sheets, cutting lists, plans, drawings and designs• workplace procedures relating to reporting and communication• manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFCP3004A Maintain and repair barrels

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFCP2004 Maintain and repair barrels

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
- maintain required production output and product quality
- Clean a barrel using both hand and machine methods
- Repair a leakage fault and replace a range of faulty component parts
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for coopering operation
- Barrel construction terminology and techniques
- Barrel firing/toasting techniques
- Barrel repair terminology and techniques
- The impact of firing on wine characteristics
- Organisational and site standards, requirements, policies and procedures for coopering
- Types of coopering tools and equipment and procedures for their safe use, operation and maintenance
- Characteristics of timber, timber products and defects
- Coopering components standard shapes and forms
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and protocols

- Relevant problem identification and resolution
- Set-up and operation of machining equipment
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to the maintenance and repair of barrels and specifications.

MSFDN4001 Produce drawings from design concepts

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers producing manual and computer-aided drawings of furnishing objects from design concepts intended for use in a furnishing industry production or manufacturing environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Prepare for the task	1.1	Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.2	Purpose and operational characteristics of object to be drawn are identified
		1.3	Production materials and methods are identified
2	Establish design requirements and limitations	2.1	Type of drawing to be completed is identified
		2.2	Design concept requirements are established and documented identifying dimensions, angles, shapes and finished size

		2.3	Drawing conventions and specifications to be noted on the drawing are identified
		2.4	Appropriate medium for drawings is identified and selected
3	Quantify and draft initial drawing	3.1	Dimensions are plotted from prototype sketch and documented specifications
		3.2	Dimensional points are connected to match appropriate drawing view
		3.3	Any production notes or special requirements are noted
		3.4	Drawing conventions and specifications are noted on the documentation
4	Complete drawing	4.1	Angles, shapes and dimensions are checked against specifications and concept prototype drawing
		4.2	Adjustments are made to the drawing within scope of authority
		4.3	Drawing is checked for compliance with workplace documentation requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and

	dangerous goods codes, and local safe operating procedures or equivalent
	<ul style="list-style-type: none">• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate discretion, judgement and problem solving• work is performed with little external assistance and with minimal supervision or direction• drawing is to be undertaken in accordance with established industry and/or enterprise practices and procedures• customers may be internal or external
Drawings include:	<ul style="list-style-type: none">• manual and computer-aided processes and two and three-dimensional
Tools and equipment include:	<ul style="list-style-type: none">• drafting table• drawing aids• computing equipment and workstation• special lighting conditions
Materials include:	<ul style="list-style-type: none">• drawing• computing consumables
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• work procedures/instructions• designer's concept and specifications/instructions• legislation/regulations/codes relevant to the work undertaken• furniture design principles and criteria, including ergonomic requirements• quality and Australian Standards and procedures, and workplace procedures relating to reporting and communication• manufacturer specifications and operational procedures

Assessment Requirements for MSFDN4001 Produce drawings from design concepts

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Identify materials used in the work process
- Interpret specifications and measurements in two and three-dimensional form
- Satisfy ergonomic criteria during the drawing process
- Present relevant information within the production drawing using both manual and computer-aided processes and techniques
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage

Knowledge Evidence

- Manual and computer-aided drawing processes and techniques
- Ergonomic principles for furniture design and manufacture
- Presentation standards
- Enterprise or equivalent operating procedures, including procedures for preparing drawings and presenting information
- Relevant regulatory requirements, recognised standards and codes, and industry practices

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.

- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to design concept, specifications, dimensions and drawing equipment.

MSFDN4002 Produce line and component production drawings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers using computing and software capabilities to produce line and component production drawings intended for use in a furnishing industry production, manufacturing or marketing environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Produce line drawings	1.1	Drawing preparations, including essential information on product range, dimensions, customer requirements and enterprise information management systems, are obtained/completed
		1.2	Presentation style and method and appropriate software capabilities are selected and applied
		1.3	Drawings accurately reflect the product specification
		1.4	Drawings cover the required product range
		1.5	Drawings are clear and comply with customer presentation requirements

2	Prepare component production drawings	2.1	Drawing preparations, including the essential information on component specifications, dimensions and drawing and labelling management, are obtained/completed
		2.2	Drawing conventions and specifications to be noted on the drawing are identified
		2.3	Dimensions are plotted and connected to match appropriate drawing view/perspective
		2.4	Production notes, special requirements and drawing information are noted as required
		2.5	Drawing is checked for accuracy, clarity and compliance with enterprise documentation requirements
		2.6	Drawing is labelled and stored or processed in accordance with enterprise requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

Drawings include:	<ul style="list-style-type: none">• work requires individual to demonstrate discretion, judgement and problem solving• work is performed with little external assistance and with minimal supervision or direction• drawing is to be undertaken in accordance with established industry and/or enterprise practices and procedures• customers may be internal or external• manual and computer-aided processes and both two and three-dimensional

MSFDN4003 Produce patterns and templates

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers developing patterns and/or templates for production processes by hand, by using appropriate tools and equipment, and by computer-assisted production.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for and dimension the task	1.1	Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.2	Customer orders are interpreted to establish required sizes of finished products
		1.3	Size requirements are checked in relation to the production process and finishing capacity of the workplace
2	Plan process	2.1	Material for pattern or template is identified for approximate size and characteristics
		2.2	Required instruments and equipment are identified, located and assembled

		2.3	Drawings and related specifications are interpreted
		2.4	Procedures for using pattern development instruments and tools are checked and equipment is prepared for use
3	Plot dimensions	3.1	Equipment and tools are used following normal workplace procedures
		3.2	Each dimension is measured, exploded and plotted maintaining appropriate angles, arcs and curves
		3.3	Visual inspection and measurements are used to compare pattern dimensions and shapes with drawings and specifications
4	Complete pattern or template	4.1	Pattern or template is completed ensuring that the pattern indicates completion date and original drawing details
		4.2	Required workplace approval of pattern or template is obtained
		4.3	Plans are marked with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates
		4.4	Plans are copied and filed, as required, according to workplace policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

work environment.

Unit context includes:	<ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual ability, discretion, judgement and problem-solving skills in the production of patterns or templates• work is performed with little external assistance and with minimal supervision or direction• development of patterns and/or templates is undertaken in accordance with established enterprise procedures and practices• customers may be internal or external
Tools and equipment include:	<ul style="list-style-type: none">• computer numeric controlled (CNC) machines• static woodworking machines• relevant hand tools
Materials include:	<ul style="list-style-type: none">• manufactured board• solid timbers• composite materials
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• work organisation procedures and practices relating to the production of patterns and/or templates• designer/drawer specifications and instructions• legislation/regulations/codes relevant to the work undertaken• furniture production techniques and criteria, including ergonomic requirements• quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFDN4003B Produce patterns and/or templates

Assessment Requirements for MSFDN4003 Produce patterns and templates

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Interpret drawings and extrapolate to physical dimensions
- Select appropriate mediums and materials and produce a minimum of three (3) patterns or templates making use of:
 - manufactured board
 - solid timber
 - composite material
- Suggest improvements to pattern and template production and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Company operating procedures, including procedures for pattern and/or template production
- Types, characteristics uses and limitations of pattern/template materials
- Operation requirements of equipment and work systems in own work area
- Competency requirements of the work activities
- Relevant regulatory requirements, recognised standards and codes, and industry practices

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to drawings, job specifications, information on production/fabrication process, production materials and relevant computer equipment and software.

MSFDN4004 Design, construct and test jigs

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers designing, constructing and testing jigs required for manufacture, assembly, construction and testing of furnishing items.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------------------|-----|--|
| 1 | Identify production requirements | 1.1 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
| | | 1.2 | The item to be produced is identified from a work order |
| | | 1.3 | Production requirements are identified from specifications, an existing item or from drawings, patterns and/or templates |
| 2 | Design jig | 2.1 | Design of proposed jig or fixture is produced |
| | | 2.2 | Production process incorporating jig is planned |
| | | 2.3 | Materials to be used to construct jig are selected |

- | | | | |
|---|---------------|-----|--|
| 3 | Construct jig | 3.1 | Appropriate tools and equipment are selected |
| | | 3.2 | Jig is constructed in accordance with design and within tolerances |
| 4 | Test jig | 4.1 | Jig is used to produce prototype to ascertain its adherence to set tolerances and to assess its match to original design |
| | | 4.2 | Jig is adjusted, as required, to meet the requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
 - work requires individuals to demonstrate conceptual ability, discretion, judgement and problem-solving skills in the completion of this competency
 - work is performed individually or in a team environment
 - customers or suppliers may be internal or external
- Tools include:**
- routers
 - spindle moulders

- panel saws
 - copy shapers
 - radial arm saws
- Materials include:**
- solid timbers
 - manufactured board
 - composites
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- an enterprise work order which may be raised in response to a customer order, a modification to an item of production, or a new product line of the enterprise
 - product drawings, prototype, design brief, patterns, specifications and/or specifications
 - machine manufacturer specifications and operational procedures
 - workplace instructions, including, job sheets, plans, drawings and designs
 - workplace procedures relating to reporting and communicating
 - quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFDN4004B Design, construct and test jigs

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFDN4004 Design, construct and test jigs

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Produce a minimum of two (2) jigs required to create complex fine furnishing items, including a moving jig
- Produce a fixture in accordance with acceptable industry tolerances
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Machine technical specifications, including the acceptable criteria for related jigs
- Impact of design changes on jig construction
- Characteristics, uses and limitations of materials used for jig/fixture construction
- Jig and fixture design, construction and testing techniques

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to item specifications, design support facilities, jig construction materials, machinery, equipment and hand tools appropriate to the jigs to be produced.

MSFDN4005 Work within a furniture design team

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers researching, developing and presenting design and development proposals and documenting outcomes and proposals within a multi-disciplinary enterprise team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Interpret design brief	1.1	Design parameters are clarified, in consultation with designer, sales team, management and/or client where required
		1.2	A strategy plan and/or critical path plan is developed when required
		1.3	Constraints are identified and taken into account when clarifying the brief
2	Research relevant information	2.1	Trends in materials are researched for performance, aesthetics, care/maintenance requirements and suitability to project or design
		2.2	Trends and new technology are researched, where

		appropriate
	2.3	Client priorities are clarified, including cost, performance, aesthetics and availability
	2.4	Technical requirements associated with production, including work health and safety (WHS) are assessed, within specified guidelines
	2.5	Any additional expertise required for the project is identified
3	Contribute to design concepts	<p>3.1 Preliminary concepts are worked out in conjunction with others to identify possibilities</p> <p>3.2 Design concept is developed through predetermined criteria, such as ergonomics, materials, colour, properties and end application</p> <p>3.3 Ideas are contributed and discussed with team members</p> <p>3.4 Relevant support materials and explanations are developed and refined in conjunction with members of the design team</p>
4	Contribute to the presentation of design/product	<p>4.1 Roles of self and others for the presentation meeting are determined</p> <p>4.2 Presentation of design or product is carried out in a manner which promotes the design's acceptance/approval</p>
5	Maintain records	5.1 Records are maintained and reports prepared, where necessary, in accordance with enterprise procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
 - work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving
 - work refers to enterprise and client initiated ideas or requests applied under general guidance on progress and outcomes
 - size and work organisation within the enterprise will determine the range of interaction with other areas/personnel, for example:
 - patternmaker
 - sample hand/machinist
 - marketing/sales
 - management
 - customer
- Design includes:**
- applications associated with an original design
 - adaptation of designs
 - interpretation of sketches
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- product catalogues, style manuals or equivalent
 - enterprise business plans and products
 - work specifications
 - customer requirements
 - design brief
 - organisation work procedures
 - legislation, regulations and industry codes of practice relevant to the product

- quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFDN4005B Work within a furniture design team

Assessment Requirements for MSFDN4005 Work within a furniture design team

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Research information and share it with others in the team and contribute to the design of products through discussion
- Encourage excellence in performance of team/group members suggesting improvements to design activities and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Company operating procedures, including procedures for developing design concepts
- Design core and professional practices
- Ergonomic principles for furniture design and manufacture
- Operation requirements of equipment and work systems in own work area
- Competency requirements of the work activities
- WHS requirements

Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to design development team, design concepts and research and development (R&D) agencies/capabilities.

MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers preparing complex drawings using computer-aided techniques and capabilities, including three-dimensional modelling, exploded assembly drawings and conversion of drawings for computer numerically controlled (CNC) applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing design

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Create exploded assembly drawings	1.1	Drawing preparations, including drawing name, labelling information, dimensions, specifications and information management requirements, are obtained/completed
		1.2	Three-dimensional models are prepared for all components
		1.3	Perspective view of the model is created and confirmed
		1.4	Model is exploded so that all components are visible
		1.5	All individual components are labelled in accordance with enterprise requirements

		1.6	Quality checks are completed to ensure accuracy of outcomes
		1.7	Drawings are stored in accordance with enterprise requirements
2	Create job sheets	2.1	Preparations, including file storage, product coding, inventory information and drawing management requirements, are identified and completed
		2.2	Job sheet template is set up in accordance with enterprise requirements and practices
		2.3	Necessary orthographic views are created and dimensioned
		2.4	Sequencing of machine operations and operator requirements, including work health and safety (WHS) are identified and listed
		2.5	Draft job sheets are prepared, reviewed, tested and amended to enterprise requirements
		2.6	Job sheets are stored in accordance with enterprise requirements
3	Convert drawings for CNC applications	3.1	Conversion requirements are identified and confirmed from the CNC machine specifications
		3.2	Layers and additional information required for final conversion are created
		3.3	Drawing entities are assigned to the relevant layers
		3.4	Conversion to the required file type is completed
		3.5	Converted file is stored in accordance with enterprise requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Create a minimum of two (2) exploded assembly drawings, including:
 - preparation of three-dimensional models
 - creation of perspective views
 - exploding the models to expose all components
 - labelling of all components
 - management and storage of drawings
- Create a minimum of two (2) confirmed job sheets which have the necessary orthographic views and all required management and inventory information
- Convert a minimum of two (2) drawings for CNC application, including the creation of layers, assignment of drawing entities and the protection and storage of converted files
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity
-

Knowledge Evidence

- Design core and professional practices
- Ergonomic principles for furniture design and manufacture
- Type, range, uses and limitations of contemporary computer-aided design (CAD) software

- Types, range, uses and limitations of contemporary CAD applications
- Industry product ranges and detailed knowledge of furniture construction processes
- Types of construction materials and their characteristics, uses and limitations
- Materials, trims, accessories and their properties and characteristics
- Enterprise information management systems and processes related to drawings
- Relevant WHS legislation, regulatory requirements and codes of practice

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to real or appropriately simulated situations involving the application of drawing and drafting techniques and to the related computing, operational and inventory support systems.

MSFFDT4001 Apply finishing techniques to custom furniture

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers applying finishing techniques to custom furniture involving application of skills and knowledge at a highly skilled craftsman or artisan level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Plan and prepare for work	1.1	Applicable legislative, work health and safety (WHS), and organisational requirements relevant to finishing custom furniture are verified and complied with
		1.2	Instructions, plans and design briefs are read and interpreted to identify processes and materials to complete work tasks
		1.3	Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition
		1.4	Quality checking procedures are developed and documented for each step in the finishing process

- | | | | |
|---|--------------------------------------|-----|--|
| 2 | Select appropriate finish technology | 2.1 | Design brief and furniture material, style and purpose are appraised to identify finishing technique options |
| | | 2.2 | Using samples of the type of material surface and specified finish, various finishing options are evaluated and the preferred option is selected |
| | | 2.3 | Specifications for type of finishing material to be applied are identified to determine means of application |
| | | 2.4 | Method of applying finishes to surfaces is identified and evaluated |
| | | 2.5 | Sample of material is tested with selected finishing technique to ensure appropriateness |
| 3 | Finish furniture surface | 3.1 | Furniture surface is prepared in accordance with the finishing specification |
| | | 3.2 | Imperfections, pores, nail or screw holes on the surface are rectified |
| | | 3.3 | Finishing processes and materials are applied in accordance with the agreed specifications |
| | | 3.4 | Surface is polished or buffed depending on the shine required |
| | | 3.5 | Work is checked against required quality standards |
| | | 3.6 | Any non-conformity with the required quality standards is rectified |
| 4 | Complete housekeeping | 4.1 | Unused materials are stored or recycled as required |
| | | 4.2 | Tools and equipment are cleaned and stored appropriately |
| | | 4.3 | Faulty and defective equipment is tagged and reported in accordance with workplace practices |
| | | 4.4 | Work area is cleaned and rubbish disposed of appropriately |
| | | 4.5 | Workplace documentation and/or reports are completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|---|--|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving |
| Finishing custom furniture includes: | <ul style="list-style-type: none">• preparation technique used on the furniture surface• the processes of selection, evaluation and application of any materials to the surface• the process of polishing• other final finishing processes |
| Tools and equipment include: | <ul style="list-style-type: none">• power and hand sanders• brushes• steel wool• scrapers• rags• rubbing pads• spray guns• rottenstone• pumice• other polishing and rubbing compounds |
| Materials include: | <ul style="list-style-type: none">• timber (both indigenous and overseas)• adhesives and fasteners |

	<ul style="list-style-type: none">• shellac• lacquer• polyurethane• oil finishes• stains• oxides• bleaching compounds• ammonia• filling compounds
Furniture surface preparation includes:	<ul style="list-style-type: none">• sanding by hand or power sander• scraping• planing• other smoothing techniques• and is to take account of the fact that the colour of the wood may be changed by:<ul style="list-style-type: none">• staining• bleaching• painting• ammonia• fuming• other techniques
Surface filling includes:	<ul style="list-style-type: none">• using wood putty, wood plugs or other fillers
Finishing processes and materials include:	<ul style="list-style-type: none">• waxing• shellacking• nitrocellulose lacquering• conversion lacquering• linseed oiling• tung oiling• alkyd varnishing• polyurethane varnishing• water-based polyurethane and/or oil-varnish mixes
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• work procedures/instructions• manufacturer specifications and instructions• standard forms of workplace process and procedures• organisation work specifications and requirements• legislation, regulations and codes of practice• quality and Australian Standards and procedures

Unit Mapping Information

Assessment Requirements for MSFFDT4001 Apply finishing techniques to custom furniture

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Finish a minimum of four (4) different pieces of furniture to industry standards using at least four (4) different finish technologies on each, from the processes set out in the Range of Conditions
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the application of finishes
- Organisational and site standards, requirements, policies and procedures for the selection and use of finishing materials
- Finishing techniques
- Characteristics, properties and selection criteria of finishing materials
- Finishing characteristics and properties of timber being used

- Matching requirements of adhesives and fasteners to timbers/materials used
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Work flow in relation to the furniture items being made or repaired
- Environmental protection requirements
- Established communication channels and protocols
- Relevant problem identification and resolution

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to realistic and differing finishing tasks, materials, equipment and specifications relevant to applying finishing techniques to custom furniture.

MSFFDT4002 Assemble custom furniture

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers assembling custom furniture to critical production specifications involving application of skills and knowledge at a highly skilled craftsman or artisan level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan and prepare for work	1.1	Applicable legislative, work health and safety (WHS), and organisational requirements relevant to assembling custom furniture are verified and complied with
		1.2	Instructions, plans or design briefs and critical production specifications are read and interpreted to identify processes and materials to complete work tasks
		1.3	Assembly sequence is planned and materials/component layout is confirmed
		1.4	Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition

- | | | | |
|---|---------------------------|-----|--|
| | | 1.5 | Adhesives, trims and accessories are identified, evaluated against the production specification and selected for use |
| | | 1.6 | Quality checking procedures are developed and documented for each step in the assembly process |
| 2 | Assemble custom furniture | 2.1 | Components, materials and tools are laid out in accordance with the assembly plan |
| | | 2.2 | Components are checked against specification prior to assembly and out of specification items are rejected |
| | | 2.3 | Components are assembled and checked against specification for accuracy, fit, twist and distortion |
| | | 2.4 | Doors, drawers and shelves are assembled and fitted |
| | | 2.5 | Hardware and decorative accessories are applied to specification |
| | | 2.6 | Product quality is prepared for final finish, including the removal of bruises, scratches, dents and marks |
| | | 2.7 | Product quality is checked against plans at identified checkpoints |
| 3 | Complete housekeeping | 3.1 | Unused materials are stored or recycled as required |
| | | 3.2 | Tools and equipment are cleaned and stored appropriately |
| | | 3.3 | Faulty and/or defective equipment is tagged and reported in accordance with workplace practices |
| | | 3.4 | Work area is cleaned and rubbish disposed of appropriately |
| | | 3.5 | Workplace documentation and/or reports are completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Assessment Requirements for MSFFDT4002 Assemble custom furniture

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Assemble and prepare for finishing a minimum of three (3) different and significant custom furniture products utilising at least three (3) different adhesive types
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the assembly of custom furniture
- Organisational and site standards, requirements, policies and procedures for the assembly of custom furniture
- Techniques for the assembly, fixing and finishing of custom furniture components
- Characteristics and properties of materials used in furniture components
- Types, characteristics, uses, limitations and safety requirements of tools and equipment used in assembly operations

- Types, characteristics, uses, limitations and safety requirements of adhesives and fasteners used in custom furniture assembly
- Work flow in relation to the furniture items being assembled
- Relevant problem identification and resolution
- Environmental protection requirements

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to realistic assembly requirement involving three significant products, materials, equipment and specifications relevant to assembling custom furniture.

MSFFDT4003 Assess and record the lifecycle of a product

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers assessing and recording the design and production of a product from its raw source to its completion and life as a product in accordance with design elements and principles in an industry workplace or design studio environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Assess raw sources of material	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to recording the lifecycle of a product are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Communication with others is established and maintained in accordance with WHS requirements
		1.4	Most suitable materials to fulfil the brief are assessed to meet the requirements
		1.5	Materials are assessed from their source taking account of where they derived from and their processing

		techniques
	1.6	Materials are assessed for their ecological and environmental impact
	1.7	Materials are assessed for their availability and supply
	1.8	Information on raw materials is recorded for future use
2	Assess the design process	2.1 Problem or underlying factors being addressed by the design brief are verified and documented
	2.2	User needs and desires are assessed and documented
	2.3	Elements of design are assessed for the intended outcome and documented
	2.4	Principles of design are assessed for the intended outcome and documented
	2.5	Requirements of the brief are prioritised and assessed for conflicts
	2.6	Activities to be undertaken to complete concepts, sketches, drawings and models are documented and prioritised
	2.7	Final documentation outlining the full analysis of the design brief is compiled and produced as a report
3	Assess the production process	3.1 Production timeline is assessed
	3.2	Supply of raw materials for production is analysed
	3.3	Available personnel with suitable skills are assessed for proficiency to complete production
	3.4	Manufacturing process is assessed for equipment and assembly methods
	3.5	Component production is mapped
	3.6	Finishing requirements are assessed
	3.7	Final completion of product is assessed and quality checking arrangements put in place
	3.8	Action plan for production is completed
4	Assess the product	4.1 Packaging and despatch procedures are assessed and

life

verified

- 4.2 Destination of the final product is verified and documented
- 4.3 Use of the product is assessed and potential life of the product estimated
- 4.4 Product lifecycle process is reviewed using all of the assessed data

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving
- customers or suppliers may be internal or external

Design brief includes:

- the aims, objectives and milestones for the design project
- organisational or personal profiles
- target audience
- budget

	<ul style="list-style-type: none">• timeline• consultation requirements• colour requirements• image requirements• function
Appropriate personnel include:	<ul style="list-style-type: none">• trainers• supervisors• suppliers• clients• colleagues• managers
Materials include:	<ul style="list-style-type: none">• timber (native and imported)• man-made timber products• plastic• metal• alloys• stones• glass• textiles• fibreglass• foam• cardboard• paper products• any other manipulable substance
Sources include:	<ul style="list-style-type: none">• origin of the raw material, including type and location wood was derived from, how and where it was processed, impact growth and available seasoning lead time• mining source of metal or alloys and how these were processed• formulas for the composition of plastics• origin of textiles and how these were milled
Ecological and environmental impact include:	<ul style="list-style-type: none">• how the use of raw materials effect the ecology and environment and how its continued use will affect the area it has been sourced from• what impact will be felt by reducing or stopping material from the source
Documentation includes:	<ul style="list-style-type: none">• working notes• hand written records• typed and computer generated information• reports
Elements of design include:	<ul style="list-style-type: none">• line• shape

Principles of design include:

- form (geometric or organic)
- texture
- colour
- function
- balance
- proportion (symmetry and asymmetry)
- harmony
- contrast
- pattern
- movement
- rhythm
- unity
- style
- focus
- scale
- dominant
- sub-dominant
- subordinate relationship
- emphasis
- proximity
- alignment
- space
- anthropometry
- ergonomics
- arrangement
- workload materials handling capacity
- skills available
- equipment capabilities
- aesthetic relations
- tension
- development methods

Concepts include:

- ideas generated to respond to the design brief through both ideation drawings or sketching and written explanation

Sketches include:

- hand drawn images
- ideation drawings completed freehand

Working drawings include:

- drafted technical drawings or drawings produced on computer using computer-aided design (CAD) software packages that contain project specifications

Models include:

- any three-dimensional (3-D) product which is made to full size or replicated through maquette, produced without normal manufacturing techniques, mainly to provide for the analysis of proportion, balance and aesthetic value

- Manufacturing processes include:**
- methods by which the product will be produced with steps that entail working from drawings and specifications, producing components utilising machine operations, assembly of the components and finishing techniques
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- work procedures/instructions
 - manufacturer specifications and instructions
 - standard forms of workplace process and procedures
 - organisation work specifications and requirements
 - legislation, regulations and codes of practice
 - quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFDT4003A Assess and record the lifecycle of a product

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSFFDT4003 Assess and record the lifecycle of a product

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Record the lifecycle of a product from its raw source to its end use, work through the design process assessing the requirements and recording the intended outcomes
- Apply design elements and principles to a product lifecycle and produce a report on the analysis
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for assessing and recording furniture details
- Organisational and site standards, requirements, policies and procedures for assessing and recording furniture details
- Environmental protection requirements
- Established communication channels and protocols

- Relevant problem identification and resolution
- Elements and principles of design
- Ergonomics and aesthetic values
- Characteristics of furnishing materials, products and defects
- Design and related computer programs
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, equipment and specifications relevant to recording the lifecycle of a product.

MSFFDT4004 Assess environmental impact of a design

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers assessing the environmental impact of a design and evaluating and recording its energy consumption, waste and material sustainability at all stages of production, product use and disposal or recycling.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Assess raw sources of material	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to assessing the environmental impact of a design are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Communication with others to complete assessment is established and maintained
		1.4	Materials are assessed from their source taking account of where they derived from, their processing techniques and energy used to obtain them

		1.5	Materials are assessed for their ecological and environmental impact
		1.6	Materials are assessed for their availability and sustainability
2	Assess the environmental impact of the design	2.1	User needs and desires are assessed and documented
		2.2	Material choice and use as stated in the specifications is audited and assessed
		2.3	Product lifecycle analysis is evaluated and longevity determined
		2.4	Intended manufacturing processes, including assembly and finishing, are assessed for their impact on the environment
		2.5	Final documentation outlining the design environmental impact
3	Assess the manufacturing process	3.1	Production timeline is assessed and energy use measured
		3.2	Supply of raw materials for production is analysed and wastage estimated
		3.3	Manufacturing process is assessed for equipment and assembly method energy usage and waste
		3.4	Component production is analysed to measure energy use and waste
		3.5	Finishing requirements are assessed for toxic waste levels and energy usage
		3.6	Packaging, despatch and transport arrangements are analysed to measure energy usage
		3.7	Final documentation outlining the full analysis of the manufacturing impact on the environment is compiled and produced as a report
4	Assess product potential for recycling	4.1	Ability for all components of product to be recycled are assessed
		4.2	Non-recyclable components are identified and potential alternatives determined
		4.3	Impact of non-recyclable components on environment is

assessed

- 4.4 Recycling potential of the product is reported in documentation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

MSFFDT4005 Construct and evaluate furniture prototypes and samples

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing or overseeing the construction of furniture prototypes and samples in furnishing operations of all sizes. Construction of prototypes and samples can apply to an industry workplace or design studio environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan for production	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to constructing prototypes and samples are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Type and quantity of material to be used is acquired from the storage location
		1.4	Equipment is selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer recommendation

		1.5	Communication with others is established and maintained in accordance with WHS requirements
2	Plan for production	2.1	Manufacturing process is planned and organised
		2.2	Material is allocated in accordance with the manufacturing plan and safe working procedures
		2.3	Components are selected
		2.4	Assembly methods are researched and planned
		2.5	Components are assembled in accordance with the sketches and freehand development drawings
		2.6	Prototype or sample is finished according to draft specifications
3	Evaluate prototype or sample	3.1	Prototype or sample is evaluated for functionality and aesthetic appeal
		3.2	Prototype or sample is assessed for their elements of design
		3.3	Prototype or sample is assessed for their principles of design
		3.4	Prototype or sample is analysed against design brief requirements
		3.5	Prototype or sample is reviewed with client or test client
		3.6	Modifications to the prototype or sample are explored to satisfy the requirements of the design brief
		3.7	Prototype or sample production process faults are recorded and reported to the appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for MSFFDT4005 Construct and evaluate furniture prototypes and samples

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Construct a prototype or sample in accordance with the design brief and concept sketches and drawings
- Apply design elements and principles to develop a prototype in accordance with a the design brief
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for the construction of prototypes and samples
- Organisational and site standards, requirements, policies and procedures for constructing prototypes and samples
- Environmental protection requirements
- Established communication channels and protocols

- Relevant problem identification and resolution
- Elements and principles of design
- Ergonomics and aesthetic values
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Characteristics of materials, products and defects
- Set-up and operation of equipment
- Design and other relevant computer programs
- Product assembly techniques
- Sketching and drawing
- Storage systems and labelling
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, equipment and specifications relevant to constructing a prototype or sample.

MSFFDT4006 Determine work health and safety (WHS) implications of designs

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers identifying and assessing WHS implications of furniture designs, including accessories and materials, to determine potential hazards for a range of customer groups and those involved in their production. It includes identifying and acting upon hazards and risks within the workplace, and participating in WHS related training.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify principles of WHS	1.1	Duty of care and responsibilities of individuals and organisations are defined
		1.2	Concepts of hierarchy of control are identified and related to the workplace
		1.3	Codes of practice relating to specific workplace risks are identified
		1.4	Importance of a systematic approach to WHS is understood

		1.5	Applicable WHS, legislative and organisational requirements relevant to furniture designs are identified
		1.6	The furnishing materials to be used and their key characteristics are identified
2	Assess WHS implications for furniture manufacturing	2.1	Hazards associated with materials used in the manufacture of furniture are identified
		2.2	Hazards associated with production of furniture are identified
		2.3	Safety measures implemented to control hazards to manufacturers are identified and implications for furniture designs evaluated
		2.4	Information resources on safety aspects of materials and technology used in the production of furniture are identified and accessed
3	Assess WHS implications for customers	3.1	Range of customers for furniture products are identified and potential hazards for users determined
		3.2	Potential hazards associated with components and accessories are identified
		3.3	Safety measures implemented to control hazards to users are identified and implications for furniture designs evaluated
		3.4	Information resources on safety aspects of furniture design are identified and accessed
4	Assess risk	4.1	Likelihood of hazards causing harm is considered and determined
		4.2	Consequence if the event should occur is evaluated and determined
		4.3	Risk level (likelihood and consequence combined) is considered and determined
5	Apply risk control measures to furniture design	5.1	Designs are evaluated for WHS implications
		5.2	Range of treatments which may eliminate or minimise risks are identified
		5.3	Feasible options are subject to detailed analysis, including the identification of resource requirements

- 5.4 Most appropriate treatment for addressing risk is selected and applied to design

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving
- customers or suppliers may be internal or external

Duty of care includes:

- everything ‘reasonably practicable’ to be done to protect the health and safety of others at the workplace. This duty is placed on:
 - all employers
 - their employees
 - any others who have an influence on the hazards in a workplace

Hierarchy of control includes:

- the range of feasible options for managing the risk to health and safety. The hierarchy is:
 - elimination of the hazard
 - its substitution with a less harmful version
 - its redesign
 - engineering controls

	<ul style="list-style-type: none">• isolation of the hazard from people at the workplace• safe work practices• redesigning work systems• the use of personal protective equipment by people at the workplace
Systematic approach includes:	<ul style="list-style-type: none">• hazard identification• risk assessment• risk control• review
WHS requirements include:	<ul style="list-style-type: none">• Commonwealth, state or territory legislation and regulations, organisational safety policies and procedures• use of personal protective equipment and clothing• firefighting equipment• first aid equipment• hazard and risk control and elimination• control of hazardous materials and substances• manual handling, including lifting and carrying
Materials include:	<ul style="list-style-type: none">• fabrics• finishes• wood• metal• plastic• paint• foam• oils• animal skin• adhesives• nails• staples
Hazards associated with materials include:	<ul style="list-style-type: none">• chemical properties:<ul style="list-style-type: none">• toxicity• fumes• combustibility• physical properties:<ul style="list-style-type: none">• strength/weakness• splintering• breakage• weight• components:<ul style="list-style-type: none">• adhesives• nails

	<ul style="list-style-type: none">• staples
Hazards associated with production include:	<ul style="list-style-type: none">• manual handling• finishing and production processes• use of tools and machinery• dust inhalation• power sources and leads• flying debris• fume inhalation• trips• falls• lack of control during pouring• machine safety and vibration (direct and indirect consequences)
Range of customers include:	<ul style="list-style-type: none">• aged and the elderly• people with disabilities• children• adults
Potential hazards for users include:	<ul style="list-style-type: none">• allergies to materials• injury from materials or components• injury due to design faults• lack of stability• breakage• difficult to handle or install
Treatments include:	<ul style="list-style-type: none">• use of production safety strategies, such as dust and fumes extraction systems• materials testing• power source protection• personal protective equipment• use of tested materials and accessories• use of specialised safety features and components
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• work procedures/instructions• manufacturer specifications and instructions• standard forms of workplace process and procedures• organisation work specifications and requirements• legislation, regulations and codes of practice• quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFDT4008A Determine occupational health and safety implications of designs

Assessment Requirements for MSFFDT4006 Determine work health and safety (WHS) implications of designs

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Locate and apply safety information and assess safety aspects of furniture designs for a range of customers to address risks and hazards in furniture designs
- Complete a minimum of three (3) risk assessments of furniture designs, including the determination of required treatments
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to risk management in a furnishing technology work environment
- Organisational and site standards, requirements, policies and procedures for furnishing technology
- Types of tools and equipment, their operating characteristics and procedures for their safe use, operation and maintenance

- Characteristics of materials, products and defects
- Common furnishing technology related hazards and the range of commonly applied treatments
- Environmental protection requirements
- Established communication channels and protocols
- Relevant problem identification and resolution
- Appropriate mathematical procedures for estimation and measurement
- Procedures for the recording, reporting and maintenance of workplace records and information

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to establishing and maintaining a safe furnishing technology work environment, and relevant WHS legislation and regulations.

MSFFDT4007 Prepare and present furniture design information

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers preparing and presenting a range of design concepts as solutions to a design brief in accordance with integral design elements and principles in an industry workplace or design studio environment. It involves application of skills and knowledge at a supervisory or equivalent level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Plan for presentation of design information	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to producing design development sketches and drawings are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Type and quantity of concepts to be presented are assessed from the design brief
		1.4	Presentation equipment is selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer recommendations

		1.5	Communication with others is established and maintained in accordance with WHS requirements
2	Present design information	2.1	Concept sketches are presented as solutions to the design brief and for the audience
		2.2	Sketches are represented as ideation drawings and presented using presentation boards and portfolios
		2.3	Freehand development drawings are incorporated into the presentation to represent the construction and joints
		2.4	Working drawings are presented to represent final measurements and specifications
		2.5	Concepts and their elements of design are promoted, explained and evaluated for the audience
		2.6	Concepts and their principles of design are promoted, explained and evaluated for the audience
		2.7	Presentation of design information is made using multimedia and computer-based strategies
3	Present manufacturing information	3.1	Maquettes of concepts are presented for discussion and viewing
		3.2	Prototypes or samples are presented for viewing and aesthetic value
		3.3	Sample joints or joining techniques are presented to support the design theory
		3.4	Alternative manufacturing techniques are presented and promoted
		3.5	Material options are presented and promoted
		3.6	Assembly and finishing techniques and processes are presented and promoted
		3.7	Concept manufacturing process is evaluated and presented using multimedia and computer-based strategies

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

MSFFDT4008 Produce and evaluate developmental furniture models to scale

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers producing developmental models to scale using fundamental design elements and principles for presentation purposes in an industry workplace or design studio environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan for production	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to producing developmental models to scale are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Type and quantity of materials to be used are acquired from the storage location
		1.4	Equipment is selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer recommendations

		1.5	Communication with others is established and maintained in accordance with WHS requirements
2	Interpret design development sketches and drawings	2.1	Sketches and drawings are assessed for their elements of design
		2.2	Sketches and drawings are assessed for their principles of design
		2.3	Sample maquette is produced in accordance with the concept sketches and drawings
		2.4	Concept is modified for its aesthetic value in keeping with the intended function
		2.5	Working drawings are assessed for their specification requirements
		2.6	Concept is planned for model manufacture taking into account available equipment and resources
3	Produce scale model	3.1	Manufacturing process is planned and organised
		3.2	Material is processed in accordance with the manufacturing plan and safe working procedures
		3.3	Components are produced and prepared for assembly
		3.4	Components are assembled in accordance with the working drawings
		3.5	Scale model is finished according to specifications
4	Evaluate scale model	4.1	Design and production process faults are recorded and reported to the appropriate personnel
		4.2	Scale model is evaluated for functionality and aesthetic appeal
		4.3	Scale model is evaluated against design brief requirements
		4.4	Scale model is reviewed with client or test client
		4.5	Modifications to the scale model are explored to satisfy the requirements of the design brief

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|---------------------------------------|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving• customers or suppliers may be internal or external |

MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers setting up, operating and maintaining basic static woodworking machines to achieve furniture design requirements, including tuning and general problem solving. It involves application of skills and knowledge at the highly skilled craftsman or artisan level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Determine set-up and operating requirements of woodworking machines	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to the selection and use of static woodworking machines are verified and complied with
		1.2	Set-up requirements for static woodworking machines are identified according to furniture design and safety requirements
		1.3	Operating requirements to achieve design outcomes are identified and safety requirements determined

2	Set up and operate static woodworking machines	2.1	Selected machines are checked for serviceability, precision settings, maintenance compliance and safety
		2.2	Work specifications and instructions are interpreted and machines are set up to perform operations
		2.3	Machines are operated according to manufacturer operating procedures to achieve required work outcome
		2.4	Work is monitored to ensure quality standards are met
		2.5	Safety procedures are followed
3	Maintain static woodworking machines	3.1	Machines are assessed for performance compliance
		3.2	Faults or non-compliances are identified and rectified, replaced or reported according to workplace procedures
		3.3	Problem-solving techniques are applied to identify and address operational problems
		3.4	Routine maintenance is conducted to ensure optimal performance of machines
		3.5	Work area is maintained to housekeeping standards
		3.6	All machines are cleaned, maintained and stored in accordance with manufacturer specifications

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

work environment.

Unit context includes:	<ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving• customers or suppliers may be internal or external
Static woodworking machines include:	<ul style="list-style-type: none">• table saw• thicknesser• jointer• band saw
Problem-solving techniques include:	<ul style="list-style-type: none">• root cause analysis (RCA)• consultation with colleagues, designers, manufacturers, technicians and maintenance personnel• re-setting of machine• routine maintenance
Personal protective equipment includes:	<ul style="list-style-type: none">• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	<ul style="list-style-type: none">• work procedures/instructions• manufacturer specifications and instructions• standard forms of workplace process and procedures• organisation work specifications and requirements• legislation, regulations and codes of practice• quality and Australian Standards and procedures

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Locate and apply relevant information and set up, operate and maintain a table saw, thicknesser, jointer and band saw.
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to use of static woodworking machines
- Organisational and site standards, requirements, policies and procedures for use of static woodworking machines
- Types, characteristics, uses, limitations and maintenance requirements of the range of static woodworking machines used in furniture production
- Manufacturing specifications for static woodworking machines

- Processes for evaluating the quality of static woodworking machines in terms of specifications, safety, maintainability and commercial reputation
- Established communication channels and protocols
- Relevant problem identification and resolution
- Workplace safety requirements and WHS legislation
- Work flow within the furnishing workplace

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to range of woodworking equipment and support documentation, specialist woodworking machines, related hand tools and maintenance specifications.

MSFFDT4010 Research and select furniture finishes

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers researching and selecting finishes for various furniture design solutions in an industry workplace or design studio environment, and involves application of skills and knowledge at a supervisory or equivalent level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan for finish research	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to researching and recommending finishes are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Communication with others is established and maintained in accordance with WHS requirements
		1.4	Client requirements and desires are reviewed, confirmed and clarified

- | | | | |
|---|-------------------|-----|--|
| 2 | Research finishes | 2.1 | Aesthetic requirements of the finish are assessed |
| | | 2.2 | New finish technologies are researched and reported |
| | | 2.3 | Tactile requirements of the finish in relation to the design is researched |
| | | 2.4 | Application methods and available expertise for the desired finish are assessed |
| | | 2.5 | Costs of finishes are assessed and compared |
| | | 2.6 | Environmental impact of finishes are assessed |
| | | 2.7 | Longevity and restorability of finishes are researched |
| | | 2.8 | Hazards associated with the use and application of finishes are researched |
| | | 2.9 | Quality of finishes are assessed and reported |
| 3 | Select finishes | 3.1 | Research information is critically analysed in the context of the design brief requirements |
| | | 3.2 | Finishes and their elements of design are promoted, research explained and evaluated for the client |
| | | 3.3 | Finishes and their principles of design are promoted, research explained and evaluated for the client |
| | | 3.4 | Presentation of research information is made highlighting the findings and rationale for the finishes chosen |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|---------------------------------------|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving skills• customers or suppliers may be internal or external |
| Design brief includes: | <ul style="list-style-type: none">• the aims, objectives, milestones for the design project• organisational or personal profiles• target audience• budget• timeline• consultation requirements• colour requirements• image requirements• function |
| Appropriate personnel include: | <ul style="list-style-type: none">• trainers• supervisors• suppliers• clients• colleagues• managers |
| Clients include: | <ul style="list-style-type: none">• suppliers• manufacturers• private clients• colleagues• retailers• the public |
| Aesthetics include: | <ul style="list-style-type: none">• consideration of appeal to a large number of people; products are pleasing to the eye of many who view it |

Finishes include:	<ul style="list-style-type: none">• paints• waxes• lacquers• stains• pigments• oils• traditional finishes• plastic coatings• UV-protected coatings• liquid coatings• synthetic coatings• synthetics• paper• glass• vinyls• textiles• laminates• plastics• stainless steel• metal• veneers• stone-based products
Tactile includes:	<ul style="list-style-type: none">• that perceived by the sense of touch producing the effect of three-dimensional depth
Application methods include:	<ul style="list-style-type: none">• spraying• painting• applicators• gluing• vacuum wrapping• rubbing• bonding
Environmental impacts include:	<ul style="list-style-type: none">• how the making and use of finishes effects the environment and how its continued use will affect those in the area• energy consumption in applying the material• greenhouse gases created• waste levels and resource utilisation• what impact will be felt by reducing or stopping use of the finish
Longevity and restorability includes:	<ul style="list-style-type: none">• an analysis of how long the finish is expected to last, while maintaining quality of aesthetic value and how readily the finish can be upgraded, repaired or replaced

Hazards include:	<ul style="list-style-type: none">• toxins and gases released by some finishes• glues which may be harmful to people if not used correctly
Critical analysis includes:	<ul style="list-style-type: none">• comparing• contrasting• reflecting• critiquing• considering merit• discussion• debate
Elements of design include:	<ul style="list-style-type: none">• line• shape• form (geometric or organic)• texture• colour• function
Principles of design include:	<ul style="list-style-type: none">• balance• proportion (symmetry and asymmetry)• harmony• contrast• pattern• movement• rhythm• unity• style• focus• scale• dominant• sub-dominant• subordinate relationship• emphasis• proximity• alignment• space• anthropometry• ergonomics• arrangement• workload materials handling capacity• skills available• equipment capabilities• aesthetic relations• tension

Personal protective equipment includes:

- development methods
- that prescribed under legislation, regulations and enterprise policies and practices

Information and procedures include:

- work procedures/instructions
- manufacturer specifications and instructions
- standard forms of workplace process and procedures
- organisation work specifications and requirements
- legislation, regulations and codes of practice
- quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFDT4013A Research and select furniture finishes

Assessment Requirements for MSFFDT4010 Research and select furniture finishes

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Research and select finishes to assist with informing the design process and arrive at a solution which meets client requirements
- Apply design elements and principles to the research and selection of finishes in accordance with the concepts and design brief
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to selecting finishes
- Organisational and site standards, requirements, policies and procedures for the selection of finishing materials
- Finishing techniques
- Characteristics, properties and selection criteria of finishing materials

- Finishing characteristics and properties of timber being used
- Matching requirements of adhesives and fasteners to timbers/materials
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Work flow in relation to the furniture items being made or repaired
- Environmental protection requirements
- Established communication channels and protocols
- Relevant problem identification and resolution

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, equipment and specifications relevant to researching and recommending furniture finishes.

MSFFDT4011 Research and select furniture materials and technology

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers researching and selecting furniture materials and technologies in order to meet design requirements, including for traditional, new and emerging materials and technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan for material research	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to researching and recommending materials are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Communication with others is established and maintained in accordance with WHS requirements
		1.4	Client requirements and desires are reviewed, confirmed and clarified

- | | | | |
|---|--------------------------------------|-----|--|
| 2 | Research materials | 2.1 | Aesthetic requirements of the material are assessed |
| | | 2.2 | New material technologies are researched and reported |
| | | 2.3 | Tactile requirements of the material in relation to the design is researched |
| | | 2.4 | Manufacturing processes and available expertise for the desired material are assessed |
| | | 2.5 | Costs of materials are assessed and compared |
| | | 2.6 | Environmental impact of materials are assessed |
| | | 2.7 | Longevity and restorability of materials are researched |
| | | 2.8 | Hazards associated with the use and application of materials, including handling, are researched |
| | | 2.9 | Quality of materials are assessed and reported |
| 3 | Select materials | 3.1 | Research information is critically analysed in the context of the design brief requirements |
| | | 3.2 | Materials and their elements of design are promoted, research explained and evaluated for the client |
| | | 3.3 | Materials and their principles of design are promoted, research explained and evaluated for the client |
| | | 3.4 | Presentation of research information is made highlighting the findings and rationale for the materials chosen |
| 4 | Research furniture making technology | 4.1 | Information sources on traditional, new and emerging technologies used in the production of furniture are identified and assessed for usefulness |
| | | 4.2 | Traditional furniture making technologies are identified and their application analysed to determine advantages and disadvantages |
| | | 4.3 | New and emerging technologies are identified and analysed for relevance in furniture designs |
| | | 4.4 | Environmental and safety aspects of technologies are identified and implications for use assessed |
| | | 4.5 | Information is collected and stored for future use |

5	Select technology for furniture	5.1	Research information is critically analysed in the context of the design brief requirements
		5.2	The relevance of technology to specific design solutions is determined and technology selected
		5.3	Presentation of research information is made highlighting the findings and rationale for the technology chosen

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

MSFFDT4012 Research furniture styles and movements

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers researching furniture styles and movements and analysing how they influence furniture design by accessing a range of information sources. It also covers identifying influences on the design of furniture and documenting information for use in furniture design projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furniture design and technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Plan research	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to researching furniture styles and movements are verified and complied with
		1.2	Design brief is reviewed, confirmed and clarified with appropriate personnel
		1.3	Relevant research sources of information on furniture styles and movements are located
		1.4	Formal and informal research techniques are selected to access the information

		1.5	Scope of research is determined
2	Conduct research and document findings	2.1	Research is conducted using a range of research techniques
		2.2	Geographical research is conducted to detect influences
		2.3	Cultural, economic and environmental influences on furniture styles and movements are identified
		2.4	Features of furniture are identified
		2.5	Significant trends, designers and techniques and their influences on styles and movements are identified
		2.6	Research information is applied to current furniture design trends, philosophy and surrounding buildings
		2.7	Information is documented to develop reference materials to inform design projects
		2.8	Research materials and results of the research are organised and compiled into easy to access facilities for further reference
3	Maintain currency with furniture styles and movements	3.1	Research sources and compiled information are regularly checked for usefulness in informing design projects
		3.2	Opportunities to update and expand research of styles and movements are scheduled
		3.3	Findings from research are regularly incorporated into design outcomes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|----------------------------------|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate conceptual and analytical ability, discretion, judgement and problem solving• customers or suppliers may be internal or external |
| Design brief includes: | <ul style="list-style-type: none">• the aims, objectives, milestones for the design project• organisational or personal profiles• target audience• budget• timeline• consultation requirements• colour requirements• image requirements• function |
| Research sources include: | <ul style="list-style-type: none">• scientific texts• historical texts and journals• oral histories• journals• periodicals• images• objects• films• videos• microfiche• internet• technical information• stories• libraries• museums |

Information includes:	<ul style="list-style-type: none">• universities• collection catalogues• philosophy texts• world histories• cultural issues publications• spiritual issues publications• religious texts• histories of furniture design• linguistics, aesthetics and political publications• gender and identity issues texts• place, signs and symbols• criticism• new technologies• popular media
Styles and movements include:	<ul style="list-style-type: none">• furniture designers and key figures, such as Frank Lloyd Wright, Charles Eames and Antonio Gaudi• schools and movements, such as Bauhaus in Germany, Federal style in the United States, and Art Nouveau in Europe• periods and styles, such as the neo-classical Adams style, the simple lines of Art Deco, and the asymmetrical style of Rococo• decorative details, such as:<ul style="list-style-type: none">• rosettes• foots• hinges• mouldings
Research techniques include:	<ul style="list-style-type: none">• internet searches• interview• discussion• books• journals• films• documentaries• first hand review
Geographical research includes:	<ul style="list-style-type: none">• international• national• regional• local influences
Facilities include:	<ul style="list-style-type: none">• files• computer files• indices

- Documentation includes:**
- databases
 - charts
 - diagrams
 - freehand drawings
 - sketches
 - ideation drawings
 - working drawings
 - computer-generated documentation
 - pictures
 - illustrations
 - photos
 - multimedia presentations
 - materials or theme boards
 - specifications
 - measurements

Unit Mapping Information

Supersedes and is equivalent to LMFFDT4015A Research furniture styles and movements

Assessment Requirements for MSFFDT4012 Research furniture styles and movements

Modification History

Release 1 - New unit of competency

Performance Evidence

- Collect, organise and understand information related to furnishing work instructions and work orders and safety procedures
- Identify materials used in the work process
- Research furniture styles and movements to assist with informing current design practices, challenging and adapting influences into current designs
- Apply design elements and principles to the research of styles and movements in accordance with the concepts and design brief
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to researching styles and movements
- Organisational and site standards, requirements, policies and procedures for researching styles and movements
- Elements and principles of design
- Ergonomics and aesthetic values
- Significant trends, designers and techniques and their influences on styles and movements
- Characteristics of materials, products and defects
- Relevant computer programs for research and documentation
- Relevant research techniques
- Presentation techniques and equipment
