# **Assessment Requirements for MSTCL2006 Press work**

**Release: 1**

# Assessment Requirements for MSTCL2006 Press work

## Modification History

Release 1. Supersedes and is equivalent to LMTCL2006B Press work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- checking work against work specification or pressing instructions
- preparing pressing equipment and work before commencing pressing operations
- applying pressing techniques for positioning and shaping of the garment, for a range of different fabric types and at least two (2) work pieces according to workplace procedures and quality requirements
- controlling equipment and handling work for variations in work type and construction and pressing requirement, including positioning and shaping the garment to contribute to the final appearance
- inspecting pressed work and comparing against workplace pressing standards
- recording results of inspection, reporting and recording subsequent action to either reject or correct faulty work
- determining and recording preventative action to avoid any recurrence of faulty work
- finalising pressing operation for storage, packing or despatch operations, according to workplace requirements.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- pressing requirements and characteristics of typical fabrics and other materials used in garment assembly
- sewing techniques, such as pleats, tucks, gathers, darts and hems, and how pressing impacts on the finish
- quality standards and practices
- workplace practices
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in pressing work, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
