# **Assessment Requirements for MSTDC2006 Operate finishing equipment**

**Release: 1**

# Assessment Requirements for MSTDC2006 Operate finishing equipment

## Modification History

Release 1. Supersedes and is equivalent to LMTDC2006A Operate finishing equipment

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- following production schedules and work load priorities
- selecting, operating and monitoring at least two (2) types of finishing equipment for two (2) different types of garments
- maintaining quality requirements for each stage of the process
- identifying articles that are damaged, torn, or require reprocessing
- using correct manual handling techniques
- using and handling additives and chemicals safely
- checking garments for quality
- complying with relevant federal and state or territory legislative or regulatory requirements

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- range of available services
- finishing equipment and their applications
- machine operation, monitoring, and adjustment procedures
- fibres and fabrics and the effects of heat and steam
- level of operator maintenance
- inspection processes
- environmental aspects of related to workplace and machine, or equipment operation and manual handling
- quality practices
- federal and state or territory legislative or regulatory requirements.

## Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in operating finishing equipment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
