MTM11 Australian Meat Industry Training Package

Release: 1.0

CONTENTS

MTM11 Australian Meat Industry.....	14
Training Package Details.....	15
Preliminary Information	17
Overview	18
History.....	21
Mapping to Previous Training Package.....	22
Historical and General Information.....	77
Introduction to the Industry	78
Industry Requirements for Employability Skills	88
Competency Standards.....	88
Competency Standards - Industry Contextualisation.....	92
Examples from this Training Package of Employability Skills	93
Qualifications Framework.....	94
Qualification Pathways.....	102
Skill Sets in this Training Package	104
List of AQF Qualifications	105
Whole of Industry Qualification Information	106
List of ALL Units within Training Package	107
Imported Units of Competency	127
Assessment Guidelines Overview.....	133
Assessment Guidelines.....	146
MTM10111 Certificate I in Meat Processing (Smallgoods)	149
MTM10211 Certificate I in Meat Processing (Meat Retailing)	152
MTM20111 Certificate II in Meat Processing (Abattoirs)	156
MTM20211 Certificate II in Meat Processing (Smallgoods).....	169
MTM20311 Certificate II in Meat Processing (Meat Retailing).....	175
MTM20411 Certificate II in Meat Processing (Food Services).....	181
MTM30111 Certificate III in Meat Processing (Boning Room)	187
MTM30211 Certificate III in Meat Processing (Food Services)	194
MTM30311 Certificate III in Meat Processing (Meat Safety)	199
MTM30411 Certificate III in Meat Processing (Rendering).....	206
MTM30511 Certificate III in Meat Processing (Slaughtering).....	210
MTM30611 Certificate III in Meat Processing (General)	217
MTM30811 Certificate III in Meat Processing (Retail Butcher).....	227
MTM30911 Certificate III in Meat Processing (Smallgoods - General)	233
MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture)	241
MTM40111 Certificate IV in Meat Processing (Leadership).....	248
MTM40211 Certificate IV in Meat Processing (Meat Safety)	255
MTM40311 Certificate IV in Meat Processing (Quality Assurance)	262
MTM40411 Certificate IV in Meat Processing (General)	269
MTM50111 Diploma of Meat Processing	277
MTM50211 Diploma of Meat Processing (Meat Retailing)	284
MTM60111 Advanced Diploma of Meat Processing	291
MTM70111 Vocational Graduate Certificate in Agribusiness	298
MTM80111 Vocational Graduate Diploma of Agribusiness.....	304
MTMSS00001 Animal Welfare Officer Skill Set	311
MTMSS00005 Basic Meat Industry Skill Set	314
MTMSS00018 Game Harvester Skill Set.....	316
MTMSS00019 Game Industry Depot Management Skill Set	318

MTMSS00020 Game Pre-dressing Inspection Skill Set.....	320
MTMSS00038 Meat Industry Microbiological Testing Skill Set.....	322
MTMBUS701A Manage financial performance	325
MTMBUS702A Provide strategic leadership	335
MTMBUS703A Communicate and negotiate in a culturally diverse context	344
MTMBUS704A Develop and enhance collaborative partnerships and relationships	352
MTMBUS705A Develop and manage international business operations	363
MTMBUS706A Commercialise research and technology product/idea	373
MTMBUS801A Manage change to organisational electronic technology systems	382
MTMBUS802A Undertake research project.....	392
MTMBUS803A Analyse data for business decision making.....	399
MTMCOR201A Maintain personal equipment	407
MTMCOR202A Apply hygiene and sanitation practices.....	415
MTMCOR203A Apply Quality Assurance practices	423
MTMCOR204A Follow safe work policies and procedures.....	431
MTMCOR205A Communicate in the workplace	440
MTMCOR206A Overview the meat industry	449
MTMCOR401C Manage own work performance	458
MTMCOR402C Facilitate Quality Assurance process.....	467
MTMCOR403A Participate in OHS risk control process.....	477
MTMCOR404A Facilitate hygiene and sanitation performance.....	485
MTMG300A Overview wild game meat industry	493
MTMG301A Operate a game harvesting vehicle.....	500
MTMG302A Eviscerate, inspect and tag wild game carcass in the field	507
MTMG303A Receive and inspect wild game carcasses from the field	514
MTMG304A Receive and inspect wild game carcasses at a processing plant	522
MTMG305A Store wild game carcasses.....	531
MTMG306A Use firearms to harvest wild game	539
MTMP2002C Prepare animals for slaughter	547
MTMP2004B Feed Race.....	555
MTMP2005B Restrain animal.....	563
MTMP2006B Apply animal welfare and handling requirements	571
MTMP2007B Perform emergency kill	579
MTMP2008A Assess, purchase and transport calves	587
MTMP2009B Unload livestock	594
MTMP2011C Identify animals using electronic systems.....	602
MTMP2012C Shackle animal	610
MTMP2013C Operate electrical stimulator	617
MTMP2014C Remove head	625
MTMP2015C Cut hocks	633
MTMP2016C Mark brisket	640
MTMP2018C Complete changeover operation.....	647
MTMP2020C Trim pig pre-evisceration.....	655
MTMP2021C Number carcass and head.....	661
MTMP2022C Punch pelts	668
MTMP2023C Remove brisket wool	674
MTMP2024C Prepare hide or pelt for removal.....	681
MTMP2025B Bag tail	688
MTMP2026B Remove and record tag.....	694
MTMP2027B Seal or drain urinary tract.....	701
MTMP2028B Singe carcass	707
MTMP2029B Shave carcass.....	713
MTMP2030B Flush carcass	721

MTMP2031C Operate scalding/de-hairing equipment	727
MTMP2032C Operate whizzard knife.....	735
MTMP2033C Operate rise and fall platform.....	741
MTMP2034C Operate vacuum blood collection process	747
MTMP2035C Operate nose roller	754
MTMP2036C Operate pneumatic cutter	761
MTMP2037C Operate circular saw	768
MTMP2038C Prepare carcass and equipment for hide/pelt puller	775
MTMP2039C Operate tenderiser.....	782
MTMP2040C Operate mincer	789
MTMP2042C Operate new technology or process.....	796
MTMP2043C Operate sterivac equipment.....	804
MTMP2044B De-rind meat cuts.....	811
MTMP2045B De-nude meat cuts.....	819
MTMP2046B Operate rib puller	827
MTMP2047B Operate frenching machine.....	834
MTMP2048B Operate cubing machine	841
MTMP2049B Cure and corn product in a meat processing plant	848
MTMP2050B Operate head splitter	856
MTMP2051C Trim neck	863
MTMP2052C Trim forequarter to specification.....	869
MTMP2053C Trim hindquarter to specification.....	877
MTMP2054C Inspect hindquarter and remove contamination	884
MTMP2055C Inspect forequarter and remove contamination	891
MTMP2057B Remove spinal cord.....	899
MTMP2058B Operate jaw breaker.....	905
MTMP2061C Grade carcass.....	911
MTMP2062C Weigh carcass	919
MTMP2063C Operate semi-automatic tagging machine	927
MTMP2064C Measure fat.....	935
MTMP2065C Label and stamp carcass.....	943
MTMP2066C Wash carcass.....	951
MTMP2067B Operate a decontamination unit	957
MTMP2068B Remove tenderloin	963
MTMP2071C Inspect meat for defects	970
MTMP2072C Assemble and prepare cartons	978
MTMP2074C Identify cuts and specifications.....	986
MTMP2075C Pack meat products	994
MTMP2081C Operate carton sealing machine	1002
MTMP2082C Operate carton scales	1009
MTMP2083C Operate strapping machine	1016
MTMP2084C Operate carton forming machine	1024
MTMP2085C Operate automatic CL determination machine	1031
MTMP2086B Operate bag forming equipment	1039
MTMP2091C Assess dentition	1046
MTMP2092C Drop tongue.....	1053
MTMP2093C Wash head	1059
MTMP2094C Bone head	1065
MTMP2095C Remove cheek meat	1072
MTMP2096C Bar head and remove cheek meat	1078
MTMP2102C Process thick skirts	1085
MTMP2115C Process thin skirts.....	1093
MTMP2116B Process offal.....	1101

MTMP2117B Process runners	1108
MTMP2118B Overview offal processing	1115
MTMP2121C Prepare and trim honeycomb	1123
MTMP2123C Further process tripe	1130
MTMP2122C Recover mountain chain	1137
MTMP2124C Trim processed tripe	1143
MTMP2125C Process small stock tripe	1151
MTMP2126C Process bibles	1159
MTMP2127B Process maws	1166
MTMP2131C Prepare and despatch meat product orders	1174
MTMP2132C Loadout meat product	1182
MTMP2133C Store carcass product	1190
MTMP2134C Store carton product	1198
MTMP2135C Locate storage areas and product	1206
MTMP2136C Complete re-pack operation	1214
MTMP2137B Bag carcass	1222
MTMP2141C Overview offal processing on the slaughter floor	1230
MTMP2143C Separate offal	1238
MTMP2144C Trim offal fat	1246
MTMP2145C Separate and tie runners	1253
MTMP2147C Recover thin skirts	1259
MTMP2148B Remove thick skirts	1266
MTMP2149B Remove flares	1273
MTMP2150B Recover offal	1280
MTMP2151C Overview hide, pelt, skin processing	1287
MTMP2152C Trim hide or skin	1294
MTMP2153C Salt hide or skin	1302
MTMP2154C Grade hide or skin	1310
MTMP2155C Despatch hide or skin	1318
MTMP2156B Treat hides chemically	1325
MTMP2157B Chill, ice hides	1332
MTMP2158B Crop pelts	1340
MTMP2161C Overview fellmongering operations	1347
MTMP2162C Chemically treat skins for fellmongering process	1355
MTMP2163C Prepare chemicals for fellmongering process	1362
MTMP2164C Operate wool drier and press	1370
MTMP2165C Perform sweating operation on fellmongered skin	1378
MTMP2166C Perform skin fleshing operation	1386
MTMP2167C Skirt and weigh fellmongered wool	1394
MTMP2168B Operate wool puller	1402
MTMP2171C Dispose of condemned carcass	1409
MTMP2172C Skin condemned carcass	1416
MTMP2173C Eviscerate condemned carcass	1423
MTMP2175C Process paunch	1430
MTMP2176C Process skin by-products	1438
MTMP2177C Process pet meat	1446
MTMP2178B Skin skins	1454
MTMP2179B Process blood	1461
MTMP2181C Overview rendering process	1469
MTMP2182C Operate hogger	1477
MTMP2183C Operate blow line	1485
MTMP2184C Operate meat meal mill	1493
MTMP2185C Operate waste recovery systems	1501

MTMP2186C Pack and despatch rendered products.....	1508
MTMP2187C Break down and bone carcass for pet meat or rendering.....	1516
MTMP2188C Operate air filtration system.....	1522
MTMP2192B Clean carcass hanging equipment.....	1530
MTMP2193B Clean amenities and grounds.....	1538
MTMP2196C Overview cleaning program.....	1546
MTMP2197C Clean after operations - boning room.....	1554
MTMP2198C Clean after operations - slaughter floor.....	1562
MTMP2201C Transport food.....	1570
MTMP3001C Knock and stun animal.....	1578
MTMP3002C Stick and bleed animal.....	1586
MTMP3003A Handle animals humanely while conducting ante-mortem inspection.....	1594
MTMP3006C Rod weasand.....	1602
MTMP3007C Seal weasand.....	1608
MTMP3008C Ring bung.....	1616
MTMP3009C Seal bung.....	1624
MTMP3010A Split carcass.....	1632
MTMP3011C Overview legging operation.....	1640
MTMP3012C Make first leg opening cuts.....	1648
MTMP3013C Make second leg opening cuts.....	1656
MTMP3014C Perform legging on small stock.....	1664
MTMP3015A Bone neck.....	1672
MTMP3016B Perform 'Y' cut.....	1678
MTMP3017A Skin head.....	1685
MTMP3021C Explain opening cuts.....	1692
MTMP3022C Perform flanking cuts.....	1700
MTMP3023C Perform brisket cuts.....	1708
MTMP3024C Perform rumping cuts.....	1715
MTMP3025C Perform rosette cuts.....	1722
MTMP3026C Perform midline cuts.....	1730
MTMP3031C Scald and de-hair carcass.....	1737
MTMP3032C Operate pelt puller.....	1745
MTMP3033C Operate hide puller.....	1753
MTMP3034C Remove pelt manually.....	1760
MTMP3036C Bed dress carcass.....	1767
MTMP3037C Eviscerate animal carcass.....	1775
MTMP3038C Operate brisket cutter, saw.....	1783
MTMP3039C Eviscerate game shot carcass.....	1791
MTMP3041C Backdown pig carcass.....	1799
MTMP3042C Prepare head for inspection.....	1806
MTMP3043B Operate air knife.....	1813
MTMP3044B Drop sock and pull shoulder pelt.....	1820
MTMP3045B Undertake retain rail.....	1827
MTMP3046A Prepare and present viscera for inspection.....	1835
MTMP3052C Bone small stock carcass - leg.....	1843
MTMP3054C Slice and trim leg - small stock.....	1851
MTMP3055C Bone large stock carcass - forequarter.....	1859
MTMP3056C Bone large stock carcass - hindquarter.....	1867
MTMP3057C Slice and trim large stock forequarter.....	1876
MTMP3058C Slice and trim large stock hindquarter.....	1884
MTMP3059C Break carcass using a bandsaw.....	1892
MTMP3060C Operate leg boning machine.....	1900
MTMP3061C Operate trunk boning machine.....	1908

MTMP3062B Bone small stock carcase - shoulder	1916
MTMP3063B Bone small stock carcase - middle	1924
MTMP3064B Slice small stock carcase - shoulder.....	1932
MTMP3065B Slice small stock carcase - middle.....	1940
MTMP3066B Bone carcase using mechanical aids (large stock).....	1948
MTMP3071C Perform ante-mortem inspection and make disposition	1956
MTMP3072C Perform post-mortem inspection and make disposition	1965
MTMP3073B Implement food safety program	1975
MTMP3074B Perform carcase Meat Hygiene Assessment	1985
MTMP3075B Perform process monitoring for Meat Hygiene Assessment	1993
MTMP3076B Perform boning room Meat Hygiene Assessment.....	2001
MTMP3077B Perform offal Meat Hygiene Assessment	2009
MTMP3081C Operate batch cooker	2017
MTMP3082C Operate continuous cooker	2025
MTMP3083C Operate press	2033
MTMP3084C Operate wet rendering process.....	2040
MTMP3085C Monitor boiler operations	2048
MTMP3086C Operate tallow processing plant	2055
MTMP3087C Operate blood processing plant.....	2062
MTMP3088C Produce rendered products hygienically	2070
MTMP3089C Render edible products	2078
MTMP3090B Implement a Quality Assurance program for rendering plant	2086
MTMP3095B Grade beef carcasses using Meat Standards Australia standards	2094
MTMP3099B Use standard product descriptions - sheep/goats	2107
MTMP3100B Use standard product descriptions - beef	2115
MTMP3101B Use standard product descriptions - pork	2123
MTMP3102B Provide coaching	2131
MTMP3103B Provide mentoring	2140
MTMP3104B Use standard product descriptions - kangaroos.....	2149
MTMP3105A Follow and implement an established work plan.....	2157
MTMP3107B Perform manual chemical lean testing.....	2165
MTMP401B Utilise refrigeration index	2173
MTMP402B Implement a Meat Hygiene Assessment program	2181
MTMP403B Oversee plant compliance with the Australian Standards for meat processing.....	2190
MTMP404B Apply meat science.....	2198
MTMP405B Conduct and validate pH/temperature declines to Meat Standards Australia standards	2208
MTMP406A Develop and implement Quality Assurance program for a rendering plant.....	2216
MTMP407B Supervise new recruits.....	2224
MTMP408A Inspect transportation container/vehicle	2234
MTMP409A Maintain abattoir design and construction standards	2242
MTMP410A Oversee humane handling of animals	2250
MTMP411A Inspect game meat	2259
MTMP412A Inspect poultry	2267
MTMP413A Inspect ratites.....	2275
MTMPR201C Prepare and operate a bandsaw	2284
MTMPS201C Clean work area during operations	2291
MTMPS203C Operate scales and semi-automatic labelling machinery	2299
MTMPS204C Maintain production records.....	2307
MTMPS205C Clean chillers.....	2315
MTMPS206C Operate forklift in a specific workplace	2322
MTMPS300A Assess product in chillers.....	2330
MTMPS411C Monitor meat preservation process	2338

MTMPS412C Monitor and overview the production of processed meats and smallgoods	2346
MTMPS414B Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	2355
MTMPS415A Conduct an internal audit of a documented program	2367
MTMPS416A Conduct statistical analysis of process	2376
MTMPS417A Manage/oversee an external audit of the establishment's quality system	2384
MTMPS418A Oversee export requirements	2392
MTMPS5603C Develop, manage and maintain quality systems	2400
MTMPS5604C Manage maintenance systems	2415
MTMPS5605C Manage utilities and energy	2427
MTMPS5607C Manage and improve meat industry plant operations	2438
MTMPS5608C Manage environmental impacts of meat processing operations	2450
MTMPS5609C Manage, maintain and continuously improve OHS plans and systems	2465
MTMPS5610C Manage transportation of meat, meat products and meat by-products	2480
MTMPSR201C Vacuum pack product	2491
MTMPSR202B Apply environmentally sustainable work practices	2499
MTMPSR203A Sharpen knives	2507
MTMPSR301C Cure and corn product	2515
MTMPSR401C Coordinate contracts	2525
MTMPSR402C Prepare and evaluate resource proposals	2536
MTMPSR403C Facilitate achievement of enterprise environmental policies and goals	2545
MTMPSR404C Foster a learning culture in a meat enterprise	2555
MTMPSR405C Build productive and effective workplace relationships	2566
MTMPSR406C Manage and maintain a food safety plan	2576
MTMPSR407A Assess and evaluate meat industry requirements and processes	2585
MTMPSR408A Specify beef product using AUS-MEAT language	2597
MTMPSR409A Specify sheep product using AUS-MEAT language	2605
MTMPSR410A Specify pork product using AUS-MEAT language	2613
MTMPSR411A Lead communication in the workplace	2621
MTMPSR412A Participate in product recall	2630
MTMPSR413A Participate in ongoing development and implementation of a HACCP and Quality Assurance system	2638
MTMPSR414A Establish sampling program	2647
MTMPSR5601C Design and manage the food safety system	2656
MTMPSR5604C Manage new product/process development	2669
MTMPSR601A Benchmark to manage/improve enterprise performance	2681
MTMPSR602A Monitor and manage organisational legal responsibilities	2693
MTMPSR603A Manage meat processing systems to maintain and improve product quality	2702
MTMPSR604A Manage effective operation of meat enterprise cold chain and refrigeration systems	2713
MTMPSR606A Assess and purchase livestock	2723
MTMPSR607A Analyse and develop enterprise systems for new opportunities	2735
MTMPSR608A Establish new markets	2747
MTMR101C Identify species and meat cuts	2759
MTMR102C Trim meat for further processing	2767
MTMR103C Store meat product	2775
MTMR104C Prepare minced meat and minced meat products	2783
MTMR106C Provide service to customers	2791
MTMR107C Process sales transactions	2800
MTMR108B Undertake minor routine maintenance	2808
MTMR109B Monitor meat temperature from receipt to sale	2816
MTMR201C Break and cut product using a bandsaw	2825

MTMR202C Provide advice on cooking and storage of meat products	2833
MTMR203C Select, weigh and package meat for sale	2848
MTMR204C Package product using manual packing and labelling equipment	2856
MTMR207B Use basic methods of meat cookery	2864
MTMR208B Vacuum pack product in a retail operation	2873
MTMR209B Undertake routine preventative maintenance	2881
MTMR210B Make and sell sausages.....	2890
MTMR211B Produce and sell value-added products.....	2901
MTMR212B Receive meat product.....	2911
MTMR301C Prepare specialised cuts.....	2920
MTMR302C Assess carcase/product quality.....	2929
MTMR303C Calculate yield of carcase or product	2938
MTMR304C Manage stock	2945
MTMR305C Meet customer needs.....	2954
MTMR306C Provide advice on nutritional role of meat.....	2962
MTMR307C Merchandise products and services.....	2970
MTMR308C Prepare and produce value-added products.....	2980
MTMR309C Prepare, roll, sew and net meat.....	2990
MTMR310C Bone and fillet poultry	2998
MTMR311C Cost and price meat products	3006
MTMR312C Prepare portion control to specifications	3013
MTMR313C Bone game meat.....	3021
MTMR314B Order stock in a meat enterprise	3028
MTMR315B Calculate and present statistical data in a meat enterprise	3037
MTMR316B Utilise the Meat Standards Australia system for beef to meet customer requirements	3045
MTMR317B Cure, corn and sell product.....	3053
MTMR318B Assess and sell poultry product.....	3063
MTMR319B Break carcasses for retail sale.....	3072
MTMR320B Locate, identify and assess meat cuts.....	3081
MTMR321A Assess and address customer preferences.....	3090
MTMR322A Collect and prepare standard samples.....	3099
MTMR501A Develop and assess a meat retailing business opportunity	3107
MTMS101C Handle materials and products.....	3117
MTMS102C Pack smallgoods product.....	3124
MTMS205C Package product using thermoform process	3132
MTMS206C Package product using gas flushing process.....	3141
MTMS207C Operate bar and coder systems	3149
MTMS208C Operate metal detection unit	3157
MTMS210B Select, identify and prepare casings	3165
MTMS211B Manually shape and form product	3173
MTMS212B Manually link and tie product	3182
MTMS213B Slice product using simple machinery.....	3189
MTMS214B Rotate stored meat	3198
MTMS215B Rotate meat product	3206
MTMS216B Inspect carton meat.....	3214
MTMS217A Prepare dry ingredients.....	3222
MTMS218B Measure and calculate routine workplace data.....	3230
MTMS300B Operate mixer, blender unit.....	3239
MTMS301B Cook, steam and cool product.....	3248
MTMS302B Prepare dried meat	3256
MTMS303B Fill casings.....	3264
MTMS304B Thaw product - water	3274

MTMS305B Thaw product - air	3282
MTMS306B Identify and repair equipment faults	3290
MTMS307A Sort meat.....	3299
MTMS308A Batch meat.....	3308
MTMS309B Operate product forming machinery	3316
MTMS310B Operate link and tie machinery	3324
MTMS311B Operate complex slicing and packaging machinery.....	3332
MTMS312A Prepare meat-based pates and terrines for commercial sale	3340
MTMS313A Prepare product formulations	3349
MTMS314A Ferment and mature product	3356
MTMS315A Blend meat product	3364
MTMSR201C Prepare and slice meat cuts.....	3372
MTMSR202C Trim meat to specifications	3381
MTMSR203C Package product using automatic packing and labelling equipment	3389
MTMSR204C Despatch meat product.....	3397
MTMSR301C Break carcase into primal cuts	3405
MTMSR302C Prepare primal cuts	3414
MTMSR303A Smoke product	3423
AHCLSK212A Ride horses to carry out stock work	3433
AHCLSK324A Care for and train working dogs.....	3440
AHCMOM202A Operate tractors.....	3446

The views expressed in the copyright work do not necessarily represent the views of the Commonwealth of Australia.

This work is copyright and licensed under the AShareNet Free for Education Instant licence (AShareNet-FfE licence). The onus rests with you to ensure compliance with the AShareNet-FfE licence and the following is merely a summary of the scope of the licence.

When you obtain a copy of material that bears the AShareNet-FfE licence mark by legitimate means you obtain an automatic licence to use and copy the work in whole or in part, solely for educational purposes.

Individual learners may:

1. use the material personally for their education such as including it, with proper attribution, in work that is performed in the course of that education; and
2. make unlimited copies, in whole or in part, of the material.

Organisations may:

1. use the material within the organisation or for the services provided by the organisation;
2. make or give copies to learners;
3. charge for the education provided; and
4. charge learners for the material on a cost-recovery basis.

Conditions for the licence can be found at <http://www.aesharenet.com.au/FfE2/>. Queries regarding the standard AShareNet-FfE licence conditions should be directed to the AShareNet website at <http://www.aesharenet.com.au/help/support/>.

In addition to the standard AShareNet-FfE licence conditions, the following special conditions apply:

1. The copyright work must only be used in Australia and New Zealand.
2. You are not permitted to develop either an Edited Version or Enhancements of the Licensed Material

Use of this work for purposes other than those indicated above, requires the prior written permission from the Commonwealth. Requests should be addressed to Training Copyright, Department of Education, Employment and Workplace Relations, GPO Box 9880 Canberra City, ACT, 2601 or email copyright@training.com.au.

This work is the result of wide consultations with Australian industry participants. It is a collaborative view and does not necessarily represent the view of the Department or any specific body. For the sake of brevity it may omit factors which could be pertinent in particular cases.

While care has been taken in the preparation of this Training Package, the Department and the original developer do not warrant that any licensing or registration requirements specified here are either complete or up-to-date for your State or Territory. The Department and the original developer do not accept any liability for any damage or loss (including indirect and consequential loss) incurred by any person as a result of relying on the information contained in this Training Package.

The Commonwealth, through the Department of Education, Employment and Workplace Relations, does not accept any liability to any person for the information or advice (or the use of such information or advice) which is provided in this material or incorporated into it by reference. The information is provided on the basis that all persons accessing this material undertake responsibility for assessing the relevance and accuracy of its content. No liability is accepted for any information or services which may appear in any other format. No responsibility is taken for any information or services which may appear on any linked websites.

Preliminary Information

Important Note to Users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

This Training Package is Version 1 – check whether this is the latest version by going to the National Training Information Service (www.ntis.gov.au) and locating information about the Training Package. Alternatively, contact www.agrifoodskills.net.au to confirm the latest version number.

Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package's national code (which remains the same during its period of endorsement).

Explanation of the review date

The review date (shown on the title page and in the footer of each page) indicates when the Training Package is expected to be reviewed in the light of changes such as changing technologies and circumstances. The review date is not an expiry date. Endorsed Training Packages and their components remain current until they are reviewed or replaced.

Version modification history

The version details of this endorsed Training Package are in the table below. The latest information is at the top of the table.

---	--------------	-----------------

Overview

What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing people's skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

How do Training Packages fit within the National Skills Framework?

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained.

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

Training Package Components

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

Training Package Endorsed Components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.

Competency Standards

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Assessment Guidelines

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

Qualifications Framework

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the 'packaging rules'. The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

Training Package Support Materials

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.

Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, **and with the code always before the title.**

Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example XYZ08. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

Qualification Codes

Within each Training Package, each qualification has a unique eight-character code, for example XYZ10108. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are **not** used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

Unit of Competency Codes

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in MTMCOR201A
- the first three characters signify the Training Package – MTM11 Australian Meat Industry Training Package – in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;
- the last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that this is the original unit of competency. ‘B’, or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

Training Package, Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

Training Package Titles

The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

Qualification Titles

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words 'in' for Certificates I to IV, and 'of' for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example: MTM10111 Certificate I in Meat Processing (Smallgoods)

Unit of Competency Titles

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example: MTMCOR201A Maintain personal equipment

Introduction to the Training Package

History

History

The Australian Meat Industry Training Package was first released in 1998. It was reviewed and re-released as MTM00 in 2000, and the MTM07 version was released in 2007. Continuous Improvement changes were made to the meat retailing qualifications and MTM07 version 2 was released in 2008. MTM07 Version 2.1 was released in 2008, when the Animal Welfare Officer Skill Set was added.

Historical and General Information

Historical and General Information

MTM11 *Australian Meat Industry Training Package* is the outcome of an extensive Continuous Improvement process.

Introduction

The endorsed components of the MTM11 Australian Meat Industry Training Package include:

- national competency standards for abattoirs, smallgoods, food services and meat retailing
- national qualifications framework
- national assessment guidelines.

The MTM11 Australian Meat Industry Training Package has been developed by the National Meat Industry Training Advisory Council (MINTRAC) on behalf of the Australian Meat Industry, for AgriFood Skills Australia. It addresses changes raised by industry stakeholders under the Continuous Improvement process and recorded on the Issues Register. A consultation process occurred across all sectors of the meat industry and with stakeholders in meat industry training to address and resolve the issues raised.

Summary of changes from MTM07

The new features of the Training Package include:

- inclusion of additional Skill Sets
- substantial restructuring of the Diploma and Advanced Diploma qualifications
- replacement of superseded imported Units of Competency
- inclusion of Green Skills
- restructuring of Qualification Requirements to address NQC requirements
- addition of new Units in some qualifications
- addition of the Vocational Graduate Certificate and Diploma of Agribusiness.

Introduction to the Industry

Introduction to the Industry

Profile of the Australian Meat Industry

Overview¹

The Australian meat processing industry comprises processors, retailers and exporters who together are responsible for guaranteeing the supply of meat to domestic and international markets.

Red meat processing

From humble beginnings just over 220 years ago, the Australian red meat industry has grown its total value to \$15.8 billion and has become one of the world's largest exporters of red meat and livestock. Approximately 350,000 people are involved either directly in the supply chain or in businesses that service the industry. The Australian domestic market is the industry's largest single market. Consumers in this country spend an estimated \$6.7 billion on beef and nearly \$2.5 billion on sheep meat annually.

Australia exports \$5 billion worth of beef and cattle annually, making this sector one of the country's most valuable farm contributors. Sheep meat and sheep exports are worth around \$1.6 billion, and goat meat and goats approximately \$55 million. Combined, these represent around 23% of total Australian farm exports. Over 70% of red meat production is exported to 110 countries worldwide.

Changes over the last five years have included a continuing reduction of the national sheep flock, primarily due to drought. There has also been an increasing concentration of production in a number of large companies, with many smaller processors either closing, or being bought out by larger companies.

The Australian production system is diverse, offering a wide variety of products to customers and consumers. Products range from high-quality, tenderness-guaranteed eating products, to hides and pharmaceutical ingredients.

The industry is renowned for its efforts in meeting customer requirements. Major international customers for Australian beef are Japan, the US and Korea, while the US is the dominant export market for lamb and goat meat.

The Australian red meat industry has an enviable international reputation as a leader in food safety, animal welfare and disease control. This earns the trust of domestic and international consumers and allows access to all global markets where collectively over three million

Introduction to the Industry

tonnes of Australian product is consumed each year.²

Pork processing

The pork industry is one of the few Australian food industries operating in a truly global marketplace, maintaining a small export industry to Asia and competing with increasing volumes of subsidised imports from North America and Europe. Increasing competition from imports is regarded as one of the major challenges facing the industry.

For the 2007-08 period, ABS data indicates that the gross value of pig slaughters in Australia decreased by 4% to \$902 million, as slaughter numbers and average prices dropped.

In contrast, consumer confidence in pork continues to grow and the peak body, Australian Pork Limited (APL) believes that the longer term outlook for the Australian pork industry is one of a strong future. Australia's clean reputation and proximity to Asia, the largest consumers of pork in the world (where demand for meat is increasing due to rising affluence), gives Australian pork producers significant advantages.³

In 2006, 82% of Australian pig meat production was consumed domestically and imports accounted for approximately one-third of consumption.⁴ More than 60% of imports came from the United States and Canada, major users of GM feed grain, with almost all of the remainder coming from Denmark.⁵

Other species

Australian animals, such as kangaroos, possums, crocodiles and emus, and introduced animals such as feral goats, horses and pigs, are the basis of a significant commercial industry.

Where they can be harvested humanely and, in the case of native animals, sustainably, wild animals can be profitable supplements or alternatives to domestic animals. Their commercial use can also contribute to pest management objectives.

Kangaroos

Kangaroos and wallabies make up the sixty known species of macropods in Australia, while only six species are commercially harvested. Tasmania is the only state where wallabies are commercially harvested. Kangaroos and wallabies are not farmed; rather they are harvested from the wild in five states of Australia by licensed, trained harvesters. The industry provides over 4000 jobs mostly in rural and remote areas.

Introduction to the Industry

Of the kangaroo meat that is harvested 60% is used for pet supplies, mostly for the domestic market. The remainder is used for human consumption with around 80% exported. Markets for kangaroo meat include Russia (although this market has been closed for eighteen months), South Africa, France and Germany. The total value of all kangaroo meat exports for 2006/07 was \$27 million. Approximately 30% of skins are used domestically with the rest exported as hide, skin and leather.

Camels

Camel meat production in 2003/04 was fourteen tonnes per year and continues to increase with a growing export market. The Central Australian Camel Industry Association Inc (CACIA) is working with the industry to promote the value of camel meat and other products such as camel oil, wool and leather. ⁶

Crocodiles

There are seven commercially operated crocodile farms in the Northern Territory of Australia. The main species farmed is the saltwater crocodile (*Crocodylus porosus*). The skin is the most valued product from farmed crocodiles and skins are exported to Japan, France, Italy and Asia. The by-products of flesh, feet, teeth and skulls are mainly sold on the domestic market. ⁷

Ratites

The emu is farmed for three different products: meat, leather and emu oil. Meat is largely sold for consumption in the domestic market, while a small percentage is exported to Europe. The oil is used in cosmetics and many natural remedies and sold to both the international and domestic market. A single bird can be expected to produce on average 10 to 12kg of meat and 10L of oil. With current commodity prices, the value of a single emu at slaughter is approximately \$575 to \$600 Australian dollars. ⁸

Ostriches are farmed for the meat and the skin (leather and feathers). Currently, the meat is the most valuable commodity but leather prices are continuously rising. There is good demand for ostrich products internationally and the Australian industry cannot keep up with the current demand.

Buffalo

The buffalo industry, at present, is in a rebuilding phase after the impact of BTEC. Strict disease eradication measures against bovine tuberculosis (TB) under the national BTEC campaign are responsible for major changes in the buffalo industry. ⁹

Smallgoods production

Smallgoods are meat products where the meat has been manufactured to form a new product,

Introduction to the Industry

such as sausages, salamis, bacons, hams, pates, and dried, roasted and preserved meat products. Smallgoods are made from pig meat and other meats, such as poultry, mutton and beef.

Australian produced smallgoods products are mainly consumed by the domestic market.

As at 2008, there were four major smallgoods manufacturers employing more than 1500 employees, and three medium sized smallgoods manufacturers employing more than 200 employees, although industry restructuring and consolidation is continuing. Industry estimates put annual turnover at around \$2 billion.

Pork represents anywhere from 60-80% of the smallgoods sector's meat input, of which 60% comes from imported pig meat.

The industry is characterised by a high level of domestic consumption, low levels of exports, and low volume sales of a large number of product items.¹⁰

Meat wholesaling

The meat wholesaling sector is a growing sector of newly emerging companies primarily made up of boning rooms and establishments servicing the hospitality industry. These establishments supply restaurants, fast-food outlets, food chains, hotels, airlines, and supermarkets and also fill niche markets, making specific products, such as portion control products, organic meat products, native meat products, meat patties, pizza toppings, meat products with health benefits, kebabs, and trimmed and pre-packed shelf-ready trays of meat.

Meat retailing

Meat retailers in Australia include traditional independent butchers, supermarkets, butcher

Introduction to the Industry

shop chains, and gourmet and specialist retail meat outlets.

The major factors affecting the meat retailing sector include the increasing focus on producing and supplying meat products to meet customer needs, and further processing and value-adding to meat products to meet demands for pre-prepared and pre-cooked products. Meat retailers increasingly provide food preparation, storage and cooking advice to customers, in response to a growing resurgence of interest in home cooking and non-traditional meat dishes.

There is also a growing trend towards further processing and supplying meat products from a variety of different animal species, including poultry, game meat, rabbits and native animals, and combining meat with other food products to produce specific product to meet local needs.

The Meat Retailing sector is facing increasing regulation particularly in food safety and Quality Assurance (QA). There are also changes in work organisation and work arrangements, including longer opening hours, and increasing skills demands in technology, food safety, QA, Occupational Health and Safety (OH&S), marketing, customer service and finances.

There is a growing trend towards the use of electronic financial systems, and increasing impact of information technologies particularly on marketing and supply of products, e.g. using the Internet.

Trends in the industry

Structured training is becoming increasingly important as companies seek to maintain the viability and competitiveness of all sectors of the industry in both domestic and international markets. Ongoing training is a critical component of addressing customer demands and expectations.

The industry is responding to:

- expectations from consumers, retailers and governments of high environmental and ethical standards, including food safety and animal welfare
- the competitiveness and ever-changing nature of international markets
- the need to attract, develop and retain a productive workforce
- the need to entice a new generation into the industry and to ensure succession planning is in place for the current workforce
- the need to ensure that learning and education opportunities exist for those already in the industry

Introduction to the Industry

- the need to continue to innovate in order to remain competitive and ensure the viability of the industry into the future
- the challenges presented by climate change and other environmental factors
- marketing and promotion requirements as markets diversify and more meal options become available
- increasing customer demands for fresh pork products
- whole-of-supply chain accountability in areas, such as animal welfare and traceability
- the impact of social conscience and values, price and health considerations on meal choices
- meeting ever increasing regulatory requirements (including export licensing, food safety, QA, animal welfare, environment, OH&S and workers compensation)
- the emergence and consolidation of large-scale, factory-based smallgoods production
- customer demands for higher standards of game meat processing
- increasing demand for post-trade training, particularly in the development of business skills, in the meat retailing sector
- the development of leading edge boutique businesses operating across meat sectors.

Work in the industry

The jobs and workplace functions covered by this Training Package are from entry level through to middle management and include:

- labourers on slaughter floors, in boning rooms and rendering plants
- packers in smallgoods and abattoir operations
- stock handlers, skin and hide processors, offal processors, chiller and freezer operators, loadout personnel and production clerks
- process workers in the smokehouse, pickling, manufacturing, fermentation, kitchen, meat receival and preparation, pre-pack and despatch areas of smallgoods manufacturing plants
- slaughterpersons, boners, slicers and rendering plant operators
- game meat harvesters and processors
- food service personnel in wholesale and retail establishments
- QA officers and meat safety officers (meat inspectors)
- butchers in the meat retailing trade
- meat workers in supermarket meat departments
- sales and packaging staff in meat retailing outlets
- managers of micro and small meat retailing businesses and combined meat industry operations
- managers of meat retail departments in supermarkets
- owner-operators of meat retailing businesses and small combined meat industry operations
- supervisors, leading hands, forepersons and team leaders in meat retailing, smallgoods, food services and abattoir operations

Introduction to the Industry

- area, regional and state/territory meat managers in supermarkets
- middle managers in abattoirs, smallgoods and food service operations.

Impacts on Training Package development

Regulatory and licensing requirements, business objectives, the literacy and numeracy skills and requirements of workers in the industry, emerging technologies, including e-commerce, environmental issues, and the importance of ethics and values to the industry have been addressed in the development of the Training Package and incorporated into Units of Competency.

The meat industry is already highly regulated and continues to move towards further regulation. MINTRAC works closely with the relevant authorities including Australian Meat Industry Council (AMIC), the Meat Standing Committee, Australian Quarantine Inspection Service (AQIS) and the meat industry authorities in each state and territory to incorporate regulatory requirements within the competency standards. These requirements are incorporated into relevant Units of Competency.

Industry-specific regulatory and licensing requirements are specified in the Elements and Performance Criteria, Range Statement and Evidence Guide of the units. These include legislation, regulations, codes, guidelines and standards relating to food safety and food standards, hygiene and sanitation, workplace safety, animal welfare, environmental impact, QA and importing country requirements.

In addition the flexibility of the Training Package ensures that women, Indigenous workers, people whose primary language is a language other than English, and people from rural and remote areas have access to meaningful qualifications and career pathways and that all workers in smallgoods, food services and abattoirs plants can gain qualifications which are meaningful and lead to increased employment opportunities across the industry.

Food services

There are many enterprises in the meat industry which undertake specialised services such as preparing specialty meat cuts, gourmet meat preparation, preparing bulk value-added products, and providing meat preparation customer service. It would not be possible to develop individual qualifications to cover every possible job, especially as new jobs are emerging all the time.

The Australian Meat Industry Training Package contains *Certificates II and III in Meat Processing (Food Services)* which are highly flexible qualifications enabling selections to be made from a wide range of Units. These qualifications enable employers to identify the skills

Introduction to the Industry

required by their enterprises, and then work with an RTO to identify a suitable training program.

Validation

The validation of the qualifications structure and key changes to the Training Package were undertaken at industry and enterprise level, particularly where Units were newly developed for the industry. Units from other industries and Training Packages were also validated at industry and enterprise level to test their applicability to the industry. Participants in the validation process were asked to assess Unit relevance, coverage of work, skills and knowledge requirements, clarity, language style and resourcing implications.

External agencies, advisers and experts were consulted to review initial drafts for technical accuracy, currency and mandatory requirements. They also identified best practice, industry trends and likely/potential future developments within their area of expertise. This ensured that the Units of Competency were focused on current and future needs.

Green Skills in the Australian Meat Industry

The Australian Meat Industry's commitment to the environment is documented in the Meat Industry Strategic Plan 2010-2015. Strategic Theme 1 of this Plan is: Environment and Ethics: Promote ethical and responsible custodianship of the environment, animal welfare and resources used in the production of red meat. There are five Imperatives identified within this Theme.

- 1) Develop, implement and verify a set of robust, creditable standards for environmental stewardship, animal welfare and ethical behaviour acceptable in the community.
- 2) Engage with customers and community to engender community trust that our industry is an ethical and responsible custodian of livestock, land and resources.
- 3) Achieve industry agreement on a total supply chain response to climate change.
- 4) Establish effective whole-of-industry processes for consultation, education and awareness of the requirements for and benefits of change relating to the environment and animal welfare.
- 5) Establish baseline and ongoing data to measure and monitor the impact of our industry on environmental sustainability and ethical custodianship of animals and resources.

Environmental issues affecting the Australian meat industry are monitored and addressed by two National Environment Committees managed through the Australian Meat Industry Council.

Introduction to the Industry

- **The National Climate Change Committee**, a representative committee of eight company managing directors, sets policy and undertakes negotiations with government on behalf of the industry.
- **The Environment Research and Development Committee**, a committee of 20-30 environmental officers from meat processing companies, sets strategic Research and Development priorities (water, energy, carbon reduction) for the industry and then approves and monitors R&D projects.

The industry also funds the MINTRAC Environment Network. The Environment Network consists of state based networks of researchers, regulators, trainers and practitioners and represents an efficient method of distribution of new information. It also gives environment managers, researchers and regulators a very useful forum to explain, explore and discuss new issues and innovations.

The two main functions of the network are to:

- organise a limited number of professional development workshops delivered in selected regional centres facilitated by a technical consultant
- develop communication channels between the various parties involved.

Environment and the MTM11 Australian Meat Industry Training Package

There are several Units of Competency within the MTM11 Australian Meat Industry Training Package which focus specifically on environmental matters:

- MTMCOR206A Overview the meat industry
- MTMPSR202A Apply environmentally sustainable work practices
- MTMPSR403B Facilitate achievement of enterprise environmental practices and policies
- MTMPS5608B Manage environmental impacts of meat processing operations.

In addition, environmental practices and principles are embedded into the Elements and Performance Criteria and Required Skills and Knowledge of most other Units within the Training Package.

The MINTRAC Environment Network serves to identify changes required in the Australian Meat Industry Training Package and as a consultative forum to assess proposed changes. The Network also assesses and provides advice on proposed training and assessment support materials.

Industry Requirements for Employability Skills

Competency Standards

What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

Contextualisation of Units of Competency by RTOs

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit Title

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit Descriptor

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

Employability Skills

This sub-section contains a statement that the unit contains Employability skills.

Pre-requisite Units (optional)

If there are any units of competency that must be completed before the unit, these will be listed.

Application of the Unit

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency Field (Optional)

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of Competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

Performance Criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

Required Skills and Knowledge

The essential skills and knowledge are either identified separately or combined. *Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner. *Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Range Statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

Evidence Guide

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills
-

Employability Skills in Units of Competency

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills Mayer Key Competencies

Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

Unit Title	Give formal presentations and take part in meetings (Communication)
Unit Descriptor	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (Initiative and enterprise)
Element	Proactively resolve issues. (problem solving)
Performance Criteria	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (Planning and organising)
Range Statement	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology)
Required Skills and Knowledge	<p>Modify activities depending on differing workplace contexts, risk situations and environments. (Learning)</p> <p>Work collaboratively with others during a fire emergency. (teamwork)</p> <p>Instructions, procedures and other information relevant the maintenance of vessel and port security. (Communication)</p>
Evidence Guide	<p>Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to:</p> <ul style="list-style-type: none"> • assess response options to identified crime-prevention needs and determine the optimal action to be implemented • in consultation with relevant others, design an initiative to address identified issues. (Initiative and enterprise).

Employability Skills Summaries and units of competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

Competency Standards - Industry Contextualisation

Competency Standards - Industry Contextualisation

Customisation of this Training Package may be achieved by:

- choosing appropriate electives from Units provided in this Training Package
- importing appropriate elective Units from other Training Packages or accredited courses, as

Competency Standards - Industry Contextualisation

allowed within the qualification requirements

- contextualising Units of Competency to better suit an enterprise or industry context.

Examples from this Training Package of Employability Skills**Examples from this Training Package of Employability Skills embedded within Unit components**

Unit component	Example of embedded Employability Skill
Unit Title	MTMR315A Calculate and present statistical data in a meat enterprise
Unit Descriptor	<i>MTMCOR205A Communicate in the workplace:</i> This unit covers the skills and knowledge required to carry out workplace communication practices. It includes the competencies to identify the enterprise's communication channels, use communication skills to undertake and complete workplace requirements, and contribute to positive workplace relations.
Element	<i>MTMP3105A Follow and implement an established work plan:</i> Element 2: Organise daily work activities
Performance Criteria	<i>MTMP2155B Despatch hide or skin:</i> Element 1.4 Occupational Health and Safety (OH&S) requirements are identified and met.
Range Statement	Communication skills may include: <ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties • speaking clearly and directly • the use of communication technology • own work and the wider work area • reading and interpreting workplace documentation.
Required Skills and Knowledge	<ul style="list-style-type: none"> • take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.
Evidence Guide	Not applicable

Qualifications Framework

The Australian Qualifications Framework

What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the *AQF Implementation Handbook*.

http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

Certificate I

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

Certificate II

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

Certificate IV*Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature. Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

Diploma*Characteristics of Learning Outcomes*

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team co-ordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

Advanced Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

Vocational Graduate Diploma

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and

within highly varied and highly specialised contexts.

- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.

Qualifications and Packaging Rules

Skill Sets

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording ‘these competencies meet *[insert skill set title or identified industry area]* need’ on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment.

http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

Skill Sets in this Training Package

This section provides information on Skill Sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Where this section is blank, nationally recognised Skill Sets have yet to be identified in this industry.

Whole of Industry Qualification Information

Whole of Industry Qualification Information

Qualifications suitable for VET in Schools

Certificates I and II from MTM11 may be delivered as VET in Schools courses.

The following qualifications can be delivered as VET in Schools courses:

- MTM10111 Certificate I in Meat Processing (Smallgoods)
- MTM10211 Certificate I in Meat Processing (Meat Retailing)
- MTM20111 Certificate II in Meat Processing (Abattoirs)
- MTM20211 Certificate II in Meat Processing (Smallgoods)
- MTM20311 Certificate II in Meat Processing (Meat Retailing)
- MTM20411 Certificate II in Meat Processing (Food Services).

Jobs requiring the use of knives and cutting machinery must be supervised by a person who is competent in the task at all times.

Enrolment into these qualifications is conditional on the following parties collaborating to agree on delivery, assessment and infrastructure arrangements:

- the employer
- the union (AMIEU)
- the school
- the RTO.

List of ALL Units within Training Package

Code	Unit title	Pre-requisite	Volume
MTMBUS701A	Manage financial performance	NIL	II
MTMBUS702A	Provide strategic leadership	NIL	II
MTMBUS703A	Communicate and negotiate in a culturally diverse context	NIL	II
MTMBUS704A	Develop and enhance collaborative partnerships and relationships	NIL	II
MTMBUS705A	Develop and manage international business operations	NIL	II
MTMBUS706A	Commercialise research and technology product/idea	NIL	II
MTMBUS801A	Manage change to organisational electronic technology systems	NIL	II
MTMBUS802A	Undertake research project	NIL	II
MTMBUS803A	Analyse data for business decision making	NIL	II
MTMCOR201A	Maintain personal equipment	NIL	II
MTMCOR202A	Apply hygiene and sanitation practices	NIL	II
MTMCOR203A	Apply Quality Assurance practices	NIL	II
MTMCOR204A	Follow safe work policies and procedures	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMCOR403A	Participate in OH&S risk control process	MTMCOR204A	II
MTMCOR404A	Facilitate hygiene and sanitation performance	MTMCOR202A	II
MTMG300A	Overview wild game meat industry	NIL	II
MTMG301A	Operate a game harvesting vehicle	NIL	II
MTMG302A	Eviscerate, inspect and tag wild game carcass in the field	MTMPSR203A	II
MTMG303A	Receive and inspect wild game carcasses from the field	NIL	II
MTMG304A	Receive and inspect wild game carcasses at a processing plant	NIL	II
MTMG305A	Store wild game carcass	NIL	II
MTMG306A	Use firearms to harvest wild game	NIL	II
MTMP2002C	Prepare animals for slaughter	NIL	II
MTMP2004B	Feed race	NIL	II
MTMP2005B	Restrain animal	NIL	II
MTMP2006B	Apply animal welfare and handling requirements	NIL	II
MTMP2007B	Perform emergency kill	NIL	II
MTMP2008A	Assess, purchase and transport calves	NIL	II
MTMP2009B	Unload livestock	NIL	II
MTMP2011C	Identify animals using electronic systems	NIL	II
MTMP2012C	Shackle animal	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP2013 C	Operate electrical stimulator	NIL	II
MTMP2014 C	Remove head	MTMPSR20 3A	II
MTMP2015 C	Cut hocks	MTMPSR20 3A	II
MTMP2016 C	Mark brisket	MTMPSR20 3A	II
MTMP2018 C	Complete changeover operation	NIL	II
MTMP2020 C	Trim pig pre-evisceration	MTMPSR20 3A	II
MTMP2021 C	Number carcass and head	NIL	II
MTMP2022 C	Punch pelts	NIL	II
MTMP2023 C	Remove brisket wool	MTMPSR20 3A	II
MTMP2024 C	Prepare hide/pelt for removal	NIL	II
MTMP2025 B	Bag tail	MTMPSR20 3A	II
MTMP2026 B	Remove and record tag	NIL	II
MTMP2027 B	Seal/drain urinary tract	NIL	II
MTMP2028 B	Singe carcass	NIL	II
MTMP2029 B	Shave carcass	MTMPSR20 3A	II
MTMP2030 B	Flush carcass	NIL	II
MTMP2031 C	Operate scalding/de-hairing equipment	NIL	II
MTMP2032 C	Operate whizzard knife	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP2033 C	Operate rise and fall platform	NIL	II
MTMP2034 C	Operate vacuum blood collection process	NIL	II
MTMP2035 C	Operate nose roller	NIL	II
MTMP2036 C	Operate pneumatic cutter	NIL	II
MTMP2037 C	Operate circular saw	NIL	II
MTMP2038 C	Prepare carcase and equipment for hide/pelt puller	NIL	II
MTMP2039 C	Operate tenderiser	NIL	II
MTMP2040 C	Operate mincer	NIL	II
MTMP2042 C	Operate new technology or process	NIL	II
MTMP2043 C	Operate sterivac equipment	NIL	II
MTMP2044 B	De-rind meat cuts	NIL	II
MTMP2045 B	De-nude meat cuts	NIL	II
MTMP2046 B	Operate rib puller	NIL	II
MTMP2047 B	Operate frenching machine	NIL	II
MTMP2048 B	Operate cubing machine	NIL	II
MTMP2049 B	Cure and corn product in a meat processing plant	NIL	II
MTMP2050 B	Operate head splitter	NIL	II
MTMP2051 C	Trim neck	MTMPSR20 3A	II

Code	Unit title	Pre-requisite	Volume
MTMP2052 C	Trim forequarter to specification	MTMPSR20 3A	II
MTMP2053 C	Trim hindquarter to specification	MTMPSR20 3A	II
MTMP2054 C	Inspect hindquarter and remove contamination	MTMPSR20 3A	II
MTMP2055 C	Inspect forequarter and remove contamination	MTMPSR20 3A	II
MTMP2057 B	Remove spinal cord	MTMPSR20 3A	II
MTMP2058 B	Operate jaw breaker	NIL	II
MTMP2061 C	Grade carcass	NIL	II
MTMP2062 C	Weigh carcass	NIL	II
MTMP2063 C	Operate semi-automatic tagging machine	NIL	II
MTMP2064 C	Measure fat	MTMPSR20 3A	II
MTMP2065 C	Label and stamp carcass	NIL	II
MTMP2066 C	Wash carcass	NIL	II
MTMP2067 B	Operate a decontamination unit	NIL	II
MTMP2068 B	Remove tenderloin	MTMPSR20 3A	II
MTMP2071 C	Inspect meat for defects	NIL	II
MTMP2072 C	Assemble and prepare cartons	NIL	II
MTMP2074 C	Identify cuts and specifications	NIL	II
MTMP2075 C	Pack meat products	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP2081 C	Operate carton sealing machine	NIL	II
MTMP2082 C	Operate carton scales	NIL	II
MTMP2083 C	Operate strapping machine	NIL	II
MTMP2084 C	Operate carton forming machine	NIL	II
MTMP2085 C	Operate automatic CL determination machine	NIL	II
MTMP2086 B	Operate bag forming equipment	NIL	II
MTMP2091 C	Assess dentition	NIL	II
MTMP2092 C	Drop tongue	MTMPSR20 3A	II
MTMP2093 C	Wash head	NIL	II
MTMP2094 C	Bone head	MTMPSR20 3A	II
MTMP2095 C	Remove cheek meat	MTMPSR20 3A	II
MTMP2096 C	Bar head and remove cheek meat	MTMPSR20 3A	II
MTMP2102 C	Process thick skirts	MTMPSR20 3A	II
MTMP2115 C	Process thin skirts	MTMPSR20 3A	II
MTMP2116 B	Process offal	MTMPSR20 3A	II
MTMP2117 B	Process runners	MTMPSR20 3A	II
MTMP2118 B	Overview offal processing	NIL	II
MTMP2121 C	Prepare and trim honeycomb	MTMPSR20 3A	II

Code	Unit title	Pre-requisite	Volume
MTMP2122 C	Recover mountain chain	NIL	II
MTMP2123 C	Further process tripe	NIL	II
MTMP2124 C	Trim processed tripe	MTMPSR20 3A	II
MTMP2125 C	Process small stock tripe	MTMPSR20 3A	II
MTMP2126 C	Process bibles	MTMPSR20 3A	II
MTMP2127 B	Process maws	MTMPSR20 3A	II
MTMP2131 C	Prepare and despatch meat product orders	NIL	II
MTMP2132 C	Loadout meat product	NIL	II
MTMP2133 C	Store carcass product	NIL	II
MTMP2134 C	Store carton product	NIL	II
MTMP2135 C	Locate storage areas and product	NIL	II
MTMP2136 C	Complete re-pack operation	NIL	II
MTMP2137 B	Bag carcass	NIL	II
MTMP2141 C	Overview offal processing on the slaughter floor	NIL	II
MTMP2143 C	Separate offal	MTMPSR20 3A	II
MTMP2144 C	Trim offal fat	MTMPSR20 3A	II
MTMP2145 C	Separate and tie runners	MTMPSR20 3A	II
MTMP2147 C	Recover thin skirts	MTMPSR20 3A	II

Code	Unit title	Pre-requisite	Volume
MTMP2148 B	Remove thick skirts	MTMPSR20 3A	II
MTMP2149 B	Remove flares	NIL	II
MTMP2150 B	Recover offal	MTMPSR20 3A	II
MTMP2151 C	Overview hide/pelt/skin processing	NIL	II
MTMP2152 C	Trim hide or skin	MTMPSR20 3A	II
MTMP2153 C	Salt hide or skin	NIL	II
MTMP2154 C	Grade hide or skin	NIL	II
MTMP2155 C	Despatch hide or skin	NIL	II
MTMP2156 B	Treat hides chemically	NIL	II
MTMP2157 B	Chill/ice hides	NIL	II
MTMP2158 B	Crop pelts	NIL	II
MTMP2161 C	Overview fellmongering operations	NIL	II
MTMP2162 C	Chemically treat skins for fellmongering process	NIL	II
MTMP2163 C	Prepare chemicals for fellmongering process	NIL	II
MTMP2164 C	Operate wool drier and press	NIL	II
MTMP2165 C	Perform sweating operation on fellmongered skins	NIL	II
MTMP2166 C	Perform skin fleshing operation	NIL	II
MTMP2167 C	Skirt and weigh fellmongered wool	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP2168 B	Operate wool puller	NIL	II
MTMP2171 C	Dispose of condemned carcase	NIL	II
MTMP2172 C	Skin condemned carcase	MTMPSR20 3A	II
MTMP2173 C	Eviscerate condemned carcase	MTMPSR20 3A	II
MTMP2175 C	Process paunch	MTMPSR20 3A	II
MTMP2176 C	Process slink by-products	MTMPSR20 3A	II
MTMP2177 C	Process pet meat	MTMPSR20 3A	II
MTMP2178 B	Skin slinks	MTMPSR20 3A	II
MTMP2179 B	Process blood	NIL	II
MTMP2181 C	Overview rendering process	NIL	II
MTMP2182 C	Operate hogger	NIL	II
MTMP2183 C	Operate blow line	NIL	II
MTMP2184 C	Operate meat meal mill	NIL	II
MTMP2185 C	Operate waste recovery systems	NIL	II
MTMP2186 C	Pack and despatch rendered products	NIL	II
MTMP2187 C	Break down and bone carcase for pet meat or rendering	MTMPSR20 3A	II
MTMP2188 C	Operate air filtration system	NIL	II
MTMP2192 B	Clean carcase hanging equipment	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP2193 B	Clean amenities and grounds	NIL	II
MTMP2196 C	Overview cleaning program	NIL	II
MTMP2197 C	Clean after operations - boning room	NIL	II
MTMP2198 C	Clean after operations - slaughter floor	NIL	II
MTMP2201 C	Transport food	NIL	II
MTMP3001 C	Knock and stun animal	NIL	II
MTMP3002 C	Stick and bleed animal	MTMPSR20 3A	II
MTMP3003 A	Handle animals humanely while conducting ante-mortem inspection	NIL	II
MTMP3006 C	Rod weasand	NIL	II
MTMP3007 C	Seal weasand	MTMPSR20 3A	II
MTMP3008 C	Ring bung	MTMPSR20 3A	II
MTMP3009 C	Seal bung	NIL	II
MTMP3010 A	Split carcass	NIL	II
MTMP3011 C	Overview legging operation	NIL	II
MTMP3012 C	Make first leg opening cuts	MTMPSR20 3A MTMP3011 C	II
MTMP3013 C	Make second leg opening cuts	MTMPSR20 3A MTMP3011 C	II
MTMP3014	Perform legging on small stock	MTMPSR20	II

Code	Unit title	Pre-requisite	Volume
C		3A MTMP3011 C	
MTMP3015 A	Bone neck	MTMPSR20 3A	II
MTMP3016 B	Perform 'Y' cut	MTMPSR20 3A	II
MTMP3017 A	Skin head	MTMPSR20 3A	II
MTMP3021 C	Explain opening cuts	MTMPSR20 3A or MTMP3043 B	II
MTMP3022 C	Perform flanking cuts	MTMPSR20 3A	II
MTMP3023 C	Perform brisket cuts	MTMPSR20 3A MTMP3021 C	II
MTMP3024 C	Perform rumping cuts	MTMPSR20 3A MTMP3021 C	II
MTMP3025 C	Perform rosette cuts	MTMPSR20 3A MTMP3021 C	II
MTMP3026 C	Perform midline cuts	MTMPSR20 3A MTMP3021 C	II
MTMP3031 C	Scald and de-hair carcass	MTMPSR20 3A	II
MTMP3032 C	Operate pelt puller	NIL	II
MTMP3033 C	Operate hide puller	MTMPSR20 3A or MTMP3043	II

Code	Unit title	Pre-requisite	Volume
		B	
MTMP3034 C	Remove pelt manually	MTMPSR20 3A	II
MTMP3036 C	Bed dress carcass	MTMPSR20 3A	II
MTMP3037 C	Eviscerate animal carcass	MTMPSR20 3A	II
MTMP3038 C	Operate brisket cutter/saw	NIL	II
MTMP3039 C	Eviscerate game shot carcass	MTMPSR20 3A	II
MTMP3041 C	Backdown pig carcass	MTMPSR20 3A	II
MTMP3042 C	Prepare head for inspection	MTMPSR20 3A	II
MTMP3043 B	Operate air knife	NIL	II
MTMP3044 B	Drop sock and pull shoulder pelt	MTMPSR20 3A	II
MTMP3045 B	Undertake retain rail	MTMPSR20 3A	II
MTMP3046 A	Prepare and present viscera for inspection	MTMPSR20 3A	II
MTMP3052 C	Bone small stock carcass - leg	MTMPSR20 3A	II
MTMP3054 C	Slice and trim leg - small stock	MTMPSR20 3A	II
MTMP3055 C	Bone large stock carcass - forequarter	MTMPSR20 3A	II
MTMP3056 C	Bone large stock carcass - hindquarter	MTMPSR20 3A	II
MTMP3057 C	Slice and trim large stock forequarter	MTMPSR20 3A	II
MTMP3058 C	Slice and trim large stock hindquarter	MTMPSR20 3A	II
MTMP3059	Break carcass using a bandsaw	MTMPR201	II

Code	Unit title	Pre-requisite	Volume
C		C	
MTMP3060 C	Operate leg boning machine	NIL	II
MTMP3061 C	Operate trunk boning machine	MTMPSR20 3A	II
MTMP3062 B	Bone small stock carcass - shoulder	MTMPSR20 3A	II
MTMP3063 B	Bone small stock carcass - middle	MTMPSR20 3A	II
MTMP3064 B	Slice small stock carcass - shoulder	MTMPSR20 3A	II
MTMP3065 B	Slice small stock carcass - middle	MTMPSR20 3A	II
MTMP3066 B	Bone carcass using mechanical aids (large stock)	MTMPSR20 3A	II
MTMP3071 C	Perform ante-mortem inspection and make disposition	MTMP3003 A	II
MTMP3072 C	Perform post-mortem inspection and make disposition	MTMPSR20 3A	II
MTMP3073 B	Implement food safety program	NIL	II
MTMP3074 B	Perform carcass Meat Hygiene Assessment	MTMPSR20 3A	II
MTMP3075 B	Perform process monitoring for Meat Hygiene Assessment	NIL	II
MTMP3076 B	Perform boning room Meat Hygiene Assessment	NIL	II
MTMP3077 B	Perform offal Meat Hygiene Assessment	NIL	II
MTMP3081 C	Operate batch cooker	NIL	II
MTMP3082 C	Operate continuous cooker	NIL	II
MTMP3083 C	Operate press	NIL	II
MTMP3084	Operate wet rendering process	NIL	II

Code	Unit title	Pre-requisite	Volume
C			
MTMP3085 C	Monitor boiler operations	NIL	II
MTMP3086 C	Operate tallow processing plant	NIL	II
MTMP3087 C	Operate blood processing plant	NIL	II
MTMP3088 C	Produce rendered products hygienically	NIL	II
MTMP3089 C	Render edible products	NIL	II
MTMP3090 B	Implement a Quality Assurance program for rendering plant	NIL	II
MTMP3095 B	Grade beef carcasses using Meat Standards Australia standards	NIL	II
MTMP3099 B	Use standard product descriptions - sheep/goats	NIL	II
MTMP3100 B	Use standard product descriptions - beef	NIL	II
MTMP3101 B	Use standard product descriptions - pork	NIL	II
MTMP3102 B	Provide coaching	NIL	II
MTMP3103 B	Provide mentoring	NIL	II
MTMP3104 B	Use standard product descriptions - kangaroos	NIL	II
MTMP3105 A	Follow and implement an established work plan	NIL	II
MTMP3107 B	Perform manual chemical lean testing	NIL	II
MTMP401B	Utilise refrigeration index	NIL	II
MTMP402B	Implement a Meat Hygiene Assessment program	NIL	II
MTMP403B	Oversee plant compliance with the Australian Standards for meat processing	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMP404B	Apply meat science	NIL	II
MTMP405B	Conduct and validate pH/temperature declines to Meat Standards Australia standards	NIL	II
MTMP406A	Develop and implement Quality Assurance program for a rendering plant	NIL	II
MTMP407B	Supervise new recruits	NIL	II
MTMP408A	Inspect transportation container/vehicle	NIL	II
MTMP409A	Maintain abattoir design and construction standards	NIL	II
MTMP410A	Oversee humane handling of animals	NIL	II
MTMP411A	Inspect game meat	NIL	II
MTMP412A	Inspect poultry	NIL	II
MTMP413A	Inspect ratites	NIL	II
MTMPR201C	Prepare and operate bandsaw	NIL	II
MTMPS201C	Clean work area during operations	NIL	II
MTMPS203C	Operate scales and semi-automatic labelling machinery	NIL	II
MTMPS204C	Maintain production records	NIL	II
MTMPS205C	Clean chillers	NIL	II
MTMPS206C	Operate forklift in a specific workplace	NIL	II
MTMPS300A	Assess product in chillers	NIL	II
MTMPS411C	Monitor meat preservation process	NIL	II
MTMPS412C	Monitor and overview the production of processed meats and smallgoods	NIL	II
MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	MTMCOR202A MTMCOR403A	II

Code	Unit title	Pre-requisite	Volume
MTMPS415 A	Conduct an internal audit of a documented program	NIL	II
MTMPS416 A	Conduct statistical analysis of process	NIL	II
MTMPS417 A	Manage/oversee an external audit of the establishment's quality system	NIL	II
MTMPS418 A	Oversee export requirements	NIL	II
MTMPS560 3C	Develop, manage and maintain quality systems	NIL	II
MTMPS560 4C	Manage maintenance systems	NIL	II
MTMPS560 5C	Manage utilities and energy	NIL	II
MTMPS560 7C	Manage and improve meat industry plant operations	NIL	II
MTMPS560 8C	Manage environmental impacts of meat processing operations	NIL	II
MTMPS560 9C	Manage, maintain and continuously improve OH&S plans and systems	NIL	II
MTMPS561 0C	Manage transportation of meat, meat products and meat by-products	NIL	II
MTMPSR20 1C	Vacuum pack product	NIL	II
MTMPSR20 2B	Apply environmentally sustainable work practices	NIL	II
MTMPSR20 3A	Sharpen knives	NIL	II
MTMPSR30 1C	Cure and corn product	NIL	II
MTMPSR40 1C	Coordinate contracts	NIL	II
MTMPSR40 2C	Prepare and evaluate resource proposals	NIL	II
MTMPSR40 3C	Facilitate achievement of enterprise environmental policies and goals	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMPSR404C	Foster a learning culture in a meat enterprise	NIL	II
MTMPSR405C	Build productive and effective workplace relationships	NIL	II
MTMPSR406C	Manage and maintain a food safety plan	NIL	II
MTMPSR407A	Assess and evaluate meat industry requirements and processes	NIL	II
MTMPSR408A	Specify beef product using AUS-MEAT language	NIL	II
MTMPSR409A	Specify sheep product using AUS-MEAT language	NIL	II
MTMPSR410A	Specify pork product using AUS-MEAT language	NIL	II
MTMPSR411A	Lead communication in the workplace	NIL	II
MTMPSR412A	Participate in product recall	NIL	II
MTMPSR413A	Participate in ongoing development and implementation of a HACCP and Quality Assurance system	NIL	II
MTMPSR414A	Establish sampling program	NIL	II
MTMPSR5601C	Design and manage the food safety system	NIL	II
MTMPSR5604C	Manage new product/process development	NIL	II
MTMPSR601A	Benchmark to manage/improve enterprise performance	NIL	II
MTMPSR602A	Monitor and manage organisational legal responsibilities	NIL	II
MTMPSR603A	Manage meat processing systems to maintain and improve product quality	NIL	II
MTMPSR604A	Manage effective operation of meat enterprise cold chain and refrigeration systems	NIL	II
MTMPSR60	Assess and purchase livestock	NIL	II

Code	Unit title	Pre-requisite	Volume
6A			
MTMPSR60 7A	Analyse and develop enterprise systems for new opportunities	NIL	II
MTMPSR60 8A	Establish new markets	NIL	II
MTMR101C	Identify species and meat cuts	NIL	II
MTMR102C	Trim meat for further processing	MTMPSR20 3A	II
MTMR103C	Store meat product	NIL	II
MTMR104C	Prepare minced meat and minced meat products	MTMPSR20 3A	II
MTMR106C	Provide service to customers	NIL	II
MTMR107C	Process sales transactions	NIL	II
MTMR108B	Undertake minor routine maintenance	NIL	II
MTMR109B	Monitor meat temperature from receipt to sale	NIL	II
MTMR201C	Break and cut product using a bandsaw	MTMPSR201 C	II
MTMR202C	Provide advice on cooking and storage of meat products	MTMR106C	II
MTMR203C	Select, weigh and package meat for sale	NIL	II
MTMR204C	Package product using manual packing and labelling equipment	NIL	II
MTMR207B	Use basic methods of meat cookery	MTMPSR20 3A	II
MTMR208B	Vacuum pack product in a retail operation	NIL	II
MTMR209B	Undertake routine preventative maintenance	NIL	II
MTMR210B	Make and sell sausages	NIL	II
MTMR211B	Produce and sell value-added products	MTMPSR20 3A	II
MTMR212B	Receive meat product	NIL	II
MTMR301C	Prepare specialised cuts	MTMPSR20 3A	II
MTMR302C	Assess carcass/product quality	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMR303C	Calculate yield of carcass or product	NIL	II
MTMR304C	Manage stock	NIL	II
MTMR305C	Meet customer needs	MTMR106C	II
MTMR306C	Provide advice on nutritional role of meat	NIL	II
MTMR307C	Merchandise products and services	NIL	II
MTMR308C	Prepare and produce value-added products	NIL	II
MTMR309C	Prepare, roll, sew and net meat	NIL	II
MTMR310C	Bone and fillet poultry	MTMPSR203A	II
MTMR311C	Cost and price meat products	NIL	II
MTMR312C	Prepare portion control to specifications	MTMPSR203A	II
MTMR313C	Bone game meat	MTMPSR203A	II
MTMR314B	Order stock in a meat enterprise	NIL	II
MTMR315B	Calculate and present statistical data in a meat enterprise	NIL	II
MTMR316B	Utilise the Meat Standards Australia system for beef to meet customer requirements	MTMPSR203A	II
MTMR317B	Cure, corn and sell product	NIL	II
MTMR318B	Assess and sell poultry product	NIL	II
MTMR319B	Break carcasses for retail sale	MTMPSR203A MTMR320B	II
MTMR320B	Locate, identify and assess cuts	NIL	II
MTMR321A	Assess and address customer preferences	NIL	II
MTMR322A	Collect and prepare standard samples	NIL	II
MTMR501A	Develop and assess a meat retailing business opportunity	NIL	II
MTMS101C	Handle materials and products	NIL	II
MTMS102C	Pack smallgoods product	NIL	II
MTMS205C	Package product using thermoform process	NIL	II
MTMS206C	Package product using gas flushing process	NIL	II

Code	Unit title	Pre-requisite	Volume
MTMS207C	Operate bar and coder systems	NIL	II
MTMS208C	Operate metal detection unit	NIL	II
MTMS210B	Select/identify and prepare casings	NIL	II
MTMS211B	Manually shape and form product	NIL	II
MTMS212B	Manually link and tie product	MTMPSR203A	II
MTMS213B	Slice product using simple machinery	NIL	II
MTMS214B	Rotate stored meat	NIL	II
MTMS215B	Rotate meat product	NIL	II
MTMS216B	Inspect carton meat	NIL	II
MTMS217A	Prepare dry ingredients	NIL	II
MTMS218B	Measure and calculate routine workplace data	NIL	II
MTMS300B	Operate mixer/blender unit	NIL	II
MTMS301B	Cook, steam and cool product	NIL	II
MTMS302B	Prepare dried meat	NIL	II
MTMS303B	Fill casings	NIL	II
MTMS304B	Thaw product - water	NIL	II
MTMS305B	Thaw product - air	NIL	II
MTMS306B	Identify and repair equipment faults	NIL	II
MTMS307A	Sort meat	NIL	II
MTMS308A	Batch meat	NIL	II
MTMS309B	Operate product forming machinery	NIL	II
MTMS310B	Operate link and tie machinery	NIL	II
MTMS311B	Operate complex slicing and packaging machinery	NIL	II
MTMS312A	Prepare meat-based pates and terrines for commercial sale	NIL	II
MTMS313A	Prepare product formulations	NIL	II
MTMS314A	Ferment and mature product	NIL	II
MTMS315A	Blend meat product	NIL	II
MTMSR201	Prepare and slice meat cuts	MTMPSR20	II

Code	Unit title	Pre-requisite	Volume
C		3A	
MTMSR202 C	Trim meat to specifications	MTMPSR20 3A	II
MTMSR203 C	Package product using automatic packing and labelling equipment	NIL	II
MTMSR204 C	Despatch meat product	NIL	II
MTMSR301 C	Break carcase into primal cuts	MTMPSR20 3A	II
MTMSR302 C	Prepare primal cuts	MTMPSR20 3A	II
MTMSR303 A	Smoke product	NIL	II

Imported Units of Competency

Imported Units of Competency in MTM11 Australian Meat Industry Training Package

Code	Title	Origin	Volume
AHC BIO302A	Identify and report unusual disease or plant pest signs	AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package	III
AHCLSK204A	Carry out regular livestock observation	AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package	III
AHCLSK207A	Load and unload livestock	AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package	III
AHCLSK212A	Ride horses to carry out stock work	AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package	III
AHCLSK324A	Care for and train working dogs	AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package	III

Assessment Guidelines Overview

Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the *Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration*. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability
- flexibility
- fairness
- sufficiency

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.

Validity

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

- (a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
- (b) assessment of knowledge and skills must be integrated with their practical application
- (c) judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

Reliability

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

Flexibility

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

Fairness

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

Sufficiency

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough *appropriate* evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

Rules of Evidence

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

Valid

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

Sufficient

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

Current

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

Authentic

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate's own work.

Assessment Requirements of the Australian Quality Training Framework

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 *Essential Standards for Registration*.

The AQTF 2010 *Essential Standards for Initial and Continuing Registration* can be downloaded from <www.training.com.au>.

The following points summarise the assessment requirements.

Registration of Training Organisations

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

Quality Training and Assessment

Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1.

Assessor Competency Requirements

Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 *Users' Guide to the Essential Standards for Registration – Appendix 2*.

Assessment Requirements

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Assessment Strategies

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

National Recognition

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Access and Equity and Client Outcomes

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Monitoring Assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Recording Assessment Outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current *AQF Implementation Handbook* and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). See the AQTF and the edition of the *AQF Implementation Handbook*—available on the AQF Council website <www.aqf.edu.au>

Licensing/Registration Requirements

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer.

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change. The developers of this Training Package consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and the Department cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis. Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact mintrac@mintrac.com.au

Separate licensing arrangements are required for the following units within MTM11 Australian Meat Industry Training Package:

- MTMPS206B *Operate forklift in a specific workplace*. Candidates undertaking this unit are required to hold a current forklift licence prior to commencement of this unit.
- MTMP2007A *Perform emergency kill*. Candidates undertaking this unit are required to hold a current firearms licence prior to commencement of this unit, if a firearm is to be used to undertake the emergency kill.
- MTMPSR408A *Specify beef product using AUS-MEAT language*,
- MTMPSR409A *Specify sheep product using AUS-MEAT language*,
- MTMPSR410A *Specify pork product using AUS-MEAT language*. Separate certification through AUS-MEAT is required.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact

Requirements for Assessors

In order to conduct assessment for statutory licensing or other industry registration requirements, assessors must meet the requirements outlined in the following chart, in addition to the AQTF requirements.

LICENCE/REGISTRATION	JURISDICTION	REQUIREMENTS

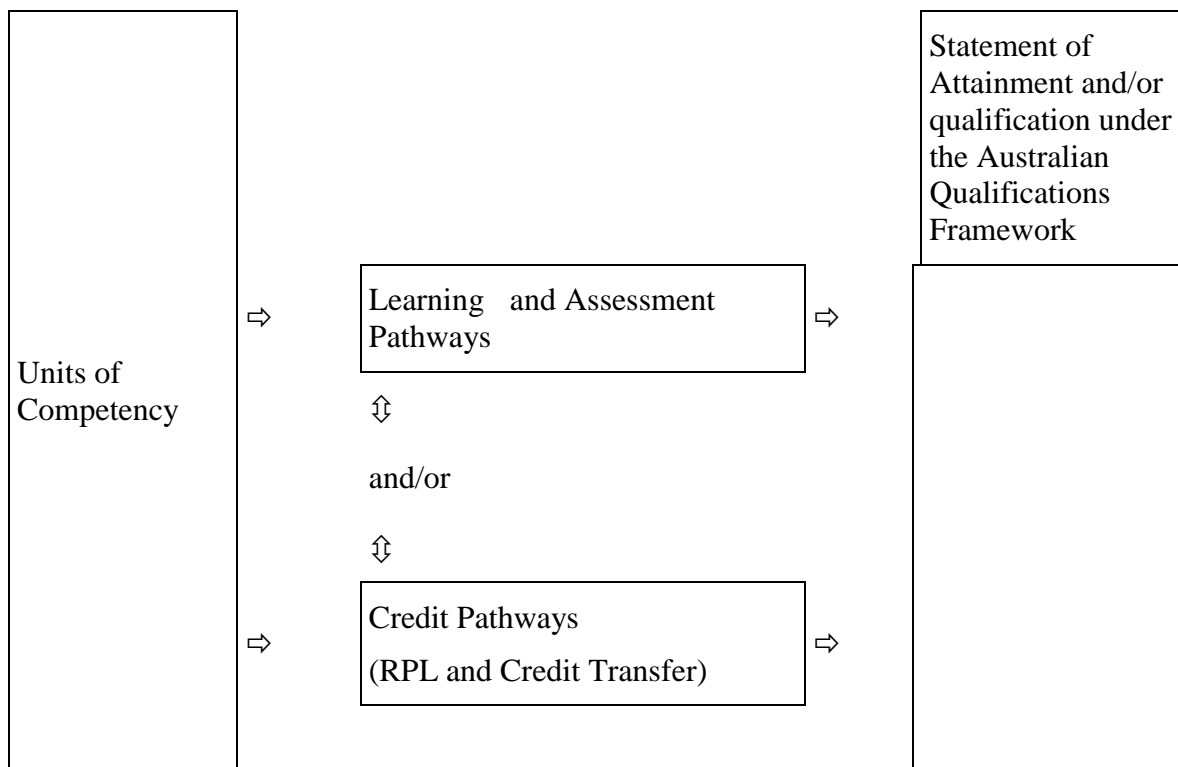

These requirements may be met through

Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.

Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, the AQTF and, where relevant, the Australian Qualifications Framework.

Learning and Assessment Pathways

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process. Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

Credit Pathways

Credit is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

Recognition of Prior Learning

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;

- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.
-

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

Credit Transfer

Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.

This process involves education institutions:

- mapping, comparing and evaluating the extent to which the defined *learning outcomes and assessment requirements* of the individual *components of one qualification* are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
- making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
- setting out the agreed credit outcomes in a documented arrangement or agreement, and
- publicising the arrangement/agreement and credit available.

Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

Assessor Competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

- 1.4 Training and assessment are conducted by trainers and assessors who:
- a) have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and
 - b) have the relevant vocational competencies at least to the level being delivered or assessed, and
 - c) can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
 - d) continue to develop their Vocational Education and Training (VET) knowledge and

skills as well as their industry currency and trainer/assessor competence.

* See AQTF 2010 *Users' Guide to the Essential Standards for Registration* – Appendix 2

Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <www.ntis.gov.au>.

Developing Assessment Tools

When developing their own assessment tools, assessors must ensure that the tools:

- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, Literacy and Numeracy

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Mandatory Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

1.5 Assessment, including Recognition of Prior Learning (RPL):

- a) meets the requirements of the relevant Training Package or accredited course
- b) is conducted in accordance with the principles of assessment and the rules of evidence
- c) meets workplace and, where relevant, regulatory requirements
- d) is systematically validated.

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <http://www.training.com.au/>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <http://employabilityskills.training.com.au>

For more information on Employability Skills in

AgriFood Skills Australia Training Packages go to the AgriFood Skills Australia website at www.agrifoodskills.net.au.

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from <http://employabilityskills.training.com.au> "

Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

Reasonable Adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship. The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to <http://www.deewr.gov.au/tpdh/Pages/home.aspx>.

Further Sources of Information

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

The National Register is an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses - <www.ntis.gov.au>

The Training Package Development Handbook site provides National Quality Council policy for the development of Training Packages. The site also provides guidance material for the application of that policy, and other useful information and links.

<http://www.deewr.gov.au/Skills/Overview/Policy/TPDH/Pages/main.aspx>

Assessment Resources

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focussed training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Resources can be purchased or accessed from:

- TVET Australia – provides an integrated service to enable users of the national training system to identify and acquire training materials, identify copyright requirements and enter licenses for use of that material consistent with the scope and direction of the NQC.

Assessment Guidelines

Licensing/Registration Requirements
This section provides information on licensing/registration requirements for this

Training Package, with the following important disclaimer.

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change.

The developers of this Training Package consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and the Department cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact mintrac@mintrac.com.au

Separate licensing arrangements are required for the following units within MTM11 Australian Meat Industry Training Package:

- MTMPS206B *Operate forklift in a specific workplace*. Candidates undertaking this unit are required to hold a current forklift licence prior to commencement of this unit.
- MTMP2007A *Perform emergency kill*. Candidates undertaking this unit are required to hold a current firearms licence prior to commencement of this unit, if a firearm is to be used to undertake the emergency kill.
- MTMPSR408A *Specify beef product using AUS-MEAT language*,
- MTMPSR409A *Specify sheep product using AUS-MEAT language*,
- MTMPSR410A *Specify pork product using AUS-MEAT language*. Separate certification through AUS-MEAT is required.

MTM10111 Certificate I in Meat Processing (Smallgoods)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers commencing entry-level work in smallgoods enterprises. It is appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- labourers requiring an induction.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior smallgoods skills or knowledge
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM20211 Certificate II in Meat Processing (Smallgoods)
- MTM20411 Certificate II in Meat Processing (Food Services).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • using mathematical skills related to areas such as time, weights and portion size
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team
Problem solving	<ul style="list-style-type: none"> • showing initiative in identifying problems, such as malfunctioning equipment, and ensuring appropriate steps are taken to notify the problem
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to products or introduction of new equipment
Planning and organising	<ul style="list-style-type: none"> • managing time and priorities, such as work times and production schedules
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete eight units of competency in total.

- complete all five core units of competency
- complete three elective units of competency.

One elective unit may be selected from any Certificate I or II qualification in this Training Package, or any other Training Package or accredited course. Units selected must be relevant to smallgoods processing and must not duplicate any unit already contained in the qualification.

Qualification structure

Core units			
MTMCOR202A	Apply hygiene and sanitation practices	MTMCOR205A	Communicate in the workplace
MTMCOR203A	Apply Quality Assurance practices	MTMCOR206A	Overview the meat industry
MTMCOR204A	Follow safe work policies and procedures		
Elective units			
MTMPS201C	Clean work area during operations	FDFOP2061A	Use numerical applications in the workplace
MTMS101C	Handle materials and products	HLTFA301B	Apply first aid
MTMS102C	Pack smallgoods product		

MTM10211 Certificate I in Meat Processing (Meat Retailing)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers commencing work in meat retailing enterprises. It is appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- butcher shop assistant
- meat department assistant.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior meat retailing skills or knowledge
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM20311 Certificate II in Meat Processing (Meat Retailing)
- MTM20411 Certificate II in Meat Processing (Food Services)
- MTM30811 Certificate III in Meat Processing (Retail Butcher), with credit for applicable units already successfully completed.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel and customers • reading and interpreting workplace-related documentation, such as customer orders and recipes • using mathematical skills in areas such as time, weights and portion size and tender
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers and customers from another country
Problem solving	<ul style="list-style-type: none"> • solving problems, such as malfunctioning equipment or OH&S issues individually or assisting other team members
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to products or introduction of new equipment
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as customer orders and product specifications • using basic business systems for planning and organising, for example, work instructions or Standard Operating Procedures • managing time and priorities, such as work times and customer order deadlines
Self-management	<ul style="list-style-type: none"> • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of setting, such as through formal training or informally from other workers
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery • applying OH&S requirements when using workplace technology, such as knives

Packaging Rules

Packaging Rules

Complete sixteen units of competency in total.

- complete five core units of competency
- complete eleven elective units of competency.

A maximum of two units can be selected from other Certificate I or II qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to meat retailing and must not duplicate units already contained within the qualification.

Qualification structure

Core units			
MTMCOR202A	Apply hygiene and sanitation practices	MTMCOR206A	Overview the meat industry
MTMCOR204A	Follow safe work policies and procedures	FDFOP2061A	Use numerical applications in the workplace
MTMCOR205A	Communicate in the workplace		
Elective units			
MTMCOR201A	Maintain personal equipment	MTMR107C	Process sales transactions
MTMPSR203A	Sharpen knives	MTMR108B	Undertake minor routine maintenance
MTMR101C	Identify species and meat cuts	MTMR109B	Monitor meat temperature from receipt to sale
MTMR102C	Trim meat for further processing	MTMR203C	Select, weigh and package meat for sale
MTMR103C	Store meat product	HLTFA301B	Apply first aid
MTMR104C	Prepare minced meat and minced meat products	PRMCL38A	Clean a food handling area

MTMR106C	Provide service to customers	
----------	------------------------------	--

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite unit
MTMR102C Trim meat for further processing	MTMPSR203A Sharpen knives
MTMR104C Prepare minced meat and minced meat products	MTMPSR203A Sharpen knives

MTM20111 Certificate II in Meat Processing (Abattoirs)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers commencing work in an abattoir. This qualification is **not suitable** for a pre-vocational or VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- stockyard or lairage labourer
- slaughter floor labourer
- carcase trimmer
- packer
- offal room labourer
- tripe room labourer
- loadout operator
- skin shed labourer
- fellmongerer
- by-products labourer
- meat processing cleaner
- field harvester of wild game
- livestock handler in lairage.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior meat processing skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units already successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM30111 Certificate III in Meat Processing (Boning Room)
- MTM30211 Certificate III in Meat Processing (Food Services)
- MTM30311 Certificate III in Meat Processing (Meat Safety)
- MTM30411 Certificate III in Meat Processing (Rendering)
- MTM30511 Certificate III in Meat Processing (Slaughtering)
- MTM30611 Certificate III in Meat Processing (General)
- MSL30109 Certificate III in Laboratory Skills.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • sharing information with other workers, especially during changeover processes
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team
Problem solving	<ul style="list-style-type: none"> • solving problems, for example, reporting malfunctioning equipment, to ensure that the problem is appropriately addressed
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to products/specifications or introduction of new equipment
Planning and organising	<ul style="list-style-type: none"> • managing time and priorities, such as work times and meeting production schedules
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers • learning new skills and techniques to adjust to production or equipment changes
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

- complete all six core units of competency
- complete a minimum of three elective units of competency, to a minimum value of twenty points.

Units with a value of up to fifteen points can be selected from a Certificate III in Meat Processing qualification in Slaughtering, Boning Room, Rendering, General or Meat Safety.

A maximum of four units can be selected from other Certificate II level qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to the identified job role and must not duplicate units already contained within the qualification. Units selected will be worth 2 points.

Qualification structure

Core units					
Identifying with the industry					
MTMCOR201A	Maintain personal equipment	2	MTMCOR204A	Follow safe work policies and procedures	4
MTMCOR202A	Apply hygiene and sanitation practices	4	MTMCOR205A	Communicate in the workplace	4
MTMCOR203A	Apply Quality Assurance practices	4	MTMCOR206A	Overview the meat industry	2
Elective units					
Handle animals					
MTMP2002C	Prepare animals for slaughter	4	MTMP2008A	Assess, purchase and transport calves	5
MTMP2004B	Feed race	1	MTMP2009B	Unload livestock	1
MTMP2005B	Restrain animal	1	MTMP2011C	Identify animals using electronic systems	2
MTMP2006B	Apply animal welfare and handling requirements*	4	AHCLSK212A	Ride horses to carry out stock work	5
MTMP2007B	Perform emergency kill	2	AHCLSK324A	Care for and train working dogs	3

Prepare the carcase					
MTMP2012C	Shackle animal	2	MTMP2023C	Remove brisket wool	1
MTMP2013C	Operate electrical stimulator	1	MTMP2024C	Prepare hide/pelt for removal	2
MTMP2014C	Remove head	1	MTMP2025B	Bag tail	1
MTMP2015C	Cut hocks	1	MTMP2026B	Remove and record tag	1
MTMP2016C	Mark brisket	1	MTMP2027B	Seal or drain urinary tract	1
MTMP2018C	Complete changeover operation	1	MTMP2028B	Singe carcase	1
MTMP2020C	Trim pig pre-evisceration	4	MTMP2029B	Shave carcase	1
MTMP2021C	Number carcase and head	1	MTMP2030B	Flush carcase	2
MTMP2022C	Punch pelts	2			
Operate mechanical aids					
MTMP2031C	Operate scalding/de-hairing equipment	4	MTMP2043C	Operate sterivac equipment	2
MTMP2032C	Operate whizzard knife	2	MTMP2044B	De-rind meat cuts	2
MTMP2033C	Operate rise and fall platform	1	MTMP2045B	De-nude meat cuts	2
MTMP2034C	Operate vacuum blood collection process	2	MTMP2046B	Operate rib puller	1
MTMP2035C	Operate nose roller	2	MTMP2047B	Operate frenching machine	1
MTMP2036C	Operate pneumatic cutter	1	MTMP2048B	Operate cubing machine	1
MTMP2037C	Operate circular saw	1	MTMP2049B	Cure and corn product in a meat processing plant	2
MTMP2038C	Prepare carcase and	1	MTMP2050B	Operate head splitter	1

	equipment for hide/pelt puller			
MTMP2039C	Operate tenderiser	1	MTMP2058B	Operate jaw breaker 1
MTMP2040C	Operate mincer	2	MTMPR201C	Prepare and operate bandsaw 2
MTMP2042C	Operate new technology or process	2	MTMSR201C	Prepare and slice meat cuts 1
Trim carcase				
MTMPSR203A	Sharpen knives	4	MTMP2054C	Inspect hindquarter and remove contamination 2
MTMP2051C	Trim neck	2	MTMP2055C	Inspect forequarter and remove contamination 2
MTMP2052C	Trim forequarter to specification	2	MTMP2057B	Remove spinal cord 2
MTMP2053C	Trim hindquarter to specification	2		
Despatch carcase from slaughter floor				
MTMP2061C	Grade carcase	8	MTMP2065C	Label and stamp carcase 2
MTMP2062C	Weigh carcase	2	MTMP2066C	Wash carcase 1
MTMP2063C	Operate semi-automatic tagging machine	4	MTMP2067B	Operate a decontamination unit 1
MTMP2064C	Measure fat	2	MTMP2068B	Remove tenderloin 2
Pack meat products				
MTMP2071C	Inspect meat for defects	4	MTMP2075C	Pack meat products 6
MTMP2072C	Assemble and prepare cartons	2	MTMP2082C	Operate carton scales 2
MTMP2074C	Identify cuts and specifications	6		
Operate packaging machinery				
MTMP2081C	Operate carton sealing	2	MTMPS203C	Operate scales and semi-automatic labelling 8

machine			machinery		
MTMP2083C	Operate strapping machine	2	MTMPSR201C	Vacuum pack product	5
MTMP2084C	Operate carton-forming machine	2	MTMS206C	Package product using gas-flushing process	2
MTMP2085C	Operate automatic CL determination machine	2	MTMS208C	Operate metal detection unit	1
MTMP2086B	Operate bag forming equipment	1			
Dress head					
MTMP2091C	Assess dentition	1	MTMP2094C	Bone head	4
MTMP2092C	Drop tongue	1	MTMP2095C	Remove cheek meat	2
MTMP2093C	Wash head	1	MTMP2096C	Bar head and remove cheek meat	2
Process offal					
MTMP2116B	Process offal	6	MTMP2118B	Overview offal processing*	2
MTMP2117B	Process runners	6			
Perform tripe processing operations					
MTMP2121C	Prepare and trim honeycomb	3	MTMP2125C	Process small stock tripe	2
MTMP2122C	Recover mountain chain	3	MTMP2126C	Process bibles	2
MTMP2123C	Further process tripe	3	MTMP2127B	Process maws	2
MTMP2124C	Trim processed tripe	2	MTMP2175C	Process paunch	4
Loadout product					
MTMP2131C	Prepare and despatch meat product orders	8	MTMP2135C	Locate storage areas and product	2
MTMP2132C	Loadout meat product	4	MTMP2136C	Complete re-pack operation	4

MTMP2133C	Store carcase product	2	MTMP2137B	Bag carcase	1
MTMP2134C	Store carton product	2			
Process offal on slaughter floor					
MTMP2102C	Process thick skirts	1	MTMP2145C	Separate and tie runners	1
MTMP2115C	Process thin skirts	1	MTMP2147C	Recover thin skirts	2
MTMP2141C	Overview offal processing on slaughter floor*	2	MTMP2148B	Remove thick skirts	1
MTMP2143C	Separate offal	2	MTMP2149B	Remove flares	1
MTMP2144C	Trim offal fat	1	MTMP2150B	Recover offal	4
Process animal covering					
MTMP2151C	Overview hide/pelt/skin processing*	2	MTMP2155C	Despatch hide or skin	4
MTMP2152C	Trim hide or skin	4	MTMP2156B	Treat hides chemically	2
MTMP2153C	Salt hide or skin	4	MTMP2157B	Chill/ice hides	2
MTMP2154C	Grade hide or skin	6	MTMP2158B	Crop pelts	2
Operate fellmongering process					
MTMP2161C	Overview fellmongering operations*	2	MTMP2165C	Perform sweating operation on fellmongered skins	3
MTMP2162C	Chemically treat skins for fellmongering process	2	MTMP2166C	Perform skin fleshing operation	3
MTMP2163C	Prepare chemicals for fellmongering process	3	MTMP2167C	Skirt and weigh fellmongered wool	2
MTMP2164C	Operate wool drier and press	3	MTMP2168B	Operate wool puller	3
Dispose of condemned carcase					
MTMP2171C	Dispose of condemned carcase*	1	MTMP2173C	Eviscerate condemned carcase	2

MTMP2172C	Skin condemned carcase	4		
Process by-products				
MTMP2176C	Process slink by-products	10	MTMP2178C	Skin slinks 2
MTMP2177C	Process pet meat	4	MTMP2179B	Process blood 2
Render product				
MTMP2181C	Overview rendering process*	2	MTMP2185C	Operate waste recovery systems 3
MTMP2182C	Operate hogger	4	MTMP2186C	Pack and despatch rendered products 4
MTMP2183C	Operate blow line	4	MTMP2187C	Break down and bone carcase for pet meat or rendering 4
MTMP2184C	Operate meat meal mill	4	MTMP2188C	Operate air filtration system 4
Clean work area				
MTMP2192B	Clean carcase hanging equipment	4	MTMPS201C	Clean work area during operations 4
Clean after operations				
MTMP2196C	Overview cleaning program*	2	MTMP2198C	Clean after operations - slaughter floor 4
MTMP2193B	Clean amenities and grounds	2	MTMPS205C	Clean chillers 2
MTMP2197C	Clean after operations - boning room	4	PRMCL35B	Maintain a cleaning storage area 2
Operate vehicle				
MTMP2201C	Transport food	4	AHCMOM212A	Operate quad bikes 2
MTMPS206C	Operate forklift in a specific workplace	6	TLID3020A	Care for livestock in transit 6
AHCMOM202A	Operate tractors	2		

Maintain records					
MTMPS204C	Maintain production records	10			
General					
MTMPSR202A	Apply environmentally sustainable work practices	2	NWP262A	Monitor and report wastewater treatment processes	2
HLTFA301B	Apply first aid	2	NWP263A	Operate and maintain wastewater treatment plant and equipment	8
NWP208A	Perform basic wastewater tests	2			

* Units marked with an asterisk (*) must be undertaken with at least one other unit from the same section.

MTMP2176C Process slink by-products	MTMPSR203A Sharpen knives
MTMP2177C Process pet meat	MTMPSR203A Sharpen knives
MTMP2178B Skin slinks	MTMPSR203A Sharpen knives
MTMP2187C Break down and bone carcass for pet meat or rendering	MTMPSR203A Sharpen knives

MTM20211 Certificate II in Meat Processing (Smallgoods)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers undertaking work in smallgoods establishments. It is not appropriate for use as a pre-vocational qualification or for inclusion as a VET in Schools program unless there is opportunity for a sustained period of work placement in a smallgoods enterprise. A substantial component of this qualification must be assessed on the job.

Job roles

Job role titles covered by this qualification may include:

- smallgoods labourer
- smallgoods operator.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- direct entry without prior work experience
- after completion of MTM10111 Certificate I in Meat Processing (Smallgoods)
- through Recognition of Prior Learning
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units successfully completed
- MTM30911 Certificate III in Meat Processing (Smallgoods - General)
- MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture)
- MTM30211 Certificate III in Meat Processing (Food Services).

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • using mathematical skills related to areas such as time, weights and portion size
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team
Problem solving	<ul style="list-style-type: none"> • showing independence in identifying problems, such as malfunctioning equipment or OH&S issues
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to products or introduction of new equipment • using numeracy skills to solve problems, such as modification of temperature settings
Planning and organising	<ul style="list-style-type: none"> • managing time and priorities, such as work times and meeting production schedules
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete sixteen units of competency in total.

- complete all five core units of competency
- complete eleven elective units of competency, made up of:
 - three units of competency from Group A
 - eight units of competency from Group B.

Two elective units may be selected from any Certificate II qualification in this Training Package, or any other Training Package or accredited course. Units selected must be relevant to smallgoods processing and must not duplicate any unit already contained in the qualification.

Qualification structure

Core units			
MTMCOR202A	Apply hygiene and sanitation practices	MTMCOR205A	Communicate in the workplace
MTMCOR203A	Apply Quality Assurance practices	MTMCOR206A	Overview the meat industry
MTMCOR204A	Follow safe work policies and procedures		
Elective units			
Group A			
MTMPS201C	Clean work area during operations	FDFOP2061A	Use numerical applications in the workplace
MTMS101C	Handle materials and products	HLTFA301B	Apply first aid
MTMS102C	Pack smallgoods product		
Group B			
MTMPSR203A	Sharpen knives	MTMS212B	Manually link and tie product

MTMPS300A	Assess product in chillers	MTMS213B	Slice product using simple machinery
MTMP2054C	Inspect hindquarter and remove contamination	MTMS214C	Rotate stored meat
MTMP2055C	Inspect forequarter and remove contamination	MTMS215B	Rotate meat product
MTMP2133C	Store carcase product	MTMS216B	Inspect carton meat
MTMP2134C	Store carton product	MTMS217A	Prepare dry ingredients
MTMP2197C	Clean after operations - boning room	MTMS218B	Measure and calculate routine workplace data
MTMPS203C	Operate scales and semi-automatic labelling machinery	MTMSR201C	Prepare and slice meat cuts
MTMPS205C	Clean chillers	MTMSR202C	Trim meat to specifications
MTMPS206C	Operate a forklift in a specific workplace	MTMSR203C	Package product using automatic packing and labelling equipment
MTMPSR201C	Vacuum pack product	MTMSR204C	Despatch meat product
MTMS205C	Package product using thermoform process	FDFOF2007A	Work in a freezer storage area
MTMS206C	Package product using gas flushing process	FDFOF2010A	Work with temperature controlled stock

MTMS207C	Operate bar and coder systems	MSL922001A	Record and present data
MTMS208C	Operate metal detection unit	PRMCL38A	Clean a food handling area
MTMS210B	Select/identify and prepare casings	TLID2013A	Move materials mechanically using automated equipment
MTMS211B	Manually shape and form product		

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMP2054C Inspect hindquarter and remove contamination	MTMPSR203A Sharpen knives
MTMP2055C Inspect forequarter and remove contamination	MTMPSR203A Sharpen knives
MTMSR201C Prepare and slice meat cuts	MTMPSR203A Sharpen knives
MTMSR202C Trim meat to specifications	MTMPSR203A Sharpen knives
MTMS212B Manually link and tie product	MTMPSR203A Sharpen knives

MTM20311 Certificate II in Meat Processing (Meat Retailing)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers working in meat retailing enterprises. It is appropriate for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- butcher shop sales assistant
- meat department worker
- assistant butcher
- meat wholesale worker
- boning room assistant.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of MTM10211 Certificate I in Meat Processing (Meat Retailing)
- by direct entry without prior meat retailing skills or knowledge
- through Recognition of Prior Learning
- through a meat retailing school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification with credit for applicable units successfully completed
- MTM30811 Certificate III in Meat Processing (Retail Butcher) with some credit for applicable completed Units
- MTM30211 Certificate III in Meat Processing (Food Services)
- MTM30611 Certificate III in Meat Processing (General)
- MTM30111 Certificate III in Meat Processing (Boning Room).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel and customers • reading and interpreting workplace-related documentation, such as customer orders and recipes • using mathematical skills in areas such as time, weights and portion size and tender • sharing information with other workers, for example, customer requests
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers and customers from another country • applying own knowledge to assist other members of the work team
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, for example, suggesting substitutions for unavailable ingredients • showing independence in identifying problems, such as malfunctioning equipment or OH&S issues • using numeracy skills to solve problems, for example, adjusting temperatures or recalculation of quantities
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as introduction of new products or equipment • using numeracy skills to solve problems, such as modification of portion sizes • translating ideas into action by demonstrating suggestions
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as customer orders and product specifications • using basic business systems for planning and organising, for example, work instructions or Standard Operating Procedures • participating in ongoing continuous improvement and planning

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	processes, such as Quality Assurance processes <ul style="list-style-type: none"> managing time and priorities, such as work times and customer order deadlines
Self-management	<ul style="list-style-type: none"> taking responsibility for own work output
Learning	<ul style="list-style-type: none"> being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes learning in a range of settings, such as through formal training or informally from other workers managing own learning, for example, undertaking self-directed research to identify a new recipe
Technology	<ul style="list-style-type: none"> using technology, such as workplace machinery, including mincers and bandsaws demonstrating skill when using workplace technology, such as knives and bandsaws applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete twenty seven units in total.

- complete all five core units of competency
- complete a minimum of eight elective units from Group A
- complete a minimum of eight elective units from Group B.

A maximum of five units can be selected from other Certificate II or III qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to meat retailing and must not duplicate units already contained within the qualification.

Qualification structure

Core units	
MTMCOR202A Apply hygiene and sanitation practices	MTMCOR206A Overview the meat industry
MTMCOR204A Follow safe work policies and procedures	FDFOP2061A Use numerical applications in the workplace
MTMCOR205A Communicate in the workplace	

Elective units			
Group A			
MTMCOR201A	Maintain personal equipment	MTMR107C	Process sales transactions
MTMPSR203A	Sharpen knives	MTMR108B	Undertake minor routine maintenance
MTMR101C	Identify species and meat cuts	MTMR109B	Monitor meat temperature from receipt to sale
MTMR102C	Trim meat for further processing	MTMR203C	Select, weigh and package meat for sale
MTMR103C	Store meat product	HLTFA301B	Apply first aid
MTMR104C	Prepare minced meat and minced meat products	PRMCL38A	Clean a food handling area
MTMR106C	Provide service to customers		
Group B			
MTMCOR203A	Apply Quality Assurance practices	MTMR211B	Produce and sell value-added products
MTMPR201C	Prepare and operate a bandsaw	MTMR212B	Receive meat product
MTMR201C	Break and cut product using bandsaw	MTMSR201C	Prepare and slice meat cuts
MTMR202C	Provide advice on cooking and storage of meat products	MTMSR202C	Trim meat to specifications
MTMR204C	Package product using manual packing and labelling equipment	MTMSR203C	Package product using automatic packing and labelling equipment
MTMR207B	Use basic methods of meat cookery	MTMSR204C	Despatch meat product
MTMR208B	Vacuum pack product in a retail operation	BSBITU101A	Operate a personal computer

MTMR209B	Undertake routine preventative maintenance	SIRXFIN001A	Balance point-of-sale terminal
MTMR210B	Make and sell sausages		

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMR102C Trim meat for further processing	MTMPSR203A Sharpen knives
MTMR104C Prepare minced meat and minced meat products	MTMPSR203A Sharpen knives
MTMR201C Break and cut product using a bandsaw	MTMPSR203A Sharpen knives
MTMR202C Provide advice on cooking and storage of meat products	MTMPSR203A Sharpen knives
MTMR207B Use basic methods of meat cookery	MTMPSR203A Sharpen knives
MTMR211B Produce and sell value-added products	MTMPSR203A Sharpen knives
MTMSR201C Prepare and slice meat cuts	MTMPSR203A Sharpen knives
MTMSR202C Trim meat to specifications	MTMPSR203A Sharpen knives

MTM20411 Certificate II in Meat Processing (Food Services)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers commencing work in meat enterprises which undertake specialised services, such as preparing specialty meat cuts, gourmet meat, bulk value-added products, and providing meat preparation customer service.

The MTM20411 Certificate II in Meat Processing (Food Services) is a highly flexible qualification enabling selections to be made from a wide range of units.

This qualification may be suitable for inclusion as a VET in Schools program, but careful attention must be given to ensuring appropriate work placement opportunities are available for the selected units.

Job roles

Job role titles covered by this qualification may include:

- meat wholesale preparation worker
- meat department customer service worker
- meat wholesale packer/wrapper
- meat wholesale packer/slicer
- butcher shop customer service worker
- delicatessen assistant
- value-adding worker in a boning room
- workers in single species retail outlets
- workers undertaking shelf-ready preparation of meat products
- 'meals ready-to-eat' preparers
- portion control slicer and packer.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior industry skills or knowledge
- through a school vocational studies program combined with work experience.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate II in Meat Processing qualification, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM30111 Certificate III in Meat Processing (Boning Room)
- MTM30211 Certificate III in Meat Processing (Food Services)
- MTM30511 Certificate III in Meat Processing (Slaughtering)
- MTM30611 Certificate III in Meat Processing (General)
- MTM30811 Certificate III in Meat Processing (Retail Butcher)
- MTM30911 Certificate III in Meat Processing (Smallgoods - General)
- MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture).

MTM30311 Certificate III in Meat Processing (Meat Safety)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by meat inspectors in meat processing enterprises. The MTM30311 Certificate III in Meat Processing (Meat Safety) is most commonly undertaken by meat inspectors in domestic processing enterprises. However, at the time of endorsement of this Training Package legislation and regulatory requirements relating to meat inspection were undergoing considerable change at both state/territory and federal level. People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Quarantine Inspection Service (AQIS), as appropriate.

This qualification is **not appropriate** for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- meat inspector.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning
- by direct entry without prior meat industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40211 Certificate IV in Meat Processing (Meat Safety)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Depending on the jurisdiction, Meat Inspectors must be registered with the relevant controlling authority (e.g. PrimeSafe (Victoria) or AQIS for export plants).

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • reading and interpreting workplace documentation such as work instructions, Standard Operating Procedures, Australian Standards and AQIS directives • preparing written documentation, such as reports • using mathematical skills relating to areas such as time and temperature • sharing information with supervisors and regulatory authorities • applying negotiation, persuasion and assertiveness skills when addressing food safety issues
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own food safety knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as when addressing food safety issues
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, such as food safety issues • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction • using numeracy skills to resolve problems, such as calculation and estimation • resolving concerns raised by external groups, such as customers or regulatory authorities
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to products or introduction of new equipment • translating ideas into action, for example contributing to the revision of a work instruction or Standard Operating Procedure
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as HACCP reports

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<ul style="list-style-type: none"> • using basic business processes for planning and organising, for example, production schedules • taking initiative and making decisions within workplace role, for example condemnation of a carcass • managing time and priorities such as meeting report deadlines and timely implementation of corrective actions
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure meat safety requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed food safety requirements, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers • learning new skills and techniques to adjust to production or equipment changes • managing own learning to ensure currency, for example, by attending technical workshops or through internet research
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery, computers and testing equipment • demonstrating skilled use of workplace technology • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete fifteen units of competency in total.

- complete all twelve core units
- complete three elective units.

Qualification structure

Core units			
MTMCOR201A	Maintain personal equipment	MTMP3003A	Handle animals humanely while conducting ante-mortem inspection
MTMCOR202A	Apply hygiene and sanitation practices	MTMP3071C	Perform ante-mortem inspection and make disposition
MTMCOR203A	Apply Quality Assurance practices	MTMP3072C	Perform post-mortem inspection and make disposition
MTMCOR204A	Follow safe work policies and procedures	MTMP3073B	Implement food safety program
MTMCOR205A	Communicate in the workplace	MTMP408A	Inspect transportation containers/vehicles
MTMCOR206A	Overview the meat industry	MTMPSR203A	Sharpen knives
Elective units			
MTMP3042C	Prepare head for inspection	MTMP412A	Inspect poultry
MTMP3046A	Prepare and present viscera for inspection	MTMP413A	Inspect ratites
MTMP3074B	Perform carcass Meat Hygiene Assessment	MTMPS415A	Conduct an internal audit of a documented program
MTMP3075B	Perform process monitoring for Meat Hygiene Assessment	BSBFLM312C	Contribute to team effectiveness
MTMP3076B	Perform boning room Meat Hygiene Assessment	MSL904001A	Perform standard calibrations
MTMP3077B	Perform offal Meat	MSL922001A	Record and present data

	Hygiene Assessment		
MTMP403B	Oversee plant compliance with the Australian Standards for meat processing	MSL954001A	Obtain representative samples in accordance with sampling plan
MTMP411A	Inspect game meat		

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMP3071C Perform ante-mortem inspection and make disposition	MTMP3003A Handle animals humanely while conducting ante-mortem inspection
MTMP3072C Perform post-mortem inspection and make disposition	MTMPSR203A Sharpen knives
MTMP3042C Prepare head for inspection	MTMPSR203A Sharpen knives
MTMP3046A Prepare and present viscera for inspection	MTMPSR203A Sharpen knives
MTMP3074B Perform carcass Meat Hygiene Assessment	MTMPSR203A Sharpen knives

MTM30411 Certificate III in Meat Processing (Rendering)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers in rendering plants. It is **not appropriate** for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- renderer/by-products operator.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning
- by direct entry without prior industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures and Material Safety Data Sheets (MSDS) • using mathematical skills, such as time, weights and temperature • sharing information with other workers, especially during changeover processes
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as assisting others to meet production schedules
Problem solving	<ul style="list-style-type: none"> • solving problems, for example, reporting malfunctioning equipment, to ensure that the problem is appropriately addressed • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to chemicals or introduction of new equipment
Planning and organising	<ul style="list-style-type: none"> • managing time and priorities, such as work times and meeting production schedules
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • learning in a range of settings, such as through formal training or informally from other workers • learning new skills and techniques to adjust to production or equipment changes

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

Technology

- using technology, such as workplace machinery
- demonstrating skilled use of workplace technology, for example, a tallow press
- applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

- complete all six core units of competency
- complete a minimum of four elective units of competency to the minimum value of thirty points.

A maximum of three units can be selected from other Certificate III qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to the identified rendering job role and must not duplicate units already contained within the qualification. Units selected will be worth 2 points.

Qualification structure

Core units					
MTMCOR201A	Maintain personal equipment	2	MTMCOR204A	Follow safe work policies and procedures	4
MTMCOR202A	Apply hygiene and sanitation practices	4	MTMCOR205A	Communicate in the workplace	4
MTMCOR203A	Apply Quality Assurance practices	4	MTMCOR206A	Overview the meat industry	2
Elective units					
MTMP3081C	Operate batch cooker	8	MTMP3086C	Operate tallow processing plant	6
MTMP3082C	Operate continuous cooker	7	MTMP3087C	Operate blood processing plant	6
MTMP3083C	Operate press	5	MTMP3088C	Produce rendered products hygienically	6
MTMP3084C	Operate wet rendering process	10	MTMP3089C	Render edible products	2
MTMP3085C	Monitor boiler operations	4	MTMP3090B	Implement a Quality Assurance program for rendering plant	4

MTM30511 Certificate III in Meat Processing (Slaughtering)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers undertaking slaughtering duties in abattoirs. It is **not appropriate** for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- slaughter and dressing operations.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • sharing information with other workers, especially during changeover processes
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as assisting others to meet production schedules
Problem solving	<ul style="list-style-type: none"> • solving problems, either individually or in teams, for example, reporting malfunctioning equipment to ensure that the problem is appropriately addressed
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as change of species or introduction of new equipment
Planning and organising	<ul style="list-style-type: none"> • managing time and priorities, such as work times and meeting production schedules
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • learning in a range of settings, such as through formal training or informally from other workers • learning new skills and techniques to adjust to production or equipment changes
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery • demonstrating skilled use of workplace technology, such as knives • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

- complete all seven core units of competency
- complete a minimum of five elective units of competency to the minimum value of thirty points.

A maximum of two units can be selected from other Certificate III qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to the identified slaughtering job role and must not duplicate units already contained within the qualification. Units selected will be worth 2 points.

Qualification structure

MTM30611 Certificate III in Meat Processing (General)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers in meat processing plants who are working in the areas of Quality Assurance or the laboratory.

Job roles

Job role titles covered by this qualification may include:

- Quality Assurance officer
- meat processing laboratory assistant
- game harvester
- game depot manager
- pre-dressing game inspector
- supervisor and leading hand
- on-floor trainer.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate I or II Meat Processing qualification
- through Recognition of Prior Learning
- by direct entry without prior industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- MSL30109 Certificate III in Laboratory Skills
- approved Skill Sets to gain expertise in specific skilled job roles, for example, the Meat Industry Microbiological Skill Set
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures and workplace memorandums • interpreting customer needs, for example, product specifications • using mathematical skills, such as time, weights and temperature • sharing information with other workers, especially during changeover processes
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team

MTMP3037C Eviscerate animal carcass	MTMPSR203A Sharpen knives
MTMP3039C Eviscerate game shot carcass	MTMPSR203A Sharpen knives
MTMP3041C Backdown pig carcass	MTMPSR203A Sharpen knives
MTMP3042C Prepare head for inspection	MTMPSR203A Sharpen knives
MTMP3044B Drop sock and pull shoulder pelt	MTMPSR203A Sharpen knives
MTMP3045B Undertake retain rail	MTMPSR203A Sharpen knives
MTMP3046A Prepare and present offal for inspection	MTMPSR203A Sharpen knives
MTMP3052C Bone small stock carcass - leg	MTMPSR203A Sharpen knives
MTMP3054C Slice and trim leg - small stock	MTMPSR203A Sharpen knives
MTMP3055C Bone large stock carcass - forequarter	MTMPSR203A Sharpen knives
MTMP3056C Bone large stock carcass - hindquarter	MTMPSR203A Sharpen knives
MTMP3057C Slice and trim large stock forequarter	MTMPSR203A Sharpen knives
MTMP3058C Slice and trim large stock hindquarter	MTMPSR203A Sharpen knives
MTMP3059C Break carcass using a bandsaw	MTMPSR203A Sharpen knives
MTMP3061C Operate trunk boning machine	MTMPSR203A Sharpen knives
MTMP3062B Bone small stock carcass - shoulder	MTMPSR203A Sharpen knives
MTMP3063B Bone small stock carcass - middle	MTMPSR203A Sharpen knives
MTMP3064B Slice small stock carcass - shoulder	MTMPSR203A Sharpen knives
MTMP3065B Slice small stock carcass - middle	MTMPSR203A Sharpen knives
MTMP3066B Bone carcass using mechanical aids (large stock)	MTMPSR203A Sharpen knives
MTMP3074B Perform carcass Meat Hygiene Assessment	MTMPSR203A Sharpen knives
MTMG302A Eviscerate, inspect and tag wild game carcass in the field	MTMPSR203A Sharpen knives

MTM30811 Certificate III in Meat Processing (Retail Butcher)

Modification History

Not Applicable

Description

This qualification is the trade qualification for butchers.

Job roles

Job role titles covered by this qualification may include:

- butcher.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate I or II Meat Processing qualification, with credit for relevant completed units
- after completion of a pre-apprenticeship program
- through Recognition of Prior Learning
- by direct entry without prior industry skills or knowledge.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification, with credit for applicable units successfully completed
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General)
- small business management qualifications.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel and customers • reading and interpreting workplace-related documentation, such as customer orders and recipes • writing, such as recording customer orders • using mathematical skills in areas such as time, weights, portion size and tender • sharing information with other workers, for example, customer requests • using negotiation, empathy, persuasion and assertiveness skills to interact with customers
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers or customers from another country • applying own knowledge to assist other members of the work team • identifying and utilising the strengths of other team members, such as specialised product knowledge • providing coaching and mentoring support to new or junior workers
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, for example, suggesting substitutions for unavailable ingredients • showing independence in identifying problems, such as malfunctioning equipment or OH&S issues • solving problems individually or in teams • suggesting a range of solutions to solve problems, for example, recommending alternative products to customers to reduce oversupply • using numeracy skills to solve problems, for example, adjusting temperatures or recommending cooking times

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	<ul style="list-style-type: none"> • testing assumptions, for example, experimenting with new ingredients, or testing new product lines • resolving customer concerns, such as complaints about poor product
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as introduction of new products or equipment • using numeracy skills to solve problems, such as modification of portion sizes • translating ideas into action by demonstrating suggestions • initiating and developing innovative solutions, for example, customer reward programs or product specials
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as customer orders and product specifications • using basic business systems for planning and organising, for example, work instructions, or Standard Operating Procedures • participating in ongoing continuous improvement and planning processes, such as Quality Assurance processes • determining or applying required resources, such as stock requirements • managing time and priorities, such as work times and production schedules • adapting resource allocations to cope with contingencies, for example, adjusting packaging to deal with different sized product or reducing stock orders for short weeks
Self-management	<ul style="list-style-type: none"> • monitoring and evaluating own performance to ensure team and production requirements are met efficiently • taking responsibility for own work output
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers • managing own learning, for example, undertaking self-directed research to identify a new recipe or product • contributing to the learning of others, for example, explaining work processes to new workers
Technology	<ul style="list-style-type: none"> • using technology, such as point of sale technology • demonstrating skill when using workplace technology, such as knives, bandsaws and mincers • applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete a total of forty-three units of competency.

In Stage 1:

- complete all fifteen core units of competency from Group A
- complete one elective unit of competency from group D.

In Stage 2:

- complete all ten core units of competency from Group B
- complete one elective unit of competency from Group E.

In Stage 3:

- complete all thirteen core units of competency from Group C
- complete three elective units of competency from Group F.

Qualification structure

Core Units			
Group A - Stage 1			
MTMCOR201A	Maintain personal equipment	MTMR103C	Store meat product
MTMCOR202A	Apply hygiene and sanitation practices	MTMR104C	Prepare minced meat and minced meat products
MTMCOR204A	Follow safe work policies and procedures	MTMR106C	Provide service to customers
MTMCOR205A	Communicate in the workplace	MTMR203C	Select, weigh and package meat for sale
MTMCOR206A	Overview the meat industry	FDFOP2061A	Use numerical applications in the workplace
MTMPSR203A	Sharpen knives	HLTFA301B	Apply first aid
MTMR101C	Identify species and meat cuts	PRMCL38A	Clean a food handling area
MTMR102C	Trim meat for further processing		
Group B - Stage 2			

MTMCOR203A	Apply Quality Assurance practices	MTMR207B	Use basic methods of meat cookery
MTMPR201C	Prepare and operate bandsaw	MTMR210B	Make and sell sausages
MTMR201C	Break and cut product using a bandsaw	MTMR211B	Produce and sell value-added products
MTMR202C	Provide advice on cooking and storage of meat products	MTMSR201C	Prepare and slice meat cuts
MTMR204C	Package product using manual packing and labelling equipment	MTMSR202C	Trim meat to specifications
Group C - Stage 3			
MTMR301C	Prepare specialised cuts	MTMR308C	Prepare and produce value-added products
MTMR302C	Assess carcase/product quality	MTMR317B	Cure, corn and sell product
MTMR303C	Calculate yield of carcase or product	MTMR318B	Assess and sell poultry product
MTMR304C	Manage stock	MTMR321A	Assess and address customer preferences
MTMR305C	Meet customer needs	MTMR320B	Locate, identify and assess cuts
MTMR306C	Provide advice on nutritional role of meat	MTMSR302C	Prepare primal cuts
MTMR307C	Merchandise products and services		
Elective units			
Group D - Stage 1			
MTMR107C	Process sales transactions	MTMR109B	Monitor meat temperature from receipt to sale
MTMR108B	Undertake minor routine		

maintenance			
Group E - Stage 2			
MTMR208B	Vacuum pack product in a retail operation	MTMSR204C	Despatch meat product
MTMR209B	Undertake routine preventative maintenance	BSBITU101A	Operate a personal computer
MTMR212B	Receive meat product	SIRXFIN001A	Balance point-of-sale terminal
MTMSR203C	Package product using automatic packing and labelling equipment		
Group F - Stage 3			
MTMP3102B	Provide coaching	MTMR316B	Utilise the Meat Standards Australia system for beef to meet customer requirements
MTMP3103B	Provide mentoring	MTMR319B	Break carcasses for retail sale
MTMR309C	Prepare, roll, sew and net meat	MTMR322A	Collect and prepare standard samples
MTMR310C	Bone and fillet poultry	MTMS306B	Identify and repair equipment faults
MTMR311C	Cost and price meat products	MTMSR303A	Smoke product
MTMR312C	Prepare portion control to specifications	SIRXMER002A	Coordinate merchandise presentation
MTMR313C	Bone game meat	SIRXSLS001A	Sell products and services
MTMR314B	Order stock in a meat enterprise	TAEDEL301A	Provide work skill instruction
MTMR315B	Calculate and present statistical data in a meat enterprise		

MTM30911 Certificate III in Meat Processing (Smallgoods - General)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by smallgoods producers working in larger, factory-type smallgoods enterprises. Factories will often have specialised lines of production, (for example, hams and bacons) and use complex production machinery, and may not encompass the range of smallgoods production techniques found in traditional smallgoods enterprises.

This qualification is **not appropriate** for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- smallgoods operator
- slicing and packaging operator
- slicer
- product formulation operator.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry without prior work experience
- after completion of the Certificate I and II in Meat Processing (Smallgoods) qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and carrying out instructions • speaking clearly and directly with other personnel • reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures and workplace memorandums • interpreting customer needs, for example, product specifications • using mathematical skills in areas such as time, weights and temperature
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own knowledge to assist other members of the work team
Problem solving	<ul style="list-style-type: none"> • showing independence and initiative in identifying problems, for example the need to revise and update a work instruction • solving problems, either individually or in teams, for example, reporting malfunctioning equipment to ensure that the problem is appropriately addressed • using numeracy skills to solve problems, for example, adjusting portion sizes and calculating stock requirements
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as introduction of new product or equipment
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as work instructions or Standard Operating Procedures • using basic business systems for planning and organising, for example, customer specifications • taking initiative and making decisions within workplace role, for example, recommending adjustments to schedules to meet production deadlines • managing time and priorities, such as work times and delivery

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	times for customer orders
Self-management	<ul style="list-style-type: none">• monitoring and evaluating own performance to ensure team and production requirements are met efficiently• taking responsibility for own work output
Learning	<ul style="list-style-type: none">• learning in a range of settings, such as through formal training or informally from other workers• learning new skills and techniques to adjust to product or equipment changes
Technology	<ul style="list-style-type: none">• using technology, such as workplace machinery• demonstrating skilled use of workplace technology, for example, packaging equipment• applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete twenty-four units of competency in total.

- complete all five core units of competency
- complete a minimum of two units from Group A
- complete a minimum of seven units from Group B
- complete a minimum of seven units from Group C.

Up to four elective units may be selected from any Certificate II or III qualification in this Training Package, or any other Training Package or accredited course. Units selected must be relevant to smallgoods processing and must not duplicate any unit already contained in the qualification.

Qualification structure

Core units	
MTMCOR202A Apply hygiene and sanitation practices	MTMCOR205A Communicate in the workplace
MTMCOR203A Apply Quality Assurance practices	MTMCOR206A Overview the meat industry
MTMCOR204A Follow safe work policies and procedures	
Elective units	
Group A	
MTMPS201C Clean work area during operations	FDFOF2061A Use numerical applications in the workplace
MTMS101C Handle materials and products	HLTFA301B Apply first aid
MTMS102C Pack smallgoods product	
Group B	
MTMP2054C Inspect hindquarter and remove contamination	MTMS212B Manually link and tie product
MTMP2055C Inspect forequarter and remove contamination	MTMS213B Slice product using simple machinery
MTMP2133C Store carcass product	MTMS214B Rotate stored meat
MTMP2134C Store carton product	MTMS215B Rotate meat product

MTMP2197B	Clean after operations - boning room	MTMS216B	Inspect carton meat
MTMPS203C	Operate scales and semi-automatic labelling machinery	MTMS217A	Prepare dry ingredients
MTMPS205C	Clean chillers	MTMS218B	Measure and calculate routine workplace data
MTMPS206C	Operate a forklift in a specific workplace	MTMSR201C	Prepare and slice meat cuts
MTMPS300A	Assess product in chillers	MTMSR202C	Trim meat to specifications
MTMPSR201C	Vacuum pack product	MTMSR203C	Package product using automatic packing and labelling equipment
MTMPSR203A	Sharpen knives	MTMSR204C	Despatch meat product
MTMS205C	Package product using thermoform process	FDFOF2007A	Work in a freezer storage area
MTMS206C	Package product using gas flushing process	FDFOF2010A	Work with temperature controlled stock
MTMS207C	Operate bar and coder systems	MSL922001A	Record and present data
MTMS208C	Operate metal detection unit	PRMCL38A	Clean a food handling area
MTMS210B	Select/identify and prepare casings	TLID2013A	Move materials mechanically using automated equipment
MTMS211B	Manually shape and form product		
Group C			
MTMP3100B	Use standard product descriptions - beef	MTMS311B	Operate complex slicing and packaging machinery
MTMP3101B	Use standard product descriptions - pork	MTMS312A	Prepare meat-based pates and terrines for commercial sale
MTMP3102B	Provide coaching	MTMS313A	Prepare product formulations

MTMP3103B	Provide mentoring	MTMS314A	Ferment and mature product
MTMPS204C	Maintain production records	MTMS315A	Blend meat product
MTMPSR301C	Cure and corn product	MTMSR301C	Break carcass into primal cuts
MTMS300B	Operate mixer/blender unit	MTMSR302C	Prepare primal cuts
MTMS301B	Cook, steam and cool product	MTMSR303A	Smoke product
MTMS302B	Prepare dried meat	BSBINM302A	Utilise a knowledge management system
MTMS303B	Fill casings	FDFO3002A	Set up a production or packaging line for operation
MTMS304B	Thaw product - water	MSL904001A	Perform standard calibrations
MTMS305B	Thaw product - air	MSL952002A	Handle and transport samples or equipment
MTMS306B	Identify and repair equipment faults	MSL954001A	Obtain representative samples in accordance with sampling plan
MTMS307A	Sort meat	MSL973001A	Perform basic tests
MTMS308A	Batch meat	TAEDEL301A	Provide work skill instruction
MTMS309B	Operate product forming machinery	TLIA2009A	Complete and check import/export documentation
MTMS310B	Operate link and tie machinery		

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMP2054C Inspect hindquarter and remove contamination	MTMPSR203A Sharpen knives
MTMP2055C Inspect forequarter and remove contamination	MTMPSR203A Sharpen knives
MTMSR201C Prepare and slice meat cuts	MTMPSR203A Sharpen knives
MTMSR202C Trim meat to specifications	MTMPSR203A Sharpen knives
MTMS212C Manually link and tie product	MTMPSR203A Sharpen knives
MTMSR301C Break carcass into primal cuts	MTMPSR203A Sharpen knives
MTMSR302C Prepare primal cuts	MTMPSR203A Sharpen knives

MTM31011 Certificate III in Meat Processing (Smallgoods - Manufacture)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by smallgoods producers working in a small to medium-sized traditional smallgoods enterprise which produces a range of smallgoods products.

It is **not appropriate** for use as a pre-vocational qualification or for inclusion as a VET in Schools program.

Job roles

Job role titles covered by this qualification may include:

- smallgoods producer
- smallgoods maker.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of the Certificate I and II in Meat Processing (Smallgoods) qualifications
- by direct entry without prior smallgoods skills or knowledge
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Certificate III in Meat Processing qualification with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM40111 Certificate IV in Meat Processing (Leadership)
- MTM40311 Certificate IV in Meat Processing (Quality Assurance)
- MTM40411 Certificate IV in Meat Processing (General).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

MTM40111 Certificate IV in Meat Processing (Leadership)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by experienced meat workers who are carrying out supervisory roles.

Job roles

Job role titles covered by this qualification may include:

- meat processing supervisor
- meat processing team leader
- smallgoods supervisor
- boning room supervisor
- meat department supervisor
- meat processing assessor.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after successful completion of any Certificate II or III Meat Processing qualification
- by direct entry with industry experience but without prior qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- approved Skill Sets to gain expertise in specific skilled job roles
- any other Meat Processing qualification at level IV, with credit for applicable units successfully completed
- MTM50111 Diploma of Meat Processing
- MTM50211 Diploma of Meat Processing (Meat Retailing).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and interpreting worker issues or management concerns • speaking clearly and directly with other personnel, such as workers, management and customers • reading and interpreting workplace documentation such as work instructions, Standard Operating Procedures, Australian Standards and food safety regulations • preparing written documentation, such as reports • using mathematical skills in areas such as time and temperature • sharing information with co-workers, managers, customers and regulatory authorities • applying negotiation, persuasion and assertiveness skills when carrying out supervisory duties • showing empathy with worker and customer issues when appropriate
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own technical knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as when addressing food safety issues • identifying and utilising the strengths of other team members, such as specialised technical knowledge • providing coaching and mentoring support to new workers
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, such as rostering issues • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction • working with a team to resolve a problem, for example, a

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<p>production issue</p> <ul style="list-style-type: none"> • using numeracy skills, such as graphing and charting, to resolve problems • resolving concerns raised by external groups, such as customers or regulatory authorities
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to customer specifications or introduction of new equipment • translating ideas into action, for example, revising a work instruction or Standard Operating Procedure • identifying opportunities that might not be obvious to others, for example, a change of supplier to achieve cost savings or a change in process to achieve better productivity
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as HACCP reports • using basic business processes for planning and organising, for example, production schedules • taking initiative and making decisions within workplace role, for example, setting production levels • managing time and priorities, such as meeting report deadlines and timely implementation of corrective actions • determining, applying and allocating resources, such as budget, product and personnel • adapting resource allocations to cope with contingencies, for example, shortage of stock or staff
Self-management	<ul style="list-style-type: none"> • having and articulating own ideas and vision, for example, when contributing to company business planning processes • monitoring and evaluating own performance to ensure company production requirements are met efficiently • taking responsibility for work output within area of responsibility
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed work instructions, new equipment and processes • learning in a range of settings, such as through formal training or informally from other workers • learning new skills and techniques to adjust to production or equipment changes • managing own learning to ensure currency, for example, by attending technical workshops or through internet research • contributing to the learning of others through support of professional development or informal processes • applying a range of learning approaches appropriate to individual and situational requirements

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**Technology**

- using technology, such as workplace machinery, computers and testing equipment
- demonstrating skilled use of workplace technology
- applying OH&S requirements when using technology
- adapting to new technology requirements, such as new software or machinery
- applying technology as a management tool, for example, running production reports

Packaging Rules

Packaging Rules

Complete eighteen units of competency in total.

- complete all ten core units of competency
- complete eight elective units of competency.

A maximum of three units can be selected from other Certificate IV or Diploma qualifications in this Training Package, or from another Training Package or accredited course. Units selected must be relevant to meat processing job roles and must not duplicate units already contained within the qualification.

Qualification structure

Core units	
Level II core	
MTMCOR201A Maintain personal equipment	MTMCOR204A Follow safe work policies and procedures
MTMCOR202A Apply hygiene and sanitation practices	MTMCOR205A Communicate in the workplace
MTMCOR203A Apply Quality Assurance practices	MTMCOR206A Overview the meat industry
Level IV core	
MTMCOR401C Manage own work performance	MTMCOR403A Participate in OH&S risk control process
MTMCOR402C Facilitate Quality Assurance process	MTMCOR404A Facilitate hygiene and sanitation performance
Elective units	
MTMP407B Supervise new recruits	BSBINM401A Implement workplace information system
MTMPS414B Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	BSBINN301A Promote innovation in a team environment
MTMPSR401C Coordinate contracts	BSBLED401A Develop teams and individuals
MTMPSR402C Prepare and evaluate resource proposals	BSBMGT402A Implement operational plan
MTMPSR403C Facilitate achievement of enterprise environmental policies	BSBMGT403A Implement continuous

	and goals		improvement
MTMPSR404C	Foster a learning culture in a meat enterprise	BSBWOR402A	Promote team effectiveness
MTMPSR405C	Build productive and effective workplace relationships	SIRXFIN004A	Manage financial resources
MTMPSR406C	Manage and maintain a food safety plan	SIRXINV004A	Buy merchandise
MTMPSR411A	Lead communication in the workplace	SIRXINV005A	Control inventory
MTMPSR412A	Participate in product recall	TAEASS401A	Plan assessment activities and processes
BSBCUS402A	Address customer needs	TAEASS402A	Assess competence

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMCOR401C Manage own work performance	MTMCOR205A Communicate in the workplace
MTMCOR403A Participate in OH&S risk control process	MTMCOR204A Follow safe work policies and procedures
MTMCOR402C Facilitate Quality Assurance process	MTMCOR203A Apply Quality Assurance practices
MTMCOR404A Facilitate hygiene and sanitation performance	MTMCOR202A Apply hygiene and sanitation practices
MTMPS414B Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	MTMCOR202A Apply hygiene and sanitation practices MTMCOR403A Participate in OH&S risk control process

MTM40211 Certificate IV in Meat Processing (Meat Safety)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by meat inspectors in meat processing enterprises, usually at export processing plants. At the time of endorsement of this Training Package legislation and regulatory requirements relating to meat inspection were undergoing considerable change at both state/territory and federal level. People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Quarantine Inspection Service (AQIS), as appropriate.

Job roles

Job role titles covered by this qualification may include:

- meat inspector.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after successful completion of MTM30307 or MTM30311 Certificate III in Meat Processing (Meat Safety)
- by direct entry without prior meat processing skills or knowledge
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Meat Processing qualification at Level IV, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM50111 Diploma of Meat Processing
- MTM5211 Diploma of Meat Processing (Meat Retailing).
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Depending on the jurisdiction, Meat Inspectors must be registered with the relevant controlling authority (e.g. PrimeSafe (Victoria) or AQIS for export plants)

Entry Requirements

Not Applicable

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and interpreting worker issues or management concerns • speaking clearly and directly with other personnel, such as workers, management and customers • reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures, Australian Standards and AQIS directives • preparing written documentation, such as reports • using mathematical skills, such as graphing, calculation and prediction • sharing information with managers and regulatory authorities • applying negotiation, persuasion and assertiveness skills when addressing food safety issues
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own food safety knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as when addressing food safety issues
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, such as food safety issues • showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction or implement corrective action • using numeracy skills, such as calculation, prediction and graphing, to resolve problems • resolving concerns raised by external groups, such as customers or regulatory authorities
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to processes or introduction of new equipment • translating ideas into action, for example contributing to the revision of a work instruction or Standard Operating Procedure

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	<ul style="list-style-type: none"> generating a range of options in response to workplace issues, for example, suggesting a range of alternatives for addressing food safety issues
Planning and organising	<ul style="list-style-type: none"> collecting, analysing and organising information, such as HACCP reports and testing results using basic business processes for planning and organising, for example, preparation of on-plant audits taking initiative and making decisions within workplace role for determining corrective actions managing time and priorities, such as meeting report deadlines and completing audit processes
Self-management	<ul style="list-style-type: none"> monitoring and evaluating own performance to ensure meat safety requirements are met efficiently taking responsibility for own work output
Learning	<ul style="list-style-type: none"> being receptive to learning new ideas and techniques, such as changed legislation or food safety standards learning in a range of settings, such as through formal training or informally from other workers learning new skills and techniques, for example, Refrigeration Index managing own learning to ensure currency, for example, by attending technical workshops or through internet research
Technology	<ul style="list-style-type: none"> using technology ,such as workplace machinery, computers and testing equipment demonstrating skilled use of workplace technology applying OH&S requirements when using technology

Packaging Rules

Packaging Rules

Complete twenty-eight units of competency in total.

- complete all sixteen core units of competency
- complete a minimum of three units from Group A
- complete a minimum of five units from Group B.

Qualification structure

Core units	
MTMCOR201 Maintain personal equipment A	MTMCOR403A Participate in OH&S risk control process

MTMCOR202 A	Apply hygiene and sanitation practices	MTMCOR404A	Facilitate hygiene and sanitation performance
MTMCOR203 A	Apply Quality Assurance practices	MTMP3003A	Handle animals humanely while conducting ante-mortem inspection
MTMCOR204 A	Follow safe work policies and procedures	MTMP3071C	Perform ante-mortem inspection and make disposition
MTMCOR205 A	Communicate in the workplace	MTMP3072C	Perform post-mortem inspection and make disposition
MTMCOR206 A	Overview the meat industry	MTMP3073B	Implement food safety program
MTMCOR401 C	Manage own work performance	MTMP408A	Inspect transportation container/vehicle
MTMCOR402 C	Facilitate Quality Assurance process	MTMPSR203A	Sharpen knives
Elective units			
Group A			
MTMP3042C	Prepare head for inspection	MTMP3077B	Perform offal Meat Hygiene Assessment
MTMP3046A	Prepare and present viscera for inspection	BSBFLM312C	Contribute to team effectiveness
MTMP3074B	Perform carcass Meat Hygiene Assessment	MSL904001A	Perform standard calibrations
MTMP3075B	Perform process monitoring for Meat Hygiene Assessment	MSL922001A	Record and present data
MTMP3076B	Perform boning room Meat Hygiene Assessment	MSL954001A	Obtain representative samples in accordance with sampling plan
Group B			
MTMP401B	Utilise refrigeration index	MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)
MTMP402B	Implement a Meat Hygiene Assessment program	MTMPS415A	Conduct an internal audit of a documented program

MTMP403B	Oversee plant compliance with the Australian Standards for meat processing	MTMPS418A	Oversee export requirements
MTMP409A	Maintain abattoir design and construction standards	MTMPSR405C	Build productive and effective workplace relationships
MTMP410A	Oversee humane handling of animals	MTMPSR413A	Participate in ongoing development and implementation of a HACCP and Quality Assurance system
MTMP411A	Inspect game meat	MTMPSR414A	Establish sampling program
MTMP412A	Inspect poultry	FDFAU4001A	Assess compliance with food safety programs
MTMP413A	Inspect ratites	FDFAU4003A	Conduct food safety audits
MTMPS411C	Monitor meat preservation process	FDFAU4002A	Communicate and negotiate to conduct food safety audits
MTMPS412C	Monitor and overview the production of processed meats and smallgoods	PSPREG412A	Gather and manage evidence

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMCOR401C Manage own work performance	MTMCOR205A Communicate in the workplace
MTMCOR403A Participate in OH&S risk control process	MTMCOR204A Follow safe work policies and procedures
MTMCOR402C Facilitate Quality Assurance process	MTMCOR203A Apply Quality Assurance practices
MTMCOR404A Facilitate hygiene and sanitation performance	MTMCOR202A Apply hygiene and sanitation practices
MTMP3071C Perform ante-mortem inspection and make disposition	MTMP3003A Handle animals humanely while conducting ante-mortem inspection
MTMP3072C Perform post-mortem inspection and make disposition	MTMPSR203A Sharpen knives
MTMP3042C Prepare head for inspection	MTMPSR203A Sharpen knives
MTMP3046B Prepare and present offal for inspection	MTMPSR203A Sharpen knives
MTMP3074B Perform carcass Meat Hygiene Assessment	MTMPSR203A Sharpen knives
MTMPS4148B Monitor and overview the production of Uncooked Comminuted Fermented Meat (UFCM)	MTMCOR202A Apply hygiene and sanitation practices MTMCOR403A Participate in OH&S risk control process

MTM40311 Certificate IV in Meat Processing (Quality Assurance)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by Quality Assurance officers in abattoirs and smallgoods production enterprises.

Job roles

Job role titles covered by this qualification may include:

- Quality Assurance officer
- Quality Assurance supervisor
- Quality Assurance auditor
- Quality Assurance manager
- compliance manager.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- after completion of a Certificate II or III in Meat Processing
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Entry requirements

The following units must be completed prior to commencing this qualification:

- MTMCOR201A Maintain personal equipment
- MTMCOR204A Follow safe work policies and procedures
- MTMCOR202A Apply hygiene and sanitation practices
- MTMCOR205A Communicate in the workplace
- MTMCOR203A Apply Quality Assurance practices
- MTMCOR206A Overview the meat industry.

In addition, the trainee must have completed a minimum of twelve months relevant employment in a meat processing plant, or hold an appropriate qualification which provides background understanding of a Quality Assurance system.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Meat Processing qualification at Level IV, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles, for example, the Meat Industry Microbiological Skill Set
- TAE40110 Certificate IV in Training and Assessment
- MTM50111 Diploma of Meat Processing
- MTM50211 Diploma of Meat Processing (Meat Retailing).
-

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and interpreting worker issues or management concerns • speaking clearly and directly with other personnel, such as workers or management, and customers • reading and interpreting workplace documentation, such as work instructions, Standard Operating Procedures, Australian Standards and AQIS directives • preparing written documentation, such as reports • using mathematical skills in areas such as graphing, calculation and prediction • sharing information with managers and regulatory authorities • applying negotiation, persuasion and assertiveness skills when addressing Quality Assurance issues
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with workers from another country • applying own Quality Assurance knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as when addressing food safety issues • identifying and utilising the strengths of other team members,

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<ul style="list-style-type: none"> such as specialised technical knowledge providing coaching and mentoring support to new workers
Problem solving	<ul style="list-style-type: none"> developing practical and creative solutions to workplace problems, such as food safety issues showing independence and initiative in identifying problems, for example, the need to revise and update a work instruction or implement corrective action using numeracy skills, such as prediction, calculation and graphing, to resolve problems resolving concerns raised by external groups, such as customers or regulatory authorities translating ideas into action by demonstrating suggestions initiating and developing innovative solutions, for example, alternative storage arrangements
Initiative and enterprise	<ul style="list-style-type: none"> adapting to new situations, such as changes to products or introduction of new equipment translating ideas into action, for example, contributing to the revision of a work instruction or Standard Operating Procedure generating a range of options in response to workplace issues, for example, suggesting a range of alternatives for addressing a corrective action
Planning and organising	<ul style="list-style-type: none"> collecting, analysing and organising information, such as HACCP reports and testing results using basic business processes for planning and organising, for example, preparation of on-plant audits taking initiative and making decisions within workplace role for determining corrective actions participating in continuous improvement and planning processes determining or applying required resources, for example, establishing an audit schedule managing time and priorities such as meeting report deadlines and completing audit processes adapting resource allocations to cope with contingences, for example, staff shortages
Self-management	<ul style="list-style-type: none"> monitoring and evaluating own performance to ensure meat safety requirements are met taking responsibility for own work output
Learning	<ul style="list-style-type: none"> being receptive to learning new ideas and techniques, such as changed legislation or food safety standards learning in a range of settings, such as through formal training or informally from other workers

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<ul style="list-style-type: none"> • learning new skills and techniques, for example, Refrigeration Index • managing own learning to ensure currency, for example, by attending technical workshops or through internet research • contributing to the learning of others through support of professional development or informal processes • applying a range of learning approaches appropriate to individual and situational requirements
Technology	<ul style="list-style-type: none"> • using technology, such as workplace machinery, computers and testing equipment • demonstrating skilled use of workplace technology • applying OH&S requirements when using technology • applying technology as a management tool, for example, running production reports

Packaging Rules**Packaging Rules**

Complete twelve units of competency in total

- complete all six core units of competency
- complete six elective units of competency.

Up to two units may be substituted with units selected from another Certificate IV qualification in this Training Package, or another Training Package or accredited course. The selected units must be relevant to the nominated meat processing job and must not duplicate units already contained in the qualification.

Qualification structure

Core units	
MTMCOR401C Manage own work performance	MTMCOR404A Facilitate hygiene and sanitation performance
MTMCOR402C Facilitate Quality Assurance process	MTMPS415A Conduct an internal audit of a documented program
MTMCOR403A Participate in OH&S risk control process	MTMPSR413A Participate in ongoing development and implementation of a HACCP and Quality Assurance system

Elective units			
MTMP401B	Utilise refrigeration index	MTMPSR408A	Specify beef product using AUS-MEAT language
MTMP402B	Implement a Meat Hygiene Assessment program	MTMPSR409A	Specify sheep product using AUS-MEAT language
MTMP403B	Oversee plant compliance with the Australian Standards for meat processing	MTMPSR410A	Specify pork product using AUS-MEAT language
MTMP404B	Apply meat science	MTMPSR412A	Participate in product recall
MTMP405A	Conduct and validate pH/temperature declines to Meat Standards Australia standards	FDFAU4001A	Assess compliance with food safety programs
MTMP406A	Develop and implement Quality Assurance program for a rendering plant	FDFAU4002A	Communicate and negotiate to conduct food safety audits
MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat	FDFAU4003A	Conduct food safety audits
MTMPS416A	Conduct statistical analysis of process	FDFAU4004A	Identify, evaluate and control food safety hazards
MTMPS417B	Manage/oversee an external audit of the establishment's quality system		

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMCOR401C Manage own work performance	MTMCOR205A Communicate in the workplace
MTMCOR403A Participate in OH&S risk control process	MTMCOR204A Follow safe work policies and procedures
MTMCOR402C Facilitate Quality Assurance process	MTMCOR203A Apply Quality Assurance practices

MTM40411 Certificate IV in Meat Processing (General)

Modification History

Not Applicable

Description

This qualification covers work activities undertaken by workers at supervisory or post-trade level in the meat industry. It is designed to enable candidates to select a mix of technical and leadership units to suit their job roles and career requirements. This qualification is also designed to enable candidates to gain cross-sectoral experience in the meat industry.

Job roles

Job role titles covered by this qualification may include:

- meat retailing supervisor
- smallgoods production supervisor
- meat processing production supervisor
- responsible UCFM officer
- meat processing assessor
- lairage supervisor
- rendering supervisor.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- by direct entry with industry experience but without formal qualifications
- after completion of a trade qualification
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- any other Meat Processing qualification at level IV, with credit for applicable units successfully completed
- approved Skill Sets to gain expertise in specific skilled job roles
- MTM50111 Diploma of Meat Processing
- MTM50211 Diploma of Meat Processing (Meat Retailing)
- TAE40110 Certificate IV in Training and Assessment.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

People working as industry assessors must address Australian Quality Training Framework (AQTF) requirements.

Entry Requirements

MTM50111 Diploma of Meat Processing

Modification History

Not Applicable

Description

The qualification is for people who are in a management position or who have the potential to move into these positions. People who enter this qualification will usually have substantial experience in a meat industry sector, and will be seeking to improve their business expertise and experience.

People who are considering undertaking this qualification need to be aware that it requires extensive reading, writing of assignments and project work. Previous study at a minimum of Certificate IV level is good preparation for Diploma level study.

The Diploma qualification is designed for people who are already employed in the industry and who have the opportunity to draw upon workplace experiences and to carry out assignments and projects in the workplace.

Job roles

Job role titles covered by this qualification may include:

- production manager
- maintenance manager
- Quality Assurance manager
- foreperson
- shift manager
- departmental manager
- regulator
- senior supervisor.

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- completion of a Certificate III or IV in Meat Processing
- completion of a trade qualification
- completion of a Bachelor degree
- by direct entry with industry experience but without formal qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM60111 Advanced Diploma of Meat Processing
- any other Diploma or Advanced Diploma qualification in a related industry area
- a Bachelor degree.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

The following table contains a summary of the Employability Skills required by the meat industry for this qualification. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Due to the high proportion of electives required by this qualification, the industry/enterprise requirements described for each Employability Skill are representative of the meat industry in general and may not reflect specific job roles. Learning and assessment strategies for this qualification should be based on the requirements of the units of competency for this qualification.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • listening and interpreting worker issues, management or customer concerns • speaking clearly and directly with other personnel, such as workers, management and customers • reading and interpreting workplace documentation, such as industry research outcomes, contracts, legislation and regulations • preparing written documentation, such as reports, market estimates and business proposals • using mathematical skills for purposes, such as budgeting and production estimates • sharing information with co-workers, managers, customers and regulatory authorities • applying negotiation, persuasion and assertiveness skills when working with staff, customers and suppliers, during planning and addressing enterprise issues
Teamwork	<ul style="list-style-type: none"> • working effectively as an individual as well as in a work team • working effectively with colleagues from diverse backgrounds • applying own technical and managerial knowledge to assist other members of the work team • using teamwork skills in a range of situations, such as when addressing industrial issues • identifying and utilising the strengths of other team members, such as specialised technical knowledge • providing coaching and mentoring support to colleagues
Problem solving	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems, such as production issues • showing independence and initiative in identifying problems, for example, identifying the establishment of a new competitor

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<ul style="list-style-type: none"> • working with a team to resolve a problem, for example, a biotechnology issue • testing assumptions and taking context into account, for example, testing the impact of a supply problem on capacity to meet customer commitments • using numeracy skills, such as calculation, estimation, and budget forecasting, to resolve problems • listening and resolving concerns in relation to workplace issues, for example, outcomes of a customer audit
Initiative and enterprise	<ul style="list-style-type: none"> • adapting to new situations, such as changes to customer specifications or introduction of new equipment • translating ideas into action, for example, revising a work instruction or Standard Operating Procedure • being creative and innovative in identifying opportunities and creating solutions, for example, seeking funding support for a proposal or assessing the viability of new technology • identifying opportunities that might not be obvious to others, for example, a change of supplier to achieve cost savings • developing a strategic, creative, long-term vision through research of the economic and political environment impacting the industry
Planning and organising	<ul style="list-style-type: none"> • collecting, analysing and organising information, such as peak body strategic plans, market forecasts and technical publications • using business processes for planning and organising, or developing business plans • taking initiative and making decisions within workplace role, for example, setting production levels • participating in continuous improvements processes, such as the enterprise Quality Assurance system • determining and applying resources, such as financial, human and physical resources • managing time and priorities, such as meeting customer deadlines • adjusting resource allocation to cope with contingencies, for example, loss of a customer contract or production delays
Self-management	<ul style="list-style-type: none"> • having and articulating own ideas and vision, for example, when contributing to company business planning processes • monitoring and evaluating own performance to ensure company requirements are addressed • taking responsibility for work outcomes of self and others within area of responsibility
Learning	<ul style="list-style-type: none"> • being receptive to learning new ideas and techniques, such as changed legislation, food safety measures or product

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

	<p>specifications</p> <ul style="list-style-type: none"> • learning in a range of settings such as through formal training or informally from other workers or self-directed research • learning new skills and techniques to adjust to management or enterprise changes • managing own learning to ensure currency, for example, by attending technical workshops or through internet research • applying a range of learning approaches appropriate to individual and situational requirements • contributing to the learning of others through support of professional development and informal learning processes
Technology	<ul style="list-style-type: none"> • using technology, such as computers, software packages and testing equipment • demonstrating skilled use of workplace technology • applying OH&S requirements when using technology • adapting to new technology requirements, such as new software • applying technology as a management tool, for example, running production reports or using spreadsheets

Packaging Rules**Packaging Rules**

Complete ten units of competency in total.

- Complete all four core units of competency
- Complete six elective units of competency.

Two of the elective units can be selected from a relevant Diploma or Advanced Diploma from this Training Package or any other Training Package or accredited course. Selected units must be relevant to meat industry and must not duplicate units already contained within the qualification.

Qualification structure

Core units	
MTMCOR401C Manage own work performance	MTMCOR403A Participate in OH&S risk control process
MTMCOR402C Facilitate Quality Assurance process	MTMCOR404A Facilitate hygiene and sanitation performance
Elective units	

MTMPS5603C	Develop, manage and maintain quality systems	MTMPS5610C	Manage transportation of meat, meat products and meat by-products
MTMPS5604C	Manage maintenance systems	MTMPSR5601C	Design and manage the food safety system
MTMPS5605C	Manage utilities and energy	MTMPSR5604C	Manage new product/process development
MTMPS5607C	Manage and improve meat industry plant operations	BSBFIM501A	Manage budgets and financial plans
MTMPS5608C	Manage environmental impacts of meat processing operations	BSBMGT605B	Provide leadership across the organisation
MTMPS5609C	Manage, maintain and continuously improve OH&S plans and systems	MSL916005A	Manage complex projects

Units with prerequisite units

Units with prerequisite units

The following units from this qualification contain prerequisite units.

Unit	Prerequisite
MTMCOR401C Manage own work performance	MTMCOR205A Communicate in the workplace
MTMCOR403A Participate in OH&S risk control process	MTMCOR204A Follow safe work policies and procedures
MTMCOR402C Facilitate Quality Assurance process	MTMCOR203A Apply Quality Assurance practices
MTMCOR404A Facilitate hygiene and sanitation performance	MTMCOR202A Apply hygiene and sanitation practices

MTM50211 Diploma of Meat Processing (Meat Retailing)

Modification History

Not Applicable

Description

The qualification is for people who are in a management position or who have the potential to move into these positions. People who enter this qualification will usually have substantial experience in a meat retailing sector, and will be seeking to improve their business expertise and experience.

People who are considering undertaking this qualification need to be aware that it requires extensive reading, writing of assignments and project work. Previous study at a minimum of Certificate IV level is good preparation for Diploma level study.

The Diploma qualification is designed for people who are already employed in the industry and who have the opportunity to draw upon workplace experiences and to carry out assignments and projects in the workplace.

The four core units should not be offered separately when undertaking this qualification. They should be undertaken as embedded units. The four core units also contain prerequisite units from level II.

Job roles

Job role titles covered by this qualification may include:

- meat retailing chain manager
- supermarket meat department manager.
-

Pathways Information

Pathways into the qualification

Pathways into the qualification may be:

- completion of a Certificate III or IV in Meat Processing
- completion of a trade qualification
- completion of a Bachelor degree
- by direct entry with industry experience but without formal qualifications
- through Recognition of Prior Learning.

This qualification is suited to Australian Apprenticeship pathways.

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- MTM60111 Advanced Diploma of Meat Processing
- any other Diploma or Advanced Diploma qualification in a related industry area
- a Bachelor degree.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

MTMPSR606A	Assess and purchase livestock		

MTM70111 Vocational Graduate Certificate in Agribusiness

Modification History

Not Applicable

Description

This qualification provides a general vocational outcome in agribusiness. It reflects the role of individuals who apply substantial specialised knowledge and skills to the managerial role in an organisation or business area. In these roles they make significant high-level independent judgements in major planning, research, design, operational, compliance and management functions within highly varied or specialised agribusiness contexts.

The agrifood industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

Job roles

Occupational titles may include:

- senior manager
- export/marketing manager
- research and development manager
- processing systems manager
- compliance and systems manager.
-

Pathways Information

Pathways into the qualification

Candidates may enter the qualification through a number of entry points which demonstrate their potential to undertake study at graduate level, including:

- an Advanced Diploma or Diploma qualification relevant to an agrifood industry
- relevant extensive vocational experience in middle management in an agrifood industry at a skill level commensurate with the AQF level VI attributes and criteria
- higher education qualification (e.g. Bachelor Degree), with relevant vocational experience in an agrifood industry.

This qualification is suited to Australian Apprenticeship pathways

Pathways from the qualification

After achieving this qualification, candidates may undertake:

- a Graduate Diploma of Agribusiness
- a post-graduate qualification.
-

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations

Units of competency in this qualification do not require a licence or certification.

Entry Requirements

Complete eight elective units made up of:

- three units from Group A (business leadership stream level VII)

- one unit from either Group A, not previously selected, or Group B (technical stream level VII), or from a relevant Vocational Graduate Certificate from this Training Package or any other Training Package or accredited course (the selected unit must not duplicate units already contained within the qualification)
- three units from Group C (business leadership stream level VIII)
- one unit from Group D (technical stream level VIII) or from any other group, or from a relevant Vocational Graduate Diploma from this Training Package or any other Training Package or accredited course (the selected unit must not duplicate units already contained within the qualification).

Qualification structure

Group A Elective Units: Business leadership stream (level VII)	
MTMBUS701A Manage financial performance	BSBDES701A Research and apply design theory
MTMBUS702A Provide strategic leadership	MSACMG701A Prepare for and implement change
MTMBUS703A Communicate and negotiate in a culturally diverse context	MSACMG706A Build relationships between teams in a manufacturing environment
MTMBUS704A Develop and enhance collaborative partnerships and relationships	NWP704A Lead a project development
Group B Elective Units: Technical stream (level VII)	
MTMBUS705A Develop and manage international business operations	MTMPSR606A Assess and purchase livestock
MTMBUS706A Commercialise research and technology product/idea	NWP706A Review and evaluate water and wastewater sustainability objectives
BSBCOM601B Research compliance requirements and issues	NWP707A Analyse and review water treatment plant technology
Group C Elective Units: Business leadership stream (level VIII)	
MTMBUS803A Analyse data for business decision making	BSBRES801A Initiate and lead applied research
BSBINN801A Lead innovative thinking and practice	MSACMG803A Develop models of future state manufacturing practice
Group D Elective Units: Technical stream (level VIII)	

MTMBUS801A Manage change to organisational electronic technology systems	MTMBUS802A Undertake research project

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Forecast future financial resource needs</p>	<p>1.1. The capacity of existing financial <i>systems</i> is established and assessed.</p> <p>1.2. <i>Financial data</i> and business system requirements are forecasted.</p> <p>1.3. Forecasted requirements are analysed.</p> <p>1.4. Budget forecasts are prepared and planned according to organisational and <i>statutory requirements</i>.</p> <p>1.5. Recommendations for budget expenditure or for modification of existing projections are prepared and presented.</p>
<p>2. Analyse current asset performance and capacity</p>	<p>2.1. The costs of, and returns from, assets and liabilities are analysed using <i>standard accounting reports</i> identifying the extent of the debt and equity financing.</p> <p>2.2. <i>Management responsibilities</i> and <i>legal requirements</i> for reporting are identified in consultation with relevant organisational staff.</p> <p>2.3. Financial reports and <i>key information</i> are analysed and interpreted.</p> <p>2.4. The effects of financial decisions on the ability of the organisation to meet planned outcomes in relation to a <i>specific activity</i> or <i>specified timeframe</i> are analysed and evaluated.</p>
<p>3. Set business targets and compliance mechanisms</p>	<p>3.1. <i>Comparative and trend information</i> is collected and needs for future budget and associated resources confirmed.</p> <p>3.2. Consultation on relevant short-term and long-term needs is completed.</p> <p>3.3. Resources are allocated against the budget to maximise organisation's performance.</p> <p>3.4. Accurate and up-to-date records of resource allocation and usage are maintained according to <i>organisational requirements</i>.</p> <p>3.5. Management systems which enable timely collection, management and processing of information are developed and reviewed.</p> <p>3.6. Records of budget performance and expenditure are completed and accurately reported according to organisational procedures and statutory requirements.</p> <p>3.7. Budget audit mechanisms and compliance requirements are evaluated and improved, as</p>

ELEMENT	PERFORMANCE CRITERIA
	required.
4. Manage financial risk	4.1. Financial <i>risk</i> factors are identified and analysed. 4.2. Financial risks are documented and managed according to organisational policies and procedures. 4.3. Procedures are implemented to review financial <i>risk management</i> activities regularly.
5. Monitor compliance with financial projections	5.1. Deviations from budgets that generate an adverse affect on budget objectives are identified. 5.2. Action plans to remedy significant deviations from budget objectives and projections are promptly developed. 5.3. <i>Financial documentation</i> is monitored and reviewed against organisational objectives. 5.4. Budget priorities are revised and renewed to meet operational contingencies and risk management. 5.5. Costs to targets set in the budget are managed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and analyse potential risks of any type
- identify financial information and to follow relevant accounting procedures
- apply decision making skills
- use interpersonal skills to:
 - maintain appropriate relationships with colleagues
 - establish trust
 - value and be open to, the opinions of others
 - work as part of a team
 - listening actively
- negotiate effectively
- timetable and schedule reports and lodgements
- use problem-solving, initiative and enterprise skills to prepare budgets and to

REQUIRED SKILLS AND KNOWLEDGE

- monitor their implementation
- use research skills to identify asset management valuations
- apply applicable professional standards
- manage risk

Required knowledge

Knowledge of:

- accounting, financial statements and cash flow
- communication processes and methods
- compliance requirements
- cost of capital, capital structure and working capital
- finance and investment decisions
- goal of financial resource management
- legislation, codes and by-laws relevant to the organisation's operations
- principles of finance management
- relevant legislation
- risk and return

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparing a financial resource plan/budget • monitoring and managing financial resources over a full planning cycle • effectively communicating financial reports and operational execution • making adjustments to changing circumstances and responding to unusual situations • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to workplace contractual and procurement documentation • competence is consistently demonstrated over time, and over a range and variety of situations • access to appropriate documentation and resources normally used in the workplace • access to an appropriate operating environment.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • completion of applied projects or learning activities, such as budget preparation, analysis and reporting, preparation of financial forecasts, and review and analysis of costs • direct observation of contextual application of skills • oral or written questioning to assess knowledge of risk and return • review of documentation displaying compliance with professional and regulatory standards for financial management.
Guidance information for	Holistic assessment with other units relevant to the

EVIDENCE GUIDE

assessment	industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.
-------------------	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Systems</i> are defined as:	<ul style="list-style-type: none"> • a detailed description/depiction of how organisations relate to their environments and how they process information through strategic and tactical management to develop actual operating procedures • electronic financial management systems used by the organisation.
<i>Financial data</i> may include:	<ul style="list-style-type: none"> • Australian Bureau of Statistics (ABS) economic data • balance sheet • benchmarks or trend analysis • budget variances • budgets and forecasts • cash flow/profit reports • financial/operational statements and reports (e.g. expenditures and receipts, and profit and loss statements) • financial markets monitoring services (e.g. Reuters) • income statements • market valuations.
<i>Statutory requirements</i> may include:	<ul style="list-style-type: none"> • delegated authorities • internal control procedures • reporting periods • taxation payment timings.

RANGE STATEMENT	
<i>Standard accounting reports</i> may include:	<ul style="list-style-type: none"> • deprival asset valuations • direct and indirect allocation • discounted cash flows • impact statements • internal rate of return • net present value • pay back break even periods • pro-rata and percentage apportionment • rates of return.
<i>Management responsibilities</i> may include:	<ul style="list-style-type: none"> • organisational policies, procedures, guidelines, ethical and/or professional standards.
<i>Legal requirements</i> may include:	<ul style="list-style-type: none"> • private sector requirements, such as: <ul style="list-style-type: none"> • Australian Accounting Standards (SAC 1, 2, Framework AASB1001) • Corporations Act 2001 • GST and income tax reporting • public sector requirements, such as: <ul style="list-style-type: none"> • Financial Administration and Audit Act 1977 • Financial Management Standard 1997.
<i>Key information</i> may include:	<ul style="list-style-type: none"> • gross profit • net profit • return on investment • for public or not-for-profit organisations: <ul style="list-style-type: none"> • best use of resources • surplus/deficit against budget • value for money.
<i>A specific activity</i> might include:	<ul style="list-style-type: none"> • significant project (e.g. new product line) • introduction of new technology • partnership arrangement with another organisation • introduction of a new customer.
<i>A specified time frame</i> may:	<ul style="list-style-type: none"> • be long enough to be able to undertake a meaningful impact evaluation of an activity (e.g. over a period of several months or a full planning cycle) • cover the lifetime of a specific project.
<i>Comparative and trend information</i> includes:	<ul style="list-style-type: none"> • benchmarks as agreed • business activity

RANGE STATEMENT	
	<ul style="list-style-type: none"> • brand value • expenses • leverage • liquidity • profitability • return on equity • sales • wages.
Organisational requirements may include:	<ul style="list-style-type: none"> • financial analysis assessments • financial management manuals • legal and organisational policies, guidelines and requirements • Occupational Health and Safety (OH&S) policies, procedures and programs • price and exchange parameters • quality assurance and/or procedures manuals • recording and filing systems • reporting requirements • standard financial analysis techniques.
Risks may include:	<ul style="list-style-type: none"> • damage to property/equipment • environmental • equipment/system failures • financial/economic loss/failure • industrial disputation • market changes • natural disasters • OH&S (e.g. disease) • contamination • political events • product failure • professional incompetence • security failure (e.g. criminal or terrorist activities).
Risk management is:	<ul style="list-style-type: none"> • the process of identifying potential negative events and developing plans to mitigate or minimise the likelihood of the negative event occurring and/or the consequences in the event it does occur.
Financial documentation may include:	<ul style="list-style-type: none"> • balance sheets • budgetary analysis

RANGE STATEMENT	
	<ul style="list-style-type: none"> • electronic forms • financial year reports • forecasts and estimates • operating statements • order and supplier documentation • returns on investments • spreadsheets • taxation and statutory returns.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Reflect on personal effectiveness and <i>efficacy</i>	<p>1.1.Strategies are identified and applied to create a culture that encourages and allows for the receiving and giving of effective feedback.</p> <p>1.2.<i>Personal efficacy</i> and attainment of professional and personal development objectives and priorities are reviewed regularly.</p> <p>1.3.Capacity as a role model is reviewed in terms of ability to build trust, confidence and respect of diverse and <i>relevant individuals and groups</i>.</p> <p>1.4.Personal efficacy and capability to build an effective organisational and workplace culture are evaluated.</p> <p>1.5.Personal effectiveness in developing the competence required to achieve operational <i>responsibilities</i> is analysed and evaluated.</p> <p>1.6.Personal responsibility for environmental sustainability is modelled and developed in others.</p>
2. Lead in a transformational manner	<p>2.1.Transformational leadership practices are applied in a given context.</p> <p>2.2.Empathy in personal communication relationships and day-to-day leadership role is demonstrated.</p> <p>2.3.Leadership is demonstrated, which is inclusive and respectful of individual differences.</p> <p>2.4.Own potentially <i>disruptive emotions and impulses</i> are controlled and appropriately regulated.</p> <p>2.5.Work-based relationships are managed effectively.</p>
3. Cultivate collaborative thinking	<p>3.1.Judgement and commonsense are displayed when undertaking day-to-day leadership role.</p> <p>3.2.Relevant legislation, information and intelligence sources are analysed when evaluating business opportunities.</p> <p>3.3.Personal expertise and relevant individuals are drawn upon to achieve strategic results.</p> <p>3.4.Contributions from relevant individuals are sought and encouraged.</p> <p>3.5.Collaborative communication and learning approaches are used to model and encourage such practices in the workplace.</p> <p>3.6.Collaborative and participative work relationships are cultivated.</p>
4. Provide strategic	4.1.Organisational direction and values are conveyed

ELEMENT	PERFORMANCE CRITERIA
leadership during change processes	<p>positively to relevant individuals and <i>relevant stakeholders</i>.</p> <p>4.2. Impact and role of leadership during organisational change is analysed.</p> <p>4.3. Capacity and competence of relevant individuals are analysed and confirmed consistent with their ability to contribute to change processes and plans.</p> <p>4.4. Learning and communication solutions are developed to address problems and <i>risks</i> arising for individuals during organisational change.</p> <p>4.5. <i>Leadership styles</i> are identified and approaches developed to best respond to the impact of change on people and processes.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriate to the circumstances
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others through a shared vision
 - work with teams with diverse emotional and multiple intelligences and thinking (cognition) skills
- use teamwork skills to lead a team, workgroup or unit, being aware of employee needs and requirements
- use provide leadership in occupational health and safety (OHS) practice, ethical standards, legislative requirements and governance
- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust
- to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team

REQUIRED SKILLS AND KNOWLEDGE

- model collaborative communication and learning
- use active listening and negotiation skills
- encourage participation across all levels of personnel and clients
- seek opinions and elicit feedback from a range of stakeholders
- develop plain English written texts which deal with complex ideas and concepts
- use workplace technology.

Required knowledge

Knowledge of:

- relevant legislation that affects the business operation, especially in regard to OHS and environmental issues, Equal Employment Opportunity (EEO) and anti-discrimination, industrial relations and regulatory requirements
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership styles
- personal development planning methodologies
- data collection methods
- external environment scanning relating to social, political, economic, regulatory and technological developments
- emotional intelligence and its relationship to individual and team effectiveness
- organisational transformation and the management of the stages of change
- organisational design and building in responsiveness to changes in customer or market conditions
- environmental sustainability principles.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • capacity to improve own development, personal leadership style and self-management skills • demonstrated application of leadership style and approach appropriate to individuals involved, outcomes being sought and context • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations • resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation • access to clients.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • series of workplace activities and projects developed and implemented as part of the organisation's strategic development • review of applied projects and learning activities, such as reports and case studies • direct observation of contextual application and presentations to a range of stakeholders • oral or written questioning to assess knowledge of leadership styles • analysis of personal reflection and self-awareness of leadership styles and impact of this approach on task

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • completion and others • review of personal development plan.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Efficacy</i> may include:	<ul style="list-style-type: none"> • accurately reflecting and performing self-assessment • having self-confidence • recognising personal emotional responses in a given context.
<i>Personal efficacy</i> may include:	<ul style="list-style-type: none"> • accessibility • adaptability to change • decisiveness • flexibility • personal performance appraisal • self-analysis.
<i>Relevant individuals and groups</i> may include:	<ul style="list-style-type: none"> • employees and staff • employers • government agencies and departments • industry associations and employer bodies • industry representatives • national Industry Skills Councils (ISCs) • professional associations • regulatory, licensing and compliance authorities • research agencies

RANGE STATEMENT	
	<ul style="list-style-type: none"> • students • state and territory industry training advisory bodies (ITABs) • subject or technical specialists and experts • trade unions • universities.
Responsibilities may include:	<ul style="list-style-type: none"> • clarifying who is to be accountable for a decision or action prior to its execution • identifying groups, individuals and activities for which a person has management responsibility.
Controlling and appropriately regulating disruptive emotions and impulses may include:	<ul style="list-style-type: none"> • avoiding personal responses that may be insensitive or inappropriate in a given context • managing disruptive emotions and impulses • positively shaping interpersonal relationships • self-control.
Relevant stakeholders may include:	<ul style="list-style-type: none"> • administrative and regulatory bodies • coordinators, teachers, assessors, coaches, mentors and support staff • experts • industry, employees, employers, professional and peak bodies or associations • public or private sector enterprises • students • suppliers and business partners • training and assessment organisations.
Risks may include:	<ul style="list-style-type: none"> • issues, concerns or actions likely to result in a negative outcome, such as preventing the organisation from meeting its objectives • likely consequences of such an event on organisational performance and business continuity management.
Leadership style will usually be differentiated by five classical approaches:	<ul style="list-style-type: none"> • autocratic (non-participative) • charismatic flexibility • democratic (participative) • laissez faire (free reign) • paternalistic.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse own organisation's cross-cultural business practices using theoretical models of culture	1.1. Key elements of <i>culture</i> and <i>cultural diversity</i> from a range of perspectives are defined. 1.2. The organisation's cultural practices in comparison to other cultures are analysed. 1.3. Identified improvements to practices are identified and applied and awareness of issues are raised. 1.4. Strengths and limitations of theoretical models of culture and diversity are identified.
2. Evaluate cultural features of selected countries relevant to the organisation's business requirements	2.1. <i>Significant events</i> that have shaped the identity of selected countries are described. 2.2. <i>Key characteristics of business systems</i> in selected countries are researched and profiled. 2.3. Broad <i>cultural differences in business behaviour</i> in selected countries are analysed and described. 2.4. Distinguishing features of <i>business practices</i> in selected countries are researched and evaluated.
3. Develop cross-cultural awareness strategies, and communication and negotiation skills in a cross-cultural business setting	3.1. Ways in which <i>cultural norms in the workplace</i> impact business practices are identified and communicated. 3.2. Potential impact of improved cross-cultural awareness on business interactions is evaluated. 3.3. Formal and informal coaching and training strategies are applied to improve organisational cross-cultural communication practices and strategies. 3.4. Negotiation strategies are identified and applied to address business requirements in a cross-cultural setting. 3.5. Appropriate criteria and strategies are determined to evaluate effectiveness of communication and negotiation in a cross-cultural business setting.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- interact and negotiate in a range of cross-cultural contexts in relation to the business of the enterprise
- interact appropriately with partners, customers, governments and other stakeholders
- use identify the cultural approach of the organisation
- use identify the strengths and weaknesses in models of cultural analysis
- use initiative and enterprise skills to take account of cultural contexts, similarities and differences in cross-cultural communication
- apply learning to identify and apply multiple perspectives and interpretations, and appropriate protocols and language
- research academic theories of culture and to present them in plain English
- use problem-solving skills to negotiate in difficult and complex situations
- communicate and negotiate through an interpreter in a culturally appropriate manner
- work effectively with groups and teams
- research online and to use libraries for gaining knowledge and information about culture

Required knowledge

Knowledge of:

- communication styles and methods, and cultural protocols for use with people from a range of countries
- definitions of culture and cultural diversity based on a number of theoretical models
- cultural bias inherent in any conceptual model of culture
- implicit and explicit similarities and differences within and between countries and cultures
- important cultural features of selected countries
- Occupational Health and Safety (OH&S) protocols for interactions with people at work, particularly duty of care requirements
- personal cultural assumptions shaping expectations and outcomes
- sources of assistance for international visitors, including location of and access to interpreters
- special types of communications for the cross-cultural business environment

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • applying cross-cultural knowledge and protocols • effectively communicating with diverse groups and individuals in the work environment • knowledge of communication styles and methods, and cultural protocols for use with people from a range of backgrounds.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • activities are related to a business context • access to workplace context in which cross-cultural communication and negotiation skills are required.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate in researching issues in business • evaluation of supervisor's reports on how the candidate applies knowledge of culture and cultural diversity • analysis of projects, responses to problem-based case studies/related tasks, completed records and reports developed by the candidate • review of analysis of interaction between the key elements of culture and cultural diversity • review of evaluation of business practices in selected countries • evaluation of formal and informal coaching and training strategies applied to improve organisational cross-cultural communication practices and strategies • oral or written questioning to assess knowledge of personal cultural assumptions shaping expectations and outcomes.

EVIDENCE GUIDE**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Culture is:

- *The set of distinctive spiritual, material, intellectual and emotional features of society or a social group. It encompasses, in addition to art and literature, lifestyles, ways of living together, value systems, traditions and beliefs. Culture is at the heart of contemporary debates about identity, social cohesion, and the development of a knowledge-based economy.*
(UNESCO Universal Declaration on Cultural Diversity 2002).

Cultural diversity is:

- *The uniqueness and plurality of the identities of the groups and societies making up humankind.*
(UNESCO Universal Declaration on Cultural Diversity 2002).

Significant events may include:

- cultural
- economic
- historical
- physical and geographic
- political
- religious.

Key characteristics of business systems may include:

- legislative and economic structure
- public and private company ownership
- market access

RANGE STATEMENT	
	<ul style="list-style-type: none"> • trade and other business agreements • cultural, religious and secular influences • participation profile and levels.
<i>Cultural differences in business behaviour</i> may include:	<ul style="list-style-type: none"> • communication styles: <ul style="list-style-type: none"> • differences in tentativeness and politeness, confidence and assertiveness • gender differences and acceptance • value given to, and conventions for, questioning of knowledge • ways of arguing (e.g. linear and direct, non-linear and indirect) • concepts of competition and fairness • pedagogical models and practices • stakeholder roles and power relationships.
<i>Business practices</i> may include:	<ul style="list-style-type: none"> • acceptability of conflict and mechanisms for conflict resolution • communication channels and modes • industrial relations • legal and ethical practices • maintaining 'face' • negotiations • protocols • relationships.
<i>Cultural norms in the workplace</i> may include:	<ul style="list-style-type: none"> • communication practices • levels of formality • pedagogical practices • roles and relationships.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and analyse existing partnerships and relationships with <i>stakeholders</i></p>	<p>1.1. Key existing <i>business partnerships</i> and relationships are identified and analysed.</p> <p>1.2. Outcomes to be achieved from existing business partnerships and relationships are identified.</p> <p>1.3. <i>Indicators</i> and <i>feedback processes</i> are analysed to evaluate the health of the partnership arrangements.</p> <p>1.4. Strategies are developed and implemented to enhance the effectiveness of existing partnerships and relationships.</p>
<p>2. Lead the establishment of a new or renegotiated partnership program</p>	<p>2.1. Outcomes to be achieved from a new or renegotiated business partnership are established.</p> <p>2.2. <i>Relevant organisational policies and procedures</i> in partnership plan are identified and addressed.</p> <p>2.3. Relevant legal requirements are identified and incorporated into planning of the partnership.</p> <p>2.4. Partnership program is formed using collaborative and consultative processes.</p> <p>2.5. <i>Resource requirements</i> are planned and allocated to accomplish the partnership program.</p> <p>2.6. Relevant organisational policies and procedures relating to the partnership are established.</p> <p>2.7. Work activities are organised and allocated in a cost-effective and equitable manner with clear, quantifiable and agreed <i>performance standards</i>.</p>
<p>3. Communicate to influence relevant individuals and stakeholders</p>	<p>3.1. Trust, confidence and support from relevant individuals and other stakeholders are generated by demonstrating a high standard of personal performance and conduct.</p> <p>3.2. <i>Communication strategies</i> to represent the organisation positively to media, local community and stakeholders are implemented.</p> <p>3.3. Decisions are made in consultation with relevant stakeholders and relevant individuals, where appropriate.</p> <p>3.4. Individuals are empowered to develop their own ways of working within agreed boundaries of competence, cultural, <i>diversity</i> and <i>organisational and legal requirements</i>.</p> <p>3.5. A range of <i>influencing strategies</i> are used to increase commitment from staff and stakeholders to achieve organisational requirements and to</p>

ELEMENT	PERFORMANCE CRITERIA
	contribute to desired culture. 3.6. Selected community and/or professional engagements are undertaken that project a positive image of the organisation to the broader community and stakeholders.
4. Establish and implement <i>reporting mechanisms</i> for partnership program	4.1. Establish reporting systems against planned partnership outcomes are established. 4.2. Reporting systems to report partnership outcome are implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- Use analysis and interpretation skills to:
 - evaluate organisational information management systems, policies and procedures
 - select relevant evaluation information and documentation
 - identify any potential and current non-compliance
 - access and interpret organisation's standards and values
 - analyse records or notes of the evaluation process
 - analyse business, political, economic and organisational contexts influencing the nature and impact of partnership arrangements
 - make judgements relating to the success and deficiencies of existing arrangements
 - generate and evaluate ideas through the analysis of information and concepts at an abstract level
- use initiative and enterprise skills to initiate and establish collaborative partnerships and relationships
- used interpersonal and communication skills to negotiate, question, direct, listen and investigate, network and clarify issues
- use planning and organising skills to:
 - research and evaluate validation processes, and to determine and implement improvements to these processes

REQUIRED SKILLS AND KNOWLEDGE

- develop and establish agreement to plans
- use problem-solving skills to undertake risk assessment, review feedback and plan improvements
- lead and motivate a team in establishing productive networks, partnerships and other relationships

Required knowledge

Knowledge of:

- relevant legislation that affects the business operation, especially in regard to Occupational Health and Safety (OH&S) and environmental issues, Equal Employment Opportunity (EEO) and anti-discrimination, industrial relations, food safety and trade
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership techniques, including:
 - leadership styles
 - emotional intelligence and its relationship to individual and team effectiveness
 - organisational transformation and the management of the stages of change
 - personal development planning methodologies
 - strategies to evaluate and analyse effectiveness of personal performance
- data collection methods
- external environment scanning relating to social, political, economic and technological developments
- models for effective consultation and collaboration within a partnership
- organisational design and building in responsiveness of operations to change in customer or market conditions
- risk assessment and monitoring strategies

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • demonstrated capacity to foster partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills • demonstrated capacity to use accepted strategies and assess and analyse personal performance • developing collaborative approaches to enhance individual, team and organisational outcomes • initiating and implementing external partnerships in line with relevant regulatory, employment and organisational requirements • knowledge of relevant policies, legislation, codes of practice and national standards • strategies to evaluate and enhance effectiveness of partnership arrangements.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • competence is consistently demonstrated over time in a workplace context, and over a range and variety of situations • access to required assessment facilities and resources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of applied projects or learning activities, especially relating to formation of professional networks and stakeholder consultation in relation to forming partnerships • direct observation of contextual application of skills • submission of a portfolio of evidence, including previous work forging partnerships • oral or written questioning to assess knowledge of

EVIDENCE GUIDE	
	development of industry partnerships.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • administrative and regulatory bodies • community organisations • employees • industry, employees, employers, professional and peak bodies or associations • public or private sector enterprises.
<i>Business partnerships</i> may:	<ul style="list-style-type: none"> • be informal • be physical or virtual (e.g. online) • involve a formal agreement • involve one or more enterprises, and training and assessment organisations • include sponsorship or community funding agreements • involve mergers, supply agreements, joint ventures, research and development partnerships.
<i>Indicators</i> may include:	<ul style="list-style-type: none"> • employees • employers • government agencies and departments • industry associations, employer bodies and professional associations • industry representatives • media reports

RANGE STATEMENT	
	<ul style="list-style-type: none"> • national Industry Skills Councils (ISCs) • regulatory and licensing authorities • research agencies • technical specialists or experts • unions • universities.
<i>Feedback processes</i> may include:	<ul style="list-style-type: none"> • formal complaints or suggestions procedures • formal-informal • independent audits • management audits/workplace checks • surveys • virtual or physical • whistleblower policy.
<i>Relevant organisational policies and procedures</i> may include:	<ul style="list-style-type: none"> • access and equity • client services • confidentiality requirements • ethical standards • fees and payment schedule • grievance and appeals processes • staff recruitment, induction and ongoing development and monitoring • human resources policies and procedures and legal requirements, including anti-discrimination, EEO and OH&S • administrative and records management systems relating to: <ul style="list-style-type: none"> • contract manager • document version control • maintenance, retention, archiving, retrieval, storage and security of records • personnel responsible for analysing statistics and data to ensure organisation complies with relevant standards across all of its operations • privacy and access to information and records • reporting and recording requirements and arrangements • supervisors and managers • union and employee representatives • users of information, such as finance

RANGE STATEMENT	
	personnel, human resources personnel and employers.
Resource requirements may include:	<ul style="list-style-type: none"> • additional staff • distribution costs • equipment • production costs • promotional costs • research and development • re-tooling • staff training.
Performance standards may:	<ul style="list-style-type: none"> • be based on contractual requirements • be described as Key Performance Indicators • specify personal or task outcomes • span short-term or long-term outcomes • specify strategic and operational outcomes.
Communication strategies may include:	<ul style="list-style-type: none"> • conducting presentations • developing and applying interview and interpersonal communication protocols • developing and circulating marketing materials • developing promotional materials and product descriptions • initiating and conducting a public communication strategy.
Diversity includes difference in:	<ul style="list-style-type: none"> • age • belief systems and values • culture • expertise, experience and working styles • gender • interpersonal style • interests • language, literacy and numeracy • physical differences • politics • race • religion • sexual orientation • thinking and learning styles.
Organisational and legal requirements may include:	<ul style="list-style-type: none"> • collaborative and partnership arrangements and agreements (e.g. memoranda of understanding)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • confidentiality and privacy requirements • licensing requirements • requirements of awards and enterprise bargaining agreements • requirements of endorsed Training Packages • requirements of other relevant federal and state/territory legislation (e.g. OH&S, anti-discrimination, workplace and industrial relations, workers compensation, and apprenticeships and traineeships) • requirements set by professional associations • requirements set by quality systems.
<i>Influencing strategies</i> may include:	<ul style="list-style-type: none"> • debate • dialogue • discussion • formal and informal techniques • levels of participation • moderated negotiations • networking • providing encouragement to staff to undertake activities that develop their personal competence and performance • resolving conflict in a fair, equitable and collaborative manner • strategies applied face-to-face or collectively.
<i>Reporting mechanisms</i> may include:	<ul style="list-style-type: none"> • internal organisational recording and reporting systems • record keeping policies and procedures • community notices and newsletters • financial reporting for funding and payments from funding bodies • OH&S incident reporting systems • performance agreements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and analyse impacts of international factors on the business operation and functions</p>	<p>1.1. Core activities, customer base, business values and current business direction are confirmed.</p> <p>1.2. Performance data from all areas of the business is reviewed to identify strengths, weaknesses and critical success factors relevant to international business activity.</p> <p>1.3. Trends and developments having an impact on international business activity are identified and analysed for their potential impact on the business.</p> <p>1.4. Comparative international market information is gathered and analysed as a basis for reviewing business performance.</p>
<p>2. Investigate international business opportunities in the areas of investment, trade, finance and workforce development</p>	<p>2.1. Market intelligence is gathered from available sources and documented.</p> <p>2.2. Current capabilities and resources are identified and assessed to identify areas for improvement or exploitation within international markets.</p> <p>2.3. International market performance of existing and potential competitors and their products or services is analysed to identify potential opportunities or threats within international business markets.</p> <p>2.4. Legal, ethical and environmental constraints of the international market are identified and analysed for their effect on international business activity.</p> <p>2.5. Current and emerging needs in international markets that link positively to the business's strengths or capabilities are identified.</p> <p>2.6. The needs of the business in terms of changes required to address an international market opportunity are identified.</p>
<p>3. Operate international business activities</p>	<p>3.1. Available international business positioning strategies are identified and a strategy chosen to meet marketing requirements and the consumer profile, including the culture of profiled groups.</p> <p>3.2. A positioning implementation plan is developed in accordance with organisational requirements.</p> <p>3.3. International business options are identified and strategies for products, pricing, sourcing, logistics, promotion and distribution developed.</p> <p>3.4. The international business payment, investment capital, accounting and taxation issues, options and proposed strategies are identified.</p> <p>3.5. Financial compliance requirements associated with international business activity are identified for relevant</p>

ELEMENT	PERFORMANCE CRITERIA
	<p><i>international finance regulations.</i></p> <p>3.6. Documentation requirements for export are identified and prepared.</p> <p>3.7. The investment, trade, financial, taxation and workforce risks in the international business operation are identified and contingency strategies developed.</p> <p>3.8. Operational plans to address the international business activity are developed or amended in accordance with organisational requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use analytical skills to identify potential risks and opportunities, and assess market dynamics
- use culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- make decisions
- use interpersonal skills to:
 - maintain appropriate relationships with colleagues
 - establish trust
 - value and be open to, the opinions of others
 - work as part of a team
 - listening actively
 - demonstrate cultural sensitivity
- negotiate effectively
- use planning and organisation skills to develop and implement business strategies
- use problem-solving, initiative and enterprise skills to seek and develop international business opportunities
- use research skills to identify trends and international business opportunities
- manage risk
- use a range of tools to monitor business performance

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- relevant legislation, codes of practice and standards that affect international business
- nature and scope of international business
- international trade and investment theory
- international monetary system and balance of payments
- foreign exchange and financial markets
- national trade and investment policy
- co-operation between nations: legal and political forces
- cultural-interpersonal relations and human resource management
- strategic management
- modes of entry and strategic alliances
- organisational design and control
- international marketing and operations management
- international finance, accounting and taxation

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • knowledge of the key concepts of international business and how to apply them within an enterprise • capacity to effectively integrate international business challenges and opportunities within and across functional areas of business • knowledge of key trends in international business.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations • access to resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • series of workplace activities and projects developed and implemented as part of the organisation's business development and management • review of applied projects and learning activities, such as reports and case studies • direct observation of contextual application • oral or written questioning to assess knowledge.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.</p>

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate commercialisation options	1.1. Product/innovation to be commercialised is described. 1.2. Innovation alignment is analysed against organisation's innovation objectives. 1.3. Market opportunities are researched, analysed and tested . 1.4. Optimum business structure and funding options are investigated.
2. Develop commercialisation proposal	2.1. Resourcing requirements are determined. 2.2. Marketing plan is developed. 2.3. Supply chain strategy is determined. 2.4. Strategies for managing Intellectual Property (IP) are determined. 2.5. Environmental sustainability impacts of proposed product/idea are determined. 2.6. Risk mitigation plan is developed. 2.7. Proposal modifications are negotiated with key stakeholders.
3. Prepare for implementation	3.1. Project implementation plan is developed. 3.2. Monitoring process is determined. 3.3. Required business processes are established and developed. 3.4. Project team is assembled.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • analyse market trends • budget, including forecasting, capacity and asset analysis, setting targets and compliance mechanisms • negotiate licensing IP (in and out), contractual supply chain arrangement and

REQUIRED SKILLS AND KNOWLEDGE

partnerships

- use communication skills to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team
 - model collaborative communication and learning
 - use active listening and negotiation skills
 - present and negotiate proposals
 - seek opinions and elicit feedback from a range of stakeholders
 - develop plain English written texts which deal with complex ideas and concepts
- generate and evaluate ideas through the analysis of information and concepts at an abstract level
- provide strategic leadership during change and negotiation processes
- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriate to the circumstances
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others through a shared vision
 - work with teams with diverse emotional and multiple intelligences and thinking (cognition) skills
- provide leadership in occupational health and safety (OHS) practice, ethical standards and legislative requirements
- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust

Required knowledge

Knowledge of:

- business strategies and legal requirements underpinning trademarks, copyright and patents
- commercial environment analysis techniques, such as Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
- market testing strategies and techniques
- strategies to analyse and assess the upstream and downstream implications of an innovation
- risk assessment strategies and techniques
- team selection, management and support strategies
- legal requirements underpinning partnership arrangements, contracts and taxation
- environmental sustainability principles

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • capacity to develop, negotiate and structure an agreed commercialisation strategy • demonstrated application of leadership style and approach appropriate to individuals involved, outcomes being sought and context • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead the development of a commercialisation strategy • resources normally used in the workplace, such as organisational policies and procedures, and relevant legislation • access to stakeholders, potential partners and clients.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • series of workplace activities and projects developed and implemented as part of the organisation's commercialisation strategy • review of applied projects and learning activities, such as reports and case studies • direct observation of contextual application and presentations to a range of stakeholders • oral or written questioning to assess knowledge of commercialisation strategies and techniques.
Guidance information for	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

EVIDENCE GUIDE**assessment**

for example, with other units in the qualification in which this unit is packaged.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Describing the product/innovation will include:

- providing detailed background information
- identifying the benefit and assumptions made when approval was given to develop the innovation
- preparing reports, summaries, demonstrations and promotional materials to suit a variety of audiences
- preparing responses to questions, issues and technical queries from current and prospective stakeholders.

Market testing may include:

- consumer sampling and testing strategies
- franchising pre-production ordering
- identifying routing opportunities, such as:
 - partner options
 - licensing
- regulatory compliance.

Funding options may include:

- government (local, state, territory and federal) development grants
- industry joint funding, including partnerships with industry and government
- commercial funding, including investor funding (e.g. venture capital and equity partners)
- owner/operator
- partnership arrangements.

Resourcing requirements may

- financial requirements:

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • manufacture capital investment • Intellectual Property (IP) costs • regulatory approval/market access cost • innovation production costing • sales and marketing costs • forecast return on investment • infrastructure • human.
Marketing plan will include:	<ul style="list-style-type: none"> • determining resources required • budgeting • setting key performance indicators (KPIs) • developing sale forecasts for one, three and five years.
Supply chain strategy will include:	<ul style="list-style-type: none"> • supply chain logistics SWOT • identifying and evaluating potential supplier partnerships • negotiating contracts.
Developing an IP strategy may include:	<ul style="list-style-type: none"> • freedom to operate • IP management purpose and benefits • patent infringement issues • patent mapping • patenting options • trademark registration.
Environmental sustainability impacts may include:	<ul style="list-style-type: none"> • reduction of waste • increased energy and resource efficiencies • recycling.
Negotiating proposal modifications may involve:	<ul style="list-style-type: none"> • making presentations to key stakeholders • negotiating with senior company personnel or Board Directors • modifying aspects of the proposal to accommodate stakeholder input/requirements.
Project implementation plan will include:	<ul style="list-style-type: none"> • determining project champions • developing project planning chart with critical points and stages • structuring, identifying and recruiting the project team • assigning KPIs and objectives to individuals.
Monitoring process may include:	<ul style="list-style-type: none"> • identifying, selecting and analysing data • quantitative and qualitative feedback

RANGE STATEMENT	
	processes <ul style="list-style-type: none"> • testing assumptions • identifying times and data collection points • developing review and reporting schedules • trend monitoring and forecasting analysis.
<i>Business processes</i> may include:	<ul style="list-style-type: none"> • human resource policies and procedures, including job descriptions • documented monitoring and reporting requirements • financial policies and procedures • company negotiation and contractual processes.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare organisational change management strategy for implementation of advanced electronic technologies	1.1. Proposed changes are analysed in relation to current operational practices, infrastructure and the strategic plan. 1.2. Identified changes are evaluated, costed and prioritised. 1.3. Risks associated with implementation are identified, evaluated and managed. 1.4. Implementation strategies are developed, including change management and communication strategies. 1.5. Implementation team is engaged, assembled and briefed.
2. Manage implementation	2.1. Implementation strategies are communicated to stakeholders and timelines and accountabilities clarified. 2.2. Progress of implementation against planned milestones is monitored, recorded and reported. 2.3. Potential risks to successful completion are identified and managed through consultation with stakeholders and review of testing outcomes. 2.4. Implementation strategy is reviewed and revised, as necessary. 2.5. Installation is finalised according to implementation strategy and organisational procedures. 2.6. Training programs needed to support new technologies are identified and implemented.
3. Evaluate implementation outcomes	3.1. Implementation process is reviewed and evaluated. 3.2. Implementation team is debriefed. 3.3. Outcomes of implementation process are assessed against organisation requirements. 3.4. Project outcomes are reported to key stakeholders.
4. Develop and implement ongoing management processes	4.1. Business processes required for ongoing electronic technology management are developed. 4.2. Business processes required for ongoing electronic technology management are implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply change management theory
- use effective communication and teamwork skills to consult with stakeholders and system users
- apply planning and reporting skills
- use problem-solving, initiative and enterprise skills to:
 - assess vulnerabilities in electronic technology proposals
 - manage risks
 - monitor stakeholder satisfaction
 - develop strategies to respond to system, personnel and technology problems
- provide leadership in occupational health and safety (OH&S) practice and observance of ethical standards, legislative requirements and good corporate governance requirements
- apply technology skills to:
 - use appropriate technology to achieve system and business outcomes
 - use appropriate terminology
 - use high levels of accounting (mathematical), technological and e-commerce systems
 - assess advice relating to suitability and reliability of hardware and software
 - analyse and assess potential of new technology solutions to improve organisational outcomes

Required knowledge

Knowledge of:

- business policies and procedures impacting on job role or function
- change management theory
- capabilities and limitations of infrastructure
- business needs
- facilities and infrastructural management
- methods for assessing and analysing electronic technology proposals
- planning techniques
- quality measures and principles
- relevant legislation, codes and regulations that affect business operations, especially in regard to OH&S and environmental issues, Equal Employment Opportunity (EEO), industrial relations and anti-discrimination
- written policies and internal procedures on electronic technology management and

REQUIRED SKILLS AND KNOWLEDGE

associated contractual documents

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • research and evaluate business and organisational impact of a proposed electronic technology system • capacity to analyse, develop and implement plans for the introduction of an electronic technology system with minimum interruption to the organisation's business processes • capacity to identify, analyse and address problems in a timely and effective manner.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • competence is consistently demonstrated over time, and over a range and variety of situations • access to required assessment facilities and resources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of applied projects or learning activities, such as those related to implementing electronic solutions for a specific business requirement • direct observation of contextual application of skills • oral or written questioning to assess knowledge of capabilities and limitations of infrastructure • review of research and evaluation of the electronic technology proposal.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Proposed changes</i> may include:	<ul style="list-style-type: none"> • e-commerce systems • electronic messaging systems • implementation of a new information management system • system hardware upgrade • mobile computing devices (e.g. handheld devices, mobile computers, personal digital assistants, handheld data capture systems and mobile cellular telephones).
<i>Risks</i> may include	<ul style="list-style-type: none"> • damage to property/equipment • environmental • equipment/system failures • financial/economic loss/failure • industrial disputation • market changes • microbiological contamination • natural disasters • OH&S including disease • political events • product failure • professional incompetence • security failure (e.g. criminal or terrorist activities) • supplier failures.
<i>Implementation strategies</i> may address:	<ul style="list-style-type: none"> • change management strategies to engage users • contingency arrangements • developing a project team • financial management • identifying and seconding project personnel • timelines and project stages • product testing and trial regimes • project milestones • quality requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • reporting requirements • risk management requirements • stakeholder consultation, familiarisation and training strategies.
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • business partners • customers • executive management • other employees • public • public agencies, especially regulators • shareholders • suppliers.
<i>Business processes</i> may include:	<ul style="list-style-type: none"> • access and equity principles and practices • business and performance plans • collaborative or partnership arrangements • confidentiality requirements • defined resource parameters • ethical standards • existing technology, systems and processes • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OH&S policies, procedures and programs • quality and continuous improvement processes and standards • Quality Assurance (QA) or procedures manuals • recording and reporting procedures • security requirements • team and business unit structures and focus.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define topic	1.1. Research issue is identified and scoped. 1.2. Research questions are developed and refined. 1.3. Research methodologies are identified. 1.4. Hypotheses are developed.
2. Undertake literature review	2.1. Suitable sources of literature are identified. 2.2. Literature outcomes are analysed and presented. 2.3. Research questions and strategy are refined in light of literature review findings.
3. Undertake research	3.1. Research instruments are developed and validated. 3.2. Ethical and confidentiality requirements are identified and addressed. 3.3. Environmental sustainability issues associated with the research are identified. 3.4. Research is undertaken. 3.5. Findings are recorded .
4. Present findings	4.1. Research outcomes are analysed. 4.2. Research methodology is reviewed and analysed. 4.3. Recommendations are developed. 4.4. Research report is prepared and presented. 4.5. Report is presented for peer review.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use analysis and interpretation skills to:
 - critically review other research strategies, analyses and findings
 - apply research findings to a current issue
 - select relevant information and documentation
- use communication and negotiation skills to:
 - present and explain research ideas

REQUIRED SKILLS AND KNOWLEDGE

- gain commitment to participate in research activity
- present findings
- use develop and conduct research activity
- undertake risk assessment and resolve blockages

Required knowledge

Knowledge of:

- relevant legislation and regulatory requirements impacting on research activity
- research strategies and techniques
- data collection methods
- risk assessment and monitoring strategies, including environmental risk analysis
- strategies to evaluate and analyse effectiveness of research approach
- environmental sustainability principles

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and access data sources available to the business	1.1. The data collection requirement of the business question or issue is scoped and defined. 1.2. Data sources are identified and assessed for accessibility and reliability. 1.3. Data is researched and/or collated from sources in accordance with legislation, policies and guidelines . 1.4. Accuracy and appropriateness of the data is evaluated. 1.5. Data is recorded in the desired format in accordance with professional, business and task requirements.
2. Apply data analysis and decision making techniques to analyse business data	2.1. Data is collected, stored and retrieved using software in accordance with legislation, policy and guidelines. 2.2. Spreadsheet tools are used to retrieve data and present it in suitable formats. 2.3. Graphical data is displayed in accordance with graphical presentation principles . 2.4. Quantitative and/or qualitative analysis is performed to obtain required outcome. 2.5. Analysis and descriptive tools and techniques are used appropriately given the nature of the information and the required outcomes. 2.6. Limitations in the methodology are identified and described, as appropriate. 2.7. Summary statistics are calculated from the given data set in accordance with the business requirement.
3. Produce information for business decision making	3.1. Data summaries and trends are interpreted according to accepted standards . 3.2. Statistical tests are interpreted and explained. 3.3. Data is interpreted in such a way as to inform business decision making. 3.4. Data is presented in tables, charts and maps so that the reader does not misconstrue it. 3.5. Glossaries, technical notes and referencing are included with the data, where required. 3.6. Reports are prepared and presented that include statistical concepts , tables, charts and maps in accordance with organisational policy and procedures. 3.7. Findings are presented in a way that is most appropriate for the audience. 3.8. Charts are used appropriately in presentations for the variables being charted and in accordance with accepted

ELEMENT	PERFORMANCE CRITERIA
	<p><i>standards.</i></p> <p>3.9. Assumptions on which the interpretation is based are communicated in accordance with audience needs.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse and interpret data
- identify sources of data, collect data, follow analysis procedures and explain results
- apply decision making skills
- negotiate effectively
- collect data and produce reports
- use problem-solving, initiative and enterprise skills to produce information for business decision making
- use research skills to identify and collect data
- manage risk

Required knowledge

Knowledge of:

- relevant legislation, codes of practice and standards
- use of statistical data for business decision making
- methods of presenting data
- methods of describing data
- risk and uncertainty
- interval estimation
- hypothesis testing
- comparing group differences
- simple linear regression and correlation
- multiple regression
- time-series analysis

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • knowledge of how to: <ul style="list-style-type: none"> • differentiate between different types of data • differentiate between inferential and descriptive statistics • application of linear regression and correlation analysis techniques • knowledge of the strengths and limitations of results produced by each statistical technique (error correction and hypothesis testing) • provision of advice for business decision making based on the results of statistical analysis.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations • access to resources normally used in the workplace such as organisational policies and procedures, relevant legislation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • series of workplace activities and projects developed and implemented as part of the organisation's business development and management • review of applied projects and learning activities such as reports and case studies • direct observation of contextual application • oral or written questioning to assess knowledge.

EVIDENCE GUIDE**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example, with other units in the qualification in which this unit is packaged.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Data sources may include:

- Australian Bureau of Statistics (ABS) data
- government agency sources.

Legislation, policies and guidelines may include:

- state/territory and federal legislation and regulations, such as:
 - financial management Acts
 - privacy legislation
 - Equal Employment Opportunity (EEO) and anti-discrimination legislation
 - Occupational Health and Safety (OH&S) legislation
- ethics and accountability standards
- risk management standards
- fraud control standards
- knowledge management standards
- organisational policy, procedures and protocols.

Software may include:

- database tools
- spreadsheets
- web-based tools (e.g. online survey tools)
- statistical packages.

Graphical presentation principles may include:

- understanding graphical literacy of audience
- scaling
- sample representativeness

RANGE STATEMENT	
	<ul style="list-style-type: none"> reporting results in formats appropriate to analysis.
<i>Analysis</i> techniques may include:	<ul style="list-style-type: none"> arranging data into a form appropriate for analysis construction of graphs calculation of summary statistics implementation of statistical tests.
<i>Summary statistics</i> may include:	<ul style="list-style-type: none"> mean median mode standard deviation standard error relative standard error.
<i>Accepted standards</i> for data may include:	<ul style="list-style-type: none"> showing awareness of data accuracy and reliability identifying other related issues, such as sample size.
<i>Statistical tests</i> may include:	<ul style="list-style-type: none"> equivalence of means and proportions tests of association, prediction and significance.
<i>Statistical concepts</i> may include:	<ul style="list-style-type: none"> the results of statistical tests trends over time statistical associations, including correlation and probability variability sampling error.
Presentation of <i>findings</i> may include:	<ul style="list-style-type: none"> a mix of text, tables, charts and maps.
<i>Accepted standards</i> for charts may include:	<ul style="list-style-type: none"> appropriately labelled appropriate scale selection clear formatting sourcing and referencing data sources.

1. Maintain personal equipment	<p>1.1. <i>Personal equipment</i> is maintained to ensure manufacturer specifications are met, where relevant</p> <p>1.2. <i>Occupational Health and Safety (OH&S)</i>, hygiene and sanitation, <i>workplace</i> and <i>regulatory requirements</i> are met</p>
2. Store personal equipment	<p>2.1. Appropriate maintenance is carried out for the equipment used.</p> <p>2.2. Personal equipment is stored in accordance with workplace and regulatory requirements.</p>
3. Clean personal equipment	<p>3.1. Personal equipment is cleaned to ensure that workplace requirements, OH&S, hygiene and sanitation requirements, and manufacturer's specifications are all met, where relevant.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply *communication* skills relevant to the task
- demonstrate the procedures for maintaining personal equipment
- check and prepare equipment in time for the start of work
- work effectively as an individual and as part of a team
- apply hygiene and sanitation, OH&S requirements in using, cleaning and storing personal equipment, including Personal Protective Equipment (PPE)
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- maintenance techniques for personal equipment
- relevant *work instructions, Standard Operating Procedures (SOPs) and reports*
- hygiene and sanitation, OH&S, workplace and regulatory requirements related to maintaining, cleaning and storing personal equipment
- manufacturer specifications for use, maintenance, cleaning and storage of personal

REQUIRED SKILLS AND KNOWLEDGE

equipment, where relevant

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated during the normal operations of a workplace.

Context of and specific resources for assessment

Competency must be assessed using the personal equipment issued to the individual.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Personal equipment may include:

- chains
- handsaws
- PPE
- pouches
- steels.

OH&S requirements may include:

- enterprise OHS policies, procedures and programs
- OHS legal requirements
- PPE:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Regulatory requirements may include:

- Export Control Act
- Federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian standards

RANGE STATEMENT	
	<ul style="list-style-type: none"> • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OHS requirements • quality assurance (QA) requirements • SOPs • the ability to perform the task to production requirements • work instructions.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include signs and signals • be with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties • require the interpretation of spoken or written instructions or diagrams.
<i>Work instructions, standard operating procedures and reports</i> may be:	<ul style="list-style-type: none"> • completed with the assistance of others • directly related to own tasks and duties • in English • in everyday workplace language, including some mathematical language • in languages other than English • presented in routine standard proformas using accurately copied information, symbols, numbers, abbreviations, sketches and codes • presented orally • provided visually (e.g. video, OH&S signs, symbols and other pictorial presentations) • routine, simple and brief.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Clean own work area and equipment during operations	1.1. Worksite is hygienically cleaned during operations to <i>Occupational Health and Safety (OH&S), workplace and regulatory requirements</i> . 1.2. Equipment and surfaces are hygienically cleaned to regulatory and workplace requirements. 1.3. Cleanliness of work area is monitored according to workplace requirements.
2. Identify <i>sources of contamination</i> and spoilage	2.1. Contamination and cross-contamination risks are identified and <i>steps taken to reduce the risk</i> . 2.2. <i>Corrective action</i> is taken when contamination is identified in accordance with workplace and regulatory requirements.
3. Follow workplace <i>hygiene and sanitation requirements</i>	3.1. Personal hygiene practices are followed to workplace requirements. 3.2. Product is handled in accordance with workplace, and hygiene and sanitation requirements. 3.3. Individual's work is conducted hygienically in accordance with workplace requirements. 3.4. Products are processed in accordance with regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- consistently follow workplace, hygiene and sanitation procedures
- work effectively as an individual and as part of a team to keep work areas clean
- demonstrate basic hygiene and sanitation practices in all activities undertaken in the workplace
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication* skills relevant to the task
- use and mix cleaning chemicals (if used) according to manufacturer specifications, regulatory and workplace requirements

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- hygiene and sanitation requirements for own area
- reporting procedures for contamination, as appropriate
- chemical contamination risks to product and how they are controlled
- consequences of contaminated or spoiled meat leaving the establishment
- consequences of failing to follow workplace requirements for hygienic handling and processing of meat
- time, temperature and moisture requirements for microbial growth
- causes of food spoilage and poisoning
- possible sources of contamination and cross-contamination in the worksite
- visual evidence of contamination
- microbes which may affect meat
- the scope and coverage of AS 4696:2007 Hygienic production and transportation of meat and meat products for human consumption
- sources of physical and microbiological contamination in meat establishments and how these hazards are controlled
- monitoring methods (e.g. visual, looks clean, smells clean and use of protein sticks)

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time during the normal operations of a meat establishment.

Context of and specific resources for assessment

Assessment must include a demonstration of on-the-job competency while performing a task in the workplace.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Fulfil OH&S responsibilities and recognise the OH&S responsibilities of key personnel	<p>1.1.OH&S responsibilities are met according to <i>regulatory</i> and <i>workplace requirements</i>.</p> <p>1.2.OH&S responsibilities of key personnel are recognised and explained.</p>
2. Follow workplace OH&S policies and procedures	<p>2.1.<i>Workplace OH&S policies, procedures and programs</i> are followed.</p> <p>2.2.<i>Personal Protective Equipment (PPE)</i> is used, maintained and stored as appropriate.</p>
3. Follow legal provisions related to OH&S	3.1.Relevant provisions of OH&S legislation and codes of practice are followed.
4. Contribute to OH&S	<p>4.1.OH&S issues are raised with designated personnel in accordance with workplace requirements and relevant OH&S legislation.</p> <p>4.2.<i>Participative arrangements for OH&S</i> are contributed to in the workplace within the organisational procedures and scope of responsibilities and competencies.</p>
5. Follow workplace requirements for hazard identification and risk control	<p>5.1.Hazards to health and safety in the work area are recognised and reported to designated personnel according to workplace requirements.</p> <p>5.2.Workplace requirements for controlling risks to health and safety are accurately followed.</p>
6. Follow emergency procedures	<p>6.1.<i>Emergency procedures</i> are followed according to workplace requirements.</p> <p>6.2.Appropriate reporting procedures for emergencies are followed according to workplace requirements.</p>
7. Operate machinery safely	<p>7.1.Machinery is operated according to safe work practices and procedures, where applicable.</p> <p>7.2.Machinery is operated and maintained according to manufacturer specifications and workplace requirements, where applicable.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work safely as an individual and as a member of a team
- select, organise and complete *routine explanations and reports* on OH&S issues
- demonstrate safe work practices in all activities at the *work site*
- follow workplace OH&S policies and procedures
- identify and apply relevant regulatory requirements as applicable
- identify and follow emergency procedures, including evacuation procedures, according to workplace requirements
- identify OH&S *hazards* in own work area and around general plant or worksite especially slips, falls and manual handling
- list hazards at the work site and control measures that have been put in place
- outline and observe own OH&S legal responsibilities
- outline the employer's OH&S legal requirements
- seek advice from more experienced colleagues or from manuals in order to operate new machinery and equipment safely
- use relevant *communication* skills

Required knowledge

Knowledge of:

- use, maintenance and storing of PPE required for different areas at the worksite, according to workplace requirements and manufacturer specifications
- ways of minimising manual handling hazards
- safe operating procedures for machinery at own work station
- procedures for reporting accidents at the work site
- functions of OH&S committees and representatives at the work site, as appropriate
- PPE that must be worn for different areas at the work site
- process for making suggestions for improvement

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must include a demonstration of on-the-job competency while performing a task in the workplace.

Context of and specific resources for assessment

Assessment may involve simulation or actual demonstration of competency where competencies involve identifying, reacting to and reporting hazards.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • Federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • emergency, fire and accident procedures • enterprise-specific procedures • hazard policy and procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Workplace OH&S policies,</i>	<ul style="list-style-type: none"> • confined spaces entry permit

RANGE STATEMENT	
<i>procedures and programs</i> may include:	<ul style="list-style-type: none"> • drug and alcohol policies and programs • emergency procedures • evacuation plans • hazardous substances policies and programs • manual handling policies and programs • noise reduction policies and programs • OH&S inspectors and audits checklists • OH&S policies and programs • sexual harassment policies and programs.
<i>Personal Protective Equipment (PPE)</i> may include:	<ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear.
<i>Participative arrangements for OH&S</i> may include:	<ul style="list-style-type: none"> • OH&S committees • OH&S representatives • workplace meetings.
<i>Emergency procedures</i> may include:	<ul style="list-style-type: none"> • accident and incident reporting and investigation procedures • evacuation plans • first aid procedures.
<i>Routine explanations and reports</i> may:	<ul style="list-style-type: none"> • be completed with the assistance of others • be directly related to own work and work area problem solving • be in English • be in everyday workplace language and include mathematical language and commonly used technical terms • be in languages other than English • be presented in writing using standard formats or proformas, diagrams, symbols and charts • be presented orally • include information from several sources

RANGE STATEMENT	
	<ul style="list-style-type: none"> include the use of visual aids (e.g. video, OH&S signs and other pictorial presentations).
Work site includes:	<ul style="list-style-type: none"> immediate working area overall workplace.
Hazards may include:	<ul style="list-style-type: none"> alcohol abuse chemicals communicable diseases confined spaces dust electrical faults equipment malfunctions excessive noise extremes of temperatures fatigue hazards associated with knives hazards associated with manual handling poor or inadequate lighting poor ventilation radiation stress substances use of illicit drugs zoonotic diseases.
Communication may:	<ul style="list-style-type: none"> be spoken, written, non-verbal and include signs and signals be with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties include reading and interpreting workplace documentation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to the maintenance and improvement of workplace operations and requirements	1.1. Problems are solved by <i>communicating</i> with others. 1.2. Information is exchanged to perform workplace tasks and take appropriate action. 1.3. Spoken and written reports (where applicable) are provided clearly and promptly.
2. Identify key personnel in the workplace	2.1. Organisational structure of the workplace, mission statements and strategic plan are identified. 2.2. Key personnel and their roles in the organisation are identified. 2.3. Role of trainees is identified.
3. Contribute to positive workplace relations	3.1. Communication styles of cultural, social and ethnic groups are recognised and considered. 3.2. Appropriate communication style for context, <i>audience</i> and purpose is applied. 3.3. Regulatory and workplace ethical standards are considered in verbal and non-verbal communications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • copy and record <i>workplace information</i> accurately in routine formats and proformas, where appropriate • demonstrate effective communication techniques with supervisors and colleagues • demonstrate the exchange of relevant routine information with others to: <ul style="list-style-type: none"> • explain issues or problems • meet quality and food safety requirements • offer suggestions for improvement • reach conclusions • describe forms of feedback provided to colleagues and key personnel • participate in, and contribute to, meetings and discussions • read <i>written information</i> and write to a level typically required in the workplace

REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate communication styles when:
 - negotiating sensitive issues
 - obtaining views and information from others
 - working with cultural, social and ethnic groups

Required knowledge

Knowledge of:

- roles of key personnel in the workplace
- sources of information relevant to own work, including *occupational health and safety (OHS)*, *regulatory*, work instructions and *workplace requirements*
- workplace standards of behaviour

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work within the industry sector	1.1. Composition and structure of the meat industry is examined to provide an overview for work priorities. 1.2. Major species and trade markets are examined. 1.3. Path of meat is traced from paddock to plate. 1.4. Flow of product is traced from stockyards to meat processing plant, to meat wholesalers and retailers, and through smallgoods plants. 1.5. Products are identified.
2. Apply workplace policies	2.1. Relevant <i>workplace policies</i> are obtained and applied, where appropriate. 2.2. Role of trainees is identified in relation to workplace policies. 2.3. Information on working conditions is obtained and important elements identified.
3. Follow award or employment agreement provisions	3.1. Information about relevant <i>award provisions</i> and employment conditions are obtained and applied, where appropriate. 3.2. Information on employee rights and responsibilities is obtained and explained.
4. Identify appropriate <i>organisations and associations</i>	4.1. Major industry organisations, peak bodies and regulatory bodies, and their roles are identified.
5. Follow equal employment opportunity (EEO) legislative requirements	5.1. Information about EEO provisions is obtained and applied as appropriate. 5.2. Information on sexual harassment is obtained and policies against sexual harassment are explained in terms of personal responsibility.
6. Demonstrate awareness of environmental issues in the meat industry	6.1. Relevant <i>environmental regulatory requirements</i> are identified. 6.2. Workplace environmental policies and practices are identified. 6.3. Consequences of not following workplace environmental policies and practices are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- explain employee's responsibilities
- explain the flow of product from receipt to sale in own workplace
- follow relevant workplace policies
- identify relevant *workplace requirements*, policies and procedures and explain their implications for trainees
- list the markets where the company's products are distributed
- name the products produced in own workplace
- outline the path of meat from paddock to plate
- relate to others in an effective and non-discriminatory way showing mutual respect
- use relevant communication skills

Required knowledge

- dispute resolution procedures in the workplace
- nature and role of *work instructions, Standard Operating Procedures (SOPs), explanations and reports*
- principles of EEO and policies to prevent sexual harassment
- relevance of *Occupational Health and Safety (OH&S)* and *regulatory requirements* for meat industry employees
- workplace employment conditions
- enterprise ethical standards and requirements for interacting with other employees and staff

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated utilising actual or representative documentation of policies and procedures.

Context of and specific resources for assessment

Assessment can be undertaken in actual or simulated environments.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality and Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Workplace policies</i> may include:	<ul style="list-style-type: none"> • EEO policies • environmental policies • mission statements • OH&S policies • organisational structure • quality assurance (QA) manual • strategic planning • work instructions.
<i>Award provisions</i> may relate to:	<ul style="list-style-type: none"> • Australian Workplace Agreements • enterprise bargaining agreements • state, territory or federal awards.
Meat industry <i>organisations and associations</i> include:	<ul style="list-style-type: none"> • AUS-MEAT • Australasian Lot Feeders Association • Australasian Meat Industry Employees Union (AMIEU) • Australian Meat Industry Council (AMIC) • Australian Meat Processor Corporation (AMPC) • Australian Pork Limited (APL) • Cattle Council of Australia (CCA) • CSIRO Meat Research Institute

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Meat&Livestock Australia Pty Ltd (MLA) • National Farmers' Federation • National Meat Industry Training Advisory Council (MINTRAC) • Sheepmeat Council of Australia.
<i>Environmental regulatory requirements</i> may include:	<ul style="list-style-type: none"> • effluent treatment or control • noise control • odours and emissions management • waste management • water management. <p>Workplace environmental policies and practices may vary.</p>
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • SOPs • the ability to perform the task to production requirements • work instructions.
<i>Work instructions, SOPs, explanations and reports</i> may:	<ul style="list-style-type: none"> • be in English • be in everyday workplace language, including some mathematical language • be in languages other than English • be presented in routine proformas using accurately copied information, symbols, numbers, abbreviations, codes and sketches • be presented orally • be routine, simple and brief • include the use of visual aids (e.g. video, OH&S signs, symbols and other pictorial presentations).
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection

RANGE STATEMENT	
	<ul style="list-style-type: none"> • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p><i>Regulatory requirements</i> may include:</p>	<ul style="list-style-type: none"> • Export Control Act • Federal, state and territory regulations regarding meat processing and the environment • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set and achieve personal goals	1.1. Personal performance standards reflect pride in achievement, commitment to customer service and enterprise requirements. 1.2. Personal goals reflect roles and responsibilities within the organisation. 1.3. Opportunities to extend personal performance and goals are identified and used. 1.4. Personal qualities and workplace relationships provide a role model to others. 1.5. Personal performance is consistent over changes in workplace conditions and contexts.
2. Establish and achieve personal work priorities	2.1. Responsibilities, duties and tasks are prioritised to achieve personal, team and organisational goals. 2.2. Work plans and schedules are developed and followed to achieve personal and enterprise targets. 2.3. Technology is used efficiently and effectively to manage work priorities and commitments. 2.4. Strategies for minimising and managing stress are implemented.
3. Maintain and update professional skills and knowledge	3.1. Personal skill and knowledge is assessed against position/job description, competency standards and personal goals to identify areas and priorities for development. 3.2. Feedback from clients, customers and colleagues is used to improve competence. 3.3. Opportunities for professional development are identified and utilised.
4. Review own work performance	4.1. Personal performance is analysed. 4.2. Personal goals are reviewed according to changing industry directions, enterprise goals and personal performance. 4.3. New skills and knowledge are identified to maintain professional excellence and competitive edge. 4.4. Strategies for achieving personal goals are prepared.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply judgement, experience and knowledge of enterprise deadlines and targets
- develop strategies for minimising and managing stress
- document professional development and training achievements
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- identify personal career path and opportunities
- keep up-to-date with enterprise procedures and processes
- make decisions within own responsibility and accountability
- manage time effectively
- participate in internal and external networks to develop own knowledge, skills and competence
- plan and sequence tasks and activities
- respond to others openly and fairly
- review own strengths, weaknesses and level of competence and identify areas for improvement
- seek and accept constructive feedback on own performance
- use relevant *communication skills*
- utilise a range of information and communication technologies to organise and complete tasks on schedule

Required knowledge

Knowledge of:

- characteristics required of an effective leader in the meat industry
- enterprise goals, directions and ethical standards and values
- how personal goals contribute to the achievement of enterprise goals
- own role in achieving organisation's goals
- potential career paths available in the industry

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in the workplace and supported by a referee's report.

Context of and specific resources for assessment

Assessment must demonstrate actual management of a work load at an appropriate level.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the ongoing implementation of the QA program in the workplace	1.1. Regulatory basis for compliance with the company's HACCP-based QA program is identified. 1.2. Nature and importance of work instructions and Standard Operating Procedures (SOPs) is identified and workers are coached in their implications. 1.3. Work instructions and SOPs are written so that they comprehensively document the details required for competent performance. 1.4. Work instructions and SOPs are reviewed for accuracy. 1.5. Implementation of work instructions and operating procedures is monitored.
2. Monitor inspection and test records	2.1. Control and critical control points in the HACCP program are identified. 2.2. Procedures for monitoring products and processes are identified and implemented, where appropriate. 2.3. Critical limits and the causes for product or process not conforming are identified. 2.4. Inspection and test records are monitored to verify product quality and to identify performance trends. 2.5. Descriptions of proposals to introduce improved processes or procedures are contained in status reports.
3. Respond to non-conforming product or processes	3.1. Procedures for taking corrective action are identified. 3.2. Corrective and preventative measures are implemented to prevent recurrence. 3.3. Procedures are devised or revised to support control measures. 3.4. Processes or conditions which could result in a breach of meat safety procedures are identified and corrective action is taken. 3.5. Process changes are introduced and controlled so that QA requirements are accomplished.
4. Review product samples and test results	4.1. Product sampling procedures are identified. 4.2. Post-collection procedures are identified according to SOPs. 4.3. Test results are reviewed and responded to in accordance with workplace requirements .

ELEMENT	PERFORMANCE CRITERIA
5. <i>Calculate</i> yield, wastage and productivity indicators	<p>5.1. Yield, wastage and productivity measures are calculated to determine performance outcomes.</p> <p>5.2. Yield, wastage and productivity measures are compared with targets to determine variation of actual from planned performance.</p>
6. Calculate <i>calibration</i> adjustments	<p>6.1. <i>Mathematical concepts</i> associated with equipment calibration are used to determine adjustment to settings.</p> <p>6.2. Calibration calculation is verified by checking the accuracy of the adjustment in the actual work performance.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply appropriate mathematical concepts and measures
- assemble product and process inspection, test and other quality data in prescribed format
- calibrate equipment accurately and verify calibrations
- communicate quality system and/or food safety system requirements clearly and precisely to workers
- determine and take corrective and preventative action
- establish and manage relevant project teams to develop and implement or update the necessary elements of the quality system and food safety system
- explain actual and potential problems evident from trend analysis
- apply the HACCP principles and the process for developing a QA or food safety program
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- interpret the results and trends of process monitoring
- prepare process and product status *reports* recommending changes to improve processes and procedures
- prepare reports using primary and summary data, and appropriate language
- use relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE

- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- utilise available technology to record, manipulate, analyse and present or report data
- verify calibrating calculations
- explain the data the enterprise uses to record performance
- interpret the resulting trends of product monitoring and testing
- monitor records and documentation for accuracy and compliance
- monitor the accurate and timely recording of quality data

Required knowledge

Knowledge of:

- workplace, **regulatory** and customer requirements critical to the workplace's operation and success
- enterprise recall and traceability procedures
- post-collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how they may be minimised
- the actual/potential problems which can occur if SOPs or work instructions or their equivalent are non-existent or not accurate
- document controls associated with a procedure change
- necessary scope of the **QA system** and food safety system to ensure requirements are met
- purpose of calibrating equipment
- purpose of SOPs and work instructions
- sampling procedure
- implementation process for a change in the process
- causes of variation and non-conformance and appropriate courses of action to rectify problems
- critical limits for enterprise product or processes
- actual and potential risks associated with uncontrolled changes in procedures
- legal obligations of the enterprise and individuals for maintenance of the QA system
- team requirements and team management processes or strategies

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in terms of current regulatory requirements.

Context of and specific resources for assessment

Assessment must involve a demonstration of skills in the workplace.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.

MTMCOR403A Participate in OHS risk control process

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to participate in the reduction of OH&S risks in a meat processing plant.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to supervisors or those with OH&S responsibilities in abattoirs, boning rooms, knackeries, game processing plants, smallgoods plants, food services operations, wholesale and retail operations.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMCOR204A	Follow safe work policies and procedures

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in workplace inspections	1.1. Group processes are facilitated to identify potential OH&S hazards. 1.2. Workplace inspections are participated in to identify potential hazards as appropriate. 1.3. Reporting obligations are fulfilled. 1.4. Risk control processes are implemented.
2. Participate in OH&S risk control process	2.1. Risk assessment processes are participated in. 2.2. Hazards are controlled in accordance with hierarchy of controls. 2.3. Workplace procedures for dealing with hazardous events are initiated. 2.4. Information is provided to relevant parties in line with action or is reported to designated personnel.
3. Monitor implementation of safe work practices	3.1. Compliance with safe work practices is demonstrated by example. 3.2. Safe work performance by employees is monitored. 3.3. Safe work practices are implemented in accordance with <i>regulatory requirements</i> .
4. Assist development of safe work practices	4.1. Changes to work procedures or Standard Operating Procedures (SOPs) are developed in line with outcomes of risk control processes and regulatory requirements. 4.2. Employees are consulted in relation to the development of safe work practices. 4.3. Employee understanding of safe work procedures on-the-job is reinforced.
5. Contribute to participative arrangements for the management of OH&S	5.1. Organisational procedures for consultation over OH&S issues are implemented and monitored to ensure that all members of the work group have the opportunity to contribute. 5.2. Issues raised through consultation are dealt with and resolved promptly or referred to the appropriate personnel for resolution in accordance with workplace procedures. 5.3. Outcomes of consultation over OH&S issues are made known to the work group promptly.
6. Contribute to workplace rehabilitation	6.1. Contributions are made to workplace rehabilitation programs in accordance with rehabilitation co-ordinator and/or rehabilitation providers

ELEMENT	PERFORMANCE CRITERIA
program as appropriate	requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate participative problem-solving techniques to identify and resolve OH&S issues
- identify and apply extent of responsibility
- identify and apply relevant *OH&S* and *workplace requirements*
- demonstrate safe work practices associated with work tasks
- identify OH&S hazards in the workplace
- identify relevant *hazard control equipment* and explain function, safe operation, maintenance and storage requirements
- use facilitation skills to ensure participation from all group members
- use relevant *communication skills*

Required knowledge

- procedures for reporting hazards, accidents and incidents
- risk management principles
- process for developing and altering work procedures or SOPs

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret statutory and workplace requirements relating to hygiene and sanitation	<p>1.1. <i>Hygiene and sanitation, regulatory and workplace requirements</i> are explained to other workers to assist their workplace performance.</p> <p>1.2. Employer and employee rights, responsibilities and obligations are implemented in achieving hygiene and sanitation compliance.</p>
2. Monitor hygiene and sanitation performance	<p>2.1. Hygiene and sanitation are monitored to workplace and statutory requirements to verify compliance.</p> <p>2.2. Situations requiring action to improve hygiene and sanitation compliance are reported as part of the continuous improvement process.</p> <p>2.3. Results of process and product monitoring are evaluated for their impact on hygiene and sanitation.</p>
3. Respond to hygiene and sanitation problems	<p>3.1. Hygiene and sanitation issues are investigated according to established processes and procedures to achieve resolution of the problem under examination.</p> <p>3.2. Recommended action arising from the investigation is followed up and reported to ensure reinforcement and <i>documentation</i> of the outcomes.</p>
4. Evaluate results of microbiological testing	<p>4.1. Results of microbiological testing are analysed in terms of regulatory and workplace requirements.</p> <p>4.2. Corrective action is taken in response to microbiological results when required by workplace and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • define the problem to be investigated • demonstrate understanding and application of HACCP systems • identify and apply <i>Occupational Health&Safety (OH&S) requirements</i> • plan approach to the investigation

REQUIRED SKILLS AND KNOWLEDGE

- evaluate the problem
- explain and monitor workplace hygiene and sanitation policies, practices and procedures
- **report** outcomes of the investigation
- follow up post-investigation issues
- identify action required to strengthen hygiene and sanitation compliance
- implement the monitoring procedures
- report monitoring outcomes
- use techniques for individual and team resolution of the problem
- use relevant **communication skills**

Required knowledge

Knowledge of:

- purpose of hygiene and sanitation monitoring
- regulatory and commercial implications of inadequate control of hygiene and sanitation
- company processes and procedures to conduct a hygiene and sanitation investigation
- employer and employee rights, responsibilities and obligations regarding hygiene and sanitation
- statutory requirements related to the site at which the person is employed

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the sequence of operations for wild game harvesting in Australia	<p>1.1. The importance of a professional image for <i>wild game</i> meat industry is explained.</p> <p>1.2. The sequence of operations from harvesting to end product is described.</p> <p>1.3. The range of <i>wild game meat products</i> produced in Australia is identified.</p> <p>1.4. The impact of <i>customer expectations</i> on the wild game harvesting process is explained.</p>
2. Interpret the commercial and regulatory environment of wild game meat harvesting	<p>2.1. The role of Australian Quarantine Inspection Service (AQIS) and relevant state and territory regulatory authorities are explained.</p> <p>2.2. The importance of the relevant approved arrangement, food safety plan or management plan is explained.</p> <p>2.3. Relevant sections of AS 4464:2007 Hygienic Production of Wild Game Meat for Human Consumption are explained.</p> <p>2.4. The nature of prohibited areas/locations for harvesting is explained.</p> <p>2.5. Auditing, review and micro-testing programs which affect the industry are described.</p>
3. Operate effectively as an individual in the wild game harvesting industry	<p>3.1. Appropriate <i>communication skills and styles are used</i>.</p> <p>3.2. Occupational Health and Safety (OH&S) hazards are identified and appropriate precautions taken.</p> <p>3.3. Time and delivery obligations are managed.</p> <p>3.4. Personal hygiene requirements are described.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use appropriate communication styles

REQUIRED SKILLS AND KNOWLEDGE

- read and interpret workplace related documentation
- maintain the professional image of the industry in the performance of duties
- learn in order to accommodate change
- collect, analyse and organise information
- work with diverse individuals and groups
- interpret the needs of internal and external customers
- monitor and evaluate own performance

Required knowledge

Knowledge of:

- application of Approved Arrangement or management plan to the individual's duties
- implications of company, regulator and international reviews of game harvesting industry
- role of the state and federal regulators
- the steps in the wild game supply chain
- markets for the wild game products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to demonstrate an understanding that the wild game industry is highly regulated and reviewed with high standards of hygiene expected by customers of both the product and workers.

Context of and specific resources for assessment

Competencies for this unit can be demonstrated either in the workplace or in a simulated environment.

Method of assessment

Assessment methods may include:

- workplace referee report
- on-the-job demonstration with assessor observation
- knowledge test
- oral and written examinations
- development of an explanatory flow chart
- preparation of a personal folio (either written or electronic) of key regulations, issues and responsibilities.

Assessment practices should take into account any

EVIDENCE GUIDE

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and maintain vehicle and equipment	1.1. Vehicle is cleaned and hygiene checked prior to harvesting operation. 1.2. <i>Consumables</i> are checked and replenished, as required. 1.3. <i>Equipment</i> is checked and maintained.
2. Load, transport and deliver to depot or processing works	2.1. Carcasses are loaded according to management plan and <i>regulatory requirements</i> . 2.2. Carcasses are loaded and transported to avoid contamination. 2.3. Delivery times are planned to meet regulatory and company requirements.
3. Unload <i>game</i> shot carcasses	3.1. Carcasses are unloaded according to management plan and regulatory requirements. 3.2. Carcasses are unloaded to minimise contamination. 3.3. Delivery times at field depots or processing plants are planned and achieved to meet regulatory and company requirements.
4. Clean truck and equipment	4.1. Vehicle is cleaned to meet regulatory requirements. 4.2. Cleaning chemicals are used that meet regulatory requirements in accordance with manufacturer instructions. 4.3. Kit and hanging pins are cleaned in accordance with the management plan. 4.4. Kit and hanging pins are stored so as to avoid contamination.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- clean vehicle and equipment to a required standard
- maintain the vehicle

REQUIRED SKILLS AND KNOWLEDGE

- operate the vehicle safely
- avoid contamination of carcasses during loading and unloading
- hang carcasses according to regulatory and corporate requirements
- plan transport to the depot to meet company and regulatory requirements
- complete required paperwork to a satisfactory standard
- use communication skills applicable to communicating with depot managers and/or processing company personnel and regulatory representatives
- clean and sanitise vehicle
- avoid contamination of kit and equipment in storage

Required knowledge

Knowledge of:

- regulations covering game harvesting vehicles
- supply of required consumables
- relevant sections of the Australian Standard
- potable water supply requirements
- lighting requirements
- hanging requirements
- importance of air flow
- regulations associated with transport, loading and unloading of carcasses
- causes of contamination during loading, transport and unloading
- methods for minimising contamination
- time requirements for refrigeration after death and sunrise
- regulatory requirements for identification and traceability of carcasses
- reporting and documentation requirements
- hygiene and sanitation during unloading
- personal hygiene Standard Operating Procedures (SOP)
- work instruction for carcase receipt
- depot requirements for receipt of carcasses
- Occupational Health and Safety (OH&S) hazards associated with handling carcasses
- Ways of minimising OH&S hazards associated with handling carcasses
- hygiene and sanitation requirements for game harvesting vehicles
- the purpose and uses of particular cleaning and sanitising chemicals
- importance of sanitising
- suitability of chemicals
- OH&S hazards associated with cleaning chemicals
- storage requirements for kit and hanging pins

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Eviscerate carcase	<p>1.1. Post-harvesting inspection is performed to identify any abnormality and disease.</p> <p>1.2. Carcases are eviscerated hygienically to company and regulatory requirements.</p> <p>1.3. A set routine for evisceration is consistently followed.</p> <p>1.4. Abnormal conditions and conditions that exclude carcases are identified.</p> <p>1.5. Hygiene between carcases is maintained.</p>
2. Inspect carcase	<p>2.1. Perform post-evisceration inspection for contamination.</p> <p>2.2. Identify diseases and conditions that exclude carcases are identified.</p> <p>2.3. Comply with trimming requirements.</p>
3. Tag animal and complete documentation	<p>3.1. Tagging requirements are accurately completed, where applicable to the species and regulatory requirement.</p> <p>3.2. Property is identified by name and/or property identification code (PIC).</p> <p>3.3. Species are identified for the purposes of completing tags</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to

- eviscerate carcases hygienically and avoid contamination
- consistently follow a set routine for evisceration
- handle knives safely and hygienically
- identify species
- read and interpret required workplace documentation
- apply numeracy skills to workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- develop practical solutions to workplace problems
- adapt to new situations
- manage time and priorities
- be open to learning and new ideas and techniques

Required knowledge

Knowledge of:

- types and causes of contamination
- trimming requirements
- relevant State Regulations
- relevant sections of the Australian Standard
- rejection and disposal processes
- hygiene and sanitation requirements
- company and regulatory requirements
- causes of contamination and cross contamination
- time requirements for evisceration
- Occupational Health and Safety (OH&S) hazards associated with the field during evisceration of game carcasses
- corporate requirements for tagging procedures
- state wildlife/conservation authority requirements for tagging
- property/location identification protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to:

- demonstrate competent evisceration of carcasses without guidance or supervision
- recognise diseases and abnormal conditions.

Context of and specific resources for assessment

This competency has to be demonstrated under actual work conditions either at a game depot or at a processing works receiving carcasses straight from the field.

Method of assessment

Methods of assessment may include:

- recognition of diseases and conditions from photographic records or preserved samples
- demonstration of evisceration in the presence of an assessor
- video record of evisceration.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Abnormal conditions</i> may include:	<ul style="list-style-type: none"> diseases and conditions injuries and wounds.
<i>Conditions that exclude carcasses</i> may include:	<ul style="list-style-type: none"> abscess or tumours (multiple) contamination (dirt, vegetable matter, faeces and ingesta) emaciation fly strike gangrene nasal and eye discharge (rabbits).
Maintenance of <i>hygiene between carcasses</i> will include:	<ul style="list-style-type: none"> hand washing cleaning of knives cleanliness of clothing.
<i>Property</i> refers to:	<ul style="list-style-type: none"> private property, farm, cattle station etc crown land.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive <i>wild game</i> meat carcasses at a depot	<p>1.1. Receiving of carcasses is managed according to depot management plan.</p> <p>1.2. <i>Tags</i> are inspected to ensure compliance with company and <i>regulatory requirements</i>.</p> <p>1.3. Paperwork associated with carcasses from each harvester's load received is checked and stored.</p>
2. Inspect game meat carcasses	<p>2.1. Carcasses are inspected for contamination and accepted or rejected according to company and regulatory requirements.</p> <p>2.2. <i>Reasons for rejection of carcasses</i> are explained to game harvester.</p> <p>2.3. Relevant records of receipt of carcasses are prepared.</p>
3. Weigh carcasses, where applicable	<p>3.1. <i>Scales</i> are <i>prepared</i> in accordance with company and regulatory requirements.</p> <p>3.2. Carcasses are weighed.</p> <p>3.3. Records are completed and stored in accordance with company and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- inspect carcasses and make accurate dispositions
- identify
 - faecal material
 - abnormal carcasses
 - enlarged or discoloured kidneys
 - slimy or smelly meat surface
 - emaciated carcasses
 - abnormal animals
 - fly strike
 - mould

REQUIRED SKILLS AND KNOWLEDGE

- unacceptable contamination by other foreign matter
- inadequate dressing (bladder left in, pluck missing, kidney(s) missing etc)
- evidence of animal welfare issues (e.g. non head-shot/brain shot)
- receive and record harvester's paperwork, where applicable
- check tags for compliance
- prepare records of carcase receipt
- communicate with game harvesters and processing companies
- weigh carcasses (where appropriate)
- read and interpret workplace related documentation
- apply numeracy skills to workplace requirements
- share information
- show independence in identifying problems
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

Required knowledge

- causes of contamination at receipt
- hygiene and Occupational Health and Safety (OH&S) risks associated with carcase receipt
- relevant sections of AS 4464:2007 Australian Standard for Hygienic Production of Wild Game Meat for Human Consumption
- identification and traceability requirements
- eligible carcasses
- tag requirements
- Shire requirements
- areas prohibited to game harvesters
- lighting lux requirements to ensure adequate inspection at night
- OH&S hazards specific to receipt

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian game meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Candidates must be able to:

- demonstrate competent receipt and inspection of carcasses without guidance or supervision
- recognise diseases and abnormal conditions and make dispositions.

Context of and specific resources for assessment

This competency has to be demonstrated under actual work conditions either at a game depot or at a processing works receiving carcasses straight from the field.

Method of assessment

Assessment methods may include;

- workplace referee report
- video record of receipt and inspection
- on-the-job demonstration with assessor observation
- knowledge test
- recognition of diseases and conditions from photographic records or preserved samples.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform pre-dressing inspection of <i>wild game</i> animal carcasses	1.1. Relevant work instructions and standard operating procedures (SOPs) are followed. 1.2. <i>Tags</i> of all carcasses are inspected for compliance. 1.3. Tags of all carcasses are inspected for determination of eligibility. 1.4. All types of <i>contamination, diseases and abnormalities</i> relevant to making a disposition are identified. 1.5. Disposition is made according to the relevant work instruction. 1.6. Carcasses are retained, where required. 1.7. Inspection results are communicated and recorded.
2. Test and record the temperature of wild game animal carcasses (where applicable to the work instruction)	2.1. Work instruction for taking carcass temperature is implemented. 2.2. Disposition is made according to work instruction for testing carcass temperature. 2.3. Sampling procedures for temperature testing are implemented. 2.4. Carcass temperature is manually tested. 2.5. Sample carcasses are retained for micro-testing, where applicable.
3. Weigh carcasses (where part of work instruction or employee's duties)	3.1. Relevant work instruction and SOPs are followed for weighing carcasses on receipt. 3.2. Scales are prepared and tared. 3.3. Carcasses are weighed. 3.4. Under weights are reported.
4. Maintain records (where part of work instruction or employee's duties)	4.1. Depot and truck temperature data logging records are retrieved and stored. 4.2. Receipt records are recorded and stored. 4.3. Reports are prepared according to workplace and <i>regulatory requirements</i> . 4.4. Issues associated with record keeping are communicated to appropriate personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- assess harvester tags for completeness, eligibility and accuracy
- assess temperature of carcasses (where required)
- identify
 - faecal material
 - ingesta
 - enlarged or discoloured kidneys
 - indication of any decomposition process
 - emaciated carcasses
 - abnormal animals
 - fly strike
 - mould
 - unacceptable contamination by other foreign matter
 - faulty dressing (bladder left in, pluck missing, kidney(s) missing etc)
 - evidence of animal welfare issues (e.g. non head-shot/brain shot)
- determine which carcase needs to be retained
- communicate and record inspection results
- ensure requirements of the work instruction have been addressed
- read and interpret workplace related documentation
- apply numeracy skills to workplace requirements
- share information
- show independence during inspection
- work without supervision
- where necessary delegate
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

Required knowledge

Knowledge of:

- relevant sections of AS 4464: 2007 Hygienic Production of Wild Game Meat for Human Consumption
- importance of the process and the need to control the unloading process to ensure adequate inspection
- relevant work instruction and Standard Operating Procedures (SOPs)

REQUIRED SKILLS AND KNOWLEDGE

- state wildlife/conservation authority requirements
- company Food Safety Approved Program requirements
- Occupational Health and Safety (OH&S) hazards associated with unloading
- lighting requirements
- temperature requirements
- sampling and temperature check procedures and reporting requirements
- micro testing arrangements
- rejection and disposal processes
- carcass retain procedures
- calibration requirements
- processes for scales preparation and carcass weighing
- weight requirements and underweight reporting procedures
- company and regulatory reporting requirements
- approved tag requirements
- inspection records requirements
- evidence of diseases and conditions
- causes of contamination
- anatomy of game animals sufficient to provide meaningful and objective feedback to harvesters and depot managers
- identification and traceability regulations/requirements
- nature of data logger information

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store <i>wild game</i> carcass product	1.1. Rails are used according to <i>workplace requirements</i> to transfer wild game carcass product into the chiller according to workplace and <i>Occupational Health and Safety (OH&S) requirements</i> . 1.2. Carcass meat product is identified and stored in appropriate area according to workplace requirements. 1.3. Carcass meat product is chilled and <i>stored</i> at correct temperature according to workplace and <i>regulatory requirements</i> . 1.4. Carcasses are spaced to achieve chilling and storage temperature requirements.
2. Perform basic refrigeration maintenance	2.1. Basic troubleshooting is performed on refrigeration units. 2.2. Chiller operation and condition is assessed. 2.3. Gas levels and defrost cycles are monitored. 2.4. Manual defrost is performed.
3. Monitor carcass temperature	3.1. Deep muscle time/temperature is monitored and recorded according to workplace requirements. 3.2. Data logger monitoring is undertaken according to regulatory and company requirements. 3.3. Thermometers are calibrated according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • work efficiently in teams and individually • measure and record temperature if part of workplace requirements • move carcass according to workplace, OH&S, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements • store carcass product according to workplace, OH&S, hygiene and sanitation, QA

REQUIRED SKILLS AND KNOWLEDGE

and regulatory requirements

- explain workplace requirements related to storing carcass product
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- handling procedures for carcass product
- hygiene and sanitation requirements related to storing carcass product
- methods of product transfer
- OH&S requirements to reduce potential risks
- potential OH&S risks related to storing carcass product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcass product
- importance of storing product at the required ambient temperature

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal operating conditions.

Context of and specific resources for assessment

Assessment must be conducted in an accredited game depot environment.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration of competency for the assessor
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Plan harvesting of <i>wild game</i> animals	<p>1.1. Anatomy and physical features of target animal are confirmed, including location of vulnerable organs of target animal.</p> <p>1.2. Location of habitats, habits and range of movements of target animal are identified.</p> <p>1.3. Timing of the harvest is determined based on the activity patterns of the target animal.</p> <p>1.4. Hazards associated with the harvest are identified in accordance with Occupational Health and Safety (OH&S) standards.</p> <p>1.5. Environmental and public safety risks associated with the harvest are identified.</p>
2. Prepare for the harvesting job	<p>2.1. Location and boundaries for the harvest are determined in accordance with the animal management plan.</p> <p>2.2. Time and duration of the harvest are checked and relevant personnel notified, where applicable.</p> <p>2.3. Precautions to minimise hazards associated with the harvest are taken in accordance with OH&S standards.</p> <p>2.4. Precautions to minimise environmental risks associated with the harvest are taken.</p> <p>2.5. Firearm licences, harvesting permits or exemptions are confirmed as current in accordance with statutory requirements.</p> <p>2.6. Firearm and ammunition types are selected to comply with those recommended for the target animal in accordance with regulatory requirements and animal ethics guidelines.</p> <p>2.7. Firearm is zeroed and test fired in accordance with industry practice.</p> <p>2.8. Firearm is stowed unloaded and in safety mode for transport.</p>
3. Harvest animals	<p>3.1. Personal Protective Equipment (PPE) is used in accordance with OH&S standards and statutory requirements.</p> <p>3.2. Firearm is carried safely with muzzle pointing in safe direction at all times in accordance with statutory requirements and industry practice.</p> <p>3.3. Firearm is loaded, discharged and unloaded safely in accordance with regulatory requirements.</p> <p>3.4. Target animal is inspected pre-harvest for suitability.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.5. Firearm is aimed at vulnerable sites on the animal according to target species.</p> <p>3.6. Each target animal is killed using a minimum of shots.</p> <p>3.7. Each target animal is checked to ensure it is dead prior to selecting the next target animal.</p> <p>3.8. Target animals that have not been killed are destroyed cleanly in a humane manner in accordance with animal welfare regulations and statutory requirements.</p> <p>3.9. Carcasses are bled in accordance with industry practice.</p>
4. Clean and store equipment and material	<p>4.1. Firearms are maintained and stored in accordance with manufacturer instructions and statutory requirements.</p> <p>4.2. Ammunition is stored in accordance with statutory requirements.</p>

Required skills

Ability to:

- identify hazards and implement safe operating procedures
- plan own work activities
- manage own time
- maintain and store weapons
- handle weapons
- ability to assess viability of shot
- use weapons to harvest accurately
- minimise animal trauma

Required knowledge

Knowledge of:

- OH&S, environment, public risk and animal welfare legislative and enterprise

REQUIRED SKILLS AND KNOWLEDGE

requirements

- common law principles relating to property, stock, duty of care and due diligence
- animal life cycles and behaviours
- anatomy and physical features of the animal
- firearms safety
- suitable firearms and ammunition for target species
- emergency procedures appropriate to the firearms handling

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- confirm the species to be harvested
- prepare and handle ammunition and weapons safely
- ensure the harvesting area is clear and notifications have been made where necessary
- shoot the animal in a body site appropriate to the target species that causes instant death and is prescribed in the relevant code of practice.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

EVIDENCE GUIDE	
	Element 3 can be assessed in the field culling game or utilising a realistic simulation in the field.
Method of assessment	<p>This unit may be assessed holistically with other units.</p> <p>The assessment strategy for this unit must verify required knowledge, skill and application using the following assessment methods:</p> <ul style="list-style-type: none"> • field assessment of harvest skills • oral/written questions • professional conversations • direct observation. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Wild game refers to:	<ul style="list-style-type: none"> • any vertebrate animal: <ul style="list-style-type: none"> • including a mammal, bird or reptile, but excluding fish; and • of a species that can be legally harvested; and • not husbanded in the manner of a farmed animal; and • is killed in the field. • and may include:

RANGE STATEMENT

	<ul style="list-style-type: none">• kangaroos• wallabies• wild boar• wild goat• possum• rabbit• hare• wild game birds.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage animals in <i>lairage</i>	1.1. Animals are received into lairage according to <i>workplace requirements</i> . 1.2. Animals in lairage are handled to minimise stress and according to workplace requirements. 1.3. Animal welfare issues in relation to the <i>handling</i> of animals in lairage are dealt with according to regulatory and workplace requirements including provision of food and water. 1.4. <i>Records of all livestock movements</i> on plant are maintained according to workplace requirements. 1.5. Animals are handled according to <i>Occupational Health and Safety (OH&S) requirements</i> .
2. Present animals for slaughter	2.1. Animals are <i>selected</i> for slaughter according to <i>product specifications</i> and workplace requirements. 2.2. Animals are <i>prepared</i> for slaughter at a rate to maintain productivity according to workplace requirements. 2.3. Animals are presented for slaughter in a suitable condition to maintain the <i>standards of product</i> . 2.4. Animals are presented for slaughter according to workplace, animal welfare, <i>regulatory</i> and OH&S <i>requirements</i> .
3. Maintain flow and order of animals	3.1. Animals are made available to meet start-up times and chain speed requirements. 3.2. Flow and order of animals is maintained according to start-up times and chain speed requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- ensure mob or lot separation and comply with regulatory or importing country's requirements

REQUIRED SKILLS AND KNOWLEDGE

- follow workplace recordkeeping procedures for receipt of animals
- keep accurate stock receipt records
- plan and maintain the flow and order of animals to meet production requirements
- move stock around pens and lairage in accordance with workplace requirements
- comply with animal welfare requirements for animals kept in lairage
- deal with sick and injured stock in accordance with workplace and regulatory requirements
- utilise stock identification systems accurately and comply with regulatory requirements related to the identification of stock
- work effectively as an individual and as part of a team
- apply relevant *communication skills*
- fulfil OH&S requirements for handling stock in lairage
- meet workplace and regulatory requirements in relation to animal welfare requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work cooperatively with other stock handlers

Required knowledge

- workplace Standard Operating Procedures (SOPs) and work instructions for animal handling
- animal welfare requirements
- regulatory and workplace requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when meeting the demands of moving stock to supply normal production requirements.

Context of, and specific resources for assessment

Assessment must be undertaken in an operating abattoir.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Lairage facilities will vary according to the species and may include:

- paddocks
- pens
- sheds
- yards.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Livestock ***handling*** methods may include the use of goads such as:

- audio
- dogs
- electrical
- mechanical.

Records of livestock movement may include:

- receivable documents
- reconciliations of livestock on hand
- slaughter data.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons

RANGE STATEMENT	
	<ul style="list-style-type: none"> • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Selection</i> of suitable livestock for slaughter may require consideration of:	<ul style="list-style-type: none"> • health status • length of lairage period • product specification.
<i>Product specification</i> may be described by:	<ul style="list-style-type: none"> • breed or type • carcass characteristics (e.g. age, sex, weight) • skin, hide or coat characteristics • species • standard of preparation and presentation.
Animal <i>preparation</i> may include:	<ul style="list-style-type: none"> • whole or partial wash down.
<i>Standards of product</i> may be described by:	<ul style="list-style-type: none"> • customer specifications • industry standards • workplace grades or classification.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • sharing information

RANGE STATEMENT	
	<ul style="list-style-type: none"> • speaking clearly and directly • working and communicating with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Feed race	1.1. <i>Animals</i> are fed into race effectively and humanely in accordance with <i>workplace</i> and <i>regulatory requirements</i> . 1.2. Goads are used in accordance with workplace requirements. 1.3. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and complied with. 1.4. Animal welfare requirements are identified and met. 1.5. Stock is segregated in accordance with work instructions. 1.6. Requirements for mob separation are identified and complied with.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- feed the race to maintain production requirements
- feed the race without causing undue stress to the animals
- maintain segregation according to workplace requirements
- maintain the flow of animals to meet production requirements
- use goads in accordance with work instructions, OH&S and animal welfare requirements
- restrain the animal to workplace and OH&S requirements
- apply relevant *communication skills*
- cooperate and communicate with other stock handlers to move stock
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- animal welfare requirements
- correct use of goads

REQUIRED SKILLS AND KNOWLEDGE

- regulatory requirements for segregation (e.g. cattle for the European Union)
- required segregation of animals
- Standard Operating Procedures (SOPs) and work instructions relevant to feeding the race
- workplace requirements related to feeding the race and the reasons for these requirements
- characteristics of breeds, sex and age of animals as they relate to work duties

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and explain <i>animal handling practices</i>	1.1. Work instructions and work practices for the welfare and handling of animals are identified. 1.2. The impact on the quality of meat of stressing and/or injuring animals is identified. 1.3. Defects in meat quality resulting from poor handling techniques of live animals are identified.
2. Identify and explain animal welfare requirements	2.1. <i>Workplace</i> and <i>regulatory requirements</i> for handling animals humanely are identified and explained. 2.2. Relevant sections of the applicable Animal Welfare Standard and relevant legislation are identified and explained.
3. Identify and explain <i>Occupational Health and Safety (OH&S) requirements</i> for handling animals safely	3.1. Risks associated with handling animals are identified. 3.2. OH&S requirements associated with handling animals are identified.
4. Identify and explain stock flow and lot identification procedures	4.1. Individual animals are identified, where appropriate, according to workplace, OH&S and regulatory requirements. 4.2. The purpose and identification of lots is explained. 4.3. Lots are identified according to workplace requirements. 4.4. The consequences of incorrect lot identification are explained. 4.5. Importance of maintaining the flow of stock for production is explained.
5. Identify and explain requirements for dealing with sick and injured stock	5.1. Workplace and regulatory requirements are explained. 5.2. Emergency kill arrangements are described.
6. Apply animal welfare and handling techniques	6.1. Animals are handled in a way that complies with workplace requirements and minimises stress. 6.2. Animals are handled safely in accordance with workplace and OH&S requirements. 6.3. Sick and injured stock are handled in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify animals *suitable for slaughter*
- accurately complete *records* of *livestock movement*
- *communicate* effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- comply with workplace procedures and requirements for handling livestock
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

Required knowledge

Knowledge of:

- workplace procedures for receipt of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on product quality, including hides and skins
- lot identification of stock and its importance with regard to trace back
- OH&S hazards of handling stock
- the relevant sections of the animal welfare standard and code
- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify <i>stock</i> requiring emergency slaughter	<p>1.1. Emergency circumstances requiring stock to be killed in lairage are identified.</p> <p>1.2. Persons with the authority to order an emergency kill are identified.</p> <p>1.3. Stock requiring emergency kill arrangements are identified correctly according to <i>workplace</i>, animal welfare and <i>regulatory requirements</i>.</p>
2. Perform emergency kill	<p>2.1. Stock requiring emergency kill arrangements are isolated according to workplace and regulatory requirements.</p> <p>2.2. Emergency kill is performed according to <i>Occupational Health and Safety (OH&S) requirements</i>.</p> <p>2.3. Emergency kill is performed according to workplace and regulatory requirements.</p> <p>2.4. Necessary documentation is completed according to workplace requirements.</p> <p>2.5. Arrangements for removal of carcase are completed according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify animals requiring emergency kill
- perform emergency kills safely and humanely in accordance within company and regulatory requirements
- comply with the regulatory and company requirements for the isolation of the identified animal, the performance of the emergency kill and disposal of the carcase
- make arrangements for the disposal of the carcase according to workplace and regulatory requirements
- follow the regulatory and company requirements for the authorisation and documentation of emergency kills

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *communication skills*
- complete relevant documentation
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- the regulatory and company requirements for the authorisation and documentation of emergency kills
- the relevant animal welfare, workplace and regulatory requirements covering emergency kills
- regulatory and company requirements for the authorisation and documentation of emergency kills
- regulatory and company requirements for the isolation of the identified animal, the performance of the emergency kill and disposal of the carcass

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Emergency kills are demonstrated as a normal part of the duties of the individual handling stock.</p>
<p>Context of, and specific resources for assessment</p>	<p>The skills component of this unit must be assessed at an operating abattoir.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment are:</p> <ul style="list-style-type: none"> • workplace demonstration • quiz of underpinning knowledge • verified work log or diary • workplace referee report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stock applies to:

- all livestock of various temperaments from very tame to wild and unused to human contact or handling procedures
- all species and breeds of livestock (also all ages) handled in an establishment for slaughter.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- all domestic and importing countries' animal welfare guides and legislation
- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Workplaces could include:

- abattoirs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • any establishment handling live animals • knackers' yards • paddocks • stockyards • transport, races and pens and knocking boxes.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and recording information • sharing information • speaking clearly and directly • working and communicating with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect calves available for collection from farms	<p>1.1. Calves are checked to meet <i>specifications for transport and slaughter</i>.</p> <p>1.2. Calves are checked to meet regulatory requirements.</p> <p>1.3. Calves not suitable for transport or slaughter are identified and rejected, where necessary.</p> <p>1.4. Reasons for rejecting calves are explained to farmers (where necessary).</p>
2. Weigh and load young calves, where applicable	<p>2.1. Calves are lifted safely and humanely onto scales.</p> <p>2.2. Calves are loaded safely onto truck or trailer.</p> <p>2.3. Weights are recorded.</p> <p>2.4. Occupational Health and Safety (OH&S) risks are identified and minimised when loading calves.</p>
3. Prepare paperwork associated with purchase of young calves	<p>3.1. National Livestock Identification System (NLIS) and National Vendor Declaration (NVD) requirements for calves to be transported are completed.</p> <p>3.2. Paperwork is prepared in accordance with company and regulatory requirements.</p>
4. Transport young calves	<p>4.1. Collection trips are planned to meet company and regulatory requirements.</p> <p>4.2. Calves are transported in accordance with company and regulatory requirements.</p> <p>4.3. Calves are monitored in transport in accordance with company and regulatory requirements.</p> <p>4.4. Appropriate action is taken to manage sick or injured calves.</p>
5. Unload calves	<p>5.1. Calves are unloaded safely and humanely according to company and regulatory requirements.</p> <p>5.2. Required paperwork is completed and presented.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to

- identify calves fit for transport and processing
- communicate to explain reasons for refusing selection of calves
- load, transport and unload bobby calves humanely, safely and hygienically
- accurately complete relevant paperwork
- plan pick up runs to meet regulatory and company requirements for time off feed
- identify and observe OH&S requirements when handling calves
- read and interpret relevant workplace documents
- share information
- manage time and priorities

Required knowledge

Knowledge of:

- relevant company and regulatory requirements
- relevant calf behaviour
- animal welfare issues associated with handling and transporting young calves
- relevant paperwork for purchasing
- record keeping requirements
- NLIS requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competencies for handling, loading, transport and unloading of calves must be demonstrated using live animals.

Context of and specific resources for assessment

Assessment must be conducted under normal operating conditions.

Method of assessment

Recommended forms of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check facilities and equipment	1.1. Required <i>facilities and equipment</i> are identified. 1.2. The work site, facilities and equipment are checked for <i>hazards</i> . 1.3. Repairs and maintenance of facilities and equipment required for the unloading of livestock are carried out or reported where necessary. 1.4. Personal Protective Equipment (PPE) and clothing is used and stored.
2. Unload <i>animals</i>	2.1. Animals are unloaded in a <i>safe manner</i> to comply with animal welfare, company and <i>regulatory requirements</i> . 2.2. Livestock is <i>identified</i> , counted and recorded according to enterprise procedures. 2.3. Workplace records are maintained according to <i>workplace</i> and regulatory requirements. 2.4. Documentation is completed according to regulatory and transporter requirements. 2.5. Agreement on condition of animals is reached with the transporter.
3. Perform appropriate animal health procedures	3.1. Stock is sorted, if required, with sick or injured stock segregated according to workplace and regulatory requirements. 3.2. Animal health treatments are performed off truck as instructed. 3.3. Animals are fed and watered to enterprise requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare equipment and working dogs (when used) for handling animals
- monitor animal behaviour and recognise irregularities

REQUIRED SKILLS AND KNOWLEDGE

- provide due care and handle animals safely and humanely
- use goads (where applicable), in accordance with work instructions, *Occupational Health and Safety (OH&S)* and animal welfare requirements
- calculate animal numbers and assess and calculate feed and water requirements
- apply relevant *communication skills*
- cooperate and communicate with others to facilitate unloading stock
- work effectively as an individual and as part of a team
- comply with relevant OH&S and animal welfare legislative requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively with others to facilitate unloading of stock

Required knowledge

Knowledge of:

- animal basic health and nutritional requirements
- animal herding and flocking behaviour
- working dogs' uses and techniques (where appropriate)
- animal handling and movement methods and techniques
- animal welfare standards
- Standard Operation Procedures (SOPs) and work instruction relevant to unloading stock
- relevant OH&S and animal welfare legislative requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence requires evidence of the ability, under supervision, to:

- safely and humanely unload animals in a calm and controlled manner
- anticipate animal behaviour
- provide and maintain appropriate animal health and nutritional requirements.

Evidence must also be demonstrated in the employment of safe workplace and positive environmental practices.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third- party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Facilities and equipment</i> may include:	<ul style="list-style-type: none"> • fixed and portable loading ramps • pens • prods • yards.
<i>Hazards</i> may include:	<ul style="list-style-type: none"> • animal movement and handling • dust • gates • moving trucks and other vehicles • solar radiation • uneven work surfaces.
<i>Animals</i> include:	<ul style="list-style-type: none"> • cattle • goats • horses • pigs • sheep.
<i>Safe manner</i> includes:	<ul style="list-style-type: none"> • animal handling including zoonoses control (e.g. Q fever)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • hazard and risk control • manual handling • outdoor work including protection from solar radiation, dust and noise • the appropriate use and maintenance of personal protective equipment.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Animal Welfare Standards • Export Control Act • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
<i>Identification</i> system used may include:	<ul style="list-style-type: none"> • tail tags • other means of identification of animals including electronic systems.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • SOPs • the ability to perform the task to production requirements • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p><i>Communication skills</i> may include:</p>	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • working and communicating with diverse individuals and groups.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify animals using electronic systems	1.1. The <i>regulatory requirements</i> for electronic identification of individual animals are identified and met. 1.2. Start-up procedures for electronic <i>readers</i> are identified and followed. 1.3. The identification and recording system is operated according to work instructions (incorporating tail tag data where appropriate). 1.4. Animals are identified electronically by scanning stock to <i>workplace requirements</i> . 1.5. Sources of errors in identification and/or malfunction of the system are explained and identified. 1.6. Consequences of incorrect identification of animals are explained.
2. Maintain, clean and monitor electronic identification system	2.1. Routine maintenance, cleaning and monitoring are undertaken according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- complete start-up procedures for electronic readers and recordings
- identify the steps in animal identification
- scan stock electronically in yards and pens (where applicable)
- operate the identification and recording system according to work instructions
- identify the sources of errors in identification and/or malfunction of the system
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *Occupational Health and Safety (OH&S)* and regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- undertake routine maintenance, cleaning and monitoring according to workplace requirements

Required knowledge

- the consequences of incorrect identification of animals
- the National Livestock Identification System (NLIS)
- the reasons for animal identification
- relevant OH&S and regulatory requirements
- the steps in animal identification

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Shackle animal	1.1. Animal is shackled in accordance with <i>workplace</i> and <i>Occupational Health and Safety (OH&S) requirements</i> . 1.2. Animal is checked for consciousness (where part of the work instruction). 1.3. Animal is hung at a height and rate suitable for next operator. 1.4. Where applicable a hoist is used according to workplace requirements. 1.5. Equipment is checked for faults in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- check all equipment for faults to allow safe operation of shackling equipment
- identify defects in shackling gear and equipment
- shackle an animal according to workplace and OH&S requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take corrective action immediately if animals are ineffectively stunned
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- OH&S requirements related to the shackling of animals
- the consequences of incorrect shackling of animals
- relevant regulatory requirements
- work instructions related to shackling animals

MTMP2013C Operate electrical stimulator

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to operate manual carcase stimulation equipment or monitor automatic carcase stimulation equipment.
------------------------	--

Application of the Unit

Application of the unit	The unit is applicable to slaughter floor operatives responsible for the operation or monitoring of manual or automatic carcase stimulators.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct pre-operational check of <i>stimulation equipment</i>	1.1. Electrical stimulation unit is regularly checked to ensure it is in good working order. 1.2. Equipment is maintained by cleaning electrodes (where applicable). 1.3. Circuit boards or cards are replaced if a fault develops (where this forms part of operator's work instructions).
2. Follow effective electrical stimulation procedures	2.1. Electrical stimulation is applied within the required time after stunning. 2.2. Constant contact with electrodes is ensured during stimulation. 2.3. <i>Occupatioanl Health and Safety (OH&S) requirements</i> are identified and met. 2.4. Stimulation is run to its full time according to the workplace or manufacturer's specifications for the type of stimulation equipment. 2.5. When using the nasal or rail methods, the carcase contact with the rubbing bar is maintained during electrical stimulation to ensure stimulation is effective. 2.6. Loss of voltage is prevented by keeping carcasses separated during stimulation. 2.7. Peak voltage levels are checked and maintained to ensure effective stimulation. 2.8. Carcase is stimulated in accordance with workplace requirements.
3. Check for ineffective stimulation	3.1. Electrical stimulation unit is checked regularly to ensure that current is maintained to specified level, stimulation is applied within specified time limits after stunning, and duration of stimulation meets workplace requirements. 3.2. Electrodes are checked to ensure they are attached during stimulation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct pre-operational checks
- conduct effective electrical stimulation of carcasses according to workplace requirements
- stimulate carcasses within the correct time after stunning
- ensure correct voltage levels are used as well as minimum and maximum stimulation times
- check for ineffective stimulation
- keep stimulation units well maintained and in good working order
- apply relevant *communication skills*
- comply with the OH&S requirements for operating electrical stimulation equipment
- work effectively as an individual and as part of a team
- apply relevant *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- the basic operations of the stimulator
- the benefits of effective stimulation
- the purpose of electrically stimulating a carcass
- events which would indicate that the stimulation is ineffective
- the relevant work instruction
- relevant regulatory and workplace requirements
- OH&S requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in the workplace at normal chain speed.

Context of, and specific resources for assessment

Assessment must be conducted in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stimulation equipment may include:

- extra low voltage (ELV)
 - nasal to leg or rail
 - nasal to rectal
 - rectal
- high voltage (HV).

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear
- requirements set out in standards and codes of

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Mark brisket	1.1. Brisket is marked according to work instructions. 1.2. Sources of contamination and cross-contamination are identified and managed according to <i>workplace requirements</i> . 1.3. <i>Occupational Health and Safety (OH&S) requirements</i> for working in and around the evisceration area are identified and complied with. 1.4. Quality Assurance (QA) requirements for scoring and marking the brisket are understood and complied with.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- mark the brisket in accordance with work instructions
- comply with OH&S requirements for marking the brisket
- work effectively as an individual and as part of a team
- apply relevant workplace and *regulatory requirements*
- apply the OH&S requirements for working in the evisceration area
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- the purpose and importance of marking the brisket in accordance with work instructions
- possible sources of contamination and cross-contamination while marking the brisket and how these are avoided
- relevant work instructions
- relevant regulatory and workplace requirements
- OH&S requirements for working in the evisceration area

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove hair, ears, eyelids and snout	1.1. Carcase is shaved correctly and ears, eyelids and snout are removed according to <i>workplace requirements</i> . 1.2. Work is performed in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> . 1.3. Ears, eyelids and snout are removed without contamination or cross-contamination in accordance with <i>hygiene and sanitation requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- shave and remove ears, eyelids, snout and trotters in accordance with workplace and OH&S requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- the purpose of a pre-evisceration trim
- the quality implications of an incorrect trim
- the work instruction for the pre-evisceration trim
- relevant regulatory requirements
- possible sources of contamination and cross-contamination and methods used to avoid these situations

Evidence Guide

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.
<i>Hygiene and sanitation requirements</i> may include:	<ul style="list-style-type: none"> relevant government regulations workplace requirements.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements relevant regulations requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Correlate heads and carcases by numbering	1.1. Heads and carcases are correlated by numbering in accordance with <i>workplace</i> and <i>regulatory requirements</i> . 1.2. Heads and carcases are numbered according to <i>Occupational Health and Safety (OH&S) requirements</i> . 1.3. Potential sources of contamination are identified and managed according to workplace requirements. 1.4. Hides are numbered where part of the task.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- number heads and carcases in accordance with work instructions
- apply *mathematical operations* to a level required for accurate numbering
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- hygiene practices for minimising contamination
- the consequences of incorrect correlation of heads and carcases
- the reasons for correlating heads and carcases
- the work instruction for numbering carcasses and heads
- potential sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment of skills needs to be conducted in the workplace.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Different types of *cuts* may:

- be used to free the extremities of the hide or pelt prior to pulling.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Hygiene and sanitation requirements may include:

- relevant government regulations
- workplace requirements.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers

MTMP2026B Remove and record tag

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to remove, dispose of and record stock identification tags.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to workers processing carcasses.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove tags	<p>1.1. Tags are removed in accordance with <i>workplace</i> and <i>regulatory requirements</i>.</p> <p>1.2. Tags are disposed of in accordance with workplace requirements.</p>
2. <i>Record tags</i>	<p>2.1. Tags are <i>recorded</i> in accordance with workplace and regulatory requirements.</p> <p>2.2. Appropriate action is taken to resolve inconsistencies and problems.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- follow work instructions for the removal of tags
- record tags accurately
- apply relevant *Occupational Health and Safety (OH&S) requirements*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* as appropriate to the task

Required knowledge

Knowledge of:

- the function and importance of tags
- the importance of maintaining correlation between carcass and tags
- the need for correct disposal of tags
- the regulations with regard to tags
- the relationship between tags and *residue testing*

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at chain speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in an abattoir.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Recording may be undertaken:

- manually or electronically

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs

RANGE STATEMENT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Shave carcase	1.1. Carcases leaving the de-hairing process are monitored to ensure de-hairing meets <i>workplace requirements</i> and defects reported (where part of work instruction). 1.2. Carcases are shaved according to work instruction. 1.3. Carcases are shaved safely according to workplace <i>Occupational Health and Safety (OH&S) requirements</i> . 1.4. Own work is monitored to ensure the effective removal of hair.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- monitor de-hairing process
- shave a carcase according to work instructions and OH&S procedures
- report problems with the de-hairing or scalding process
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- monitor own work
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.
- use *communication* skills relevant to the task

Required knowledge

Knowledge of:

- the company's Quality Assurance (QA) requirements for hair removal
- the work instructions for shaving carcasses
- relevant regulatory requirements
- the OH&S requirements for working around scalding equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed.

Context of, and specific resources for assessment

Competency must be assessed in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- assignment
- debrief
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm equipment settings	<p>1.1. Automated equipment safety guards are secured and in place.</p> <p>1.2. Equipment settings are selected and confirmed in accordance with <i>workplace</i> and <i>Occupational Health and Safety (OH&S) requirements</i>.</p>
2. Operate equipment for scalding or de-hairing	<p>2.1. Scalding or <i>de-hairing equipment</i> is powered in accordance with <i>regulatory</i> and workplace requirements.</p> <p>2.2. Scalding or de-hairing equipment is operated in accordance with workplace and manufacturer's specifications.</p> <p>2.3. Scalding or de-hairing equipment is operated in accordance with OH&S requirements.</p> <p>2.4. Equipment is operated within its capacity and the capacity of the operator.</p> <p>2.5. Carcase is scalded and de-haired to workplace requirements.</p>
3. Identify and report defects	<p>3.1. Carcases leaving the process are monitored to ensure de-hairing meets workplace requirements.</p> <p>3.2. Defects are monitored and corrective action is taken in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate and monitor de-hairer according to manufacturer's specifications and work instructions
- monitor defects in processing and take corrective action
- report defects in accordance with workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use *communication* skills relevant to the task

Required knowledge

Knowledge of:

- defects to be identified and reported in accordance with workplace requirements
- OH&S requirements of operating machinery
- potential sources of contamination and ways of preventing it
- work instructions related to operating scalding or de-hairing equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.
<i>De-hairing equipment</i> may be:	<ul style="list-style-type: none"> automated or mechanical.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements relevant regulations requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption state and territory regulations regarding meat processing
<i>Communication</i> may:	<ul style="list-style-type: none"> be spoken, written, non-verbal and include the use of signs and signals be with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties require the reading and recording of workplace information.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate whizzard knife	<p>1.1. Knife is used in accordance with <i>workplace requirements</i>.</p> <p>1.2. Knife is operated in accordance with <i>Occupational Health and Safety (OH&S) requirements</i>.</p>
2. Maintain whizzard knife	2.1. Knife is maintained according to manufacturer's specifications and work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to

- operate a whizzard knife competently and safely in accordance with the work instructions for one work station in a meat processing operation
- identify potential sources of contamination
- perform basic maintenance of the knife
- work effectively as an individual and as part of a team
- follow hygiene and sanitation procedures for the use of the knife at a particular work station
- follow OH&S procedures for the use of the knife at a particular work station
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- basic operating principles
- OH&S requirements related to using the knife
- work instructions for a particular work station
- relevant regulatory requirements
- hygiene and sanitation requirements for a particular work station

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at a work station using a cutter at normal chain speed. The pneumatic cutter must be operated for at least one workstation (e.g. cutting hocks, horns or trimming necks) at the speed of the chain.

Context of, and specific resources for assessment

Assessment must be conducted in the workplace under normal conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate circular saw	<p>1.1. Circular saw is operated in accordance with <i>workplace requirements</i>.</p> <p>1.2. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and met.</p> <p>1.3. Operating equipment is sterilised and cleaned in accordance with workplace requirements.</p> <p>1.4. Possible sources of contamination and cross-contamination are identified.</p>
2. Maintain a circular saw	<p>2.1. Circular saw is maintained according to manufacturer's specifications and workplace requirements.</p>
3. Remove horns or other off-cuts	<p>3.1. Horns or off-cuts are removed using appropriate equipment in accordance with workplace requirements.</p> <p>3.2. Off-cuts are disposed of according to workplace requirements.</p> <p>3.3. Work area is kept neat and clear of waste in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate the circular saw to workplace requirements at a work station
- demonstrate safe use of a circular saw in accordance with OH&S requirements
- demonstrate maintenance and sterilisation of circular saw
- demonstrate procedures for disposal of off-cuts
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- operation of a circular saw
- maintenance and sterilisation processes for circular saw
- procedures for disposal of off-cuts
- possible sources of contamination to the product
- maintenance requirements for circular saw
- OH&S issues associated with operating a circular saw
- work instruction for the task to be performed
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at normal production speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be carried out in an operating meat processing plant.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice etc.
<p><i>Regulatory requirements</i> may include:</p>	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements relevant regulations requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Shackle hide and/or pelt to hide and/or pelt puller	<p>1.1. Hide and/or pelt is shackled to hide and/or pelt puller in accordance with <i>workplace requirements</i>.</p> <p>1.2. Hide and/or pelt pullers, chains or belts are used in accordance with work instructions.</p>
2. Dispose of hide and/or pelt	2.1. Hide and/or pelts are despatched or disposed of, in accordance with workplace requirements (where part of work instructions).
3. Maintain and store belts and chains	3.1. Belts and chains are stored and maintained in accordance with workplace and <i>Occupational Health and Safety (OH&S) requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate the preparation of the carcase and equipment for the operation of removal of the hide and/or pelt
- store and maintain pelts and chains according to work instructions
- work effectively as an individual and as part of a team
- locate emergency switches
- keep work area neat and tidy
- follow work instructions
- perform duties in accordance with OH&S requirements
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- how hide and/or pelt puller works
- emergency switches procedures
- possible sources of contamination to carcase

REQUIRED SKILLS AND KNOWLEDGE

- consequences of incorrect clearance of hide or pelt
- ways of minimising contamination hazard
- relevant regulatory requirements
- disposal arrangements for hides and pelts
- OH&S hazards associated with working with and around the hide and/or pelt puller

Required knowledge

Knowledge of:

- basic operating principles of pneumatic sterivac equipment
- OH&S issues associated with use of sterivac equipment

REQUIRED SKILLS AND KNOWLEDGE

- consequences of not removing contamination to workplace requirements
- work instructions for operating the sterivac equipment
- relevant regulatory requirements
- potential sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be assessed at normal chain speed and over a period of time.

Context of, and specific resources for assessment

Assessment of skills must be conducted in an operating plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE	
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate de-rinder	1.1. Machinery is operated in accordance with <i>workplace requirements</i> and manufacturer's specifications. 1.2. Machinery is operated in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> . 1.3. Machinery is maintained in accordance with work instructions. 1.4. Meat cuts are monitored for defects and contamination. 1.5. Output is monitored to ensure compliance with Quality Assurance (QA) requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate the de-rinder to OH&S requirements
- operate the de-rinder to QA requirements
- operate and maintain the de-rinder in accordance with work instructions and manufacturer's specifications
- report equipment faults to supervisor either verbally or in writing in accordance with workplace procedures
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- operation of the de-rinder
- work instructions for operation of the de-rinder
- relevant regulatory requirements

REQUIRED SKILLS AND KNOWLEDGE

- potential OH&S risks
- potential sources of contamination

MTMP2049B Cure and corn product in a meat processing plant

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to cure and corn product in a meat processing plant.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers in boning rooms who are required to operate corning equipment but who do not take responsibility for the whole process including preparing meat cuts, preparing ingredients and brines as well as the corning process. If the worker is responsible for all these duties then the unit MTMPSR301B Cure and corn product is applicable.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Process <i>meat</i>	<p>1.1. Pre-operational checks are performed according to <i>workplace requirements</i>.</p> <p>1.2. Meat is cured or corned according to <i>product specifications</i>, health regulations and workplace requirements at a speed that is the same as production requirements.</p> <p>1.3. Processing is monitored regularly.</p> <p>1.4. Adjustments are made to processing as required to achieve product specifications.</p>
2. Store meat product	<p>2.1. Processed product is stored according to product specifications.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- activate processing equipment to assess its readiness for operational use
- perform running adjustments according to workplace requirements and manufacturer's specifications
- operate adjustment tools and equipment correctly
- **report** any equipment faults and adjustments required either verbally or in writing to supervisor, according to workplace procedures
- work effectively as an individual and as part of a team
- apply relevant **Occupational Health and Safety (OH&S)** and **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use **mathematical applications** relevant to the task
- use relevant **communication skills**

Required knowledge

Knowledge of:

- selection criteria for meat for curing or corning process

REQUIRED SKILLS AND KNOWLEDGE

- the meat curing process
- the term 'osmosis' in relation to the curing process
- effects of curing on shelf life and taste of product
- purpose and effect of brine on meat
- purpose of correct water temperature and correct additive sequence
- purpose and use of processing equipment used in curing and corning products
- reasons for pickling to correct pump percentage and yield requirements
- safe and correct operation of processing equipment
- conditions under which equipment may need adjusting
- relevant OH&S and regulatory requirements
- procedures for cleaning processing equipment

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated under typical production conditions and at the normal speed of production.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in an operating meat processing plant.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • brining equipment, machinery or production facility • equipment that meets safety requirements • product specifications and ingredients.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • workplace demonstration • quiz of underpinning knowledge • workplace referee report of performance over time. <p>Assessment practices should take into account any</p>

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Meat</i> may include:	<ul style="list-style-type: none"> • beef • game meat • lamb • mutton • pork • veal • other meat species or products.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Product specifications</i> may vary according to:	<ul style="list-style-type: none"> • customer and workplace requirements.
<i>Reports</i> may:	<ul style="list-style-type: none"> • be in diagrammatic, sketch, tabular and graphic formats • be presented in writing, in standard formats

RANGE STATEMENT	
	<ul style="list-style-type: none"> • be presented orally • include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory and regulations regarding meat processing.
<i>Mathematical applications</i> may include:	<ul style="list-style-type: none"> • collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • sharing information • speaking clearly and directly • working with diverse individuals.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Split heads	1.1. Pre-operational checks are performed according to <i>workplace requirements</i> . 1.2. Head splitter is operated according to work instruction and relevant Standard Operating Procedures (SOPs). 1.3. Head splitter is operated according to <i>Occupational Health and Safety (OH&S) requirements</i> . 1.4. head splitting is monitored and problems reported to supervisor. 1.5. Split head is stored according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform pre-operational checks
- operate head splitter hygienically and safely
- identify potential OH&S hazards
- store split heads hygienically according to workplace requirements
- report equipment faults to supervisor either verbally or in writing in accordance with workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

- standard of head splitting required to meet Quality Assurance (QA) requirements
- relevant work instructions and SOPs
- relevant regulatory requirements
- potential sources of contamination and measures to minimise contamination

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Trim neck	1.1. Neck is trimmed in accordance with <i>workplace requirements</i> . 1.2. Neck is trimmed in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> . 1.3. Types of contamination are identified and reported where appropriate. 1.4. Neck is trimmed to remove blood clots, stains and areas of contamination from the carcass. 1.5. Neck is trimmed effectively with minimal meat removed from the neck. 1.6. Neck is trimmed to meet customer specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate safe and hygienic neck trimming
- trim neck to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- types of contamination to be trimmed
- OH&S, hygiene and sanitation, and customer specifications related to trimming neck
- potential sources of contamination of product and how it is avoided
- relevant regulatory requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect the hindquarter of the carcass for contamination	<p>1.1. Types of contamination and their sources are identified.</p> <p>1.2. Carcass is scanned according to <i>workplace requirements</i>.</p>
2. Remove contamination	<p>2.1. Hindquarter is trimmed to remove contamination according to workplace requirements.</p> <p>2.2. Hindquarter is trimmed to remove contamination according to <i>Occupational Health and Safety (OH&S) requirements</i>.</p> <p>2.3. Ongoing contamination issues are reported according to workplace requirements.</p> <p>2.4. Trimmings are disposed of according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work effectively as an individual and as part of a team
- trim a hindquarter to remove contamination according to work instructions, hygiene and sanitation, and OH&S requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- hygiene and sanitation requirements related to inspecting the hindquarter and removing contamination
- OH&S requirements related to inspecting the hindquarter and removing contamination
- relevant *regulatory requirements*
- sources of contamination and cross-contamination in trimming

<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> listening and understanding sharing information speaking clearly and directly working with diverse individuals and groups.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements relevant regulations requirements set out in AS 4696:2002 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption state and territory regulations regarding meat processing.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect the forequarter of the carcass and remove contamination	1.1. Carcass is scanned according to <i>workplace requirements</i> . 1.2. Forequarter is trimmed to remove contamination according to workplace requirements. 1.3. Types and sources of contamination and cross-contamination in the trimmings are identified. 1.4. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and fulfilled. 1.5. Trimmings are disposed of according to workplace requirements. 1.6. Ongoing contamination issues are reported according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- trim forequarter to remove contamination according to work instructions
- comply with hygiene and sanitation requirements
- work effectively as an individual and as part of a team
- identify and apply relevant *regulatory requirements*
- identify and fulfil OH&S requirements when trimming
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- the steps involved in scanning the carcass
- hygiene and sanitation requirements
- sources of contamination and cross-contamination
- types of contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of and specific resources for assessment

Assessment must be demonstrated in meat processing plants, boning rooms, food services or wholesaling operations.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove spinal cord	1.1. Spinal cord and dura mater is removed from split carcase in accordance with the work instructions. 1.2. Removal is monitored to meet Quality Assurance (QA) specifications. 1.3. Rise and fall platform is operated according to <i>workplace requirements</i> (where part of trimmer's duties).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify spinal cord and dura mater to be removed
- remove spinal cord cleanly and safely according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- QA specifications for spinal cord removal
- reasons for the removal of the spinal cord
- relevant work instructions and *Occupational Health and Safety (OH&S) requirements*
- relevant regulatory requirements

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check scales	<p>1.1.Scales are checked regularly according to operational. procedures and state/territory regulations to ensure hot weights are accurate.</p> <p>1.2.Scales are checked to ensure they read zero after taring.</p> <p>1.3.Appropriate personnel are notified in accordance with work instructions if scales are inaccurate.</p>
2. Test weights	<p>2.1.Clean and undamaged mass are combined to determine maximum operational weight for production.</p> <p>2.2.Scale readings are recorded at a minimum of two increments to ensure scales are checked accurately.</p> <p>2.3.Test weights are certified in accordance with state regulations and <i>workplace requirements</i>.</p>
3. Record check measure	<p>3.1.All results of checking measures are accurately recorded according to workplace requirements.</p> <p>3.2.Results are verified according to workplace requirements.</p>
4. Operate carcase scales	<p>4.1.Carcases are weighed according to workplace requirements.</p> <p>4.2.Weights are recorded according to workplace requirements.</p> <p>4.3.Carcases are tagged and labelled according to workplace and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- weigh carcases and accurately complete scales records
- demonstrate the correct scale check procedure
- report equipment faults to supervisor
- record and report recorded weights information

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- concept of tare
- *regulatory requirements* of checking scales and weighing carcasses
- scale problems that can be encountered and the action required to maintain weighing standards
- possible problems for the scales operation and the appropriate corrective action
- weights recording process and where applicable the reporting process on the information gathered
- *Occupational Health and Safety (OH&S) requirements* in relation to weighing process

In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated under normal production conditions.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal working conditions.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Communication skills may include:

- applying numeracy skills to workplace requirements
- listening and understanding
- reading and interpreting workplace information
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

RANGE STATEMENT	
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

MTMP2063C Operate semi-automatic tagging machine

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to operate electronic equipment that generates carcass tags, records carcass grades and generates production reports.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to slaughter floors or load areas where carcasses are graded, weighed and tagged.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select carcase grade	1.1. Carcase is weighed and <i>labelled</i> according to <i>workplace requirements</i> .
2. Operate tag generating equipment	2.1. Codes for specific carcase category are entered into the system. 2.2. Tags are generated according to workplace requirements. 2.3. Consumables are monitored and replenished as required. 2.4. Equipment is monitored, cleaned and maintained according to workplace requirements and manufacturer's specifications. 2.5. Reports are generated, where part of work instructions.
3. Tag carcase	3.1. Carcase is tagged according to workplace requirements. 3.2. Potential sources of contamination are identified and dealt with according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- generate carcase tags according to workplace requirements
- monitor operation of equipment and stocks of consumables
- recognise, select and record information accurately according to workplace requirements
- where applicable, generate reports of recorded information
- report equipment faults to supervisor
- work effectively as an individual and as part of a team
- apply relevant *Occupational Health and Safety (OH&S) requirements* for tagging carcases
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- *regulatory requirements* for tagging carcasses
- purpose of *tagging information*
- relevant OH&S requirements for tagging carcasses
- types of tags used and information recorded

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Label or tag may include:

- automatic or handwritten ticket
- government stamp (regulation)
- roller brand
- work instructions.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption <p>state and territory regulations regarding meat processing.</p>
<i>Tag information</i> may include:	<ul style="list-style-type: none"> • 'bone in' or 'boneless' statement • category cipher, category in full, cut description in full • country of origin • date of production • generic identification (species) • meat quality statement • number of pieces • temperature requirements for chiller • trade description • type of packaging • weight • workplace in-house bar code.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct pre-operation check	<p>1.1. <i>Fat measuring equipment</i> is checked according to <i>workplace requirements</i> to ensure it is in good working order.</p> <p>1.2. Equipment is calibrated before the start of production, after each break, and whenever a blade is changed to ensure measurements are accurate.</p> <p>1.3. Instruments are checked regularly for wear at the start of each shift.</p>
2. Identify lots requiring fat measurement	<p>2.1. Lots requiring measurement are located according to workplace requirements to determine the value, market destination and yield of meat.</p> <p>2.2. Possible <i>damage</i> to the measurement site is assessed and appropriate action is taken to ensure accuracy of measurement according to workplace requirements.</p>
3. Measure the fat	<p>3.1. Fat measurements are taken according to workplace and species requirements.</p> <p>3.2. Incorrect measurements are cancelled and rectified promptly to prevent the transmission of incorrect measurements to the recording system.</p>
4. Record the fat measurement	<p>4.1. Fat measurement is compared with visual assessment of fat depth.</p> <p>4.2. Fat measurement is recorded according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • measure fat according to workplace requirements • check and maintain equipment in accordance with work instructions • observe relevant <i>Occupational Health and Safety (OH&S) requirements</i> • report equipment faults to supervisor • read, record and report measurement information

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- purpose of fat measurements and *regulatory requirements*
- relevant OH&S requirements
- sites for possible damage including hide stripper, air knife, bruising, excessive trim, wavy finish and soft siding, and appropriate actions to ensure incorrect measurements are not recorded
- *possible causes of error* in measurement such as contact plate not flat, blunt blade, bent blade, wrong site, dirty light diode and incorrect measuring action

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Label carcase to specification	1.1. Correct labels are identified. 1.2. Labels are attached to carcase according to <i>workplace</i> and <i>regulatory requirements</i> . 1.3. Stocks of labels are monitored and replenished according to workplace requirements.
2. Stamp or brand carcase to specification	2.1. Carcasses are stamped with appropriate (approved) Australian Quarantine Inspection Service (AQIS) or state meat authority stamps. 2.2. Carcasses are stamped with establishment code or identification stamp. 2.3. Carcasses are branded with workplace and/or AUS-MEAT grade brands in accordance with workplace requirements. 2.4. Stamps and brands are checked for legibility.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- differentiate between the different types of labels
- differentiate between the different types of stamps and brands
- label and stamp carcase to hygiene and sanitation requirements
- label and stamp carcase to workplace and regulatory requirements
- consistently apply brands so they are legible
- observe relevant *Occupational Health and Safety (OH&S) requirements*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*
- comply with *security arrangements* for stamps when not in use

Required knowledge

- security arrangements for stamps when not in use

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- consequences of incorrect labelling, stamping or branding
- correct methods of attaching labels
- correct methods of stamping and branding
- relevant OH&S requirements
- types of labels, stamps and brands, and when they are to be used

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Wash carcase	1.1. Carcase is washed to remove <i>foreign matter</i> and contaminants from product. 1.2. Carcase is washed to <i>workplace requirements</i> . 1.3. Carcase is washed to <i>Occupational Health and Safety (OH&S) requirements</i> . 1.4. Types and sources of potential contamination and cross-contamination are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- wash carcase to workplace requirements
- wash the carcase without causing contamination to the carcase
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- purpose of washing the carcase
- *regulatory requirements* applicable to washing carcasses
- potential for contaminating the carcase during washing
- workplace requirements for washing the carcase
- why water usage should be kept to a minimum whilst washing the carcase

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

Context of, and specific resources for assessment

Assessment must be conducted in a registered meat processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Foreign matter to be washed off may include:

- bone
- dust
- blood.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering

<ul style="list-style-type: none"> • function of the decontamination unit • requirements for monitoring and what corrective action is to be taken if the unit does not function properly • workplace and/or manufacturer operating requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal plant throughput and over a period of time.

Context of, and specific resources for assessment

Assessment must be completed in a registered processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove tenderloins	1.1. Tenderloins are removed according to the work instructions. 1.2. Tenderloins are removed safely and in accordance with workplace <i>Occupational Health and Safety (OH&S) requirements</i> . 1.3. Tenderloins are inspected for defects and contamination. 1.4. Tenderloins are trimmed or downgraded to 'inedible' where required. 1.5. Tenderloins are stored in tubs correctly, where part of the work instructions. 1.6. Knives are kept sharp.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* appropriate to the task
- take corrective actions if contamination occurs

Required knowledge

Knowledge of:

- ways to minimise contamination and cross-contamination
- relevant *regulatory requirements*
- relevant work instructions and relevant *workplace requirements*
- potential defects and contamination
- sources of contamination and cross-contamination
- relevant cutting lines

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed over a period of time.

Context of, and specific resources for assessment

Assessment has to be conducted in a registered processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear
- requirements set out in standards and codes of practice.

Communication skills may include:

- listening and understanding
- sharing information
- speaking clearly and directly
- working with diverse individuals and groups.

RANGE STATEMENT	
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
Workplace requirements may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect meat cuts for defects	<p>1.1. Types of contamination to be detected including bone chips, fibre, grease, excreta, ingesta and bruising are identified.</p> <p>1.2. Meat cuts with contamination defects are consistently detected and returned to the slicer for trimming (or trimmed by packing personnel if part of work instructions).</p> <p>1.3. Consistent contamination problems are reported promptly to the supervisor.</p>
2. Identify meat that is outside specifications	<p>2.1. Meat trimmed out-of-specification is identified and returned to trimmer for re-working (or trimmed by packing personnel if part of work instructions).</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- trim product free of defects in accordance with **workplace requirements** (where laid down in the employee's work instructions)
- inspect cuts for defects to workplace requirements
- follow the drop meat policy
- identify trim out-of-specification
- detect contamination including ingesta, excreta, rail dust, grease, bruising, bone chips and fibres
- deal with contaminated meat cuts promptly to ensure segregation from meat to be packaged or further processed
- communicate with trimmers and/or supervisors regarding defect problems as needed and accept feedback
- dispose of contaminated trimmings into inedible product tubs
- work effectively as an individual and as part of a team
- apply relevant **regulatory requirements**
- observe relevant **Occupational Health and Safety (OH&S) requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- nature and types of contaminants
- results of allowing contaminated meat to be packaged or further processed
- results of allowing out-of-specification cuts to be packaged or further processed
- workplace requirements for reporting consistent or repeated contamination of cuts or cuts out-of-specification
- relevant regulatory requirements
- relevant OH&S requirements

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check packing area	1.1. Packing area is checked for hygiene and operational requirements prior to commencing work, in accordance with work instructions.
2. Pack <i>meat product</i>	2.1. Product to be packed is selected and checked for defects according to customer and <i>workplace requirements</i> . 2.2. Corrective action is taken according to workplace requirements if product is out-of- <i>specification</i> . 2.3. Product out-of-specification is handled according to workplace requirements. 2.4. Correct packaging materials are selected according to workplace and customer requirements. 2.5. <i>Packaging</i> is checked for defects in accordance with work instructions. 2.6. Product is packed and arranged according to workplace and customer requirements. 2.7. Product is weighed according to workplace and <i>regulatory requirements</i> , if this forms part of work instructions. 2.8. Food safety hazards associated with packing are identified and minimised by preventative measures. 2.9. <i>Occupational Health and Safety (OH&S) requirements</i> for packing are identified and complied with, including safe manual handling. 2.10. Packed product is labelled according to workplace requirements (if this forms part of work instructions).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate the inspection and selection of meat products prior to packaging
- select and blend meat cuts and trimmings to meet customer specifications (where

REQUIRED SKILLS AND KNOWLEDGE

appropriate)

- pack and arrange product to workplace, customer and regulatory requirements
- accurately weigh a variety of products (where appropriate)
- inspect packaging for defects and take appropriate action
- work effectively as an individual and as part of a team
- comply with OH&S requirements for packing including safe handling
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- how a variety of products may need to be arranged for packing
- labelling requirements where relevant
- requirements for inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- packaging requirements for the range of meat products to be packaged
- workplace, customer and regulatory requirements related to packing products

1. Operate sealing machine	<p>1.1. Sealing machine is operated in accordance with <i>workplace requirements</i> and manufacturer's specifications.</p> <p>1.2. Defects are reported promptly in accordance with workplace requirements.</p>
2. Maintain sealing machine	<p>2.1. Sealing machine is maintained in accordance with manufacturer's specifications and workplace requirements.</p> <p>2.2. Consumables such as glue levels are monitored at designated intervals in accordance with workplace requirements.</p> <p>2.3. Consumables such as glue are refilled in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate the carton sealing machine in accordance with manufacturer's specifications and workplace requirements
- to operate the carton sealing machine in accordance with *Occupational Health and Safety (OH&S) requirements*
- re-load the carton sealing machine with consumables
- report equipment faults to supervisor
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- OH&S requirements related to sealing cartons

REQUIRED SKILLS AND KNOWLEDGE

- operation of the carton sealing machine
- work instructions related to sealing cartons
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal production speed.

Context of, and specific resources for assessment

Assessment must occur in a meat processing or wholesaling operation.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check scales	<p>1.1. All scales are checked regularly according to operational procedures and <i>regulatory requirements</i> to ensure hot weights are accurate.</p> <p>1.2. Scales are checked to ensure they read zero after taring.</p> <p>1.3. Appropriate personnel are notified if scales are not accurate.</p>
2. Test weights	<p>2.1. Clean and undamaged mass is combined to determine maximum operational weight for production.</p> <p>2.2. Scale readings are recorded at a minimum of two increments to ensure scales are checked accurately.</p> <p>2.3. Test weights are certified in accordance with regulatory and <i>workplace requirements</i>.</p>
3. Record check measure	<p>3.1. All results of check measures are accurately recorded according to workplace requirements.</p> <p>3.2. Results are verified according to workplace requirements.</p>
4. Weigh carton	<p>4.1. Carton is weighed and weight read.</p> <p>4.2. Net weight of carton is checked to ensure compliance with workplace requirements and customer specifications.</p> <p>4.3. Weight of carton is recorded (where this forms part of work instruction).</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • weigh cartons accurately • check carton contents against product description • accurately complete scales records • use correct scale check procedure

REQUIRED SKILLS AND KNOWLEDGE

- identify specific scales problems and specify the action required to maintain weighing standards
- report equipment faults to supervisor
- work effectively as an individual and as part of a team
- apply relevant *Occupational Health and Safety (OH&S) requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication* skills appropriate to the task

Required knowledge

- consequences of incorrect operation of scales
- enterprise and regulatory requirements for operating and testing scales
- relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Form bags	1.1. Start-up procedures are undertaken according to <i>workplace requirements</i> . 1.2. Consumables are checked to ensure minimum requirements for production are available. 1.3. Packaging specifications for the run are identified. 1.4. Bags are formed according to work instructions. 1.5. Bags are formed safely in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct start-up procedures to workplace requirements
- form bags according to workplace requirements
- operate machinery safely to OH&S requirements
- maintain supply of consumables
- report equipment faults according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- start-up and operating procedures for bag forming machinery
- relevant regulatory requirements
- hygiene requirements for forming bags
- OH&S hazards associated with machinery operation
- different packaging specifications

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Bag forming machinery must be operated to meet normal production requirements.

Context of, and specific resources for assessment

Assessment must be conducted in a processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear
- requirements set out in standards and codes of

RANGE STATEMENT	
	practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Expose all incisor teeth	1.1. Incisor teeth are exposed. 1.2. Permanent incisors are differentiated from milk teeth. 1.3. The number of permanent incisors is counted correctly. 1.4. Dentition is assessed to <i>workplace, regulatory and Occupational Health and Safety (OH&S) requirements</i> . 1.5. Sterilisation techniques are followed prior to, and during, the assessment of dentition.
2. Record the dentition	2.1. The number of permanent incisor teeth is identified and accurately recorded in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work cleanly to assess dentition and to avoid the risks of contamination of the carcase
- identify and record the number of permanent incisor teeth according to work instructions
- apply numeracy skills relevant to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- dentition as a measure of animal age
- anatomical aspects of dentition
- importance and value of accurate dentition assessment
- workplace requirements for recording dentition

- recoverable meat from head
- relevant regulatory requirements
- defects and contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal speed of the chain.

Context of, and specific resources for assessment

Assessment must be conducted in an operational slaughtering establishment.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration of competency for the assessor
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the

EVIDENCE GUIDE	
	work role.

	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Bar heads	<p>1.1. Steps involved in barring heads and removing cheek meat are identified.</p> <p>1.2. Head is barred according to <i>workplace requirements</i>.</p> <p>1.3. Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> are identified and met.</p> <p>1.4. Sources of contamination and cross-contamination are identified.</p>
2. Remove cheek meat	<p>2.1. Cheek meat is removed according to workplace requirements.</p> <p>2.2. Cheek meat is removed in accordance with OH&S requirements.</p> <p>2.3. Types and sources of contamination and cross-contamination are identified.</p> <p>2.4. Edible cheek meat is forwarded for further processing in accordance with workplace requirements.</p> <p>2.5. Trimmings or <i>defects</i> are placed in inedible bins or chutes in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- bar head according to workplace, OH&S and hygiene and sanitation requirements
- remove cheek meat according to workplace, OH&S and hygiene and sanitation requirements
- work cleanly to avoid the risks of contamination of the carcass
- correctly place edible and inedible cheek meat according to workplace and *regulatory requirements*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use communication skills appropriate to the task

Required knowledge

Knowledge of:

- hygiene and OH&S requirements
- sources of contamination and cross-contamination
- steps involved in barring heads and removing cheek meat
- uses of cheek meats

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at a rate that is the same as the speed of production.

Context of, and specific resources for assessment

Assessment must be conducted in an operating slaughtering establishment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Process <i>offal</i>	1.1. Steps involved in processing four types of offal are identified and described. 1.2. Offal is inspected and defects are identified including disease and <i>contamination</i> . 1.3. Offal is trimmed of connective tissue and other material according to <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.4. Trim is placed in the appropriate bin or chute according to workplace requirements. 1.5. Types and sources of contamination are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify contamination and defects and take corrective action
- identify defects in offal including disease (including Ovine Johne's Disease (OJD)), parasite damage and contamination
- work efficiently in teams and individually
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- wash offal (where required) according to workplace requirements

Required knowledge

Knowledge of:

- hygiene and sanitation requirements related to processing offal
- OH&S requirements related to processing offal
- relevant regulatory requirements
- sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed.

Competency must be demonstrated in processing a minimum of four (4) types of offal.

Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

MTMP2118B Overview offal processing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to develop an understanding of the processing of offal in abattoirs, the uses of offal and the hygiene, Quality Assurance (QA) and Occupational Health and Safety (OH&S) requirements for offal processing areas.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to workers employed in meat processing plants where offal is recovered, washed, trimmed and packed.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the steps in offal processing in the plant	1.1. Types of <i>offal</i> processed, their uses and markets are identified. 1.2. Steps in processing, packing and storage of offal are identified. 1.3. Types of packaging are identified. 1.4. Chutes and bins used in the offal room are identified. 1.5. Storage locations and requirements are identified.
2. Identify production requirements	2.1. <i>Production requirements</i> for offal are identified and explained. 2.2. <i>Regulatory requirements</i> and customer specifications for offal are identified. 2.3. Specific hygiene and sanitation requirements for offal processing areas are identified and explained. 2.4. Specific <i>OH&S requirements</i> for offal processing areas are identified and explained. 2.5. Types and sources of offal <i>contamination</i> are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- defects in offal and procedures for reporting defects
- importance of the storage procedures for offal
- nature and importance of customer trim specifications and grades
- uses of edible offal including for pharmaceuticals and human consumption

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed over a period of time.

Context of, and specific resources for assessment

Assessment must be conducted in an abattoir.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Offal may include:

- brain
- cheeks
- diaphragm, skirts and flares
- glands
- head meat
- heart
- kidneys
- lips
- liver
- lungs
- pancreas
- penis
- rectum
- small intestines
- spleen
- stomach(s)
- sweet runners
- tail
- tendons
- testicles
- tongue and tongue meat
- tripe
- uterus
- weasand

RANGE STATEMENT	
	<ul style="list-style-type: none"> • or any other tissue recovered for human consumption or medical uses.
<i>Production requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Trim</i> honeycomb	1.1. Defects in honeycomb are identified and trimmed. 1.2. Honeycomb is trimmed according to <i>workplace requirements</i> . 1.3. Honeycomb is trimmed according to Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.4. Trim is put in appropriate bin or chute according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- trim honeycomb and remove defects to specifications, workplace, OH&S and hygiene and sanitation requirements
- apply relevant *regulatory requirements*
- identify sources of *contamination*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- steps in tripe processing
- impact of inadequately trimmed product being packed
- relevant regulatory requirements
- sources of contamination
- honeycomb and trim specifications

1. Hang tripe	1.1. Tripe is hung according to <i>workplace requirements</i> .
2. Cut and empty paunch	2.1. Paunch is cut and contents are emptied in accordance with workplace requirements to prevent cross-contamination. 2.2. Paunch is processed in accordance with Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> .
3. <i>Trim</i> tripe to specifications	3.1. Defects are identified and trimmed in accordance with workplace requirements. 3.2. Tripe is trimmed into edible and inedible components in accordance with workplace requirements and customer specifications. 3.3. Tripe is trimmed in accordance with OH&S requirements. 3.4. Trimmed waste is placed into inedible bin or chute in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- empty and clean paunch in accordance with workplace, OH&S, hygiene and sanitation and Quality Assurance (QA) requirements
- deposit waste in correct bins and keep work area neat and tidy
- communicate and cooperate with team members to maintain constant flow of product
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- steps in tripe processing

REQUIRED SKILLS AND KNOWLEDGE

- tripe trim specifications
- consequences of inadequately trimmed product being packed
- OH&S requirements for *small stock* tripe processing
- QA requirements for small stock tripe processing
- workplace and customer tripe specifications
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed over a period of time.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify product required for <i>meat product orders</i>	<p>1.1. Products are identified and labelled in accordance with trade descriptions.</p> <p>1.2. Products are identified in accordance with company requirements.</p>
2. Check customer requirements for delivery of order	<p>2.1. Customer requirements are confirmed to determine product order <i>delivery</i> arrangements.</p> <p>2.2. Customer requirements are checked to confirm whether the order is domestic or export so as to comply with appropriate regulatory and importing country requirements.</p> <p>2.3. Temperature and storage requirements for product order are confirmed and arranged in accordance with <i>workplace requirements</i>.</p>
3. Arrange orders	<p>3.1. Products are identified for an order and chiller location is confirmed.</p> <p>3.2. Product is assembled and checked against <i>documentation</i> to ensure correct order is sent out.</p>
4. Complete documentation	<p>4.1. Despatch documentation is correctly completed either manually or electronically to workplace and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- make up meat orders correctly in accordance with workplace, Occupational Health and Safety (*OH&S*), hygiene and sanitation, Quality Assurance (QA) and *regulatory requirements*
- identify cartons and carcasses which are unsuitable for loadout
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- types of cartons and carcasses which are unsuitable for loadout
- export and domestic regulatory requirements related to the despatch of meat products
- procedures to deal with contingencies, such as incorrect orders documentation
- relevant security arrangements
- temperature requirements for despatch of product

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify product	<p>1.1. Product required for order is identified in accordance with workplace requirements and customer specifications.</p> <p>1.2. Temperature of product is correctly recorded in accordance with workplace requirements.</p> <p>1.3. Brands or labels are checked against order.</p>
2. Consolidate order	<p>2.1. Product order is checked to ensure it is complete before loading.</p> <p>2.2. Carcasses are assembled in hanging yard or carton meat is palletised in accordance with workplace and OH&S requirements, where required.</p>
3. Loadout product	<p>3.1. Order is handled in accordance with hygiene and sanitation, and food safety requirements.</p> <p>3.2. Product is loaded into transport vehicle, container or refrigerated storage in accordance with workplace requirements.</p> <p>3.3. OH&S requirements are identified and met.</p> <p>3.4. Security requirements for products (e.g. seals on trucks and containers) are met in accordance with regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- ensure that all points leading to the loadout area are open and relevant points are closed when handling carcasses on the rail
- loadout product to workplace, OH&S and regulatory requirements and customer specifications.
- use loading machinery and technology according to workplace and manufacturer's specifications
- check brands and correctly label product when part of loadout procedures
- correctly identify products

REQUIRED SKILLS AND KNOWLEDGE

- accurately record temperatures
- accurately weigh product where part of loadout procedures
- identify and comply with regulatory requirements for loadout including security arrangements for containers and trucks
- identify causes of cross contamination of carcasses during manual handling
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- OH&S, regulatory, hygiene and sanitation requirements related to loadout of product
- purpose and nature of relevant documentation
- security requirements related to loadout.
- impact of weather conditions at loadout from wild game depots e.g. rain (where applicable)

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. Required skills

Ability to:

- work efficiently in teams and individually
- measure and record temperature if part of workplace requirements
- move carcase according to workplace, OH&S, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- store carcase product according to workplace, OH&S, hygiene and sanitation, QA and regulatory requirements
- explain workplace requirements related to storing carcase product
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- handling procedures for carcase product
- hygiene and sanitation requirements related to storing carcase product
- methods of product transfer
- OH&S requirements to reduce potential risks
- potential OH&S risks related to storing carcase product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcase product
- importance of storing product at the required ambient temperature

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Carcase storage may include:

- h-bone hanging
- quartered carcase
- split carcasses
- whole carcase.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Storage area may include:

- blast freezer
- chiller
- conditioning tunnels
- freezers.

Carcase meat product may:

- include a range of species
- be identified by brands or tags.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • sharing information • speaking clearly and directly • working with diverse individuals and groups.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store carton meat product	1.1. Carton meat product is transported, racked or palletised in accordance with <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.2. Carton meat product is identified according to labelling. 1.3. Carton meat product is stored in appropriate area in accordance with workplace requirements. 1.4. Carton meat product is stored at required temperature. 1.5. Temperature is checked (if part of work instructions). 1.6. OH&S requirements related to working in <i>refrigerated areas</i> are met.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify types of product stored
- use correct handling techniques for storing carton product
- demonstrate methods of racking, palletising and transferring product in accordance with workplace, OH&S, hygiene and sanitation, and Quality Assurance (QA) requirements
- store carton product in accordance with workplace, OH&S, hygiene and sanitation, and QA requirements
- work efficiently in teams and individually
- identify and apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- OH&S requirements related to manual handling of carton meat products
- OH&S requirements related to working in refrigerated areas
- importance of storing meat at required temperature
- meat storage requirements
- possible causes of contamination of carton meat
- specific OH&S risks related to storage of carton product and working in a cold environment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

Context of and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate storage area	<p>1.1. Information containing stock location is received and applied to <i>workplace requirements</i>.</p> <p>1.2. Workplace signs, codes and labels are followed and applied to workplace standards and <i>regulatory requirements</i>.</p>
2. Identify product	<p>2.1. Product is correctly identified in accordance with workplace documentation, signs, codes, labels and brands.</p> <p>2.2. <i>Information on product location</i> is assessed either electronically or manually from company records.</p> <p>2.3. Product is checked for quality in accordance with workplace quality standards.</p>
3. <i>Check</i> product	<p>3.1. Product storage is checked to ensure workplace requirements are met.</p> <p>3.2. Product is picked, counted, consolidated, replenished or adjusted to meet workplace, customer and regulatory requirements.</p> <p>3.3. Routine problems with product storage area are identified and corrective action taken in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify any problems related to storage of products and take the corrective action detailed in work instruction
- locate storage areas for a variety of products
- identify products accurately
- work effectively as an individual and as a team member
- apply relevant Occupational Health and Safety (*OH&S requirements*)
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- purpose of product segregation
- relevant OH&S requirements
- products stored and explain their storage requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal circumstance of normal utilisation of chiller or freezer facilities.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Systems incorporating ***information on product location*** may be:

- automated
- computer-based
- manual
- paper-based.

Checking processes may include:

- estimation and calculation to count, consolidate, replenish or adjust product for, or in, storage.

RANGE STATEMENT	
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the types of offal	1.1. <i>Types of offal</i> are identified. 1.2. Sources of contamination and cross-contamination of offal are identified. 1.3. Consequences of damage or contamination of offal are explained.
2. Identify the flow of offal and processing steps on the slaughter floor	2.1. Steps for handling offal on the slaughter floor are followed. 2.2. Procedures for inspecting offal are identified. 2.3. Chutes and bins used for edible and inedible offal are identified.
3. Identify the requirements for processing offal on the slaughter floor	3.1. <i>Workplace, regulatory</i> and <i>OH&S requirements</i> for workers handling offal are identified and followed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify condemnation marks on offal
- identify edible offal
- identify the various organs processed on the viscera table
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- inspection process
- contamination to offal caused by bile, ingesta, excreta or paunch content
- procedures for the disposal of inedible offal in appropriate bins or chutes
- workplace, OH&S, hygiene and sanitation, and Quality Assurance (QA)

REQUIRED SKILLS AND KNOWLEDGE

- requirements related to processing offal on the slaughter floor
- sources of contamination
 - general uses of offal
 - impact of contamination of edible offal on further processing

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify offal	1.1. Different types of <i>offal</i> , including edible and inedible offal, are identified according to <i>workplace requirements</i> .
2. Separate offal into edible and inedible offal	2.1. Offal is separated and sorted into edible and inedible offal according to workplace requirements. 2.2. Offal that is fit for human consumption is identified and passed to appropriate area for processing according to workplace requirements. 2.3. Gall bladder is separated from liver. 2.4. Offal that may have sustained damage is washed, where applicable. 2.5. Condemned offal is identified according to inspection brands or marking. 2.6. Offal is placed in chutes or bins according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the various organs processed on the viscera table
- separate offal to hygiene and sanitation, workplace, Quality Assurance (QA) and Occupational Health and Safety (*OH&S*) *requirements*
- identify condemnation marks on offal
- handle offal to avoid bile, ingesta, excreta or content contamination
- dispose of inedible offal in appropriate bins or chutes
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- hygiene and sanitation, workplace, QA and OH&S requirements associated with separating offal on the slaughter floor
- impact of contamination of edible offal on further processing
- importance of accurate separation of offal on the viscera table
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove flares in accordance with workplace, OH&S and Quality Assurance (QA) requirements
- identify and manage defects, contamination and cross-contamination in accordance with workplace requirements
- apply relevant *regulatory requirements*
- despatch or store flares to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use communication skills appropriate to the task

Required knowledge

Knowledge of:

- uses and further processing of flares
- workplace, OH&S and QA requirements for removing flares
- possible sources of contamination and cross-contamination, and rectify problems

Evidence Guide

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recover <i>offal</i>	1.1. Identify and recover offal according to <i>workplace requirements</i> . 1.2. Recover offal safely according to workplace Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.3. Offal inspected for defects according to workplace Quality Assurance (QA) requirements. 1.4. Knife, when used, is kept sharp.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- inspect offal for defects
- recover offal according to workplace requirements
- recover offal safely according to OH&S requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- types of offal recovered
- methods of avoiding or dealing with contamination
- sources of contamination and cross-contamination
- work instructions and Standard Operating Procedures (SOPs) relevant to the recovery of offal
- relevant regulatory requirements
- types of defects and *contamination* of offal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- methods of stacking and storing animal coverings
- methods of treating animal coverings
- importance of maintaining the quality of hides processed
- storage of animal coverings and the goals of such storage
- types of defects that occur in hides, pelts and skins and what causes these defects
- uses of animal coverings
- OH&S requirements for hide or skin processing
- customer requirements for hides, pelts and skins
- steps in processing of hides, pelts and skins

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Despatch hides or skins	1.1. Hide or pelt pallets are used according to <i>workplace</i> and customer requirements. 1.2. Hide or skin is despatched according to workplace requirements. 1.3. Despatch <i>documentation</i> is completed in accordance with work and customer requirements. 1.4. Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> are identified and met.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • despatch <i>animal coverings</i> according to workplace and customer requirements • apply relevant <i>regulatory requirements</i> • comply with OH&S procedures related to handling and despatching animal coverings • work effectively as an individual and as part of a team • take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology • use relevant <i>communication skills</i>
Required knowledge
Knowledge of: <ul style="list-style-type: none"> • methods of treating animal coverings • relevant regulatory requirements • steps in processing animal coverings at the plant • OH&S procedures related to handling and despatching animal coverings

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when completing real orders.

Context of, and specific resources for assessment

Assessment must be conducted in an operating hide and/or skin processing facility.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Documentation requirements may include those of the:

- workplace, customer, regulatory and importing country.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coat and apron
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh apron
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Treat <i>hides</i> chemically	1.1. Hides are treated chemically according to the work instructions. 1.2. Hides are monitored for <i>contamination</i> and corrective action is taken, where part of work instructions. 1.3. Hides are treated chemically according to <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.4. Hides are stored after treatment in accordance with workplace requirements. 1.5. Chemical concentrations are monitored according to work instructions. 1.6. Waste water disposal is monitored according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- treat hides according to work instructions
- inspect hides for contamination, where applicable
- apply relevant *regulatory requirements*
- monitor chemicals and reservoir levels to be used in treating the hides
- store hides according to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- treat hides safely according to workplace OH&S procedures

Required knowledge

Knowledge of:

- OH&S requirements when treating hides
- OH&S hazards when treating hides

REQUIRED SKILLS AND KNOWLEDGE

- purpose of treating hides with chemicals
- work instructions for treating hides
- relevant regulatory requirements
- environmental issues and requirements when treating hides chemically
- storage requirements for hides after treatment

MTMP2162C Chemically treat skins for fellmongering process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to apply chemicals to skins in a fellmongering process.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to workers employed in a fellmongering plant.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate spray equipment	1.1. Spray equipment is operated in accordance with <i>workplace requirements</i> and manufacturer's specifications. 1.2. Spray equipment is maintained and cleaned in accordance with workplace requirements and manufacturer's specifications, where required.
2. Spray skins and prepare them for sweating	2.1. Skins are laid out for chemical treatment in accordance with workplace requirements. 2.2. Acid solutions are applied to skins in accordance with workplace requirements. 2.3. Acid solution is spread evenly over pelt (including points) in accordance with workplace requirements. 2.4. Skins are folded in accordance with workplace requirements. 2.5. Skins are kept in their mob batches for identification purposes. 2.6. Occupational Health and Safety (OH&S) hazards are identified and <i>preventative measures</i> are taken. 2.7. Environmental hazards are identified and preventative measures are taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- spray skins with chemicals in accordance with *OH&S requirements* and workplace *specifications* customer specifications
- operate spraying equipment to workplace and OH&S requirements
- cite and locate the material safety data sheets for the chemicals used and explain how they relate to the use and disposal of the chemicals
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback

REQUIRED SKILLS AND KNOWLEDGE

from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- environmental risks and controls related to the use of chemicals
- protective equipment to be used for each chemical and emergency procedures related to spills etc
- purpose of chemically treating skins in fellmongering
- relationship between concentration of chemicals and different types of skins
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at normal production speeds.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in an operating fellmongering plant.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

Preventative measures may include:

- accident prevention
- electrical fault procedures
- emergency evacuation procedures
- emergency procedures in case of injury
- equipment malfunction procedures
- hand and arm protection.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- PPE which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Specifications</i> may include:	<ul style="list-style-type: none"> • workplace • customer • grading • treatment • mathematical information
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • hygiene and sanitation requirements • relevant regulations.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare <i>chemicals</i> for fellmongering process	1.1. Chemicals for the fellmongering process are removed from storage and transported to area for mixing in accordance with <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.2. Chemicals are mixed and stored in accordance with work instructions, OH&S requirements and manufacturer's specifications. 1.3. Pumps and mixers are operated to workplace and OH&S requirements. 1.4. Chemicals are mixed to workplace and OH&S requirements in accordance with the varying requirements of different types of skins. 1.5. pH readings of the mixed chemicals are taken and checked against <i>specifications</i> . 1.6. Chemicals are used, stored and disposed of in accordance with environmental protection requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • obtain and cite the Material Safety Data Sheets for the chemicals used and explain how they relate to the use, mixing, storage and disposal of the chemicals • transport chemicals for the fellmongering process to an area for mixing in accordance with workplace and OH&S requirements • mix chemicals in accordance with work instructions, OH&S requirements and manufacturer's specifications • mix chemicals to workplace requirements in accordance with the varying requirements of different types of skins • work efficiently in teams and individually • apply relevant <i>regulatory requirements</i> • take action to improve own work performance as a result of self-evaluation,

REQUIRED SKILLS AND KNOWLEDGE

feedback from others, or in response to changed work practices or technology

- use relevant *communication skills*

Required knowledge

Knowledge of:

- OH&S requirements for mixing chemicals
- OH&S hazards associated with mixing chemicals
- environmental risks and controls related to storing, mixing and disposing of chemicals
- protective equipment to be used for each chemical and the emergency procedures related to spills etc
- purpose of chemically treating skins in fellmongering
- steps in mixing chemicals, the protective equipment needed and safety procedures
- use of different mixes of chemicals in fellmongering
- relevant regulatory requirements

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Chemicals may:

- be selected from a variety of different chemicals
- be used in different concentrations and mixes according to the requirements of a variety of skins.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Dry wool	1.1. Start-up routine for wool drier is followed in accordance with <i>workplace requirements</i> and manufacturer's <i>specifications</i> . 1.2. Wool drier is operated to workplace and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> and manufacturer's specifications. 1.3. Wool is dried to workplace requirements. 1.4. Wool is monitored for correct drying in accordance with workplace requirements. 1.5. Wool flow through drier is monitored. 1.6. Routine maintenance and cleaning is performed in accordance with workplace requirements and manufacturer's specifications. 1.7. Safety hazards are identified and explained. 1.8. OH&S requirements are identified and met.
2. Operate wool press to bale wool	2.1. Start-up procedures for wool press are followed in accordance with workplace requirements and manufacturer's specifications. 2.2. Wool is fed into wool press in accordance with work instructions. 2.3. Wool is baled in accordance with workplace requirements and customer's specifications. 2.4. Wool dryness is monitored in accordance with workplace requirements. 2.5. Fleece type and class separations are observed in accordance with workplace requirements. 2.6. Bales are branded, weighed and recorded in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

REQUIRED SKILLS AND KNOWLEDGE

- maintain separation of wool types and classes according to classer's instructions
- monitor wool for correct drying
- press wool bales to workplace requirements
- operate, maintain and clean machinery for drying and pressing wool in accordance with workplace and OH&S requirements, and manufacturer's specifications
- work efficiently in teams and individually
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- methods and goals of storage of wool bales
- purpose of drying wool
- reasons for drying and baling wool according to work instructions
- steps and importance of recording the details of the bale and its importance
- workplace and OH&S requirements and manufacturer's specifications associated with the operation of the wool drier
- relevant regulatory requirements
- OH&S hazards associated with operating a wool drier and a wool press, and *safety procedures*

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the level of usual production.

Context of, and specific resources for assessment

Assessment must be conducted in an operating fellmongering plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

Specifications may include:

- workplace
- manufacturer
- customer
- grading
- treatment
- mathematical information

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons

RANGE STATEMENT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Sweat skins	1.1. Skins are folded and hung in sweat room according to <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.2. Temperature and humidity settings are established for sweat room according to workplace requirements. 1.3. Cleanliness of hanging rooms is maintained to workplace requirements. 1.4. Quality checks are made on skins prior to removal from sweating room. 1.5. Skins are transferred from sweat rooms to wool pulling machines. 1.6. Mob separation of skins is maintained.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- check quality of the skins
- operate the sweating room in accordance with workplace and OH&S requirements
- apply relevant *regulatory requirements* and *safety procedures*
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- OH&S requirements related to sweating skins
- purpose of sweating skins
- quality *specifications* required of sweated skins prior to pulling
- steps in sweating skins
- relevant regulatory requirements and safety procedures

Unit descriptor	This unit covers the skills and knowledge required to skirt and weigh fellmongered wool.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to workers skirting fellmongered wool, then sorting and weighing the skirtings.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Skirt pulled fleeces	1.1. Fleeces are skirted in accordance with OH&S and workplace requirements . 1.2. Skirtings are segregated in accordance with classer's instructions. 1.3. Skirtings are stored in accordance with workplace requirements. 1.4. Large skin pieces are sheared, where required. 1.5. Mob separation of fleece wool is maintained. 1.6. Sample fleeces are selected and dried where required.
2. Weigh fleeces	2.1. Fleeces are weighed and results recorded, where required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify all types of wool to be skirted including bellies, legs, coloured wool and stained wool as well as skin and fat pieces
- skirt fleeces in accordance with workplace and wool classer's requirements
- maintain mob separation
- segregate skirtings in accordance with classer's instructions
- select and dry sample of fleeces where part of workplace requirements
- work efficiently in teams and individually
- apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant **communication skills**

Required knowledge

Knowledge of:

- relevant **safety procedures**

REQUIRED SKILLS AND KNOWLEDGE

- wools to be skirted from fleeces
- OH&S and Quality Assurance (QA) requirements for skirting wool
- purpose of skirting and classing
- purpose of storing fleeces in their mobs
- steps in skirting and classing fleece wool
- use of skins and pulled wool
- workplace requirements for skirting wool
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of throughput.

Context of, and specific resources for assessment

Assessment must be conducted in an operating fellmongery plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE	
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>OH&S</i> requirements may include:</p>	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • personal protective equipment (PPE): <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work instructions.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • hygiene and sanitation requirements • relevant regulations.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
<i>Safety procedures</i> may include:	<ul style="list-style-type: none"> • accident prevention • electrical fault procedures • emergency evacuation procedures • emergency procedures in case of injury • equipment malfunction procedures • hand and arm protection.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate wool puller	1.1. Perform start-up and shut-down procedures. 1.2. Operate wool puller according to work instructions. 1.3. Monitor skins to ensure wool is pulled correctly. 1.4. Operate puller according to Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> including the use of Personal Protective Equipment (PPE). 1.5. Clean and check machinery according to <i>workplace requirements</i> . 1.6. Report processing difficulties to supervisor. 1.7. Monitor wool flow to ensure no bottlenecks.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate machinery according to work instructions
- operate machinery safely
- monitor machine operations
- clean and check machinery
- report defects in machine performance
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- relevant *safety procedures*
- OH&S hazards associated with operating the wool puller
- operating requirements for pulling machine
- QA requirements for skins and pulled wool

REQUIRED SKILLS AND KNOWLEDGE

- cleaning requirements
- relevant OH&S policies and procedures
- relevant regulatory requirements

<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coat and apron
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh apron
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards, codes of practice etc.
<i>Mechanical aids</i> may include:	<ul style="list-style-type: none"> various types of paunch emptying and washing machinery
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> Export Control Act federal, state and territory regulations regarding meat processing hygiene and sanitation requirements relevant Australian Standards relevant regulations requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> listening and understanding sharing information speaking clearly and directly working with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Process slink	1.1.Slinks are collected in accordance with <i>workplace requirements</i> .
2. Process slink into <i>by-products</i>	2.1.By-products are separated for further processing according to workplace requirements. 2.2.By-products are processed for storage and packing according to workplace requirements. 2.3.By-products are processed according to Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> .
3. Package slink by-products	3.1.By-products are packaged for effective storage according to workplace requirements. 3.2.By-products are accurately labelled in preparation for storage or distribution according to customer specifications and workplace requirements. 3.3.By-products are packaged according to OH&S requirements.
4. Store by-products	4.1.By-products are stored effectively to preserve product quality according to workplace requirements. 4.2.By-products are stored according to OH&S requirements.
5. Dispose of slink carcase	5.1.Slink carcase and other wastes are disposed of according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • use vacuum pumps to recover blood (where applicable) • process slink by-products in accordance with workplace requirements and customer specifications • process slink by-products to OH&S requirements • pack and store slink by-products to workplace requirements • work effectively as an individual and as part of a team

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*.

Required knowledge

Knowledge of:

- methods of packaging slink by-products for effective storage to meet workplace requirements and customer specifications
- packaging and labelling requirements for slink by-products to meet customer specifications and workplace requirements
- procedures for processing slink by-products
- storage requirements
- uses of slink by-products
- correct disposal of slink
- OH&S requirements for processing slink
- OH&S hazards related to processing slink by-products
- relevant regulatory requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Examine meat and offal for pet meat	<p>1.1. Meat and <i>offal</i> for pet meat is inspected for <i>abnormalities</i> or defects.</p> <p>1.2. Abnormalities or defects are identified and appropriate action is taken according to <i>workplace requirements</i>.</p> <p>1.3. Infected or affected products are isolated for disposal according to <i>regulatory</i> and workplace requirements.</p>
2. Prepare meat and offal for pet meat	<p>2.1. Meat and offal is prepared for pet consumption or further processing in accordance with regulatory and workplace requirements.</p> <p>2.2. Product is trimmed and processed to meet customer specifications.</p>
3. Package and store pet meat	<p>3.1. Pet meat is packaged in tubs, bins or containers in accordance with regulatory and workplace requirements, and customer specifications.</p> <p>3.2. Pet meat is stored in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- process meat and offal for pet food in accordance with work instructions, regulatory requirements and customer specifications
- process meat and offal for pet food to workplace requirements
- identify abnormalities or defects and take appropriate corrective action
- package and store pet food in accordance with regulatory, customer and workplace requirements
- comply with Occupational Health and Safety (*OH&S*) *requirements* for the processing of pet meat
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- types of meat used for pet meat
- workplace and regulatory requirements related to the processing, packaging and storage of pet meat
- OH&S requirements for the processing of pet meat

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Skin slink	1.1.Slink is skinned according to the work instructions. 1.2.Slink is skinned safely fulfilling the Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.3.Slink skins are removed using correct cutting lines. 1.4.Slink skins are despatched or stored according to <i>workplace requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove skin according to workplace OH&S requirements and work instructions
- maintain a sharp knife
- work efficiently in teams and individually
- apply relevant *regulatory requirements*
- store skins according to workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

Required knowledge

Knowledge of:

- OH&S requirements for skinning slinks
- storage requirements for slink skins
- cutting lines and Quality Assurance (QA) requirements for slink skins
- work instructions for skinning slinks
- relevant regulatory requirements
- OH&S hazards associated with skinning slinks

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency that meets workplace requirements must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment should be conducted in a meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recover and store blood	<p>1.1. Blood is recovered hygienically according to work instructions and relevant Standard Operating Procedures (SOPs).</p> <p>1.2. Blood is recovered safely according to <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p> <p>1.3. Blood is stored prior to processing according to workplace requirements.</p>
2. Process blood	<p>2.1. Pre-operational checks on equipment are performed to workplace requirements.</p> <p>2.2. Blood is processed according to workplace requirements for hygiene.</p> <p>2.3. Blood is processed safely according to workplace OH&S policies and procedures.</p>
3. Pack and store blood <i>products</i>	<p>3.1. Blood is packed hygienically according to workplace requirements.</p> <p>3.2. Packaged blood products are stored according to workplace requirements and customer <i>specifications</i>.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- collect and process blood hygienically, safely and in accordance with:
 - relevant *regulatory requirements*
 - SOPs
 - work instructions
 - workplace OH&S requirements
- operate processing equipment in accordance with workplace and manufacturer's requirements
- use relevant workplace *machinery* correctly
- pack and store blood products according to workplace requirements
- apply relevant *mathematical* skills to ensure processing, packaging and storage

REQUIRED SKILLS AND KNOWLEDGE

requirements are met

- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- nature and uses of blood products produced
- relevant work instructions and SOPs
- ways of minimising contamination and cross-contamination
- workplace OH&S policies and procedures
- workplace and manufacturer's requirements for operating processing equipment
- OH&S hazards and ways of minimising them
- sources of contamination and cross-contamination

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Deliver material to feeder bins	1.1. Material is delivered to feeder bins in accordance with <i>workplace requirements</i> . 1.2. Material is delivered to feeder bins in accordance with Occupational Health and Safety (<i>OH&S requirements</i>) and in particular, in accordance with manual handling requirements. 1.3. Delivery of meat waste is monitored in accordance with workplace requirements. 1.4. Condemned carcasses are dealt with promptly. 1.5. Housekeeping requirements are followed in relation to work area.
2. Operate hogger	2.1. Hogger is operated in accordance with manufacturer's and workplace requirements. 2.2. Hogger is operated in accordance with OH&S requirements. 2.3. Flow of waste material to rendering plant is maintained to keep adequate levels in holding or feeder bins. 2.4. Problems associated with waste or hogger operation are promptly corrected or reported to supervisor. 2.5. Routine maintenance and cleaning is carried out in accordance with workplace requirements.
3. Monitor filling and emptying of raw material receival bins	3.1. Filling and emptying of raw material receival bins is monitored to prevent overfilling and to clear any blockages in drainage in accordance with workplace requirements.
4. Check size reduction equipment	4.1. Size reduction equipment is checked for wear in accordance with workplace requirements.
5. Operate metal detector (wet rendering) or magnet (dry rendering)	5.1. Metal detector and magnet sensitivity is checked regularly. 5.2. Metal detector or magnet is operated in accordance with workplace requirements. 5.3. Metal is removed from magnet or product.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- to operate the hogger in accordance with manufacturer's specifications and workplace requirements
- follow work instructions for the operation of the hogger
- monitor flow of waste
- follow OH&S requirements
- keep area neat and tidy
- monitor machinery gauges where fitted
- undertake routine maintenance and cleaning as specified in work instructions
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- how the hogger works
- maintenance requirements related to the hogger
- OH&S requirements related to the hogger
- reporting procedures for problems related to the hogger
- flow requirements of the by-products processing plant
- waste specifications
- relevant regulatory requirements
- disposal arrangements for condemned carcasses
- emergency switches and shut-down procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at normal chain speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal production conditions.</p>

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor waste recovery systems	1.1. System is monitored regularly to ensure solid waste is contained within the system. 1.2. System is monitored to ensure it complies with environmental and <i>workplace requirements</i> . 1.3. Environmental impact of systems failure is identified. 1.4. Corrective action is taken in response to systems failure in accordance with workplace and <i>regulatory requirements</i> .
2. Operate waste recovery systems	2.1. System is operated and monitored according to workplace requirements. 2.2. Material is recovered from waste water according to workplace requirements. 2.3. Material is disposed of in accordance with workplace requirements.
3. Maintain waste recovery systems	3.1. Waste recovery system is maintained in accordance with workplace requirements and manufacturer's specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate waste recovery systems in accordance with workplace requirements
- consistently observe Occupational Health and Safety (*OH&S requirements*)
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- operate mechanised system so that solids are not pumped into the waste system

Required knowledge

Knowledge of:

- environmental and workplace requirements related to the operation of waste

REQUIRED SKILLS AND KNOWLEDGE

recovery systems

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating facility.

Context of, and specific resources for assessment

Assessment must involve demonstrated competency monitoring a functioning waste recovery system.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Package rendered products	<p>1.1. Rendered <i>products</i> are inspected to <i>workplace requirements</i> prior to packaging.</p> <p>1.2. Rendered products are packaged to workplace requirements using correct packaging procedures and effective storage materials.</p> <p>1.3. Meat meal is packaged in bulk and/or bags, if applicable.</p> <p>1.4. Packaging and labelling is checked in accordance with customer specifications.</p> <p>1.5. Packaged products are palletised where required.</p> <p>1.6. Rendered products are packaged to Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p>
2. Despatch rendered products	<p>2.1. Products are labelled accurately, to customer specifications, in preparation for <i>storage</i>, sales or distribution.</p> <p>2.2. Products are transferred to storage areas.</p> <p>2.3. Packaged products are despatched.</p>
3. Check Quality Assurance (QA) aspects of delivery trucks	<p>3.1. QA requirements are identified for trucks leaving the plant.</p> <p>3.2. Environmental and commercial impact of a spill during transportation is identified.</p> <p>3.3. QA check of truck is undertaken according to work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- pack and despatch rendered products according to workplace and OH&S requirements
- label rendered products according to customer specifications and workplace requirements
- despatch rendered products to workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- work efficiently in teams and individually
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- OH&S hazards associated with packing and despatching by-products
- QA requirements for delivery trucks
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating rendering plant.

Context of, and specific resources for assessment

Assessment must be conducted in the workplace.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Products may include:

- blood
- fertiliser
- meat or meat and bone meal
- tallow.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Storage</i> may include:	<ul style="list-style-type: none"> • bulk bin or bagging of dry material • heated bulk tanks for wet material • sterile refrigerated bottles.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 5008:2001 Australian Standard for the Hygienic Rendering of Animal Products • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • completing workplace documentation • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency needs to be demonstrated under normal operating conditions.

Context of, and specific resources for assessment

Assessment must be conducted utilising an operating air filtration system.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Clean <i>carcass hanging equipment</i></p>	<p>1.1. Hanging equipment is rotated through cleaning, rinsing and, where applicable, oiling tanks, in accordance with workplace requirements.</p> <p>1.2. Cleaning chemicals are handled in accordance with manufacturer's specifications and Occupational Health and Safety (<i>OH&S</i>) requirements.</p> <p>1.3. Damaged spreaders etc are identified and dealt with in accordance with <i>workplace requirements</i>.</p> <p>1.4. Level and concentration of cleaning tank is monitored and adjusted to ensure complete sanitising of iron work.</p> <p>1.5. OH&S risks are identified and OH&S procedures are followed.</p> <p>1.6. OH&S requirements related to chemical and manual handling hazards are followed when loading and unloading tanks.</p> <p>1.7. Hoists are used in accordance with manufacturer's specifications, workplace and OH&S requirements.</p>
<p>2. Maintain flow of equipment cleaning process</p>	<p>2.1. Hanging equipment is inspected for damage and when necessary, sent for repair or disposal.</p> <p>2.2. Spreaders, gambles and any other hanging equipment are returned to the slaughter floor promptly.</p> <p>2.3. Spreaders, gambles and any other hanging equipment are processed and handled to avoid damage.</p> <p>2.4. Work area is kept neat and clean with clear segregation of sanitised and non-sanitised iron work.</p> <p>2.5. Difficulties encountered with maintaining the flow through the cleaning process are reported promptly to the supervisor.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE**Required skills**

Ability to:

- inspect hanging equipment thoroughly for damage
- apply correct use of *mechanical handling aids* where appropriate
- demonstrate the capacity to clean hanging equipment
- adjust cleaning materials and process to suit the *variety of materials* to be cleaned
- maintain a clean and neat work area
- follow the cleaning procedure for iron work as described in work instructions
- despatch hanging equipment promptly to slaughter floor
- maintain the flow of hanging equipment through the cleaning process
- report damage of hanging equipment requiring repair or disposal either orally or written according to work instructions
- report any difficulties to supervisor
- co-operate and communicate with team members to maintain flow through the cleaning process
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*
- work in a safe manner with due regard to the cleaning chemicals used, manual handling dangers and any other OH&S requirements

Required knowledge

- *cleaning* and sanitising process for hanging equipment
- function of hanging equipment in production
- need for adequate sanitising of the hanging equipment
- need for *oiling* of the iron work (where applicable)
- relevant regulatory requirements
- OH&S requirements for cleaning hanging equipment
- OH&S hazards and precautions of working in this area
- consequences of not returning the hanging equipment promptly to the slaughter floor
- repercussions of faulty or damaged hanging equipment returning to the slaughter floor

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when meeting the normal demands of the processing area.

Context of, and specific resources for assessment

Assessment must be undertaken at an operating meat processing plant.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration of competency for the assessor
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Transfer waste materials	<p>1.1. Different types of waste materials are identified.</p> <p>1.2. Workplace requirements for transferring waste materials to designated storage area are explained.</p>
2. Clean <i>site</i>	<p>2.1. Steps in a cleaning schedule are identified.</p> <p>2.2. Workplace and regulatory requirements related to cleaning the workplace are identified and explained.</p> <p>2.3. Health, hygiene and sanitation hazards are identified and reported according to workplace and Occupational Health and Safety (OH&S requirements).</p> <p>2.4. Housekeeping tasks are identified according to workplace and OH&S requirements.</p> <p>2.5. Appropriate cleaning equipment is identified.</p> <p>2.6. Workplace and regulatory requirements related to post-cleaning monitoring are identified.</p>
3. Use chemicals correctly	<p>3.1. Chemicals used in the workplace are identified.</p> <p>3.2. Material Safety Data Sheets (MSDS) for the chemicals and their contents are cited.</p> <p>3.3. OH&S precautions for the use, handling and storage of chemicals are explained according to manufacturer's specifications and workplace requirements.</p> <p>3.4. Chemicals are handled in accordance with OH&S requirements and manufacturer's instructions at all times.</p> <p>3.5. Chemicals are stored according to OH&S, manufacturer's and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and follow a cleaning schedule

REQUIRED SKILLS AND KNOWLEDGE

- correctly use cleaning chemicals for the work site and conditions
- correctly transfer waste materials to workplace requirements
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- steps in a cleaning program
- OH&S requirements for cleaning with chemicals
- common hazards and the importance of maintaining a sanitary work environment
- importance of correct waste disposal
- importance of cleaning the whole work area when product has been removed
- importance of following a cleaning schedule
- purpose and action of detergents and sanitisers
- workplace requirements relevant to cleaning
- equipment used to transfer waste
- factors inhibiting achieving adequate standards of cleanliness
- waste materials for transfer and explain waste transfer requirements and conditions
- housekeeping tasks to be completed according to workplace procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated for specific plant cleaning programs.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace for established cleaning programs.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality Or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Sites to be cleaned may include:

- ceilings
- chutes
- drains
- equipment
- floors
- machinery
- shields
- trays
- walls
- work surfaces.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations
- regulations relating to the use, storage and disposal of chemicals
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products

RANGE STATEMENT	
	for Human Consumption <ul style="list-style-type: none"> • state regulations regarding meat processing.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Cleaning equipment</i> may include:	<ul style="list-style-type: none"> • brooms • chemical foamers • hot or cold hoses and industrial hoses • industrial vacuum cleaners • scrub-down equipment.
<i>Chemicals</i> may include:	<ul style="list-style-type: none"> • cleaning fluids • detergents • fumigation compounds • sanitisers.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting relevant workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.

MTMP2197C Clean after operations - boning room

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean boning room	<p>1.1. Boning room is cleaned in accordance with cleaning schedule and work instructions.</p> <p>1.2. Cleaning procedures are undertaken to minimise condensation.</p> <p>1.3. Cleaning chemicals are used in accordance with manufacturer's specifications and Occupational Health and Safety (<i>OH&S</i>) requirements.</p> <p>1.4. Major areas of contamination are identified.</p> <p>1.5. Cleaning procedures meet pre-operational hygiene requirements.</p> <p>1.6. Surfaces are left free of excess moisture.</p>
2. Clean boning room machinery	<p>2.1. Machinery is isolated in accordance with workplace requirements.</p> <p>2.2. Boning room packing machinery is cleaned in accordance with workplace requirements and manufacturer specifications.</p> <p>2.3. Conveyers and elevators are isolated and cleaned.</p> <p>2.4. Electronic scales, recording and labelling machines are cleaned in accordance with workplace requirements and manufacturer's specifications.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- work effectively as an individual and as part of a team
- observe OH&S requirements for cleaning the boning room
- identify and apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant **communication skills**

REQUIRED SKILLS AND KNOWLEDGE

- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

Required knowledge

Knowledge of:

- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and OH&S requirements for boning room machinery and conveyor systems

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean slaughter floor	1.1.Slaughter floor is cleaned in accordance with cleaning schedule and work instructions. 1.2.Cleaning chemicals are used according to manufacturer's specifications and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.3.Post-cleaning monitoring is undertaken in accordance with <i>workplace requirements</i> . 1.4.Slaughter floor cleaning is conducted to OH&S requirements. 1.5.Specific areas of contamination risk for product are identified and cleaned according to workplace requirements.
2. Clean , <i>equipment and fittings</i>	2.1.Knocking or stunning area is cleaned and equipment isolated and/or immobilised. 2.2.Equipment is tagged out and immobilised during cleaning. 2.3.Machinery is isolated, stripped down, cleaned and sanitised according to work instructions. 2.4.Cleaned areas are checked according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify significant areas of contamination on slaughter floor
- clean slaughter floor effectively in accordance with cleaning program
- clean slaughter floor equipment in accordance with work instructions and OH&S requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- implications for production if slaughter floor fails to meet pre-operational check requirements
- cleaning schedule for slaughter floor
- hygiene and sanitation monitoring program for slaughter floor
- relevant regulatory requirements
- significant areas of contamination on slaughter floor
- specific OH&S risks associated with cleaning machinery on slaughter floor

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to transport <i>food</i>	1.1. Vehicles and containers or receptacles used to transport food are inspected and are appropriate for use. 1.2. Vehicles and containers or receptacles used to transport food are prepared for use. 1.3. Food is loaded and secured as required, according to product requirements and <i>workplace</i> and <i>regulatory requirements</i> .
2. Transport food	2.1. Food safety hazards are monitored and controlled as required by the food safety program to ensure that food safety is maintained during transport. 2.2. Where food safety control requirements are not met, non-conformance is promptly reported and corrective action is taken. 2.3. Food is unloaded as required according to product requirements and workplace procedures. 2.4. Food safety information is recorded to meet the requirements of the food safety program.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare to transport food, such as:
 - confirming that food holding containers or receptacles meet workplace hygiene standards
 - confirming that equipment used to maintain the required environment during transport is ready for use
 - food parameters (e.g. temperature, loading and unloading areas, and containers and receptacles) are met prior to loading, transporting and unloading
- confirm vehicle and associated equipment are ready to transport food
- load and unload food as required by work responsibility by following procedures to ensure that food is loaded and unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food

REQUIRED SKILLS AND KNOWLEDGE

or non-food items

- maintain work area and vehicles in a tidy state to meet workplace requirements
- transport food safely
- work effectively as an individual and as part of a team
- observe relevant Occupational Health and Safety (*OH&S*) *requirements*
- locate and follow workplace information relating to food safety responsibilities
- identify and implement the methods and procedures used to control food safety hazards
- monitor food safety hazards as required by workplace requirements
- record results of monitoring and maintain records as required by the food safety program
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- report non-conformance and/or unusual circumstances which could affect food safety
- take appropriate corrective action in response to failure to meet food safety requirements as required by workplace procedures
- undertake record-keeping responsibilities relating to food safety
- use relevant *communication skills*
- use work instructions to find advice on food safety responsibilities relating to own work

Required knowledge

Knowledge of:

- characteristics of food transported as they affect loading and handling of food and the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported
- procedures and responsibilities for food safety relating to own work
- non-conformance and/or unusual circumstances which could affect food safety
- microbiological, physical and chemical hazards that can occur when loading, transporting and unloading food, including the types of hazards likely to occur, the conditions under which they occur and possible consequences
- environmental conditions necessary to maintain food safety
- methods and procedures used to control food safety hazards

Evidence Guide

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Restrain animal	1.1. Animal is restrained humanely and safely in appropriate position in accordance with <i>Animal Welfare Code of Practice</i> . 1.2. Animal is restrained in correct position for stunning as required. 1.3. Animal is restrained with appropriate <i>restraining equipment</i> .
2. Operate stunning equipment	2.1. Stunning equipment is operated in accordance with <i>workplace and regulatory requirements</i> . 2.2. Stunning equipment and facilities are maintained in effective working order. 2.3. Stunning equipment is operated humanely in accordance with the Animal Welfare Code of Practice.
3. Stun the animal	3.1. Animal is stunned in accordance with Animal Welfare Code of Practice. 3.2. Animal is stunned to workplace and <i>Occupational Health and Safety (OH&S) requirements</i> . 3.3. Stun is checked, where part of work instructions, and corrective action is taken when effective stun is not achieved.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
<p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<p>Ability to:</p> <ul style="list-style-type: none"> • restrain animal effectively and safely, with minimum stress to the animal • stun animal effectively in accordance with OH&S, workplace and regulatory requirements • correctly use <i>measuring equipment</i> for voltage and/or gas levels • demonstrate procedures if stun is not effective • check, operate and maintain stunning equipment according to workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *communication* and *mathematical skills*
- report equipment faults according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- alternative *methods of stunning*
- animal welfare requirements including importing country requirements where appropriate
- purpose of stunning animal
- risks of potential contamination and cross-contamination during stunning
- OH&S consequences of not achieving an effective stun
- impact of ineffective restraining and stunning on product quality
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Animal welfare requirements may include:

- Animal Welfare Standard
- enterprise ethical standards
- European Union (EU) and other importing country animal welfare regulations
- state legislation.

Restraining equipment may include:

- catching enclosure
- double rail restrainer
- knocking (stunning) box
- 'V' belt conveyer.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat

RANGE STATEMENT	
	processing.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Measuring equipment</i> for voltage and gas levels may be:	<ul style="list-style-type: none"> • digital • analogue.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • interpreting the needs of internal and external customers • listening and understanding • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups • writing to audience needs.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • include calculation, checking and calibrating equipment • measurements relating to time, gas levels and time voltage ratios • recording malfunctions using maths symbols, figures and abbreviations.
<i>Methods of stunning</i> may include:	<ul style="list-style-type: none"> • captive bolt stunner • electric stunner

MTMP3002C Stick and bleed animal

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required for the humane, effective and hygienic bleeding of animals.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to workers in registered slaughtering establishments.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Stick and bleed</i> the animal	1.1. Major blood vessels, trachea and/or oesophagus are accurately located and identified. 1.2. Knife is used to sever the major blood vessels safely and hygienically to <i>workplace requirements</i> . 1.3. Animal is stuck in manner to avoid undue and unnecessary suffering to the animal in accordance with <i>animal welfare requirements</i> . 1.4. Incision is made exposing the trachea or oesophagus in accordance with animal welfare, <i>regulatory</i> and workplace requirements, where part of work instruction. 1.5. Sticking procedures are conducted to minimise risk of contamination to the carcass and to maintain product quality. 1.6. Threats of contamination and cross-contamination in the sticking process are identified and explained. 1.7. Animal is <i>bled in a fast and complete process</i> to avoid undue suffering. 1.8. Carcass is bled in accordance with workplace and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate effective sticking of animal in accordance with *Occupational Health and Safety (OH&S)* and workplace requirements
- maintain, clean and handle knives safely and hygienically
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- *religious requirements*, where relevant
- animal welfare considerations and animal welfare requirements
- consequences of an incomplete bleed for the quality of the product
- purpose of sticking
- purpose of a fast and complete bleed
- anatomical structures relevant to sticking, including variations between *species*
- relevant regulatory requirements
- potential causes of contamination and cross-contamination
- requirements of the Animal Welfare Code of Practice and enterprise ethical standards relating to the bleeding of animals

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at normal chain speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in a registered slaughtering establishment under normal production conditions.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stick and bleed process employed may vary.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Animal welfare requirements may include:

- Animal Welfare Code of Practice
- Enterprise ethical standards
- European Union (EU) and other importing country animal welfare requirements.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Fast and complete bleeding may

- avoiding contamination of the carcass

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • avoiding damage to the carcass • making correct incisions • sterilisation techniques.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • sharing information • speaking clearly and directly • working with diverse individuals and groups.
<i>Religious requirements</i> may include:	<ul style="list-style-type: none"> • Halal • Kosher.
<i>Species</i> may include:	<ul style="list-style-type: none"> • cattle • deer • goats • pigs • sheep.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify animal species and breeds, and their behavioural characteristics	<p>1.1. Common breeds are identified.</p> <p>1.2. Normal behavioural characteristics of relevant species are identified.</p>
2. Identify and comply with animal welfare requirements for stock handling and lairage facilities	<p>2.1. Animal welfare regulatory requirements are identified and complied with.</p> <p>2.2. <i>Workplace</i> and <i>regulatory requirements</i> for lairage are identified and confirmed as suitable for use.</p> <p>2.3. Facilities and equipment are identified and confirmed as suitable for use.</p>
3. Handle animals to achieve objective or outcome required	<p>3.1. Animals are moved and 'processed' (e.g. for ante-mortem inspection) and sorted as required by workplace and regulatory standards.</p> <p>3.2. <i>Occupational Health and Safety (OH&S) requirements</i> for handling animals are identified and complied with.</p> <p>3.3. Animals are handled appropriately to prevent injury, minimise stress and maintain the quality of hides or pelts.</p>
4. Handle <i>contingencies</i>	<p>4.1. Suspect sick or injured stock are handled in accordance with workplace and regulatory requirements.</p> <p>4.2. Wild or uncooperative animals are handled humanely without disturbing or injuring other animals or people.</p>
5. Deal with affected animals appropriately	<p>5.1. Affected animals are treated in accordance with regulatory, workplace and OH&S requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- take steps to minimise stress and injury to stock during handling procedures

REQUIRED SKILLS AND KNOWLEDGE

- handle animals humanely during ante-mortem inspection
- handle sick and injured animals in accordance with workplace and regulatory requirements
- apply emergency procedures as required
- work effectively as an individual and as part of a team
- use effective interpersonal skills in a range of contexts, including stressful situations
- comply with OH&S requirements for handling stock
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* relevant to the task

Required knowledge

Knowledge of:

- methods to handle livestock in a calm and stress-free manner
- impact of stress during handling on the ultimate pH and quality of meat
- impact of poor handling
- OH&S requirements for handling stock
- regulatory and workplace requirements for animal welfare
- documentation required for ante-mortem inspection
- regulatory requirements when dealing with animals affected by common and exotic or notifiable diseases
- procedures for dealing with animal-handling emergencies

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ring bung	<p>1.1. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and met.</p> <p>1.2. Sources of contamination and cross-contamination are identified and contamination is minimised.</p> <p>1.3. Hide is removed from around the anus and tail area in accordance with work instructions.</p> <p>1.4. Anus and vulva (bung) are cut in accordance with work instructions.</p> <p>1.5. Tissue around anus and vulva is severed and anus and vulva are freed with minimal damage.</p> <p>1.6. Dags are trimmed from around anus in accordance with work instructions, and hygiene and sanitation requirements, where this forms part of the work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove hide cleanly from around the bung and without damage, according to *workplace requirements*
- free the bung with minimal damage and contamination
- cut the bung to workplace requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory* and workplace requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- purpose of ringing the bung
- work instruction for ringing the bung

REQUIRED SKILLS AND KNOWLEDGE

- consequences of incorrectly performing this procedure
- relevant regulatory and workplace requirements
- sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must be carried out in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must be conducted in an operating processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean and prepare equipment	<p>1.1. Equipment is sterilised and checked to ensure it is in operational order according to <i>workplace</i> and <i>Occupational Health and Safety (OH&S) requirements</i>.</p> <p>1.2. Saw is cleaned and maintained according to work instructions.</p>
2. Operate saw	<p>2.1. Saw is used to split carcase according to customer specifications and workplace requirements.</p> <p>2.2. Carcase is split according to OH&S requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- split carcasses accurately and in accordance with workplace and OH&S requirements
- work effectively as an individual and as part of a team
- perform routine cleaning and maintenance as specified in the work instructions
- take action to improve own work performance as a result of self-evaluation, feedback from others, in response to changed work practices or technology
- use *communication skills* relevant to the task

Required knowledge

Knowledge of:

- routine maintenance that forms part of the work instructions for splitting the carcase
- operation of the carcase splitting saw (where applicable)
- problems caused by soft siding carcasses
- relevant work instructions and Standard Operating Procedures (SOPs)
- OH&S requirements for operating, cleaning and maintaining the saw
- *regulatory requirements*
- sources of contamination and cross-contamination for carcase splitting

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Open the pelt	<p>1.1. Pelt is opened down the inside of the hind leg from the hock to the pit area in accordance with work instructions.</p> <p>1.2. Pelt is opened applying the technique of cuts aimed outwards to minimise damage to tissue or pelt in accordance with work instructions.</p>
2. Remove udders, testicles and pizzles	<p>2.1. Pelt is opened between the tail and the cod or udder area, and pizzle and testicles or udder are removed with zero spillage in accordance with work instructions.</p>
3. Remove the pelt	<p>3.1. Pelt from the outside of the leg is removed down to the flank maintaining minimal damage to pelt or tissue in accordance with work instructions.</p> <p>3.2. Hock is removed in accordance with workplace procedures and related equipment is sterilised to avoid cross-contamination, where this forms part of the work instruction.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform legging cuts in accordance with work instructions
- direct all cuts through the pelt outwards (spear cuts)
- achieve a hide with good shape and consistency using appropriate methods
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory* and *workplace requirements*
- comply with Occupational Health and Safety (*OH&S requirements*) for the legging area
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- *equipment* sterilisation requirements
- methods used to avoid *contamination*
- impact of damage to the carcase on product quality
- consequences of cutting the muscle structure and surfaces
- relevant regulatory and workplace requirements
- OH&S requirements for the legging area
- sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal production speed.

Context of, and specific resources for assessment

Assessment must be conducted in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Split hides or pelts	<p>1.1. Hides or pelts are split correctly in accordance with work instructions.</p> <p>1.2. Hides or pelts are split avoiding <i>contamination</i> and puncturing.</p> <p>1.3. Hides or pelts are split in accordance with <i>Occupational Health and Safety (OH&S)</i> and <i>workplace requirements</i>.</p>
2. Flank the carcase	<p>2.1. Carcase is flanked in accordance with work instructions.</p> <p>2.2. Carcase is flanked using a knife or air knife with both left and right hand sides flanked.</p> <p>2.3. Carcase is flanked without damage to the hides or pelts or contamination of the carcase.</p> <p>2.4. Hides or pelts are removed from the area in accordance with OH&S requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- flank carcase in accordance with work instructions
- demonstrate correct cutting lines for flanking
- use effective knife skills
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- comply with OH&S and *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- economic impact of nicked, soiled or damaged pelt and scored meat during flanking operation
- flanking work instructions

REQUIRED SKILLS AND KNOWLEDGE

- OH&S and regulatory requirements
- potential sources of contamination and cross-contamination
- procedures for maintenance, cleaning and sterilisation of knives

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed.

Context of, and specific resources for assessment

Assessment must be conducted in an operating processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Contamination may include:

- chain fall out
- contents of intestines
- dust
- excreta
- hair
- water.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear
- requirements set out in standards and codes of

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at the normal chain speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in an operating processing plant.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements.
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Contaminants</i> may:	<ul style="list-style-type: none"> • be removed by cutting or washing • include: <ul style="list-style-type: none"> • abscesses • hair • ingesta.
<i>Equipment</i> may include:	<ul style="list-style-type: none"> • gas burners for singeing • mechanical de-hairers • scalding vat • scrapers.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and writing workplace information • speaking clearly and directly • sharing information • working with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean and prepare equipment	<p>1.1. Equipment is cleaned and prepared according to <i>workplace requirements</i>.</p> <p>1.2. Routine maintenance and checks are performed according to work instructions.</p>
2. Position carcase	<p>2.1. Carcase is positioned and attached to pelt puller according to work instructions and <i>Occupational Health and Safety (OH&S) requirements</i>.</p>
3. Operate pelt puller	<p>3.1. Pelt puller is started and operated according to work instructions.</p> <p>3.2. OH&S requirements are identified and complied with.</p> <p>3.3. Operation of puller is monitored and damage to the carcase or pelts reported to the supervisor.</p> <p>3.4. Pelts are disposed of in accordance with work instructions.</p> <p>3.5. Work area is kept neat and tidy and clear of pelts.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate a pelt puller to workplace standards
- apply relevant OH&S and *regulatory requirements*
- report defective operation of puller clearly, accurately and promptly
- report malfunctions of puller or pelt removal not achieving workplace requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take corrective action as specified in work instructions

Required knowledge

- general operation of the puller

REQUIRED SKILLS AND KNOWLEDGE

- work instructions for the operation and routine maintenance of the pelt puller
- relevant OH&S and regulatory requirements
- emergency procedures relating to pelt puller and positioning of carcase
- potential for contamination and cross-contamination and the required corrective actions

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment	1.1. Equipment is prepared and checked for operation according to <i>workplace requirements</i> .
2. Position carcase	2.1. Carcase is chained according to workplace and <i>Occupational Health and Safety (OH&S) requirements</i> . 2.2. Chains (hide puller) are attached to hide, where this forms part of work instructions. 2.3. Opening cuts are completed, where this forms part of work instructions.
3. Operate hide puller	3.1. Hide puller is operated to work instructions. 3.2. Rise and fall platform is operated to workplace requirements, where this forms part of work instructions. 3.3. Knife or air knife is used to ensure hide removal is carried out without damage to hide or carcase. 3.4. Compliance with OH&S requirements is achieved. 3.5. Hide is lowered and disconnected from chain, where this forms part of work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- position carcase securely and safely, where part of work instructions
- comply with OH&S requirements
- operate a hide puller according to workplace requirements
- operate a hide puller to achieve a hide with good shape and consistency
- remove hide without damage to carcase
- use correct maintenance procedures for hide pulling equipment
- report defects when hides are not coming off cleanly to supervisor in accordance with workplace requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- general operation of the puller
- work instructions
- potential for contamination and cross-contamination
- relevant regulatory requirements
- maintenance requirements for hide puller
- OH&S issues related to the operation of the hide puller

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Position carcase	1.1. Carcase is secured according to <i>workplace requirements</i> .
2. Complete opening cuts	2.1. Leg is cut so that all cuts to the pelt are directed outwards, where this forms part of work instructions. 2.2. Pockets are punched down each flank without damage to muscles or selvedge (where this forms part of work instructions). 2.3. Pelt is pulled from the carcase without damage or loss of value to either the carcase or the pelt (where this forms part of work instructions).
3. Clean covering from carcase	3.1. Covering is removed completely without damage to the subcutaneous fat cover. 3.2. Covering is disposed of in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove the pelt cleanly and in accordance with work instructions
- apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- work cleanly and avoid the risks of contamination to the carcase
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- procedure for trimming of contaminants
- potential for contamination and cross-contamination
- relevant OH&S and regulatory requirements
- work instructions

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Position carcase	1.1. Carcase is positioned correctly in cradle to provide good access by operators in accordance with <i>workplace requirements</i> . 1.2. Carcase is positioned in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> .
2. Complete opening cuts	2.1. Opening cuts are performed in accordance with workplace requirements. 2.2. OH&S requirements are identified and met. 2.3. Hide is split correctly from the udder/cod and to the point of the brisket with outward cuts to avoid <i>contamination</i> and puncturing. 2.4. Carcase is flanked with both left and right sides split from the flank to the shoulder area. 2.5. Opening cuts are carefully made around both forelegs with incision from pit to hock. 2.6. Hide is cleared from both forelegs in accordance with workplace procedures. 2.7. Hide is opened to the neck along the length of the brisket. 2.8. Hide is cleared from both sides of neck and deep into the neck and shoulders clearing the brisket.
3. Remove hide	3.1. Hide is removed employing measures and techniques to avoid damage to, or contamination of, carcase. 3.2. Hide is disposed of in accordance with workplace requirements. 3.3. All operations are performed in accordance with OH&S requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- position carcase correctly in the cradle
- remove hide without damage to hide or carcase
- bed dress carcase according to work instructions
- work with bed dressing partner to remove hide smoothly and safely (where applicable)
- apply relevant OH&S and *regulatory requirements*
- operate, clean and maintain *equipment* according to workplace requirements
- apply relevant *communication skills*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- general economic impact of nicked, soiled or damaged hide and scored meat
- importance of correctly placing carcase in cradle
- relevant work instructions
- relevant OH&S and regulatory requirements
- general anatomy of carcase relevant to the task

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal production speed.

Context of, and specific resources for assessment

Assessment must occur in a registered meat processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements.
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing
 - work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove <i>internal organs and tissues</i>	1.1. Organs and tissues to be removed are identified. 1.2. Pluck is removed without contaminating the carcase and in accordance with work instructions. 1.3. Digestive tract is removed in accordance with work instructions. 1.4. Organs are presented for inspection according to <i>regulatory requirements</i> . 1.5. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and complied with. 1.6. Sources of contamination and cross-contamination are identified. 1.7. Corrective action is taken in the event of contamination in line with <i>workplace requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- open carcase and remove internal organs to workplace and regulatory requirements
- use secure *sealing procedures* to avoid fouling the carcase (where this forms part of work instruction)
- apply relevant OH&S requirements
- comply with OH&S requirements
- apply relevant *communication skills*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work with team members to ensure offal is presented correctly for inspection

Required knowledge

Knowledge of:

- procedures for safe and hygienic use of knife
- work instructions, including corrective action requirements
- relevant OH&S requirements

REQUIRED SKILLS AND KNOWLEDGE

- potential risks of contamination and cross-contamination of the carcase and the required steps for corrective action
- relevant anatomy of the species, breed, sex and age of the animal being processed

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internal organs and tissues may be those associated with:

- glands
- nervous system
- renal system
- reproductive and digestive systems
- respiratory and circulatory systems.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- federal, state and territory regulations regarding meat processing.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear

RANGE STATEMENT	
	<ul style="list-style-type: none"> • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • hygiene and sanitation requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Sealing procedures</i> may include the use of:	<ul style="list-style-type: none"> • elastrator ring • knot • plastic clip • string tie.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • speaking clearly and directly • sharing information • working with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare, clean and maintain equipment	<p>1.1. Pre-operational checks of equipment are completed according to <i>workplace requirements</i>.</p> <p>1.2. Routine cleaning, sterilisation and maintenance are performed in accordance with work instructions.</p>
2. Operate brisket saw/scissors	<p>2.1. Brisket saw or scissors is positioned in the score mark at the top of the brisket in accordance with work instructions.</p> <p>2.2. Score mark is followed to the base of the brisket using the brisket saw or cutter with no damage to the rib cavity or internal organs in accordance with work instructions.</p> <p>2.3. <i>Occupational Health and Safety (OH&S) requirements</i> are identified and complied with.</p> <p>2.4. Corrective action procedures are followed in accordance with work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- cut brisket correctly in accordance with work instruction
- apply relevant *regulatory requirements*
- report equipment faults to supervisor in accordance with workplace requirements
- take corrective action as required
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- maintain, clean and sterilise brisket saw, cutter or scissors in accordance with work instructions
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- corrective action if contamination or cross-contamination of the carcass occurs
- OH&S requirements related to operating brisket saw, cutter or scissors
- operation of brisket saw cutter or scissors
- potential sources of contamination or cross-contamination
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

Context of, and specific resources for assessment

Assessment must occur in a registered meat processing plant or facility.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove the internal organs and tissues left in the <i>game shot carcase</i>	1.1. Organs and tissues to be removed are identified. 1.2. Pluck is removed without contaminating the carcase in accordance with work instructions. 1.3. Organs are presented for inspection according to regulatory requirements . 1.4. Occupational Health and Safety (OH&S) requirements are identified and complied with. 1.5. Sources of contamination and cross-contamination are identified. 1.6. Corrective action taken is in the event of contamination in line with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove internal organs to **workplace** and regulatory requirements
- follow procedures for presenting offal for inspection
- apply relevant **communication skills**
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- regulatory requirements applying to evisceration of game shot carcase
- purpose and method of presenting offal for inspection
- relevant work instructions
- organs to be removed
- potential risks of contamination and cross-contamination of the carcase and the required steps for corrective action

MTMP3044B Drop sock and pull shoulder pelt

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to perform the opening cut drop sock and pull shoulder pelt on sheep and goats.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to the slaughter floor task involving the freeing of the pelt from the forequarter of sheep or goats.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Open pelt	<p>1.1. Pelt is opened in accordance with <i>workplace requirements</i>.</p> <p>1.2. Pelt is opened in accordance with <i>Occupational Health and Safety (OH&S) requirements</i>.</p>
2. Clear pelt	<p>2.1. Pelt is cleared from around both forelegs in accordance with workplace requirements.</p> <p>2.2. Pelt is cleared from shoulder area following OH&S requirements to avoid the risks of damage and contamination to the carcase.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use correct cutting lines
- apply relevant OH&S and *regulatory requirements*
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- general economic impact of nicked, soiled or damaged hide/pelt and scored meat
- relevant work instructions for opening and clearing the foreleg and shoulder area
- relevant OH&S and regulatory requirements
- potential sources of contamination and cross-contamination
- ways of minimising contamination
- general anatomy of carcase relevant to the task

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at the normal chain speed.</p>
<p>Context of, and specific resources for assessment</p>	<p>Competency must be assessed in an operating processing plant.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • speaking clearly and directly • sharing information • working with diverse individuals and groups.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Trim carcase on retain rail	1.1.Retain rail procedure is identified and explained. 1.2.Defects that need trimming are identified under a meat inspector's supervision. 1.3.Defects are trimmed in accordance with work instructions and meat inspector's direction. 1.4.Defects are trimmed in accordance with <i>hygiene and sanitation requirements</i> . 1.5.Defects are trimmed in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> . 1.6.Inspectors' requests are satisfied and yield maximised when defects are trimmed. 1.7.Trimmings are disposed of in accordance with <i>workplace requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • trim defects on carcasses (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions • demonstrate trim which meets regulatory requirements but maintains yield • dispose of trim in accordance with work instructions • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • apply relevant <i>regulatory requirements</i> • provide and accept feedback in order to improve performance from colleagues and meat inspectors
Required knowledge
Knowledge of: <ul style="list-style-type: none"> • potential sources of contamination or cross-contamination • retain rail procedures

REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory requirements
- types of defects which result in carcasses being retained

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare offal and internal tissues for inspection	<p>1.1. <i>Offal and internal tissue</i> to be inspected is identified.</p> <p>1.2. Hearts and lungs are separated for inspection according to workplace requirements.</p> <p>1.3. Sources of potential contamination and cross-contamination are identified and minimised.</p> <p>1.4. Offal and internal tissue is handled without causing damage and/or contamination.</p>
2. Present offal and internal tissue for inspection	<p>2.1. Viscera are presented for inspection according to <i>workplace</i> and <i>regulatory requirements</i>.</p> <p>2.2. <i>Occupational Health and Safety (OH&S) requirements</i> for the presentation of offal for inspection, including those for manual handling, are identified and followed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- handle offal to avoid bile, ingesta, excreta or content contamination
- present offal for inspection in accordance with regulatory, OH&S, hygiene and sanitation, and workplace requirements
- identify the organs processed on the viscera table
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- inspection process
- workplace, OH&S, hygiene and sanitation, and regulatory requirements for the presentation of offal for inspection

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. Specifications for cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer <i>specifications</i> and <i>workplace requirements</i> .
2. <i>Bone</i> leg	2.1. Primal cuts are sliced and removed from leg according to work instructions and specifications. 2.2. Primal lines are cut in compliance with regulatory requirements. 2.3. Meat safety and quality hazards are handled according to workplace procedures. 2.4. Primals are cut to maximise yield. 2.5. <i>Product</i> is boned in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> including the use of safe manual handling techniques and the safe and effective use of a knife.
3. Identify and remove defects	3.1. <i>Defects</i> are identified, removed and reported according to government regulations and workplace standards. 3.2. Persistent defects are reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • bone out the legs according to specifications and work instructions • check the accuracy of cutting lines • identify contamination and take corrective action • identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements • identify finished primal cuts • comply with OH&S requirements • apply relevant <i>communication skills</i>

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- use *equipment* correctly
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- dropped meat procedures
- OH&S requirements for boning *small stock*
- procedure for cuts required to maximise yields for a given carcass
- structure of the carcass and identify cutting lines
- work instruction for the removal of all primals to desired specifications
- workplace and customer specifications
- carcass defects and corrective actions to be taken
- sources of contamination and cross-contamination and the ways of minimising the contamination.

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer specifications and <i>workplace requirements</i> .
2. Slice and trim primary meat cuts	2.1. Primary meat cuts are sliced into finished meat cuts according to specifications and work instructions. 2.2. <i>Occupational Health and Safety (OH&S) requirements</i> are met including the safe and effective use of knives and safe manual handling techniques. 2.3. Dropped meat procedures are followed in accordance with workplace requirements.
3. Identify and remove defects	3.1. Defects are identified, removed and reported according to government regulations and workplace standards. 3.2. Persistent defects are reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy of *small stock* relevant to cutting lines
- how yield is calculated and why it is important
- regulatory requirements as they relate to carcass cutting lines
- relevant specifications for meat cuts sliced and trimmed from legs

MTMP3055C Bone large stock carcass - forequarter

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to remove primal cuts from the forequarter of large stock carcasses, including beef, horse, buffalo.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, whole and retail operations.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for <i>forequarter</i> cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer specifications and <i>workplace requirements</i> .
2. Remove primal cuts from forequarter of carcase	2.1. Primal cuts are removed from carcase according to workplace requirements and specifications. 2.2. Primal lines are cut in compliance with regulatory requirements. 2.3. Meat safety and quality hazards are dealt with according to workplace procedures. 2.4. Primal cuts are removed from carcase according to <i>Occupational Health and Safety (OH&S) requirements</i> including safe manual handling techniques and safe effective use of a knife. 2.5. Primals are cut from a carcase using a technique that maximises yield.
3. Identify, remove and trim defects	3.1. Defects and contamination are identified and dealt with according to workplace requirements. 3.2. Persistent defects in carcasses are reported to a supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> demonstrate the procedure for boning large stock carcase forequarter primal cuts in accordance with workplace requirements bone <i>product</i> in safe and hygienic manner identify primals containing contamination or <i>abnormalities</i> and handle according to workplace and regulatory requirements maintain the accuracy of cutting lines use <i>equipment</i> correctly apply relevant <i>communication skills</i>

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- personal hygiene, dropped meat and OH&S procedures
- primal cutting lines as they relate to the structure of the *large stock* carcase
- regulatory, workplace and meat safety procedures and specifications
- *boning procedure* for cuts that is required to maximise yield for a given carcase
- procedure for removal of all forequarter primals to desired specifications
- carcase defects and the corrective action to be taken

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at the normal rate of production for that plant.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in a registered, operating meat processing plant or premises.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:

- mathematical concepts and terms including measures for:
 - chemical lean
 - fat depth
 - weight.

Forequarter cuts may include:

- brisket
- chuck or blade
- ribset
- shin or bola.

Regulatory requirements may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production

RANGE STATEMENT	
	requirements <ul style="list-style-type: none"> • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards, codes of practice.
<i>Product</i> may include:	<ul style="list-style-type: none"> • chilled product • hot boned product.
<i>Abnormalities</i> may include:	<ul style="list-style-type: none"> • abscesses • bruising • ingesta • pathological lesions • product contamination.
<i>Equipment</i> may include:	<ul style="list-style-type: none"> • bandsaw • bone cutters • hooks • knives • pouches • rise and fall platforms • stands • tables.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation

RANGE STATEMENT	
	<ul style="list-style-type: none"> • speaking clearly and directly • sharing information • working with diverse individuals and groups.
<i>Large stock</i> may include:	<ul style="list-style-type: none"> • buffalo • camel • bison • deer.
<i>Boning procedures</i> may include:	<ul style="list-style-type: none"> • mechanical de-boning • quarter boning • side boning • table boning.
