Application of the Unit

Application of the unit	This unit is applicable to workers using an air knife in a range of jobs on a slaughter floor.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate air knife	<p>1.1. Air knife is used in accordance with <i>workplace requirements</i>.</p> <p>1.2. Air knife is operated in accordance with <i>Occupational Health and Safety (OH&S) requirements</i>.</p>
2. Maintain air knife	2.1. Air knife is maintained according to manufacturer's specifications and work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use an air knife competently and safely in accordance with the work instructions for one work station in a meat processing operation
- perform basic maintenance of the knife
- report equipment faults to supervisor in accordance with workplace requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- apply the hygiene and sanitation requirements for that work station
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- basic operating principles of the air knife
- hygiene and sanitation requirements for that work station
- work instructions for a particular work station
- relevant regulatory requirements
- potential sources of contamination and ways of minimising it

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE	
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific requirements • hygiene and sanitation requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<p><i>OH&S requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • speaking clearly and directly • sharing information • working with diverse individuals and groups.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Trim carcase on retain rail	1.1.Retain rail procedure is identified and explained. 1.2.Defects that need trimming are identified under a meat inspector's supervision. 1.3.Defects are trimmed in accordance with work instructions and meat inspector's direction. 1.4.Defects are trimmed in accordance with <i>hygiene and sanitation requirements</i> . 1.5.Defects are trimmed in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> . 1.6.Inspectors' requests are satisfied and yield maximised when defects are trimmed. 1.7.Trimmings are disposed of in accordance with <i>workplace requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • trim defects on carcasses (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions • demonstrate trim which meets regulatory requirements but maintains yield • dispose of trim in accordance with work instructions • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • apply relevant <i>regulatory requirements</i> • provide and accept feedback in order to improve performance from colleagues and meat inspectors
Required knowledge
Knowledge of: <ul style="list-style-type: none"> • potential sources of contamination or cross-contamination • retain rail procedures

REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory requirements
- types of defects which result in carcasses being retained

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare offal and internal tissues for inspection	<p>1.1. <i>Offal and internal tissue</i> to be inspected is identified.</p> <p>1.2. Hearts and lungs are separated for inspection according to workplace requirements.</p> <p>1.3. Sources of potential contamination and cross-contamination are identified and minimised.</p> <p>1.4. Offal and internal tissue is handled without causing damage and/or contamination.</p>
2. Present offal and internal tissue for inspection	<p>2.1. Viscera are presented for inspection according to <i>workplace</i> and <i>regulatory requirements</i>.</p> <p>2.2. <i>Occupational Health and Safety (OH&S) requirements</i> for the presentation of offal for inspection, including those for manual handling, are identified and followed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- handle offal to avoid bile, ingesta, excreta or content contamination
- present offal for inspection in accordance with regulatory, OH&S, hygiene and sanitation, and workplace requirements
- identify the organs processed on the viscera table
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- inspection process
- workplace, OH&S, hygiene and sanitation, and regulatory requirements for the presentation of offal for inspection

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. Specifications for cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer <i>specifications</i> and <i>workplace requirements</i> .
2. <i>Bone leg</i>	2.1. Primal cuts are sliced and removed from leg according to work instructions and specifications. 2.2. Primal lines are cut in compliance with regulatory requirements. 2.3. Meat safety and quality hazards are handled according to workplace procedures. 2.4. Primals are cut to maximise yield. 2.5. <i>Product</i> is boned in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> including the use of safe manual handling techniques and the safe and effective use of a knife.
3. Identify and remove defects	3.1. <i>Defects</i> are identified, removed and reported according to government regulations and workplace standards. 3.2. Persistent defects are reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- bone out the legs according to specifications and work instructions
- check the accuracy of cutting lines
- identify contamination and take corrective action
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- identify finished primal cuts
- comply with OH&S requirements
- apply relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- use *equipment* correctly
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- dropped meat procedures
- OH&S requirements for boning *small stock*
- procedure for cuts required to maximise yields for a given carcass
- structure of the carcass and identify cutting lines
- work instruction for the removal of all primals to desired specifications
- workplace and customer specifications
- carcass defects and corrective actions to be taken
- sources of contamination and cross-contamination and the ways of minimising the contamination.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer specifications and <i>workplace requirements</i> .
2. Slice and trim primary meat cuts	2.1. Primary meat cuts are sliced into finished meat cuts according to specifications and work instructions. 2.2. <i>Occupational Health and Safety (OH&S) requirements</i> are met including the safe and effective use of knives and safe manual handling techniques. 2.3. Dropped meat procedures are followed in accordance with workplace requirements.
3. Identify and remove defects	3.1. Defects are identified, removed and reported according to government regulations and workplace standards. 3.2. Persistent defects are reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy of *small stock* relevant to cutting lines
- how yield is calculated and why it is important
- regulatory requirements as they relate to carcass cutting lines
- relevant specifications for meat cuts sliced and trimmed from legs

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at the normal rate of production for that plant.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must be conducted in an operating and registered meat processing plant or premises.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
<p>Guidance information for</p>	<p>A current list of resources for this unit of competency is</p>

EVIDENCE GUIDE**assessment**

available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may :

- include
 - cutting lines
 - fat depth
 - length and weight ranges
 - muscle groups.
- be derived from:
 - AUS-MEAT
 - customer requirements
 - fat trim depth
 - species
 - workplace requirements.

Regulatory requirements may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • the ability to perform the task to production requirements • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
<i>Small stock</i> may include:	<ul style="list-style-type: none"> • goats • kangaroos • pigs • sheep.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for <i>forequarter</i> cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer specifications and <i>workplace requirements</i> .
2. Remove primal cuts from forequarter of carcase	2.1. Primal cuts are removed from carcase according to workplace requirements and specifications. 2.2. Primal lines are cut in compliance with regulatory requirements. 2.3. Meat safety and quality hazards are dealt with according to workplace procedures. 2.4. Primal cuts are removed from carcase according to <i>Occupational Health and Safety (OH&S) requirements</i> including safe manual handling techniques and safe effective use of a knife. 2.5. Primals are cut from a carcase using a technique that maximises yield.
3. Identify, remove and trim defects	3.1. Defects and contamination are identified and dealt with according to workplace requirements. 3.2. Persistent defects in carcasses are reported to a supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate the procedure for boning large stock carcase forequarter primal cuts in accordance with workplace requirements
- bone *product* in safe and hygienic manner
- identify primals containing contamination or *abnormalities* and handle according to workplace and regulatory requirements
- maintain the accuracy of cutting lines
- use *equipment* correctly
- apply relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- personal hygiene, dropped meat and OH&S procedures
- primal cutting lines as they relate to the structure of the *large stock* carcase
- regulatory, workplace and meat safety procedures and specifications
- *boning procedure* for cuts that is required to maximise yield for a given carcase
- procedure for removal of all forequarter primals to desired specifications
- carcase defects and the corrective action to be taken

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for <i>hindquarter</i> cuts, including those from the silverside, rumps and flanks, are identified using cut descriptions according to <i>regulatory requirements</i> , customer and <i>workplace requirements</i> .
2. Remove primal cuts from hindquarter of carcass	2.1. Primal cuts are removed from the hindquarter including those from the silverside, rumps and flanks according to work instructions and specifications. 2.2. <i>Product</i> is <i>boned</i> in accordance with <i>Occupational Health and Safety (OH&S) requirements</i> including the use of safe manual handling techniques and the safe and effective use of a knife. 2.3. Primal lines are cut in compliance with regulatory requirements. 2.4. Meat safety and quality hazards are dealt with according to work instructions procedures. 2.5. Primals are cut to maximise yield.
3. Identify and remove defects	3.1. Defects and contamination are trimmed and dealt with according to workplace requirements. 3.2. Persistent defects are reported to supervisors in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate procedure for *boning* a hindquarter into a broad range of primal cuts from the rump, silverside and flank of *large stock* in accordance with workplace requirements
- check and correct the accuracy of cutting lines
- use *equipment* safely and hygienically
- identify primals containing contamination or *abnormalities* and handle according to workplace and regulatory requirements

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- structure of the carcase as it relates to cutting lines
- personal hygiene and dropped meat procedures
- primal cutting lines as they relate to the structure of the carcase
- primal specifications
- procedure for cuts required to maximise yield for a given carcase
- procedure for the removal of all primals to desired specifications
- OH&S requirements

<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may:

- include
 - age
 - chemical lean
 - cutting lines
 - fat depth
 - gender
 - weight and/or length range
- and be derived from:
 - AUS-MEAT
 - customer requirements
 - different species
 - workplace requirements.

Regulatory requirements may include:

- Export Control Act
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- state and territory regulations regarding meat processing.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • speaking clearly and directly • sharing information • working with diverse individuals and groups.
<i>Mathematical</i> concepts and terms may include measures for:	<ul style="list-style-type: none"> • chemical lean • fat depth • weight.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. Specifications for cuts are determined using cut descriptions according to <i>regulatory requirements</i> , customer specifications and <i>workplace requirements</i> .
2. Break carcase using a bandsaw	2.1. Carcase is positioned securely and safely. 2.2. Carcase is split then shoulders, middles and legs are removed according to work instructions and specifications. 2.3. Carcase is split in accordance with Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> including the use of safe manual handling techniques and the safe use of a bandsaw.
3. Identify and remove defects	3.1. Defects and contamination are trimmed and dealt with according to workplace requirements. 3.2. Persistent defects are reported to supervisors in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- break a carcase using a bandsaw according to work instructions and specifications for one or more species
- check and adjust the accuracy of cutting lines
- use correct techniques for handling hot and/or chilled *product*
- identify primals containing a contamination or *abnormalities* and handle according to workplace and regulatory requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- cutting lines as they relate to the structure of the carcase
- dropped meat procedures
- how yield is calculated and why it is important
- procedure for removal of all primals to desired specifications
- work instructions for breaking a carcase in the workplace

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform preparatory cuts	<p>1.1.Legs are selected for de-boning according to workplace specifications.</p> <p>1.2.Legs are inspected for defects and trimmed or disposed of in accordance with <i>workplace requirements</i>.</p> <p>1.3.Preparatory cuts are made prior to mechanical boning.</p>
2. Prepare and maintain boning machinery	<p>2.1.Routine checks and maintenance are performed according to manufacturer's requirements and work instructions.</p> <p>2.2.Faulty or out-of-specification performance of machinery is reported to appropriate personnel.</p>
3. De-bone legs	<p>3.1.Legs are secured safely and securely.</p> <p>3.2.Mechanical boning machinery is operated in accordance with work instructions, to minimise waste and meet workplace product quality requirements.</p> <p>3.3.Occupational Health and Safety (<i>OH&S requirements</i>) are identified and followed.</p> <p>3.4.Bones are disposed of in accordance with workplace requirements.</p> <p>3.5.Workplace housekeeping requirements are completed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • prepare leg boning machine for operation • perform preparatory cuts according to work instructions • trim defects as required in work instructions • disassemble, clean, sanitise and maintain machine to workplace requirements • operate boning machine including routine checks and maintenance included in workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- how yield is calculated and why it is important
- *hygiene and sanitation requirements* for the operation of a mechanical boner
- OH&S requirements for mechanical boning, include emergency shut-down procedures
- specifications for mechanically boned leg product
- purpose and location of preparatory cuts on leg to be boned
- relevant regulatory requirements
- work instructions relating to mechanical leg boning
- potential defects and explain their causes

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform preparatory cuts	1.1. Trunks are taken from the chain and selected for de-boning according to workplace specifications. 1.2. Trunks are inspected for defects and trimmed or disposed of in accordance with <i>workplace requirements</i> . 1.3. Preparatory cuts along the spine are made prior to mechanical boning in accordance with work instructions.
2. De-bone trunks mechanically	2.1. Trunk is positioned in accordance with work instruction. 2.2. Mechanical trunk boning machinery is operated in accordance with work instructions. 2.3. Routine equipment and bone checks, cleaning and maintenance are performed according to work instructions. 2.4. Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> are identified and followed. 2.5. Bones and trunk meat are disposed of in accordance with workplace requirements, keeping the work area neat and tidy. 2.6. Out-of-specification performance by the boning machinery is reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • prepare and operate machinery according to manufacturer's specification and workplace requirements • operate boning machine including routine checks and maintenance included in workplace requirements • monitor and report machinery performance • apply relevant <i>communication</i> and <i>mathematical skills</i>

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- cutting lines for preparatory cuts
- how yield is calculated and why it is important
- specifications for trunks to be de-boned
- relevant personal hygiene and OH&S requirements
- relevant regulatory requirements
- work instruction.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that plant.

Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat processing plant or premises.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance requirements
- Standard Operating Procedures
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- reading and interpreting workplace-related documentation
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for cuts are determined using cut descriptions according to regulatory standards, customer specifications and <i>workplace requirements</i> .
2. <i>Bone</i> shoulder	<p>2.1. Primal cuts are sliced and removed from the carcass according to work instructions and specifications.</p> <p>2.2. Primal cuts are sliced and removed from the carcass according to Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> including the safe and effective use of a knife and following safe manual handling techniques.</p> <p>2.3. Primal lines are cut in compliance with <i>regulatory requirements</i>.</p> <p>2.4. Meat safety and quality hazards are handled according to workplace procedures.</p> <p>2.5. Primals are cut to maximise yield.</p>
3. Identify and remove defects	<p>3.1. <i>Defects</i> are identified, removed and reported according to government regulations and workplace standards.</p> <p>3.2. Persistent defects are reported to supervisor in accordance with work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- operate *equipment* in accordance with workplace requirements
- check and correct, where necessary, the accuracy of cutting lines
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- structure of the carcase and identify primal cutting lines
- procedure for removal of all primals to desired specifications
- sources of contamination and cross-contamination and the ways of minimising it
- importance of and technique required to maximise yield from a carcase
- work instructions and dropped meat procedures
- carcase defects and appropriate corrective actions

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

Context of, and specific resources for assessment

Assessment must occur in a registered meat processing plant or facility.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may:

- be derived from
 - AUS-MEAT
 - customer requirements
 - workplace requirements
- and relate to:
 - age
 - gender
 - muscle groups
 - species
 - standard primals.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Boning systems or methods may include:

- mechanical de-boning
- side boning
- table boning.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs

Primal lines are cut in compliance with <i>regulatory requirements</i>.</p> <p>2.4. Meat safety and quality hazards are handled according to workplace procedures.</p> <p>2.5. Primals are cut to maximise yield.</p>
3. Identify and remove defects	<p>3.1. Defects are identified, removed and reported according to government regulations and workplace standards.</p> <p>3.2. Persistent defects are reported to supervisor in accordance with work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • prepare and operate <i>equipment</i> according to workplace requirements • check and correct where necessary, the accuracy of cutting lines • identify contamination or <i>abnormalities</i> and handle according to workplace and regulatory requirements • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- structure of the carcase and primal cutting lines
- procedure for removal of all primals to desired specifications
- sources of contamination and cross-contamination and the ways of minimising it
- importance of and technique required to maximise yield from a carcase
- work instructions and dropped meat procedures
- carcase defects and appropriate corrective actions

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

Context of, and specific resources for assessment

Assessment must occur in a registered meat processing plant or facility.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may:

- be derived from
 - AUS-MEAT
 - customer requirements
 - species
 - workplace requirements
- and relate to:
 - age
 - gender
 - muscle groups
 - species
 - standard primals.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Boning systems or methods may include:

- mechanical de-boning
- side boning
- table boning.

OH&S requirements may include:

- enterprise OH&S policies, procedures and

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specifications for cuts	1.1. <i>Specifications</i> for cuts are determined using cut descriptions according to regulatory standards, customer specifications and <i>workplace requirements</i> .
2. Slice and trim primary meat cuts	2.1. Primary meat cuts are sliced into finished meat cuts according to specifications and work instructions. 2.2. Primary meat cuts are sliced into finished meat cuts following Occupational Health and Safety (<i>OH&S requirements</i>) including safe manual handling techniques and the safe and effective use of knives. 2.3. Dropped meat procedures are followed in accordance with workplace requirements. 2.4. Corrective action is taken to ensure out-of-specification product is not forwarded for packing.
3. Identify and remove defects	3.1. Defects are identified, removed and reported according to government regulations and workplace standards. 3.2. Persistent defects are reported to supervisor in accordance with work instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • check and adjust the accuracy of <i>small stock</i> cutting lines • identify primal cuts • identify out-of-specification product • apply relevant <i>regulatory requirements</i> • report defects accurately, promptly and in accordance with work instructions • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy relevant to cutting lines
- how yield is calculated and why it is important
- causes of defects and out-of-specification products
- relevant regulatory requirements

MTMP3071C Perform ante-mortem inspection and make disposition

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to the detect abnormalities and diseases in the major livestock species (cattle, sheep and pigs) prior to slaughter. This unit will be assessed for the species for which competency is demonstrated in the workplace and the outcome and the species will be recorded appropriately on the assessment sheet. (Note: Poultry, game and ratites are covered by separate units).
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to meat inspectors and/or stock handlers responsible for ante-mortem inspection.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMP3003A	Handle animals humanely while conducting ante-mortem inspection

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify types of stock and market requirements of food animals commonly slaughtered for meat	1.1. Major breeds of commonly slaughtered domestic animals are identified. 1.2. Distinguishing features of major breeds are identified. 1.3. Market requirements of commonly slaughtered domestic animals are identified.
2. Identify the main reasons for ante-mortem inspection	2.1. Reasons for ante-mortem inspection are identified. 2.2. Regulatory requirements associated with ante-mortem inspection are identified.
3. Perform ante-mortem inspection on live animals	3.1. Procedures and principles of humane handling of animals are identified. 3.2. Signs of common conditions responsible for abnormalities at ante-mortem are detected and identified. 3.3. Procedures for emergency and suspect slaughter are identified. 3.4. Ante-mortem inspection is performed on at least one species according to relevant Occupational Health and Safety (OH&S), workplace and regulatory requirements. 3.5. Quality Assurance aspects of ante-mortem inspection are identified.
4. Identify and isolate animals requiring testing for residue	4.1. Reasons for residue testing are identified. 4.2. Procedures for identifying and isolating animals for testing are followed.
5. Make disposition as a result of inspection and take appropriate action	5.1. Common diseases and conditions responsible for abnormalities are identified, detected and documented on at least one species 5.2. Suspect stock are segregated according to regulatory and workplace requirements 5.3. Signs of major exotic or notifiable diseases are identified. 5.4. Exotic or notifiable disease procedures are followed in accordance with regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- estimate size of stock pens
- estimate number of cattle in a mob
- identify animals using brand, tags, tattoos and electronic identification devices
- identify common diseases and conditions in beef, sheep and pigs
- describe appropriate dispositions for common diseases and conditions in beef, sheep and pigs
- identify major exotic or notifiable diseases
- demonstrate procedures for humane handling of livestock
- perform ante-mortem inspection to Australian Standards and other relevant regulatory requirements on at least one major domestic food species in a workplace environment under normal operating conditions
- identify suspect animals that may be suffering from a notifiable disease on ante-mortem examination according to Australian Standards
- make disposition according to workplace and regulatory requirements
- **report** notifiable diseases promptly and accurately according to regulatory requirements
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- apply relevant **communication skills**
- work effectively as an individual and as part of a team
- perform tasks to workplace requirements
- work cooperatively with company stock handlers to ensure smooth flow of stock

Required knowledge

Knowledge of:

- regulatory requirements for suspect stock, hygiene and sanitation standards, and workplace standards associated with ante-mortem inspection
- segregation requirements for suspect animals
- sources of information to keep up-to-date with current theories or findings
- steps and procedures for emergency and suspect kill
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of major exotic or notifiable diseases (including Ovine Johne's Disease (OJD))
- principles and procedures for humane handling of livestock
- regulatory requirements associated with exotic or notifiable diseases
- steps to be taken to notify of suspect exotic or notifiable disease

MTMP3072C Perform post-mortem inspection and make disposition

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to identify and dispose of diseases detected in a post-mortem inspection carried out on major food species in accordance with regulatory requirements for animals slaughtered for human consumption. This unit will be assessed for the species for which competency is demonstrated in the workplace and the outcome and species will be recorded appropriately on the assessment sheet.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to meat inspectors performing post-mortem inspection on food animals in registered meat establishments.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify base anatomical structure systems of domestic food animals	<p>1.1. Organs of animals are identified.</p> <p>1.2. Lymphatic, circulatory, digestive, urinary, nervous and respiratory systems are identified and explained.</p> <p>1.3. Basic skeletal structure is identified.</p>
2. Identify the main reasons for post-mortem inspection	<p>2.1. Reasons for post-mortem inspection are identified.</p> <p>2.2. Regulatory requirements associated with post-mortem inspection are identified</p>
3. Perform post-mortem inspection of major food animals	<p>3.1. Procedures for post-mortem inspection are followed.</p> <p>3.2. Abnormalities are identified and detected.</p> <p>3.3. Post-mortem inspection is performed on at least one species in accordance with regulatory requirements, hygiene and sanitation requirements and Occupational Health and Safety (OH&S requirements), in a work environment and under normal production conditions.</p> <p>3.4. Quality Assurance (QA) issues of post-mortem inspection are identified.</p>
4. Make disposition	<p>4.1. Common diseases and conditions responsible for abnormalities are identified, detected and documented for at least one species.</p> <p>4.2. Symptoms of exotic or notifiable diseases are identified and explained.</p>
5. Treat affected carcase appropriately	<p>5.1. Carcase is treated in accordance with:</p> <p>5.1.1. regulatory requirements</p> <p>5.1.2. hygiene and sanitation requirements</p> <p>5.1.3. OH&S requirements.</p> <p>5.2. Anatomical knowledge of carcase is demonstrated in the disposition process.</p>
6. Monitor stunning of animals	<p>6.1. Requirements for effective stunning are identified.</p> <p>6.2. Animals are stunned according to workplace and regulatory requirements.</p> <p>6.3. Corrective action is taken in the event of ineffective stunning.</p>
7. Describe the procedures followed for retained carcase on the slaughter floor	<p>7.1. Procedures for retained carcase are identified and described in accordance with workplace and regulatory requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
8. Identify and use Personal and Protective Equipment (PPE) required to perform post-mortem inspection	8.1. Equipment for post-mortem inspection is identified and described. 8.2. Equipment is used in accordance with QA and workplace requirements. 8.3. PPE is used, maintained and stored to OH&S requirements.
9. Take pathological and residue samples to assist in determining disposition	9.1. Lesions and tissues necessary for determining dispositions are identified. 9.2. <i>Specimens</i> are collected and submitted according to workplace procedures. 9.3. Results are interpreted. 9.4. Carcasses awaiting results are retained according to workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform post-mortem in accordance with Australian Standards
- perform post-mortem inspections to meet QA, OH&S and regulatory requirements
- identify common diseases and conditions in beef, sheep and pigs
- describe appropriate dispositions for common diseases and conditions in beef, sheep and pigs
- identify exotic or notifiable diseases on post-mortem examination
- carry out procedures for identifying, collecting and submitting specimens
- identify and label diagrams of the structure of animal cells
- follow procedures for making disposition of carcass
- follow procedures for retained carcass
- carry out procedures for disposal of carcass
- complete *reports* for exotic or notifiable disease detected according to regulatory requirements
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- maintain currency of knowledge through independent research or professional

REQUIRED SKILLS AND KNOWLEDGE

development

- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- use *problem-solving skills* relevant to scope of authority

Required knowledge

Knowledge of:

- role of equipment for meeting hygiene and sanitation, OH&S and workplace requirements
- role, maintenance and storage of protective equipment to meet OH&S requirements
- correct technique for incision of parts and organs
- basic structure and locations of animal tissues
- procedures for disposal of carcass
- procedures for identifying, collecting and submitting specimens
- procedures for making disposition of carcass
- procedures for retained carcass
- steps in post-mortem inspection
- properties of living cells
- equipment used for post-mortem inspection
- protective equipment and clothing used in post-mortem inspection
- major exotic or notifiable diseases and their signs
- OH&S and other relevant regulatory requirements associated with the disposal of carcasses
- regulatory requirements associated with exotic or notifiable diseases
- functions of animal cells
- two types of cellular reproduction and difference between them
- carcass parts and organs incised during post-mortem inspection
- common parasitic conditions in post-mortem inspection
- regulatory requirements, hygiene and sanitation standards, and OH&S requirements related to post-mortem inspection
- symptoms of major exotic or notifiable diseases (including Ovine Johne's Disease (OJD))
- function of the lymphatic, circulatory and respiratory systems

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency in post-mortem skills must be demonstrated in a registered, operating meat processing plant.</p> <p>Candidates must be able to:</p> <ul style="list-style-type: none"> perform post-mortem inspection on at least one species. <p>The identification of diseases and conditions in other species can be undertaken in a simulated situation utilising samples and photographs.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment of practical post mortem skills on a slaughter floor will require approval of the operator and regulators. The assessment of diagnostic skills can be undertaken under simulated conditions.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> assignments

EVIDENCE GUIDE

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify microbiological hazards for meat and meat safety	<p>1.1. Types of micro-organisms (e.g. bacteria, virus, yeast and mould) are identified.</p> <p>1.2. Major microbiological threats to meat (i.e. bacteria and relevant yeasts or moulds) are identified and assessed to determine the risk level and control requirements.</p> <p>1.3. Types of bacteria causing food poisoning and meat spoilage are identified.</p> <p>1.4. Effects of bacterial contamination in relation to food poisoning (i.e. impact on people) and food spoilage (i.e. shelf life) are identified.</p> <p>1.5. Sources of bacterial contamination are identified.</p> <p>1.6. Growth characteristics and requirements of bacteria are identified.</p> <p>1.7. Critical Control Points (CCP) and control points for prevention and control of bacterial contamination are identified.</p> <p>1.8. Control methods required to prevent or reduce microbiological hazards are determined and implemented.</p> <p>1.9. Customer and <i>regulatory requirements</i> for microbiological contamination levels are identified.</p> <p>1.10. Relevant microbiological tests are identified and test results are assessed.</p>
2. Identify chemical hazards for meat and meat safety	<p>2.1. Chemical hazards which may affect meat are identified.</p> <p>2.2. Common sources of chemical hazards or contamination are identified (e.g. cleaning chemicals and drug residues) are assessed to determine the risk level and control requirements.</p> <p>2.3. Control methods which prevent or reduce chemical contamination to acceptable levels including national programs (e.g. residue testing) are determined and implemented.</p> <p>2.4. Effects of chemical residues on meat (e.g. poisoning, tainting, and rejections) are explained.</p> <p>2.5. Chemical residue testing programs and level requirements are identified.</p>
3. Identify physical hazards on meat and	<p>3.1. Physical hazards which may affect meat are explained.</p>

ELEMENT	PERFORMANCE CRITERIA
meat products	<p>3.2. Common sources of physical hazards and/or contamination are identified and assessed to determine the risk level and control requirements.</p> <p>3.3. Control methods to prevent contamination reaching an unacceptable level are determined and implemented.</p> <p>3.4. Effects of physical hazards on meat are explained.</p>
4. Calibrate thermometers	4.1. Thermometers are calibrated according to regulatory requirements.
5. Identify the components of a Hazard Analysis Critical Control Point (HACCP)-based QA program for meat processing plants	<p>5.1. Regulatory basis for compliance with a HACCP-based QA program is identified and explained.</p> <p>5.2. Steps in the development of a HACCP program are identified and explained.</p> <p>5.3. Nature and importance of work instructions or task descriptions and operating procedures are identified and workers are coached in their implications.</p> <p>5.4. Elements of a HACCP program are identified.</p> <p>5.5. Nature and importance of Good Manufacturing Practices (GMP) and pre-requisite programs are identified.</p> <p>5.6. Mechanisms for validation, monitoring and verification are identified and explained.</p>
6. Conduct pre-operational hygiene check	<p>6.1. Pre-operational checklists are identified.</p> <p>6.2. Corrective action procedures are identified and explained.</p> <p>6.3. Pre-operational hygiene check is conducted.</p>
7. Conduct microbiological test swabbing	<p>7.1. Appropriate microbiological testing regimes are identified.</p> <p>7.2. Swabbing for microbiological testing is performed according to <i>workplace</i> and regulatory requirements.</p> <p>7.3. Microbiological test results are assessed and where necessary appropriate corrective action is taken.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct a pre-operational hygiene check
- complete *reports* as required by regulators or the enterprise
- identify and culture different types of micro-organisms
- identify and describe features of major types of micro-organisms affecting the meat industry
- identify and interpret relevant regulations and Australian Standards
- identify and utilise sources of information
- apply relevant *communication* and *mathematical skills*
- calibrate a thermometer
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others and in response to changed work practices or technology
- use relevant *problem-solving skills*

Required knowledge

Knowledge of:

- aerobic and anaerobic requirements of micro-organisms
- growth traits of different types of micro-organisms
- bacterial contamination testing programs used in abattoirs
- how bacterial contamination can be prevented
- how bacterial growth can be controlled
- how hazard risk assessment is undertaken
- effect each requirement has on microbial growth
- effects of incorrect removal of contamination
- effects on microbial growth of refrigeration, handling techniques etc
- effects on microbial growth of wet carcass surfaces
- impact of chemicals on meat and meat products
- importance of food chain security and the implications of a break down in control
- symptoms, effects and means of prevention of microbial infection contamination of meat
- major sources of physical contamination
- function of the elements of a HACCP-based QA system
- major chemical contamination control programs
- major sources of chemical contamination
- monitoring and control methods employed such as inspection and metal detectors

REQUIRED SKILLS AND KNOWLEDGE

- relevant Occupational Health and Safety (*OH&S*), regulatory and workplace requirements
- elements of a HACCP-based QA program including hazard identification, control points, CCP, critical limits, control measures, preventative measures, GMP, pre-requisite programs, verification, monitoring, documentation and validation
- habitat of different types of micro-organisms and their ability to survive outside the host animal
- actions to prevent physical and chemical contamination of meat
- conditions under which food poisoning occurs
- symptoms of bacterial food poisoning
- steps to limit and remove contamination.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with current HACCP and approved program regulations in an operating meat processing plant.

Context of, and specific resources for assessment

Assessment must involve reference to an actual or simulated meat processing HACCP program.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulated demonstration
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Regulatory requirements may include:</p>	<ul style="list-style-type: none"> • Export Control Act • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
<p>Workplace requirements may include:</p>	<ul style="list-style-type: none"> • enterprise-specific requirements • hygiene and sanitation requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<p>Reports may:</p>	<ul style="list-style-type: none"> • be in diagrammatic, sketch, tabular, graphic formats • be presented in writing, in standard formats • be presented orally • include information and mathematical data gathered, interpreted and summarised from a

RANGE STATEMENT	
	range of sources.
Communication skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • being appropriately assertive • interpreting needs of internal and/or external customers • listening and understanding • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • using negotiation and persuasion skills • working with diverse individuals and groups • writing to audience needs.
Mathematical skills may include:	<ul style="list-style-type: none"> • calculation, estimation, collation and recording of data relating to cell counts, time, temperature, humidity, quantity, etc • interpretation of control screens and panel, dials and controls.
Problem-solving skills may involve:	<ul style="list-style-type: none"> • applying a range of strategies to problem-solving • developing practical and creative solutions to workplace problems • listening to and resolving concerns in relation to workplace issues • resolving customer concerns relative to workplace responsibilities • showing independence and initiative in identifying problems • solving problems individually or in teams • using numeracy skills .
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and, codes of practice.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor carcass product	1.1. Samples are selected for assessment according to the approved sampling plan for sample size and frequency. 1.2. Assessment is conducted utilising appropriate facilities, lighting and time. 1.3. Products are monitored for defects according to the agreed criteria and classification. 1.4. Carcasses are scanned using the approved scanning lines. 1.5. Defects are recorded accurately using the correct forms or electronic system. 1.6. Immediate corrective action is implemented according to the Meat Hygiene Assessment (MHA) program's requirements. 1.7. Carcasses are monitored according to the <i>workplace requirements</i> for <i>hygiene and sanitation</i> , and Occupational Health and Safety (<i>OH&S</i>).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • instigate corrective actions when appropriate • monitor product for defects according to the MHA program • calculate defect ratings • <i>record</i> the monitoring results accurately • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • apply relevant <i>regulatory</i> and workplace requirements • take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- how carcass monitoring is to be undertaken
- how defect ratings are detected
- hygiene and sanitation requirements when monitoring product
- OH&S requirements when monitoring product
- types of defects to be identified on carcass product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how the approved sample plan is implemented for product monitoring
- classification of defects
- purpose of an MHA program
- relevant regulatory and workplace requirements

MTMP3075B Perform process monitoring for Meat Hygiene Assessment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to monitor processes in a meat processing plant as part of a Meat Hygiene Assessment (MHA) program.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to monitoring workers' compliance with company work instructions and Standard Operating Procedures (SOPs) as part of an MHA program.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor process	1.1.Process is monitored according to company monitoring plan. 1.2.Results are recorded accurately on appropriate process monitoring sheets. 1.3.Process is rated according to established criteria of acceptable, marginal or unacceptable. 1.4.Immediate corrective action is implemented according to MHA program's requirements. 1.5.A conformity index is calculated and recorded after each process monitoring exercise. 1.6.Process is monitored according to <i>workplace requirements</i> for hygiene and sanitation, and Occupational Health and Safety (<i>OH&S</i>).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • accurately gather monitoring data and calculate compliance ratings • use weighting and cumulative scores to calculate compliance ratings • identify when trigger points have been reached and corrective actions are to be implemented • develop corrective actions • liaise effectively with supervisors who are responsible for implementing corrective actions • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology
Required knowledge
Knowledge of: <ul style="list-style-type: none"> • hygiene and OH&S requirements associated with process monitoring

REQUIRED SKILLS AND KNOWLEDGE

- how the monitoring program is developed
- purpose and nature of work instructions and SOPs
- purpose of an MHA process monitoring program
- relevant OH&S, *regulatory* and workplace requirements.

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect samples of <i>carton meat</i> for defects	<p>1.1. Samples of product are taken from each line of product according to a pre-determined sampling plan.</p> <p>1.2. Sample is inspected for defects in accordance with <i>regulatory</i> and <i>workplace requirements</i> as established in a government approved Hazard Analysis Critical Control Point (HACCP) program.</p> <p>1.3. Defects are reported in accordance with workplace requirements.</p>
2. Assess samples against pre-determined defect tolerances	<p>2.1. Levels of defects are assessed against established tolerances.</p> <p>2.2. Samples outside tolerance are reported to supervisor and corrective action is taken.</p> <p>2.3. Sampling program is adhered to and results are recorded according to workplace requirements.</p> <p>2.4. Sampling area is kept clean and neat to avoid contamination between samples.</p> <p>2.5. Dropped meat procedures are identified and followed according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- inspect, identify and record defects
- identify defects and explain the relevant critical limits and specifications
- interpret information including details of out of tolerance samples
- take corrective action if defect tolerances are exceeded
- follow re-inspection procedures to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- defect tolerance
- procedures for reporting defects and samples outside tolerance
- sampling program and consequence of not following procedures
- relevant Occupational Health and Safety (*OH&S*) **requirements**

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while complying with:

- Australian Quarantine Inspection Service (AQIS) and/or state meat authority regulations
- company procedures.

Context of, and specific resources for assessment

Assessment must take place in a meat processing plant under real working conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Carton meat</i> may include:	<ul style="list-style-type: none"> • meat cuts and • offal.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • hygiene and sanitation requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • being appropriately assertive • interpreting needs of internal or external customers • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • using negotiation or persuasion skills • working with diverse individuals and groups • writing to audience needs.
<i>Mathematical skills</i> may:	<ul style="list-style-type: none"> • involve accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas • involve interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc • involve use of calculators and computer software packages • include operations involving percentages, comparisons and variations • require reading and interpreting analogue and digital measures (e.g. clocks, scales, pressured gauges, thermometers, cash registers) • relate to own work and work area problem-solving • involve routine estimations and calculations using a range of specified formula and procedures.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor offal	1.1. Samples are selected for assessment according to the approved sampling plan for sample size and frequency. 1.2. Assessment is conducted utilising appropriate facilities, lighting and time. 1.3. Assessment is conducted according to <i>workplace requirements</i> . 1.4. Offal is monitored for defects according to agreed criteria and classification. 1.5. Defects are recorded accurately using the correct forms or electronic system. 1.6. Levels for triggering corrective actions are identified. 1.7. Immediate corrective action is implemented according to the Meat Hygiene Assessment (MHA) program's requirements. 1.8. Offal is monitored according to the workplace requirements for hygiene and sanitation, and Occupational Health and Safety (<i>OH&S</i>).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- monitor product for defects according to the MHA program
- record the monitoring results accurately
- calculate defect ratings
- instigate corrective actions when appropriate
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from other or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- hygiene and sanitation requirements when monitoring product
- OH&S requirements when monitoring product
- types of defects to be identified in carcase, offal and carton product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how defect ratings are detected
- classification of defects
- purpose of an MHA program
- relevant regulatory requirements

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production for that rendering plant.

Context of, and specific resources for assessment

Assessment must be conducted in a registered, operating meat rendering plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- hygiene and sanitation requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering
 - uniforms
 - waterproof clothing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 5008:2001/Amdt-12003 Australian Standard for the Hygienic Rendering of Animal Products • federal, state and territory regulations regarding meat processing.
<i>Mathematical</i> processes may include	<ul style="list-style-type: none"> • calculation, estimation, collation and recording of data relating to time, temperature, humidity quantity etc • interpretation of control screens and panels, dials and controls
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform start-up operation	1.1. Start-up operation is performed to manufacturer's and <i>workplace requirements</i> .
2. Monitor running of press	2.1. Flow of product is monitored. 2.2. Condition of press cake is monitored. 2.3. Build up of fines is monitored. 2.4. Fines are removed in accordance with workplace requirements. 2.5. Press is operated in accordance with work instructions. 2.6. Occupational Health and Safety (<i>OH&S requirements</i>) are identified and complied with.
3. Clean press and hood	3.1. Press and hood are cleaned regularly in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- load and unload press to specifications
- test product samples to ensure pressed product meet specifications
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- basic operating principles of the press
- implications on product quality and productivity of incorrect press
- production problems and out-of-specification product and take corrective action
- relevant regulatory requirements

2. Operate and maintain size reduction equipment	2.1.Mincer is operated in accordance with workplace requirements. 2.2.Knives and plates are changed daily in accordance with workplace requirements. 2.3.Occupational Health and Safety (<i>OH&S requirements</i>) are identified and complied with.
3. Monitor pre-heating	3.1.Start-up procedure is performed in accordance with workplace and manufacturer's requirements. 3.2.Feed rate is monitored. 3.3.In and out feed is balanced.
4. Monitor press or decanter	4.1.Press or decanter is monitored in accordance with workplace and manufacturer's specifications.
5. Monitor movement of solids to dryer	5.1.Temperature is monitored in accordance with workplace requirements. 5.2.Feed rate is monitored.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct pre-start checks and maintenance procedures according to work instructions
- operate machinery according to workplace instructions
- produce a rendered product according to workplace requirements
- identify production problems and out-of-specification product and take corrective action
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*

REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- basic principles of wet rendering process
- operation and maintenance process
- need to change knives and plates daily and the replacement technique
- relevant regulatory requirements
- implications of not following manufacturer's instructions for operation and maintenance
- Quality Assurance (QA) requirements for rendered product

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Control bacteria in rendered products	<p>1.1. Micro-organisms in meat meal are identified and their impact on quality is explained.</p> <p>1.2. Risk assessment and control measures for micro-organisms are carried out.</p> <p>1.3. Good housekeeping practices are implemented to minimise risk of contamination.</p> <p>1.4. Critical control points are identified and control measures implemented.</p>
2. Implement cleaning program for rendering plant	<p>2.1. Cleaning program for raw material processing areas is explained and implemented as per work instructions.</p> <p>2.2. Cleaning program for dry meal processing areas is explained and implemented as per work instructions.</p> <p>2.3. Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> are identified and met.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- implement cleaning program
- apply relevant *regulatory* and *workplace requirements*
- identify production problems and out-of-specification product and take corrective action
- apply relevant *communication skills*
- assess hygiene risks and take preventative action
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- cleaning program for rendering process

REQUIRED SKILLS AND KNOWLEDGE

- relevant regulatory and workplace requirements
- critical control points for monitoring hygiene and sanitation of the process
- micro-organisms affecting meat meal and the control measures for these

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and maintain equipment	1.1. Pre-operational checks are performed in accordance with <i>workplace</i> , Occupational Health and Safety (OH&S) and <i>hygiene and sanitation requirements</i> . 1.2. Routine maintenance is performed in accordance with workplace requirements.
2. Monitor and control flow of raw materials	2.1. Nature and quality of the raw materials is monitored to ensure compliance with workplace and <i>regulatory requirements</i> . 2.2. Defects in raw materials are reported promptly and corrective action taken promptly in accordance with workplace requirements. 2.3. Flow of raw materials into bulk bins and/or the processing equipment is controlled in accordance with work instructions.
3. Render edible product	3.1. Equipment is operated in accordance with workplace regulations, OH&S requirements and manufacturer's specifications. 3.2. Edible product is rendered to workplace and customer specifications. 3.3. Routine monitoring, record keeping and sampling is performed to ensure compliance with product specifications. 3.4. Sources of potential contamination of the product are identified and preventative and corrective measures are taken in accordance with work instructions. 3.5. Cleanliness of work area is maintained in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- apply the regulatory requirements for the rendering of the edible product
- identify production problems and out-of-specification product and take corrective action
- render product in accordance with work instructions, hygiene and sanitation and regulatory requirements
- sample and monitor product quality to ensure product meets workplace and customer requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- regulatory requirements for the rendering of the edible product
- operating and maintenance procedures for the rendering equipment
- relevant work instructions for the operation of the equipment
- OH&S requirements for the operation of the rendering equipment
- relevant product specifications
- sampling and monitoring procedures relevant to the product
- possible sources of contamination of the product and the relevant preventative measures

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the QA program for the rendering plant	1.1. QA procedures and requirements are clearly explained to relevant personnel. 1.2. Staff are coached and monitored in the introduction of work instructions and operating procedures. 1.3. Verification and recording procedures are introduced and monitored. 1.4. Internal audit is conducted to validate the QA program.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • implement the QA program • identify and implement corrective action • verify the program using sampling, testing and auditing • mentor staff implementing the procedures • apply relevant <i>communication skills</i> • work effectively as an individual and as part of a team • apply relevant Occupational Health and Safety (<i>OH&S</i>), <i>regulatory</i> and <i>workplace requirements</i> • take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology.
Required knowledge
Knowledge of: <ul style="list-style-type: none"> • hazards likely to be encountered in a rendering plant • critical control points for QA monitoring • process flow chart for the rendering operation • relevant OH&S, regulatory and <i>workplace requirements</i> • verification and validation procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when implementing a functioning QA program.

Context of, and specific resources for assessment

Competency must be assessed in an operating rendering plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

MTMP3095B Grade beef carcasses using Meat Standards Australia standards

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the skills and knowledge required to grade beef to Meat Standards Australia (MSA) standards.</p> <p>It is an MSA requirement that enterprises with a Level 1 (b) licence have company graders who have a Statement of Attainment in this unit of competency or an MSA approved equivalent unit.</p> <p>Attainment of this unit does not qualify a participant for accreditation as an MSA grader. Participants must contact MSA on 1800 111 672 to organise accreditation.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>The skills and knowledge gained from this unit allow company chiller assessors to apply to MSA for accreditation to grade beef to MSA standards.</p>
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Prerequisite units	Nil	

Employability Skills Information

-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply the <i>MSA system</i>	<p>1.1. Consumer preferences for eating quality traits are identified.</p> <p>1.2. <i>Factors impacting on eating quality</i> are identified.</p> <p>1.3. The role that DNA samples have in the MSA system is identified and explained.</p>
2. Grade beef carcasses to MSA standards	<p>2.1. Grade codes are accurately identified and allocated.</p> <p>2.2. Boning room group of a carcase is identified.</p> <p>2.3. Maturity, MSA <i>marbling</i>, hump height, <i>fat distribution</i> and <i>hide puller damage</i> are assessed to MSA standards.</p> <p>2.4. <i>Equipment</i> used for measuring ultimate <i>pH</i> is calibrated, maintained and operated, and calibration results are recorded.</p> <p>2.5. Ultimate pH is measured.</p> <p>2.6. <i>Hanging method</i> is identified.</p> <p>2.7. DNA samples are collected, stored and despatched according to MSA standards.</p> <p>2.8. <i>MSA graded carcase product</i> is identified</p> <p>2.9. AUS-MEAT chiller assessment measurements of the carcase to be graded are recorded.</p>
3. Operate MSA software and hardware to record grading details and generate eating quality outcomes	<p>3.1. MSA software and hardware are accessed and operated.</p> <p>3.2. Data is entered, stored, sorted, retrieved, checked and validated, interpreted and forwarded.</p> <p>3.3. Grading reports and labels are generated.</p>
4. Complete the MSA vendor declaration system	<p>4.1. Essential information on a vendor declaration is identified.</p> <p>4.2. Vendor declaration is signed.</p> <p>4.3. <i>Data Capture Unit (DCU)</i> defaults are activated in accordance with the vendor declaration.</p> <p>4.4. Records of MSA vendor declarations are stored in accordance with MSA requirements.</p>
5. Stamp, ticket or label MSA graded carcase product	<p>5.1. System for identifying graded product is identified.</p> <p>5.2. Slaughter floor ticket information is applied.</p> <p>5.3. Stamping of product is completed.</p>
6. Adhere to the <i>MSA Standards Manual</i>	<p>6.1. All aspects of <i>MSA grading</i> are completed in accordance with the Standards Manual and Licensing</p>

ELEMENT	PERFORMANCE CRITERIA
for Grading	requirements. 6.2. Carcase is graded according to the MSA system. 6.3. Grading problems are identified and resolved.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate proficiency with all aspects of the DCU system
- demonstrate proficiency with all aspects of the *MSA model*
- describe all carcass attributes that are collected
- apply relevant communication and *problem-solving skills*
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- maintain currency of knowledge through independent research or professional development
- apply all MSA grading reports
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively as an individual and as a member of a team

Required knowledge

Knowledge of:

- requirements of the MSA Standards Manual for Grading
- carcass hanging methods and their impact on eating quality
- fat distribution
- hump height and tropical breed content
- marbling
- *ossification*
- conventions of using *ZIP files*
- hide puller damage
- *essential operating conditions* for use of the MSA system, including the equipment required for grading
- importance of the DNA system to the integrity of the MSA program

REQUIRED SKILLS AND KNOWLEDGE

- information on a carcass ticket that is necessary for MSA Grading
- minimum mandatory ageing period for MSA product
- MSA vendor declaration system
- relationship between DCU, stamps, boning room groups, boning group tables and labels
- how ageing affects eating quality and how its effect is incorporated onto the MSA system
- how the carcass stamping system works
- how the MSA web site is used for feedback purposes
- pH
- AUS-MEAT chiller assessment standards
- eating quality levels in MSA
- link between carcass ticket information and grading results
- ***MSA minimum requirements***
- Palatability Analysis Critical Control Points (PACCP) approach to eating quality
- process of sampling and storing DNAs
- relationship between AUS-MEAT chiller assessment and MSA grading
- relationship between cut and cooking method
- role of boning room groups and tables
- what a CMQ4 score is
- ***minimum standards of performance***
- potential grading problems and suggest solutions
- MSA grading reports

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency is to be assessed in the workplace. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

Context of, and specific resources for assessment

Competency must be demonstrated in the grading of actual carcasses, and not simulated.

Method of assessment

Assessors will need to visit the applicant's workplace on at least one occasion. Recommended methods of assessment include:

- evidence log book
- examination of assessed product
- observation of the applicant working
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	<p>The trainer and assessor must have the following qualifications:</p> <ul style="list-style-type: none"> • Statement of Attainment in MTMP3095A Grade beef carcasses using Meat Standards Australia Standards or Module 6 MSA Grading • successful completion of the AUS-MEAT chiller assessment course • successful completion of Overview of meat science relating to the eating qualities of beef, Apply meat science to eating quality, or Module 9 MSA Meat Science. <p>Trainers and assessors must also demonstrate AUS-MEAT chiller assessment and MSA grading currency.</p> <p>A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Usage of <i>MSA system</i> may include:	<ul style="list-style-type: none"> • backing up data • data validation • ensuring currency through regular updating • explaining MSA Producer Codes • sending files and receiving updates • updating through the MSA web site.
<i>Factors impacting on eating</i>	<ul style="list-style-type: none"> • carcase weight

RANGE STATEMENT	
quality include:	<ul style="list-style-type: none"> • fat distribution • hanging method • hide puller damage • hormonal growth inputs • hump height • milk fed vealers • MSA marbling • ossification • saleyard consignment • tropical breed content.
Marbling includes:	<ul style="list-style-type: none"> • description of what marbling is • the effect marbling has on eating quality and grading outcomes • the MSA correlation standard for marbling • the scale of measurement for marbling.
Fat distribution includes:	<ul style="list-style-type: none"> • the MSA correlation standard for fat distribution • the relationship between fat distribution and eating quality • the MSA requirements for overall fat distribution • what insufficient fat distribution can result from.
Hide puller damage includes:	<ul style="list-style-type: none"> • causes of hide puller damage • recording of hide puller damage • the MSA correlation standard for hide puller damage • the MSA requirement for hide puller damage • the relationship between hide puller damage and eating quality.
Grading equipment may include:	<ul style="list-style-type: none"> • AUS-MEAT Eye Muscle Area Grid • AUS-MEAT marbling reference • AUS-MEAT meat and fat colour chips • computer • DCU and charger • DNA samples • download cable • Hump Height reference • MSA Carcase Stamp • MSA marbling references

RANGE STATEMENT	
	<ul style="list-style-type: none"> • MSA maturity references • MSA software • pH meter and probes • steel ruler • torch kit.
<i>Hanging method</i> includes:	<ul style="list-style-type: none"> • Achilles tendon and tenderstretch through the aitch bone or through the iliosacral ligament • advantages and disadvantages of tenderstretch • the relationship between hanging method and eating quality.
<i>pH</i> includes:	<ul style="list-style-type: none"> • describing the relationship between ultimate pH and rate of pH decline • how to check battery power and change the date and time on a pH meter • identifying the pH/temperature window and the impact of missing the window on eating quality • the necessary factors needed to record calibration results • the relationship between glycogen, stress and pH • the relationship between pH and eating quality • the required intervals for calibration of both pH and temperature probes.
<i>MSA graded carcass product</i> may include:	<ul style="list-style-type: none"> • approved primals or portions from MSA carcasses that were graded in accordance with the MSA Standards Manual for Grading.
<i>DCU</i> system familiarity may include:	<ul style="list-style-type: none"> • changing tag types • changing time and date on DCU • current DCU program file and the process used to load this program • DCU defaults and their link to impact on grading results or MSA requirements • DCU fields • DCU operation and maintenance • different DCU files • different types of DCU files • entering grading data • grader codes and pin numbers for individuals • identifying and utilising DCU function keys • instances when it is necessary to load a DCU

RANGE STATEMENT	
	<ul style="list-style-type: none"> program file • naming and downloading DNL files • program used to download files • program used to load the DCU set up files • scanning tickets and/or manual entering of data • the main menu.
<i>MSA Standards Manual</i> for Grading includes:	<ul style="list-style-type: none"> • on farm responsibilities for MSA producers • protocol for conducting monthly declines • requirements for MSA saleyards • requirements for the boning rooms of licensed enterprises • requirements for the chilling operations of licensed enterprises • requirements for the grading operations of licensed enterprises • requirements for the livestock receipt or lairage of licensed enterprises • requirements for the loadout of licensed enterprises • requirements for the pH or temperature relationship of licensed enterprises • requirements for the slaughter floor of licensed premises.
Knowledge and application of <i>MSA grading requirements</i> must include:	<ul style="list-style-type: none"> • Grade Codes and why they are used • MSA butcher bodies and why they require labels • MSA Grade Codes and their respective criteria • MSA mandatory feedback requirements • Quinns butcher bodies • the information that must be contained on MSA carton labels • the two options for generating carton labels.
<i>MSA model</i> requirements include:	<ul style="list-style-type: none"> • MSA Standards Manual for Grading • MSA Standards Manual for Saleyards Consignment • MSA Standards Manual for MSA Trade Mark Usage.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • interpreting the needs of internal or external

RANGE STATEMENT	
	<p>customers</p> <ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • writing to audience needs.
<i>Problem-solving skills</i> may involve	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems • identifying opportunities and solutions that might not be obvious to others • solving problems individually or in teams • using numeracy skills to solve problems.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear. • requirements set out in standards and codes of practice.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> • Export Control Act • relevant regulations and Australian Standards • requirements set out in AS 4696:2007 Australian Standard for the Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.

RANGE STATEMENT	
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • hygiene and sanitation requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Ossification</i> includes:	<ul style="list-style-type: none"> • frosting and its impact on ossification scores • identifying the regions in which maturity is assessed • MSA minimum requirements and measurement scale for ossification • the MSA correlation standard for ossification • the relationship between connective tissue, age and growth • the relationship between maturity and eating quality.
Usage of <i>ZIP files</i> may include:	<ul style="list-style-type: none"> • backing-up files to server • creating ZIP files • checking data for errors and validating data • explaining the difference between a ZIP file and a DNL file • generating, interpreting and printing Butcher Body Labels and MSA Carton Labels • generating, interpreting and printing MSA feedback reports • logging onto MSA model and importing DNL file • using naming conventions for a ZIP file • sorting, filtering, finding a particular field, replacing and deleting data • using the three different types of ZIP files • understanding the purpose and potential applications of ZIP files • updating plant, brand and producer codes for each lot • viewing statistics for a number of options.
<i>Essential operating conditions</i> include:	<ul style="list-style-type: none"> • appropriate software and hardware • carcasses that have met AUS-MEAT pre-chiller assessment requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • establishment must be MSA licensed • grading equipment that is accurate and fully charged • MSA and AUS-MEAT reference standards.
Knowledge of <i>MSA minimum requirements</i> must include:	<ul style="list-style-type: none"> • the MSA minimum requirement for AUS-MEAT meat colour • the MSA minimum requirement for fat distribution and hide puller damage • the MSA minimum requirement for ultimate pH • the MSA minimum requirements for subcutaneous rib fat/p8 fat.
Minimum standards of performance include:	<ul style="list-style-type: none"> • currency in AUS-MEAT chiller assessment • currency in MSA grading.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a sheep or goat carcass	1.1. Directions on a carcass using the anatomical direction format are described. 1.2. Bones relevant to meat <i>specifications</i> in a sheep or goat skeleton are located and identified. 1.3. Relevant glands and cartilage on a sheep or goat carcass are located and identified. 1.4. <i>Muscles</i> relevant to sheep or goat specifications are located and identified.
2. Identify and name meat <i>products</i> using the standard product description	2.1. Nature and format of product specifications are explained. 2.2. Meat products are correctly identified, named and spelt using the standardised cut description. 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the anatomical terms to describe cutting lines. 2.5. Necessary changes required for any given meat product to comply with the company product description are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- undertake *measurements and checking* against specification requirements
- identify non-conforming product in accordance with specifications
- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as part of a team
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- product specification requirements
- corrective action procedures for non-conforming product
- relevant OH&S, regulatory and workplace requirements
- language specifications of sheep or goat product
- product specification points
- skeletal and anatomical structures and features of sheep or goat product to be specified

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when applying the language to actual carcasses and meat cuts.

Context of and specific resources for assessment

Competency must be assessed in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- completion of standard AUS-MEAT assessment
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

MTMP3102B Provide coaching

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to act as a coach to others in the workplace.
------------------------	--

Application of the Unit

Application of the unit	Coaching is used when experienced personnel are teamed with new recruits or employees new to a position. The role of a coach is to provide advice, support and guidance as the employee learns new tasks and skills, and becomes familiar with the position and the working environment. In many companies, this is referred to as a 'buddy' system. Coaching or buddying is used throughout the meat industry.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish <i>coaching</i> relationship	1.1. Areas for development in line with organisational and individual requirements are identified. 1.2. Effective communication styles to develop trust, confidence and rapport are applied. 1.3. <i>Coaching arrangements</i> on how the relationship will be conducted are made. 1.4. Expectations and goals are agreed. 1.5. Input from <i>relevant personnel</i> is sought, if required.
2. Provide coaching support	2.1. Individual is assisted to clarify tasks, duties and other requirements associated with the position. 2.2. Individual is assisted to gain required skills and expertise through demonstration, guidance, advice and constructive feedback. 2.3. A supportive environment is provided to allow the individual to develop towards the achievement of required skill levels. 2.4. Individual is encouraged to make decisions and take responsibility for the courses of actions or solutions under consideration. 2.5. Assistance and guidance is provided in a manner that allows the individual to retain responsibility for personal performance.
3. Evaluate effectiveness of coaching	3.1. <i>Changes in the coaching relationship</i> are recognised and openly discussed. 3.2. Adjustments to the relationship are made to take account of the needs of both the coach and the individual. 3.3. <i>Feedback</i> from colleagues and other relevant personnel is sought to identify and implement improvements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- apply *communication skills* in giving, receiving and analysing feedback relevant to the process of coaching
- apply the organisation's policies, procedures and plans
- apply relevant *problem-solving skills*
- assist another individual to achieve their goals and development needs through the use of significant workplace knowledge
- create a learning environment that allows for open discussion, feedback, tolerance of mistakes during learning within a safe environment, and affirmation of the individual's worthiness
- work effectively as an individual and as part of a team
- demonstrate effective methods of coaching
- demonstrate effective planning skills to organise activities
- Identify and apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate methods and techniques for eliciting and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Required knowledge

Knowledge of:

- effective learning styles and methods of coaching
- methods for identifying development opportunities
- enterprise's Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the coaching process
- principles of coaching for development of competence

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Context of and specific resources for assessment

Assessment must occur in the workplace and under normal enterprise or production conditions.

Method of assessment

Recommended methods of assessment include:

- interview with employee to evaluate coach's skills
- structured or unstructured simulations, case studies or scenarios
- workplace referee, supervisor or third-party reports of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish <i>mentoring</i> relationship	1.1. Areas for development are identified in line with organisational and individual requirements. 1.2. Effective <i>communication</i> styles are used to develop trust, confidence and rapport. 1.3. Mentoring arrangements on how the relationship will be conducted are made. 1.4. Expectations and goals are agreed. 1.5. Input from <i>relevant personnel</i> is sought if required.
2. Provide mentoring support	2.1. Individual is assisted to identify and evaluate opportunities to achieve agreed goals and development activities. 2.2. Personal experiences and knowledge are shared with the individual to assist in progress to agreed goals and development. 2.3. A supportive environment is provided to allow the individual to develop towards the achievement of goals. 2.4. Individual is encouraged to make decisions and take responsibility for the courses of action or solutions under consideration. 2.5. Assistance and guidance are provided in a manner that allows the individual to retain responsibility for achievement of their goals.
3. Evaluate effectiveness of mentoring	3.1. <i>Changes in the mentoring relationship</i> are recognised and openly discussed. 3.2. Adjustments to the relationship are made to take account of the needs of both the mentor and the individual. 3.3. <i>Feedback</i> from the individual and other relevant personnel is sought to identify and implement improvements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE**Required skills**

Ability to:

- use effective planning skills to organise activities
- apply communication skills in giving, receiving and analysing feedback relevant to the process of mentoring
- apply relevant *problem-solving skills*
- assist another individual to achieve their goals and development needs using significant workplace knowledge and experience
- work effectively as an individual and as part of a team
- demonstrate effective methods of mentoring
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- demonstrate methods and techniques for eliciting and interpreting feedback
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Required knowledge

Knowledge of:

- methods for identifying development opportunities
- enterprise's Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the mentoring process
- principles of mentoring
- role and benefits of mentoring
- relevant *OH&S*, *regulatory* and *workplace requirements*
- methods and techniques for eliciting and interpreting feedback

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace and under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- interview with employee to evaluate mentor's skills
- structured or unstructured simulations, case studies or scenarios
- workplace referee, supervisor or third-party reports of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>mentoring</i> may include:	<ul style="list-style-type: none"> • effective communication and problem-solving • individual and personal development • supporting 'at risk' personnel (e.g. new employees) • workplace relationships.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • being appropriately assertive • empathising • interpreting the needs of internal or external customers • listening and understanding • providing constructive feedback • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • using negotiation and persuasion techniques • writing to audience needs.
<i>Mentoring arrangements</i> may include:	<ul style="list-style-type: none"> • amount of time involved for both parties • confidentiality of information • identification of development opportunities • development plan towards achieving goals.

RANGE STATEMENT	
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • human resources manager • OH&S personnel • supervisor or training manager • training or development officer • other members of the organisation.
<i>Changes in the mentoring relationship</i> may include:	<ul style="list-style-type: none"> • achievement of goals and a decision to conclude the relationship • change in the dynamic of the relationship • identification of a need for assistance from others with different skills • inability of one party to continue participation.
<i>Feedback</i> on performance may include:	<ul style="list-style-type: none"> • informal discussion • obtaining feedback from supervisors or colleagues • personal, reflective behaviour strategies • routine organisational methods for appraising performance.
<i>Problem-solving skills</i> may involve:	<ul style="list-style-type: none"> • applying a range of strategies in problem-solving • developing practical and creative solutions to workplace problems • identifying opportunities and solutions that might not be obvious to others • listening to and resolving concerns in relation to workplace issues • showing independence and initiative in identifying problems • solving problems individually or in teams • using numeracy skills.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p>Regulatory requirements may include:</p>	<ul style="list-style-type: none"> • animal welfare • award and enterprise agreements and relevant industrial instruments • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • relevant industry codes of practice • relevant legislation from all levels of government that impact on business operations, especially in regard to OH&S and environmental issues, EEO, industrial relations and anti-discrimination • relevant regulations • requirements in the AS 4696:2007 Australian Standard for the Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing • taxation.
<p>Workplace requirements may include:</p>	<ul style="list-style-type: none"> • access and equity principles and practice • anti-discrimination and related policy • business and performance plans • confidentiality and security requirements • enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a kangaroo carcass	1.1. Directions on a carcass using the anatomical direction format are described. 1.2. Bones relevant to meat <i>specifications</i> in a kangaroo skeleton are located and identified. 1.3. Relevant glands and cartilage on a kangaroo carcass are located and identified. 1.4. <i>Muscles</i> relevant to kangaroo specifications are located and identified.
2. Identify and name meat <i>products</i> using the standard product description	2.1. Nature and format of product specifications are explained. 2.2. Meat products are correctly identified, named and spelt using the standardised cut description. 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the anatomical terms to describe cutting lines. 2.5. Necessary changes to any given meat product for it to comply with the company product description are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- undertake *measurements and checking* against specification requirements
- identify non-conforming product in accordance with specifications
- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as part of a team
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- product specification requirements
- corrective action procedures for non-conforming product
- relevant OH&S, regulatory and workplace requirements
- language specifications for kangaroo products
- product specification points
- skeletal and anatomical structures and features of kangaroo product to be specified

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated applying the language to actual carcasses and meat cuts.

Context of, and specific resources for assessment

Competency must be assessed in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- completion of standard AUS-MEAT assessment
- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify work activities	1.1. Identify team tasks. 1.2. Identify work activities that are allocated to the individual. 1.3. Prioritise work activities as directed.
2. Organise daily work activities	2.1. Break work activities down into small achievable components. 2.2. Identify hazards and implement required controls. 2.3. Identify <i>regulatory</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 2.4. Identify relevant <i>workplace requirements</i> . 2.5. Record activities.
3. Follow work plan	3.1. Locate relevant Standard Operating Procedures (SOPs) and work instructions. 3.2. Undertake tasks in accordance with schedule/plan. 3.3. Maintain output in accordance with schedule/plan. 3.4. Follow prescribed and routine work related sequences.
4. Modify work plan	4.1. Identify changing needs/conditions. 4.2. Identify the safety and production implications of changes. 4.3. Seek assistance from <i>relevant personnel</i> when difficulties arise. 4.4. Review tasks and priorities in line with changing needs/conditions with a change of instruction from appropriate personnel. 4.5. Update work plan taking account of safety and production implications and communicate to appropriate personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- use communication skills appropriate to the task, including reading, writing, numeracy, listening and speaking skills
- apply relevant problem-solving skills
- work effectively as an individual and as part of a team
- interpret and apply enterprise's standard operating procedures, work instructions and relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate methods and techniques for obtaining and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Required knowledge

Knowledge of:

- enterprise quality, operational and safety procedures
- regulatory requirements and customer specifications
- importance of workplace documentation
- routine work planning processes
- potential safety implications of modifying the work plan
- job outcomes, standards and priorities
- equipment and processes used in the workplace
- hazards associated with the process
- methods of controlling the hazards according to procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Consistent performance should be demonstrated. In particular assessors should check that:

- hazards are identified and controlled
- work schedules are interpreted and understood and instructions acted upon
- relevant procedures are followed
- resources and time are effectively and efficiently utilised
- potential disruptions or changed circumstances are recognised and work plans modified in conjunction with relevant personnel
- assistance is sought from relevant personnel when difficulties arise

Context of and specific resources for assessment

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations.

EVIDENCE GUIDE	
	A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • structured or unstructured simulations, case studies or scenarios • workplace project • on-the-job demonstration • workplace referee, supervisor or third-party reports of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take samples for testing	<p>1.1. Cartons for testing are selected according to sampling plan.</p> <p>1.2. Cartons are handled according to workplace hygiene and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p> <p>1.3. <i>Products</i> to be sampled are identified.</p> <p>1.4. Samples are taken according to <i>workplace requirements</i>.</p>
2. Test samples	<p>2.1. Pre-operational checks on scales are performed according to workplace requirements.</p> <p>2.2. Meat samples are blended according to workplace requirements.</p> <p>2.3. Scales are tared or beaker weighed according to work instruction.</p> <p>2.4. Samples are cooked and weighed according to workplace requirements.</p> <p>2.5. Samples are disposed of according to workplace requirements.</p>
3. Calculate CL	<p>3.1. CL percentage is calculated using prescribed formula.</p> <p>3.2. Cartons are withheld or released depending on CL results and workplace requirements.</p> <p>3.3. CL results are recorded and reported according to workplace requirements.</p> <p>3.4. Corrective action and retesting requirements are identified for out-of-specification product.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- accurately use of the formula for calculating CL
- apply relevant regulatory requirements

REQUIRED SKILLS AND KNOWLEDGE

- use testing scales and taring scales (if required) according to manufacturer's specifications and workplace requirements
- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- concept of CL and why it is important in specifications
- corrective actions required if CL results are not within specification
- work instruction for sampling and testing
- relevant *regulatory requirements*

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated at the normal speed of production.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment should be performed in an operating boning room and across the full range of product specifications.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • workplace demonstration • workplace referee report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
<p>Guidance information for</p>	<p>A current list of resources for this Unit of Competency is</p>

assessment	available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Products</i> may include:	<ul style="list-style-type: none"> • any carton muscle meat.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • hygiene and sanitation requirements • OH&S requirements • Quality Assurance (QA) requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • interpreting the needs of internal or external customers • listening and understanding • reading and interpreting workplace documentation • speaking clearly and directly • sharing information • writing to audience needs.
<i>Problem-solving skills</i> may involve:	<ul style="list-style-type: none"> • developing practical and creative solutions to workplace problems • identifying opportunities and solutions that might not be obvious to others • solving problems individually or in teams • using numeracy skills to solve problems.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.

MTMP401B Utilise refrigeration index

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the skills and knowledge required to use the Refrigeration Index (RI) to validate compliance of a chilling and freezing process.</p> <p>The Export Control Orders (ECO), which came into effect in July 2005, require the validation of all chilling processes using the RI.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is applicable to Quality Assurance (QA) staff and regulators who utilise the RI to validate compliance of a chilling or freezing process.</p>
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the RI	<p>1.1. RI measure and the uses of predictive microbiological model are explained.</p> <p>1.2. Regulatory requirements for process compliance using the RI are identified.</p> <p>1.3. <i>Factors affecting microbial growth</i> are identified.</p> <p>1.4. RI model parameters are identified.</p>
2. Collect <i>temperature data</i> for RI	<p>2.1. Data logger is set up correctly.</p> <p>2.2. Temperature sensor is placed in <i>product</i>, taking into account the point of microbiological concern and recommended placement.</p> <p>2.3. Time-temperature data is processed into correct format for RI calculator.</p>
3. Select and define process to be validated	<p>3.1. Process is defined in terms of the output.</p> <p>3.2. Production lot is defined.</p> <p>3.3. Variables in the process are identified.</p> <p>3.4. Number of measurements to be taken is identified.</p> <p>3.5. When and where data is to be collected is identified.</p> <p>3.6. RI criteria are identified.</p>
4. Calculate RI index	<p>4.1. Software is loaded and opened.</p> <p>4.2. Correct calculator options for process being validated are selected.</p> <p>4.3. RI for process to be validated is calculated.</p>
5. Utilise RI to validate process	<p>5.1. RI is compared with ECO requirements.</p> <p>5.2. Appropriateness of the data is assessed where RI does not comply.</p> <p>5.3. Action is taken on a non-conforming process.</p> <p>5.4. Decisions are made on production disposition for a refrigeration breakdown.</p>
6. Document a validation process using the RI	<p>6.1. Purpose, process and arrangements for the validation are described.</p> <p>6.2. Data collection methods and calculation options used are described and data collected is summarised.</p> <p>6.3. Validation decision is stated.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- define a process and the relevant variables
- plan and manage the collection of data for a validation exercise
- arrange and document the validation of a chilling process using the RI
- input data into the RI index
- identify and resolve data inconsistencies
- process data into the correct format for the RI calculator
- review RI calculated and make decisions on process validation or product disposition
- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge and techniques through informal learning and personal research utilising such things as the web, industry journals, Australian Quarantine Inspection Service (AQIS) notices and conference workshops
- work effectively as an individual and as a team member when gathering data
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- growth phases of microbes
- purpose of predictive microbiological models
- how and why RI is used
- the parameters of the RI model
- product disposition using the RI
- ECO criteria for RI
- requirements for data collection
- different RI calculator options
- documentation requirements for process validation using RI
- factors affecting the growth of microbes
- meaning of log values

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor carcass product	<p>1.1. Samples are selected for assessment according to the approved <i>sampling plan</i>.</p> <p>1.2. Assessment is conducted utilising appropriate facilities, lighting and time.</p> <p>1.3. Products are monitored for defects according to the agreed criteria and classification.</p> <p>1.4. Carcasses are scanned using the approved scanning lines.</p> <p>1.5. Defects are recorded accurately using the correct forms or electronic system.</p> <p>1.6. Immediate corrective action is implemented according to the MHA program's requirements.</p> <p>1.7. Carcasses are monitored according to <i>workplace requirements</i> for hygiene and sanitation, and Occupational Health and Safety (OH&S).</p>
2. Monitor offal (where applicable to a plant's operations)	<p>2.1. Samples are selected for assessment according to the approved sampling plan.</p> <p>2.2. Assessment is conducted utilising appropriate facilities, lighting and time.</p> <p>2.3. Offal is monitored for defects according to the agreed criteria and classification.</p> <p>2.4. Defects are recorded accurately using the correct forms or electronic system.</p> <p>2.5. Levels for triggering corrective actions are identified.</p> <p>2.6. Immediate corrective action is implemented according to the MHA program's requirements.</p> <p>2.7. Offal is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.</p>
3. Assess carton meat (where applicable to a plant's operations)	<p>3.1. Samples are selected for assessment according to the approved sampling plan.</p> <p>3.2. Assessment is conducted utilising appropriate facilities, lighting and time.</p> <p>3.3. Carton meat is monitored for defects according to the agreed criteria and classification.</p> <p>3.4. Defects are recorded accurately using the correct forms or electronic system.</p> <p>3.5. Levels for triggering corrective actions are identified.</p> <p>3.6. Immediate corrective action is implemented</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to the MHA program's requirements.</p> <p>3.7. Carton meat is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.</p>
4. Monitor process	<p>4.1. Process is monitored according to the enterprise monitoring plan.</p> <p>4.2. Results are recorded accurately on the appropriate process monitoring sheets.</p> <p>4.3. Process is rated according to the <i>established criteria</i>.</p> <p>4.4. Immediate corrective action is implemented according to the MHA program's requirements.</p> <p>4.5. A conformity index is calculated and recorded after each process monitoring exercise.</p> <p>4.6. Process is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.</p> <p>4.7. Results of process monitoring are tracked over time and reconciled with product monitoring outcomes.</p>
5. Analyse data gathered	<p>5.1. Product and process monitoring results are <i>plotted on simple trend charts</i>.</p> <p>5.2. Product and process monitoring results are <i>plotted on control charts</i>.</p> <p>5.3. Trends are interpreted and remedial or corrective actions are taken where necessary.</p>
6. Implement MHA program	6.1. Work instructions for monitoring activities are prepared and implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • monitor product for defects according to the MHA program • identify and resolve data inconsistencies • monitor the process for conformity with the plant's HACCP-based QA system in accordance with the MHA program

REQUIRED SKILLS AND KNOWLEDGE

- observe hygiene and sanitation requirements when monitoring product and process
- graph and interpret trends in product and process monitoring results
- instigate corrective and preventative actions when appropriate
- apply relevant *communication* and *mathematical skills*
- comply with *OH&S requirements* when monitoring product and process
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- work efficiently as an individual and as a team member
- identify and apply relevant OH&S and *regulatory requirements*
- provide relevant information to work colleagues to facilitate understanding of, and compliance with, the applicable standards and regulations
- record the monitoring results accurately
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology

Required knowledge

Knowledge of:

- purpose of an MHA program
- classification of defects
- when and how corrective actions are to be taken in response to monitoring outcomes
- types and purpose of control charts
- purpose of trend charts
- what a trend is and why it is important when monitoring process and product
- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- purpose of the process conformity index
- types of defects to be identified in carcass, offal and carton product

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify the major <i>regulatory requirements</i> relevant to meat processing plants supplying the domestic market</p>	<p>1.1. Relevant legislation and its application to meat processing plants is identified.</p> <p>1.2. Relevant Australian Standards called up in this legislation are identified.</p> <p>1.3. Agency responsible for the enforcement of this legislation is identified.</p> <p>1.4. Process for registration of a domestic meat processing plant is explained.</p> <p>1.5. Registration process for meat inspectors is described.</p>
<p>2. Identify and describe the requirements of the Australian Standard</p>	<p>2.1. Nature of approved arrangements and pre-requisite programs is described.</p> <p>2.2. Meat inspection requirements of the Australian Standard are described and explained.</p> <p>2.3. Disposition requirements of the Australian Standard are described and explained.</p> <p>2.4. Requirements for reporting exotic or notifiable diseases are described.</p>
<p>3. Identify government review and audit processes</p>	<p>3.1. Relevant government agencies regulating the meat industry at state level are identified.</p> <p>3.2. Review and audit processes used by the agencies to ensure compliance with the Australian Standard are described.</p>
<p>4. Oversee compliance with the Australian Standard</p>	<p>4.1. Internal verification activities for compliance are participated in.</p> <p>4.2. External review or audit is prepared for.</p> <p>4.3. External review or audit of compliance is managed.</p> <p>4.4. Corrective action requests from external or internal audits are closed out.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- apply relevant *communication* and *mathematical skills*
- identify and resolve data inconsistencies
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research
- work effectively as an individual and as a team member
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to close out corrective action requests
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *workplace requirements*
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations.
- use technology to access information, prepare reports, and to access and prepare relevant data

Required knowledge

Knowledge of:

- how to prepare for an external review or audit
- how to close out corrective action requests from external or internal audits
- requirements for meat inspection staff to work effectively as an individual and as a team member
- characteristics of exotic or notifiable diseases

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated in terms of specific legislation relevant to export or domestic meat processing plants.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in the context of simulated breaches and simulated review processes. Assessment must involve utilising the current Australian Standards.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment are:</p> <ul style="list-style-type: none"> • assignment • quiz of underpinning knowledge • simulation • workplace demonstration • workplace project • workplace referee report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to</p>

EVIDENCE GUIDE	
	Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply knowledge of muscle structure and biochemistry to meat quality and the factors that affect it	1.1. Biological mechanisms (both pre and post slaughter) that affect meat quality in beef are explained. 1.2. Pattern of tissue development in the body and the pattern of deposition within the muscle and fat depots within the body are identified including the composition of fat in depots and the extent it can be manipulated by production factors. 1.3. Structure of skeletal muscles in terms of the myofibre and connective tissue components and the effect that these structures have on eating quality is identified. 1.4. Biochemical events that occur in muscle early post-mortem and their significance in subsequent meat quality are identified.
2. Identify the <i>production and pre-slaughter factors that affect meat quality</i>	2.1. Impacts of production factors on meat quality are identified. 2.2. Pre-slaughter factors are explained.
3. Identify the <i>processing factors that impact on eating quality</i>	3.1. pH/temperature window and how it impacts on palatability is explained. 3.2. Role of electrical stimulation in controlling the rate of glycolysis in the carcass is described. 3.3. Impact of stretching the muscles pre-rigor on palatability is explained. 3.4. Process of ageing, its impact on tenderness and methods for extending the storage life of fresh meat including the application of packaging technologies is described. 3.5. Impact of cooking on the palatability of meat is described.
4. Describe quality attributes of meat	4.1. Factors that control the changes in colour in fresh meat are identified. 4.2. Development of marbling fat and its impact on palatability in the carcass is described. 4.3. Impact of drip on both the appearance and palatability of meat is explained.
5. Identify and evaluate the MSA cuts based grading scheme	5.1. Palatability Analysis Critical Control Points (PACCP) approach to meat grading is explained. 5.2. Principles behind the development of the MSA

ELEMENT	PERFORMANCE CRITERIA
	<p>carcase pathways system, including tasting protocols, are described.</p> <p>5.3. Impact of the various production, processing and value-adding inputs on the palatability of beef using the MSA model are established.</p> <p>5.4. Potential benefits of a cuts-based grading system to the various sectors of the industry are evaluated.</p> <p>5.5. Alternative grading schemes and their various grade attributes are analysed.</p>
6. Interpret and analyse data to predict probable impacts on meat eating quality	<p>6.1. Probable impacts of production and processing on meat quality are predicted.</p> <p>6.2. Potential solutions for eating quality problems are identified.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication skills*
- collate and analyse eating quality *data*
- maintain currency of knowledge through independent research or professional development
- identify and apply relevant *OH&S, regulatory* and *workplace requirements*
- identify and recommend improvements that could be made to improve meat eating quality to management
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- consumer taste testing protocols and how they have been used to set grade standards and develop the cuts-based grading system
- factors that control the changes in colour in fresh meat and other quality factors including drip and marbling which impact on both appearance and palatability
- factors that occur between the knocking box and chiller assessment and their

REQUIRED SKILLS AND KNOWLEDGE

- impact on meat palatability
- visual and palatability attributes of meat quality that are important to customers
- physical and chemical changes that occur in the cooking of meat
- anatomical and biochemical determinants of meat palatability
- factors in animal husbandry, transport, lairage, slaughter, carcass storage, packaging, further processing and cooking that will impact on tenderness and palatability
- *minimum standards of performance*

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Competency must be assessed in the workplace or under simulated conditions. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

Method of assessment

Recommended methods of assessment are:

- evidence log book
- observation of the applicant working
- workplace referee or third party report of performance over time
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Production and pre-slaughter factors that affect meat quality</i> may include:</p>	<ul style="list-style-type: none"> • breed • growth path • glycogen depletion • high pH • Hormonal Growth Promotants (HGPs) • stress and stress reduction techniques.
<p><i>Processing factors that affect meat eating quality</i> may include:</p>	<ul style="list-style-type: none"> • ageing • anatomical factors • biochemical factors • cooking methods • electrical stimulation • fat distribution • grain feeding • growth rate or path • hanging method • hormonal growth promotants • marbling • packaging methods • Pale Soft Exudative (PSE) • pH • post mortem shortening • social regrouping of cattle

RANGE STATEMENT	
	<ul style="list-style-type: none"> • starvation • stress • temperature • time and temperature of cooking process • transport • tropical breed content.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • being appropriately assertive • interpreting the needs of internal or external customers • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups • writing to audience needs.
<i>Data</i> includes:	<ul style="list-style-type: none"> • ageing requirements • AUS-MEAT chiller assessment results, transport times • chiller cycles • lairage duration and conditions • MSA grading results • processing conditions, such as stimulation and other electrical inputs • time across the slaughter floor.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coat and apron • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh apron • protective boot covers • protective hand and arm covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> • Export Control Act • relevant Australian Standards • relevant regulations • AS 4696:2007 Australian Standard for the Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Minimum standards of performance</i> include:	<ul style="list-style-type: none"> • ability to identify areas where changes in management could potentially improve eating quality • analysis of data to present management with possible solutions.

MTMP405B Conduct and validate pH/temperature declines to Meat Standards Australia standards

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to accurately calibrate and maintain pH equipment, conduct pH and temperature declines and weekly monitoring, as well as to validate results to ensure conformance to the pH and temperature window. It is a licence requirement for Meat Standards Australia (MSA) enterprises to achieve the pH and temperature window.
------------------------	---

Application of the Unit

Application of the unit	The skills and knowledge gained from this unit allow operatives to monitor pH or temperature window to AUS-MEAT and MSA standards. This unit is suitable for people working in Quality Assurance (QA) or a company grading role.
--------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Operate</i> and calibrate <i>pH equipment</i>	1.1. Temperature calibrations are conducted. 1.2. pH calibrations are conducted.
2. Conduct monthly and weekly monitoring of the pH or temperature window	2.1. Correct technique for pH and temperature measurement is demonstrated. 2.2. Necessary information for validating monitoring is collected. 2.3. Valid and sufficient readings are collected. 2.4. Results are recorded and reported.
3. Analyse results of pH and temperature monitoring	3.1. Effects of heat shortening and cold shortening are recognised. 3.2. pH and temperature window is identified.
4. Suggest corrective action plans if window conformance is not achieved	4.1. Factors impacting on pH or temperature window conformance are identified and evaluated. 4.2. Reasons for non-conformance are identified. 4.3. Trials to achieve window conformance are conducted.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • collect information on live animals to be used in pH and temperature monitoring • conduct monthly and weekly monitoring of the pH and temperature window • observe, time and follow carcasses through the slaughter floor recording the following: <ul style="list-style-type: none"> • carcass information • chiller number • immobiliser information (if applicable) • rigidity probe information (if applicable) • stimulation information (if applicable) • time into the chiller

REQUIRED SKILLS AND KNOWLEDGE

- time stunned
- analyse results to verify conformance
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- generate individual and lot average graphs to show pH and temperature window conformance
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- Improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- maintain currency of knowledge through professional development or self-directed research
- operate and calibrate pH and temperature readings
- suggest corrective action procedures

Required knowledge

Knowledge of:

- the scope and nature of *MSA standards*
- how electrical stimulation impacts on pH decline
- impact chilling factors have on the *rate of pH and temperature decline*
- how the time it takes a carcass to reach the chiller can impact on the rate of pH decline
- pH and temperature window
- how cold shortening occurs and the characteristics of cold shortened product
- how heat shortening occurs and the characteristics of heat shortened product
- how other electrical inputs can impact on the rate of pH decline
- the impact the temperature of the slaughter floor can have on the rate of the pH and temperature decline
- what glycogen is and the relationship between stress and pH
- what pH is and why pH is important for eating quality

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a QA program for rendering plant	1.1. Process flow chart is developed for rendering plant. 1.2. Control and Critical Control Points (CCPs) are identified. 1.3. Procedures to be carried out at control and CCPs are identified. 1.4. Critical limits are validated. 1.5. Operations manual, monitoring sheets and verification procedures are developed.
2. Implement the QA program at the rendering plant	2.1. QA procedures and requirements are clearly explained to relevant personnel. 2.2. Staff are coached and mentored in the introduction of work instructions and operating procedures. 2.3. Verification and recording procedures are introduced and monitored. 2.4. Internal audit is conducted to verify program.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • develop a QA program that meets <i>regulatory</i> and <i>workplace requirements</i> • develop an implementation plan • develop and document work instructions and Standard Operating Procedures (SOPs) • establish and validate critical limits • explain the process flow chart for the rendering operation • form, instruct and lead a Hazard Analysis Critical Control Point (HACCP) team • identify and observe <i>Occupational Health and Safety (OH&S)</i> requirements where applicable • identify corrective action • identify CCPs for QA monitoring • identify hazards • implement the QA program

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate work requirements and expectations	1.1. Information requirements of new recruits are identified. 1.2. Company policies, performance requirements and responsibilities are communicated to new recruits. 1.3. Information is made available in formats appropriate and accessible to new recruits. 1.4. Communication methods take into account the purpose and the audience, including social and cultural diversity . 1.5. Appropriate work behaviours and procedures are modelled in personal conduct. 1.6. Individual and team issues relating to developing and managing new recruits are identified, facilitated and resolved within level of responsibility.
2. Provide a learning environment for new recruits	2.1. Learning and development plans for new recruits are established and monitored in conjunction with human resources personnel. 2.2. Resources required to support informal and formal learning and training in the work area are estimated and secured. 2.3. Implementation of workplace policies is monitored to ensure the workplace and learning environment conforms with industrial, customer and legal requirements. 2.4. Opportunities for new recruits to develop and apply skills and knowledge are arranged. 2.5. Patterns of work organisation and job rotation are established to reinforce learning.
3. Provide regular and timely feedback on performance	3.1. Progress and performance of new recruits is monitored. 3.2. Signs of poor or unacceptable practices are identified. 3.3. Reasons for poor or unacceptable performance are investigated. 3.4. Structured feedback is provided to new recruits. 3.5. Strategies to address the performance gap are identified and agreed with the new recruit. 3.6. Progress and/or taking appropriate follow up action is confirmed through ongoing monitoring.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply appropriate communication skills to facilitate resolution of issues and **manage conflict** to resolve disagreements or disputes
- apply interpersonal skills including appropriate questioning, listening and feedback techniques
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- ensure that appropriate behaviour or procedures are consistently observed by all personnel in the work area
- ensure that new recruits have adequate opportunities to learn, apply and practice new skills and knowledge
- ensure that relevant and appropriate information is available to new recruits in the work area to describe behaviour and performance expectations. This includes information on policies and procedures, corporate values and production targets or work outcomes required of the work role
- establish effective relationships with new recruits in the work area
- foster effective teamwork by recognising and utilising the strengths of individuals
- identify and apply relevant **Occupational Health and Safety (OH&S), regulatory and workplace requirements**
- identify legal requirements and responsibilities of self and the company in managing new recruits
- identify and conform with enterprise and employee obligations under **industrial arrangements** and **training agreements** relating to the provision of (workplace) training
- investigate causes of poor or unacceptable work performance in consultation with new recruits
- model behaviour consistent with company policies and procedures
- monitor individual performance, identify **performance gaps and develop strategies** in consultation with human resources personnel
- monitor progress towards achieving agreed conduct and/or performance improvements
- plan and undertake structured feedback or appraisal of new recruits
- provide regular feedback to new recruits to foster confidence and appropriate workplace behaviours
- take action to improve own work practice as a result of self-evaluation, feedback

REQUIRED SKILLS AND KNOWLEDGE

from others, or changed work practices, regulations or technology

Required knowledge

Knowledge of:

- workplace feedback and performance management systems and responsibilities in the workplace, including personal level of authority for performance counselling and disciplinary procedures
- Equal Employment Opportunities (EEO) legislation
- conflict management techniques
- workplace policies and procedures.

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Communication may include:	<ul style="list-style-type: none"> • interpretation and sensitive handling of non-verbal and visual clues and cues • non-verbal communication, including the use of signs, signals, symbols and pictures • speaking clearly and directly; listening and understanding • reading and interpreting workplace-related documentation • writing to audience needs • sharing information • use of negotiation and persuasion skills, and being appropriately assertive. • showing empathy.
Diversity of individuals may include:	<ul style="list-style-type: none"> • ability • age • ethnicity, culture • gender • language group • social and economic background.
Resources may include:	<ul style="list-style-type: none"> • equipment (e.g. maintenance, purchase, type, quantity and function) • finance (e.g. capital and cash flow) • ingredients and materials (e.g. supply,

RANGE STATEMENT	
	<p>quantity, storage and rotation)</p> <ul style="list-style-type: none"> • personnel (e.g. staffing levels, shifts and allocation to work areas) • specialist advice (e.g. industry associations, media organisations and marketing agencies).
Structured feedback may include:	<ul style="list-style-type: none"> • performance appraisal • structured interviews.
Conflict management may include:	<ul style="list-style-type: none"> • referral to more senior management and/or relevant industrial parties where conflicts are unable to be resolved.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Regulatory requirements may include:	<ul style="list-style-type: none"> • animal welfare • environmental and waste management • equal opportunity, anti-discrimination and sexual harassment • hygiene and sanitation requirements • industrial awards and agreements • OH&S • relevant regulations and Australian Standards.
Workplace requirements will include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Industrial arrangements</i> may include:	<ul style="list-style-type: none"> • consultative processes • industrial agreements, awards, training agreements • pay scales and entitlements, qualifications, classification.
<i>Training agreements</i> and contracts may include:	<ul style="list-style-type: none"> • cadetships • internships • traineeships and apprenticeships • training arrangements included in industrial agreements.
<i>Strategies to address performance gap</i> may include:	<ul style="list-style-type: none"> • a clear statement of the problem, an explanation of why it is a problem, and the action or change required to address the problem and any follow up action required • a formal interview to counsel a new recruit on poor performance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect meat transport <i>container</i> or vehicle	1.1. Regulatory and workplace requirements for vehicles and containers are identified. 1.2. Sources of potential contamination are identified and explained. 1.3. Meat transport vehicle or container is inspected for compliance with licensing requirements. 1.4. Meat transport vehicle or container is inspected for compliance with regulatory and workplace requirements. 1.5. Corrective action is taken if vehicles or containers do not meet workplace or regulatory requirements. 1.6. Reports are completed to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply **mathematical applications** where relevant
- complete **literacy and numeracy** tasks to a standard required in the workplace
- work effectively as an individual and as part of a team
- follow enterprise and regulatory inspection procedures for meat transport vehicles
- identify non-conformance in hygiene and sanitation, **Occupational Health and Safety (OH&S)** and licensing requirements
- prepare reports clearly and concisely in standard formats
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take corrective action if vehicle or container does not meet workplace or regulatory requirements

Required knowledge

Knowledge of:

- potential sources of contamination
- regulatory and enterprise hygiene and sanitation requirements related to inspection

REQUIRED SKILLS AND KNOWLEDGE

of meat transport vehicles or containers

- licensing and registration requirements for meat transport vehicles

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess a proposed site for a meat processing plant	<p>1.1. Identify workplace production requirements.</p> <p>1.2. Site suitability for a meat processing establishment is assessed in terms of meeting all regulatory requirements.</p> <p>1.3. Factors that will affect all key stakeholders in the site are identified.</p>
2. Assess the design and construction of a proposed meat processing establishment	<p>2.1. All regulatory requirements and importing country requirements, where relevant, for the design and construction of meat processing establishments are identified and applied to the design.</p> <p>2.2. Statutory and practical requirements for Quality Assurance (QA), animal welfare, Occupational Health and Safety (OH&S), and hygiene and sanitation are identified and applied to the design.</p> <p>2.3. Design is assessed in terms of achieving an effective and efficient product flow and separation of edible and inedible products.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • assess plans for a meat processing establishment against regulatory requirements • describe the layout, operation and product flow of a range of meat processing establishments • identify elements of production process design that demonstrate efficient, hygienic and practical production procedures for edible and inedible products • consult with relevant stakeholders to ensure all requirements are addressed • work effectively as an individual and as part of a team • identify and apply relevant workplace requirements • interpret flow charts and plans relating to the design and construction of meat processing plants • prepare reports relevant to the task • take action to improve work performance as a result of self-evaluation, feedback

REQUIRED SKILLS AND KNOWLEDGE

from others and in response to changed work practices or technology

- use relevant *communication skills*

Required knowledge

Knowledge of:

- quality principles in relation to cleaning and repair of plant and equipment
- relevant statutory requirements for design and construction of abattoirs to meet hygienic production, OH&S and animal welfare requirements
- critical points in meat processing establishments that relate to design

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Oversee the humane handling of <i>animals</i>	1.1. Animal welfare requirements are identified in legislation, regulation and workplace procedures. 1.2. <i>Handling of animals</i> is overseen in accordance with <i>workplace</i> and <i>regulatory requirements</i> . 1.3. Procedures for minimising stress and preventing injury are monitored.
2. Oversee the humane <i>emergency kill</i> or <i>slaughter of animals</i>	2.1. Effective restraint, where appropriate, and <i>stunning</i> or emergency kill of animals is overseen to ensure compliance with workplace and regulatory requirements. 2.2. Bleeding of animals is overseen to ensure compliance with workplace and regulatory requirements, where applicable. 2.3. Monitoring of bleed chain insensibility is overseen to ensure compliance with workplace and regulatory requirements, where applicable.
3. Oversee facilities, equipment and people involved with the handling of animals	3.1. Facilities, equipment and people handling and slaughtering animals are overseen in accordance with workplace and regulatory requirements. 3.2. Bruising and/or hide or pelt damage data is monitored and corrective action is taken where appropriate.
4. Handle contingencies	4.1. Handling of sick or injured stock is overseen in accordance with workplace and regulatory requirements. 4.2. Handling of wild or uncooperative animals is overseen in accordance with workplace and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- ensure bruising and/or hide or pelt damage due to livestock handling is minimised
- ensure stock handlers remain calm and are not injured or put at risk of injury
- ensure stress in animals is minimised through correct handling
- explain the consequence of incorrect animal handling techniques
- explain why correct animal handling helps ensure that meat attains an acceptably low ultimate pH (i.e. high pH meat, caused by stressed animals and depleted glycogen stores, is avoided)
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- monitor the handling of livestock to ensure it occurs without injury to animal or worker
- identify sick and injured stock
- identify features of effective restraint, stun and bleed and/or oversee humane emergency kill
- monitor bleed chain insensibility, where applicable
- plan the movement of stock to meet production requirements and minimise stress
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

Required knowledge

Knowledge of:

- regulatory and workplace requirements for the humane handling and slaughtering of animals
- animal welfare standards and regulations
- strategies to minimise stress to livestock
- the stunning and bleeding process and/or emergency kill requirements
- causes of ineffective stunning and bleeding
- regulatory and workplace requirements for monitoring stunning and bleeding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated against the current animal welfare codes and regulations. Part of the assessment must involve working with livestock handling in stockyards or a slaughtering premises. This may take the form of supervising or auditing livestock handling or slaughtering operations.

Context of and specific resources for assessment

Assessment must be conducted in working stockyards and or slaughtering premises.

Method of assessment

Recommended methods of assessment are:

- assignment
- quiz of underpinning knowledge
- verified work log
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher nor less than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Animals</i> may include:	<ul style="list-style-type: none"> • all ages, species and breeds of livestock handled in an establishment for slaughter • livestock of various temperaments from very tame to wild • livestock unused to human contact or any handling procedures.
<i>Handling of animals</i> may include:	<ul style="list-style-type: none"> • all activities in the supply chain up to and including the knocking box or where live animals are killed, including handling in lairage, yards and pens, as well as the loading, transporting and unloading of livestock.
<i>Workplace</i> requirements may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

RANGE STATEMENT	
Regulatory requirements may include:	<ul style="list-style-type: none"> • domestic and importing country animal welfare codes, guides and legislation • Export Control Act • federal and state regulations regarding meat processing or animal welfare • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
Emergency kill applies to:	<ul style="list-style-type: none"> • the emergency slaughter of injured or sick animals being held in lairage or while in transport.
Slaughter of animals applies to:	<ul style="list-style-type: none"> • the stunning and bleeding of animals in the slaughter process.
Stunning includes the use of:	<ul style="list-style-type: none"> • gas chambers • electrical stunning • rifles • captive bolt guns • any other process approved by the responsible authority.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear

RANGE STATEMENT	
	<ul style="list-style-type: none"> requirements set out in standards and codes of practice.
<p><i>Communication skills</i> may include:</p>	<ul style="list-style-type: none"> applying numeracy skills to workplace requirements being appropriately assertive empathising establishing/using networks interpreting the needs of internal/external customers listening and understanding negotiating responsively persuading effectively reading and interpreting workplace-related documentation sharing information speaking clearly and directly working with diverse individuals and groups writing to audience needs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Describe <i>wild game meat</i> classification requirements	<p>1.1. Animal habitat is identified to <i>workplace requirements</i>.</p> <p>1.2. Wild game meat is identified and classified in accordance with workplace and <i>regulatory requirements</i>.</p>
2. Identify distinguishing characteristics and features of game animals	<p>2.1. Differences between game and non-game species are identified.</p> <p>2.2. Structure, locations and function of varying body systems are identified.</p> <p>2.3. Organoleptic or sensory differences between game and non-game animals are identified.</p>
3. Inspect wild game meat	<p>3.1. Wild game meat is inspected in accordance with regulatory requirements, hygiene and sanitation, and Occupational Health and Safety (OH&S) standards.</p> <p>3.2. Abnormalities in wild game meat are detected and identified.</p> <p>3.3. Major diseases and defects of game are identified.</p> <p>3.4. Carcase parts and organs are examined during inspection, according to workplace and regulatory requirements.</p> <p>3.5. Dispositions are made according to regulatory and workplace requirements.</p> <p>3.6. <i>Reporting and recording</i> requirements are completed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- list the main wild game meat animals
- list and describe major diseases and defects of game
- identify and apply relevant *OH&S requirements*
- inspect wild game meat in accordance with workplace and regulatory requirements

REQUIRED SKILLS AND KNOWLEDGE

- identify abnormalities or diseases in wild game meat
- access and explain regulatory requirements for wild game meat inspection
- complete *mathematical operations* required to calculate or establish regulatory compliance
- identify appropriate learning resources useful when working with unfamiliar species
- identify sources of contamination and take corrective action
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*
- work with processing team to ensure carcasses are presented correctly and in a timely manner

Required knowledge

Knowledge of:

- requirements to enable animal or carcass to be classified as wild game
- basic structure of game animals
- regulatory requirements for handling wild game meat
- distinguishing characteristics and features between the game and non-game animal

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency need only be demonstrated on the inspection of one game species.

Context of and specific resources for assessment

Assessment must include utilising wild game field shot carcasses.

Method of assessment

Recommended methods of assessment are:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify conditions of <i>poultry</i>	<p>1.1. Anatomical characteristics of poultry are identified.</p> <p>1.2. Signs of common conditions and defects are identified.</p> <p>1.3. Dispositions are made according to regulatory and workplace requirements.</p> <p>1.4. Major exotic and notifiable diseases affecting poultry and their signs and symptoms are identified.</p> <p>1.5. Appropriate steps are initiated, if suspect birds are identified, according to workplace and regulatory requirements.</p> <p>1.6. Reporting and recording requirements are completed.</p>
2. Identify relevant necessary processing standards	<p>2.1. Relevant Australian Standards for poultry processing are identified.</p> <p>2.2. Hygiene and sanitation requirements for each step in processing are identified.</p> <p>2.3. QA arrangements including monitoring and auditing requirements are identified.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform poultry inspection in accordance with regulatory and workplace requirements
- work with processing team to inspect poultry and identify suspect birds in an efficient and timely manner
- identify symptoms and signs of exotic or notifiable diseases
- report exotic or notifiable diseases promptly, accurately and clearly
- identify and apply relevant **Occupational Health and Safety (OH&S)** and workplace requirements
- apply **mathematical operations** where necessary to establish regulatory compliance

REQUIRED SKILLS AND KNOWLEDGE

- identify and describe the QA programs operating in poultry plants
- identify and use relevant *workplace information and documentation*
- identify sources of repeated contamination and work with processing team to rectify the problem
- use relevant *communication skills*

Required knowledge

Knowledge of:

- steps in poultry processing
- major diseases and defects found in poultry
- procedures for reporting exotic or notifiable diseases in poultry
- symptoms of exotic or notifiable diseases
- major food safety hazards in each step of poultry processing
- basic anatomical structure of poultry
- relevant regulatory requirements including Australian Standards and the various requirements for the processing of poultry
- specific hygiene and sanitation requirements for poultry processing

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency should be demonstrated against current Australian Standards and regulations.

Context of and specific resources for assessment

Assessment should utilise poultry carcasses and actual examples of pathology.

Method of assessment

Recommended methods of assessment are:

- assignment
- debrief
- quiz of underpinning knowledge
- simulation
- verified work log
- workplace demonstration
- workplace project
- workplace referee or third party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Poultry</i> may include:	<ul style="list-style-type: none"> • a range of different breeds and species.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • domestic and importing country requirements • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4465-2006 Construction of Premises and Hygienic Production of Poultry Meat for Human Consumption.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

RANGE STATEMENT	
Reporting and recording may:	<ul style="list-style-type: none"> • be oral, written (with accurate transcription) • be manual or electronic • be complex and contain information from a range of sources • include graphs, tables, charts, diagrams • include technical workplace and mathematical language and data.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Mathematical operations may include:	<ul style="list-style-type: none"> • acceptable limits, tolerances, out-of-specification performance, trends • calculation • estimation • measurement and interpretation, and relate to time, temperature, moisture humidity, ratios, percentages, weight, mass, or volume • processes which may be undertaken using a calculator or electronic aids.
Workplace information and documentation may include:	<ul style="list-style-type: none"> • specifications • status reports • audit reports • monitoring data.
Communication skills may	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical and physiological properties specific to <i>ratites</i>	1.1. Structure of body system is identified.
2. Perform ante-mortem inspection	2.1. Procedures and principles for humane handling of ratites are identified in accordance with <i>hygiene and sanitation, Occupational Health and Safety (OH&S)</i> and <i>workplace requirements</i> . 2.2. Ratites are handled humanely according to animal welfare regulations. 2.3. Signs of common conditions are identified during ante-mortem inspection and are dealt with accordingly. 2.4. Ante-mortem inspection is performed in accordance with OH&S and <i>regulatory requirements</i> . 2.5. QA issues relating to handling of animals during ante-mortem inspection are identified. 2.6. Procedures for emergency and suspect slaughter are identified. 2.7. <i>Reporting and recording</i> requirements are completed.
3. Assess suitability for slaughter	3.1. Diseases and conditions affecting ratite suitability for slaughter are identified and appropriate action is initiated. 3.2. Major exotic and notifiable diseases and their signs are identified and reported according to regulatory requirements. 3.3. Appropriate remedial action is taken.
4. Perform post-mortem inspection	4.1. Post-mortem inspection is performed in accordance with regulatory requirements. 4.2. Abnormalities in ratites are identified and detected. 4.3. Disposition is made according to Australian Standards and work instructions. 4.4. Exotic and notifiable diseases are identified. 4.5. Reporting and recording requirements are completed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform ante-mortem and post-mortem inspection on ratites according to the Australian Standard
- notify relevant authorities promptly when exotic or notifiable diseases are identified
- prepare notification reports, including technical information for internal personnel and external authorities
- work with processing team to inspect poultry and identify suspect birds in an efficient and timely manner
- research and identify legislation and Australian Standards applicable to the processing of ratites
- apply *mathematical operations* where necessary to establish regulatory compliance
- identify and use relevant *workplace information and documentation*
- identify common conditions and exotic and notifiable diseases in ratites
- identify sources of repeated contamination and work with processing team to rectify problems
- use relevant *communication skills*

Required knowledge

Knowledge of:

- basic anatomical structure of ratites
- specific hygiene and sanitation requirements associated with ratite processing
- specific structural requirements for ratite processing
- potential hazards associated with ratite processing
- dressing and storage requirements for ratites
- major diseases and defects in ratites
- main products and by-products associated with ratite processing

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated on at least one ratite species and in a ratite processing plant.

Context of and specific resources for assessment

Assessment must include ratite carcasses and actual examples of pathology.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble a bandsaw	<p>1.1. Bandsaw is assembled according to manufacturer's, workplace and Prepare and operate bandsaw requirements.</p> <p>1.2. Bandsaw guards and scrapers are checked for functioning and safety according to manufacturer's specifications and OH&S requirements.</p> <p>1.3. Bandsaw is checked to ensure it is clean in accordance with hygiene and sanitation, and workplace requirements.</p>
2. Operate a bandsaw	<p>2.1. Bandsaw is operated in accordance with workplace requirements and manufacturer's specifications.</p> <p>2.2. Bandsaw is operated in accordance with OH&S requirements.</p> <p>2.3. Bandsaw is used to cut meat products according to product specifications and workplace requirements.</p>
3. Clean a bandsaw	<p>3.1. Bandsaw is cleaned to manufacturer's, hygiene, OH&S and workplace requirements.</p>
4. Disassemble bandsaw	<p>4.1. Bandsaw is disassembled according to manufacturer's, OH&S and workplace requirements.</p> <p>4.2. Routine maintenance is performed according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- assemble and operate of a bandsaw to manufacturer's, workplace, OH&S, and hygiene and sanitation requirements
- carry out a pre-operational safety check on the bandsaw
- cut products using the bandsaw according to workplace, OH&S and hygiene requirements
- use the bandsaw according to OH&S, hygiene and sanitation, Quality Assurance (QA) and workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- seek advice from appropriate sources when working with new products or equipment
- demonstrate effective use of all cutting guides and safety guards
- report equipment faults either verbally or in writing to supervisor in accordance with workplace requirements.
- work safely and effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- purpose and effective use of all cutting guides and safety guards
- purpose and use of the bandsaw
- safety procedures related to use of the bandsaw
- relevant regulatory requirements
- OH&S requirements for operating a bandsaw
- workplace requirements related to:
 - cleaning a bandsaw
 - disassembly and reassembly of the bandsaw
 - operating a bandsaw
 - routine maintenance of a bandsaw

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Assessment must involve cutting meat products over a period of time.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove waste from work areas	1.1. Waste is deposited into correct bins, hoppers and chutes in accordance with workplace requirements. 1.2. Correct shovels, brooms and bins are used when gathering waste material to avoid cross-contamination of product and work areas. 1.3. Work area is kept free from waste or trimmings to ensure a safe working environment for fellow workers. 1.4. Segregation of edible and inedible product is maintained at all times (where applicable). 1.5. Work is performed without contaminating edible product (where applicable). 1.6. Waste in bins and tubs is shifted in accordance with manual handling procedures.
2. Clean areas during production	2.1. Work areas are cleaned in accordance with workplace requirements including Quality Assurance (QA) and Occupational Health and Safety (OH&S) requirements . 2.2. Work areas are cleaned while avoiding contamination of product. 2.3. Cleaning chemicals are used as directed and in accordance with standard workplace procedures (where part of an individual's duties).
3. Wash and store cleaning equipment , tubs and bins	3.1. Hoses are rolled and stored safely in accordance with workplace requirements. 3.2. Brooms, shovels and scrubbing brushes are cleaned and stored appropriately when not in use. 3.3. Chemicals, if used, are stored in accordance with workplace requirements in designated locations. 3.4. All bins, tubs etc are sanitised in accordance with workplace requirements (where applicable).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- follow work instructions which may require the employee to:
 - **communicate** to supervisor any problems or difficulties
 - maintain cleanliness of work areas and surfaces to workplace requirements
 - sort and dispose of waste in accordance with workplace requirements
 - store equipment and chemicals (where applicable) safely
 - use cleaning materials and equipment in a safe and hygienic manner
 - use hoses in a manner that effectively cleans without contaminating surfaces, edible or inedible product
- apply relevant **regulatory requirements**
- apply relevant communication skills
- work effectively as an individual and as a team member
- demonstrate a broad understanding of the inedible waste processing that occurs in the meat industry
- **explain** potential threat to the edible product of inadequate cleaning demonstrate the capacity to clean the work area safely during operations
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- OH&S requirements associated with the work e.g. using very hot water, using correct manual handling procedures, and maintaining a safe work environment for others
- potential threat to the edible product of inadequate cleaning
- correct usage of chemicals (as required)
- importance of dealing with or reporting problems associated with waste disposal eg blocked chutes or drains
- relevant regulatory requirements
- OH&S issues associated with cleaning during operations
- impact of incorrect disposal of waste on the environment and on by-products processing
- importance of following the documented cleaning procedure or schedule
- importance of, and difference between, wet and dry cleaning procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select meat product	<p>1.1. Meat products are identified for weighing and labelling according to <i>workplace requirements</i>.</p> <p>1.2. Carton is placed on scales in accordance with manufacturer's specifications and workplace requirements.</p>
2. Enter product data	<p>2.1. Codes for specific cuts are entered into the system.</p> <p>2.2. Data is recovered in report form where this is part of work instructions.</p>
3. Weigh carton	<p>3.1. Carton is weighed and details are recorded according to workplace requirements.</p> <p>3.2. Equipment operation is monitored to ensure correct information is recorded on <i>label</i>.</p>
4. Label carton	<p>4.1. Label is removed from labelling equipment and placed on carton according to workplace and regulatory requirements.</p> <p>4.2. Carton is labelled clearly for loadout.</p> <p>4.3. <i>Labelling</i> of cartons is monitored for accuracy in correlation with products.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- perform pre-start checks and routine maintenance as specified in work instructions
- monitor operation of equipment
- weigh and label meat product cartons in accordance with workplace and *regulatory requirements*
- check carton contents against labelling
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a team member
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- Occupational Health and Safety (*OH&S*) *requirements* related to labelling
- regulatory requirements with regard to labelling
- consequences of incorrect labelling
- monitoring of consumables
- purpose of labelling information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under normal rate of production.

Context of, and specific resources for assessment

Assessment must be conducted in a registered meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<p><i>Label</i> information may include:</p>	<ul style="list-style-type: none"> • Australian inspection stamp • 'bone in' or 'boneless' statement • category cipher, category in full, cut description in full • country of origin • customer requirements • date of production • duration of ageing workplace in-house bar code • enterprise-specific requirements • generic identification (species) • meat quality statement • number of pieces • temperature requirements for chiller

RANGE STATEMENT	
	<ul style="list-style-type: none"> • trade description • type of packaging • weight.
Labelling may include:	<ul style="list-style-type: none"> • automatic or handwritten ticket • government stamp (regulation) • roller brand.
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant regulations and Australian Standards • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
Communication skills may include:	<ul style="list-style-type: none"> • communicating and working with diverse individuals and groups • interpreting customer requirements • listening and understanding, speaking clearly and directly • reading and interpreting workplace-related documentation • sharing information.
Mathematical skills may include:	<ul style="list-style-type: none"> • accurate recording of time, volume, weight and quantity in standard formats or proformas • calculators and computer software packages • operations involving comparisons and variations • reading and interpreting analogue and digital measures including clocks and scales.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare <i>production records</i>	1.1. <i>Workplace</i> and <i>regulatory requirements</i> for <i>record-keeping</i> are identified. 1.2. Production recording equipment or materials are prepared in accordance with work instructions. 1.3. Records are updated on an electronic or manual system in accordance with work instructions. 1.4. Shortcomings of the recording system are corrected if applicable.
2. Generate reports	2.1. Data summaries and reports are prepared in accordance with workplace requirements 2.2. Major reports are generated detailing inventory, production or staffing data.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- follow all work instructions effectively
- generate reports to meet workplace and regulatory requirements
- apply relevant Occupational Health and Safety (*OH&S*) *requirements*
- maintain stocks of consumables for use
- prepare all recording equipment for use (where relevant)
- use all recording equipment properly (where relevant)
- record data according to data requirements
- update records as required
- prepare all summaries required
- apply relevant communication and mathematical skills
- work effectively as an individual and as part of a team
- describe the workplace and/or regulatory requirements for record-keeping
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- workplace requirements for reports
- relevant security arrangements such as Australian Quarantine Inspection Service (AQIS) or company requirements
- function and uses of the reports generated
- possible shortcomings of recording and how to correct them
- purposes of keeping production records
- relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while collecting and recording significant data over a period of time. The data should involve some complexity in categories and require accurate recording.

Context of, and specific resources for assessment

Assessment should be undertaken in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify load characteristics	<p>1.1. Characteristics of the load are taken into account and appropriate attachments are employed.</p> <p>1.2. Hazardous materials are identified and <i>workplace</i>, industry and <i>regulatory requirements</i> are taken into account when operating a forklift carrying hazardous materials.</p>
2. Consider specific features of workplace in transporting product	<p>2.1. Product is transported and loaded, taking into consideration specific features of the <i>workplace environment</i>.</p>
3. Transport and store product	<p>3.1. Specific Occupational Health and Safety (<i>OH&S requirements</i>) for work area are identified and followed.</p> <p>3.2. Forklift and pallets are handled in accordance with the requirements of specific work locations.</p> <p>3.3. Product is transported in accordance with workplace, Quality Assurance (QA), and hygiene and sanitation requirements.</p> <p>3.4. Product is stored in accordance with workplace, QA, and hygiene and sanitation requirements.</p> <p>3.5. Products and pallets are racked or stored in accordance with work instructions.</p>
4. Maintain equipment records	<p>4.1. Equipment records are maintained in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> gain a licence and satisfy traffic authority examiner, where required by government regulation <i>explain</i> operational safety requirements including OH&S requirements operate a forklift in a specific workplace to requirements of that workplace

REQUIRED SKILLS AND KNOWLEDGE

- operate a forklift in accordance with workplace requirements, and OH&S and manufacturer's specifications
- transport and store a variety of products to meet production requirements
- maintain equipment records
- apply hand-eye coordination
- apply relevant *communication* and *mathematical skills*
- assess, interpret and apply technical information
- work effectively as an individual and in a team
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- characteristics, capabilities and limitations of the forklift
- operational safety requirements including OH&S requirements
- QA considerations for transporting product within the plant
- critical aspects of:
 - identification of damage or leaks which may compromise operational capability or safety
 - operational safety.
- specific features of the workplace that impact on the operation of the forklift (eg operating in a cold environment)
- workplace operating procedures

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess meat colour, fat colour and marbling	1.1. Product sample is assessed to achieve meat and fat colour scores and marbling scores within the workplace-specified range.
2. Ensure cleaning program is followed	2.1. Cleaning program is established and maintained to ensure product safety, and health and hygiene requirements are met. 2.2. Cleaning schedule is set up and followed for daily, weekly or regular fumigation.
3. Monitor <i>chiller temperature</i>	3.1. Temperature of product is monitored daily to meet product specifications, workplace procedures and regulatory requirements . 3.2. Temperature of chiller is maintained to ensure product safety and to meet product specifications. 3.3. Changes to temperature are corrected to maintain product specifications.
4. Monitor product handling and identification	4.1. Products are identified and labelled in accordance with product specification, customer and workplace requirements . 4.2. Customer requirements are confirmed to determine product order delivery arrangements. 4.3. Temperature and storage requirements for product order are confirmed and arranged in accordance with workplace requirements. 4.4. Documentation for orders is correctly completed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply **mathematical concepts** to monitoring procedures (e.g. temperature checks and adjustments)
- apply relevant **communication skills**
- assess carcasses according to workplace, regulatory and where appropriate

REQUIRED SKILLS AND KNOWLEDGE

AUS-MEAT requirements

- complete documentation, including accurate and legible labelling
- work effectively as an individual and as part of a team
- identify and apply relevant Occupational Health and Safety (*OH&S*) *requirements*
- identify product chiller requirements
- identify product health and hygiene requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use available technology to record, gather and interpret product-monitoring data

Required knowledge

Knowledge of:

- carcass grading system employed in a plant
- product transfer and storage methods
- process involved in assessing chillers in the workplace
- product quality monitoring processes
- importance of fat depth, carcass colour and other grading parameters
- rejection procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated utilising documented product specifications and a significant number of carcasses.

Context of and specific resources for assessment

Assessment must be conducted in an operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Products may include:	<ul style="list-style-type: none"> • carcass and split carcasses • the range of animals processed for human consumption.
Chiller temperature may:	<ul style="list-style-type: none"> • be monitored with automatic data loggers or manual temperature gauges.
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
Workplace requirements may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production

RANGE STATEMENT	
	requirements <ul style="list-style-type: none"> • work instructions.
<i>Mathematical concepts</i> may include:	<ul style="list-style-type: none"> • carcass grades • dates, times • fat depth, colour and marbling scores • processes of estimation and calculation to monitor, adjust and calibrate equipment • product descriptions • temperature • weight.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • communicating and working with diverse individuals and groups • listening and understanding • reading and writing workplace-related information • sharing information • speaking clearly and directly.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

MTMPS411C Monitor meat preservation process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to overview and monitor the hygienic preservation of meat and ensure compliance with quality standards and regulatory requirements.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to meat safety officers (inspectors) and Quality Assurance (QA) managers responsible for overseeing meat preservation.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Overview the meat preservation process	<p>1.1. Types of <i>preservation</i> processes used by the meat industry are identified and explained.</p> <p>1.2. Meat quality required for preservation processes are identified according to customer and <i>workplace requirements</i>.</p> <p>1.3. Ingredients and <i>equipment</i> required for the preservation process are prepared according to product specifications, <i>hygiene and sanitation</i>, and safety requirements.</p>
2. Monitor preservation process	<p>2.1. Product and process are inspected and monitored to ensure meat is preserved to specifications, health, hygiene and customer requirements.</p> <p>2.2. Equipment or processes involved in the preservation process are monitored regularly at critical control points.</p> <p>2.3. Procedures to ensure quality and hygiene of the product are monitored and followed at all times.</p> <p>2.4. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene requirements are implemented.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify critical control points in the meat preservation process
- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge through professional development and self-directed research
- work effectively as an individual and as a team member
- determine and implement corrective action
- identify and apply relevant Occupational Health and Safety (*OH&S*) *requirements*
- interpret monitoring data and identify out-of-specification performance or product
- monitor the preservation of meat to ensure compliance with workplace and

REQUIRED SKILLS AND KNOWLEDGE***regulatory requirements***

- ***record*** monitoring information accurately
- ***report*** non-conformances to appropriate personnel
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- criteria for rejected, reprocessed or recalled product
- process involved in preserving meat in own workplace
- critical aspects of meat safety and hygiene in the preservation process
- relevant procedures to ensure the preserved meat product is safe and fit for human consumption
- reject and recall procedures
- impact of the preserving process on product quality, including eating quality
- regulatory requirements relating to the preservation of meat and products
- reject and recall procedures

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Overview the production of further processed meats and smallgoods</p>	<p>1.1. Range of further processed meat products and smallgoods is identified and explained.</p> <p>1.2. Processing techniques involved in the production of these <i>products</i> are identified and explained.</p> <p>1.3. <i>Hygiene and sanitation</i> and quality hazards associated with the production of these products are identified and explained.</p> <p>1.4. <i>Regulatory requirements</i> associated with the production of these products are identified and explained.</p>
<p>2. Monitor the preparation of processing <i>equipment</i> and areas</p>	<p>2.1. Procedures for pre-operational equipment checks conducted are identified in accordance with workplace policies and procedures, and manufacturer's instructions.</p> <p>2.2. Pre-operational checks and procedures carried out in accordance with workplace and regulatory requirements are monitored.</p>
<p>3. Monitor the production of smallgoods and further processed meat products</p>	<p>3.1. Ingredients are identified by type and quality according to <i>product specifications</i> and their function in the process is explained.</p> <p>3.2. Types of meat, by-product, stock, additive, binder and spices selected are identified according to the formulation specifications and regulatory requirements.</p> <p>3.3. Handling requirements for ingredients to prevent contamination and to ensure product quality and safety are demonstrated.</p> <p>3.4. Relevant processing equipment is identified and operating procedures are explained according to manufacturer and work specifications.</p> <p>3.5. Relevant temperature, consistency, appearance and texture requirements are described and monitored in accordance with product specifications and regulatory requirements.</p> <p>3.6. Relevant processing area hygiene and sanitation requirements are monitored as specified in workplace procedures and regulatory requirements.</p> <p>3.7. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene and sanitation requirements are identified and assessed against regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- monitor production of processed meats and smallgoods to ensure compliance with workplace and regulatory requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a team member
- identify and apply relevant Occupational Health and Safety (*OH&S*), *workplace* and regulatory requirements
- propose and implement solutions to a range of production problems
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- hazards to the safe and hygienic manufacture of smallgoods
- *options for chilling product*
- process involved in manufacturing smallgoods
- procedures required to ensure the product is fit for human consumption and meets regulatory and quality requirements
- critical limits in the manufacture of smallgoods
- recall procedures, including notification of appropriate authorities

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify microbiological hazards for <i>UCFM products</i></p>	<p>1.1. Types of <i>micro-organisms</i> are identified. 1.2. <i>Major threats</i> to UCFM products are identified. 1.3. Types of bacteria causing food poisoning and spoilage are identified. 1.4. Effects of bacterial contamination for food poisoning (i.e. impact on people) and food spoilage (i.e. shelf life) are identified. 1.5. Sources of bacterial contamination are identified. 1.6. Growth characteristics and requirements of bacteria are identified.</p>
<p>2. Identify chemical hazards for UCFM products</p>	<p>2.1. Chemical hazards which may affect UCFM products are identified. 2.2. <i>Common sources of chemical hazards/contamination</i> are identified. 2.3. Control methods which prevent chemical contamination locally and relevant national programs (e.g. residue testing) are explained. 2.4. Impact of chemical residues on meat (e.g. poisoning, tainting, rejections) is explained.</p>
<p>3. Identify physical hazards for UCFM products</p>	<p>3.1. Physical hazards which may affect meat are explained. 3.2. Common sources of physical hazards and/or contamination are identified. 3.3. Control methods to prevent contamination are explained. 3.4. Effects or impact of physical hazards on meat are explained.</p>
<p>4. Overview the production of UCFM products</p>	<p>4.1. Range of UCFM products is identified and explained. 4.2. Processing techniques involved in production of UCFM are identified and explained. 4.3. Hygiene and food safety hazards associated with the production of UCFM products are identified and explained. 4.4. <i>Regulatory requirements</i> associated with the production of UCFM products are identified and explained.</p>
<p>5. Monitor the preparation of</p>	<p>5.1. Procedures for pre-operational equipment checks are identified in accordance with workplace policies and</p>

processing <i>equipment</i> and areas	<p>procedures, and manufacturer's instructions.</p> <p>5.2. Pre-operational checks and procedures carried out in accordance with workplace, food safety and regulatory requirements are monitored.</p>
6. Manage the production of UCFM and further processed products	<p>6.1. Ingredients are identified by type, quality and safety according to product specifications and their function in the process is explained (including starter culture).</p> <p>6.2. Types of meat, by-product, stock, additive, binder and spices selected are identified according to the formulation specifications and regulatory requirements.</p> <p>6.3. Handling requirements for ingredients (including starter culture) to prevent food safety hazards are demonstrated to ensure product quality and safety.</p> <p>6.4. Relevant processing equipment is identified and operating procedures are explained according to manufacturer and workplace specifications.</p> <p>6.5. Relevant time, temperature and humidity requirements for fermentation, maturation and monitoring are described in accordance with product specifications, regulatory requirements and industry guidelines.</p> <p>6.6. Relevant consistency, appearance, texture and monitoring requirements are described in accordance with product specifications and regulatory requirements.</p> <p>6.7. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene and sanitation requirements are identified and assessed against regulatory requirements and industry guidelines.</p> <p>6.8. Relevant processing area hygiene and sanitation requirements are identified and monitored as specified in workplace procedures and regulatory requirements.</p>
7. Overview the implementation of the Approved Hazard Analysis Critical Control Point (HACCP) plan for the production of UCFM products	<p>7.1. Critical Control Points (CCPs) and control points for prevention and control of bacterial contamination (e.g. process controls and systems) are identified.</p> <p>7.2. Control methods to prevent microbiological contamination are explained and implemented.</p> <p>7.3. Critical limits for CCPs are identified and monitoring processes are implemented.</p> <p>7.4. Validation requirements for critical limits of</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>HACCP programs are described.</p> <p>7.5. Documented procedures are implemented which ensure any CCPs which are out of control are brought back into control and affected product is suitably handled.</p> <p>7.6. Documented procedures are implemented to ensure the whole HACCP system is regularly audited and verified as working effectively.</p> <p>7.7. All documents and <i>records</i> required for the system are kept available, up-to-date and in use.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research such as by using the web, industry journals, circulars from regulators and industry workshops
- work effectively as an individual and as a team member
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to resolve problems
- identify and apply relevant Occupational Health and Safety (*OH&S*) and *workplace requirements*
- monitor production of UCFM to ensure compliance with workplace and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology
- use technology to access information, prepare reports, and to access and prepare relevant data

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- process involved in manufacturing UCFM
- purpose of fermentation
- raw materials storage and selection
- fermentation control criteria for pH
- fermentation speed control
- purpose of maturation and drying
- maturation and drying speed control
- impact of the raw material on product quality and food safety
- water activity as a release criteria
- microbiological criteria in UCFM production and microbiological limits of UCFM, particularly the following significant microbial pathogens: enterohaemorrhagic Escherichia coli, Salmonella, enterotoxin of Staphylococcus aureus and Listeria monocytogenes
- physical hazards for UCFM products
- role of starter culture
- storage and handling requirements for starter culture
- product handling and release criteria
- impact of critical limits in a HACCP program for UCFM production
- procedures required to ensure the product is fit for human consumption and meets regulatory, food safety and quality requirements
- implementation of the HACCP plan for the production of UCFM products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, with an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include

- relevant documentation such as:
 - manufacturer's instructions and operation manuals
 - regulatory requirements
 - workplace policy and procedures
- workplace environment.

Method of assessment

Recommended methods of assessment include:

- assignment focusing on understanding and application of principles and theory to workplace operations
- third-party referee report of sustained performance at appropriate level of authority and responsibility
- workplace project with a focus on enterprise

EVIDENCE GUIDE	
	<p>environment and conditions.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

MTMPS415A Conduct an internal audit of a documented program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to conduct an internal audit of a documented program.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in scheduling, preparing for and conducting an internal audit in a meat processing plant. The scope of the audit may include operational areas such as food safety, Occupational Health and Safety (OH&S), vendor and environmental programs. This may include industry standards and codes.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan the audit	<p>1.1. Audit schedule is interpreted and the timely conduct of internal audit is planned and organised.</p> <p>1.2. Objectives, scope and criteria of audit are determined according to <i>workplace requirements</i>.</p> <p>1.3. Audit team is assembled and briefed, as required, for the objectives, scope and criteria of the audit.</p> <p>1.4. Those affected by and involved in the audit are notified and responsibilities documented according to workplace requirements.</p> <p>1.5. Stakeholders involved in an internal audit are notified according to workplace requirements.</p> <p>1.6. Procedures, records and <i>workplace documentation</i> needed for the audit are identified.</p> <p>1.7. <i>Evidence collection methods and sources</i> to be used in the audit are documented, including workplace checklists developed to workplace specifications.</p> <p>1.8. A document review is conducted prior to audit.</p>
2. Conduct the audit	<p>2.1. An entry meeting is conducted with relevant parties to explain the purpose, scope and criteria for the audit, the methods to be used in the audit, and how results will be reported and followed up.</p> <p>2.2. An audit of the program is conducted in accordance with workplace and regulatory requirements.</p> <p>2.3. Effective communication skills are used to conduct the audit</p> <p>2.4. Verifiable objective evidence is collected against the criteria of the audit.</p> <p>2.5. Findings are made using the objective evidence against the criteria of the audit.</p> <p>2.6. Non-conformances are identified and categorised according to workplace requirements</p> <p>2.7. Audit activity is recorded according to workplace requirements.</p>
3. Report on audit findings	<p>3.1. An audit report is prepared, detailing areas of the program which were audited and findings against the audit criteria, including non-conformances, where applicable.</p> <p>3.2. Objective <i>evidence</i> is documented according to workplace standards.</p> <p>3.3. Records of audit process, objective evidence and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>findings are kept in accordance with workplace and regulatory requirements.</p> <p>3.4. Findings are reported according to workplace requirements.</p>
4. Confirm and close out corrective action	<p>4.1. The effectiveness of corrective actions is verified.</p> <p>4.2. <i>Records</i> of the effectiveness of corrective actions are maintained.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of the business relevant to the industry sector
- locate relevant codes or compliance program requirements
- communicate the audit process, requirements and findings to relevant personnel clearly and accurately
- apply planning skills to ensure the smooth conduct of the audit process
- use negotiation skills to organise and facilitate audit processes, including following meeting procedures and resolving issues
- identify and follow an audit trail
- conduct research to identify, collect and analyse evidence
- gather, analyse and record data accurately
- plan and organise audit activities
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgement on the level of compliance
- prepare well-balanced, factual and objective written audit reports

Required knowledge

Knowledge of:

- audit management to develop and implement an audit against an agreed plan, including an understanding of the scope/level of authority to revise the resource

REQUIRED SKILLS AND KNOWLEDGE

- and allocate time allocations to take account of variation to plan
- audit processes
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- communication methods relevant to different groups and audience
- evidence appropriate for use in audit processes, including an understanding of the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods including record sampling and sample analysis, including an understanding of the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- legislation that impacts on acceptable communication methods and conduct including anti-discrimination, anti-harassment and privacy legislation
- methods used to identify Critical Control Points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
- personal attributes required of an auditor
- strategies to communicate in culturally diverse environments
- the internal auditing policies and procedures of the workplace
- the structure, authority levels and lines of reporting within the organisation
- the underlying principles of risk-based approaches to controlling food safety hazards including HACCP as described in the Codex Alimentarius Guidelines
- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Candidates must be able to plan, conduct and report and internal audit of a documented program.</p> <p>Competency must be demonstrated in the workplace, utilising an approved audit plan and procedure from the workplace. Candidates must conduct an entire internal audit.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must involve working with actual realistic data and in the context of an audit plan that meets regulatory requirements.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • mock audit conducted in the workplace • debrief after participation in a real audit • quiz of underpinning knowledge • verified work log or diary • workplace demonstration • workplace referee or third-party report of

EVIDENCE GUIDE	
	<p>performance over time.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>workplace requirements</i> may include</p>	<ul style="list-style-type: none"> • hygiene and sanitation requirements • internal and external OH&S requirements • industry standards and codes of practices • regulatory standards, including AS 4696:2007 <i>Australian Standard for the Production and Transportation of Meat and Meat products for Human Consumption</i> • state and federal legislation • the wearing of Personal Protective Equipment (PPE) • observation of workplace hygiene and sanitation requirements.
<p><i>workplace documentation</i> may include:</p>	<ul style="list-style-type: none"> • work instructions • Standard Operating Procedures (SOPs) • enterprise specific procedures

RANGE STATEMENT	
	<ul style="list-style-type: none"> • OH&S requirements • QA requirements • previous audit reports and corrective action records • vendor requirements • environmental requirements.
<i>Evidence collection methods and sources</i> may include:	<ul style="list-style-type: none"> • observation • interviews • checklists • auditee documentation review • reports/data from other sources such as customer feedback, technical references, computerised databases • results of analyses • analytical results.
Audit <i>evidence</i> may include	<ul style="list-style-type: none"> • system records • evidence collection records • statements of fact or other information relevant to the audit criteria and which is verifiable • observations • third party certification (e.g. HACCP accreditation) • records of audit stage progression.
<i>Audit records</i> may include:	<ul style="list-style-type: none"> • audit plans • audit reports • non-conformity reports • corrective action reports • follow up reports • audit data base.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and analyse statistical data drawn from the workplace	1.1. Samples from a process line are selected. 1.2. Statistical calculations on a sample are conducted.
2. Use statistical analysis to verify the process	2.1. Relevant graphs and charts are prepared. 2.2. Trends and cyclic patterns of control graphs are identified and analysed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply statistical information to the analysis and verification of a process
- calculate simple statistical measures
- cooperate with monitors to ensure data is accurate and provided on time
- use a range of information and communications technology and software, including statistics management and analysis programs
- conduct trend analysis of meat processing data
- explain the verification process using statistical data
- identify and apply relevant *Occupational Health and Safety (OHS)*, *regulatory* and *workplace requirements*
- perform basic statistical calculations on data from samples drawn from the workplace
- prepare control graphs and use charts as relevant
- prepare reports on the outcomes of the statistical analysis of monitoring data
- use and explain simple *statistical measures*, such as mean, range, frequency, mode and median
- use relevant *communication skills*.

Required knowledge

Knowledge of:

- statistical measures, such as mean, range, frequency, mode and median.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify audit dates	1.1. Known or expected dates of external audits are documented on a schedule according to workplace procedures and practice. 1.2. Dates are confirmed and all company personnel affected by the external audit are notified.
2. Identify audit scope	2.1. Audit scope is described and conveyed to people affected by the external audit process.
3. Identify audit team size and length/duration of the external audit	3.1. Audit team size and audit duration are identified and necessary notifications are made throughout the workplace.
4. Review internal audit reports to check areas expected to be covered in the external audit	4.1. Internal audits are conducted, where necessary, and reported in accordance with workplace policy and procedures. 4.2. Previous internal audit reports and production reports are reviewed to identify past problem areas. 4.3. Past problem areas are monitored and reviewed.
5. Make arrangements for the external audit process	5.1. Arrangements for the days of the external audit are made and confirmed with the auditors. 5.2. Arrangements for greeting the external auditors and provision of workplace guide are made in accordance with workplace requirements . 5.3. Internal departments subject to the external audit are notified of the arrangements. 5.4. Roles and responsibilities of enterprise personnel in the process are determined.
6. Accompany the external auditors	6.1. Entry and exit interviews are facilitated. 6.2. External auditors are escorted throughout the duration of the audit in accordance with arrangements and workplace procedures.
7. Report on the external audit	7.1. Findings of the external audit are reported in accordance with workplace requirements. 7.2. Findings of the external audit are communicated to everyone affected or involved in the external audit procedure. 7.3. Findings of the external audit are followed up and corrective action is taken, where appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as part of a team
- demonstrate clear communication and interpersonal skills related to preparing for and participating in an external audit
- demonstrate methods of scheduling, recording the scheduling and managing the planning for external audits
- ensure the quality systems covering the area to be audited are in place and effective as shown by internal audit reports
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- use available technology to prepare for and follow up external audits
- identify reports of internal and external audits and demonstrate the ability to take corrective action
- maintain currency of knowledge through independent research and professional development
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology.

Required knowledge

Knowledge of:

- regulatory and other requirements for external audits
- technical and regulatory aspects covered by each external audit.

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify major export legislation	<p>1.1. Main relevant legislation is identified and application to establishment is described.</p> <p>1.2. Export control orders are identified and application is explained in accordance with customer specifications and work instructions.</p> <p>1.3. Legislation is accessed on ELMER.</p>
2. Identify and describe importing country requirements	<p>2.1. Information on importing country requirements is accessed and applied.</p> <p>2.2. Specific importing country and export inspection procedures are performed in accordance with <i>regulatory requirements</i> and <i>workplace requirements</i>.</p>
3. Identify the function of the Australian Quarantine Inspection Service (AQIS)	<p>3.1. Role of AQIS is described.</p> <p>3.2. Function of AQIS meat inspection staff is identified.</p> <p>3.3. Structure of AQIS and AQIS chain of command is identified.</p>
4. Identify QA arrangements	<p>4.1. Specific requirements for AQIS approved arrangements are identified.</p> <p>4.2. AQIS review, monitoring and auditing arrangements for approved arrangements are described.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and *research* legislation on the ELMER system and other appropriate electronic information systems
- gather, analyse and present complex information to colleagues
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- identify orders relevant to particular operational situation
- use *communication and information technology* to access required information

REQUIRED SKILLS AND KNOWLEDGE

- use relevant *communication skills*

Required knowledge

Knowledge of:

- role and jurisdiction of AQIS
- role and function of AQIS meat inspection staff
- ante-mortem and post-mortem inspection procedures for importing countries
- procedures for condemnation in export works
- main regulatory and legislative requirements for exporting product and their application to meat processing
- QA systems operating, monitored and audited by AQIS in export works.

Co-requisite units		

Competency field

Competency field	
-------------------------	--

MTMPS5603C Develop, manage and maintain quality systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to establish, maintain and control an enterprise quality system. It also covers the skills and knowledge needed to lead people, manage systems and build quality into all enterprise systems and operations. The development and management of quality systems affects the ability of the enterprise to operate in specific markets and influences customer and consumer confidence in enterprise products.
------------------------	--

Application of the Unit

Application of the unit	This unit is of particular interest to Quality Assurance (QA) managers and personnel, production managers and supervisors operating in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish <i>requirements of the quality system</i>	1.1. Policies expressing the organisation's commitment to the quality system and processes are developed. 1.2. Legislative requirements for enterprise quality systems are identified. 1.3. Scope and objectives of the quality system are determined, including links with all enterprise operations, customers, suppliers and contractors. 1.4. Quality performance standards, including customer and supplier service standards, are established consistent with the direction and goals of the enterprise. 1.5. Resource requirements are identified and included in financial, human resource and operational plans.
2. Design and prepare for the quality system	2.1. <i>Quality systems</i> are selected and designed to meet enterprise, customer and regulatory requirements. 2.2. Quality principles underpin all enterprise operations to achieve business goals and performance standards. 2.3. Responsibilities for development, implementation and operation of the system are clearly defined and communicated. 2.4. Personnel from all levels and areas of the organisation are involved in the development and implementation of the quality system. 2.5. <i>System components, procedures</i> and supporting <i>documentation</i> are developed and validated. 2.6. Consultative and communication strategies are developed to link the quality system with all aspects of enterprise operations. 2.7. Supplier or contractor service standards and <i>audit</i> requirements are determined and negotiated. 2.8. <i>Performance measures</i> and indicators are developed to measure performance against policies, goals and performance standards.
3. Implement and <i>monitor</i> the quality system	3.1. Implementation plan is prepared and resourced. 3.2. Training plans to provide personnel at all levels with quality concepts and skills are prepared and resourced. 3.3. Quality system requirements and customer focus are addressed in the establishment, operation and

ELEMENT	PERFORMANCE CRITERIA
	<p>evaluation of all enterprise systems.</p> <p>3.4. Control and preventative action measures are identified and validated.</p> <p>3.5. Corrective action procedures are developed and monitored.</p> <p>3.6. Procedures for reporting, recording and responding to non-conformances and non-compliances are established.</p> <p>3.7. Customer and supplier service standards are monitored and documented.</p> <p>3.8. Quality data is collected and analysed, and implications reported.</p> <p>3.9. Quality costs and performance are monitored.</p> <p>3.10. Quality system is prepared for external review and approval by relevant authorities.</p>
4. Continuously improve the quality system	<p>4.1. Impacts of the quality system on enterprise operations are monitored and reviewed.</p> <p>4.2. Responses to customer complaints and requests are resolved and used to improve the system.</p> <p>4.3. Procedures for the ongoing identification and resolution of issues are established.</p> <p>4.4. Quality system is updated for changes in process, technical information, customer and regulatory requirements.</p> <p>4.5. <i>Stakeholders</i> are included in decision making and continuous improvement processes and strategies.</p> <p>4.6. Quality results, findings and conclusions are fed into improvement processes.</p> <p>4.7. Costs and benefits of the quality system are analysed.</p> <p>4.8. Quality goals and targets are continuously reviewed.</p>
5. <i>Communicate quality outcomes</i>	<p>5.1. <i>Certification</i> of product and processes consistent with quality outcomes is completed according to customer and regulatory requirements.</p> <p>5.2. Regulatory authorities and agencies are promptly notified of breaches and non-compliance incidents.</p> <p>5.3. Quality outcomes are used to promote public confidence in enterprise products and services.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse complex *statistical data* and prepare corrective responses to non-conformances and variations identified in the data, relevant to enterprise quality systems and operations
- apply *quality* concepts and *tools* to problem solving and the development of quality data collection, *data management systems* and analysis strategies
- apply substantial product and process knowledge to the development of the quality system and the *interpretation* of quality data
- apply relevant *communication* and *mathematical skills*
- communicate quality goals, requirements and findings to stakeholders in formats and styles appropriate to the context and purpose
- develop quality policies for the enterprise in consultation with senior management and other stakeholders
- develop consultative and feedback procedures and opportunities for identification and resolution of quality issues and problems
- develop continuous improvement processes and team building using the 'plan, do, check, act cycle'
- consult, negotiate with and report to regulatory authorities openly and promptly, consistent with enterprise ethical standards, including the notification of breaches and the preparation of non-compliance reports
- develop workforce commitment, capability and responsibility for the quality system, including identifying, negotiating and scheduling training, inclusion of responsibilities and duties relating to quality system implementation and integration in all job descriptions and work instructions, clear communication of responsibilities and requirements, delegation of tasks and responsibilities and inclusion of the workforce in consultative and continuous improvement processes
- ensure the quality system meets legislative and *regulatory requirements*
- exercise judgement, pragmatism and quality knowledge in the management and resolution of quality issues and problems
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *workplace requirements*
- identify appropriate *monitoring systems* and strategies to support the enterprise quality system
- identify, research and update sources of quality information and advice, including technical and regulatory information to support enterprise quality system
- lead personnel (e.g. Hazard Analysis Critical Control Point (HACCP) team, management, quality team, meat inspection team, laboratory, maintenance teams, processors and operators) in the implementation and improvement of the quality

REQUIRED SKILLS AND KNOWLEDGE

system

- monitor and analyse the *costs* of the quality system, including prevention costs, appraisal costs, total quality costs and failure costs
- monitor and certify processes and product to meet *third -party* requirements (e.g. importing country, public health requirements and customers)
- oversee *audit processes* (internal and external), act on audit findings and provide feedback to personnel for improvement of the system
- oversee the preparation for third party certification (where appropriate)
- plan and resource the enterprise training strategy, consistent with regulatory requirements, to assist personnel at all levels in the implementation of the quality system
- prepare and sign off quality policies, manuals and documentation for the enterprise, including the preparation and updating of preventative, corrective and responsive procedures and strategies, supplier criteria and specifications, supplier and contractor audit requirements
- prepare quality implementation plans, identifying goals, key personnel and areas, resources, strategies, timelines and milestones
- present reports according to legal and enterprise requirements
- resolve customer complaints promptly and provide corrective action responses
- use appropriate questioning, observation, listening and recording skills in the collection and monitoring of quality data
- where quality systems are based on HACCP principles or Good Manufacturing Practice (GMP), explain these principles and the implications for the enterprise quality system.

Required knowledge

Knowledge of:

- key concepts, philosophies and tools of quality management
- management and organisational structure of the enterprise and its impact on enterprise systems
- the role audits play in a quality system
- documentation requirements of the quality system, including levels, and their roles in the functioning of the system, including the requirement for effective and secure quality record keeping systems
- enterprise goals and directions and their implications for the quality system
- *process capability*
- applicable quality standards, regulations, codes, legislation and customer requirements for the quality system and explain the implications for the enterprise
- legal requirements for the establishment and maintenance of the enterprise QA system including responsibilities for reporting breaches to authorities and implementing audit findings
- principles and functions of hazard analysis and control, validation, including

REQUIRED SKILLS AND KNOWLEDGE

auditing, and verification in quality systems.
--

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- a real work environment
- customer specifications
- establishment's quality system, performance data
- relevant documentation, such as:
 - manufacturer instructions or operations manuals
 - manufacturer requirements
 - regulatory requirements
 - workplace policy and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- third party referee report of sustained performance at an appropriate level of authority and responsibility

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • assignment focusing on understanding and application of principles and theory to workplace operations • workplace projects which focus on the company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Requirements of the quality system</i> may include:</p>	<ul style="list-style-type: none"> • control of documents, data and quality records • coverage of contracts, purchasing, supply, processing, handling, storage, packaging, preservation, storage and delivery of meat and meat products • definition of management responsibilities • design and process controls • inspecting and testing, control of non-conforming product, preventative and corrective action, and auditing • management of links and impacts on all systems within the enterprise • production identification and traceability

RANGE STATEMENT	
	<ul style="list-style-type: none"> • training.
<i>Quality systems</i> may include:	<ul style="list-style-type: none"> • Australian, and Australian and New Zealand standards • food and meat safety • industry specific standards • international standards (e.g. ISO 9000 series) • Meat Safety Enhancement Program (MSEP) • Meat Safety Quality Assurance (MSQA) • Personal Qualities Assessment (PQA) • trade description and certification systems.
<i>Systems components and procedures</i> include:	<ul style="list-style-type: none"> • correction (e.g. disposition, corrective action, liability management and customer complaint resolution) • prevention (e.g. training, operator feedback, manuals, technology and equipment reliability and maintenance, statistical collection and information, supplier QA, Standard Operating Procedures (SOPs) and work instructions).
Where the quality system relates to food safety, relevant <i>documentation</i> may include:	<ul style="list-style-type: none"> • amendment registers • Critical Control Points (CCP) monitoring forms and additional monitoring requirements and supporting programs • critical control point work instructions • HACCP audit table • HACCP team register, product description and use • process flow charts, factory floor plan and hazard analysis table • schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, and product identification and recall.
<i>Audits</i> of performance may include:	<ul style="list-style-type: none"> • compliance with regulatory requirements • external reviewers • human resource performance • QA, including meat and food safety • safety, energy and environment.
<i>Performance measures</i> for the total quality cost may include:	<ul style="list-style-type: none"> • quality cost per kg of product • quality cost per dollar of direct production costs.
<i>Monitoring</i> and analysis may be:	<ul style="list-style-type: none"> • periodic (e.g. hourly, daily and weekly)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • in real time (electronically).
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders and financiers • competitors • management and employees • suppliers, customers and consumers • unions and employer associations.
Systems for the <i>communication of quality outcomes</i> may include:	<ul style="list-style-type: none"> • development of quality teams • newsletters, bulletins and awards • problem-solving teams and sessions • quality meetings or circles • training.
<i>Certification</i> may include:	<ul style="list-style-type: none"> • AUS-MEAT certification • importing country requirements • Meat Standards Australia (MSA) certification • State, territory or public health requirements.
<i>Statistical data</i> analysis may include:	<ul style="list-style-type: none"> • correlation and regression analysis, bi-variate and multi-variate analysis • distribution • estimating and hypothesis testing • management • probability and statistical inference • process stability, capability and management • reliability planning • sampling • statistical process control requirements and charting applications • variations and variation monitoring.
<i>Quality tools</i> may include:	<ul style="list-style-type: none"> • cause and effect and fish bone diagrams • control charts • data points • flow charts • histograms • prioritisation matrices • process improvement models • process capability • pareto charts • team structures.
<i>Data management systems</i> may be manual or computerised, cover	<ul style="list-style-type: none"> • bar coding, identification, tagging and traceback systems

RANGE STATEMENT	
data collection, data monitoring and data analysis and interpretation, and may include:	<ul style="list-style-type: none"> • calculators • charting and graphing materials • computer software packages (e.g. spreadsheets and statistical analysis packages) • computerised equipment • manual measuring equipment (e.g. thermometers, pressure gauges and scales) • monitoring sheets and records.
Data analysis and <i>interpretation</i> may include:	<ul style="list-style-type: none"> • Acceptable Quality Level (AQLs) • Chemical Lean (CL) levels • microbiological analysis (e.g. Total Viable Counts (TVC) and e-coli counts) • process capability analysis • process variation analysis • product monitoring • statistical process control • temperature (e.g. cooling and chilling rates).
<i>Communication</i> may:	<ul style="list-style-type: none"> • be with culturally, ethnically and socially diverse individuals and groups • involve information and communications technology (e.g. databases, internet search and e-commerce services) • occur in a variety of sensitive, conflictive, collaborative and supportive environments • be formal or informal and involve face to face, technological and electronic methods • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data.
<i>Mathematical skills</i> may relate to:	<ul style="list-style-type: none"> • complex actual and hypothetical technical and financial modelling • calculations and interpretation and analysis • mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel

RANGE STATEMENT	
	<ul style="list-style-type: none"> • operations • sales and turnover • exports.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • commercial law, including fair trading and trade practices • consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • hygiene and sanitation requirements • industrial awards and agreements • relevant regulations • state and territory regulations regarding meat processing • taxation.
<i>OHS requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE): <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Monitoring systems</i> and strategies may include:	<ul style="list-style-type: none"> • audits and reviews • feedback from stakeholders • inspection and testing procedures and regimes, including chemical and microbiological testing procedures, for validation and verification • statistical collection and analysis.
Quality <i>costs</i> include:	<ul style="list-style-type: none"> • appraisal (e.g. design appraisal, inspection, depreciation of quality equipment, process control and end product testing) • failure (e.g. scrap and waste, reinspection or retesting, disposal, down time, product downgrading, product liability, loss of custom, returned product and complaints) • prevention (e.g. training, auditing, process control engineering, testing, reporting and recall systems).
<i>Third-party</i> certification may include:	<ul style="list-style-type: none"> • Australian Quarantine Inspection Service (AQIS) accountabilities and inspection stamps/seals • customer requirements and specifications, including importing country requirements • licensing or registration requirements • national or international quality endorsement • product description and certification.
<i>Audit processes</i> include:	<ul style="list-style-type: none"> • planning • establishing controls • developing the team • conducting entry/exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
<i>Process capability</i> includes:	<ul style="list-style-type: none"> • operational capability (e.g. resources, risks, opportunities and commitments) • technical capability (e.g. personnel,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare <i>maintenance</i> policies	1.1. Maintenance costs, including the cost of poor maintenance procedures, are identified and quantified. 1.2. Management commitment to a productive maintenance strategy is negotiated and confirmed. 1.3. Enterprise performance is benchmarked against agreed standards, and maintenance policies and priorities are developed. 1.4. <i>Maintenance system goals</i> are developed through negotiation with <i>stakeholders</i> . 1.5. Communication strategies are established to build positive workforce attitude and commitment to maintenance.
2. Implement maintenance management system	2.1. Resource requirements are identified, secured and included in enterprise budgets and operational plans. 2.2. Location of the maintenance function and/or team within enterprise structures is determined. 2.3. Profile of the maintenance function and/or team within enterprise structures is determined. 2.4. Roles and responsibilities of equipment users and the <i>maintenance team</i> are clarified and built into position descriptions and work instructions. 2.5. Mentoring and training in the use and care of technology and equipment is provided to support the maintenance strategy. 2.6. Maintenance procedures and schedules are prepared to minimise negative impacts on production, costs, waste and the environment. 2.7. Record keeping systems are developed and maintained. 2.8. Potential risks are analysed and management strategies recommended. 2.9. Contingency plans are prepared in collaboration with the workforce, suppliers and customers. 2.10. Maintenance schedules and procedures are effectively communicated to the team.
3. Monitor and review maintenance management system	3.1. Continuous improvement strategies are developed. 3.2. Performance criteria for maintenance goals are determined and data collection strategies established. 3.3. Performance information and outcomes are analysed

ELEMENT	PERFORMANCE CRITERIA
	and implications reported to stakeholders.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- consult with key personnel, people on the floor, delegates, suppliers, contractors and equipment manufacturers to determine appropriate maintenance strategies, procedures and schedules
- develop *maintenance policies* and strategies, including establishing criteria for determining maintenance priorities and planning and scheduling routine equipment and overhead maintenance to meet quality system requirements
- establish and monitor performance targets for maintenance teams within performance planning and appraisal processes
- develop workforce commitment to effective maintenance strategies, including implementing strategies for *devolving* the identification of maintenance needs to the floor, developing consultative and cooperative *problem-solving strategies*, and negotiating changes in work practices
- develop secure record keeping procedures to document maintenance costs, *problems*, priorities, solutions, schedules and completions
- apply relevant *communication* and *mathematical skills*
- evaluate and recommend alternative maintenance policies and strategies, including evaluation of the costs and benefits of internal and consultant service models, changes in work roles and responsive/preventative models for maintenance
- determine and recommend the need for capital expenditure for the replacement of plant and equipment
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- manage *maintenance costs*, including determining total maintenance costs based on maintenance service cost and machine breakdown cost, setting, justifying, and achieving maintenance budgets
- monitor performance of the system, including establishing indicators, setting up data collection strategies, analysing data to identify trends and isolate problems or problem areas, and measuring progress against targets
- prepare and implement contingency plans for dealing with risks, including equipment breakdowns and failures, including negotiation and planning with

REQUIRED SKILLS AND KNOWLEDGE

production personnel

- present reports according to legal and enterprise requirements
- review maintenance strategies and goals within the enterprise, continuous improvement and planning processes.

Required knowledge

Knowledge of:

- plant and equipment falling under the scope of the maintenance program, including steam generation systems, refrigeration systems, water and effluent systems, processing and production equipment, and building
- maintenance issues related to the enterprise and their impact on the productivity of the plant
- cost elements in maintenance system costing and budgeting
- relevant legislation and regulations (e.g. food safety and food standards), and industrial agreements, and explain the implications for plant and equipment maintenance
- costs resulting from poor maintenance and the benefits of a preventative maintenance system
- *impacts of poor maintenance* on meat safety, meat and/or product quality, occupational and environmental safety.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- a real work environment
- relevant documentation, such as:
 - financial data relating to maintenance costs
 - manufacturer instructions or operations manuals
 - regulatory requirements
 - workplace policy and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace

EVIDENCE GUIDE	
	<p>operations</p> <ul style="list-style-type: none"> workplace projects with focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. MTMPS5605C Manage utilities and energy

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to identify enterprise utilities and energy requirements, and to manage their use, control waste and control costs. Utilities and energy are a significant cost component in the production of meat and meat products. Their efficient use affects the quality of the product, costs and profits.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is of particular interest to maintenance, engineering, production, environment and finance personnel working in a meat industry context.</p> <p>At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify enterprise utility and energy requirements and <i>costs</i></p>	<p>1.1. Utility and energy requirements for all areas and operations of the enterprise are identified consistent with <i>workplace</i>, customer and <i>regulatory requirements</i>.</p> <p>1.2. Current utility and energy costs are measured and impact on profitability is identified.</p> <p>1.3. Enterprise's future utility or energy requirements are determined consistent with enterprise goals and directions.</p> <p>1.4. Utility and energy requirements and costs are included in all forward planning.</p>
<p>2. Monitor and control enterprise utility and energy use</p>	<p>2.1. Performance standards and indicators are established, using agreed <i>benchmarks</i> and best practice methods.</p> <p>2.2. Team commitment to utility or energy management is developed using consultative approaches.</p> <p>2.3. Systems for the accurate monitoring of utility and energy use and costs are developed.</p> <p>2.4. Enterprise operations are audited to assess use, misuse and <i>waste</i> of utilities and energy.</p> <p>2.5. Enterprise performance is monitored and systems and operations are adjusted or corrected.</p> <p>2.6. Contingency plans for failure of utility or energy supply and service are prepared.</p> <p>2.7. Workplace safety systems and procedures are updated to include requirements for safe use of utilities or energy.</p>
<p>3. Review performance and utility or energy costs</p>	<p>3.1. Strategies and/or procedures for more <i>efficient</i> use of utilities or energy and the minimisation of <i>wastage</i> are identified, evaluated and recommended.</p> <p>3.2. Alternative utility or energy sources and services are assessed for availability, suitability for enterprise product, contribution to sustainability, operations and cost.</p> <p>3.3. Appropriate <i>utility or energy services</i> are recommended and utility or energy supply conditions and charges negotiated.</p> <p>3.4. Enterprise utility and energy performance is monitored and measured.</p> <p>3.5. Performance information, including team feedback, is analysed and reported to <i>stakeholders</i>.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.6.Recommendations for further improvements are prepared and implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse utility or energy tariffs and charges and options available to the enterprise
- apply relevant *mathematical* and *communication* skills
- communicate effectively with internal and external personnel with diverse roles, communication skills and cultures to determine utility or energy requirements and use
- calculate and analyse enterprise utility or energy costs and their impact on production costs
- consult with personnel across the enterprise to identify and resolve utility or energy waste problems
- determine current and future utility or energy requirements for enterprise operations, including analysing company goals, conducting utility or energy audits to identify consumption patterns and inefficiencies, *measuring* enterprise utility or energy consumption and cost, including waste, against agreed benchmarks
- develop performance measures and indicators for utility or energy consumption and costs, based on benchmarks and enterprise goals
- develop strategies for minimising and optimising utility or energy usage, including assessing and monitoring equipment performance, introducing energy efficient plant and equipment, comparing sources and recommending utility or energy substitution, changes to procedures, and assessing and minimising non-working day use of utilities (e.g. lighting)
- evaluate, cost and recommend alternative plant, equipment, procedures and utility or energy sources to improve *efficiency*, including researching sources, reviewing enterprise procedures, evaluating suitable alternatives for enterprise products and operations, and calculating initial and maintenance costs and payback periods
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- include safety requirements of utility or energy use in workplace health and safety systems and procedures
- interpret and review performance information and recommend strategies for

REQUIRED SKILLS AND KNOWLEDGE

improvement

- manage utility and energy costs, including calculating current utility or energy charges, comparing and recommending supply sources and costs, monitoring utility or energy budget, determining the impact of changes in utility or energy costs on budgets and profitability and taking actions to correct budget variations
- prepare contingency plans relating to utility or energy supply failure and incidents, which include emergency and safety procedures, alternative supplies (e.g. co-generation) and communication strategies
- prepare strategies to spread utility or energy use to avoid supplier peak demand or cost periods
- prepare reports, resource proposals and recommendations in styles, formats and language appropriate for the audience
- present reports according to legal and enterprise requirements
- recommend utility or energy suppliers and negotiate supply and costs
- research best practice models in utility or energy assessment, planning, use and sustainability, and assess their applicability for the enterprise
- take action to improve own work performance as a result of feedback from others, self-evaluation, or in response to changed work practices and technologies
- utilise information and communications technology including budget and costing modelling software to analyse costs of alternative utility or energy management or purchase strategies.

Required knowledge

Knowledge of:

- principles and methods of heat transfer and how they impact on utility or energy use, waste and cost
- concepts of base load and variable load of utility and energy services
- principles of demand control, including co-generation or outage, and peak load shedding or shifting to minimise utility or energy costs
- steam generation process and its use as an energy source in the plant
- cost components related to the use of utility or energy including capital, purchase, replacement and maintenance costs for plant and equipment, payback periods and net utility or energy costs
- procedures and systems for measuring utility or energy use and waste, appropriate to the operations of the enterprise
- utility or energy supply *status* and sources available to the enterprise

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Assessment must be conducted in a workplace context under normal production and operating conditions.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- simulation
- workplace projects with a focus on company environment and conditions.

Assessment practices should take into account any relevant language or cultural issues related to

EVIDENCE GUIDE	
	Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Strategies for reducing <i>costs</i> of utility or energy supply may include:</p>	<ul style="list-style-type: none"> • bulk purchasing alliances • encouraging sustainability • reducing use and wastage • replacing external supplies with on-plant generation or co-generation (e.g. using wind and biogas methane) at lower cost or at suppliers' cost • spreading use to avoid peak demand or cost periods through scheduling, computerised demand management systems • substitution.
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • sustainable work practices • the ability to perform the task to production requirements • work instructions.
<p><i>Regulatory requirements</i> may</p>	<ul style="list-style-type: none"> • animal welfare • commercial law, including fair trading and

RANGE STATEMENT	
include:	trade practices <ul style="list-style-type: none"> • consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards and agreements • relevant state, territory and federal regulations regarding meat processing • taxation.
Benchmarks may be:	<ul style="list-style-type: none"> • industry benchmarks established through partnerships or base figures determined by the enterprise.
Utility and energy <i>efficiency</i> may relate to:	<ul style="list-style-type: none"> • characteristics of installed load • cost saving measures not directly related to plant performance (e.g. lighting and after hours use) • cost saving measures related to plant performance • sustainability, green, co-generations • tariffs.
Utility and energy <i>wastage</i> and inefficient use may be caused by:	<ul style="list-style-type: none"> • equipment not suitable for the job • equipment running unnecessarily • equipment used constantly • inefficient equipment • poor maintenance of equipment, operating systems • poor procedures.
Utilities and energy services and supply may be contestable or non-contestable and include:	<ul style="list-style-type: none"> • coal and wool • electricity (e.g. on site generation, such as wind, oil or diesel, co-generation, hydro, and gas or coal generated) • fuel oil, distillate and petrol • gas (natural and bottled) • telecommunications • water and steam.
Stakeholders may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders and financiers • competitors

RANGE STATEMENT	
	<ul style="list-style-type: none"> • management and employees • suppliers, customers and consumers • unions and employer associations.
<i>Mathematical skills</i> may relate to:	<ul style="list-style-type: none"> • technical and financial modelling • calculations • interpretation • analysis • complex actual and hypothetical mathematical information, such as: <ul style="list-style-type: none"> • complex and relate to product and product quality • financial operations • personnel • operations • sales and turnover • exports.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be with culturally, ethnically and socially diverse individuals and groups • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve reading and interpreting workplace documentation • occur in a variety of sensitive, conflictive, collaborative and supportive environments • be formal or informal and involve face-to-face and technological/electronic methods • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require persuasion, negotiation and assertiveness skills.
Strategies and measures for <i>measuring</i> use and <i>waste</i> may include:	<ul style="list-style-type: none"> • cubic metres per tonne hot carcase weight or equivalent cattle weight • departmental meters • inflow and outflow comparisons • litres per kilogram hot carcase weight or equivalent cattle weight • unit of utility or energy per (tonne) dressed

RANGE STATEMENT	
	carcass weight <ul style="list-style-type: none"> • unit of utility or energy per kilogram processed, manufactured or prepared product • water (e.g. m³, cost per tonne hot carcass weight HCW, m³, cost per kg of processed, manufactured or prepared product).
<i>OHS requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice etc.
Utility or energy supply <i>status</i> may include:	<ul style="list-style-type: none"> • contestable suppliers • sole supplier • supplier and purchaser (buy enterprise generated surpluses).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess operational requirements	<p>1.1. Enterprise directions, goals and forecasts are analysed to establish the parameters for enterprise operations.</p> <p>1.2. Industry, market and enterprise information is gathered and analysed to determine short and medium term implications for enterprise operations.</p> <p>1.3. Operational budgets and strategies to achieve forecasts are prepared and resource requirements obtained.</p> <p>1.4. Operational productivity and performance measures to meet enterprise goals are determined.</p>
2. Plan operations for optimum efficiency and effectiveness	<p>2.1. Work organisation and performance patterns are reviewed for safety, efficiency and to maximise team contribution and satisfaction.</p> <p>2.2. Systems and technologies are developed to facilitate cost efficient and effective operations and to meet production, quality, waste, environmental and safety targets.</p> <p>2.3. Product/process flows are reviewed for optimum performance.</p> <p>2.4. Systems monitoring and control procedures are established to maximise performance.</p> <p>2.5. Contingency plans are prepared.</p> <p>2.6. Operational assets are identified and asset management strategies are recommended.</p> <p>2.7. Action plans to implement change are prepared.</p>
3. Manage operations	<p>3.1. Operational requirements for inputs, personnel, equipment and transport are identified.</p> <p>3.2. Plans and schedules are prepared to meet customer requirements.</p> <p>3.3. Systems to control costs, energy consumption, waste, environmental impact, quality and food safety are implemented.</p> <p>3.4. Work organisation strategies are planned and reviewed in consultation with the workforce.</p> <p>3.5. Opportunities to maximise yield and gain commercial value from total production are identified and evaluated.</p> <p>3.6. Operations are monitored and adjusted, consistent with operational plans and budgets.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.7. Consultation and collaboration are used to identify and resolve problems promptly, efficiently and effectively.
4. Evaluate performance	4.1. Data is collected and analysed to determine achievement of operational performance targets. 4.2. Performance information and implications are conveyed to <i>stakeholders</i> . 4.3. Recommendations and outcomes are included in the review of enterprise business plans, directions and goals. 4.4. Systems and procedures are reviewed to facilitate the achievement of enterprise plans and goals.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse enterprise forecasts for orders, livestock and raw material availability and prices, and determine the operational requirements to achieve enterprise goals
- analyse performance data to determine achievement of profit, productivity and other targets
- analyse the implications of blockages or stoppages (e.g. breakdowns, no stock or materials and staff shortages) at particular points in the process flow, including upstream and downstream effects and costs
- outline enterprise directions, goals and ethical standards and analyse the implications for enterprise operations
- assess current operational capability to achieve enterprise goals, including an analysis of current technology and configurations and mixes of personnel and processes, and a review of procedures to identify any gaps or shortfalls in capability of resources
- apply methods and theories of workplace or work team organisation and job design, and review to enterprise operations
- apply relevant *communication* skills
- apply scheduling techniques and principles to enterprise operations
- consult, collaborate and negotiate with personnel from all levels and areas of the

REQUIRED SKILLS AND KNOWLEDGE

plant

- maintain currency of knowledge through independent research and/or professional development
- develop action plans to implement changes to improve performance
- evaluate and recommend strategies for achieving enterprise goals and forecasts, including assessment of alternative configurations/mixes of personnel, processes and work organisation structures and calculating the impact changes in operations have on the productivity of the enterprise/department and the preparation of resource proposals
- evaluate the costs, benefits, consequences and implications of adopting alternative risk management strategies and make recommendations to senior management
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *workplace requirements*
- manage operations for area of responsibility, including developing operational strategies and schedules in response to short, medium and long term forecasts and plans for the enterprise; obtaining and scheduling required resources, including raw materials, personnel, equipment, refrigeration, storage and transport; and monitoring product or process flow
- maximise value of enterprise operations, including identifying opportunities for gaining commercial value from co-products and *by-products*, evaluating relative returns on enterprise products to determine overall impact on profitability, controlling waste and energy consumption
- minimise workplace conflict and build positive relationships using consultation, negotiation and problem-solving strategies
- monitor enterprise performance, including developing productivity and operational performance measures for enterprise operations, linking monitoring systems to quality requirements and performance measures, interpreting performance information and taking/authorising corrective action
- prepare and monitor operational budgets, including identification of operational cost components, calculation of resource requirements, calculation of cost per unit of finished product (e.g. cost per kilogram dressed weight and processed weight), monitoring of costs, taking action to adjust budget variations, including budget requirements and projections in enterprise financial planning
- prepare contingency plans to minimise disruption to production
- present reports according to legal and enterprise requirements
- research and evaluate available technologies and systems for suitability for enterprise products and directions or plans
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices organisation or technology
- use detailed product knowledge to describe the processing or production requirements necessary to maintain the quality of enterprise products (e.g. handling, processing methods, equipment, and storage for different species and breeds)

REQUIRED SKILLS AND KNOWLEDGE

- use *mathematical skills* to analyse performance relating to costs, waste, production levels, yields
- utilise available information and communications technology (e.g. productivity analysis and scheduling software).

Required knowledge

Knowledge of:

- enterprise's *scope of operations*
- enterprise budget planning and management processes and cycles
- *regulatory requirements* affecting enterprise operations
- potential impact of operational changes on personnel and develop strategies to minimise negative effects on individuals, the team and enterprise operations
- factors which affect the productivity of the enterprise, including workforce costs, capital investment, materials, waste and overheads.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- a real work environment
- relevant documentation, such as:
 - manufacturer instructions and operations manuals
 - regulatory requirements
 - workplace policy and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> workplace projects with focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine <i>environment management strategy</i> requirements	1.1. Enterprise's ethical, community and legal obligations for environmental management are ascertained. 1.2. Enterprise operations are examined to identify potential environmental impacts. 1.3. Competitive and economic advantages and disadvantages of environmental management strategies are analysed.
2. Develop enterprise commitment to environmental management	2.1. Management commitment is obtained and enterprise environmental management policy formulated. 2.2. Agreed environmental management strategies are built into enterprise planning, operating systems and review processes. 2.3. Consultative processes are developed to resolve environmental issues and problems. 2.4. Environmental management roles and responsibilities are incorporated into job functions, position descriptions and Standard Operating Procedures (SOPs). 2.5. Communication and training strategies to inform and support <i>stakeholder</i> commitment are developed and implemented.
3. Prepare environmental management strategy	3.1. Enterprise requirements for expert assistance and advice are identified. 3.2. Environmental risks are identified and evaluated. 3.3. Requirements of environmental management systems are determined. 3.4. Alternative environmental management strategies and <i>systems</i> are evaluated for efficiency, effectiveness and sustainability, according to enterprise requirements and <i>regulatory</i> compliance. 3.5. Opportunities for minimising <i>environmental impact</i> and maximising commercial value of waste or waste treatment by-products are identified. 3.6. Resource requirements are calculated and included in enterprise planning processes. 3.7. Performance criteria for environmental management are developed.
4. Implement and monitor environmental	4.1. Licences, permits, schedules and agreements are negotiated with regulatory requirements. 4.2. Environment and waste management policies and

ELEMENT	PERFORMANCE CRITERIA
management strategies and systems	<p>responsibilities are communicated to stakeholders.</p> <p>4.3. Environmental and waste management systems are selected, developed, implemented and integrated into operational systems.</p> <p>4.4. Monitoring, reporting and validation procedures are developed.</p> <p>4.5. Corrective action strategies and contingency plans are prepared.</p> <p>4.6. Verification procedures are established.</p> <p>4.7. Causes of non-compliance are investigated and control measures developed.</p> <p>4.8. Systems are reviewed to reflect changes in technology, regulations and operational performance.</p>
5. Review environmental management policies, strategies and systems	<p>5.1. Continuous review and improvement processes, including consultation with stakeholders, are established.</p> <p>5.2. Performance information is assessed and analysed against specified criteria and standards to identify areas for improvement.</p> <p>5.3. Conclusions and recommendations are analysed and included in enterprise planning and improvement processes.</p>
6. Manage community relations	<p>6.1. Environmental impact statements are prepared to address community, environmental and public health concerns and regulatory requirements.</p> <p>6.2. Interactions with environmental authorities and agencies are conducted openly, positively and ethically.</p> <p>6.3. Opportunities to promote the enterprise as a good corporate citizen in environmental management are identified and utilised.</p> <p>6.4. Enterprise measurement and logging of environmental impacts is maintained, analysed and reported to stakeholders.</p> <p>6.5. Community complaints are dealt with promptly, openly and courteously.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse and interpret current regulatory requirements, including local, state, national and international, for environmental management, such as environmental tolerance levels, and explain the implication for enterprise operations
- assess viability of gaining commercial value from waste, including the determination of commercial quantities, costs, returns and payback periods
- apply relevant *mathematical* and *communication skills*
- communicate effectively with internal and external personnel with diverse roles and cultures
- comply with regulatory requirements for managing enterprise environmental impact, including negotiation of agreements, plans, permits and licences with relevant environmental management authorities, confinement of environmental impacts within permissible limits and preparation of the enterprise for external audit where specified
- consult with internal/external stakeholders and external agencies to prepare contingency plans and emergency response procedures for environmental incidents
- develop individual and team capacity to achieve enterprise management policies and goals, including clear communication of individual and team responsibilities for minimising environmental impact, development of consultative processes and strategies to identify and resolve environmental issues, and identification and provision of appropriate training programs
- develop procedures for responding to community complaints and concerns
- evaluate and recommend environmental management systems to meet enterprise needs, including the identification and audit of enterprise creation of waste and environmental impacts and evaluation of control and treatment systems suitable for enterprise operations, comparative costs, savings and minimisation of environmental impacts, such as *wastewater disposal*, *measures to minimise nutrients* and other contaminants in water, e.g. strategies to control *air pollution*, *odour treatment processes* and managing *solid waste*
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
- implement enterprise environmental management systems to minimise environmental impact, including the establishment of monitoring and testing regimes and record keeping systems; development of procedures for identifying, reporting and analysing the causes of environment non-conformances and incidents; development of control measures to prevent recurrence of environmental incidents, hazardous events and non-conformances
- monitor performance of the enterprise environmental management system, including the identification of performance standards based on industry best practice; collection and analysis of qualitative and quantitative performance data;

REQUIRED SKILLS AND KNOWLEDGE

benchmarking; assessment of performance against standards and recommendations for improvement

- prepare and update enterprise environmental impact statements and environment management plans
- prepare information about the enterprise's environmental management strategy and progress for release to the public, consistent with enterprise ethical standards and regulatory requirements
- prepare **reports** and recommendations for senior management, using analysis of complex information and language, and presentation styles appropriate for the purpose
- present reports according to legal and enterprise requirements
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices and requirements or technologies
- utilise effective communication, negotiation and problem-solving skills in interactions with all stakeholders, including environmental authorities and agencies and community representatives
- utilise information and communications technology for research, data collection and analysis and reporting, including the use of statistical and modelling software, where available.

Required knowledge

Knowledge of:

- potential costs of prevention, assessment and control of environmental impact
- customer and consumer, including importing country, requirements for effective environmental management and the implications for enterprise operations
- enterprise requirements for **expert advice, assistance** and support
- major air, water and solid waste environmental impacts generated by the meat industry
- relevant environmental authorities, their jurisdictions, powers and the implications for enterprise operations.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- a workplace environment with typical operating and production conditions
- enterprise system information, including company Environmental Protection Authority (EPA) licences, environmental performance reports and data.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Environmental management strategies</i> may include:	<ul style="list-style-type: none"> • alternative energy sources and configurations • further processing of waste for commercial purposes • minimisation strategies (e.g. plant, technology and equipment design and replacement, systems review, process and work flow redesign) • recycling, reuse and recovery of liquid and solid waste.
<i>Stakeholders</i> and external agencies may include:	<ul style="list-style-type: none"> • community groups, including neighbours, residents, environment and conservation groups • company owners, directors, shareholders and financiers • customers and consumers • emergency services • employees • enterprise departments, divisions and sections

RANGE STATEMENT	
	<ul style="list-style-type: none"> • environment protection authorities and agencies • governments and government agencies (federal, state, territory and local) • industry groups and associations, including employee, employer, professional and technical groups • regulatory authorities.
Environmental management <i>systems</i> may include:	<ul style="list-style-type: none"> • consultation requirements • qualitative assessment techniques • sampling and measurement schedules, methods and requirements • sustainability targets.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • AS 3595-1990 Energy management - Guidelines for financial evaluation of a project • AS/NZ ISO 14001:2004 Environmental Management Systems - Requirements with Guidance for Use • AS/NZ ISO 14040:1998 Environmental Management Systems - Life Cycle Assessment - Principles and Framework • AS/NZ ISO 19011:2003 Guidelines for Quality and/or Environmental Management Systems Auditing • Australian covenants and codes of practice on packaging disposal • commercial law, including fair trading and trade practices • consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management • environmental protection, conservation and sustainability requirements • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • licensing requirements and conditions (e.g. export meat order requirements for potable water and food safety)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • planning permission, including solid and liquid waste disposal, odours, plant noise, and impact of road transport/traffic (e.g. noise) • pollution control licences • public health requirements • relevant regulations, such as state and territory regulations regarding meat processing • taxation • United Nations Educational, Scientific and Cultural Organization (UNESCO) and World Health Organisation (WHO) covenants and agreements.
<i>Environmental impacts</i> may include:	<ul style="list-style-type: none"> • air pollution (e.g. odour, noise, ozone depletion and contamination) • soil degradation (e.g. solid and liquid waste) • water pollution (e.g. effluent and liquid waste, and solid waste).
<i>Mathematical</i> skills may relate to:	<ul style="list-style-type: none"> • complex actual and hypothetical technical and financial modelling • calculations • interpretation • analysis. • complex actual and hypothetical mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel • operations • sales and turnover • exports.
<i>Communication skills</i> may:	<ul style="list-style-type: none"> • be with culturally, ethnically and socially diverse individuals and groups • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve reading and interpreting workplace documentation • occur in a variety of sensitive, conflictive, collaborative and supportive environments • be formal or informal and involve face to face

RANGE STATEMENT	
	<p>and technological/electronic methods</p> <ul style="list-style-type: none"> • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require persuasion, negotiation and assertiveness skills.
Wastewater disposal options may include:	<ul style="list-style-type: none"> • biological treatments • disposal to surface waters • land disposal • primary and secondary treatment process • screening, flotation and evaporation • sewer disposal • wastewater recycling.
Measures to minimise nutrients and other contaminants in water may include:	<ul style="list-style-type: none"> • dry cleaning before wash down • improved manual plug change over for blood pit plug • improved screening/filters in treatment plans and floor drains screens • pondage, purification and filtering • primary screening.
Air pollution may include:	<ul style="list-style-type: none"> • noise (e.g. on site operations and transport) • odours related to production and transport on lairage of large animals • vapours, gases (e.g. greenhouse gases), solids fallout.
Odour treatment processes may be physical, chemical or biological and include:	<ul style="list-style-type: none"> • activated carbon • biofilters and bioscrubbers • chemical oxidation (e.g. wet chemical scrubbing or ozonisation) • dispersion (e.g. extraction hoods and dispersion stacks) • thermal oxidation (e.g. incineration).
Solid waste may include:	<ul style="list-style-type: none"> • animal waste (e.g. non-commercial value hides and manure) • meat and meat products (e.g. fat, bone and flesh) • packaging materials (e.g. cardboard cartons, paper/plastic liners, vacuum packs and binding tapes) • refuse from non-processing operations (e.g.

RANGE STATEMENT	
	<p>canteen, offices and amenities)</p> <ul style="list-style-type: none"> • smallgoods manufacturing, processing, rendering and further processing wastes (e.g. fat, meat and meat product trimmings, rejects and returns, paunch manure, waste from fly ash boilers, oil and grease trap waste, and sludge) • solids suspended in effluent. <p>Methods of managing solid waste may include:</p> <ul style="list-style-type: none"> • composting • filtration, effluent treatment/settling ponds • identification of alternative products (e.g. biodegradable packaging) • incineration.
<i>OHS requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OHS requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work instructions.
<i>Benchmarking</i> may include working with:	<ul style="list-style-type: none"> • companies from other industries • internal departments • international or national industry standards • other companies or sites within the industry.
<i>Reports</i> may:	<ul style="list-style-type: none"> • include analysis and response to complaints • include evaluation of alternative environmental management strategies and controls • include financial reports (e.g. cost/benefit analyses and budget reports) • include performance information, audit reports and environment management reports to meet licensing requirements • be complex • contain information from a range of technical sources and include mathematical and graphic information and data • need to be presented according to legal and enterprise requirements.
<i>Expert advice and assistance</i> may be sought from:	<ul style="list-style-type: none"> • environmental engineers • environmental agencies • government departments.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit covers the skills and knowledge required to prepare and manage Occupational Health and Safety (OH&S) plans and systems. It includes the development of a positive workplace health and safety culture and the development of systems, procedures and controls. Improved OH&S is a priority in the meat industry.</p> <p>Effective management of OH&S systems produces a safe environment and reduces the financial liabilities of the enterprise. This standard is consistent with the National Guidelines for Integrating OH&S Competencies into National Industry Competency Standards [NOH&SC: 7025].</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>In the meat industry context, managers may have responsibility for OH&S or OH&S responsibilities within production, human resources (HR) or other roles.</p> <p>At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Scope the workplace health and safety program</p>	<p>1.1. Legal requirements and obligations for OH&S are identified and interpreted for the enterprise.</p> <p>1.2. Scope of enterprise operations and requirements for OH&S systems is determined, including requirements for management of hazardous events.</p> <p>1.3. Enterprise's current system is documented and performance is analysed against internal and external benchmarks.</p>
<p>2. Develop OH&S policies and plans</p>	<p>2.1. Policies documenting and defining Chief Executive Officer (CEO)/organisational commitment to OH&S are developed.</p> <p>2.2. Enterprise goals and targets for OH&S performance are set for the short, medium and long term.</p> <p>2.3. Resource requirements for the operation of the system are identified and committed.</p> <p>2.4. Implementation plan detailing resources and strategies is prepared.</p> <p>2.5. Communication strategy for informing stakeholders of policies, obligations and responsibilities is prepared.</p>
<p>3. Develop enterprise commitment to OH&S</p>	<p>3.1. OH&S responsibilities and duties are incorporated in all relevant policies, position descriptions, operating procedures and work instructions.</p> <p>3.2. Enterprise OH&S policies, strategies and requirements include all enterprise personnel, contractors, suppliers and visitors on the work site.</p> <p>3.3. Consultative and participative mechanisms are established to facilitate the prevention, identification and effective and prompt resolution of OH&S issues.</p> <p>3.4. OH&S issues, including hazard and risk identification and control, are considered in the planning, design and evaluation of job design, procedures, technology, work/process flows, plant layout and construction.</p>
<p>4. Develop and maintain procedures for identifying hazards</p>	<p>4.1. OH&S records are analysed to determine trends.</p> <p>4.2. Existing and potential hazards are correctly identified.</p> <p>4.3. Hazard identification procedures are developed and integrated within enterprise procedures and systems.</p>
<p>5. Manage and maintain</p>	<p>5.1. Risks determined by the identification of hazards are</p>

ELEMENT	PERFORMANCE CRITERIA
procedures for assessing risks	<p>correctly assessed.</p> <p>5.2.Procedures for assessment of risks are developed and integrated within enterprise procedures and systems.</p>
6. Manage and maintain procedures for controlling risk	<p>6.1.Risk control measures are developed and implemented, consistent with the hierarchy of control and regulatory requirements.</p> <p>6.2.Procedures for control of risks are based on the hierarchy of control and integrated into enterprise procedures and systems.</p> <p>6.3.Interim control measures are replaced with permanent measures to control risks at the source.</p> <p>6.4.Resources to enable implementation of new or permanent control measures are sought and included in enterprise planning processes.</p>
7. Maintain enterprise commitment to OH&S goals	<p>7.1.Training is resourced, planned and delivered to support commitment to and compliance with regulatory and enterprise requirements for OH&S.</p> <p>7.2.Enterprise, team and individual obligations for progress towards OH&S goals are presented clearly and are regularly updated.</p> <p>7.3.Enterprise operations and procedures are monitored to ensure the effective adoption of OH&S procedures according to enterprise and regulatory requirements.</p>
8. Manage and maintain procedures for hazardous events	<p>8.1.Potential hazardous events are correctly identified.</p> <p>8.2.Potential community health hazards are identified and notified appropriately.</p> <p>8.3.Local communities, and emergency and community health services and authorities are consulted in the control of hazardous events and community health incidents.</p>
9. Continuously improve OH&S performance	<p>9.1.OH&S data and record keeping systems are maintained and secured.</p> <p>9.2.Performance data, including team feedback, is collected and analysed against enterprise goals and targets.</p> <p>9.3.Performance implications are conveyed to stakeholders.</p> <p>9.4.Compliance with enterprise and mandatory OH&S requirements is monitored and reported.</p> <p>9.5.Systems and procedures are updated for legislative,</p>

ELEMENT	PERFORMANCE CRITERIA
	technical, process or operational changes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, where appropriate, *specialist external advice* to assist in the development of OH&S systems and plans
- analyse the impact of *workforce characteristics* and enterprise communication patterns and culture on OH&S system design, implementation and operation
- apply analysis of enterprise culture, including ethical standards and values, communication systems and workforce characteristics to the development of effective OH&S consultative processes
- apply principles and procedures for hazard identification, risk analysis and hierarchy of controls in any or all areas of the workplace
- apply problem-solving strategies, such as developing practical and creative solutions, showing independence, developing a range of strategies to resolve problems, testing assumptions, and addressing customer and workplace concerns
- collect, analyse and report complex OH&S information to stakeholders using a variety of formats appropriate for the purpose and the audience
- consult with the community to develop strategies to minimise community health and safety impacts of enterprise operations (e.g. hazardous events and Q fever from stockyards)
- maintain currency of knowledge through independent research and/or professional development
- develop and monitor systems to ensure workforce ownership of and compliance with enterprise safety procedures, including establishing OH&S consultative strategies and processes, mandatory workplace safety committees and provision of training
- develop hazardous events plans in consultation with appropriate workplace personnel and external agencies, including emergency services and government agencies
- establish record management systems to monitor compliance, including mandatory notifications and reporting, mandatory licences and certificates, registers, listings and labelling of regulated materials
- identify and apply relevant communication and *mathematical skills*

REQUIRED SKILLS AND KNOWLEDGE

- identify and apply relevant *workplace* and regulatory requirements
- identify and interpret the implications, obligations and requirements of relevant legislation, regulations, guidelines, codes of practice, Australian standards for health and safety for the enterprise's directors, management and workforce
- identify appropriate industry or enterprise benchmarks for OH&S performance
- improve health and safety performance, including developing OH&S plans and strategies, acting on performance information, developing continuous review processes, including recommendations in the OH&S planning process
- integrate enterprise OH&S policies, systems and procedures with relevant organisational management systems and procedures, including the inclusion of OH&S responsibilities in all relevant position descriptions/procedures and work instructions, and strategies for ensuring visitor and contractor compliance with enterprise health and safety policies and procedures
- monitor enterprise health and safety performance, including analysing *health and safety information, and reports* measuring performance against enterprise goals, targets and agreed benchmarks
- observe standard workplace OH&S requirements during performance of duties
- prepare action plans which identify goals, managerial responsibilities and operational strategies for OH&S
- prepare and monitor enterprise training plan for all levels of the organisation to support workforce commitment and contribution to workplace health and safety
- present reports according to legal and enterprise requirements
- set enterprise health and safety goals and targets through consultation with stakeholders and analysis of enterprise OH&S data
- systematically analyse the causes of accidents, incidents and work-related *injuries and illnesses* and take corrective action by identifying and introducing programs for reducing accidents and injuries
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices or requirements or technologies
- update enterprise policies, plans and practices for changes in relevant legislation, regulation, codes of practice and guidelines
- utilise available information and communications technology, including modelling and evaluation software, to collect, monitor, analyse and report enterprise safety data.

Required knowledge

Knowledge of:

- enterprise requirements for external expertise and assistance in the development of OH&S systems and plans
- impacts of enterprise OH&S policies, systems and procedures on all organisational management systems and operations, including processing and production, maintenance, contractors, distribution and administration

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • a workplace with typical operating and production conditions • enterprise system information.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility • assignment focusing on understanding and application of principles and theory to workplace operations • workplace projects with focus on company environment and conditions.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Specific OH&S <i>obligations</i> and requirements may include:	<ul style="list-style-type: none"> • duty of care under OH&S legislation and common law • hazards management • OH&S representative and consultative mechanisms and issues resolution provisions • security and confidentiality relating to individual OH&S records • training.
<i>Hazardous events</i> and community health hazards may include:	<ul style="list-style-type: none"> • lairage of livestock carrying Q fever and other zoonotic diseases • refrigerant leaks • seepage from holding ponds.
Measuring of <i>OH&S performance</i> may include:	<ul style="list-style-type: none"> • average time lost rate, and days lost per reporting period • costs, including preventative, rehabilitation and compensation • reported incidents, accidents, incident rates, and reports by types of accidents and incidents.

RANGE STATEMENT	
<i>Communication</i> may:	<ul style="list-style-type: none"> • be inclusive of the cultural, ethnic and social diversity of individuals and groups • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve reading and interpreting workplace documentation • occur in a variety of sensitive, conflictive, collaborative and supportive environments • may be formal or informal and involve face to face and technological/electronic methods • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require persuasion, negotiation and assertiveness skills.
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders and financiers • competitors • emergency services (e.g. ambulance, hospital, fire, police and rescue) • insurance agencies, brokers and underwriters • local community • management and employees • OH&S agencies and government departments • suppliers, customers and consumers • unions and employer associations.
<i>Consultative and participative</i> processes may include:	<ul style="list-style-type: none"> • continuous improvement and review • inclusion of OH&S in other consultative processes and forums (e.g. consultative committee or maintenance meetings) • involvement of workforce at all levels in problem solving, management and monitoring of OH&S, including inspections, audits, risk assessment and risk control • OH&S representatives and/or committees • procedures for reporting hazards, risks and issues.
<i>OH&S records</i> may include:	<ul style="list-style-type: none"> • audit and inspection reports • environmental monitoring and health

RANGE STATEMENT	
	<p>surveillance records</p> <ul style="list-style-type: none"> • first aid and sick room records • information from suppliers and agencies, including stock handling, equipment and machinery usage and maintenance • maintenance reports • mandatory requirements: compensation and rehabilitation, Material Safety Data Sheets (MSDS), accident, injury and illness notifications, certificates and licences, hazardous substances registers and driver's log books • training.
<p>Regulatory requirements may include:</p>	<ul style="list-style-type: none"> • animal welfare • commercial law, including fair trading and trade practices • compliance, including AS 3806:2006 Compliance programs • consumer law • corporate law, including registration, licensing and financial reporting • current NOH&SC Codes of Practice, including noise management and protection of hearing at work, preparation of MSDSs, and prevention of occupational overuse • environmental and waste management legislation and regulations • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards and agreements • OH&S management systems including: <ul style="list-style-type: none"> • AS/NZS 4581:1999 Management System Integration - Guidance to Business Government and Community Organisations • AS/NZS 4801:2001 Occupational Health&Safety Management Systems - Specification with Guidance for Use • ASNZS 4804:2001 Occupational Health&Safety Management Systems - General Guidelines on Principles, Systems and Supporting Techniques

RANGE STATEMENT	
	<ul style="list-style-type: none"> • relevant regulations • risk management, including: <ul style="list-style-type: none"> • AS/NZS 4360:2004 Risk Management • state and territory regulations regarding meat processing • taxation.
<i>Training</i> may include:	<ul style="list-style-type: none"> • first aid training • OH&S training for all levels and areas of enterprise • safety committee training.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Specialist external advice</i> may be:	<ul style="list-style-type: none"> • provided by health and safety professionals (e.g. ergonomists, rehabilitation specialists and occupational therapists) • provided by technical experts (e.g. ergonomists) • utilised in the design of control measures, monitoring systems and health surveillance.
<i>Workforce characteristics</i> may include:	<ul style="list-style-type: none"> • age • cultural and language background • education and training experience • employment history and work experience

RANGE STATEMENT	
	<ul style="list-style-type: none"> • gender • individual ethical standards and values • literacy, numeracy, communication skills • part time, casual, contract and permanent employment.
<i>Mathematical skills</i> may relate to:	<ul style="list-style-type: none"> • technical and financial modelling • calculations • interpretation and analysis • complex actual and hypothetical mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel • operations • sales and turnover • exports.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Health and safety information and reports</i> may include:	<ul style="list-style-type: none"> • audit reports, accident investigation reports, and financial reports relating to premiums, costs and claims • detailed, summarised, expanded or synthesised information • oral, written, graphic, technical or statistical information • sketches, photographs, video or audio taped information.
Occupation <i>injuries and illnesses</i> may include:	<ul style="list-style-type: none"> • cuts, sprains and strains • substance abuse • zoonotic diseases.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to schedule and monitor the hygienic, safe and secure transportation of meat, meat products and meat by-products, for domestic or international markets. The efficient transportation of meat, meat products and meat by-products results in the satisfaction of customer requirements.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is of use to livestock buyers and coordinators, transport managers and finance managers operating in a meat industry context.</p> <p>At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Implement requirements for the <i>transport</i> of meat, <i>meat products and meat by-products</i></p>	<p>1.1. Regulatory, customer and enterprise requirements for the hygienic, safe and timely transportation of meat, meat products and meat by-products are identified and followed.</p> <p>1.2. Resource requirements are assessed and allocated.</p>
<p>2. Establish transport policies and procedures</p>	<p>2.1. Systems and procedures for the operation of meat transport vehicles for the hygienic and safe transport of meat, meat products and meat by-products are developed.</p> <p>2.2. Security procedures and systems are developed.</p> <p>2.3. Reporting and recording procedures are established and maintained.</p> <p>2.4. Supplier quality requirements and standards are developed and monitored.</p> <p>2.5. Personnel, including contractors, are informed and mentored in the performance of their obligations and responsibilities, including Occupational Health and Safety (OH&S).</p>
<p>3. Manage transport logistics</p>	<p>3.1. <i>Transport options</i> are analysed and selected.</p> <p>3.2. <i>Contracts and schedules</i> are prepared and negotiated according to customer and production requirements.</p> <p>3.3. Documentation is completed according to enterprise, customer and <i>regulatory requirements</i>.</p> <p>3.4. Transport vehicles are maintained to ensure the hygienic transportation of meat.</p> <p>3.5. Enterprise storage facilities are operated according to enterprise and regulatory requirements.</p> <p>3.6. Consignments are tracked and monitored.</p>
<p>4. Determine and manage transport costs</p>	<p>4.1. Cost of storage and transport is calculated.</p> <p>4.2. Transport budget is prepared and monitored.</p> <p>4.3. Procedures for cost savings are reviewed.</p>
<p>5. Manage contingencies</p>	<p>5.1. Contingency plans are developed according to enterprise requirements.</p> <p>5.2. Changing circumstances are analysed, and responses are prioritised and clarified.</p> <p>5.3. Impacts of changed schedules are communicated to all relevant parties.</p>
<p>6. Review transport of</p>	<p>6.1. Resources, procedures and schedules are monitored</p>

ELEMENT	PERFORMANCE CRITERIA
meat, meat products and meat by-products to improve customer service	and reviewed for effectiveness and efficiency. 6.2. Customer feedback and requirements are included in review of transport procedures and schedules. 6.3. Team is involved in continuous improvement processes.
7. Establish effective communication with customers	7.1. Customer requirements are determined. 7.2. Customer complaints are resolved promptly. 7.3. Communication strategies are inclusive of the cultural, ethnic and social diversity of individuals and groups.
8. Produce reports	8.1. Reports are produced according to legal and enterprise requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse throughput, production, storage requirements, meat safety, product specifications, customer requirements, orders and the purchasing or scheduling of appropriate transport services
- apply **problem-solving skills** to resolve transportation issues
- communicate effectively with regulatory authorities and **stakeholders**
- maintain currency of knowledge through independent research or personal development
- develop supplier quality criteria including audit requirements for the purchase of transport services
- establish systems for the completion and certification of product transport documentation
- identify and analyse transportation options; develop procedures to inform enterprise personnel, customers and contractors of changes in schedules
- apply relevant **mathematical skills**
- identify and apply relevant **OH&S requirements**
- present reports according to legal and enterprise requirements
- take action to improve own work practice as a result of feedback from others, self-evaluation, or in response to changed work practices or requirements or

REQUIRED SKILLS AND KNOWLEDGE

technologies

- use available communication and information technology systems to monitor transport purchase, schedule and *track* consignments, collect and analyse performance information
- work effectively as an individual and as a team member.

Required knowledge

Knowledge of:

- food safety requirements for meat and meat product transport vehicles
- regulatory and *workplace requirements* relating to the transportation of meat, meat products and meat by-products
- potential impact and costs of inappropriate transportation of meat, meat products and meat by-products, including public liability and loss of custom
- public and OH&S obligations relating to the transport of meat, meat products and meat by-products
- requirements for maintaining product quality during transportation.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • a real work environment • relevant documentation, such as: <ul style="list-style-type: none"> • customer requirements or orders • manufacturer instructions and operations manuals • production and chilling schedules • regulatory requirements • workplace policy and procedures • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility • assignment focusing on understanding and

EVIDENCE GUIDE	
	<p>application of principles and theory to workplace operations</p> <ul style="list-style-type: none"> workplace projects which focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Transport</i> may be:	<ul style="list-style-type: none"> intrastate interstate international by road, rail, sea or air.
<i>Meat, meat products and meat by-products</i> may include:	<ul style="list-style-type: none"> carcase and carton meat fresh, frozen, further processed and rendered products noxious products smallgoods treated and untreated hides value-added products.
Analysing and selecting <i>transport options</i> includes:	<ul style="list-style-type: none"> unit cost size and availability customer requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • product requirements and characteristics • route • speed.
<i>Contracts and schedules</i> may be developed for enterprise owned vehicles or contracted vehicles including:	<ul style="list-style-type: none"> • air transport • rail or container • road transport • sea or container transport.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • AS 4696:2002 Australian Standard for the Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • commercial law, including fair trading and trade practices • consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management, and sustainable work practices • equal employment opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • HB 40.1:2001 The Australian Refrigeration and Air-Conditioning Code of Good Practice - Reduction of Emissions of Fluorocarbon Refrigerants in Commercial and Industrial Refrigeration and Air-Conditioning Applications • industrial awards and agreements • relevant regulations • state and federal transport regulations • state regulations regarding meat processing • taxation.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be formal or informal and involve face to face and technological or electronic methods • be with culturally, ethnically and socially diverse individuals and groups • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve reading and interpreting workplace

RANGE STATEMENT	
	<p>documentation</p> <ul style="list-style-type: none"> • occur in a variety of sensitive, conflictive, collaborative and supportive environments • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require persuasion, negotiation and assertiveness skills.
Reports may be:	<ul style="list-style-type: none"> • complex • contain information from a range of technical sources and include mathematical and graphic information and data.
Problem-solving skills may include:	<ul style="list-style-type: none"> • applying a range of strategies • developing practical and creative solutions • resolving workplace and customer concerns • showing independence and initiative • solving problems individually or in teams • testing assumptions and taking context into account • using mathematical skills to resolve problems.
Stakeholders may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders and financiers • competitors • management and employees • suppliers, customers and consumers • unions and employer associations.
Mathematical skills may relate to:	<ul style="list-style-type: none"> • technical and financial modelling • calculations • interpretation and analysis • complex actual and hypothetical mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel • operations • sales and turnover • exports.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Systems for the <i>tracking</i> and trace back of consignment may be manual or electronic and include:	<ul style="list-style-type: none"> • communication systems • computerised tracking systems • consignment, despatch and delivery documentation • export documentation • log books • product certification.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select packaging	1.1. Product is bagged in appropriately sized bag. 1.2. Product is arranged in appropriate container.
2. Set machine requirements	2.1. Requirements in preparation for start-up of vacuum packing machine are completed to <i>workplace requirements</i> . 2.2. Machine requirements are set correctly. 2.3. Start-up procedures are followed to workplace requirements. 2.4. Packing materials are attached and changed to workplace requirements and product specification. 2.5. Bagged meat is placed on the vacuum packing machine or in the formed pockets as appropriate. 2.6. Open ends of bags are placed flat across the sealing bar or meat contained in pockets as appropriate. 2.7. Occupational Health and Safety (<i>OH&S</i>), <i>hygiene and sanitation requirements</i> are followed.
3. Operate machinery	3.1. Vacuum packaging machine is operated correctly in accordance with workplace requirements. 3.2. A variety of products is vacuum packed to customer specifications, hygiene and sanitation, OH&S and Quality Assurance (QA) requirements at a speed that is the same as production requirements. 3.3. Bags are shrunk using hot water baths where appropriate. 3.4. Bagged cuts are left to drain. 3.5. Shut-down procedures are performed to workplace requirements.
4. Perform routine maintenance	4.1. Dyes are changed according to workplace requirements. 4.2. Corrective action is taken when leaks and defects are identified, according to workplace requirements. 4.3. Plates are changed as required.
5. Ensure quality of packaging and product	5.1. Bagged cuts are inspected for leaks and other defects. 5.2. Bagged cuts are placed in cartons according to specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare for vacuum packaging according to OH&S and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- *explain* defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- work effectively as an individual and as a team member
- demonstrate hygienic work practices for vacuum packing
- apply relevant *communication* and *mathematical skills*
- apply relevant *regulatory requirements*
- manage time and priorities
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific OH&S requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer's and workplace requirements for vacuum packaging of product

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use	<p>1.1. Workplace <i>environmental and resource efficiency issues</i> are identified.</p> <p>1.2. Resources used in own work role are identified.</p> <p>1.3. <i>Wastes and emissions</i> created by own work role are identified.</p>
2. <i>Comply</i> with environmental regulations	<p>2.1. <i>Regulatory requirements</i>, work instructions and procedures are followed to ensure compliance.</p> <p>2.2. Non-conformances are identified and corrective action procedures are followed.</p>
3. Seek opportunities to improve resource efficiency	<p>3.1. Enterprise plans to improve environmental practices and resource efficiency are followed.</p> <p>3.2. Suggestions are made for improvements to workplace practices in own work area.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate a basic understanding of sustainability
- interpret workplace information
- report non-conformances
- recognise and follow procedures, follow instructions and respond to change
- relate to people from a range of social, cultural, ethnic backgrounds, and physical and mental abilities
- apply relevant *communication* and mathematical skills
- ask questions and clarify work requirements
- work effectively as an individual and as part of a team
- follow good housekeeping procedures and practices
- apply relevant Occupational Health and Safety (*OH&S*), regulatory and *workplace requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- take corrective action according to workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- work with others to solve problems relating to environmental performance

Required knowledge

Knowledge of:

- environmental and resource efficiency hazards and risks associated with own workplace and own work area
- *workplace environmental management strategies* affecting own work practice
- relevant environmental and resource efficiency systems and procedures for own work area
- relevant OH&S, regulatory and workplace requirements

EVIDENCE GUIDE**assessment**available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Environmental and resource efficiency issues may include:

- minimisation of environmental risks
- maximisation of opportunities to improve business environmental performance
- promotion of more efficient consumption of resources including:
 - efficient energy use
 - efficient water use
 - minimisation of waste, through implementation of the waste management hierarchy.

Wastes and emissions may include:

- animal products such as blood, fat and manure
- contamination and polluted water
- direct and indirect generation of greenhouse gases
- emissions resulting from consumption of non-renewable resources e.g. diesel fuels, coal generated electricity, coal, gas including natural gas
- noise
- packaging, emissions, vapours and odours.

Regulatory requirements may include:

- AS/NZS ISO 14001:2004 Environmental Management Systems Requirements with guidance for use
- AS/NZS ISO 14040:1988 Environmental Management - Life Cycle Assessment - Principles and Framework.

RANGE STATEMENT	
<i>Compliance</i> includes:	<ul style="list-style-type: none"> • meeting enterprise requirements • meeting relevant federal, state and local government laws, by-laws and regulations.

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Sharpen <i>knives</i>	<p>1.1. Knives are sharpened according to <i>workplace requirements</i>.</p> <p>1.2. Knives are sharpened to maintain bevel edge.</p> <p>1.3. Steel is used correctly to maintain bevel edge and to meet OH&S requirements.</p>
2. Work safely with others	<p>2.1. Knives are used in ways which minimise the risk of injury.</p> <p>2.2. Knives are used safely at all times in accordance with <i>OH&S, hygiene and sanitation</i>, and food safety requirements.</p>
3. Maintain knives and associated equipment	<p>3.1. Knives are maintained to hygiene and sanitation, and workplace requirements.</p> <p>3.2. <i>Knife-sharpening equipment</i> is maintained, cleaned and stored to hygiene and sanitation, and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- steel a knife correctly
- use safe techniques of knife sharpening to workplace, hygiene and sanitation, and OH&S requirements

Required knowledge

Knowledge of:

- steps in steeling a knife to maintain edge
- technique to sharpen a knife with an appropriate bevel edge
- theory of knife sharpening
- sterilisation, and hygiene and sanitation requirements related to knife sharpening
- OH&S issues related to the use and sharpening of knives
- relevant *regulatory requirements*

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated in conjunction with a skill or task requiring the use of a knife.

Context of, and specific resources for assessment

Assessment can be carried out in an actual or simulated workplace.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Knives include:

- boning
- steak
- skinning.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear
 - lifting assistance
 - mesh aprons
 - protective boot covers
 - protective hand and arm covering
 - protective head and hair covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Hygiene and sanitation</i> requirements may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
<i>Knife sharpening equipment</i> includes:	<ul style="list-style-type: none"> • sharpening stone • steels • setters • hollow grinders.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare, operate and clean <i>processing equipment</i> used for curing and corning <i>product</i>	1.1. Processing equipment is prepared according to manufacturer's <i>specifications</i> , and Occupational Health and Safety (<i>OH&S</i>), <i>hygiene and sanitation</i> , and <i>workplace requirements</i> 1.2. Processing equipment is operated according to manufacturer's specifications, and OH&S, hygiene and workplace requirements. 1.3. Processing equipment is cleaned according to manufacturer's specifications, and OH&S, hygiene and workplace requirements.
2. Prepare meat	2.1. Meat is selected according to product specifications. 2.2. Meat is prepared according to product specifications, and hygiene and workplace requirements.
3. Prepare ingredients	3.1. Ingredients are selected and prepared according to product specifications, and hygiene and workplace requirements.
4. Prepare brines	4.1. Required amount of water and other liquid and solid additives are added in correct order and mixed according to product specifications, and hygiene and workplace requirements. 4.2. Brine solutions are prepared according to product specifications, and hygiene and workplace requirements. 4.3. Hydrometer (salinometer) is used to check brine solution.
5. Process meat	5.1. Meat is cured or corned according to product specifications, health regulations and workplace requirements at a speed appropriate for production requirements. 5.2. Processing is regularly monitored. 5.3. Adjustments are made to processing as required to achieve product specifications.
6. Store meat product	6.1. On completion of processing, product is stored according to product specifications, and hygiene, regulatory and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify meat cuts used in curing and corning
- identify various ingredients for curing meat and explain their use and purpose
- identify sub-standard product and address the problem according to workplace requirements
- follow recipes and procedures accurately
- **explain** the effects of curing on shelf life and taste of product
- activate processing equipment to assess its readiness for operational use
- operate mixing machines for required length of time
- operate adjustment tools and equipment correctly
- perform running adjustments according to workplace requirements and manufacturer's specifications
- pump meat correctly to avoid air pockets
- pump meat to increase original weight according to workplace requirements
- perform curing and corning according to workplace, OH&S, hygiene and regulatory requirements
- demonstrate the correct pickling procedure according to product specifications and workplace requirements
- wash residue from cured meats following removal from holding brine
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer's specifications
- apply relevant **communication** and **mathematical skills**
- work effectively as an individual and as part of a team
- apply relevant **regulatory requirements**
- seek advice from appropriate sources when working with new products or equipment
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- meat curing process
- purpose and effect of brine on meat

REQUIRED SKILLS AND KNOWLEDGE

- safe and correct operation of processing equipment
- health regulations which apply to curing and corning of meats
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment
- 'osmosis' in relation to the curing process

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal production conditions.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • real work environment • relevant documentation such as: <ul style="list-style-type: none"> • manufacturer's instructions or operations manuals • regulatory requirements • workplace policies and procedures • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • simulation

EVIDENCE GUIDE

MTMPSR401C Coordinate contracts

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to coordinate the production, packaging and transportation of products to contracted markets according to enterprise, customer and legal requirements, and is relevant for contracts in local, national and international markets. The effective coordination of contracts through all stages of the production and distribution chain gives the meat industry a high profile in the marketplace, with a reputation for quality products and customer service.
------------------------	---

Application of the Unit

Application of the unit	The breadth of this unit makes it particularly useful for small and micro businesses in the retail, meat processing, smallgoods manufacturing and food service areas. In a micro or small business one person would have responsibility for overseeing contract management.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify characteristics of the client or market	1.1. Characteristics of the client or market are analysed. 1.2. Appropriate communication strategies are identified.
2. Confirm enterprise and contractual requirements	2.1. Market regulations, controls and requirements are identified. 2.2. Contractual requirements are analysed and checked against production schedule. 2.3. Negotiations with <i>agents, representatives, brokers</i> and clients are confirmed according to enterprise requirements and ethical standards. 2.4. Contingency plans are put in place.
3. Monitor production for clients and market	3.1. <i>Supply of raw product</i> and ingredients is negotiated and confirmed, according to market and enterprise requirements. 3.2. Production is scheduled to meet contract requirements. 3.3. Product specifications, including customer, market requirements and Quality Assurance (QA) requirements, are met. 3.4. Product is packaged to maintain quality of product and to meet customer and legal requirements.
4. Coordinate transportation of product	4.1. Transport, freight and storage is scheduled with carrier. 4.2. <i>Documentation</i> is accurately completed. 4.3. Insurance arrangements are confirmed.
5. Facilitate financial transactions	5.1. Costs, charges and payments are calculated accurately within enterprise policies and negotiated contracts. 5.2. Costs, charges and payments are calculated accurately and in appropriate currency. 5.3. Payments and receipts are monitored according to enterprise procedures.
6. Monitor contract coordination effectiveness	6.1. Performance against <i>targets</i> is assessed. 6.2. Recommendations for improvement are made.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply food safety and QA requirements as applicable
- apply problem-solving skills to resolve issues that impact on capacity to meet contractual obligations
- apply relevant *mathematical skills*
- calculate costs and prices for *local, national and international markets*, including the impacts of inter-market taxes, tariffs, duties, charges or exchange rates
- complete documentation accurately and on time
- work effectively as an individual and as part of a team
- use effective *communication* strategies, including cross cultural communication, to negotiate or confirm transactions in the market place e.g. new, distant and diverse markets
- determine implications for the enterprise of information relevant to the sale of meat and meat products in a local, national and international context (e.g. market regulations, agents' terms and conditions, etc)
- identify and apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and *workplace requirements*
- identify and follow freight, insurance and banking procedures
- liaise, as required, with agents, representatives and brokers
- prepare schedules and coordinate supply, production, packaging and transshipment of product to meet contract specifications and deadlines.
- review enterprise operations and processes to meet regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use appropriate *communication and information technology* to complete communication, scheduling, monitoring and reporting tasks as required

Required knowledge

Knowledge of:

- legislation, regulations and codes of practice that apply to the production, sale, *packaging and transport* of meat products in local, national or international markets including legislative requirements and regulations for meat and other ingredients
- standard documentation required for local, national or international trade
- product specifications and enterprise contractual obligations
- negotiation and communication strategies appropriate for use with government

REQUIRED SKILLS AND KNOWLEDGE

agencies and business clients

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommend methods of assessment include:

- assignment
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare <i>resource proposals</i>	1.1. <i>Resource</i> requirements are identified in consultation with relevant personnel. 1.2. Resource planning information is collected in consultation with colleagues, including those who have a specialist role in resource management. 1.3. Objectives of the proposal are clarified and are consistent with enterprise directions and goals.
2. Evaluate feasibility of resource proposals	2.1. Potential impact of resource allocation on enterprise operations is analysed. 2.2. Realistic options and outcomes are identified. 2.3. <i>Cost or benefit analyses</i> (including payback periods) are conducted and documented. 2.4. Risks associated with the proposal are identified and assessed. 2.5. <i>Targets, goals and performance measures</i> to measure performance of implemented strategies are developed.
3. Gain commitment to resource proposals	3.1. Proposal is refined and commitment to the objectives gained through consultation with colleagues or team. 3.2. Proposal is prepared for <i>presentation</i> and discussion. 3.3. Proposal and recommendations are presented to relevant personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- assess potential impacts of the proposal on enterprise operations (e.g. production and personnel)
- record, gather and consolidate financial information
- apply relevant *mathematical skills*
- assess risks associated with the proposal and recommend risk management strategies

REQUIRED SKILLS AND KNOWLEDGE

- calculate net present value, internal rate of return and payback periods
- prepare departmental/section *financial information* for inclusion in enterprise/department budget
- interpret and prepare cash flow statements, profit and loss statements and asset/liabilities statements
- recommend strategies for obtaining resources including finance (e.g. internal, external, re-allocation of resources, new resources or funds)
- prepare *financial proposals* which include costs, cash flow requirements, payback period and benefits
- consult and collaborate with colleagues and those potentially affected to refine the proposal
- promote the advantages and disadvantages of the proposal to relevant personnel and *stakeholders*
- work effectively as an individual and as a team member
- determine the need for and scope of the proposal, relevant to enterprise direction and goals
- develop performance indicators to measure outcomes of resource allocation/proposal
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- research options, models and benchmarks relating to the proposal
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices and/or technology
- use *communication* skills to present and argue a case and prepare reports in language, style and format appropriate to the audience
- use technology to analyse, prepare and present a range of data

Required knowledge

Knowledge of:

- variable and fixed costs relating to the operations of the department/cost centre/enterprise
- *sources of information* in the enterprise (e.g. specialist personnel, information systems, documentation)

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's requirements
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- debriefs
- workplace project
- workplace referee or third-party report of performance over time.

MTMPSR403C Facilitate achievement of enterprise environmental policies and goals

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to facilitate the achievement of the enterprise's environmental goals. It includes developing workforce understanding of and commitment to environmental responsibility and sustainability and the monitoring and minimisation of environmental impact and waste.
------------------------	--

Application of the Unit

Application of the unit	Management of environmental impact is a high priority for the meat processing industry. All members of the industry have responsibility for environmental management and sustainability. This unit is particularly useful for first line managers including supervisors and team leaders in all sectors of the meat industry.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Clarify enterprise policies and responsibilities for minimising <i>environmental impact</i></p>	<p>1.1. Relevant <i>company documents</i>, policies and legal obligations are located and requirements for enterprise operations are clarified.</p> <p>1.2. Responsibilities for minimising environmental impact are explained to individuals and teams.</p> <p>1.3. Individual and team commitment to enterprise environmental management strategy is developed.</p>
<p>2. Implement environment management procedures</p>	<p>2.1. Work practices are planned with colleagues to ensure compliance with workplace and legislative environmental management requirements.</p> <p>2.2. Work practices are implemented in accordance with requirements specified in legislation and standards for environment protection.</p> <p>2.3. Coaching and mentoring supports colleagues in managing their responsibilities for environmental protection.</p>
<p>3. Monitor, adjust and report performance</p>	<p>3.1. Environmental impacts including pollutants, emissions and waste are measured according to enterprise procedures and regulatory requirements.</p> <p>3.2. Actual and potential problems are identified, rectified and reported promptly and decisively to ensure environmental safety.</p> <p>3.3. Environmental hazards are managed so that risks are minimised.</p> <p>3.4. Waste recycling, reduction and disposal is carried out within legislative and enterprise requirements.</p> <p>3.5. Recommendations to improve environmental and waste procedures and controls are submitted to designated persons and groups.</p> <p>3.6. Individuals and teams are informed of the results of environmental improvements in the workplace.</p> <p>3.7. Systems, records and reporting procedures are maintained according to legislative requirements.</p>
<p>4. Investigate and report environmental non-conformance</p>	<p>4.1. Non-conformance is investigated and dealt with according to legislative requirements.</p> <p>4.2. Coaching and mentoring supports colleagues to acquire and apply competencies to meet legislative requirements and the associated standards.</p> <p>4.3. Workplace environmental and waste minimisation practices are implemented, reviewed and improved to</p>

ELEMENT	PERFORMANCE CRITERIA
	ensure that non-conformance is not repeated.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- adjust and improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- consult with *stakeholders*, individuals and teams in the development and review of environmental procedures
- maintain currency of knowledge through independent research or professional development
- develop, in conjunction with managers, environmental targets for the section/department
- demonstrate consultation, negotiation and mentoring skills in interactions with employees, managers, peers and technical experts
- determine and take corrective actions to eliminate or minimise environmental risks
- ensure that procedures are followed by all employees in the area of responsibility
- explain environmental management requirements, procedures and responsibilities clearly to individuals and teams, in appropriate styles, formats and language
- identify and apply relevant *communication* and *mathematical skills*
- identify environmental hazards and conduct risk analyses
- interpret monitoring information and take corrective action
- apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- investigate, analyse and report environmental incidents, using enterprise procedures
- measure and monitor pollutants, emission and waste levels for the area of responsibility
- prepare reports containing technical and mathematical information for employees, managers and peers
- recognise limits of own expertise and indicate when additional expertise is required
- utilise informal and formal consultative strategies to build individual and team commitment to goals and procedures

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- company *goals, targets and performance measures*
- enterprise environmental management policies and legal obligations and responsibilities

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment conditions require demonstration of sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • real work environment • relevant documentation such as: <ul style="list-style-type: none"> • workplace policies and procedures • regulatory requirements • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • assignments • workplace project • workplace referee or third-party report or performance over time. <p>Assessment practices should take into account any</p>

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Typically <i>environmental impacts</i> will include the production of pollutants, emissions and waste such as:</p>	<ul style="list-style-type: none"> • animal products (e.g. blood, fat and manure) • consumption of non-renewable resources • contaminated and polluted water • greenhouse gases, either directly or indirectly • noise • packaging • vapours, odours.
<p><i>Company documents</i> may include:</p>	<ul style="list-style-type: none"> • environmental licences • environmental performance monitoring data, including sampling data • status reports, plans and projections, technical manuals, industry journals, audit reports, incident reports, complaints registers and investigations • work site environmental incident/accident reporting and investigation procedure.
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • company owners, directors, shareholders, financiers • environmental experts • management and employees

RANGE STATEMENT	
	<ul style="list-style-type: none"> • suppliers, customers, consumers • unions and employer associations.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve listening and understanding • involve interpreting the needs of internal or external customers • involve preparations of explanations and reports in language styles suitable for the audience and include everyday workplace language, technical and mathematical language • require the use of negotiation, persuasion and assertiveness skills • involve the use of technology.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • calculation of metric volumes, weights, mass, temperature, ratios, percentages, heat transfer and load shifting, and relate to sound or noise, liquid and solid materials and waste.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a learning culture in the enterprise	1.1. Personal performance demonstrates a commitment to, and the value of, learning. 1.2. Learning and training strategies are included as an integral part of work and performance plans. 1.3. Learning and training strategies and plans reflect the diversity of needs and opportunities. 1.4. Resource proposals to support workplace learning are prepared and recommended. 1.5. Consultation and negotiation with training and development professionals results in the planning and provision of learning, which enhances individual, team and organisational performance.
2. Create learning opportunities to develop individual, team and organisational performance	2.1. Workplace environments and contexts which facilitate learning are developed and supported. 2.2. External and internal opportunities for learning are identified and promoted. 2.3. Learning plans are developed collaboratively to meet individual, team and organisational goals. 2.4. Individual and/or team access to, and participation in, learning opportunities is facilitated. 2.5. Individual and or team learning and training is planned and provided in consultation with learners and training specialists where appropriate.
3. Facilitate and promote learning	3.1. Workplace activities are used as opportunities for learning. 3.2. Personnel are encouraged to take advantage of learning opportunities. 3.3. Coaching and mentoring contributes effectively to the development of workplace knowledge, skills and attitudes. 3.4. Benefits of learning are shared with others in the team and organisation. 3.5. Opportunities are provided for learners to continue to utilise and extend new skills and knowledge. 3.6. Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards.
4. Monitor and improve learning effectiveness	4.1. Individual and or team performance is monitored to determine the type and extent of additional work-based support required. 4.2. Feedback from individuals and or teams is used to

ELEMENT	PERFORMANCE CRITERIA
	<p>make improvements in future learning arrangements.</p> <p>4.3. Effectiveness and efficiency of learning and training programs is monitored and recommendations for improvement are prepared.</p> <p>4.4. Adjustments to learning plans and activities negotiated with training and development personnel result in improvements in the efficiency and effectiveness of learning.</p> <p>4.5. Learning plans, records and reports of competency are documented and maintained within the organisation's systems and procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- **communicate** openly and sensitively when negotiating learning opportunities and plans
- define the workplace learning opportunities within own capacity to provide, and within the capacity of the enterprise
- develop and review learning plans, linked with individual and or team goals and enterprise needs, in consultation with individuals or teams
- develop simple **targets, goals and performance measures** for measuring outcomes of learning and training
- estimate resources required to support informal and formal learning and training within the department or enterprise (e.g. personnel, time, cost)
- facilitate and monitor the implementation of training and assessment schedules (e.g. negotiate time release)
- maintain currency of knowledge through independent research or professional development
- apply relevant communication and **mathematical skills**
- identify and apply relevant **Occupational Health and Safety (OH&S), regulatory and workplace requirements**
- identify and support internal coaches and mentors
- identify learning opportunities and strategies which meet the cultural, working and learning experiences and styles of individuals and team

REQUIRED SKILLS AND KNOWLEDGE

- identify learning opportunities to support individual and team learning plans
- identify the areas requiring the *training services provided by training professionals*
- map learning and training strategies against individual, team and enterprise goals or priorities
- negotiate training strategies and schedules with enterprise trainers and assessors and other training and development professionals, to meet enterprise needs
- promote and report the impact of training on the operation of the department or enterprise
- promote the sharing of skills and knowledge as a strategy for achieving personal and enterprise goals
- provide coaching and mentoring to individuals and teams
- recognise the achievements of individuals promptly and appropriately, within enterprise requirements
- resource and encourage enterprise trainers and assessors (e.g. ensure necessary equipment and materials are available) to provide and follow up training and assessment
- review learning plans, opportunities, strategies and outcomes with individuals or team
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology

Required knowledge

Knowledge of:

- enterprise and employee obligations under industrial and training agreements relating to the provision of (workplace) training
- requirements and ethical considerations for the supervision of employees operating under *formal training agreements and contracts* (e.g. trainees and apprentices)
- impact and outcomes of workplace learning on the competitive advantage of the enterprise
- range of internal and external learning opportunities available to enterprise personnel

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
 - workplace policies and procedures
 - regulatory requirements
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- debriefs
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather and present information and ideas to do the job	<p>1.1. Information from appropriate sources is utilised to fulfil workplace responsibilities and to develop and refine alternative processes and solutions.</p> <p>1.2. Communication methods take into account the purpose and the audience, including social and cultural diversity.</p> <p>1.3. Communication strategies are used to keep people informed and up-to-date on enterprise or department directions and activities.</p> <p>1.4. Clear and unambiguous guidance and direction is provided to others, consistent with workplace responsibilities.</p> <p>1.5. Input from internal and external sources is sought and valued in developing and refining new ideas and approaches.</p>
2. Develop trust and confidence	<p>2.1. People are treated with integrity, respect and empathy.</p> <p>2.2. Enterprise's social, ethical and business standards are used to develop and maintain positive relationships.</p> <p>2.3. Trust and confidence of colleagues, customers and suppliers is gained and maintained through competent performance.</p> <p>2.4. Interpersonal styles and methods are adjusted to the social and cultural environment.</p>
3. Build and maintain networks and relationships	<p>3.1. Networking is used to identify and build relationships.</p> <p>3.2. Identifiable benefits for the team and organisation are provided through networks and other work relationships with stakeholders.</p>
4. Manage difficulties to achieve positive outcomes	<p>4.1. Problems are identified and analysed and action is taken to rectify the situation with minimal disruption to performance.</p> <p>4.2. Colleagues receive guidance and support to resolve their work difficulties.</p> <p>4.3. Pro-active strategies are used to manage individual's performance, within the organisation's processes.</p> <p>4.4. Conflict is managed constructively within the organisation's processes.</p> <p>4.5. Difficult situations are negotiated to achieve results</p>

ELEMENT	PERFORMANCE CRITERIA
	acceptable to participants, and which meet organisation and legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- accept and provide constructive feedback
- contribute to and support meetings (e.g. team, department and maintenance).
- cooperate with other supervisors and managers
- maintain currency of knowledge through independent research or professional development
- demonstrate problem-solving and negotiation skills in a range of circumstances
- develop and implement consultative and participative approaches within own work responsibilities
- encourage and respond to individual and team contributions
- gather and analyse alternative viewpoints, ideas and information to develop processes and strategies
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- introduce strategies for improving workplace relationships (e.g. coaching and mentoring)
- locate and evaluate information from a range of sources, using a range of available resources
- mentor and counsel individuals and teams, within enterprise procedures
- model positive and effective communication and interaction strategies in the performance of responsibilities
- monitor and diffuse potential conflicts and disputes, applying a range of strategies
- observe and respect enterprise confidentiality requirements and individual's privacy requests
- provide direction, instruction and guidance in ways that encourage cooperation
- recognise and discuss alternative suggestions, viewpoints and proposals
- resolve differences between employees, within enterprise processes
- review own actions and attitudes and describe their impact on others in the work environment

REQUIRED SKILLS AND KNOWLEDGE

- seek feedback from colleagues and networks on own ideas and performance
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use available information and communications technology to facilitate two-way communication and understanding
- use enterprise's established procedures to handle grievances and complaints
- work collaboratively with individuals in planning, reviewing and improving performance

Required knowledge

Knowledge of:

- impact of the enterprise's social, ethical and business standards on workplace relationships
- factors which influence workplace relationships (e.g. cultural and social characteristics, past experience and industrial approaches)
- networks and other sources of information which could assist in the development of workplace relationships and build own knowledge and expertise
- strategies for building networks

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
 - workplace policies and procedures

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to manage a food safety plan.
------------------------	--

Application of the Unit

Application of the unit	Food safety is critical to public health and safety and the successful operation of meat industry businesses. This unit is suitable for managers in meat retail establishments, and supervisors and team leaders in smallgoods, meat processing and food services establishments, for maintaining the food safety plan or system in a designated work area.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage the implementation of the <i>food safety plan</i>	1.1. Food safety principles, food safety procedures and requirements, including regulatory requirements, are explained to the <i>team</i> . 1.2. Team commitment to, and responsibility for, food safety is developed. 1.3. Procedures to support the food safety plan are put in place. 1.4. Training and mentoring is provided to the team to assist implementation.
2. Monitor the food safety plan and take corrective action	2.1. Team implementation of the food safety plan is monitored. 2.2. <i>Records</i> and <i>reports</i> are completed accurately and on schedule. 2.3. Prompt action is taken to correct non-conformance according to enterprise and <i>regulatory requirements</i> . 2.4. Causes of non-conformance are identified and analysed. 2.5. Control measures are implemented to prevent future non-conformance. 2.6. Non-conformance is reported according to enterprise requirements.
3. Maintain the food safety plan	3.1. Feedback is sought from all personnel to identify potential hazards, corrective actions and controls. 3.2. Processes or conditions which could result in breaches of food safety procedures are identified and preventive or corrective action is taken. 3.3. Corrective action and control procedures are updated to improve food safety. 3.4. Documentation is completed according to enterprise and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- collect, monitor and interpret data to identify trends and non-conformance
- **communicate** with a range of stakeholders, including customers, to convey food safety requirements and programs
- demonstrate current technical and process knowledge for the control of hazards and improvement of the food safety system
- demonstrate enterprise monitoring procedures (including sampling, testing and required records and documents) and explain their purpose
- determine and take corrective action
- identify and apply relevant **Occupational Health and Safety (OH&S)**, regulatory and **workplace requirements**
- identify and review operations and practices for food safety improvement
- identify enterprise **Standard Operating Procedures (SOPs)** and explain their role in the food safety system
- lead personnel/team in investigation of food safety incidents and potential incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures as required
- review communication systems (spoken and written) to minimise the potential for mis-reporting and misunderstanding of food safety requirements, procedures and plans
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- use a range of communication and team building strategies to gain team commitment to food safety
- use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling, display, to monitor food safety
- utilise problem-solving strategies required in investigating non-conformance and reviewing the food safety system

Required knowledge

- enterprise recall and traceability procedures
- food safety requirements to the team
- food safety risk assessment procedures
- Hazard Analysis Critical Control Point (HACCP) principles and the process for developing a food safety plan
- regulatory requirements that apply to the enterprise's food safety plan

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • real work environment • relevant documentation such as: <ul style="list-style-type: none"> • food safety plan and/or HACCP plan • regulatory requirements • workplace policies and procedures • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • assignment or simulation • workplace project • workplace referee or third-party report on performance.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Food safety plans</i> will be:	<ul style="list-style-type: none"> based on HACCP principles in standard formats and meet mandatory requirements
<i>Teams</i> may be:	<ul style="list-style-type: none"> a department or small business a food safety or HACCP team all personnel in work area two or more people.
<i>Record</i> -keeping systems may be:	<ul style="list-style-type: none"> electronic and/or manual.
<i>Reports</i> may be:	<ul style="list-style-type: none"> complex, contain technical, mathematical and graphic information and be presented in standard formats according to enterprise and legal requirements.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> animal welfare commercial law including fair trading, trade practices consumer law corporate law, including registration, licensing, financial reporting

RANGE STATEMENT	
	<ul style="list-style-type: none"> • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • relevant Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve communication and information technologies • involve presentation of explanations and reports in language styles suitable for the audience and include everyday workplace language, technical and mathematical language • involve reading and interpreting workplace-related documentation • require negotiation, persuasion and assertiveness skills.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans • OH&S requirements • Quality Assurance (QA) requirements • SOPs • the ability to perform the task to production requirements • work instructions.
<i>Standard Operating Procedures</i> may relate to:	<ul style="list-style-type: none"> • personal hygiene • food preparation and processing • pest control • waste disposal • cleaning • maintenance of premises • product recall • customer complaints • calibration.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish livestock production and transport requirements	1.1. Production techniques impacting meat quality are explained for the range of <i>species</i> involved. 1.2. Role and purpose of traceability requirements are explained. 1.3. Purchasing process and selling alternatives for livestock are explained. 1.4. Relationship between transport arrangements and meat quality are explained. 1.5. Potential product quality, animal welfare and food safety hazards from transporting livestock are identified.
2. Identify the sequence of operations for meat processing in an abattoir	2.1. Critical elements of the slaughtering process are identified. 2.2. Critical elements of the boning process are identified. 2.3. Role and purpose of rendering are explained. 2.4. Offal processing requirements are explained. 2.5. Differences between export and domestic requirements are identified.
3. Explain factors affecting food safety and meat quality during processing	3.1. Key meat safety issues are described. 3.2. Key legislation and regulations affecting meat processing are identified. 3.3. Impacts of seasonal and geographical factors on meat quality are explained. 3.4. The nature and purpose of the Meat Standards Australia (MSA) program are described. 3.5. Impacts of further processing on meat quality are explained. 3.6. Factors affecting shelf life and meat quality are explained. 3.7. The nature and purpose of a meat testing program are explained.
4. Identify processes and process controls for a range of meat smallgoods	4.1. Differences between product sources are identified. 4.2. Key smallgoods products and production processes are identified. 4.3. Food safety requirements impacting smallgoods production are explained.
5. Define the structure and nature of meat	5.1. Differences between supermarket, independent and wholesale butchers are identified.

ELEMENT	PERFORMANCE CRITERIA
retailing in Australia	<p>5.2. <i>Regulatory requirements</i> directly impacting meat retailing are explained.</p> <p>5.3. Key meat product lines and the role of value-adding are identified.</p> <p>5.4. The impact of <i>customer requirements and expectations</i> are explained.</p> <p>5.5. Food safety requirements impacting retail operations are explained.</p>
6. Identify key issues and bodies that impact the Australian meat industry	<p>6.1. Impacts of climatic factors on the meat industry are explained.</p> <p>6.2. <i>Key issues impacting meat industry employment</i> are explained.</p> <p>6.3. <i>Environmental impacts of a meat processing site</i> are reviewed.</p> <p>6.4. Impacts of <i>changing customer expectations</i> are explained.</p> <p>6.5. The role of <i>key industry bodies</i> is described.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse and interpret work instructions, Standard Operating Procedures (SOPs), safety and hygiene procedures, and other workplace documentation
- identify livestock
- locate, and interpret industry information
- distinguish between meat products and the processes to produce them
- identify personal hygiene and operational sanitation procedures
- identify and Occupational Health and Safety (OH&S) risks
- apply sustainable work practices

Required knowledge

Knowledge of:

- factors which impact on meat safety and quality through the supply chain

REQUIRED SKILLS AND KNOWLEDGE

- the main animal welfare issues associated with the production and processing animals for human consumption
- main markets for meat
- common causes and impact of contamination
- relationship between food safety and market access
- nature and structure of the Australian meat processing industry
- principles of Quality Assurance (QA) and traceability from paddock to retailer
- slaughtering and boning processes
- nature and purpose of the AUS-MEAT and MSA programs
- customer requirements
- value-adding of meat products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Critical aspects of assessment must include the following:

- describe the livestock production and marketing, and retailing systems for the meat industry
- document the sequence of operations for livestock slaughter and meat processing
- define processes for a range of meat smallgoods
- describe production factors influencing meat quality and safety
- comply with industry requirements for hygiene, OH&S and other work practices.

Context of and specific resources for assessment

Assessment of performance requirements in this unit should be undertaken within the context of food technology in the meat processing industry.

Assessment must occur in a real or simulated workplace where the candidate has access to:

- production process and related equipment,

EVIDENCE GUIDE	
	<p>manufacturers' advice and operating procedures</p> <ul style="list-style-type: none"> • equipment and facilities for carrying out slaughtering of livestock and processing of primary cuts of meat.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • direct or third-party evidence of compliance with enterprise procedures for hygiene and OHS • a process chart developed and explanation of the sequence of operations for meat processing in an abattoir. <p>Evidence should be gathered over a period of time in a range of actual or simulated environments.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	<p>A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Production techniques</i> may include:</p>	<ul style="list-style-type: none"> • location • flock/herd size • feedlots or paddock raised • organic

RANGE STATEMENT	
	<ul style="list-style-type: none"> • research trials.
<i>Species</i> to be slaughtered may include:	<ul style="list-style-type: none"> • cattle • sheep • goats • pigs • horses • ratites • crocodiles.
<i>Traceability requirements</i> may include:	<ul style="list-style-type: none"> • National Livestock Identification Scheme (NLIS) • ear and tail tags • state-based requirements • PigPass • disease notification • customer requirements, such as Country of Origin Labelling (COOL).
<i>Purchasing process and selling alternatives</i> may include:	<ul style="list-style-type: none"> • contractual requirements • 'over the hook' • live purchasing in paddock or saleyards • computer selling • major customers (e.g. Woolworths, Tesco, McDonalds) paddock-plate purchasing systems.
<i>Critical elements of the slaughtering process</i> will include:	<ul style="list-style-type: none"> • animal welfare and handling requirements • quality determinants (e.g. stress) • carcass description • food safety and testing regimes • stunning and slaughtering procedures • hide removal • evisceration • time and temperature requirements for carcass chilling and freezing.
<i>Critical elements of the boning process</i> will include:	<ul style="list-style-type: none"> • cut descriptions • integrated/independents boning rooms • customer specifications

RANGE STATEMENT	
	<ul style="list-style-type: none"> • packaging • refrigeration and freezing requirements • transport arrangements • traceability • micro testing • hygiene and sanitation • physical and micro contamination.
<i>Export and domestic requirements</i> will include	<ul style="list-style-type: none"> • Approved Arrangements • livestock traceability • micro testing • product traceability and recall arrangements • regulatory and standards frameworks • roles and requirements of Australian Quarantine Inspection Service AQIS and State Meat Authorities • Meat Hygiene Assessment (MHA) • Refrigeration Index • MSA • food safety testing regimes • animal welfare • social accountability • food safety • market access • cuts and specifications • religious requirements • kill method • processing and packing procedures • types of packaging • environmental impacts of meat production and processing.
<i>Key legislation and regulations</i> may include:	<ul style="list-style-type: none"> • Australian Standards • Export Act • Approved Arrangements • State-based legislation • Codes of Practice (e.g. Animal Welfare) • OH&S legislation.
<i>Meat testing programs</i> may include:	<ul style="list-style-type: none"> • microbiological testing • residue testing • species testing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • temperature logging • Critical Control Points (CCPs) • role of AQIS and National Association of Testing Authorities (NATA) in laboratory accreditation.
<i>Product sources</i> for smallgoods production may include:	<ul style="list-style-type: none"> • imported product • Australian product • different species (e.g. cattle, sheep, goats and pigs) • product additives and mixes (e.g. emulsions, spices and nitrites/nitrates).
<i>Smallgoods products and production processes</i> will include:	<ul style="list-style-type: none"> • smoked product • cooked product • Uncooked Comminuted Fermented Meat UCFM • dried meats • factory-type production techniques • independent retailer production techniques • regulatory requirements • processing equipment.
<i>Food safety requirements impacting smallgoods production</i> will include:	<ul style="list-style-type: none"> • UCFM • thawing processes • uncooked/cooked product handling requirements • blending/batching processes • packaging requirements • product storage and transport requirements.
<i>Regulatory requirements impacting meat retailing</i> will include:	<ul style="list-style-type: none"> • role of State and Council authorities • environmental requirements • legislation, regulations and Codes of Practice • OH&S, Equal Employment Opportunity (EEO) legislation • Modern Awards • Food Standards Code.
<i>Customer requirements and expectations</i> affecting meat retailing may include:	<ul style="list-style-type: none"> • species and cuts • packaging • value-adding • religious • dietary and allergen requirements.

RANGE STATEMENT	
<i>Key issues impacting meat industry employment may include:</i>	<ul style="list-style-type: none"> • labour supply and market characteristics • meat industry career structures • role and nature of training • role of overseas workers • seasonal and market factors • national policies and regulations.
<i>Environmental impacts of a meat processing site may include:</i>	<ul style="list-style-type: none"> • water use • waste water • emissions • power sources and consumption.
<i>Changing customer expectations may include:</i>	<ul style="list-style-type: none"> • animal welfare and handling • organic production • social accountability • ethical production • traceability.
<i>Key industry bodies will include</i>	<ul style="list-style-type: none"> • state and federal regulators • peak industry bodies (e.g. MLA, AMIC and AMPC) • unions covering the industry (e.g. (Australian Meat industry Employees Union AMIEU)) • AUS-MEAT • Standards determining bodies: <ul style="list-style-type: none"> • International Organization for Standardization (ISO) • Joint Accreditation System of Australia and New Zealand (JAS ANZ) • Food Standard Australia New Zealand (FSANZ).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a beef carcass	1.1. Directions on a carcass are described using the anatomical direction format. 1.2. Bones relevant to meat <i>specifications</i> in a beef skeleton are located and identified. 1.3. Major <i>muscles</i> relevant to meat specifications are identified. 1.4. Major glands and cartilage relevant to meat specifications are identified.
2. Identify and name meat products using the standard product description	2.1. Nature and format of product specifications are identified. 2.2. Standardised cut descriptions are used and correctly spelt to name meat products. 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the correct anatomical features to describe the cutting lines. 2.5. What must be altered from any given meat product for it to comply with the company product specification is identified.
3. Check <i>beef product</i> complies with written specifications	3.1. Beef product compliance with written specifications is checked and principles of Quality Assurance (QA) are described. 3.2. Sections of the workplace QA system related to ensuring beef product compliance are described to AUS-MEAT product description requirements. 3.3. Non-conforming product is defined and described in relation to workplace requirements. 3.4. Critical Control Points (CCPs) are identified and monitored in accordance with <i>workplace requirements</i> .
4. Assess product compliance	4.1. Product compliance with written specifications is assessed in accordance with workplace and AUS-MEAT product description requirements. 4.2. Product description given in written specifications is identified and explained. 4.3. Corrective action is taken in the event of non-conformance to beef product specifications.
5. <i>Measure and check</i> product compliance	5.1. Cutting lines and muscle content is checked in accordance with written specifications.

ELEMENT	PERFORMANCE CRITERIA
against written specifications	5.2. Non-conforming product that can be made to comply with the specification is identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as a team member
- identify and apply relevant *Occupational Health and Safety OH&S requirements*
- identify and apply relevant workplace and *regulatory requirements*
- identify and explain AUS-MEAT language specifications on beef product label
- identify non-conforming product in accordance with specifications
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- corrective action procedures for non-conforming product
- product specification points

Evidence Guide

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:

- approval system
- AUS-MEAT
- communication
- measurement
- technical accuracy.

Muscles may include cuts from:

- forequarter (major)
- hindquarter (major).

Beef product may include:

- muscle content
- points of specification
- product compliance
- product name.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Measurement and checking may include:

- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming products
- sample size

RANGE STATEMENT	
	<ul style="list-style-type: none"> taking measurements.

MTMPSR409A Specify sheep product using AUS-MEAT language

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	<p>This unit covers the skills and knowledge required to use AUS-MEAT language in defining sheep specifications. This unit may also be used to specify goat product. Satisfactory completion of assessment conducted by AUS-MEAT is required before an individual can gain AUS-MEAT accreditation for Sheepmeat Boning Room Standards Officers. People who have satisfactorily completed AUS-MEAT Accreditation for Sheepmeat Boning Room Standards Officers will have satisfied the requirements for this unit of competency.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit prepares the workers to work with sheep cuts, specifications and cutting lines.</p> <p>Participants will be directly involved in demonstration and explanation of:</p> <ul style="list-style-type: none"> • achieving maximum yields and returns • basic anatomy • cutting lines • detecting and recording defects • product description • specifications and verification.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a sheep carcase	1.1. Directions on a carcase are described using the anatomical direction format. 1.2. Bones relevant to meat <i>specifications</i> in a sheep skeleton are located and identified 1.3. Major <i>muscles</i> relevant to meat specifications are identified. 1.4. Major glands and cartilage relevant to meat specifications are identified.
2. Identify and name meat products using the standard product description	2.1. Nature and format of product specifications are identified. 2.2. Standardised cut descriptions are used and correctly spelt to name meat products 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the correct anatomical features to describe the cutting lines. 2.5. What must be altered from any given meat product for it to comply with the company product specification is identified.
3. Check <i>sheep product</i> complies with written specifications	3.1. Sheep product compliance with written specifications is checked and principles of Quality Assurance (QA) are described. 3.2. Sections of the workplace quality assurance system related to ensuring sheep product compliance are described to AUS-MEAT product description. 3.3. Non-conforming product is defined and described in relation to <i>workplace requirements</i> . 3.4. Critical Control Points (CCPs) are identified and monitored in accordance with workplace requirements.
4. Assess product compliance	4.1. Product compliance with written specifications is assessed in accordance with workplace and AUS-MEAT product description requirements. 4.2. Product description given in written specifications is identified and explained. 4.3. Corrective action is taken in the event of non-conformance to sheep product specifications.
5. <i>Measure and check</i> product compliance	5.1. Cutting lines and muscle content is checked in accordance with written specifications.

ELEMENT	PERFORMANCE CRITERIA
against written specifications	5.2. Non-conforming product that can be made to comply with the specification is identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as a team member
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- identify and apply relevant workplace and *regulatory requirements*
- identify and explain AUS-MEAT language specifications on sheepmeat product label
- identify non-conforming product in accordance with specifications
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- corrective action procedures for non-conforming product
- product specification points

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated over time and under normal enterprise or production conditions.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal enterprise or production conditions.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • completion of standard AUS-MEAT assessment • workplace demonstration • quiz of underpinning knowledge • workplace referee report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:

- approval system
- AUS-MEAT
- communication
- measurement
- technical accuracy.

Muscles may include cuts from:

- forequarter (major)
- hindquarter (major).

Sheep product may include:

- muscle content
- points of specification
- product compliance
- product name.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Measurement and checking may include:

- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming products
- sample size

RANGE STATEMENT	
	<ul style="list-style-type: none"> taking measurements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Engage in complex verbal communication	1.1. Group processes are facilitated and monitored to support group objectives. 1.2. One-to-one interaction with team members is provided to achieve effective support. 1.3. Work instructions are explained to others. 1.4. Work requirements and expectations are negotiated with others. 1.5. Negotiation skills are used as appropriate. 1.6. Conflict resolution techniques are used as appropriate. 1.7. Problem-solving and decision making techniques are used as appropriate.
2. Read complex text	2.1. Written information is read, analysed and used to assist in overseeing workplace performance. 2.2. Technical information from written source is used to examine and introduce new procedures and approaches to improve workplace performance.
3. Prepare written information for a range of audiences and applications	3.1. Routine and specialist reports are consolidated and summarised to convey key points. 3.2. Procedures and instructions related to existing and new functions and tasks are written for others to follow and implement.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • analyse written information from a variety of sources to assist with decision-making process • convey information, which may be complex or technical or involve a change to a familiar process, to people who may not have a technical background • convey workplace information, such as work instructions, in a way that facilitates learning by others

REQUIRED SKILLS AND KNOWLEDGE

- demonstrate conflict-resolution techniques
- demonstrate participative problem-solving techniques to resolve workplace problems
- demonstrate techniques to check that information has been understood
- explain and demonstrate *communication* styles relevant to conveying information to employees from a range of social, cultural and ethnic backgrounds
- identify and observe *Occupational Health and Safety (OH&S) requirements* where applicable
- identify and observe *regulatory* and *workplace requirements* where relevant
- locate and extract relevant information from technical documentation
- prepare reports in a range of formats and language styles suitable for the audience
- resolve or progress issues in complex and/or hostile environments
- select and organise relevant routine information to:
 - clarify or explain issues or problems
 - offer suggestions for improvement
 - provide opinions
- use facilitation skills to ensure participation from all group members
- utilise available information and communications *technology* to facilitate communication

Required knowledge

Knowledge of:

- purpose of feedback and forms of feedback suitable for the workplace
- purpose of reports and other documentation used in the work area
- roles and expectations of customers, suppliers and participants in the work process

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency needs to be demonstrated while exercising suitable levels of authority in the workplace.

Context of and specific resources for assessment

Assessment must include demonstration of competency in the workplace under normal working conditions.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in decision about disposition	1.1. Decision is made in relation to whether product is recalled according to workplace and product specifications.
2. Simulate a product recall	<p>2.1. Criteria for a product recall are identified according to product specifications and <i>workplace requirements</i>.</p> <p>2.2. Product to be recalled is identified and traced according to product specifications and workplace requirements.</p> <p>2.3. Individuals or groups involved in a product recall are identified and their role described.</p> <p>2.4. Steps in recall are identified and described.</p> <p>2.5. Product development is reviewed in consultation with those responsible.</p> <p>2.6. Manufacturing methods and quality control methods are reviewed to prevent problems re-occurring.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- complete records of simulated product recall exercise and review for improvements to the recall procedure
- use communications technology such as computers and telephones to facilitate product recall
- identify and implement the procedure for a product recall
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- identify records of product identification and traceability and use them for trace forward
- use relevant *communication skills*

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- steps involved in implementing a product recall
- reasons and procedures for initiating a product recall

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when utilising a documented product recall procedure and realistic data.

Context of and specific resources for assessment

Assessment can be based on participation in a comprehensive simulation.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Involve management and staff in developing the quality system</p>	<p>1.1. Relevant staff members and management are involved to clarify the purpose and scope of the program.</p> <p>1.2. Enterprise needs and expectations are clearly defined.</p> <p>1.3. Other systems, such as AUS-MEAT, Occupational Health and Safety (OH&S) and meat inspection are incorporated into the system as appropriate to the workplace needs.</p>
<p>2. Establish the scope of the system</p>	<p>2.1. Scope of the HACCP-based quality system is defined to encompass food safety, quality, regulatory compliance, animal welfare and preventative maintenance.</p> <p>2.2. System is directed to prevent and control food safety hazards and any other hazards such as <i>product</i> quality and OH&S hazards.</p> <p>2.3. Agreement is sought from relevant areas of the workplace on the coverage and scope of the system.</p>
<p>3. Conduct hazard analysis and assessment</p>	<p>3.1. Every step in the production process is assessed for potential food safety hazards.</p> <p>3.2. Critical Control Points (CCPs) are established to identify where each significant hazard can be prevented or controlled.</p> <p>3.3. Critical limits are established for each CCP.</p> <p>3.4. A measurable or recognisable standard is assigned for each CCP to define the critical limits.</p> <p>3.5. Critical limits are technically and scientifically validated.</p>
<p>4. Ensure all documents, work procedures and processes required for the system are developed, available and in use</p>	<p>4.1. All products and processes covered by the HACCP-based quality system are described in a standardised format defining product characteristics relevant to food safety.</p> <p>4.2. Work instructions and Standard Operating Procedures (SOPs) are reviewed for accuracy, relevance and sufficiency to prevent potential hazards.</p> <p>4.3. Documented procedures for monitoring CCPs are implemented.</p> <p>4.4. Documented procedures which ensure any CCPs which are out of control are brought back into control, and affected product is suitably handled, are</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>implemented.</p> <p>4.5. Documented procedures are implemented to ensure the whole HACCP system is regularly audited and verified as working effectively.</p> <p>4.6. All documents and records required for the system are available, up-to-date and in use.</p>
<p>5. Audit, verify and validate the system</p>	<p>5.1. HACCP plans are routinely revised, verified and validated to reassess hazards, CCPs, critical limits, microbiological and other testing methods and all related procedures of the HACCP system to ensure they are still appropriate to the plant's operations and products.</p> <p>5.2. Follow up on audit findings is taken and recorded.</p> <p>5.3. HACCP system is reviewed to take account of any process or product changes.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- conduct monitoring of a CCP
- use communications technology such as computers, as relevant to the task
- develop and implement changes in a HACCP-based QA system
- identify and apply relevant *OH&S*, *regulatory* and *workplace requirements*
- record and analyse monitoring and verification data
- use relevant *communication* skills
- validate CCPs and critical limits

Required knowledge

Knowledge of:

- objectives of a HACCP-based QA system
- process for validating critical limits and CCPs
- role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program

REQUIRED SKILLS AND KNOWLEDGE

- | |
|---|
| <ul style="list-style-type: none">• process of auditing and verifying a HACCP-based QA system• steps in the development of a HACCP-based QA system• steps in the systematic introduction of a HACCP-based QA system• documentation required to support a HACCP-based QA system |
|---|

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated in the workplace utilising an existing approved HACCP plan.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must involve working with actual realistic data and in the context of a HACCP plan that meets regulatory requirements.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment are:</p> <ul style="list-style-type: none"> • assignment • debrief • quiz of underpinning knowledge • simulation • verified work log or diary • workplace demonstration of competency for the assessor • workplace project • workplace referee or third party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Product</i> may include:	<ul style="list-style-type: none"> • carcase • carton meat • offal • pet meat • rendered product.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective hand and arm coverings • protective head and hair coverings • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards, codes of practice etc.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> • Export Control Act • importing country requirements • relevant Australian Standards • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • federal, state and territory regulations regarding meat processing.
<i>Workplace requirements</i> will include:	<ul style="list-style-type: none"> • approved arrangements • enterprise-specific requirements • OH&S requirements • QA requirements • SOPs • work instructions.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • being appropriately assertive • empathising • establishing/using networks • interpreting the needs of internal/external customers • listening and understanding • negotiating responsively • persuading effectively • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups • writing to audience needs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish and implement a valid <i>sampling plan</i>	1.1. Sampling tables from AS 1199.1-2003 and AS 1199.0-2003 are recognised and used. 1.2. Items and purpose of sampling are determined. 1.3. Acceptable quality levels are determined in accordance with relevant Australian Standards. 1.4. Sampling plans are determined. 1.5. <i>Sampling</i> is conducted according to <i>workplace requirements</i> . 1.6. Test results are recorded and monitored. 1.7. Test results are interpreted and <i>reported</i> to relevant personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • establish a sampling plan according to relevant Australian Standards • demonstrate aseptic sampling techniques (for micro-sample or swabs) • apply <i>mathematical</i> skills to a level required to undertake accurate sampling • work effectively as an individual and as part of a team • identify and apply relevant <i>Occupational Health and Safety (OH&S)</i>, <i>regulatory</i> and workplace requirements • record sampling information accurately to meet workplace and regulatory requirements • report test results promptly to relevant personnel • take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology • use relevant <i>communication skills</i> • utilise available workplace technology to establish, record and monitor sampling program data
Required knowledge
Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- routine tests performed on meat or meat products in the plant
- preparation and analysis of specimens or samples
- requirements of relevant Australian Standards

Evidence Guide

EVIDENCE GUIDE

MTMPSR5601C Design and manage the food safety system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to design and manage food safety programs for a meat industry enterprise including meat processing, smallgoods, retail and food services operations. The unit also covers skills and knowledge for working with customers and consumers on food safety issues.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit is appropriate for all managers in a food safety and/or Quality Assurance (QA) role, and for those working in production roles with responsibility for food safety and QA within their job role.</p> <p>Food safety is a critical element of product quality and is a priority for all sectors of the meat processing industry. Food safety is also a community issue and public perceptions of the safety of meat and meat products impact on the viability of meat processing enterprises.</p>
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish enterprise meat or food safety system requirements	<p>1.1. Goals, scope and requirements of <i>food safety system</i> are determined, consistent with customer, enterprise and <i>regulatory requirements</i>.</p> <p>1.2. Alternative food safety systems are evaluated against enterprise requirements and preferred system is identified.</p> <p>1.3. Development of the food safety system is carefully planned, using team and consultative approaches.</p> <p>1.4. Resource requirements, including staff training requirements, for effective systems operation and maintenance are identified and obtained.</p>
2. Develop food safety systems	<p>2.1. Food safety responsibilities, obligations and roles are identified and clearly explained to <i>stakeholders</i>.</p> <p>2.2. Processes covered by the food safety system are identified and described.</p> <p>2.3. Food safety hazards are identified for all processes within the scope of the food safety system.</p> <p>2.4. Hazard control measures are identified, developed and validated.</p> <p>2.5. Procedures for <i>preventative action</i> are developed.</p>
3. Establish monitoring procedures and corrective actions	<p>3.1. Monitoring procedures are developed and <i>monitoring</i> information is used to inform <i>corrective actions</i>.</p> <p>3.2. Corrective actions are developed and implemented to effectively control hazards.</p> <p>3.3. Recording and <i>documentation</i> procedures are developed, maintained and secured.</p> <p>3.4. <i>Strategies to support the workforce</i> in the routine and consistent application of food safety systems are developed, resourced and implemented.</p>
4. Evaluate food safety system	<p>4.1. <i>Audit procedures</i> are established and audits monitored.</p> <p>4.2. <i>Verification procedures and schedules</i> are established and verification information is used in the review of the food safety system.</p> <p>4.3. Food safety system is reviewed and updated for changes in Australian Standards, <i>technical information</i> (including verification data) and process information according to established procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.4. Food safety systems are prepared for external review and approval by relevant authorities. 4.5. Performance information is used to measure performance against policies and goals.
5. Communicate food safety outcomes	5.1. Interactions with the public, regulatory authorities and agencies are conducted in a positive, cooperative and open manner. 5.2. Food safety incidents and non-compliances are reported promptly to relevant authorities. 5.3. Customer and consumer feedback is gathered, analysed and included in review of the food safety system. 5.4. Food safety system outcomes are documented to promote public confidence in enterprise products and services.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse performance information to determine progress and areas for review or improvement
- consult with stakeholders to determine the scope of the *food safety systems, procedures and controls* and identify food handling practices, processing techniques and support programs in use
- demonstrate detailed knowledge of Hazard Analysis Critical Control Point HACCP principles and techniques and where appropriate to the enterprise, Good Manufacturing Practices (GMP)
- demonstrate detailed knowledge of *validation* and verification (including audit) purposes and processes
- demonstrate substantial product and process knowledge and the microbiological, physical and chemical impacts on the safety of enterprise meat and meat products in the identification of hazards and the assessment and control of food safety risks
- determine measures for correcting processes or outcomes outside acceptable limits or support program requirements including procedure to be followed, when corrective action must be implemented, the person responsible for taking corrective

REQUIRED SKILLS AND KNOWLEDGE

- action and the information to be recorded
- develop and validate control measures using objective data, industry guidelines and codes of practice
 - develop performance standards and criteria for the food safety system
 - develop strategies to support the workforce in the implementation of the food safety system
 - establish internal audit processes and schedules, including developing and leading the audit team
 - establish procedures to monitor, review and secure record-keeping systems consistent with regulatory requirements
 - establish verification procedures and schedules and identify action required if the outcomes of verification indicate that the program requirements have not been met or that the original program was inadequate
 - establish, monitor and continuously improve food safety support systems consistent with regulatory requirements
 - evaluate alternative food and/or meat safety systems for suitability for enterprise goals and directions, enterprise operations, enterprise product, cost and customer and regulatory requirements
 - identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
 - identify *monitoring requirements* and develop monitoring procedures *for food safety hazards* identified in the enterprise
 - identify workforce training needs and negotiate and schedule training to support system requirements and operation
 - liaise with suppliers to establish and monitor enterprise food safety and quality requirements for products and processes
 - maintain currency of knowledge through independent research or professional development
 - monitor *public health requirements* and concerns and prepare reports for the enterprise, public health authorities, customers and consumers on progress and outcomes of the food safety system.
 - monitor the implementation of preventative action measures, controls and actions to correct non-compliance or non-conformances
 - prepare accurate reports for senior management detailing compliance breaches/incidents, actions and outcomes and the implications for the enterprise
 - prepare action plans for the development and review of the food safety system, which include timelines, the establishment, leading and support of the HACCP team
 - prepare and present food safety system information, procedures, documentation and reports in languages, formats and styles appropriate for the audience and purpose
 - prepare *communication* strategies to inform internal and external stakeholders of progress and outcomes of the food safety system

REQUIRED SKILLS AND KNOWLEDGE

- prepare HACCP plans and support documentation including hazard analysis charts and tables, manuals, data analysis reports, corrective action reports and verifications reports, Standard Operating Procedures (SOPs) and work instructions where appropriate for the enterprise system
- provide feedback to the workforce or team on food safety performance
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology.
- use appropriate communication skills and strategies for informing and confirming the roles, responsibilities and obligations of all participants in the operation of the enterprise
- use available technology and *data management systems* to gather, record, manipulate, interpret and report food safety data and information

Required knowledge

Knowledge of:

- enterprise's ethical standards and the implications for the food safety system
- roles, responsibilities and obligations of the enterprise and individuals in the food safety system
- regulatory requirements for food safety, including HACCP-based programs, support programs, record-keeping, verification and internal/external audits, and explain the implications for enterprise operations
- scope, auditor role and responsibility, and scheduling requirements for internal and external audit process
- legal responsibilities for reporting audit findings, including breaches and non-compliances to enforcement agencies, and for conflicts of interest, confidentiality, rights of appeal and giving evidence in court

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • a real work environment • relevant documentation such as: <ul style="list-style-type: none"> • workplace policies and procedures • manufacturer instructions and operations manuals • regulatory requirements • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility • assignment focusing on understanding and application of principles and theory to workplace operations

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> workplace projects which focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Food safety systems:</i>	<ul style="list-style-type: none"> are written documents required by legislation which specify how businesses will control all food safety hazards that are reasonably expected to occur within a food enterprise may be developed by personnel within the enterprise or by external consultants may be developed within an enterprise's QA system or as a discrete program must provide for the systematic monitoring of controls and actions to correct hazards not under control (records demonstrating action in relation to or in compliance with the food safety program must be kept) may be for export or domestic processing, smallgoods manufacturing, wholesaling, cold stores or retail enterprises may be ISO-based or non ISO-based.

RANGE STATEMENT	
Regulatory requirements may include:	<ul style="list-style-type: none"> • animal welfare • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
Stakeholders may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders, financiers • competitors • management and employees • regulatory authorities • suppliers, customers, consumers • unions and employer associations.
Preventative action may involve:	<ul style="list-style-type: none"> • revision of materials, processes and/or food handling procedures • revision of workplace practices and documentation such as specifications, SOPs, approved supplier programs, and work instructions.
Product/process monitoring may be:	<ul style="list-style-type: none"> • microbiological or chemical testing • online testing • sensory.
A corrective action plan identifies:	<ul style="list-style-type: none"> • non-conformance • corrective actions • date by which action must be taken • other follow up requirements.
Food safety documentation includes:	<ul style="list-style-type: none"> • amendment registers • Critical Control Point (CCP) monitoring forms and additional monitoring requirements • CCP work instructions • factory/shop floor plan

RANGE STATEMENT	
	<ul style="list-style-type: none"> • HACCP audit table • HACCP team register • hazard analysis table • process flow charts • product description or use • supporting programs and schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, product identification and recall.
Technical information includes:	<ul style="list-style-type: none"> • conditions for bacterial food poisoning, including: <ul style="list-style-type: none"> • product composition • temperature • time • aw • pH.
Strategies to support the workforce in the implementation of the food safety system may include:	<ul style="list-style-type: none"> • clear signage • coaching and mentoring • development and presentation of procedures in plain language and visuals • implementation of problem-solving by work teams to develop and monitor food safety procedures • initial and refresher structured training programs • provision of appropriate work areas and equipment.
Food safety systems, procedures and controls apply to:	<ul style="list-style-type: none"> • display, packaging and sale of food, including meat and meat products • equipment design, use and maintenance • handling and disposal of condemned or recalled food, including meat, products • location, construction and servicing of meat premises • processing, further processing and preparation of food including meat and meat products • receipt, storage and transportation of food including meat and meat products.
Validation is:	<ul style="list-style-type: none"> • the identification, collection and analysis of objective information to confirm that

RANGE STATEMENT	
	operations (e.g. equipment, processes, procedures) are able to provide the required food safety outcomes.
<i>Audit procedures</i> include:	<ul style="list-style-type: none"> • planning • establishing controls • developing the team • conducting entry and exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
<i>Verification procedures and schedules</i> may be defined in:	<ul style="list-style-type: none"> • legislation relevant to the sector (verification applies to all aspects of the food safety program including documentation, auditing and support programs).
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans

RANGE STATEMENT	
	<ul style="list-style-type: none"> • SOPs • work instructions.
Monitoring requirements for food safety hazards include:	<ul style="list-style-type: none"> • a description of the method or procedure to be followed • the frequency and timing • the information to be recorded (procedures to be followed would typically be specified in the form of a SOP or work instruction) • the person responsible.
Public health requirements include the impacts of pathogenic bacteria such as:	<ul style="list-style-type: none"> • Clostridium etc • E.coli • Listeria • Salmonella • Yersinia.
Communication may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve reading and interpreting workplace documents • require the use of negotiation, persuasion and assertiveness skills.
Data management systems may be manual or computerised, cover data collection, data monitoring and data analysis and interpretation and include:	<ul style="list-style-type: none"> • calculators • charting and graphing materials • computer software packages including spreadsheets, statistical analysis packages • computerised equipment • inspection regimes • manual measuring equipment (e.g. thermometers, pressure gauges, scales) • monitoring sheets and records • product quality and safety.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify potential for <i>new product or process development</i>	1.1. Internal and external environments including legislative framework, industry directions, enterprise goals and consumer trends are analysed to identify emerging opportunities. 1.2. Enterprise goals for the development of new product or process are clearly described. 1.3. Potential products or processes are identified and evaluated, consistent with the goals and directions of the enterprise. 1.4. Enterprise estimates and forecasts of required production levels, costs, sales and required rate of return are obtained. 1.5. Regulatory requirements for the development and sale of new product or process are identified.
2. Develop and <i>test</i> product or process	2.1. Schedules and plans for the development and trial of new product are prepared. 2.2. Sources of technical expertise and information are identified. 2.3. Product or process concept is researched and refined. 2.4. Prototype is developed and evaluated for impact on meat quality and food safety. 2.5. Specifications for new product or process are refined and confirmed.
3. Evaluate feasibility of product or process for the enterprise	3.1. Bench top samples of new products are prepared. 3.2. Trials and tests of product or processes are coordinated, monitored and evaluated for commercial operation. 3.3. Customer and consumer feedback is gathered and analysed. 3.4. Enterprise capacity to support new product or process is assessed and system strengths and weaknesses are identified. 3.5. Resource analyses and proposals for the introduction of new product or process are prepared. 3.6. New product is costed for commercial implementation and evaluated against enterprise forecasts of production, costs, sales and rate of return. 3.7. Risks are identified, measured and analysed. 3.8. Recommendations including risk management

ELEMENT	PERFORMANCE CRITERIA
	strategies are prepared and presented to stakeholders.
4. Scale up operations for commercial implementation	<p>4.1. Resources for commercial operation are obtained and scheduled.</p> <p>4.2. Action plans for the scale up to commercial operations are prepared, in consultation with enterprise personnel.</p> <p>4.3. Communication and consultation strategies to inform stakeholders of progress and gain commitment to the process are prepared and implemented.</p> <p>4.4. Food safety requirements of new product or process are identified and included in food safety system and plans.</p> <p>4.5. Monitoring and control systems are developed and implemented.</p> <p>4.6. Contingency plans are prepared.</p> <p>4.7. Personnel are trained in new product or processes, systems and procedures.</p> <p>4.8. Product or process is commissioned with minimum disruption to other operations.</p>
5. Evaluate market impact of new product	<p>5.1. Product information and samples are prepared for marketing and promotion.</p> <p>5.2. Targets for new product or process are determined in consultation with relevant personnel, within enterprise goals and operations.</p> <p>5.3. Product or process performance is measured against targets.</p> <p>5.4. <i>Causes of non-achievement of targets</i> are analysed and recommendations for improvement prepared.</p> <p>5.5. Customer or consumer feedback is gathered, analysed and included in recommendations for improvement.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- analyse product or process performance against enterprise targets. This includes identifying company goals, setting targets, collecting and analysing performance data including customer feedback
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a team member
- describe and comply with the legal, ethical and *regulatory requirements* relating to the development, testing and trialling, packaging, labelling and distribution of meat and meat products
- develop commitment and capacity of personnel. This requires identification of training requirements and provision of training, consultation with personnel in planning and in the resolution of problems, teamwork, and the use of effective communication strategies with all stakeholders
- develop concept proposals based on detailed technical and product knowledge and an evaluation of alternative products or processes
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- outline sampling, testing and evaluation procedures and assess their appropriateness to the development of new product
- plan and implement the commercial operation of the new product or process, including obtaining and scheduling resources, the development of Standard Operating Procedures (SOPs), work instructions, product specifications and their integration with plant systems
- prepare product descriptions for a range of audiences (e.g. regulatory authorities, importing countries, enterprise marketing and/or sales personnel, customers and consumers)
- prepare product or process development strategy
- prepare resource proposals based on the calculation and estimation of costs, sales, payback periods and potential rates of return
- present reports according to legal and enterprise requirements
- research and describe current technical and product information relating to potential new product (e.g. processing and manufacturing techniques, functional ingredients, *additives*, and consumer and industry trends)
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- utilise a range of communication and information technologies for the development, testing, monitoring and analysis of new products

Required knowledge

Knowledge of:

- impact of pre and post slaughter factors and the major physical, chemical, biochemical and microbiological characteristics and changes affecting the quality

REQUIRED SKILLS AND KNOWLEDGE

of meat and meat products

- | |
|---|
| <ul style="list-style-type: none">• nutritional qualities of meat and meat products |

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • a real work environment • relevant documentation such as: <ul style="list-style-type: none"> • workplace policies and procedures • manufacturer instructions and operations manuals • regulatory requirements • relevant equipment and materials.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility • assignment focusing on understanding and application of principles and theory to workplace operations

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> workplace projects which focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>New product or process developments</i> may include:</p>	<ul style="list-style-type: none"> development of products or processes totally new to the market introduction of products or processes already in the market and used by competitors product or process extensions (e.g. pack sizes, mild and hot salamis, restructured meat products) product or process improvements including convenience (e.g. easy carve), eating quality (e.g. taste) and extended shelf life.
<p><i>Internal and external environments</i> and information may include:</p>	<ul style="list-style-type: none"> changes in legislation (e.g. export, environment, food safety) competitors' practices enterprise goals and requirements for by-product utilisation, increased market share, diversification

RANGE STATEMENT	
	<ul style="list-style-type: none"> • market research and consumer feedback • technical advances.
Trials and <i>tests</i> of products or processes:	<ul style="list-style-type: none"> • are conducted within the framework of enterprise and industry ethical and legal standards • may include: <ul style="list-style-type: none"> • chemical, microbiological, nutritional, physical, organoleptic or other sensory evaluations and tests • customer or consumer evaluations • instrumental and non-instrumental tests.
<i>Costs of commercial implementation</i> operation may include:	<ul style="list-style-type: none"> • determining enterprise current and future capacity against projections • interpreting and analysing the results of product or process tests and trials • pre-production costs (e.g. capital), production costs and post production costs including marketing and distribution • resource requirements.
<i>Causes of non-achievement of targets</i> may include:	<ul style="list-style-type: none"> • ingredient availability • packaging • palatability and quality • price point • production costs and levels • unit size.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be formal or informal and involve personal face-to-face methods and technological and/or electronic methods • involve communication and information technology that may include telephone, email, internet, software including testing and analysis programs, scheduling, financial packages, data bases etc • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve strategies that are inclusive of the cultural, ethnic and social diversity of individuals and groups • involve the use of negotiation, persuasion and assertiveness skills

RANGE STATEMENT	
	<ul style="list-style-type: none"> • occur in a variety of sensitive, conflictive, collaborative and supportive environments • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require the establishment of appropriate industry and information networks.
<i>Mathematical skills</i> may relate to:	<ul style="list-style-type: none"> • complex actual and hypothetical technical and financial modelling, calculations and interpretation and analysis • mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel • operations • sales and turnover • exports.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory</i> requirements may	<ul style="list-style-type: none"> • animal welfare • commercial law including fair trading, trade

RANGE STATEMENT	
include:	practices <ul style="list-style-type: none"> • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • relevant Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans • Standard Operating Procedures (SOPs) • work instructions.
<i>Additives</i> may include:	<ul style="list-style-type: none"> • alginates and calcium technology • binding agents • protein additives (meat and non meat).

MTMPSR601A Benchmark to manage/improve enterprise performance

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to conduct benchmarking exercises through the identification of appropriate benchmarks and to use them to focus enterprise operations and improve performance. In the meat industry benchmarking is a tool for informing, measuring and developing an enterprise's performance.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is suitable for all managers working in a meat industry context and supports them in their responsibility for measuring, evaluating and improving enterprise performance. This unit has applicability for engineers, refrigeration/chiller managers, production and operations managers, Occupational Health and Safety (OH&S), environment, quality, Human Resources (HR), finance, livestock, logistics managers.</p> <p>At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the need for <i>benchmarking</i>	<p>1.1. Benchmarking is identified in enterprise planning processes as a tool for achieving strategic goals.</p> <p>1.2. Customer requirements, perceptions and satisfaction data are analysed to identify the need for improvement.</p> <p>1.3. Competitor's products or processes are analysed to identify the need for improvement.</p> <p>1.4. Company processes are analysed to determine whether potential <i>improvements to efficiency</i> might be possible.</p> <p>1.5. <i>Regulatory requirements</i> are analysed to identify the need for improvement.</p>
2. Prepare for benchmarking	<p>2.1. Scope and parameters of the benchmarking exercise are determined according to enterprise priorities and plans.</p> <p>2.2. Benchmarking resource requirements are estimated and included in budgets and operational plans.</p> <p>2.3. <i>Benchmarking strategy</i> is planned around realistic time frames and enterprise planning cycles.</p> <p>2.4. <i>Communication</i> and <i>mathematical requirements</i> are identified and planned.</p> <p>2.5. Goals of benchmarking are developed in consultation with <i>stakeholders</i>.</p> <p>2.6. <i>Benchmarking teams</i> are selected according to agreed criteria.</p> <p>2.7. Team roles and responsibilities are confirmed and supported with training.</p> <p>2.8. Benchmarking activities are scheduled and documented following consultation with stakeholders.</p> <p>2.9. Criteria are established for internal and external benchmarking and agreed upon by benchmarking team.</p> <p>2.10. Internal and/or external <i>benchmarking partners</i> or sources are identified, according to the scope, parameters and goals of the benchmarking exercise.</p> <p>2.11. Cooperative and open relationships are built with benchmark partners.</p>
3. Undertake	3.1. Logistical requirements and impacts of the

ELEMENT	PERFORMANCE CRITERIA
benchmarking activity	<p>benchmarking exercise are identified and negotiated with stakeholders.</p> <p>3.2. Statistical analysis frameworks and measurement frameworks are developed.</p> <p>3.3. Problem-solving processes are developed and agreed.</p> <p>3.4. Own enterprise or department functions, processes and operations are analysed and documented according to agreed criteria.</p> <p>3.5. Benchmarking partner's functions, processes, operations and performance outcomes are analysed and documented.</p> <p>3.6. Comparisons of performance are made to identify compatibility of measurement data, commonalities, trends, differences and gaps.</p> <p>3.7. Comparisons or benchmarking reports are communicated to benchmarking partners according to agreement.</p> <p>3.8. Change strategies are developed from analysis and evaluation of divergences and gaps.</p>
4. Capitalise on benchmarking outcomes	<p>4.1. Opportunities for using benchmarking and <i>benchmarking data</i> in continuous improvement processes are identified.</p> <p>4.2. Customer consultation and feedback is built into continuous improvement processes.</p> <p>4.3. Enterprise personnel are supported through the change process.</p> <p>4.4. Improvements resulting from the benchmarking processes are measured and reported to stakeholders.</p> <p>4.5. Benchmarking information is utilised to develop the enterprise's competitive advantage and market profile.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- determine criteria for the identification of appropriate benchmarking partners and maintaining positive partner relationships, consistent with enterprise goals and directions
- access industry and enterprise benchmarking data
- analyse and interpret a range of complex qualitative and quantitative data relating to enterprise operations and benchmarking activities
- apply relevant communication and mathematical skills
- identify enterprise goals and directions and explain the role benchmarking can have in achieving enterprise goals
- develop and maintain positive relationships with benchmarking partners
- work effectively as an individual and as a member of a team
- use effective communication, negotiation and leadership skills in a range of benchmarking interactions (e.g. with benchmarking teams, benchmarking partners and internal stakeholders dealing with change)
- use problem-solving skills in a range of situations
- utilise information and communications technology including performance management, project management, statistical and modelling software
- prepare a strategy for gathering and analysing customer feedback
- develop a financial model for measuring Return On Investment (ROI) for benchmarking processes
- develop and implement a communication and marketing strategy to inform stakeholders (including senior management, personnel at all levels of the organisation and customers) of benchmark goals, progress and outcomes
- prepare benchmarking action plans that specify resource requirements, methodologies, milestones, communication strategies and timelines, and include mechanisms for linking with enterprise planning cycles and continuous improvement strategies
- develop and implement strategies for the resolution of logistic, resource, cultural, ethical and political issues raised during the benchmarking process, including scheduling team release and involvement, supporting individuals through change, managing group dynamics, confidentiality and commercially sensitive information, dealing with diversity
- develop performance indicators for the enterprise, function, department or process being benchmarked
- implement the findings of benchmarking exercise including interpreting benchmarking results, identifying areas for improvements, building findings into targets and planning, identifying possible indicators of enterprise and/or department competitive edge and preparing a market profile
- plan quantitative and qualitative data management strategies (e.g. collection, collation, analysis, presentation and reporting)
- prepare memorandums of understanding or contracts for benchmarking partners, as appropriate

REQUIRED SKILLS AND KNOWLEDGE

- present reports according to legal and enterprise requirements
- take action to improve own work performance as a result of feedback from others, self-evaluation, or in response to changed work practices and technologies

Required knowledge

Knowledge of:

- the role of performance indicators in benchmarking
- the difference between performance and process benchmarking
- relevant OH&S, workplace and regulatory requirements
- the critical factors required for successful and effective benchmarking processes and outcomes, and the implications for enterprise benchmarking activities

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p> <p>Effective management and/or facilitation of a benchmarking process, including related improvement activities, must be demonstrated.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • access to appropriate information sources including industry standards and research data, similar businesses and industries • enterprise system information • workplace environment with typical operation and production conditions.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • assignment focusing on understanding and application of principles and theory to workplace operations • simulation • workplace or industry projects with a focus on company/industry environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Benchmarking</i> may be undertaken:	<ul style="list-style-type: none"> • between companies, including competitors • between departments or sections: <ul style="list-style-type: none"> • boning, slaughter, rendering, stockyards, sales • curing, corning, smokehouse, rasher room • for functional areas (e.g. human resources, finances, production, marketing and sales) • between sites • between the company and industry • internally, externally or across industries.
<i>Improvements to efficiency</i> might	<ul style="list-style-type: none"> • reductions in labour

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • reductions in resource costs.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • commercial law including fair trading, trade practices, Intellectual Property (IP) • consumer law • corporate law, including registration, licensing, financial reporting • environmental impact, sustainability and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • relevant regulations • risk management • state and territory regulations regarding meat processing • taxation.
<i>Benchmarking strategies</i> may include:	<ul style="list-style-type: none"> • audit of internal systems or processes • analysis of partner's systems or processes • benchmarking outside the immediate industry (e.g. benchmarking against freight and logistics enterprises) • competitive or lean manufacturing • benchmarking cross the value chain • Total Quality Management (TQM) • Six Sigma.
<i>Communication</i> may	<ul style="list-style-type: none"> • be formal or informal and involve face-to-face and technological/electronic methods • be inclusive of the cultural, ethnic and social diversity of individuals and groups • involve preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data • involve reading and interpreting workplace documentation • occur in a variety of sensitive, conflictive, collaborative and supportive environments • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or

RANGE STATEMENT	
	<ul style="list-style-type: none"> • complex formats • require persuasion, negotiation and assertiveness skills.
Mathematical requirements may:	<ul style="list-style-type: none"> • be complex and relate to product and product quality, financial operations, personnel, operations, sales and turnover and exports • involve the use of information and communications technology and services, online and offline data bases, information management and storage systems and e-commerce • relate to complex actual and hypothetical, technical and financial modelling, calculations, interpretation or analysis • involve statistical analysis of enterprise and industry data.
Stakeholders may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders, financiers • competitors • management and employees • suppliers, customers, consumers • unions and employer associations • meat industry and industry organisations • government organisations.
Benchmarking teams may include:	<ul style="list-style-type: none"> • lead team • preparation team • visit team • improvement team.
Benchmarking partners and benchmarks may be:	<ul style="list-style-type: none"> • competitors • generic or cross industry • industry and industry data owners • internal.
Benchmarking data may include:	<ul style="list-style-type: none"> • input, output (process output) information • performance indicators • qualitative data, formal and informal feedback, reports, interviews • industry data • quantitative data, statistics, surveys.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather <i>legal information required for business compliance</i>	1.1. Relevant legal information is gathered and analysed from appropriate <i>sources</i> . 1.2. Expert advice is sought, analysed and evaluated. 1.3. Employer and employee obligations and responsibilities are clearly explained to management.
2. Identify legal risks	2.1. Workplace policies, systems, controls and practices are evaluated according to enterprise and <i>legal requirements</i> . 2.2. Workplace policies, procedures and systems are analysed for compliance with contract and legal requirements. 2.3. Key risk areas are identified. 2.4. Level of risk is analysed.
3. Ensure enterprise compliance with legal requirements	3.1. Current strategies for compliance with legal requirements are analysed. 3.2. Feedback on compliance record is provided to <i>stakeholders</i> . 3.3. Strategies to ensure compliance with legal requirements and reduce risk are developed, communicated and implemented. 3.4. Currency of legal information is maintained.
4. Report enterprise compliance	4.1. Records relating to systems, training, communication and non-compliance with legal requirements are maintained and secured. 4.2. Compliance reports are prepared for internal personnel and <i>external authorities</i> as required. 4.3. Non-compliance incidents are recorded and reported to relevant internal personnel and external authorities in a timely manner. 4.4. Compliance reports and enterprise representations are prepared for external authorities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE**Required skills**

Ability to:

- analyse and update legal information through independent research and/or professional development
- read, analyse and interpret complex legal information
- access relevant mathematical information
- interpret monitoring data and prepare compliance reports
- apply legal concepts including duty of care, to the development and implementation of enterprise operations and systems
- apply teamwork strategies to foster stakeholder commitment and compliance with legal requirements
- communicate legal information and requirements to all stakeholders, in a language and style suitable for the purpose and audience
- determine the enterprise's level of legal and statutory compliance
- interact and communicate with external authorities in a professional and open manner
- promptly report non-compliance to relevant external authorities and enterprise personnel
- determine corrective actions appropriate for the circumstances
- present reports according to legal and enterprise requirements
- use assertive, persuasion and negotiation skills as required
- determine the responsibilities and liabilities of managers, directors, owners and employees and the consequences of non-compliance
- maintain and secure records and record keeping systems to meet legal or statutory requirements
- prepare briefing information for specialist legal advisors
- identify enterprise requirements for specialist legal advice
- take action to improve own work practice as a result of self-evaluation, feedback from others' or in response to changed work practices or technology

Required knowledge

Knowledge of:

- relevant OH&S and workplace requirements
- sources of legal information
- legal concepts including social justice, tort, negligence, consumer law, employment law
- relevant environmental requirements
- relevant food safety legal requirements
- relevant trade practices requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Ability to identify, understand and interpret legal information in context for the enterprise's business must be demonstrated.

Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- real work environment.
- relevant documentation such as:
 - manufacturer's instructions or operations manuals
 - regulatory requirements

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • workplace policies and procedures • relevant equipment and materials.
Method of assessment	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at appropriate level of authority and responsibility • assignment focusing on understanding and application of principles and theory to workplace operations • workplace projects focusing on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>legal information required for business compliance</i> may include:</p>	<ul style="list-style-type: none"> • ANZ risk management standards • ANZ compliance standards • Australian Standards • commercial law including fair trading, banking, trade practices, insurance, contracts, patents, copyright, trademarks, sale of goods, procurement rights

RANGE STATEMENT	
	<ul style="list-style-type: none"> • consumer law • corporate law, including registration, licensing, financial reporting, liability, partnerships • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • export regulations • food standards and food safety including industry licensing and registration, processing and transporting of meat for human consumption, food safety and labelling of ingredients • industrial awards, agreements • OH&S regulations and rehabilitation legislation • superannuation • taxation • traineeship requirements.
Sources of legal information include:	<ul style="list-style-type: none"> • courts, including industrial, civil and criminal courts • employer associations and unions • government departments, agencies and statutory bodies • industry associations • enterprise legal advisors • official web sites containing Acts, regulations and food standards.
Legal requirements must include, as a minimum:	<ul style="list-style-type: none"> • consumer • commercial • corporate • industrial awards • employment.
Stakeholders might include	<ul style="list-style-type: none"> • enterprise management • regulatory authorities • industry organisations.
Compliance reports for external authorities might include:	<ul style="list-style-type: none"> • environmental compliance reports • declarations of legal competence

MTMPSR603A Manage meat processing systems to maintain and improve product quality

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to manage the enterprise quality system and maintain the quality of products. It includes the skills and knowledge to monitor, review, evaluate and improve enterprise operations to ensure delivery of meat and meat products that satisfy customer demands.
------------------------	--

Application of the Unit

Application of the unit	This unit is particularly appropriate for Quality Assurance (QA) personnel, production managers, cold chain coordinators and transport coordinators. Many factors impact on the quality, including eating quality, of meat and meat products, which affect prices and sales.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define meat quality	<p>1.1. Relevant regulatory, scientific, industry and market information defining <i>meat quality</i>, and <i>factors affecting</i> meat quality, is researched and analysed.</p> <p>1.2. Customer and consumer perceptions, expectations and requirements are identified and analysed.</p> <p>1.3. Meat quality is defined and balanced against enterprise requirements for yield, cost and meat safety.</p> <p>1.4. Enterprise meat quality specifications for suppliers or supplied product and end product are prepared.</p> <p>1.5. Performance standards, including specifications, are established and data collection strategies are put in place.</p>
2. Analyse production processes and systems for impact on meat quality	<p>2.1. Meat quality control points along the value chain, including pre- and post-slaughter factors, are identified.</p> <p>2.2. Production processes and systems are analysed against agreed criteria.</p> <p>2.3. Enterprise operations including inputs, processes and technology are analysed and evaluated for impact on meat quality, yield and cost.</p> <p>2.4. Recommendations to improve operations for product quality are prepared and presented.</p> <p>2.5. Alliances with suppliers and customers are identified and established to improve quality at all points in the value chain.</p> <p>2.6. Resource requirements for the achievement of meat quality specifications are identified and allocated.</p>
3. <i>Monitor</i> meat product quality	<p>3.1. Sampling and <i>testing</i> procedures and schedules are prepared, implemented and analysed.</p> <p>3.2. Non-conformances with meat quality requirements are investigated.</p> <p>3.3. Preventative and control measures are developed and implemented.</p>
4. Evaluate meat quality outcomes	<p>4.1. Performance is analysed and assessed against performance standards.</p> <p>4.2. Continuous improvement strategies are developed and strategies for implementation prepared.</p> <p>4.3. Consumer and customer feedback is analysed and acted on within the continuous improvement</p>

ELEMENT	PERFORMANCE CRITERIA
	framework. 4.4. <i>Recommendations for improving operations</i> to maintain and enhance meat or meat product quality are developed and communicated to appropriate personnel
5. Promote enterprise meat quality outcomes	5.1. Meat quality outcomes are reported to <i>stakeholders</i> , including employees, customers and consumers. 5.2. Enterprise meat quality specifications are used to identify enterprise's market edge.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- evaluate current plant, equipment and processes for impact on meat and meat product quality
- assess and monitor the efficiency of improvements to meat and meat product quality
- apply relevant communication and mathematical skills
- monitor operations for meat and meat product quality
- develop performance criteria for meat and meat product quality
- evaluate product quality outcomes through the development of specifications and performance standards, analysis and interpretation of performance information including costs and sales
- improve product input and service quality through the development of alliances, supplier specifications and audit processes, monitoring input quality
- maintain currency of knowledge through independent research or professional development
- prepare and communicate information on meat and meat product quality outcomes to workforce, consumers and customers
- prepare recommendations for improving operations to maintain and enhance meat/meat product quality
- prepare specifications for enterprise product, including specifications for end product where not provided by customer, supplier and supplied product specifications, product description, labelling and claims

REQUIRED SKILLS AND KNOWLEDGE

- research best practice in meat processing, meat manufacturing and meat preparation techniques and technology including computerised, mechanical and manual systems, and the impact on product quality
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology

Required knowledge

Knowledge of:

- Hazard Analysis Critical Control Point (HACCP) principles, systems and food safety requirements for enterprise product.
- nutritional content and value of meat and meat products
- negative physiological changes of meat and their prevention (e.g. Dark, Firm and Dry (DFD) and Pale, Soft, Exudative (PSE))
- impact of species, breed, sex, age (dentition and ossification) and nutrition of livestock on meat and meat product quality
- enterprise requirements for product costs, prices and sales and how this influences enterprise definitions and achievement of product quality
- major physical, chemical/biochemical and microbiological characteristics and changes affecting the quality of meat and meat products
- relevant Occupational Health and Safety (OH&S) and workplace requirements
- optimum testing and sampling regimes to monitor and measure the quality of enterprise product
- meat tenderisation techniques and their suitability for enterprise product and operations, including:
 - advanced technological processes
 - calcium activated tenderisation
 - conditioning, including elevated temperature conditioning
 - electrical stimulation
 - further processing (e.g. cooking and smoking)
 - mechanical tenderisers (e.g. knife tenderisers)
 - product ageing process (e.g. rigor mortis, shear force and post mortem including calcium dependent) proteolysis
 - tenderstretching
- pre and post slaughter factors and their impact on meat and meat product quality
- biological and anatomical structures of major species processed in Australia for human consumption
- local and international meat and meat product description and grading systems operating in the Australian market, such as:
 - AUS-MEAT
 - Japan Beef Grading System
 - Meat Standards Australia (MSA)

MTMPSR604A Manage effective operation of meat enterprise cold chain and refrigeration systems

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to plan and oversee the effective operation of enterprise cold chain and refrigeration systems to ensure product quality and food safety. It also covers ways to manage and reduce the costs of cold chain operations. Cold chain systems and operations are critical to the quality and food safety of enterprise products and their efficient management will help minimise the cost of production and maintain regulatory compliance.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to production managers, plant engineers, Quality Assurance (QA), maintenance and chiller managers or coordinators. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Assess enterprise <i>cold chain system</i> requirements</p>	<p>1.1. Enterprise goals, directions and forecasts are analysed and the implications for cold chain requirements are determined.</p> <p>1.2. Enterprise refrigeration systems, cold chain, technical support team and operations are documented.</p> <p>1.3. Regulatory and customer requirements relating to the operation and maintenance of refrigeration systems are identified.</p> <p>1.4. Enterprise requirements for specialised refrigeration advice and expertise are determined.</p> <p>1.5. <i>Optimum refrigeration requirements</i> to maintain quality and safety of products are determined.</p> <p>1.6. Performance standards and targets including standards related to food safety, cost, quality and waste are established.</p>
<p>2. Manage and control cold chain systems</p>	<p>2.1. Procedures for the hygienic and safe operation and maintenance of refrigeration or cold chain systems are developed according to quality, food safety, manufacturer specifications, and customer and enterprise requirements.</p> <p>2.2. Contingency plans and procedures for systems failure or overload are prepared and conveyed to relevant personnel.</p> <p>2.3. Emergency procedures and plans are prepared and included in health and safety systems, procedures, training and work instructions.</p> <p>2.4. Strategies for communicating and resolving systems problems and failures with <i>stakeholders</i> are prepared.</p>
<p>3. Monitor refrigeration and cold chain system performance</p>	<p>3.1. Performance information requirements and data collection strategies are determined and developed.</p> <p>3.2. Monitoring procedures for the operation of refrigeration or cold chain systems are established and maintained.</p> <p>3.3. Non-conformances are investigated, reported where required, and corrective actions implemented.</p> <p>3.4. Preventative and control procedures are developed and implemented to prevent future non-conformance.</p>
<p>4. Improve refrigeration</p>	<p>4.1. Performance data is analysed and measured against performance standards, including product quality and</p>

ELEMENT	PERFORMANCE CRITERIA
system <i>performance</i>	cost requirements. 4.2. Energy costs of refrigeration systems are calculated and monitored. 4.3. <i>Strategies for improving performance</i> and minimising costs are developed and implemented. 4.4. Refrigeration system requirements are included in budgets and forward planning.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- assess requirements for enterprise refrigeration or cold chain systems based on enterprise goals, directions and forecasts, detailed product knowledge and regulatory requirements
- apply calculation skills and budget principles to refrigeration costs
- apply relevant communication and mathematical skills and processes including, as appropriate:
 - assertiveness, persuasion and negotiation skills
 - face-to-face, technological and electronic methods
 - communicating in sensitive, conflictive, collaborative and supportive environments
 - analysing and presenting complex concepts, technical information, mathematical information and other data in simple or complex formats
 - complex actual and hypothetical technical and financial modelling, calculations, interpretation or analysis
- develop and maintain the operating system
- prepare manuals and procedures for the operation of refrigeration systems, chillers and freezers according to hygiene, safety, quality and customer requirements and determine corrective actions for systems variations and non-conformances
- identify key personnel for the resolution and communication of systems problems and failures
- maintain currency of knowledge through independent research or professional development
- maintain the quality of products in the cold chain by monitoring chillers or freezers

REQUIRED SKILLS AND KNOWLEDGE

and interpreting refrigeration data to maintain appropriate temperature or humidity for product types and quantities

- manage maintenance of enterprise refrigeration systems including the negotiation and preparation of maintenance schedules; monitoring repairs; conformance with regulatory and quality requirements; and replacement requirements
- manage refrigeration costs by monitoring the costs of refrigeration including internal or external service models, maintenance costs, lost time costs, product losses and energy costs, minimising energy costs
- monitor and report system performance including setting performance standards and measures for refrigeration system, consistent with enterprise goals and products, analysing performance information and making recommendations for systems improvement for inclusion in enterprise forward planning
- operate refrigeration or cold chain systems efficiently including identifying and implementing strategies for reducing heat load in enterprise chiller or freezer, minimising energy costs, maximising availability and minimising down time, maintaining temperatures according to quality and food safety requirements
- prepare safety procedures for chillers or refrigeration systems including emergency plans and procedures for incidents and accidents associated with refrigerants (leaks and spills) and procedures for the safe and efficient operation of equipment (e.g. forklifts and lights) in chillers and freezers
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- utilise information and communications technology including statistical and modelling software for research, data collection and analysis, and reporting

Required knowledge

Knowledge of:

- refrigeration concepts and terms including:
 - ambient temperature
 - Biot number: ratio of conductive (internal) resistance to heat transfer to the convective (external) resistance
 - half cooling time
 - surface heat transfer
 - thermal properties of meat including conductivity
- strategies for reducing heat loads, such as:
 - air curtains
 - automatic door closers
 - improved insulation to prevent heat filtration through wall
 - no lights, people, machinery inside
 - plastic strips
 - removal of heat load caused by fans

REQUIRED SKILLS AND KNOWLEDGE

- impact of high and/or low humidity on eating quality, production and storage of meat and meat products
- impact of moisture transfer during chilling and freezing on quality, production and storage of meat and meat products
- impact of packaging on chilling and freezing rates of meat and meat product
- concept of heat load and the implications for product quality and energy requirements for refrigeration system
- methods of chilling and freezing meat and meat products including:
 - air (e.g. natural convection, forced convection and spray chilling)
 - air freezing
 - contact freezing
 - cryogenic (e.g. gaseous, solid and liquid - liquid nitrogen and solid carbon dioxide)
 - cryogenic freezing
 - direct contact (e.g. plate freezing and conduction)
 - direct freezing systems
 - liquid immersion (e.g. chilled water or glycol solution)
- impact of chilling or chilling rates and freezing or freezing rates on quality, production and storage of meat and meat products
- qualities of humidity including changes in evaporation, pH levels, saturation humidity, saturation vapour pressure
- thermal properties of meat and meat products and the implications for meat quality
- relevant Occupational Health and Safety (OH&S) and workplace requirements
- relevant food safety requirements and reporting responsibilities
- identify enterprise requirements for refrigeration system including evaluating requirements for specialist personnel and expertise for management and maintenance of refrigeration system; and evaluating different methods of chilling and freezing for cost, efficiency and impact on product quality
- hygiene and sanitation requirements for operation, cleaning and maintenance of cold chain systems
- processes and methods for chilling and freezing meat and meat products and their impact on product quality, food safety and tenderness
- relevant regulatory requirements including food safety regulations and the implications for the management of the enterprise refrigeration or cold chain systems
- OH&S requirements related to the safe handling of refrigerants and safety in controlled atmosphere and confined spaces
- main elements of the compression cycle (compressor, evaporator, condenser, refrigerant) used in refrigeration

MTMPSR606A Assess and purchase livestock

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to identify, select and purchase livestock according to customer requirements and within enterprise livestock budgets. The selection, purchasing and transport of livestock has implications for the quality of the product and the profitability of the enterprise.
------------------------	---

Application of the Unit

Application of the unit	<p>In a meat industry context, individuals working at this level exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.</p> <p>Their responsibilities may include management of cost centres or departments operating semi-autonomously within guidelines of the parent enterprise or company (e.g. retail meat departments, boning rooms, food service and meat retail, domestic and export establishments, medium and large enterprises and small business employing fewer than 100 workers).</p> <p>This unit is of particular interest to livestock buyers but may also have relevance for production and finance personnel.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify livestock markets	1.1. Livestock markets and methods are identified and selected to meet enterprise requirements. 1.2. Risks associated with the purchase of inappropriate livestock are analysed and risk management strategies identified. 1.3. Regulatory requirements relating to the sale and purchase of livestock are identified. 1.4. Networks and alliances to ensure access to markets are established, and market intelligence is gained, according to legal and enterprise ethical requirements.
2. <i>Select</i> livestock	2.1. Enterprise specifications and requirements for livestock are confirmed, including Quality Assurance (QA) arrangements for and with producers. 2.2. Livestock inspection procedures are conducted according to Occupational Health and Safety (OH&S) and animal welfare requirements. 2.3. Livestock are selected according to enterprise and customer specifications.
3. <i>Purchase</i> livestock	3.1. Market conditions are analysed and trends in livestock quality and prices are monitored. 3.2. Terms of sale are negotiated according to enterprise requirements. 3.3. Livestock budget is monitored and corrective action is taken to address variations. 3.4. Documentation relating to purchase or sale is completed.
4. Transport livestock	4.1. Transport of livestock is negotiated according to enterprise and animal welfare requirements. 4.2. Transport of livestock is negotiated according to enterprise production schedules and requirements.
5. Evaluate livestock purchases	5.1. Quality of livestock is monitored against customer specifications and enterprise requirements. 5.2. Strategies for improving quality of purchases are recommended and implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- assess livestock against enterprise specifications and determine fitness for purpose (suitability for customer requirements and ability to meet customer specifications), including the identification of species and breeds in stockyards or paddocks and calculating dressed carcass weight to determine yield and product price
- communicate effectively with producers to provide feedback on enterprise requirements including the presentation of livestock
- complete purchase documents accurately
- develop open and constructive relationships with key **livestock sales and transport personnel**
- estimate expected yield from species and breeds
- evaluate industry methods for purchasing livestock and determine methods suitable for the enterprise
- gather and interpret processing and sales data, including customer feedback to analyse quality of livestock purchased
- identify and apply relevant OH&S and *workplace requirements*
- identify potential alliances, *key stakeholder* networks and *information sources* to facilitate enterprise access to required livestock and livestock markets
- interpret the implications of enterprise forecasts of orders and sales for the purchase of livestock
- manage livestock budget including analysis of livestock market trends and enterprise purchase history to determine quality and price parameters, calculating average purchase price per kilo and balancing purchase prices to achieve livestock budget targets
- negotiate enterprise requirements for transport of livestock with *carrier* including animal welfare requirements, enterprise production schedules and enterprise budget requirements
- obtain and secure documentation relating to livestock status, purchase and transport
- prepare livestock purchasing plans to meet enterprise forecasts of orders and sales including liaison with enterprise personnel to identify production livestock schedules and requirements, analysing enterprise orders and sales, and confirming livestock specifications
- present reports according to legal and enterprise requirements
- use available communication and information technology to record, monitor and analyse livestock purchase data, including fat scores, prices and pricing structures

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- characteristics of different species and breeds and their suitability for the enterprise's product
- identification of animals using brands, tags and tattoos
- international, national and local factors affecting the livestock market and describe the implications for the enterprise's operations
- livestock classification and conformation or scoring system
- customer specifications and the implications for the selection and purchase of stock (e.g. required product or cuts, European Union (EU) closed system, Japanese ox)
- enterprise ethical standards and the implications for operations in the livestock market
- *producer QA* programs including 'Cattle Care' and 'Flock Care'
- regulatory requirements affecting the purchase and transportation of livestock
- effects of transportation on livestock and product quality
- symptoms of infectious and non-infectious diseases to be identified or eliminated when assessing livestock

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Resources may include:</p> <ul style="list-style-type: none"> • a real work environment • access to stockyards • relevant equipment and materials • relevant documentation such as: <ul style="list-style-type: none"> • customer and workplace specifications • electronic and online livestock data • manufacturer instructions or operations manuals • regulatory requirements • workplace policy and procedures.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • a third-party referee report of sustained performance at an appropriate level of authority and responsibility

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • assignment focusing on the understanding and application of principles and theory to workplace operations • simulation • workplace projects with focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Regulatory requirements</i> may include:</p>	<ul style="list-style-type: none"> • animal welfare • appropriately accredited saleyards • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management, sustainable work practices • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act

RANGE STATEMENT	
	<ul style="list-style-type: none"> • hygiene and sanitation requirements • industrial awards, agreements • relevant regulations and Australian Standards • state, territory and federal regulations regarding meat processing • taxation law.
<i>Market intelligence</i> may be local, national and international and may be provided by:	<ul style="list-style-type: none"> • communications media (e.g. radio, TV, newspapers and internet) • government agencies: <ul style="list-style-type: none"> • Department of Primary Industries and Energy (DPIE) • Australian Bureau of Agricultural and Resource Economics (ABARE) • Australian Competition and Consumer Commission (ACCC) • Aus Industry/AusTrade • industry associations • research agencies and publications (e.g. MLA, Feedback) • specialist journals and press (e.g. breeder or producer, economic, agricultural and manufacturing) • standard yield analysis systems and standard costing arrangements • stock and station agents.
<i>Selection</i> of suitable cattle may be determined by:	<ul style="list-style-type: none"> • age, sex, size, condition • breed or strain • chemical application history • cost • end use • feed history • health anomalies • number • pregnancy status • production records • weight, fat cover, muscling.
<i>Enterprise specifications</i> may include:	<ul style="list-style-type: none"> • availability and delivery dates • body conformation requirements • number or head • species and breeds • use of AUS-MEAT language and descriptors.

RANGE STATEMENT	
OH&S requirements may include:	<ul style="list-style-type: none"> • animal or manual handling • confined spaces operations • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice • zoonotic diseases.
Methods of purchasing livestock may include:	<ul style="list-style-type: none"> • Computer Aided Livestock Marketing (CALM) • direct from feedlots • forward contracting • out of the paddock • saleyard.
Documentation and certification of livestock may include:	<ul style="list-style-type: none"> • breeding • chemical residue clearance • electronic tagging or chips • exotic and notifiable diseases • feed history • Hormonal Growth Promotants (HGP) status • National Livestock Identification System (NLIS) • National Residue Survey (NRS) • tail tags • treatment and with holding periods.
Communication may:	<ul style="list-style-type: none"> • be inclusive of the cultural, ethnic and social diversity of individuals and groups • include use of data bases, e-commerce systems, grading and scoring systems • involve use of negotiation, persuasion and assertiveness skills

RANGE STATEMENT	
	<ul style="list-style-type: none"> occur in a variety of sensitive, conflictive, collaborative and supportive environments be formal or informal and involve face-to-face and technological and electronic methods require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats require preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data.
Mathematical skills may relate to:	<ul style="list-style-type: none"> complex actual and hypothetical technical and financial modelling calculations and interpretation and analysis mathematical information such as: <ul style="list-style-type: none"> product and product quality financial operations personnel operations sales and turnover exports.
Livestock sales and transport personnel may include:	<ul style="list-style-type: none"> auctioneers livestock breeders or producers stock and station agents transport vendors, drivers, agents.
Workplace requirements may include:	<ul style="list-style-type: none"> enterprise-specific requirements OH&S requirements QA requirements Standard Operating Procedures (SOPs) the ability to perform the task to production requirements work instructions.
Key stakeholders may include:	<ul style="list-style-type: none"> company owners, directors, shareholders and financiers competitors management and employees suppliers, customers, consumers unions and employer associations.
Information sources for livestock purchases may include:	<ul style="list-style-type: none"> electronic marketing private consultations

RANGE STATEMENT	
	<ul style="list-style-type: none"> • rural news, rural newspapers • stock and station agents • word of mouth.
<i>Carrier's</i> terms of engagement may include:	<ul style="list-style-type: none"> • cost per kilometre • number per truck or deck or selection • points (long trip) • quality of service • time for trip.
<i>Producer QA arrangements</i> may include:	<ul style="list-style-type: none"> • Cattle Care • EU closed system or HGP status • Flock Care • QA Certification feedlots.

MTMPSR607A Analyse and develop enterprise systems for new opportunities

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	<p>This unit covers the skills and knowledge required to evaluate and develop production systems which are suited to the company's products and goals, are cost efficient and to ensure that products meet enterprise and customer specifications. The design of the production system affects the quality of product processed. The analysis and development of enterprise production systems gives an enterprise the flexibility to become an innovative organisation, take on new opportunities and strengthen or expand its market.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.</p> <p>This unit is suitable for senior managers, Chief Executive Officers (CEOs), Chief Finance Officers (CFOs) and directors of meat processing and smallgoods enterprises, building a culture of innovation in a meat industry context.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse effectiveness of enterprise production system to meet enterprise goals	1.1. Enterprise mission, direction and objectives are analysed. 1.2. Impact of current and future market trends and business environment on enterprise goals and operations is determined. 1.3. Production system requirements to meet enterprise goals are determined. 1.4. Capacity of the existing system to meet enterprise goals is assessed. 1.5. Existing systems are analysed to identify system strengths, weaknesses and problem areas.
2. Identify and <i>evaluate alternatives</i>	2.1. New, reconfigured or redesigned systems and components are researched. 2.2. New, reconfigured or redesigned systems and components are evaluated for suitability for enterprise product, feasibility and cost, and outcomes reported to stakeholders . 2.3. Enterprise commitment to a new, reconfigured or redesigned system is obtained. 2.4. Resource requirements are identified, agreed upon and included in enterprise planning. 2.5. Sources of resource support are identified and evaluated.
3. Implement solutions	3.1. Specifications for new, reconfigured or redesigned system are developed. 3.2. New, reconfigured or redesigned system is commissioned. 3.3. Implementation strategy, including work redesign, is planned, communicated and negotiated with stakeholders. 3.4. Impact on personnel is identified and strategies to facilitate change are prepared. 3.5. Training plans are developed, resourced and implemented. 3.6. Procedures and controls are developed, tested and refined.
4. Monitor production process	4.1. Performance criteria for the new, reconfigured or redesigned system are established. 4.2. Performance data is collected, analysed and reported. 4.3. Progress and performance are reported to

ELEMENT	PERFORMANCE CRITERIA
	stakeholders. 4.4. Strategies for improvement are identified in consultation with the team and built into continuous improvement and planning processes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- flowchart the movement of products and resources along the chain or process line to identify strengths and weaknesses
- apply in-depth *product knowledge* in determining the processing requirements for species or products according to customer and enterprise requirements, including methods, technology, quality, speed of production
- analyse the organisational environment to assess capacity for, and impact of changes to, systems and operations
- establish goals and performance criteria for operation of the production system
- determine criteria for evaluating alternative production systems and system components including reference to product specifications, yield and quality, technical requirements and cost
- develop data collection and recording systems linked to systems performance criteria
- analyse performance information and prepare reports for stakeholders
- apply relevant *communication* and *mathematical skills*
- develop a communication strategy for involving the workforce, negotiating changes and reporting progress
- assess alternative configurations of technology, labour, processes, organisation and layouts for process flow effectiveness
- compare capability of existing production system with market potential and capability of alternative systems
- estimate the impacts of enterprise forecasts and changes in the industry, including technology and in the market on enterprise resource requirements, operation and sales
- evaluate the consequences and change implications of adopting new, reconfigured or redesigned systems on overall operation of the plant, including the impact on personnel

REQUIRED SKILLS AND KNOWLEDGE

- identify and apply relevant *Occupational Health and Safety OH&S, workplace and regulatory requirements*
- identify and resolve industrial relations issues related to changes in systems
- prepare action plans for the implementation of new systems including commissioning of the new system, timelines, resources and training and change facilitation strategies to assist personnel implement new, reconfigured or redesigned systems
- prepare and justify budgets for the introduction of new systems or components including calculating the costs of retaining the current system and the costs of setting up and operating new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- prepare and present recommendations in formats, language and styles appropriate for the audience
- present reports according to legal and enterprise requirements
- quantify and cost the resources required for optimum operation of existing systems, including utilities and energy, personnel, equipment and stock
- research and analyse *market intelligence*, trends and forecasts to identify possibilities for the enterprise
- research and evaluate available systems (e.g. technology and equipment, processing methods and techniques and work design) appropriate for enterprise product
- research and evaluate sources of support including government and private, financial and other support
- review existing procedures and controls or develop new ones to facilitate systems operations according to enterprise and regulatory requirements including integration with enterprise quality and food safety systems
- seek external advice where appropriate (e.g. from technology and equipment manufacturers, architects, engineers and tradespeople)
- use a range of quality and evaluative tools to analyse the capability of enterprise systems to meet future projections
- use available communication and information technology to complete forecasts, analyses and *modelling*, where required

Required knowledge

Knowledge of:

- enterprise goals and directions and the implications for enterprise operations
- budgeting strategies including calculating the costs of retaining the current system and the costs of setting up and operating new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- report formats and styles and their appropriateness for various audiences

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research and determine viability of entering new markets	1.1. Sources of assistance for identifying and establishing new markets are identified and evaluated. 1.2. Characteristics of potential markets are analysed. 1.3. Enterprise product or service range is reviewed in terms of potential market and customer requirements. 1.4. Competitive position of enterprise product is assessed and sales projections are prepared. 1.5. Licensing and other regulatory requirements are determined. 1.6. Costs, benefits and risks of entering new markets are evaluated.
2. Develop a market entry strategy	2.1. Resourcing strategies for entering the new market are developed. 2.2. Strategies for managing risk are identified. 2.3. Marketing strategy is developed, in association with relevant internal and external personnel. 2.4. Distribution strategy is planned to ensure profile of product in the new market.
3. Identify contract and service requirements	3.1. Enterprise terms of payment and administrative requirements are established. 3.2. Documentary and commercial requirements of new markets are identified. 3.3. Finance and insurance requirements are identified. 3.4. Requirements for transport and distribution contracts are identified to ensure quality and safety of product.
4. Develop evaluation strategy for new market entry	4.1. Targets are identified and performance indicator requirements determined. 4.2. Strategies for collecting and analysing performance are prepared. 4.3. Strategies for reporting outcomes and including recommendations in future planning are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication and mathematical skills*
- communicate and negotiate clearly, ethically and effectively with a range of representatives (e.g. internal personnel, government agents, financial agencies, distributors, *export control agencies*, brokers, customers) and other *stakeholders*
- determine and obtain *resources* required to support new market strategy
- *establish infrastructure requirements* for new market
- *evaluate and report market entry* performance
- *evaluate potential and/or feasibility of new market entry*
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
- identify strategies for managing financial risk
- identify the cultural requirements of the new market/clients
- maintain currency of knowledge through independent research or professional development
- prepare enterprise strategies and plans which include resource requirements, timelines, milestones and communication strategies
- prepare, negotiate and implement strategies and action plans for entering the new market.
- present reports according to legal and enterprise requirements
- research potential markets including competitors, products, customers and market regulations, legislation and controls
- research, collate and analyse *information* relating to the individual business, domestic and international context (as applicable)
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or *technology*.
- use available information and communication technology and systems (e.g. forecasting software, budgets, research material) to assist planning, monitoring and reporting
- use *teamwork strategies* to prepare work team to support new market strategy

Required knowledge

Knowledge of:

- purpose and features of distribution and marketing strategies
- role of new markets in the achievement of enterprise goals and plans
- enterprise budgetary and planning cycles and processes; methods for analysing production; and sales records and costs; and enterprise methods for estimating and forecasting sales and production requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise, is required.

Context of and specific resources for assessment

Resources may include:

- a real work environment
- relevant documentation such as:
 - enterprise business plan
 - manufacturer instructions and operations manuals
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace

EVIDENCE GUIDE	
	<p>operations</p> <ul style="list-style-type: none"> workplace projects which focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify meat cuts	<p>1.1. Meat cuts are correctly identified by cut name and <i>species</i> according to workplace requirements and <i>specifications</i>.</p> <p>1.2. Meat cuts are correctly selected by cut name and species according to <i>workplace requirements</i>.</p>
2. Identify primal cuts	<p>2.1. Primal cuts are correctly identified by name and species according to workplace requirements.</p> <p>2.2. Primal cuts are correctly selected by name and species according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify meat cuts according to label on cartons (as appropriate)
- identify primal cuts correctly by species and cut according to workplace specifications for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- apply relevant *regulatory requirements*
- select and handle products according to *Occupational Health and Safety (OH&S) requirements*
- select cuts correctly by species and cut according to workplace requirements for a minimum of three species for *meat retailing* and at least one species for *smallgoods manufacturing*
- Identify cuts correctly by species and cut according to workplace specifications for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- select primal cuts correctly by species and cut according to workplace requirements for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- primal cuts used for different cuts of meat for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- principles of product selection by species, primal and cut type for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing
- relevant regulatory requirements
- appropriate sources of information on new species or cuts
- different species and *categories of meat* and cuts for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.</p> <p>The candidate must be able to select and identify primal and secondary cuts correctly by species and cut for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing.</p> <p>Where the candidate does not prepare primal cuts in their usual place of work they must complete the requirements of the Unit in an alternative work placement or in a simulated environment.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment may occur on- or off-the-job.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
<p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<p>Ability to:</p> <ul style="list-style-type: none"> • demonstrate storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products • monitor refrigerated temperature on a regular basis • recognise and interpret codes, date tags and labels • identify and report unacceptable temperatures either verbally or in writing, according to workplace requirements • work individually and with other team members • seek advice from appropriate sources when working with new products • use correct manual handling techniques for transferring product to storage facilities • use relevant <i>communication skills</i>
<p>Required knowledge</p>

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- appropriate *storage facilities* for individual products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- species and various meat products for storage

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace or in a simulated environment under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean and prepare processing equipment used in the preparation of minced meat products	1.1. Mincing equipment is prepared according to manufacturer's specifications and workplace, Occupational Health and Safety (OH&S), and hygiene and sanitation requirements . 1.2. Mincing equipment is cleaned according to manufacturer specifications, and workplace and OH&S requirements. 1.3. Mincing equipment is adjusted as required in accordance with manufacturer specifications and workplace, OH&S and hygiene requirements.
2. Mince meat	2.1. Trimming s are selected according to workplace policy. 2.2. Trimmings are cut to manufacturer specifications and workplace requirements to avoid blockages in mincer. 2.3. Trimmings are fed through mincer efficiently to avoid blockages and heat build-up. 2.4. Species are accurately identified. 2.5. Species are stored separately according to product description. 2.6. Product is maintained at correct temperature during processing. 2.7. Product is handled and stored at correct temperature and conditions.
3. Prepare minced meat products	3.1. Minced meat products are prepared according to regulatory, workplace, hygiene and OH&S requirements. 3.2. Ingredients are combined to workplace requirements. 3.3. Fat content is measured. 3.4. Meat is processed in preparation for forming to product specifications and regulatory requirements . 3.5. Product is formed to specifications and regulatory requirements. 3.6. Correct temperature of product is maintained during processing and handling. 3.7. Product is stored at correct temperature and conditions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- activate mincing equipment to assess its readiness for operational use
- identify different species and categories of meat
- start-up and shut-down equipment when necessary according to manufacturer, workplace and OH&S, requirements
- operate a mincer to manufacturer, workplace, OH&S, and hygiene and sanitation requirements
- tighten front plate on mincer as required
- operate adjustment tools and equipment correctly
- interpret time and temperature measuring equipment
- accurately copy and record temperature, weights and time, according to workplace requirements
- clean mincer between species to avoid cross-contamination
- use tools and cleaning agents appropriate to the cleaning activity or manufacturer's specifications
- report faults and adjustments required either verbally or in writing according to workplace requirements
- work individually and as part of a team
- list minced meat products
- perform tasks according to OH&S, hygiene and regulatory requirements
- seek advice from appropriate sources when working with new products
- use relevant *communication skills*

Required knowledge

Knowledge of:

- conditions under which equipment may need adjusting
- fat content using chemical lean measures or visual lean estimation
- purpose and use of processing equipment used in making minced meat products
- temperature requirements for product
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- procedure for cleaning equipment

ELEMENT	PERFORMANCE CRITERIA
1. Acknowledge and greet customer	<p>1.1. Customer is politely acknowledged on entering the workplace.</p> <p>1.2. Customer is greeted when first contact is made.</p> <p>1.3. Customer is offered assistance according to workplace requirements.</p>
2. Establish customer requirements	<p>2.1. Customer requirements are established by questioning, active listening and clarification of customer comments.</p> <p>2.2. Customer needs are acknowledged.</p> <p>2.3. Customer is referred to more experienced staff when specialist advice and/or service and products are required.</p>
3. Convey a professional image	<p>3.1. Behaviour displayed when serving customer maintains established workplace image.</p>
4. Take orders courteously and accurately	<p>4.1. Telephone is answered according to workplace requirements.</p> <p>4.2. Orders are taken from customer by phone or face-to-face accurately and according to workplace requirements.</p> <p>4.3. Orders are taken legibly and in the correct format.</p> <p>4.4. Pick up or delivery time is arranged with the customer.</p> <p>4.5. Procedures for following up specific customer enquiries, unfilled orders or unmet customer specialist needs are implemented.</p>
5. Refer customer complaints	<p>5.1. Customer complaints are acknowledged and difficulty noted.</p> <p>5.2. Complaints are courteously referred to a more senior staff member or manager.</p>
6. Receive customer enquiries	<p>6.1. Customer enquiries are received.</p> <p>6.2. Customer enquiries are followed up in accordance with workplace requirements.</p> <p>6.3. Customer is informed in relation to enquiry.</p>
7. Record information from enquiries	<p>7.1. Information about enquiries is recorded to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply **communication** skills to meet customer needs and enterprise requirements
- provide an overview of the **range of products** and **services** offered by the enterprise
- seek advice or assistance from more experienced team members when necessary
- operate telephone system
- demonstrate polite and efficient telephone technique
- demonstrate suitable behaviour by attending to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene
- arrange pick up or delivery with customer according to enterprise procedures
- apply relevant **Occupational Health and Safety (OH&S)** and **regulatory requirements**
- use **mathematical skills** appropriate to the task

Required knowledge

Knowledge of:

- how to interact with others in an appropriate way
- workplace complaints policies and procedures
- workplace requirements related to acknowledging and greeting customers, including enterprise ethical standards
- relevant OH&S and regulatory requirements

Evidence Guide

EVIDENCE GUIDE

Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Customers include regular or first-time visitors to the enterprise, or those making contact by telephone.

Workplace requirements may include:

- enterprise ethical and customer standards
- enterprise standard for greeting and thanking the customer
- enterprise-specific requirements
- OH&S requirements
- order forms
- Quality Assurance(QA) requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Customer requirements may include:

- advice on enterprise products and services
- different cultural and ethnic needs
- immediate purchase of customer-selected items.

Customer *orders* may be taken:

- by email
- by fax
- by phone
- face to face.

Procedures for following up customer enquiries may include:

- contacting customer when additional information, product or service is available
- recording in order book

RANGE STATEMENT	
	<ul style="list-style-type: none"> referring to another staff member, butcher or manager telephoning or writing to a supplier.
<i>Customer complaints</i> may include:	<ul style="list-style-type: none"> concerns about products advice given service provided by the enterprise.
<i>Communication</i> may include:	<ul style="list-style-type: none"> clear oral responses completing workplace documentation effective listening interacting with people from a range of cultural, social and ethnic backgrounds reading and interpreting workplace documentation recognition and use of non-verbal communication strategies recognition of cultural diversity use of communications technology.
<i>Range of products</i> may include:	<ul style="list-style-type: none"> a range of meats (e.g. veal, beef, lamb, mutton, pork, chicken, game, venison, kangaroo, emu) BBQ spits dry stock manufactured goods smallgoods special cuts.
Range of <i>services</i> may include:	<ul style="list-style-type: none"> coordinating with promotions demonstrations ingredients recipes taste preferences value-added products, ingredients.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> enterprise OH&S policies, procedures and programs OH&S legal requirements Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> coats and aprons ear plugs or muffs eye and facial protection head-wear lifting assistance

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal and state regulations regarding meat processing and food handling • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • following basic flow charts, mimic panels and numerically-sequenced tasks and procedures • reading and interpreting analogue and digital measures, including clocks, scales, pressure gauges, thermometers and cash registers • recognising out-of-specification, acceptable or unacceptable range on simple graphs and charts • recognition and accurate copying of numbers relating to temperature, time, volume, weight and quantity • routine simple calculations using specified fixed formulas and procedures • understanding and accurately using terms, such as hotter or cooler, heavier or lighter, slow or fast, increasing or decreasing, and lower or higher in own work • use of calculators.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Process transaction	1.1. Transaction is accurately processed. 1.2. Transaction accurately put through point of sale equipment. 1.3. Correct and accurate receipts are provided to customer. 1.4. Customer is thanked according to workplace requirements . 1.5. Correct hygiene is observed while handling cash transactions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify point of sale equipment
- process a range of sales transactions to meet customer requirements in accordance with workplace requirements
- calculate total cost of sale
- manually calculate change
- provide correct and accurate receipts to customers in line with workplace requirements
- demonstrate courteous and respectful customer relations
- refer enquiries to more senior staff if appropriate
- apply relevant **Occupational Health and Safety (OH&S) requirements**
- use **communication** skills appropriate to customer and enterprise requirements
- use **mathematical skills** relevant to the task

Required knowledge

Knowledge of:

- procedures for using point of sale equipment
- workplace requirements for dealing with customer enquiries
- **regulatory requirements** related to weights and measures

REQUIRED SKILLS AND KNOWLEDGE

- relevant OH&S requirements
- legal requirements and details necessary for acceptance of cheques

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- simulation
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Transactions</i> may involve:	<ul style="list-style-type: none"> • application of sale to customer • cash • cash vouchers • cheques • credit or debit card • customer accounts • electronic funds transfer (EFTPOS, credit or debit card) • point of sale equipment • referral of enquiry to more senior staff • sale of product or service.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use hand operated or hand held power tools	1.1. Hand and power tools are selected according to task requirements. 1.2. Tools are checked before use and unsafe and/or faulty items are reported according to standard procedures. 1.3. Tools are used according to manufacturer specifications to achieve desired outcomes. 1.4. Tools are stored safely in a designated location.
2. Undertake minor routine preventative maintenance	2.1. Routine preventative maintenance on equipment is carried out in association with fellow workers in accordance with workplace agreements and company procedures. 2.2. Grease and oil is applied as directed according to manufacturer's specifications and <i>maintenance instructions</i> . 2.3. Faulty application of lubricants is identified and reported according to standard procedures. 2.4. Occupational Health and Safety (OH&S) non-compliance is identified, rectified and/or reported. 2.5. Waste arising from routine preventative maintenance is disposed of according to company procedures. 2.6. Routine preventative maintenance information is recorded in the company reporting system.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • access workplace information to identify routine maintenance requirements • clean preventative maintenance tools and equipment • prepare equipment and work area to conduct preventative maintenance • select, fit and use personal protective clothing and/or equipment

REQUIRED SKILLS AND KNOWLEDGE

- ensure appropriate *supplies* prior to commencement of task
- seek advice from other team members or manuals prior to working with new equipment
- consistently apply isolation procedures
- address common problems in conducting routine preventative maintenance
- demonstrate purpose and use of common hand and power tools used in routine preventative maintenance
- locate and refer to workplace information such as lubrication schedules
- identify faults in routine preventative maintenance
- identify relevant plant and equipment
- observe food safety factors for maintenance and servicing
- rectify or report faulty maintenance
- report or record maintenance information as required
- apply relevant *regulatory* and *workplace requirements*
- follow relevant *OH&S requirements*
- observe roles of and relationships with others involved in carrying out maintenance functions
- maintain work area to meet housekeeping standards
- use *communication* skills relevant to enterprise requirements

Required knowledge

Knowledge of:

- purpose and use of common hand and power tools used in routine preventative maintenance
- purpose and use of routine preventative maintenance
- isolation procedures
- food safety factors for maintenance and servicing
- environmental issues and controls related to routine preventative maintenance
- links between routine preventative maintenance and other work to be achieved by routine maintenance
- relevant regulatory and workplace requirements
- relevant OH&S requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Monitor temperature</i> of meat product in receipt area	<p>1.1. Temperature of received meat product is checked and recorded in line with <i>workplace requirements</i>.</p> <p>1.2. Supervisor is notified when meat product is delivered at a temperature that does not meet workplace, <i>hygiene and sanitation</i> and <i>regulatory requirements</i>.</p>
2. Monitor temperature of cool room	<p>2.1. Temperature of cool room is checked and recorded to meet workplace, hygiene and sanitation and regulatory requirements.</p> <p>2.2. Supervisor is notified when cool room temperature does not meet workplace, hygiene and sanitation and regulatory requirements.</p>
3. Monitor display cabinet temperature	<p>3.1. Temperature of display cabinet is checked and recorded to meet workplace, hygiene and sanitation and regulatory requirements.</p> <p>3.2. Supervisor is notified when display cabinet temperature does not meet workplace, hygiene and sanitation and regulatory requirements.</p>
4. Monitor temperature of meat product while moving between refrigerated <i>storage</i> locations	<p>4.1. Temperature of meat product is monitored while outside of refrigerated storage areas to comply with workplace, hygiene and sanitation and regulatory requirements.</p> <p>4.2. Meat product is returned to refrigerated storage quickly and efficiently according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- measure temperature of meat product and storage areas, including:
 - receipt area
 - cool room

REQUIRED SKILLS AND KNOWLEDGE

- display cabinets
- monitor refrigerated temperatures on a regular basis
- advise customers of suitable storage temperatures of meat product
- apply *Occupational Health and Safety (OH&S) requirements* for working in refrigerated areas
- seek advice from appropriate sources when working with new products
- *explain* effect of incorrect storage temperatures on meat products
- use relevant *communication skills*
- use *mathematical skills* relevant to the task
- work effectively individually or as part of a team

Required knowledge

Knowledge of:

- suitable temperature range for meat product stored in warehouse chillers, transportation, cool rooms and display cabinets
- effect of incorrect storage temperatures on meat products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- OH&S requirements for working in refrigerated areas

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Resources may include:

- freezer, cool room and refrigerated display cabinet
- thermometers
- digital or analogue equipment
- work instructions.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Required skills

Ability to:

- demonstrate assembly and operation of a bandsaw to manufacturer's, workplace and OH&S requirements
- demonstrate a safety check on the bandsaw
- ensure the safety of team members while working with a bandsaw
- report equipment faults, either verbally or in writing, according to workplace requirements
- demonstrate hanging and hooking techniques according to OH&S, hygiene and sanitation, QA and workplace requirements
- demonstrate storage and rotation of meat product according to workplace requirements
- seek advice from appropriate resources before using bandsaw on new products
- work effectively individually or as part of a team
- use relevant *communication skills*

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- primal cuts of carcase
- principles of storage and rotation of product according to workplace and ***regulatory requirements***
- cutting lines for breaking carcase according to specifications
- safety procedures related to use of bandsaw

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Where the candidate cannot use a bandsaw in their usual place of work they must complete the requirements of the Unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or off-the-job in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- simulation
- verified work log or diary
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Products include:	<ul style="list-style-type: none"> • beef cuts • chicken • frozen mince products • lamb cuts • pork cuts • soup bones.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Primal cuts</i> may include:	<ul style="list-style-type: none"> • beef (e.g. shortloin, bone in blade, shin on bone, brisket, ribs) • lamb (e.g. forequarter, saddle, chump, short loin, leg, rib loin) • pig (e.g. forequarter, fore loin, rib loin, leg, belly, hand).
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • Federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide information on cooking specific meat cuts	<p>1.1. Cooking method is identified for various meat cuts to maximise eating quality.</p> <p>1.2. Information is provided for cooking times for various meat cuts to meet customer needs.</p> <p>1.3. Information is provided on complementary herbs, spices, vegetables, sauces or other flavours according to customer needs.</p>
2. Provide information on specific cuts for cooking methods	<p>2.1. Available meat cuts are identified for specific cooking method according to customer needs.</p> <p>2.2. Information is provided for cooking times for various meat cuts to meet customer needs.</p>
3. Provide information on storage and shelf life of fresh meat and cooked meat products	<p>3.1. Information is provided on the storage and shelf life of fresh meat and cooked meat products.</p>
4. Provide hygiene information on handling of meat products	<p>4.1. Information is provided on the safe and hygienic handling, storage and preparation of meat products.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • acknowledge customer's presence • greet customer • establish customer needs by enquiry, listening and summarising • demonstrate awareness of cultural and ethnic differences and respond accordingly • demonstrate suitable behaviour by attending to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene • explain cooking times and temperatures for roasting and microwaving meat to

REQUIRED SKILLS AND KNOWLEDGE

- achieve rare, medium or well done results
- provide advice on cooking methods, times, temperatures, and efficiently and courteously meet customer needs
- relay information to customer
- acknowledge complaints
- demonstrate polite and efficient telephone technique (if required)
- follow up customer enquiries
- refer customer to more experienced staff if necessary, listen and learn from colleagues
- identify and apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- operate telephone system, if required
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

Required knowledge

Knowledge of:

- effects of each cooking technique on tenderness of meat
- flavours which enhance various cuts and how to achieve the flavours
- how to interact with others in an appropriate way when providing advice
- moist cooking, dry cooking and microwave cooking techniques
- serving suggestions including suitable vegetables, pasta or rice accompaniments
- properties and effects of animal fats in cooking
- which cuts are suitable for dry cooking techniques including roasting, grilling and stir-frying
- which cuts are suitable for microwave cooking techniques
- which cuts are suitable for moist cooking techniques including casseroles and stewing
- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- storage times, temperatures and shelf life of fresh and cooked meat products
- workplace complaints policies and procedures
- relevant OH&S, regulatory and workplace requirements
- sources of information on new cooking techniques

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Cooking methods may include:

- baking
- barbecuing
- casseroles
- frying
- grilling
- microwaving
- roasting
- stewing
- stir-frying.

Meat cuts may include:

Beef

- boneless:
 - blade or clod
 - bolar blade
 - bottom sirloin (bottom butt)
 - bottom sirloin triangle (tritip)
 - brisket
 - brisket (deckle off)
 - brisket navel end
 - brisket pieces (deckle)
 - brisket point end
 - brisket point end (deckle off)
 - brisket point end pectoral
 - brisket point end plate

RANGE STATEMENT

- butt set
- butt tenderloin
- chuck
- chuck (square cut)
- chuck and blade
- chuck crest
- chuck eye
- chuck eye roll
- chuck roll (long cut)
- chuck tender
- cube roll (rib eye roll)
- diced beef
- d-rump
- external flank plate
- eye round
- flank plate steak tip
- flank steak
- flap meat
- fore and hind cuts mixed
- fore set
- full rump
- inside skirt
- intercostals (rib fingers)
- internal flank plate
- knuckle
- minced beef (ground)
- neck
- neck chain
- outside
- outside flat
- outside meat
- oyster blade
- red meat
- rib ends
- rib set
- rostbiff
- rump
- rump cap

RANGE STATEMENT

- shin (shank)
- shin (special trim)
- short rib meat
- silverside
- strips
- tenderloin
- tenderloin (side strap off)
- thick skirt
- thin flank or thin flank meat
- thin skirt
- top sirloin (top butt)
- topside or inside
- topside or inside (cap)
- topside or inside (cap off)
- bone in:
 - armbone shin
 - brisket
 - butt
 - butt (shank off)
 - butt (square cut)
 - foreleg
 - forequarter
 - hindquarter
 - pistola hindquarter
 - rib set
 - ribs (prepared)
 - shin or shank
 - short loin
 - short ribs
 - spare ribs
- offal:
 - brain
 - brain (skinned)
 - cheek (papillae off)
 - cheek (papillae on)
 - head meat
 - heart
 - kidney

RANGE STATEMENT

- lips
- liver
- lungs
- rumen pillars (mountain chain)
- spleen tail
- tendons
- testes
- thymus gland
- tongue (long cut)
- tongue (short cut)
- tongue (short cut - special trim)
- tongue (Swiss cut)
- tongue (Swiss cut - special trim)
- tongue root
- tongue root fillet
- tripe (honeycomb)
- tripe (raw unscalded)
- tripe (scalded)
- tripe pieces (raw unscalded)
- tripe pieces (scalded)
- weasand meat
- variety pieces:
 - body fat
 - diaphragm membrane
 - large intestine
 - ligamentum nuchae
 - membrane
 - small intestine
 - spinal cord
 - vell

Goat

- bone-in:
 - carcass
 - forequarter
 - leg (chump on)
 - loin
 - rack

RANGE STATEMENT

- short loin
 - boneless
 - eye of loin
 - forequarter
 - leg (chump on)
 - leg cuts
 - tenderloin
 - offal:
 - brain
 - head meat
 - heart
 - kidney
 - liver
 - lungs
 - pluck
 - thymus gland
 - tongue (long cut)
 - tongue (short cut)
 - tongue blade
 - tongue root
 - tripe (raw unscalded)
 - tripe (scalded)
 - spleen
- Sheep
- bone-in:
 - assorted cuts (bone-in)
 - breast and flap
 - carcase (hogget)
 - carcase (lamb)
 - carcase (mutton)
 - carcase (ram)
 - chump
 - forequarter
 - foreshank
 - hindshank
 - lamb telescoped carcase
 - leg (chump on)

RANGE STATEMENT

- leg (chump on - aitch bone removed)
- leg (chump on - shank off)
- leg (chump off)
- leg (chump off - shank off)
- leg (femur bone)
- loin
- loin end rack
- neck
- rack
- rack (frenched)
- saddle
- short loin
- shoulder
- shoulder (oyster cut)
- shoulder rack
- square cut shoulder
- trunk
- trunk meat cuts (mixed)
- boneless:
 - backstrap
 - eye of forequarter
 - eye of loin
 - eye of rack
 - eye of short loin
 - eye of shoulder rack
 - eye of shoulder or neck fillet
 - forequarter
 - knuckle
 - leg (chump on)
 - leg (chump on - shank on)
 - leg (chump on - shank off)
 - leg cuts
 - rump (lamm rost)
 - side
 - silverside
 - square cut shoulder (rolled netted)
 - tenderloin
 - tenderloin (butt)

RANGE STATEMENT

- tenderloin (butt off)
- topside
- trunk
- offal:
 - brain
 - head meat
 - heart
 - kidney
 - liver
 - lungs
 - pluck
 - thymus gland
 - tongue (long cut)
 - tongue (short cut)
 - tongue blade
 - tongue root
 - tripe (raw unscalded)
 - tripe (scalded)

Veal

- bone-in:
 - carcass
 - forequarter
 - leg (long cut)
 - leg (short cut)
 - loin
 - rack
 - shin or shank
 - short loin
 - side
- boneless:
 - assorted cuts
 - backstrap
 - blade
 - knuckle
 - leg (long cut)
 - leg (short cut)
 - leg set

RANGE STATEMENT	
	<ul style="list-style-type: none"> • loin • outside • rump • shoulder • silverside • tenderloin • thick flank • topside • offal: <ul style="list-style-type: none"> • brain • head meat • heart • kidney • liver • spleen • tail • tendons • thymus gland • tongue (long cut) • tongue (short cut) • tongue (short cut -special trim) • tongue (Swiss cut).

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select requested products	<p>1.1. Meat product requested is recognised.</p> <p>1.2. Meat product is selected according to <i>workplace</i> and <i>customer requirements</i>.</p>
2. Weigh selected products	<p>2.1. Products are weighed according to <i>regulatory</i>, workplace and customer requirements.</p> <p>2.2. Products are costed accurately.</p> <p>2.3. Sale price is confirmed with customer.</p> <p>2.4. Meat orders are prepared according to customer's recorded requirements.</p> <p>2.5. Special, standing or repeat orders are prepared according to customer specifications.</p>
3. Wrap and pack sales items	<p>3.1. Items are neatly and safely wrapped or packed according to hygiene, workplace and customer requirements.</p> <p>3.2. Wrapping <i>equipment</i> is used according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • identify meat products • identify the most appropriate packaging for products • prepare meat order to customer requirements • identify sub-standard products and take required action • weigh items correctly following regulatory requirements • over wrap meat items according to weather conditions and customer requirements • use wrapping materials appropriately • price items accurately according to displayed price • use, read and interpret scales, calculators, cash registers • <i>explain</i> regulatory requirements related to weighing products • work with team members

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *Occupational Health and Safety (OH&S)* and regulatory requirements
- record *mathematical* information accurately
- report equipment faults, either verbally or in writing according to workplace requirements
- seek advice from colleagues when working with new products or equipment
- use relevant *communication skills*

Required knowledge

Knowledge of:

- regulatory requirements related to weighing products
- effect of poor wrapping techniques on meat quality
- relevant OH&S and regulatory requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set weight controls	1.1. Weight controls are set to production requirements.
2. Package <i>product</i>	2.1. Product is packaged to <i>workplace requirements</i> ensuring packs are undamaged and sealed, and coded to packing requirements where appropriate. 2.2. Packaged product is measured according to workplace requirements. 2.3. Packaged product is labelled according to workplace requirements. 2.4. Product is packaged according to <i>Occupational Health and Safety (OH&S)</i> and <i>hygiene requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select packaging *equipment* according to customer specifications and workplace requirements
- assemble the packaging unit
- check the unit to ensure cleanliness and working order
- adjust equipment settings as required for packaging instructions or schedules
- check safety features are in place
- set weight controls on *scales*
- load product according to specifications
- operate packaging equipment to package products to manufacturer's and customer specifications, workplace, OH&S and hygiene and sanitation requirements
- complete packaging records, documents and labels accurately
- identify and report faults in equipment either verbally or in writing according to workplace requirements
- work with team members or individually
- seek advice from manuals or team members before repairing faults
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- methods of recording production
- ***regulatory requirements*** related to packaging
- features of the ***packaging unit*** (e.g. parts, safety features, start-up and shut-down procedures, possible faults and adjustments)
- production schedule

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use <i>cooking equipment and technology</i>	<p>1.1. Appropriate equipment or technology is selected for particular cooking methods.</p> <p>1.2. Equipment is used hygienically, safely and in accordance with manufacturer's instructions.</p>
2. Use <i>methods of meat cookery</i>	<p>2.1. Various cookery methods are used correctly to prepare dishes to enterprise standard.</p> <p>2.2. Correct quantities and ratios of <i>commodities</i> are calculated for specific cookery methods.</p> <p>2.3. Cooking process is completed in a logical and safe manner.</p> <p>2.4. Problems with the cooking process are identified promptly and corrective action is taken.</p> <p>2.5. Dishes are prepared using a range of methods and current technology within acceptable enterprise time frames.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the most appropriate cooking methods for a range of cuts of meat
- select appropriate cooking equipment
- follow recipes accurately
- apply hygiene and safety principles and procedures during the cooking process
- demonstrate safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns
- seek advice from appropriate sources when working with new products/equipment
- report equipment faults, either verbally or in writing according to workplace requirements
- work individually and with other team members
- *explain* logical and time-efficient workflow
- apply relevant *Occupational Health and Safety (OH&S), regulatory* and

REQUIRED SKILLS AND KNOWLEDGE*workplace requirements*

- use *mathematical skills* relevant to the task
- use relevant *communication skills*

Required knowledge

Knowledge of:

- effects of different cookery methods on the nutritional value of food
- underlying principles of all basic methods of meat cookery
- waste minimisation techniques and environmental considerations in relation to different cookery methods
- logical and time-efficient workflow
- use and characteristics of a range of equipment used for the required methods of meat cookery
- relevant OH&S, regulatory and workplace requirements
- major food groups, culinary terminology and equipment as they relate to the required methods of meat cookery

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The candidate must be able to cook meat dishes using all the following cooking methods:

- boiling or simmering
- stewing
- braising
- roasting
- grilling
- shallow frying.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- assignments

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • quiz of underpinning knowledge • verified work log or diary • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare product for packaging	1.1. Product is prepared for vacuum packaging to required specifications.
2. Select packaging	2.1. Appropriately sized bag is selected for product. 2.2. Product is arranged on appropriate container.
3. Set machine requirements	3.1. Requirements in preparation for start-up of vacuum packing machine are completed to <i>workplace requirements</i> . 3.2. Machine requirements are set correctly. 3.3. Start-up procedures are followed according to workplace requirements. 3.4. Packing materials are attached and changed according to workplace requirements and product specification. 3.5. Bagged meat is placed on the vacuum packing machine or in the formed pockets as appropriate. 3.6. Open ends of bags are placed flat across the sealing bar or meat contained in pockets as appropriate. 3.7. <i>Occupational Health and Safety (OH&S), hygiene and sanitation requirements</i> are followed.
4. Operate machinery	4.1. Vacuum packaging machine is operated correctly in accordance with workplace requirements. 4.2. A variety of products are vacuum packed to customer specifications, and hygiene and sanitation, OH&S and Quality Assurance (QA) requirements, at a speed appropriate for production requirements. 4.3. Bagged cuts are left to drain. 4.4. Shut-down procedures are performed to workplace, OH&S, and hygiene and sanitation requirements.
5. Ensure quality of packaging and product	5.1. Bagged cuts are inspected for leaks and other defects. 5.2. Corrective action is taken when leaks and defects are identified according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare for vacuum packaging according to OH&S and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- *explain* defects that can occur during packaging
- clean equipment according to hygiene requirements
- work with team members
- apply relevant *regulatory* and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

Required knowledge

Knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific OH&S requirements for vacuum packing
- purpose of vacuum packaging
- general operating principles, including start-up and shut-down procedures
- manufacturer and workplace requirements for vacuum packaging of product
- relevant regulatory and workplace requirements

MTMR209B Undertake routine preventative maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to carry out routine maintenance as agreed, in the workplace.
------------------------	--

Application of the Unit

Application of the unit	<p>Routine preventative maintenance is undertaken by workers in the retail, smallgoods, meat processing and food services sectors. It may relate to tasks such as:</p> <ul style="list-style-type: none"> • vehicle and equipment checks • cleaning and lubrication of equipment • adjustments and repairs to plant and equipment.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct routine check of plant and equipment	1.1. Visual checks are made of plant and equipment to detect signs of defects and damage in accordance with preventative maintenance documentation and procedures. 1.2. Requirements for the adjustments and repairs are made to plant and equipment within workplace procedures and agreements.
2. Implement routine preventative maintenance	2.1. Routine adjustments and repairs are made to plant and equipment within workplace procedures and agreements. 2.2. Greasing, lubrication and other regular servicing of plant and equipment are carried out in accordance with workplace schedules, procedures and agreements, and according to <i>maintenance instructions</i> . 2.3. Equipment is cleaned and returned to operating order after maintenance is complete. 2.4. Out-of-specification preventative maintenance is identified, rectified and/or reported. 2.5. Waste arising from preventative maintenance is collected, treated and disposed of or recycled according to company procedures. 2.6. Routine maintenance information is recorded in the company reporting system.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply isolation procedures
- conduct pre-operational checks and requirements
- calculate down time for preventative maintenance
- select, fit and use personal protective clothing and equipment
- access services used in preventative maintenance

REQUIRED SKILLS AND KNOWLEDGE

- seek advice from manuals and colleagues before working with new equipment
- prepare equipment and work area to conduct preventative maintenance
- resolve common problems in conducting preventative maintenance
- clean preventative maintenance *tools and equipment*
- observe cleaning requirements
- maintain a clean and safe work area
- rectify and report out-of-specification faulty maintenance
- apply waste handling requirements
- *report* and record maintenance information
- follow *Occupational Health and Safety (OH&S) requirements* hazards and controls
- *explain* and follow roles and relationships with others involved in planning and carrying out maintenance functions
- use *communication* and mathematical skills appropriate to the task
- work with team members when appropriate to carry out tasks and solve problems

Required knowledge

Knowledge of:

- services used in preventative maintenance
- isolation procedures
- waste handling requirements
- pre-operational checks and requirements
- cleaning requirements
- OH&S requirements hazards and controls
- common problems in conducting preventative maintenance
- operational requirements of equipment including cleaning and sanitation following servicing
- purpose of preventative maintenance and possible consequences of poor preventative maintenance
- workplace information, systems and schedules for conducting preventative maintenance
- consequences of incorrect or inadequate routine maintenance
- environmental aspects related to preventative maintenance
- impact of operating and cleaning procedures on maintenance requirements (e.g. unless product is removed from belts during cleaning, belts may not track properly)
- quality parameters to be achieved
- relationship of preventative maintenance to other work activities in the meat processing plant
- food safety factors in maintaining and servicing plant and equipment
- relevant *regulatory* and *workplace requirements*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare meat for sausages	<p>1.1. Meat is selected and weighed according to product and <i>workplace specifications</i>.</p> <p>1.2. Meat is processed in preparation for forming according to <i>product specifications</i>.</p>
2. Select ingredients for sausages	2.1. <i>Ingredients</i> are selected and weighed according to product specifications and workplace and <i>regulatory requirements</i> .
3. Combine selected ingredients	3.1. Selected ingredients are combined according to product specifications and workplace and regulatory requirements.
4. Prepare casings	<p>4.1. <i>Casings</i> are prepared according to product specifications.</p> <p>4.2. Casings are used and stored according to workplace requirements and health and hygiene requirements.</p> <p>4.3. Defective casings are identified and reported where appropriate according to workplace requirements.</p>
5. Fill casings	<p>5.1. Casings are filled to consistency required by product specifications.</p> <p>5.2. Defective product is identified and reported, where appropriate, according to workplace requirements.</p>
6. Link, tie and hang sausages	<p>6.1. Sausages are linked and tied to product specifications.</p> <p>6.2. Excess casings are trimmed according to product specifications.</p> <p>6.3. Sausages are hung or stored according to product specifications and workplace requirements.</p>
7. Prepare, operate, disassemble and clean equipment	<p>7.1. Sausage making equipment is prepared, adjusted and operated to <i>Occupational Health and Safety (OH&S)</i>, workplace and hygiene requirements, and manufacturer specifications.</p> <p>7.2. Equipment is disassembled and cleaned, and parts are stored in line with OH&S, workplace and regulatory requirements, and manufacturer specifications.</p>
8. Sell a <i>variety of sausages</i>	<p>8.1. <i>Information</i>, including cooking, storage and serving suggestions, is provided to customers on a variety of sausages.</p> <p>8.2. Sausage range is promoted to customers.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- accurately identify different species and categories of meat used in sausages
- seek advice from appropriate sources before working with new equipment or products
- operate adjustment tools and equipment
- apply *mathematical skills* relevant to the task
- make a range of at least four different varieties of sausage
- report required faults and adjustments, verbally or in writing according to workplace requirements
- *explain* cooking methods for a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- answer customer enquiries, for at least four different varieties of sausage, relating to:
 - cooking methods
 - cooking times
 - storage
 - shelf life
 - ingredients
 - nutritional value, including fat content
- work with team members
- apply relevant OH&S requirements
- use relevant *communication skills*

Required knowledge

Knowledge of:

- sausage filler types according to power source
- materials for hanging and storing sausages
- protective covering for sausages and its purpose
- conditions under which equipment may need adjusting
- function and operation of sausage filler machines
- safe and correct operation of sausage making equipment
- cooking methods for a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties

REQUIRED SKILLS AND KNOWLEDGE

- shelf life of a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- temperature for storing a range of sausages, including beef, pork, Italian, veal, gourmet and game varieties
- filling yields of various sizes and types of casings
- purpose and storage needs of collagen casings and natural casings
- purpose and use of *processing equipment* used in making sausages
- purpose and use of ingredients used in sausage making
- relevant OH&S requirements
- ingredients used in at least four different varieties of sausage
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- regulatory requirements in relation to sausage making
- procedures for cleaning sausage making equipment
- properties of correct blending of ingredients

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time under typical operating conditions.

The candidate must be able to make at least four varieties of sausages including two gourmet varieties.

Where the candidate cannot make and sell sausages in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- simulation
- verified work log or diary
- workplace project
- workplace referee or third-party report of

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select <i>ingredients</i> for formulation of <i>value-added products</i>	<p>1.1. Ingredients are selected according to workplace recipes, policy and practice.</p> <p>1.2. Ingredients are weighed according to <i>regulatory requirements</i>.</p> <p>1.3. Unused ingredients are labelled according to <i>workplace</i> and regulatory <i>requirements</i>.</p>
2. Prepare meat, stuffings, seasonings and forcemeat for value-added products	<p>2.1. Meat is prepared according to recipes, policy and practices.</p> <p>2.2. Stuffings, seasonings and forcemeat are prepared according to recipes, policy and practices.</p>
3. Mix ingredients	<p>3.1. Ingredients are added according to recipe and product specifications.</p> <p>3.2. Ingredients are blended to achieve product consistency or substance according to recipe and product specifications.</p>
4. Produce value-added products	<p>4.1. Ingredients are added to meat according to instructions or recipe.</p> <p>4.2. Product is formulated according to product specifications and workplace, <i>hygiene and sanitation</i>, and Quality Assurance (QA) requirements.</p> <p>4.3. Product is presented according to product specifications and workplace requirements.</p> <p>4.4. Product is <i>labelled</i> according to product specifications, and regulatory and workplace requirements.</p>
5. Store products and ingredients	<p>5.1. Products are stored according to workplace and regulatory requirements.</p> <p>5.2. Ingredients are stored according to workplace and regulatory requirements.</p> <p>5.3. Shelf life of product is identified.</p> <p>5.4. Effects of ingredients on shelf life are identified.</p>
6. Sell meat product	<p>6.1. <i>Information</i>, including cooking, preparation, storage and serving suggestions, is provided to customers on meat product.</p> <p>6.2. Product is promoted to customers.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- follow recipes accurately
- select meat and ingredients according to recipes and workplace requirements
- measure and weigh meat and ingredients according to recipe and regulatory requirements
- perform calculations as required for production of value-added products
- **explain** permissible use of additives and ingredients in value-added products
- mix ingredients to achieve product consistency according to recipe and product specifications
- produce at least five value-added products from a minimum of three **species**
- identify quality requirements related to production of value-added products, including limits to value-adding options
- present and label products to workplace requirements
- record information, including mathematical information, accurately
- store meat and ingredients to workplace and regulatory requirements
- apply workplace, **Occupational Health and Safety (OH&S)** and hygiene requirements related to producing value-added products
- use **mathematical skills** relevant to the task (e.g. estimating measures to verify calculations)
- work effectively individually or as part of a team
- work with other team members to develop new value-added products
- use relevant **communication skills**

Required knowledge

Knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and the effect of different ingredients on shelf life
- range of effects on the product and consumer of the use of both incorrect and inadequate quantities of ingredients
- permissible use of additives and ingredients in value-added products
- properties of correct blending
- use and purposes of ingredients in producing value-added products
- reasons for poor product consistency and rectify problem
- workplace, OH&S and hygiene requirements related to producing value-added products

REQUIRED SKILLS AND KNOWLEDGE

- | |
|---|
| <ul style="list-style-type: none">• effect of various ingredients on product shelf life |

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time under typical operating conditions.

The candidate must demonstrate the ability to make a minimum of five different value-added products from at least three species.

Where the candidate is unable to produce the required volume of value-added products in their workplace they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace project

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> workplace referee or third-party report of performance over time demonstration with assessor. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare delivery area	1.1. Delivery area is checked and cleaned if necessary before delivery to meet <i>workplace, regulatory, Occupational Health and Safety (OH&S)</i> , hygiene and sanitation requirements.
2. Receive <i>meat product</i>	2.1. Carcasses or cartons are weighed and checked on receipt according to the number and quality ordered. 2.2. <i>Ticketing and labels</i> are checked to ensure they comply with meat ordered. 2.3. <i>Meat quality</i> is checked according to workplace requirements. 2.4. Problems with receipts are recorded and reported according to workplace requirements.
3. Move meat product to storage	3.1. Product is moved from receipt area to storage according to workplace OH&S, regulatory and hygiene and sanitation requirements. 3.2. Product is stacked, hung or stored in cool room according to workplace, OH&S, hygiene and sanitation and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- receive incoming stock
- follow equipment and material requirements
- follow health and hygiene requirements
- follow workplace requirements
- identify and minimise safety hazards
- apply relevant OH&S and regulatory requirements
- calibrate equipment correctly
- use different types of weighing machines
- complete *documentation* for weighing and receiving goods
- *explain* the features and purpose of a stock control sheet

REQUIRED SKILLS AND KNOWLEDGE

- work individually or with others to carry out tasks
- work with diverse individuals and groups
- use *mathematical skills* relevant to the task
- use relevant *communication skills*

Required knowledge

Knowledge of:

- principles of the relevant health Acts and regulatory requirements in relation to stock control
- differences in quality of carcasses
- differences in types of *weighing machines*
- indications of meat contamination and workplace procedures for handling contamination
- storage requirements for a range of species and meat cuts
- features and purpose of a stock control sheet
- purpose of each item of data on invoices and delivery dockets
- relevant OH&S and regulatory requirements
- limits of weight individuals are allowed to carry according to legislative and regulatory requirements

Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine customer needs	<p>1.1. Customer's needs are clarified through questioning and active listening to ensure <i>specialised cuts</i> are cut and trimmed correctly.</p> <p>1.2. Other sources of information are utilised when necessary to ensure specialised cuts meet the needs of customers.</p>
2. Select meat for specialised cuts	<p>2.1. Meat is selected in accordance with quality requirements of specialised cuts.</p> <p>2.2. Meat is selected from a minimum of two <i>species</i>.</p> <p>2.3. Meat is selected from bone-in primals</p>
3. Prepare specialised meat cuts	<p>3.1. Meat is cut according to customer and workplace requirements.</p> <p>3.2. Cuts are presented to <i>customer requirements</i>.</p>
4. Handle knife effectively	<p>4.1. Knife is handled safely, hygienically and effectively.</p>
5. Cost and price specialised cuts	<p>5.1. Specialised cuts are costed to include yield and labour costs.</p> <p>5.2. Specialised cuts are priced to meet <i>workplace requirements</i>.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
<p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<p>Ability to:</p> <ul style="list-style-type: none"> • establish customer requirements by questioning, active listening and clarifying of customer comments where applicable • seek advice from appropriate sources when developing new cuts • select and weigh meats for a range of specialised cuts • prepare specialised meat cuts to <i>Occupational Health and Safety (OH&S)</i> and hygiene requirements • identify sub-standard products and rectify as appropriate • apply <i>communication skills</i> relevant to the task

REQUIRED SKILLS AND KNOWLEDGE

- apply *mathematical skills* relevant to the task
- work individually and in a team
- *explain* food safety, Quality Assurance (QA) and product quality requirements for specialised cuts
- apply relevant OH&S and *regulatory requirements*

Required knowledge

- what specialised cuts are
- food safety, QA and product quality requirements for specialised cuts
- requirements for a range of specialised cuts according to workplace and customer requirements
- types of specialised cuts to meet customer requirements
- relevant OH&S and regulatory requirements
- why meat retailers sell specialised cuts
- why customers request specialised cuts
- costing and pricing calculations

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Candidates must be able to prepare specialised cuts from a minimum of two species.

Where the candidate does not prepare specialised cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

1. Sort and select carcase or meat product	<p>1.1. <i>Carcase</i> or <i>meat product</i> is sorted according to customer and workplace <i>specifications</i>.</p> <p>1.2. Contaminated carcasses or meat products are identified and corrective action is taken.</p> <p>1.3. Hygiene and sanitation requirements are followed in regard to selecting carcase or meat product.</p>
2. <i>Assess</i> carcase or meat product	<p>2.1. Carcase or meat product is assessed to verify that it meets <i>workplace</i> or market requirements.</p> <p>2.2. Carcase or meat product is assessed according to workplace requirements, customer specifications and industry requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select carcase or meat product to customer and workplace requirements
- apply relevant *regulatory requirements* for slicing
- record and communicate outcomes of carcase or meat product assessment according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- methods of assessing carcase or meat product according to specifications
- procedures for interpreting, recording and reporting mathematical and technical information such as that found on carcase tickets
- elements of the specification being utilised
- workplace, *Occupational Health and Safety (OH&S)*, and hygiene and sanitation requirements in relation to assessing and *measuring carcasses* or meat product

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- workplace observation
- verified work log or diary
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Carcass</i> may be described and recorded by:	<ul style="list-style-type: none"> • age (dentition) • butt shape • fat • sex • weight.
<i>Meat product</i> may include:	<ul style="list-style-type: none"> • carcass meat • primals (chilled, carton or product) • primals (fresh or unwrapped).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive <i>stock</i>	1.1. Carcases or cartons are weighed or checked on receipt in accordance with the number and quality ordered. 1.2. <i>Ticketing and labels</i> are checked to ensure they comply with <i>meat</i> ordered. 1.3. Meat quality is checked in accordance with workplace requirements. 1.4. Dry goods are received and checked to ensure they are in accordance with order placed. 1.5. Problems with receivals are recorded and reported in accordance with <i>workplace requirements</i> .
2. Check stock	2.1. Quantity of existing stock is determined in accordance with workplace requirements. 2.2. Meat is inspected to determine quality in accordance with health, hygiene and Quality Assurance (QA) requirements. 2.3. State of stock is communicated promptly to supervisor or manager. 2.4. Outdated or deteriorated stock is discarded in accordance with workplace requirements. 2.5. Future stock needs are determined in accordance with workplace requirements.
3. Participate in stocktake	3.1. Stocktaking and cyclical counts are assisted with, in accordance with workplace requirements. 3.2. Stock records <i>documentation</i> is completed in accordance with workplace stock control system. 3.3. Discrepancies in stock are recorded and reported. 3.4. Electronic recording equipment is operated and maintained according to manufacturer's specifications, as appropriate.
4. Re-order stock	4.1. Minimum stock levels are identified in accordance with workplace requirements. 4.2. Stock requisition forms or electronic orders are completed accurately. 4.3. Undelivered stock orders are identified on stock system and followed up without undue delay.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- receive incoming stock:
 - follow equipment and material requirements
 - follow health and hygiene requirements
 - follow workplace requirements
 - identify and minimise safety hazards
- use different types of weighing machines
- calibrate equipment correctly
- complete documentation for weighing and receipt of goods
- perform stock control tasks:
 - follow equipment and material requirements
 - follow health and hygiene requirements
 - follow workplace requirements
 - identify and minimise safety hazards
- work individually or with others to carry out tasks
- work with diverse individuals and groups
- apply relevant *Occupational Health and Safety (OH&S)* and regulatory requirements
- use relevant *communication skills*

Required knowledge

Knowledge of:

- principles of the relevant health acts and *regulatory requirements* in relation to stock control
- ageing process and the shelf life of various products
- bacterial process in ageing and deterioration of meat
- differences in quality of carcasses
- differences in types of *weighing machines*
- features and purpose of the stock control sheet
- indications of meat contamination, and workplace procedures for handling contamination
- principles and procedures of stock rotation
- procedures for meat disposal
- purpose of each item of data on invoices and delivery dockets

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stock may include:

- carton meats
- dry products, such as herbs and spices, skewers, netting, salt, flour, skins
- frozen goods
- pre-packaged goods
- whole carcasses
- sides of carcasses.

Ticketing and labels may include:

- AUS-MEAT language
- other processor specification data.

Meat is checked for:

- abnormal condition
- ageing
- ante-mortem trauma
- classification
- colour
- composition
- contamination
- fat colour and dimension
- fat depth
- muscle
- post-mortem trauma
- weight.

Workplace requirements may include:

- enterprise-specific procedures and ethical standards
- Standard Operating Procedures (SOPs)

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide information on products and services	<p>1.1. Customer is accurately and courteously advised on products and services which are relevant to customer requirements.</p> <p>1.2. Information is provided on handling products, <i>cooking requirements</i>, presentation to the consumer, and a <i>range of catering needs</i> as appropriate.</p> <p>1.3. Customer is offered alternative products or services, or advice on how to obtain same when requested item is not available.</p>
2. Satisfy customer needs	<p>2.1. Range of products and services is discussed with customer, which allows for informed decision making by the customer.</p> <p>2.2. Products or services are recommended to meet customer needs.</p> <p>2.3. Products or services are sold in accordance with customer's budget, preferred products and their availability.</p>
3. Deal with customer complaints	<p>3.1. Complaints and grievances are dealt with courteously and efficiently to the satisfaction of the customer.</p> <p>3.2. Customer complaints referred from other staff are dealt with according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply *communication skills* appropriate to the task
- apply *mathematical skills* appropriate to the task
- demonstrate a variety of sales techniques
- *explain* different methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product
- provide accurate advice in a courteous manner to customers on the use of products

REQUIRED SKILLS AND KNOWLEDGE

and services

- provide advice on cooking meat products as required
- provide clear descriptions and advice to customers, demonstrating use of appropriate language and showing sensitivity to cultural differences
- suit advice to customer needs
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- handle information from external clients with discretion and confidentiality
- refer customers to a more experienced team member if unable to meet their needs
- demonstrate effective interpersonal skills in providing advice to customers and when handling complaints
- work with team members
- apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*

Required knowledge

Knowledge of:

- catering needs, new lines, menus or recipes, portion requirements, cooking, carving and meat presentation
- products and services to suit customer needs
- methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product
- enterprise ethical and customer service standards
- relevant OH&S, regulatory and workplace requirements
- sources of information to further meet customer needs
- products and explain how they may be cooked and served

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- acknowledge customer's presence
- greet customer
- establish customer needs by enquiring, listening and summarising
- apply *communication* skills appropriate to the task
- demonstrate suitable behaviour by attending to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically, and maintaining professional standards of dress and personal hygiene
- *explain* cooking times and temperatures for roasting and microwaving meat to achieve rare, medium and well-done
- provide advice on the nutritional role of meat as appropriate
- follow up customer enquiries
- assist other staff to provide advice to customers when able
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- maintain currency of reference materials and information to give to customers
- refer customers to more experienced or knowledgeable staff member, when

REQUIRED SKILLS AND KNOWLEDGE

required

- relay information to customer

Required knowledge

Knowledge of:

- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium and well-done
- dry cooking techniques
- major nutrients required for a healthy diet
- meat cuts which are suitable for microwave cooking techniques
- workplace customer service standards, complaints policy and procedures
- sources of information on new cooking techniques
- major nutrients found in meat
- meat cuts recommended by the National Heart Foundation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Price and weigh products for <i>display</i>	1.1. Products are accurately weighed. 1.2. Products are priced accurately to <i>workplace requirements</i> . 1.3. Price tickets are placed on products in accordance with workplace requirements. 1.4. Prices are marked on pre-packaged trays.
2. Arrange <i>meat</i> for display	2.1. Meat is trimmed for display purposes in accordance with workplace, hygiene and regulatory requirements. 2.2. Meat is arranged on trays according to workplace, hygiene and <i>regulatory requirements</i> .
3. Layout cabinets to display products and services	3.1. Meat, <i>trays</i> and other products are displayed in window and cabinets in accordance with workplace, hygiene and regulatory requirements. 3.2. Trays are laid in window to take most advantage of colour and design and in accordance with workplace, hygiene and regulatory requirements. 3.3. Meat and other products are displayed to ensure maintenance of product quality and food safety. 3.4. Cabinets and windows are regularly replenished with stock to maintain presentation. 3.5. Trays are interspersed with other products and garnishing to provide attractive display in accordance with workplace requirements, hygiene and regulatory requirements. 3.6. Layout reflects advertising and seasonal promotions.
4. <i>Maintain stock</i> presentation	4.1. Meat and other products are displayed to ensure maintenance of product quality and safety. 4.2. Cabinets and windows are regularly replenished with stock to maintain presentation.
5. Position displays for impulse buying	5.1. Key positions to place displays for maximum sales effect are identified. 5.2. Local, cultural and ethnic needs, seasons or events are identified. 5.3. Displays are planned and prepared in accordance with workplace requirements.
6. Organise signs and tickets	6.1. Signage, labels and price tickets are displayed visibly and legibly, with accurate information. 6.2. Signage, labels and price tickets are correctly

ELEMENT	PERFORMANCE CRITERIA
	placed.
7. Wrap meat and other products for display	7.1. Meat is wrapped and/or packed for display in accordance with health and workplace requirements.
8. <i>Contribute to the development of workplace marketing and merchandising strategy</i>	8.1. Workplace promotional activities are participated in. 8.2. Promotional events and strategies to be conducted within the workplace are recommended to the manager.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- plan a display:
 - follow health and hygiene requirements
 - plan a cabinet layout
 - plan window displays
 - select products to be displayed
- trim meat for display purposes
- portion products in display to increase sales of particular items
- weigh products accurately
- label products according to workplace and regulatory requirements
- mark prices on stock to match stock records
- demonstrate the effective and attractive laying out of a cabinet or window according to a pre-determined plan
- position displays to gain attention of customers
- demonstrate a range of merchandising strategies
- explain a range of advertising and seasonal promotions
- work with team members to carry out tasks
- evaluate effectiveness of display for selling products
- apply relevant *Occupational Health and Safety (OH&S) requirements*
- use *communication skills* appropriate to the task
- use *mathematical skills* appropriate to the task

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- key positions to display products for maximum sales effect
- merchandising strategies
- methods of maintaining product quality of displays
- workplace policy for cabinet and window displays
- relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be

EVIDENCE GUIDE	
	higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Displays</i> may:	<ul style="list-style-type: none"> • be based on <ul style="list-style-type: none"> • customer preference, including cultural and ethnic needs • excess stock • national or local promotional campaigns • new product lines • supplier or shop specials • include <ul style="list-style-type: none"> • complementary product • condiments • dry products • fixed displays • fixtures • free standing displays and display bins • garnishes • ice • margarines and butter carvings • menu boards • signs • ticket • window displays.
<i>Workplace requirements</i> may	<ul style="list-style-type: none"> • enterprise-specific procedures

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Meat</i> may be weighed on a variety of analogue and digital weighing machines.	
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
<i>Tray</i> packing may include:	<ul style="list-style-type: none"> • bulk packing • fat to left presentation • fat to right presentation • left and right presentation • pre-packing.
<i>Maintainance</i> of adequate display <i>stock</i> may include:	<ul style="list-style-type: none"> • both wet and dry products • cabinets • temperature control to meet health regulations • temperature controlled displays • window cabinets.
<i>Contribution to development of workplace marketing and merchandising strategy</i> may include:	<ul style="list-style-type: none"> • demonstrating promotional products and services • distributing pamphlets and menu ideas • idea generation • packaging.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties • speaking clearly and directly • the use of communications technology • own work and the wider work area • reading and interpreting workplace documentation.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • use of calculators and computer software packages may be used • estimation and calculation • use of familiar and unfamiliar complex formulas • product formulations and specifications • interpreting and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts • monitoring, adjusting and calibrating of formula, specifications, outputs and equipment • synthesis and analysis of mathematical information from more than one source.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and operate processing equipment used in producing <i>value-added products</i>	1.1. Processing equipment is prepared and operated according to hygiene, and health and safety requirements. 1.2. Faults are identified in line with manufacturer and <i>workplace requirements</i> . 1.3. Equipment is used according to manufacturer, workplace and <i>Occupational Health and Safety (OH&S) requirements</i> . 1.4. Start-up and shut-down procedures are performed according to manufacturer and workplace requirements.
2. Clean processing equipment	2.1. Equipment is cleaned to manufacturer's, OH&S, hygiene and workplace requirements.
3. Follow recipe	3.1. Recipes are followed to prepare and produce value-added products to product specifications.
4. Select <i>ingredients</i> for formulation of value-added products	4.1. Ingredients are selected in accordance with recipes, policy and practice, and <i>regulatory requirements</i> . 4.2. Ingredients are weighed in accordance with recipe specifications and regulatory requirements. 4.3. Ingredients are labelled according to workplace and regulatory requirements.
5. Prepare meat, stuffings, seasonings and force meat for value-added products	5.1. Meat is prepared according to recipes, policy and practice. 5.2. Stuffings, seasonings and force meat are prepared in accordance with recipes, policy and practice.
6. Prepare marinades, sauces, and glazes for value-added product	6.1. Marinades, sauces and glazes are prepared in accordance with recipes, policy and practice.
7. Mix ingredients	7.1. Ingredients are weighed in accordance with recipe requirements. 7.2. Ingredients are added to meat according to recipes, product specifications and regulatory requirements. 7.3. Ingredients are blended to achieve product consistency according to recipes and product specifications.
8. Produce value-added products	8.1. Product is formulated according to product specifications. 8.2. Product is presented according to product specifications and policy and procedures.

ELEMENT	PERFORMANCE CRITERIA
	8.3. Pastry types are used correctly to recipes and workplace requirements. 8.4. Meat is skewered according to recipes and workplace requirements.
9. Store products and ingredients	9.1. Product is stored according to workplace and regulatory requirements. 9.2. Ingredients are stored according to workplace and regulatory requirements. 9.3. Shelf life of products is identified and appropriate action taken. 9.4. Effects of ingredients on shelf life are identified and appropriate action taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- make adjustments to equipment when necessary according to manufacturer's, workplace and OH&S requirements
- **describe** shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- **explain** the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use **communication skills** appropriate to the task
- use **mathematical skills** as required for production of value-added products
- estimate measures to verify calculations

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending
- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace, OH&S and hygiene requirements related to producing value-added products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace assignment
- workplace referee or third-party report of

EVIDENCE GUIDE	
	<p>performance over time.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare work bench for use	1.1. Work bench is cleared of other species and products. 1.2. Work bench is cleaned in accordance with <i>hygiene</i> and <i>workplace requirements</i> .
2. Bone <i>poultry</i>	2.1. Poultry is secured for boning. 2.2. Poultry is <i>boned</i> to maximise yield using hand knives to workplace and hygiene requirements.
3. Separate poultry into <i>bone-in products</i>	3.1. Poultry is secured for cutting. 3.2. Poultry is separated into a range of bone-in products to workplace and hygiene requirements.
4. Identify and separate contaminated product	4.1. Product is checked for contamination and non-compliance to workplace and hygiene requirements. 4.2. Contaminated or non-compliant product is separated and corrective action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- cut product according to workplace, *Occupational Health and Safety (OH&S)* and hygiene requirements
- demonstrate correct cutting, slicing and trimming techniques
- demonstrate cutting lines to produce cuts to workplace requirements
- demonstrate safe and effective knife skills
- bone poultry safely, effectively, and with consideration for maximising yield
- demonstrate the ability to work with team members
- *explain* hygiene requirements specific to poultry (e.g. salmonella risk)
- operate and clean *equipment* according to workplace requirements
- remove defects from products according to workplace, hygiene and *regulatory requirements*
- use *communication* skills appropriate to the task

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- hygiene requirements specific to poultry (salmonella risk)
- boning procedure
- OH&S implications of the slippery and moist nature of poultry

- workplace assignment
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hygiene requirements may include:

- hygiene requirements specific to poultry
- relevant government regulations
- workplace requirements.

Workplace requirements may include:

- enterprise-specific requirements
- Standard Operating Procedures (SOPs)
- work instructions.

Poultry may include:

- chickens
- ducks
- geese
- pheasant
- quail
- turkeys.

Boned products may include:

- breast fillets
- tenderloins
- thigh fillets
- trimmings.

Bone-in products may include:

- breasts
- drumsticks
- lovely legs
- marylands
- mini-drummies
- thighs
- wings.

RANGE STATEMENT	
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs/muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Explanations</i> may:	<ul style="list-style-type: none"> • be presented orally, in writing using standard formats or using a range of communications technology and media • include information from several sources • present information in diagrammatic, tabular, graphic or pictorial formats • require summaries of information for presentation to work colleagues • use workplace, mathematical and technical language.
<i>Equipment</i> may include boning cones.	
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • relevant Australian Standards • state and territory regulations regarding meat processing and food handling.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties • speaking clearly and directly • the use of communications technology • relate to own work and the wider work area

RANGE STATEMENT	
	<ul style="list-style-type: none"> reading and interpreting workplace documentation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Cost <i>product</i>	1.1. Cost price of product is calculated.
2. Price product to achieve business <i>goals</i>	2.1. Prices are calculated to achieve enterprise sales, stock and profitability targets.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- alter electronic scales to show correct sales price
- apply *mathematical skills* appropriate to the task
- calculate margins required to return gross profit targets
- calculate product cost price based on invoice price and cost price based on yield
- calculate sale price to achieve required return according to enterprise targets and goals
- *explain* concepts of 'break even point', and 'gross' and 'net profit' margins
- apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- identify *overhead cost per kilogram*
- mark ticket prices to show correct sales price
- use *communication skills* relevant to the task

Required knowledge

Knowledge of:

- concepts of 'break even point', and 'gross' and 'net profit' margins
- reasons for prices calculated to achieve more than or less than gross profit margin
- relevant OH&S, regulatory and workplace requirements
- elements contributing to the total cost of the product (total cost of purchase, preparing or selling product)

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may include:

- Bone-in, bone out, sliced or trimmed meat
- smallgoods
- value-added products.

Targets and ***goals*** may include:

- customer targets including return custom, average purchase per customer, specific product purchase
- market share
- returns and profits , including variable net or gross profit margins on selected items and total product range
- stock targets including product mix ratios and levels, sale of surplus product or stock.

Mathematical skills may include:

- the use of calculators and computer software packages
- estimation and calculation
- the use of familiar and unfamiliar complex formula
- product formulation and specification
- interpretation and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts
- monitoring, adjusting and calibrating formula, specifications, outputs and equipment
- synthesis and analysis of mathematical information from more than one source.

RANGE STATEMENT	
Explanations may:	<ul style="list-style-type: none"> • be presented orally, in writing using standard formats or using a range of communications technology and media • include information from several sources • present information in diagrammatic, tabular, graphic or pictorial formats • require summaries of information for presentation to work colleagues • use workplace, mathematical and technical language.
Gross profit is based on fixed and variable overheads (including wages and salaries, sole proprietor drawings) and net profit requirements of the business.	
Gross profit is based on:	<ul style="list-style-type: none"> • fixed and variable overheads, including wages and salaries, sole proprietor drawings, and net profit requirements of the business.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • head-wear • mesh aprons • protective boot covers • uniforms • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Slice primal cuts to <i>portion control</i> specifications	1.1. Cuts are selected to <i>customer specifications</i> to maximise yield. 1.2. Cuts are sliced to specified weight tolerances and for maximum yield. 1.3. Cuts are sliced to <i>workplace, hygiene</i> and Quality Assurance (QA) requirements.
2. Handle knife effectively	2.1. Knife is handled safely, hygienically and effectively.
3. Package and label cuts to specifications	3.1. Cuts are packaged to customer specifications and workplace requirements. 3.2. Cuts are labelled to customer specifications and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select primal cuts for maximum yield and suitability to portion control specification
- demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two *species*
- demonstrate safe use of bandsaw, as required
- demonstrate sorting procedures to gain maximum yield
- explain and demonstrate hygiene standards and procedures for preparing portion control cuts
- explain and demonstrate QA standards and procedures for preparing portion control cuts
- slice portions evenly
- apply *mathematical skills* relevant to the task
- *explain* and demonstrate correct procedure for achieving and maintaining weights while cutting
- identify sub-standard product and rectify appropriately
- demonstrate the ability to listen actively and ask questions to confirm

REQUIRED SKILLS AND KNOWLEDGE

- understanding when customers are explaining new cuts and/or specifications
- work with team members
- explain and demonstrate sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- apply *Occupational Health and Safety (OH&S)* and *regulatory requirements*
- use *communication skills* relevant to the task

Required knowledge

Knowledge of:

- correct procedure for achieving and maintaining weights while cutting
- hygiene standards and procedures for preparing portion control cuts
- QA standards and procedures for preparing portion control cuts
- sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- pre-portioning processes
- criteria for selection of meat to suit specification
- hygiene requirements for preparation of cuts
- portion specification
- quality requirements for preparation of cuts
- relationship between primal cut size, dimensions, order specification and yield
- value of off-cuts
- OH&S and regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Candidates must be able to demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two species.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace assignment
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

EVIDENCE GUIDE	
	language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply *problem-solving skills* where necessary
- work with team members and individually
- demonstrate *communication* and *mathematical skills* in regard to:
 - maintaining delivery and supply records
 - maintaining stock ordering and recording system
 - processing or raising stock orders
 - stock distribution records
- apply workplace requirements in regard to:
 - current and future stock levels
 - existing suppliers
 - quality control procedures and requirements
 - range of stock

REQUIRED SKILLS AND KNOWLEDGE

- workplace merchandising and marketing
- apply relevant *Occupational Health and Safety (OH&S)* and *regulatory requirements*

Required knowledge

Knowledge of:

- workplace requirements in regard to:
 - current and future stock levels
 - existing suppliers
 - quality control procedures and requirements
 - range of stock
 - workplace merchandising and marketing
- relevant OH&S and regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's instructions or operations manuals
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- simulation
- workplace project
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design and complete statistical tables and charts	<p>1.1. <i>Frequency tables and charts</i> are designed to record and present statistical information.</p> <p>1.2. Statistical tables and charts are analysed to provide a description and interpretation of their contents.</p>
2. <i>Calculate</i> measures of central tendency	2.1. <i>Measures of central tendency</i> are calculated and used to explain the average of a set of data.
3. Calculate measures of dispersion	3.1. <i>Measures of dispersion</i> are calculated and used to explain the pattern of variation of data.
4. <i>Graph</i> statistical data	<p>4.1. Graphs are structured to <i>present meat processing data</i> in a form suitable for analysis and interpretation.</p> <p>4.2. Meat processing performance and trends are interpreted from graphs.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- accurately calculate averages, average range and standard deviation
- consistently use estimation processes
- consistently use mathematical processes
- consistently use mathematical symbols and diagrams
- consistently prepare and interpret statistical charts and tables including frequency charts and tables.
- consistently prepare and interpret graphs
- apply relevant *Occupational Health and Safety (OH&S), regulatory and workplace requirements*
- use relevant *communication skills*

Required knowledge

Knowledge of:

- estimation processes

REQUIRED SKILLS AND KNOWLEDGE

- mathematical processes
- mathematical symbols and diagrams
- purpose and structure of statistical charts and tables including frequency charts and tables
- purpose and structure of graphs
- purpose of calculating averages
- purpose of measuring the dispersion of values
- relevant OH&S, regulatory and workplace requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under typical operating conditions for the enterprise and within the parameters of the role and responsibilities.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Resources may include:

- a real work environment
- calculations as required
- conversion charts used in the workplace
- formulae to calculate mean, mode and median, range and standard deviation
- relevant documentation such as:
 - manufacturer's instructions and operations manuals
 - regulatory requirements
 - work procedures including advice on safe work practices, food safety and environmental

EVIDENCE GUIDE	
	<p>requirements</p> <ul style="list-style-type: none"> • workplace policies and procedures • relevant equipment and materials • statistical process control charts or similar records • work tasks requiring calculation of averages and deviation • workplace forms, documents, charts and graphs used for recording data.
Method of assessment	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • assignments • simulation • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	<p>A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Frequency tables and charts</i> may include:</p>	<ul style="list-style-type: none"> • histograms • pie charts • statistical tables.

RANGE STATEMENT	
<i>Calculations</i> may be:	<ul style="list-style-type: none"> made manually or by calculator.
<i>Measures of central tendency</i> (averages) include:	<ul style="list-style-type: none"> mean mode median.
<i>Measures of dispersion</i> include:	<ul style="list-style-type: none"> range and standard deviation.
<i>Graphs</i> may be:	<ul style="list-style-type: none"> designed manually or through the use of computer-based systems.
<i>Meat processing data is presented</i> in accordance with:	<ul style="list-style-type: none"> company procedures industrial awards and agreements legislative requirements licensing requirements.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> enterprise OH&S policies, procedures and programs OH&S legal requirements Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> coats and aprons ear plugs or muffs eye and facial protection head-wear lifting assistance mesh aprons protective boot covers protective hand and arm covering protective head and hair covering uniforms waterproof clothing work, safety or waterproof footwear requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements relevant Australian Standards state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the <i>MSA system</i>	1.1. MSA grading system is described. 1.2. Factors that affect eating quality are identified. 1.3. Product is cut correctly for each approved cooking method. 1.4. Product categories in line with AUS-MEAT and <i>MSA requirements</i> are identified.
2. Describe the <i>licensing requirements</i> for an MSA end user	2.1. MSA Standards Manual for Trade Mark Usage is used appropriately. 2.2. Carton end panels and butcher body labels are interpreted accurately. 2.3. MSA customer complaint system is described.
3. Explore increased value through the seaming out of primals	3.1. Beef primals and sub-primal cuts are identified. 3.2. Beef primals are value-added by seaming into individual muscles. 3.3. Product is prepared according to MSA approved eating quality and cooking methods.
4. Investigate potential profits through seaming of primals into sub-primals	4.1. Variation in yield differences between preparing product traditionally versus value-adding through seaming is investigated. 4.2. Gross profit of preparing product traditionally versus value-adding through seaming is investigated. 4.3. Differences in portion sizes between traditionally prepared product and value-added product are demonstrated.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • seam the following primals into muscles: <ul style="list-style-type: none"> • blade • knuckle

REQUIRED SKILLS AND KNOWLEDGE

- rump
- investigate gross profit percentages of selling primal cuts seamed versus traditionally sliced
- work effectively as an individual and as part of a team
- demonstrate active listening in relation to customer complaints
- complete an MSA customer complaint form and provide all necessary information
- apply relevant *Occupational Health and Safety (OH&S)*, *regulatory* and *workplace requirements*
- use relevant *communication skills*

Required knowledge

Knowledge of:

- differences between the MSA grading system and other international grading systems
- key elements of the MSA program
- relationship between pricing and eating quality
- taste test panel system on which the MSA is based
- relevant OH&S, regulatory and workplace requirements
- primals that have variable eating quality
- sources of information on the MSA program
- failure rate of beef
- MSA approved cooking methods and describe their preparation requirements
- value-added options using muscle seaming
- variables that impact on eating quality

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare , operate and clean processing equipment used for curing and corning product	1.1.Processing equipment is prepared according to manufacturer specifications , and Occupational Health and Safety (OH&S) , hygiene and workplace requirements . 1.2.Processing equipment is operated according to manufacturer specifications, and OH&S, hygiene and workplace requirements. 1.3.Processing equipment is cleaned according to manufacturer specifications, and OH&S, hygiene and workplace requirements.
2. Prepare meat	2.1.Meat is selected according to product specifications. 2.2.Meat is prepared according to product specifications, and hygiene and workplace requirements.
3. Prepare ingredients	3.1.Ingredients are selected and prepared according to product specifications, and hygiene and workplace requirements.
4. Prepare brines	4.1.Required amount of water and other liquid and solid additives are added in correct order and mixed according to product specifications, and hygiene and workplace requirements. 4.2.Brine solutions are prepared according to product specifications, and hygiene and workplace requirements. 4.3.Hydrometer (salinometer) is used to check brine solution.
5. Process meat	5.1.Meat is cured or corned according to product specifications, health regulations and workplace requirements at a speed appropriate for production requirements. 5.2.Processing is regularly monitored. 5.3.Adjustments are made to processing as required to achieve product specifications.
6. Store meat product	6.1.On completion of processing, product is stored according to product specifications, and hygiene, regulatory and workplace requirements.
7. Sell meat product	7.1. Information , including cooking, storage and serving suggestions, is provided to customers on meat product. 7.2.Product is promoted to customers.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- activate processing equipment to assess its readiness for operational use
- follow recipes and procedures accurately
- *explain* the curing and corning processes for a variety of meat products
- mix curing ingredients for required length of time
- perform running adjustments according to workplace requirements and manufacturer specifications
- pump meat to increase original weight according to workplace requirements
- pump meat correctly to avoid air pockets
- demonstrate the correct pickling procedure, according to product specifications and workplace requirements
- perform curing and corning according to workplace, OH&S, hygiene and regulatory requirements
- wash residue from cured meats following removal from holding brine
- identify sub-standard product and address the problem according to workplace requirements
- operate adjustment tools and equipment correctly
- seek advice from appropriate sources when working with new products or equipment
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer specifications
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- the term 'osmosis' in relation to the curing process
- different salts, cures and brines used in the curing process

REQUIRED SKILLS AND KNOWLEDGE

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- purpose and effect of brine on meat
- safe and correct operation of processing equipment
- health regulations that apply to curing and corning meats
- curing and corning processes for a variety of meat products
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- meat cuts used in curing and corning
- various ingredients for curing meat and their use and purpose
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time under typical operating conditions.

Where the candidate does not cure or corn meat product in their usual place of work they must complete the requirements of the Unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Resources may include:

- real work environment
- relevant documentation, such as:
 - manufacturer instructions or operations manuals
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

EVIDENCE GUIDE	
Method of assessment	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • quiz of underpinning knowledge • simulation • workplace demonstration • workplace referee or third-party report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Preparing</i> of equipment includes:	<ul style="list-style-type: none"> • programming automatic machines to specifications, where applicable.
<i>Equipment</i> and machinery used in processing may include:	<ul style="list-style-type: none"> • automatic injector machine (Injectomat) • massagers • pumping equipment.
<i>Product</i> may include:	<ul style="list-style-type: none"> • beef (e.g. brisket, silverside and tongue) • game meat • lamb (e.g. legs and tongue) • mutton • pork (e.g. hand and spring)

RANGE STATEMENT	
	<ul style="list-style-type: none"> veal.
<i>Specifications</i> may vary according to:	<ul style="list-style-type: none"> customer and workplace requirements.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> enterprise OH&S policies, procedures and programs OH&S legal requirements Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> coats and aprons ear plugs or muffs eye and facial protection head-wear lifting assistance mesh aprons protective boot covers protective hand and arm covering protective head and hair covering uniforms waterproof clothing work, safety or waterproof footwear requirements set out in standards and codes of practice.
<i>Hygiene and sanitation requirements</i> may include:	<ul style="list-style-type: none"> relevant government regulations workplace requirements.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> enterprise-specific requirements OH&S requirements Quality Assurance (QA) requirements Standard Operating Procedures (SOPs) performing the task to production requirements work instructions.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption federal, state and territory regulations regarding meat processing.

RANGE STATEMENT	
Information on meat product may include:	<ul style="list-style-type: none"> • dietary information, including kilojoules per average serving size • identifying allergies associated with cures, brines and salts used in product • identifying ingredients and preservatives in meat product • interpreting nutritional panels • recommendations for alternative products.
Explanations may:	<ul style="list-style-type: none"> • be presented orally or in writing using standard formats • include information from several sources • present information in diagrammatic, tabular, graphic or pictorial formats • require summaries of information for presentation to work colleagues • use a range of communications technology and media • use workplace, mathematical and technical language.
Communication skills may include:	<ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds, and with colleagues, superiors, customers, clients and external parties • empathising with customers and work colleagues • interpreting the needs of internal and external customers • listening and understanding, and speaking clearly and directly • reading and interpreting workplace documentation • the use of negotiation, persuasion and assertiveness skills • own work area and wider work area • sharing of information • writing to audience needs.
Mathematical skills may include:	<ul style="list-style-type: none"> • accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas • interpreting and drawing conclusions from routine charts, bar graphs and pie charts • operations involving percentages, comparisons

RANGE STATEMENT	
	and variations <ul style="list-style-type: none"> • reading and interpreting analogue and digital measures, including scales, pressured gauges and thermometers • routine estimations and calculations using a range of specified formulas and procedures • using calculators and computer software packages.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify <i>poultry cuts</i>	1.1. Poultry cuts are identified by cut name and <i>species</i> according to <i>specifications</i> and <i>workplace requirements</i> .
2. Sort and select poultry product	2.1. Poultry product is sorted according to customer and workplace specifications. 2.2. Poultry cuts are selected by cut name and species according to workplace requirements. 2.3. Contaminated product is identified and corrective action is taken. 2.4. Hygiene and sanitation requirements are followed in regard to selecting product.
3. <i>Assess</i> poultry product	3.1. Product is assessed for shelf life expectancy. 3.2. Product is assessed according to workplace requirements, customer specifications and industry requirements.
4. Identify and separate contaminated product	4.1. Product is checked for contamination and non-compliance to workplace and hygiene requirements. 4.2. Contaminated or non-compliant product is separated and corrective action is taken.
5. Sell poultry product	5.1. <i>Information</i> , including cooking, storage and serving suggestions, is provided to customers on poultry products. 5.2. Product is promoted to customers.
6. Store poultry product	6.1. Poultry is stored according to hygiene and sanitation, regulatory and workplace requirements. 6.2. Poultry is stored under correct conditions and temperatures to maintain quality, extend shelf life, and maximise appearance and eating quality.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- identify poultry cuts according to label on cartons as appropriate
- select cuts correctly by species and cut according to workplace requirements
- select poultry to customer and workplace requirements
- identify cuts correctly by species and cut, according to workplace specifications
- remove defects from products according to workplace, hygiene and regulatory requirements
- record and communicate outcomes of poultry product assessment according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements in relation to selling poultry
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- normal causes of contamination of poultry
- hygiene requirements specific to poultry (e.g. salmonella risk)
- methods of assessing poultry according to specifications
- legislation regarding growth promotants in poultry
- OH&S implications of the slippery and moist nature of poultry
- difference between growth promotants and antibiotics
- difference between organic, free range and conventional poultry products
- procedures for interpreting, recording and reporting mathematical and technical information, such as that found on carton labels
- workplace, *Occupational Health and Safety (OH&S)*, and hygiene and sanitation requirements in relation to assessing poultry
- relevant *regulatory requirements* in relation to selling poultry

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Break carcass into <i>primal cuts</i>	Carcass is accurately separated into primal cuts according to <i>workplace, Occupational Health and Safety (OH&S), Quality Assurance (QA) and hygiene requirements.</i>
2. Handle knife effectively	Knife is handled safely, hygienically and effectively.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare equipment for breaking carcass correctly and safely
- position or fasten carcass securely for separation
- demonstrate the separation of carcass into primal cuts on a range of meat cuts for a minimum of three *species* including beef, sheep and one other species, according to workplace, OH&S, and hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- demonstrate safe manual-handling techniques
- apply relevant *communication* skills
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- sanitise equipment according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- hygiene, OH&S or workplace requirements when breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts
- primary *cut specifications* for beef, sheep and one other species

REQUIRED SKILLS AND KNOWLEDGE

- | |

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate cuts on a carcase	1.1. Primal cuts are located on a carcase by cut name and species according to workplace requirements and specifications. 1.2. Meat cuts are located on a carcase by cut name and species according to workplace requirements and customer specifications. 1.3. Specialised cuts are located on a carcase by cut name and species according to workplace requirements and customer specifications.
2. Identify cuts	2.1. Meat cuts are identified on a carcase by cut name and species according to workplace requirements and customer specifications. 2.2. Meat cuts are identified on primals in cartons by cut name and species according to workplace requirements and customer specifications. 2.3. Cutting lines for meat cuts are correctly identified on primals according to workplace requirements and customer specifications. 2.4. Cutting lines for primal cuts are correctly identified on a carcase according to workplace requirements and customer specifications.
3. Assess cuts	3.1. Meat cuts are assessed for quality to workplace requirements and customer specifications. 3.2. Meat cuts are assessed against cut specifications to workplace requirements. 3.3. Primal cuts are assessed for quality to workplace requirements and customer specifications. 3.4. Primal cuts are assessed against cut specifications to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- demonstrate safe manual-handling techniques
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- apply relevant *communication* skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- *hygiene* and *Occupational Health and Safety (OH&S) requirements* for breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts
- sequence for breaking carcasses
- relevant *regulatory requirements*
- acceptable cutting lines to produce primary cuts to workplace requirements
- primary cut specifications for beef, sheep and one other species
- major anatomical structures of the carcass of each species

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time under typical operating conditions.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

Resources may include:

- charts and diagrams for cuts
- specifications for primal cuts.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- simulation
- workplace demonstration of competency for the assessor
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research local markets to determine potential customer needs	<p>1.1. <i>Local demographics</i> are investigated and purchasing <i>preferences/requirements</i> interpreted.</p> <p>1.2. Current product lines, brands and suppliers are reviewed to determine match to local preferences/requirements.</p> <p>1.3. Current and alternative suppliers are researched to ensure local requirements can be met.</p> <p>1.4. Alternative product lines are reviewed to <i>determine economic viability</i> of introduction.</p>
2. Recommend new products to manager	<p>2.1. New product line possibilities are prioritised.</p> <p>2.2. Research is <i>reported</i> to supervisors/managers.</p> <p>2.3. New product lines or suppliers are recommended to managers, with support from market research.</p>
3. <i>Promote product features</i> to customers	<p>3.1. Customers are informed of special features of product lines.</p> <p>3.2. Product features that meet local requirements and preferences are promoted.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- undertake market research, including determining:
 - demographic make-up of local area
 - specific religious needs of local area, such as halal or kosher meats
 - specific cuts of meat preferred by major local cultural groups
 - preferences for organic meats
 - preferences for value-added products or basic meat cuts
 - more sophisticated expectations of product such as brands that promote good animal welfare practices, environmentally-friendly production and processing, Australian made and owned products
 - preferences for particular species, including game meat

REQUIRED SKILLS AND KNOWLEDGE

- prices they are prepared to pay for meat
- what is sold by competitors
- use appropriate research methodology, such as internet research, questionnaires, observations, conversations with customers, other local residents, local council data, suppliers or other industry members, existing market research data
- research suppliers and brands for product features and supply chain policies and practices
- seek advice from appropriate sources when introducing/investigating new product lines
- apply communication skills relevant to the task
- apply mathematical skills to determine economic viability of various product lines
- apply relevant Occupational Health and Safety (OH&S) and regulatory requirements
- report findings and make recommendations based on market research and accurate cost/price/profit calculations to senior staff members
- provide sound information to customers about product lines, brands and supply chain, using appropriate language and showing sensitivity to cultural differences
- research and follow cutting specifications for non-standard meat cuts
- provide sound information to customers on link between specialised brands and product cost
- demonstrate effective interpersonal skills in providing advice to customers
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- take action to improve own work performance as a result of self evaluation, feedback from others or changes in work practices, legislation or technology

Required knowledge

Knowledge of:

- requirements of whole of supply-chain practices required for a product to achieve brandings such as RSPCA, free-range, organic, environmeat and MSA
- range of species, including game
- difference between dry-aged and wet-aged meat
- requirements of whole of supply-chain practices required for a product to meet religious requirements such as halal (for Muslim consumers) or kosher (for Jewish consumers)
- enterprise ethical and customer service standards
- relevant OH&S requirements such as:
 - enterprise OH&S policies, procedures and programs
 - OH&S legal requirements
 - Personal Protective Equipment (PPE) which may include:
 - coat and apron
 - head-wear

REQUIRED SKILLS AND KNOWLEDGE

- uniforms
- work, safety or waterproof footwear
- requirements set out in standards, codes of practice etc.
- workplace requirements, such as:
 - enterprise-specific procedures and ethical standards
 - Standard Operating Procedures (SOPs)
 - work instructions
- relevant regulatory requirements such as:
 - federal and state regulations regarding meat processing and food handling
 - hygiene and sanitation requirements
 - relevant Australian Standards
- sources of information to further meet customer needs and expectations
- features of new and existing product lines
- mathematical formulas for determining product selling prices
- problem-solving techniques

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

- Recommended methods of assessment include:
- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

local demographics include:

Social make-up of local community (e.g. residents, shoppers, workers) such as:

- age
- sex
- marital/family status
- socio-economics
- culture
- religion.

preferences/requirements and product features may include:

- meat processed according to religious requirements (e.g. Halal or Kocher)
- preferences for species
- preferences for specific or specialised cuts
- preferences for particular cooking methods
- cost
- value-added or cook-and-serve meals
- packaging
- organic meat
- gourmet product
- convenience (ability to buy whole meal in one location)
- free-range meat and eggs
- dry-aged or wet aged product
- social responsibility of supply chain, including animal welfare practices,

RANGE STATEMENT	
	environmentally friendly practices, employee-welfare practices and human rights policies.
<i>determining economic viability</i>	<ul style="list-style-type: none"> • means to determine whether a product can be produced and sold at a price that: <ul style="list-style-type: none"> • the customer is willing to pay • the enterprise will make an acceptable profit margin • can be determined using mathematical skills that may involve: <ul style="list-style-type: none"> • estimation and calculation • the use of calculations and computer software packages • the use of familiar and unfamiliar complex formulas • relate to product formulation, yield and costing and pricing • require interpretation and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts • require synthesis and analysis of mathematical information from more than one source.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive, handle and store <i>samples</i>	1.1. Samples are registered upon receipt in accordance with quality and <i>workplace procedures</i> . 1.2. Labelling and history of sampling are checked in accordance with laboratory procedures. 1.3. Sample information is recorded and cross-referenced with current or previous test data according to workplace requirements. 1.4. Universal precautions and relevant legislative requirements are observed during the handling and storage of all samples. 1.5. <i>Samples requiring analysis by external laboratories</i> are recorded and forwarded following workplace procedures. 1.6. Unwanted samples are disposed of in accordance with workplace and hygiene standards.
2. Prepare for sample collection	2.1. Type of sample required is confirmed prior to collection. 2.2. Prescribed procedures to ensure representative sampling are followed and details recorded to workplace requirements. 2.3. Appropriate sampling equipment is prepared or assembled to safety and workplace requirements.
3. Perform sample collection	3.1. Gross samples are collected in accordance with workplace procedures. 3.2. Sample integrity is preserved throughout all aspects of sampling. 3.3. Samples are placed in suitable containers and labelled to clearly identify sample type, location, date and any other workplace-specific information. 3.4. Samples are stored, preserved and transported in accordance with <i>relevant regulations</i> and laboratory procedures. 3.5. Sampling equipment is maintained in clean, safe and sterile working order. 3.6. Unusual or non-standard observations made during sampling are recognised and reported.
4. Perform standard chemical or biological sample preparation (where	4.1. Samples and controls are prepared for analysis. 4.2. Action is taken to minimise loss of analyses from sample. 4.3. Separation equipment is used to provide the required

ELEMENT	PERFORMANCE CRITERIA
applicable)	sample fractions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- collect samples in accordance with workplace and regulatory requirements
- apply relevant *Occupational Health and Safety (OH&S) requirements*
- use relevant *communications skills*

Required knowledge

Knowledge of:

- procedure for collecting, receiving, handling and storing specimens in accordance with laboratory procedures, universal precautions and legislative requirements
- use of aseptic techniques in collecting samples
- how sample collection has to be coordinated with workplace activities
- importance of obtaining representative samples and how this can be achieved
- procedures for documenting all pertinent sample information in the required format
- workplace *Standard Operating Procedures (SOPs)* for collecting and preparing samples
- relevant OH&S requirements
- steps in preparing samples and sub-samples to comply with required procedures
- workplace procedures to recognise sampling equipment and, as required, maintain it in a sterile condition
- correct disposal procedures

Evidence Guide

EVIDENCE GUIDE

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Sample collection techniques must comply with the relevant meat industry regulations and standards.

Context of, and specific resources for assessment

Assessment may be conducted in a real or simulated situation.

Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- verified work log or diary
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any

EVIDENCE GUIDE	
	relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Samples</i> may include	<ul style="list-style-type: none"> • blood • blood products • animal tissue and fluids • solids, liquids, and gases that involve raw materials, • products, by-products, waste or naturally-occurring substances. <p>Their exact nature will depend on the ambit of the laboratory and the workplace.</p>
<i>Workplace procedures</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • SOPs • work instructions.
<i>Samples requiring analysis by external laboratories</i> are:	<ul style="list-style-type: none"> • forwarded in accordance with relevant regulations and procedures.
<i>Relevant regulations</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing

RANGE STATEMENT	
	<ul style="list-style-type: none"> • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • listening and understanding • sharing information • speaking clearly and directly • working with diverse individuals and groups • reading and interpreting workplace related documentation.
<i>SOPs</i> may include those covering:	<ul style="list-style-type: none"> • collection • preparation • storage • transport.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify a business opportunity	1.1. Relevant market, client, product and service information is located and reviewed. 1.2. <i>Collective capability</i> of existing staff and facilities is assessed. 1.3. <i>Thinking techniques</i> are used to generate <i>business opportunity ideas</i> . 1.4. Sources for additional information and fresh business opportunity ideas are identified, explored and absorbed. 1.5. Personal and business objectives of developing opportunities are identified. 1.6. Input is obtained from others to improve and sort initial ideas.
2. Develop a business concept	2.1. A range of business opportunity ideas is reviewed and prioritised to develop business concepts. 2.2. <i>Basic business planning estimates</i> are calculated for new business concepts. 2.3. Relevant <i>legal and non legal requirements</i> are identified and reviewed. 2.4. <i>Criteria for determining the feasibility</i> of new business ideas are determined and documented. 2.5. Preliminary assessment of feasibility of business concepts is undertaken and <i>specialist advice</i> sought as required. 2.6. <i>Risks</i> of business concepts are identified. 2.7. <i>Choice is</i> made of most feasible ideas to be further developed into business plans. 2.8. Basic documentation is prepared to communicate business concepts to stakeholders.
3. Work with others to advance the business concept	3.1. Requirements for partners, alliances and advisors to advance business concept are determined. 3.2. Potential partners, alliances and advisors are identified and assessed. 3.3. Legal advice is sought to protect interest throughout negotiations, where appropriate. 3.4. Negotiations are conducted to advance the concept. 3.5. Partnership, alliance and advisory arrangements are negotiated, if appropriate. 3.6. Partnership, alliance and advisory arrangements are

ELEMENT	PERFORMANCE CRITERIA
	confirmed using legal processes, if appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- relate to people from a range of social, cultural and ethnic backgrounds, and physical and mental abilities
- use thinking techniques
- use research and analytical skills to:
 - conduct basic research
 - conduct an initial feasibility assessment
 - prepare basic business planning estimates
- apply negotiation skills for exploring partnerships
- use verbal and written communication skills to:
 - document ideas, business planning estimates and feasibility assessment
 - negotiate with potential partners
- determine legal, Occupational Health and Safety (OH&S) and non-legal requirements
- work with employees and family (if a family business)
- calculate business planning estimates
- assess risk and plan for contingencies
- solve problems as they arise in negotiations
- using technology to manage information
- identify and develop fresh business opportunity ideas
- document a range of ideas
- assess and evaluate relevant market, client, product and service information
- communicate ideas to supervisors, managers and other employees

Required knowledge

Knowledge of:

- general characteristics and traits of successful entrepreneurs
- biographies and case studies of particular individuals, in own or related industries

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence that they have identified, developed and assessed the initial feasibility of at least one new business or activity idea. Evidence should be documentary and show that consultation occurred.</p> <p>Evidence will cover the processes used to identify a range of ideas, to select ideas to have initial feasibility assessed, and to consult with prospective partners. It will also cover documentation of the idea and of the feasibility assessment.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment will take place in actual business premises to provide access to relevant records, personnel and documentation.</p>
<p>Method of assessment</p>	<p>Recommended methods of assessment are:</p> <ul style="list-style-type: none"> • a third-party referee (at appropriate level of authority and responsibility) report covering the entire period of development of the business concept

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • documented business proposal • formal presentation of a business proposal to managers/supervisors/staff • personal reflection and re-evaluation of development process and proposal, responding to feedback received. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Collective capability</i> of existing staff and facilities may include:	<ul style="list-style-type: none"> • flexibility • interest in pursuing new ideas • desire to take risks • confidence in self and vision • attitudes toward ambiguity and uncertainty • financial capability to invest in change • ability to think laterally • limitations of existing facilities and environment.
<i>Thinking techniques</i> may include:	<ul style="list-style-type: none"> • brainstorming • discussions • lateral thinking

RANGE STATEMENT	
	<ul style="list-style-type: none"> • de Bono's Six Thinking Hats® method
<p><i>Business opportunity ideas</i> may include:</p>	<ul style="list-style-type: none"> • ideas to create profits or assets • new product lines • identifying and targeting a new customer or group of customers • new facilities or locations • change of image.
<p><i>Basic business planning estimates</i> may be calculated for:</p>	<ul style="list-style-type: none"> • work methods • locations • initiatives and types of activities • human resources • budgets and other resources • timelines • return on investment period.
<p><i>Legal and non-legal requirements</i> may include:</p>	<ul style="list-style-type: none"> • award and enterprise agreements and relevant industrial instruments • Food Safety Code • relevant legislation from all levels of government that affects business operation, especially in regard to OH&S and environmental issues, Equal Employment Opportunity (EEO), industrial relations and anti-discrimination • relevant industry codes of practice • requirements deriving from organisation's policies and procedures • access and equity requirements • codes of practice • contractual obligations • customer expectations • industrial relations agreements • insurance requirements • laws and regulations • local council regulations • accreditation/licence/patent/copyright requirements • maintenance/service/operating requirements • manufacturers' requirements • OH&S requirements • professional development requirements • standards • warranty requirements.

RANGE STATEMENT	
<i>Criteria for determining feasibility</i> may include:	<ul style="list-style-type: none"> • ability to meet legal and non-legal requirements • ability to meet personal and business objectives • commercial viability • supply and demand assessments.
<i>Specialist advice</i> may include:	<ul style="list-style-type: none"> • accounting, legal, food safety and OH&S advice • advice from government agencies, industry associations, business brokers and consultants • mentoring support
<i>Risks</i> may include those related to:	<ul style="list-style-type: none"> • regulations, legislation and codes of practice • safety • public reputation and consumer interest • sustainability • personnel • environmental factors • financial risk.
<i>Choice</i> may be made:	<ul style="list-style-type: none"> • by owner/operator of small business • by key family members of family business • by managers or supervisors.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to:

REQUIRED SKILLS AND KNOWLEDGE

- inspect and grade of a variety of products prior to packaging
- demonstrate the accurate weighing of a variety of products
- package and arrange product into two containers according to workplace requirements
- bag and seal product to workplace, hygiene and sanitation, and QA requirements
- inspect bagged product for defects and take appropriate action for defects
- work effectively as an individual and as a member of a team
- *explain* how a variety of products may need to be arranged in bags
- apply relevant *OH&S requirements*
- make adjustments to own work practice in response to advice from colleagues, new techniques or technology or self-evaluation
- use *communication* and *mathematical skills* appropriate to the task

Required knowledge

Knowledge of:

- labelling requirements
- inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- procedures for packing products into containers for a variety of different products
- requirements for inspecting bagged products and the action to be taken if defects are found
- requirements related to bagging products
- how a variety of products may need to be arranged in bags
- relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's instructions or operations manuals
 - regulatory requirements
 - workplace policy and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- observation of performance over time

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up and adjust thermoforming machinery and materials	<p>1.1. Thermoforming machinery and materials are set up for a variety of product specifications according to manufacturer's specifications and <i>workplace</i>, Occupational Health and Safety (<i>OH&S</i>) and <i>hygiene requirements</i>.</p> <p>1.2. Thermoforming machinery and materials are adjusted according to manufacturer's specifications and workplace, OH&S and hygiene requirements.</p>
2. Set up <i>requirements for packaging</i>	2.1. Requirements for packaging are set up to workplace, OH&S, and hygiene and sanitation requirements.
3. Operate thermoforming machinery	3.1. Thermoforming machinery is operated to throughput requirements for a variety of products according to manufacturer's specifications and workplace, OH&S and hygiene requirements.
4. Change dates	4.1. Dates on the date coder are changed according to manufacturer's specifications and workplace, OH&S and hygiene requirements.
5. Clean machinery and materials	5.1. Machinery and accessories are cleaned according to manufacturer's specifications and workplace, OH&S and hygiene requirements.
6. Monitor and identify faulty product and packaging	6.1. Faulty product and packaging is identified according to workplace requirements
7. Report and/or fix operating problems on thermoforming equipment and auxiliaries	7.1. Operating problems on thermoforming equipment and auxiliaries are reported and/or fixed according to workplace requirements.
8. Perform gas flushing	8.1. Gas flushing is performed according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- set up machine for gas-flushing if required under work instructions
- identify where labels and other raw materials are stored
- read gas gauges and change gas bottle if required under work instructions
- demonstrate correct loading procedure at machine speed
- demonstrate correct loading procedure for labels
- change dates on the coders
- correctly load and unload films
- join films
- line up printed film
- demonstrate a full label change
- set machine to different product specifications
- perform a full changeover within the specified time including:
 - knives
 - rails
 - sealing chamber
- describe obvious flaws in packaging film
- apply *communication* and *mathematical skills* appropriate to the task
- work effectively as an individual and with a team
- *explain* how the thermoforming machine works
- apply appropriate *regulatory requirements*
- implement the hygiene procedures for the thermoforming machinery
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- how the thermoforming machine works
- reasons for changing the different settings
- temperature requirements and the importance of correct temperature
- hygiene requirements and their importance when changing between uncooked and cooked products
- need to adjust tracking and the procedure to make adjustment
- packaging specifications for a range of products for cartons, tubs and pouches
- principles of thermoforming
- purposes of gas analysis and demonstrate the function of a gas-flush analyser if required in work instructions

REQUIRED SKILLS AND KNOWLEDGE

- use of oxygen absorbers if required under work instructions
- use-by date or packed-on date for a range of products and the importance of these dates
- which films are used for which products
- appropriate regulatory requirements
- causes and corrective actions for re-packs
- thermoforming equipment and accessories

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated over time and under typical operating conditions for the enterprise.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal production conditions.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • specifications for at least two products • manufacturer's requirements • thermoforming equipment and materials which are compliant with safety requirements and workplace procedures • workplace environment.
<p>Method of assessment</p>	<p>Recommended methods of assessment are:</p> <ul style="list-style-type: none"> • demonstration • quiz, question and answer • observation of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Workplace requirements may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • performance of the task to production requirements • work instructions.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Hygiene requirements</i> may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
<i>Requirements for packaging</i> may include:	<ul style="list-style-type: none"> • cartons • film • labels • plastic containers.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • communicating with diverse individuals and groups • listening and understanding • reading and interpreting workplace-related documentation • speaking clearly and directly.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • accurate recording of temperature, time, volume, weight and quantity in standard formats and proformas • interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc • reading and interpreting analogue and digital measures including scales, pressure gauges, thermometers • routine estimations and calculations using a range of specified formulas and procedures.
<i>Explanations</i> may be:	<ul style="list-style-type: none"> • completed with the assistance of others • directly related to own work and work area problem-solving • in everyday workplace language and include mathematical language and commonly used technical terms • presented in writing using standard formats or proformas and symbols • presented orally.

RANGE STATEMENT	
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal and state regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up gas flushing packaging process	<p>1.1. Machinery is set up for <i>packaging process</i> according to <i>workplace</i>, Occupational Health and Safety (OH&S), <i>hygiene and sanitation requirements</i> and manufacturer's specifications.</p> <p>1.2. Gas cylinders are set up and checked according to workplace requirements and supplier's specifications.</p>
2. Set up requirements for packaging	<p>2.1. <i>Requirements for packaging</i> are set up and placed in appropriate positions on packaging line according to workplace, OH&S, and hygiene and sanitation requirements.</p>
3. Operate gas flushing process to throughput requirements	<p>3.1. Packaging machinery is operated to throughput requirements for a variety of products according to manufacturer's specifications and workplace, OH&S, Quality Assurance (QA) and hygiene and sanitation requirements.</p>
4. Report and/or fix operating problems on equipment and auxiliaries	<p>4.1. Operating problems are reported and/or fixed according to workplace requirements.</p>
5. Check packaged product against specifications	<p>5.1. Packaged product is assessed according to workplace, and hygiene and sanitation requirements.</p> <p>5.2. Appropriate action is taken if product is out-of-specifications</p> <p>5.3. Packaged product is labelled according to workplace requirements.</p>
6. Perform gas flushing	<p>6.1. Gas flushing is performed according to workplace requirements.</p>
7. Replace gas cylinders	<p>7.1. Empty gas cylinders are replaced according to workplace where part of work instructions.</p> <p>7.2. Procedures for removing empty cylinders and replacing with full cylinders are followed.</p>
8. Clean machinery and accessories	<p>8.1. Machinery and accessories are cleaned according to manufacturer's specifications and workplace, OH&S, and hygiene and sanitation requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- set up and place the requirements for packaging in appropriate positions on packaging line to workplace, OH&S, and hygiene and sanitation requirements
- set up and check gas cylinders to workplace requirements and supplier's specifications
- set up the machinery for packaging process to workplace, OH&S, hygiene and sanitation requirements and manufacturer's specifications
- conduct gas flushing process to workplace requirements
- operate packaging machinery to throughput requirements for a variety of products to manufacturer's specifications and workplace, OH&S, QA, and hygiene and sanitation requirements
- assess packaged product to workplace, and hygiene and sanitation requirements
- label packaged product to workplace requirements
- take appropriate action if product is out-of-specification
- apply *communication* and *mathematical skills* appropriate to the task
- work effectively as an individual and as part of a team
- *explain* the gas flushing process
- apply relevant OH&S and *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

- types of packaging where gas flushing is included
- workplace requirements related to checking the packaged product against specifications
- workplace requirements related to the gas flushing process of packaging
- relevant OH&S and regulatory requirements

Evidence Guide

EVIDENCE GUIDE

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Start-up and shut-down coding system	1.1. Coding system is started-up and shut-down to <i>workplace</i> , Occupational Health and Safety (<i>OH&S</i>), <i>regulatory</i> and <i>hygiene requirements</i> .
2. Change dates and fonts on bar and date coders	2.1. Dates and fonts on bar and date coders are changed according to workplace requirements.
3. Perform routine maintenance on the coding system	3.1. Routine maintenance is performed on the coding system according to manufacturer's specifications and workplace, OH&S and hygiene requirements.
4. Enter or change product details	4.1. Product details are entered or changed according to workplace requirements.
5. Fix printing problems	5.1. Printing problems are fixed according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use bar and coder system on a variety of products
- change dates on the coders
- demonstrate the correct procedures for manually entering new product details into the product coding system
- demonstrate the correct maintenance procedures for bar and coder system components
- demonstrate the correct procedures for fixing common printing problems
- apply *communication* and *mathematical skills* appropriate to the task
- work effectively as an individual and as a member of a team, including with diverse individuals and groups
- *explain* the common causes of printing problems
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practice or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- functions performed by solvent and water in the printing process
- safety procedures for handling solvents
- start-up procedures for the coding system
- common causes of printing problems
- correct procedures for fixing common printing problems
- use-by date or packed-on date for a range of products and the importance of these dates
- components of the coding system and explain their maintenance requirements
- correct procedures for re-booting the computer system

3. Clean metal detection unit	3.1. Metal detection unit is cleaned according to workplace, OH&S, hygiene and sanitation requirements, and manufacturer specifications.
4. Maintain metal detection unit	4.1. Metal detection unit is maintained according to workplace, OH&S, hygiene and sanitation requirements, and manufacturer specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- operation of the metal detection unit
- reasons for having metal detection units and their location at the work site
- workplace procedures when metal is detected in a product
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Resources include metal detection equipment which meets OH&S requirements.

Method of assessment

Recommended methods of assessment include:

- observation of performance over time
- workplace demonstration
- quiz of underpinning knowledge.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select casings	1.1. Casings are identified according to <i> casing specifications</i> . 1.2. Casings are selected to suit product requirements. 1.3. Casings are checked for <i> faults</i> according to <i> workplace requirements</i> .
2. Prepare casings	2.1. Casings are calibrated according to <i> product specifications</i> and workplace requirements. 2.2. Casings are prepared as required according to workplace requirements. 2.3. Casings are flushed thoroughly with clean water in accordance with workplace requirements. 2.4. Casings are spooled or pulled into filling tube or nozzle in preparation for further processing. 2.5. Correct quantity of casings is prepared in accordance with production specifications. 2.6. Casings are prepared according to Occupational Health and Safety (<i> OH&S</i>), and <i> hygiene and sanitation requirements</i> . 2.7. Casings are stored according to manufacturer specifications and hygiene requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify casing size requirements according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify, remove and report defective product according to workplace procedures
- apply relevant *communication* and *mathematics skills*
- work effectively as an individual and as a member of a team
- work to production speed

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practice or technology

Required knowledge

Knowledge of:

- storage requirements of soaked casings carried over from production
- storage requirements of both natural and synthetic casings
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and their effect on the product
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- filling equipment
- manufacturer's instructions
- product specifications
- workplace environment
- workplace procedures.

Method of assessment

Recommended methods of assessment include:

- demonstration of casing preparation
- quiz of underpinning knowledge
- workplace referee report over time.

MTMS211B Manually shape and form product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to manually shape and form products into a particular shape.
------------------------	---

Application of the Unit

Application of the unit	This unit is suitable for operators preparing boneless ham, bacon, salami, corned beef or any other product that is formed manually into a particular shape. Operators in smallgoods manufacturing and value-adding food services operations would use this unit.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select meat product	1.1. Meat product to be placed in casing is selected to <i>product specifications, hygiene and sanitation, workplace</i> and Quality Assurance (QA) requirements.
2. Fill <i>casings</i>	2.1. Appropriate casings and filling nozzle (where appropriate) are selected according to workplace requirements and product specifications. 2.2. Casings are filled to consistency required by product specifications, hygiene and sanitation, workplace and QA requirements. 2.3. Defective product is identified, removed and reported according to workplace requirements.
3. Operate metal detector	3.1. Metal detector is operated (where appropriate) to workplace requirements and manufacturer's specifications.
4. Form product	4.1. Product is shaped and formed according to product specifications, workplace, hygiene and sanitation, QA and customer requirements. 4.2. A variety of products is shaped and formed to production requirements.
5. Link or twist, clip and net product	5.1. Product is linked or twisted to meet product specifications. 5.2. <i>Clipping</i> is performed according to specifications. 5.3. Product is formed according to specifications. 5.4. Products are shaped and netted if required by product specifications. 5.5. Defective products are removed from production and reported according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

REQUIRED SKILLS AND KNOWLEDGE

- correctly fill a range of product lines in terms of:
 - casing
 - clips
 - length
 - tension
 - weight
- shape and form a range of products to product specifications, workplace, hygiene and sanitation, QA and customer requirements
- demonstrate operation, adjustments and actions of filling machine to address faults
- operate a metal detector if a detector is included in the operation
- identify, remove and rectify faulty product
- identify *defects in natural casings*
- clean *equipment* according to workplace requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a member of a team
- *explain* filling to required product specifications for a variety of products
- apply relevant Occupational Health and Safety (*OH&S*) and *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work at required speed of production

Required knowledge

Knowledge of:

- hygiene requirements for forming products
- filling to required product specifications for a variety of products
- how and why products must be formed and shaped
- possible faults in skins and their effect on the product
- procedures for dealing with waste product and broken casings
- relevant OH&S and regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

At least two different products must be formed and/or shaped to specification.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- casings, filling and forming equipment and product specifications materials
- manufacturer's specifications
- workplace environment.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • observation of performance over time • workplace referee report. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Product specifications</i> may include:	<ul style="list-style-type: none"> • consistency or firmness • shape • size • thickness • weight.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare <i>slicing equipment</i>	1.1. Equipment and accessories are set up in accordance with product specifications and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.2. Equipment and machinery is cleaned in accordance with hygiene and <i>workplace requirements</i> . 1.3. Pre-start safety checks are conducted in accordance with workplace and <i>regulatory requirements</i> and corrective action is taken for identified faults.
2. Prepare product for slicing	2.1. Product is prepared for slicing to workplace requirements. 2.2. Out-of-specification product is handled to workplace requirements.
3. Operate slicing equipment	3.1. Equipment is adjusted to suit product specifications in accordance with workplace and OH&S requirements. 3.2. Equipment is operated to slice a range of products to specifications at a speed similar to production requirements and in accordance with manufacturer's specifications. 3.3. Equipment is changed from the slicing of one product to the slicing of another to workplace requirements. 3.4. Equipment malfunctions or faults are identified, recorded and reported in accordance with workplace requirements
4. Weigh and bag products within weight specifications	4.1. Products with weight specifications are weighed and bagged to specifications, workplace, hygiene and sanitation, Quality Assurance (QA) and customer requirements. 4.2. Weight control mechanisms are adjusted to specifications and workplace requirements.
5. Clean and maintain slicing equipment	5.1. Slicing equipment is cleaned and maintained according to workplace and manufacturer's specifications. 5.2. Cleaning procedures are implemented to workplace requirements when changing product to be sliced.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify slicing equipment and accessories
- identify product and slicing faults in a range of products
- adjust weight control mechanisms if a part of work instructions
- demonstrate procedure for preparing slicing equipment for new product
- slice products to workplace requirements and customer specifications for a variety of products
- clean and maintain slicing equipment if required in work instructions
- observe safety requirements for cleaning slicing equipment (if required in work instructions)
- sharpen a slicing blade if a part of work instructions
- apply relevant *communication* skills
- work effectively as an individual and with other team members
- weigh and bag products with weight specifications
- *explain* and demonstrate checks on products if a part of work instructions
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others or in response to changed work practices or technology

Required knowledge

- workplace procedures when metal is detected in a product
- how and why product is prepared for slicing
- how products are weighed and bagged when they have a weight specification
- how weight control mechanisms are adjusted
- illegal weights
- maximum and minimum allowable weights
- operating procedures for various types of slicing equipment
- importance of cutting blade maintenance in the slicing process
- procedure for sharpening a slicing blade if a part of work instructions
- procedures for handling faulty product
- procedures for reporting faults in slicing equipment
- safety considerations when setting up slicing equipment
- use-by and packed-on dates and their importance
- relevant regulatory requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store meat	<p>1.1. Meat is stored at the required refrigerated temperature in accordance with <i>hygiene and sanitation, regulatory and workplace requirements</i>.</p> <p>1.2. Meat storage time and shelf life are documented for each <i>meat product</i> according to regulatory requirements.</p> <p>1.3. Meat is checked to ensure it is labelled in accordance with workplace and regulatory requirements.</p>
2. Rotate stored meat	<p>2.1. Meat is selected for rotation according to label documentation and workplace requirements.</p> <p>2.2. Meat is handled hygienically during rotation in accordance with regulatory and hygiene requirements.</p> <p>2.3. Meat is rotated according to regulatory, hygiene and workplace requirements.</p> <p>2.4. Shelf life of meat is considered in relation to the storage and rotation of meat and meat product.</p> <p>2.5. Meat is handled according to Occupational Health and Safety (<i>OH&S requirements</i>).</p>
3. Maintain clean holding room	<p>3.1. Holding room is cleaned according to regulatory, OH&S, hygiene and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- store meat in accordance with temperature requirements
- demonstrate rotation of stored meat in line with:
 - hygiene and sanitation requirements
 - regulatory requirements
 - OH&S requirements
 - workplace requirements
- select, organise, report and record routine information and mathematical data

REQUIRED SKILLS AND KNOWLEDGE

related to:

- labelling
- rotation and shelf life of meat product
- storage of meat product
- work effectively as an individual and as a member of a team
- **explain** stock rotation requirements for meat to regulatory and hygiene requirements
- apply relevant **communication** and **mathematical** skills
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- effects on the product of the use of meat which is beyond its useful life
- storage temperatures and shelf life for meat
- stock rotation requirements for meat to regulatory and hygiene requirements

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store meat product	1.1. <i>Meat product</i> is stored at the required refrigerated temperature in accordance with <i>hygiene and sanitation, regulatory and workplace requirements</i> . 1.2. Meat product storage times and shelf life are documented for each meat product according to regulatory requirements. 1.3. Meat product is checked to ensure it is labelled in accordance with workplace and regulatory requirements.
2. Rotate stored meat product	2.1. Meat product is selected for rotation according to label documentation and workplace requirements. 2.2. Meat product is handled hygienically during rotation in accordance with regulatory and hygiene requirements. 2.3. Meat product is rotated according to regulatory, hygiene and workplace requirements. 2.4. Shelf life of meat product is considered in relation to the storage and rotation of meat and meat product. 2.5. Meat product is handled according to Occupational Health and Safety (<i>OH&S requirements</i>).
3. Maintain clean holding room	3.1. Holding room is cleaned according to regulatory, OH&S, hygiene and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- store meat product in accordance with temperature requirements
- demonstrate rotation of stored meat product in line with:
 - hygiene and sanitation requirements
 - OH&S requirements
 - regulatory requirements
 - workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- apply *communication* and *mathematical skills* relevant to the task
- work effectively as an individual and as a member of a team
- *explain* stock rotation requirements for meat products to regulatory and hygiene requirements
- select, organise, report and record routine information and mathematical data related to:
 - labelling
 - rotation and shelf life of meat product
 - storage of meat product
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- stock rotation requirements for meat products to regulatory and hygiene requirements
- effects on the product of the use of meat product which is beyond its useful life
- storage temperatures and shelf life for meat products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- real work environment
- relevant documentation such as:
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz
- question and answer

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • observation of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Meat product</i> may include:	<ul style="list-style-type: none"> • cooked product • cured meat • dried meats • pate • pre-salted meat • Uncooked Comminuted Fermented Meats (UCFM).
<i>Hygiene and sanitation</i> requirements may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
<i>Regulatory</i> requirements may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.

RANGE STATEMENT	
Workplace requirements may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Communication skills may include:	<ul style="list-style-type: none"> • communicating with diverse individuals and groups • listening and understanding • reading and interpreting workplace documentation • speaking clearly and directly.
Mathematical skills may:	<ul style="list-style-type: none"> • include routine estimation and calculation • involve percentages, comparisons and variations • involve the use of calculators.
Explanations may:	<ul style="list-style-type: none"> • be in everyday workplace language including mathematical language and some commonly used technical terms • be presented in writing using standard formats,

RANGE STATEMENT	
	proformas, charts and diagrams <ul style="list-style-type: none"> • be presented orally • include mathematical and other information from several sources.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Open <i>carton meat</i>	1.1. Sample cartons are selected for inspection according to a sampling plan where every carton is not being inspected. 1.2. Inspection is conducted according to workplace requirements for facilities and for using Personal Protective Equipment (PPE). 1.3. Carton meat is inspected for contamination and specification defects according to workplace requirements. 1.4. Corrective action is taken according to workplace requirements. 1.5. Cartons are handled safely according to workplace and Occupational Health and Safety (OH&S) requirements . 1.6. Defects are recorded or reported according to workplace requirements. 1.7. Defects are segregated and disposed of in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use sample program, where applicable
- perform inspection according to workplace requirements for **hygiene** and safety
- report defects, where appropriate
- apply defect reporting procedures
- apply relevant **communication** and **mathematical skills**
- apply relevant OH&S policies and procedures
- work effectively as an individual and as a member of a team
- apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE

- take appropriate corrective action when defects are found

Required knowledge

Knowledge of:

- appropriate inspection procedures
- defect reporting procedures
- Standard Operating Procedures (SOPs) for personal hygiene
- likely defects to be encountered
- work instructions for inspection

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use routine measuring instruments	<p>1.1. <i>Measuring instruments</i> are selected and used to measure common workplace units.</p> <p>1.2. Faults with measuring instruments are identified and reported according to standard procedures.</p>
2. Calculate routine workplace measures	<p>2.1. Basic <i>mathematical processes</i> are used to calculate routine workplace measures of <i>product characteristics</i>.</p> <p>2.2. <i>Calculations</i> are verified by using estimating techniques.</p>
3. Calculate <i>performance measures</i>	<p>3.1. Percentages, ratios and proportions are calculated to derive information about <i>workplace requirements</i> and performance.</p> <p>3.2. Deviations in performance are identified and measured to determine the extent of variations.</p>
4. Record routine workplace data	<p>4.1. Results are recorded on standard graphs or charts.</p> <p>4.2. Errors in recording information on charts are identified and rectified.</p> <p>4.3. Graphs or charts are interpreted to identify trends and variations.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify routine faults in measuring instruments
- achieve consistent levels of accuracy
- interpret mathematical symbols and diagrams
- explain the purpose of graphs or charts
- source and apply new ideas and techniques to address unfamiliar situations or resolve problems
- explain the relationship between different measurement scales
- apply relevant Occupational Health and Safety (*OH&S*), workplace and *regulatory requirements* whenever undertaking numeracy tasks in a meat industry

REQUIRED SKILLS AND KNOWLEDGE

environment

- present mathematical data for use in the workplace
- select, operate and explain the purpose of measuring instruments
- use and apply the principles and units of measurement
- use estimation processes
- use numeracy skills and *mathematical concepts* to solve workplace problems
- use relevant *communication skills*
- verify calculations

Required knowledge

Knowledge of:

- purpose of graphs or charts
- relationship between different measurement scales
- relevant OH&S, workplace and regulatory requirements
- principles and units of measurement

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up specialist cutting equipment	1.1. Blades are checked for sharpness and correct sequence in accordance with <i>workplace</i> and Occupational Health and Safety (<i>OH&S requirements</i>). 1.2. Corrective action is taken as necessary. 1.3. Equipment is washed down and sanitised according to hygiene and workplace requirements. 1.4. Ingredients are loaded according to product specifications and OH&S requirements.
2. Operate <i>specialist cutting equipment</i>	2.1. Ingredients are checked to ensure conformity to product and customer specifications. 2.2. Equipment is programmed to product specification and OH&S requirements. 2.3. Ingredients are loaded in a specified regime for the style of the product. 2.4. Product is processed according to product and manufacturer's specifications, and OH&S requirements. 2.5. Silent or bowl cutter is operated to produce a variety of specified products to meat production requirements. 2.6. Timing of the process is judged for correct texture according to product specifications. 2.7. Temperature is controlled to product specifications, and <i>hygiene and sanitation requirements</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • <i>explain</i> the health and hygiene factors related to operating a bowl cutter • identify various additives, spices and binders • operate bowl cutter to produce a variety of products to:

REQUIRED SKILLS AND KNOWLEDGE

- workplace requirements
- OH&S requirements
- hygiene and sanitation requirements
- product specifications
- production requirements
- demonstrate the difference in cutting techniques between raw meat *emulsions* and pre-cooked meat emulsions
- identify any unhygienic meat ingredients
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a team member
- apply relevant *regulatory requirements*
- take corrective action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- corrective action to be taken in situations such as:
 - incorrect loading of ingredients
 - machinery malfunction
 - temperature malfunction
 - unhygienic meat ingredients
- common tests for blade sharpness:
 - no feathered edges
 - cutting paper without tearing
 - checking for ragged edges
- appropriate quantities of water or ice to ensure temperature is maintained according to product specifications
- consequences of loading ingredients in the incorrect order such as:
 - fat separation caused by over-heating etc
 - red colour after cooking
 - temperature control
- health and hygiene factors related to operating a bowl cutter
- importance of protein extraction
- effects on product and on health and safety of incorrectly placing product in equipment
- effect of meat temperature when cutting meat for salami
- effect on product of the temperature of the cutting equipment
- importance of blade sharpness for the cutting process and the consequences of

REQUIRED SKILLS AND KNOWLEDGE

- blunt blades
- purpose of the following additives:
 - anti-oxidant
 - curing ingredients
 - phosphate
 - salt
 - water
- difference in cutting techniques between raw meat *emulsions* and pre-cooked meat emulsions
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's instructions or operations manuals
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment are:

- demonstration - snapshot of performance
- quiz, question and answer

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • observation of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Place product in cooking or steaming facility	<p>1.1. Individual product is identified and placed correctly in cooking or steaming facility for even cooking or steaming.</p> <p>1.2. Product is spaced in cooking facility according to product and manufacturer's specifications.</p>
2. Cook or steam product	<p>2.1. Correct cooking or steaming procedure is determined.</p> <p>2.2. Cooking or steaming cycle is set and maintained according to specifications and workplace requirements.</p> <p>2.3. Cooking or steaming process is regularly monitored and adjusted as necessary to fulfil product specifications.</p> <p>2.4. Internal temperature of product is checked on completion of cooking or steaming cycle to ensure correct process has been achieved.</p> <p>2.5. A variety of products are cooked or steamed to workplace requirements and customer specifications at a speed similar to production requirements.</p> <p>2.6. Process and results of cooking or steaming are correctly recorded.</p> <p>2.7. Product is dyed to achieve a uniform colour when required by product specifications.</p>
3. Chill or cool product	<p>3.1. Product is weighed immediately on completion of cooking or steaming cycle.</p> <p>3.2. Product is chilled immediately or cooled at ambient temperature before chilling according to product specifications.</p> <p>3.3. Product is identified and stored according to product specifications and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- cook or steam of a variety of products to product specifications, to workplace, customer, Quality Assurance (QA) and *hygiene and sanitation requirements*
- identify the cause and effects of, and explain the appropriate action for:
 - cycle out of sequence
 - drops during cooking
 - excess cooking or steaming
 - excess humidity
 - insufficient cooking or steaming
 - low humidity
- operate cooking or steaming facility in a safe and hygienic manner
- demonstrate storage procedures
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a member of a team
- apply relevant Occupational Health and Safety (*OH&S*) and *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- correct cooking or steaming procedure for specific products
- procedure followed to measure product internal temperatures correctly
- chilling or cooling requirements for different products
- dye addition procedures for a given range of products
- effect of incorrect chilling on yield
- effects of incorrect spacing or placement of product for cooking or steaming
- recording requirements for the cooking or steaming process
- relevant OH&S and regulatory requirements
- cause and effects of
 - cycle out of sequence
 - drops during cooking
 - excess cooking or steaming
 - excess humidity
 - insufficient cooking or steaming
 - low humidity

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Context of, and specific resources for assessment

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's instructions
 - regulatory requirements
 - workplace policies and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz
- observation of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

EVIDENCE GUIDE	
	Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and prepare meat for drying	1.1. Meats cuts are selected for drying according to workplace <i>specifications</i> . 1.2. Meat is inspected for defects. 1.3. Defects are identified and corrective action taken according to <i>workplace requirements</i> . 1.4. Meat is prepared and stored prior to processing according to workplace requirements.
2. Dry meat <i>products</i>	2.1. Pre-operational checks on drier are performed according to workplace requirements. 2.2. Drier is loaded according to workplace requirements, including <i>hygiene and sanitation</i> , and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 2.3. Drier is operated according to workplace requirements, including observing time and temperature specifications. 2.4. Records are maintained according to workplace requirements. 2.5. Drier is emptied according to workplace requirements.
3. Inspect and store dried meat	3.1. Dried product is inspected according to workplace requirements. 3.2. Dried product is stored prior to packing according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • apply relevant <i>communication</i> and <i>mathematical skills</i> • work effectively in a range of situations as an individual and as a team member • apply workplace specifications for meat to be dried • apply relevant <i>regulatory requirements</i> • identify defects that have to be inspected for possible causes of contamination

REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- ways of preventing contamination
- OH&S hazards associated with operating a drier
- workplace specifications for meat to be dried
- relevant regulatory requirements
- time and temperature requirements for the variety of products produced

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare casings	<p>1.1. Casings are calibrated according to product specifications and workplace requirements.</p> <p>1.2. Specifications of casings are confirmed for each product.</p> <p>1.3. Casings are checked for faults according to workplace requirements.</p> <p>1.4. Casings are prepared as required according to workplace requirements.</p> <p>1.5. Casings are flushed thoroughly with clean water in accordance with workplace requirements.</p> <p>1.6. Casings are spooled or pulled into filling tube or nozzle in preparation for further processing.</p> <p>1.7. Correct quantity of casings is prepared in accordance with production specifications.</p> <p>1.8. Casings are prepared according to Occupational Health and Safety (OH&S) and hygiene and sanitation requirements.</p> <p>1.9. Casings are stored according to manufacturer's specifications and hygiene requirements.</p>
2. Prepare filling machinery	<p>2.1. Requirements in preparation for start-up of filling machine are completed to workplace requirements.</p> <p>2.2. Machine requirements are set correctly.</p> <p>2.3. Start-up procedures are followed to workplace requirements.</p> <p>2.4. Filling materials are attached and changed to workplace requirements and product specifications.</p> <p>2.5. OH&S, hygiene and sanitation requirements are followed.</p>
3. Fill casings	<p>3.1. Appropriate casings and filling nozzle are selected according to requirements and product specifications.</p> <p>3.2. Filler is loaded and casings are filled to consistency required by product specifications.</p> <p>3.3. Defective product is identified, removed and reported according to workplace requirements.</p>
4. Clean equipment	<p>4.1. Equipment is cleaned according to manufacturer's specifications and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify casing size requirement according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify possible faults in natural and synthetic casings
- correctly fill a range of product lines in terms of:
 - casing
 - clips
 - length
 - tension
 - weight
- perform filling to required product specifications
- identify over-filled and under-filled products
- identify, remove and report defective product according to workplace procedures
- match clip size to casing
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a team member
- *describe* storage requirements of soaked casings carried over from production
- explain storage requirements of both natural and synthetic casings
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- procedures followed to set up filling machine to correct specifications
- appropriate corrective action for:
 - casing breakages and bent nozzles
 - jammed clips or loops
 - poorly-printed casings
- storage requirements of soaked casings carried over from production
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation

REQUIRED SKILLS AND KNOWLEDGE

- possible faults in skins and explain their effect on the product
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Thaw product</i> in water	<p>1.1. Meat to be thawed is selected according to <i>workplace requirements</i>.</p> <p>1.2. Tanks are checked and prepared according to work instructions.</p> <p>1.3. Product is thawed according to work instructions.</p> <p>1.4. Tank flows are monitored to meet <i>regulatory requirements</i>.</p> <p>1.5. Product temperature monitoring and recording is completed according to workplace requirements.</p> <p>1.6. Thawing is completed in accordance with Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p> <p>1.7. Potential sources of contamination and cross-contamination are identified and minimised.</p>
2. Store and despatch thawed product and forward for processing	<p>2.1. Thawed product is rotated according to workplace requirements.</p> <p>2.2. Thawed product is stored according to workplace requirements.</p> <p>2.3. Records are kept according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- check and prepare tanks for thawing
- identify contaminated product prior to thawing and take corrective action according to workplace requirements
- thaw product according to workplace and regulatory requirements
- apply relevant *communication* and *mathematical skills*
- work effectively in a range of situations as an individual and as a member of a team
- maintain control of the flow of product through thawing and dispatch to further processing

REQUIRED SKILLS AND KNOWLEDGE

- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices

Required knowledge

Knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with thawing of product
- workplace requirements for thawing product including:
 - OH&S requirements.
 - Standard Operating Procedures (SOPs)
 - stock rotation
 - work instructions

EVIDENCE GUIDE**assessment**available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may be *thawed* by:

- immersing in ambient running water
- showering with ambient water
- washing in water or brine.

Product may include:

- beef
- game meat
- lamb
- mutton
- pork
- veal
- other meat species or products.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- Quality Assurance (QA) requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds • speaking and listening • reading and interpreting workplace communication.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Thaw product</i> in air	<p>1.1. Product to be thawed is selected and moved to thawing chillers according to <i>workplace requirements</i>.</p> <p>1.2. Chillers are checked according to workplace requirements.</p> <p>1.3. Product is thawed according to work instructions and <i>regulatory requirements</i>.</p> <p>1.4. Product monitoring and recording is completed according to workplace requirements.</p> <p>1.5. Thawing is undertaken in accordance with workplace Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p> <p>1.6. Potential sources of contamination and cross-contamination are identified and minimised.</p>
2. Store and despatch thawed product	<p>2.1. Thawed product is stored and rotated according to workplace and regulatory requirements.</p> <p>2.2. Product segregation is maintained as required.</p> <p>2.3. Records are kept according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and despatch to further processing
- apply relevant *communication* and *mathematical skills*
- check and prepare chillers for thawing
- work effectively in a range of situations as an individual and as a team member
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- ways of minimising contamination
- regulations dealing with the thawing of product
- workplace requirements for thawing product including:
 - OH&S
 - Standard Operating Procedures (SOPs)
 - stock rotation
 - work instructions
- sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Guidance information for

A current list of resources for this Unit of Competency is

EVIDENCE GUIDE**assessment**

available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Product may be ***thawed*** by:

- chill cabinets
- placing in cool room
- use of intensive coolers.

Product may include:

- beef
- game meat
- lamb
- mutton
- pork
- veal
- other meat species or products.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- federal, state and territory regulations regarding meat processing
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate equipment <i>faults</i>	1.1. Unit or sub-system performance is monitored to identify presence of actual and/or potential faults. 1.2. Built in test functions, fault indicators or alarms and error codes are monitored and appropriate maintenance records are checked and reviewed. 1.3. Equipment faults are detected using established fault diagnoses techniques and procedures. 1.4. Faults are recorded and/or reported according to standard procedures.
2. Repair and/or replace faulty equipment components	2.1. Equipment is isolated according to standard procedures in preparation for component repair or replacement. 2.2. Faulty components are removed using appropriate <i>tools</i> and techniques in accordance with standard procedures. 2.3. Faulty components are repaired and/or replaced in accordance with manufacturer's specifications and standard procedures. 2.4. Unit, sub-system or system is checked and tested to confirm that maintenance has been completed to specifications. 2.5. Tools are used according to manufacturer's specifications to achieve desired outcomes. 2.6. Waste arising from maintenance is disposed according to waste management requirements. 2.7. Maintenance information is recorded in the company <i>reporting system</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare equipment and work area to conduct maintenance

REQUIRED SKILLS AND KNOWLEDGE

- wear personal protective clothing for maintenance work
- apply relevant regulatory requirements
- follow *instructions* in undertaking agreed maintenance task
- diagnose and repair or replace faulty equipment according to Occupational Health and Safety (*OH&S*), *hygiene and sanitation*, *workplace requirements* and manufacturer's specifications
- apply fault diagnosis techniques and procedures
- demonstrate the use of common hand and power tools used for component repair or replacement
- verify completion of repair or replacement
- clean maintenance tools or equipment
- maintain a clean and safe work area
- pack or store tools in designated location
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- seek advice from others, manuals etc to learn new skills and techniques
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- common problems in conducting maintenance
- consequences of incorrect or inadequate maintenance
- *environmental aspects* related to maintenance
- equipment isolation requirements
- food safety factors in maintaining equipment
- OH&S hazards and controls
- purpose and use of common hand and power tools used for component repair or replacement
- fault diagnosis techniques and procedures
- purpose of routine preventative maintenance
- quality parameters to be achieved
- recording or reporting systems and processes
- relationship of maintenance to other work activities in the meat or enterprise plant
- roles of and relationships with others involved in carrying out maintenance functions
- services used in maintenance
- significance of minimising equipment down time
- waste handling requirements
- relevant *regulatory requirements*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select sorted meat	<p>1.1. Sorted <i>meat</i> is selected by type according to product and customer specifications.</p> <p>1.2. Sorted meat is selected according to Occupational Health and Safety (<i>OH&S</i>), and <i>hygiene and sanitation requirements</i>.</p> <p>1.3. Correct meat, by-product and stock are selected according to the formulation specification and <i>workplace requirements</i>.</p>
2. Prepare batched meat	<p>2.1. Scales are calibrated in accordance with product specifications and workplace requirements.</p> <p>2.2. Meat is placed in appropriate containers and is weighed according to production specifications.</p> <p>2.3. Meat is batched according to workplace hygiene requirements.</p>
3. Record usage of meat	<p>3.1. Meat is stored in accordance with workplace, <i>OH&S</i>, and hygiene and sanitation requirements.</p> <p>3.2. Usage of meat is recorded in accordance with workplace and <i>regulatory requirements</i>.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare equipment and work area prior to batching meat
- calibrate scales correctly
- follow a recipe correctly
- batch product to specifications at a speed similar to the speed of production
- demonstrate accurate record keeping practices for meat usage
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and with other team members
- apply relevant *OH&S*, workplace and regulatory requirements

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- batching requirements for the workplace
- consequences of using incorrect meat for both the product and the consumer
- hygiene and sanitation factors associated with the selection of meat
- relevant OH&S, workplace and regulatory requirements
- critical information within the Australia New Zealand Food Standards Code relevant to immediate work environment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up <i>product</i> forming equipment	<p>1.1. All processing equipment is <i>set up</i> according to production requirements.</p> <p>1.2. Appropriate Personal and Protective Equipment (PPE) is used as provided.</p> <p>1.3. Routine pre-start checks are conducted prior to commencement of operation.</p> <p>1.4. Required product materials are in place.</p>
2. Operate product forming machinery	<p>2.1. Product forming machinery is used according to <i>workplace requirements</i>.</p> <p>2.2. Appropriate remedial action is taken to correct any faults in process or product.</p> <p>2.3. Process is monitored to confirm that specifications are met, and variations in operating conditions are addressed.</p> <p>2.4. Daily production schedule is met.</p> <p>2.5. Workplace records are maintained according to workplace recording requirements.</p>
3. Ensure smooth operation of process	<p>3.1. Potential dangers from hazards are identified and actions reflect the required precautions.</p> <p>3.2. Oral <i>communication</i> with team members is clear and accurate.</p> <p>3.3. Faults and variances outside the job holder's area of responsibility are reported promptly, clearly and accurately to an appropriate authority.</p> <p>3.4. Team members are encouraged and supported to work as an effective team.</p> <p>3.5. Safe working procedures are followed at all times.</p>
4. Shut-down the process	<p>4.1. Appropriate shut-down procedure is identified.</p> <p>4.2. Process is shut-down according to workplace procedures.</p> <p>4.3. Faults and variances outside area of responsibility are reported promptly, clearly and accurately to an appropriate authority.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply production documentation requirements and procedures
- apply relevant communication and *mathematical skills*
- work effectively as an individual or as a member of a team
- demonstrate teamwork practices and team-building techniques
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- relevant QA and inspection procedures and systems
- materials and equipment specifications
- Standard Operating Procedures (SOPs)
- food safety and Hazard Analysis Critical Control Points HAACP requirements
- precautions necessary to ensure safety
- how output is maximised while still meeting quality and safety requirements
- limits of authority
- tolerance allowable in the quality system and when action should be taken
- production documentation requirements and procedure
- relevant OH&S, regulatory and workplace requirements
- potential dangers in specific plant and equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- quiz of underpinning knowledge
- workplace project
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Product</i> may include:	<ul style="list-style-type: none"> • devon, polony, fritz • frankfurts • salami • sausages.
Machine <i>set up</i> may include:	<ul style="list-style-type: none"> • selecting or entering programs on to automatic machines to specifications.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • QA requirements • SOPs • the ability to perform the task to production requirements • work instructions.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be with people from a range of cultural, social and ethnic backgrounds • involve listening and understanding, speaking clearly and directly • involve reading and interpreting workplace-related communication.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • OH&S legal requirements • PPE which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.

Workplace records are maintained according to workplace recording requirements.
3. Ensure smooth operation of process	3.1. Potential dangers from hazards are identified and actions reflect the required precautions. 3.2. Clear and accurate oral communication is used with team members. 3.3. Faults and variances outside area of responsibility are reported promptly, clearly and accurately to an appropriate authority. 3.4. Team members are encouraged and supported to work as an effective team. 3.5. Safe working procedures are followed at all times.
4. Shut-down the process	4.1. Appropriate shut-down procedure is identified. 4.2. Process is shut-down according to workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- Apply fault-finding, rectification and reporting procedures.
- demonstrate correct use of PPE
- identify potential dangers in specific plant and equipment
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply production documentation requirements and procedures
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a member of a team
- demonstrate teamwork practices and team-building techniques
- apply relevant Occupational Health and Safety (*OH&S*), *regulatory* and workplace requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- Standard Operating Procedures (SOPs)
- safe working procedures and systems
- materials and equipment specifications
- production documentation requirements and procedures
- relevant QA) and inspection procedures and systems
- food safety and HACCP requirements
- precautions necessary to ensure safety
- how input is maximised while still meeting quality and safety requirements
- limits of authority
- rationale for linking, tying and hanging products
- tolerances allowable in the quality system and when action should be taken
- workplace requirements for dealing with waste product and broken casings
- relevant OH&S, regulatory and workplace requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare ingredients	1.1. Work area is prepared. 1.2. <i>Ingredients</i> for <i>pâtés and terrines</i> are selected according to specifications. 1.3. Meat and offal ingredients are pre-prepared according to specifications. 1.4. Meat, offal and other ingredients are pre-cooked according to specifications. 1.5. Moulds for <i>pâtés</i> and <i>terrines</i> are prepared and <i>lined</i> according to specifications. 1.6. Pre-operational checks are set up and conducted on required <i>specialised machinery</i> .
2. Prepare <i>pâtés</i> and <i>terrines</i>	2.1. A range of binding agents and processes required in the preparation of basic forcemeat are prepared and used. 2.2. A range of pastries suitable for <i>pâté en crouste</i> are prepared and handled correctly to ensure high quality and attractive presentation. 2.3. Specialised machinery for making <i>pâtés</i> and <i>terrines</i> is used correctly and safely according to manufacturer instructions. 2.4. <i>Pâtés</i> and <i>terrines</i> are cooked to specification ensuring non-spore forming pathogens are destroyed. 2.5. Product stability and spreadability are assessed.
3. <i>Pack and store</i> <i>pâtés</i> and <i>terrines</i>	3.1. <i>Pâtés</i> and <i>terrines</i> are selected and packed using appropriate packaging. 3.2. <i>Pâtés</i> and <i>terrines</i> are chilled at a sufficient rate to prevent spore-forming pathogens. 3.3. <i>Pâtés</i> and <i>terrines</i> are stored according to regulatory requirements.
4. Develop new recipes	4.1. Recipes for <i>pâtés</i> and <i>terrines</i> are developed using a range of suitable products, with consideration given to food safety, taste and presentation. 4.2. New recipes are costed and priced. 4.3. Customer response to new recipes are assessed and evaluated.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply presentation skills for pâtés and terrines, including pastry decoration, glazing and layering of ingredients
- assess the freshness and suitability of ingredients for pâtés and terrines
- pre-prepare meat and offal using safe knife skills
- cook meat emulsions
- develop commercially viable new recipes
- correctly package and store finished products
- poach or boil products, as required
- use communication and numeracy skills required to read, write and interpret written documentation, such as recipes and regulatory requirements
- listen to, interpret and correctly carry out instructions
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work effectively in a range of situations as an individual and as a team member.

Required knowledge

Knowledge of:

- ingredients suitable for making pâtés and terrines and their characteristics
- culinary terms related to pâtés and terrines commonly used in the industry
- properties and outcomes of the various seasonings, additives, binding agents and processes used in the preparation of pâtés and terrines
- core temperature requirements associated with the various stages of pâté production
- heating and cooling processes required to ensure end product is safe for consumption and meets regulatory requirements
- safe work practices, in particular in relation to using chopping and mincing equipment
- food safety requirements for the handling and separation of cooked and raw meats
- hygiene requirements particularly relating to possible bacterial spoilage in the preparation, storage and service of pâté and terrine products
- casings and containers suitable for commercial use and storage of pâtés and terrines
- three-stage cooling program or regime specified in the Australian standard
- principles of nutrition, in particular, the food values of pâtés and terrines and the effects of cooking on the nutritional value of food
- packing and storage requirements for pâtés and terrines
- organisation's food safety plan.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Candidates must be able to:

- produce a minimum of one type of pâté or terrine
- demonstrate knowledge of product-specific food safety hazards and control measures
- develop a minimum of three new recipes and test one recipe.

Context of and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Resources may include:

- workplace recipes and formulations
- manufacturer's instructions

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • product specifications • food safety plan • workplace equipment • workplace procedures.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare product formulations	<p>1.1. Recipes and product specifications are followed to formulate products in accordance with <i>workplace</i> and <i>regulatory requirements</i>.</p> <p>1.2. Products are formulated in accordance with product specifications, <i>hygiene and sanitation</i>, regulatory and workplace requirements.</p> <p>1.3. <i>Ingredients</i> are checked to ensure they meet product specifications and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- follow recipes and product specifications to formulate products
- formulate products
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and with other team members
- apply relevant Occupational Health and Safety (*OH&S*) *requirements*
- use *equipment* according to manufacturer's specifications and workplace requirements

Required knowledge

Knowledge of:

- functions, dangers and legal implications of various ingredients
- usage and purpose of various *additives*, spices, binders and ingredients in the products
- relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.</p> <p>These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.</p> <p>Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.</p> <p>All assessment must be conducted against Australian meat industry standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.</p>
<p>Context of, and specific resources for assessment</p>	<p>Assessment must occur in the workplace under normal production conditions.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • appropriate blending equipment • product specifications and recipes • workplace environment.
<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • workplace demonstration • quiz • question and answer • observation of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Workplace requirements may include:	<ul style="list-style-type: none"> • Enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.
Hygiene and sanitation requirements may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
Types of ingredients may include:	<ul style="list-style-type: none"> • additives • spices • binders.

RANGE STATEMENT	
Communication skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
Mathematical skills may:	<ul style="list-style-type: none"> • involve estimation and calculation • relate to own work and work area problem-solving and monitoring • relate to product formulation and specification • require interpretation and drawing conclusions from a range of mathematical tables, charts, bar graphs, pie charts, recipes • require monitoring formula, specifications, outputs and equipment • require synthesis and analysis of mathematical information from more than one source.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Equipment may include:	<ul style="list-style-type: none"> • blenders • choppers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • cutters • mixers.
<i>Additives</i> may include:	<ul style="list-style-type: none"> • antioxidants • binders • curry • Glucono Delta Lactone (GDL) • GO2 • nitrates • nitrites • non-meat proteins • phosphate • salt • spices • sugar • water.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Ferment</i> product	<p>1.1. Maturation area is sanitised according to <i>workplace requirements</i>.</p> <p>1.2. Product is placed correctly in greening room for adequate air circulation for processing according to product specifications and <i>hygiene requirements</i>.</p> <p>1.3. Product is spaced according to product and manufacturer's specifications.</p> <p>1.4. Maturation process is monitored regularly and appropriate action taken according to product specifications.</p> <p>1.5. Product is smoked if required by product specifications.</p> <p>1.6. Variety of products is fermented and matured to workplace and <i>regulatory requirements</i> and customer specifications, at a speed similar to production requirements.</p>
2. Finish maturation process	<p>2.1. Product is stored according to product specifications.</p> <p>2.2. Product is identified and stacked according to product specifications and workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- ferment and mature product to workplace requirements, and product and customer specifications, within workplace time frames
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and with other team members
- demonstrate familiarity with the regulatory requirements related to fermenting product
- apply relevant Occupational Health and Safety (*OH&S requirements*)

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- possible effects on health of inadequate finishing of maturation process
- possible effects of temperature fluctuations, relative humidity and air circulation on product
- effect pH has on the maturation process
- purpose and effect of smoking salamis
- air circulation requirements of specific products
- impact of Aw on the shelf life of fermented products
- relevant OH&S requirements
- importance of check-weighing at the end of drying
- relationship between pH, Aw and humidity
- requirements of product spacing for specific product
- fermented products

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare blending equipment	<p>1.1. Blending <i>equipment</i> is prepared according to <i>workplace, hygiene and sanitation</i>, and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>.</p> <p>1.2. Recognition and reporting of faults is carried out to ensure equipment is maintained to an operating level which meets manufacturer's specifications and workplace requirements.</p> <p>1.3. Equipment and tools are used according to manufacturer's specifications.</p>
2. Make adjustments to, and operate, blending equipment	<p>2.1. Blending equipment is adjusted when necessary according to workplace, hygiene and sanitation, and OH&S requirements.</p> <p>2.2. Tools and equipment for adjusting processing equipment are used according to workplace, hygiene and sanitation, and OH&S requirements.</p> <p>2.3. Blending equipment is operated in accordance with OH&S, workplace and manufacturer's requirements.</p> <p>2.4. Blending equipment is used to blend a variety of products to production requirements.</p>
3. Blend products	<p>3.1. A range of products is blended to workplace, OH&S, hygiene and sanitation, and Quality Assurance (QA) requirements and product specifications, at a speed similar to production requirements.</p>
4. Clean and maintain blending equipment	<p>4.1. Blending equipment is cleaned and maintained according to work instructions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use blending equipment to blend a variety of products to production requirements
- demonstrate effective operation of tools and equipment used for adjusting blending

REQUIRED SKILLS AND KNOWLEDGE

equipment

- demonstrate safe handling procedures for operating blending equipment
- operate equipment to manufacturer's specifications, workplace and OH&S requirements
- clean and maintain blending equipment as required in work instructions
- apply *mathematical* and *communication skills* relevant to the task
- learn new techniques, operate new equipment and adjust to workplace change as required
- work effectively as an individual and as a team member
- apply relevant *regulatory requirements*
- take corrective action to improve own work performance

Required knowledge

Knowledge of:

- safe handling procedures for operating blending equipment
- conditions under which processing equipment might need adjusting
- cleaning and maintenance procedures for blending equipment if required in work instructions
- relevant regulatory requirements
- purpose and use of equipment used in blending

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions.

Resources may include:

- real work environment
- relevant documentation such as:
 - manufacturer's instructions or operations manuals
 - regulatory requirements
 - workplace policy and procedures
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- workplace demonstration
- observation of performance over time

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • quiz, question and answer. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Slice and trim meat in preparation for sale	<p>1.1. <i>Meat cuts</i> are prepared and sliced according to <i>workplace requirements</i> and customer specifications.</p> <p>1.2. Meat cuts are separated into final meat cuts according to Quality Assurance (QA), hygiene and sanitation and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i>, and customer specifications.</p>
2. Handle knife effectively	2.1. Knife is handled safely, hygienically and effectively.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate correct cutting, slicing and trimming techniques
- use safe and effective knife skills
- identify and name examples of finished meat cuts
- apply relevant *regulatory requirements*
- slice and trim meat in preparation for sale according to OH&S, hygiene and workplace requirements and customer specifications
- prepare finished meat cuts from all primals relevant to meat retailing and/or smallgoods manufacturing
- remove defects from products according to workplace and regulatory requirements
- work effectively as an individual and as part of a team
- seek advice from relevant sources when working with new *cutting equipment* or products
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication skills* appropriate to the task

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- principles of QA, hygiene and sanitation, and OH&S in relation to cutting meat
- workplace requirements related to slicing meat
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

For meat retailing:

- prepare and slice meat cuts for all primals for three species (including beef and sheep) to workplace and regulatory requirements, similar to the speed of production.

For smallgoods manufacturing:

- prepare and slice meat cuts for all primals for one species to workplace and regulatory requirements, similar to the speed of production.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

EVIDENCE GUIDE	
	<p>Resources may include:</p> <ul style="list-style-type: none"> knives, knife equipment product specifications workplace requirements.
Method of assessment	<p>Recommended method of assessment include:</p> <ul style="list-style-type: none"> demonstration with an assessor observation of performance over time for three (meat retail) or one (smallgoods) species quiz of underpinning knowledge workplace project. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality and Torres Strait Islander, gender, or language backgrounds other than English. Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Trim meat to workplace specifications	1.1. Meat is trimmed to <i>workplace specifications</i> . 1.2. Meat is trimmed to Occupational Health and Safety (<i>OH&S</i>), <i>hygiene and sanitation</i> , and <i>workplace requirements</i> . 1.3. Meat is trimmed to customer specifications.
2. Handle product hygienically	2.1. Product is handled to meet hygiene and sanitation requirements.
3. Handle <i>knife</i> effectively	3.1. Knife is handled safely, hygienically and effectively.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare equipment appropriately prior to the commencement of the task
- give examples of customer specifications for trimming meat
- give examples of workplace specifications for trimming meat
- trim meat to specifications as follows:
 - for *meat retailing*, meat must include beef, sheep meat and one other species
 - for *smallgoods manufacturing*, meat must include a minimum of one species
- use a knife to workplace, OH&S and hygiene requirements
- maintain a sharp knife
- apply relevant *communication skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- hygiene requirements for the handling of meat products
- hygiene requirements for use of a knife

REQUIRED SKILLS AND KNOWLEDGE

- OH&S requirements for use of a knife
- workplace requirements for use of a knife
- relevant regulatory requirements
- steps in sharpening a knife

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Meat retailing:

- trim meat for a minimum of two species (including beef and sheep) to specification, workplace and regulatory requirements.

Smallgoods manufacturing:

- trim meat for one species to specification, workplace and regulatory requirements.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

Resources may include:

EVIDENCE GUIDE

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up <i>packaging unit</i> for operation	1.1. Workplace start-up procedures are implemented ensuring compliance with Occupational Health and Safety (<i>OH&S</i>) and hygiene requirements 1.2. Consumables are loaded to specifications 1.3. <i>Equipment</i> settings are selected according to packaging instructions 1.4. Faults in equipment are identified and reported either verbally or in writing according to <i>workplace requirements</i> .
2. Set weight controls	2.1. Weight controls are set to production requirements ensuring bagged <i>product</i> is check-weighed to verify machine set up 2.2. Controls are adjusted to achieve production specifications.
3. Operate packaging process	3.1. Product is packaged to workplace requirements ensuring process is operated according to <i>OH&S</i> , workplace and hygiene requirements, and manufacturer's specifications 3.2. Packs are checked for damage, sealed and coded to packing requirements.
4. Describe packaged product	4.1. Packaged product is measured according to workplace requirements. 4.2. Packaged product is labelled according to workplace requirements. 4.3. Product is packaged according to <i>OH&S</i> and hygiene requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- assemble the packaging unit
- check safety features are in place

REQUIRED SKILLS AND KNOWLEDGE

- check the unit to ensure cleanliness and working order
- accurately enter information in labelling equipment
- set weight controls
- load product according to specifications
- operate packaging equipment to package products according to manufacturer's specifications, workplace, OH&S, hygiene and sanitation requirements
- adjust equipment settings according to packaging instructions or schedules
- complete packaging and labelling records accurately
- package product to customer specifications
- identify and report faults in equipment
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as part of a team
- apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use estimation and manual scales to check-weigh product

Required knowledge

Knowledge of:

- methods of recording production
- regulatory requirements related to packaging
- features of the packaging unit - parts, safety features, start-up and shut-down procedures, possible faults and adjustments
- production schedule for automatic packaging and labelling equipment
- relevant regulatory requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Arrange and consolidate orders	1.1. Orders picked from separate areas are consolidated. 1.2. Products and/or batches are placed in correct despatch area. 1.3. Information about despatch scheduling requirements is acquired. 1.4. Products are arranged and secured. 1.5. Product is stored in despatch area according to schedule. 1.6. Correct methods for efficient and safe loading are used.
2. Loadout product	2.1. Product is transported to loadout according to Occupational Health and Safety (<i>OH&S</i>), <i>hygiene and sanitation</i> , Quality Assurance (QA) and <i>workplace requirements</i> . 2.2. Product is loaded according to OH&S, hygiene, QA and workplace production requirements. 2.3. Products are documented and <i>recorded</i> according to workplace and production requirements. 2.4. Product loadout is completed according to OH&S, QA, and workplace requirements.
3. Maintain clean holding rooms	3.1. Holding rooms are maintained to workplace, <i>regulatory</i> , and hygiene and sanitation requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: <ul style="list-style-type: none"> • identify species and various meat products for storage • handle product according to hygiene requirements • monitor refrigerated temperature on a regular basis • rotate stock • apply relevant <i>communication</i> and <i>mathematical skills</i> • arrange and consolidate orders to customer and workplace requirements

REQUIRED SKILLS AND KNOWLEDGE

- work effectively as an individual and as part of a team
- record information accurately and legibly
- seek advice where necessary from relevant sources when working with new products, technology or changes in work practices
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use correct manual handling techniques for transferring product to storage facilities

Required knowledge

- storage requirements for products
- recording procedures for loadout of product
- regulatory requirements related to storage and handling of product
- temperatures for storage of meat products
- workplace requirements for despatch of meat
- appropriate storage facilities for individual products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

Resources may include:

- enterprise inventory and despatch systems, access to product holding and loadout areas, orders
- workplace environment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality and Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Break carcass into <i>primal cuts</i>	1.1. Carcass is accurately separated into primal cuts according to <i>workplace</i> , Occupational Health and Safety (<i>OH&S</i>), Quality Assurance (QA) and <i>hygiene requirements</i> .
2. Handle knife effectively	2.1. Knife is handled safely, hygienically and effectively.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the major anatomical structures of the carcass of each species
- identify primary *cut specifications* for:
 - *meat retailing*: beef and at least two species of small stock
 - *smallgoods manufacturing*: at least one species
- prepare equipment for breaking carcass correctly and safely
- position or fasten carcass securely for separation
- demonstrate the separation of carcass into primal cuts on a range of meat cuts (minimum of three species for meat retailing and one for smallgoods manufacturing), according to workplace, OH&S, and hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- demonstrate safe manual handling techniques
- sanitise equipment according to workplace requirements
- apply relevant *communication* skills
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- hygiene, OH&S or workplace requirements when breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts
- relevant *regulatory requirements*

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

For meat retail the candidate must be able to::

- break carcass into primal cuts for a minimum of three species (including beef and sheep)
- identify primary cut specifications for beef and at least two species of small stock.

For smallgoods manufacturing the candidate must be able to:

- break carcass into primal cuts for a minimum of one species
- identify primary cut specifications for at least one species.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <i>Bone primal cuts</i>	1.1. Primal cuts are boned to <i>workplace</i> , Occupational Health and Safety (<i>OH&S</i>), <i>hygiene and sanitation</i> , and Quality Assurance (QA) requirements.
2. Trim primal cuts	2.1. Primal cuts are trimmed to workplace, OH&S, hygiene and sanitation, and QA <i>requirements</i> .
3. Handle knife effectively	3.1. Knife is handled safely, hygienically and effectively.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate correct use of Personal Protective Equipment (PPE) when boning
- identify meat cuts specifications for:
 - *meat retailing*: a minimum of three species using cut descriptions according to customer specifications and regulatory requirements
 - *smallgoods manufacturing*: a minimum of one species
- position cuts securely for boning
- demonstrate safe and effective use of knives and other cutting tools when separating primals
- use safe manual handling techniques
- identify contaminated product and take corrective action according to workplace requirements
- sterilise or sanitise equipment according to regulatory and workplace requirements
- apply relevant *communication* and mathematical skills
- work effectively as an individual and as part of a team
- describe meat *cut specifications* using cut descriptions according to customer specifications and regulatory requirements
- apply relevant *regulatory requirements*
- seek advice from appropriate sources where necessary when working with new species, new technology or changed regulatory requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- principles of hygiene and sanitation, and OH&S in relation to cutting meat product
- food safety, QA and product quality requirements for boning primals
- principles of cross-contamination in relation to cutting
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

For meat retail the candidate must be able to:

- identify meat cut specifications for a minimum of three species using cut descriptions according to customer specifications and regulatory requirements.

For smallgoods manufacturing the candidate must be able to:

- identify meat cut specifications for a minimum of one species.

Where the candidate does not prepare primal cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

EVIDENCE GUIDE

Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Boning of primal cuts</i> may include:</p>	<ul style="list-style-type: none"> • beef (.g. rump, round or knuckle, silverside or outside, topside or inside, loin, shins, chuck, blade or clod, rib set, brisket and flank)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • deer (e.g. legs, rumps, loins, shoulders and forequarters) • goat (e.g. legs, shortloin, ribloin, chump, forequarters and breasts) • kangaroo (e.g. legs, tail butt, loins and shoulders) • pigs (e.g. legs, rumps, loins, foreloins, forequarters and belly/spring) • sheep (e.g. legs, shortloin, ribloin, chump, forequarters and breast) • veal (e.g. legs, loins, forequarters and shoulders).
Workplace requirements may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • PPE which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Hygiene and sanitation requirements may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.

RANGE STATEMENT	
For <i>meat retailing</i> , select beef and sheep plus one other species from the following:	<ul style="list-style-type: none"> • buffalo • emu • game • goat • pork • poultry • or any other species.
For <i>smallgoods manufacturing</i> , select a minimum of one species from:	<ul style="list-style-type: none"> • beef • game • pork • poultry • sheep • any other species.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • applying numeracy skills to workplace requirements • communicating and working with people from a range of cultural, social and ethnic backgrounds • interpreting the needs of internal or external customers • listening and understanding; speaking clearly and directly • reading and interpreting workplace-related documentation.
<i>Cut specifications</i> may be defined by:	<ul style="list-style-type: none"> • customer specifications • industry standards.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select meat	<p>1.1. Meat is selected according to product specifications.</p> <p>1.2. Meat is prepared according to product specifications where part of the work instructions.</p>
2. Prepare ingredients	2.1. Ingredients are prepared according to product specifications and workplace requirements .
3. Prepare facility	3.1. Machinery and equipment are prepared according to product and manufacturer's specifications.
4. Load products	<p>4.1. Product is checked to ensure correct spacing prior to loading.</p> <p>4.2. Product is loaded in a manner that ensures even cooking.</p> <p>4.3. Product is handled at all times according to Occupational Health and Safety (OH&S), and hygiene and sanitation requirements.</p>
5. Smoke product	<p>5.1. Core temperature probes are inserted into the centre of the product as appropriate to product specifications and workplace requirements.</p> <p>5.2. Machinery is programmed, where applicable in accordance with manufacturer's and product specifications.</p> <p>5.3. A variety of products is smoked to workplace requirements and customer specifications at a speed similar to production requirements.</p> <p>5.4. Process is monitored and recorded according to workplace requirements.</p>
6. Monitor smoke cycle	<p>6.1. Smoke cycle is monitored regularly, results are noted and deviations from the program are corrected.</p> <p>6.2. Internal temperature is manually checked in accordance with workplace requirements to ensure correct smoke time has been achieved and, where necessary, further cooking is undertaken.</p> <p>6.3. When product type and processing procedures require, a shower cycle is initiated according to process specifications.</p>
7. Chill product	7.1. On completion of smoke cycle, product is correctly weighed and either chilled immediately or cooled at ambient temperature to a specified internal temperature before chilling, according to regulatory requirements.

ELEMENT	PERFORMANCE CRITERIA
	7.2. Product is held at a specific and constant temperature according to product specifications. 7.3. Product is stored according to product specifications. 7.4. Product is identified and stacked according to product specifications and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate correct loading procedure for both a full and less-than-full smokehouse
- activate and operate machinery according to manufacturer's and workplace instructions
- measure and monitor product internal temperature correctly to ensure it meets product specifications
- monitor smoking of meat on a regular basis to meet product specifications (including, where relevant, the interpretation of graphs or flow charts or mimic panels and controls)
- interpret cooking records where appropriate with respect to relevant product
- adjust processing as required to achieve product specifications
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and with other team members
- *describe* correct smoking procedure for specific product
- *explain* chilling requirements for different products
- operate smoke facility according to OH&S, hygiene, *regulatory*, product specifications and workplace requirements, and meet production requirements
- report machine faults either verbally or in writing according to workplace specifications
- store meat according to OH&S, hygiene, regulatory, product specifications and workplace requirements

Required knowledge

Knowledge of:

- correct smoking procedure for specific product

REQUIRED SKILLS AND KNOWLEDGE

- storage procedures for smoked products
- meat smoking process
- purpose and effect of smoking processes on meat
- health regulations that apply to smoking of meats
- chilling requirements for different products
- possible effects of inconsistent temperature on product
- effects of smoking on shelf life and taste of product
- purpose of correct water temperature and correct additive sequence, especially phosphate and smoke
- recording requirements for the smoking/cooking process
- relevant workplace requirements related to:
 - appropriate humidity levels
 - effect of moisture on casings
 - smoke generator
 - smoke jet
 - sock
 - wet bulb sock
- use and purpose of *raw materials* for smoking meat
- use and purpose of ingredients for smoking meat
- mathematical information in work instructions, specifications and recipes
- meat cuts used in smoking
- cause and effects of, and explain the appropriate corrective action for:
 - cycle out of sequence
 - excess smoke
 - insufficient smoke

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under normal operating conditions for the enterprise, within the parameters of the role and responsibilities, and according to workplace requirements.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions in a simulated environment.

Resources may include:

- equipment that meets safety requirements
- product specifications and ingredients
- smoking equipment, machinery or production facility.

Method of assessment

Recommended methods of assessment include:

- demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Product specifications</i> may vary according to:</p>	<ul style="list-style-type: none"> customer and workplace requirements.
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> enterprise-specific procedures OH&S requirements Quality Assurance (QA) requirements Standard Operating Procedures (SOPs) the ability to perform the task to production requirements work instructions.
<p><i>Machinery and equipment</i> may include:</p>	<ul style="list-style-type: none"> atomising generators automatic or manual machinery cookers friction generators liquid smoke jet moulds probe thermometers sawdust or woodchip burning generators

RANGE STATEMENT	
	<ul style="list-style-type: none"> • smoke generators • smokers • sock • wet bulb reservoir.
<i>Product</i> may include:	<ul style="list-style-type: none"> • beef (e.g. brisket and tongue) • game meat • lamb (e.g. legs and tongue) • mutton • other meat species or products • pork (e.g. hand and spring) • veal.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Hygiene and sanitation requirements</i> may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
Product may be <i>chilled</i> by:	<ul style="list-style-type: none"> • chill cabinets • immersing in ambient running water • placing in cool room • showering with ambient water • use of intensive coolers • washing in water or brine.

RANGE STATEMENT	
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse groups and individuals • writing to audience needs.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • collection • estimation • calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.
<i>Descriptions and explanations</i> may:	<ul style="list-style-type: none"> • be in diagrammatic, sketch, tabular or graphic formats • be presented in writing, using standard formats • be presented orally • include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • federal and state regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.
Smoke-producing <i>raw materials</i> may include:	<ul style="list-style-type: none"> • liquid smoke • powder • sawdust • solid timber • woodchips.

AHC BIO302A Identify and report unusual disease or plant pest signs

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit of competency specifies the outcomes required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.
------------------------	--

Application of the Unit

Application of the unit	The work in this unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Identify signs of unusual disease or a plant pest	1.1. Signs of disease or a plant pest are identified. 1.2. Signs of disease or a plant pest are compared with own experience of common endemic disease or a plant pest in the species. 1.3. Where signs indicate an unusual disease or a plant pest, severity and extent of problem in the species are assessed. 1.4. Where signs indicate an unusual disease or a plant pest, immediate advice is sought from supervisors, professionals or appropriate authorities.
2. Report signs of unusual disease or a plant pest	2.1. Signs of unusual disease or a plant pest are reported immediately to appropriate authorities. 2.2. Biosecurity measures are implemented according to enterprise biosecurity plans and instructions from appropriate authority.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- observing
- recognising unusual disease or plant pest signs
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- required procedures to follow in notifying appropriate authorities
- where to access additional reliable information or personnel.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:</p> <ul style="list-style-type: none"> • identify unusual disease or pest signs within ones own experience • notify appropriate authorities where appropriate • implement appropriate biosecurity measures.
Context of and specific resources for assessment	<p>For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to identify and report unusual disease or plant pest signs.</p> <p>The candidate must also have access to resources such as photographs of signs of emergency and endemic diseases and of plant pests.</p>
Method of assessment	<p>Assessment for this unit of competency may be undertaken on or off the job. The unit could be assessed on its own or in combination with other units of competency relevant to the job function,</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to identify and report unusual disease or plant pest signs must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include a range of diseases for a particular species or a variety of pests.</p>

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Signs of disease or a plant pest may include:	<ul style="list-style-type: none"> • abnormality • clinical signs • decline and dieback • insect damage or presence of insects • mortalities and mode of death • presence of highly specific vectors • results of post-mortem examinations • unexplained levels of morbidity or mortality in populations.
Unusual diseases or plant pests may include:	<ul style="list-style-type: none"> • disease that is classified as an emergency disease • disease that presents in an unusual, uncommon or atypical form • plant pest species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.
Appropriate authorities may include:	<ul style="list-style-type: none"> • national disease watch hotlines • property owner or manager • regulatory officers from state and territory departments of Primary Industries, Agriculture, Fisheries and Forestry.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to work with livestock	<p>1.1. Work to be undertaken is interpreted from work program where necessary, and confirmed with management.</p> <p>1.2. Discussions are held with other workers who may be affected by the activities to ensure continued smooth operation of the process.</p> <p>1.3. Tools and equipment suitable for the work to be undertaken are selected, checked, and maintained if necessary.</p> <p>1.4. Suitable personal protective equipment is selected, used and maintained.</p>
2. Carry out livestock checks	<p>2.1. All livestock are routinely checked for signs of ill health.</p> <p>2.2. Livestock are examined for signs of illness, injuries and abnormalities, and signs of these are reported in the methods prescribed in the organisations work procedures.</p> <p>2.3. While handling livestock, the potential for Occupational Health and Safety (OHS) hazards is continually monitored, risks assessed, and suitable controls implemented.</p> <p>2.4. Livestock are handled safely and all required restraints are within the organisations and industry guidelines for animal health and welfare.</p>
3. Deal with livestock emergencies	<p>3.1. Common signs of livestock injury or life threatening conditions are detected and the situation quickly analysed before notification or action is taken.</p> <p>3.2. Life threatening livestock ailments requiring emergency treatment are notified to the supervisor, manager or veterinarian and immediate assistance is called.</p> <p>3.3. Basic emergency and/or livestock first aid procedures are carried out until professional help arrives.</p> <p>3.4. Serious cuts and abrasions to livestock are promptly reported to the supervisor or to the veterinarian and assistance provided as required during professional treatment.</p>
4. Provide veterinary procedure support	<p>4.1. Cuts, abrasions and bruises are treated under instruction from the veterinarian, manager or foreman.</p> <p>4.2. Animals are examined for signs of distress or</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>soreness after moving or mating procedures and all abnormalities are reported.</p> <p>4.3. Appropriate treatment is applied as instructed by the manager or supervisor.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and follow safe operating procedures
- handle livestock
- identify signs of ill health or injury or signs of injury or abnormality
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- the range of ailments that may occur or affect livestock
- the application of a range of basic treatments under veterinary supervision
- the behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- the organisations livestock production and management plans
- sound management practices and processes to minimise noise, odours and debris
- relevant legislation and regulations relating to waste and environment management and animal health and welfare.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> • check livestock regularly • identify symptoms of ill health or injury • deal efficiently and calmly with livestock emergencies • complete basic livestock first aid procedures • record and report serious issues or injuries.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Livestock may include:	<ul style="list-style-type: none"> • cattle • sheep • pigs • alpacas • goats • deer.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for handling livestock	<p>1.1. Livestock handling areas, gates and access routes are identified, prepared and maintained according to enterprise requirements.</p> <p>1.2. Livestock are located and identified for handling according to supervisor's instructions.</p> <p>1.3. Behavioural characteristics of livestock are observed, anticipated and appropriate handling methods selected.</p> <p>1.4. Handling equipment is selected, checked for soundness and prepared for use according to manufacturer's specifications and supervisor's instructions.</p> <p>1.5. Hazards in the workplace are recognised and safety concerns reported.</p>
2. Handle livestock	<p>2.1. Suitable personal protective equipment is selected, used and maintained according to Occupational Health and Safety (OHS) requirements.</p> <p>2.2. Procedures to control, draft and sort livestock are conducted with due care according to OHS and animal welfare requirements.</p> <p>2.3. Restraint procedures are carried out safely and with minimum stress and discomfort to livestock according to OHS and animal welfare requirements.</p> <p>2.4. Livestock behaviour is continually monitored and anticipated during moving and drafting processes to ensure wellbeing of livestock and safety of handlers.</p> <p>2.5. Livestock count is conducted and recorded according to enterprise requirements.</p> <p>2.6. Environmental implications associated with livestock production are recognised and reported to the supervisor.</p>
3. Complete handling procedure	<p>3.1. Livestock handling operations are completed as instructed, and gates and access routes prepared for livestock departure according to enterprise requirements.</p> <p>3.2. Handling areas and equipment are cleaned and maintained and surplus materials stored according to OHS and enterprise requirements.</p> <p>3.3. Handling area maintenance requirements and equipment faults or malfunctions are detailed and reported according to enterprise requirements.</p> <p>3.4. Livestock residues and waste are disposed of</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to OHS and enterprise environmental practices.</p> <p>3.5. Relevant information is recorded and reported according to enterprise requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and follow safe work practices
- provide due care in the handling of livestock
- recognise enterprise livestock identification systems
- safely drive vehicles, and ride horses and motorbikes without damage to person, property or environment
- recognise livestock abnormalities
- control environmental impacts associated with livestock production
- apply contingency measures for handling livestock in the event of adverse weather conditions
- observe and describe the behaviour of livestock
- read and comprehend oral and written information and instructions, write basic statements and maintain livestock handling records
- assess and calculate livestock numbers
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- livestock breeds and basic nutritional and welfare requirements
- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Prepare horses for work	<p>1.1. Occupational Health and Safety (OHS) hazards are continually identified when working with horses, risks are assessed and suitable controls implemented.</p> <p>1.2. Equipment suitable for the work to be undertaken is selected, checked, and maintained if necessary.</p> <p>1.3. Suitable personal protective equipment is selected, used and maintained.</p> <p>1.4. Feeds are mixed and offered in the quality and quantities instructed by the manager.</p> <p>1.5. Horses are groomed before and after work to ensure their coat condition and health are maintained.</p> <p>1.6. Hoof care and cleaning is completed before working the horses, according to the organisations procedures.</p> <p>1.7. Vices of horses are identified and corrective action is taken to maintain control of the horses.</p> <p>1.8. Horse education is carried out in association with stock working routines.</p>
2. Ride horses	<p>2.1. Stock horses suitable for the task and rider ability are identified and selected.</p> <p>2.2. Unhealthy or unsound horses are identified and reported to foreman or manager.</p> <p>2.3. Selected horses are approached, caught and restrained as instructed.</p> <p>2.4. Gear to manage and control the horse for the required work is selected and fitted.</p> <p>2.5. OHS procedures are followed for working with and riding horses.</p> <p>2.6. Horses are handled and restrained safely and within the organisation's and industry guidelines for animal health and welfare.</p> <p>2.7. Livestock are checked, mustered and moved by horseback.</p> <p>2.8. Educated horses are controlled and worked as an integral part of stock husbandry routines.</p> <p>2.9. Horses are handled safely and within the organisations and industry guidelines for animal health and welfare.</p>
3. Care for saddlery and equipment	<p>3.1. Basic working gear to suit the individual horse is selected and fitted.</p> <p>3.2. Working gear is cleaned and checked as a part of regular daily routines.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Working gear is maintained or repaired as required to ensure safe horse working conditions. 3.4. Working gear and saddlery is stored after use in line with organisation policy.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- horse handling skills
- ride horses
- complete basic hoof care procedures
- groom horses
- care for saddlery and equipment
- measuring quantities required for feed
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- horses and horse husbandry
- horse riding and handling safety when riding
- horse health, behaviour and psychology
- anatomy and physiology of the horse
- care and maintenance of hooves and the lower limbs
- environmental controls and codes of practice applicable to the organisation
- the organisation's livestock production and management plans
- sound management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to waste and environment management,

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> • prepare horses for work • select and maintain equipment for riding • monitor and anticipate horse behaviour when riding • recognise and report hazards or movement problems for remedial action • care for saddlery and equipment.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Horses may include:	<ul style="list-style-type: none"> • those suitable for beginning riders and novice handlers, but can be of any type and breed used for riding work.

AHCLSK324A Care for and train working dogs

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of selecting, training and caring for working dogs in the rural industry and defines the standard required to: select a working dog; develop training programs and apply effective training procedures; maintain health and welfare requirements and recognise abnormalities; provide a balanced diet, adequate water and housing.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to farm workers who use dogs to handle stock and involves the application of some judgement and discretion.
--------------------------------	---

Licensing/Regulatory Information

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Identify role and select working dog	1.1. Working dog requirements for the enterprise are identified and confirmed. 1.2. Suitable working dog breeders and bloodlines are researched and availability determined. 1.3. Dogs are inspected for suitability and selected to meet role and enterprise requirements.
2. Develop and implement training program	2.1. Basic commands are taught. 2.2. The dog is introduced to a small flock in a confined area. 2.3. The dog is asked to handle larger numbers in more open areas. 2.4. Specialist skills such as backing and forcing are taught. 2.5. Existing and potential animal handling hazards in the workplace are identified, risk assessed and controlled in line with enterprise requirements.
3. Maintain welfare of working dog	3.1. Health, condition and status are monitored and maintained. 3.2. Diet is provided to meet nutritional requirements in consideration of work/training program. 3.3. Preventative health treatments are arranged and administered. 3.4. Facilities and equipment needs are provided and maintained in line with animal welfare requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- select working dog to meet requirements
- develop training programs and apply effective training procedures
- maintain health and welfare requirements and recognise abnormalities
- arrange and administer preventative health treatments
- maintain clean and safe facilities and workplace environment
- assess and calculate work area dimensions, and measure dietary requirements and preventative health treatments.

REQUIRED SKILLS AND KNOWLEDGE

- demonstrate safe workplace and animal handling practices
- dispose of waste according to enterprise procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- canine breeds and behaviour, health and nutritional requirements
- effective canine training systems and procedures
- safe animal handling methods and techniques
- canine preventative health treatments
- dietary requirements of working dogs
- enterprise policies with regard to working dogs and recording and reporting routines.
- hazards associated with training and caring for working dogs and appropriate control measures
- State/Territory legislative and regulatory requirements with regard to OHS, animal welfare, and the registration and care of domestic dogs.

Evidence Guide

EVIDENCE GUIDE

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Prepare tractor for operation	<p>1.1. Occupational Health and Safety (OHS) hazards in the work area are identified and safety concerns reported to the supervisor.</p> <p>1.2. Routine checks of tractors are conducted prior to use according to manufacturer's specifications and enterprise requirements.</p> <p>1.3. Attached equipment is identified and selected appropriate to work requirements, checked for safety and set for operation.</p> <p>1.4. Tractor and attached equipment faults or malfunctions are identified and reported for repair according to enterprise requirements.</p>
2. Operate tractor	<p>2.1. Risks to self, others and the environment are recognised and avoided according to enterprise requirements.</p> <p>2.2. Suitable personal protective equipment is used, maintained and stored according to enterprise requirements.</p> <p>2.3. Tractor is operated according to low risk operating procedures in a controlled manner and monitored for performance and efficiency.</p> <p>2.4. Environmental impacts associated with tractor operation are recognised and minimised according to directions.</p>
3. Complete and check tractor operation	<p>3.1. Shut-down procedures are conducted according to manufacturer's specifications and enterprise requirements.</p> <p>3.2. Malfunctions, faults, irregular performance or damage to tractor and attached equipment is detailed and reported according to enterprise requirements.</p> <p>3.3. Tractor and attached equipment is cleaned and decontaminated where necessary, secured and stored according to enterprise and OHS requirements.</p> <p>3.4. Tractor operational reports are maintained to industry standards according to enterprise requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- steer, manoeuvre and position tractor in a smooth and controlled manner
- utilise the various components and controls of tractors
- set and secure equipment for operation
- safely and effectively operate tractors in adverse weather and difficult terrain conditions
- demonstrate safe and environmentally responsible workplace practices
- interpret manufacturers specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- effectively communicate faults and hazards, interpret and apply task instructions, report and maintain operational records
- calculate and measure distance, volumes and weights
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- tractor components, controls and features and operational functions
- tractor steering systems and features
- attached equipment, features and operational functions and procedures
- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated power
- effects of adverse weather and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- use and control of hazardous substances.
- relevant legislation with regard to machinery operation and licensing requirements
- environmental Codes of Practice with regard to machinery operation
- OHS legislative requirements, Codes of Practice, hazard identification and risk assessment.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include evidence of the following:</p> <ul style="list-style-type: none"> • carry out pre-operational checks and maintenance including tagging defects • set and secure attachments according to manufacturer's directions • operate tractor in a safe and controlled manner • implement shut-down procedures • store machinery and equipment • record maintenance and operation details.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Prepare a quad bike for operation	<p>1.1. Occupational Health and Safety (OHS) hazards are identified and safety concerns reported to the supervisor.</p> <p>1.2. Routine checks and maintenance of quad bike is conducted prior to use according to manufacturer's specifications and enterprise requirements.</p> <p>1.3. Attached equipment suitable for quad bikes is fitted according to manufacturer's specifications.</p> <p>1.4. Attached equipment is selected appropriate to work requirements, checked for safety, and set for operation.</p> <p>1.5. Quad bike and equipment faults or malfunctions are identified and reported for repair according to enterprise requirements.</p> <p>1.6. Areas and applications excluded to quad bikes are identified on the farm safety plan.</p> <p>1.7. Appropriate licenses for operation of vehicles are obtained where required.</p> <p>1.8. Unload quad bike safely.</p>
2. Operate a quad bike	<p>2.1. Risks to self, others and the environment are recognised and controlled according to legislative and enterprise requirements.</p> <p>2.2. Suitable personal protective equipment is selected, used and maintained according to legislative and enterprise requirements.</p> <p>2.3. Legislation and enterprise policies are complied with in regards to carrying passengers only bikes specifically equipped for passengers may be used.</p> <p>2.4. Hazards are identified, anticipated and controlled through the application of safe riding techniques.</p> <p>2.5. Farm quad bikes are operated in a safe and controlled manner and monitored for performance and efficiency.</p> <p>2.6. Environmental implications associated with quad bike operation are recognised and positive enterprise environmental procedures applied where relevant.</p>
3. Complete and check quad bike operation	<p>3.1. Shut-down procedures are conducted according to manufacturer's specifications and enterprise requirements.</p> <p>3.2. Malfunctions, faults, irregular performance or damage to ride-on vehicle is detailed and reported according to enterprise requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Quad bikes are cleaned, secured and stored according to enterprise requirements. 3.4. Quad bike operational reports are maintained to industry standards according to enterprise requirements. 3.5. Load and secure quad bike safely.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- steer, manoeuvre and position quad bikes in a smooth and controlled manner
- apply hand-eye co-ordination and correctly transfer body weight to maintain bike stability
- safely operate quad bikes in a range of weather and terrain conditions
- match and attach equipment to quad bikes according to manufacturer's specifications, legislative requirements, work requirements and enterprise safety policy
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- effectively communicate faults and hazards, interpret and apply task instructions, report and maintain operational records
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- hazards and risks associated with quad bike use
- components, controls and features of quad bikes and their functions
- range of quad bikes and attached equipment and functional applications

REQUIRED SKILLS AND KNOWLEDGE

- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and bike movement
- effects of adverse weather and terrain conditions on the operation of quad bikes
- licensing requirements
- OHS legislative requirements, codes of practice and enterprise procedures
- codes of practice with regard to the use and control of hazardous substances
- environmental codes of practice for machinery operation.
- Safe Operating Procedures (SOPs)
- record keeping requirements.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> • perform routine pre-operational checks and maintenance • attach and operate equipment • recognise and control hazards and risks • safely operate quad bikes vehicles in a range of weather and terrain conditions • match and attach equipment appropriate to work requirements • monitor and maintain vehicle records.

BSBCOM501B Identify and interpret compliance requirements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation. A range of legislation, rules, regulations and codes of practice may apply to this unit at the time of endorsement, depending on job roles and jurisdictions.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to individuals working as a chief executive or manager in a small organisation (where it would be part of their broad role) or as a member of a compliance management team within a larger organisation. These individuals require a sound theoretical knowledge of compliance and well established skills in identifying and interpreting compliance requirements relevant to the operations and sphere of business of the organisation and/or industry sector concerned.</p> <p>The unit also applies to internal or external consultants as part of a broader advisory role to the chief executive or management team of a large or small organisation on compliance management policies and systems.</p> <p>As the activities are focused primarily on identifying and interpreting specific legislative requirements, codes of practice, and internal standards and procedures as they relate to a particular organisation, this unit differs from BSBCOM601B Research compliance requirements and issues. Researching compliance issues is a higher order competence aimed at carrying out research into a wider range of compliance-related issues, such as the costs of compliance, the potential impact of compliance on an organisation or industry, and the risks and consequences of non-compliance.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify the scope of operations	<p>1.1. Identify and review the relevant <i>range of operations</i> and the sphere of business arrangements of the organisation</p> <p>1.2. Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to <i>compliance requirements</i></p> <p>1.3. Develop and document work activity plans for determining relevant compliance requirements</p> <p>1.4. Obtain approval of plans from relevant organisational personnel</p>
2. Identify compliance requirements	<p>2.1. Conduct a search of <i>information on internal and external compliance requirements</i> using appropriate <i>search resources</i>, including <i>relevant Australian and international standards</i></p> <p>2.2. Ensure the search of compliance requirements scans across all relevant <i>jurisdictions of laws, regulations, and industry and organisational codes and standards</i> and identify pertinent compliance requirements</p> <p>2.3. Progressively review information collected in terms of its relevance to the organisation's operations, services and products</p> <p>2.4. Organise and store gathered <i>information on relevant compliance requirements</i> in an appropriate format for further analysis</p>
3. Interpret, analyse and prioritise identified compliance requirements	<p>3.1. Review and interpret collected information in terms of its relevance to the organisation's functions, services and products</p> <p>3.2. Discuss and clarify with <i>relevant internal or external personnel</i> ambiguities, uncertainties and problems experienced in interpreting identified compliance information</p> <p>3.3. Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches</p> <p>3.4. Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the</p>

ELEMENT	PERFORMANCE CRITERIA
	organisation's operations, and those that are pertinent but are incidental to the organisation's operations
4. Document compliance requirements	4.1. Organise and document outcomes of the identification and interpretation activities 4.2. Prepare and communicate reports of relevant compliance requirements and assessment of implications to <i>relevant personnel performing specific compliance management functions</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to:
 - contribute to the development of a positive culture of compliance within an organisation
 - work with internal and external personnel with an interest in an organisation's compliance program and management system
- interpersonal and communication skills to relate to internal and external personnel, including those representing relevant regulatory authorities, professional institutes and organisations, including standards' organisations
- literacy skills to read and interpret various types of documents and to write reports containing complex concepts
- organisational and time-management skills to conduct compliance management activities
- project management skills to:
 - scope and plan the conduct of compliance requirement identification activities
 - manage other personnel involved in the identification and interpretation of compliance management activities
- research and analytical skills to identify and interpret compliance requirements
- technical skills to use communications technology effectively

Required knowledge

- elements of compliance programs and related management systems, including:
 - documentation of compliance requirements relevant to the organisation
 - specification of compliance management functions, accountabilities and responsibilities within the organisation
 - compliance-related management information systems
 - record-keeping systems required for compliance management
 - liaison procedures with relevant internal and external personnel on compliance-related matters
 - breach management policies and processes, including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
 - compliance reporting procedures
 - corporate induction and training processes related to compliance management
 - processes for the internal and external distribution and promotion of information on compliance requirements, and compliance programs and management systems

REQUIRED SKILLS AND KNOWLEDGE

- complaints handling systems
- continuous improvement processes for compliance, including monitoring, evaluation and review
- strategies for developing a positive compliance culture within the organisation
- techniques and performance indicators for monitoring the operation of a compliance program or management system
- reporting processes on compliance management, including reports on breaches and rectification action
- relevant organisational policies and procedures, including:
 - compliance plans and policies in various compliance areas
 - organisational standards for operations and ethics
- relevant Australian and international standards, including:
 - AS 3806:2006 Compliance programs
 - AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations
 - AS ISO 15489:2004 Records management
 - AS/NZS 4360:2004 Risk management
- relevant organisational policies and procedures, including:
 - plans and policies in various compliance areas
 - organisational standards for operations and ethics

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • document processes used to identify, analyse and interpret organisational compliance requirements • apply knowledge of elements of compliance programs and related management systems.
Context of and specific resources for assessment	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • organisational policies and procedures, standard operating procedures, and plans • relevant published material on legislation, regulations, licensing requirements, codes of practice, standards, etc. • appropriate computer resources for online searching and review of relevant compliance requirements.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • observation of activities undertaken to identify compliance requirements • assessment of reports identifying compliance requirements and containing analysis of the implications of those requirements on organisational objectives, processes and systems • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • observation of interactions with internal and external stakeholders while identifying compliance requirements • oral or written questioning to assess knowledge of compliance requirements and their impact on organisational objectives, processes and systems • review of authenticated compliance promotional documents or computer files from the workplace or training environment.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Range of operations may include:

- full range of operations of an organisation at a particular site
- full range of operations of an organisation distributed across multiple sites
- full range of operations of an organisation, including mobile units such as vehicles, railway trains, maritime vessels and aircraft
- operations of a particular section or organisational unit.

Compliance requirements may include:

- cross-industry, industry-specific and internal organisational compliance requirements in such areas as (examples in alphabetical groupings):
 - anti-discrimination, including discrimination by race, sex, disability, religion, etc.; alcohol licensing, including licensing regulations covering clubs, pubs, licensed premises, etc.; aviation
 - bankruptcy
 - chemical use, child protection, construction, conveyancing/real estate, copyright, corporate governance, customs, credit
 - education, electricity, environmental protection, equal opportunity
 - financial services, including banking; fire; food hygiene; freedom of information; freight forwarding
 - gambling, gene technology
 - health, human rights
 - insurance, immigration, intellectual property
 - land management
 - maritime, mining
 - pharmaceuticals, patents, privacy
 - quarantine
 - racing, rail transport, road transport
 - safety, including cross-industry generic regulations as well as industry, equipment or product-specific subcategories, e.g. marine safety, rail safety, food

RANGE STATEMENT	
	<p>safety, aviation safety, road safety, dangerous goods, construction safety, mine safety, etc.; security; sewage; superannuation</p> <ul style="list-style-type: none"> • taxation, telecommunications, tobacco, trade practices and consumer protection • water supply, workers compensation, workers rehabilitation • different types of internal and external compliance requirements, including: <ul style="list-style-type: none"> • accreditation requirements of an institute, professional organisation or registration body • internal policies, procedures, standards or codes of practice of an organisation • regulations of a state or territory, national or international regulatory authority • requirements for certification under statutory licensing systems • statutory standards or codes of practice.
<i>Information on internal and external compliance requirements</i> may include:	<ul style="list-style-type: none"> • internal policies, standard operating procedures, standards, and codes of practice • published material relevant to compliance held in either internal or external libraries • relevant legislation, regulations and licensing requirements pertinent to the organisation's operations and sphere of business.
<i>Search resources</i> may include:	<ul style="list-style-type: none"> • computer terminals linked to data sources either via the internet, internal networks, or CDs • library resources and materials, including compliance-related books, journals, manuals, standards, CDs and other multimedia resources • published information on such things as relevant legislation, regulations, licensing requirements, codes of practice and Australian standards.
<i>Relevant Australian and international standards</i> may include:	<ul style="list-style-type: none"> • AS 3806:2006 Compliance programs • AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations • AS ISO 15489:2004 Records management • AS/NZS 4360:2004 Risk management.
<i>Jurisdictions of laws, regulations, industry and organisational codes and standards</i>	<ul style="list-style-type: none"> • global • industry • local

RANGE STATEMENT	
may include:	<ul style="list-style-type: none"> • national • organisational • state or territory.
<i>Information on relevant compliance requirements</i> may include:	<ul style="list-style-type: none"> • correspondence, emails and other written information provided by internal and external personnel contacted during search activities • information downloadable from relevant websites • newsletters, bulletins and information sheets and other similar periodic documentation distributed by relevant regulatory authorities and standards bodies • published information on legislation, regulations, codes of practice, standards, licensing requirements, standard operating procedures, etc. • records of conversations and meetings with relevant internal and external personnel.
<i>Relevant internal personnel</i> may include:	<ul style="list-style-type: none"> • board of directors • chief executive officer • compliance management team • compliance specialists at the operational level • frontline managers • senior management team.
<i>Relevant external personnel</i> may include:	<ul style="list-style-type: none"> • legal and business advisors and consultants with expertise in compliance management • representatives of professional associations and institutes relevant to the organisation's operations and sphere of business • representatives of relevant authorities in pertinent compliance areas.
<i>Relevant personnel performing specific compliance management functions</i> may include:	<ul style="list-style-type: none"> • compliance management consultants • compliance management officers • compliance managers • legal personnel specialising in compliance management • line managers with specific compliance functions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify the purpose and scope of the research	1.1. Confirm and clarify the <i>purpose and scope of the required compliance related research</i> in collaboration with the <i>client/s</i> and relevant <i>internal and/or external personnel</i> 1.2. Document the purpose and scope of the required research in accordance with organisational and/or client requirements
2. Develop the research plan	2.1. Develop a suitable <i>research methodology</i> to enable sufficiently valid and reliable outcomes for the required research 2.2. Prepare the <i>research plan</i> for the proposed project 2.3. Obtain approval of plan from relevant internal and/or external personnel
3. Gather required research data	3.1. Collect relevant <i>research data</i> using appropriate research techniques and sources in accordance with the agreed research plan 3.2. Gather and interpret from appropriate sources, information on <i>relevant Australian and international standards</i> pertaining to compliance requirements and related systems 3.3. Organise, interpret and review collected data in terms of its relevance to the project's purpose and objectives 3.4. Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal or external personnel 3.5. Organise interpreted research data for later analysis
4. Analyse collected data	4.1. Analyse data in accordance with planned methodology 4.2. Review and discuss outcomes of the analysis with relevant internal or external personnel
5. Determine research findings and outcomes	5.1. Interpret the outcomes of the data analysis in accordance with the project objectives 5.2. Develop and discuss preliminary findings, identified issues and related recommendations with relevant internal and/or external personnel 5.3. Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options

ELEMENT	PERFORMANCE CRITERIA
6. Document and disseminate research outcomes	<p>6.1. Prepare a draft report of the research outcomes, findings and recommendations in accordance with the agreed structure and format, and distribute to relevant internal and/or external personnel for comment and feedback</p> <p>6.2. Edit the report based on the feedback obtained</p> <p>6.3. Proofread the report prior to publication</p> <p>6.4. Ensure the outcomes, findings and recommendations in the report are signed off by <i>authorised personnel</i></p> <p>6.5. Produce and disseminate the report to nominated internal and/or external personnel in accordance with agreed arrangements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to contribute to a positive culture of compliance within an organisation
- interpersonal skills to relate to internal and external personnel and in particular those representing relevant regulatory authorities, professional institutes and organisations, standards organisations
- project management skills to:
 - manage other personnel involved in the research activity
 - manage time
 - manage finances
- research skills to:
 - conduct literature and internet searches
 - assist with various types of research surveys
 - assist with the analysis and organisation of research data, including qualitative and quantitative data, using appropriate techniques
 - develop research plans.

Required knowledge

- compliance requirements relevant to the organisation research methods and techniques suitable for compliance related research projects
- elements of compliance program/management systems including:
 - specification of compliance management functions, accountabilities and responsibilities within the organisation
 - compliance related management information systems
 - record keeping systems required for compliance management
 - liaison procedures with relevant internal and external personnel on compliance related matters
 - breach management policies and processes including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
 - compliance reporting procedures
 - corporate induction and training processes related to compliance management
 - processes for the internal and external promulgation and promotion of information on compliance requirements and compliance program/management system
 - compliance complaints handling systems
 - continuous improvement processes for compliance including monitoring,

REQUIRED SKILLS AND KNOWLEDGE

- evaluation and review
- strategies for developing a positive compliance culture within the organisation
 - techniques and performance indicators for monitoring the operation of a compliance program/management system
 - reporting processes on compliance management including reports on breaches and rectification action
 - quantitative and qualitative data analysis techniques relevant to compliance related research
 - relevant Australian and international standards including but not limited to:
 - AS 3806:2006 Compliance programs
 - AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations
 - AS ISO 15489:2004 Records management
 - AS/NZS 4360:2004 Risk management quantitative and qualitative data analysis techniques relevant to compliance related evaluation
 - relevant organisational policies and procedures including:
 - compliance plans and policies in various compliance areas
 - organisational standards for operations and ethics
 - sources of data relevant to compliance related research.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • completion of projects in which key aspects or issues associated with compliance requirements or a compliance program/management system have been researched • knowledge of compliance requirements relevant to the organisation research methods and techniques suitable for compliance related research projects.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to relevant published material such as: <ul style="list-style-type: none"> • organisational policies, standard operating procedures, procedures and plans • relevant legislation, regulations, licensing requirements, codes of practice, standards • access to relevant internal and external data files • access to appropriate computer resources for online searching, data processing and analysis, and report preparation and editing.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of techniques and data collected to identify compliance requirements • assessment of reports documenting compliance research and issue findings • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observations of activities undertaken to research compliance requirements and issues • observations of interactions with internal and external stakeholders while researching compliance requirements • oral or written questioning to assess knowledge of

EVIDENCE GUIDE	
	<p>compliance processes used to identify compliance requirements and issues</p> <ul style="list-style-type: none">• review research plan• evaluation of process used to distribute draft report of the research outcomes, findings and recommendations for comment and feedback, and outcomes of this process.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none">• other compliance units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purpose and scope of the required compliance related research</i> may include:</p>	<ul style="list-style-type: none"> • costs of compliance at the organisation or wider levels • investigation of relevant jurisdictional aspects of compliance covering: <ul style="list-style-type: none"> • organisational issues • industry issues • local issues • state/territory issues • national issues • global issues • potential consequences of non-compliance at the organisation or wider levels • potential impacts of compliance requirements upon an organisation, an industry or an economy • program and system requirements for effective compliance management • skill requirements and organisational structures for effective compliance management
<p><i>Client/s</i> may include:</p>	<ul style="list-style-type: none"> • educational institutions and organisations • enterprises • government departments • professional associations and institutes • regulatory authorities
<p><i>Relevant internal and/or external personnel</i> may include:</p>	<ul style="list-style-type: none"> • board of directors • chief executive officer • chief executives and managers in organisations with an interest in the compliance issues being researched • compliance management team (where relevant) • compliance specialists at the operational level • frontline managers • legal and business advisors and consultants

RANGE STATEMENT	
	<p>with expertise and interest in compliance requirements and related management systems</p> <ul style="list-style-type: none"> • representatives of professional associations and institutes relevant to the organisation's operations and sphere of business • representatives of relevant authorities in pertinent compliance areas • senior management team
Research methodology may include:	<ul style="list-style-type: none"> • desk analysis • environmental scans • literature searches including internet searches • qualitative data analysis • quantitative data analysis using manual and computerised techniques • surveys including interviews, focus groups, questionnaires
Research plan may include:	<ul style="list-style-type: none"> • costs • details of the research objectives and deliverables • methodology • personnel required including project manager, researcher or research team and those who may be consulted during the course of the research activities • time lines and milestones
Research data may include:	<ul style="list-style-type: none"> • completed survey questionnaires • document files downloaded from internet websites • published documents including papers, standards, regulations • quantitative data collected from various sources, such as ABS data, data provided by regulatory authorities, demographic data • records of interviews, meetings or focus group workshop outcomes • records of telephone conversations • written correspondence including letters, faxes, emails
Relevant Australian and international standards may include:	<ul style="list-style-type: none"> • AS 3806:2006 Compliance programs • AS ISO 10002:2006 Customer satisfaction - Guidelines for complaints handling in organizations

RANGE STATEMENT	
	<ul style="list-style-type: none"> • AS ISO 15489:2004 Records management • AS/NZS 4360:2004 Risk management quantitative and qualitative data analysis techniques relevant to compliance related evaluation
<i>Authorised personnel</i> may include but are not limited to:	<ul style="list-style-type: none"> • chief executive officer or manager in an organisation • nominated representative of educational institution/s or organisation/s • nominated representative of professional association/s or institute/s • nominated representative of a regulatory authority • project manager • project steering committee

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist customer to articulate needs	1.1. Ensure <i>customer</i> needs are fully explored, understood and agreed 1.2. Explain and match available services and products to customer needs 1.3. Identify and communicate <i>rights and responsibilities of customers</i> to the customer as appropriate
2. Satisfy complex customer needs	2.1. Explain possibilities for meeting customer needs 2.2. Assist customers to evaluate service and/or product options to satisfy their needs 2.3. Determine and prioritise preferred actions 2.4. Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3. Manage networks to ensure customer needs are addressed	3.1. Establish <i>effective regular communication</i> with customers 3.2. Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3. Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer, and the products and services available 3.4. Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5. Maintain records of customer interaction in accordance with <i>organisational procedures</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read a variety of texts, to prepare general information and papers, and to write formal and informal letters according to target audience
- numeracy skills to analyse data, and to compare time lines and promotional costs against budgets
- problem-solving skills to develop solutions unique to a customer
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - occupational health and safety
- organisational procedures and standards for customer service relationships
- detailed product knowledge which may be of significant breadth (so as to propose alternative products and services), or of significant depth (so as to propose variations within a limited product and service range).

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • assisting customers to articulate their needs • documenting processes used and customer satisfaction with the products/services offered • assisting customers to address their needs.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of products/services and promotional strategies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation prioritising preferred actions • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • assessment of written reports • evaluation of communication established with customers • review of customer interaction records.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • general administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research design theory	1.1. Use a range of <i>research techniques</i> to source information about design theory 1.2. Identify and explore <i>new, emerging and alternative sources of ideas and thinking</i> about design 1.3. Expand own knowledge and understanding of design through review and <i>critical analysis</i> of information 1.4. Analyse, compare and contrast a range of <i>theoretical perspectives and thinking</i> on design
2. Apply theories of design to professional practice	2.1. Evaluate the relevance and application of different theories of design based on analysis of <i>own professional and personal experience</i> 2.2. Analyse the ways in which different aspects of history, theory and other influences are applied, adapted or challenged in practice 2.3. Assess the ways in which theories and thinking about design may be applied in ways that provide <i>benefits to individuals, businesses and communities</i>
3. Develop, articulate and debate own perspectives on theories of design	3.1. Take a critical approach to different theories and reflect on own ideas and responses 3.2. Develop own <i>substantiated positions</i> in response to research and analysis 3.3. Articulate own positions in a manner which demonstrates <i>clarity of thought and conceptual understanding</i> of different theories and thinking 3.4. Debate own positions on design showing belief in own and ideas and a willingness to remain open to new perspectives

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to articulate and debate complex concepts
- critical thinking skills to analyse complex information, and to develop and substantiate own positions and responses to theories and thinking around design
- literacy skills to research information dealing with complex concepts and theories
- self-management skills to develop and substantiate own views and ideas.

Required knowledge

- different theories of design, including different historical perspectives and current and emerging thinking
- relationship between theories of design and design in practice (in a particular work or broader social context)
- relationships, similarities and differences at a conceptual and practical level between the concepts of design, innovation and creativity
- systemic impacts on design - social, economic, political and environmental.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • research into past, current and emerging theories of design • development of substantiated positions on design and its application in response to own analysis and research • knowledge of different theories and thinking on design and its application in different social and work contexts.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • use of current and emerging sources of information and thinking on design.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of research undertaken by the candidate into design theory and its application • evaluation of candidate's participation in discussion and debate on theories of design
Guidance information for assessment	The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Research techniques</i> may include:	<ul style="list-style-type: none"> • desk research • informal discussions • internet • interviews • literature reviews
<i>New, emerging and alternative sources of ideas and thinking</i> may include:	<ul style="list-style-type: none"> • current business theories • government policy • individual in any field of endeavour • innovative organisations • international trends
<i>Critical analysis</i> may involve:	<ul style="list-style-type: none"> • adapting • analysing and evaluating actions and policies • challenging • clarifying issues, values and standards • comparing analogous situations • comparing and contrasting ideals with practice • comparing and evaluating beliefs, interpretations and theories • developing criteria for evaluation • distinguishing relevant from irrelevant facts • examining and evaluating assumptions • exploring implications and consequences • generating and assessing solutions • debating and discussing • judging • making interdisciplinary connections • making plausible inferences and predictions • noting significant similarities and differences • questioning • reading and listening critically • reflecting
<i>Theoretical perspectives and</i>	<ul style="list-style-type: none"> • economic

RANGE STATEMENT	
<i>thinking</i> may be:	<ul style="list-style-type: none"> • environmental • historical • local, national and international • political • social/cultural
<i>Own professional and personal experience</i> may include:	<ul style="list-style-type: none"> • evaluation of contexts in which creativity has flourished • evaluation of different attitudes to design and the role of designers • observations of the ways people interrelate with the design process, of the ways people use and adapt designs in daily life • reflection on current political, social and cultural trends • reflection on own experience with any type design process • workplace experience
<i>Benefits to individuals, businesses and communities</i> may include:	<ul style="list-style-type: none"> • better individual and business relationships • capacity for innovation and invention • greater social cohesion • improved productivity and profit • psychological wellbeing of individuals and communities
<i>Substantiated positions</i> may be positions which are:	<ul style="list-style-type: none"> • grounded in appropriate research • result of rational and logical thought • subjected to the analysis of others • supported by relevant information
<i>Clarity of thought and conceptual understanding</i> may be demonstrated by:	<ul style="list-style-type: none"> • ability to exchange and debate ideas with others • appropriate distillation of ideas to suit the required purpose • audience understanding • clear articulation of ideas

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research diversity	1.1. Analyse existing practices and <i>information</i> in relation to <i>diversity</i> 1.2. Identify potential benefits of diversity and analyse in relation to <i>business objectives</i> 1.3. Consult <i>key stakeholders</i> about their requirements for a diversity policy 1.4. Access diversity policies from similar organisations and review for relevance to own organisation
2. Draft policy and plan for implementation	2.1. Draft <i>diversity policy</i> 2.2. Develop <i>action plans</i> for policy 2.3. Consult key stakeholders for feedback on draft policy and action plans 2.4. Determine relationships and links with other related policies 2.5. Revise policy for implementation
3. Implement diversity policy	3.1. Explain and interpret policy to key stakeholders 3.2. Promote policy across the organisation through a range of <i>communication channels</i> 3.3. Identify intended and unintended impacts of policy implementation 3.4. Develop tools, benchmarks and other indicators for planning and measuring impact of policy implementation 3.5. Monitor business activities, team plans and staff performance to ensure diversity policy is effectively implemented
4. Review diversity policy	4.1. Gather and analyse information about diversity, the policy and its implementation 4.2. Consult key stakeholders to provide feedback on the policy 4.3. Develop and approve recommendations for changes to the policy 4.4. Refine policy

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- high level research and analytical skills to review business needs and to determine how diversity approaches apply
- interpersonal skills to consult and negotiate with people at all levels, and to present ideas for change and foster support for them
- planning and organising skills to implement and monitor diversity policy.

Required knowledge

- business operations including:
 - familiarity with structure, roles and responsibilities
 - business plans and strategic direction
 - issues that can be linked to diversity
- diversity within the community and business environment:
 - cultures
 - beliefs
 - traditions and practices
- equal opportunity theory
- productive diversity - contemporary theory about diversity and its potential contribution to business advantage
- legislation, codes of practice and national standards, for example:
 - Commonwealth Human Rights and Equal Opportunity Act
 - Commonwealth Racial Discrimination Act/s
 - Commonwealth Sex Discrimination Act
 - Commonwealth Disability Discrimination Act
 - relevant state/territory legislation.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • development of a comprehensive diversity policy with details of an implementation strategy and how it will be monitored and reviewed OR • critical analysis of an existing diversity policy with an evaluation of its effectiveness and recommendations for improvement • knowledge of relevant legislation, codes of practice and national standards.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to workplace documents and data.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • assessment of written reports evaluating the effectiveness of diversity policies and their implementation • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • review of action plans to support diversity policy implementation • review of documentation promoting the policy across the organisation • evaluation of recommendations for policy changes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the BSB60407 Advanced Diploma of Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Information</i> may include:	<ul style="list-style-type: none"> • complaints and grievances e.g. sexual harassment, racial discrimination • customer analysis and feedback • equal opportunity targets • recruitment patterns • stakeholder opinions • statistical data
<i>Diversity</i> includes differences in:	<ul style="list-style-type: none"> • age • belief systems and values • culture • expertise, experience and working styles • gender • interests • interpersonal style • language, literacy and numeracy • physical differences • politics • race • religion • sexual orientation • thinking and learning styles
<i>Business objectives</i> may include:	<ul style="list-style-type: none"> • business goals and plans • future directions statements • vision or mission statements
<i>Key stakeholders</i> may include:	<ul style="list-style-type: none"> • customers and clients • heads of business units • managers and supervisors • organisation executives • staff working in a range of job roles and functions
<i>Diversity policy</i> may include:	<ul style="list-style-type: none"> • benefits of recognising diversity • human resources practices

RANGE STATEMENT	
	<ul style="list-style-type: none"> • key diversity issues for the organisation • organisational vision and purpose about diversity • policies the organisation will commit to • proposed action • reasonable adjustments
<i>Action plans</i> may include:	<ul style="list-style-type: none"> • financial plans • promotional strategies • resource requirements • risk management issues and strategies • sales and distribution projections • specific actions, initiatives and tasks to be undertaken • staffing/responsibility requirements and arrangements • time lines
<i>Communication channels</i> may include:	<ul style="list-style-type: none"> • face-to-face meetings • inclusion in training events • internet and intranet • posters, leaflets and fliers • presentations and speeches

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan financial management approaches	1.1. Access <i>budget/financial plans</i> for the work team 1.2. Clarify budget/financial plans with <i>relevant personnel</i> within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3. Negotiate any changes required to be made to budget/financial plans with relevant personnel within the organisation 1.4. Prepare <i>contingency plans</i> in the event that initial plans need to be varied
2. Implement financial management approaches	2.1. Disseminate relevant details of the agreed budget/financial plans to team members 2.2. Provide <i>support</i> to ensure that team members can competently perform <i>required roles</i> associated with the management of finances 2.3. Determine and access <i>resources and systems</i> to manage financial management processes within the work team
3. Monitor and control finances	3.1. Implement <i>processes</i> to monitor actual expenditure and to control costs across the work team 3.2. Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3. Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4. <i>Report</i> on budget and expenditure in accordance with organisational protocols
4. Review and evaluate financial management processes	4.1. Collect and collate for analysis, <i>data and information on the effectiveness of financial management processes</i> within the work team 4.2. Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3. Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- numeracy skills to read and understand a budget and to update a budget
- technology skills to use software associated with financial record keeping.

Required knowledge

- basic accounting principles
- organisational requirements related to financial management
- relevant legislation and current requirements of the Australian Taxation Office, including GST
- requirements for organisational record keeping and auditing
- principles and techniques involved in:
 - budgeting
 - cash flows
 - electronic spreadsheets
 - GST
 - ledgers and financial statements
 - profit and loss statements.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> financial skills required to work with and interpret budgets, ageing summaries, cash flow, petty cash, GST, and profit and loss statements knowledge of the record keeping requirements for the ATO and for auditing purposes.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written reports indicating broad knowledge of managing budgets and managing financial resources in the organisation demonstration of techniques using financial record keeping software direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate oral or written questioning to assess knowledge of requirements for organisational record keeping and auditing review of contingency plans review of identification of cost variations and expenditure overruns evaluation of documentation reporting on budget and expenditure review of documentation identifying and recommending improvements to financial management processes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Budget/financial plans</i> may include:</p>	<ul style="list-style-type: none"> • cash flow projections • long-term budgets/plans • operational plans • short-term budgets/plans • spreadsheet-based financial projections • targets or key performance indicators for production, productivity, wastage, sales, income and expenditure
<p><i>Relevant personnel</i> may include:</p>	<ul style="list-style-type: none"> • financial managers, accountants or financial controllers • supervisors, other frontline managers
<p><i>Contingency plans</i> may include:</p>	<ul style="list-style-type: none"> • contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-using • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
<p><i>Support</i> may include:</p>	<ul style="list-style-type: none"> • access to specialist advice • documentation of procedures • help desk or identified experts within the organisation • information briefings or sessions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • intranet-based information • training including mentoring, coaching and shadowing
Required roles may include:	<ul style="list-style-type: none"> • arranging for use of corporate credit cards • banking • debt collection • ensuring security, accuracy and currency of financial operations • invoicing clients, customers and consumers • maintaining journals, ledgers and other record keeping systems • maintaining petty cash system • purchasing and procurement • wages and salaries payments and record keeping
Resources and systems may include:	<ul style="list-style-type: none"> • hardware and software • human, physical or financial resources • record keeping systems (electronic and paper-based) • specialist advice or support
Processes to monitor actual expenditure and to control costs across the work team include:	<ul style="list-style-type: none"> • reporting of: <ul style="list-style-type: none"> • assets • consumables • equipment • expenditure • income • stock • wastage
Reporting may include data from:	<ul style="list-style-type: none"> • bank statements • credit card statements • financial reports • invoices and receipts • ledgers and journals • logs • petty cash records • spreadsheet-based records
Data and information on the effectiveness of financial management processes may include records (paper-based and	<ul style="list-style-type: none"> • bank account records • cash flow data • contracts

RANGE STATEMENT

electronic) related to:

- credit card receipts
- employee timesheets
- files of paid purchase and service invoices
- income and expenditure
- insurance reports
- invoices
- job costings
- petty cash receipts
- quotations
- taxation records
- wages/salaries books

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for financial management	1.1. Review and analyse previous <i>financial data</i> to establish areas which have generated a profit or loss 1.2. Undertake research to review reasons for previous profit and loss 1.3. Review business plan to establish critical dates and initiatives that will require or generate resources in next financial cycle 1.4. Analyse cash flow trends 1.5. Review statutory requirements for compliance and liabilities for tax 1.6. Review existing software and its suitability for financial management
2. Establish budgets and allocate funds	2.1. Use previous financial data to determine allocations for resources 2.2. Make informed estimates of new items for inclusion in budget 2.3. Prepare budgets in accordance with <i>organisational requirements</i> and <i>statutory requirements</i>
3. Implement budgets	3.1. Circulate budgets and ensure managers and supervisors are clear about budgets, reporting requirements and financial delegations 3.2. Manage risks by checking there are no opportunities for misappropriation of funds and that systems are in place to properly record all financial transactions 3.3. Review profit and loss statements, cash flows and ageing summaries 3.4. Revise budgets, as required, to deal with contingencies 3.5. Maintain audit trails to ensure accurate tracking and to identify <i>discrepancies</i> between agreed and actual allocations 3.6. Ensure compliance with due diligence
4. Report on finances	4.1. Ensure structure and <i>format</i> of reports are clear and conform to organisational and statutory requirements 4.2. Identify and prioritise significant <i>issues</i> in statements, including comparative financial performances for review and decision making 4.3. Prepare <i>recommendations</i> to ensure financial viability of the organisation 4.4. Evaluate the effectiveness of financial management

ELEMENT	PERFORMANCE CRITERIA
	processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain budgets and reporting requirements, and to deal with questions
- mathematical skills to read and interpret budgets
- technology skills to work with financial software.

Required knowledge

- financial probity
- principles of accounting and financial systems
- relevant Australian, international and local legislation and conventions, such as:
 - bilateral or regional trade agreements
 - International Commercial Terms (INCOTERMS)
 - Trade Practices Act
 - Warsaw Convention
 - World Trade Organization determinations
- requirements of the Australian Tax Office, including Goods and Services Tax, Company Tax, PAYG.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparation of budgets which align with the business plan, use previous financial data and meet all compliance requirements • analysis of the effectiveness of existing financial management approaches • knowledge of the requirements of the Australian Tax Office.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • assessment of written reports on financial systems and financial management • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of budgets prepared • oral or written questioning to assess knowledge of legislative requirements or the tax system • evaluation of documentation reviewing profit and loss statements, cash flows and ageing summaries • analysis of maintenance of audit trails • review of recommendations prepared to ensure the financial viability of the organisation.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the BSB60407 Advanced Diploma of Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Financial data</i> may include:	<ul style="list-style-type: none"> • budgets, forecasts and variations • cash flow/profit reports • financial/operational statements and reports (e.g. expenditures and receipts, profit and loss statements) • market valuations
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • financial analysis assessments • financial management manuals • legal and organisational policies, guidelines and requirements • occupational health and safety policies, procedures and programs • price and exchange parameters • quality assurance and/or procedures manuals • recording and filing systems • reporting requirements • standard financial analysis techniques
<i>Statutory requirements</i> may include:	<ul style="list-style-type: none"> • delegated authorities • internal control procedures • limits on volumes and types of financial transactions • reporting of duty, excise and other overseas government charges • reporting periods • taxation and payment timings
<i>Discrepancies</i> may include:	<ul style="list-style-type: none"> • absence of auditable trail • expenditure report mismatches • inappropriate authorisations • incorrect payments • incorrect report formats • unreconciled cash flows and operating statements • variances from budget and phasings

RANGE STATEMENT	
<i>Format</i> may include:	<ul style="list-style-type: none"> • audits • balance sheets • cash flow statements • electronic forms • financial year reports • operating statements • spreadsheets • statutory forms
<i>Issues</i> may include:	<ul style="list-style-type: none"> • cost structures • internal controls • losses and returns • profitability • statutory obligations • suppliers and markets
<i>Recommendations</i> may refer to:	<ul style="list-style-type: none"> • cash flow • changes in business activity including markets, goods or services traded • consolidation • expenses and overheads • labour costs including decisions to move production to other locations or sites • loss • profit • write-offs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team outcomes	1.1. Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2. Support team members to meet expected outcomes
2. Support team cohesion	2.1. Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2. Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3. Provide feedback to team members to encourage, value and reward team members' efforts and contributions 2.4. Identify and address issues, concerns and problems identified by team members to relevant persons as required
3. Participate in work team	3.1. Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions 3.2. Support the team to identify and resolve problems which impede its performance 3.3. Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4. Communicate with management	4.1. Maintain open communication with line manager/management at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues to line manager/management and follow-up to ensure action is taken in response to these matters

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communication skills, including listening
- basic training skills, including mentoring and coaching
- planning and organising skills
- problem solving skills
- attributes:
 - empathic
 - communicative
 - self aware
 - supportive
 - trusting
 - open
 - flexible
 - accommodating
 - initiating
 - loyal
 - fair
 - adaptable

Required knowledge

Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- organisational policies and procedures
- organisational goals, objectives and plans at both tactical and strategic levels
- organisational structure including organisational chart
- learning and development options available within and through organisation
- a general understanding of the principles and techniques of:
 - group dynamics and processes
 - motivation
 - planning

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job descriptions	1.1. Clarify time lines and requirement for appointment 1.2. Assist with preparation of <i>job descriptions</i> which accurately reflect the role requirements in accordance with organisational procedures and <i>legislation, codes and national standards</i> and <i>occupational health and safety (OHS) considerations</i> 1.3. Consult with relevant personnel about job descriptions 1.4. Ensure that job descriptions do not contravene legislative requirements 1.5. Obtain approvals to advertise position
2. Plan for selection	2.1. <i>Advertise</i> vacancies for <i>staffing requirements</i> in accordance with organisational policies and procedures 2.2. Consult with relevant personnel to convene selection panel and to develop interview questions 2.3. Short list applicants 2.4. Ensure that interview questions do not breach legislative requirements 2.5. Schedule interviews and advise relevant personnel of times, dates and venues
3. Assess and select applicants	3.1. Participate in interview process and assess candidates against agreed selection criteria 3.2. Discuss assessment with other selection panel members 3.3. Correct any biases or deviations from agreed procedures and negotiate for preferred candidate 3.4. Contact referees for referee reports 3.5. Prepare selection report and make recommendations to senior personnel for appointment 3.6. Advise unsuccessful candidates of outcomes and respond to any queries 3.7. Complete all necessary documentation in accordance with organisational procedures 3.8. Secure agreement of preferred candidate
4. Appoint and induct successful candidate	4.1. Provide successful candidate with employment contract and other documentation 4.2. Advise managers and staff of starting date and make

ELEMENT	PERFORMANCE CRITERIA
	<p>necessary administrative arrangements for pay and employee record keeping</p> <p>4.3. Advise manager and work team of new appointment</p> <p>4.4. Arrange induction in accordance with organisational policy</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to use networks to source suitable applicants, to listen to and understand what is being said in interviews, and to advise on the outcomes of the selection process
- literacy skills to work with job descriptions to devise suitable questions for interviews, to prepare letters for unsuccessful applicants and to make job offers
- organising and scheduling skills to arrange interviews and venues.

Required knowledge

- documentation required for recruitment and selection
- human resource functions, human resource life cycle and the place of recruitment and selection in that life cycle
- principles of equity, diversity and relevant legislation.
- range of interviewing techniques and other selection processes and their application.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • demonstrated ability to work with job descriptions to source and select suitable staff • interviewing and other selection techniques that demonstrate awareness of equal opportunity and anti-discrimination requirements • knowledge of the human resource life cycle.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an appropriate range of documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • assessment of written reports on recruitment and selection • demonstration of selection techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of interviewing techniques • review of advertisements for staffing vacancies • review of documentation provided to successful candidate • oral or written questioning to assess knowledge of selection processes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the Certificate IV in Human Resources.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and use knowledge management system	1.1. Access <i>knowledge management system</i> to assist with specific tasks, in line with system <i>procedures</i> 1.2. Administer system, in line with procedures
2. Input to knowledge management system	2.1. Gather, analyse and prepare <i>inputs</i> for contribution to the system, in line with procedures 2.2. Check inputs for clarity, accuracy, currency and relevance 2.3. Make inputs to system, in line with procedures 2.4. Analyse requirements of the system and ensure suggestions for improvements are provided to <i>relevant personnel</i>
3. Review and improve work practices	3.1. Provide feedback about the clarity, accuracy, currency and relevance of the system's output to relevant personnel 3.2. Document learning resulting from the use of the system 3.3. Improve work practices as a result of learning from the use of the system

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to classify and report information
- literacy skills to read and understand a variety of texts; and to write, edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to display information in a format suitable to the target audience.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
 - anti-discrimination
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies and procedures for knowledge management
- other relevant organisational policies and procedures, for example:
 - commercial confidentiality.
 - customer service
 - information management
- records management.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • making contributions to knowledge management system • records of outcomes resulting from the use of the system • knowledge of organisational policies and procedures for knowledge management.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of information documents found in the workplace • access to system (within privacy and confidentiality provisions).
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation outlining learning resulting from the use of the system • analysis of responses to case studies and scenarios • demonstration of techniques.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • general administration units • other information management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Knowledge management system</i> may include:</p>	<ul style="list-style-type: none"> • planned and implemented system • policies • procedures and practices to manage knowledge within the organisation and among relevant stakeholders • protocols
<p><i>Procedures</i> may include:</p>	<ul style="list-style-type: none"> • accessible operating instructions • accessible user manuals • criteria established for selecting and filtering input to the system • related policies and procedures covering: <ul style="list-style-type: none"> • consultation, participation, communication, and written and verbal reporting • documentation • data collection, storage and retrieval • privacy and confidentiality • quality • staff, professional development, training, and coaching and mentoring • work organisation • templates for the collection of input to the system
<p><i>Inputs</i> may be:</p>	<ul style="list-style-type: none"> • electronic • paper-based • verbal
<p><i>Relevant personnel</i> may include:</p>	<ul style="list-style-type: none"> • managers, leaders, supervisors and coordinators • owners • staff, team members and colleagues

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and source information needs	1.1. Determine and locate <i>information</i> required by teams 1.2. Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to <i>organisational policies</i>
2. Collect, analyse and report information	2.1. Collect information, which is adequate and relevant to the needs of teams, in a timely manner 2.2. Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3. Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3. Implement information systems	3.1. Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2. Use <i>technology</i> available in the work area to manage information effectively 3.3. Submit recommendations for improving the information system to <i>designated persons and/or groups</i>
4. Prepare for information system changes	4.1. Collect information about information system future needs in consultation with <i>colleagues</i> , including those who have a specialist role in resource management 4.2. Ensure estimates of information system future needs reflect the organisation's <i>business plans</i> , and customer and supplier requirements 4.3. Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4. Prepare team members to work with new technology and information system changes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to work with information, and to research and present information in ways that are appropriate to the work team
- technology skills to work with a range of information systems.

Required knowledge

- information management systems and technology that would be associated with the workplace such as:
 - budgets and financial management systems
 - customer information software or records
 - databases
 - personal digital assistant (PDA)
 - product and service information
 - project management software
 - record management systems
 - spreadsheets.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> analysis of the information that is required for the effective functioning of the team's work together knowledge of the range of information systems that are, or should be, available in the workplace ability to recognise what information system changes and improvements will be required in the future.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> demonstration of techniques in working with information management systems direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate oral or written questioning to assess knowledge of relevant technology review of documentation analysing information trends and developments written reports on future information system needs review of preparation undertaken for team members to work with new technology and information system changes.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Information</i> may include:</p>	<ul style="list-style-type: none"> • archived, filed and historical background data • continuous improvement and quality assurance data • data available internally or externally • data shared and retrieved in various forms such as in writing or verbally, electronically or manually • financial and contractual data • marketing and customer-related data • organisational performance data • planning and organisational documents • policies and procedures
<p><i>Organisational policies</i> may include:</p>	<ul style="list-style-type: none"> • guidelines for decision making throughout the organisation that link the formulation of strategy with its implementation • sets of accepted actions approved by the organisation • Standard Operating Procedures
<p><i>Technology</i> may include:</p>	<ul style="list-style-type: none"> • computerised systems and software such as databases, project management and word processing • telecommunications devices • any other technology used to carry out work roles and responsibilities
<p><i>Designated persons and/or groups</i> may include:</p>	<ul style="list-style-type: none"> • groups designated in workplace policies and procedures • managers or supervisors with management roles and responsibilities concerning information systems • other stakeholders accessing the information system such as customers and service providers • other work groups or teams whose work will be affected by the system

RANGE STATEMENT	
<i>Colleagues</i> may include:	<ul style="list-style-type: none"> • employees at the same level or more senior managers • occupational health and safety committee members and other specialists • people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities • team members
<i>Business plans</i> may include:	<ul style="list-style-type: none"> • cash flow projections • long-term budgets/plans • operational plans • short-term budgets/plans • spreadsheet-based financial projections • targets or key performance indicators for production, productivity, wastage, sales, income and expenditure

Co-requisite units

Co-requisite units	

BSBINN301A Promote innovation in a team environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes, skills and knowledge required to be an effective and pro active member of an innovative team.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies individuals who play a pro active role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader.</p> <p>The team may 'make itself' or be constructed by others. It may have core members and members who participate at certain times or for particular purposes. It may be permanent or temporary, or come together at different times to work on specific projects.</p> <p>The team could consist of a team of contractors/freelancers, permanent staff, clients and service providers, or any combination of these groups. It may operate within an organisation or across several organisations - or simply across a group of individuals.</p> <p>The key focus of the unit is on what makes for an innovative team, what keeps it working well, how the structure of work can make a difference and what skills and knowledge are needed to maximise opportunities for innovation. Where a greater focus on team leadership is required this unit should be combined with units such as BSBLED401A Develop teams and individuals.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Create opportunities to maximise innovation within the team	1.1. Evaluate and reflect on <i>what the team needs and wants to achieve</i> 1.2. Check out <i>information about current or potential team members' work</i> in the context of developing a more innovative team 1.3. Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross-fertilising ideas 1.4. Acknowledge, respect and discuss the <i>different ways that different people may contribute</i> to building or enhancing the team
2. Organise and agree effective ways of working	2.1. Jointly establish <i>ground rules</i> for how the team will operate 2.2. Agree and communicate responsibilities in ways that encourage and reinforce <i>team-based innovation</i> 2.3. Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4. Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5. Establish personal reward and stimulation as an integral part of the team's way of working
3. Support and guide colleagues	3.1. Model <i>behaviour that supports innovation</i> 3.2. Seek <i>external stimuli and ideas</i> to feed into team activities 3.3. Pro-actively share information, knowledge and experiences with other team members 3.4. Challenge and test ideas within the team in a positive and collaborative way 3.5. Pro-actively discuss and explore ideas with other team members on an ongoing basis
4. Reflect on how the team is working	4.1. De-brief and reflect on activities and on opportunities for improvement and innovation 4.2. Gather and use feedback from within and outside the team to generate discussion and debate 4.3. Discuss the <i>challenges of being innovative</i> in a constructive and open way 4.4. Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5. Identify, promote and celebrate successes and

ELEMENT	PERFORMANCE CRITERIA
	examples of successful innovation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions
- creative thinking skills to generate, explore, test and challenge ideas
- learning skills to stretch boundaries of own knowledge and skills
- literacy skills to analyse a wide range of information from varied sources
- planning and organisational skills to participate in the effective allocation of work in a team context
- problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities
- self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation.

Required knowledge

- barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation
- broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation
- characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation
- different roles that people may play within a team, how this impacts on the way a team works and what it might achieve
- group dynamics in a team.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • active participation in a team where the team takes a pro-active and considered approach to innovation and innovative practice • collaborative and open communication within the team • knowledge and understanding of the internal and external factors that contribute to a team becoming and remaining innovative.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • demonstration of skills as part of a team.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of team interactions • evaluation of reports by the candidate or the team (could be oral or written) discussing the ideas, challenges and opportunities associated with teams, and how they can be more innovative • evaluation of feedback from other people in the team about the candidate's communication approaches and abilities • oral or written questioning to assess knowledge of the characteristics of innovative teams, innovation concepts more broadly and the ways in which innovation can be encouraged • review of jointly established 'groundrules' for how the team will operate.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>What the team needs and wants to achieve</i> may relate to:</p>	<ul style="list-style-type: none"> • addressing particular customer feedback • conceiving and implementing a particular project • developing new services or products • generating ongoing ideas within the work unit • improving budgetary performance • improving or changing work conditions • new ideas that impact beyond the workplace (e.g. that have a broader social or community impact)
<p><i>Information about current or potential team members' work</i> may relate to:</p>	<ul style="list-style-type: none"> • interests • lifestyle preferences • past jobs • technical strengths • work preferences • working styles
<p><i>Different ways that different people may contribute</i> may relate to individual strengths around:</p>	<ul style="list-style-type: none"> • creating positive energy within the team • fundamental literacy strengths (e.g. particularly strong in visual literacy, written or spoken communication) • generating ideas • networks or spheres of influence • particular ways of thinking • powers of persuasion • problem-solving capacities • specific technical skills or knowledge
<p><i>Ground rules</i> may relate to:</p>	<ul style="list-style-type: none"> • boundaries or lack of boundaries for team activities and ideas • confidentiality • copyright, moral rights or intellectual property • regularity of communication • key roles and responsibilities • time lines

RANGE STATEMENT	
	<ul style="list-style-type: none"> ways of communicating
<i>Team-based innovation</i> may be encouraged through:	<ul style="list-style-type: none"> accessing training and learning opportunities enough but not too much guidance and structure equitable sharing of workload follow-through with ideas supportive communication
<i>Behaviour that supports innovation</i> may include being:	<ul style="list-style-type: none"> collaborative equitable fair fun hardworking reflective responsible sympathetic
<i>External stimuli and ideas</i> might be from:	<ul style="list-style-type: none"> Australia or overseas colleagues outside of the team family and friends internet journals networks or technical experts other organisations
<i>Challenges of being innovative</i> may relate to:	<ul style="list-style-type: none"> budgetary or other resource constraints competing priorities organisational culture problems with breaking old patterns of behaviour or thinking time pressures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Generate innovative thinking and creativity	1.1. Research and use a <i>range of techniques and tools</i> to generate new ideas and thinking 1.2. Research and analyse trends shaping organisation's current and future thinking and practice 1.3. Introduce and promote creative thinking techniques to foster personal and team innovation 1.4. Evaluate <i>overall context</i> for individual and collective innovative thinking and creativity 1.5. Research and analyse specific <i>conditions for innovation</i> and issues that impact on individual and collective innovative thinking and creativity 1.6. Research and review innovation <i>drivers</i> and <i>enablers</i>
2. Lead innovative practices	2.1. Develop personal <i>leadership style</i> to model positive innovative thinking and practice 2.2. Review, challenge and refine own style and practice in relation to modelling and supporting innovation 2.3. Assess and determine the requirements to promote sustainable innovative activity for the operational context and people involved 2.4. Devise and implement most appropriate means to promote knowledge transfer 2.5. Identify, evaluate and manage <i>risks</i> associated with innovation within an organisation
3. Generate and support a culture of innovation	3.1. Introduce and promote innovative practices, processes, products or services appropriate to audience and organisational requirements 3.2. Establish ways to capture, communicate and share innovative ideas and practices 3.3. Initiate and foster communication, consultation and team development approaches that support innovation 3.4. Identify, assess and provide adequate resources for innovation to occur 3.5. Develop and apply strategies to foster a workplace culture capable of encouraging innovation 3.6. Establish <i>mechanisms at system and process</i> level that can support innovation
4. Sustain innovative thinking and practice	4.1. Develop strategies to make innovation an integral part of organisational activity

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2. Develop and monitor processes to ensure ongoing awareness of individual and collective contributions to innovative thinking and practice</p> <p>4.3. Analyse potential barriers and risks to innovation and devise strategies to respond</p> <p>4.4. Analyse and reflect on innovation performance as a basis for developing strategies for improvement</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, consultation and negotiation skills to model and lead open and collaborative relationships
- planning and organisational skills to develop, implement and sustain practical strategies for innovation
- problem-solving skills to assess challenges and risks at a strategic level and to develop appropriate responses
- research and analytical skills to work with structurally intricate and conceptually complex innovation texts and broader industry contexts; and to develop materials which deal with complex ideas and concepts
- self-management and learning skills to evaluate and enhance personal effectiveness, and to promote a culture of ongoing learning and development
- team and leadership skills to generate, promote and sustain innovation in an organisational or community setting
- technology skills to use computers for document production and research of innovative practices and theories

Required knowledge

- current and past theories and thinking about innovation and creativity
- leadership styles including the way that different approaches impact on innovation in organisations, and specific approaches that foster innovation
- legislative framework that affects business operations in a given context, including particular legislation with a direct impact on innovation, for example concerning copyright, trademarks, intellectual property, occupational health and safety (OHS)
- management techniques and tools for the encouragement of creative thinking and for turning good ideas and creative thinking into innovation
- organisational and industry context for innovation including overarching mission, objectives and strategies
- relationship between theory and thinking on innovation and creativity, and applied practice
- risk assessment and management strategies in the context of innovation
- social, political, economic and technological developments that determine the broad context for innovation in the relevant workplace context
- theories, processes and practice of organisational transformation and the management of the stages of change
- typical strategic challenges and barriers to innovation within organisations and ways of overcoming these challenges and barriers

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> comprehensive understanding and application of key concepts, current theories and processes for promoting innovative thinking and practices in an organisational context critical examination of trends in thinking and emerging practices as they relate to an organisation's current thinking and practices knowledge of social, political, economic and technological developments that determine the broad context for innovation in the relevant workplace context.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead and sustain innovative thinking and practice opportunities for interaction with others to reflect the collaborative nature of the innovation process access to current organisational documentation and support materials.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate evaluation of reports prepared by the candidate to propose strategies and techniques for building innovative thinking and practice within a given organisational context oral or written questioning to assess knowledge of innovation theory and practice, context for innovation, and factors that affect innovation in a particular organisation.

EVIDENCE GUIDE

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBINN601B Manage organisational change
- BSBLED701A Lead personal and strategic transformation
- BSBLED702A Lead learning strategy implementation
- PSPMNGT614A Facilitate knowledge management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Range of techniques and tools for creative thinking may include:

- brainstorming
- concept maps
- creative thinking matrix
- DeBono tools (e.g. six hats)
- foresight tools
- Kirton Adaptation Innovation Inventory
- mindmapping (Buzan)
- nominal group technique
- scenario analysis.

Overall context may include the environment relating to:

- culture
- electronic and non-physical context
- global
- local or regional
- national
- work group or community.

Conditions for innovation may span causal factors and issues relating to:

- ability to gain and respond to customer feedback
- available resources (in all their forms)
- business systems
- changes to workflow and processes
- competency, capability and skills of the workforce
- culture and values
- economic change
- emerging technologies
- executive support for innovation
- external
- globalisation
- government regulations, policy or funding initiatives
- internal
- labour market and industry changes and restructures

RANGE STATEMENT	
	<ul style="list-style-type: none"> • learning culture • management practices • new business models • new markets • organisational sociocultural circumstances and issues (for example, within Indigenous organisations) • research and development focus and support • shift to knowledge economy or new economy • structure and design of work in the organisation • technology change and convergence • vision, core purpose and capabilities.
Drivers are factors or changes that impel innovative practice and may include:	<ul style="list-style-type: none"> • customer expectations • globalisation • market shifts • new legislation (such as compliance) • policies (such as environmental protection) • price and profitability • technology change.
Enablers are factors that help innovation overcome barriers and may include:	<ul style="list-style-type: none"> • breakthroughs • collaboration • culture • development • intellectual property • inventions • management support • profitability • research • resources • responsiveness • skilled workforce • technology.
Leadership style will usually be differentiated by five classical approaches:	<ul style="list-style-type: none"> • autocratic (non-participative) • charismatic flexibility • democratic (participative) • laissez faire (free reign) • paternalistic.
Risks may include:	<ul style="list-style-type: none"> • damage to property/equipment • environmental

RANGE STATEMENT	
	<ul style="list-style-type: none"> • market changes • OHS (including disease) • product failure • professional incompetence • resource deficiencies • systems and process failures.
<p><i>Mechanisms at system and process level</i> may be physical or electronic and relate to:</p>	<ul style="list-style-type: none"> • customer management • human resources • information technology • learning • market • OHS • operations • planning (strategic and corporate) • quality • research and development • risk • resource management • supply chain management • structural and performance hierarchies (strata).

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Start computer, system information and features	1.1. Adjust workspace, furniture and equipment to suit user <i>ergonomic requirements</i> 1.2. Ensure <i>work organisation</i> meets organisational and <i>occupational health and safety (OHS) requirements</i> for computer operation 1.3. Start computer or log on according to user procedures 1.4. Identify basic functions and features using system information 1.5. Customise desktop configuration, if necessary, with assistance from appropriate persons 1.6. Use help functions as required
2. Navigate and manipulate desktop environment	2.1. Open, close and access features by selecting correct <i>desktop icons</i> 2.2. Open, resize and close desktop windows by using correct window functions and roles 2.3. Create shortcuts from the desktop, if necessary, with assistance from appropriate persons
3. Organise files using basic directory and folder structures	3.1. Create folders/subfolders with suitable names 3.2. Save files with suitable names in appropriate folders 3.3. Rename and move folders/subfolders and files as required 3.4. Identify folder/subfolder and <i>file attributes</i> 3.5. Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6. Save folders/subfolders and files to <i>appropriate media</i> where necessary 3.7. Search for folders/subfolders and files using appropriate software tools 3.8. Restore deleted folder/subfolders and files as necessary
4. Print information	4.1. Print information from installed printer 4.2. View progress of print jobs and delete as required 4.3. Change default printer if installed and required
5. Shut down computer	5.1. Close all open applications 5.2. Shut-down computer according to user procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to identify work requirements, to comprehend basic workplace documents, to interpret basic user manuals and to proofread simple documents
- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions and to receive feedback
- problem-solving skills to solve routine problems in the workplace, while under direct supervision
- technology skills to use equipment safely while under direction, basic keyboard and mouse skills and procedures relating to logging on and accessing a computer
- basic typing techniques and strategies.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - OHS
- basic ergonomics of computer use
- main types and parts of computers, and basic features of different operating systems
- suitable file naming conventions.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • navigation and manipulation of the desktop environment within the range of assigned workplace tasks • knowledge of organisational requirements for simple documents and filing conventions • application of simple keyboard functions to produce documents with a degree of speed and accuracy relevant to the level of responsibility required.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of workplace documentation.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • demonstration of techniques • oral or written questioning to assess knowledge of computer operations and functions • review of shortcuts created • review of folders/subfolders created.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBITU102A Develop keyboard skills • other general administration units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Ergonomic requirements</i> may include:	<ul style="list-style-type: none"> • avoiding radiation from computer screens • chair height, seat and back adjustment • document holder • footrest • keyboard and mouse position • lighting • noise minimisation • posture • screen position • workstation height and layout
<i>Work organisation</i> may include:	<ul style="list-style-type: none"> • exercise breaks • mix of repetitive and other activities • rest periods • visual display unit (VDU) eye testing
<i>Occupational health and safety requirements</i> may include:	<ul style="list-style-type: none"> • OHS guidelines related to the use of the screen equipment, computing equipment and peripherals, ergonomic work stations, security procedures, customisation requirements • statutory requirements
<i>Desktop icons</i> include:	<ul style="list-style-type: none"> • directories/folders • files • network devices • recycle bin and waste basket
<i>File attributes</i> include:	<ul style="list-style-type: none"> • dates • size
<i>Appropriate media</i> may include:	<ul style="list-style-type: none"> • CDs • diskettes • local hard drive • other locations on a network • USB/ Flash/Thumb drives • zip disks

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine development needs	<p>1.1. Systematically identify and implement <i>learning and development needs</i> in line with <i>organisational requirements</i></p> <p>1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented</p> <p>1.3. Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4. Collect <i>feedback on performance</i> of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2. Ensure that <i>learning delivery methods</i> are appropriate to the learning goals, the learning style of participants, and availability of <i>equipment and resources</i></p> <p>2.3. Provide workplace learning opportunities, and <i>coaching and mentoring assistance</i> to facilitate individual and team achievement of competencies</p> <p>2.4. Create development opportunities that incorporates a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4. Document and maintain records and reports of competency according to organisational requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- facilitation techniques to encourage team development and improvement
- organisational policies, plans and procedures
- career paths and competency standards relevant to the industry.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • identifying and implementing learning opportunities for others • giving and receiving feedback from team members to encourage participation in and effectiveness of team • creating learning plans to match skill needs • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of learning and development plans, policies and procedures • examples of documents relating to diversity policies and procedures.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry • review of records and reports of competency.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • management units • other learning and development units.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement operational plan	<p>1.1. Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers</p> <p>1.2. Implement operational plans to contribute to the achievement of organisation's performance/business plan</p> <p>1.3. Identify and use key performance indicators (KPIs) to monitor operational performance</p> <p>1.4. Undertake contingency planning and consultation processes</p> <p>1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1. Recruit and induct employees within organisation's policies, practices and procedures</p> <p>2.2. Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel</p>
3. Monitor operational performance	<p>3.1. Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets</p> <p>3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5. Present recommendations for variation to operational plans to the designated persons/groups and gain approval</p> <p>3.6. Implement systems, procedures and records associated with performance in accordance with organisation's requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
 - contingency planning
 - methods for monitoring and reporting on performance
 - monitoring and implementing operations and procedures
 - problem identification and methods of resolution
 - relevant budgeting and financial analysis, interpretation and reporting requirements
 - resource management systems at the tactical implementation level
 - resource planning and acquisition
 - tactical risk analysis including identification and reporting requirements.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required • knowledge of principles and techniques associated with monitoring and implementing operations and procedures.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation outlining contingency planning and consultation processes undertaken • demonstration of techniques in managing performance • evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Resource requirements</i> may refer to:</p>	<ul style="list-style-type: none"> • goods and services to be purchased and ordered • human, physical and financial resources - both current and projected • stock requirements and requisitions

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Systems may refer to:

- forums, meetings
- newsletters and reports
- organisational policies and procedures
- web-based communication devices

Participation in decision making processes may include:

- feedback in relation to outcomes of the consultative process
- processes which ensures all employees have the opportunity to contribute to organisational issues

Continuous improvement processes may include:

- cyclical audits and reviews of workplace, team and individual performance
- evaluations and monitoring of effectiveness
- implementation of quality systems, such as International Standardization for Organization (ISO)
- modifications and improvements to systems, processes, services and products
- policies and procedures which allow the organisation to systematically review and improve the quality of its products, services and procedures
- seeking and considering feedback from a range of stakeholders

Mentoring and coaching may refer to:

- providing assistance with problem-solving
- providing feedback, support and encouragement
- teaching another member of the team, usually focusing on a specific work task or skill

Technology may include:

- computerised systems and software such as databases, project management and word processing
- telecommunications devices
- any other technology used to carry out work roles and responsibilities

RANGE STATEMENT	
<i>Customer service</i> may be:	<ul style="list-style-type: none"> • internal or external • to existing, new or potential clients
<i>Processes to ensure that team members are informed of savings and productivity/service improvements</i> may refer to:	<ul style="list-style-type: none"> • email/intranet, newsletters or other communication devices • newsletters and bulletins • staff reward mechanisms • team meetings

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate organisational mission and goals	1.1. Clarify objectives, values and standards in accordance with organisation's strategic direction 1.2. Establish linkages between organisational objectives, values and standards and the responsibilities of relevant groups and individuals 1.3. Ensure media and language used is appropriate to individuals and group circumstances 1.4. State clear expectations of internal groups and individuals and explain in a manner which builds commitment to the organisation 1.5. Address <i>expectations of the organisation</i> 1.6. Investigate <i>incidents</i> promptly and communicate results clearly to relevant groups and individuals
2. Influence groups and individuals	2.1. Build trust, confidence and respect of diverse groups and individuals, through positive role modelling, and effective communication and consultation 2.2. Embrace, resource and effectively implement improvements to organisational and workplace culture 2.3. Demonstrate understanding of the global environment and new technology in work activities 2.4. Ensure actions convey flexibility and adaptability to change and accessibility 2.5. Ensure consultation and participation in decision making occurs with relevant groups and individuals where appropriate 2.6. Ensure decision making takes into account needs and expectations of both internal and external groups 2.7. Ensure decision making occurs in accordance with <i>risk management</i> plans for all options, and within appropriate timeframes 2.8. Ensure that the organisation is represented positively in the media and community
3. Build and support teams	3.1. Assign <i>accountabilities and responsibilities</i> to teams consistent with their competencies and operational plans 3.2. Ensure teams are resourced to allow them to achieve their objectives

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Empower teams and individuals through effective delegation and support for their initiatives</p> <p>3.4. Create and maintain <i>a positive work environment</i></p> <p>3.5. Encourage teams and individuals to develop innovative approaches to the performance of work</p>
4. Demonstrate personal and professional competence	<p>4.1. Model ethical conduct in all areas of work and encourage others to adopt business ethics</p> <p>4.2. Adapt appropriate interpersonal and leadership styles to meet particular circumstances and situations</p> <p>4.3. Set and achieve personal objectives and work program outcomes</p> <p>4.4. Ensure self performance and professional competence is continuously improved through engagement in a range of professional development activities</p> <p>4.5. Participate regularly in industry/professional networks and groups</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to communicate and inspire trust and confidence of others and to ensure their cooperation and support
- networking skills to ensure support from key groups and individuals for concepts/ideas/products/services
- risk management skills to analyse, identify and develop mitigation strategies for identified risks.

Required knowledge

- business ethics and their application
- leadership styles and their application
- legislation, codes and by-laws relevant to the organisation's operations
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- organisational change processes.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> input from a wide range of sources providing evidence in respect to a broad range of activities and application of business ethics demonstration of personal competence that links to the organisation's requirements for managers effective communication skills and an ability to win commitment to the organisation and its activities knowledge of leadership styles and their application knowledge of legislation, codes and by-laws relevant to the organisation's operations.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> analysis of responses to case studies and scenarios direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate observation of demonstrated leadership techniques observation of presentations review of media and language used when communicating with individuals and groups evaluation of accountabilities and responsibilities assigned to teams review of documentation outlining personal objectives and work program outcomes review of professional development activities undertaken to improve self performance and professional competence.
Guidance information for	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop business plan	1.1. Review and evaluate pre-existing <i>strategic, business and operational plan</i> , if available 1.2. Analyse and interpret business vision, mission, values and objectives 1.3. Consult with <i>key stakeholders</i> 1.4. Review market requirements for the product or service, profile customer needs and research pricing options 1.5. Develop <i>performance objectives and measures</i> through consultation with key stakeholders 1.6. Identify financial, human and physical resource requirements for the business 1.7. Consider any permits or licences that may be required for new activity 1.8. Write <i>business plan</i>
2. Monitor performance	2.1. Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2. Ensure skilled labour is available to implement plan 2.3. Test performance measurement systems and refine, if necessary 2.4. Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5. Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1. Analyse performance reports against planned objectives 3.2. Review performance indicators and refine if necessary 3.3. Ensure groups and individuals contributing to under-performance are <i>coached</i> , and provide training where appropriate 3.4. Review system processes and work methods regularly as part of continuous improvement

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and research skills to review the market, to research competitors and to review pricing structures
- coaching and communication skills to remediate any under-performance in the work group or individuals
- planning and organising skills to sequence activities and to develop a logical structure.

Required knowledge

- performance measurement approaches and benchmarking
- options for developing business plans.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> analysis of the strengths and weaknesses of a range of business plans implementation of a business plan including evaluation of performance against documented indicators in key results areas knowledge of performance measurement approaches and benchmarking.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written reports/examples of business plans and their outcomes direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate oral or written questioning to assess knowledge of options for developing business plans review of development of performance objectives and measures review of how business plan was communicated to all relevant parties.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other units from the Advanced Diploma of Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Strategic, business and operational plan</i> may include:</p>	<ul style="list-style-type: none"> • previously formulated: <ul style="list-style-type: none"> • action plan • business goals • competitor analysis • financing arrangements or financial targets • management arrangements and/or personnel requirements • marketing approaches • product or service research or analysis
<p><i>Key stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • business partners or financiers • customers • shareholders • staff • technical experts or advisers
<p><i>Performance objectives and measures</i> may relate to:</p>	<ul style="list-style-type: none"> • efficiency measures • input measures such as staff time or dollars allocated • outcomes measures • qualitative indicators such as feedback from customers, effect on the wider market or competitors, staff reports • quantitative indicators, such as numbers produced and sold, turnover, customer satisfaction ranking, lower staff turnover
<p><i>Business plan</i> includes:</p>	<ul style="list-style-type: none"> • description of the business • business products and services • marketing activity • financial indicators • productivity and performance targets for key result areas such as: <ul style="list-style-type: none"> • community awareness or branding • environmental impact

RANGE STATEMENT	
	<ul style="list-style-type: none"> • governance or management • quality • sales • triple bottom line • workforce

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research marketing information	1.1. Research the concept of marketing as it applies to the organisation 1.2. Identify and analyse organisation's marketing plan and relevant policies and procedures 1.3. Identify <i>need for marketing activities</i> from the established marketing plan 1.4. Investigate previous marketing activities for relevant information 1.5. Identify profile of the market segment 1.6. Identify positioning and market mix for each target segment 1.7. Identify <i>outcomes</i> expected from marketing activities
2. Plan marketing activities	2.1. Undertake <i>analysis</i> of collected basic marketing information 2.2. Develop and document <i>work activity plans</i> for marketing activities 2.3. Obtain approval of plans from <i>relevant enterprise personnel</i>
3. Implement marketing activities	3.1. Determine and access <i>resources</i> required for work activities 3.2. Undertake marketing activities within job role 3.3. Assist with assigning responsibilities and functions to <i>relevant personnel</i> performing specific marketing functions 3.4. Monitor marketing activities, and review and amend activity plan as required
4. Review marketing activities	4.1. Measure and record outcomes of marketing activities 4.2. Review marketing activities against expected outcomes and record identified improvements 4.3. Prepare reports of marketing activities and communicate to relevant enterprise personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to:
 - select and use appropriate research methods
 - review and learn from marketing activities to contribute to the organisation's marketing operations
- literacy skills to:
 - prepare general information and papers for a target audience
 - read a variety of texts
 - write formal and informal letters
- planning and organising skills to develop implementation schedules
- problem-solving skills to address issues that may affect plans and their implementation
- research skills to:
 - research the concept of marketing
 - identify profile of marketing segment

Required knowledge

- basic foundations of marketing practices:
 - concept of marketing
 - marketing planning process
 - marketing mix
 - segmentation
 - targeting and positioning
- key provisions of relevant legislation and industry-specific regulations that may affect aspects of marketing, such as:
 - anti-discrimination legislation
 - codes of practice
 - competition legislation
 - consumer legislation
 - environmental issues
 - ethical principles
 - OHS legislation
 - privacy legislation
 - trade practices legislation
- organisational policies and procedures relating to marketing

REQUIRED SKILLS AND KNOWLEDGE

- specific product knowledge related to products and services being marketed

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- research into the foundations of marketing practice and how they apply to an organisation
- planning and implementing marketing activities
- reviewing the effectiveness of the marketing plan
- recording the activities and processes worked with.

Context of and specific resources for assessment

Assessment must ensure:

- access to a workplace or simulated work environment
- access to office equipment and resources
- examples of products or services to be marketed
- examples of marketing plans, policies and procedures.

Method of assessment

The following assessment methods are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- review of work activity plans for marketing activities
- analysis of responses to case studies and scenarios
- observation of presentations
- oral or written questioning to assess knowledge of marketing techniques and strategies
- analysis of documentation outlining the outcomes of marketing activities
- review of marketing activity reports.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Need</i> may be determined by:</p>	<ul style="list-style-type: none"> • analysis of sales figures and other performance data • analysis of client information • direction from relevant enterprise personnel • development of new products and services.
<p><i>Marketing activities</i> may include:</p>	<ul style="list-style-type: none"> • attendance at trade shows, conferences and other events • basic advertising • development and distribution of general promotional and informational materials • development and distribution of samples, case studies, testimonials and other evidence of enterprise activity • development of displays and signs • development of media releases, articles and media background information • information sessions for clients, suppliers and stakeholders • online information • telephone promotions.
<p><i>Outcomes</i> may include:</p>	<ul style="list-style-type: none"> • projections for: <ul style="list-style-type: none"> • potential client enquiries • detailed potential client follow-up • sales and service levels.
<p><i>Analysis</i> may include:</p>	<ul style="list-style-type: none"> • market definition, statistics and basic research • basic market segmentation • target audience profiles.
<p><i>Work activity plans</i> may include:</p>	<ul style="list-style-type: none"> • activity monitoring and evaluation plans • detailed implementation plans covering the how, what and when of activities • financial plans • human resource plans • plans for other required resources • time plans.
<p><i>Relevant enterprise</i></p>	<ul style="list-style-type: none"> • coordinators

RANGE STATEMENT	
<i>personnel</i> may include:	<ul style="list-style-type: none"> • owners • managers • section leaders • supervisors • team leaders.
<i>Resources</i> may include:	<ul style="list-style-type: none"> • finance • human resources • resource contributions from suppliers and partners.
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> • administrators • copywriters • desktop publishers • external consultants • graphic artists and designers • marketing specialists • printers and sign-writers.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate each component of the marketing mix	1.1. Identify key <i>characteristics of products or services</i> and estimate their significance to the market 1.2. Review pricing policy and analyse <i>pricing variables</i> to determine their effect on demand 1.3. Analyse <i>promotional methods</i> to determine their importance to <i>marketing</i> outcomes 1.4. Review <i>channels of distribution</i> and estimate their significance in relation to marketing outcomes 1.5. Identify and analyse <i>level of customer service</i> provision to determine its significance to marketing outcomes 1.6. Identify potential customer base and key pressure points for success 1.7. Analyse and test the effect of the components of <i>marketing mix</i> on each other, and establish their relative importance to customer base
2. Determine marketing mix for specific markets	2.1. Identify and assess environmental factors for their impact on marketing mix 2.2. Identify <i>consumer priorities, needs and preferences</i> that affect marketing mix 2.3. Consider product, pricing, promotional, distribution and service variations, and evaluate these against marketing objectives, target market characteristics and desired positioning 2.4. Select marketing mix that best satisfies target market and meets marketing objectives 2.5. Ensure marketing mix decision meets organisational, strategic and operational marketing objectives
3. Monitor and adjust marketing mix	3.1. Monitor marketing mix against marketing performance and isolate components for testing 3.2. Evaluate implications of altering one or more components of marketing mix in relation to market factors and consumer response 3.3. Adjust components of marketing mix in response to test results and evaluation of market response 3.4. Ensure adjusted marketing mix meets budgetary requirements 3.5. Ensure adjusted marketing mix continues to meet organisational, strategic and operational marketing objectives, and desired positioning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to identify market information, to write in a range of styles for different audiences and to interpret requirements
- numeracy skills to interpret testing results and to manage marketing budgets
- organisational and time management skills to design and adjust a marketing mix.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects business operations, codes of practice and national standards such as:
 - anti-discrimination legislation and principles of equal opportunity, equity and diversity
 - ethical principles
 - marketing codes of practice and conduct such as the Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice; Free TV Australia Commercial Television Industry Code of Practice
 - privacy laws
 - Trade Practices Act
- organisational policies, procedures, products and services
- principles and concepts of marketing such as consumer or buyer behaviour and elements of marketing mix
- statistical techniques.

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Construct an applied research strategy	1.1. Clarify and confirm <i>applied research purpose</i> and needs of the <i>target group</i> 1.2. Determine policies and procedures in relation to conducting applied research 1.3. Establish mechanisms for collecting and maintaining data in a systematic manner 1.4. Analyse <i>factors affecting the reliability and validity of data</i> 1.5. Review relevant research ethics and codes of conduct 1.6. Prepare <i>applied research strategy</i> and <i>hypothesis</i> 1.7. Frame a research strategy in consideration of available <i>tools</i> and <i>resources</i>
2. Use a range of applied research techniques	2.1. Review and evaluate a range of <i>applied research methods, theories</i> and <i>data collection techniques</i> 2.2. Select appropriate methods to gather and analyse data 2.3. Use, as appropriate, <i>suitable technology</i> and technology services to support data collection and analysis 2.4. Access <i>appropriate sources of information</i> and <i>contributors</i> relevant to the research 2.5. Optimise <i>relevance of the research</i> through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1. Evaluate how research findings such as trends and changes will impact on learning strategy 3.2. Review data and research findings for accuracy of details and adherence to any <i>legal requirements</i> 3.3. Collate and analyse data for relevance against the original applied research strategy 3.4. Document and <i>present research findings</i> in a clear and logical manner consistent with audience needs 3.5. Identify the need for and an appropriate approach to, further research

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and teamwork skills to:
 - analyse and interpret structurally intricate information in the area being researched
 - consult with target groups using a range of communication techniques
 - develop written texts which deal with complex ideas and concepts
 - present research results creatively to meet audience needs
- initiative and enterprise skills to discover and source appropriate information, and to identify future implication of information and data collected
- planning and organising skills to:
 - construct an applied research strategy
 - initiate and design research methodology
 - manage an applied research project
 - frame research strategy in consideration of available resources
- problem-solving skills to:
 - develop and examine the validity of the hypothesis using a range of applied research techniques
 - collect, organise, analyse and present data
 - analyse research
 - check the integrity of data collected
 - conduct trend analyses
- self-management and learning skills to:
 - manage own time and determine priorities
 - review and adhere to relevant ethics and codes of conduct
 - store data to maintain privacy and confidentiality of information
 - conduct research to develop capabilities and learning related activities
- technical skills to:
 - select suitable technology and technical services
 - use a range of software programs
 - use technology and the internet to discover, access, collect and store data, information and research in a systematic manner.

Required knowledge

- communication processes and methods
- data collection methods
- legislation, regulations, policies, procedures and guidelines relating to handling or

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • formulating a research proposal or plan which includes: <ul style="list-style-type: none"> • specific research questions or hypotheses • valid population or sample size • description of the geographical, cultural, social or institutional context within which the research will be carried out • full description of the data collection methods • analysis of the limitations to research design • designing an applied research project using appropriate tools and techniques • research report with analysis of data, and valid and reliable findings • utility and relevance of the research results • knowledge of applied research techniques.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • research activity relates to an actual workplace or simulated context and topic • competence is consistently demonstrated over time, over a range of applied topics, and using a range of tools and techniques appropriate to the given situations and research topic.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • applied projects or assessment activities relating to conducting applied research • observation of contextual application of skills • oral or written questioning to assess knowledge of

EVIDENCE GUIDE	
	applied research.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • BSBITB701A Implement advanced electronic technologies • BSBLED702A Lead learning strategy implementation • BSBLED703A Implement improved learning practice • BSBLED704A Review enterprise e-learning systems and solutions implementation • BSBLED709A Identify and communicate trends in career development.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Applied research purpose</i> may be contained in documents such as:</p>	<ul style="list-style-type: none"> • agreements • research brief • research contracts • research guidelines • research statement
<p><i>Target group</i> may include:</p>	<ul style="list-style-type: none"> • age cohort • career choices • cultural background and needs • diversity • employees • employment status or role • end users • learners/students • learning styles and preferences • level of education achieved • literacy and numeracy skills • location • occupational health and safety • predetermined service user group • skill or competency profile • socioeconomic background
<p><i>Applied research strategy</i> may cover:</p>	<ul style="list-style-type: none"> • analysis of industry specific trends, statistics and issues • collection of data to assist informed decision making, planning or risk management • data and information relating to strategy, policy, practices, or work processes developed and implemented by an organisation • formation of solutions to complex problems • information and analysis needed to develop a campaign, strategic plan, industry or sector plan and strategy, or to bargain effectively with employers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • information and analysis to conduct a strategic or community campaign or activity • relationship or relevance of a theory, principle or practice to an immediate practical problem, issue or to test a proposed solution
<i>Factors affecting reliability and validity</i> may include:	<ul style="list-style-type: none"> • sample size • type or survey used (e.g. comparing types and methods to increase validity) • capacity to generalise findings across the whole population • access appropriate population
<i>Hypothesis</i> is:	<ul style="list-style-type: none"> • conceptual or operational proposition or explanation that will be tested through the conduct of the applied research
<i>Tools</i> may be:	<ul style="list-style-type: none"> • designed for electronic or physical presentation • involve a range of technologies (online or computer-based)
<i>Resources</i> may include:	<ul style="list-style-type: none"> • components required • design specifications • infrastructure • monetary • physical • technical manuals • samples
<i>Applied research methods and theories</i> may cover:	<ul style="list-style-type: none"> • methods such as: <ul style="list-style-type: none"> • action research • case study • classification • experience and intuition • experiments • interviews • map making • mathematical models and simulations • participant observation • physical traces analysis • semiotics • surveys • statistical data analysis • statistical surveys

RANGE STATEMENT	
	<ul style="list-style-type: none"> • ethnographic research • content, textual analysis, theories and techniques, which will vary upon consideration of: <ul style="list-style-type: none"> • application of statistical methods • causal factors and dependant or independent variables • critical analysis • experimental, quasi-experimental, non-experimental • mathematical calculations • problem solving • qualitative or quantitative research • sampling and sample size
<i>Data collection techniques</i> may include:	<ul style="list-style-type: none"> • collaboration with other experts or mentors • desk research • document research • field study • observation • physical items analysis • interviews • questionnaires • surveys
<i>Suitable technology</i> may include:	<ul style="list-style-type: none"> • communication technology and networks • databases and the use of spreadsheets, graphs, trend and time series, and mathematical equations • hardware and software
<i>Appropriate sources of information</i> may include:	<ul style="list-style-type: none"> • archives • community organisations • computer data, including internet • discussions with current industry practitioners • discussions with industry personnel, manufacturers, and technical and sales personnel • government departments • industry associations and organisations • industry journals • libraries (such as text, film, video, sound, graphic)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • media (such as film, television, radio, newspapers, multimedia) • media archives • museums, galleries • organisational policies, procedures and journals • personal observations and experience • professional organisations • reference books • technical publications, manuals
<i>Contributors</i> may include:	<ul style="list-style-type: none"> • individuals and groups both inside and outside the organisation who have some direct interest or expertise in relation to the applied research or who provide data
<i>Relevance of the research</i> may be based on:	<ul style="list-style-type: none"> • available time and resources • feasibility of implementing the recommendations • findings of previous and current research • original research parameters and brief • quality and credibility of the methodology • value of its usefulness • value of the information and data
<i>Legal requirements</i> may include:	<ul style="list-style-type: none"> • agreements with third parties that supply research or data • competency standards • contracts • copyright and privacy laws relating to physical materials and electronic technology • licensing • plagiarism • privacy • relevant commonwealth and state/territory legislation, policy, codes of practice and national standards • security of information
<i>Presenting research findings</i> may include:	<ul style="list-style-type: none"> • circulating publications for comment and critique on the internet • contributing to strategic policy • drafting publications or reports • presentations at seminars and conferences • providing data, plans, specifications and reports resulting in changed work practice/s or

RANGE STATEMENT	
	design/s <ul style="list-style-type: none"> • providing internal reports verbally, in writing or via presentations • publishing papers and articles for expert review and audiences • publishing reports and articles for lay audiences

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm requirements for recordkeeping in an online environment	1.1. Identify and confirm <i>system</i> procedures for capturing and managing <i>records</i> 1.2. Identify and verify organisational and <i>risk management</i> requirements for classifying and storing online information 1.3. Identify legal, business, financial, socio-historical, and security requirements for recording online business transactions 1.4. Prepare an organisational checklist in accordance with <i>organisational requirements</i> for use in assessing which electronic information should be captured, for how long and in what format
2. Identify and assess records for storage	2.1. Categorise incoming and outgoing information in terms of key activities and responsible personnel 2.2. Assess information against the organisational checklist and records identified for capture 2.3. Dispose information not to be stored in accordance with organisational procedures 2.4. Determine <i>storage</i> methods and <i>media</i> in accordance with <i>retention requirements</i>
3. Monitor and maintain business records in an online environment	3.1. Classify, sentence and link records with other records in the system in accordance with system rules and organisational procedures 3.2. Assign unique identifiers and register records into the recordkeeping system in accordance with system rules and organisational procedures 3.3. Determine <i>access and security status</i> and disposal requirements of records and records in accordance with organisational procedures 3.4. Store records on required <i>media</i> in accordance with organisational and record retention requirements 3.5. Carry out <i>migration</i> of records from one medium to another in accordance with organisational procedures 3.6. Action and record archiving or <i>disposal</i> of records in accordance with disposal schedule and organisational procedures 3.7. Maintain records in a usable and accessible form in accordance with security conditions and legislative requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to identify organisational requirements for recordkeeping in an online environment
- technology skills to address online access and security issues
- literacy skills to read and interpret record content, functions and problems
- problem-solving and analysis skills to identify requirements of business or records system
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities

Required knowledge

- overview knowledge of key provisions of relevant legislation, regulations, standards and documentation that may affect relevant aspects of business operations, such as;
 - AS ISO 15489:2004 Records Management
 - AS 5044 AGLS Metadata element set
 - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
 - AS 5090:2003 Work process analysis for recordkeeping
 - ASX Principles of Good Corporate Governance
 - ethical principles
 - codes of practice
 - privacy and freedom of information
 - archives and records legislation
 - occupational health and safety
- general principles and processes of records management and records management systems, including, but not limited to ;
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
- online recordkeeping environment including location and nature of transactions

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • monitoring usage of online business or records system • monitoring application of system procedures • managing records as they are created, updated, migrated and disposed of.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • examples of real or simulated records, recordkeeping system and policies. • workplace reference materials such procedural manuals and company policies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • demonstration of techniques in a workplace or simulated environment • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of authenticated documents from the workplace or training environment • tests of knowledge on general principles and processes of recordkeeping systems.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • general administration units • other knowledge management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Systems relating to online records may include:

- archival control systems
- business systems
- cash register-based systems
- characteristics relating to:
 - aggregations
 - context
 - entities
 - metadata
- current business or records systems
- ERDMS (Electronic Records and Document Management System)
- informal
- paper-based accumulation and card systems
- PC-based accounting systems, employee and tax records systems
- proprietary recordkeeping package
- storage facilities systems

Records may include:

- digital, such as:
 - remote drives
 - servers
 - CDs
 - DVDs
 - imaging systems
 - PC-based applications
 - mainframe
 - server
- physical, such as:
 - audio-visual or multimedia
 - graphic
 - microform
 - paper-based (acid free or multiple copies)
- a variety of sources, such as:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • already in the custody of the organisation • in the process of being transferred between organisations • different stages of use, e.g.: <ul style="list-style-type: none"> • active • archival
<i>Risk management requirements</i> may include:	<ul style="list-style-type: none"> • backup and recovery procedures • policy and procedures for checking the accuracy and currency of data • remote storage for backup data • secondary storage requirements
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • business • financial • legal • security • socio-historical
<i>Storage</i> may include:	<ul style="list-style-type: none"> • migration of records from one medium to another eg tape to compact disc • off-line • off-site • online • on-site • outsourced
<i>Storage media</i> may include:	<ul style="list-style-type: none"> • audiotape • audiovisual • compact disc • computer tape • diskette • film • hard drive • imaging systems • mainframe • microform • multimedia • paper based • server • video
<i>Retention requirements</i> may include:	<ul style="list-style-type: none"> • long term storage media for information / records • most cost-effective storage media for

RANGE STATEMENT	
	ephemeral or short term records <ul style="list-style-type: none"> remote storage of backup data in case of fire or other incidents
<i>Access and security status</i> may include:	<ul style="list-style-type: none"> confidential high security (restricted) open
<i>Migration of records</i> may include:	<ul style="list-style-type: none"> from about-to-be superseded media eg 5¼" disks from tapes, which may deteriorate over time
<i>Disposal of records</i> may include:	<ul style="list-style-type: none"> destruction of paper based records eg shredding permanent deletion from electronic media

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to achieve team outcomes	1.1. Identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2. Support team members in meeting expected outcomes
2. Develop team cohesion	2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2. Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4. Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open communication with line manager/management at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - boost team morale
 - deal with team conflict
 - deliver messages from management
 - facilitate discussion
 - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
 - delegation and work allocation
 - goal setting
 - group dynamics and processes
 - individual behaviour and difference
 - leadership
 - motivation
 - negotiation
 - planning.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan the audit	1.1. An audit plan is developed to meet the audit scope 1.2. The plan is capable of delivering the required outcomes within resource and time allocations 1.3. Plan includes audit purpose, scope and relevant templates or approved food safety program 1.4. Activities and responsibilities for the audit are identified 1.5. Audit timing (as required by legislation and/or client) is identified including timetable for each stage of the audit 1.6. Resource, personnel and reporting requirements are identified 1.7. Follow up and completion procedures are identified 1.8. Communication protocols are identified and established to facilitate the effective exchange of information and suited to the auditee environment
2. Confirm that the food business has documented required preliminary work	2.1. The food and the method of distribution are defined 2.2. Customers and intended use of food is identified 2.3. The process is described and documented 2.4. The food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1. The documented food safety program and related procedures and prerequisite programs are assessed to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2. The food business method of identifying and analysing food safety hazards is reviewed 3.3. Templates or the approved food safety program are correctly selected to meet audit scope 3.4. Templates or the approved food safety program are appropriately adapted to suit the needs of the business without adversely affecting food safety 3.5. Documented verification records are reviewed to confirm that the requirements of the food safety program are being met 3.6. Corrective actions required where processes are identified as not meeting targets or critical limits are assessed to confirm they meet the requirements of the template or food safety program 3.7. Food safety prerequisite programs are assessed to

ELEMENT	PERFORMANCE CRITERIA
	<p>confirm they are appropriate for the food business/industry sector to maintain a safe food environment</p> <p>3.8. Food safety program documents are reviewed to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food safety program</p>
<p>4. Collect evidence to review and assess implementation of food safety programs</p>	<p>4.1. Evidence is collected to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied</p> <p>4.2. Evidence is collected to confirm that food safety monitoring and corrective actions are carried out according to procedure</p> <p>4.3. Evidence is collected to confirm that safety prerequisite programs are effective and consistently followed</p> <p>4.4. Evidence is collected to confirm that food safety records are completed and provide an accurate record of events</p> <p>4.5. Evidence is collected to confirm that records are accessed and analysed to confirm effective program maintenance in accordance with the template or food safety program</p> <p>4.6. Evidence is collected to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role</p> <p>4.7. Evidence is collected to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert</p>
<p>5. Manage the audit process</p>	<p>5.1. Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>5.2. Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner</p> <p>5.3. Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>5.4. The audit process is reviewed to identify opportunities for improvement</p>
<p>6. Consolidate audit outcomes</p>	<p>6.1. Audit evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or the food safety program</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>6.2. Non-conformities are identified and classified as agreed by the audit plan</p> <p>6.3. Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>6.4. Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>6.5. A corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed by the auditor to confirm that template or food safety program requirements are met</p> <p>6.6. Audit findings are reviewed to confirm that evidence is sufficient as defined by the template or approved food safety program</p>
7. Confirm and close out corrective actions	<p>7.1. Implementation and effectiveness of corrective action is monitored and verified against the template or the approved food safety program</p> <p>7.2. Audit records are maintained to record corrective actions</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- plan and organise audit activities
- identify work processes and work flow
- interpret food safety programs including flow charts, standard operating procedures (SOPs), and other process documentation
- describe each process step and identify food safety hazards
- conduct research to identify, collect and analyse evidence of compliance with food safety programs
- use communication skills to support evidence collection and outcome presentation
- identify and classify non-compliances
- prepare audit reports and certificates to meet regulatory and client requirements
- review corrective action implementation plans
- monitor the implementation of corrective actions
- maintain audit records

Required knowledge

Knowledge of:

- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards
- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories

REQUIRED SKILLS AND KNOWLEDGE

- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the of food safety and food hygiene relevant to the food business

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- confirm that the food safety program and/or template is appropriate to the activities of the business
- review food safety program records to assess compliance against the approved food safety program and/or template
- collect and analyse evidence to confirm that the food safety program is consistently followed and controls all critical risks
- identify circumstances where variation or customising of the template or food safety program requires further validation
- submit non-compliance reports to clearly identify the aspects of the food safety program that have broken down/need further development in order to prevent recurrence.

Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the scenarios should be assessed in an actual workplace context.

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.

The following resources must be available:

- food safety plans

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • food safety-related documentation required to implement and record the food safety plan • evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program • plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the critical aspects for assessment identified above • questioning to test the level and application of knowledge • workplace example or scenario to allow a valid decision on the compliance of the food safety program to be made, with evidence of recording and feedback.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Food safety program</p>	<p>Food safety programs include both prerequisite programs and a risk-based analysis of food safety hazards to determine required control measures to eliminate, prevent or reduce hazards. Minimum legal requirements for food safety programs are specified in National Food Safety Standard 3.2.1 or other relevant legislative requirements.</p> <p>The food safety program may be based on a template or externally developed program that is adapted to the needs of the business</p>
<p>Licensing/certification requirements</p>	<p>Licensing and certification requirements are determined by system owners</p>
<p>Technical expert</p>	<p>The requirements of a technical expert are determined by the system owner. System owners may include:</p> <ul style="list-style-type: none"> • government regulators as well as private system owners
<p>Audit scope</p>	<p>The scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
<p>Prerequisite programs</p>	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p>

RANGE STATEMENT

	<p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state and territory legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as that relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements

RANGE STATEMENT	
	<p>relevant to importing countries</p> <ul style="list-style-type: none"> • Commonwealth legislation (e.g. Export Control Act) <p>Other legislation which may impact on the conduct of a food safety auditor may include legislation covering:</p> <ul style="list-style-type: none"> • occupational health and safety (OHS), anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management • legal contracts or agreements
Food businesses	A food business refers to a business, enterprise or activity where food is produced, processed, stored, displayed and/or sold. It may also include primary producers
Food safety program documents	<p>Food safety program documents may include:</p> <ul style="list-style-type: none"> • documented statements of food safety policy and objectives • documented procedures and records • documented complaints register • documents and records to ensure the effective development, implementation and updating of the food safety program
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Develop a communication plan to support audit processes</p>	<p>1.1. Roles and responsibilities of the auditee are defined and agreed by both parties to address the audit scope</p> <p>1.2. Roles and responsibilities of all personnel involved in the audit process are defined, communicated and agreed</p> <p>1.3. Appropriate communication methods and protocols are determined and specific arrangements, including reporting requirements, are agreed</p> <p>1.4. A communication plan is developed to identify the communication requirements and responsibilities of personnel involved in the audit process</p>
<p>2. Select and use appropriate communication methods to conduct an audit</p>	<p>2.1. Appropriate communication methods are used to establish and maintain effective client relationships, collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution and communicate audit findings</p> <p>2.2. Communication methods are selected to take account of system owner and food business requirements, workplace culture and individual differences</p> <p>2.3. Information provided by the auditee is interpreted in the context of the industry sector, language and culture of the business</p>
<p>3. Negotiate to achieve agreement on audit outcomes</p>	<p>3.1. Areas of disagreement over audit outcomes are identified and clarified with the auditee</p> <p>3.2. Understanding is sought on actions to be followed to resolve outstanding issues</p> <p>3.3. Communication techniques are applied to encourage all relevant parties to participate and express their views fully</p> <p>3.4. Auditee views are treated with respect</p> <p>3.5. Options for resolving differences are explored to reach agreement and meet audit timeline and resource parameters</p> <p>3.6. Appropriate issue resolution strategies are explored to increase the likelihood of agreement on steps required to conclude the audit</p> <p>3.7. The negotiation process is managed to maintain constructive client relationships</p> <p>3.8. Any areas of continuing non-compliance that result</p>

ELEMENT	PERFORMANCE CRITERIA
	from unresolved differences are reported to system owners and appropriate authorities as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select, design and use appropriate communication methods and techniques to support the audit process and the needs of the audience
- apply strategies to communicate with people at different levels of the food business with different English language, literacy and technical skill levels
- facilitate groups to resolve sensitive and/or conflict-based issues
- structure and present written and verbal information that is thorough, legible, clear, accurate and appropriate to the purpose and the audience
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- communicate information in environments where the recipients may be hostile to the information being presented
- apply issue resolution strategies

Required knowledge

Knowledge of:

- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- vocabulary and terms relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to select and use appropriate methods of communication and negotiation to support audit processes. This unit should be assessed together with other food safety auditing units.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- design a communication plan to meet the needs of stakeholders in an audit process, specifically where a number of participants have limited English language and literacy skills
- facilitate and negotiate to seek understanding of audit outcomes in a conflict-based situation where the outcomes are contested by the auditee. This component of assessment must provide opportunities to select and apply appropriate communication methods.

Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment where the simulated context provides access to audit findings which are disputed by the auditee. At least one of the audit scenarios should be assessed in an actual workplace context. A simulated environment must provide access to a typical range of personnel with communication skill levels appropriate to food businesses and to the roles of personnel involved in food safety audit processes.

Method of assessment

The following assessment methods should be considered to gather sufficient and valid evidence of competency:

- observation of communication and conflict management skills
- a report for a communication plan to conduct a food safety audit

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• questioning to test the level and application of knowledge• a journal or report on communication strategies used in conducting a food safety audit. <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Licensing/certification requirements

This unit is part of a set of units that are a minimum requirement for auditors of food safety programs

Communication plan

A communication plan identifies:

- the type and purpose of information to be provided through each stage of the audit process
- audiences for types of information
- the form or method of communication (e.g. written report, verbal presentation)
- when/how often the communication will occur reporting procedures and responsibilities, including reporting timelines, formats and procedure for reporting serious/critical food safety hazards

Communication methods and protocols

Methods of communication may include:

- written presentations and reports
- two-way verbal interaction
- constructive feedback
- active listening
- questioning to elicit, confirm and clarify information
- interview techniques
- facilitation of meetings and group processes
- interpreting non-verbal skills and body language

Communication protocols may include:

- confidentiality
- objectivity
- information access and dissemination
- levels of communication/lines or reporting
- timeliness of providing

RANGE STATEMENT	
	information/responding to information requests
Food business requirements	<p>Business requirements may require that communication is consistent with:</p> <ul style="list-style-type: none"> • confidentiality requirements • legal requirements and related policies and procedures relating to communication requirements • professional codes of conduct/personal attributes of auditors • information that is accurate, thorough and clearly presented • resource parameters • organisational structure and delegated levels of authority • existing communication mechanisms and systems used in the auditee's workplace
Individual differences	<p>Individual differences may include but are not limited to:</p> <ul style="list-style-type: none"> • age • race • gender • culture • religion • impairment/disability • physical features • educational background • technical skill level • communication styles and skill levels • English language and literacy • any other individual characteristics that may need to be taken into account in designing communication as covered by relevant legislation
Issue resolution strategies	<p>Issue resolution strategies may include:</p> <ul style="list-style-type: none"> • establishing open communication practices to encourage the trust and engagement of all parties • designing processes that ensure all parties have opportunities to fully express their

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the scope of the audit	1.1. Audit scope is identified and defines the extent of the audit to meet legislative and audit client requirements 1.2. Audit criteria meet legislative and client requirements 1.3. The definition and levels of non-conformity and related reporting responsibilities are identified consistent with legislative requirements and client requirements 1.4. Evidence required to address audit scope and criteria is identified and appropriate collection methods are selected 1.5. Food safety management system documents are reviewed to determine adequacy for the purposes of the audit
2. Plan the audit	2.1. An audit plan is developed that includes definitions and levels of non-conformity to meet the audit scope 2.2. Activities and responsibilities for the audit are identified 2.3. Audit timing (as required by legislation and/or client) is identified, including timetable for each stage of the audit 2.4. Resource, personnel and reporting requirements are identified 2.5. Follow up and completion procedures are identified 2.6. Communication protocols are established to facilitate the effective exchange of information and suited to the auditee environment
3. Conduct the audit	3.1. Information on the audit scope and methodology is communicated in an effective and timely manner 3.2. Stages and activities of the audit process are followed 3.3. Methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk are reviewed to confirm that they are appropriate and correctly applied 3.4. Evidence used by the food business to support identification of control measures and establish control limits is identified and evaluated to determine adequacy and relevance 3.5. Methods used by the food business to control

ELEMENT	PERFORMANCE CRITERIA
	<p>hazards and determine corrective action where processes are identified as not meeting targets or critical limits are reviewed to confirm they are adequate, effective and appropriate</p> <p>3.6.Evidence is collected to confirm that the documented food safety policies and procedures are working effectively, reflect actual practice and are consistently applied</p>
4. Manage the audit process	<p>4.1.Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>4.2.Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner</p> <p>4.3.Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>4.4.The audit process is reviewed to identify opportunities for improvement</p>
5. Consolidate audit outcomes	<p>5.1.Evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or client requirements as appropriate to the audit scope</p> <p>5.2.Non-conformities are identified and classified as agreed by the audit plan</p> <p>5.3.Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>5.4.Audit findings are communicated to the auditee</p> <p>5.5.Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>5.6.Corrective actions proposed by the auditee in response to non-conformances are reviewed for compliance with the template or food safety program</p> <p>5.7.Audit findings are reviewed to confirm that evidence is appropriate and sufficient and findings are accurate</p> <p>5.8.The food safety management system is reviewed to identify areas of potential improvement of the system according to audit scope</p>
6. Confirm and close out corrective actions	<p>6.1.Implementation and effectiveness of corrective actions are monitored and verified and any variation to the food safety plan is identified and addressed</p> <p>6.2.Audit records are maintained to record corrective</p>

ELEMENT	PERFORMANCE CRITERIA
	actions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of food businesses relevant to the industry sector
- plan and manage audit activities
- communicate information in ways appropriate to the purpose and the audience and to facilitate opening and closing meetings
- negotiate and facilitate audit processes, including following meeting procedures and resolving issues
- select and use research skills relevant to audit activities, including researching technical sources to validate food safety programs and collecting evidence to support verification
- consolidate audit findings based on objective evidence
- prepare records and reports appropriate to the purpose of the audit and the needs of the auditee and the client (system owner/regulator)

Required knowledge

Knowledge of:

Auditor roles and responsibilities

- audit activities and stages, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional client requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
- audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan

Food safety management systems

- purpose and intent of each element of a food safety management system
- the underlying principles of risk-based approaches to controlling food safety hazards, including HACCP as described in the Codex Alimentarius Guidelines

REQUIRED SKILLS AND KNOWLEDGE

- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- food safety management system knowledge relevant to the system being audited., including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
- the interaction between different types of management systems, including the impact of food safety decisions on other management systems, such as occupational health and safety (OHS), quality, environmental risk management and animal welfare
- technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements

Food safety legislation

- the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
- the content covered by the Food Standards Code and/or other relevant standards
- the structure and responsibilities of commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
- the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
- sources of information on legislation and codes governing primary production and primary processing
- requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- the role of auditors when called on to provide evidence as a witness in court

Food safety audit processes

- preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flowchart) and check accuracy and

REQUIRED SKILLS AND KNOWLEDGE

completeness

- methods used identify food safety hazards and assess food safety hazard risk levels taking account of severity and likelihood of occurrence
- methods used to identify critical control points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
- methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
- types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods, including record sampling and sample analysis, and the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority of an auditor to initiate cessation of an audit
- understanding of the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
- information recording requirements and audit reporting requirements

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- Identify food safety legislation applying to a food business. Legislative requirements may relate to actual or hypothetical food businesses. A minimum of two scenarios must be covered providing that at least one food business operates in a market segment that has to meet compliance requirements in place of or in addition to the Food Standards Code. One such market segment is export meat processors who must comply with the Export Control Act and the Export Meat Orders.
- The assessment activity must:
 - identify the relevant legislation applying to the food business taking account of the industry sector, range of food handling activities undertaken and the markets into which products and/or services are sold.
 - locate advice on relevant authorities and enforcement agencies in a state or territory and for international markets as appropriate.
 - explain the legal responsibilities of a given food business.
- Plan and conduct an audit that complies with legal and client requirements as appropriate. The criteria and evidence requirements may be developed to apply to an actual or hypothetical food business. The assessee must substantiate:
 - how audit scope and criteria meet legislative and

EVIDENCE GUIDE	
	<p>client requirements.</p> <ul style="list-style-type: none"> the evidence required to assess compliance with the criteria and to support an objective, reliable and consistent audit outcome. definitions, levels and related reporting of non-conformance to comply with legislative requirements. <ul style="list-style-type: none"> Submit completed audit records for the selected audit including the final audit report, non-conformity reports, corrective action reports, follow up reports and suggestions for improvements to the food safety management system and to the audit process. These latter items may be documented in personal notes rather than part of the formal audit report according to the audit scope.
Context of and specific resources for assessment	<p>Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the audit scenarios should be assessed in an actual workplace context.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> food safety plans food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> observation, including the completion of documentation to show the planning and conducting of an audit a report on the legal responsibilities of the food business questioning to test the level and application of knowledge

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • documentation to show validation and verification processes used • completion of all audit records. <p>The whole audit process must be witnessed by the assessor.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety audits	Audits may be conducted for either regulatory or commercial food safety systems for low, medium or high risk food safety hazards
Licensing/certification requirements	Licensing and registration arrangements are determined by system owners
Audit scope	<p>The audit scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as those relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements relevant to importing countries • commonwealth legislation (e.g. Export Control Act) • other legislation which may impact on the conduct of a food safety auditor and may include legislation covering: <ul style="list-style-type: none"> • OHS, anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management

RANGE STATEMENT	
	<ul style="list-style-type: none"> • legal contracts or agreements
Audit client	<p>Audit client refers to the organisation or person requesting an audit (system owner). This may be the same as the auditee or any other organisation which has the regulatory or contractual right to request an audit.</p> <p>The system owner may be the regulator</p>
Auditee	Auditee refers to the organisation being audited
Audit client requirements	<p>Client requirements are typically defined in audit contracts or agreements and may relate to:</p> <ul style="list-style-type: none"> • legal requirements • food safety management system requirements • compliance with client site operational policies and procedures • confidentiality • business size, activities and processes • business culture • professional standards of conduct
Audit criteria	<p>The audit criteria must comply with relevant food safety legislation and may extend to address additional system owner/client requirements. In addition to meeting the requirements of food safety legislation, reference against which conformity is determined may include:</p> <ul style="list-style-type: none"> • management systems policies and procedures • industry standards or codes • contractual requirements • international treaties and conventions
Levels of non-conformity	<p>Levels of non-conformity are defined and based on food safety risk. They may be determined by:</p> <ul style="list-style-type: none"> • the management system • the audit client • legislation • where legislation applies, definitions may be determined by: <ul style="list-style-type: none"> • state and territory authorities • AQIS • primary industry jurisdiction

RANGE STATEMENT	
	<ul style="list-style-type: none"> • primary food production jurisdiction
Audit evidence	<p>Evidence required for the purposes of meeting relevant food safety legislation may be defined by:</p> <ul style="list-style-type: none"> • the client and/or the regulatory authority <p>Audit evidence should be based on objective information rather than hearsay and may include:</p> <ul style="list-style-type: none"> • system records • evidence collection records • statements of fact or other information relevant to the audit criteria and which is verifiable • observations • records of audit stage progression
Evidence collection methods and sources	<p>Evidence collection methods and sources will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • observation • interviews • checklists • auditee documentation review • reports/data from other sources, such as customer feedback, technical references, computerised databases • results of analyses
Food safety management system	<p>A food safety management system is a documented arrangement implemented (and resourced) by a business for control of food safety. A food safety management system includes:</p> <ul style="list-style-type: none"> • commitment from management, procedures and practices to identify and control food safety hazards and prevent their recurrence. It may incorporate recognised food safety tools, such as HACCP and its prerequisite programs
Resource requirements	<p>Resource requirements will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • audit personnel directly involved in undertaking the audit

RANGE STATEMENT	
	<ul style="list-style-type: none"> • access to relevant personnel and information within the business • access to any additional resources as required
Food businesses	A food business refers to a business, vehicle, enterprise or activity where food is produced, processed, stored, displayed, transported and/or sold. It may also include primary producers
Preliminary work	<p>Preliminary work includes but is not limited to:</p> <ul style="list-style-type: none"> • identifying food to be covered by the food safety program • defining the food and the method of distribution • identifying customers and intended use of food • describing the process (flowchart) • checking for accuracy and completeness of the previous steps
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Verification	Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met
Audit records	<p>Audit records are maintained to demonstrate the implementation of the audit process. These may include but are not limited to:</p> <ul style="list-style-type: none"> • audit plans • audit reports • non-conformity reports • corrective action reports • follow up reports
Close out	<p>Auditors have different levels of responsibility and authority to close out audits according to the level of non-conformity and whether they are an authorised officer or a commercial auditor. Closing out may involve notifying the regulator</p>

RANGE STATEMENT	
	with the power to enforce legislation
Commercial auditor	Commercial auditor refers to any auditor other than a regulatory auditor, who is external to and independent of the food business being audited
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify food safety hazards in a food business	<p>1.1. Biological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.2. Intrinsic and extrinsic chemical food safety hazards that could present a risk in the food at the point of consumption, including toxin presence, are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements</p>
2. Control food safety hazards in a food business	<p>2.1. Processing hazards and related control measures and critical limits, monitoring and recording requirements are established and validated to eliminate or reduce food safety hazards to acceptable levels</p> <p>2.2. Food storage and handling requirements necessary to eliminate or reduce food safety hazards are determined</p> <p>2.3. Personal hygiene practices required to eliminate or reduce food safety hazards are established</p> <p>2.4. Cleaning and sanitation, housekeeping and pest control practices and procedures required to prevent or reduce food safety hazards are established</p> <p>2.5. Other prerequisite programs are developed to eliminate or reduce food safety hazards to acceptable levels</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, codes of practice and technical standards
- identify biological, chemical and physical food safety hazards
- determine critical control points and critical limits for identified hazards
- establish the required procedures, systems and records to monitor critical control points in order to demonstrate that the critical control point is in control
- specify required corrective actions and corrections to be taken when critical limits are not achieved

Required knowledge

Knowledge of:

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards (including toxin production and spore formation) and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable (and legal) levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Food Standards Code (and may be additionally defined by system owners)
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the

REQUIRED SKILLS AND KNOWLEDGE

identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control

- types and causes of acute and chronic chemical food borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial (including cleaning) chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
 - chemicals that pose a food safety risk
 - common food allergens
 - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to acceptable levels

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to establish or validate specific control measures in a food safety program based on demonstration of the identification, evaluation and control of food safety hazards.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • select a food supply chain and identify: <ul style="list-style-type: none"> • known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption • likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels • sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain • impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain • acceptable levels of contamination. These may be established by reference to relevant legislation and/or reference to system requirements • select one stage in the food supply chain (which must be a medium or high risk business or process) and establish or validate control measures and verification records and procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment may occur in a real or simulated food business context where the simulated context provides access to food safety programs for a multi-staged food supply chain which includes the point of delivery to the</p>

EVIDENCE GUIDE	
	<p>consumer.</p> <p>The selected supply chain must include at least one medium or high risk business and/or process and provide opportunity to apply a depth and breadth of food safety knowledge.</p>
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and documentation showing the identification of critical aspects of a food chain • questioning to test the level and application of knowledge • workplace example or scenario to produce validated control measures and verification records and procedures for food safety hazards.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Licensing/certification requirements

Licensing and registration arrangements are determined by system owners

Food safety hazards

A food safety hazard is a biological, chemical, or physical agent in, or condition of, food with the potential to cause an adverse health effect in humans (defined in 'Hazard Analysis and Critical Control Point System and Guidelines for its Application', Codex Alimentarius Commission)

Biological food safety hazards

Common biological food safety hazards include but are not limited to:

- Salmonella spp
- Campylobacter jejuni
- Bacillus cereus
- Clostridium perfringens
- Clostridium botulinum
- Cryptosporidium
- Pathogenic escherichia coli
- Giardia
- Listeria monocytogenes
- Shigella spp
- Staphylococcus aureus
- Vibrio parahaemolyticus
- Yersinia enterocolitica
- Hepatitis A virus
- Norwalk virus

Classifications by type of micro-organism include:

- bacteria
- viruses
- moulds/fungi
- parasites

RANGE STATEMENT	
	<ul style="list-style-type: none"> algae
Chemical food safety hazards	<p>Common origins of chemical contamination may include:</p> <ul style="list-style-type: none"> cleaning chemicals pesticides veterinary residues chemical additives allergenic substances toxic metals nitrites, nitrates and N-nitroso compounds polychlorinated biphenyls (PCBs) plasticizers and packaging migration phytotoxins zootoxins
Physical food safety hazards	<p>Physical food safety hazards refer to objects not normally found in food which may cause illness or injury to the consumer</p>
Acceptable levels	<p>Acceptable levels define the level of a particular hazard in the end product that is acceptable to ensure food safety. Acceptable levels are typically defined by:</p> <ul style="list-style-type: none"> the Food Standards Code commonwealth, state or territory legislation or codes industry codes of practice international protocols (CODEX Alimentarius) customer food safety requirements (including intended use)
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP).</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> layout, design and construction of buildings and facilities

RANGE STATEMENT	
	<ul style="list-style-type: none"> • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability
Food supply chain	Food supply chain refers to a sequence of stages and operations involved in the production, processing, distribution and handling of food from primary production to consumption
Growth requirements	<p>Factors which influence the growth of pathogenic micro-organisms may include:</p> <ul style="list-style-type: none"> • temperature

RANGE STATEMENT	
	<ul style="list-style-type: none"> • water activity • gases • pH • time • moisture • nutrients
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Validation evidence	<p>Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to enter a freezer storage environment	1.1. Appropriate clothing and footwear are identified and available 1.2. Clothing and footwear are correctly fitted prior to entering a freezer 1.3. Checks and inspections are conducted according to workplace procedures
2. Identify and monitor equipment operation in a freezer storage environment	2.1. Effects of freezing temperatures on equipment used are identified 2.2. Equipment is monitored to ensure it is in operational order when in use in a freezer
3. Handle frozen product safely	3.1. Handling requirements for frozen product are identified 3.2. Frozen product is handled safely 3.3. Work is conducted in accordance with workplace environmental guidelines
4. Respond to emergencies	4.1. Signs and symptoms of exposure are identified 4.2. Appropriate action is taken to minimise effects of exposure of self and others

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and fit appropriate protective clothing, footwear and equipment
- follow procedures to enter and work in a freezer environment to ensure safety of self and others, including carrying out relevant checks and inspections prior to entry as required by workplace procedures
- follow procedures to handle product to avoid product damage
- monitor operating performance of equipment used in the freezer and identify signs of unsafe or unfit operation
- conduct work in a manner appropriate to minimising risk of contamination
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and conditions required in a freezer storage environment, including how temperature parameters are maintained in the freezer/cold room
- safety requirements and hazards associated with entering and working in a freezer storage/cold room area, including required protective clothing and equipment, limitations of protective clothing and equipment, and maximum work duration
- symptoms associated with hypothermia and action to take if these occur
- the effects of freezer/cold room temperatures and frozen condensation on equipment used in a freezer/cold room but designed for room temperature operation, including symptoms that equipment is unsafe or unfit for use
- effects of room temperatures on equipment using hydraulic oils designed for freezer/cold room temperatures
- typical freezing rates for product handled, such as products stacked on pallets
- handling requirements for moving pallets of frozen product and how this differs from moving pallets of fresh product
- the differences in product stability of pallets loaded with fresh compared with frozen product and related wrapping requirements
- the effect of freezing on product packaging and related handling requirements
- housekeeping requirements for work area

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify risks associated with freezer storage to self and equipment and identify controls to address risks • correctly use personal protective equipment • use and monitor equipment in freezer storage • take corrective action in response to typical faults, inconsistencies and symptoms of exposure • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • freezer storage/cold room area • stock to be held in frozen storage.
<p>Method of assessment</p>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2010A Work with temperature controlled stock.
<p>Guidance information for assessment</p>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store stock to meet temperature control requirements	1.1. Goods requiring temperature control are identified 1.2. Goods are located in correct storage areas to meet storage temperature, stores handling and stock rotation requirements 1.3. Stores information is recorded according to workplace requirements
2. Monitor and maintain temperature of stock within specifications	2.1. Stock temperature is monitored to confirm temperature is within specified limits 2.2. Storage areas are monitored to confirm temperature is within storage zone limits 2.3. Residence time in temperature controlled stores is monitored to meet stock control requirements 2.4. Out-of-specification storage temperatures are identified and corrective action is taken
3. Transfer temperature controlled stock	3.1. Goods are handled and transferred to maintain temperature control and meet stock rotation requirements 3.2. Stores transfer information is recorded according to workplace reporting requirements 3.3. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine product handling and storage requirements
- identify storage requirements including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identify temperature controlled storage facilities and temperature zones available
- select, fit and use personal protective clothing and/or equipment
- use materials handling equipment in a temperature controlled environment as required to undertake work functions
- follow procedures to measure temperature of product, such as use of instrumentation as required to take core and surface temperatures
- read instrumentation, such as temperature gauges, to monitor stores and zone temperatures
- identify and report out-of-specification temperatures in product and storage facilities
- take corrective action in response to out-of-specification temperatures including implementation of procedures to segregate damaged or potentially unsafe product
- complete records of stock receipt and transfer as required
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- occupational health and safety (OHS) hazards and controls, including the purpose and limitations of protective clothing and equipment
- temperature controlled storage facilities and capacities available in the work area, such as temperature zones within a single store and concepts (e.g. the Cold Chain compliance) as relevant to work requirements
- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges, and where required requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating, and disposing of damaged or potentially unsafe stock

REQUIRED SKILLS AND KNOWLEDGE

- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements
- operating procedures for goods handling equipment as required
- housekeeping requirements for work area
- recording requirements and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify storage requirements of temperature controlled stock • monitor temperature of storage area and stock to ensure standards are maintained • handle and transfer stock to maintain required conditions • identify and act on non-conformances • complete workplace documentation • apply food safety procedures.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply basic mathematical concepts to calculate workplace information	1.1. Calculation requirements are identified and appropriate method is selected 1.2. Data is obtained from relevant sources and interpreted correctly. 1.3. Calculations are undertaken using addition, subtraction, multiplication and division to support work role
2. Apply basic mathematical concepts to estimate workplace information	2.1. Estimation requirements are identified and appropriate estimation method is selected 2.2. Data is obtained from relevant sources and interpreted correctly. 2.3. Estimations are made to meet work requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify whether a calculation or estimation is required to meet workplace requirements
- carry out calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables where required)
- use estimation techniques to check quantities, ratios, speed and other required data estimates
- use estimation techniques to check calculated results and workplace data
- record calculations and measurement information accurately according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals (to one decimal point) (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, such as charts, graphs and tables
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify calculation or estimation requirements • carry out calculations involving basic addition, subtraction, division and multiplication • where estimations are used, estimated amounts must be consistent with process or product specification and demonstrate knowledge of measurement units used in the workplace • use estimation techniques to check calculated results and workplace data.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • work tasks requiring simple estimation and calculation • conversion tables, calculators and measuring instruments where required • workplace forms/documents used for recording data where required.
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the function or work role. Example could be:</p> <ul style="list-style-type: none"> • FDFOP2015A Apply principles of statistical process control.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Calculations	<p>Calculations may include:</p> <ul style="list-style-type: none"> the use of whole numbers, decimals, fractions and percentages <p>Calculations may be made:</p> <ul style="list-style-type: none"> manually or using calculators and other measuring instruments as appropriate to the task
Estimations	<p>Estimations can be used where the workplace tasks require only an approximate judgment of an amount, ratio, speed, and so on. Estimations can be made from:</p> <ul style="list-style-type: none"> observations of other amounts or measurements supplied data, such as volume or weight information on packaging of raw materials
Conversion charts	<p>Conversion charts are those in common use in the workplace</p>
Results	<p>Results may or may not be recorded depending on workplace requirements</p>
Numerical information	<p>Numerical information may be presented in forms, including:</p> <ul style="list-style-type: none"> simple run charts graphs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for line setup	1.1. Materials are confirmed and available to meet production requirements 1.2. Equipment and related accessories are confirmed, available and fit for use to meet production requirements 1.3. Tools and equipment required for line setup are available, operational and fit for use 1.4. Processing parameters and settings are identified to meet production or packaging requirements
2. Set up the line for operation	2.1. Cleaning and maintenance requirements and status are identified and confirmed 2.2. Equipment is inspected to confirm condition 2.3. Machine settings are selected or adjusted as required to meet safety and production requirements 2.4. Processing or packaging parameters are entered as required to meet production requirements 2.5. Equipment performance is checked and adjusted as required 2.6. Pre-start checks are carried out as required by workplace requirements 2.7. Line setup is completed to match production or packaging schedule and operating requirements 2.8. The line is ready and safe to operate and any maintenance requirements are reported according to workplace reporting requirements 2.9. Work is conducted in accordance with workplace environmental guidelines 2.10. Relevant personnel are notified of setup completion

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access production/packing schedule and related information to identify line setup/changeover requirements, such as checking product sequencing and compatibility, confirming that the required cleaning and/or sanitation has occurred and required packaging components and consumables are available as appropriate
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary equipment and related attachments, materials and services for production
- confirm supply of necessary equipment and services to carry out setup operations
- set and/or adjust equipment to meet production/packaging requirements, including selecting the required parameters or equipment settings, and changing processing set points as required
- position safety guards and cancel isolation/lockouts ready for operation
- confirm that sensors and related feedback instruments are correctly positioned and operational
- operate equipment to confirm equipment setup and make final adjustments as required
- time setup activities to meet production requirements
- advise affected work areas/personnel of completion of setup
- maintain work area to meet housekeeping standards
- load and/or position materials/ingredients/product and/or packaging consumables according to enterprise procedures
- use the control panel/system to set and adjust equipment components according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, such as different types of

REQUIRED SKILLS AND KNOWLEDGE

- equipment and/or components as required by processing operations
- nature of setup/changeover requirements, such as product compatibility and related cleaning requirements, impact of variation in materials or product on setup requirements, equipment and/or attachment changeovers related to given products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- pre-start checks required by setup/changeover
- related processes and personnel dependent on line setup, and communication responsibilities
- isolation, lock out and tag out procedures and responsibilities
- occupational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting equipment performance information
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance requirements and procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for production to determine cleaning, maintenance and operation readiness • determine production parameters and requirements • set up line according to production requirements • take corrective action in response to typical faults and inconsistencies • complete workplace records and communicate line status with other personnel as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • production/packaging schedule and related advice on setup/changeover requirements • cleaning records/clearance as required • information on equipment capacity and operating parameters • process/packaging equipment and related accessories and services • materials/consumables required by the process • hand tools as required.
<p>Method of assessment</p>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• FDFOP2030A Operate a process control interface.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • standard forms and reports
Equipment adjustment	<p>Equipment adjustment may include:</p> <ul style="list-style-type: none"> • limited use of hand tools, such as Allen keys and screwdrivers, within level of responsibility
Confirming cleaning requirements and status	<p>Confirming cleaning requirements and status may involve:</p> <ul style="list-style-type: none"> • accessing cleaning records

Co-requisite units

Co-requisite units		

HLTFA301B Apply first aid

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	<p>1.1 Identify assess and minimise hazards in the situation that may pose a risk of injury or illness to self and others</p> <p>1.2 Minimise immediate risk to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements</p> <p>1.3 Assess casualty and identify injuries, illnesses and conditions</p>
2 Apply first aid procedures	<p>2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness</p> <p>2.2 Use available resources and equipment to make the casualty as comfortable as possible</p> <p>2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner</p> <p>2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort</p> <p>2.5 Seek consent from casualty prior to applying first aid management</p> <p>2.6 Provide first aid management in accordance with established first aid principles and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements</p> <p>2.7 Seek first aid assistance from others in a timely manner and as appropriate</p> <p>2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures</p>

- 2.9 Use safe manual handling techniques as required
- 2.1 Monitor **casualty's condition** and respond in accordance with effective first aid principles and procedures
- 2.1 Finalise casualty management according to casualty's needs and first aid principles
- 3 Communicate details of the incident
 - 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant **communication media and equipment**
 - 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
 - 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
 - 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
 - 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate own performance
 - 4.1 Seek feedback from **appropriate clinical expert**
 - 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
 - 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

ARC Guidelines relating to provision of first aid as outlined

Working knowledge of:

basic principles and concepts underlying the practice of first aid

procedures for dealing with major and minor injury and illness

priorities of management in first aid when dealing with life threatening conditions

basic occupational health and safety requirements in the provision of first aid

infection control principles and procedures, including use of standard precautions

chain of survival

first Aiders' skills and limitations

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

First aid management of:

abdominal injuries

allergic reactions

altered and loss of consciousness

bleeding

burns - thermal, chemical, friction, electrical

cardiac arrest

casualty with no signs of life

chest pain

choking/airway obstruction

injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

envenomation - snake, spider, insect and marine bites

environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke

fractures

medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

near drowning

poisoning and toxic substances (including chemical contamination)

respiratory distress

seizures

shock

stroke

substance misuse - common drugs and alcohol, including illicit drugs

Awareness of stress management techniques and available support

Social/legal issues:

duty of care

need to be culturally aware, sensitive and respectful

importance of debriefing

confidentiality

own skills and limitations

Essential skills:

Ability to:

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit **HLTCPR201A Perform CPR**)

Apply first aid principles

Infection control, including use of standard precautions

Follow OH&S guidelines

Demonstrate:

safe manual handling

consideration of the welfare of the casualty

ability to call an ambulance

site management to prevent further injury

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions

Administer medication in line with state/territory regulations, legislation and policies

Prepare a written incident report or provide information to enable preparation of an incident report

Communicate effectively and assertively in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evaluate own response and identify appropriate improvements where required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:	Preserve life Prevent illness, injury and condition(s) becoming worse Promote recovery Protect the unconscious casualty
Vital signs include:	Consciousness Breathing Circulation
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	Physical hazards Biological hazards Chemical hazards Hazards associated with manual handling
Risks may include:	Risks from equipment, machinery and substances Risks from first aid equipment Environmental risks Exposure to blood and other body substances Risk of further injury to the casualty Risks associated with the proximity of other workers and bystanders Risks from vehicles

Casualty's condition is managed for:

Abdominal injuries
Airway obstruction
Allergic reactions
Altered and loss of consciousness
Bleeding
Burns - thermal, chemical, friction, electrical
Chest pain/cardiac arrest
Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
Near drowning
Envenomation - snake, spider, insect and marine bites
Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
Fractures
Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
No signs of life
Poisoning and toxic substances (including chemical contamination)
Respiratory distress/arrest
Seizures
Shock
Stroke
Substance misuse - common drugs and alcohol, including illicit drugs.

First aid management must take into account applicable aspects of:

The setting in which first aid is provided, including:

workplace policies and procedures

industry/site specific regulations, codes etc.

OHS requirements

state and territory workplace health and safety legislative requirements

location and nature of the incident

situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents

location of emergency services personnel.

The use and availability of first aid equipment and resources

Infection control

Legal and social responsibilities of first aider

Resources and equipment are used appropriate to the risk to be met and may include:

AED

First aid kit

Auto-injector

Puffer/inhaler

Resuscitation mask or barrier

Spacer device

Communication media and equipment may include but are not limited to:

Telephones, including landline, mobile and satellite phones

HF/VHF radio

Flags

Flares

Two way radio

Email

Electronic equipment

Hand signals

Appropriate clinical expert may include:

Supervisor/manager

Ambulance officer/paramedic

Other medical/health worker

Documentation may include:

Injury report forms

Workplace documents as per organisation requirements

Documentation may include recording:

Time

Location

Description of injury

First aid management

Fluid intake/output, including fluid loss via:

blood

vomit

faeces

urine

Administration of medication including:

time

date

person administering

dose

Vital signs

Unit Sector(s)

MSACMG701A Prepare for and implement change

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the establishment of the preconditions for the implementation of a change such as a 'step change' or a change resulting from a problem solving exercise such as a kaizen blitz. The unit can be applied to sub sections of an enterprise such as a team, area or department, or in the case of a small or medium sized manufacturer, to the whole enterprise.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It applies to individuals who are already familiar with change leadership in a competitive manufacturing environment through either previous study or industry experience. Where this is not the case MSACMC410A Lead change in a manufacturing environment may be completed to supply the necessary skills.</p> <p>Skills covered by this unit are applied in an organisation after a desired change has already been identified. This unit may also be applied in service organisations applying competitive manufacturing principles.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the change	1.1. Determine the purpose of the change 1.2. Identify key change project personnel 1.3. Record the current state that the change is addressing 1.4. Develop a consensus view of the intended future state including indicators of a successful change 1.5. Develop an agreed statement of the solution 1.6. Identify the health, safety and environment (HSE) impacts of the change 1.7. Determine the scope of the change project including taking into account the impact of the solution on any codes of practice, standards, contracts, commercial or industrial agreements 1.8. Obtain sign off from key change project personnel
2. Identify personnel required to implement the change and their roles	2.1. Develop a high level change network map 2.2. Identify employees, suppliers or customers who may be required to implement the change 2.3. Identify other demands on these people during the change 2.4. Investigate priorities, synergies and conflicts 2.5. Take appropriate action to resolve conflicts
3. Assess and manage the change related risks	3.1. Identify organisational capacity for the change including available resources and ability to absorb any disruption during the change 3.2. Clarify specific risk dimensions for this change 3.3. Develop appropriate transition approach
4. Build high level change plans	4.1. Develop high level involvement plan 4.2. Develop high level communication plan to all stakeholders 4.3. Develop high level competency development plan for all implementers 4.4. Develop high level alignment plan
5. Implement and sustain the change	5.1. Implement change plans 5.2. Check change objectives have been met 5.3. Transfer ownership of post change operations from change agents where relevant 5.4. Ensure support structures are in place 5.5. Check alignments have been obtained

ELEMENT	PERFORMANCE CRITERIA
	5.6. Check competencies have been developed and will be maintained 5.7. Ensure base line is defined for continuous improvement 5.8. Review project and capture learning from the project 5.9. Take action to sustain improvement by standardising

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<ul style="list-style-type: none"> • decision making • communication at all levels • situation analysis
Required knowledge
<ul style="list-style-type: none"> • competitive manufacturing principles • change management • workplace strategy and vision • methods of determining competency gaps • project planning and management

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Demonstrates skills and knowledge required to:</p> <ul style="list-style-type: none"> • prepare for and deliver change. <p>In particular look for evidence of:</p> <ul style="list-style-type: none"> • communication with all stakeholders • development of consensus • development and implementation of plans.
Context of and specific resources for assessment	<p>Assessment may occur on the job or in an appropriately simulated environment. Access is required to real or appropriately simulated situations, including work areas, materials and equipment, and to information on workplace practices and OHS practices.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p>
Method of assessment	<ul style="list-style-type: none"> • Assessment must satisfy the endorsed assessment guidelines of the Manufacturing Training Package. • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge. • Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure its correct interpretation and application. • Assessment may be applied under project related conditions (real or simulated) and require evidence of process. • Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the

EVIDENCE GUIDE	
	<p>particular circumstance, but is able to be transferred to other circumstances.</p> <ul style="list-style-type: none">• Assessment may be in conjunction with assessment of other units of competency where required.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Change project personnel	<p>Change project personnel include:</p> <ul style="list-style-type: none"> the decision makers who determine if the proposed change may proceed and the key managers and implementers of the change
Current state	<p>The current state is ideally defined by existing data. Where this is not available suitable proxies should be sought</p>
Codes of practice/standards	<p>Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used</p>
Health, safety and environment (HSE)	<p>All changes implemented should be at least neutral, or preferably beneficial, in their impact on health, safety and environment</p>
High level change network	<p>High level change network includes groups involved in the change and who need to be committed to the change and include:</p> <ul style="list-style-type: none"> sponsors cascading change sponsors targets agents advocates enablers impeders
Organisation	<p>Organisation includes:</p> <ul style="list-style-type: none"> any part of a manufacturing or service organisation companies, government bodies or other body of people aiming to produce a product to service a customer
Key change project personnel	<p>Key change project personnel include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • project sponsors • cascading sponsors • relevant managers • change agents
Sponsor	<p>Project sponsors include:</p> <ul style="list-style-type: none"> • those people who proposed the project and are its main supporters
Cascading sponsor	<p>A cascading sponsor refers to:</p> <ul style="list-style-type: none"> • a person who reports to a sponsor and so may be contributing on their behalf <p>A cascading sponsor works with delegated authority and responsibility</p>
Risks	<p>Risks include:</p> <ul style="list-style-type: none"> • business risks for example over spending • market risk, for example, loss of market share • HSE risks • relationship risks, for example, to shareholders, employees, suppliers, customers or the community
Organisation capacity	<p>Organisation capacity includes:</p> <ul style="list-style-type: none"> • organisation history of implementing change • capability in change implementation • adaptability of people to change • demand for the change in the part of the organisation
Risk dimensions	<p>Specific risk dimensions include:</p> <ul style="list-style-type: none"> • impact of the solution - its potential for disruption to production, quality, delivery and budgets • readiness of people to accept the change including readiness to accept changes in role and responsibilities • availability of resources including financial, plant and equipment, and dedicated personnel
Transition approach	<p>Transition approach will depend on the nature of the risks determined and will include:</p> <ul style="list-style-type: none"> • transition style (top down/pilot/process

RANGE STATEMENT	
	<p>focused/ delegated change)</p> <ul style="list-style-type: none"> • degree of sponsorship to be cascaded • balance of engagement/involvement • internal and/or external resources • use of change to build organisation capacity
High level involvement plans	<p>High level involvement plans aim to create ownership by involving groups in specific activities within defined constraints of:</p> <ul style="list-style-type: none"> • objectives for involvement • decision parameters and • timing of involvement <p>The specific activities include:</p> <ul style="list-style-type: none"> • problem/opportunity identification • solution design • implementation/transition planning • solution building • solution testing • solution piloting • training design • training delivery • communication roll out • solution roll out
Alignment plan	<p>Alignment plan ensures alignment and sustainability between:</p> <ul style="list-style-type: none"> • policies, processes and procedures • incentives and rewards (key performance indicators (KPIs) and intended outcomes) • consequences and penalties for non-compliance • preventing pre-change behaviours and patterns recurring
Sustaining improvement	<p>Improvement may be sustained by including it in:</p> <ul style="list-style-type: none"> • standard procedures and work instructions • standard practice • other relevant documents and practices
Team leader	<p>Team leader may include:</p> <ul style="list-style-type: none"> • any person who may have either a permanent or an ad hoc role in facilitating the function of

Co-requisite units

Co-requisite units		

MSACMG706A Build relationships between teams in a manufacturing environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the development of an attitude of respect for individuals in teams and trust between individuals, teams, supervisors and management in order to develop a suitable culture for implementing and sustaining competitive manufacturing initiatives.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It builds on more general competitive manufacturing graduate units and specifically addresses inter-team issues. The unit also encompasses intra-team issues where these are a barrier. The unit envisages a specialist facilitation role in assisting with implementing an enterprise competitive manufacturing culture.</p> <p>It is also about developing a 'whole of value chain' view so that there is not competition between individuals or teams, but rather cooperation to achieve organisation and value stream goals with competition being directed towards other organisations competing in the marketplace.</p> <p>This unit may also be applied to service organisations applying competitive manufacturing principles.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify organisational relationships	1.1. Map actual and intended process flows within and between teams 1.2. Map actual and intended communication/information/data flows within and between teams 1.3. Identify and map other interactions (actual and intended) within and between teams 1.4. Determine the consequences in terms of customer benefit of intended flows/interactions 1.5. Determine the consequences in terms of customer benefit of the actual flows/interactions
2. Foster cooperation within team	2.1. Present relationships information to team members 2.2. Discuss areas where greater cooperation would yield benefits 2.3. Agree on ways to achieve greater cooperation in these areas 2.4. Facilitate team implementation of agreed changes
3. Foster cooperation between teams	3.1. Present relationships information to teams/team representatives 3.2. Discuss areas where greater cooperation would yield benefits 3.3. Agree on ways to achieve greater cooperation in these areas 3.4. Obtain any necessary approvals for proposed changes 3.5. Facilitate implementation by teams of agreed changes
4. Identify sources of tension, conflict or competition	4.1. Examine team and individual key performance indicators (KPIs) for sources of conflict/competition 4.2. Examine flows and interactions for possible sources of conflict and competition 4.3. Observe interactions between team members and identify tensions, conflicts and competition 4.4. Observe interactions between teams and identify tensions, conflicts and competition 4.5. Observe response to change and resistance to change
5. Reduce causes of tension, conflict or competition	5.1. Draft modified KPIs to reduce causes of conflict and competition 5.2. Draft modified systems causing conflicting flows and interactions

ELEMENT	PERFORMANCE CRITERIA
	5.3. Facilitate discussions within and between teams to identify causes of tensions, conflicts and competition 5.4. Facilitate discussions to develop a consensus solution to identified causes of tensions, conflicts and competition 5.5. Obtain any required approvals for suggested/drafted changes 5.6. Facilitate the implementation of the agreed solutions 5.7. Take actions to ensure agreed changes become standard practice

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- decision making
- communication at all levels
- negotiation
- conflict resolution
- situation analysis

Required knowledge

- competitive manufacturing principles
- organisational goals and processes
- types of KPIs, their applications and limits
- continuous improvement
- communication methods
- process mapping, communication and people interaction mapping
- customer perception of benefits

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Demonstrates skills and knowledge required to:</p> <ul style="list-style-type: none"> critically examine relationships within and between teams and to take action to improve them. <p>In particular look for evidence of:</p> <ul style="list-style-type: none"> identification of relationships/relationship maps identification of sources of conflict/tension consensus development of improvement plans implementation of those plans and a rechecking of the subsequent relationships.
Context of and specific resources for assessment	<p>Assessment may occur on the job or in an appropriately simulated environment. Access is required to real or appropriately simulated situations, including work areas, materials and equipment, and to information on workplace practices and OHS practices.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p>
Method of assessment	<ul style="list-style-type: none"> Assessment must satisfy the endorsed assessment guidelines of the Manufacturing Training Package. Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge. Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure its correct interpretation and application. Assessment may be applied under project related conditions (real or simulated) and require evidence of

EVIDENCE GUIDE	
	<p>process.</p> <ul style="list-style-type: none">• Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.• Assessment may be in conjunction with assessment of other units of competency where required.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice/standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used
Health, safety and environment (HSE)	All changes implemented are expected to be at least neutral, or preferably beneficial in their impact on health, safety and environment
Relationship between organisational teams	<p>Organisational teams may include:</p> <ul style="list-style-type: none"> • downstream customer teams • upstream supplier teams • support teams (maintenance, IT) <p>Relationship between teams includes:</p> <ul style="list-style-type: none"> • the impact of teams on each others' work expressed in competitive manufacturing terms <p>Impacts covered could include:</p> <ul style="list-style-type: none"> • supplier, customer and support team impacts on: <ul style="list-style-type: none"> • flow • pull • takt time • waste
Cooperation within teams	<p>Cooperation within team may include:</p> <ul style="list-style-type: none"> • assistance with problem solving • dealing with disruptions to flow • dealing with variations of flow level/volume • dealing with variations in quality/quantity/timeliness
Key performance indicators (KPIs)	<p>KPIs may include:</p> <ul style="list-style-type: none"> • reward systems • systems (formal and informal) which

RANGE STATEMENT	
	encourage some types of behaviour over others
Resistance to change	Resistance to change may be: <ul style="list-style-type: none"> overt or covert
Stakeholders	Stakeholders include: <ul style="list-style-type: none"> work team members, value chain members as well as other stakeholders
Team leader	Team leader may include: <ul style="list-style-type: none"> any person who may have either a permanent or an ad hoc role in facilitating the function of a team in a workplace

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a shared future state model	1.1. Establish an appropriate representative team 1.2. Analyse a value chain map of an appropriate section of the value chain 1.3. Determine the current state of practice across the value chain 1.4. Identify overall organisation strategy, direction and competitive manufacturing philosophy 1.5. Validate view with process/system owner
2. Develop and review a collaborative best practice model	2.1. Develop a future state model of practice 2.2. Review model with process/system owners and other stakeholders across the value chain as appropriate 2.3. Modify model to deliver better results for the customer and reduce wastes 2.4. Develop implementation plan in consultation with stakeholders
3. Provide the resources necessary to move to the future state	3.1. Identify changes required to infrastructure 3.2. Determine benefit/cost for required changes 3.3. Prioritise required changes 3.4. Obtain required authorisations 3.5. Facilitate the provision of resources needed to implement plan
4. Review future state model	4.1. Manage the implementation of improvements 4.2. Identify measures of progress towards agreed future state 4.3. Review progress towards future state 4.4. Agree methods of improving areas which could progress better 4.5. Agree on methods for evaluating future state 4.6. Validate measures and methods with relevant managers

Co-requisite units		

MSL904001A Perform standard calibrations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare items for calibration	1.1. Select the authorised calibration procedure in accordance with enterprise procedures 1.2. Identify hazards and use appropriate personal protective equipment, safety equipment and procedures 1.3. Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure 1.4. Assemble and set up specified reference standards and associated equipment prior to testing 1.5. Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary 1.6. Identify and minimise potential sources of measurement error
2. Perform calibration	2.1. Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement 2.2. Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment) 2.3. Adjust device under test to bring readings within specification and record data (as-left or after adjustment) if required 2.4. Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results 2.5. Seek appropriate advice when interpretation of results is outside authorised scope of approval
3. Document results	3.1. Document compliance/non-compliance with requirements of test and/or specifications 3.2. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 3.3. Record the results of each test/calibration accurately, unambiguously and objectively 3.4. Ensure confidentiality of enterprise information
4. Finalise calibration	4.1. Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required 4.2. Report any non-compliance and verify next course of

ELEMENT	PERFORMANCE CRITERIA
	action with supervisor 4.3. Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in enterprise procedures 4.4. Store test equipment/measurement standards and results in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- selecting and applying appropriate test methods and calibration procedures
- maintaining close attention to procedures, accuracy and precision of measurement to ensure the integrity of test/calibration results
- using calibration and correction charts
- calculating to give results in appropriate accuracy, precision and units
- preparing test/calibration documentation that is accurate and complies with requirements
- operating equipment correctly and safely
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and report opportunities for improvements to procedures

Required knowledge

Required knowledge includes:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures, and applications
- National Association of Testing Authority's (NATA) and National Measurements Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- methods for statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement (may include the use of software)
- reporting procedures and legislative requirements
- handling, transport, storage and operation of reference and working standards
- laboratory environmental control requirements
- relevant health, safety and environmental requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services for the enterprise and customers

REQUIRED SKILLS AND KNOWLEDGE

Specific calibration fields

Additional knowledge requirements may apply for different calibration fields. For example, testing and calibrations conducted in the following:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • maintain very close attention to procedures, accuracy and precision of measurement to ensure integrity of test/calibration results (especially during lengthy tests) • critically examine each calibration step to ensure repeatability and validity of data • apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the services or data provided • prepare test/calibration documentation that is accurate and complies with requirements • operate equipment correctly and safely • recognise problems or departures in systems and documentation and initiate actions to prevent or minimise them • recognise and report opportunities for improvements to procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001 Process and interpret data</i> • <i>relevant MSL974000 series unit of competency</i> • <i>relevant MSL975000 series unit of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • specialised calibration/test equipment, reference standards and laboratory facilities • access to a library of calibration methods, procedures and equipment specifications • enterprise quality manual and procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of calibration results, uncertainty calculations and workplace documentation completed by the

EVIDENCE GUIDE

	<p>candidate</p> <ul style="list-style-type: none"> • feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate • observation of the candidate performing standard calibrations • oral or written questioning to check underpinning knowledge of standard calibration procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Background</p> <p>Calibration work may be simple or highly complex depending upon the type of equipment being calibrated and the accuracy or uncertainties required. Manual calibrations may involve interconnecting equipment and setting the stimulus devices to the settings listed in the procedure. At each setting, the technician must verify that the response or output of the unit under test (UUT) is within the tolerances specified in the procedure. In addition, many procedures require that 'as-found' (before adjustment) and 'as-left' (after adjustment) results are recorded for maintaining the UUT documentation history.</p> <p>Often calibration technicians must assess and document the total uncertainties for a given measurement by analysing equipment specifications and methodology</p>

EVIDENCE GUIDE

during calibration. They have to interpret specifications and technical information and demonstrate initiative when adjusting and repairing instruments.

The calibration technician's workload can be routine and repetitive. A perpetual backlog of work and the constant need to reduce turn-around-time to meet client demands, coupled with enterprise productivity goals, can induce stress and mental fatigue if not carefully managed.

However, it is essential that all personnel are able to perform tests and associated work tasks without undue pressure that might influence technical judgement if 'integrity of measurement' is to be retained. Errors arising from items incorrectly calibrated will, at best, have to be recalled which wastes time, resources and destabilises enterprise credibility. At worst, if undetected, they may have severe safety implications to personnel or equipment, depending on the nature of the item.

Calibration (1)

A customer delivers a test pressure gauge and requires certification that the gauge conforms to manufacturer's specifications. Personnel in the item reception area log the job and the laboratory supervisor assigns it to a calibration technician. He/she reads the work order and retrieves the approved calibration procedure. The procedure requires the customer's gauge to be tested to 1000 kPa using a hydraulic test station. The technician assembles the required apparatus and personal protective equipment. The gauge is visually inspected for defects and contamination. The temperature of the environment is checked and the hydraulic test station confirmed as fully operational. The required pressures are applied to the gauge and the indicated readings are transcribed onto the test report. The technician notes that some readings are outside the allowable tolerance and adjustments will have to be made. He/she takes another set of readings after making the necessary adjustments and records them on the report. The technician applies the required labels to the gauge, updates the database, produces a test report and places the item on the quality assurance bench for inspection by the supervisor. The supervisor visually inspects the item and checks the readings on the report. The job has taken two hours to complete.

Calibration (2)

A client has asked the laboratory to calibrate a spectrum

EVIDENCE GUIDE

analyser to manufacturer's specification. The supervisor assigns the job to a calibration technician who reads the job sheet and locates the appropriate calibration procedure. Although this spectrum analyser will be calibrated partly with the aid of automated technology, the technician estimates that the calibration will still take about nine hours to complete. The technician reads the procedure and assembles the equipment and allows for the required warm-up time for instrument stabilisation. Possible sources of error are minimised by cleaning connectors and tensioning them with the torque spanner. The technician performs the manual phase of the test and manually records 12 pages of results. The equipment is reconnected for the automated part of the procedure the test recommenced. The technician produces a further six pages of results. These are assessed for errors and non-conformances and all calculations are carefully checked. A final report is produced which accompanies the spectrum analyser to the quality assurance bench for checking by the supervisor. All cables and equipment used for the calibration are returned to the store.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise procedures may include:

- Australian and international standards, such as:
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS ISO 9001:2008 Quality management systems - Requirements
 - AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans
 - AS/NZS ISO 10012:2004 Quality assurance requirements for measurement equipment
 - ISO 5725 Accuracy (trueness and precision) of measurement methods and results
 - ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- material safety data sheets (MSDS)
- enterprise recording and reporting procedures and standard operating procedures (SOPs)
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures

RANGE STATEMENT	
	<p>published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers</p> <ul style="list-style-type: none"> • incident and accident/injury reports • schematics, work flows, laboratory layouts and production and laboratory schedules
Standard calibrations	<p>Standard calibrations may include testing and/or calibrating the following equipment and reference materials using standard methods and procedures:</p> <ul style="list-style-type: none"> • test equipment, such as anemometers, balances, barometers, calipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments • electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references • working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • electric shock • disturbance or interruption of services

RANGE STATEMENT	
	<ul style="list-style-type: none"> • manual handling of heavy equipment boxes • sources of electromagnetic radiation (lasers and RF generators/transmitters) • fluids under pressure • heat sources, such as ovens
Safety procedures	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> • use of personal protective equipment, such as hearing protection, gloves, safety glasses and coveralls • ensuring access to service shut-off points • handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning of equipment and work areas
Reference materials	<p>Reference materials may include:</p> <ul style="list-style-type: none"> • colour standards • graded granular materials • hardness blocks
Communication	<p>Communication may be with:</p> <ul style="list-style-type: none"> • supervisors and managers (laboratory, quality and customer service) • peers and other laboratory or relevant technical personnel • clients and end users of equipment • external auditors, or accreditation agency for example, NATA • manufacturers of equipment and suppliers of spare parts and materials
Working environment	<p>The working environment will have a controlled environment but may include:</p> <ul style="list-style-type: none"> • purpose-built designed facility • mobile facility in the field
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these

RANGE STATEMENT	
	<p>requirements must not be compromised at any time</p> <ul style="list-style-type: none"> • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret brief and design feasible project plan	1.1. Interpret and confirm project objectives, deliverables, constraints and principal work activities 1.2. Determine resource requirements, including personnel, equipment and materials 1.3. Develop a detailed implementation plan for the project outlining methodology, milestones and budget 1.4. Identify roles and responsibilities of project team members 1.5. Analyse quality requirements to ensure compliance with quality standards 1.6. Develop risk management strategies and risk management plans to ensure successful and timely outcomes
2. Establish and implement project plan	2.1. Brief team members about the project and allocate roles and responsibilities, balancing job roles and skills development opportunities 2.2. Establish communication and reporting mechanisms 2.3. Implement agreed time management strategies to ensure milestones are met 2.4. Apply agreed quality requirements to measure performance and outcomes
3. Manage project	3.1. Monitor and report progress of activities in relation to the project plan 3.2. Ensure income and expenditure is in line with the agreed project plan and budget 3.3. Work with the team to analyse and diagnose problems and to determine corrective actions 3.4. Implement agreed variations to the plan to accommodate changing situations 3.5. Maintain accurate records and communication with stakeholders and project team members
4. Finalise project	4.1. Ensure project objectives are met and deliverables are provided on time and within budget 4.2. Complete all reporting requirements
5. Evaluate project methodology	5.1. Assess the effectiveness of resource management in delivering project outcomes 5.2. Evaluate the effectiveness of communication processes used throughout the project

ELEMENT	PERFORMANCE CRITERIA
	5.3.Recommend improvements for future projects

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- analysing a complex technical brief and preparing a feasible project implementation plan
- establishing a project team and implementing a project in response
- reaching milestones within budget
- consulting and communicating effectively to ensure the project outcomes are achieved
- maintaining accurate records and documentation in accordance with the enterprise procedures
- selecting and establishing operational systems for the project
- planning work activities, resources and finances to ensure the project outcomes are achieved within the timeframe and budget constraints
- monitoring and evaluating the progress of the project

Required knowledge

Required knowledge includes:

- purpose and methods of planning
- techniques for monitoring timelines, expenditure and team performance
- techniques for achieving effective communication and cooperation
- techniques for troubleshooting, problem solving and conflict resolution
- reporting requirements
- techniques for evaluation and continuous improvements
- relevant health, safety and environment requirements
- laboratory's business goals and key performance indicators

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • analyse a complex technical brief and prepare a feasible project implementation plan • establish a project team and implement a project in response • reach milestones within budget • consult and communicate effectively to ensure project outcomes are achieved • maintain accurate records and documentation in accordance with enterprise procedures • select and establish operational systems for the project • plan work activities, resources and finances to ensure project outcomes are achieved within the timeframe and budget constraints • monitor and evaluate the progress of the project.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL916002A Manage and develop teams</i> • <i>MSL936001A Maintain quality system and continuous improvement processes within work/functional area.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • procedures and documentation typically used by the enterprise • scheduling charts/strategic plans • GANTT charts • operational reports • financial plans • sample budgets.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of reports, operational budgets and project

EVIDENCE GUIDE

	<p>plans generated by the candidate</p> <ul style="list-style-type: none"> • review of project outcomes and customer satisfaction • questioning/interview to assess underpinning knowledge • feedback from project team and management • review of documented examples of quality performance improvements achieved and examples of significant problems solved • observation of the candidate's interaction with project team. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A cosmetics manufacturing company decided to upgrade the image of a product range which included lipsticks, nail lacquers, hair shampoos and conditioners. A technical specialist coordinated the project and organised input from marketing, development, quality assurance and production personnel. The production boundaries were defined through consultation with marketing and it was decided to update shades of shaded products and introduce natural ingredients wherever possible. The project had to be completed within a reasonably short timeframe and within a tight budget which placed overall constraints on the way the project could be handled. After developing and gaining approval for an</p>

EVIDENCE GUIDE

implementation plan, team members were briefed and development samples produced for approval. Product characteristics were checked and recommendations made for adjustments until each product met requirements. When pilot batch manufacture had been successfully completed, project development processes were fully documented and then passed to production to allow for efficient development of production batches.

Environmental

The quality team in a laboratory has set a goal of getting reports out more quickly and assigned the coordination of the project to one of the senior technical officers. The officer prepared an outline of the project, a timeframe, a resource list and budget. Specific tasks were allocated to members of the quality team according to their abilities and existing work commitments. The officer monitored the project's progress by tracking and adjusting elements as necessary. After the development of a final draft for the revised procedures, a draft project report was prepared for consideration by the quality team.

Food processing

A dairy company currently uses an imported cocoa-based product for the chocolate flavouring of their milk. Following a feasibility study of a range of ingredients, it was decided to investigate further an alternative source on the basis of cost. A technical specialist prepared a project plan that included required personnel, materials, equipment and a detailed GANTT chart. Key personnel from quality assurance, production, engineering, product development and marketing were chosen for the project team. The project was monitored to confirm progress, control expenditure and review the suitability of the alternative product source. At the end of the project, the technical specialist assessed the outcomes and prepared a detailed report that recommended the use of a local ingredient.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Complex projects	Complex projects may include: <ul style="list-style-type: none"> • development or modification of products and services • acquisition and commissioning of new equipment • commissioning of laboratory facilities • appraisal of supplies • development of applications for customers • validation of analytical methods and/or equipment • quality improvement or corrective action teams • restructuring of laboratory services • reclassification of staff and staffing levels
Records	Records may include: <ul style="list-style-type: none"> • lists of potential costs, invoices and payment records • project and/or enterprise files and records • reports to clients, personnel and higher management • risk management plans and log books • diaries, scheduling charts and other charts
Communication	Communication may include: <ul style="list-style-type: none"> • computer generated communication • customers, stakeholders, external authorities and project team • reports, briefs, minutes, letters, oral briefings, advice and conversations and telephone calls

RANGE STATEMENT	
Resources	Resources may include: <ul style="list-style-type: none"> • personnel • budget • equipment, materials and facilities • computer project planning programs
Occupational health and safety (OHS) and environmental management requirements	OHS and environmental management requirements: <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Record and check data	1.1. Enter data into laboratory information system or record sheets as directed 1.2. Check data to identify transcription errors or atypical entries 1.3. Rectify errors in data using enterprise procedures
2. Calculate simple scientific quantities	2.1. Calculate simple scientific quantities using given formulae and data 2.2. Ensure calculated quantities are consistent with estimations and expectations 2.3. Report all calculated quantities with appropriate precision and units
3. Present data in tables, charts and graphs	3.1. Present data accurately in tables and charts using given formats and scales 3.2. Recognise and report obvious features and trends in data
4. Store and retrieve data	4.1. File and store data in accordance with enterprise procedures 4.2. Maintain enterprise confidentiality standards

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing simple calculations
- preparing and interpreting straightforward tables, graphs and charts
- applying calculations in the workplace
- coding, recording and checking data accurately
- presenting accurate results in the required format
- recognising obvious trends in data
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- conversion of units involving multiples and submultiples
- significant figures, estimation, approximation, rounding off
- substitution of data in formulae
- calculations involving fractions, decimals, proportions and percentages
- procedures for maintaining and filing records, security of data

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • accurately code, check and record data in the required format • calculate simple scientific quantities • recognise obvious trends in data • maintain the confidentiality of data.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit may be assessed with technical units, such as:</p> <ul style="list-style-type: none"> • <i>MSL973001A Perform basic tests</i> • <i>MSL973002A Prepare working solutions</i> • <i>MSL973007A Perform microscopic examination.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • computer and relevant software or laboratory information system • relevant enterprise procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of data worksheets, calculations, graphs and tables prepared by the candidate • review of records transcribed, maintained or stored by the candidate • feedback from supervisors and peers • observation of the candidate as they record data and perform calculations • questions to assess understanding of relevant procedures and trends in data. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made</p>

EVIDENCE GUIDE

	<p>to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Construction materials</p> <p>A laboratory assistant is given 20 soil samples and asked to test their moisture content by weighing each sample, placing them in an oven for 24 hours and then reweighing them. The assistant performs the tests in accordance with the standard method and then calculates the % water content by dividing the weight loss by the wet weight and multiplying by 100. He/she checks the results. After entering them into the laboratory information management system (LIMS), they notice that they are consistently less than the previous results recorded for soils at the same site. The assistant reports the discrepancy to the supervisor who checks whether the oven was operated at the required temperature. The supervisor then discovers that the assistant has calculated the moisture content by dividing the weight loss by the wet weight instead of the dry weight. The assistant recalculates the moisture content for the 20 samples and notes that the results are now consistent with previous results.</p> <p>Manufacturing</p> <p>On Friday, a laboratory assistant performs the routine set of temperature, pressure and humidity measurements at 10 sites in a refinery. They enter the data on a pre-prepared data sheet that also contains the data recorded for the previous days of that week. The assistant checks the data for any significant variations to that recorded previously. They notice that for site #5, the temperature reading is 250(C which is 100(C below the expected value. The assistant repeats the measurement</p>

EVIDENCE GUIDE

and gets the same result. After returning to the laboratory, the assistant enters the data into the LIMS and reports the odd result to their supervisor. The supervisor contacts the site manager and finds out that the pipeline at site #5 has been isolated as part of unscheduled maintenance in that part of the site.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards such as: <ul style="list-style-type: none"> • AS ISO 1000-1998 The international system of units (SI) and its application • national measurement regulations and guidelines
Concepts of metrology	<p>Concepts of metrology may include:</p> <ul style="list-style-type: none"> • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Data	<p>Data may be recorded on:</p> <ul style="list-style-type: none"> • worksheets • spreadsheets or databases linked to information management systems <p>Data may include results of:</p> <ul style="list-style-type: none"> • observations • tests and measurements • surveys <p>Data may be presented in the form of:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • graphs • tables • control charts • semi-quantitative observations expressed on a scale (for example, 1 to 4 or + to ++++)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Retrieve and check data	1.1. Store and retrieve data using appropriate files and/or application software 1.2. Verify the quality of data using enterprise procedures 1.3. Rectify errors in data using enterprise procedures
2. Calculate scientific quantities	2.1. Calculate statistical values for given data 2.2. Calculate scientific quantities using given formulae and data and estimate uncertainties 2.3. Ensure calculated quantities are consistent with estimations and expectations 2.4. Report all calculated quantities using the appropriate units and correct number of significant figures
3. Present data in tables, charts and graphs	3.1. Present data in clearly labelled tables and charts 3.2. Graph data using appropriate scales to span the range of data or display trends 3.3. Report all data using the appropriate units and number of significant figures
4. Interpret data in tables, charts and graphs	4.1. Interpret significant features of graphs, such as gradients, intercepts, maximum and minimum values, and limit lines 4.2. Recognise and report trends in data
5. Keep accurate records and maintain confidentiality	5.1. Transcribe information accurately 5.2. Verify the accuracy of records following enterprise procedures 5.3. File and store workplace records in accordance with enterprise procedures 5.4. File all reference documents logically and keep them up-to-date and secured 5.5. Observe enterprise confidentiality standards

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing calculations of scientific quantities
- using scientific notation
- applying the concepts of metrology
- applying calculations to the workplace
- coding, recording and checking of data accurately
- presenting accurate results in the required format
- preparing graphs, tables and charts (pie, bar, histogram) and interpreting trends
- preparing and interpreting process control charts
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology
- uncertainty associated with measurement steps
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- converting units involving multiples and submultiples
- significant figures, rounding off, estimating, approximating
- transposing and evaluating formulae
- calculations involving fractions, decimals, proportions and percent
- determining statistical values of data such as mean, median, mode and standard deviation
- procedures for maintaining and filing records, and maintaining security of data

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • code, record and check the documentation of data • calculate scientific and statistical quantities relevant to the workplace and present accurate results in the required format • recognise anomalies and trends in data • maintain the confidentiality of data in accordance with workplace and regulatory requirements • keep records up-to-date and secure.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924002A Use laboratory application software</i> • technical units, such as: <ul style="list-style-type: none"> • <i>relevant MSL973000 series units of competency</i> • <i>relevant MSL974000 series units of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of data worksheets, calculations, computer files (such as spreadsheets, databases, statistical analysis), graphs, tables and/or charts prepared by the candidate • review of records transcribed, maintained or stored by the candidate • feedback from supervisors and peers • questions to assess understanding of relevant procedures and trends in data • observation of the candidate as they process data, file

EVIDENCE GUIDE

	<p>and store records.</p> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A laboratory assistant in a materials testing laboratory was performing routine tensile tests on samples of vinyl sheet. The assistant converted the readings from the machine to appropriate units using a simple calculation and recorded them in the logbook for that test method. After comparing these test results with previous results for the same type of vinyl material, the assistant found that the tensile strength was within the required range. However, it was at the lower rather than the upper end of the range as in previous testing. The assistant discussed the results with the laboratory supervisor. The calibration file for that machine showed that it had been calibrated four months previously and had not needed adjustment. Test results for the same period showed that the machine was giving lower than normal tensile strength readings for the few higher strength materials tested over the last two months. The assistant did some more checks and confirmed this trend. The machine was re-calibrated by the instrument company and the frequency of internal calibration checks by the laboratory assistant was increased. This problem would not have been detected or corrected as quickly without the assistant's initiative and competent recording and retrieval of test results and</p>

EVIDENCE GUIDE

calibration information.

Biomedical

A technical assistant works in a team with laboratory scientists and technical officers. Analyses of electrolytes are routine and occur in large volume throughput even in this small diagnostic laboratory. The assistant is assigned tasks that contribute to the overall production of results, their reporting and the quality control evaluation of the results. One task is the daily collection of the electrolyte analyses from the internal quality control area. In this case, the technical assistant plots the results on a Levy-Jennings graph and computes the mean value. The assistant reports immediately to the supervisor if the plots show deviations which indicate out-of-control results.

Food processing

Cooking and holding temperatures greatly affect the nutrient composition of processed foods. The CSIRO provides documentation of nutrient losses with temperature variations. For cooked foods, there is the added problem of microbial growth in the so called 'danger zone'. In one laboratory, the technical assistant conducts simple testing of foods using a temperature probe and also measures the temperature of the storage areas, holding trays or bainmaries and individual tray units. Careful documentation of the temperatures of the foods and times of measurement must be kept. The technical assistant supplies the data as tables and a plot of temperature versus time. For quality control purposes, the assistant is directed to use a cross reference of mercury thermometer readings versus probe measurements for ambient temperature. The assistant plots the thermometer readings against the probe readings and reports to the supervisor if the plot shows a slope other than the defined value.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform scientific calculations	1.1. Ensure raw data are consistent with expectations and reasonable ranges 1.2. Calculate scientific quantities involving algebraic, power, exponential and/or logarithmic functions 1.3. Ensure calculated quantities are consistent with estimations 1.4. Present results using the appropriate units, uncertainties and number of significant figures
2. Analyse trends and relationships in data	2.1. Determine linear and non-linear relationships between sets of data 2.2. Prepare and analyse control charts to determine if a process is in control 2.3. Identify possible causes for out-of-control condition 2.4. Follow enterprise procedures to return process to in-control operation
3. Determine variation and/or uncertainty in data distributions	3.1. Organise raw data into appropriate frequency distributions 3.2. Calculate means, medians, modes, ranges and standard deviations for ungrouped and grouped data 3.3. Interpret frequency distributions to determine the characteristics of the sample or population 3.4. Calculate standard deviations and confidence limits for means and replicates 3.5. Estimate the uncertainty in measurements using statistical analysis 3.6. Determine data acceptability using statistical tests and enterprise procedures
4. Check for aberrant results	4.1. Identify results that cannot be reconciled with sample, sample documentation, testing procedures and/or expected outcomes 4.2. Determine appropriate actions in consultation with supervisor as required
5. Report results	5.1. Use charts, tables and graphs to present results in the required format 5.2. Verify that entry of data and results are correct 5.3. Prepare reports in a format and style consistent with their intended use and enterprise guidelines 5.4. Communicate results within the specified time and in accordance with enterprise confidentiality and

ELEMENT	PERFORMANCE CRITERIA
	security guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing laboratory computations
- calculating scientific quantities
- statistical analysis
- graphical analysis
- reporting results in the required formats and expected timeframe
- storing, retrieving and manipulating data following document traceability procedures
- maintaining the security and confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- relevant scientific and technical terminology such as: variables, dispersion, central tendency, process control, process stability, normal distribution, confidence level and replication
- calculations involving evaluation of formulae containing algebraic, power, exponential and/or logarithmic functions
- preparation and interpretation on linear and non-linear graphs, complex control charts and frequency distribution plots
- determination of regression line equations, correlation coefficients
- statistical analysis and significance tests, such as t-test, f-test, analysis of variance (ANOVA)
- data acceptability tests, such as Q, T and Youden
- the characteristics of a valid measurement
- relevance/importance of the national measurement legislation and guidelines to laboratory measurement
- sources and estimates of uncertainty in measurements
- procedures for data traceability
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and maintaining security of data

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • store, retrieve and manipulate data following document traceability procedures • calculate scientific quantities relevant to their work and present accurate results in the required format • analyse data to determine relationships between variables • prepare frequency distributions for given data, calculate and interpret measures of central tendency and dispersion • prepare and interpret control charts and take appropriate actions • maintain the security and confidentiality of data in accordance with workplace and regulatory requirements • report results in the required formats and expected timeframe.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924002A Use laboratory application software</i> • technical units, such as: <ul style="list-style-type: none"> • <i>relevant MSL974000 series units of competency</i> • <i>relevant MSL975000 series units of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of data worksheets, calculations, computer files (such as spreadsheets, databases), statistical analysis, graphs and/or tables prepared by the

EVIDENCE GUIDE

	<p>candidate</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trends in data and sources of uncertainty • review of reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to analyse and report data in accordance with enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Before pharmaceutical products can be approved for use in Australia, they must be tested for shelflife in their Australian sales packs. The shelf life of a preparation is the time of storage which results in a preparation becoming unfit for use, either through chemical decomposition of the active substances or physical deterioration of the preparation. Stability profiles are determined by storing the preparation under a range of temperature conditions and evaluating it at predetermined time intervals. For example, a technical assistant may be required to evaluate the physical parameters of the new tablet to detect any changes in its appearance, hardness, friability, disintegration and dissolution profile. The assistant regularly assays the tablets using a stability indicating assay. The results are plotted and the information gained is used to predict the</p>

EVIDENCE GUIDE

period of time for which the tablets will meet the appropriate standards for physical characteristics, purity and potency when stored under defined conditions.

Biomedical

Supplementation of vitamins and minerals in the diet as a means to avert a clinical problem is a popular area of research, linking epidemiological and clinical investigation with food analyses. In the example of folate, such combined studies have led to the fortification of a number of foods and the requirement for folate supplementation for women of child bearing age. A typical project team would involve medical staff, a dietician and a scientific or technical officer to perform the assays. One possible line of study is to control the level of supplementation for the person and introduce the micronutrient in a dose form over and above that given in a controlled baseline diet. Blood samples would be collected and the serum micronutrient levels assayed. The technical officer would be responsible for keeping the statistical quality control data and analysing the assays. The technical officer would work with the research team to correlate the serum levels with the dose input. To contribute effectively, the technical officer must understand the significance of the relationships between collected test data and the controlled experimental variables.

Food processing

A state government analytical laboratory recently performed comparative assays of (-)-carotene using ultraviolet-visible (UV-VIS) spectrometric and high performance liquid chromatography (HPLC) techniques. In any procedure where the assay is to be replaced, side by side analyses must be performed on multiple samples and the correlations between the data compared statistically. The two procedures are then developed or modified for local laboratories and a routine procedure developed. At this point, technical officers would assay the samples by the two methods. They would ensure that all procedures were followed with close attention to quality control. Precision would be assessed through frequent assays of the same samples. Sensitivity of the assay would be assessed by performing the assay over a range of sample concentrations. The technical officers would carefully document the procedures and record all

EVIDENCE GUIDE	
	data for later validation. They may also provide preliminary graphical representations of data for their supervisor.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
 - ISO 5725 Accuracy (trueness and precision) of measurement methods and results
 - ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- national measurement regulations and guidelines
- National Association of Testing Authorities (NATA) Technical notes
- material safety data sheets (MSDS)
- equipment manuals and warranty, supplier catalogues and handbooks
- sampling and test procedures and standard operating procedures (SOPs)
- enterprise quality manual and customer quality plan
- validation of the equipment and associated software, where applicable
- validation of spreadsheets developed in-house for assay and process calculations

Data records

Data records may include:

- worksheets
- spreadsheets or databases linked to information

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean work preparation areas	1.1. Clean preparation areas using appropriate cleaning agents and equipment according to enterprise procedures 1.2. Remove spillages, if they occur, using appropriate agents, personal protective equipment and enterprise procedures 1.3. Collect and segregate wastes in accordance with enterprise procedures, relevant codes and regulations
2. Clean and store equipment	2.1. Collect used equipment, inspect for faults and, where necessary, remove from service 2.2. Use appropriate agents, apparatus and techniques to clean equipment 2.3. Store clean equipment in the designated locations and manner
3. Monitor stocks of materials and equipment	3.1. Perform stock checks and maintain records of usage as directed 3.2. Store labelled stocks for safe and efficient retrieval 3.3. Inform appropriate personnel of impending stock shortages to maintain continuity of supply
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other personnel 4.2. Report potential hazards and/or maintenance issues in own work area to designated personnel 4.3. Minimise the generation of wastes and environmental impacts 4.4. Dispose of wastes in accordance with enterprise procedures, relevant codes and regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- minimising the exposure to hazards of self, others and the laboratory
- safely storing equipment and materials using enterprise procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records
- reporting potential hazards and maintenance issues using enterprise procedures

Required knowledge

Required knowledge includes:

- enterprise procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- enterprise procedures for minimisation and disposal of waste
- enterprise procedures for monitoring of laboratory stocks
- information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow enterprise procedures, relevant codes and guidelines when maintaining the laboratory/field workplace • work safely and minimise exposure of hazards to self, others and the laboratory • keep accurate up-to-date records and report potential hazards and maintenance issues.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • access to work preparation areas, stocks, materials and equipment • cleaning, decontamination and/or disinfection agents and equipment • personal protective equipment • stock order forms, labels and records/forms.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal • review of stock records completed by the candidate • feedback from supervisors and peers • questioning to assess underpinning knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE	
	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>On receipt of a bulk container of cleaning or sanitising agent, a laboratory assistant always attached to the container a description of its method of use. The assistant also attached a list of the surfaces, apparatus, utensils and machines that could be safely treated with that chemical agent as outlined in the company's quality manual. This practice reduced the likelihood of misuse of the chemical, wastage, damage to equipment and inadequate cleaning and sanitation.</p> <p>Biomedical and environmental</p> <p>Laboratory assistants and technical officers routinely examine fluids for micro-organisms using a microscope. They examine fluids, such as urine, seawater, chlorinated pool water, water from catchment areas and bottled water. To maintain microscopes in working order, they thoroughly clean the stage, oculars and each objective after use and sometimes between samples. The 100X objective requires particular care since this is the oil immersion objective. The oil is slightly acidic and will slowly corrode the objective if it is not cleaned thoroughly and regularly. After using the 100X objective they also take care not to drag the other objectives through the oil.</p> <p>Food processing</p> <p>A laboratory assistant regularly uses standard pH</p>

EVIDENCE GUIDE

solutions to calibrate the laboratory's pH meters. The assistant is aware from the label that the shelf life of these solutions after opening is two months and records the opening and disposal dates on the container. The assistant is also aware that the shelf life of unopened buffer solutions is twelve months from the date of manufacture and monitors this by noting the production date on the bottle. Requests for stock replacement take into account the normal rate of use of these buffer solutions so that unopened bottles have not reached their expiry date before use.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 2252 Biological safety cabinets
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS 4332-2004 The storage and handling of gases in cylinders
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 1269 Set:2005 Occupational noise management set
 - AS/NZS 1337 Eye protection
 - AS/NZS 2161 Set:2008 Occupational protective gloves set
 - AS/NZS 2210:1994 Occupational protective footwear
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2243.8:2006 Safety in laboratories - Fume cupboards
 - AS/NZS 2865 Set:2005 Safe working in a confined space set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements

RANGE STATEMENT

- AS/NZS 4187:2003 Cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment, and maintenance of associated environments in health care facilities
- AS/NZS 4452:1997 The storage and handling of toxic substances
- AS/NZS 4501 Set:2008 Occupational clothing set
- AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform setup and pre-use checks of laboratory equipment	1.1. Perform laboratory equipment setup and pre-use checks in accordance with enterprise procedures 1.2. Perform safety checks in accordance with relevant enterprise and instrumental procedures 1.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 1.4. Complete instrument log books/records to meet enterprise requirements
2. Perform calibration checks	2.1. Start up equipment according to operating procedures 2.2. Use specified standards for calibration check 2.3. Check equipment as per calibration procedures and schedules 2.4. Record all calibration data accurately and legibly 2.5. Compare data with specifications and/or previous records to identify non-compliant equipment 2.6. Quarantine out of calibration equipment
3. Assist with equipment maintenance	3.1. Ensure all equipment work areas are clean during and after equipment use 3.2. Perform basic maintenance in accordance with enterprise procedures 3.3. Clean and store equipment according to enterprise and/or manufacturer's specifications/procedures 3.4. Identify and replace, repair or dispose of damaged/worn equipment as appropriate
4. Maintain records	4.1. Record and report information on unsafe or faulty equipment according to enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing setup, pre-use checks and shutdown procedures
- performing calibration checks of basic equipment using standard procedures
- obtaining readings of the required accuracy and precision
- identifying non-compliant equipment from specifications and/or previous checks
- recognising non-standard behaviour of instruments
- assisting with maintaining equipment in working order by performing basic maintenance tasks
- following all relevant occupational health and safety (OHS) requirements
- following enterprise recording and reporting procedures

Required knowledge

Required knowledge includes:

- operational principles and methods for equipment use
- basic sources of error in equipment operation and their control
- role and importance of correct calibration
- basic equipment maintenance procedures
- enterprise communication and reporting procedures
- relevant OHS and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • perform setup pre-use checks and shutdown procedures • perform calibration checks of basic equipment using standard procedures • obtain readings of the required accuracy and precision • recognise non-standard behaviour of instruments • assist with maintaining equipment in working order by performing basic maintenance tasks • follow all relevant OHS requirements • follow enterprise recording and reporting procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL973001A Perform basic tests.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment and reference materials • enterprise procedures and standard methods, equipment manuals • calibration check standards and procedures • maintenance procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of the quality of test data/results achieved by the candidate over time • inspection of records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate performing calibration checks and basic maintenance tasks <p>In all cases, practical assessment should be supported by</p>

EVIDENCE GUIDE	
	<p>questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing and construction materials testing</p> <p>Laboratory assistants perform calibration checks and operate a range of laboratory equipment to ensure the quality of products. For example, the labelling on fertilisers specifies the total percentage of nitrogen [N or N(t)], the total percentage of phosphorus [P or P(t)] in all forms and the total percentage of potassium [K]. A 5-10-5 fertiliser contains 5% N, 10% P and 5% K. During the manufacture of fertiliser, an assistant in a quality control laboratory measures the concentration of nitrogen, phosphorus and potassium using standard analytical methods to ensure that the final products are within prescribed specifications. The assistant must pay particular attention to the equipment calibration check. If the equipment is out of calibration no amount of testing skill will result in accurate results. Selling out of specification fertiliser could result in a product recall or claims from users against the manufacturer.</p> <p>Biomedical and environmental services</p> <p>Laboratory assistants are quite often involved in routine collections and culturing of cells. Bacterial cells are often cultured and grown to large populations in order to provide material from which to extract biological materials. A quick method of determining when the cell growth has yielded enough cells is to determine the</p>

EVIDENCE GUIDE

absorbance of the cell culture by measuring absorbance at 600 nm. An absorbance of 1 to 1.5 will give a good cell harvest. This method relies on the assistant being able to perform calibration checks on an ultraviolet-visible (UV-VIS) spectrometer.

Food and beverage processing

A laboratory assistant in the quality control laboratory of a fruit canning company is required to perform calibration checks and maintain and operate a range of equipment, including a pH meter. Canned pears, for example, are routinely checked for pH to ensure safe heat processing. While checking the calibration of the pH meter with the standard buffer solutions, the laboratory assistant found that stable pH readings could not be obtained. On closer inspection, it was found that the pH probe was damaged. This was reported to the supervisor. The probe was replaced and the meter was re-checked for calibration in readiness for routine testing.

Construction Materials Testing

A laboratory assistant has been allocated the task of performing in-house calibration checks on the laboratory's equipment. He/she has previously prepared a wall chart for the year that shows when the required calibration checks fall due in accordance with the NATA Field Application Document (FAD) for construction materials testing. The assistant consults the wall chart and notes that this month's calibration checks include checking the:

- ice points of the liquid-in-glass thermometers
- working sieves against the reference set
- compaction hammers for compliance with specifications
- repeatability of the balances.

A full calibration of one of the laboratory's nuclear density gauges is also required. He/she then telephones the local calibration authority to book the nuclear gauge in for calibration and prepares to perform the other in-house checks.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to Industry codes of practice and Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards such as: <ul style="list-style-type: none"> • AS/NZS 2243 Set:2006 Safety in laboratories set • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • Australian code of good manufacturing practice for medicinal products (GMP) • National Association of Testing Authorities (NATA) Field Application Documents (FADs) • calibration check and maintenance schedules • enterprise recording and reporting procedures • equipment manuals • equipment start up, operation and shutdown procedures • material safety data sheets (MSDS) • material, production and product specifications • national measurement regulations and guidelines • OHS national standards and codes of practice • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals • standard operating procedures (SOPs)
Typical equipment and instruments	<p>Typical equipment and instruments may include:</p> <ul style="list-style-type: none"> • balances, pipettes, burettes and volumetric glassware

RANGE STATEMENT	
	<ul style="list-style-type: none"> • colorimeters/spectrometers and polarimeters • compaction rammers and soil classification equipment • conductivity meters and pH meters • disintegration apparatus, thermometers, incubators and water baths • instrument chart recorders, penetrometers, force measuring equipment and tensiometer • melting point apparatus, viscometers and hardness testing equipment • mixing and separating equipment such as centrifuges, riffles and splitters, and mixers • noise meters and blasting meters • optical microscopes
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain and control stocks of materials or equipment	1.1. Label, document and store stocks in accordance with relevant standards and specific safety requirements 1.2. Follow stock rotation procedures to maximise use of stocks within permitted shelf life 1.3. Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level 1.4. Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate 1.5. Initiate quality control sampling and testing procedures when appropriate 1.6. Report stock problems outside own knowledge and authority limitations to relevant personnel
2. Order and receive materials and equipment	2.1. Determine requirements of customers and suppliers using appropriate communication and interpersonal skills 2.2. Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions 2.3. Place and/or follow up approved orders using enterprise systems and procedures 2.4. Check condition of received goods and take appropriate action
3. Maintain stock records	3.1. Record all relevant details accurately using the specified forms/computer system 3.2. Ensure that written information is legible and indelible 3.3. File all records in the designated place
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 4.2. Minimise the generation of wastes and environmental impacts 4.3. Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- maintaining and controlling stocks or materials and equipment
- ordering and receiving materials and equipment
- maintaining stock records
- maintaining a safe work environment

Required knowledge

Required knowledge includes:

- technical terminology relating to ordering and storage of stocks
- laboratory stock, product and service information
- types of chemical reactions and rationale for recommended storage systems
- enterprise procedures and quality system requirements for stock control
- codes of practice and regulations concerning the handling, storage and transport of the stock involved
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:

- confirm customer requirements with senior personnel where there is doubt
- access online databases and/or catalogues efficiently
- interpret labelling information (lot number, batch and date) and MSDS correctly
- apply procedures for safe handling, storage and transport of stocks
- use required safety and manual handling equipment and procedures
- perform quality controlsampling and testing and rotate stock in accordance with SOPs
- follow workplace procedures for predicting and/or determining demand for stock
- maintain stock at prescribed levels for their work area, through regular inspections, timely ordering of replacement items and followup of late orders
- cope with peak and seasonal variations in stock usage and production conditions
- follow workplace procedures for researching, ordering and receipt of stock
- complete and record all documentation accurately
- demonstrate effective and appropriate communication and interpersonal skills when dealing with customers and suppliers.

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- *MSL935004A Maintain instruments and equipment.*

Resources may include:

- stocks of materials and equipment
- stock order forms and documentation
- sampling and testing equipment.

EVIDENCE GUIDE**Method of assessment**

The following assessment methods are suggested:

- review of documentation for orders prepared by the candidate
- examination of stock records maintained by the candidate
- observation of the candidate handling stock and conducting quality control sampling and testing
- feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
- explanation by the candidate of the labelling and storage requirements of a selection of stock items.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

Biotechnology

A technical officer arrived at work on Monday morning and discovered that the freezer had been turned off over the weekend and the restriction nucleases had thawed. These enzymes were to be used that morning. The technician needed to check the enzyme activity to determine whether the enzymes had been denatured by the rise in temperature. The technician quickly set up a digestion mix of affected enzyme with some viral DNA of known sequence. The digest produced DNA fragments of expected length, showing the enzyme still had activity.

EVIDENCE GUIDE

The technician reported the incident along with the results to the supervisor, who decided that the enzymes could be used for that day.

Manufacturing

Neglected chemicals may deteriorate on the shelf and turn into a completely different entity. Not only can this change in identity damage a chemical manufacturing process, it can also present an immediate hazard. For example, this occurred in a storeroom where stored ether built up high levels of peroxides. When it was used in an extraction process to make a starting material in a manufacturing process, the peroxides were concentrated and exploded. The company was fortunate that loss of life didn't occur. The company revised enterprise procedures to ensure that in the future, redundant or outdated stocks are identified and removed.

Food processing

The staff in a confectionary company laboratory use enzyme based methods to routinely analyse sugars (glucose, fructose, sucrose and lactose) in products. Although the enzymes are stored as directed by the manufacturer, typically at -20(C in the dark, they do not retain their activity indefinitely. To avoid using inactive enzyme in an analytical procedure and obtaining a reduced or false negative result, several features of each enzyme preparation are routinely noted. These include the date of purchase, the number of times the enzyme has been thawed and refrozen and its initial activity. Periodically, the enzyme activity is verified and stock is discarded where its activity has fallen to a less than acceptable value. These practices ensure that the analytical methods that use enzymes are performed with functional reagents and give accurate results.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS 4332-2004 The storage and handling of gases in cylinders
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 1269 Set:2005 Occupational noise management set
- AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4452:1997 The storage and handling of toxic substances
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Dangerous Goods Code
- Australian Quarantine and Inspection Service

RANGE STATEMENT	
	<p>(AQIS) Export Control (Orders) Regulations 1982</p> <ul style="list-style-type: none"> • Australian Quarantine and Inspection Service (AQIS) Import Guidelines • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • customer database and supplier catalogues • enterprise or standard operating procedures (SOPs) • equipment manuals and warranty, supplier catalogues and handbooks • gene technology regulations • internal/external stock orders and overdue actions • material safety data sheets (MSDS) • National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994)) • National Environment Protection Measures • National Health and Medical Research Council (NHMRC) Guidelines • national measurement regulations and guidelines • occupational health and safety (OHS) national standards and codes of practice • principles of good laboratory practice (GLP) • Therapeutic Goods Regulations 1009
Workplace procedures	<p>Workplace procedures may include:</p> <ul style="list-style-type: none"> • ordering, purchase and receipt of stocks • verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes) • organisation of compatible batch or lot numbers • storage of stocks, stock control and rotation of stock • quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins) • reporting non-conformances
Records	<p>Records could include:</p>

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Acquire reference materials	1.1. Confirm that required transit conditions were maintained 1.2. Apply quarantine or isolation arrangements as necessary 1.3. Record data of accessioned reference material in the collection database 1.4. Label material to ensure that its identity is maintained during storage and issue
2. Maintain reference materials	2.1. Monitor storage conditions to ensure that they comply with suppliers' warranty specifications 2.2. Monitor storage conditions to ensure materials remain true to specification 2.3. Test material during storage, where relevant and appropriate, to report on reference characteristics and specificity 2.4. Report findings that suggest reference specimens may be deteriorating
3. Dispense reference materials to clients	3.1. Verify requests with supervisor before requests for reference materials are processed 3.2. Supply reference material without contamination of stock material 3.3. Keep records of materials issued in accordance with enterprise procedures
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 4.2. Follow safety protocols when handling and processing reference materials 4.3. Minimise the generation of wastes and environmental impacts 4.4. Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- maintaining materials and specimens so that the reference characteristics and attributes are stable in storage and manifest in use after retrieval
- performing all manipulations safely
- testing stored material for reference characteristics before release or use
- communicating appropriately with all customers

Required knowledge

Required knowledge includes:

- certified reference materials - what they are, when and why they should be used
- the storage requirements of biological and non-biological materials
- quarantine or isolation procedures
- the labile nature of chemical and biological materials
- the rationale for testing reference characteristics before issuing reference materials
- reasons for testing before accession of reference materials
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Process manufacturing and construction:

- drill (core) samples for mineral identification
- concrete samples for analysis of composition and/or strength and suitability for application

Biomedical and environmental:

- bacterial cultures related to colony and microscopic morphology, specificity and reliability of staining reaction, biochemical characteristics and immunological characteristics
- cell suspensions and cell and tissue preparations that can act as quantitative or qualitative controls in tests and procedures
- plasma and other body fluids with known attributes or quanta that can act as standards and controls in quantitative and qualitative tests and procedures

Food and beverage processing:

- quality assurance for viability of enzymes used in process
- bacterial or yeast cultures relating to colony and microscopic morphology for

REQUIRED SKILLS AND KNOWLEDGE

EVIDENCE GUIDE

	<p style="text-align: center;">Staphylococcus culture with coagulase activity</p> <ul style="list-style-type: none"> • oral/written questioning about receipt, testing during storage and release of reference materials. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show their relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A technical officer in a pharmaceutical laboratory assays each batch of paracetamol tablets before their release for sale using ultraviolet spectrometric analysis. Twenty tablets are ground and a known weight of sample is dissolved in a specified solvent. The ultraviolet absorption is measured and compared with the absorption of a reference standard, which has been similarly treated. The potency of the tablets is calculated and compared to the release limits before being released for sale. The concentration of the reference paracetamol must be accurately known if the assay is to be correct. The standard is packed and stored under conditions that will minimise its breakdown, and the storage conditions are monitored to ensure that the potency remains with acceptable limits.</p> <p>Biomedical</p> <p>A technical officer in a histology laboratory was asked to perform a batch of iron stains by the Prussian Blue technique. The officer went to the block repository and</p>

EVIDENCE GUIDE

chose one of the liver blocks known to contain haemosiderin. The officer checked the block number against the data in the control materials log and then cut four sections to process in parallel for the day's batch and those anticipated over the next few days. Noting that there was only one iron-positive block left, the officer wrote a short memo to the laboratory supervisor suggesting that the pathologist allow for a stock of tissue to be collected the next time they identified a suitable specimen.

Food processing

While many attributes of food can be quantified and specified using chemical reference standards, some attributes are best assessed by comparison with a physical reference sample. For example, the number of poppy seeds on a loaf of bread would be impractical to count. However, comparison with retention samples made with various levels of poppy seeds will give an approximation of the number of seeds on the bread. Suitable reference samples need to be prepared and preserved so that the handling of samples does not result in seeds falling from the sample.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
- AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 4452:1997 The storage and handling of toxic substances
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australian Dangerous Goods Code
- Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations 1982
- Australian Quarantine and Inspection Service (AQIS) Import Guidelines
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- cleaning, hygiene and personal hygiene requirements
- enterprise procedures, standard operating procedures (SOPs) and operating manuals
- gene technology regulations
- incident and accident/injury reports
- material safety data sheets (MSDS)
- National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994))
- national environment protection measures
- National Health and Medical Research

RANGE STATEMENT	
	<p>Council (NHMRC) Guidelines</p> <ul style="list-style-type: none"> • national measurement regulations and guidelines • occupational health and safety (OHS) national standards and codes of practice • sampling procedures (labelling, preparation, storage, transport and disposal) • schematics, work flows and laboratory layouts • test procedures (validated and authorised) • Therapeutic Goods Regulations 1009 • waste minimisation and disposal procedures
Reference materials	<p>Reference materials may include:</p> <ul style="list-style-type: none"> • specimens, such as cells, tissues and samples of aqueous or proteinaceous standards • aggregates, grains and powders • materials used for checking equipment calibrations
Dispensing and storing of reference materials	<p>Dispensing and storing of reference materials may require:</p> <ul style="list-style-type: none"> • reconstitution of completely lyophilised materials • preparing materials for freeze-drying
Equipment, materials and systems	<p>Equipment, materials and systems may include:</p> <ul style="list-style-type: none"> • centrifuges, water baths and incubators • lyophilisers and humidifiers • equipment and material for transport, such as dry ice or ice packs • equipment and material for storage, such as liquid nitrogen • storage boxes • storage and display cabinets • computer information systems, databases, record and filing systems • laboratory glassware and measuring equipment • materials suitable for the safe collection and disposal of biological and non-biological wastes
Communication	<p>Communication may involve:</p> <ul style="list-style-type: none"> • supervisors and managers (laboratory, quality)

RANGE STATEMENT	
	<p>and customer service)</p> <ul style="list-style-type: none"> • other laboratory or clinical personnel • outside suppliers, internal and external customers
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • chemicals, reagents • micro-organisms associated with soil, air, water, blood and blood products and human or animal tissue and fluids • sharps, such as broken glassware • disturbance or interruption of services • manual handling of heavy boxes
Safety procedures	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> • use of personal protective equipment, such as hearing protection, gloves, safety glasses and coveralls • ensuring access to service shut-off points • handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions and enterprise procedures and regulations • regular cleaning of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Co-requisite units

Co-requisite units		

MSL935003A Authorise the issue of test results

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to critically assess the accuracy of data and validity of test results prior to formally authorising their release to the client. Personnel are expected to investigate and, if necessary, rectify results that are not consistent with expected values.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory personnel working in all industry sectors who are approved by their organisation to authorise the results obtained for specific test methods. In many instances these personnel are known as 'signatories' or 'delegates' for the tests involved. The scope of tests authorised in each case will be determined by the specialised knowledge, technical competence and experience of the personnel involved.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Verify the accuracy of data and technical records	1.1. Access relevant job instructions, data and technical records in laboratory information management system (LIMS) 1.2. Confirm that technical records provide sufficient information to ensure traceability for the tests involved 1.3. Compare data with expected values and identify any outliers 1.4. Inspect data records to check the integrity of data entry, alterations, transfers and calculations 1.5. Correct and initial any incorrect data records 1.6. Sign off data records as correct
2. Determine if results are acceptable and within expectation	2.1. Compare results with expected values and identify any significant differences 2.2. Check the reliability of results by examining data or results from repeat tests or duplicate samples 2.3. Assess the significance of any documented observations of atypical test conditions or environment and/or sample appearance 2.4. Check that all calculations are free from error 2.5. Check that estimations of uncertainty are reasonable and consistent with the test method, client and/or product specification requirements 2.6. Authorise the issue of results that meet the organisation's quality standards and are consistent with expectations
3. Investigate unexpected or unacceptable results	3.1. Examine records of pre-use checks and calibration performance to ensure that the equipment and/or instruments used meet test specifications and enterprise requirements 3.2. Establish whether human and/or environmental factors could have affected the reliability of results 3.3. Check for obvious sources of interferences that may have occurred during measurements 3.4. Retrieve stored samples (if available) and assess whether they are atypical or contaminated 3.5. Perform control tests using the same, or new, samples to check unexpected results 3.6. Authorise the issue of unexpected results that meet the organisation's quality standards 3.7. Identify possible root causes of unacceptable results and appropriate preventative/corrective actions

ELEMENT	PERFORMANCE CRITERIA
	3.8. Report investigation outcomes and recommendations for improvements in accordance with enterprise procedures
4. Liaise with clients about results	4.1. Establish whether sampling procedures used by the client could contribute to unexpected/unacceptable results 4.2. Arrange for new samples and/or re-testing as necessary 4.3. Explain investigation outcomes and confidence level for unexpected test results

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- verifying the accuracy and completeness of data, results and technical records
- recognising unexpected or unacceptable data and results
- using statistical tests to estimate uncertainties and determine data acceptability
- reviewing records of sampling, sample preparation, testing and/or calibration activities to identify potential causes of unacceptable data/results
- using effective problem solving strategies
- recommending appropriate preventative/corrective actions to control potential/actual non-conforming work
- applying enterprise procedures for authorising test results
- explaining technical details of sampling, test methods and results to clients
- demonstrating a professional approach and positive company/organisation image (including maintaining independence and an ability to resist improper influences)

Required knowledge

Required knowledge includes:

- scientific and technical knowledge of the samples, procedures, equipment, materials and instrumentation used to generate the test results and data
- expected values for data and results and the uncertainty components for specified test methods
- problem solving techniques and cause analysis appropriate to the test methods
- enterprise procedures for authorising the issue of test results
- relevant reporting requirements such as the Guide to the Expression of Uncertainty in Measurement (GUM), National Association of Testing Authorities (NATA) and/or test methods
- working knowledge of health, site safety and environmental management requirements relevant to job role
- working knowledge of confidentiality requirements relevant to job role

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • verify the accuracy and completeness of data, results and technical records for specified tests • issue specified test results in accordance with authorisation and enterprise procedures • investigate unexpected or unacceptable results in a logical and efficient manner • explain test results to clients.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • relevantMSL09 units of competency that cover the ability to perform the tests involved, relevant data analysis and quality assurance procedures. <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • test methods and description of test setup • computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of records and test results verified and issued by the candidate • feedback from supervisors and clients regarding the candidate's ability to issue authorised test results • review of recommendations and reports prepared by the candidate • questions to assess understanding of procedures governing the authorised issue of test results, acceptability of data/results, sources of uncertainty and preventative/corrective actions. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and</p>

EVIDENCE GUIDE

	<p>those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<p>This competency in practice</p>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Calibration</p> <p>A calibration technician/specialist has completed testing an instrument and places it with the test report for the relevant signatory to authorise. The laboratory manager physically examines the item to ensure all accessories have been applied. The manager checks the test report for validity and correctness and ensures any abnormalities or departures from normal or specified conditions are reported appropriately. He/she confirms that all data transfers and calculations are accurate and in accordance with SOPs, industry guidelines and the laboratory's accreditation requirements. The manager also ensures that all relevant databases are updated and client confidentiality is maintained. He/she signs the relevant certificates and reports and authorises the release of the results and return of the item to the client.</p> <p>Construction materials testing</p> <p>A laboratory supervisor, who is authorised to issue Atterberg Limit test results, receives a set of QC data for gravel that is to be supplied to a local council. The technician has provided Liquid Limit, Plastic Index, Linear Shrinkage data for three samples:</p> <ol style="list-style-type: none"> 1. 35%, 7%, 3% 2. 35%, 4%, 3%

EVIDENCE GUIDE

3. 33%, 5%, 2%

Using a well known 'rule of thumb' that the P.I./L.S. ratio for gravel samples is usually between 2 and 3, the supervisor notes that the ratio for the second sample is 1.3. This indicates a possible error. Although the most likely source of error is in the determination of the Plastic Limit, he/she systematically reviews all of the technician's work. Firstly, he/she checks that all three samples are from the same source and whether their appearance was recorded on receipt. He/she reviews the relevant data records by checking for simple transcription errors, moisture calculation errors, variation in the weights of containers and straightforward weighing errors. He/she also checks if the samples were properly dried to constant mass. Then he/she accesses the client's previous test records to see if any similar sample variability has occurred in the past. After completing all the checks he/she can do from his/her desk, he/she talks to the tester and asks to see the rolled specimens before they are disposed of. A visual inspection confirms his/her hunch that the technician's rolling technique is not good enough to obtain reliable results. He/she arranges for the test to be repeated under supervision using surplus sample material and also organises additional training.

Construction materials testing

Asphalt is being laid at night on a busy motorway and the road must be available for traffic by 6 am each day. The construction company's own laboratory is responsible for conducting compaction tests for each lot. The specifications require a field compaction density of 95% of the laboratory compacted density and penalties apply for lots where results are <94%. A technician who is authorised to issue compaction results uses a nuclear density gauge to determine field compaction values in accordance with an established inspection test plan and test method. The data for the latest lot is 95, 94, 93, 93, 93.5, 93 and 93%. The average result is 93.5% and the shift foreman decides to roll and then re-test the lot. The repeat test indicates an average value of 93%. Before completing the test report, the technician reviews all the data, calculations and record of 'standard counts' for the gauge. He/she also checks the laboratory compaction results, gradings and bitumen content for consistency and compliance

EVIDENCE GUIDE

with mix design. These results indicate a trend of the mix design moving out of specification. The technician informs the plant manager that the test results indicate unacceptable compaction. The manager maintains that the results are borderline and points out that the company has already paid \$250K in penalties this month. He/she asks the technician to re-check the compaction results and repeat the tests at different inspection points. He/she also suggests that the technician should find a better sample for the maximum density test. The technician reviews the results and re-tests further samples but there are no new results that would justify any change to the test report. Therefore, the technician issues the test report unaltered.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice and Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
- AS ISO 1000-1998 The international system of units (SI) and its application
- AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans
- AS/NZS ISO 10012:2004 Measurement management systems - Requirements for measurement processes and measuring equipment
- AS/NZS ISO 9000 Set:2008 Quality management systems set
- ISO 5725 Accuracy (trueness and precision) of measurement methods and results
- ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- Australian code of good manufacturing practice for medicinal products (GMP)
- enterprise quality manual and customer quality plan
- equipment manuals and warranty, supplier catalogues and handbooks

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Eurolab technical report • inspection test plans, sampling plans for sites • NATA supplementary requirements for the relevant field of testing (e.g. field application document) • NATA Accreditation programs requirements • NATA Technical notes, policy circulars and guides • national measurement regulations and guidelines • Nordtest guide • principles of good laboratory practice (GLP) • sampling and test procedures and standard operating procedures (SOPs)
Data and results	<p>Data and results may include:</p> <ul style="list-style-type: none"> • entries in worksheets, spreadsheets or databases that may be linked to information management systems • observations, measurements, derived data and calculations • results of tests and analyses
Technical records	<p>Technical records may include:</p> <ul style="list-style-type: none"> • request forms, service agreements and contracts • worksheets, work books, check sheets and work notes • data and information generated during sampling, testing and/or calibrations that indicate whether quality or process parameters have been achieved • control graphs • external, internal test reports and calibration certificates • clients notes, papers and feedback • listing of data, personnel responsible for sampling, performance of each test/calibration and checking of results
Calculations	<p>Calculations may be performed:</p> <ul style="list-style-type: none"> • with or without a calculator or computer software, such as spreadsheets, databases and

RANGE STATEMENT	
	statistical packages
Statistical analysis	<p>Statistical analysis may include the use of:</p> <ul style="list-style-type: none"> • standard deviation, standard deviation of the mean, histograms and frequency plots • probability and normal probability plots • run charts and control charts, such as Shewhart and CuSum • regression methods for calibration, linearity checks and comparing analytical methods • analysis of variance (ANOVA) • data acceptability tests, such as T and F
Estimates of uncertainty	<p>Estimates of uncertainty may include components such as:</p> <ul style="list-style-type: none"> • calibration uncertainty • instability or drift in the calibrated instrument • repeatability of the results • resolution or readability of the instrument • environmental influences such as temperature, air pressure, humidity, vibration, electrical noise and gravity • reference material uncertainty • factors arising from using an instrument under a different operating environment or procedures (e.g. orientation of a transducer, immersion depth of a temperature probe) • reproducibility of quality control data
Human and environmental factors	<p>Human and environmental factors may include:</p> <ul style="list-style-type: none"> • technician preparing the sample and/or performing the test did not apply the test method correctly • inadequate attention to detail, fatigue, stress • inadequate hygiene or sterility • unacceptable dust, radiation, humidity, temperature and illumination levels • electromagnetic disturbances • unacceptable variations to gas, electricity and water supply • unacceptable sound and vibration levels
Sample preparation problems	Sample preparation problems could result from:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of incorrect sample containers • incorrect particle size • contamination • incorrect sample handling, storage or conditioning (filtered/non-filtered, temperature control, moisture content and preservation) • incorrect matrix • incomplete digest
Sources of interference	<p>Sources of interference may include:</p> <ul style="list-style-type: none"> • presence of contaminants • spectral interference (e.g. in Inductively Coupled Plasma Spectroscopy) • physical interference (e.g. in Atomic Absorption Spectroscopy) • matrix effects • masking of analytes
Preventative/corrective actions	<p>Preventative/corrective actions may include:</p> <ul style="list-style-type: none"> • more regular use of certified reference materials • internal quality controls using secondary reference materials • participation in inter-laboratory comparison or proficiency testing programs • replicate tests or calibrations using the same or different methods • retesting or recalibration of retained items • correlation of results for different characteristics of an item • additional audits and management reviews • more regular quality checks on consumables • increased staff observation, supervision and/or training • more detailed sample specifications, test methods and procedures
Confidence level	<ul style="list-style-type: none"> • The most common confidence level is 95% in accordance with the National Measurement Act, 1960. However, some applications require a higher level of confidence
Occupational health and safety	OHS and environmental management

RANGE STATEMENT	
(OHS) and environmental management requirements	<p>requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for pickup	1.1. Confirm pickup sequence and any licence/permit requirements with supervisor 1.2. Check that vehicle and communication devices are in working order 1.3. Check that required transport containers and materials are in the vehicle
2. Pick up and transport items	2.1. Confirm the number and nature of items to be picked up on arrival 2.2. Ensure items match paperwork 2.3. Apply enterprise requirements to the transport of samples and/or equipment 2.4. Alert laboratory personnel to any special needs that are identified on documents accompanying the items 2.5. Complete required documentation at pickup point 2.6. Stow items in the specified transport containers and under the required conditions 2.7. Maintain sample integrity at all times 2.8. Deliver items to reception point in accordance with enterprise procedures 2.9. Maintain confidentiality of information
3. Maintain transport equipment	3.1. Maintain vehicle according to enterprise requirements 3.2. Maintain state of transport containers to ensure they are fit for purpose 3.3. Requisition stocks of consumable materials as required 3.4. Replenish stocks of collecting equipment at collection centres as required
4. Maintain a safe work environment	4.1. Use established work practices and personal protective equipment to ensure personal safety and that of others 4.2. Clean up spills, if they occur, using enterprise procedures 4.3. Minimise the generation of waste 4.4. Dispose of all waste in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- planning the picking up of items in conjunction with a supervisor
- preparing a vehicle for the required journey
- using communication devices so contact is possible between the courier, reception centre, and routine pickup locations
- communicating effectively and courteously with individuals, customers, clients and reception staff
- recording details of item exchange in relevant sections of chain of custody forms, as required
- maintaining the integrity of collected samples or equipment during transport
- containing and cleaning up spillage or breakages
- using appropriate techniques and equipment to safely dispose of waste materials
- maintaining confidentiality in all aspects of work
- reporting of problems, accidents or incidents in accordance with enterprise procedures

Required knowledge

Required knowledge includes:

- the relationship between effective communication with clients and customers and enterprise business
- the need for appropriate and timely transport
- control measures for minimising exposure to hazardous materials and equipment
- effect of changes in environmental conditions, vibration and shock on samples
- procedures for the containment and cleanup of spillages and breakages
- efficient waste containment and disposal practices
- maintenance requirements of equipment used in the processes of handling and transporting samples
- relevant health, safety and environment requirements
- enterprise procedures for responding to emergencies
- contact details for key personnel

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical samples:

- labile nature of biological and environmental samples
- possible infectivity of biological materials

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow required policies and procedures to maintain the integrity of collected samples or equipment during transport • deal with customers effectively and courteously • work safely • maintain confidentiality and report problems, accidents and incidents in accordance with procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • vehicle • enterprise procedures for the handling and transport of samples or equipment • communication devices • sample containers • containers for transporting samples and test/calibration equipment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of the job sheets or journal of completed activities • direct observation of work as a courier • the quality of review of results traceable to the transport of samples or equipment by candidate • oral or written questions to assess knowledge of the handling of unforeseen circumstances • simulated role plays between a courier and personnel at a reception desk or customer pickup centre.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<p>This competency in practice</p>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Calibration</p> <p>Calibration laboratories must take special care to ensure that they do not damage test equipment during handling, testing or storage. Information relating to equipment requiring special handling, transport or storage conditions should be provided to those responsible for collecting and transporting the items.</p> <p>A customer-orientated calibration laboratory offers a door to door calibration service to most of its clients. Once a week their driver arrives at a major facility and takes delivery of several precision measuring instruments. As always, the driver signs the acceptance note paying particular attention that all the items are recorded correctly, including listing all accessories and associated handbooks. But this time, two delicate items require unique transit cases to ensure they are stored and transported upright. Because the laboratory received prior notice, these cases were loaded into the van before setting off as well as a copy of the special transport and packaging instructions. The driver secures all the items in accordance with the accompanied written instructions to ensure their safe travel and minimise damage during transit. Upon return, the driver unloads the van and the instruments are acquitted by administration staff,</p>

EVIDENCE GUIDE

inspected for damage and booked into the laboratory. The lab supervisor makes sure that their technicians are aware of the special handling requirements of the two delicate instruments.

Biotechnology

During transit, samples must be handled and maintained under conditions which will ensure that their potency and efficacy are maintained. A courier has been asked to transport vaccine samples from the airport to the enterprise for laboratory evaluation. The supervisor faxes the courier company detailed instructions regarding pickup and handling/storage conditions during transit. In this case, the samples are in insulated containers and the temperature is monitored and recorded continuously. The courier collects the samples, puts them in the coolest part of the vehicle, ensuring that the package will not be subject to any sudden jolts, and transports them to the enterprise. After the samples arrive they are checked by the enterprise and appropriate documentation completed.

Biomedical

At 8 am the courier commences the day shift. The shift supervisor identifies the collection centres to be visited. The courier takes the mobile phone from the charger and checks their pager. In the vehicle, the courier logs in the odometer reading, makes a mental note of the fuel level, checks the cooler boxes and other equipment and carefully drives out. Today, there are pickups from four private hospitals and 12 collecting centres in a 200 sq km zone. As they approach the first hospital, there is a call from base with instructions to collect a tissue biopsy and bring it back immediately. He/she asks the base contact to tell haematology that their 10 am specimen arrival will be 40 minutes late because of this unforeseen diversion. Eventually, they complete the round, having remembered to replenish specimen collecting stock at each centre visited.

Environmental (1)

A technical assistant regularly handles and transports sensitive equipment over rough terrain in a 4WD vehicle. After reaching a field site, they are asked to transport expensive water monitoring equipment across an estuary in a small aluminium boat. The assistant notes that the equipment boxes are open to the weather and will need to be made waterproof. Because the water is choppy, the

EVIDENCE GUIDE

assistant adds extra packing material to cushion the most shock sensitive items. They choose to travel with the equipment rather than entrusting it to the local fisherman. Together, they carefully secure the items on the seats rather than placing them on the floor of the boat which is wet.

Environmental (2)

A waste management authority has sent one of their laboratory technicians to collect six containers that have been found by a member of the public on the verge of an industrial area service road. Given that the materials may be hazardous the technician assembles a full set of safety equipment. They also locate a laptop computer with MSDS information, a list of phone contacts for agencies responsible for handling hazardous materials and suitable containers for storing/transporting potentially hazardous materials. Upon arrival at the site, the technician locates six containers of concentrated sulphuric acid which are clearly labelled. The technician consults the MSDS for information on appropriate handling, storage and transportation procedures and follows them closely.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used.

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
- AS 1678 Emergency procedure guide -Transport
- AS 1940-2004 Storage and handling of flammable and combustible liquids
- AS 4332-2004 The storage and handling of gases in cylinders
- AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- AS/NZS 2243 Set:2006 Safety in laboratories set
- AS/NZS 4452:1997 The storage and handling of toxic substances
- AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australia Post Guides
- Australian Dangerous Goods Code
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- International Air Transport Association (IATA) Regulations
- material safety data sheets (MSDS)
- occupational health and safety (OHS) national standards and codes of practice

Paperwork and documentation

Paperwork and documentation may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • enterprise protocols regarding customer liaison and communication • vehicle log books • protocols for use of pagers, mobile telephones and two-way radios • precautions for safe handling and handling of specific materials (e.g. toxic, infective, radioactive and dangerous goods) • precautions for the transport of volatile and unstable fluids • incident/accident report forms • spillage and waste containment and disposal protocols and containment materials
Maintenance of the integrity of samples or test/calibration equipment	<p>Maintenance of the integrity of samples or test/calibration equipment could involve:</p> <ul style="list-style-type: none"> • use of appropriate sample containers (glass, plastic and opaque) • use of appropriate preservatives • wrapping container in foil to exclude light • temperature control, which may involve prevention of direct contact between the sample and coolant • use of appropriate equipment boxes (insulated, shockproof and waterproof) • restraint of containers to prevent movement • checking sample viability during transport while avoiding unnecessary handling
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • chemicals, such as acids and hydrocarbons • sharps and broken glassware • manual handling of heavy sample bags and containers and equipment
Safety practices	<p>Safety practices may include:</p> <ul style="list-style-type: none"> • use of MSDS • use personal protective equipment, such as gloves, safety glasses, goggles and coveralls

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of biohazard containers • safe road/off road driving practices • correct labelling of hazardous materials • handling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontaminating of equipment and vehicle
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Log samples	1.1. Record date (and time of arrival, if required) of samples at enterprise 1.2. Check and match samples with request forms before they are accepted 1.3. Enter samples into the laboratory information management system (LIMS) 1.4. Apply required document tracking mechanisms 1.5. Process 'urgent' test requests according to enterprise requirements 1.6. Ensure security and traceability of all information, laboratory data and records
2. Address customer service issues	2.1. Report to referring client when samples and request forms do not comply with enterprise requirements 2.2. Refer to supervisor for instruction where 'return to source' is inappropriate or not possible 2.3. Maintain confidentiality of all client/enterprise data and information 2.4. Ensure that information provided to customers is accurate, relevant and authorised for release 2.5. Deal with customers politely and efficiently and in accordance with enterprise procedures
3. Prepare samples for testing	3.1. Perform physical separation of the samples, as required 3.2. Prepare the required number of sub-samples 3.3. Perform chemical separation of the samples as required 3.4. Place samples in appropriate transport media, if appropriate 3.5. Monitor and control sample conditions before, during and after processing
4. Distribute samples	4.1. Group samples requiring similar testing requirements 4.2. Distribute samples to work stations maintaining sample integrity 4.3. Distribute request forms for data entry or filing in accordance with enterprise procedures 4.4. Check that samples and relevant request forms have been received by laboratory personnel
5. Maintain a safe work	5.1. Apply safe work practices to ensure personal safety

ELEMENT	PERFORMANCE CRITERIA
area and environment	and that of other laboratory personnel 5.2. Use appropriate protective equipment to ensure personal safety when sampling, processing, transferring or disposing of samples 5.3. Report all accidents and spillages to supervisor 5.4. Clean up splashes and spillages immediately using appropriate techniques and precautions 5.5. Minimise the generation of wastes and environmental impacts 5.6. Ensure the safe disposal of hazardous materials and other laboratory wastes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- receipt and logging in of samples
- checking of samples for history and acceptable transport conditions
- preparing and sub-sampling of samples
- labelling samples accurately and completely
- using standard precautions when dealing with potentially hazardous materials
- applying knowledge of the relationship between specific sample preparation and associated tests
- clarifying specific client requirements with appropriate personnel promptly
- labelling and storing samples in a way which maintains sample integrity and traceability
- disposing of samples following required procedures
- maintaining equipment and the workspace

Required knowledge

Required knowledge includes:

- enterprise procedures for the receipt, documentation, distribution and storage of samples
- potentially hazardous and unstable nature of samples
- requirement of specified sample types for specific tests
- importance of maintaining effective customer relations
- sample storage and transport requirements
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical laboratories:

- potentially infective nature of all biological materials
- nature of unstable solutions, such as anti-coagulated whole blood
- non-conformance of clotted samples for procedures, such as routine haematological tests

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • safely receive and log samples in accordance with enterprise procedures • apply knowledge of the relationship between sample preparation requirements and associated tests • deal with customers politely and efficiently • recognise and deal with problems according to enterprise procedures • maintain sample integrity and traceability.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL913001A Communicate with other people</i> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • a selection of sample containers, tubes, request forms and sample documentation • simulated samples when an authentic sample is unavailable or inappropriate.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of sample receipt and preparation records prepared by the candidate • feedback from supervisors and peers • direct observation of sample receipt and preparation • questioning to assess knowledge of procedures where direct observation is difficult (such as sample receipt and preparation in the field). <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p>

EVIDENCE GUIDE

	<p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Environmental</p> <p>A laboratory assistant at a hazardous liquid waste recycling plant is required to log in all samples, match all samples with the in-house profile of the source of the waste, label them and activate the tracking procedure. He/she then prepares a sample for a series of standard tests which are determined by the profile of the waste material (acid or alkali, organic or heavy metal, etc). Given the hazardous nature of the waste, the laboratory assistant must use appropriate safety equipment at all times and ensure the safe disposal of all hazardous material. The assistant must work efficiently as these procedures are activated upon arrival of a road tanker and when the hazardous waste has been verified and judged acceptable for treatment at the plant by the laboratory supervisor. The laboratory assistant also liaises with the truck driver, or the referring client, should the samples (and/or subsequent tests) not comply with enterprise conditions for receiving the hazardous waste.</p> <p>Construction materials testing and mineral assay</p> <p>A laboratory assistant has received a consignment of disturbed soil samples from a client for classification testing. A test request and field logs have been sent by mail. Each sample is bagged and labelled, with the label showing the name of the client, project, date and sampling location, and a field description of the material. The laboratory policy is that samples weighing more than 20 kg must be bagged so that the individual bags do not exceed this limit and labelled as bag 1 of ..., bag 2 of ...</p>

EVIDENCE GUIDE

etc. The assistant checks to ensure all component bags of such samples are present. He/she is careful to handle the samples using safe manual handling techniques. The assistant arranges the samples in order of location and reconciles them with the test request and logs. Two samples have been shown on the request but have not been received. The assistant emails the technician who despatched them and subsequently is advised that they were overlooked during despatch and will be forwarded as soon as possible.

The assistant compares the samples with the field descriptions and finds that they match. Samples that are not designated for testing immediately are set aside in the laboratory store. The remainder are placed in trays for drying in the 50°C oven. The tray numbers are carefully written on the respective worksheets. When the samples have dried and cooled they are split out sufficiently for sieve analysis and plasticity testing, making allowance for the maximum particle size of each sample. The assistant is careful to avoid raising dust during the process.

Biomedical

A laboratory assistant has just started a shift in specimen reception and puts on a coat and gloves before touching any samples. There is a pile of samples and forms in the sample box. In some cases, the samples and forms are enclosed in a plastic bag. In other cases, they are seemingly unconnected. The assistant notices that one of the samples has a bloodstained label. She/he quickly examines the samples, isolates the leaking sample in a lockable plastic bag and places the related request form in the bag's separate compartment. The assistant then disposes of her/his dirty gloves. The assistant now logs all samples into the computer, placing to one side a sample and request form that is inadequately labelled. She/he makes a note to call the referring doctor as soon as possible. The assistant places the haematology samples in the colour-coded tray and calls the laboratory for their pickup. She/he then calls the doctor of the patient whose sample is inadequately labelled. She/he records the missing date of birth on the request form, and then barcode/labels tubes for the samples' testing. Within 30 minutes, she/he has cleared the first rush of samples. She/he takes the time to carefully empty the bin of

EVIDENCE GUIDE	
	wastes.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- Australia Post Guides
- Australian Dangerous Goods Code
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- enterprise operating procedures for preparing samples
- enterprise quality manuals
- gene technology regulations
- International Air Transport Association (IATA) Regulations
- material safety data sheets (MSDS)
- occupational health and safety (OHS) national standards and codes of practice
- procedure sheets for physical and chemical separation
- procedure sheets indicating how samples and sub-samples are to be labelled, processed, distributed, flagged for urgent testing or for other non-routine requirements, including referral to external laboratories

RANGE STATEMENT	
	<ul style="list-style-type: none"> • procedure sheets indicating transport and storage requirements • safety manuals describing personal protective equipment requirements, control of hazardous wastes, containment and cleanup of spillages, and disposal and recycling of wastes
Samples received	<p>Samples received may include:</p> <ul style="list-style-type: none"> • gas or air samples • liquid samples, such as water and waste water, stormwater, sludges and complex mixtures and sewage • solid samples, such as soils and sediments, rocks/minerals, concrete, quarry or mining products • solid wastes, such as hazardous, non-hazardous, domestic, commercial, industrial, mining and agricultural • biological specimens such as tissue and blood • raw materials, start, middle, end of production run samples and final products
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • dust and noise • chemicals, such as acids and hydrocarbons • aerosols • sharps and broken glassware • manual handling of heavy sample bags and containers • crushing, entanglement and cuts associated with moving machinery
Safe work practices	<p>Safe work practices may include:</p> <ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • use of biohazard containers and laminar flow cabinets

RANGE STATEMENT	
	<ul style="list-style-type: none"> • correct labelling of reagents and hazardous materials • handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontamination of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for sampling	1.1. Confirm the sampling location, number and type of samples, and timing and frequency of sampling from enterprise or client's sampling plan 1.2. Liaise with relevant personnel to arrange site access and, if appropriate, all necessary clearances and/or permits 1.3. Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit 1.4. Check that all procedures are in accordance with client or enterprise requirements, relevant standards and codes 1.5. Identify site and sampling hazards and review enterprise safety procedures 1.6. Assemble and check all sampling equipment, materials, containers and safety equipment 1.7. Arrange suitable transport to, from and around site as required
2. Conduct sampling and log samples	2.1. Locate sampling sites and, if required, services at the site 2.2. Conduct representative sampling in accordance with sampling plan and defined procedures 2.3. Record all information and label samples in accordance with traceability requirements 2.4. Record environment or production conditions and any atypical observations made during sampling that may impact on sample representativeness or integrity 2.5. Transport all samples back to base according to standard operating procedures (SOPs) and relevant codes
3. Prepare samples for testing	3.1. Prepare sub-samples and back-up sub-samples that are representative of the source 3.2. Label all sub-samples to ensure traceability and store in accordance with SOPs 3.3. Follow defined preparation and safety procedures to limit hazard or contamination to samples, self, work area and environment 3.4. Distribute sub-samples to defined work stations maintaining sample integrity and traceability requirements

ELEMENT	PERFORMANCE CRITERIA
4. Address client issues	4.1. Enter approved information into laboratory information management system (LIMS) 4.2. Report all relevant aspects of the sampling and preparation phases in accordance with enterprise procedures 4.3. Ensure that information provided to client is accurate, relevant and authorised for release 4.4. Maintain security and confidentiality of all client/enterprise data and information
5. Maintain a safe work environment	5.1. Clean all equipment, containers, work area and vehicles according to enterprise procedures 5.2. Check serviceability of all equipment before storage 5.3. Use defined safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 5.4. Minimise the generation of wastes and environment impacts 5.5. Ensure the safe collection of all hazardous wastes for appropriate disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- collecting representative samples in accordance with a sampling plan
- techniques to preserve the integrity of samples
- identifying atypical materials and samples and taking appropriate action
- maintaining sampling equipment
- completing sampling records
- working safely
- following requirements for the disposal of waste and the preservation of the environment

Required knowledge

Required knowledge includes:

- principles of representative samples
- principles and procedures for random, systematic and stratified sampling, consistency of sampling procedures
- preservation of the integrity of samples
- maintaining identification of samples relative to their source
- enterprise and/or legal traceability requirements
- cost effectiveness of sampling
- characteristics of product/material to be sampled and likely contaminants
- links between quality control, quality assurance, quality management systems and sampling procedures
- enterprise procedures dealing with legislative requirements for the handling, labelling and transport of hazardous goods
- links between correct occupational health and safety (OHS) procedures and personal and environmental safety particularly at high risk sites

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical and environmental services:

- specific legislation on biohazards
- documentation procedures for the chain of custody for samples to be used as evidence or for blood transfusion

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • collect the specified quantity of sample to enable all processing and testing to occur and back-up samples to be stored • obtain a sample that is representative of the bulk material • preserve the integrity of samples by closely adhering to procedures • label samples and sub-samples to satisfy enterprise/legal traceability requirements • identify atypical materials and samples and take appropriate action • maintain sampling equipment in appropriate condition • complete sampling records using enterprise procedures • follow safety regulations and enterprise OHS procedures during sampling, transport and storage • follow relevant legislative requirements for the disposal of waste and the preservation of the environment.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data</i> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>relevant MSAL974000 series units of competency</i> • <i>relevant MSAL975000 series units of competency relevant to the sampling.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • variety of sample types • sampling plans • a selection of sampling containers and sampling

EVIDENCE GUIDE	
	equipment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • inspection of samples collected by the candidate • review of sampling documentation completed by the candidate • feedback from peers, customers and supervisors that sampling plans were followed • questioning to assess underpinning knowledge of representative sampling procedures • observation of the candidate taking a range of samples. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A metallurgical laboratory technician is very familiar with preparing representative samples for a range of final products in a steelmaking plant. One day, he/she is asked to sample a 50 tonne small-particle coal delivery which is believed to have a higher than acceptable sulphur content. Having never prepared representative samples for such a large quantity of material, the technician consulted their supervisor and developed an appropriate sampling plan. The technician arranged for the operator of a small front-end loader to take buckets of coal from five equally spaced points around the pile. The resulting</p>

EVIDENCE GUIDE

material was then combined and mixed in one heap. The technician coned and quartered the heap enough times to obtain a representative sample of about 5kg. He/she arranged for the unwanted material to be returned to the stockpile. On return to the laboratory, the technician crushed the sample and repeatedly coned and quartered the material to obtain an analytical portion.

Environmental

A field technician trained in sampling natural water systems is asked to sample a bright yellow industrial wastewater discharge into a small creek. The relevant sampling plan specifies that the samples should be collected where the waste water is well mixed near the centre of the creek and at the mid-depth point. The technician also notes that the samples must be collected where turbulence is at a maximum so that the settling of solids is minimal. On arrival at the site, the technician locates where the wastewater is entering the creek. He/she moves downstream to where the waste water and creek water is well mixed and there is little apparent loss of the yellow suspended solids. The technician dons the required personal protective equipment and uses a convenient bridge to collect a set of six samples and duplicates over a half-hour period using the equipment and procedures specified in the sampling plan. Using a field notebook, the technician records all information specified in the laboratory's chain of custody requirements and safety plan for handling potentially hazardous industrial waste.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 1199 Sampling procedures and tables for inspection by attributes
 - AS 1678 Emergency procedure guide -Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS 4433.2-1997 Guide to the sampling of particulate materials - Preparation of samples
 - AS/NZS 4452:1997 The storage and handling of toxic substances
- American Association of Cereal Chemists (AACC) Approved Methods of Analysis
- Australian Dangerous Goods Code
- enterprise and/or client sampling schemes and sampling plans
- enterprise recording and reporting procedures
- gene technology regulations
- material safety data sheets (MSDS)
- methods and procedures which may be written to meet enterprise, client and/or regulatory/certifying body requirements
- National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)]
- site plans, maps and specifications

RANGE STATEMENT	
Basic principles of sampling	<p>Basic principles of sampling include:</p> <ul style="list-style-type: none"> • representative samples • preservation of integrity of samples • maintaining identification of samples relative to their source, enterprise and legal traceability • cost-effectiveness of sampling • consistency of sampling procedures • sampling principles, including random, systematic and stratified sampling
Materials sampled	<p>Materials sampled may include:</p> <ul style="list-style-type: none"> • gas or air samples • liquid samples, such as water, groundwater, waste water, stormwater, sludges and sewage • solid samples, such as soil, sediments, rocks, concrete, quarry and mining material • solid wastes • raw materials, start, middle, end of production run samples, final products and materials used in production processes, such as flocculants • plants • animals • microbiological samples
Types of samples	<p>Types of samples may include:</p> <ul style="list-style-type: none"> • grab samples • composite samples • quality control samples • research or one-off samples • environmental or survey samples
Sampling tools and equipment	<p>Sampling tools and equipment may include:</p> <ul style="list-style-type: none"> • shovels, augers and chain saws • sampling frames, sampling tubes, dip tubes, spears, flexible bladders and syringes • front-end loader, backhoe, excavator and drill rig • sample bottles or containers, plastic containers and disposable buckets • access valves • sample thief • auto samplers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pumps and stainless steel bailers • traps and cages • sterile containers, pipettes, inoculating loops and disposable spoons
Maintenance of integrity of samples	<p>Maintenance of integrity of samples may include:</p> <ul style="list-style-type: none"> • use of compatible container, such as glass, plastic, amber and opaque bottles • use of appropriate preservatives, such as sodium azide, toluene or antibiotics • decontamination of sampling tools between collection of consecutive samples • wrapping container in foil • purging of sample lines and boxes • handling and transport to avoid disturbance or damage • temperature control which may involve insulation of sample without direct contact with the coolant • wrapping in wet newspaper, cloth, sand or sawdust • transfer of sterile sample into sterile container • monitoring of storage conditions
Site and sampling hazards	<p>Site and sampling hazards may include:</p> <ul style="list-style-type: none"> • solar radiation, dust and noise • wildlife, such as snakes, spiders and domestic animals • biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • chemicals, such as acids and hydrocarbons • aerosols • sharps and broken glassware • manual handling of heavy sample bags and containers • crushing, entanglement and cuts associated with moving machinery and hand tools • vehicular and pedestrian traffic
Safety procedures	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> • use of MSDS

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • use of biohazard containers and laminar flow cabinets • correct labelling of reagents and hazardous materials • handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontaminating equipment and work areas • machinery guards • signage, barriers, service isolation tags, traffic control and flashing lights • lockout and tag-out procedures
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret test requirements	1.1. Review test request to identify samples to be tested, test method and equipment involved 1.2. Identify hazards and enterprise controls associated with the sample, preparation methods, reagents and/or equipment
2. Prepare sample	2.1. Record sample description, compare with specification, record and report discrepancies 2.2. Prepare sample in accordance with appropriate standard methods
3. Check equipment before use	3.1. Set up test equipment in accordance with test method 3.2. Perform pre-use and safety checks in accordance with enterprise procedures and manufacturer's instructions 3.3. Identify faulty or unsafe equipment and report to appropriate personnel 3.4. Check calibration status of equipment and report any out of calibration items to appropriate personnel
4. Perform tests on samples	4.1. Identify, prepare and weigh or measure sample and standards to be tested 4.2. Conduct tests in accordance with enterprise procedures 4.3. Record data in accordance with enterprise procedures 4.4. Perform calculations on data as required 4.5. Identify and report out of specification or atypical results promptly to appropriate personnel 4.6. Shut down equipment in accordance with operating procedures
5. Maintain a safe work environment	5.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 5.2. Minimise the generation of wastes and environmental impacts 5.3. Ensure safe disposal of laboratory and hazardous wastes 5.4. Clean, care for and store equipment and reagents as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting enterprise procedure or standard methods accurately
- using safety information, such as material safety data sheets (MSDS) and performing procedures safely
- checking test equipment before use
- completing all tests within required timeline without sacrificing safety, accuracy or quality
- calculating, recording and presenting results accurately and legibly
- maintaining security, integrity and traceability of all samples, data/results and documentation
- cleaning and maintaining equipment

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- purpose of test
- principles of the standard method
- pre-use equipment checks
- relevant standards/specifications and their interpretation
- sources of uncertainty in measurement and methods for control
- enterprise and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognition/reporting of unexpected or unusual results
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • accurately interpret enterprise procedures or standard methods • complete all tests within the required timeline without sacrificing safety, accuracy or quality • demonstrate close attention to the accuracy and precision of measurements and the data obtained • maintain the security, integrity and traceability of all samples, data/results and documentation.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment standards and materials • enterprise procedures and standard methods, and equipment manuals • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of the quality of test data/results achieved by the candidate over time • inspection of records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate performing a range of basic tests • oral or written questioning to check underpinning knowledge of test procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Standard testing methods may be viewed as legal requirements that must be followed to ensure that a product manufactured in a chemical plant meets the specification by which it is sold to the customer. Technical assistants perform tests in a quality control laboratory to ensure that material meets legal requirements and the material is safe and effective in use. Peroxides may be present in ether as a result of light-catalysed air oxidation. Peroxides are toxic and can give rise to mixtures which are explosive when distilled. Technical assistants test ether to ensure that the level of peroxide is within acceptable limits. The test is done by shaking ether with a solution of potassium iodide. After standing for 30 minutes in the dark the yellow colour of the aqueous phase, due to the liberation of iodine, must not be more intense than a prepared standard solution. These tests ensure the quality and safety of the ether.</p> <p>Food processing</p> <p>A snack food company produces a range of high quality, impulse purchase snack foods. Some of these products are moisture and/or oxygen sensitive and are therefore packaged in multi-layer flexible packaging to provide optimum shelflife. The packaging must also be able to withstand the rigours of the production and distribution process. While the packaging is purchased to meet the shelflife and distribution specifications, the quality</p>

EVIDENCE GUIDE

assurance program requires the periodic evaluation of the packaging materials against these specifications. A laboratory assistant uses standard methods to test the tearing resistance, bursting strength, impact resistance and permeability and/or leakage of the snack food packaging. Tests are also conducted on aspects of the manufacturing process that can affect shelflife. These tests involve the measuring of the heat-seam strength and the sealing performance of the closure process. The test results are recorded by the laboratory assistant to verify the conformance of the materials to the supplier specifications and of the process to the manufacturing specifications. The assistant reports any anomalies or non-conformances to the appropriate personnel.

Construction materials testing

A technician performs an Aggregate Stripping Test (AS 1141.50) and enters the results in the laboratory's information management system (LIMS). The resulting 20-30% stripped values (i.e. 70-80% adhering) indicate a 'fail' result. The technician notes that he has repeated the test and obtained the same 'fail' result. The laboratory manager reviews the results and asks the technician to explain how he performed the test. He describes how he prepared 3-4 mm thick plates of bitumen and binding agent in the mould and then placed 50 small clean pieces of aggregate on top. After treatment in an oven for 24 hours and a 50°C water bath in accordance with the test method, the technician had then carefully pulled out the pieces of aggregate and avoiding any twisting motion. He then estimated the % of bitumen adhering to each of the stones with the expectation that the stripped value would be about 5% (i.e. 95% adhering). The manager is satisfied that the technician has performed the test in accordance with the method and suggested that he now re-run the test with a known aggregate as a control. This test gives a stripped value of 5-7% (i.e. 93-95% adhering). The manager is now sufficiently confident of the laboratory's results to sign and issue the test report and explain the aggregate's 'test failure' to the client.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- Australian code of good manufacturing practice for medicinal products (GMP)
- calibration and maintenance schedules
- enterprise recording and reporting procedures
- equipment manuals
- equipment startup, operation and shutdown procedures
- MSDS and safety procedures
- material, production and product specifications
- national measurement regulations and guidelines
- principles of good laboratory practice (GLP)
- production and laboratory schedules
- quality manuals
- standard operating procedures (SOPs)

Concepts of metrology

Concepts of metrology may include:

- that all measurements are estimates
- measurements belong to a population of measurements of the measured parameters

RANGE STATEMENT	
	<ul style="list-style-type: none"> • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Preparation of samples	<p>Preparation of samples may include:</p> <ul style="list-style-type: none"> • sub-sampling or splitting using procedures, such as riffing, coning and quartering, manual and mechanical splitters • diluting samples • physical treatments, such as ashing, dissolving, filtration, sieving, centrifugation and comminution • moulding, casting or cutting specimens
Typical tests carried out by laboratory/field assistants	<p>Typical tests carried out by laboratory/field assistants may include:</p> <ul style="list-style-type: none"> • visual/optical tests of appearance, colour, texture, identity, turbidity, refractive index (alcohol content and Baume/Brix) • physical tests: <ul style="list-style-type: none"> • density, specific gravity and compacted density • moisture content and water activity • particle size, particle shape and size distribution • chemical tests: <ul style="list-style-type: none"> • gravimetric • colorimetric • electrical conductivity (EC) and pH • specific ions using dipsticks and kits • nutrients (e.g. nitrates and orthophosphates) using basic kits • ashes, including sulphated ashes • biological/environmental tests: <ul style="list-style-type: none"> • pH, oxygen reduction potential (ORP), dissolved oxygen (DO) and (EC) • E coli using test kits

RANGE STATEMENT	
	<ul style="list-style-type: none"> • surface hygiene/presence of microbes • packaging tests: <ul style="list-style-type: none"> • tearing resistance, bursting strength and impact resistance • permeability and/or leakage • mechanical tests: <ul style="list-style-type: none"> • Emerson class • concrete slump
Measurements	<p>Measurements may include:</p> <ul style="list-style-type: none"> • simple ground surveys • meteorological parameters, such as wind direction/strength, rainfall, maximum/minimum temperature, humidity and solar radiation • simple background radiation survey • production/process parameters, such as temperature, flow and pressure • gas levels in a confined space
Common measuring equipment	<p>Common measuring equipment may include:</p> <ul style="list-style-type: none"> • dimension apparatus • DO and EC • analogue and digital meters and charts/recorders • basic chemical and biological test kits • dipsticks and site test kits (e.g. HACK) • timing devices • temperature measuring devices, such as thermometers and thermocouples
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • electric shock • biohazards, such as microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals, such as sulphuric acid, fluorides and hydrocarbons • aerosols • sharps, broken glassware and hand tools

RANGE STATEMENT	
	<ul style="list-style-type: none"> • flammable liquids • dry ice and liquid nitrogen • fluids under pressure • sources of ignition • occupational overuse syndrome, slips, trips and falls • manual handling, working at heights and working in confined spaces • crushing, entanglement and cuts associated with moving machinery or falling objects
Enterprise controls to address hazards	<p>Enterprise controls to address hazards may include:</p> <ul style="list-style-type: none"> • use of MSDS • use of signage, barriers and service isolation tags • use of personal protective equipment, such as hard hats, hearing protection, sunscreen lotion, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • use of appropriate equipment, such as biohazard containers and cabinets and laminar flow cabinets • recognising and observing hazard warnings and safety signs • labelling of samples, reagents, aliquoted samples and hazardous materials • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions, and enterprise procedures and regulations • cleaning and decontaminating equipment and work areas regularly using recommended procedures • following established manual handling procedures for tasks involving manual handling
Minimising environmental impacts	<p>Minimising environmental impacts may involve:</p> <ul style="list-style-type: none"> • recycling of non-hazardous waste, such as chemicals, batteries, plastic, metals and glass • appropriate disposal of hazardous waste • correct disposal of excess sample/test material • correct storage and handling of hazardous

RANGE STATEMENT	
	chemicals
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Safely use laboratory chemicals, glassware and equipment	1.1. Apply appropriate safety precautions for use of laboratory equipment and hazardous chemical materials 1.2. Use appropriate laboratory glassware and measuring equipment 1.3. Clean and store glassware and equipment in accordance with enterprise procedures
2. Make up working solutions	2.1. Identify the relevant standard methods for solution preparation 2.2. Assemble specified laboratory equipment 2.3. Select and prepare materials and solvent of specified purity 2.4. Measure appropriate quantities of reagents for solution preparation and record data 2.5. Prepare labels and log solution details in laboratory register 2.6. Transfer solutions to appropriately labelled containers
3. Check existing stock of solutions	3.1. Monitor shelf life of working solutions according to laboratory procedures 3.2. Replace out-of-date or reject solutions according to laboratory procedures 3.3. Conduct routine titrimetric analyses, if appropriate, to determine if solutions are fit for purpose

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using appropriate materials, equipment and procedures to prepare solutions
- following appropriate occupational health and safety (OHS), and hygiene procedures, if appropriate
- using all equipment safely and efficiently
- using enterprise procedures to calculate concentrations
- identifying solutions not fit for use
- using titrations to determine the concentration of solutions
- labelling, storing and disposing of solutions appropriately
- recording and presenting data appropriately

Required knowledge

Required knowledge includes:

- relevant biological, chemical, food and laboratory terminology
- principles of metrology
- the international system of units (SI)
- concentration terms, such as % w/w, % w/v, % v/v, ppm (mg/L) and molarity
- basic theory of acids, bases, salts, buffers and neutralisation
- enterprise procedures for preparing solutions
- calculations required to prepare specified amounts of solutions of specified concentration
- appropriate OHS procedure for preparing, handling and disposal of solutions
- use of material safety data sheets (MSDS)
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • prepare working solutions in compliance with relevant standards, appropriate procedures and/or enterprise requirements • follow OHS procedures to safely use laboratory chemicals glassware and equipment • make up working solutions according enterprise procedures • check existing stocks of solutions as being fit for purpose.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data</i> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment and reagents • SOPs and testing methods • access to appropriate containers and storage facilities.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • inspection of solutions prepared, labelled and stored by the candidate • review of solution records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate preparing working solutions • oral or written questioning. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>When starting materials used for the manufacture of common household materials are in transit from the supplier to the manufacturer, they may degrade if subjected to conditions, such as heat, moisture, light and oxygen. Even when the supplier ships quality materials to the manufacturing plant, the materials may be sub-standard when they arrive. Quality control tests are designed to test starting materials to ensure they are within specification. For example, aspirin forms salicylic acid when stored under adverse conditions. Laboratory assistants prepare and monitor the quality of solutions, such as ferric chloride solution, which gives an intense violet colour when added to salicylic acid but gives no colour with aspirin. Absence of the violet colouration indicates that breakdown of the aspirin hasn't occurred.</p> <p>Biomedical</p> <p>A laboratory assistant made up 1 litre of buffer solution using buffer tablets and a 1 litre volumetric flask as specified in the method. To ensure the solution was suitable for use the assistant measured the pH and found it was within acceptable range. The assistant then appropriately labelled a storage vessel and stored the buffer according to requirements. By following enterprise procedures the shelf life of the buffer was maximised.</p>

EVIDENCE GUIDE**Environmental**

An environmental laboratory is contracted to determine the acidity of water samples taken from local lakes and streams. A laboratory assistant is required to make up small batches of 0.01M sodium hydroxide and to determine its concentration by titrating it against a standard solution of potassium acid phthalate using phenolphthalein indicator. This procedure is carried out monthly to ensure that the concentration of the sodium hydroxide solution is accurately known. Alternatively, the laboratory assistant may be required to prepare and standardise a fresh batch of sodium hydroxide on a monthly basis. In this case, he/she must understand the underpinning knowledge of basic acid/base theory, potential problems of interferences (such as slow absorption of carbon dioxide by sodium hydroxide solution) so as to ensure that the concentrations of workup solutions are accurately known. He/she must also be skilled in calculating and performing dilution when required to prepare such low concentrations (0.01M) of working solutions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2163-2000 Laboratory glassware - Measuring cylinders
 - AS 2165-1996 Laboratory glassware - Burettes AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- Australian code of good manufacturing practice for medicinal products (GMP)
- calibration and maintenance schedules
- enterprise recording and reporting procedures
- equipment manuals
- equipment startup, operation and shutdown procedures
- MSDS and safety procedures
- material, production and product specifications
- national measurement regulations and guidelines
- principles of good laboratory practice (GLP)
- production and laboratory schedules
- quality manuals

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare culture media	1.1. Prepare mixture of media and solvent to ensure solution and even settling of heat soluble materials 1.2. Label media to allow tracking in subsequent processes 1.3. Use a vessel large enough to endure adequate mixing and heating of the media 1.4. Dispense media into vessels for sterilisation, leaving room for expansion during heating and cooling
2. Sterilise media	2.1. Load the steriliser in keeping with maximum permitted loads and appropriate positioning of materials 2.2. Ensure a sterilisation indicator is correctly placed with the load to monitor sterilisation process 2.3. Operate sterilisation cycle in accordance with manufacturer's requirements to achieve sterilisation at the required settings 2.4. Cool media to the temperature specified in the media formulation procedures
3. Pour, label and store media	3.1. Add labile constituents where necessary, under conditions that will not lead to their denaturation or contamination of media 3.2. Ensure even mixing of additives and media before dispensing 3.3. Aseptically dispense media to minimise occurrence of procedural contamination 3.4. Label media to allow for selection, avoiding areas of the culture vessel required for examination of colony growth 3.5. Store media to maximise shelf life and minimise contamination 3.6. Date batch media to ensure correct batch rotation 3.7. Incubate control plates as a sterility check
4. Perform quality control checks	4.1. Inspect media for any evidence of possible contamination or problems with structure or sterilisation 4.2. Check useability of selective media by growth of expected organism 4.3. Check stored stocks at regular intervals for conformance to required standards

ELEMENT	PERFORMANCE CRITERIA
5. Maintain work area and equipment to prevent cross-infection and contamination	5.1. Use personal protective equipment and safe work practices to ensure safety of self and others 5.2. Place disposable and reusable items into relevant receptacles 5.3. Clean and disinfect work area and equipment after use 5.4. Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- calculating mass and volume
- measuring accurately
- making media to support growth of the relevant micro-organism or tissue
- preventing cross-contamination
- following enterprise procedures consistently
- labelling and storing culture media according to enterprise procedures
- accurately recording data
- reporting non-compliance, anomalies or out of specification results
- sorting, collecting, treating, recycling or disposing of waste
- using appropriate personal protective equipment

Required knowledge

Required knowledge includes:

- basic microbiological concepts and terminology such as growth rates in culture, production of gas and haemolysis of red cells in media
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- the purpose, content and features of culture media and the relationship between the correct preparation of culture media and the optimal growth of organisms or cells
- nature, properties and use of a range of biological media
- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- the importance of physical requirements, such as pH and temperature on optimal growth of organisms and cells
- the effect of inappropriate storage on culture media quality and performance
- cleaning and sanitising requirements of equipment and work area
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure candidates can:</p> <ul style="list-style-type: none"> • prepare culture media which is free of contamination to facilitate the optimal growth of organisms and cells • use appropriate sterilisation techniques, such as maintaining adequate space between containers • perform post-sterilisation procedures, such as dispensing or adding using aseptic technique • ensure the sterilised media has cooled down sufficiently to ensure that heat labile constituents, such as blood, hormones or antibodies are not inactivated when added to the media • consistently follow enterprise procedures • report non-compliances, anomalies or out of specification results.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL973004A Perform aseptic techniques.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • work schedule and enterprise procedures, including advice on safe work practices • relevant equipment and personal protective equipment • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of quality assurance results and examination of batches of media prepared by the candidate • observation of the candidate preparing culture media • written and/or oral questioning to assess underpinning knowledge.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Food processing</p> <p>A laboratory assistant's task was to prepare and pour agar plates in readiness for milk sampling. The assistant collected all the equipment and material needed to make an agar plate and ensured the working area was suitably prepared. The agar solution was carefully prepared and poured into a large conical flask prior to sterilisation in the autoclave. On completion of the sterilisation cycle, the agar was cooled to 42°C in a water bath. It was then poured into the plates after flaming the neck of the flask. The lids were quickly replaced on the plates to minimise contamination. The plates were then stored. Any excess plates were bagged in a laminar flow unit and then placed in the fridge. The equipment was hot washed and the benches swabbed with 70% ethanol solution.</p> <p>Biomedical</p> <p>Media preparation is a routine task of the technical assistant. The methods and standard procedures are all documented but common working knowledge and standard 'don'ts' are not always written into the methods. Some ingredients, such as labile nutrients and antibiotics must be added under sterile conditions after the basic ingredients have been mixed and autoclaved. In one laboratory there is a list of ingredients not to be</p>

EVIDENCE GUIDE

autoclaved posted on the notice board, in the media recipe book and for good measure, on the autoclave itself. One day, a technical assistant who was preparing media added all the ingredients, including the glucose, then autoclaved all 20L of it. The technical assistant learned the consequences of not paying full attention to the procedure the hard way and spent most of the day removing the 'toffee' residue from inside the autoclave!

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes procedures and/or enterprise requirements

Standards, codes procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4187:2003 Cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment and maintenance of associated environments in health care facilities
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- Australia New Zealand Food Standards (ANZFS) Code
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Dangerous Goods Code
- client and product specifications
- HB 9-1994 Occupational personal protection
- manufacturer's instructions or verbal direction from laboratory manager, supervisor or senior technician
- material safety data sheets (MSDS)
- National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)]
- occupational health and safety (OHS) national standards and codes of practice
- operation and maintenance manuals for

RANGE STATEMENT	
	automated media preparation equipment <ul style="list-style-type: none"> • principles of good laboratory practice (GLP) • production schedules and instructions • standard operating procedures (SOPs)
Equipment	Equipment may include: <ul style="list-style-type: none"> • balance • pH meter • hot plate stirrer and Bunsen burners • autoclave and Arnold steamer • membrane filtration equipment • measuring cylinders, flasks and glassware and Petri dishes • distilled water apparatus • automatic agar pourers • labelling equipment • refrigerators • sterilisation indicators • self-refilling syringes • Falcon dishes • media storage bottles and tissue culture bottles
Media	Media maybe prepared from: <ul style="list-style-type: none"> • formulated powders obtained from microbiological companies • first principles under supervision of a technical officer or scientist
Cell and tissue culture media	Cell and tissue culture media may include: <ul style="list-style-type: none"> • agars • broths • solutions • slopes • basic balanced salt solutions, such as Hank's or Krebs-Ringer's • deeps • enriched media, such as blood sugar, chocolate agar, tetrathionate broth and selenite broth • control media • differential media, such as eosin-methylene blue agar and MacConkey's agar • selective media, such as deoxycholate-citrate

RANGE STATEMENT	
	agar, Lowenstein-Jensen medium <ul style="list-style-type: none"> • tissue culture media • labile constituents, such as blood, hormones or antibodies
Sterilisation techniques	Sterilisation techniques may include: <ul style="list-style-type: none"> • autoclaving • steam and membrane filtration • boiling • microwaving • radiation • high temperature • high pressure steam • gas • chemical treatments
Quality control checks	Quality control checks may include: <ul style="list-style-type: none"> • streaking out of cultures to a single colony • lawn cultures
Hazards	Hazards may include: <ul style="list-style-type: none"> • micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • sources of heat, such as ovens, burners and autoclaves • sharps and broken glassware • fluids under pressure and such as steam • radiation used for sterilisation
Safe work practices	Safe work practices may include: <ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as safety glasses, gloves and coveralls • use of biohazard containers and laminar flow cabinets • correct labelling of reagents and hazardous materials • handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • allowing the chamber pressure of the autoclave

RANGE STATEMENT	
	<p>to return to zero and temperature to cool to 80-90°C before opening autoclave door to prevent boil over or plugs/caps being blown off flasks or tubes</p> <ul style="list-style-type: none"> regular cleaning and/or decontaminating equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time all operations assume the potentially hazardous nature of samples and require standard precautions to be applied where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for aseptic sampling or transfer	1.1. Ensure that any sampling procedure conforms with the requirements of the sampling plan 1.2. Use specified personal protective clothing and equipment 1.3. Prepare the work area for safe and effective sample transfer 1.4. Select equipment and materials specified by the procedure 1.5. Organise equipment to minimise contamination during manipulations 1.6. Label containers for clear identification 1.7. Record details in relevant log or database
2. Transfer materials aseptically	2.1. Protect the integrity of the sample source by sterilising the sampling site and the mouth of transport or culture vessel 2.2. Sterilise inoculating loops and/or pipette where used to prevent contamination 2.3. Perform transfer while minimising opportunities for contamination and cross-infection 2.4. After transfer, and before sealing the transport or culture vessel, flame the vessel mouth to maintain sterility 2.5. Re-sterilise inoculating loops, minimising the generation of aerosols 2.6. Perform quality control checks, if required 2.7. Label transport or culture vessels for clear identification
3. Maintain work area and equipment to prevent cross-infection and contamination	3.1. Place disposable and reusable items into relevant receptacles 3.2. Clean and disinfect work area and equipment after use 3.3. Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- sterilising equipment such as flasks, loops and pipettes
- handling of laboratory equipment and glassware to prevent contamination
- streak plating of inoculations
- sampling transfers
- labelling and storing culture media according to enterprise procedures
- recording data accurately
- reporting non-compliance, anomalies or outofspecification results
- sorting, collecting, treating, recycling or disposing of waste
- following enterprise procedures consistently
- using appropriate personal protective equipment

Required knowledge

Required knowledge includes:

- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- cleaning and sanitising requirements of equipment and work area and effects of physical and chemical agents on microbial growth and death
- principles of infection control related to occupational health and safety (OHS), sampling and transfer of materials in microbiological investigations
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Food processing:

- food spoilage symptoms
- food safety principles
- beneficial/detrimental organisms relevant to specific food industry sector

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>In particular, assessors should look to see that the candidate:</p> <ul style="list-style-type: none"> • follows established laboratory procedures, including recording of samples, operation of equipment and cleaning/decontamination • prevents cross-contamination of sample source and sample • manipulates equipment to prevent contamination of culture medium during transfer • sterilises equipment as required to prevent cross-contamination of work area, personnel and environment.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL973003A Prepare culture media.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory with appropriate equipment and materials • enterprise procedures and standard methods • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of quality assurance results and examination of samples transferred by the candidate • observation of the candidate successfully transferring a range of samples • written and/or oral questioning to assess underpinning knowledge. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Food processing</p> <p>As part of the quality assurance program at an ice-cream manufacturer, six ice-creams were removed from the production line, placed in sterile bags and then stored in a freezer in the microbiology laboratory. Later in the morning, the laboratory assistant removed the samples from the freezer, registered the samples with the date received and test code and signed the register book. She/he then placed the samples in a water bath set at 42(C. While the samples were melting, the laboratory assistant labelled the respective agar plates with the registered codes. Using aseptic techniques she/he carefully transferred 1ml of ice-cream mix into the total plate count agar. The plates were then placed in the incubator. The final results were noted and recorded.</p> <p>Biomedical</p> <p>In preparation for antibiotic sensitivity testing and biochemical identification of presumed pathogenic bacteria, a technical assistant was asked to prepare a sterile peptone suspension of a lactose fermenting colony. The colony had been previously identified by the supervisor on a MacConkey's agar plate. The assistant labelled a 5mL tube of peptone broth with the sample number and a code for the identified colony and then donned a pair of disposable gloves. Bringing the labelled tube and the MacConkey's plate near to the Bunsen, she/he took an inoculating loop and sterilised it in the</p>

EVIDENCE GUIDE

incandescent flame. She/he carefully cooled the loop in a sterile area of the agar and gently scraped off half the colony. With the other hand, and in the vicinity of the heated air of the Bunsen, she/he removed the cover of the peptone tube in her/his crooked finger. In a continuous and coordinated way she/he flamed the lip of the tube and emulsified the colony in the broth. She/he then flamed the lip of the tube and replaced its cover. Finally, the technical assistant re-sterilised the inoculating loop by introducing and holding it in the Bunsen flame to minimise the generation of bacterial aerosols.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret test requirements	1.1. Review test request to identify samples to be tested, test method and equipment involved 1.2. Identify hazards associated with the sample, preparation methods and equipment and implement enterprise control measures
2. Set up work area for preparation and examination of samples	2.1. Collect equipment and arrange the workspace so that equipment can be used safely and efficiently 2.2. Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel
3. Prepare samples for examination	3.1. Log and label samples according to enterprise procedures to ensure traceability 3.2. Check suitability of the original and prepared sample for the examination and report unsuitable samples to appropriate personnel 3.3. Prepare and store the sample for examination following enterprise methods
4. Set up and use a light microscope	4.1. Set up the light path to optimise resolution 4.2. Select the appropriate objectives and filter for the sample being examined 4.3. Ensure that the lenses are clean 4.4. Adjust settings and alignment of the light path to optimise performance 4.5. Place sample correctly on the stage
5. Observe, identify and report sample characteristics	5.1. Recognise and identify significant sample characteristics 5.2. Perform required calculations accurately 5.3. Prepare and view control samples and check that results are consistent with expected values 5.4. Identify and report out of specification or atypical results promptly to appropriate personnel 5.5. Record and report data in accordance with enterprise procedures
6. Maintain a safe work environment	6.1. Ensure safety and minimise cross-contamination through the use of personal protective clothing and safety equipment 6.2. Handle all samples and equipment in accordance with enterprise safety protocols 6.3. Clean up spills using appropriate techniques to

ELEMENT	PERFORMANCE CRITERIA
	protect personnel, work area and environment 6.4.Minimise generation of waste and environmental impacts 6.5.Collect and dispose of all wastes safely 6.6.Report hazards and incidents to designated personnel using enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- setting up the workbench and microscope ergonomically
- setting up, cleaning and using a light microscope to achieve optimum resolution of the specimen
- using personal protective clothing and other safety equipment correctly
- performing counts on samples
- performing basic measurements using grids
- logging and tracking samples through all steps from receiving a sample through to completion of a procedure and reporting
- interpreting and recording test results, including simple calculations
- correctly handling and storing samples and equipment

Required knowledge

Required knowledge includes:

- parts and functions of a light microscope
- importance and appropriate use of controls and certified reference materials
- hazards and risks in laboratories associated with performing microscopic examination
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biological industry:

- basic structure and function of cells and organelles
- basic classes and classification of organisms of organisms, such as prokaryotes, eukaryotes, plants, animals, bacteria, viruses and prions
- cell physiology and processes, such as simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- purposes and mechanisms of staining (e.g. Gram +ve and -ve)

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow enterprise standards, procedures and practices • prepare suitable samples • recognise, identify and document significant sample characteristics • set up a light microscope for optimal resolution • maintain personal safety and that of others • minimise cross-contamination and contamination of the laboratory and environment.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data</i> • <i>MSL933002A Contribute to the achievement of quality objectives</i> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL953001A Receive and prepare samples for testing.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment, such as light microscopes and samples • enterprise procedures, standard methods and materials.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the candidate performing microscopic examinations • review of data records prepared by the candidate, such as counts, observations and results • feedback from supervisors and peers about adherence to enterprise/technical procedures • questioning to assess underpinning knowledge.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Construction materials testing</p> <p>The supply of river sand is running out and quarries are accessing alternative sources of sand for use in concrete mixes in construction. The sand should not be an aggregate that is likely to break down into smaller particles. A technician in a quarry company is required to analyse samples of crushed rock using a light microscope. The technician looks for characteristics of the sample, such as angularities, roundness, sharpness, cracks, presence of organic matter, mineral structure and whether the particles are a conglomerate. If the sample does not meet the characteristics, the company will need to treat it to make it suitable for use in concrete mixes (for example by washing, crushing and sieving).</p> <p>Food processing</p> <p>A customer complaint is received about the baking properties of a flour delivery. The laboratory assistant at the flour mill is given the task of testing the starch content of the suspect flour. He/she prepares iodine stained samples of the returned flour and a range of baked and partially baked products prepared from it. First, the assistant makes up fresh iodine staining solution and then prepares slides of each sample for microscopic examination. He/she identifies the</p>

EVIDENCE GUIDE

characteristic starch granules of the flour sample and records the degree of gelatinisation in the starch granules in the baked samples. He/she discusses the results with the supervisor and prepares a report for the customer.

Biomedical

A laboratory assistant works in the microbiology laboratory of a public hospital and is responsible for preparing and staining sputum smears from patients for micro and culture. The assistant puts on a clean gown and gloves before collecting the specimens from the reception area of the laboratory. The assistant prepares cultures of the sputum specimens on simple and selective media before preparing, fixing and staining smears for microscopic examination. The results are checked by the supervisor, entered into the laboratory information management system (LIMS) and sent to the appropriate section of the hospital.

Environmental

A laboratory assistant prepares media for plant tissue culture. There has been some contamination of Gram-positive bacteria in the last two batches and the supervisor has initiated an overhaul of the preparation and aliquotting procedure. The laboratory assistant has been asked to follow the new procedure exactly and to remove samples at each stage of ingredient addition for microscopic examination. The laboratory assistant records the exact addition amounts, batch numbers and brands of the reagents, the location of the addition (which biohazard cabinet), the equipment used and the pre-sterilisation records of all equipment.

The laboratory assistant then prepares slides, fixes them and performs a Gram stain on each of the aliquots removed from the new preparation run. Microscopic analysis of each aliquot reveals nil contamination. The supervisor decides that there has been a breach in the old procedure and the laboratory assistant is asked to follow the new procedure and to perform a routine microscopic check on all batches for the next month.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS ISO 9000 Set:2008 Quality management systems set
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- principles of good laboratory practice (GLP)
- Australian code of good manufacturing practice for medicinal products (GMP)
- safety manuals
- quality manuals and equipment and procedure manuals
- standard operating procedures (SOPs)
- material safety data sheets (MSDS)
- enterprise recording and reporting procedures
- production and laboratory schedules
- material, production and product specifications

Preparation of samples

Preparation of samples may include:

- aseptic transfer of specimen
- centrifugation
- cooling
- drying
- filling a counting chamber in one continuous flow without bubbles or overflow
- filtration

RANGE STATEMENT	
	<ul style="list-style-type: none"> • fixing of films to minimise cell damage and the production of artefacts • labelling • mounting of stained films, sections and whole mounts to ensure long term preservation • permanent labels for smears, films and sections for presentation, storage and retrieval • physical or chemical separation • selection of diluent to preserve or enhance visibility of the cells to be counted • selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling • serial dilution to enable individual cells to be reliably counted • staining of fixed material to illustrate required characteristics • sub-sampling • thin film or smear on a slide
Checking sample condition	<p>Checking sample condition may include:</p> <ul style="list-style-type: none"> • labelling • spillage • spoilage due to incorrect storage and transport conditions • temperature control • suitability for the examination
Pre-use checks	<p>Pre-use checks may include:</p> <ul style="list-style-type: none"> • calibration • cleaning/checking use by dates of reagents • routine maintenance
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • glass slides • counting chambers (e.g. haemocytometer) • optical graticules and stage micrometers • tissue culture flasks
Light microscopes	<p>Light microscopes may include:</p> <ul style="list-style-type: none"> • bright field illumination microscopic examination up to 1000x magnification • stereomicroscopes and dissection microscopes

RANGE STATEMENT	
	<ul style="list-style-type: none"> • compound microscopes • phase contrast microscopes • inverted microscopes
Biological samples	<p>Biological samples may include:</p> <ul style="list-style-type: none"> • smears, impression smears, sections, squashes, films and whole mounts • a monolayer of cells in smears and films • fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques • blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes • stained sections of animal tissues using regressive haematoxylin and eosin to differentiate cytoplasmic and nuclear detail • differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium) • stained whole mounts of helminths • whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae • pond water organisms • onion root tip squash • midstream sample of urine
Physical samples	<p>Physical samples may include:</p> <ul style="list-style-type: none"> • sand • asbestos fibres • coal samples • construction testing materials • geological specimens
Checking prepared samples	<p>Checking prepared samples may include looking for:</p> <ul style="list-style-type: none"> • clean and scratch-free microscope slides to reduce artefacts • preparation according to SOPs • a homogeneous suspension of sample • films and smears that have been fixed rapidly

RANGE STATEMENT	
	<ul style="list-style-type: none"> • thin films with a monolayer of cells • appropriate whole mounts for intact organisms • correct sample identification during and after processing
Sample characteristics	<p>Sample characteristics are restricted to what can be viewed by bright light microscopy and may include:</p> <ul style="list-style-type: none"> • shape and size of particles • presence of contamination • colour • consistency and variability • number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains) • type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory • presence of stained material, such as starch • colour/staining and morphology • motility
Calculations	<p>Calculations may include:</p> <ul style="list-style-type: none"> • dilutions • percentage viability • number of cells in original sample after dilution • calculation of cells/ml in a number of squares of a counting chamber
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • micro-organisms and agents associated with soil, air, water, blood and blood products and human or animal tissue and fluids • chemicals and stains • sharps and broken glassware • aerosols
Safety practices and personal protective equipment	<p>Safety practices and personal protective equipment may include:</p> <ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as safety glasses, gloves and coveralls

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of biohazard containers and laminar flow cabinet • correct labelling of reagents and hazardous materials • handling and storing hazardous materials and equipment in accordance with labels, MSDS and manufacturer's instructions • ergonomic layout, correct illumination and organisation of workbench • regular cleaning and/or decontamination of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Co-requisite units

Co-requisite units		

MSL974004A Perform food tests

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to interpret food test requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine testing of raw food materials, in-process materials and final products. These tests will involve several measurement steps. The unit includes data processing and some interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent.
------------------------	---

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory or technical assistants and instrument operators working in the food and beverage processing industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and schedule test requirements	1.1. Review test request to identify samples to be tested, test method and equipment/instruments involved 1.2. Identify hazards and enterprise controls associated with the sample, preparation/test methods, reagents and/or equipment 1.3. Plan parallel work sequences to optimise throughput of multiple sets of samples, if appropriate
2. Receive and prepare food samples	2.1. Log samples using standard operating procedures (SOPs) 2.2. Record sample description, compare with specification and note and report discrepancies 2.3. Prepare samples and standards in accordance with food testing requirements 2.4. Ensure traceability of samples from receipt to reporting of results
3. Check equipment before use	3.1. Set up equipment/instruments in accordance with test method requirements 3.2. Perform pre-use and safety checks in accordance with relevant enterprise and operating procedures 3.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 3.4. Check equipment calibration using specified standards and procedures, if applicable 3.5. Quarantine out of calibration equipment/instruments 3.6. Ensure reagents required for the test are available and meet quality requirements
4. Test samples to determine food components and characteristics	4.1. Operate equipment/instruments in accordance with test method requirements 4.2. Perform tests/procedures on all samples and standards, if appropriate, in accordance with specified methods 4.3. Shut down equipment/instruments in accordance with operating procedures
5. Process data	5.1. Record test data noting atypical observations 5.2. Construct calibration graphs, if appropriate and compute results for all samples from these graphs 5.3. Ensure calculated values are consistent with reference standards and expectations 5.4. Estimate and document uncertainty of measurement

ELEMENT	PERFORMANCE CRITERIA
	<p>in accordance with enterprise procedures, if required</p> <p>5.5. Record and report results in accordance with enterprise procedures</p> <p>5.6. Interpret trends in data and/or results and report out of specification or atypical results promptly to appropriate personnel</p> <p>5.7. Determine if basic procedure or equipment problems have led to atypical data or results</p>
6. Maintain a safe work environment	<p>6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel</p> <p>6.2. Minimise the generation of wastes and environmental impacts</p> <p>6.3. Ensure the safe collection of laboratory and hazardous waste for subsequent disposal</p> <p>6.4. Care for and store equipment and reagents as required</p>
7. Maintain laboratory records	<p>7.1. Enter approved data into laboratory information management system (LIMS)</p> <p>7.2. Maintain confidentiality and security of enterprise information and laboratory data</p> <p>7.3. Maintain equipment and calibration logs in accordance with enterprise procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using instruments for qualitative and/or quantitative analysis
- interpreting test methods and procedures
- sample preparation procedures
- performing calibration checks
- using instruments for qualitative and/or quantitative analysis
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- calculations to estimate uncertainty and produce results
- preparing calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

Required knowledge

Required knowledge includes:

- principles and concepts underpinning the test/procedure
- purpose of tests
- metrology techniques underpinning test/procedure including uncertainty
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument
- effects on the test of modifying equipment/instrument variables
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • interpret test methods/procedures accurately • prepare and test samples using procedures appropriate to the nature of sample • perform calibration checks (if required) • safely operate test equipment/instruments to enterprise standards and/or manufacturer's specification • prepare calibration graphs and calculate results using appropriate units and precision • apply basic theoretical knowledge to interpret gross features of data and make relevant conclusions • identify atypical results as out of normal range or an artefact • trace and source obvious causes of an artefact • communicate problems to a supervisor or outside service technician • record and communicate results in accordance with enterprise procedures • maintain security, integrity, traceability of samples, sub-samples, test data/results and documentation.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with test equipment, instruments, standards and materials • enterprise procedures and standard methods.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of test data/results obtained by the candidate over a period of time to check accuracy, consistency and timeliness of results

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • review of test records and workplace documentation completed by the candidate • observation of candidate conducting a range of food tests and procedures and sample preparation • feedback from peers and supervisors • oral or written questioning of food technology concepts and principles, test methods and enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Food processing</p> <p>A technician was required to conduct an analysis of the level of sorbic acid in samples of processed cheese. She/he set up and calibrated the distillation unit while the samples were prepared. The controls and samples were distilled and placed in the spectrometer at 260 nm. Readings were carefully recorded for each sample and control flask. The control sample readings at the beginning and end of the testing period were compared for any variance. The technician worked quickly and excluded light from the reactants as they were light sensitive. Analytical data was presented to the supervisor for checking and signing-off for release of the product batch prior to the results being recorded on a daily run chart for viewing by production personnel.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1766.0-1995 Food microbiology - General introduction and list of methods
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS ISO 9000 Set:2008 Quality management systems set
 - ISO/TS 19036 Set:2006 Microbiology of food and animal feeding stuffs - Guidelines for the estimation of measurement uncertainty for quantitative determinations
- Australia New Zealand Food Standards (ANZFS) Code
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations 1982
- Australian Quarantine and Inspection Service (AQIS) Import Guidelines
- calibration and maintenance schedules
- data quality procedures
- enterprise recording and reporting procedures

RANGE STATEMENT	
	<ul style="list-style-type: none"> • equipment startup, operation and shutdown procedures • gene technology regulations • industry standards, such as Royal Australian Chemical Institute (RACI) or American Association of Cereal Chemists (AACI) methods for colour, moisture, total ash, fats and proteins, nitrogen, fibre, micro-organisms and viscosity • material safety data sheets (MSDS) • material, production and product specifications (including maximum residue levels) • national measurement regulations and guidelines • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals, equipment and procedures manuals • SOPs and in-house methods • Therapeutic Goods Regulations 1009
Sample preparation processes	<p>Sample preparation processes may include:</p> <ul style="list-style-type: none"> • grinding • milling • preparation of discs • dissolving • ashing • refluxing • extracting • filtration • evaporation • flocculation • precipitation and centrifugation • culturing of selected micro-organisms • digestion • degassing • temperature equilibration
Principles and concepts underpinning the test/procedure	<p>Principles and concepts underpinning the test/procedure may include:</p> <ul style="list-style-type: none"> • ions, atoms, molecules, bonding, affinities and related properties

RANGE STATEMENT

	<ul style="list-style-type: none"> • chemical reactions (acid/base and complexiometric) • structure and properties of proteins, lipids, carbohydrates, vitamins and minerals • food additives, flavourings and essences • nutrient value of major food groups • interaction of water with food components • microbiology, including incubation characteristics, selective media, growth stages of bacterial cultures and reference organisms • microbiology of organisms with public health significance • chemical and microbial changes in food • food preservation techniques • fermentation process • packaging and controlled atmosphere • elastic properties of materials and hardness • cohesive/adhesive forces, fluid flow and viscosity • changes of state, energy content and enthalpy change • electromagnetic spectrum and absorption, emission and refraction of light • quality control program for raw materials, process control and finished product inspection • genetically modified foods
Food tests and procedures	<p>Food tests and procedures may include:</p> <ul style="list-style-type: none"> • visual and sensory tests: <ul style="list-style-type: none"> • appearance, taste, texture, colour and odour of foods • melting point, boiling point and freezing point • sediments and scorched particles • foreign matter • damage to packaging and compatibility of packaging • dispersability • chemical analysis: <ul style="list-style-type: none"> • pH, conductivity and moisture content • solids, fats, proteins and carbohydrates

RANGE STATEMENT

	<ul style="list-style-type: none"> • ash analysis and salt analysis • titratable acids, iodine values and peroxide values • enzyme activity • specific ions and active ingredients • microbiological tests and procedures: <ul style="list-style-type: none"> • isolation, detection, classification to genera and some species or micro-organisms • enumeration and nomenclature of desirable/non-desirable micro-organisms • propagation and maintenance of yeast, bacteria and cultures used in food processing • measurement of spoilage and contamination • sterility, hygiene and sanitation checks • optical/spectrometric tests: <ul style="list-style-type: none"> • ultraviolet-visible (UV-VIS) spectrophotometry • refractive index • optical rotation • physical/mechanical tests: <ul style="list-style-type: none"> • mass, volume, density, specific gravity and particle size • foreign matter • rheology, viscosity and gel strength • 'wetability' and 'whipability' • homogenisation • browning (sugar content) • elasticity, hardness, compressibility and strength • starch quality • thermal tests: <ul style="list-style-type: none"> • calorific values • stability of products • effectiveness of heat treatments
Tests	<p>Tests may include methods for:</p> <ul style="list-style-type: none"> • control of starting materials, in-process materials and finished products • health monitoring

RANGE STATEMENT	
	<ul style="list-style-type: none"> • basic troubleshooting of production processes
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • microbiological organisms and agents associated with soil, air, water, plants, animal tissue and fluids • chemicals, such as acids, heavy metals, pesticides and hydrocarbons • aerosols from broken centrifuge tubes and pipetting • sharps and broken glassware • flammable liquids and gases • cryogenics, such as dry ice and liquid nitrogen • fluids under pressure, such as steam and industrial gases • sources of ignition • high temperature ashing processes • disturbance or interruption of services
Hazard control measures	<p>Hazard control measures may include:</p> <ul style="list-style-type: none"> • ensuring access to service shut-off points • recognising and observing hazard warnings and safety signs • labelling of samples, reagents, aliquoted samples and hazardous materials • handling and storage of hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • identifying and reporting operating problems or equipment malfunctions • cleaning and decontaminating equipment and work areas regularly using enterprise procedures • using personal protective clothing and equipment, such as gloves, safety glasses, coveralls, gown, body suits and respirators • using containment facilities (PCII, PCIII and PCIV physical containment laboratories), containment equipment (biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures • following established manual handling

RANGE STATEMENT	
	<p>procedures</p> <ul style="list-style-type: none"> reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates to appropriate personnel
Records	<p>Records may include:</p> <ul style="list-style-type: none"> test and calibration results equipment use, maintenance and servicing history faulty or unsafe equipment
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time all operations assume the potentially hazardous nature of samples and require standard precautions to be applied where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and schedule work requirements	1.1. Review work request to identify samples, required procedures and materials/equipment/instruments involved 1.2. Identify hazards and enterprise control measures associated with the sample, preparation methods, reagents and/or equipment 1.3. Plan parallel work sequences to optimise throughput of multiple sets of samples, if appropriate
2. Receive and prepare biological samples	2.1. Log samples using standard operating procedures (SOPs) 2.2. Record sample description, compare with specification and note and report discrepancies 2.3. Prepare samples in accordance with testing requirements 2.4. Ensure traceability of sample from receipt to reporting of results
3. Perform techniques that assist in the classification of a cell or species	3.1. Select suitable techniques in accordance with enterprise requirements and methods 3.2. Set up and use equipment and reagents in accordance with the method 3.3. Perform techniques in accordance with the method
4. Perform techniques that analyse biological activity	4.1. Select suitable techniques in accordance with enterprise requirements and methods 4.2. Set up and use equipment and reagents in accordance with the method 4.3. Perform techniques in accordance with the method
5. Process and interpret data	5.1. Record test data noting atypical observations 5.2. Construct calibration graphs, if appropriate, and compute results for all samples from these graphs 5.3. Ensure calculated values are consistent with expectations 5.4. Record and report results in accordance with enterprise procedures 5.5. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 5.6. Interpret trends in data and/or results and report out of specification or atypical results promptly to appropriate personnel 5.7. Determine if obvious procedure or equipment

ELEMENT	PERFORMANCE CRITERIA
	problems have led to atypical data or results
6. Maintain a safe work environment	6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 6.2. Minimise the generation of wastes 6.3. Ensure the safe disposal of biohazardous wastes 6.4. Clean, care for and store equipment and reagents as required
7. Maintain laboratory records	7.1. Record approved data into enterprise system 7.2. Maintain confidentiality and security of enterprise information and laboratory data 7.3. Maintain equipment and calibration logs in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using instruments for qualitative and/or quantitative analysis
- sample preparation and separation techniques
- performing calibration checks
- metrology techniques underpinning test/procedure including estimating uncertainty
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- preparing and using calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

Required knowledge

Required knowledge includes:

- hazards and risks in biological laboratories
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument and/or reagents
- effects of modifying equipment/instrument variables
- basic equipment/method troubleshooting procedures
- calculation steps to give results in appropriate units and precision
- sources of uncertainty in measurement and methods for control
- importance and appropriate use of controls and certified reference materials
- enterprise and/or legal requirements for traceability
- relevant health, safety and environmental requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • interpret test procedures accurately • prepare and test samples using procedures appropriate to the nature of sample • perform calibration checks (if required) • safely operate test equipment to enterprise standards and/or manufacturer's specification • prepare calibration graphs and calculate results in appropriate units and precision • apply basic theoretical knowledge to interpret gross features of data and make relevant conclusions • identify atypical results as out of normal range or an artefact using reference material or quality control sera • trace and source obvious causes of an artefact • communicate problems to a supervisor or outside service technician • record and communicate results according to enterprise procedures • maintain security, integrity, traceability and identity of samples, sub-samples and documentation • follow OHS procedures and principles of GLP.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data</i> • <i>MSL974003A Perform chemical tests and procedures.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate test equipment and instruments, reagents and materials • SOPs and testing methods.
Method of assessment	<p>The following assessment methods are suggested:</p>

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • review of results obtained by the candidate over a period of time to ensure accuracy, consistency and timeliness • review of testing records and workplace documentation completed by the candidate • observation of candidate conducting a range of biological procedures • feedback from peers and supervisors • oral or written questioning of biological concepts, principles and enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Biomedical (1)</p> <p>A laboratory technician conducts a screening test for parasites in stool samples. She/he checks the sample identification details, cross-checks the sample barcode with the request slip and the data entry in the laboratory information management system (LIMS). The technician locates the test method and then examines the sample container to ensure that it has not leaked and that there is sufficient volume for the test. She/he prepares the sample by adding solvent to a portion and shaking it before placing it in a centrifuge. After satisfactory separation, she/he pipettes a small quantity of the top layer of solvent onto a glass slide and adds iodine as a stain. The technician carefully views the slide using x40</p>

EVIDENCE GUIDE

magnification and searches for eggs. She/he enters a nil result in the LIMS and disposes of the sample in accordance with enterprise procedures.

Biomedical (2)

A technical officer is requested to determine the total protein concentration of a blood sample using colorimetry. After checking the condition of the sample, she/he collects the Biuret reagent from the refrigerator, the required number of tubes and protein control samples and standards specified in the method. The officer labels the tubes and then accurately dispenses the correct volumes of reagent, standards, controls and samples into them. The solutions are thoroughly mixed using a vortex mixer and allowed to stand for five minutes for the reaction to occur. She/he records absorbance readings for each tube and prepares a calibration curve. The officer reads the concentration values from the graph for the control and test samples and checks the control data against the expected values. As these fall within the accepted range, she/he enters the test results into the LIMS.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2134.1-1999 Recommended practice for chemical analysis by atomic absorption spectrometry - Flame atomic absorption spectrometry
 - AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS 3753-2001 Recommended practice for chemical analysis by ultraviolet/visible spectrophotometry

Co-requisite units

Co-requisite units		

MSL975001A Perform microbiological tests

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to contribute to the culture, isolation and identification of micro-organisms, such as bacteria, fungi, viruses, protozoans, algae and parasites in order to investigate the physiology and pathology of plants and animals, monitor the natural environment, and to assist in the production of foods, pharmaceutical goods and other manufactured materials.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory technicians and technical officers working in the biomedical, biotechnology, environmental, manufacturing and food processing industry sectors. The results of work performed by technical personnel would normally be integrated, interpreted and reported on by scientists, medical, veterinary or plant pathologists or other responsible officers of an enterprise. Although a supervisor may not always be present, the technician will follow standard operating procedures (SOPs) that will clearly describe the scope of permitted practice in modifying testing procedures, interpreting of data and for communicating test results to people outside the laboratory.</p> <p>It is applicable to investigations of as well as addressing the broader needs of biotechnology and tissue culture applications.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive samples and process associated request forms	1.1. Check samples and request form details before they are accepted 1.2. Return samples and request forms that do not comply with requirements to source with reasons for non-acceptance 1.3. Log samples, recording details that allow accurate tracking and chain of custody 1.4. Distribute samples for local testing or dispatch samples to other testing facilities 1.5. Store samples appropriately where testing or transport is to be delayed
2. Prepare for safe microbiological work and aseptic applications	2.1. Select work area and equipment required for the safe handling of materials that may contain micro-organisms of specified risk groups 2.2. Wear protective apparel, replacing it when contamination is suspected 2.3. Apply correct disinfection procedures to work areas before and after use 2.4. Locate relevant emergency equipment for timely response to microbiological accidents 2.5. Apply standard precautions when handling biological materials 2.6. Minimise the production and release of aerosols, using biological safety cabinets where necessary 2.7. Clean spills, and report all spills and suspected incidents to supervisor 2.8. Wash hands before and after laboratory work and when contamination is suspected 2.9. Ensure the safe disposal of biohazardous materials and other laboratory wastes in accordance with enterprise procedures
3. Process samples for direct examination	3.1. Prepare thin smears of samples for subsequent staining to enable microscopic identification of cells 3.2. Prepare liquid films of specimens for direct observation for motility or cell structure 3.3. Prepare samples to concentrate material for subsequent staining or microscopy
4. Prepare pure cultures for microbiological work and aseptic	4.1. Select culture media to maximise growth of micro-organisms and cells 4.2. Inoculate media aseptically, applying techniques

ELEMENT	PERFORMANCE CRITERIA
applications	suitable for purpose of culture 4.3. Incubate inoculated media in conditions to optimise growth of organisms and cells 4.4. Subculture on suitable media to optimise production of pure cultures
5. Perform procedures that can assist in the identification of micro-organisms	5.1. Select staining techniques to demonstrate required cellular characteristics 5.2. Stain prepared films to demonstrate diagnostically useful characteristics 5.3. Inoculate and incubate media with pure cultures to assist in the biochemical and immunological identification of micro-organisms 5.4. Perform tests on pure cultures to assist in the biochemical and immunological identification of micro-organisms
6. Estimate the number and/or size of micro-organisms in samples	6.1. Count cells in undiluted samples to indicate the dilution necessary to reliably count organisms in culture 6.2. Prepare serial dilutions of samples aseptically for culture and colony counting 6.3. Count colonies for calculating number of viable organisms per unit volume 6.4. Count micro-organisms in samples and cultures using spectrometric and electronic methodologies, where relevant 6.5. Estimate and document uncertainty of measurement in accordance with enterprise procedures, where relevant
7. Contribute to antibiotic sensitivity testing where required	7.1. Prepare inoculum suitable for antibiotic sensitivity testing 7.2. Dispense or position antibiotic discs as indicated by enterprise protocol 7.3. Incubate inoculated media under conditions to maximise growth of cultured organism 7.4. Read and record sensitivity reactions, noting phenomena that can assist in the correct interpretation of results
8. Maintain records of laboratory work	8.1. Make entries on report forms or into computer systems, accurately calculating, recording or transcribing data as required 8.2. Maintain instrument logs as required by

ELEMENT	PERFORMANCE CRITERIA
	accreditation checklists 8.3.Maintain security and confidentiality of all clinical information, laboratory data and records

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using protective clothing and biological safety cabinets
- safely performing tasks for the culture, isolation, identification and use of micro-organisms
- not contaminating oneself, other people, the work area, equipment or the samples or materials under test
- not contaminating media or reagents during manipulations involving transfer of cultures
- identifying artefacts or image aberrations attributable to misalignment or obstruction of light paths or condensers used in bright field, dark ground, phase and fluorescent microscopy, or with other steps in microscopic examinations
- Gram reactions
- describing bacterial colony forms on common media used in bacteriological investigations
- preparing documentation that is accurate, concise and in accordance with enterprise requirements
- reporting incidents or accidents
- disinfecting spillage and safely disposing of all contaminated materials
- decontaminating the work area upon completion of work

Required knowledge

Required knowledge includes:

- microbiological terminology, including, where relevant, that of bacteriology, parasitology, virology and mycology
- disinfection and sterilisation as applied to practical aspects of microbiology
- microbial diversity
- micro-organisms of importance in medicine, in production of foods and other manufactured goods, and in assessment of the natural environment
- cell biology and chemistry related to laboratory phenomena, such as growth and isolation of organisms for identification
- microbial genetics
- rationale for sample dilution when preparing materials for enumerating organisms and other pure culture work (e.g. Most Probable Number (MPN) technique)
- need for accurate identification of sample source (e.g. body, specimen, process line and field location)
- relevant health, safety and environment requirements

REQUIRED SKILLS AND KNOWLEDGE

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biomedical and biotechnology:

- aspects of normal and abnormal anatomy, physiology, biochemistry and immunology as these pertain to the microbiological investigation of health and disease of animals and plants
- interactions of micro-organisms with hosts
- issues of pathogenicity
- antimicrobial agents and antibiotic susceptibility/sensitivity testing
- use of polymerase chain reaction (PCR) procedures in virology testing
- handling of genetically altered cells
- freezing and thawing of cultured cells
- in tissue culture settings, maintaining the proper growth or storage conditions for the preservation of pure cell culture lines
- maintaining the proper containment and preservation of genetically altered cell lines
- use of micro-organisms in enzyme, vitamin, preservative and amino acid production

Biological and environmental:

- sampling for the microbiological testing of drinking water which should conform to the guidelines published by the National Health and Medical Research Council (NHMRC) and the Australian Water Resources Council
- testing procedures for the microbiological content of water which should be guided by advice of relevant national and state/territory environment protection agencies
- aspects of ecology and other biological disciplines as these pertain to the microbiological investigation of the natural environment
- use of micro-organisms in waste and toxic spill recovery
- use of micro-organisms in site remediation
- identification of micro-organisms to assist in determining the cause, time or nature of pollution

Food processing:

- sampling and test batteries which should conform to relevant food standards code
- aspects of food, pharmaceutical and other relevant processing as these relate to the involvement of micro-organisms in the production process and the microbiological monitoring of the production process
- use of bacteria as probiotics
- multiple resistant antibiotic strains of bacteria and their relevance to the food industry
- importance of hazard analysis and critical control points (HACCP) to production

REQUIRED SKILLS AND KNOWLEDGE

processes

- involvement of bacteria in food spoilage and poisoning
- identification procedures for determining the source of a food poisoning event
- limiting bacterial growth in foods and food preservation

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • safely perform tasks for the culture, isolation, identification and use of micro-organisms • not contaminate him/herself, other people, the work area, equipment or the samples or materials under test • not contaminate media or reagents during manipulations involving transfer of cultures • identify artefacts or image aberrations attributable to misalignment or obstruction of light paths or condensers used in bright field, dark ground, phase and fluorescent microscopy, or with other steps in microscopic examinations • be consistently accurate in the identification of Gram reactions • be consistently accurate in the description of bacterial colony forms on common media used in bacteriological investigations • preparedata and documentation that is accurate, concise and in accordance with enterprise requirements • report all incidents or accidents • disinfectany spillage and safely dispose of all contaminated materials • decontaminate the work area upon completion of work.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL934002A Apply quality system and continuous improvement processes.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • a standard microbiology laboratory with relevant equipment, samples and reagents

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • enterprise procedures, test methods and equipment manuals • under duty of care requirements, off-the-job training providers will only use samples and organisms of a risk category compatible with their laboratory as defined in AS/NZS 2243.3.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of results/data/records generated by the candidate • feedback from peers and supervisors to confirm that enterprise procedures are consistently followed and those results meet workplace requirements • oral and/or written questions associated with laboratory determinations and record keeping • integrated assessment with a case study focus, such as the isolation and identification of bacterial species in a specimen containing two or more species, by relating sample, cultural, morphological and biochemical data, and such from other relevant tests and procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Biomedical</p> <p>A patient's urine sample and request form have been brought to the laboratory for urgent testing. After</p>

EVIDENCE GUIDE

preparation of the work area, the technical officer examines a cover-slipped preparation of the sample and notes the presence of pus cells and non-motile rod organisms. In a Gram stain he confirms the presence of pus cells and Gram negative bacilli. They inoculate a MacConkey's and a blood agar plate for growth and isolation of bacteria. After consultation with the supervisor they are asked to set up a direct culture for antibiotic sensitivity testing. The supervisor informs the clinician of the initial findings. The next morning the technical officer assists the supervisor to read the plates. The predominance of lactose fermenting organisms is noted. The supervisor asks the technical officer to set up a biochemical panel to assist in identifying the organism. The supervisor confirms the technical officer's reading of the direct sensitivities plate. Later in the day the team is able to confirm that the patient's urine is infected with *Escherichia coli* and that the organism is sensitive to a number of antibiotics, including a sulphonamide and a cephalosporin.

Food processing

A swollen can of tuna was received at the company laboratory for microbiological investigation. The technical officer recorded the details supplied with the can and prepared for the investigation. A range of media, including cooked meat media and nutrient broth were prepared and aseptic can opening equipment was sterilised. After the can was opened in the biohazard cabinet, the state of the contents was recorded, pH checked and Gram stains prepared and examined. The media was inoculated with the food samples and incubated at a range of temperatures under aerobic and anaerobic conditions. The can was then emptied for double seam tear down to determine the cause of the spoilage. The next day the technical officer examined the media and broth cultures. From all the data collected the technical officer and supervisor were able to determine that pre-processing spoilage had occurred, probably due to excessive delays in the process prior to can sterilisation. The results were reported to production personnel so that they could follow up the circumstances relating to the delays, and ensure that the SOP had been followed and sufficient product rejected.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

- Standards, codes, procedures and/or enterprise requirements may include:
- Australian and international standards, such as:
 - AS 2252 Biological safety cabinets
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243.3:2002 Safety in laboratories - Microbiological aspects and containment facilities
 - ISO/TS 19036:2006 Microbiology of food and animal feeding stuffs - Guidelines for the estimation of measurement of uncertainty for quantitative determinations
 - ISO7218:2007 Microbiology of food and animal feeding stuffs - General requirements and guidance for microbiological examinations
- cleaning, hygiene, personal hygiene requirements
- enterprise procedures, standard operating procedures (SOPs) and operating manuals
- guidelines for small scale genetic manipulation work from the gene technology regulations
- incident and accident/injury reports
- instructions to comply with new legislation, standards, guidelines and codes
- quality system and continued improvement processes
- safety requirements for equipment, materials or products and material safety data sheets

RANGE STATEMENT	
	<p>(MSDS)</p> <ul style="list-style-type: none"> • sampling procedures (labelling, preparation, storage, transport and disposal) • schematics, work flows and laboratory layouts • test procedures (validated and authorised) • waste minimisation, containment, processing and disposal procedures
Equipment, materials and systems	<p>Equipment, materials and systems may include:</p> <ul style="list-style-type: none"> • protective and physical containment facilities and equipment for safe handling of micro-organisms personal protective equipment, such as gloves, gowns, masks and safety glasses and gloves for working with extremes of heat and cold • carbon dioxide cabinets and incubators • transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas • liquid nitrogen containers for cell storage • filtration membranes • microscopes with bright field and other relevant illumination systems and stereomicroscopes • counting chambers for micro-enumeration • colony counting devices • Bunsen burners and bench incinerators • Incubators and water baths • anaerobic jars, fermentation chambers, continuous culture systems and other devices for controlling growth environments of micro-organisms • laboratory information management systems (LIMS), databases, record and filing systems • stains, media, reagents and biological materials necessary for laboratory testing • laboratory glassware and measuring equipment • disinfecting and sterilising solutions and equipment, such as ultraviolet (UV) lamps • materials suitable for the safe containment, collection, processing and disposal of biological and non-biological wastes • autoclaves

RANGE STATEMENT	
Communication	<p>Communication may involve:</p> <ul style="list-style-type: none"> • supervisors and managers (laboratory, quality and customer service) • personnel in other laboratories in the enterprise or in other enterprises to which work may be referred • customers, patients and clients • external auditors and accreditation agencies (e.g. National Association of Testing Authorities (NATA))
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all work will assume the potential infectivity of samples and materials presented for laboratory processing • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Not applicable.

Unit Descriptor

Unit descriptor This unit of competency describes the outcomes required to perform basic wastewater tests.

Application of the Unit

Application of the unit This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for preparing for, conducting and reporting on basic wastewater tests in wastewater treatment and system operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for basic wastewater tests.	<p>1.1 Receive instructions for conducting and recording <i>basic wastewater tests</i> and confirm with appropriate personnel.</p> <p>1.2 Confirm <i>testing details</i> and <i>plan testing work</i> according to <i>legislative and organisational requirements</i>.</p> <p>1.3 Select, fit and use personal protective equipment specified for routine wastewater tests.</p> <p>1.4 Prepare and check <i>testing equipment</i> according to organisational requirements.</p>
2 Conduct basic wastewater tests.	<p>2.1 Locate and identify correct samples for testing and report <i>abnormal sample characteristics</i>.</p> <p>2.2 Conduct basic wastewater tests according to organisational requirements.</p> <p>2.3 <i>Maintain integrity of samples</i> during testing.</p> <p>2.4 Identify <i>atypical data</i> and take appropriate action.</p>
3 Finalise work.	<p>3.1 Record relevant <i>information</i> according to organisational requirements.</p> <p>3.2 Dispose of samples and clean and store test equipment according to organisational procedures.</p> <p>3.3 Clear and restore work area according to organisational requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- conduct basic wastewater tests
- calibrate testing equipment
- operate testing equipment
- conduct sub-sampling
- dispose of samples and waste
- communicate effectively
- produce reports and logs
- perform relevant work-related calculations
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- interpret work requirements.

Required knowledge:

- range and purpose of basic wastewater testing
- procedures for the use of instruments and other field-testing equipment
- test procedures
- relevant work-related calculations
- maintenance and storage of reagents
- sub-sampling and basic wastewater test methods
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to perform basic wastewater tests by:

- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different tests safely while maintaining the integrity of samples
- recording all relevant information.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

EVIDENCE GUIDE

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Basic wastewater tests include:

- range of tests required for competent performance of work tasks in the organisational context, which should comprise at least three of the following types of test:
 - pH
 - temperature
 - electrical conductivity
 - dissolved oxygen
 - microscopy
 - thirty minute settleability
 - settleable solids concentration (cone test)
 - turbidity.

Testing details may include:

- locations, including:
 - on-site testing
 - field-based testing
 - laboratory
- range of testing procedures and techniques that apply to organisational, plant or field sites
- variety of samples to be tested
- testing equipment
- test reporting systems.

Planning of testing work may include:

- interpretation of instructions and directions
- timelines
- interaction and communication with team members and individuals
- interpretation of legislative and organisational requirements.

Legislative and organisational requirements may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements.

RANGE STATEMENT

Testing equipment may include:

- portable meters, such as:
- pH meters
- electrical conductivity meters
- thermistors
- comparators
- pocket colorimeters
- dissolved oxygen meters
- test kits
- microscopes
- thermometers
- Imhoff cones
- graduated cylinders and settling apparatus.

Abnormal sample characteristics may include:

- insufficient sample volume
- odour
- visible contaminants, such as:
- scum
- debris
- discolouration.

Maintaining integrity of samples may include application of correct:

- holding time
- storage procedures
- sub-sampling procedures.

Atypical data may include:

- results that fall outside organisational range requirements
- results that fall outside legislated range requirements.

Information may include:

- time and logging of sample receipt and testing
- visual observations
- equipment identification
- atypical results
- test results.

Employability Skills Information

Employability skills This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify sources and characteristics of wastewater and reasons for wastewater treatment.	1.1 Identify <i>wastewater sources</i> and characteristics. 1.2 Identify <i>reasons</i> and <i>statutory requirements</i> for wastewater treatment.
2 Monitor and report on wastewater quality.	2.1 Identify <i>wastewater treatment processes</i> and determine their application. 2.2 Check <i>characteristics of wastewater</i> according to organisational procedures. 2.3 Record and report wastewater quality according to organisational procedures.
3 Follow safety requirements for work in a wastewater treatment plant.	3.1 Identify and record hazards of working in a wastewater treatment plant. 3.2 Identify operational requirements for safe and effective use of <i>equipment</i> . 3.3 Select, fit and use safety equipment, including personal protective equipment. 3.4 Identify and apply safe work practices when handling <i>chemicals</i> and working in a wastewater treatment plant.
4 Monitor and report on wastewater treatment.	4.1 Identify operating principles used in wastewater treatment processes. 4.2 Complete records required for effective operation of a wastewater treatment plant. 4.3 Identify, record and report range of <i>data</i> routinely collected. 4.4 Carry out, record and report <i>process calculations</i> . 4.5 Identify data that falls outside normal operating <i>parameters</i> and report for further action.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- apply policies, procedures and standards
- recognise and report operational problems
- use safety equipment and personal protective equipment
- select, collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment.

Required knowledge:

- sources of wastewater
- physical, chemical and microbiological characteristics and operating principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plant processes
- major chemicals and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to monitor and report on wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- performing, recording and reporting process measurements and calculations
- demonstrating procedures for starting and stopping plant and locking out control equipment
- adjusting process controls according to specific plant procedures
- recording and reporting faults and breakdowns
- identifying common process faults and following procedures to rectify these.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning

EVIDENCE GUIDE

experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Wastewater sources may include:

- domestic
- industrial
- storm
- ground.

Reasons for treatment may include:

- ensuring conformity with legislation, regulations, standards and codes
- removal of impurities and contaminants to enable discharge or re-use
- reducing impact of impurities on the environment and public health.

Statutory requirements are defined by:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements.

Wastewater treatment processes may include:

- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis.

RANGE STATEMENT

Characteristics of wastewater may include:

- types of impurities, such as:
- organic
- inorganic
- micro-organisms
- public health considerations.

Equipment used may include:

- pumps, including:
- centrifugal
- positive displacement
- airlift
- blowers
- screens
- control valves
- electronic digital monitoring systems
- recording systems
- chemical testing and analysis equipment
- communication equipment
- belt press
- centrifuge
- comminutor
- flow meters
- flow recorders
- manual or hydraulic equipment
- personal protective equipment.

Chemicals and major equipment used may include:

- chemicals and lime
- sodium hypochlorite
- aluminium and iron coagulants
- polymers.

Data may include:

- instantaneous flow rate
- flow records
- temperature
- sand and grit
- pH
- chemical oxygen demand
- dissolved oxygen
- settleable solids concentration (cone test)
- thirty minute settleability test
- sludge blanket level
- residual chlorine
- microscopic examination
- conductivity.

RANGE STATEMENT

Process calculations may include:

- average dry weather flow
- peak dry weather flow
- chemical feed rate and concentration
- process efficiency.

Wastewater quality *parameters* may include:

- physical
- chemical
- microbiological.

Unit Descriptor

Unit descriptor This unit of competency describes the outcomes required to operate and maintain wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas. The ability to operate wastewater treatment processes to ensure that wastewater disposal or re-use meets state or territory licensing requirements is essential to performance.

Application of the Unit

Application of the unit This unit supports the attainment of skills and knowledge required for operational staff in wastewater treatment plants with responsibility for the practical and safe operation of plant, equipment and processes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate wastewater treatment processes.	<p>1.1 Identify <i>reasons and requirements</i> for treatment of wastewater.</p> <p>1.2 Identify major components of wastewater treatment processes.</p> <p>1.3 Identify and apply practices undertaken in <i>wastewater treatment processes</i>.</p> <p>1.4 Operate <i>mechanical equipment</i> used in wastewater treatment according to manufacturer specifications and organisational requirements.</p> <p>1.5 Handle, use, store and dose <i>chemicals</i> according to relevant legislation and organisational procedures.</p>
2 Maintain items of equipment used in wastewater treatment processes.	<p>2.1 Identify maintenance requirements and schedules according to standard operating procedures.</p> <p>2.2 Meet maintenance and cleaning requirements of equipment.</p>
3 Follow safety requirements for work in a wastewater treatment plant.	<p>3.1 Identify and record hazards of working in a wastewater treatment plant.</p> <p>3.2 Identify and record operational requirements for safe and effective use of equipment.</p> <p>3.3 Select, fit and use safety equipment, including personal protective equipment.</p> <p>3.4 Identify and apply safe work practices when handling chemicals and working in a wastewater treatment plant.</p>
4 Record wastewater treatment plant data.	<p>4.1 Complete records required for effective operation of a wastewater treatment plant.</p> <p>4.2 Identify, record and report range of data routinely collected.</p> <p>4.3 Identify data that falls outside normal operating parameters and report for further action.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- recognise and report operational problems
- apply policies, procedures and standards
- use safety equipment and personal protective equipment
- collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment.

Required knowledge:

- sources and characteristics of wastewater
- physical, chemical and microbiological characteristics and basic principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plants and processes
- major chemical types and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection
- MSDS.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to operate and maintain wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- applying wastewater treatment processes, including operating mechanical equipment
- using chemicals safely, as required and according to organisational procedures
- conducting regular routine inspection of mechanical equipment
- identifying hazards and applying appropriate safety procedures
- gathering and recording data
- reporting anomalies.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts

EVIDENCE GUIDE

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Reasons and requirements for treatment may include:

- ensuring conformity with legislation, standards and guidelines
- removing impurities and contaminants to enable discharge and re-use
- reducing impact of impurities on environment and public health
- relevant environmental protection legislation and regulations and trade waste agreements.

Wastewater treatment processes may include:

- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- anoxic processes
- sludge digestion
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis.

Mechanical equipment used may include:

- pumps, including:
 - centrifugal
 - positive displacement
 - airlift
 - blowers
 - screens
 - control valves
- electronic digital monitoring systems

RANGE STATEMENT

Chemicals and aids used may include:

- recording systems
- chemical testing and analysis equipment
- communication equipment
- manual and hydraulic equipment
- personal protective equipment.
- lime
- sodium hypochlorite
- polymers
- aluminium and iron coagulants
- carbon sources.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan the project.	1.1 Clarify project brief with relevant personnel. 1.2 Identify and quantify human and financial resources to support management of project. 1.3 Assemble and brief project team. 1.4 Negotiate and finalise organisational requirements and procedures for management of project. 1.5 Identify and address <i>legislative requirements</i> relevant to project in the planning process. 1.6 Develop project goals, objectives and performance indicators in consultation with relevant personnel and stakeholders and follow organisational procedures. 1.7 Plan project according to organisational requirements and using appropriate <i>planning tools</i> .
2 Manage the project.	2.1 Communicate project plan to project team and clarify and allocate resourcing and accountabilities. 2.2 Monitor, record and report progress of project against milestones of project plan and according to organisational requirements. 2.3 Integrate range of tasks that comprise project to ensure efficient completion. 2.4 Consult stakeholders regarding progress of project and inform development. 2.5 Negotiate, record and communicate required changes to project plan. 2.6 Finalise project according to project plan and organisational procedures.
3 Manage project risk.	3.1 Identify potential risks to successful completion of project through extensive consultation with relevant stakeholders and personnel. 3.2 Analyse identified risks for likelihood of occurrence and their potential consequences. 3.3 Develop risk management or control plans to eliminate or reduce potential for risk events and consequences. 3.4 Review risk management or control plans periodically during life of the project and assess them for their adequacy, timeliness and effectiveness in risk mitigation.
4 Deliver quality project outcomes.	4.1 Identify and record quality requirements for successful completion of project and communicate them to project team members. 4.2 Identify and use quality management methods, techniques

ELEMENT

PERFORMANCE CRITERIA

and tools to support and manage project.

4.3 Assess outcomes of project for compliance with required quality standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- apply advanced project management skills
- apply quality management principles and techniques
- apply risk management principles and techniques
- use project management software and tools
- coordinate activities
- communicate effectively with a wide audience inside and outside the workplace
- plan effectively
- prepare a range of internal and external reports
- solve problems.

Required knowledge:

- technical and industry knowledge relevant to project being managed
- legislation relevant to project being managed
- project management, quality management and risk management techniques
- relevant industry trends, including emerging technologies
- infrastructure capacity and capacity planning
- organisational processes and reporting requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to lead a complex project within the water industry including:

- managing a complex project and delivering required project outcomes
- effectively coordinating activities of project team members to deliver required outcomes
- preparing, monitoring and revising plans
- applying principles of quality and risk management to completion of project
- communicating with stakeholders.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition

EVIDENCE GUIDE

(RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative requirements may include:

- relevant federal legislation, including:
 - National Water Commission Act 2004
 - Environment Protection and Biodiversity Conservation Act 1999
- relevant state or territory legislation relating to water and resource management
- relevant state or territory legislation and regulations relating to OHS, including:
 - protective clothing and equipment
 - use of tools and equipment
 - workplace environment and safety
 - handling of materials
 - use of fire fighting equipment
 - use of first aid equipment
 - hazard control and hazardous materials and substances
- relevant local government by-laws
- relevant government and non-government policies and regulations such as:
 - National Water Initiative
 - Murray Darling Basin Water Agreement
- relevant community planning and development agreements, such as land care agreements.

Plan project to address all facets of activity, which may include:

- budgets
- timelines
- human resource requirements
- project milestones
- project accountabilities
- project reporting processes and schedules
- contingency arrangements
- risk management requirements
- quality requirements.

Planning tools used to

- may be:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse water resource issues.	1.1 Analyse <i>economic</i> and <i>social issues</i> relevant to sustainable <i>water</i> use to determine implications for specific situations. 1.2 Identify and analyse <i>community attitudes</i> to use of recycled water for their impact on future initiatives. 1.3 Identify and analyse <i>legislation, regulations and policies</i> on <i>sustainability</i> and water recycling issues for relevance to specific situation. 1.4 Determine <i>water sustainability objectives</i> and targets for specific situation.
2 Determine treatment options for recycling.	2.1 Determine water catchment and groundwater protection and management principles for surface and groundwater sources, and recycled water. 2.2 Analyse hydrometric cycle and types and percentage of water use to determine sustainability of specific water resources. 2.3 Analyse impact of stormwater and industrial, agricultural, aquaculture and domestic water use on water quality. 2.4 Analyse <i>sustainability issues</i> and effect of reduced and more concentrated sewage flows for a specific situation. 2.5 Evaluate treatment options for recycling of treated wastewater and <i>alternative water sources</i> for their suitability in meeting quality standards for a <i>range of uses</i> .
3 Develop environmental strategies and targets.	3.1 Analyse designs of <i>model sustainable water systems</i> to determine their viability in specific situations. 3.2 Analyse costs and benefits of recycling schemes most appropriate to situation. 3.3 Evaluate existing and planned water recycling systems against <i>Australian and international benchmarks</i> . 3.4 Undertake risk assessment to determine strategies for managing hazards and risks. 3.5 Recommend integrated water resource planning to achieve water sustainability objectives and targets, with consideration of costs.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- analyse financial information
- analyse trend data
- research and interpret social trends
- perform relevant statistical analysis
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- prepare complex reports
- use computer systems.

Required knowledge:

- political, economic and social aspects of water sustainability
- principles of cost benefit analysis
- concept of virtual water in agricultural and manufactured products
- legislative and regulatory requirements relevant to a sustainable water industry
- hydrometric cycle
- methods for evaluating risks to water quality, assets and services
- water sustainability issues and ecosystem quality
- recycling models and performance benchmarks
- water sustainability in domestic, industrial, agricultural and aquaculture contexts, including stormwater
- legislative and regulatory framework for water industry
- relevant Australian standards, international guidelines and best practice systems applicable to water sustainability.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to analyse and identify solutions to issues such as the sustainable use of water, drinking water safety and quality, water recycling and the effectiveness of wastewater treatment including:

- analysing complex technical, social and legislative issues affecting water sustainability
- determining water and wastewater treatment options
- researching and reviewing information and developing evidence-based recommendations for the development of relevant policies relating to environmental sustainability.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

EVIDENCE GUIDE

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- Economic issues*** may include:
- costs and benefits of various options
 - public and private ownership
 - costing models
 - increased costs of new developments.
- Social issues*** may include:
- land resumption
 - cost of water supply
 - damage to ecosystems
 - equity issues
 - political exploitation.
- Water*** includes:
- water in a watercourse, lake or spring
 - underground water
 - overland flow water
 - water that has been collected in a dam
 - wastewater of domestic, commercial, industrial or agricultural origin.
- Community attitudes*** may include:
- revulsion or fear of contamination
 - fear of diseases
 - resistance to change.
- Legislation, regulations and policies*** relevant to the State or Territory may include:
- Environmental Protection and Biodiversity Conservation Act 1999
 - relevant state and territory environmental protection legislation
 - relevant water legislation and regulations
 - Australian Drinking Water Guidelines
 - water recycling guidelines
 - water quality guidelines
 - National Water Quality Management Strategy.
- Sustainability*** may include:
- replenishment of resources
 - maintaining resources
 - assault on diminishing resource.
- Water*** and wastewater ***sustainability objectives***
- sustainable use of water
 - drinking water safety
 - water recycling

RANGE STATEMENT

may include:

- long-term certainty of sources.

Sustainability issues may include:

- leakage
- evaporation
- sewer mining
- grey water use
- recycling
- intelligent use
- alternatives.

Alternative water sources may include:

- stormwater
- bore water
- brackish water
- process water.

Range of uses may include:

- irrigation
- aquaculture
- industry
- fire fighting
- recreation
- domestic
- replenishing raw surface water or groundwater resources.

Model sustainable water systems may include examples that are:

- specific to locations (e.g. Australia, Singapore, Israel and California)
- specific to industries (e.g. paper, cooling and food processing)
- existing or planned
- local and international.

Australian and International benchmarks may include:

- data from existing systems
- published research.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse fundamentals of water science.	1.1 Analyse natural and engineered water cycles to establish their <i>components, features</i> and <i>variables</i> . 1.2 Carry out <i>water testing</i> according to procedures in order to determine water and wastewater parameters, including nitrogen, phosphorus and microbiological indicators. 1.3 Identify <i>substances commonly found in natural water sources</i> and analyse their <i>interactions</i> . 1.4 Identify <i>substances commonly found in range of wastewater sources</i> and analyse their <i>environmental</i> and <i>epidemiological effects</i> . 1.5 Identify <i>microbial species</i> found in water and wastewater and determine their activities and effects as <i>agents of disease</i> or <i>agents for removing organic matter</i> .
2 Determine design features of water treatment plants.	2.1 Determine purpose of <i>water treatment</i> and quality standards required in providing water for human consumption, industry, agriculture and aquaculture. 2.2 Analyse fundamentals of <i>separation processes</i> to determine their role in water treatment. 2.3 Research microbial metabolism systems and determine their role in removing organic and inorganic constituents of water. 2.4 Analyse <i>input and output parameters</i> of water and wastewater treatment systems. 2.5 Determine <i>fundamental features</i> of water and wastewater <i>reticulation systems</i> to establish their role and function in water treatment.
3 Analyse application of government legislation and policies to water industry.	3.1 Research <i>legislation and regulations</i> for Australian water industry to identify evolutionary framework and <i>forces of change</i> . 3.2 Identify key principles and provisions of water-related legislation and regulations and analyse them for their impact on current practice. 3.3 Analyse the Environment Protection Agency conditions for water and wastewater treatment plant licences, and Australian drinking water quality parameters to identify operational standards required. 3.4 Identify changes required to meet legislative and regulatory requirements and communicate to relevant stakeholders.
4 Prepare strategic advice.	4.1 Synthesise and evaluate design, operation and management of water treatment plants and processes. 4.2 Consult relevant personnel to inform the framing of policy

ELEMENT

PERFORMANCE CRITERIA

advice for the water organisation.

4.3 Prepare and present strategic advice on current and potential policies and procedures and the design, operation and management of water treatment plants and processes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- use technology, including the internet, to access current legislative and regulatory requirements for water industry
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- communicate with employees, senior management, external industry experts and other stakeholders
- prepare complex reports
- use communication systems
- give and receive instructions.

Required knowledge:

- fundamental aspects of physics, chemistry, biology and microbiology relevant to water and wastewater treatment and requisite laboratory skills
- water sources and resources relevant to water and wastewater treatment
- substances in natural water sources and their interactions
- environmental and epidemiological effects of substances found in wastewater sources
- microbial species and effects
- purposes of water treatment
- fundamentals of separation processes and disinfection
- microbial metabolism
- input and output parameters of treatment systems
- reticulation systems and hydraulic modelling
- legislative and regulatory framework for water industry
- Environment Protection Authority requirements for treatment plant licenses and drinking water
- OHS legislation, risk management and procedures
- relevant water treatment policies and procedures
- communication systems
- relevant Australian standards, international guidelines and best practice systems applicable to water treatment plants and plant technologies.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to understand water quality and sustainability technology, and provide high-level advice on meeting legislative and regulator requirements including:

- analysing and applying principles of water science
- analysing and applying principles associated with design of water treatment plants and processes
- reviewing and refining current practices associated with water treatment plant technologies
- preparing clear and accurate reports
- contributing to development of water treatment planning within organisation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect

EVIDENCE GUIDE

and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Components may include:

- natural water cycles, including:
 - rivers and lakes
 - artesian and aquifers
 - brackish and salt water
 - stormwater
- engineered water cycles, including:
 - reticulation systems
 - dams
 - collection systems
 - bores and wells.

Features may include:

- natural water cycles:
 - rainfall patterns
 - size and protection
 - retention time in catchment
 - evaporation rate
 - types of source:
 - bore
 - river
 - dam
 - engineered water cycles
 - type of user:
 - domestic
 - industrial
 - aquaculture
 - agriculture
 - type of water or wastewater treatment system:
 - urban
 - non-urban
 - length and volume of collection and reticulation system.

Variables may include:

- natural water cycles, including:
 - rainfall
 - temperature

RANGE STATEMENT

- pH, hardness and alkalinity
 - taste, odour, colour and turbidity
 - nature and quantity of total dissolved and suspended matter
 - dissolved oxygen
 - engineered water cycles, including:
 - flow rates
 - industrial and agricultural uses and inputs
 - input and output parameters
 - availability and uses of recycling.
- Water testing*** may include:
- pH, chlorine, suspended solids and dissolved oxygen
 - alkalinity and volatile acids
 - mixed liquor suspended solids
 - mixed liquor volatile suspended solids
 - colour, turbidity and conductivity
 - biological oxygen demand (BOD) and chemical oxygen demand (COD), total organic carbon (TOC), phosphorus (P), nitrogen (N), other ions and organic compounds
 - identification and enumeration of bacteria, cyanobacteria and protozoa.
- Substances commonly found in natural water sources*** may include:
- metal ions
 - salts
 - N and P
 - microorganisms and algae
 - organic and inorganic compounds producing colour, turbidity, odour or taste
 - radiation emitters.
- Interactions*** may include:
- oxidation of metal ions
 - settling of suspended matter
 - ultraviolet destruction of microorganisms
 - growth of nuisance organisms, such as cyanobacteria.
- Substances commonly found in range of wastewater sources*** may include:
- toxins
 - metals
 - domestic or industrial organic matter
 - other dissolved and suspended solids
 - toxic, flammable and asphyxiating gases
 - disinfection by-products.
- Range of wastewater sources*** may include:
- domestic
 - industry
 - aquaculture

RANGE STATEMENT

- agriculture
 - stormwater.
- Environmental effects* may include:
- serious:
 - material environmental harm to air, water or land
 - nuisance environmental harm.
- Epidemiological effects* may include:
- faecal-oral route of infection
 - infection and transmission of infectious agents
 - effects of biological, chemical or physical toxins on animals and plants.
- Microbial species* may include:
- E. Coli
 - salmonella
 - campylobacter
 - Shigella
 - Yersinia
 - protozoa
 - adenovirus
 - enterovirus
 - hepatitis virus.
- Agents of disease* may include:
- bacteria
 - viruses
 - protozoa
 - microbial toxins
 - chemical toxins.
- Agents for removing organic matter* may include:
- aerobic bacteria
 - facultative bacteria
 - anaerobic bacteria.
- Water treatment* may include:
- coagulation
 - flocculation
 - sedimentation
 - filtration
 - disinfection
 - natural systems
 - designed wetlands
 - lagoons
 - Imhoff tanks
 - small septic tanks
 - bio-filters
 - contactors
 - activated sludge processes

RANGE STATEMENT

- Separation processes* may include:
- special treatment processes.
 - filtration
 - presses
 - centrifuges
 - sedimentation
 - gravity settling
 - flocculation
 - chemically assisted processes.
- Input and output parameters* may include:
- Biological Oxygen Demand and Chemical Oxygen Demand
 - suspended solids
 - biomass as mixed liquor suspended solids (MLSS) or mixed liquor volatile suspended solids (MLVSS)
 - pH
 - dissolved oxygen (DO)
 - N, P and other chemical species
 - toxins
 - chlorine
 - faecal coliforms, such as E. Coli
 - colour
 - turbidity.
- Fundamental features* may include:
- pipe networks
 - gravity and pressure systems
 - pumps and pump wells
 - reservoirs
 - residual disinfection
 - oxygenation
 - hydraulic modelling
 - leak detection
 - leak prevention.
- Reticulation systems* may include:
- sewage collection systems
 - water distribution systems.
- Legislation and regulations* relevant to the State or Territory may include:
- Environmental Protection and Biodiversity Conservation Act 1999
 - relevant state and territory environmental protection legislation
 - relevant water legislation and regulations
 - Australian Drinking Water Guidelines
 - Water recycling guidelines
 - Water quality guidelines

RANGE STATEMENT

Forces of change may include:

- National Water Quality Management Strategy.
- community expectations
- availability of technology
- climatic change
- diminishing fresh water sources.

Competency field Leadership

PRMCL35B Maintain a cleaning storage area

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required for the maintenance of a dedicated cleaning storage area and the movement and control of equipment, chemicals and consumables used in the provision of cleaning services. This unit applies to persons whose major function is cleaning, not storekeeping.

The unit requires the ability to maintain and operate a safe and efficient cleaning storage area within a strict legislative context. Maintaining the storage area requires the ability to follow established procedures, understand the issues associated with the storage and usage of chemicals and to adhere to legislative and public health and safety requirements.

Application of the Unit

|---|--|---|
| 1 | Maintain storage area | <p>1.1 Secure <i>storage area</i> from unauthorised access in accordance with <i>legislative, occupational health and safety (OHS)</i> and <i>company requirements</i></p> <p>1.2 Identify <i>hazards</i> and control risks in the storage area in accordance with <i>legislative, OHS</i> and <i>company requirements</i></p> <p>1.3 Display <i>safety warnings</i> prominently and ensure <i>safety information</i> is accessible in accordance with <i>legislative, OHS</i> and <i>company requirements</i></p> <p>1.4 Store, maintain and safety-check <i>equipment</i> to enable ready access and re-use in accordance with <i>manufacturers' specifications</i> and <i>legislative, OHS</i> and <i>company requirements</i></p> <p>1.5 Store <i>chemicals</i> and <i>consumables</i> in accordance with <i>manufacturers' specifications</i> and <i>legislative, OHS</i> and <i>company requirements</i></p> <p>1.6 Clean, safety-check, record maintenance requirements and store <i>personal protective equipment (PPE)</i> in accordance with <i>manufacturers' specifications, OHS</i> and <i>company requirements</i></p> <p>1.7 Review and respond to <i>work site communication devices</i> in accordance with <i>company requirements</i></p> <hr/> <p>1.8 Ensure <i>storage area</i> is accessible and free from obstacles in accordance with <i>OHS</i> and <i>company requirements</i></p> <p>1.9 Collect and dispose of all <i>waste</i> in accordance with <i>manufacturers' specifications</i> and <i>environmental, legislative, OHS</i> and <i>company requirements</i></p> |
| 2 | Control and maintain stocks of equipment and chemicals | <p>2.1 Maintain and operate an inventory system of all <i>equipment, PPE, chemicals</i> and <i>consumables</i> with maximum and minimum holding levels in accordance with <i>legislative</i> and <i>company requirements</i></p> <p>2.2 Monitor usage patterns and re-order <i>chemicals</i> and <i>consumables</i> to maintain required levels in accordance with <i>company requirements</i></p> |

ELEMENT**PERFORMANCE CRITERIA**

- 2.3 Maintain accurate labelling system of all containers in accordance with *manufacturers' specifications* and *legislative, OHS* and *company requirements*
- 2.4 Issue *chemicals* and *consumables* on a first-in first-out basis in accordance with *company requirements*
- 2.5 Prepare *chemicals* in accordance with *manufacturers' specifications* and *legislative, OHS* and *company requirements*
- 2.6 Collect and dispose of all obsolete *equipment* and *chemicals* and *waste* in accordance with *manufacturers' specifications* and *environmental, legislative, OHS* and *company requirements*
- 3 Respond to emergency situations
- 3.1 Respond to accidental spillages and emergency situations using *emergency response procedures* in accordance with *environmental, legislative, OHS* and *company requirements*
- 3.2 Prepare *regulatory and company documentation* in accordance with *environmental, legislative, OHS* and *company requirements*

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to maintain a cleaning storage area. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Compliance with company and legislative/regulatory requirements.
- Good storage and housekeeping practices, particularly those relating to the labelling and security of chemicals.
- Knowledge of emergency response procedures.
- Maintenance of a secure and accessible storage area.
- Systematic use of stock control records.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Equipment types and functions.
- Product knowledge including manufacturers' specifications for equipment and chemicals being used.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.
- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Company procedures and practices.
- Documentation requirements.
- Emergency response and evacuation procedures.
- Hazards and risks of storing, preparing, using and disposing chemicals.
- Injury, dangerous occurrence and incident reporting.
- Knowledge of biological and viral control procedures.
- Routes of entry and potential symptoms of exposure from chemicals.
- Skin penetration issues.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- applying correct manual handling techniques
- communicating clearly and concisely using written and verbal modes
- customer service
- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- hazard identification and risk control
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- planning

- problem solving
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals, MSDS, safety warning signs and symbols, enterprise codes and chemical labels
- requesting advice or further information
- seeking and receiving feedback
- sourcing, organising and recording information
- working on an individual basis and within a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with:

- PRMCL33B Plan for safe and efficient cleaning activities
- PRMCMN201A Participate in workplace safety arrangements.

Resources required to assess this unit

The following resources should be available:

- access to a suitable venue, including stores and store records
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activity normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added. Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	2	Plan and prioritise work tasks to meet legislative, OHS, company and client requirements in an efficient and effective manner.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate area available for storing equipment and chemicals safely.
How can problem-solving skills be applied?	1	Discuss with management/clients/work site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Chemicals may include:

- acid cleaners
- alkaline cleaners
- neutral cleaners
- solvent cleaners.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans

- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Consumables may include:

- air freshener
- hand towel
- liner bags
- soap (liquid or solid)
- toilet paper.

Emergency response procedures include:

- clean-up
- containment
- decontamination
- documented emergency response and evacuation procedures
- First Aid
- isolation
- notification of authorities
- use of appropriate fire fighting appliances
- use of appropriate personal protective equipment
- work site/workplace evacuation.

Environmental requirements may include:

- clean-up, containment and/or isolation
- company policies and guidelines
- environmental protection agency and government department regulations and guidelines
- hazardous materials handling

- local government regulations/bylaws.

Equipment may include:

- access equipment - various types
- bins - various types
- brooms - various types
- buckets
- buffers - various types
- cleaning trolley
- cloths
- cobwebber
- doodle bag holder
- drop sheets
- drying equipment
- dust pans and brushes
- dusters - various types
- extension poles
- extraction units, wand and hand tools
- gloves - non-permeable
- hoses
- ladders
- mops
- personal protective equipment
- polishers
- pressure-washing equipment and attachments
- safety equipment - various types
- scouring pads
- scrapers
- scrubbers - various types
- sponges
- spray bottles
- squeegee
- steam cleaners
- sweepers - various types
- vacuum cleaners and attachments - various types
- window cleaning equipment
- work site communication devices.

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment

- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights
- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying
- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps
- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements
- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy

- trade practices
- workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)
- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting
- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE
- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes

- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Regulatory and company documentation may include:

- accident and incident reports
- certificates and notices
- customer files and databases
- invoices
- job sheets
- OHS control procedures, forms and documentation
- risk assessments.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures
- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care
- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident
 - commit a criminal offence
 - commit acts of disloyalty such as revealing confidential information
 - use abusive language.

Safety information may include:

- chemical co-location, separation and segregation arrangements
- chemical manifests
- chemical registers
- colour codes
- company policies and procedures
- labels
- manufacturers' specifications
- manufacturers' instructions
- MSDS

- OHS information
- operation manuals.

Safety warnings may include:

- charts and posters
- instructions
- labels
- signs and placards
- symbols.

Storage area may be a room, storage cupboard or other secure area separate from normal client functions and may include:

- chemical cupboard
- clothes rack
- desk
- equipment storage bays
- slop sink.

Waste may be either solid or liquid and include:

- chemicals past the expiry date
- obsolete equipment
- packaging
- used containers
- used or unused chemicals
- used/contaminated personal protective equipment.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work site communication devices may include:

- communication books
- noticeboards
- telephone/two-way radio
- whiteboards.
-

PRMCL38A Clean a food handling area

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required to clean in a food handling area where the work does not involve direct food contact. This unit is not appropriate for a person who has direct contact with food and/or raw materials/ingredients.

This unit is based on the guideline food safety unit GFSWFHAA Carry out work in a food handling area.

Food handling areas include food courts and industrial food processing plants.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements, the special characteristics of food handling areas, and applying company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently. This unit recognises the importance of paying careful attention to health and safety issues.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- 1 Assess area to be cleaned
 - 1.1 Assess the *food handling area* and review *work order* in accordance with client requirements, *food safety program* and *company requirements* and clarify any issues with *appropriate person(s)*
 - 1.2 Identify *hazards* and control risks in the work site in accordance with *legislative, occupational health and safety (OHS)* and *company requirements*
 - 1.3 Identify *contamination hazards* in the work site in accordance with *legislative, OHS* and *company requirements*
 - 1.4 Identify *surface* types through observation in accordance with the *work order* and *company requirements*
 - 1.5 Identify *soil* type(s) through observation in accordance with the *work order* and *company requirements*
 - 1.6 Determine the size and usage pattern of the work site to ensure the safety of, and the minimisation of disruption to, *personnel* and the efficient use of cleaning *equipment* and *chemicals*
 - 1.7 Select the most appropriate *cleaning technique(s)* in accordance with the *work order* and *company requirements*
- 2 Select equipment and chemicals
 - 2.1 Select and use suitable *personal protective equipment (PPE)* in accordance with *manufacturers' specifications, OHS* and *company requirements*
 - 2.2 Select *equipment* and *chemicals* appropriate for *work order* in accordance with *OHS* and *company requirements*
 - 2.3 Confirm that *equipment* and *chemicals* meet the cleaning and sanitation requirements of the *food safety program* in accordance with, *legislative, OHS* and *company requirements*
 - 2.4 Check operational effectiveness of *equipment* in accordance with *manufacturers' specifications* and *company requirements*
 - 2.5 Adjust *equipment* to suit operator's requirements in accordance with

ELEMENT**PERFORMANCE CRITERIA**

	<i>manufacturers' specifications and OHS requirements</i>
	2.6 Prepare <i>chemicals</i> in accordance with <i>manufacturers' specifications, OHS and company requirements</i>
	2.7 Obtain supplies of <i>consumables</i> to meet anticipated usage patterns in accordance with <i>work order and company requirements</i>
3 Prepare self and work site	3.1 Check personal hygiene, clothing and footwear and any health issues or illness meet <i>food safety program, legislative, OHS and company requirements</i>
	3.2 Confirm and reassess <i>hazards</i> in the work site and control risks in accordance with <i>legislative, OHS and company requirements</i>
	3.3 Install appropriate <i>signage and barriers</i> to maximise public safety during the cleaning operation in accordance with <i>work order and OHS and company requirements</i>
	3.4 Identify <i>food safety program</i> requirements related to <i>work order</i> in accordance with <i>OHS and company requirements</i>
	3.5 Identify any <i>work restrictions</i> affecting the completion of the <i>work order</i> instructions and advise promptly the <i>appropriate person(s)</i>
4 Clean work site while maintaining food safety	4.1 Follow <i>food safety program</i> and conduct cleaning activities to ensure food safety is maintained in accordance with health regulations, <i>work order and OHS and company requirements</i>
	4.2 Clean all surfaces using appropriate <i>equipment, PPE, chemicals and cleaning technique(s)</i> in accordance with <i>manufacturers' specifications, work order and OHS and company requirements</i>
	4.3 Conduct all work in accordance with <i>legislative, OHS and company requirements</i>
	4.4 Report any identified procedures or practices inconsistent with the food safety program to <i>appropriate person(s)</i>
5 Replenish consumables and tidy work site	5.1 Replenish <i>consumables</i> in accordance with client requests, <i>work order and company requirements</i>

ELEMENT**PERFORMANCE CRITERIA**

- 6 Clean, safety-check and store equipment
- 5.2 Dispose of all collected *soil and waste* in accordance with client specifications, *work order, manufacturers' specifications* and *environmental, legislative, OHS and company requirements*
- 5.3 Remove *signage and barriers* in accordance with *work order* and *OHS and company requirements*
- 6.1 Clean *equipment and PPE* in accordance with *manufacturers' specifications* and *environmental, OHS and company requirements*
- 6.2 Safety-check *equipment and PPE* in accordance with *manufacturers' specifications* and *OHS requirements* and record any required maintenance in accordance with *company requirements*
- 6.3 Store and maintain *equipment and PPE* to allow ready access in accordance with *manufacturers' specifications* and *OHS and company requirements*
- 6.4 Store *chemicals* in accordance with *manufacturers' specifications* and *OHS and company requirements*

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to clean in a food handling area. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Access and apply workplace information on food safety policies and procedures relating to own work.
- Accurate identification of the hazards associated with food handling area.
- Accurate identification of the surfaces and soil types found in food handling.
- Compliance with company and legislative requirements.
- Fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements.
- Identification of food safety hazards in work area.
- Maintain housekeeping standards in the food handling area and dispose of waste to meet food-handling requirements.
- Maintain personal conduct and hygiene to ensure that food safety is not compromised.
- Outcomes achieved in relation to customer work order and company requirements.
- Recognise and report situations or procedures that could compromise food safety.
- Report health conditions and illness as required by workplace food safety procedures.
- Safe and efficient cleaning methods.
- Selection of appropriate cleaning equipment and chemicals.
- Take necessary precautions when moving between or around the workplace and/or from one task to another to minimise risk of food contamination.
- Wear and maintain appropriate clothing and footwear as required by work task to meet food safety procedures.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Access to workplace information on food safety policies and procedures.
- Sources of advice on food safety issues and responsibilities in the workplace.
- Personal hygiene practices, clothing and footwear requirements associated with working in and moving in and between food handling areas and in moving between food handling and non-food handling areas.
- Suitable equipment, chemicals and other chemicals for use in the food handling area, including a knowledge of unsuitable equipment and materials e.g. breakable and/or dirty equipment and materials.
- Types of contamination and prevention methods.
- Cleaning and sanitation requirements.
- Waste collection, recycling and handling procedures.
- Knowledge of the range of cleaning equipment, chemicals and cleaning methods.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.

- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Company procedures and practices.
- Emergency response and evacuation procedures.
- Injury, dangerous occurrence and incident reporting.
- Knowledge of biological and viral control procedures.
- Routes of entry and potential symptoms of exposure from chemicals.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- accurate identification of soil and stains
- accurate selection of chemicals to suit surface type
- dusting, cleaning, polishing and buffing techniques
- replenishing consumables
- applying correct manual handling techniques
- communicating concisely using written and verbal modes
- customer service
- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- planning
- problem solving and critical analysis
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals and MSDS and on chemical labels
- requesting advice or further information
- seeking and receiving feedback
- sourcing, organising and recording information
- working on an individual basis or as part of a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with:

- PRMCL01B Maintain a hard floor surface.

Resources required to assess this unit

The following resources should be available:

- access to a suitable food handling work site or venue
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- access to food safety policies and procedures relevant to the workplace
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added.

Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	1	Organise and prioritise work tasks to meet work order and company requirements.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate area(s) to be cleaned and measure and carry out chemical applications.
How can problem-solving skills be applied?	1	Discuss with management/clients/site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Appropriate person(s) may include:

- clients
- colleagues
- managers
- person(s) in control of work site(s)
- supervisors.

Chemicals may include:

- acid cleaners
- alkaline cleaners

- neutral cleaners
- solvent cleaners.

Cleaning technique(s) may include:

- buffing
- damp dusting
- hosing
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping
- window cleaning.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Consumables may include:

- air fresheners
- bin liners
- cloth towels/tea towels
- disposable gloves

- hair nets
- hand towels (cloth, rolls and sheets)
- serviettes
- soap (liquid or bar forms).

Contamination hazards include:

- chemical contamination caused by cleaning and sanitation chemicals
- microbiological contamination resulting from cross-contamination when moving into and between food handling areas
- physical contamination caused by metal, glass, plastic and cloths.

Environmental requirements may include:

- clean-up, containment and/or isolation
- company policies and guidelines
- environmental protection agency and government department regulations and guidelines
- hazardous materials handling
- local government regulations/bylaws.

Equipment may include:

- absorbent cleaning cloths
- brooms
- buckets
- cleaning trolley
- damp cloths
- doodle bug
- dry cloths
- hose and nozzle
- lint-free cloths
- long-handled brush and dustpan tongs
- mops
- needle hazard disposal unit
- nylon scourers
- scraper
- scrubbing brush
- scrubbing or polishing machines
- toilet brush
- window squeegee
- wringer buckets.

Food handling areas include:

- dispatching food
- handling food
- inspecting food
- packaging food
- preparing food
- processing
- receiving food
- storing food
- transporting food.

Food safety program identifies the food safety hazards that may be reasonably expected to occur in all food handling operations of a food business and:

- identifies where and how each hazard can be controlled
- describes how the controls are monitored
- describes the corrective actions required if conditions are not met
- specifies the information to be recorded and the procedures to be signed off
- must comply with relevant national, state and industry legislation and regulations
- includes the responsibilities for any person visiting and/or working in a food handling area
- specifies minimum procedures to ensure any person does not:
 - contaminate food
 - have unnecessary contact with ready-to-eat food
 - spit, smoke or use tobacco or similar in a food handling area (refer Food Safety Standard 3.2.2, Clause 17:3 and state regulations/legislation).

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights
- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying
- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps

- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements
- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy
 - trade practices
 - workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)
- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting
- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE

- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Personnel may include:

- client's staff
- fellow workers (colleagues)
- general public
- venue/facility/building/shopping centre staff/management.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures
- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care

- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident
 - commit a criminal offence
 - commit acts of disloyalty such as revealing confidential information
 - use abusive language.

Signage and barriers may include:

- physical barriers and restraints erected to restrict access to a site
- signs complying with legislative requirements and/or Australian Standards warning of danger and/or adverse conditions including cleaning in progress and hazardous chemicals are in use or present in the work area.

Soil types can be wet or dry and may include:

- blood
- dust
- food, food scraps and residue
- grease
- human waste (faeces, urine, vomit)
- litter
- mould and algae
- mud and dirt
- pen, texta, pencil
- rust
- soap scum
- syringes.

Surfaces may include:

- ceramics and porcelain
- chrome
- concrete
- glass
- laminates
- metal
- painted
- plastic
- stainless steel
- stone
- terracotta
- vinyl.

Waste may be either solid or liquid and include:

- chemicals past the expiry date

- cloths
- contaminated waste
- food leftovers/scraps
- liquid waste
- litter
- obsolete cleaning equipment
- packaging
- soil
- used containers
- used or unused chemicals
- used/contaminated personal protective equipment.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work restrictions may include:

- amount of cleaning anticipated
- client activity
- employee(s) level of literacy and/or communication skills
- faulty or inappropriate equipment
- site hazards
- skills of the work unit/team
- staffing resources
- time limitations.
-

Unit Sector(s)

Not Applicable

Functional Area:

Functional Area: Elective. Cleaning Operations

PSPREG412A Gather and manage evidence

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers all activities involved in gathering and managing evidence. It includes planning and activating evidence collection, identifying persons of interest, collecting and storing evidence, and summarising and reporting on evidence.

In practice, gathering and managing evidence may overlap with other generalist or specialist public sector work activities such as exercising regulatory powers, acting ethically, complying with public sector legislation, applying government processes, gathering and analysing information, etc.

This unit replaces and, for qualification purposes only, is equivalent to *PSPFRAU403A Gather, manage and present evidence*. The unit has been expanded and is no longer restricted to evidence relating to fraud.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Plan and activate evidence collection

- 1.1 *Evidence* requirements are researched to establish the type and standard of evidence and *resources* required when the size of investigation and/or type of offence/s require this
- 1.2 Approval to commence investigation is obtained in accordance with organisational policy and procedures
- 1.3 Plan of action is agreed in accordance with organisational policy and procedures, and communication and review processes are established
- 1.4 Evidence recording process is put in place in accordance with organisational guidelines and legislative requirements

2. Identify persons of interest

- 2.1 Possible witnesses are identified, located and contacted to request that they provide information
- 2.2 Particulars of witness/es are documented according to correct evidentiary procedures
- 2.3 *Responsible parties* are identified, located and their *particulars* are recorded in accordance with correct evidentiary procedures
- 2.4 Responsible parties are contacted for interview in accordance with organisational procedures and legislative requirements, and informed of the nature of the investigation, if required by law

3. Collect and store evidence

- 3.1 *Authority to search* is obtained/verified, involving other organisations where necessary
- 3.2 Evidence is identified, *collected*, *labelled*, recorded and preserved according to exhibit management principles for later use in proceedings
- 3.3 Evidence is *managed* in accordance with the principles of continuity of possession, *legislation and standards*
- 3.4 Corroboratory evidence is collected, documented and preserved
- 3.5 *Expert* skills and knowledge are accessed when necessary to further assist staff in areas where they cannot or are not authorised to act
- 3.6 Constant review is implemented during evidence collection to enable gaps and inadequacies to be addressed in accordance with organisational policy and procedures

4. Summarise and report on evidence

- 4.1 Verbal and written summaries/*reports* are made in accordance with legislative and organisational requirements
- 4.2 Outcomes of investigation are entered into data management systems according to organisational guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- organising and problem solving
- liaising and negotiating
- communicating with people from diverse backgrounds
- responding to diversity, including gender and disability
- making comparisons and exercising judgment about facts in written materials
- report writing using formal structures and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of gathering and managing evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- rules of evidence relevant to the jurisdiction
- evidence legislation relevant to the jurisdiction
- legislation which contains the offence/s under investigation
- document management systems
- exhibit management principles
- organisational policies, guidelines and regulations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to gathering and management of evidence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV422A Apply government processes

PSPREG401C Exercise regulatory powers

PSPREG407B Produce formal record of interview

PSPREG411A Gather information through interviews

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to gathering and managing evidence
- case studies and workplace scenarios to capture the range of likely offences for which evidence needs to be gathered and managed

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|---|---|
| <i>Evidence may include</i> | <ul style="list-style-type: none"> • real, oral, computer data or documentary • photographic or video • new evidence which results in reopening an investigation • requirements identified in an evidence guide or evidence matrix |
| <i>Establishing resource requirements may require</i> | <ul style="list-style-type: none"> • an estimate of the costs of gathering evidence |
| <i>Responsible parties may include</i> | <ul style="list-style-type: none"> • suspects • alleged offenders • obligation holders • employers • principal contractors • owners • operators |
| <i>Particulars of responsible parties may include</i> | <ul style="list-style-type: none"> • personal details • identification of assets and entitlements for criminal or civil recovery purposes |
| <i>Authority to search may include</i> | <ul style="list-style-type: none"> • warrant already issued • no requirement for search warrant under powers of enabling legislation • affidavit • confirming the legal basis for the search and seizure • appropriate information to ground a warrant • requirement to obtain search/seizure warrant before proceeding • organisational approval/s to undertake search and seizure • completion/submission of organisational documents relating to planned search and seizure • the need for assistance from other agencies/jurisdictions • referral to other agencies |
| <i>Evidence collection may include</i> | <ul style="list-style-type: none"> • voluntary submission • acquisition through legislative powers • following new lines of inquiry suggested during the process of gathering evidence |

RANGE STATEMENT

- Labelling of evidence may include*
- date
 - time
 - location
 - details of person/s giving the evidence
 - person/s collecting the evidence
- Evidence management may include*
- systematic recording (such as dating and numbering)
 - using written or electronic database systems
 - referral to prosecution organisations at any stage
 - constant reviews during an investigation
 - restricting access to evidence
- Legislation and standards may include*
- relevant Commonwealth/State/Territory legislation and guidelines
 - ethical and conduct standards
 - judicial standards which must be followed in evidence collection to ensure the continuity of possession and admissibility of the evidence
- Expert knowledge and skills may include*
- police, other law enforcement agencies
 - private provider
 - standards setting organisation
 - input such as:
 - search warrant
 - surveillance
 - scientific analysis
- Reports may be*
- to finalise case
 - to inform team members and management
 - to refer to other sections or organisations
 - to prepare for final summation in proceedings
 - edited and security coded for a particular audience

SIRXCLM002A Manage store facilities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves the management of the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts and identifying and locating facilities requirements.

Application of the Unit

Application of the unit This unit requires the team member to apply store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment. Those with some managerial responsibility undertake this role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store maintenance program.	<p>1.1 Monitor and maintain premises, fittings, fixtures and equipment according to <i>store policy and procedures</i> and <i>relevant legislation</i>.</p> <p>1.2 Identify deficiencies in store maintenance procedures and take remedial action as required.</p> <p>1.3 Obtain <i>expert or specialist advice</i> as required according to store policy.</p> <p>1.4 Initiate contingency plan in the event of maintenance problems.</p>
2 Manage retail equipment maintenance.	<p>2.1 Develop and implement policy and procedures to ensure <i>retail equipment</i> is maintained according to store policy.</p> <p>2.2 Monitor and implement maintenance program for retail</p>

ELEMENT	PERFORMANCE CRITERIA
	equipment according to manufacturer design specifications and store policy.
	2.3 Identify and rectify equipment faults where possible, without undue delay.
	2.4 Report equipment faults or failures according to service agreements and store policy.
3 Negotiate maintenance contracts.	3.1 Negotiate maintenance contracts with contractors and suppliers according to store policy and procedures.
	3.2 Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to relevant personnel .
	3.3 Monitor maintenance procedures to ensure products and tasks meet contract specifications.
4 Identify facilities and space requirements.	4.1 Identify facilities and space requirements according to store policy and budget requirements.
	4.2 Locate suitable facilities and space.
	4.3 Maximise space utilisation, with consideration to existing configuration.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- record maintenance
- negotiation skills
- interpersonal communication skills to:
 - obtain expert or specialist advice
 - report faults
 - negotiate contracts and communicate contracts to staff through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - ensure listening and understanding
 - use language and concepts appropriate to cultural differences
 - use and interpreting non-verbal communication
- literacy skills in regard to:
 - developing, documenting and recording procedures
 - reading and interpreting manufacturer instructions
- numeracy skills in regard to:
 - accounting and recording data
 - estimating measurements and volumes
 - working within a budget.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - maintenance of store facilities
 - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements
- relevant industry codes of practice
- OHS legislation and codes of practice
- food safety legislation and regulations
- principles and techniques in:
 - monitoring performance of contracts

REQUIRED SKILLS AND KNOWLEDGE

- negotiating, in particular contract negotiation
- interpersonal communication.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and utilises space and facilities to maximise space utilisation
- evaluates and reports on effectiveness of maintenance contracts.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - maintenance contracts
 - store policy and procedures on maintenance of facilities, contract negotiation
 - relevant legislation and statutory requirements
 - industry codes of practice
 - OHS legislation and codes of practice
- a team
- equipment and technology.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- case study or research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- store maintenance
- facilities management
- reporting mechanisms
- OHS
- food safety.

Relevant legislation may include:

- federal, state or territory and local legislation
- food safety regulations
- OHS.

Expert or specialist advice may be sought:

- internally
- externally.

Retail equipment may include:

- point-of-sale terminals
- EFTPOS terminals
- computers, scanners and printers
- pricing equipment
- electronic bar coding equipment
- portable data entry
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- fixtures and fittings
- food preparation equipment.

RANGE STATEMENT

Faults may be *reported*:

- verbally
- in writing
- by email
- to service personnel
- to contractors
- to relevant managers
- to supervisor.

Contracts may be negotiated:

- externally
- internally.

Contracts may involve:

- quality standards
- building maintenance services
- cleaning
- security
- electrical services
- plumbing services
- equipment maintenance.

Relevant personnel may include:

- managers
- supervisors
- specialist staff.

Cross-Sector

Competency field

Competency field

Cleaning and Maintenance

SIRXFIN001A Balance point-of-sale terminal

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to balance a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions and reconciling takings.

Application of the Unit

Application of the unit This unit is undertaken with some supervision. It requires the team member to apply store policy and procedures to accurately and efficiently balance a register or terminal, maintain a cash float, reconcile cash and non-cash transactions and record takings.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Remove takings from register or terminal.	1.1 Perform <i>register or terminal</i> balance at designated times according to <i>store policy and procedures</i> . 1.2 Separate cash float from takings prior to balancing procedure and secure according to store policy. 1.3 Supply change to register or terminal according to store policy. 1.4 Acquire and accurately interpret register or terminal reading or print-out. 1.5 Remove and transport cash and <i>non-cash documents</i> according to store security policy and procedures.
2 Reconcile takings.	2.1 Count cash accurately. 2.2 Calculate non-cash documents accurately. 2.3 Determine balance between register or terminal reading and sum of cash and non-cash transactions.

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Report discrepancies between register or terminal reading and sum of cash and non-cash transactions to *relevant personnel* according to store policy.
- 2.5 Record store and individual department takings and file *records* according to store policy.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- operating register or terminal
- completing tasks in a set timeframe
- literacy skills in regard to:
 - interpreting documentation
 - completing documentation
- numeracy skills in regard to:
 - counting cash
 - calculating non-cash transactions
 - reporting on takings.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - register or terminal balance
 - cash and non-cash transactions security
 - cash float
 - operation of equipment used at register or terminal
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash float
 - counting cash
 - calculating non-cash documents
 - balancing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
 - change required and denominations of change
 - EFTPOS
 - credit cards
 - gift vouchers
 - lay-by
 - credit and returns.

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- consistently applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- consistently applies store policy and procedures in regard to cash float
- consistently applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - financial transaction docketts, slips and invoices
 - sample debit card and credit card vouchers
 - recording and tally sheets
 - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

RANGE STATEMENT

Register or terminals may be:

- manual
- electronic
- cleared by operator or specialist staff
- cleared at intervals during or at close of trading.

Store policy and procedures in regard to:

- register or terminal balance
- cash handling
- security.

Non-cash documents may relate to:

- credit cards
- cheques
- gift vouchers
- hire-purchase
- lay-by
- cash on delivery (COD)
- customer refunds
- customer credit ratings.

Relevant personnel may include:

- manager
- supervisor
- team leader.

Records may be:

- manual
- electronic.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Control costs.	<p>1.1 Implement cost reduction measures according to <i>store policy and procedures.</i></p> <p>1.2 Assess and interpret <i>information</i> on costs and <i>resource</i> allocation.</p> <p>1.3 Actively encourage <i>team members</i> to control costs in their areas of responsibility.</p> <p>1.4 Promptly implement recommendations for improving cost reduction or <i>communicate to relevant personnel.</i></p>
2 Control budget.	<p>2.1 Monitor and maintain expenditure within budget targets according to store policy.</p> <p>2.2 Compare actual income and expenditure to budget targets at regular intervals according to store policy.</p> <p>2.3 Monitor, analyse and compare gross profit and loss figures by department or section and store, with budget targets.</p> <p>2.4 Monitor and analyse net profit figures, including floor space profitability according to budget targets.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5 Monitor and analyse stock turnover figures according to budget targets.</p> <p>2.6 Promptly inform relevant personnel, where potential occurs for budget under or overspend.</p> <p>2.7 Take prompt corrective action where significant deviations from budget occur.</p> <p>2.8 Negotiate necessary changes or allocations to agreed budget in advance of requirement.</p> <p>2.9 Ensure modifications to existing budgets are authorised according to store policy.</p>
3 Propose expenditure.	<p>3.1 Ensure estimates of costs and benefits are supported by valid, relevant information.</p> <p>3.2 Ensure final recommendations are supported by realistic alternatives and contain accurate, clear <i>proposals</i>.</p> <p>3.3 Ensure recommendations clearly indicate net benefits over designated timeframe and related changes in operations.</p> <p>3.4 Clarify contentious issues by further explanation.</p> <p>3.5 Compare estimates to actual costs and benefits to improve future proposals.</p>
4 Maintain store accounting systems.	<p>4.1 Manage and maintain store policy and procedures in regard to <i>record-keeping systems</i>.</p> <p>4.2 Monitor and maintain store systems for recording sales figures, revenue and expenditure.</p> <p>4.3 Monitor and maintain systems for recording and retrieving financial, personnel and payroll information as required by store policy.</p>
5 Prepare store sales budgets.	<p>5.1 Maintain store policy and procedures in regard to preparation of <i>budget or target figures</i>.</p> <p>5.2 Compare, analyse, document and report budget and actual sales revenue and expenditure figures according to budget targets and store policy.</p> <p>5.3 Maintain accurate records on past sales budgets or targets according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
	5.4 Present proposed budgets or targets accurately and concisely.
	5.5 Justify variations to proposed targets and report according to store policy.
6 Negotiate budgets.	6.1 Conduct budget negotiations within a set timeframe and in a manner likely to promote good relationships.
	6.2 Ensure budget negotiations reflect the overall store policies and objectives relevant to the manager's area of responsibility.
	6.3 Seek clarification, where areas of uncertainty or disagreement occur.
	6.4 Promptly inform all relevant personnel of budget decisions.
	6.5 Present proposals clearly, concisely, in an appropriate form, and emphasising benefits to store operation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- report presentation
- interpersonal communication skills to:
 - encourage team members to control costs
 - provide information to relevant personnel where potential occurs for budget under or overspend
 - negotiate budgets and provide information on budget decisions through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- time management
- literacy and numeracy skills in regard to:
 - report writing
 - compilation and analysis of budgetary figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - financial management
 - resource utilisation
- store revenue
- capital and overhead costs
- interest rates
- pricing policies, including GST requirements
- cost of stock, materials and equipment
- staffing costs
- operational costs
- principles and techniques in:
 - interpersonal communication
 - monitoring resource utilisation and costs
 - analysing efficiency and effectiveness
 - cost-benefit analysis
 - differential analysis

REQUIRED SKILLS AND KNOWLEDGE

- risk analysis.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently negotiates, develops and implements store budgets according to store policy and procedures
- monitors, analyses and reports on income and expenditure against budgets according to store policy and procedures
- manages and maintains accurate accounting systems according to store policy and procedures
- develops and maintains store policy and procedures in regard to store sales budgets or targets.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- store or sample policy and procedures in regard to financial management
- an accounting system
- budgetary information
- a team involved in budget control.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research project
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- financial management
- reporting mechanisms.

RANGE STATEMENT

Information may include:

- resource utilisation
- capital and overhead costs
- interest rates
- stock, materials and equipment
- staffing levels
- operational costs.

Information may be obtained by:

- direct observation
- written reports
- numerical data.

Resources may include:

- people
- materials
- equipment and technology
- finances
- time.

Team members may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Communication may be:

- formal and informal
- with individuals or groups
- written, faxed, emailed or spoken.

Relevant personnel may include:

- relevant managers
- supervisor
- team leader.

RANGE STATEMENT

Proposals may include:

- profitability
- productivity
- quality of service
- environmental impact
- working conditions
- working relationships
- team motivation
- long-term goals
- short-term goals.

Record keeping systems may include:

- manual
- computerised.

Budget or target figures may encompass:

- sales
- cash flow
- net profit
- payroll
- staff expenditure
- capital
- maintenance
- advertising and promotion.

SIRXINV004A Buy merchandise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	<p>1.6 Monitor market competition.</p> <p>2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i>.</p> <p>2.2 Analyse store or department sales figures to determine contribution rates of product lines.</p> <p>2.3 Determine store or department space requirements and brand product mix according to store policy.</p> <p>2.4 Determine future directions for merchandise ranges according to store policy.</p>
3 Plan merchandise ranges.	<p>3.1 Develop and implement buying plan according to outcomes of analysis and store policy.</p> <p>3.2 Determine future directions for merchandise ranges according to store policy.</p> <p>3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities.</p> <p>3.4 Analyse store or department sales figures to determine contribution rates of product lines.</p> <p>3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit.</p> <p>3.6 Identify and act upon contribution improvement opportunities.</p> <p>3.7 Determine store or department space requirements and brand product mix according to store policy.</p> <p>3.8 Determine stock levels according to peak seasons, special events and supplier lead time.</p> <p>3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i>.</p>
4 Establish supplier relations.	<p>4.1 Develop cooperative relationships with supplier representatives according to store policy.</p> <p>4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status.</p> <p>4.3 Identify new suppliers and delete existing suppliers</p>

ELEMENT	PERFORMANCE CRITERIA
	according to <i>performance indicators</i> .
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	<p>8.1 Calculate or estimate individual product range contributions against budget and targets.</p> <p>8.2 Develop and implement product range assessment checks against budget and targets.</p> <p>8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.</p> <p>8.4 Maximise profit margins in negotiations with suppliers.</p> <p>8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.</p> <p>8.6 Negotiate specifications for <i>terms of trade</i>.</p>
9 Rationalise stock.	<p>9.1 Review and update stock range at regular intervals.</p> <p>9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit.</p> <p>9.3 <i>Consolidate stock</i> as required to maximise sales potential.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication
 - ask questions to identify and confirm requirements
 - give instructions
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas

REQUIRED SKILLS AND KNOWLEDGE

- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

RANGE STATEMENT

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

RANGE STATEMENT

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends
- product availability
- sales performance.

Legal requirements may include:

- sale of second-hand goods
- Trade Practices and Fair Trading Acts
- licence, patent or copyright arrangements
- pricing procedures, including GST requirements.

Staff training may include:

- on-the-job
- off-the-job
- one-on-one coaching
- any combination of the above.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Terms of trade may include:

- special buys
- payment terms
- promotional deals with supplier.

RANGE STATEMENT

Stock lines may be *deleted* due to:

- changes in store policy and culture
- sales performance
- customer requirements
- fashion trends
- product availability
- problems with supply.

Methods to *consolidate stock* may include:

- movement of stock between departments or stores.

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage receipt, dispatch and storage of merchandise.	<p>1.1 Receive, dispatch and store merchandise according to <i>store policy and procedures</i>.</p> <p>1.2 Determine cost-effective and efficient methods for goods movement according to store policy.</p> <p>1.3 Implement maintenance procedures for storage areas and <i>equipment</i> according to store policy.</p>
2 Manage stock control.	<p>2.1 Implement store policy and procedures in regard to <i>stock control</i> and inventories.</p> <p>2.2 Establish and implement store procedures to monitor and control stock levels.</p> <p>2.3 Maintain budgeted stock levels.</p> <p>2.4 Establish and implement stocktaking procedures.</p> <p>2.5 Establish and implement <i>contingency plans</i> in regard to stock delivery times.</p>

ELEMENT

PERFORMANCE CRITERIA

2.6 Document and prepare accurate *reports* on stock inventories.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- store stocktaking systems
- use of electronic recording equipment
- time management
- report preparation and presentation
- literacy and numeracy skills in regard to:
 - stock control reports and documentation
 - processing orders
 - maintaining delivery and supply records
 - stock distribution records
 - maintaining stock recording systems
 - data analysis.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - receipt of goods from suppliers
 - dispatch of goods
 - shrinkage prevention
 - waste controls
 - safety controls
 - secure storage in an appropriate environment
 - equipment used to move stock
- store systems and equipment for stock recording and control
- inventory control
- storage security
- licensing requirements for operating moving equipment (if applicable)
- relevant legislation and statutory requirements
- relevant industry codes of practice
- OHS legislation and codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with receipt, dispatch, storage and movement of merchandise according to store policy and procedures, including OHS policies and guidelines
- implements maintenance procedures for storage areas and equipment according to store policy
- plans, coordinates and implements activities associated with stock control, including:
 - monitoring and controlling stock levels
 - establishing and maintaining stocktaking procedures
 - documenting and reporting on inventories according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures on inventory control
 - legislation and statutory requirements
 - industry codes of practice
 - OHS legislation and codes of practice
- access to:
 - a stock control system
 - stock control equipment
 - a team.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

RANGE STATEMENT

Store policy and procedures in regard to:

- receipt of goods from suppliers
- dispatch of goods
- shrinkage prevention
- waste controls
- safety controls
- secure storage
- stock control and inventories.

Equipment may include:

- electronic bar coding equipment
- weighing machines
- thermometers
- climate control
- cold storage units
- storage fixtures
- trolley return equipment
- portable data entry
- cutting equipment
- protective clothing.

Stock control may include:

- stocktaking
- monitoring stock levels
- cyclical counts
- minimisation of out-of-date stock
- quality control.

Contingency plans may include:

- breakdowns
- delays
- floods
- breakages.

Reports may include:

- business documents
- informal reports
- stocktake reports.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Coordinate merchandise presentation and display.	<p>1.1 Identify items to be advertised or promoted according to store merchandising policy.</p> <p>1.2 Plan, coordinate and evaluate promotions or special events as directed by management.</p> <p>1.3 Plan and supervise construction and maintenance of <i>displays</i> in order to achieve balance and visual impact.</p> <p>1.4 Inform <i>staff</i> of store <i>display standards and requirements</i>.</p> <p>1.5 Inform staff of occurrence and timing of <i>promotions and special events</i>.</p> <p>1.6 Ensure product or service <i>display information</i> accurately depicts product or service being promoted.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7 Ensure displays are completed according to required time schedule, with minimum disruption to <i>customer</i> service and traffic flow.
	1.8 Construct and maintain displays in a safe, secure manner.
	1.9 Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.
	1.10 Inform staff of appropriate timing for dismantling and disposal of displays.
	1.11 Evaluate merchandise presentation against sales turnover and store presentation standards.
	1.12 Provide management with feedback in regard to improvement of store marketing and promotional activities.
2 Implement merchandise pricing.	2.1 Implement store policy and procedures in regard to pricing and ticketing.
	2.2 Identify current prices for products and services and amend according to store policy.
	2.3 Inform team members of price changes and current pricing policies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- use and maintenance of electronic labelling and ticketing equipment
- interpersonal communication skills to:
 - provide information to staff
 - provide feedback to management through clear and direct communication
 - share information
 - give instructions
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy and numeracy skills in relation to:
 - machine or manual preparation of labels and tickets
 - reading and interpreting store policies and procedures
 - merchandise presentation and pricing.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - merchandising, pricing and ticketing
 - merchandise range
 - storage of stock
 - stock rotation and replenishment
 - minimum stock levels required
- procedure for accessing information and implementing price changes
- principles of display and design
- location of display areas
- availability and use of materials
- store promotional themes
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- load-bearing capacity of fixtures and display areas
- correct storage procedures for labelling and ticketing equipment and materials
- relevant OHS legislation and codes of practice
- relevant legislation and statutory requirements, including Trade Practices and Fair Trading Acts

REQUIRED SKILLS AND KNOWLEDGE

- pricing procedures, including GST requirements
- relevant industry codes of practice
- principles and techniques of interpersonal communication skills
- manufacturer specifications for the use of electronic labelling and ticketing equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- implements store policies and procedures in regard to displaying, merchandising, ticketing and pricing of stock
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements and timing for dismantling and disposal of displays
- evaluates and reports sales and presentation effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
 - store policy and procedures manuals on merchandising
 - OHS requirements
 - manufacturer instructions and operation manuals on electronic ticketing equipment
 - legislation and statutory requirements
 - industry codes of practice
 - a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Displays may be located in a variety of areas, including:

- windows
- shelves
- walls
- fixtures on floor
- permanent or temporary
- interior or exterior
- publicly accessible areas.

Staff may be:

- full-time, part-time, casual or contract
- from within or outside own work team
- from a range of social, cultural and ethnic backgrounds.

Display standards and requirements may include :

- setting up new displays
- maintaining existing displays
- ticketing and display signage
- safety.

Promotions and special events may include:

- stock characteristics
- industry codes of practice.

Display information may include:

- product brand
- product characteristics, such as:
 - size
 - weight capacity
 - materials
- special guarantees
- price
- discount information.

RANGE STATEMENT

Customers may include:

- new or repeat contacts
- external and internal contacts
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

SIRXMGT005A Set strategic plans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to develop strategic plans.

Application of the Unit

Application of the unit This unit involves setting objectives and targets both long-term and short-term, and developing action plans consistent with the store's overall aims and objectives. Senior management staff are responsible for this function.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Communicate and implement mission statement.	<p>1.1 Communicate <i>mission statement</i> according to store's stated purpose and values.</p> <p>1.2 Interpret mission statement in active consultation with <i>team members and management</i>.</p>
2 Set objectives and targets.	<p>2.1 Develop objectives and targets after active consultation with team members and management according to <i>store policy and procedures</i>.</p> <p>2.2 Ensure <i>strategies and objectives</i> accurately reflect the overall <i>store mission and values</i>.</p> <p>2.3 Ensure strategies and objectives are attainable, cost-efficient and realistic within a designated timeframe and allow for continuous improvement planning.</p> <p>2.4 Ensure strategies and objectives contain sufficient detail to allow development of specific projects.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.5 Clearly acknowledge <i>constraints upon objectives</i> .
3 Develop action plans.	3.1 Develop, evaluate and implement action plans according to store policy and procedures.
	3.2 Ensure action plans contain, clear, comprehensive and concise details.
	3.3 Ensure action plans take account of appropriate operational and other relevant considerations.
	3.4 Ensure proposals identify targets, standards and implementation methods.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- analysing, implementing and evaluating plans
- presenting reports
- consultative processes
- group presentation
- interpersonal communication skills to:
 - interpret and communicate mission statement
 - develop objectives and targets in consultation with team members and management through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - documenting strategic plans
 - reading and interpreting information
 - numerical skills in regard to financial and budget planning.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to strategic planning
- store purpose and values
- store mission statement
- internal and external operating environment
- principles and techniques in strategic planning.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets, communicates and implements store's mission statement
- collaboratively develops team objectives reflecting the store's mission statement
- collaboratively develops strategies for achieving team objectives
- collaboratively develops effective action plans to implement strategies, including targets, standards and implementation methods.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - strategic plans
 - store mission statement
 - store value statement
- information on the internal and external operating environment
- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Mission statements may be:

- formal
- informal
- communicated verbally
- communicated in writing.

Team members and management may include:

- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Store policy and procedures in regard to:

- strategic planning

RANGE STATEMENT

Strategies and objectives may relate to:

- technology
- time management
- standards of work
- quality
- quantity
- human relations, personal development
- legal issues
- internal and external operating environments
- implementation of policy and procedures
- development and communication of ideas
- development of product and service provision
- problem solving
- financial control and accounting
- profits
- management systems
- inventory control
- loss prevention.

Store mission and values may include:

- customer relationships
- supplier relationships
- legal requirements
- OHS
- equal opportunity
- ethics
- employment
- human relations
- training
- environment.

Constraints upon objectives may include:

- internal considerations
- external considerations.

SIRXMGT006A Initiate and implement change

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to initiate and implement change in a retail environment.

Application of the Unit

Application of the unit This unit requires the management personnel to identify opportunities for increased sales and service, and to evaluate, negotiate and implement changes consistent with the store's overall aims and objectives.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Identify opportunities for increased sales and service | <p>1.1 Regularly obtain relevant, reliable <i>information</i> from a variety of sources and analyse with regard to requirements of store operations.</p> <p>1.2 Accurately report information on developments to <i>appropriate personnel</i>.</p> <p>1.3 Use information related to current practices to identify opportunities for growth in sales and service.</p> <p>1.4 Continuously monitor and evaluate operations, and take action to improve where indicated.</p> <p>1.5 Accurately identify obstacles to change and take action to alleviate problems.</p> <p>1.6 Use evaluation of previous development outcomes to identify a range of <i>opportunities for improvement and change</i>.</p> |
|--|--|

ELEMENT	PERFORMANCE CRITERIA
2 Evaluate changes.	<p>2.1 Ensure information on current and proposed merchandise and service range and operating systems is complete, accurate and accessible.</p> <p>2.2 Compare advantages and disadvantages of current and proposed operations.</p> <p>2.3 Assess <i>implications</i> of introducing changes using appropriate <i>analysis measures</i>.</p> <p>2.4 Ensure proposed changes take account of previous evaluations.</p> <p>2.5 Communicate recommendations to appropriate people within designated timeframes.</p> <p>2.6 Analyse responses to recommendations and make appropriate alterations.</p>
3 Negotiate changes.	<p>3.1 Promptly communicate information on projected change to appropriate people in sufficient detail for them to evaluate the implications for their areas of responsibility.</p> <p>3.2 Maintain good working relationships during <i>negotiations</i>.</p> <p>3.3 Ensure agreements reached include detailed implementation plans in line with <i>store policy and procedures</i>.</p> <p>3.4 Communicate complete and accurate records of negotiations and agreements to appropriate people.</p> <p>3.5 Where compromise necessary, ensure it is mutually acceptable and in line with store policy.</p> <p>3.6 Convey reasons for non-acceptance of proposals positively to relevant staff.</p> <p>3.7 Encourage relevant people to understand and participate in changes.</p>
4 Implement and evaluate change.	<p>4.1 Communicate relevant details of implementation plans within designated timeframes to appropriate people in a manner and at a level and pace suitable for their needs.</p> <p>4.2 Use resources effectively to meet the requirements of operational changes.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.3 Monitor operational changes according to implementation plans.
	4.4 Evaluate outcomes of changes against expectations and previous sales and service records.
	4.5 Modify implementation process to resolve <i>problems</i> if required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- planning and proposing changes
- consultation skills
- negotiation skills
- evaluating and forecasting
- collecting and organising information
- presentation skills
- interpersonal communication skills to:
 - report information and communicate recommendations
 - negotiate changes and communicate details of implementation plans through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to documenting plans and reports.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - initiating and implementing change
 - applying relevant legislation and organisational rules
- changes to technology and resources
- market needs and marketing opportunities
- resource utilisation and costs
- analysing efficiency and effectiveness
- assessing alternatives in areas of change, including contingency planning
- using financial analysis techniques, including cost and benefit, differential and risk analysis
- quality assurance and control.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- reviews relevant information and identifies opportunities for increased sales and service
- evaluates proposals for changes to merchandise and service range and operating systems
- negotiates for the successful implementation of change
- collaboratively implements changes
- evaluates implemented change against the initial proposal.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures in regard to initiating and implementing change
 - resource utilisation
 - proposals for changes
 - market analysis data
- a team.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

RANGE STATEMENT

Information may be gathered from:

- external sources
- higher-level managers
- subordinates
- colleagues
- specialists
- staff in other departments.

Appropriate personnel may include:

- supervisor and manager
- team members.

Opportunities for improvement and change may include:

- personnel requirements and team composition
- employment and work practices
- work methods and patterns
- cost factors
- nature and availability of services and products
- quality of services and products
- methods to reduce waste
- new equipment and technology
- design of systems.

Implications of change may affect:

- profitability
- productivity
- quality of service and product
- environmental impact
- working conditions
- working relationships
- reactions of individual employees.

Analysis measures may be:

- qualitative
- quantitative.

RANGE STATEMENT

Communication and negotiations may include:

- higher-level managers
- subordinates
- colleagues
- specialists
- staff in other departments
- representatives from external organisations.

Negotiations may be conducted:

- verbally in formal or informal meetings
- by telephone or fax
- written correspondence
- email.

Store policy and procedures in regard to:

- initiating and implementing changes
- communication techniques.

Problems in implementing change may relate to:

- internal considerations
- external considerations.

SIRXSL001A Sell products and services

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment. It involves the use of sales techniques and encompasses the key selling skills from approaching the customer to closing the sale. It requires a basic level of product knowledge.

Application of the Unit

Application of the unit This competency applies to frontline sales personnel. It requires the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales. Personal evaluation is utilised to maximise sales in accordance with industry codes of practice, relevant legislation and store policy.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply product knowledge.	<p>1.1 Demonstrate knowledge of the use and application of relevant products and services according to <i>store policy</i> and <i>legislative requirements</i>.</p> <p>1.2 Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p>
2 Approach customer.	<p>2.1 Determine and apply timing of <i>customer</i> approach.</p> <p>2.2 Identify and apply effective <i>sales</i> approach.</p> <p>2.3 Convey a positive impression to arouse customer interest.</p> <p>2.4 Demonstrate knowledge of customer buying behaviour.</p>

ELEMENT	PERFORMANCE CRITERIA
3 Gather information.	<ul style="list-style-type: none">3.1 Apply questioning techniques to determine customer buying motives.3.2 Use listening skills to determine customer requirements.3.3 Interpret and clarify non-verbal communication cues.3.4 Identify customers by name where possible.3.5 Direct customer to specific merchandise.
4 Sell benefits.	<ul style="list-style-type: none">4.1 Match customer needs to appropriate products and services.4.2 Communicate knowledge of products features and benefits clearly to customers.4.3 Describe product use and safety requirements to customers.4.4 Refer customers to appropriate product specialist as required.4.5 Answer <i>routine customer questions</i> about merchandise accurately and honestly or refer to senior sales staff.
5 Overcome objections.	<ul style="list-style-type: none">5.1 Identify and accept customer objections.5.2 Categorise objections into price, time and merchandise characteristics.5.3 Offer solutions according to store policy.5.4 Apply <i>problem solving</i> to overcome customer objections.
6 Close sale.	<ul style="list-style-type: none">6.1 Monitor, identify and respond appropriately to customer buying signals.6.2 Encourage customer to make purchase decisions.6.3 Select and apply appropriate method of closing sale.

ELEMENT

PERFORMANCE CRITERIA

7 Maximise sales opportunities.

7.1 Recognise and apply opportunities for making additional sales.

7.2 Advise customer of complementary products or services according to customer's identified need.

7.3 Review personal sales outcomes to maximise future sales.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- selling techniques, including:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific merchandise
 - add-ons and complementary sales
 - overcoming customer objections
 - closing techniques
- verbal and non-verbal communication skills
- handling difficult customers
- negotiation skills
- sales performance appreciation
- questioning, listening and observation
- literacy skills in regard to:
 - reading and understanding product information
 - reading and understanding store policies and procedures
 - recording information
- numeracy skills in regard to:
 - handling payment for goods
 - weighing and measuring goods.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - selling products and services
 - allocated duties and responsibilities
- store merchandise and service range
- specific product knowledge for area or section
- relevant legislation and statutory requirements
- relevant industry codes of practice
- customer types and needs, including:
 - customer buying motives
 - customer behaviour and cues

REQUIRED SKILLS AND KNOWLEDGE

- individual and cultural differences
- demographics, lifestyle and income
- types of customer needs, e.g. functional, psychological.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- consistently applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- consistently applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future sales.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as policy and procedures manuals
- a range of customers with different requirements
- a range of merchandise and products appropriate to the retail workplace
- product labels and sources of product information.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- interaction with customers
- selling products and services.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- tobacco laws
- liquor laws
- lottery legislation
- industry codes of practice
- OHS
- sale of second-hand goods
- sale of X and R rated products
- trading hours
- transport, storage and handling of goods.

Product knowledge may include:

- warranties
- features and benefits
- use-by dates
- handling and storage requirements
- stock availability
- safety features
- price.

RANGE STATEMENT

Relevant sources of information may include:

- internet
- staff members
- store or supplier product manuals
- product profiles
- videos
- demonstrations
- labels
- store tours.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Sales transactions may be completed:

- face to face
- over the telephone
- online.

Routine customer questions may relate to:

- price and price reductions
- quality
- availability
- features and benefits.

Problem solving may be affected by:

- store policies and procedures
- resource implications.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine assessment approach	<p>1.1 Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2 Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1 Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2 Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1 Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2 Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3 <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4 Write clear instructions for candidate about the use of the instruments</p> <p>3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
 - identify opportunities for integrated competency assessment
 - contextualise competency standards to the operating assessment environment, including RPL
 - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work focused
 - criterion referenced
 - standards based
 - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence

- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • Evidence of the ability to: • plan and organise the assessment process on a minimum of two occasions • collect evidence that demonstrates: <ul style="list-style-type: none"> • documented assessment plans • having covered a range of assessment events • catering for a number of candidates • different competency standards or accredited curricula • an RPL assessment • contextualisation of competency standards and the selected assessment tools, where required • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purposes of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.
<p><i>Context of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and: <ul style="list-style-type: none"> • evidence to support RPL • work activities in the candidate's workplace • learning activities • who carries out the assessment/RPL.
<p><i>Organisational, legal and ethical requirements</i> may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • assessment strategy requirements • reporting, recording and retrieval systems for assessment, including RPL • quality assurance systems • business and performance plans • access and equity policies and procedures • collaborative and partnership arrangements • defined resource parameters • mutual recognition arrangements • industrial relations systems and processes, awards, and enterprise agreements • Australian Quality Training Framework • registration scope • human resources policies and procedures • legal requirements, including:

	<ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	<ul style="list-style-type: none"> • criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.
Types of evidence may include:	<ul style="list-style-type: none"> • direct • indirect • supplementary.
Rules of evidence ensure that evidence collected is:	<ul style="list-style-type: none"> • valid • sufficient • authentic • current.
Assessment methods are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> • direct observation, for example: <ul style="list-style-type: none"> • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: <ul style="list-style-type: none"> • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: <ul style="list-style-type: none"> • written questions, e.g. on a computer • interviews • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example:

	<ul style="list-style-type: none"> • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: <ul style="list-style-type: none"> • testimonials and reports from employers and supervisors • evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
Assessment plan may include:	<ul style="list-style-type: none"> • overall planning document describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
Simple assessment instruments may include:	<ul style="list-style-type: none"> • instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
Available assessment instruments may include:	<ul style="list-style-type: none"> • commercially available instruments • those created by others inside the registered training organisation.
Map assessment means:	<ul style="list-style-type: none"> • showing a clear relationship between the evidence and the requirements of the unit.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assess the competence of a candidate.

Application of the Unit

This unit typically applies to assessors.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare for assessment	<p>1.1 Interpret <i>assessment plan</i> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</p> <p>1.2 Access and interpret relevant <i>benchmarks for assessment</i> and nominated <i>assessment tools</i> to confirm the requirements for evidence to be collected</p> <p>1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures</p> <p>1.4 Organise <i>specialist support</i> required for assessment</p> <p>1.5 Explain, discuss and agree details of the assessment plan with candidate</p>
2. Gather quality evidence	<p>2.1 Use agreed <i>assessment methods</i> and instruments to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p> <p>2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</p> <p>2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</p>
3. Support the candidate	<p>3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <i>individual differences</i> and enables two-way <i>feedback</i></p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics</p> <p>3.4 Access required specialist support in accordance with the assessment plan</p> <p>3.5 Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to candidate regarding</p>

	the assessment decision and develop any follow-up action plan required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and process an assessment report according to agreed assessment procedures 5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in <i>consultation</i> with relevant people to improve own future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL
 - identify candidate needs
 - make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning
 - make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome
 - use language appropriate to candidate and assessment environment
 - establish a working relationship with candidate.

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications
 - structure and application of competency standards
 - principles of assessment and how they are applied
 - rules of evidence and how they are applied
 - range of assessment purposes and assessment contexts, including RPL
 - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
 - reasonable adjustments and when they are applicable
 - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
 - potential barriers and processes relating to assessment tools and methods
 - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information
 - plagiarism
 - training packages and competency standards
 - licensing requirements
 - industry and workplace requirements
 - duty of care under common law
 - recording information and confidentiality requirements
 - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
 - workplace relations
 - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use and maintenance of relevant equipment

- sources of OHS information.

-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and instruments involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported • assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Assessment plan</i> may include:</p>	<ul style="list-style-type: none"> • overall planning, describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<p><i>Assessment tools</i> include:</p>	<ul style="list-style-type: none"> • the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
<p><i>Specialist support</i> may include:</p>	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.
<p><i>Assessment methods</i> include:</p>	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation

	<ul style="list-style-type: none"> • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
Individual differences may include:	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
Feedback may include:	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and presentation.
Consultation may involve:	<ul style="list-style-type: none"> • moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according

ELEMENT	PERFORMANCE CRITERIA
	to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:
 - ensure all learning objectives are covered
 - pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency

REQUIRED SKILLS AND KNOWLEDGE

requirements

- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing: <ul style="list-style-type: none"> • different learning objectives • a range of techniques and effective communication skills appropriate to the audience.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Learner characteristics</i> may include:</p>	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<p><i>Safe learning environment</i> may include:</p>	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<p><i>Instruction and demonstration objectives</i> may include:</p>	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<p><i>Learning resources</i> may include:</p>	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<p><i>Learning materials</i> may include:</p>	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<p><i>Details</i> may include:</p>	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration

RANGE STATEMENT	
	<ul style="list-style-type: none"> • reason for instruction or demonstration • who will be attending instruction session.
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

Co-requisite units

Co-requisite units		

TLIA2009A Complete and check import/export documentation

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to complete and or evaluate import and export documentation, and check documentation in accordance with the requirements of Customs and related legislation and workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning the completion and checking of import/export documentation.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

This unit is normally packaged at AQF II or above.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify procedures required for documentation for import/export of goods	1.1 Documents required for import/export of goods are identified 1.2 Required documents are sourced 1.3 Content requirements for each section of the documentation are applied 1.4 Timelines for completion of documents are identified and noted 1.5 Requirements for permits and other documentation (e.g. Quarantine) are identified and implications noted 1.6 Procedures for obtaining clearances including AUTHORITY TO DEAL, Delivered into Home Consumption authorisation and Export Declaration Numbers (EDN) are identified and followed in accordance with the requirements of Customs and related legislation and workplace procedures 1.7 Letters of credit are identified and implications of each noted 1.8 Assistance is sought as required in identifying required documents and to commence process of assessing or completing these documents 1.9 Lodge all documentation if required by legislation (e.g. CITES)
2 Complete documentation to meet legislative and workplace requirements	2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs and related legislation and workplace procedures 2.2 Workplace procedures for authorisations are followed 2.3 Data entry for documents are completed 2.4 Problems arising in completing required documents are identified and assistance sought to resolve these in accordance with the requirements of Customs and related legislation and workplace procedures 2.5 Actions are taken to meet deadlines 2.6 Assistance is sought as required in completing required documents
3 Check documentation to ensure it meets legislative requirements	3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs and related legislation and workplace procedures 3.2 Declarations are checked to ensure they meet the requirements of Customs and related legislation and workplace procedures 3.3 Letters of credit are checked to ensure they meet commercial, transport and overseas requirements 3.4 Dangerous goods documentation is checked in accordance with the requirements of Customs and related legislation and workplace procedures

ELEMENT	PERFORMANCE CRITERIA
	3.5 Any revisions to documents are finalised and rechecked by self and supervisor, manager or more senior personnel prior to lodgement
4 Lodge documentation for processing	4.1 Documents are forwarded to relevant personnel in accordance with the requirements of Customs and related legislation and workplace procedures
	4.2 Documents are filed, stored and retained in accordance with the requirements of Customs and related legislation and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international standards, codes and regulations relevant to the import and export of cargo and freight
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of import and export documentation
- Focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation
- Problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve the problems
- The Customs Act 1901 and related legislation
- Documentation requirements for the import and export of cargo and freight

Required skills:

- Communicate effectively with others when completing import and export documentation
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the import and export of cargo and freight
- Complete and/or assess accuracy of import and export documentation
- Work collaboratively with others when completing import and export documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing and/ or assessing

Required skills:

- import and export documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
 - Modify activities depending on differing operational contingencies, risk situations and environments
 - Operate and adapt to differences in equipment in accordance with standard operating procedures
 - Select and use relevant communications, computing and office equipment when completing import and export documentation

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying procedures required for documentation for import/export of goods
 - completing and checking documentation and records to meet relevant Customs legislation and related legislation and workplace requirements
 - providing customer/client service and work effectively with others
 - selecting and using appropriate workplace colloquial and technical language and communication technologies in the workplace context

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is

EVIDENCE GUIDE

- required to:
- relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted in:
- a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
- Cargo may include:
- goods with specialist requirements, including temperature controlled goods and dangerous goods
 - personal effects
 - consignments imported/exported by parcels post
 - consignments imported/exported by air freight
 - consignments imported/exported by sea freight
 - wildlife or wildlife products (living or non-living)
 - goods with specialist requirements, including temperature controlled goods and dangerous goods

RANGE STATEMENT

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, barcodes, and container identification/serial number
- relevant Customs legislation, related legislation including quarantine legislation, environment and conservation legislation and Australian and international codes of practice and regulations relevant to import/export of cargo
- Australian and international standards, regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- dangerous goods declarations and material safety data sheets (MSDSs) (where applicable)
- packing declaration
- timber treatment certificates
- cleanliness certificate
- handling instructions for cargo (especially for dangerous goods or temperature controlled goods)
- commercial invoices
- packing lists
- air waybill (AWB)
- certificates of origin

RANGE STATEMENT

Applicable regulations and legislation may include:

- bills of lading (B/L) or sea waybills
- certificates of marine insurance, other insurance certificates
- quarantine treatment certificate
- transportation and warehousing instructions
- permits from regulatory bodies (Australian and international)
- financial documentation
- other documents specific to goods, country of origin/destination
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian Standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant Customs and related legislation, including taxation legislation
- relevant standards and codes for the import/export of cargo
- quarantine legislation
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select load moving equipment	<p>1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods</p> <p>1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures</p>
2 Move goods	<p>2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures</p> <p>2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures</p>
3 Check goods and complete documentation	<p>3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken</p> <p>3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements

REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
 - by day or night
 - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Mechanised equipment may include a range of goods and materials handling equipment such as:
- automatic guided vehicle
 - tow motors
 - high level order picker
 - conveyor system
 - mechanised pallet mover
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - moving and rotating equipment and vehicles
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace
- company procedures
 - enterprise procedures
 - organisational procedures

RANGE STATEMENT

procedures may include:

- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers instructions concerning the use and servicing of automated mechanical equipment
- workplace procedures and policies
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- ADG Code and regulations

Applicable regulations and legislation may include:

TLID3020A Care for livestock in transit

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to prepare and care for livestock in transit, including making preparations to transport livestock, caring for and controlling livestock in transit, and using appropriate animal husbandry techniques, as required. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and industry codes of practice for the care of livestock in transit.

Work is performed under limited or minimum supervision generally within a team environment. It involves the application of the basic principles and routine procedures to the care of livestock during transit.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to transport livestock	<p>1.1 Condition, quality and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace policy</p> <p>1.2 Any poor quality livestock is identified and reported to specified personnel in accordance with workplace policy</p> <p>1.3 Feed provisions and other requirements for livestock prior to and during transit are identified and organised</p> <p>1.4 Portable stockyards are assembled as required</p>
2 Care for and control livestock in transit	<p>2.1 Condition of livestock is regularly monitored during loading, transit and unloading and appropriate action is taken in terms of relevant government regulations, workplace policy, and humane and permit requirements</p> <p>2.2 Working dogs and appropriate handling equipment are used to aid the handling of livestock during loading and unloading operations in accordance with regulations and workplace procedures</p> <p>2.3 Required action is taken for the care and well-being of animals in the event of an accident during transit</p> <p>2.4 Distressed stock is handled in an appropriate manner in accordance with government regulations and workplace policies</p>
3 Use animal husbandry techniques	<p>3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in terms of relevant government regulations, workplace policy, and humane and permit requirements</p> <p>3.2 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace policy</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulations concerning the care for livestock in transit
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when caring for livestock during transit and related precautions to control the risk
- Workplace procedures and policies for the caring for livestock during transit

REQUIRED KNOWLEDGE AND SKILLS

- Specialised livestock handling equipment and procedures for its use
- Insurance rights and responsibilities
- Housekeeping standards and procedures when caring for livestock during transit
- Methods of securing livestock during transit

Required skills:

- Communicate effectively with others when caring for livestock in transit
- Read and interpret instructions, procedures and information relevant to the care of livestock in transit
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the care of livestock in transit
- Work collaboratively with others when caring for livestock in transit
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when caring for livestock in transit in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events during the care of livestock in transit
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to animals or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify and correctly use equipment required to care for livestock during transit
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment

EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

RANGE STATEMENT

Livestock being cared for in transit may include any livestock able to be transported, such as:

- sheep
- cattle
- horses
- goats
- pigs
- chickens

Customers may be:

- internal or external

Operations may be conducted:

- in a range of work environments and weather conditions
- by day or night

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments
- a workplace, warehouse or depot
- in a vehicle on the road
- at a client's workplace

Handling operations may be carried out both manually and with the aid of working dogs and livestock handling equipment, including:

- cattle prods
- restraining devices
- portable cattle yards

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear
- safety footwear

Information/documents may include:

- industry codes and government regulations for the care of livestock during transit
- workplace documentation
- client instructions
- workplace procedures and policies for the care of livestock during transit
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- award, enterprise bargaining agreement, other industrial arrangements
- guidelines on livestock husbandry relevant to the care of livestock during transit

RANGE STATEMENT

Applicable regulations and legislation may include:

- standards and certification requirements
- quality assurance procedures
- emergency procedures
- state/territory mass and loading regulations
- Australian and state/territory regulations relevant to the care of livestock during transit
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation
