Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recover thin skirts	1.1. Thin skirts are removed according to cutting line specifications, <i>workplace</i> and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> .
	1.2. Defects in thin skirts are identified and managed according to workplace requirements.
	1.3. Sources of contamination and cross-contamination are identified and corrective action is taken according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- remove thin skirts according to cutting line specifications, workplace, OH&S, Quality Assurance (QA), and hygiene and sanitation requirements
- identify and manage defects in thin skirts according to workplace requirements
- identify and correct sources of contamination and cross-contamination according to workplace requirements
- work effectively as an individual and as part of a team
- apply relevant regulatory requirements
- take action to improve own work performance as a result of self-evaluation,
 feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- cutting line specifications, workplace, OH&S and QA requirements related to the recovery of thin skirts
- possible defects in thin skirts
- possible sources of contamination and cross-contamination
- steps involved in recovering the thin skirt
- relevant regulatory requirements

Evidence Guide

EVIDE	JOE	GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Guidelines for the Training Package.	i knowledge, range statement and the Assessment	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.	
	These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.	
	Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.	
	All assessment must be conducted against Australian meat industry standards and regulations.	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency has to be demonstrated at normal chain speed.	
Context of, and specific resources for assessment	Assessment must occur in an abattoir under normal production conditions.	
Method of assessment	Recommended methods of assessment include: utility quiz of underpinning knowledge workplace demonstration workplace referee or third-party report of performance over time.	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
