

NWPTRT081 Operate and control activated sludge processes

Release: 1

NWPTRT081 Operate and control activated sludge processes

Modification History

Release	Comments			
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.			
	This unit supersedes and is equivalent to NWP351B Monitor, operate and control activated sludge processes.			
	 Unit code updated Content and formatting updated to comply with the new standards All PC transitioned from passive to active voice Unit title changed to better reflect unit outcomes Element 1 revised One new PC added to Elements 1 and 2 Elements 1 and 2 all PC reordered and renumbered PC 3.1 removed 			
	PC 3.1 removedPC 2.1 and 2.3 revised			

Application

This unit describes the skills required to operate and control activated sludge processes and to measure and report on system performance and process quality control. The ability to identify faults, determine and apply technical adjustments and conduct chemical dosing procedures is essential to performance.

This unit applies to those working as operational staff with a specific responsibility for wastewater activated sludge in treatment plants.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, performing routine tasks within a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Treatment

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA
Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1.	Plan and prepare for work	1.1 Determine work requirements from job specification and plans.1.2 Select and check equipment required to meet safety requirements of task and site.1.3 Select, fit and use personal protective equipment.
2.	Operate and control process	 2.1 Carry out routine inspection on assets. 2.2 Collect process samples. 2.3 Carry out routine tests. 2.4 Prepare samples for laboratory testing. 2.5 Identify and report process faults and operational condition of assets. 2.6 Carry out basic process adjustments to enhance process performance. 2.7 Monitor processes to maintain parameters of operation.
3.	Complete documentation	3.1 Collect, record and complete process data.3.2 Identify data that falls outside normal parameters and report for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

Approved Page 3 of 4

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Current processes	•	intermittent decanted extended aeration (IDEA)
include:	•	sequencing batch reactors (SBR)
	•	Bathurst Box
	•	oxidation ditches

Unit Mapping Information

This unit supersedes and is equivalent to NWP351B Monitor, operate and control activated sludge processes.
