PUA80112 Vocational Graduate Certificate in Public Safety (Forensic Firearms Examination) 318
PUA80212 Vocational Graduate Certificate in Public Safety (Police Prosecution) 320
PUA80312 Vocational Graduate Certificate in Public Safety (Police Investigation) 322
PUA80412 Vocational Graduate Certificate in Public Safety (Crime Scene Investigation) 324
PUA80512 Vocational Graduate Certificate in Public Safety (Fingerprint Investigation) 325
PUA80612 Vocational Graduate Certificate in Public Safety (Police Management) 326
PUASS00026 Air Search Observer 327
PUASS00027 Alpine Search and Survival Operations 329
PUASS00028 Basic Rescue 331
PUASS00029 Basic Tree Operations 333
PUASS00030 Beach Operations Management 335
PUASS00031 Beach Safety and Risk Management 337
PUASS00032 Beach Team Management 339
PUASS00033 Community Engagement 341
PUASS00035 Floodboat Response Operations 343
PUASS00035 Floodboat Response Operations 345
PUASS00036 Incident Response Team Leader 347
PUASS00037 Intermediate Tree Operations 348
PUASS00038 Land Search Team 350
PUASS00041 Operational Leadership 352
PUASS00042 Operations Centre 353
PUASS00043 Police computer crime investigations 355
PUASS00044 Police electronic surveillance 357
PUASS00045 Road Accident Rescue 359
PUASS00046 SES First Aid and Safety 361
PUASS00047 SES Induction 362
PUASS00048 Storm and Water Damage Response 364
PUASS00049 Storm and Water Damage Response at Height 366
PUASS00050 Structural Collapse 368
PUASS00051 Vertical Rescue 370
PUACCI001B Plan a computer related crime operation 372
PUACCI002B Conduct a preliminary search for electronic data 374
PUACCI003B Copy electronic data 376
PUACCI004B Search electronic data 378
PUACCI005B Investigate network offences 380
PUACCI006B Build and maintain target computer networks 382
PUACCI007B Present evidence of computer crime 384

PUAAMS001B Work in an aviation environment....386
PUAAMS002B Search as a member of an air search team....391
PUAAMS003B Conduct stores dropping operations....395
PUAAMS006B Coordinate search and rescue resources....399
PUAAMS007B Coordinate search and rescue operations....405
PUAAMS008B Manage search and rescue operations....411
PUACOM001C Communicate in the workplace....416
PUACOM002B Provide services to clients....421
PUACOM003B Manage information....426
PUACOM004B Manage organisational communication strategies....431
PUACOM005B Foster a positive organisational image in the community....435
PUACOM006B Plan and conduct a public awareness program....439
PUACOM007B Liaise with other organisations....445
PUACOM008B Develop and organise public safety awareness programs....449
PUACOM009B Manage media requirements at major incident....453
PUACOM010B Promote the organisation's mission and services....458
PUACOM011B Develop community awareness networks....462
PUACOM012B Liaise with media at a local level....468
PUACOM013B Administer a local public safety group....473
PUACOM014B Contribute to community safety....478
PUACOM015B Conduct community safety activities....483
PUAECO001A Operate telephony systems....488
PUAECO002A Process emergency incident calls and enquiries....493
PUAECO003A Operate and control radio networks....502
PUAECO004A Operate computer aided dispatch system....507
PUAECO005A Dispatch resources from within an emergency communications centre....512
PUAECO006A Read and interpret maps....519
PUAECO007A Respond to and maintain monitored alarm systems....525
PUAECO008A Receive and action notification of uncontrolled hazardous materials situations....530
PUAECO009A Coordinate emergency communications centre operations....537
PUAECO010A Maintain standards of emergency service delivery....543
PUAECO011A Support logistics in the field....550
PUAEME001B Provide emergency care....554
PUAEME002C Manage injuries at emergency incident....561
PUAEME003C Administer oxygen in an emergency situation....566
PUAEME004A Provide emergency care for suspected spinal injury....571
PUAEME005A Provide pain management....577
PUAEMR008B Contribute to an emergency risk management process....583
PUAEMR009B Facilitate emergency risk assessment....591
PUAEMR012B Determine treatment options....599
PUAEMR014A Deliver recovery services....606
PUAEMR015A Establish and manage a recovery centre....613
PUAEMR016A Facilitate community involvement in recovery....622
PUAEMR017A Manage recovery functions and services....629
PUAEMR018A Work in an emergency management context....637
PUAEMR021A Facilitate emergency planning processes....644
PUAEMR022 Establish context for emergency risk assessment....652
PUAEMR023 Assess emergency risk....658
PUAEMR024 Develop treatment options for emergency risk....663
PUAEMR025 Manage risk treatment implementation....668
PUAEMR026 Treat operational risk....674
PUAEMR027 Assess operational risk....680

© Commonwealth of Australia, 2025 Public Skills Australia

PUAEMR028 Develop emergency management plans 686
PUAEMR029 Plan and implement a treatment measure 693
PUAEMR030 Manage and evaluate emergency management exercises 698
PUAEMR031 Design emergency management exercises 704
PUAEQU001B Prepare, maintain and test response equipment 711
PUAESU001B Plan an electronic surveillance operation 716
PUAESU002B Execute an electronic surveillance operation 718
PUAESU003B Set up monitoring equipment 720
PUAESU005B Prepare and present evidence 722
PUALAW001B Protect and preserve incident scene 724
PUALAW002B Conduct initial investigation at incident scene 730
PUALAW003B Give evidence in a judicial or quasi-judicial setting 737
PUALAW004B Represent the organisation in a judicial or quasi-judicial setting 741
PUALIO002B Provide local community, cultural and geographic information to other agencies and tourists 745
PUAMAN001B Manage the organisation's public safety responsibilities 750
PUAMAN002B Administer work group resources 755
PUAMAN003B Manage human resources 759
PUAMAN004B Manage procurement 766
PUAMAN005B Manage projects 772
PUAMAN006B Manage and facilitate change 777
PUAMAN007B Manage financial resources 781
PUAMAN008B Manage physical resources 786
PUAOHS001C Follow defined occupational health and safety policies and procedures 791
PUAOHS002B Maintain safety at an incident scene 796
PUAOHS003B Implement and monitor the organisation's occupational health and safety policies, procedures and programs 805
PUAOHS004B Establish and maintain the occupational health and safety system 811
PUAOIL201 Use basic equipment operations for oil spill response 818
PUAOIL301 Apply health, safety and risk controls when working on oiled shorelines 824
PUAOIL302 Use advanced equipment operations for oil spill response 829
PUAOIL401 Apply decision making strategies in an oil spill response 837
PUAOIL402 Apply oiled shoreline assessment strategies in an oil spill response 844
PUAOIL403 Lead a team in oiled shoreline clean up 849
PUAOPE006B Control multi-agency emergency situations 855
PUAOPE007B Command agency personnel within a multi-agency emergency response 865
PUAOPE009C Navigate in an aquatic environment 875
PUAOPE010C Operate an automated external defibrillator in an emergency 882
PUAOPE011B Inspect property and facilities 888
PUAOPE012A Control a Level 1 incident 896
PUAOPE013A Operate communications systems and equipment 905
PUAOPE014A Navigate to an incident 910
PUAOPE015A Conduct briefings and debriefings 917
PUAOPE016A Manage a multi-team sector 923
PUAOPE017A Coordinate resources for a multi-agency incident 931
PUAOPE018A Control a Level 2 incident 942
PUAOPE019A Control a Level 3 incident 952
PUAOPE020A Lead a crew 962
PUAOPE021A Manage information function at an incident 967
PUAOPE022A Manage logistics for a Level 2 incident 976
PUAOPE023A Manage operations for a Level 2 incident 984
PUAOPE024A Manage operations for a Level 3 incident 992
PUAOPE025A Manage planning for a Level 2 incident 1004

© Commonwealth of Australia, 2025 Public Skills Australia

PUAOPE026A Provide strategic safety advice at an incident 1014
PUAOPE027A Undertake beach safety management activities 1022
PUAPOL014B Manage performance/behavioural issues 1028
PUAPOL017B Plan and develop strategies to support organisational policy 1032
PUAPOL020B Develop a business plan 1038
PUAPOL028B Manage investigation information processes 1042
PUAPOL031B Confiscate assets 1047
PUAPOL032B Plan intelligence activities 1052
PUAPOL033B Manage intelligence information processes 1058
PUAPOL034B Analyse information 1064
PUAPOL035B Disseminate outputs from the intelligence process 1069
PUAPOL036B Provide crime prevention advice through environmental design 1075
PUAPOL601 Apply core science within a forensic environment and-or investigation 1083
PUAPOL801 Develop and appraise complex documents 1085
PUAPOL802 Develop and review a business plan 1087
PUAPOL803 Lead an emergency response 1089
PUAPOL804 Manage an internal compliance audit and review within policing 1091
PUAPOL805 Manage the human resource function of a local police work area 1093
PUAPOL806 Apply specialised forensic science techniques 1095
PUAPOL807 Conduct serious forensic crime and incident scene investigation 1097
PUAPOL808 Coordinate multi-discipline forensic investigations 1099
PUAPOL809 Develop forensic crime scene expertise 1101
PUAPOL810 Apply fingerprint comparison and identification methodology 1103
PUAPOL811 Determine and apply advanced fingerprint detection techniques 1105
PUAPOL812 Develop fingerprint expertise 1107
PUAPOL813 Operate the National Automated Fingerprint Identification System 1109
PUAPOL814 Perform fingerprinting of deceased persons 1111
PUAPOLDH001A Care for police dog 1113
PUAPOLDH002A Manage proficiency of a police dog 1115
PUAPOLDH003A Deploy a general purpose police dog 1117
PUAPOLDH004A Manage police dog tracking 1119
PUAPOLDH005A Manage police dog criminal apprehension 1121
PUAPOLDH006A Manage police dog for person and property searching 1123
PUAPOLDH007A Maintain police dog obedience and agility 1125
PUAPOLDH008A Deploy a specific odour police dog 1127
PUAPOLDH009A Manage police dog for specific odour searching 1129
PUAPOLDV001A Maintain occupational heatlh, safety and welfare in a disaster victim identification response 1131
PUAPOLDV002A Conduct disaster victim identification scene activities 1133
PUAPOLDV003A Conduct disaster victim identification post mortem activities 1135
PUAPOLDV004A Conduct disaster victim identification ante mortem activities 1137
PUAPOLDV005A Conduct disaster victim identification reconciliation activities 1139
PUAPOLDV006A Manage occupational health, safety and welfare in a disaster victim identification response 1141
PUAPOLDV007A Coordinate disaster victim identification scene activities 1143
PUAPOLDV008A Coordinate disaster victim identification post mortem activities 1145
PUAPOLDV009A Coordinate disaster victim identification ante mortem activities 1147
PUAPOLDV010A Coordinate disaster victim identification reconciliation activities 1149
PUAPOLDV011A Command disaster victim identification incidents 1151
PUAPOLFC002B Maintain a safe forensic working environment 1153
PUAPOLFC003B Detect, record and collect physical evidence 1160
PUAPOLFC004B Evaluate and document cases and facilitate analyses 1166
PUAPOLFC005B Prepare and submit forensic documentation 1171

© Commonwealth of Australia, 2025 Public Skills Australia

PUAPOLFC006B Contribute to and comply with quality systems....1175
PUAPOLFC008B Process and interpret comparative evidence....1179
PUAPOLFC014A Conduct investigations at a bomb-explosion scene....1184
PUAPOLFC015A Undertake analyses and examination of firearms and ammunition..1186
PUAPOLFC016A Restore serial numbers to firearms, parts and accessories....1188
PUAPOLFC017A Examine ammunition components using the comparison microscope1190
PUAPOLFC018A Reconstruct shooting scenes....1192
PUAPOLFC019A Assemble and disassemble ammunition....1194
PUAPOLFC020A Undertake firearm related test....1196
PUAPOLFC021A Interpret gunshot wounds....1198
PUAPOLFC022A Prepare and present specialist forensic evidence or opinion....1200
PUAPOLFC023A Communicate in a forensic science environment....1205
PUAPOLFC024A Record incident scene and evidence....1207
PUAPOLFC025A Coordinate forensic evidence analysis....1209
PUAPOLFC026A Apply forensic case management systems....1211
PUAPOLFC028A Examine forensic scenes....1213
PUAPOLFC029A Use and maintain specialist forensic equipment....1215
PUAPOLFC030A Manage complex forensic investigations....1220
PUAPOLGD001A Maintain police operational safety....1222
PUAPOLGD002A Apply policing methods....1228
PUAPOLGD003A Undertake initial police investigation....1236
PUAPOLGD004A Gather, collate and record police information....1242
PUAPOLGD005A Use and maintain police operational equipment....1248
PUAPOLGD006A Facilitate effective communication in the policing environment....1254
PUAPOLGD007A Manage persons in care or custody....1261
PUAPOLGD008A Administer legislation to ensure compliance....1268
PUAPOLGD009A Manage involvement in the judicial process....1274
PUAPOLGD010A Perform police administrative duties....1280
PUAPOLGD011A Manage personal and ethical performance....1285
PUAPOLGD012A Address customer needs....1291
PUAPOLGD013A Develop productive working relationships....1296
PUAPOLGD014A Drive police vehicles....1301
PUAPOLGD015A Employ media strategies....1308
PUAPOLGD016A Perform inter-jurisdictional police duties....1313
PUAPOLGD017A Employ protective service methods....1320
PUAPOLGD018A Perform court security duties....1327
PUAPOLHD001A Manage information relating to reported improvised hazardous device incidents....1333
PUAPOLHD002A Use and maintain specialist equipment....1335
PUAPOLHD003A Manage an improvised hazardous device incident....1337
PUAPOLHD004A Manage post incident improvised hazardous device information requirements....1339
PUAPOLHD005A Search for an improvised hazardous device....1341
PUAPOLHD006A Maintain occupational health, safety and welfare at an improvised hazardous device incident....1343
PUAPOLHD007A Manage evidence at an improvised hazardous device incident....1345
PUAPOLHD008A Conduct render-safe procedures for improvised hazardous devices 1347
PUAPOLHD009A Respond to a chemical, biological or radiological improvised hazardous device incident....1349
PUAPOLHS001A Control a human source....1351
PUAPOLHS002A Negotiate in a human source environment....1353
PUAPOLHS003A Communicate in a human source environment....1355
PUAPOLHS004A Maintain operational security for human sources....1357

© Commonwealth of Australia, 2025 Public Skills Australia

PUAPOLHS005A Use specialised technical equipment in a human source environment1359
PUAPOLIM001A Assist police with members of a culturally specific community 1361
PUAPOLIM002A Promote public safety objectives by liaison with a culturally specific community 1365
PUAPOLIM003A Provide interpreting and translating services 1369
PUAPOLIM004A Provide police services in an Aboriginal or Torres Strait Islander community 1373
PUAPOLIM005A Provide advanced information concerning an Aboriginal or Torres Strait Islander community 1378
PUAPOLIM006A Enhance status as a role model in an Aboriginal or Torres Strait Islander community 1382
PUAPOLIN001A Assess threat and report risk 1386
PUAPOLIN002A Produce and manage documents within an intelligence environment1388
PUAPOLIN003A Produce and review standard intelligence products 1390
PUAPOLIN004A Manage classified intelligence briefing or presentation 1392
PUAPOLIN005A Provide intelligence support to an operational response 1394
PUAPOLIN006A Design, develop and review customised intelligence products.....1396
PUAPOLIV001A Manage police investigations 1398
PUAPOLIV002A Conduct police investigations 1404
PUAPOLIV003A Manage incident scenes 1412
PUAPOLIV004A Conduct investigative interviews.....1419
PUAPOLIV005A Coordinate multi-agency investigations 1428
PUAPOLIV006A Lead major crime investigations 1430
PUAPOLIV007A Lead a major investigation review 1432
PUAPOLIV008A Lead crime reduction and-or prevention strategies 1434
PUAPOLIV009A Manage physical evidence.....1436
PUAPOLIV010A Conduct criminal legal research within a policing context.....1442
PUAPOLIV011A Manage information within specialised policing functions.....1444
PUAPOLMG001A Supervise police operations 1452
PUAPOLMG002A Supervise police response 1454
PUAPOLMG003A Manage risk in a policing environment.....1456
PUAPOLMG004A Manage media requirements.....1458
PUAPOLMG005A Promote workplace diversity 1464
PUAPOLMG006A Plan and organise work unit plans 1466
PUAPOLMG007A Contribute to policy formulation and revision 1468
PUAPOLMG008A Manage working relationships.....1472
PUAPOLMP001A Apply first aid for police horses 1474
PUAPOLMP002A Care for police horses 1476
PUAPOLMP003A Assess conformation and movement of police horses 1478
PUAPOLMP004A Handle police horses safely 1480
PUAPOLMP005A Maintain health and safety of police horses 1482
PUAPOLMP006A Prepare and transport police horses 1484
PUAPOLMP007A Ride and exercise police horses in training 1486
PUAPOLMP008A Perform mounted police flat riding skills 1488
PUAPOLMP009A Perform mounted police jumping skills.....1490
PUAPOLMP010A Perform mounted police crowd management duties 1492
PUAPOLMP011A Perform mounted police ceremonial duties.....1494
PUAPOLMP012A Perform mounted drill 1496
PUAPOLMP013A Perform mounted police operational patrol duties.....1498
PUAPOLMP014A Demonstrate horse riding skills for police duties in tracked or wilderness areas 1500
PUAPOLMP015A Perform mounted police cross country skills 1502
PUAPOLMP016A Perform mounted police vaulting skills 1504

© Commonwealth of Australia, 2025 Public Skills Australia

PUAPOLNG001A Use and maintain specialised equipment to support police response 1506
PUAPOLNG002A Perform negotiations 1508
PUAPOLNG003A Manage teamwork at significant events 1510
PUAPOLNG004A Use communication, counselling and de-escalation techniques 1512
PUAPOLPP001A Perform close personal protection operation 1514
PUAPOLPP002A Plan a close personal protection operation 1516
PUAPOLPP003A Manage a close personal protection operation 1518
PUAPOLPP004A Drive close personal protective vehicles 1520
PUAPOLPR001A Utilise the Rules of Evidence 1522
PUAPOLPR002A Conduct legal research 1524
PUAPOLPR003A Conduct a pre hearing mention 1526
PUAPOLPR004A Conduct mention duties 1528
PUAPOLPR005A Manage effective customer service in a police prosecutor's environment 1530
PUAPOLPR006A Conduct a hearing 1532
PUAPOLSU001A Plan a surveillance operation 1534
PUAPOLSU002A Communicate in a surveillance environment 1536
PUAPOLSU003A Perform foot surveillance 1538
PUAPOLSU004A Perform mobile surveillance 1540
PUAPOLSU005A Take covert suveillance images 1542
PUAPOLSU006A Perform static surveillance 1544
PUAPOLSU007A Maintain operational security in a covert environment 1546
PUAPOLSU008A Perform covert surveillance utilising camouflage and concealment .. 1548
PUAPOLSU009A Utilise electronic tracking systems 1550
PUAPOLTF001A Perform crew cockpit duties 1552
PUAPOLTF002A Conduct search and rescue operations using aircraft 1554
PUAPOLTF004A Collect, prepare and present surveillance intelligence and evidence . 1556
PUAPOLUC001A Develop and maintain cover stories 1558
PUAPOLUC002A Perform undercover negotiations 1560
PUAPOLUC003A Use undercover policing technical and specialised equipment 1562
PUAPOLUC004A Manage human sources 1564
PUAPOLUC005A Deal in a commodity 1566
PUAPOLUC006A Communicate in an undercover operation environment 1568
PUAPOLUC007A Prepare reports relating to undercover operations 1570
PUAPOLUC008A Supervise undercover operatives 1572
PUAPOLUC009A Plan an undercover operation 1574
PUAPOLWP001A Plan a protection operation 1576
PUAPOLWP002A Manage a protection operation 1578
PUAPOLWP003A Perform witness protection duties 1580
PUAPRO001B Promote a learning environment in the workplace 1582
PUASAR011C Search as a member of an aquatic search team 1586
PUASAR012C Apply surf awareness and self-rescue skills 1593
PUASAR013A Participate in an aquatic rescue operation 1598
PUASAR014A Operate and maintain a small powercraft and motor for rescue operations 1605
PUASAR015A Crew small powercraft in a rescue operation 1613
PUASAR016A Operate and maintain a personal water craft for rescue operations 1620
PUASAR017A Undertake advanced surf rescue 1627
PUASAR018A Select and maintain canines to be part of a canine search team for USAR incidents 1634
PUASAR019A Train canines to work in a USAR environment 1642
PUASAR020A Develop a canine search team for USAR incidents 1649
PUASAR021A Search as part of a canine search team at USAR incidents 1658
PUASAR022A Participate in a rescue operation 1666
PUASAR023A Participate in an urban search and rescue Category 1 1673

© Commonwealth of Australia, 2025 Public Skills Australia

PUASAR024A Undertake road crash rescue 1684
PUASAR025A Undertake confined space rescue 1693
PUASAR026A Undertake industrial and domestic rescue 1699
PUASAR027A Undertake land search rescue 1709
PUASAR028A Undertake rescue from a partial structural collapse 1716
PUASAR029A Undertake a complex transport rescue 1725
PUASAR030A Undertake trench rescue 1737
PUASAR031A Undertake an urban search and rescue Category 2 1743
PUASAR032A Undertake vertical rescue 1758
PUASAR033 Perform land based swiftwater and floodwater rescue and recovery 1765
PUASAR034 Undertake swiftwater and floodwater rescue and recovery 1774
PUASAR035 Develop plans for deployment of a USAR task force 1784
PUASAR036 Implement and monitor USAR task force plans 1794
PUASAR037 Review USAR task force plans implemented at an incident 1803
PUASES008A Undertake storm and water damage operations 1809
PUASES009A Undertake inland floodboat operations 1818
PUASES010A Plan, activate and maintain a communications network 1824
PUASES011A Manage emergency operations 1830
PUASES012A Work as a team member in an emergency operations centre 1837
PUASES013A Undertake storm and water damage operations performed at heights ... 1845
PUASES014A Apply flood and fast moving water safety techniques 1851
PUASES015A Operate over-snow vehicle 1856
PUASES016A Apply snowcraft skills when performing search operations 1864
PUATEA001B Work in a team 1872
PUATEA002B Work autonomously 1877
PUATEA003B Lead, manage and develop teams 1883
PUATEA004D Work effectively in a public safety organisation 1889
PUATEA005A Manage own professional performance 1896
PUAVEH001B Drive vehicles under operational conditions 1902
PUAWER001B Identify, prevent and report potential workplace emergency situations 1908
PUAWER002B Ensure workplace emergency prevention procedures, systems and processes are implemented 1913
PUAWER003B Manage and monitor workplace emergency procedures, equipment and other resources 1918
PUAWER004B Respond to workplace emergencies 1924
PUAWER005B Operate as part of an emergency control organisation 1929
PUAWER006B Lead an emergency control organisation 1935
PUAWER007B Manage an emergency control organisation 1941
PUAWER008B Confine small workplace emergencies 1948
PUAWER009B Participate as a member of a workplace emergency initial response team 1953
PUAWER010B Lead a workplace emergency initial response team 1959
PUAWER011B Manage workplace emergency initial response teams 1965
TLIH107D Interpret road maps and navigate pre-determined routes 1971
ICAU2006B Operate computing packages 1978
ICAU1133B Send and retrieve information using web browsers and email 1986
PUAEMR007B Conduct risk assessment 1995
PUAEMR006B Treat risk at an operational level 2002
HLTFA301B Apply first aid 2022
PSPWPI605B Audit management systems 2045
PSPREG602B Evaluate regulatory compliance 2052
PSPREG601B Manage regulatory compliance 2058
LGAPLEM608A Identify and evaluate options to improve road safety 2064

The views expressed in the copyright work do not necessarily represent the views of the Commonwealth of Australia.

This work is copyright and licensed under the AEShareNet Free for Education instant licence (AEShareNet-FfE Licence). The onus rests with you to ensure compliance with the AEShareNet-FfE licence and the following is merely a summary of the scope of the Licence.

When you obtain a copy of material that bears the AEShareNet-FfE licence mark by legitimate means you obtain an automatic licence to use and copy the work in whole or in part, solely for educational purposes.

Individual learners may:

1. use the material personally for their education such as including it, with proper attribution, in work that is performed in the course of that education; and
2. make unlimited copies, in whole or in part, of the material.

Organisations may:

1. use the material within the organisation or for the services provided by the organisation;
2. make or give copies to learners;
3. charge for the education provided; and
4. charge learners for the material on a cost-recovery basis.

Conditions for the licence can be found at http://www.aesharenet.com.au/FfE2/. Queries regarding the standard AEShareNet-FfE Licence conditions should be directed to the AEShareNet website at http://www.aesharenet.com.au/help/support/.

In addition to the standard AEShareNet-FfE Licence conditions, the following special conditions apply:

1. The copyright work must only be used in Australia and New Zealand.
2. You are not permitted to develop either an Edited Version or Enhancements of the Licensed Material

Use of this work for purposes other than those indicated above, requires the prior written permission from the Commonwealth. Requests should be addressed to Training Copyright, Department of Education, Employment and Workplace Relations, GPO Box 9880 Canberra City, ACT, 2601 or email copyright@training.com.au.

This work is the result of wide consultations with Australian industry participants. It is a collaborative view and does not necessarily represent the view of the Department or any specific body. For the sake of brevity it may omit factors which could be pertinent in particular cases.

While care has been taken in the preparation of this Training Package, the Department and the original developer do not warrant that any licensing or registration requirements specified here are either complete or up-to-date for your State or Territory. The Department and the original developer do not accept any liability for any damage or loss (including indirect and consequential loss) incurred by any person as a result of relying on the information contained in this Training Package.

The Commonwealth, through the Department of Education, Employment and Workplace Relations, does not accept any liability to any person for the information or advice (or the use of such information or advice) which is provided in this material or incorporated into it by reference. The information is provided on the basis that all persons accessing this material undertake responsibility for assessing the relevance and accuracy of its content. No liability is accepted for any information or services which may appear in any other format. No responsibility is taken for any information or services which may appear on any linked websites.

Preliminary Information

Important Note to Users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

This Training Package is Version 1.1 – check whether this is the latest version by going to the National Training Information Service (*www.ntis.gov.au*) and locating information about the Training Package. Alternatively, contact Government Skills Australia http://www.governmentskills.com.au http://www.governmentskills.com.au to confirm the latest version number.

Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package's national code (which remains the same during its period of endorsement).

Explanation of the review date

The review date (shown on the title page and in the footer of each page) indicates when the Training Package is expected to be reviewed in the light of changes such as changing technologies and circumstances. The review date is not an expiry date. Endorsed Training Packages and their components remain current until they are reviewed or replaced.

Version modification history

The version details of this endorsed Training Package are in the table below. The latest information is at the top of the table.

Version	Release Date	Comments
1.1	27 August 2012	Editorial and typographical corrections.
1	9 August 2012	Primary Release. Replaces PUA00. Contains new and revised units of competency and qualifications – see mapping tables for full details.

Summary of AQF qualifications in PUA12 Public Safety Training Package

PUACOM010B	Promote the organisation's mission and services	Nil
PUACOM011B	Develop community awareness networks	Nil
PUACOM012B	Liaise with media at a local level	Nil
PUACOM013B	Administer a local public safety group	Nil
PUACOM014B	Contribute to community safety	Nil
PUACOM015B	Conduct community safety activities	PUATEA004D Work effectively in a public safety organisation
PUAECO001A	Operate telephony systems	Nil
PUAECO002A	Process emergency incident calls and enquiries	Nil
PUAECO003A	Operate and control radio networks	Nil
PUAECO004A	Operate computer aided dispatch system	Nil
PUAECO005A	Dispatch resources from within an emergency communications centre	Nil
PUAECO006A	Read and interpret maps	Nil
PUAECO007A	Respond to and maintain monitored alarm systems	Nil
PUAECO008A	Receive and action notification of uncontrolled hazardous materials situations	PUAECO001A Operate telephony systems
PUAECO009A	Coordinate emergency communications centre operations	Nil
PUAECO010A	Maintain standards of emergency service delivery	Nil

© Commonwealth of Australia, 2025 Public Skills Australia

Code	Title	Pre-requisite
PUAECO011A	Support logistics in the field	Nil
PUAEME001B	Provide emergency care	Nil
PUAEME002C	Manage injuries at emergency incident	PUAEME001B Provide emergency care
PUAEME003C	Administer oxygen in an emergency situation	PUAEME001B Provide emergency care
PUAEME004A	Provide emergency care for suspected spinal injury	HLTFA201B Provide basic emergency life support **OR** HLTFA301C Apply first aid
PUAEME005A	Provide pain management	HLTFA201B Provide basic emergency life support **OR** HLTFA301C Apply first aid
PUAEMR008B	Contribute to an emergency risk management process	Nil
PUAEMR009B	Facilitate emergency risk assessment	Nil
PUAEMR012B	Determine treatment options	PUAEMR008B Contribute to an emergency risk management process **OR** PUAEMR009B Facilitate emergency risk assessment
PUAEMR014A	Deliver recovery services	Nil
PUAEMR015A	Establish and manage a recovery centre	Nil
PUAEMR016A	Facilitate community involvement in recovery	Nil
PUAEMR017A	Manage recovery functions and services	Nil
PUAEMR018A	Work in an emergency management context	Nil
PUAEMR021A	Facilitate emergency planning processes	Nil
PUAEMR022	Establish context for emergency risk assessment	Nil

© Commonwealth of Australia, 2025 Public Skills Australia

Code	Title	Pre-requisite
PUAEMR023	Assess emergency risk	PUAEMR022 Establish context for emergency risk assessment
PUAEMR024	Develop treatment options for emergency risk	Nil
PUAEMR025	Manage risk treatment implementation	Nil
PUAEMR026	Treat operational risk	PUAEMR027 Assess operational risk
PUAEMR027	Assess operational risk	Nil
PUAEMR028	Develop emergency management plans	Nil
PUAEMR029	Plan and implement a treatment measure	Nil
PUAEMR030	Manage and evaluate emergency management exercises	Nil
PUAEMR031	Design emergency management exercises	Nil
PUAEQU001B	Prepare, maintain and test response equipment	Nil
PUALAW001B	Protect and preserve incident scene	Nil
PUALAW002B	Conduct initial investigation at incident scene	Nil
PUALAW003B	Give evidence in a judicial or quasi-judicial setting	Nil
PUALAW004B	Represent the organisation in a judicial or quasi-judicial setting	Nil

PUASES014A	Apply flood and fast moving water safety techniques	HLTFA301C Apply first aid
PUASES015A	Operate over-snow vehicle	Nil
PUASES016A	Apply snowcraft skills when performing search operations	Nil

Summary of Imported Units of Competency

Imported Units of Competency in the PUA12 Public Safety Training Package

The units of competency listed below have been imported from other Training Packages into PUA12 Public Safety Training Package qualifications.

Individual units of competency can be downloaded from the internet via TGA at www.training.gov.au.

AHC10 Agriculture Horticulture, Conversation and Land Management Training Package	
AHCARB205A	Operate and maintain chainsaws
AHCBIO202A	Follow site quarantine procedures
AHCBIO301A	Work effectively in an emergency disease or pest plant response
AHCBIO302A	Identify and report unusual disease or plant pest signs
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises
AHCBIO304A	Carry out movement and security procedures
AHCBIO401A	Supervise activities on infected premises

© Commonwealth of Australia, 2025 Public Skills Australia

AHCBIO402A	Carry out field surveillance for a specific emergency disease or plant pest
AHCBIO501A	Manage active operational emergency disease or plant pest sites
AHCBIO502A	Manage the implementation of an emergency disease or plant pest control program
AHCBIO601A	Plan and oversee an emergency disease or plant pest program
AHCCCF406A	Facilitate ongoing group development
AHCCCF413A	Service committees
AHCCCF505A	Contribute to regional planning process
AHCILM506A	Operate within community cultures and goals
AHCNAR302A	Collect and preserve biological samples
AHCOHS401A	Safety (OHS) processes
AHCPMG601A	Develop a plant pest survey strategy
AHCPMG602A	Develop a plant pest destruction strategy

AVI08 Aviation Training Package	
AVIL4012B	Manage aircraft passengers and cargo
AVIL3003B	Plan an aircraft load
AVIL3005B	Operate aircraft push-out tug
AVIW3006B	Refuel aircraft
AVIZ1005B	Maintain basic situation awareness in the aviation workplace

BSB07 Business Services Training Package	
BSBADV507B	Develop a media plan
BSBADV602B	Develop an advertising campaign
BSBADV603B	Manage advertising production
BSBADV604B	Execute an advertising campaign
BSBADV605B	Evaluate campaign effectiveness
BSBCCO301B	Use multiple information systems
BSBCCO302B	Deploy customer service field staff
BSBCMM401A	Make a presentation
BSBCON401A	Work effectively in a business continuity context
BSBCON601A	Develop and maintain business continuity plans

© Commonwealth of Australia, 2025 Public Skills Australia

BSBCUS301B	Deliver and monitor a service to customers
BSBCUS501B	Manage quality customer service
BSBFLM312C	Contribute to team effectiveness
BSBFLM511B	Develop a workplace learning environment
BSBINM501A	Manage an information or knowledge management system
BSBINN502A	Build and sustain an innovative work environment
BSBMGT401A	Show leadership in the workplace
BSBMGT502B	Manage people performance
BSBMKG401B	Profile the market
BSBOHS405B	Contribute to the implementation of emergency procedures
BSBOHS407A	Monitor safe workplaces
BSBREL402A	Build client relationships and business networks
BSBWOR401A	Establish effective workplace relationships
BSBWOR402A	Promote team effectiveness
BSBWOR403A	Manage stress in the workplace
BSBWOR502B	Ensure team effectiveness

CH08 Community Services Training Package	
CHCCD401D	Support community participation
CHCCD413D	Work within specific communities
CHCDFV402C	Manage own professional development in responding to domestic and family violence
CHCDFV404C	Promote community awareness of domestic and family violence
CHCGROUP302D	Support group activities
CHCGROUP403D	Plan and conduct group activities
CHCNET503C	Develop new networks
CHCPOL403B	Undertake research activities
CHCPOL505B	Manage research activities
CHCYTH301D	Work effectively with young people
CHCYTH505D	Support youth programs

© Commonwealth of Australia, 2025 Public Skills Australia

CPP07 Property Services Training Package	
CPPSEC3028A	Compile investigative report
CPPSIS3001A	Apply map presentation principles
CPPSIS3005A	Collect basic spatial data
CPPSIS4006A	Read and interpret basic image data
CPPSIS4015A	Apply GIS software to problem-solving techniques

CSC12 Correctional Services Training Package	
CSCOFM303A	Respond to offenders influenced by drugs or alcohol
CSCOFM309A	Process offender induction
CSCSAS303A	Conduct searches
CSCSAS305A	Supervise attendance at court
CSCTRA201A	Maintain security during escort
CSCTRA401A	Plan and monitor escorts

FPI05 Forest and Forest Products Training Package	
FPICOT2234B	Operate 4x4 vehicle
FPICOT2237A	Maintain chainsaws
FPICOT2239A	Trim and cut felled trees
FPIFGM2208A	Fall trees manually (basic)
FPIFGM3204A	Fall trees manually (intermediate)
FPIFGM3205A	Fall trees manually (advanced)
FPIFGM3208B	Perform complex 4x4 operations

HLT07 Health Training Package	
HLTAMBPD401B	Manage personal stressors in the work environment
HLTFA201B	Provide basic emergency life support
HLTFA301C	Apply first aid
HLTFA302B	Provide first aid in remote situation
HLTFA402C	Apply advanced first aid
HLTFA404B	Apply advanced resuscitation techniques

© Commonwealth of Australia, 2025 Public Skills Australia

ICA11 Information and Communications Training Package	
ICAICT103A	Use, communicate and search securely on the internet
ICAICT203A	Operate application software packages
ICAICT308A	Use advanced features of computer applications

LGA04 Local Government Training Package	
LGACOM502B	Devise and conduct community consultations
LGAEHRH604B	Develop and implement environmental health education, promotion and awareness strategies
LGAEHRR504C	Implement public education programs to improve community compliance
LGAPLEM403A	Attend requests for building and planning information and advice
LGAPLEM404A	Prepare and present geographic information systems data
LGAPLEM501A	Achieve an efficient and sustainable use of natural resources
LGAPLEM506A	Improve community knowledge and skills in environmental management practices
LGAPLEM606B	Develop ecologically sustainable land management systems
LGAPLEM608A	Identify and evaluate options to improve road safety

NWP07 Water Industry Training Package	
NWP505B	Implement and manage environmental management policies, plans, procedures and programs

PMA08 Training Package	
PMAOHS214B	Undertake helicopter safety and escape

PSP04 Public Sector Training Package	
PSPCOM503A	Build and maintain community relationships
PSPGOV307B	Organise workplace information
PSPGOV417A	Identify and treat risks
PSPGOV504B	Undertake research and analysis
PSPGOV515A	Develop and use political nous

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV606A	Prepare high-level/sensitive written materials
PSPPA601A	Manage public affairs
PSPPM501B	Design complex projects
PSPPOL401A	Contribute to policy development
PSPREG402C	Promote client compliance
PSPREG403B	Assess compliance
PSPREG411A	Gather information through interviews
PSPREG601B	Manage regulatory compliance
PSPREG602B	Evaluate regulatory compliance
PSPSEC405A	Handle security classified information
PSPSOHS502A	Participate in the management of the OHS information and data systems
PSPSOHS609A	Evaluate an organisation's OHS performance
PSPWPI605B	Audit management systems

PUA00 Public Safety Training Package V8.1	
PUAFIR201B	Prevent injury
PUAFIR206B	Check installed fire safety systems
PUAFIR208B	Participate in community safety activities
PUAFIR209B	Work safely around aircraft
PUAFIR301B	Undertake community safety activities
PUAFIR314B	Utilise installed fire safety systems
PUAFIR403B	Assess building plans
PUAFIR404B	Inspect dangerous goods facilities
PUAFIR405B	Collect, analyse and provide regulatory information
PUAFIR501B	Conduct fire investigation and analysis activities
PUAFIR504B	Assist with the formulation and implementation of plans and policies
PUAFIR506B	Conduct an assessment of a building's performance based design
PUAFIR507B	Inspect building fire safety systems
PUAFIR508B	Assess and evaluate a facility's fire/incident safety management systems in hazardous materials
PUAFIR509B	Implement prevention strategies
PUAFIR510B	Inspect for legislative compliance
PUAFIR602B	Manage the implementation of community safety strategies

© Commonwealth of Australia, 2025 Public Skills Australia

PUAPRS20529	Manage marketing requirement

SIS10 Sport, Fitness and Recreation Training Package	
SISCAQU201A	Monitor pool water quality
SISCAQU202A	Perform basic water rescues
SISCAQU304A	Maintain pool water quality
SISCAQU305A	Implement aquatic facility plant and equipment maintenance program
SISCAQU306A	Supervise clients at an aquatic facility or environment
SISCAQU307A	Perform advanced water rescues
SISCAQU312A	Assist participants with a disability during aquatic activities
SISCAQU416A	Coordinate lifeguard service at an aquatic facility
SISONAV403A	Navigate in uncontrolled environments
SISOOPS202A	Use and maintain a temporary or overnight site
SISXRES402A	Support implementation of environmental management practices

TAE10 Training and Education Training Package	
TAEASS301B	Contribute to assessment
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction
TAEDEL401A	Plan, organise and deliver group-based learning
TAEDEL402A	Plan, organise and facilitate learning in the workplace
TAEDEL403A	Coordinate and facilitate distance-based learning
TAEDEL404A	Mentor in the workplace
TAEDES401A	Design and develop learning programs
TAETAS401A	Maintain training and assessment information
TAETAS501B	Undertake organisational training needs analysis

TDM07 Maritime Training Package	
TDMMC807B	Manoeuvre a vessel within the limits of responsibility of a Master 5
TDMMF1107B	Survive at sea in the event of vessel abandonment

© Commonwealth of Australia, 2025 Public Skills Australia

TDMMF5407A	Observe safety and emergency procedures on a coastal vessel
TDMMF5507A	Fight and extinguish fires on board a coastal vessel
TDMMF5607A	Observe personal safety and social responsibilities
TDMMF6207A	Prevent, control and fight fires on board an ocean-going vessel
TDMMH807B	Plan and navigate an offshore passage within the limits of responsibility of a Master 5
TDMMR4307B	Assist in mooring and anchor handling activities

SIT07 Tourism, Hospitality and Events Training Package	
SITXMPR001A	Coordinate production of brochures and marketing materials
SITXMPR002A	Create a promotional display or stand

TLI10 Transport and Logistics Training Package	
TLIG3002A	Lead a work team or group
TLIH2001A	Interpret road maps and navigate predetermined routes

Overview

What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing peoples skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

How do Training Packages fit within the National Skills Framework?

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained.

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

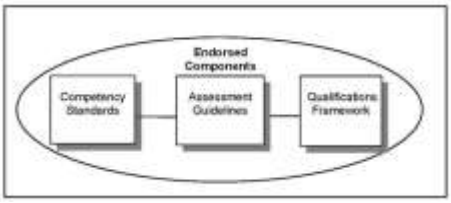
Training Package Components

© Commonwealth of Australia, 2025 Public Skills Australia

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

Training Package Endorsed Components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.



Competency Standards

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Assessment Guidelines

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

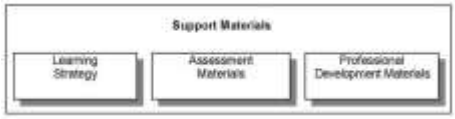
Qualifications Framework

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the ‘packaging rules’. The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

Training Package Support Materials

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.



Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

© Commonwealth of Australia, 2025 Public Skills Australia

Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, **and with the code always before the title**.

Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example XYZ08. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

Qualification Codes

Within each Training Package, each qualification has a unique eight-character code, for example XYZ10108. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are **not** used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

Unit of Competency Codes

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in PUACOM002B
- the first three characters signify the Training Package – PUA12 Public Safety Training Package – in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;
- the last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that this is the original unit of competency. ‘B’, or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

Training Package, Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

© Commonwealth of Australia, 2025 Public Skills Australia

Training Package Titles

The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

Qualification Titles

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words ‘in’ for Certificates I to IV, and ‘of’ for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example:PUA21012 Certificate II in Public Safety (Aquatic Rescue)

Unit of Competency Titles

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example:PUACOM012B Liaise with media at a local level

Introduction to the PUA12 Public Safety Training Package

Public Safety Industry

The Public Safety Industry comprises Police, State and Territory Emergency Services, Aquatic Search and Rescue, and Emergency Management sectors. The Public Safety Training Package provides units of competency and qualifications, which cover approximately 506,000 workers, paid and volunteer, managed by State/Territory and Commonwealth departments.

The organisations that comprise these sectors undertake functions that are determined by State/Territory and Commonwealth legislation and policy frameworks. The functions of the various services are not always consistent nationally.

The roles and functions of Public Safety workers, in relation to emergency response capacities, fall into four main categories:

- Prevention/mitigation
- Preparation
- Response
- Recovery.

Additionally, the role and functions of Police are to:

- maintain public order and safety
- enforce the law
- prevent crime, public disorder and emergency incidents
- assist the community.

© Commonwealth of Australia, 2025 Public Skills Australia

To varying extents, all Public Safety workers undertake duties in relation to these categories. The mix and level of such functions will depend on the type of agency and the nature of the positions within agencies.

Public Safety Emergency Response Agencies direct a considerable proportion of training effort to ‘preparation’ for events/incidents that most people hope will never occur. When these event/incidents do occur, the response is both time critical and potentially life threatening to both Public Safety workers and members of the public.

PUA12 Public Safety Training Package

The Public Safety Training Package specifies nationally endorsed units of competency, qualifications frameworks and assessment guidelines required to perform effectively in the workplace for the following sectors:

- Australian Police Forces
- State/Territory Emergency Services
- Aquatic Search and Rescue
- Emergency Management

The public safety competencies are divided into three functional areas. The Industry Wide component reflects units of competency common to all sectors and covers common operations such as communication, emergency procedures, judicial compliance, management, occupational health and safety, teamwork, emergency management, and search and rescue activities. The Industry Wide units of competency form a strong link across the sectors.

The remaining two functional areas specifically focus on the activities of Police and State and Territory Emergency Service. These units are distinctive in operation and provide for varying contexts.

Relevant units of competency have been imported from existing endorsed Training Packages into PUA12 Public Safety Training Package qualifications.

Consultative Process

Each sector works with GSA to ensure a rigorous consultative process that includes all key stakeholders and interested parties.

The Police Sector also involved representatives from New Zealand in the consultation process.

The Government Skills Australia (GSA) Public Safety Industry Advisory Committee (IAC) has been the major conduit for the development of Version 1 of the PUA12 Public Safety Training Package.

GSA Public Safety IAC Representatives

The actual representatives of Public Safety IAC have changed over the life of the PUA00 Training Package. At the time of submission of the PUA12 Training Package, the membership was:

- Mr Brendan Angwin, United Firefighters Union of Australia
- Mr Mark Burgess, Police Federation of Australia
- Mr Peter George, Surf Life Saving Australia (observer status)

© Commonwealth of Australia, 2025 Public Skills Australia

- Dr Brian Jardine, Community and Public Sector Union
- Ms Margot Kropinski-Myers, Department of Defence
- Ms Sandra Lunardi, Australasian Fire and Emergency Service Authorities Council
- Mr Dave Owen, Australian Council of State Emergency Service
- Mr Larry Proud, Australia New Zealand Policing Advisory Agency
- Mr Ken Railton, Defence Force Welfare Association

Removal of Fire Sector Material

On the 1st of June 2012 it was decided to remove the Fire Sector Material from the PUA12 submission to NSSC, to allow the passage of the new Training Package. This was in response to concerns raised by stakeholders in relation to the Fire Sector material.

The non-Fire Sectors represented on the GSA Public Safety Industry Advisory Committee required the submission of non-Fire Sector material to continue to meet industry demand, and for the PUA12 Training Package to be considered by NSSC on 14th of June. The Fire Sector representatives agreed to the removal and committed to resolving concerns quickly and reincorporating Fire Sector Material as Version 2 of PUA12. This approach was made based on the fact that the existing Fire Sector material from PUA00 would be available for use for 12 months from 14th June endorsement of PUA12.

Qualifications Framework

The Australian Qualifications Framework

What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the *AQF Implementation Handbook*.
http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...

© Commonwealth of Australia, 2025 Public Skills Australia

- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

Certificate I

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

Certificate II

Characteristics of Learning Outcomes

© Commonwealth of Australia, 2025 Public Skills Australia

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

© Commonwealth of Australia, 2025 Public Skills Australia

Certificate IV

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team co-ordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

© Commonwealth of Australia, 2025 Public Skills Australia

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

Advanced Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.

© Commonwealth of Australia, 2025 Public Skills Australia

- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

© Commonwealth of Australia, 2025 Public Skills Australia

Vocational Graduate Diploma

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and within highly varied and highly specialised contexts.
- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.

Qualifications and Packaging Rules

[Note: Insert relevant information in relation to the above heading here]

Qualification Pathways

The following pathways charts are provided to show the types of pathways into and from qualifications that are possible with this Training Package. For more information about qualifications and pathways contact Government Skills Australia www.governmentskills.com.au http://www.governmentskills.com.au

Pathway chart

© Commonwealth of Australia, 2025 Public Skills Australia

Australian Apprenticeships (including Traineeships and School-based Apprenticeships)

Australian Apprenticeships are declared in each State or Territory according to the particular processes of the jurisdiction and requirements identified by industry in the State or Territory.

Declarations for particular qualifications as either Traineeships or Apprenticeships are made accordingly and therefore the same qualification may be classified differently between jurisdictions.

At the time of publishing, there are significant variations across jurisdictions. Some jurisdictions such as South Australia, Tasmania, and New South Wales have no listed Public Safety Australian Apprenticeships. Other jurisdictions have a varying range depending on local need. To ensure current and correct information, please contact an Australian Apprenticeships Centre.

VET in Schools

Vocational Education and Training in Schools are programs undertaken by school students as part of the senior secondary certificate that provide credit towards a nationally recognised VET qualification within the Australian Qualifications Framework. The training that students receive reflects specific industry competency standards and is delivered by a Registered Training Organisation or a school in partnership with a Registered Training Organisation.

A key success of VET in Schools is the integration of vocational options within the traditionally academic studies at the senior secondary school level. VET in Schools programs allow Year 11 and 12 students to:

- develop industry specific skills;
- gain nationally recognised Vocational Education and Training qualifications and units of competency while still completing their senior secondary school qualification;
- develop employability skills and an understanding of the world of work, and;
- gain an understanding of the world of work which is valuable experience to assist with planning and pursuing their career pathways

Some units from the Certificate II in Public Safety (SES) may be appropriate for a VET in schools program, depending on local need and resources.

Skill Sets

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

© Commonwealth of Australia, 2025 Public Skills Australia

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording 'these competencies meet *[insert skill set title or identified industry area]* need' on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment. http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

Skill Sets in this Training Package

This section provides information on Skill Sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Where this section is blank, nationally recognised Skill Sets have yet to be identified in this industry.

Industry wide – Aquatic

Beach Operations Management

Target Group	Those who will be leading a surf rescue team or patrol and respond to a range of incidents including search and rescue operations.	
Unit/s	PUAOPE012A	Control a Level 1 incident
	PUAOPE015A	Conduct briefings and debriefings
	PUASAR011C	Search as a member of an aquatic rescue team
Pathway	These units contribute to the PUA42612 Certificate IV in Public Safety (Aquatic Search and Rescue Management) and a number of other PUA12 Public Safety Training Package qualifications.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a leader of an operational surf rescue and response team.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Beach Safety and Risk Management

Target Group	People responsible for maintaining their own safety and the safety of team members during operational activities in addition to identifying, managing (if safe to do so) and reporting risks and hazards in line with organisational policies.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit/s	PUAEMR026	Treat operational risk
	PUAEMR027	Assess operational risk
	PUAOHS002B	Maintain safety at an incident scene
Pathway	These units contribute to the PUA42612 Certificate IV in Public Safety (Aquatic Search and Rescue Management) and a number of other PUA12 Public Safety Training Package qualifications.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to ensure the safety of surf patrol teams and to apply risk management approaches at an operational level.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Beach Team Management

Target Group	Leader of a surf rescue team or patrol.	
Unit/s	PUACOM003B	Manage information
	PUAMAN002B	Administer work group resources
	PUATEA003B	Lead, manage, develop teams
Pathway	These units contribute to the PUA42612 Certificate IV in Public Safety (Aquatic Search and Rescue Management) and a number of other PUA12 Public Safety Training Package qualifications.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a leader of a surf rescue team.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Community Engagement

Target Group	Those who will be engaging the local community in beach and aquatic safety programs.	
Unit/s	PUACOM005B	Foster a positive organisational image in the community
	PUACOM007B	Liaise with other organisations
	PUACOM012B	Liaise with media at a local level

© Commonwealth of Australia, 2025 Public Skills Australia

Pathway	These units contribute to the PUA42612 Certificate IV in Public Safety (Aquatic Search and Rescue Management) and a number of other PUA12 Public Safety Training Package qualifications.
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to engage local communities in aquatic (including beach) safety and educational programs.
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Industry wide – Oil Spill Response

Oil Spill Responder

Target Group	Members of an oil spill response team.	
Units	PUAOIL201	Use basic equipment operations for oil spill response
	PUAOIL301	Apply health, safety and risk controls when working on oiled shorelines
	PUAOIL302	Use advanced equipment operations for oil spill response
Pathway	These units can be used in a range of Public Safety Certificate III qualifications.	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as an oil spill response member within an authorised oil spill response.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Oil Spill Response Team Leader

Target Group	Leaders of oil spill response teams.	
Units	PUAOIL401	Apply decision making strategies in an oil spill response
	PUAOIL402	Apply oiled shoreline assessment strategies in an oil spill response
	PUAOIL403	Lead a team in oiled shoreline clean up

© Commonwealth of Australia, 2025 Public Skills Australia

Pathway	These units can be used in a range of Public Safety Certificate IV Leadership qualifications.
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as an oil spill response team leader within an authorised oil spill response.
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

SES Sector

Air Search Observer

Target Group	Members of an air search team.	
Units	PUAAMS001B	Work in an aviation environment
	PUAAMS002B	Search as a member of an air search team
Pathway	These units contribute to the PUA30412 Certificate III in Public Safety (SES Rescue).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as an air search team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Alpine Search and Survival Operations

Target Group	Those who will be a member of an alpine land search team during winter operations.	
Unit/s	HLTFA301C	Apply first aid
	PUALAW001B	Protect and preserve incident scene
	PUAOPE013A	Operate communications systems and equipment
	PUASAR027A	Undertake land search rescue
	PUASES016A	Apply snowcraft skills when performing search operations
	PUATEA001B	Work in a team
	SISONAV403A	Navigate in uncontrolled environments

© Commonwealth of Australia, 2025 Public Skills Australia

	SISOOPS202A	Use and maintain a temporary or overnight site
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package, the HLT07 Health Training Package and the SIS10 Sport, Fitness and Recreation Training Package meet the industry requirements to commence working as an alpine land search team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Basic Rescue

Target Group	Members of a rescue team.	
Units	PUACOM001C	Communicate in the workplace
	PUAEME001B	Provide emergency care
	PUAEQU001B	Prepare, maintain and test response equipment
	PUALAW001B	Protect and preserve incident scene
	PUASAR022A	Participate in a rescue operation
Pathway	These units contribute to the PUA21312 Certificate II in Public Safety (SES) and the PUA30512 Certificate III in Public Safety (SES Operations).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a rescue team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Basic Tree Operations

Target Group	Members of an operations/response team who have responsibility for creating a safe environment in which to work where felled trees are involved.	
Units	FPICOT2239A	Trim and cut felled trees
	PUAOHS002B	Maintain safety at an incident scene
	PUAEQU001B	Prepare, maintain and test response

© Commonwealth of Australia, 2025 Public Skills Australia

		equipment
Pathway	These units contribute to the PUA30412 Certificate III in Public Safety (SES Rescue).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety and FPI05 Forest and Forest Products Industry Training Package meet the industry requirements to commence working as a member of a tree operations team within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Flood Response Operations

Target Group	Those who will be a member of a flood response team.	
Unit/s	PUASES008A	Undertake storm and water damage operations
	PUASES014A	Apply flood and fast moving water safety techniques
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate II and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a flood response team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Floodboat Response Operations

Target Group	Those who will be a flood boat operator during flood response operations.	
Unit/s	PUAEQU001B	Prepare, maintain and test response equipment
	PUAOHS002B	Maintain safety at an incident scene
	PUASES009A	Undertake inland floodboat operations (Licensing requirements may apply to this unit.)
	PUATEA001B	Work in a team

© Commonwealth of Australia, 2025 Public Skills Australia

Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a flood boat operator within SES flood response operations.
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Incident Response Team Leader

Target Group	Those who are a team leader of an incident response team.	
Unit/s	PUAOPE012A	Control a Level 1 incident
	PUAOPE015A	Conduct briefings and debriefings
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a team leader within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Intermediate Tree Operations

Target Group	Those who will be a member of a tree operations team.	
Unit/s	FPICOT2239A	Trim and cut felled trees
	FPIFGM3204A	Fall trees manually (intermediate)
	PUAEQU001B	Prepare, maintain and test response equipment
	PUAOHS002B	Maintain safety at an incident scene
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package and the FPI05 Forest and Forest Products Industry Training Package meet the industry requirements to commence working as a

	member of a tree operations team within the SES.
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Land Search Team

Target Group	Those who will be a member of a land search team.	
Unit/s	PUALAW001B	Protect and preserve incident scene
	PUAOHS002B	Maintain safety at an incident scene
	PUASAR027A	Undertake land search rescue
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate II and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a land search team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Operational Leadership

Target Group	Those who wish to take on strategic operational leadership roles within the SES.	
Unit/s	PUAEMR018A	Work in an emergency management context
	PUAOPE016A	Manage a multi-team sector
	PUASES011A	Manage emergency operations
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate IV and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to work as a senior operational leader within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Operations Centre

Target Group	Members of an operations centre team.	
Units	ICAICT103A	Use, communicate and search securely on the internet
	ICAU2006B	Operate computing packages
	PUAOPE013A	Operate communications systems and equipment
	PUASES012A	Work as a team member in an emergency operations centre
	TLIH2001A	Interpret road maps and navigate pre-determined routes
Pathway	These units contribute to the PUA30512 Certificate III in Public Safety (SES Operations).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package, the ICA11 Information and Communications Technology Training Package and the TLI10 Transport and Logistics Training Package meet the industry requirements to commence working as a member within a SES operations centre.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Road Accident Rescue

Target Group	Members of a road accident rescue team.	
Units	PUAEME001B	Provide emergency care
	PUAEME002C	Manage injuries at emergency incident
	PUALAW001B	Protect and preserve incident scene
	PUAOHS002B	Maintain safety at an incident scene
	PUASAR022A	Participate in a rescue operation
	PUASAR024A	Undertake road crash rescue
Pathway	These units contribute to the PUA30412 Certificate III in Public Safety (SES Rescue).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a road accident team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and

	regulatory requirements.

SES Induction

Target Group	People who join a local SES unit and obtain the basic skills required to be a team member in either operations or rescue. This Skill Set includes induction to the role of the SES and the nature of the work involved.	
Units	PUACOM001C	Communicate in the workplace
	PUACOM002B	Provide services to clients
	PUAOHS001C	Follow defined occupational health and safety policies and procedures
	PUATEA001B	Work in a team
	PUATEA004D	Work effectively in a public safety organisation
Pathway	These units contribute to the PUA21312 Certificate II in Public Safety (SES).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a member of the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

SES First Aid and Safety

Target Group	People who join an SES unit and obtain the basic first aid and safety skills required to be a team member in either operations or rescue.	
Units	HLTFA201B	Provide basic emergency life support
	PUAOHS002B	Maintain safety at an incident scene
Pathway	These units contribute to the PUA21312 Certificate II in Public Safety (SES).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package and the HLT07 Health Training Package meet the industry requirements to commence working as a member of the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and

	regulatory requirements.

Storm and Water Damage Response at Height

Target Group	Those who will be a member of a storm response team working at heights.	
Unit/s	PUAEQU001B	Prepare, maintain and test response equipment
	PUAOHS002B	Maintain safety at an incident scene
	PUASES008A	Undertake storm and water damage operations
	PUASES013A	Undertake storm and water damage operations performed at heights
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate II and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to ensure the safety of surf patrol teams and to apply risk management approaches at an operational level.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Storm and Water Damage Response

Target Group	Those who will be a member of a storm response team.	
Unit/s	PUAEQU001B	Prepare, maintain and test response equipment
	PUAOHS002B	Maintain safety at an incident scene
	PUASES008A	Undertake storm and water damage operations
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate II and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a storm and water damage response team member within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and

	regulatory requirements.

Structural Collapse

Target Group	Those who will be a member of a tree operations team.	
Unit/s	PUAEME001B	Provide emergency care
	OR	
	HLTFA201B	Provide basic emergency life support
	PUAEQU001B	Prepare, maintain and test response equipment
	PUALAW001B	Protect and preserve incident scene
	PUAOHS002B	Maintain safety at an incident scene
	PUASAR022A	Participate in a rescue operation
	PUASAR023A	Participate in an urban search and rescue Category 1
	PUASAR028A	Undertake rescue from a partial structural collapse
Pathway	These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.	
Suggested words for Statement of Attainment	These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as member of a structural collapse team within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Vertical Rescue

Target Group	Members of a vertical rescue team	
Units	PUAEME001B	Provide emergency care
	OR	
	HLTFA201B	Provide basic emergency life support
	PUAEQU001B	Prepare, maintain and test response equipment

	PUAOHS002B	Maintain safety at an incident scene
	PUASAR022A	Participate in a rescue operation
	PUASAR032A	Undertake vertical rescue
Pathway	These units contribute to the PUA30412 Certificate III in Public Safety (SES Rescue).	
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a vertical rescue team within the SES.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.	

Police Sector

Police Electronic Surveillance

Target Group	Workers undertaking Police Electronic surveillance in line with agency protocols.	
Units	PUACOM001C	Communicate in the workplace
	PUAESU001B	Plan an electronic surveillance operation
	PUAESU002B	Execute an electronic surveillance operation
	PUAESU003B	Set up monitoring equipment
	PUAESU004B	Maintain installations
	PUAESU005B	Prepare and present evidence
	PUAOPE015A	Conduct briefings and debriefings
	PUAPOLGD001A	Maintain police operational safety
	PUAPOLGD011A	Manage personal and ethical performance
	PUAPOLSU002A	Communicate in a surveillance environment
	PUATEA001B	Work in a team
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to undertake police electronic surveillance.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and

	regulatory requirements.

Police Computer Crime Investigations

Target Group	Workers undertaking police computer crime investigation in line with agency protocols.	
Units	PUACCI001B	Plan a computer related crime operation
	PUACCI002B	Conduct a preliminary searches for electronic data
	PUACCI003B	Copy electronic data
	PUACCI004B	Search electronic data
	PUACCI005B	Investigate network offences
	PUACCI006B	Build and maintain target computer networks
	PUACCI007B	Present evidence of computer crime
	PUACCI008B	Build and maintain computer crime networks
	PUACOM001C	Communicate in the workplace
	PUAOPE015A	Conduct briefings and debriefings
	PUAPOLGD001A	Maintain police operational safety
	PUAPOLGD011A	Manage personal and ethical performance
	PUAPOLGD013A	Develop productive working relationships
	PUATEA001B	Work in a team
Suggested words for Statement of Attainment	These units from the PUA12 Public Safety Training Package meet the industry requirements to undertake police computer crime investigation.	
Disclaimer	Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Public Safety Qualifications

In structuring qualifications in the Public Safety Training Package, the approach has been to identify core competency standards essential to achieving the qualification and elective units to provide choice and flexibility, and to meet the range of specific roles a worker may undertake. The qualification framework provides a balance between achieving the requirements of the industry to demonstrate competency in the area of work covered by the qualification and the need to provide maximum flexibility.

Units of competency have been packaged and aligned to a specific qualification within the Australian Qualification Framework (AQF) to establish the qualification level and title.

An Overview of the Public Safety Qualifications Framework

Qualifications in Public Safety have been devised to provide maximum recognition, flexibility and portability for all Public Safety industry workers, whether employed full-time or part-time, or volunteers.

The qualifications framework identifies and incorporates national sector specific qualifications and Industry Wide qualifications.

Industry Wide Qualifications

The industry wide qualifications range from Certificate II to Advanced Diploma and cover:

- aquatic search and rescue
- bio-security
- community safety
- emergency communications centre operations
- emergency management
- leadership
- search and rescue

Flexibility has been maximised in the qualifications by using a core plus elective model. The community safety qualifications have two groups of electives: Group A has a public safety focus while Group B covers generic PSTP units and imported units.

The flexibility of the community safety qualifications allows for specialisation in the areas of community education, community liaison, buildings and facilities inspection, compliance audits, and workplace emergency response.

Police Sector Qualifications

Certificate level qualifications have been developed to cover those units of competency required by Police Officers who perform a support function in assisting other police working in Aboriginal or Torres Strait Islander or ethnic communities. The Diploma covers wider operational policing functions, while a number of Advanced Diplomas and Graduate Vocational Certificates cover supervisory, management and specialist functions.

© Commonwealth of Australia, 2025 Public Skills Australia

State and Territory Emergency Service Sector Qualifications

Certificate II qualification cover those functions performed by SES workers who undertake both rescue and operations centre roles. The Certificates III and IV qualifications are designed for SES workers who undertake leadership roles during specialist rescue operations or within an operations centre. Operational management functions are covered in the Diploma qualification.

Customisation of Qualifications

Where the packaging rules of a particular qualification do not specify other customisation options, the following rules apply.

Qualifications may include a maximum of:

- one unit from a qualification within the Public Safety TP at one AQF level lower
- four units from qualifications within the Public Safety TP at one AQF level higher
- two units from qualifications within other endorsed Training Packages at the same AQF level

Individual organisations may declare certain elective units as compulsory for workers within their organisation

Customisation of qualifications should be advised to the GSA Public Safety Industry Advisory Committee to verify that any customisation maintains the integrity of the original qualification and to maintain accurate information of qualifications available to the industry.

Qualification Pathways Information

Specific pathway advice for public safety qualifications is not always included due to the unique nature of employment in public safety occupations. Pathway information is normally contained in recruitment documentation and subsequent pathways, post-employment, are determined in consultation with the employer.

In the public safety industry, qualifications pathways depend on a range of issues specific to each sector such as agency structure, promotional structure and rank structure. Where qualifications are used outside of public safety agencies, then qualifications pathways will depend on the organisation and the structure of the organisation.

In instances where qualifications pathways can be articulated, these are provided in the actual qualification.

Qualification pathways

The following pathways chart is provided to show the types of pathways into and from qualifications that are possible with this Training Package. For more information about qualifications and pathways contact Government Skills Australia.

Assessment Guidelines

Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the *Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration*. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
-
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

Industry Requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Industry specific requirements will be either covered in the unit of competency or managed by assessors and trainers as they arise.

Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability
- flexibility
- fairness
- sufficiency

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.

Validity

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

(a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance

(b) assessment of knowledge and skills must be integrated with their practical application

(c) judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

Reliability

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

Flexibility

© Commonwealth of Australia, 2025 Public Skills Australia

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

Fairness

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

Sufficiency

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough *appropriate* evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

Rules of Evidence

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

Valid

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

Sufficient

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

© Commonwealth of Australia, 2025 Public Skills Australia

Current

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

Authentic

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate's own work.

Assessment Requirements of the Australian Quality Training Framework

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 *Essential Standards for Registration.*

The AQTF 2010 *Essential Standards for Initial and Continuing Registration* can be downloaded from <www.training.com.au>.

The following points summarise the assessment requirements.

Registration of Training Organisations

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

Quality Training and Assessment

Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1.

Assessor Competency Requirements

Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 *Users' Guide to the Essential Standards for Registration* – Appendix 2.

Assessment Requirements

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Assessment Strategies

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

© Commonwealth of Australia, 2025 Public Skills Australia

National Recognition

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*..

Access and Equity and Client Outcomes

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration.*

Monitoring Assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Recording Assessment Outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current *AQF Implementation Handbook* and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). See the AQTF and the edition of the *AQF Implementation Handbook*—available on the AQF Council website <www.aqf.edu.au >

Licensing/Registration Requirements

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer.

The developers of this Training Package consider that no licensing or registration requirements apply to RTOs, assessors or candidates with respect to this Training Package.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact Government Skills Australia.

Requirements for Assessors

In order to conduct assessment for statutory licensing or other industry registration requirements, assessors must meet the requirements outlined in the following chart, in addition to the AQTF requirements.

LICENCE/REGISTRATION	JURISDICTION	REQUIREMENTS

© Commonwealth of Australia, 2025 Public Skills Australia

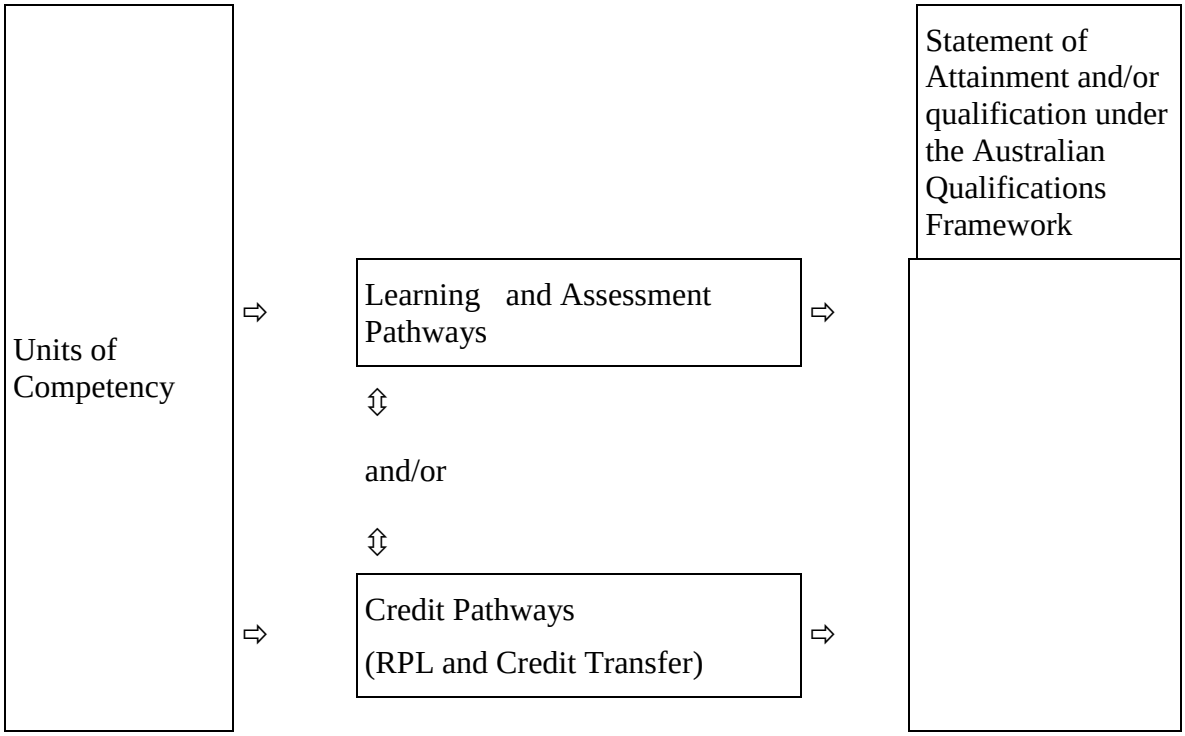
These requirements may be met through

Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.



Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired.

Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package , the AQTF and, where relevant, the Australian Qualifications Framework.

Learning and Assessment Pathways

© Commonwealth of Australia, 2025 Public Skills Australia

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

Credit Pathways

Credit is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

Recognition of Prior Learning

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;

© Commonwealth of Australia, 2025 Public Skills Australia

- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.
-

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

Credit Transfer

© Commonwealth of Australia, 2025 Public Skills Australia

Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.

This process involves education institutions:

- mapping, comparing and evaluating the extent to which the defined *learning outcomes and assessment requirements* of the individual *components of one qualification* are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
- making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
- setting out the agreed credit outcomes in a documented arrangement or agreement, and
- publicising the arrangement/agreement and credit available.

Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

Assessor Competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

© Commonwealth of Australia, 2025 Public Skills Australia

1.4 Training and assessment are conducted by trainers and assessors who:

a) have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and

b) have the relevant vocational competencies at least to the level being delivered or assessed, and

c) can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and

d) continue to develop their Vocational Education and Training (VET) knowledge and skills as well as their industry currency and trainer/assessor competence.

* See AQTF 2010 *Users' Guide to the Essential Standards for Registration* – Appendix 2

Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <*www.ntis.gov.au*>.

Developing Assessment Tools

When developing their own assessment tools, assessors must ensure that the tools:

- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, Literacy and Numeracy

© Commonwealth of Australia, 2025 Public Skills Australia

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Mandatory Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

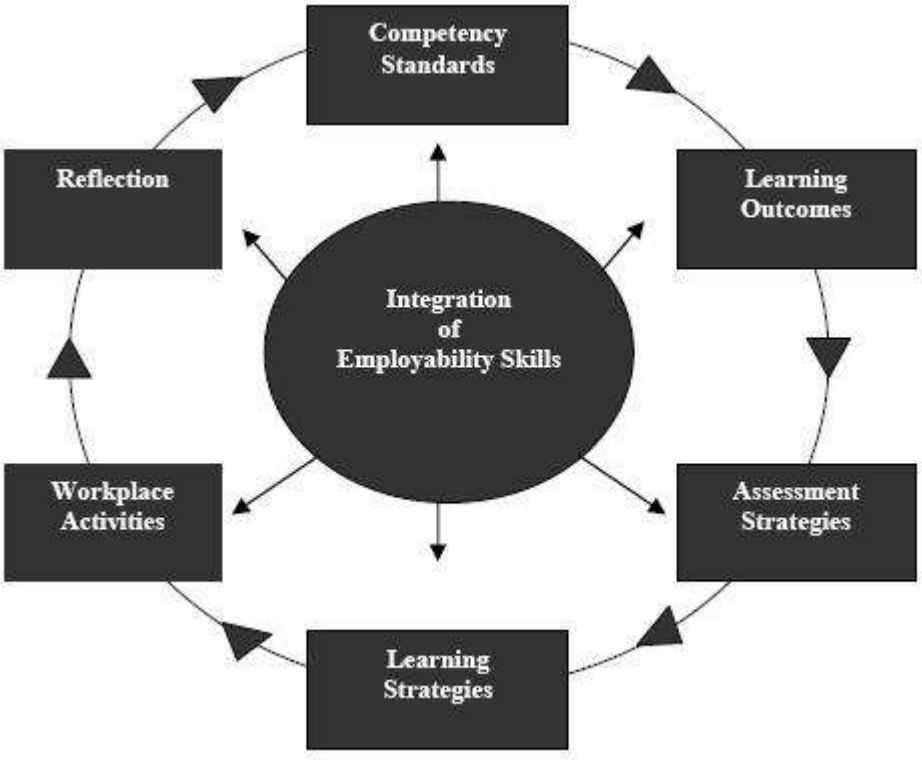
1.5 Assessment, including Recognition of Prior Learning (RPL):

a) meets the requirements of the relevant Training Package or accredited course
b) is conducted in accordance with the principles of assessment and the rules of evidence
c) meets workplace and, where relevant, regulatory requirements
d) is systematically validated.

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

© Commonwealth of Australia, 2025 Public Skills Australia



Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <http://www.training.com.au/>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <http://employabilityskills.training.com.au>

For more information on Employability Skills in

Government Skills Australia's Training Packages go to the website at www.governmentskills.com.au http://www.governmentskills.com.au.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from http://employabilityskills.training.com.au "

Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

Reasonable Adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship.

The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. *Go to http://www.deewr.gov.au/tpdh/Pages/home.aspx* .

Further Sources *of Information*

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

The Training Package Development Handbook site provides National Quality Council policy for the development of Training Packages. The site also provides guidance material for the application of that policy, and other useful information and links.
http://www.deewr.gov.au/Skills/Overview/Policy/TPDH/Pages/main.aspx

A**ssessment Resources**

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focussed training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Resources can be purchased or accessed from:

- TVET Australia – provides an integrated service to enable users of the national training system to identify and acquire training materials, identify copyright requirements and enter licenses for use of that material consistent with the scope and direction of the NQC.

Competency Standards

What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

© Commonwealth of Australia, 2025 Public Skills Australia

Contextualisation of Units of Competency by RTOs

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit Title

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit Descriptor

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

Employability Skills

This sub-section contains a statement that the unit contains Employability skills.

Pre-requisite Units (optional)

© Commonwealth of Australia, 2025 Public Skills Australia

If there are any units of competency that must be completed before the unit, these will be listed.

Application of the Unit

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency Field (Optional)

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of Competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

Performance Criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

Required Skills and Knowledge

The essential skills and knowledge are either identified separately or combined. *Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner. *Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Range Statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills
-

Employability Skills in Units of Competency

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills	Mayer Key Competencies
Communication	Communicating ideas and information
Teamwork	Working with others and in teams

© Commonwealth of Australia, 2025 Public Skills Australia

Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Title	Give formal presentations and take part in meetings **(Communication)**
Unit Descriptor	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. **(Initiative and enterprise)**
Element	Proactively resolve issues. (problem solving)
Performance Criteria	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. **(Planning and organising)**
Range Statement	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology)
Required Skills and Knowledge	Modify activities depending on differing workplace contexts, risk situations and environments. **(Learning)** Work collaboratively with others during a fire emergency. (teamwork) Instructions, procedures and other information relevant the maintenance of vessel and port security. **(Communication)**
Evidence Guide	Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to: • assess response options to identified crime-prevention needs and determine the optimal action to be implemented • in consultation with relevant others, design an initiative to address identified issues. **(Initiative and enterprise).**

Employability Skills Summaries and units of competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Not for public access material

Police specialist units of competency and qualifications

NOTE: Police specialist units of competency and qualifications are not included in this document; Police specialist units of competency and qualifications are confidential and should not be accessible in the public domain. Public access to these units of competency and qualifications has the potential to compromise Police operations and security as well as place members of the public and Police Officers at risk. These units are contained in a separate document and are only available to persons authorised by the Australia New Zealand Policing Advisory Agency (ANZPAA) – via website contact http://www.anzpaa.org.au
http://www.anzpaa.org.au

The Police Sector not for public access qualifications are:

- PUA42512 Certificate IV in Public Safety (Disaster Victim Identification Operations)
- PUA42812 Certificate IV in Public Safety (Policing Support Services – General or Protective Services)
- PUA51812 Diploma of Public Safety (Human Source Management)
- PUA51912 Diploma of Public Safety (Mounted Policing)
- PUA52012 Diploma of Public Safety (Police Dog Handling – General Purpose or Specific Odour)
- PUA52112 Diploma of Public Safety (Police Intelligence Practice)
- PUA60412 Advanced Diploma of Public Safety (Police Intelligence Operations)
- PUA61012 Advanced Diploma of Public Safety (Disaster Victim Identification Coordination)
- PUA61112 Advanced Diploma of Public Safety (Improvised Hazardous Device Operations – Technician or Response)
- PUA61212 Advanced Diploma of Public Safety (Police Close Personal Protection)
- PUA61312 Advanced Diploma of Public Safety (Police Negotiations)
- PUA61412 Advanced Diploma of Public Safety (Surveillance)
- PUA61512 Advanced Diploma of Public Safety (Tactical Flight Operations – Helicopter or Surveillance)
- PUA61612 Advanced Diploma of Public Safety (Undercover Operations – Operative or Controller)
- PUA61712 Advanced Diploma of Public Safety (Forensic Investigation)
- PUA61812 Advanced Diploma of Public Safety (Police Supervision)

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA20112 Certificate II in Public Safety (Aboriginal or Torres Strait Islander Community Policing) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	Employability Skills Statement
Communication	▸ communicate effectively with a wide range of community members such as those with physical/sensory/intellectual impairment and with different cultural backgrounds ▸ use active listening skills and questioning techniques to clarify issues ▸ use clear, concise language in all communications that is appropriate to client, assignment and organisation's requirements
Teamwork	▸ make contributions to participative arrangements in the workplace within organisational procedures and scope of responsibilities and competencies ▸ seek peer support when required ▸ understand, acknowledge and accurately represent views and opinions of individuals or a group to others where required
Problem solving	▸ identify and arrange for the needs of specific categories of persons in care or custody ▸ raise workplace issues with appropriate personnel and make appropriate contribution to resolve issues in accordance with workplace procedures ▸ recognise hazards in the work area, rectify where possible and report to designated personnel according to workplace procedures
Initiative and enterprise	▸ minimise workplace risks to self, colleagues and the public ▸ optimise the potential safety and security of persons in care or custody ▸ raise occupational health and safety issues with designated personnel in accordance with workplace procedures and relevant

© Commonwealth of Australia, 2025 Public Skills Australia

	occupational health and safety legislation
Planning and organising	▸ employ alternative communications strategies according to organisational procedures to address identified faults and deficiencies in communication ▸ participate in initial assessment to identify factors which will impact on public safety and scene preservation ▸ plan, implement and where necessary adapt workplace safety responses to situational contexts
Self-management	▸ assess work load and set priorities within allocated timeframes ▸ observe confidentiality in accordance with organisation's policies and procedures ▸ recognise and manage signs of personal stress and take appropriate action to ensure continued work effectiveness
Learning	▸ access workplace information and seek clarification where necessary ▸ identify training and development needs relevant to area of work in conjunction with supervisor and follow up with relevant personnel ▸ maintain currency of required licences and certificates
Technology	▸ safely operate and use general issue and emergency operational equipment and safety clothing ▸ use and maintain police communications equipment in accordance with manufacturer's specifications and organisational guidelines ▸ use information technology effectively

Packaging Rules

8 units of competency are required for this qualification including:

- 8 core units

Code	Core Units

Employability Skills Summary

Employability Skills Summary for PUA21012 Certificate II in Public Safety (Aquatic Rescue)

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA21012 Certificate II in Public Safety (Aquatic Rescue) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement
Communication	• interact with people internally and externally through verbal, non-verbal and written communications in the workplace and follow verbal and written workplace instructions • provide verbal reports to paramedical personnel • use active listening skills and questioning techniques to clarify issues • use established communication pathways for routine and non-routine communication • use language that is clear, concise and appropriate to client, assignment and organisation's requirements, in all communications
Teamwork	• assist members of other emergency services • contribute to the identification of team goals and objectives • discuss methods for minimising hazards with team members and reach agreement as a team • encourage others/team members • obtain and discuss operation and task information with team members • participate in rescue operations as a member of an aquatic rescue team • take part in group discussions and informal meetings • work cooperatively with personnel from other organisations
Problem solving	• minimise or control hazards and environmental conditions • provide emergency care pending the arrival of appropriately qualified personnel • recognise and resolve problems and conflict • rectify and/or report first aid equipment faults • research hazards en-route to the incident area to determine a safe route/course
Initiative and	• initiate search and rescue patterns if required within the incident

© Commonwealth of Australia, 2025 Public Skills Australia

enterprise	area where distressed vessel or survivors are believed to now be located • raise occupational health and safety issues with designated personnel in accordance with workplace procedures and relevant occupational health and safety legislation • recognise and refer to the supervisor, personal capabilities and limitations • use improvised techniques where access to equipment is limited
Planning and organising	• assess work load and set priorities within allocated timeframes • identify factors affecting work requirements, assess their impact and take appropriate action to ensure work requirements are met • identify hazards and assess risks • prepare and make ready for use relevant maps/charts, electronic navigation aids and navigation equipment • report the need for additional personnel and/or specialist equipment to the supervisor • select personal protective equipment based on the nature of the rescue operation
Self-management	• develop and maintain own expertise • effectively recognise level of well being necessary to perform work • identify signs and symptoms of operational stress in self and others and report these signs and symptoms to relevant personnel • identify training and development needs relevant to the area of work • manage own work • monitor own work • recognise and manage signs of personal stress
Learning	• learn about casualty handling techniques • learn about manual handling techniques • learn about priorities for life support in emergencies including the DRABC (danger, response, airway, breathing ventilation and circulation assessments) model • learn about resuscitation techniques • learn about systems of the body • learn about verbal and non-verbal communication techniques including hand signals and language style
Technology	• operate a chart plotter • operate a GPS • operate a radio system • operate an appropriate sized rescue vessel • operate an intercom system

© Commonwealth of Australia, 2025 Public Skills Australia

	• operate first aid equipment • operate satellite phones from search and rescue authority • use communication technology if relevant to workplace requirements • use information technology effectively

Packaging Rules

8 units of competency are required for this qualification including:

- 5 core units
- 3 elective units

Choose a minimum of 1 elective unit from the list of elective units below.

Choose the remaining 2 elective units from either the elective list below or elsewhere in this training package or another endorsed training package or accredited course.

Only 1 unit from Group B may be included in this qualification.

Only 1 unit from Group C may be included in this qualification.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Code	Core Units

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA30112 Certificate III in Public Safety (Aboriginal or Torres Strait Islander Community Policing) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	Employability Skills Statement
Communication	▸ accurately complete departmental forms and reports complying with organisational requirements regarding completion/currency of maintenance logs, patrol records ▸ adopt communication strategies that reflect consideration of cultural, gender, age issues and are in accordance with organisational policies and procedures ▸ inform and skill community members to implement prevention and mitigation activities
Teamwork	▸ assist officers from other areas with policing matters including local protocols and identifying appropriate sources of information ▸ develop information networks for current and future use ▸ work in a team
Problem solving	▸ de-escalate, as far as possible, situational conflict ▸ identify options for action that will allow compliance to be achieved at the earliest possible date ▸ negotiate/resolve/mediate conflict (negotiation can take place with supervisors, colleagues and members of the public)
Initiative and enterprise	▸ apply professional judgement in issuing licences/regulatory authorisations ▸ give advice on current developments with potential policing and public safety implications ▸ where necessary, establish protocols that allow community

© Commonwealth of Australia, 2025 Public Skills Australia

	members not culturally permitted to address the member to lodge requests for assistance
Planning and organising	▸ assess, prioritise and execute administrative tasks to ensure effectiveness of operations ▸ develop practical action plan as a result of consultation, to achieve compliance ▸ notify supervisors of impending events with potential policing or public safety implications
Self-management	▸ maintain control and objectivity at all times in conflict situations ▸ maintain water and food intake, rest breaks and shelter requirements ▸ manage time to ensure people can access police assistance during duty hours and for emergencies out of duty hours as per organisational policies and guidelines
Learning	▸ learn about by-laws and regulations relating to the preparation of documentation ▸ learn about jurisdictional laws, policies and procedures relating to receiving, recording and store money and property are complied with ▸ learn about relevant legislation and regulations
Technology	▸ access databases for the purposes of checking applicant details/history ▸ accurately operate a computer keyboard ▸ use electrically insulated tools and equipment

Packaging Rules

8 units of competency are required for this qualification including:

- 8 core units

Code	Core Units
PUACOM005B	Foster a positive organisational image in the community
PUAOHS002B	Maintain safety at an incident scene

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Liaison and community policing qualifications have been developed to set agreed minimum standards that should be contextualised within the specifics of each jurisdiction/ agency/organisational policy and procedure.

Pathways for candidates considering this qualification may include:

- achievement of the PUA20312 Certificate II in Public Safety (Police Liaison)
- other relevant experience

Pathways from the qualification

After achieving the PUA30312 Certificate III in Public Safety (Police Liaison), candidates may undertake a range of qualifications relevant to their role. Pathways for candidates considering this qualification may include to:

- undertake other liaison/police related qualifications

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA31312 Certificate III in Public Safety (Aquatic Search and Rescue) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement
Communication	▸ accurately record the details of casualties' condition, treatment and response to treatment in line with organisation's procedures ▸ communicate, which may include Auslan gestures; calming and reassuring a casualty; face-to-face; facsimile; feedback of information; landline and mobile telephone; pamphlets translated into other languages; radio; signalling systems; using interpreters ▸ record vital signs in planning treatment and report as appropriate ▸ relay instructions clearly, concisely and accurately and obtain confirmation of understanding ▸ use clear concise and appropriate language in all communications to client, assignment and organisation's requirements ▸ use established communication pathways for routine and non-routine communication ▸ use questioning, learning and summarising skills to establish client needs ▸ write reports
Teamwork	▸ assist members of other emergency services ▸ contribute to maintaining safety of other work group members ▸ have knowledge of the composition of team and the roles and responsibilities of team members ▸ move a casualty, which may be as part of a team ▸ establish issues affecting safety of self and other personnel by identifying hazards and assessing risks ▸ obtain search operation information and task information, and discuss with team members ▸ participate in group discussions and informal meetings
Problem solving	▸ apply fault finding techniques ▸ assess the movement of a casualty to a safer location by scene assessment, visual inspections, planning reviews, recognising hazard warnings, interviewing others at the scene

© Commonwealth of Australia, 2025 Public Skills Australia

	▸ employ alternative communication strategies ▸ identify hazards to self and others and take appropriate action to safeguard against injury ▸ provide emergency care pending the arrival of appropriately qualified personnel ▸ seek expert advice
Initiative and enterprise	▸ assess extent and nature of emergency care required ▸ assist work group members in danger in accordance with standard operating procedures, ensuring personal safety is maintained ▸ immediately report any changes in situation and/or conditions to designated person ▸ improvise techniques where there is limited access to equipment ▸ monitor, assess and amend treatment and management plan in response to changes in condition of the casualty and/or environment
Planning and organising	▸ assess extent and nature of initial emergency care required ▸ select and check personal protective clothing and equipment according to organisational procedures to ensure it is operational prior to entry into incident situation ▸ select and check search equipment for serviceability, and store/pack it for use ▸ use equipment according to casualty's condition, availability and to organisation's procedures ▸ use search formation or grids to locate missing persons or objects
Self-management	▸ establish issues affecting safety of self and other personnel by identifying hazards and assessing risks ▸ implement hazard control and mitigation measures with minimum damage to the environment, while maintaining safety of self and others ▸ maintain knowledge of legal and ethical issues in pre-hospital care and knowledge of current practices and procedures in emergency care ▸ maintain universal hygiene precautions ▸ maintain water and food intake, rest breaks and shelter requirements ▸ recognise impact of own actions on safety of others ▸ remain calm under pressure ▸ undertake duties in line with organisational health and safety codes of practice and relevant legislation
Learning	▸ learn about current practices and procedures in emergency care ▸ maintain knowledge in managing identified injuries in line with approved emergency care

© Commonwealth of Australia, 2025 Public Skills Australia

	▸ recognise and refer personal capabilities and limitations to the team leader ▸ recognise and report symptoms of operational stress
Technology	▸ identify hazards by accessing databases ▸ operate first aid equipment ▸ use communication systems and equipment ▸ use hazard control equipment such as atmospheric monitoring equipment; meteorological equipment; radiation monitoring equipment ▸ use search equipment such as radio communications equipment; information technology systems; mobile telephone; radio; signalling systems

Employability Skills Summary

Employability Skills Summary for PUA31412 Certificate III in Public Safety (Community Safety)

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA31412 Certificate III in Public Safety (Community Safety) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement

© Commonwealth of Australia, 2025 Public Skills Australia

Communication	• adopt a calm, caring and reassuring manner in interaction with the casualty and others • communicate with stakeholders and convey information, which may include clarifying, listening, paraphrasing, questioning, summarising • exercise courtesy, consideration and sensitivity at all times with the client • give and receive instructions • interact with people internally and externally through verbal, non verbal and written communications in the workplace and follow verbal and written workplace instructions • make notes of observations • provide and receive feedback in a constructive manner • read and understand the organisation's plans, policies and procedures • use language in all communications which is clear, concise and appropriate to client, assignment and organisation's requirements • use non verbal communication which is positive, culturally appropriate and tailored to the audience • use skills to follow instructions/directives and to report information
Teamwork	• apply interpersonal skills • assist members of other emergency services • attend and contribute to work related meetings and workplace committees • participate in group discussions and informal meetings • promote cooperation • recognise and access contribution of individuals of different ages, gender, and social and cultural backgrounds • seek peer support when required • suggest and debate practical consultation and decision making strategies • work effectively with other personnel in the organisation
Problem solving	• assess moving casualty to a safer location • identify and communicate additional or specific resource requirements • identify hazards to self and others and take appropriate action to safeguard against injury • monitor and assess treatment, and appropriately amend the management plan in response to changes in condition of the casualty and/or environment • operate within local supervisory/management responsibility and apply known solutions to a variety of predictable problems

© Commonwealth of Australia, 2025 Public Skills Australia

	• provide emergency care pending the arrival of appropriately qualified personnel • recognise and resolve problems and conflict • rectify and/or report first aid equipment faults • use the organisation's policies and procedures
Initiative and enterprise	• make initial assessment of extent and nature of emergency care required • monitor treatment • use information such as characteristics of natural, local and built environments, demographics (population distribution, social, cultural, health status and education data), economic activity reports and government reports • use improvised techniques, when limited access to equipment necessitates
Planning and organising	• accurately record details of casualties' condition, treatment and response to treatment in line with organisation's procedures • assess work load and set priorities within allocated timeframes • compare calculated level of risk to the established risk evaluation criteria and determine to be acceptable or unacceptable in consultation with the supervisor • determine scope and focus of a feasible emergency risk management project • evaluate treatment plans to determine residual risk following implementation • identify factors affecting work requirements, assess impact and take appropriate action to ensure work requirements are met • monitor, review and record effectiveness and efficiency of the treatment plan, in accordance with organisational policies and procedures, to ensure compliance and validity • use equipment according to casualty's condition, availability and to organisation's procedures
Self-management	• apply knowledge of current practices and procedures in emergency care • apply knowledge of legal and ethical issues in pre-hospital care • conduct oneself at all times in accordance with organisation's policies, procedures and standards • develop and maintain own expertise • identify training and development needs relevant to the area of work • maintain universal hygiene precautions • maintain work effectiveness • manage own work • monitor own work • observe designated dress codes

© Commonwealth of Australia, 2025 Public Skills Australia

	• participate in programs to ensure level of expertise meets organisation's requirements • recognise and manage signs of personal stress • recognise level of well being necessary to perform work effectively • remain calm under pressure • voice personal view to the review process
Learning	• learn about assessment of casualty, in accordance with organisation's procedures • learn about culture, diversity and history of communities, environments and associated concerns, issues and sensitivities • learn about current practices and procedures in emergency care • learn about group dynamics • learn about perception of risks • learn about strategies for resolving conflict
Technology	• analyse information • operate first aid equipment • represent mathematical ideas in appropriate format • use information technology effectively • use technology such as monitoring and assessment resources • use technology, which may include specified methods or tools for examining any available data, such as audit results/incident reports

Packaging Rules

12 units of competency are required for this qualification including:

- 3 core units
- 9 elective units

Choose 3 elective units from the Group A list below.

Choose a minimum of 4 elective units from the Group B list of elective units below.

Choose the remaining 2 elective units from either the Group B elective list below or elsewhere within this training package or another endorsed training package, or accredited course.

© Commonwealth of Australia, 2025 Public Skills Australia

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Code	Core Units
PUACOM001C	Communicate in the workplace

Pathways Information

Pathways into the qualification

Candidates may enter the qualification through a number of entry points demonstrating potential to undertake vocational education and training at this qualification level, such as:

- after achieving the PUA21012 Certificate II in Public Safety (Aquatic Rescue)
- working in an emergency communications centre operations role
- with vocational experience in emergency communications centre operations roles

Pathways from the qualification

After achieving the PUA33012 Certificate III in Public Safety (Emergency Communications Centre Operations), candidates may undertake a range of qualifications relevant to their role, such as:

- PUA31312 Certificate III in Public Safety (Aquatic Search and Rescue)
- PUA42712 Certificate IV in Public Safety (Emergency Communications Centre Operations)
- PUA41012 Certificate IV in Public Safety (Leadership)
- PUA41112 Certificate IV in Public Safety (Community Safety)

Employability Skills Summary

Employability Skills Summary for PUA33012 Certificate III in Public Safety (**Emergency Communications Centre Operations**)

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA33012 Certificate III in Public Safety (Emergency Communications Centre Operations) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	**Employability Skills Statement**
Communication	• control the conversation to ensure necessary information is obtained from the caller • use active listening skills and questioning techniques to clarify issues • use codes, abbreviations, prowords or specialist terminology in the transmission of information
Teamwork	• encourage and acknowledge participation by team members • make contributions to participative arrangements in the workplace (such as occupational health and safety committees team or workgroup meetings) within organisational procedures and scope of responsibilities and competencies • request assistance in the completion of tasks from other team members where appropriate
Problem solving	• identify and communicate difficulties/problem areas to the appropriate person • identify and report faulty equipment in accordance with the organisation's policies and procedures, and employ alternative strategies employed when necessary • make decisions and solve problems to prioritise requests
Initiative and enterprise	• make contributions to identifying team goals and objectives • raise occupational health and safety issues with designated personnel in accordance with workplace procedures and relevant occupational health and safety legislation • understand, acknowledge and accurately represent to others where required, views and opinions of individuals or a group

© Commonwealth of Australia, 2025 Public Skills Australia

Planning and organising	• prioritise request/s for assistance in accordance with agency protocols and legislation where required • receive, record and relay information • summarise and communicate information using clear and appropriate language, in accordance with the organisation's policies and procedures
Self-management	• maintain readiness in periods of low operational activity • manage stress • respond calmly to multiple demands in high operational activity
Learning	• learn about communication protocols • learn about the meaning of occupational health and safety signs and symbols relevant to area of work • learn about the types of emergencies (with regards to relevant legislation)
Technology	• effectively use telephony equipment, radios, computer systems and associated software • use equipment designed to receive incoming incident calls/enquiries in accordance with the organisation's and supplier's procedures • use equipment relating to incident/information management

Packaging Rules

11 units of competency are required for this qualification including:

- 8 core units
- 3 elective units

Choose a minimum of 1 elective units from the Group A or Group B lists below.

Choose the remaining 2 elective units from either the elective list below **or** elsewhere within this training package **or** another endorsed training package, **or** accredited course.

Only one unit may be chosen from the Group A elective list.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Liaison and community policing qualifications have been developed to set agreed minimum standards that should be contextualised within the specifics of each jurisdiction/agency/ organisational policy and procedure.

Pathways for candidates considering this qualification may include:

- achievement of the PUA30112 Certificate III in Public Safety (Aboriginal or Torres Strait Islander Community Policing)
- appropriate vocational experience in a range of environments providing liaison services between communities and others or in providing support services to communities
- appropriate experience working as a volunteer
- appropriate experience participating in community activities

Pathways from the qualification

After achieving the PUA40112 Certificate IV in Public Safety (Aboriginal or Torres Strait Islander Community Policing), candidates may undertake a range of qualifications relevant to their role. Pathways for candidates considering this qualification may include to:

- commence the PUA50212 Diploma of Public Safety (Policing)
- undertake community/policing related qualifications

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA40112 Certificate IV in Public Safety (Aboriginal or Torres Strait Islander Community Policing) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification as Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	Employability Skills Statement
Communication	▸ interact with others effectively ▸ legitimately collect and document relevant information ▸ provide information to other organisations in a clear, concise and comprehensive manner
Teamwork	▸ minimise workplace risks to self, colleagues and the public ▸ provide encouragement, support and advice to personnel as required ▸ mentor people as required
Problem solving	▸ explore possible resolutions or compromises ▸ readily identify and critically evaluate problems and barriers to resolution and develop and plan a range of response options ▸ resolve conflict
Initiative and enterprise	▸ analyse, note and disseminate features particular to a patrol area ▸ correctly analyse emergent situations and take appropriate actions, including requests for further assistance ▸ regularly use self-assessment and reflection in practice to monitor performance against established standards and to accurately identify personal strengths and weaknesses
Planning and organising	▸ involve other community groups/organisations when opportune, to help reach a solution

© Commonwealth of Australia, 2025 Public Skills Australia

	▸ note and file outcomes of the proceedings and complete reports where required according to organisation requirements ▸ plan and implement personal improvement plans
Self-management	▸ assess competing demands and organise within time constraints to achieve individual, team and organisational priorities ▸ maintain an acceptable demeanour (in relation to issues such as appearance, confidence, deportment, dress standard) ▸ organise and manage time effectively
Learning	▸ learn about acceptable/non-acceptable behaviour and practices ▸ learn about professional standards ▸ learn about the rules of evidence
Technology	▸ manage computers and information ▸ select appropriate equipment

Packaging Rules

7 units of competency are required for this qualification including:

- 7 core units

Code	Core Units
PUACOM007B	Liaise with other organisations
PUALAW003B	Give evidence in a judicial or quasi-judicial setting
PUAPOLGD002A	Apply policing methods
PUAPOLGD003A	Undertake initial police investigation
PUAPOLGD009A	Manage involvement in the judicial process
PUAPOLGD011A	Manage personal and ethical performance
PUAPOLIM006A	Enhance status as a role model in an Aboriginal or Torres Strait Islander community

	festivals • explain and promote the organisation's activities • participate in conferences • represent the organisation's position on particular issues in a way which acknowledges community concerns and promotes community awareness • write reports
Teamwork	• allocate resources, which may include considering urgency, cost effectiveness, accessibility, maintenance demands, availability and deployment time • collect timely information that is relevant to the needs of individuals/teams • determine the information needs of individuals/teams and identify the sources • gather and disseminate information to appropriate personnel within the specified timeframe
Problem solving	• allocate resources to facilitate required outcomes • analyse feedback and cooperation with community groups • analyse, which may include problem solving • brief and debrief content and format, which may include problem based approaches • provide advice that takes into account type of risk, locality, and protection of life, property and the environment • review activity against the policies, practices and training of the organisation to identify any discrepancies • review information held by the organisation to determine suitability and accessibility
Initiative and enterprise	• identify and act upon briefing and debriefing follow-up actions in a timely manner • prepare plans to obtain information which is not available or accessible within the organisation • report the results of information gathering, analysis and synthesis so they can be input to policy development and organisation's decision making • select an appropriate location for the brief/debrief
Planning and organising	• conduct inspections to provide for relevant information for pre-incident planning • evaluate resource usage against targets and organisational standards • gather, analyse, synthesise and report information within specified timeframes and to the standard defined by the organisation • monitor resource usage • plan and prepare a briefing/debriefing in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

	organisation's policy and procedures • report the results of information gathering, analysis and synthesis so they can be input to policy development and organisation's decision making • store equipment stock and supplies in accordance with organisation's policy and procedures
Self-management	• analyse needs • manage and store equipment stock and supplies in accordance with organisation's policy and procedures • provide leadership to individuals and teams • voice personal view to the review process
Learning	• learn about legislative requirements relevant to emergency management • learn about organisation's policies • learn about organisation's procedures for activity debriefing • learn about practices and training processes in relation to activity • learn about reporting procedures of the organisation • learn about techniques for the prioritisation and evaluation of public safety risk management systems • maintain records of resource allocation and usage in accordance with relevant legislation and organisational guidelines • support and participate in development activities
Technology	• ensure that computer-based tools are used to produce resource reports • use basic statistical information • use communication channels • use information technology effectively • use management information systems that may include computers • use management information systems to store and retrieve data for decision making • use market trends • use records management systems, registries and file records

Packaging Rules

13 units of competency are required for this qualification including:

- 5 core units
- 8 elective units

© Commonwealth of Australia, 2025 Public Skills Australia

Choose 1 elective unit from the Group A list below.

Choose a minimum of 5 elective units from the Group B list below.

Choose the remaining 2 elective units from either the Group B elective list below or elsewhere within this training package, or another endorsed training package, or accredited course.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where a pre-requisite unit is attached to a unit it is identified by this symbol ∟.

The pre-requisite units attached to any of the units must be undertaken and are additional to the number of units required for the qualification.

Code	**Core Units**
PUACOM001C	Communicate in the workplace
PUACOM003B	Manage information
PUACOM005B	Foster a positive organisational image in the community
PUAMAN002B	Administer work group resources
PUAOPE015A	Conduct briefings and debriefings
Code	**Elective Units**
Group A	
PUATEA003B	Lead, manage and develop teams
BSBWOR402A	Promote team effectiveness
Code	**Elective Units**
Group B	
PUAAMS007B	Coordinate search and rescue operations
PUACOM002B	Provide services to clients
PUACOM008B	Develop and organise public safety awareness programs
PUACOM012B	Liaise with media at a local level

© Commonwealth of Australia, 2025 Public Skills Australia

PUACOM013B	Administer a local public safety group
PUAEMR008B	Contribute to an emergency risk management process
PUAEMR026	Treat operational risk
PUAEMR029	Plan and implement a treatment measure
PUAEMR030	Manage and evaluate emergency management exercises
PUAEMR031	Design emergency management exercises
PUALAW001B	Protect and preserve incident scene
PUALAW002B	Conduct initial investigation at incident scene
PUALAW003B	Give evidence in a judicial or quasi-judicial setting
PUAMAN007B	Manage financial resources
PUAMAN008B	Manage physical resources
PUAPRO001B	Promote a learning environment in the workplace
PUASES010A	Plan, activate and maintain a communications network ∟ PUAOPE013A Operate communications systems and equipment
PUASES012A	Work as a team member in an emergency operations centre
PUAVEH001B	Drive vehicles under operational conditions
TAEDEL301A	Provide work skill instruction
For the purposes of gaining a qualification the following three units count as one unit*:	
TAEASS401B *	Plan assessment activities and processes
TAEASS301B *	Contribute to assessment
OR	
TAEASS402B *	Assess competence
TAEASS403B *	Participate in assessment validation

NOTE

BSB unit has been imported from the BSB07 Business Services Training Package.

TAE units have been imported from the TAE10 Training and Education Training Package.

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA41112 Certificate IV in Public Safety (Community Safety) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement
Communication	• answer general enquiries • listen to questions • make presentations at community group gatherings, special

© Commonwealth of Australia, 2025 Public Skills Australia

	interest forums, other organisation forums, community events and festivals • participate in conferences • provide advice on prevention and mitigation techniques in a way that acknowledges community concerns • provide information in a format suitable for analysis, interpretation and dissemination
Teamwork	• collect information that is timely and relevant to the needs of individuals/teams • determine the information needs of individuals/teams and identify the sources • develop networks and relationships • gather information which is disseminated to appropriate personnel within the specified timeframe • liaise effectively • participate in regular meetings and forums • support mutual cooperation • suggest and debate practical consultation and decision making strategies
Problem solving	• analyse, which may include problem solving • assess credibility, accuracy and currency of available risk information • identify sources of useful, credible information through stakeholders, community networks and interested parties • review information held by the organisation to determine suitability and accessibility • seek additional information from specialists, organisations and other stakeholders regarding information gaps and conflicting data or views
Initiative and enterprise	• analyse documented risk assessments • analyse family and historical records • analyse, which may include critical analysis • prepare plans to obtain information which is not available or accessible within the organisation • report the results of information gathering, analysis and synthesis so they can be input to policy development and organisation decision making • source information, which may include community information, credible individuals, group and community leaders
Planning and organising	• develop risk statements jointly by considering sources of risk, elements at risk and community/environmental vulnerability • develop with others, a draft project plan that is jointly refined and finalised prior to communication with stakeholders • identify organisational resources that can be provided to support

© Commonwealth of Australia, 2025 Public Skills Australia

	the emergency risk management process
Self-management	• collect information that is timely and relevant to the needs of individuals/teams • demonstrate commitment by sharing knowledge and expertise, completing allocated tasks on time and encouraging others to help achieve common goals • place overall community safety outcomes above personal or organisational/constituency interests • provide input to help assess the effectiveness of existing treatment strategies • report information gathering, analysis and synthesis within specified timeframes and to the standard defined by the organisation
Learning	• learn about active listening • learn about reporting procedures of the organisation • learn about the promotion of two-way communication with organisation/constituency
Technology	• locate and interpret community information • know risks, which may include technology/technical issues • make technology available in the work area/organisation to manage information • use information systems, which may include computers; communication channels; records management; market trends, registries and file records, basic statistical information • use management information systems to store and retrieve data for decision making

Packaging Rules

12 units of competency are required for this qualification including:

- 4 core units
- 8 elective units

Choose a minimum of 3 elective units from the Group A list below.

Choose a minimum of 3 elective units from the Group A and B elective lists below.

Choose the remaining 2 elective units from elsewhere in this training package or another endorsed training package or accredited course.

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA42912 Certificate IV in Public Safety (Biosecurity Response Leadership) have been reproduced in the table below.

© Commonwealth of Australia, 2025 Public Skills Australia

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skills	**Employability Skills Statements**
Communication	• advise and involve the community in public safety activities, presentations at community group gatherings, special interest forums, other organisation forums, community events and festivals • participate in conferences • represent the organisation's position on particular issues in a way which acknowledges community concerns and promotes community awareness • write reports
Teamwork	• allocate resources, which may include considering urgency, cost effectiveness, accessibility, maintenance demands, availability and deployment time • collect timely information that is relevant to the needs of individuals/teams • determine the information needs of individuals/teams and identify the sources • gather and disseminate information to appropriate personnel within the specified timeframe
Problem solving	• allocate resources to facilitate required outcomes • analyse feedback and cooperation with community groups • analyse, which may include problem solving • brief and debrief content and format, which may include problem based approaches • provide advice that takes into account type of risk, locality, and protection of life, property and the environment • review activity against the policies, practices and training of the organisation to identify any discrepancies • review information held by the organisation to determine suitability and accessibility
Initiative and enterprise	• identify and act upon briefing and debriefing follow-up actions in a timely manner • prepare plans to obtain information which is not available or accessible within the organisation • report the results of information gathering, analysis and synthesis so they can be input to policy development and organisation's decision

© Commonwealth of Australia, 2025 Public Skills Australia

	making • select an appropriate location for the brief/debrief
Planning and organisation	• conduct inspections to provide for relevant information for pre-incident planning • evaluate resource usage against targets and organisational standards • gather, analyse, synthesise and report information within specified timeframes and to the standard defined by the organisation • monitor resource usage • plan and prepare a briefing/debriefing in accordance with organisation's policy and procedures • report the results of information gathering, analysis and synthesis so they can be input to policy development and organisation's decision making • store equipment stock and supplies in accordance with organisation's policy and procedures
Self-management	• analyse needs • manage and store equipment stock and supplies in accordance with organisation's policy and procedures • provide leadership to individuals and teams • voice personal view to the review process
Leadership	• learn about legislative requirements relevant to emergency management • learn about organisation's policies • learn about organisation's procedures for activity debriefing • learn about practices and training processes in relation to activity • learn about reporting procedures of the organisation • learn about techniques for the prioritisation and evaluation of public safety risk management systems • maintain records of resource allocation and usage in accordance with relevant legislation and organisational guidelines • support and participate in development activities
Technology	• ensure that computer-based tools are used to produce resource reports • use basic statistical information • use communication channels • use information technology effectively • use management information systems that may include computers • use management information systems to store and retrieve data for decision making • use market trends • use records management systems, registries and file records

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Policing qualifications have been developed to set agreed minimum standards for police personnel that should be contextualised within the specifics of each Police jurisdiction/ agency/organisational policy and procedure.

A recruit will join a Police agency, generally become a Police Officer and subsequently move into a specialist role (such as a supervisor, detective, dog handler, scientific officer etc.).

Therefore, the recruit will be equipped vocationally with generic Police competencies, and often move into a supervising, managing, leading role or into a technical specialist role.

Pathways for candidates considering this qualification may include:

- an interest in search and rescue
- completion of police jurisdictional specific training
- achievement of the PUA50212 Diploma of Public Safety (Policing)
- entry points that demonstrate potential to undertake vocational education and training at this qualification level, including vocational experience within a range of environments such policing, search and rescue and other relevant environments or relevant work experience in such environments.

Pathways from the qualification

© Commonwealth of Australia, 2025 Public Skills Australia

After achieving the PUA50112 Diploma of Public Safety (Police Search & Rescue – Coordination), candidates may undertake a range of qualifications relevant to their role, either to enhance technical expertise in a specialist area or to move into a supervising or managing role. Pathways for candidates considering this qualification may include to:

- commence the PUA60212 Advanced Diploma of Public Safety (Police Search and Rescue – Management).

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA50112 Diploma of Public Safety (Police Search & Rescue – Coordination) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	**Employability Skills Statement**
Communication	▸ communicate clearly in a group setting ▸ communicate establishment of the facility to participating and relevant personnel/authorities ▸ maintain incident records in accordance with organisational guidelines
Teamwork	▸ acknowledge contributions of personnel in a positive way ▸ provide feedback and encourage contributions from group members ▸ respond to the concerns of individuals and work teams
Problem solving	▸ address concerns held by other agencies positively, honestly and respectfully ▸ deal with and resolve promptly or refer to the appropriate

© Commonwealth of Australia, 2025 Public Skills Australia

	personnel for resolution, issues raised through consultations ▸ use tools and techniques to solve problems
Initiative and enterprise	▸ counsel and mentor colleagues ▸ monitor work environment to ensure it is maintained in line with organisational standards ▸ seek input from others in developing new ideas
Planning and organising	▸ develop an Incident Action Plan ▸ prepare briefing and/or debriefing plans ▸ use media plan to form the media strategy
Self-management	▸ monitor work performance, formally and informally ▸ overtly display professionalism in all day-to-day work activities ▸ retain professionalism under duress
Learning	▸ assess training needs ▸ develop, agree and implement, an action plan to meet individual and team training and development needs ▸ provide on-the-job training to the required organisational standard and to meet team needs
Technology	▸ account for physical resources, which may include technology devices ▸ be aware of equipment characteristics and communication modes when establishing control facility ▸ establish communications systems and procedures to facilitate the functions of control

Packaging Rules

8 units of competency are required for this qualification including:

- 7 core units
- 1 elective unit

Choose the elective unit from either the elective list below or elsewhere within this training package, or another endorsed training package, or accredited course.

Elective unit selected from outside this qualification must be from an equivalent qualification level or higher.

© Commonwealth of Australia, 2025 Public Skills Australia

Elective units selected must not duplicate content already covered by other units in this qualification.

Code	Core Units
PUAAMS006B	Coordinate search and rescue resources
PUAAMS007B	Coordinate search and rescue operations
PUAOPE006A	Control multi-agency emergency situations
PUAOPE015A	Conduct briefings and debriefings
PUAPOLMG004A	Manage media requirements
PUAPOLGD013A	Develop productive working relationships
PUATEA003B	Lead, manage and develop teams
Code	**Elective Units**
PUAOPE009C	Navigate in an aquatic environment
PUAOPE014A	Navigate to an incident

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Policing qualifications have been developed to set agreed minimum standards for police personnel that should be contextualised within the specifics of each Police jurisdiction/ agency/organisational policy and procedure.

A recruit will join a Police agency, generally become a Police Officer and subsequently move into a specialist role (such as a supervisor, detective, dog handler, scientific officer etc.).

Therefore, the recruit will be equipped vocationally with generic Police competencies, and often move into a supervising, managing, leading role or into a technical specialist role. This qualification engages the candidate who accesses policing for the first time or has limited experience and /or knowledge of policing environments. The qualification will generally be accessed by candidates from varied contexts such as school leavers, candidates who have completed other qualifications and candidates who have experience in other industries and/or completed qualifications in other disciplines.

Pathways for candidates considering this qualification may include:

- achievement of other Public Safety Training Package qualifications at Certificate IV level
- completion of police jurisdictional specific training
- entry points that demonstrate potential to undertake vocational education and training at this qualification level, such as vocational experience in a range of environments at the level supporting this qualification.

Pathways from the qualification

© Commonwealth of Australia, 2025 Public Skills Australia

After achieving the PUA50212 Diploma of Public Safety (Policing), candidates may undertake a range of qualifications relevant to their role. Pathways for candidates considering this qualification may include to:

- commence the PUA61812 Advanced Diploma of Public Safety (Police Supervision)
- undertake specific technical specialist qualifications.

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA50212 Diploma of Public Safety (Policing) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	Employability Skills Statement
Communication	▸ communicate effectively with a wide range of community members such as those with physical/sensory/intellectual impairment and with different cultural backgrounds ▸ communicate in writing (prepare briefs of evidence, exhibit register) ▸ prepare and compile statements
Teamwork	▸ promote the organisation in the community ▸ seek out and respond effectively to feedback related to personal performance ▸ work in a team
Problem solving	▸ make decisions and solve problems ▸ negotiate/resolve/mediate conflict (negotiation can take place with supervisors, colleagues and members of the public) ▸ recognise and accurately assess, situational risks/hazards

© Commonwealth of Australia, 2025 Public Skills Australia

Initiative and enterprise	▸ de-escalate incidents ▸ maintain an acceptable demeanour (in relation to issues such as appearance, confidence, deportment, dress standard) ▸ minimise workplace risks to self, colleagues and the public
Planning and organising	▸ analyse and plan appropriate action ▸ command, control, coordinate initial emergency responses at an incident scene ▸ organise and manage time effectively
Self-management	▸ act autonomously ▸ maintain consistently high levels of professional ethics and integrity in all work practices and dealings with the community ▸ recognise, accurately assess and acknowledge personal strengths and weaknesses
Learning	▸ learn about jurisdictional laws, policy and procedures ▸ learn organisational Codes of Ethics ▸ plan and implement personal improvement plans
Technology	▸ maintain a professional safety first attitude to the use of police equipment ▸ operate interviewing recording equipment ▸ safely operate and use general issue and emergency operational equipment and safety clothing

Packaging Rules

13 units of competency are required for this qualification including:

- 12 core units
- 1 elective unit

Choose the elective unit from either the elective list below, **or** elsewhere within this training package, **or** another endorsed training package, **or** accredited course.

Elective unit selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Policing qualifications have been developed to set agreed minimum standards for police personnel that should be contextualised within the specifics of each Police jurisdiction/ agency/organisational policy and procedure.

A recruit will join a Police agency, generally become a Police Officer and subsequently move into a specialist role (such as a supervisor, detective, dog handler, scientific officer etc.).

Therefore, the recruit will be equipped vocationally with generic Police competencies, and often move into a supervising, managing, leading role or into a technical specialist role.

Civilian employees are usually employed within an agency to perform a specific role but can then move laterally or vertically. Therefore, civilians would be given the opportunity to demonstrate previous experience or present relevant qualifications.

Pathways for candidates considering this qualification may include:

- achievement of the PUA50212 Diploma of Public Safety (Policing)
- completion of police jurisdictional specific training
- achievement of partial or full, higher and vocational qualifications relevant to forensic investigation
- entry points that demonstrate potential to undertake vocational education and training at this qualification level, such as vocational experience within a range of environments such as policing, forensic and other relevant environments or relevant work experience in such environments.

Pathways from the qualification

© Commonwealth of Australia, 2025 Public Skills Australia

After achieving the PUA50312 Diploma of Public Safety (Forensic Investigation), candidates may undertake a range of qualifications relevant to their role, either to contribute to further technical expertise in a specialist area or to move to a supervising or managing role. Pathways for candidates considering this qualification may include to:

- commence the PUA60312 Advanced Diploma of Public Safety (Forensic Investigation)

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA50312 Diploma of Public Safety (Forensic Investigation) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	Employability Skills Statement
Communication	▸ communicate in writing (clearly and unambiguously) ▸ communicate orally (listen, establish rapport, negotiate, resolve conflict) ▸ record physical evidence prior to examination to ensure continuity and accuracy
Teamwork	▸ discuss and document logistics of the examination with other forensic practitioners as required ▸ effectively communicate safety issues/concerns to colleagues, supervisors and when necessary other emergency service workers and the public ▸ work effectively with a range of practitioners
Problem solving	▸ analyse, make decisions and solve problems in responding to a range of physical evidence contexts including the systematic examination of items of physical evidence

© Commonwealth of Australia, 2025 Public Skills Australia

	▸ implement corrective action to address non-conformance ▸ minimise workplace risks to self, colleagues and the public
Initiative and enterprise	▸ assess need for specialist and/or external agency assistance and request where necessary ▸ identify and report non-conformance of laboratory practice in accordance with quality system requirements ▸ identify system improvements and deficiencies and convey to management
Planning and organising	▸ analyse task requirements and implement strategies to successfully examine and record forensic evidence ▸ organise work effectively ▸ plan, implement and where necessary adapt workplace safety responses to situational contexts
Self-management	▸ confirm arrangements, role and involvement in proceedings ▸ evaluate involvement in the judicial proceedings to inform future practice ▸ follow instructions and directions
Learning	▸ learn about general duty of care responsibilities ▸ learn about organisational policy and procedures covering safety issues/practices ▸ learn about legislative and procedural requirements for the security, protection and preservation of evidence
Technology	▸ accurately use recording equipment and processes to produce evidence that is acceptable in courts ▸ take forensic photographs ▸ use discipline specific laboratory equipment, such as fingerprinting equipment, computer software, photographic equipment

Packaging Rules

9 units of competency are required for this qualification:

- 9 core units

Code	Core Units
PUAPOLFC002B	Maintain a safe forensic working environment
PUAPOLFC003B	Detect, record and collect physical evidence
PUAPOLFC004B	Evaluate and document cases and facilitate analyses

Packaging Rules

12 units of competency are required for this qualification including:

- 8 core units
- 4 elective units

Choose a minimum of 2 elective units from the list below.

Choose the remaining 2 elective units from either the list below, **or** from elsewhere within this training package, **or** another endorsed training package, **or** accredited course.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where a pre-requisite unit is attached to a unit it is identified by this symbol ∟.

The pre-requisite units attached to any of the units must be undertaken and are additional to the number of units required for the qualification.

Code	Core Units
PUACOM004B	Manage organisational communication strategies
PUACOM007B	Liaise with other organisations
PUACOM012B	Liaise with media at a local level
PUACOM013B	Administer a local public safety group
PUAEMR022	Establish context for emergency risk assessment
PUAMAN003B	Manage human resources
PUAOHS003B	Implement and monitor the organisation’s occupational health and safety policies, procedures and programs
PUASES011A	Manage emergency operations
Code	**Elective Units**
PUAAMS008B	Manage search and rescue operations

© Commonwealth of Australia, 2025 Public Skills Australia

PUACOM009B	Manage media requirements at major incident
PUACOM011B	Develop community awareness network
PUAEMR023	Assess emergency risk
PUAEMR025	Manage risk treatment implementation
PUAEMR030	Manage and evaluate emergency management exercises
PUAEMR031	Design emergency management exercises
PUALAW002B	Conduct initial investigation at incident scene
PUALAW003B	Give evidence in a judicial or quasi-judicial setting
PUAMAN005B	Manage projects
PUAMAN006B	Manage and facilitate change
PUAOPE012A	Control a Level 1 incident
PUAOPE016A	Manage a multi-team sector
PUAOPE017A	Coordinate resources for a multi-agency incident
PUAOPE019A	Control a Level 3 incident
PUAPRO001B	Promote a learning environment in the workplace
TAEDEL301A	Provide work skill instruction
TAEDEL401A	Plan, organise and deliver group-based learning
OR	
TAEDEL403A	Coordinate and facilitate distance based learning
TAEDES401A	Design and develop learning programs
TAETAS401A	Maintain training and assessment information

For the purposes of gaining a qualification the following units count as one unit*:

TAEASS401B *	Plan assessment activities and processes
TAEASS301B *	Contribute to assessment
OR	
TAEASS402B *	Assess competence
TAEASS403B *	Participate in assessment validation

NOTES

TAE units have been imported from the TAE10 Training and Education Training Package.

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA50912 Diploma of Public Safety (Search and Rescue - Coordination) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement

© Commonwealth of Australia, 2025 Public Skills Australia

Communication	• apply skills to collect and analyse information, and to effectively communicate and consult with a range of individuals by a range of means • communicate search and rescue procedures and policies to interested and affected persons, groups and organisations in accordance with the needs of those people • document and communicate levels of risk in accordance with organisational policies and procedures • negotiate • use verbal and non verbal skills
Teamwork	• access resources, which may include human resources - personnel within own work area and other areas and personnel from outside statutory bodies/agencies • have knowledge of coaching and team building concepts • have the skills to cooperate as part of a team with minimum supervision • know about each person's role within the Rescue Coordination Centre (RCC) • prepare plans to obtain information which is not available or accessible within the organisation
Problem solving	• assess the capabilities and limitations of assets and continually review resources • consider support requirements, which may include revising make-up of shifts • estimate potential consequence of a risk and the likelihood of that consequence • identify sources of risk from the perspective of all stakeholders • interpret cartographic information, navigation techniques and local and environmental conditions to determine and plan a safe and timely route • review resource needs based on intelligence
Initiative and enterprise	• apply skills that use initiative to achieve goals • determine the availability of required resources using intelligence gathering methods • develop a compromised search area to suit available assets • modify route to address prevailing conditions and, if required, initiate alternate strategies • plan with contingency in accordance with organisational policies and procedures • prepare plans to obtain information which is not available or accessible within the organisation • review resource needs based on intelligence
Planning and	• apply datum search planning principles including calculating a search area consistent with organisational policies and

© Commonwealth of Australia, 2025 Public Skills Australia

organising	procedures; determining search pattern and tracking spacing consistent with organisational policies and procedures; and calculating probability of detection factor consistent with organisational policies and procedures • clearly define the aims, objectives, scope and boundaries of the risk assessment in accordance with organisational policies and procedures • prioritise tasks to determine resource requirements in accordance with the rescue plan • use strategies for obtaining the required resources as determined by the necessities of the search and rescue activity in accordance with organisational policies and procedures
Self-management	• collect information that is timely and relevant to the needs of individuals/teams • make notes of observations • understand coronial requirements in relation to search and rescue • understand hypothermia/hyperthermia factors • understand risk management principles
Learning	• learn about organisational policies and procedures • learn about reference publications/material/documents, which may include IMO Manual; ICAO Manual; NATSAR Manual; MERSAR Manual • learn to collect and analyse information • read and understand the organisation's plans, policies and procedures • understand the personal development plan
Technology	• calculate to establish intended track/area/position in accordance with planned route • maintain databases by updating details on a regular basis as determined by local policies and procedures • manage information with the technology available in the work area/organisation • record in databases • represent mathematical ideas in appropriate format • use databases for contact names; telephone numbers; addresses (where appropriate); aircraft/vessel details; aircraft/vessel requirements • use navigational equipment that includes computers

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA51012 Diploma of Public Safety (Community Safety) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement
Communication	• document broad tactics, roles, tasks, responsibilities, resource implications and timeframe for implementing the selected

© Commonwealth of Australia, 2025 Public Skills Australia

	strategy • document strategies according to organisational requirements • identify, through research and stakeholder consultation, existing prevention, preparedness, response and recovery strategies • inform stakeholders of progress • negotiate accountability for components of the strategy • maintain accurate records of meetings and communications with stakeholders and project team members • maintain effective communication between working group members
Teamwork	• allocate team roles and responsibilities • apply knowledge of team work principles and strategies • confirm communication and reporting procedures • harness cooperation, motivation and diversity of others • identify treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members • prepare for, participate in and lead meetings to achieve effective outcomes
Problem solving	• adjust implementation action plans following the review process if required • apply knowledge of problem solving and decision making techniques • apply knowledge of risk analysis and management • apply problem solving and decision making techniques • evaluate strategies and limitations and impacts identified and communicated to stakeholders • identify implementation issues and contingencies developed where necessary • identify potential hazards and their consequences • identify problems likely to preclude the implementation of strategies • review planning processes to identify opportunities for improvements
Initiative and enterprise	• identify existing prevention, preparedness, response and recovery strategies through research and stakeholder consultation • use knowledge of techniques for the prioritisation and evaluation of public safety risk management systems • use skills to define and anticipate implementation barriers • use knowledge of the planning process and the kinds of outcomes and benefits for communities
Planning and	• assess and establish performance criteria for the effectiveness of

© Commonwealth of Australia, 2025 Public Skills Australia

organising	treatment implementation • complete treatment activities efficiently • develop consultation strategies • develop effective processes for cooperative planning • develop feasible and effective plans, tactics and activities to achieve treatment objectives • develop information management, reporting and accountability strategies • identify a range of potential prevention, preparedness, response and recovery strategies through researching current best practice, alternative options, and seeking expert opinion • identify characteristics of the risk
Self-management	• establish a project and see it through • obtain commitment and agreement on reviewed strategies as negotiated with stakeholders • use knowledge of culture, diversity and history of communities, environments and associated concerns, issues and sensitivities, perception of risks • use knowledge of current principles and practices to conduct activities which exercise elements of public safety management • use knowledge of organisation's approval procedures • use knowledge of risk management and models • use skills to summarise and explain key information clearly
Learning	• learn about benchmarking best practices in the implementation and review of management processes • learn about emergency risk management terminology; risk; prevention, preparedness, response and recovery concepts and principles; mitigation; organisational requirements for the submission and approval of treatment plans; and reporting of treatment outcomes • learn about legislative and regulatory requirements relevant to emergency management • learn about planning theory and processes • learn about potential hazards and their consequences
Technology	• communicate using information technology, which may include meetings, letters, facsimile, electronic transmission of information • select technologies and processes which most effectively communicate the information • use information technologies, which may include computerised simulations • use resources, which may include project planning software

Packaging Rules

10 units of competency are required for this qualification including:

- 6 core units
- 4 elective units

Choose a minimum of 2 elective units from the list below.

Choose the remaining 2 elective units from either the list below, **or** elsewhere within this training package, **or** another endorsed training package, **or** any accredited course.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Code	Core Units
PUACOM007B	Liaise with other organisations
PUAEMR008B	Contribute to an emergency risk management process
PUAEMR018A	Work in an emergency management context
PUAEMR031	Design emergency management exercises
PUAMAN001B	Manage the organisation's public safety responsibilities
PUAMAN005B	Manage projects
Elective Units	
PUAEMR014A	Deliver recovery services
PUAEMR015A	Establish and manage a recovery centre
PUAEMR016A	Facilitate community involvement in recovery
PUAEMR017A	Manage recovery functions and services
PUAEMR021A	Facilitate emergency planning processes
PUAMAN003B	Manage human resources
PUAMAN007B	Manage financial resources
PUAMAN008B	Manage physical resources
PUAOPE016A	Manage a multi-team sector

© Commonwealth of Australia, 2025 Public Skills Australia

PUAOPE017A	Coordinate resources for a multi-agency incident
PUAOPE019A	Control a Level 3 incident
PUAOPE024A	Manage operations for a Level 3 incident
BSBCON401A	Work effectively in a business continuity context
BSBCON601A	Develop and maintain business continuity plans

NOTE

BSB units have been imported from the BSB07 Business Services Training Package.

Pathways Information

Pathways into the qualification

In the public safety industry, qualification pathways depend on a range of factors specific to each industry such as organisational/agency structure, promotional structure and rank structure.

Policing qualifications have been developed to set agreed minimum standards for police personnel that should be contextualised within the specifics of each Police jurisdiction/ agency/organisational policy and procedure.

A recruit will join a Police agency, generally become a Police Officer and subsequently move into a specialist role (such as a supervisor, detective, dog handler, scientific officer etc.).

Therefore, the recruit will be equipped vocationally with generic Police competencies and often move into a supervising, managing, leading role or into a technical specialist role.

Pathways for candidates considering this qualification may include:

- achievement of the PUA50112 Diploma of Public Safety (Police Search and Rescue Coordination)
- completion of police jurisdictional specific training
- entry points demonstrating potential to undertake vocational education and training at this qualification level, including vocational experience within a range of environments such policing, search and rescue and other relevant environments or relevant work experience in such environments.

Pathways from the qualification

© Commonwealth of Australia, 2025 Public Skills Australia

After achieving the PUA60212 Advanced Diploma of Public Safety (Police Search & Rescue – Management) candidates may undertake a range of qualifications relevant to their role, either to enhance technical expertise in a specialist area or to move into a supervising or managing role.

Pathways for candidates considering this qualification may include to undertake:

- other qualifications in the Public Safety Training Package
- policing management qualifications
- national search and rescue programs.

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA60212 Advanced Diploma of Public Safety (Police Search & Rescue – Management) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Public Safety qualifications have core units (which must be achieved) and elective units (where there is a choice of units which must be achieved) so different Employability Skills Summaries are possible within the one qualification, depending on the package of core units and chosen elective units.

Employability Skill	**Employability Skills Statement**
Communication	▸ communicate in a group setting ▸ communicate effectively with colleagues and stakeholders ▸ provide feedback to team members to encourage, value and reward individual and team efforts and contributions
Teamwork	▸ consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives ▸ encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes

© Commonwealth of Australia, 2025 Public Skills Australia

	▸ explain team goals, address team conflict and build an environment of trust
Problem solving	▸ communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders ▸ develop strategies to ensure team members have input into planning, decision making and operational aspects of work team ▸ use tools and techniques to solve problems
Initiative and enterprise	▸ identify and address information gaps to improve operational response ▸ provide advice ▸ report or deal with breaches and inconsistencies in applying guidelines as required by the organisation
Planning and organising	▸ develop performance plans to establish expected outcomes, outputs, key performance indicators and goals for work team ▸ implement coordination plans including predicting consequences and identifying improvements ▸ use navigation plans and navigation aids to maintain compliance with planned route
Self-management	▸ ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders ▸ manage own time ▸ mentor and coach team members
Learning	▸ implement adult learning principles ▸ learn about emergency management concepts and principles ▸ learn about jurisdictional laws
Technology	▸ access specialist information systems ▸ gather and check relevant navigational maps and navigation equipment ▸ use a range of information technology devices including computers

Packaging Rules

9 units of competency are required for this qualification including:

- 9 core units

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA60612 Advanced Diploma of Public Safety (Search and Rescue - Management) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement

© Commonwealth of Australia, 2025 Public Skills Australia

Communication	• ensure the content of a report is accurate and written in a concise and logical manner in accordance with organisational requirements • have knowledge of the communications systems available within the Rescue Coordination Centre (RCC) • identify communications systems as appropriate to the situation and strategy • manage control systems ensuring human, physical, fiscal and communication systems are identified, allocated and deployed in accordance with the control structure • manage records to ensure quality and attention to detail in accordance with policies and procedures • prepare briefings, which may include providing information to team members; members of the public; external search and rescue authorities; manager operations; Australian Maritime Safety Authority public relations personnel; media • provide briefings to the appropriate people in accordance with operational procedures • use effective communication and consultation with a range of individuals by a range of means including fax; write reports
Teamwork	• allocate tasks to team members commensurate with their roles in the team and level of competence • brief team members on their roles and responsibilities and of the way the team will operate • ensure that goals are unambiguous and take into account the capabilities of people and teams • inform team members of the scenario and strategy, determined from outcome of review of all information and resource requirements • receive feedback from team members and relay this to others in accordance with operational policies and procedures • understand occupational health and safety requirements • understand team members' capabilities • use knowledge of coaching and team building concepts • use problem solving skills for a defined range of problems
Problem solving	• analyse staffing levels which clearly demonstrate returns to the organisation • establish problem solving/issue resolution procedures within legislative requirements and organisation's guidelines • evaluate and review strategy as determined by the input of all information and review of available resources • monitor resources to determine changing requirements in accordance with operational procedures • use problem solving skills for a defined range of problems

© Commonwealth of Australia, 2025 Public Skills Australia

Initiative and enterprise	• create a workplace environment which facilitates training, education and development • develop contingency plans for staffing which meet key provisions of the human resources plan • provide guidance to and seek support from authorities and agencies in accordance with requirement • recognise and encourage initiative and innovation
Planning and organising	• compare calculated level of risk to the established risk evaluation criteria and as determined to be acceptable or unacceptable in consultation with the supervisor • compare existing competencies of staff with the needs of the work group • determine and review human resource needs within the anticipated operational needs and allocated budget • develop search and rescue strategy based on all information available • ensure that the total performance development system identifies and proposes strategies to rectify performance shortfalls and recognise success • establish control in accordance with designated responsibility/authority • identify required resources in accordance with the strategy based on all available information • identify search and rescue parameters based on information available
Self-management	• apply knowledge of current principles and practices to conduct an activity which exercises elements of public safety management • apply knowledge and understanding of occupational health and safety requirements • demonstrate consistency between instructions and action in self and others • develop search and rescue strategies based on information available • display personal and professional integrity in working relationships • follow instructions/directives and reporting information • voice personal view to the review process
Learning	• contribute effectively with coaching and mentoring to the training, education and development of personnel in an environment of change • learn about the communications systems available within the Rescue Coordination Centre (RCC) • learn about the technical maintenance state of search and rescue

© Commonwealth of Australia, 2025 Public Skills Australia

	resources • learn about training and education principles; training need analysis; training, education and development plans as included as part of individual/team performance plans • participate in individual/team training, education and development opportunities
Technology	• designate appropriate modes and channels of communication, radio communications, data transfer, telecommunications • operate databases • use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems etc. • use communication systems, which may involve designation of appropriate modes and channels of communication • use specialist search and rescue information systems, which may include communications systems; COSPAS-SARSAT and similar satellite systems; the Australian Ship Reporting System (AUSREP); the Great Barrier Reef Reporting (REEFREP) and similar systems

Packaging Rules

12 units of competency are required for this qualification including:

- 6 core units
- 6 elective units

Choose a minimum of 4 elective units from the Group A and/or B lists below.

Choose the remaining 2 units from either the Group A and/or B lists below, or elsewhere within this training package, or another endorsed training package, or accredited course.

Only 1 elective unit may be chosen from the Group A elective list.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

© Commonwealth of Australia, 2025 Public Skills Australia

Code	Core Units
PUAAMS008B	Manage search and rescue operations
PUAEMR026	Treat operational risk
PUAMAN003B	Manage human resources
PUAOPE006B	Control multi-agency emergency situations
PUAPOL033B	Manage intelligence information processes
PUATEA003B	Lead, manage and develop teams
Code	**Elective Units**
Group A	
PUAOPE014A	Navigate to an incident
TDMMH807B	Plan and navigate an offshore passage within the limits of responsibility of a Master 5
LGAPLEM404A	Prepare and present geographic information systems data
Code	**Elective Units**
Group B	
PUACOM009B	Manage media requirements at major incident
PUACOM012B	Liaise with media at a local level
PUAEMR030	Manage and evaluate emergency management exercises
PUAEMR031	Design emergency management exercises
PUALAW004B	Represent the organisation in a judicial or quasi-judicial setting
PUAMAN001B	Manage the organisation’s public safety responsibilities
PUAMAN006B	Manage and facilitate change
PUAOHS003B	Implement and monitor the organisation’s occupational health and safety policies and programs
PUAOPE016A	Manage a multi-team sector
PUAOPE007B	Command agency personnel within a multi-agency emergency response
PUAOPE015A	Conduct briefings and debriefings
PUAPOLMG007A	Contribute to policy formulation and revision
BSBMGT401A	Show leadership in the workplace

Employability Skills Summary

Employability Skills are part of a unit of competency.

Employability Skills statements from a selection of units of competency from the PUA60712 Advanced Diploma of Public Safety (Community Safety) have been reproduced in the table below.

This table provides an example of Employability Skills for the qualification because Employability Skills within a qualification will vary depending on the qualification packaging options.

Employability Skill	Employability Skills Statement
Communication	• demonstrate effective interpersonal interactions

© Commonwealth of Australia, 2025 Public Skills Australia

	• develop risk statements • explain emergency risk management concepts • inform the community in ways that suit their language, literacy and cultural needs • negotiate the means of implementing the emergency risk management process • undertake consultation at all stages of the process
Teamwork	• confirm, in the context of assessment, the ability to work cooperatively with others to develop emergency plans that have own organisation/constituency approval and broad community and stakeholder support • develop with others, frameworks for project planning, management and evaluation • maintain knowledge of group dynamics • monitor and enhance team work • use strategies for team building and resolving conflict
Problem solving	• apply decision making techniques • define and solve problems • evaluate strategies and limitations, and identify and communicate impacts to stakeholders • maintain knowledge of problems likely to preclude the implementation of strategies • maintain knowledge of potential hazards and their consequences • maintain knowledge of problem solving and decision making techniques • prioritise risks by considering vulnerability and priority for treatment
Initiative and enterprise	• apply knowledge of techniques for the prioritisation and evaluation of public safety risk management systems • apply skills that define and anticipate implementation barriers • determine vulnerability of communities and environments by analysing their susceptibility and resilience to risk • ensure that a project is broken down into a logical sequence of manageable and time related activities and identify the required resources • identify existing prevention, preparedness, response and recovery strategies through research and stakeholder consultation • investigate sponsorship/joint venture opportunities to maximise impact within budget
Planning and organising	• collect information on community characteristics, safety expectations, risk perceptions, and the roles and requirements of stakeholders • conduct a pilot program, where appropriate, to assess

© Commonwealth of Australia, 2025 Public Skills Australia

	effectiveness in achieving required outcomes and making changes as necessary • develop with stakeholders feasible consultation and project management strategies • develop a community profile • develop an agreed list of prioritised risks using an emergency risk management process • identify, define and engage community • produce resources to ensure that relevant materials are available in sufficient quantities to meet identified needs
Self-management	• apply decision making techniques • establish a project and see it through • maintain knowledge of culture, diversity and history of communities, environments and associated concerns, issues and sensitivities, perception of risks • maintain momentum and achieve project outcomes within available resources
Learning	• learn about emergency risk management terminology; risk; prevention, preparedness, response and recovery concepts and principles; mitigation; organisational requirements for the submission and approval of treatment plans; and reporting of treatment outcomes • learn about legislative and regulatory requirements relevant to emergency management • learn about potential hazards and their consequences • learn about research tools and demographic and economic analysis techniques • learn about the planning process and the kinds of outcomes and benefits for communities
Technology	• apply tools for assessing treatment options • consult and communicate via email messages, websites, surveys • develop and get agreement on information management, reporting and accountability strategies • use information technologies such as computerised simulations • use project planning software • use technology to develop educational support materials

Packaging Rules

12 units of competency are required for this qualification including:

- 3 core units

© Commonwealth of Australia, 2025 Public Skills Australia

- 9 elective units

Choose a minimum of 3 elective units from the Group A list below.

Choose a minimum of 4 units from the Group A and/or B lists below.

Choose the remaining 2 elective units from elsewhere within this training package, or another endorsed training package, or accredited course.

All elective units selected from outside this qualification must be from an equivalent qualification level or higher.

Elective units selected must not duplicate content already covered by other units in this qualification.

Code	**Core Units**
PUACOM004B	Manage organisational communication strategies
PUACOM008B	Develop and organise public safety awareness programs
PUAEMR009B	Facilitate emergency risk assessment
Code	**Elective Units**
Group A	
PUACOM007B	Liaise with other organisations
PUAEMR028	Develop emergency management plans
PUAEMR029	Plan and implement a treatment measure
OR	
PUAFIR509B	Implement prevention strategies
PUAEMR012B	Determine treatment options
PUAFIR602B	Manage the implementation of community safety strategies
PUAEMR030	Manage and evaluate emergency management exercises
PUAEMR031	Design emergency management exercises
PUAOHS004B	Establish and maintain the occupational health and safety system
PUAWER003B	Manage emergency procedures, equipment and other resources
PUAWER006B	Lead an emergency control organisation
PUAWER007B	Manage an emergency control organisation

© Commonwealth of Australia, 2025 Public Skills Australia

PUAWER010B	Lead an initial workplace emergency response team
PUAWER011B	Manage initial workplace emergency response teams

Code	**Elective Units**
Group B	
PUALAW004B	Represent the organisation in a judicial or quasi-judicial setting
PUAMAN001B	Manage the organisation's public safety responsibilities
PUAMAN003B	Manage human resources
PUAMAN005B	Manage projects
PUAMAN006B	Manage and facilitate change
PUAMAN007B	Manage financial resources
PUAMAN008B	Manage physical resources

PUASS00036 Incident Response Team Leader

Modification History

Not applicable.

Description

Not applicable.

Pathways Information

These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

PUAOPE012A	Control a Level 1 incident
PUAOPE015A	Conduct briefings and debriefings

Target Group

Those who are a team leader of an incident response team.

Suggested words for Statement of Attainment

These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a team leader within the SES.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

PUASS00037 Intermediate Tree Operations

Modification History

Not applicable.

Description

Not applicable.

Pathways Information

These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate III and above.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FPICOT2239A	Trim and cut felled trees
FPIFGM3204A	Fall trees manually (intermediate)
PUAEQU001B	Prepare, maintain and test response equipment
PUAOHS002B	Maintain safety at an incident scene

Target Group

Those who will be a member of a tree operations team.

Suggested words for Statement of Attainment

These units of competency from the PUA12 Public Safety Training Package and the FPI05 Forest and Forest Products Industry Training Package meet the industry requirements to commence working as a member of a tree operations team within the SES.

© Commonwealth of Australia, 2025 Public Skills Australia

PUASS00038 Land Search Team

Modification History

Not applicable.

Description

Not applicable.

Pathways Information

These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate II and above.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

PUALAW001B	Protect and preserve incident scene
PUAOHS002B	Maintain safety at an incident scene
PUASAR027A	Undertake land search rescue

Target Group

Those who will be a member of a land search team.

Suggested words for Statement of Attainment

These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to commence working as a land search team member within the SES.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

PUASS00041 Operational Leadership

Modification History

Not applicable.

Description

Not applicable.

Pathways Information

These units may contribute to a number of qualifications from the Public Safety Training Package including those at AQF Certificate IV and above.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

PUAEMR018A	Work in an emergency management context
PUAOPE016A	Manage a multi-team sector
PUASES011A	Manage emergency operations

Target Group

Those who wish to take on strategic operational leadership roles within the SES.

Suggested words for Statement of Attainment

These units of competency from the PUA12 Public Safety Training Package meet the industry requirements to work as a senior operational leader within the SES.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

PUASS00042 Operations Centre

Modification History

Not applicable.

Description

Not applicable.

Pathways Information

These units contribute to the PUA30512 Certificate III in Public Safety (SES Operations).

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICAICT103A	Use, communicate and search securely on the internet
ICAU2006B	Operate computing packages
PUAOPE013A	Operate communications systems and equipment
PUASES012A	Work as a team member in an emergency operations centre
TLIH2001A	Interpret road maps and navigate pre-determined routes

Target Group

Members of an operations centre team.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

These units from the PUA12 Public Safety Training Package, the ICA11 Information and Communications Training Package and the TLI10 Transport and Logistics Training Package meet the industry requirements to commence working as a member within a SES operations centre.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

PUASS00043 Police computer crime investigations

Modification History

First release.

Description

Not applicable.

Pathways Information

Not applicable.

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

PUACCI001B	Plan a computer related crime operation
PUACCI002B	Conduct a preliminary search for electronic data
PUACCI003B	Copy electronic data
PUACCI004B	Search electronic data
PUACCI005B	Investigate network offences
PUACCI006B	Build and maintain target computer networks
PUACCI007B	Present evidence of computer crime
PUACCI008B	Build and maintain computer crime networks
PUACOM001C	Communicate in the workplace
PUAOPE015A	Conduct briefings and debriefings
PUAPOLGD001A	Maintain police operational safety
PUAPOLGD011A	Manage personal and ethical performance
PUAPOLGD013A	Develop productive working relationships
PUATEA001B	Work in a team

© Commonwealth of Australia, 2025 Public Skills Australia

Target Group

Workers undertaking police computer crime investigation in line with agency protocols.

Suggested words for Statement of Attainment

These units from the PUA12 Public Safety Training Package meet the industry requirements to undertake police computer crime investigation.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

PUAAMS001B Work in an aviation environment

Modification History

PUAAMS001B Release 2: Content reviewed. Application added. Layout adjusted.

PUAAMS001B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to work effectively as a crew member.

Application of the Unit

This unit applies to members of Air Search and Rescue teams working in the air.

Team members and crews may be members of a range of government and/or non-government agencies.

All aspects of the unit should be implemented in line with organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work effectively as a member of a search and rescue crew	1.1 Crew functions and responsibilities are determined. 1.2 Contact/call-out arrangements and requirements are determined from ***organisational documents*** and personal employment requirements 1.3 ***Factors which impede*** or disqualify persons from performing safe and effective aircrew duties are determined. 1.4 Communication equipment, terminology and procedures are utilised to ensure safe and effective operations during flight. 1.5 In-flight performance is maintained.
2. Work safely in an aviation environment	2.1 ***Safety procedures*** for working in and around aircraft are followed. 2.2 Cabin/load security and ***dangerous goods*** requirements are determined and followed in consultation with the pilot-in-command. 2.3 Appropriate manual handling strategies are applied when loading the aircraft. 2.4 ***In-flight hazards*** are identified and risks managed.
3. Respond to aircraft emergency situations	3.1 Aircraft cabin, load and occupants are prepared for impact. 3.2 ***Firefighting equipment*** is used to protect occupants and the aircraft from fire. 3.3 ***Escape/evacuation plan*** is implemented as required. 3.4 ***Emergency and ongoing care*** is provided to injured occupants. 3.5 Survival plan is implemented.
4. Complete documentation	4.1 Manifests, load sheets and other ***pre-flight documents*** are completed. 4.2 In-flight operations log is completed. 4.3 Debriefing documents and other ***post flight reports*** are completed.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills:

The ability to:

- communicate information orally and in writing
- complete Search and Rescue documentation
- harnesses and emergency exits
- operate aircraft doors
- operate aircraft intercom systems
- operate aviation survival equipment
- operate firefighting equipment

Required Knowledge:

Evidence of:

- a knowledge of aircraft accidental hazards and response
- an understanding of airside safety and aircraft safety
- an understanding of appropriate air traffic control procedures and terminology
- an understanding of appropriate aviation meteorology
- an understanding of aviation technology and communication procedures
- an understanding of manual handling hazards and techniques
- an understanding of Search and Rescue functions and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Operate safely and effectively as a crew member in an aviation environment. **Consistency in performance** In order to assess these performance criteria it may be necessary for evidence to be collected over a period of time in a context of rescue operations.
Context of and specific resources for assessment	**Context of assessment** Evidence can be collected on the job but may be undertaken in a simulation. **Specific resources for assessment** An appropriate training location/venue and access to aircraft and survival equipment required for learning and assessment activities.

© Commonwealth of Australia, 2025 Public Skills Australia

Guidance information for assessment	Assessment with the following units would help meet aspects of holistic assessment: • PUAAMS002B Search as a member of an air search team • PUATEA001B Work in a team • PUATEA003B Lead, manage and develop teams • PUATEA004C Work effectively in a public safety organisation

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational documents may include:	• emergency service pilots and procedures • aircraft operator company operations manuals • and memoranda of understanding
Factors which may impede or exclude safe performance may include:	• physical condition • physiological condition • psychological condition • psychosocial condition • pathological condition • psychosocial condition
Safety procedures for working in and around aircraft may include:	• being familiar with aircraft • appreciation of aircraft capabilities • approaching rotary wing aircraft • terrain-related issues
Dangerous goods may include	• search and rescue related pyrotechnics • weapons and ammunition • petroleum fuels
In-flight hazards may include:	• opening doors/windows • moving around the aircraft • operating near open doors • loose articles in the cabin • dispatching items • operating electronic equipment
Firefighting equipment may include:	• dry chemical powder • vaporising liquid • carbon dioxide and foam extinguishers

© Commonwealth of Australia, 2025 Public Skills Australia

Emergency care includes:	• pre-hospital emergency care as described in workplace emergency care qualifications which meet State and Territory OH&S requirements
Survival equipment may include:	• inflatable life-jackets • inflatable life-rafts • survival kits • electronic location beacons
Pre/post-flight documentation may include:	• search briefing and debriefing forms • manifests • load sheets • flight logs • post flight reports

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

1 Prepare for search operations	1.1 Operational briefing is obtained from ***relevant search and rescue authority.***
	1.2 Aircraft is configured and loaded in accordance with requirements and pilot-in-command instructions.
	1.3 Involvement in briefings is undertaken.
	1.4 Incident information is used to determine personal equipment needed for search operation.
2 Conduct search operations	2.1 Scanning distance is identified and aircraft windows are marked.
	2.2 Search briefing is reviewed en route to task area.
	2.3 ***Impediments to effective observation techniques*** are identified and appropriate adjustments made.
	2.4 Observation technique is applied.
	2.5 ***Search equipment*** is operated to maximise sighting and identification effectiveness.
3 Investigate sightings	3.1 ***Sightings*** are reported and maintained.
	3.2 Sightings are investigated.
	3.3 Sightings are logged and communicated to the relevant search and rescue authority.
4 Communicate outcome search	4.1 ***Signals*** are identified.
	4.2 Communications are logged and communicated to the relevant search and rescue authority.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

The ability to:

- communicate information clearly within the search team
- make decisions based on available information
- select and use available technology appropriate to the search task

Required Knowledge

- basic understanding of search planning
- basic understanding of the physiology of sight
- understanding of factors which may indicate evidence of a search target

© Commonwealth of Australia, 2025 Public Skills Australia

- understanding of observation techniques and procedures
- understanding of signalling/message equipment and procedures
- understanding of target marking equipment and procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Knowledge and skill in the safe dispatch of target marking and communications equipment from aircraft in flight. **Consistency in performance** In order to assess these performance criteria it may be necessary for evidence to be collected over a period of time.
Context of and specific resources for assessment	**Context of assessment** Evidence can be collected on the job but may be undertaken in a simulation. **Specific resources for assessment** An appropriate training location/venue. Access to aircraft and equipment required for learning and assessment activities. Flight operations for learning/skills development and assessment.
Guidance information for assessment	Assessment with the following units would help meet aspects of holistic assessment: • PUAAMS001B Work in an aviation environment • PUAEME001B Provide emergency care • PUATEA001B Work in a team • PUATE003B Lead, manage and develop teams • PUATEA004C Work effectively in a public safety organisation

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Relevant search and rescue authorities may include:	• rescue coordination centre • state and territory SAR authority • pilot-in-command
Impediments to effective observation techniques may include:	• aircraft structure • glare • dirty or damaged windows • weather • environmental conditions • aircraft flight angle
Search equipment may include:	• binoculars and other magnification equipment • radar • infra-red • radio direction finding equipment • video/camera equipment • night vision equipment
Sightings may include:	• debris • damaged or discoloured vegetation • oil slicks • reflections • lights • smoke • burned areas • unusual colours, shapes or movements in the environment floating objects
Signals may include:	• ground to air emergency signal code • international code of signals • signal panels • Morse code • improvised signals

Unit Sector(s)

Aviation marine search and rescue.

PUAAMS003B Conduct stores dropping operations

Modification History

PUAAMS003B Release 2: Layout adjusted. Application added. Content reviewed.

PUAAMS003B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to prepare for and carrying out stores dropping operations in a search and rescue context. It does not cover the competency to control and position the aircraft for dropping operations.

Application of the Unit

This unit applies to members of Air Search and Rescue teams working in the air carrying out the dropmaster/loadmaster's role.

All aspects of the unit should be implemented in line with organisational policies and procedures.

Team members and crews may be members of a range of government and/or non-government agencies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Configure aircraft	1.1 Stores are prepared prior to loading on aircraft**.** 1.2 Search briefing is obtained from relevant Search and Rescue authority. 1.3 Aircraft is ***configured*** for drop operations in accordance with the applicable flight manual. 1.4 Protective surfaces are installed and protective tape applied. 1.5 ***Stores*** are checked and ***secured***. 1.6 Principles of internal loading of cargo are complied with when loading the aircraft.
2. Locate target	2.1 ***Distance estimation methods*** are employed to identify target position. 2.2 Initial target marking smoke is prepared and dispatched to mark target area. 2.3 Visual sighting of target is maintained during stores dropping.
3. Dispatch stores	3.1 Reference markers are dispatched under the pilot's directions. 3.2 Stores are dispatched under the pilot's directions. 3.3 Visual sighting of target is maintained during stores dropping.
4. Reconfigure aircraft	4.1 Equipment is removed and checked for serviceability. 4.2 Items of stores used are annotated on the incident form.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- check ancillary Search and Rescue equipment for serviceability

© Commonwealth of Australia, 2025 Public Skills Australia

- handle pyrotechnic devices in a safe manner
- operate safely around aircraft
- work in a crewed environment

Required Knowledge

- actions to be carried out in the event of in-flight emergencies
- arming procedures for pyrotechnic markers and general operation of electronic markers
- burning times of pyrotechnic markers
- frequencies of electronic markers
- general operation of light emitting markers
- inherent dangers of handling pyrotechnic devices
- maximum and minimum weight of a loaded helibox
- meaning of the hand signals relayed by other crew members during a stores dropping operation
- OH&S considerations as they pertain to operating within an aircraft during stores dropping operations
- principles of teamwork

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Stores are prepared and secured safely and dispatched under the pilot's directions. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence can be collected on the job but may be undertaken in a simulation. **Specific resources for assessment** On job assessment may entail additional costs.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Configured may include:	• removing doors

© Commonwealth of Australia, 2025 Public Skills Australia

- hatches
- furnishings
- fittings
- outfitting with specialist equipment
- crew equipment

Stores may include:

- safety knives
- timer
- dropmaster bag
- seeblitz (strobe marker) life-rafts
- heliboxes
- pyrotechnic and electronic reference markers
- stores delivery systems
- pumps
- storepedoes
- search and rescue datum buoy
- air droppable search and rescue radio

Secured may include:

- stowing stores
- using nets
- tie-down straps and static line cord

Distance estimation methods may include:

- using clock method

Unit Sector(s)

Aviation marine search and rescue.

PUAAMS006B Coordinate search and rescue resources

Modification History

PUAAMS006B Release 2: Layout adjusted. Application added. Content reviewed.

PUAAMS006B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to identify, procure and task human and physical resources for Search and Rescue.

Application of the Unit

The requirement to coordinate resources may be national, State and Territory and regional levels.

Team members and crews may be members of a range of government and/or non-government agencies.

All aspects of the unit should be implemented in line with organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

© Commonwealth of Australia, 2025 Public Skills Australia

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain required resources	1.1 Tasks are prioritised and analysed to determine resource requirements in accordance with the rescue plan. 1.2 The availability of required resources is determined using ***intelligence gathering methods.*** 1.3 ***Strategies for obtaining the required resources*** are identified as determined by the necessities of the search and rescue activity in accordance with ***organisational policies and procedures.***
2. Organise resources	2.1 ***Resources*** are assessed and allocated in accordance with their suitability for the task, equipment carried and availability consistent with organisational policies and procedures**.** 2.2 Resources are coordinated to ensure timely completion of tasks within ***physiological*** and ***environmental constraints.*** 2.3 Personnel are encouraged and motivated to complete tasks consistent with organisational policies and procedures. 2.4 Personnel needs are continually reviewed in accordance with organisational policies and procedures. 2.5 ***Support considerations*** for personnel are taken into account in accordance with organisational policies and procedures. 2.6 Resource needs are continually reviewed based on intelligence.
3. Liaise with supporting authorities	3.1 ***Contacts*** are identified in supporting authorities to facilitate liaison and cooperation. 3.2 Details of contacts and resources/services are recorded and maintained in accordance with organisational policies and procedures. 3.3 The role and support capabilities of other ***search and rescue authorities*** are determined through liaison, consultation and exchange of information in accordance with organisational policies and procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.4 Procedures for activation, deactivation and advising other search and rescue authorities and agencies are initiated in accordance with policies and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills:

- collect and analyse information
- access the various databases for contact names/numbers for resource allocation
- work as part of a team with minimum supervision
- communicate and consult with a range of individuals by a range of methods
- negotiation

Required Knowledge:

- types of assets that are suitable for situations including:
  - land search
  - maritime search
  - coastal search
- equipment range and performances of resources available for Search and Rescue
- policy relating to the secondment of Australian Defence Force assets for Search and Rescue
- each person’s role within the Rescue Coordination Centre (RCC)
  - understanding of organisational policies and procedures
  - understanding of personnel entitlements and administrative procedures
  - understanding of occupational health and safety requirements
  - understanding of technical maintenance state of Search and Rescue resources

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • Identify and obtain relevant resources • Allocate appropriate assets to suit the situation • Assess the capabilities and limitations of assets and continually review resources **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

	In order to assess these performance criteria it may be necessary for evidence to be collected over a period of time.
Context of and specific resources for assessment	**Context of assessment** Evidence can be collected on the job or may be undertaken in a simulation. **Specific resources for assessment** On job assessment will not entail additional resources However, rosters may need to be amended in order for simulation e.g. Search and Rescue exercise (SAREX) to be effected.
Guidance information for assessment	Assessment with the following units would help meet aspects of holistic assessment: • PUAAMS007B Coordinate search and rescue operations • PUACOM003B Manage information • PUATEA001B Work in a team

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Intelligence gathering methods may include:	• Interrogating databases • making phone calls
Strategies for obtaining resources may include:	• conducting a cost/benefit analysis and risk analysis • formal applications • both internal and external • verbal requests
Organisational policies and procedures protocols may include:	• National Search and Rescue Manual • International Search and Rescue Manual and reference texts • legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational, corporate and strategic plans • operational performance standards • organisational personnel practices and guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational quality standards

Resources may include:

- Human resources – personnel within own work area and other areas and personnel from outside statutory bodies/agencies such as:
  - Australian Defence Force (ADF)
  - police
  - voluntary agencies
  - owners/agents
  - offshore mineral/energy facilitates and international agencies
- Physical resources:
  - equipment
  - facilities
  - vehicles
  - vessels
  - aircraft
  - fuel
  - accommodation
  - computer-based Search and Rescue systems
  - ADF/police assets
  - communications systems and stationery

Physiological constraints may include:

- hypothermia
- hyperthermia
- physical condition
- age
- sex
- mental condition
- health

Environmental constraints may include:

- terrain
- weather conditions

Support considerations may include:

- revising make-up of shifts
- meals and refreshments
- breaks
- accommodation
- fuel

Contacts may include:

- individuals within organisations
- sections of an organisation(s) or general members of the public

Search and Rescue (SAR) authority is:

- one of the designated search and rescue authorities in Australia and overseas as defined in the National Search and Rescue manual

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector(s)

Aviation and marine search and rescue.

PUAAMS007B Coordinate search and rescue operations

Modification History

PUAAMS007B Release 2: Layout adjusted. Application added. Content reviewed.

PUAAMS007B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to coordinate a Search and Rescue incident.

Application of the Unit

This unit applies particularly to personnel coordinating search and rescue operations in and air and marine setting, however may be applied in a broader search and rescue situation.

Team members and crews may be members of a range of government and/or non-government agencies.

All aspects of the unit should be implemented in line with organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare search plan	1.1 Search and rescue ***assets*** and potential assets are identified and recorded in ***databases.***
	1.2 Strategic and tactical objectives are identified in accordance with unit plans.
	1.3 Strategies to achieve objectives are identified.
	1.4 Risk management strategies are identified and incorporated/conducted.
	1.5 ***Information management strategies*** are identified and applied.
	1.6 Search and Rescue procedures and policies are communicated to interested and affected persons, groups and organisations in accordance with the needs of those people.
2. Apply datum search planning principles	2.1 A last known/most probable position is established from ***available data***.
	2.2 Initial search procedures are implemented in accordance with the National Search and Rescue manual.
	2.3 ***Calculations*** are made to establish intended track/area/position in accordance with planned route.
	2.4 Time frame for survival of the missing person(s) is calculated.
	2.5 ***Physiological*** and ***environmental factors*** are determined as a basis for decision making.
	2.6 A search area is calculated consistent with organisational policies and procedures.
	2.7 ***Search pattern and track spacing*** is determined.
	2.8 A probability of detection factor is calculated.
	2.9 Acceptability of probability of detection factor is evaluated.
	2.10 Search area is recalculated or redefined, determined by availability of assets, changing weather conditions and search time available.
3. Apply rescue-planning principles	3.1 The ***nature of problem***/***distress is determined*** in accordance with the available information.
	3.2 Rescue resources are identified, mobilised and monitored.
	3.3 Operational risks are assessed and minimised.
	3.4 ***Survivor delivery points*** are identified in accordance

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with requirements and capability of the rescue platform.
	3.5 Physiological, geographic and medical factors are considered for rescue and delivery as per the situational requirements.
	3.6 ***Time factors*** are considered as per the situational requirements.
	3.7 The chosen solution is evaluated and reported against the determined criteria.
4. Evaluate operational direction	4.1 The search and rescue plan is implemented and amended as dictated by the requirements of the situation.
	4.2 A process of continual evaluation is applied.
	4.3 Contingency planning is conducted.
	4.4 Regular briefings and debriefings are conducted.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- collecting and analysing information
- developing a compromised search area to suit available assets
- effectively communicating and consulting with a range of individuals by a range of methods
- identifying potential search patterns and their use pertaining to terrain
- plan for results
- use initiative to achieve goals

Required Knowledge:

- coaching and team building concepts
- potential rescue platforms' capabilities and limitations
- coronial requirements in relation to SAR
- hypothermia/hyperthermia factors
- risk management principles
- personal development plan
- national search and rescue manual
- international search and rescue manuals and reference texts
- legislation relevant to the operation/incident/response and organisation
- operational, corporate, and strategic plans

© Commonwealth of Australia, 2025 Public Skills Australia

- operational standing operating procedures
- operational performance standards
- organisational personnel practices and guidelines
- organisational quality standards

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Knowledge of defining the search area

preparing search and rescue plans and making recommendations to the Senior Search and Rescue Officer that are based on research.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competence must be demonstrable for the relevant work situation by day or night. The assessment for this unit is most effectively undertaken on the job but may be undertaken in a simulation e.g. Search and Rescue Exercise – (SAREX).

Specific resources for assessment

On job assessment will not entail additional resources however, rosters may need to be amended in order for simulation e.g. Search and Rescue exercise (SAREX) to be effected.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Assets may include:

- aircraft
- including helicopters
- Australian Defence Force aircraft
- vessels and personnel
- police equipment and personnel
- civilian vessels

© Commonwealth of Australia, 2025 Public Skills Australia

- volunteer groups
- clubs and associations

Databases may include:

- contact names
- telephone numbers
- addresses (where appropriate)
- aircraft/vessel details
- aircraft/vessel requirements
- databases are maintained by updating details on a regular basis as determined by local policies and procedures

Information management strategies may include:

- communication flow
- use of technology
- compatibility
- audit trails
- standardised information reporting procedures and formats

Available data may include:

- route taken
- last verbal/radio or other contact
- known patterns based on historical/routine data
- navigation plan

Calculations may include:

- sweep width and track spacing calculations
- area – time – velocity – spacing calculations
- probability of detection factors
- time/distance/speed calculations
- time frame for survival and mobility calculations

Physiological factors may include:

- physical condition
- age
- sex
- mental condition
- health

Environmental factors may include:

- terrain
- weather conditions

Determining a search pattern and track spacing may include:

- taking into account environmental factors including: weather conditions
  - currents
  - terrain
- target type including:
  - person
  - type of vessel/life raft; and physiological factors including body mass
  - clothing

© Commonwealth of Australia, 2025 Public Skills Australia

	• medical conditions and state of mind
The nature of the problem may include:	• size of area • time of day • number of lives at risk • location/accessibility • condition of survivors • capacity of available resources and speed of rescue platform(s)
Survivor delivery points may include:	• hospital facilities • medical facilities
Time factors may include:	• time frame for survival • speed of rescue platform • time of mobilisation • transit times • rescue platform endurance

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop strategies	1.1 Search and rescue parameters are identified based on ***information*** available. 1.2 Search and rescue strategy is developed based on all information available. 1.3 Required ***resources*** are identified in accordance with the strategy based on all available information. 1.4 Strategy is evaluated and reviewed as determined by the input of all information and review of available resources.
2. Coordinate team members	2.1 Team members are informed of the scenario and strategy, determined from outcome of review of all information and resource requirements. 2.2 ***Team members*** are briefed on their ***roles and responsibilities*** and of the way the team will operate. 2.3 Tasks are allocated to team members commensurate with their roles in the team and level of competence. 2.4 Confirmation is gained from team member of an understanding of the scenario, their role and roles of others in the team. 2.5 Performance of team members is monitored and reviewed as the scenario unfolds to determine ongoing requirements. 2.6 Feedback from team members is received and relayed to others.
3. Liaise with internal and external authorities and agencies/organisations	3.1 ***Briefings*** are provided to the appropriate people. 3.2 Resources are monitored and reviewed to determine changing requirements. 3.3 ***Guidance and support*** are provided and sought to/from authorities and agencies in accordance with requirements.
4. Manage communications systems	4.1 Communications systems are identified as appropriate to the situation and strategy. 4.2 Communications systems are selected in accordance with requirements. 4.3 Communications systems are managed to provide optimum capability.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. Manage search and rescue records	5.1 ***Records*** are managed to ensure quality and attention to detail. 5.2 Intended audience for ***written report*** is identified and expectations negotiated. 5.3 Content of report is accurate and written in a concise and logical manner. 5.4 Report is disseminated to the intended audience in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- develop search and rescue strategies based on information available
- effectively communicate and consult with a range of individuals by a range of means including fax
- make decisions
- negotiate
- telephone and face-to-face
- write reports

Required Knowledge

- coaching and team building concepts
- communications systems available within the Rescue Coordination Centre (RCC)
- technical maintenance state of Search and Rescue resources
- personal abilities and competence levels
- management techniques
- OH&S requirements
- personnel entitlements and administrative procedure
- team members capabilities
- organisation's policies and procedures protocols
- equipment and resource relevant to search and rescue operations

Evidence Guide

Critical aspects for assessment and evidence	The ability to assess information, form strategies, and

© Commonwealth of Australia, 2025 Public Skills Australia

required to demonstrate competency in this unit	create plans based on strategies. The ability to convey the strategies and plans to team members. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence can be collected on the job or may be undertaken in a simulation. **Specific resources for assessment** On job assessment will not entail additional resources However, rosters may need to be amended if simulation e.g. Search and Rescue exercise (SAREX) is selected as the method of assessment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information may include:

- specialist search and rescue information systems
- search and rescue authorities
- members of the public
- vessel/aircraft owners
- agents and operators both private and commercial
- volunteer organisations
- government departments
- professional associations and event organisers

Resources may include:

- maps/charts
- electronic aids
- manuals
- instructions
- people
- equipment
- facilities
- vehicles
- vessels
- aircraft

- fuel
- accommodation
- ADF/Police assets
- communications systems and stationery

Team members roles and responsibilities may include:

- Intelligence gathering
- allocation of assets
- rescue planning

Briefings may include:

- providing information to team members
- members of the public
- external search and rescue authorities
- manager operations
- Australian maritime safety authority public relations personnel
- media

Guidance and support may include:

- telecommunications systems including telephone
- fax and telex
- electronic communications systems
- satellite communications systems

Records may include:

- databases
- logs and files

Written report may include:

- messaging systems
- covering reports (overview of operation
- recommendations
- attachments)
- board reports and briefings
- briefings to government
- initial advice forms
- search and rescue logs
- media releases

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate verbally	1.1 Language used in all communications is clear concise and appropriate to client, assignment and organisation's requirements. 1.2 Active listening skills and questioning techniques are used to clarify issues. 1.3 Established ***communication*** pathways are used for routine and non-routine communication.
2. Communicate non verbally	2.1 ***Non verbal communication*** is positive, culturally appropriate and tailored to the audience. 2.2 Non verbal communication is consistent with verbal communication.
3. Communicate with clients	3.1 Questioning, learning and summarising skills are used to establish ***client needs.*** 3.2 The needs of ***clients*** are addressed in line with organisation's policy and procedures. 3.3 Confidentiality is observed in accordance with organisation's policies and procedures.
4. Give and receive instructions	4.1 ***Instructions*** received are acted upon within an agreed time frame and to meet organisation needs. 4.2 Difficulties/problem areas are identified and communicated to the appropriate person in a timely manner. 4.3 Clarification of instructions is sought from the appropriate person. 4.4 Instructions are relayed clearly, concisely and accurately and confirmation of understanding obtained.
5. Take part in group discussions and informal meetings	5.1 Contributions are made in small informal group activities and meetings to facilitate outcomes. 5.2 Responses are sought from, and provided to, other group members in a constructive way. 5.3 Views and opinions of individuals or a group are understood, acknowledged and accurately represented to others where required.
6. Prepare and process routine written correspondence notes and records	6.1 Information and ideas are presented in a format, language and timeframe to meet organisation's requirements. 6.2 Presentation of written documents meets organisation's standards of style and accuracy. 6.3 Documents are processed to comply with legislative

ELEMENT	PERFORMANCE CRITERIA
	requirements and organisation's policy and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in group setting
- follow written instructions
- give and receive verbal instructions
- interact with clients
- use information technology effectively

Required Knowledge

- effective non verbal communication techniques
- effective verbal communication techniques
- group communication techniques
- small group dynamics
- written communication skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in effectively interacting with clients and communicate verbally and non verbally.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

- A combination of oral or written presentations
- observations
- on the job and/or in a simulated workplace environment

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Clients may include:
- external
- internal
- representatives of other organisations
- representatives of non government organisations
- contractors
- members of the public
- persons from culturally and linguistically diverse backgrounds
- people with hearing/vision impairments

Instructions may include:
- verbal
- non verbal
- written and may include requests
- directions

Modes of communication may include:
- written
- face to face
- radio
- mobile telephone
- land line telephone
- facsimile
- information technology systems
- signalling systems
- pamphlets translated in other languages for persons from culturally and linguistically diverse backgrounds
- Auslan gestures
- use of interpreters
- signals
- visual signalling re vessels
- helicopter signals
- fixed plane signals
- signalling to vessel skipper re anchoring, towing etc

Client needs may include:
- information
- advice
- directions
- assistance

© Commonwealth of Australia, 2025 Public Skills Australia

Workplace may include:	• office • in the field • workshop • operational area • surf or ocean environment • blue water coastal areas, barrier reef • bars and bar crossings
Non verbal communication may include:	• body language • gestures and signals
Routine correspondence may include:	• brief notes • documents • number of themes covered in document would be simple and limited

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify client needs and expectations	1.1 Current and potential ***clients*** are identified. 1.2 Needs and expectations are discussed and clarified with clients.
2. Determine and implement response to client needs	2.1 Appropriate decision making processes are established with client and relevant stakeholders. 2.2 Options are identified. 2.3 Decision making criteria are identified taking account of client needs and organisational context. 2.4 Decision making criteria are applied to options in order to identify range of relevant outcomes. 2.5 ***Appropriate response*** are selected and implemented. 2.6 Client needs are recognised and taken into consideration in accordance with anti discrimination and other organisation policy and procedures.
3. Manage client expectations	3.1 Range of possible organisational responses are communicated to the client in a timely manner. 3.2 Client is informed of options for further action. 3.3 Courtesy, consideration and sensitivity are exercised at all times with the client. 3.4 All ***necessary documentation*** is obtained, completed and processed according to organisation's policy and procedures. 3.5 ***Organisation's policy and procedures*** relating to confidentiality are implemented. 3.6 Assistance is sought to manage clients' expectations when necessary. 3.7 Clients are referred to other personnel where necessary to ensure their needs are managed efficiently.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- interpersonal skills
- locating information
- reading selectively and summarising information

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- major regulatory functions of organisation
- organisation and structure
- organisation services, facilities and activities
- organisation's anti-discrimination procedures
- organisation's policies and procedures relevant to client service and information provision

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- locating, interpreting and providing relevant information to requests
- seeking assistance when necessary
- completing appropriate workplace records
- working in accordance with organisation's policies and procedures

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentation, observation on the job and/or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communication with clients may include:

- spoken
- face-to-face
- telephone

© Commonwealth of Australia, 2025 Public Skills Australia

- written
- electronic
- forms
- letters
- non verbal
- gestures
- body language
- displays of information
- photographs
- interpreters

Clients may include:

- colleagues
- community
- contractors
- personnel from other organisations

Other organisations may include:

- government departments
- community services
- community groups
- public safety organisations
- non government organisations

Effective (spoken) communication may include:

- clear
- sequenced explanations
- instructions
- paraphrasing
- negotiating meaning
- checking back on details
- summarising
- using another language

Appropriate response may include:

- written response involving reading
- selecting and extracting relevant information
- spoken response involving questioning appropriate personnel and relaying information to the client

Completion of necessary documentation may include:

- independent or assisted form filling
- recording events in the sequence they happened

Organisation's policy and procedures may include:

- as documented in procedures manual
- standardised operations
- conveyed through spoken language

Procedures for dealing with difficult clients may include:

- seeking assistance
- referring to other personnel

Opportunities for feedback may include:

- client satisfaction forms
- telephone survey
- follow up contact

© Commonwealth of Australia, 2025 Public Skills Australia

- suggestion box
- verbal

PUACOM003B Manage information

Modification History

PUACOM003B Release 2: Layout adjusted. Application added.

PUACOM003B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to manage information to support the achievement of the organisation's objectives.

Application of the Unit

This unit applies to workers who have the delegated responsibility to ensure that information is collected and disseminated to team members and also that data and information is stored in organisational information systems. This unit is relevant at both local public safety group level and organisation wide. While written specifically for the public safety industry, it may have application in other industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information needs and sources	1.1 The ***information*** needs of individuals/teams are determined and the sources are identified. 1.2 Information held by the organisation is reviewed to determine suitability and accessibility. 1.3 Plans are prepared to obtain information which is not available or accessible within the organisation.
2. Collect and analyse information	2.1 ***Collection*** of information is timely and relevant to the needs of individuals/teams. 2.2 Information is in a formal suitable for ***analysis***, interpretation and dissemination. 2.3 Information is analysed to identify relevant trends and developments in terms of the needs for which is was acquired.
3. Use management information systems	3.1 ***Management information systems*** are used to store and retrieve data for decision making. 3.2 Technology available in the work area/organisation is used to manage information. 3.3 Recommendations for improving the information system are submitted to designated persons/groups.
4. Record and support information	4.1 The results of information gathering, analysis and synthesis are reported within specified time frames and to the standard defined by the organisation. 4.2 The results of information gathering, analysis and synthesis are reported so they can be inputs to policy development and organisation decision making. 4.3 Information which is gathered is disseminated to appropriate personnel within the specified timeframe.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse record information

© Commonwealth of Australia, 2025 Public Skills Australia

- collect and collate information
- communicate effectively
- disseminate information
- present information
- use management information systems to store and retrieve data

Required Knowledge

- analysis and display techniques
- information collection, collation
- information evaluation issues
- information storage requirements and methods
- reporting procedures of the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Establish an effective information system which facilitates achievement of organisational objectives. **Consistency in performance** Evidence will need to be collected over time in a range of actual and/or simulated management contexts.
Context of and specific resources for assessment	**Context of assessment** Evidence will need to be collected over time in a range of actual and/or simulated information management contexts. **Specific resources for assessment** Evidence of competent performance should be obtained by observing an individual in an information management role within the workplace or operational or simulated environment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Presentation of information may include:	• routine and complex reports and submissions • briefing notes • ministerials

© Commonwealth of Australia, 2025 Public Skills Australia

- proposals
- project plans
- articles and promotional material

Management information systems may include:

- computers
- communication channels
- records management
- procedures
- manuals
- protocol
- legislation
- guidelines and awards
- organisational
- legal and policy materials
- client information
- market trends
- registries and file records
- library
- financial records
- basic statistical information
- personnel resources

Analysis may include:

- application of statistical methods
- mathematical calculations
- critical analysis
- problem solving

Collection techniques may include:

- research
- surveys
- literature search
- interviews
- data bases
- observation

Collection methods may include:

- indexing
- linking
- sorting
- comparing
- categorising
- integrating

Evaluation of information issues may include:

- credibility
- reliability
- validity
- accuracy
- pertinence

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop communication strategies	1.1 Strategies for effective internal and external dissemination of information are developed to meet the organisation's requirements. 1.2 ***Special communication needs*** are considered in developing ***strategies to avoid discrimination*** in the workplace. 1.3 ***Communication strategies*** are analysed, evaluated and revised where necessary to make sure they are effective.
2. Establish and maintain communication pathways	2.1 Pathways of communication are established to meet requirements of organisation and workforce. 2.2 Pathways are maintained and reviewed to ensure personnel are informed of relevant information.
3. Promote the use of communication strategies	3.1 Information is provided to all areas of the organisation to facilitate implementation of the strategy. 3.2 Effective communication techniques are articulated and modelled to the workforce. 3.3 Personnel are given guidance about adapting communication strategies to suit a range of contexts.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building relationships
- coaching
- conflict resolution
- listening
- negotiation
- networking
- verbal communication

Required Knowledge

- conflict resolution strategies and techniques

© Commonwealth of Australia, 2025 Public Skills Australia

- language and literacy levels of personnel
- negotiation strategies and techniques
- possible communication difficulties
- range of communication strategies
- special communication needs of personnel
- techniques for improving communication and listening skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Strategies developed suit organisation's core business and different audiences

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Special communication needs may include:	• persons from culturally and linguistically diverse backgrounds • people with a disability
Strategies to avoid discrimination may include:	• emphasis on verbal rather than written communication • simple proformas • plain English documents • provision of individual assistance with reading/writing
Communication strategies	• internal and external information requirements

© Commonwealth of Australia, 2025 Public Skills Australia

may include:
- range of content areas
- dissemination of organisational information
- evaluation and effectiveness

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Promote the organisation in the community	1.1 ***Community*** requests for ***information*** or participation are responded to in accordance with the organisation's policies and procedures. 1.2 ***Opportunities to*** explain and ***promote*** the organisation's activities are acted on to promote community recognition and support. 1.3 Non-routine requests for information are referred to an ***appropriate person.***
2. Represent the organisation in the community	2.1 The organisation's position on particular issues is represented in a way which acknowledges community concerns and promotes community awareness. 2.2 Communication and presentation to the public enhances the organisation's public image.
3. Advise and involve the community in public safety activities	3.1 The community is advised of a range of ***prevention and mitigation techniques.*** 3.2 Community members are informed and skilled to implement prevention and mitigation activities. 3.3 Community is assisted to initiate, develop and conduct prevention and mitigation techniques addressing their own particular needs.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating with wide variety of people
- evaluating activities
- interpreting comments
- listening to questions

Required Knowledge

- a range of presentation strategies and techniques

© Commonwealth of Australia, 2025 Public Skills Australia

- legislative responsibilities relevant to provision of information
- organisation policy relevant to provision of advice
- organisation's position on current issues
- relevant recording procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrate in ability to provide advice on prevention and mitigation techniques in a way that acknowledges community concerns.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

In a Fire Sector specific context, this unit should be assessed with PUAFIR301B Undertake community safety activities.

Specific resources for assessment

Access to promotional/informational material.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information may include:

- how to participate
- publicity material
- contact information
- prevention and mitigation strategies

Community may include:

- local community
- business community including a range of ages and persons from culturally and linguistically diverse backgrounds
- people with a disability

© Commonwealth of Australia, 2025 Public Skills Australia

Opportunities to promote may include:	• answering general enquiries • presentations at community group gatherings • special interest forums • other organisation forums • community events and festivals • participating in conferences • representing organisation on associations and committees • school visits
Special promotions may include:	• career promotions • local shows • marches and ceremonies • organisation specific weeks and regular state/national events e.g. fire awareness week • bluey day • shopping mall promotions
Appropriate person may include:	• more senior personnel • personnel with specific expertise • community liaison officer • other organisation • bilingual
Response may include:	• referral • provide action • details of where to access further information
Prevention and mitigation techniques may include:	• dances • school/community group visitations/presentations • station open days • Police Citizens Clubs • specific co-operative arrangements with community groups • business owners • shopping centres/malls • etc, and should focus on local community safety issues and the fostering of closer linkages/partnership with policy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan public awareness/ information presentation	1.1 Details of the ***audience***'s, requirements and expectations are confirmed and clarified to ensure presentation meets client requirements 1.2 Objectives of presentation and respective roles of those involved are determined in consultation with ***relevant personnel.*** 1.3 Presentation is structured taking into account ***characteristics of the audience***, including ethic composition, anticipated questions and the subject matter to be presented. 1.4 Relevant ***information*** is accessed and familiarity with subject matter is confirmed to ensure all information ***imparted*** is current and accurate. 1.5 Required ***equipment*** aids and resources appropriate to the audience are identified and organised.
2. Conduct public awareness/ information presentation	2.1 Information is accurate, culturally appropriate and is presented in a clear manner, in logical sequence. 2.2 Aids and equipment are used effectively and correctly to help the audience gain knowledge and retain the information. 2.3 Presentations are conducted using recognised principles of group learning appropriate to the audience characteristics. 2.4 Feedback from audience and observers is used to assist in assessing own performance and program content. 2.5 Current publications suitable to audience, and sources of additional information are provided to enable follow-up. 2.6 Questions asked are answered and ***supplemented with relevant information***. 2.7 Queries outside the area of responsibility or expertise are referred to the relevant area.
3. Conduct visits to facilities/specific locations of interest	3.1 ***Facilities***, ***locations*** and/or equipment are prepared prior to demonstration/tour to meet organisation standards and occupational health and safety guidelines, and to promote a positive public image. 3.2 Information given is accurate and provides comprehensive coverage of the facility/location/equipment being discussed or demonstrated.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Store resources and complete records	4.1 Equipment and resources are stored according to organisation procedures. 4.2 ***Records*** of presentations/demonstrations are completed in line with organisation requirements.
5. Evaluate/review presentations and demonstrations	5.1 Improvements to own delivery of presentations are implemented within ***operational constraints.*** 5.2 Recommendations for improvement to presentations/demonstrations and associated resources are made to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analysing feedback
- analysing information requirements
- communicating information verbally and non-verbally
- completing forms
- planning presentations
- presentation techniques
- reviewing own performance

Required Knowledge

- available presentation aids and resources
- knowledge of hazards related to the organisation's responsibility
- occupational health and safety guidelines relevant to safety of public around equipment and in facilities
- organisation procedures for packing up and storing equipment
- organisation requirements for completing records of presentations/demonstrations
- organisation standards relevant to presentation of equipment and facilities
- organisation standards relevant to safety of public in station/base premises
- overhead projector
- policy and procedures relating to provision of information about the organisation's activities
- range of communication strategies
- slide presentation equipment
- technical information relevant to presentation/tour
- use of a variety of learning/training/presentation equipment including whiteboard

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrate in:

- The preparation and presentation of information which is accurate and in accordance with the organisation's policies and procedures, guidelines and legal requirements

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Review plan against organisational guidelines and assess performance on the job.

Specific resources for assessment

Access to presentation venue.

presentation equipment and aids will be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Audience may include:

- adults
- children
- senior citizens
- other agencies
- pre-school children
- community groups
- persons from culturally and linguistically diverse backgrounds
- people with disabilities

Relevant personnel may include:

- co-presenter
- team leader/supervisor
- training officer

© Commonwealth of Australia, 2025 Public Skills Australia

	• human resources manager • technical expert/experienced person
Characteristics of audience may include:	• age • size of group • anticipated level of existing knowledge on the subject • the reason for attendance and level of English proficiency
Information may include:	• how to reduce public safety risk • organisation's services • facilities and activities • legal obligations of public and organisations involved
Information ***imparted*** may include:	• in a range of formal and informal situations including organisation displays and information stands • demonstrations • exercises • group displays • ceremonial displays • at local events and festivals •
Venues may include:	• shopping malls • station/base • any public place where organisation is being represented • front counter of station/base • community venues • schools • other organisation's facilities • specific locations of interest, • places of worship
Equipment may include:	• overhead projectors • electronic whiteboard • electronic presentation equipment • organisation technical equipment • practical demonstration equipment • writing material
Relevant supplementary information may include:	• information to assist the public • information of public interest
Facilities, location may include:	• shopping malls • station/base

PUACOM007B Liaise with other organisations

Modification History

PUACOM007B Release 2: Layout adjusted. Application added.

PUACOM007B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to develop networks and relationships and liaise effectively with other organisations.

Application of the Unit

This unit applies to workers who have a role that includes formally liaising with other organisations in order to increase response effectiveness and community safety. While all workers should engage in networking opportunities with like-minded organisations in order to increase the effective of response in incidents, this unit is focussed at a more strategic liaisons, from local public safety group level to organisation wide.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUACOM005B Foster a positive organisational image in the community (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish networks and relationships	1.1 Formal and informal networks are established to support ongoing and future liaisons and collaboration. 1.2 Relationships are developed and used in a way which provides identifiable benefits to the organisation from shared expertise, information and/or resources. 1.3 Participation in regular meetings and forums supports mutual cooperation. 1.4 Consultation with ***affected and interested parties*** is undertaken to support the ***organisational goals and objectives***.
2. Communicate and interact with other organisations	2.1 Information is provided to other ***organisations*** in a clear, concise and comprehensive manner. 2.2 Communication with other organisations is conducted in accordance with organisational policy and procedures. 2.3 Information from other organisations is gathered to inform the improvement of services and to avoid duplication of effort.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- chairing meetings
- networking and developing relationships
- public speaking
- using networks effectively

Required Knowledge

- awareness of role and responsibilities of other organisations
- chairing meetings
- knowledge of current practices and procedures for communicating in the workplace
- meeting protocols and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- organisation's confidentiality requirements
- organisational policy and procedures relating to liaison with other organisations
- role

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated as follows:

- Networks and relationships developed and used effectively
- All information provided is accurate and clear

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Affected and interested parties may include:

- local community
- business community
- commonwealth
- state and territory and local governments

Organisational goals and objectives may vary between sectors and organisations and may include:

- organisational performance standards
- organisational personnel practices and guidelines
- organisational quality standards
- customer focussed service delivery
- community awareness of public safety issues
- effective response to incidents/operations/emergencies

© Commonwealth of Australia, 2025 Public Skills Australia

- community participation in public safety activities
- inter-organisation cooperation and collaboration
- organisational goals and objectives may vary between sectors and organisations

Organisations may include:

- public safety organisations
- government organisations
- emergency response organisations
- local
- state/territory and commonwealth
- government
- suppliers
- non-government organisations e.g. Red Cross
- Salvation Army
- volunteers
- rescue etc

PUACOM009B Manage media requirements at major incident

Modification History

PUACOM009B Release 2: Layout adjusted. Application added.

PUACOM009B Release 1: Primary release.

Unit Descriptor

This unit covers the development of a media strategy and the management of the media and provision of information for a major incident.

Application of the Unit

This unit applies to public safety workers who have been delegated media liaison responsibilities during major incidents, either at the scene or in a command centre.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess scene and organisation requirements	1.1 Restricted and/or special access areas are clearly defined to media personnel to safeguard the operation and prevent contamination of evidence. 1.2 Media access to personnel/volunteers/victims/casualties is controlled. 1.3 Operational responsibilities and provision of information to media is assessed.
2. Develop media strategy	2.1 Media plan is used to form the media strategy 2.2 Arrangements are made to meet ***media requirements*** according to incident characteristics and current developments. 2.3 Organisational media representative is selected and briefed according to availability, knowledge of incident, media presence and role played in the incident. 2.4 Media briefing area is allocated with required resources where possible. 2.5 Media co-operation is gained in order to co-ordinate ***information*** flow and to provide information to the public on matters of safety and public interest. 2.6 Media strategy is changed at any time to suit operational demands and level of incident. 2.7 Approval is gained for information releases where appropriate. 2.8 Information briefing sessions and tours are scheduled at appropriate times in line with operational responsibilities and media requirements. 2.9 Media personnel and VIP are provided with Occupational Health and Safety clothing where appropriate.
3. Provide information to media	3.1 Organisational protocols are followed when liaising with the media. 3.2 Organisational media representative provides current developments of incident where appropriate. 3.3 Interview and photo opportunities are scheduled and conducted to provide information where appropriate. 3.4 Other organisations are consulted with at the incident to ensure a consistent presentation of information to the media. 3.5 Accurate records of media enquiries and interviews

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are maintained. 3.6 A two-way communication process between organisation and media is maintained.
4. Promote the organisation via the media	4.1 Work and achievements of organisation, volunteer and other organisation personnel at incident is promoted throughout the incident to assist in maintaining morale and public profile. 4.2 Own demeanour and presentation reflects the professional standards of the organisation and support for victims and others affected by the incident.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- conducting press conferences and group interviews
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- public speaking
- retaining professionalism under duress

Required Knowledge

- knowledge of current practices for media liaison
- legal and organisation requirements relating to confidentiality, libel, accuracy, discrimination
- newsworthiness of information
- requirements of different media newspapers, magazines, radio, television
- requirements of local v's regional v's national media
- requirements of media to present information in a newsworthy/entertaining manner
- role of media in disseminating information

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Manage media to ensure integrity of information being disseminated.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Media requirements may include:

- technical e.g. lighting/sound
- access for crew and equipment
- photographic/film opportunities
- on-site interviews
- interviews with particular personnel
- newsworthiness
- news angles
- human interest interviews and stories
- technical and other requirements of local vs regional vs national media
- of print vs radio vs television
- and of community vs commercial vs government-owned media
- individual requests from media personnel
- food
- shelter
- personal protective equipment
- telephones
- facsimiles
- power outlets
- bilingual briefing

© Commonwealth of Australia, 2025 Public Skills Australia

Information which needs to be disseminated to the public may include:	• emergency hotlines • road closures • facility closures • warnings • danger zones • persons police are seeking to interview • public information/assurance • evacuation details
Organisation and legal requirements may include:	• relating to occupational health and safety • public safety • operational priorities • confidentiality
Organisational requirements for press conferences etc may include:	• operational requirements • policies and procedures • currency of information • need for public assistance
Sources of information may include:	• other organisations • eyewitnesses • weather forecasters • own organisation personnel • volunteer workers

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Build networks and develop working relationships	1.1 Formal and informal networks are established at the local, regional and national levels to support ongoing and future liaison and collaboration. 1.2 The roles and responsibilities of ***stakeholders*** are recognised and taken account of in interactions. 1.3 Working relationships are developed with stakeholders and used in a way which provides identifiable benefits to the organisation and the community from shared expertise and resources. 1.4 Dealings with stakeholders are conducted in line with ethical and professional standards to develop a relationship of trust and mutual understanding. 1.5 Feedback is obtained from other organisations and governments to inform and improve service delivery.
2. Represent the organisation	2.1 The organisation's message is imparted accurately and in a clear, concise and confident manner to gain stakeholder's understanding and commitment. 2.2 The organisation's representation is sought and promoted on external bodies. 2.3 Opportunities to promote the organisation through media, government and the community are utilised in a positive and constructive manner, in line with organisational requirements. 2.4 Advice to stakeholders is provided consistent with organisation policy, needs, quality standards and legislative responsibilities. 2.5 Advice is provided in the context of strategic planning for the organisation. 2.6 Advice is provided confidentially on matters sensitive to governments and the organisation, in line with privacy and confidentiality legislation and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building networks and relationships

© Commonwealth of Australia, 2025 Public Skills Australia

- gaining cooperation of others
- speaking publicly

Required Knowledge

- confidentiality requirements
- goals and objectives of the organisation
- legislation
- organisation policies
- regulation
- responsibilities of three levels of government relevant to the organisation
- roles and responsibilities of other agencies and relevant organisations
- statutes impacting on the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in establishment and maintenance of networks which will promote the organisation and achieve the organisation's outcomes. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:
- local
- state/territory and federal governments
- industry
- national and international associations

© Commonwealth of Australia, 2025 Public Skills Australia

- other emergency management and non-government organisations e.g. Red Cross/Salvation Army/Cave Rescue
- volunteers
- community groups
- technical advisers
- consultants
- work groups and individuals internal to the organisation
- customers
- utilities

PUACOM011B Develop community awareness networks

Modification History

PUACOM011B Release 2: Layout adjusted. Application added.

PUACOM011B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to develop appropriate networks within the community to enable the development and implementation of effective public safety awareness activities.

Application of the Unit

This unit applies to workers with a role that includes creating networks within geographically specific communities in order to advance public safety knowledge within that community. This may be relevant to managers of local public safety groups, however may be more relevant to managers responsible for supporting multiple public safety groups within a larger geographical area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR301B Undertake community safety activities (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop networks within the community	1.1 Individual and group ***stakeholders*** within the community, and their issues and concerns, are identified. 1.2 Rapport is established and maintained with appropriate community representatives and groups.
2. Manage public safety awareness activities	2.1 Need for activities is determined. 2.2 Cooperation and support is enlisted from industry, government and the ***community*** in planning and initiating special promotions which target the identified needs. 2.3 Representation for the organisation in public forums and community events is arranged to promote awareness and a positive public image of the organisation.
3. Facilitate community group discussions and formal meetings	3.1 Relevant ***information*** is provided to the group to facilitate its outcomes. 3.2 Contributions are sought, acknowledged and encouraged to foster group participation. 3.3 ***Strategies*** appropriate to the group are implemented to promote ongoing participation of all group members. 3.4 Objectives and agendas for meetings are negotiated to assist the community. 3.5 Meeting procedures are appropriate to the level of formality and the community context.
4. Report on public safety awareness activities	4.1 Community perceptions of organisational personnel and quality of service delivery are consistently monitored by listening to feedback, both direct and via the media. 4.2 ***Public safety awareness*** activities are evaluated. 4.3 Reports detailing activities, results and recommendations are completed and processed in line with organisation guidelines.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse and evaluate the effectiveness of public safety awareness activities
- analysing community safety needs
- communicating in a group setting
- communicating with wide variety of people
- establishing networks
- evaluating activities
- facilitating group discussion and participation
- interpreting comments
- listening to questions
- media liaison
- relevant recording procedures
- reporting procedures and standards
- writing reports

Required Knowledge

- a range of presentation strategies and techniques
- activities and level of community activity of various organisations in the community
- fairs and events
- how to identify leaders/stakeholders representatives'
- legislative considerations and organisation standards relevant to communication and provision of information
- organisation policy relevant to provision of advice
- possible implications of community festivals
- possible protocols and procedures
- promotional techniques and methods
- role
- small group dynamics

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the identification and establishment of networks relevant to the development and implementation of public safety awareness activities.

Consistency in performance

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:
- local community
- service clubs
- neighbourhood watch
- ethnic groups
- festival and show committees
- sporting groups
- tourist industry
- local businesses
- chambers of commerce
- local facility management

Community includes:
- local community
- business community and will include a range of ages and a diversity of cultural, linguistic and ethnic backgrounds

Information may include:
- how to manage public safety risks

Opportunities to promote may include:
- presentations at community group gatherings
- special interest forums
- other organisation forums
- community events and festivals
- speaking at seminars
- participating in conferences
- representing organisation on associations and committees

Public safety awareness may include:
- career promotions
- local shows
- marches and ceremonies
- organisation - specific weeks and regular

© Commonwealth of Australia, 2025 Public Skills Australia

	state/national events e.g. fire safety week • bluey day • shopping mall promotions • processes derived from models such as community fire guard • Neighbourhood Watch and Landcare
Appropriate person may include:	• more senior personnel • personnel with specific expertise • community liaison officer • other organisation and bilingual personnel
Public safety awareness activities should be evaluated in terms of:	• their costs and benefits
Identification of needs may include:	• surveys • questionnaires • research • policy directive from management
Appropriate media and equipment may include:	• whiteboard • overhead projectors • slides • multi-media • electronic whiteboard • computerised slide presentation • organisation technical equipment • models • dummies • microphones
Appropriate presentation techniques style and language may include:	• recognised group presentation techniques including audience participation • questioning • activities • change of pace • use of range of equipment • level of formality appropriate to group/own position • language appropriate to age • language level of group
Strategies may include:	• encouragement • reinforcement • icebreakers • active physical involvement

© Commonwealth of Australia, 2025 Public Skills Australia

Records may include:
- minutes of meetings
- diarised entries
- formal reports
- proformas

Response may include:
- refer
- provide advice
- details of where to access further information

PUACOM012B Liaise with media at a local level

Modification History

PUACOM012B Release 2: Layout adjusted. Application added.

PUACOM012B Release 1: Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	1.1 ***Organisational protocols*** are followed when ***liaising with the media.***
	1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.
	1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media.***
2. Provide information to the media	2.1 A positive image of the ***organisation*** is maintained when liaising with the media.
	2.2 Every opportunity is used to promote the organisation, its services and personnel.
	2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.
3. Publicise an event	3.1 Relationship is established with media contacts.
	3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media.
	3.3 Information provided to media is recorded and maintained.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to media
- public speaking
- retaining professionalism under duress

Required Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisation may include	• Fire

© Commonwealth of Australia, 2025 Public Skills Australia

	• Police • State Emergency Service • Emergency Management
Organisational protocols may include	• organisational policies and procedures • personal presentation being as neat as possible considering the operational circumstances • ensuring media liaison person is fully briefed and prepared • acknowledge support of other organisations • seeking advice from headquarters where appropriate • limiting comments on role of own service • relevant Federal and State legislation and regulations
Liaising with the media may include	• print (local, community, daily newspapers, magazines) • television (live or pre-recorded) • radio (live or pre-recorded)
Operational responsibilities may include	• preservation of life and property, which is the principal concern to all public safety personnel • presenting information relevant to the public
Event may include	• long service to organisation • medal presentation • awarding of certificates • donations/sponsorships/fundraising • recruiting • new equipment • VIP visit • open day • training • unusual rescues • self help information
Media's potential interest may include:	• enormous media event • standard report • human interest • in the public's interest
Media's requirements may include:	• deadlines • capabilities • visual and verbal requirements • types of medium • variation • journalists • amenities • briefing area

© Commonwealth of Australia, 2025 Public Skills Australia

Media may include:	• access to media liaison person • bilingual personnel and bilingual information • representatives from mainstream, community and ethnic television • print and broadcast media
Organisational positive image may include:	• promote the relevance and efficiency of the service • report the facts • heroism of personnel • organisational personnel are co-operative and responsive • organisational personnel well presented • handling media in most positive manner in even the most adverse conditions/circumstances
Media opportunity may include:	• opportunity to promote the services • provide educational information to the public • airplay
Relevant and succinct information may include:	• information that according to protocol is available for public release • report facts and avoid speculation • do not supply classified information • use language that can be readily understood by all to avoid misinterpretation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage administrative functions	1.1 ***Administrative functions*** are scheduled and allocated to self or others to meet agreed deadlines. 1.2 ***Records*** are maintained in accordance with ***organisational standards.*** 1.3 Records are completed clearly, accurately and legibly. 1.4 Records are filed accurately and systematically.
2. Distribute organisational information	2.1 ***Organisational information*** and instructions are communicated to others on an on-going basis. 2.2 Information is directed to the appropriate person(s). 2.3 Communication is clear, unambiguous and relevant to the subject and target audience.
3. Prepare strategic plans	3.1 Strategic outcomes are established in the context of the organisation's direction. 3.2 Plans to meet the strategic outcomes are developed and implemented. 3.3 ***Strategic plans*** are regularly reviewed and updated to incorporate changing circumstances.
4. Administer organisation finances	4.1 A budget is prepared, taking into account local needs and funding limitations. 4.2 Budget is administered according to organisational financial policies and procedures. 4.3 Expenditure is controlled to meet budget outcomes. 4.4 ***Financial records*** are maintained according to organisational financial policies and procedures. 4.5 Standards of financial probity are adhered to.
5. Arrange and conduct audits	5.1 Financial audits are arranged in accordance with organisational standards. 5.2 Safety audits are periodically conducted in accordance with OH&S guidelines. 5.3 Equipment stocktakes are conducted in accordance with organisational standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- conduct equipment stocktakes
- conduct safety audits
- evaluate resource usage
- interpret financial reports
- monitor financial reports
- monitor resource allocation and usage
- operate a recognised filing system
- plan activities and set priorities
- prepare budgets
- produce resource reports
- write in clear, concise English

Required Knowledge

- budget processes
- equal employment opportunity legislation
- legislative requirements and organisation's procedures for budget development and financial management
- management information systems
- occupational health and safety legislation
- standard operating procedures (SOPs), policies and procedures
- stock handling procedures
- tools to keep records and produce resource reports

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to complete accurate records in a timely manner. **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated administrative contexts.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by observing an individual in an administrative role in the workplace. **Specific resources for assessment** There are no special resource requirements for this unit.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Administrative functions may include:
- Preparing correspondence
- Actioning requests for information
- Authorising equipment requisitions and expenditure
- Keeping records and collecting statistics

Records may include:
- Planning and budget documents
- Financial records
- Operational records
- Training records
- Personal and personnel records
- Stock and equipment records
- Temporary loan books
- Equipment usage records
- Maintenance records
- Project briefs
- Inventories
- Standard operating procedures
- Reports and other documentation

Organisational standards may include:
- Legislation including Audit Act
- Finance regulations
- Equal Employment Opportunity and Occupational Health and Safety legislation
- Organisation's corporate and strategic plans
- Organisation's financial and other resource management guidelines
- Technology and data associated with management information systems

Organisational information may include:
- Schedule of events
- Training plans
- Potential training opportunities
- Policies and procedures
- Administrative instructions and information bulletins

Strategic plans may relate to:
- Training
- Fundraising
- Building
- Maintenance

PUACOM014B Contribute to community safety

Modification History

PUACOM014B Release 2: Layout adjusted. Application added.

PUACOM014B Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to participate in specific hazard identification, present community safety information and undertake mitigation activities while predominantly under supervision.

This unit is based on PUAFIR208B Participate in community safety activities.

Application of the Unit

This unit applies to workers who are required, under supervision, to take part in a range of community safety prevention and education activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in the identification of specific hazards	1.1 Available information is assessed to identify specific ***hazards*** as directed. 1.2 ***Community members***, ***organisations*** and own organisational staff are consulted during the identification process in accordance with the organisation's procedures. 1.3 Outcomes of identification process are reported to the supervisor.
2. Participate in presenting community safety information	2.1 Community safety information is collected and prepared in accordance with the organisation's requirements and the ***needs of the target group.*** 2.2 Community safety information is distributed to the relevant target groups as instructed. 2.3 Location for presentation is identified and relevant preparations for the event are undertaken as directed. 2.4 ***Feedback*** received from the participants is reported to the supervisor in a timely manner.
3. Participate in risk mitigation activities	3.1 Appropriate risk mitigation procedures, work instructions and directions are followed in accordance with the organisation's procedures. 3.2 Work is undertaken in accordance with occupational health and safety procedures. 3.3 ***Mitigation activities*** are undertaken with minimum damage to the ***environment*** in accordance with organisational procedures and ***legislation.*** 3.4 Outcomes are reported to the supervisor.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply risk mitigation activities
- communicate in groups
- identify hazardous materials
- present to small groups

© Commonwealth of Australia, 2025 Public Skills Australia

- verbal and non-verbal communication

Required Knowledge

- hazard identification
- hazardous materials identification
- mitigation
- principles of hazard behaviour
- relevant legislation
- safe work practices

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to identify hazards specified by the industry sector in which the person is working; to present information in accordance with the organisation's procedures; and to undertake risk mitigation activities. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace. **Specific resources for assessment** Access to the appropriate literature and equipment.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Assessing available information may include:	• Undertaking accompanied inspections such as:
	  • familiarisation inspections
	  • inspections required by legislation

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- licensed premises inspections
- scheduled inspections

Hazards may include:

- adverse weather
- after dark operations
- closed access routes
- conflict with cultural practices
- damaged structures
- dangerous goods
- debris
- difficult terrain
- events such as fire, flood, storm
- electrical hazards
- explosion
- hazardous materials
- illegal or careless use of fire
- impediments to firefighting and rescue activities
- natural disasters
- on-scene hazards such as smoke, darkness, heat; machinery, equipment, products; structural collapse; hazardous products and materials
- structural fire and associated exposures
- time pressure
- utilities (electricity, gas, water and sewage)

Community members and organisations may include:

- Geographically-based groups of people such as: households, neighbourhood, suburbs, business districts and towns
- Indigenous Australian communities, which can be metropolitan, regional, rural or remote communities
- Shared-experience groups of people such as:
  - particular-interest groups, ethnic groups, professional groups, language groups, age groupings and those exposed to a particular hazard

Needs of the target group may refer to:

- age
- cultural issues and protocols
- language read
- language spoken
- learning preferences e.g. audio, print, visual
- literacy and numeracy support
- mobility issues
- requiring an interpreter

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Feedback may include:	• support issues • checklists • facilitated group meetings • reports, verbal and/or written submitted to immediate supervisor • survey results • standard organisation forms • using an interpreter
Mitigation activities may include:	• altering work practices • community activities • community information/education • hazard isolation • hazard management • hazard reduction • hazard removal
Environment may include:	• built environment • elements such as economics, commerce, culture and public safety service provisions that relate to how the community functions • natural environment such as: topographical features, water bodies, vegetation communities and ecosystems
Legislation may include:	• local, state/territory and/or commonwealth acts and regulations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specific hazards	1.1 ***Hazards*** are identified using the organisation's risk management procedures and process. 1.2 Specific hazards in area of responsibility that may impact on life, ***property***, process or the ***environment*** are accurately identified and reported to the supervisor according to the organisation's procedures. 1.3 ***Inspections*** are conducted to provide for relevant information for pre-incident planning. 1.4 ***Community members and organisations*** are consulted where appropriate during the identification and/or inspection process.
2. Consider hazard information to determine level of risk	2.1 Level of risk is determined using the organisation's risk management procedures and process. 2.2 Liaison is undertaken with external organisations as required and according to the organisation's procedures.
3. Implement risk mitigation guidelines	3.1 Risk ***mitigation strategy*** is selected from a pre-determined list and implemented. 3.2 Risk reduction activities are conducted in accordance with the organisation's procedures. 3.3 Mitigation guidelines are implemented with minimum damage to the environment in accordance with ***legislation*** and the organisation's procedures.
4. Evaluate mitigation strategies	4.1 ***Feedback*** is provided to appropriate parties on the risk mitigation procedures and process. 4.2 Mitigation strategies are evaluated for effectiveness and community acceptance. 4.3 Issues are reported to supervisor according to the organisation's procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse feedback
- apply risk management guidelines to the organisation

© Commonwealth of Australia, 2025 Public Skills Australia

- complete forms
- identify at risk plant species
- identify building construction and materials
- identify hazardous materials
- liaise with community groups
- oral and written communication

Required Knowledge

- Australian Standard AS/NZS 4360
- community organisation contacts
- evacuation procedures
- hazardous materials
- occupational health and safety guidelines
- organisation risk identification guidelines, policies and procedures relating to hazard reduction, hazard isolation, hazard removal and hazard management
- principles of hazard behaviour and suppression
- relevant legislation
- relevant technical information
- risk management principles specific to the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to identify and describe the relationship between a hazard and the risk posed to the community and environment; and to evaluate risk against established organisation risk management guidelines in consultation with relevant community groups. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace. **Specific resources for assessment** Access to organisation forms and appropriate equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include
- Adverse weather
- After dark operations
- Closed access routes
- Conflict with cultural practices
- Damaged structures
- Dangerous goods
- Debris
- Difficult terrain
- Events such as fire, flood, storm
- Electrical hazards
- Explosion
- Hazardous materials
- Illegal or careless use of fire
- Impediments to firefighting and rescue activities
- Natural disasters
- On-scene hazards such as smoke, darkness, heat; machinery, equipment, products; structural collapse; hazardous products and materials
- Structural fire and associated exposures
- Time pressure
- Utilities (electricity, gas, water and sewage)

Property may include:
- Buildings
- Infrastructure which provides for the movement of people, goods and services

Environment may include:
- Built environment
- Elements such as economics, commerce, culture and public safety service provisions that relate to how the community functions
- Natural environment such as: topographical features, water bodies, vegetation communities and ecosystems

Inspections may include:
- Familiarisation inspections
- Inspections required by legislation
- Licensed premises inspections
- Scheduled inspections

Community members and organisations may include:
- Geographically-based groups of people such as:
  - households, neighbourhood, suburbs, business districts and towns

© Commonwealth of Australia, 2025 Public Skills Australia

- Indigenous Australian communities, which can be metropolitan, regional, rural or remote communities
- Shared-experience groups of people such as:
  - particular-interest groups, ethnic groups, professional groups, language groups, age groupings and those exposed to a particular hazard

Mitigation strategies may include:

- Altering work practices
- Community activities
- Community information/education
- Hazard isolation
- Hazard management
- Hazard reduction
- Hazard removal

Legislation may include:

- Local, state/territory or federal acts or regulations

Feedback may include:

- Checklists
- Facilitated group meetings
- Reports, verbal and/or written submitted to immediate supervisor
- Standard organisation forms
- Survey results
- Using an interpreter

PUAECO001A Operate telephony systems

Modification History

PUAECO001A Release 2: Layout adjusted. No changes to content.

PUAECO001A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to efficiently operate emergency communications centre telephony systems and equipment.

Application of the Unit

This unit applies to emergency communications centre personnel.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Use telephony system**	1.1 Telephony system is accessed and set up in accordance with organisational procedures 1.2 Telephony system is ***operated*** in accordance with ***manufacturer's instructions*** 1.3 Appropriate lines are accessed in accordance with organisational procedures 1.4 Standard agency answering protocols are applied for emergency calls and general enquiries 1.5 ***System functions*** are used appropriately to ensure caller status is maintained 1.6 ***Systems*** and other interfaces are accessed to locate and record information 1.7 Telephony system is controlled and coordinated to ensure equitable access and prioritisation of operations 1.8 Calls are terminated in accordance with organisational procedures
2. **Identify faults in the telephony system**	2.1 System testing is conducted in accordance with manufacturer's and organisational policies and procedures 2.2 Telephony systems are monitored for faults and ***appropriate action*** is taken 2.3 Back-up telephone system and business continuity arrangements are followed when primary telephony systems fail

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access organisational documentation
- accurately record and relay information
- effectively communicate orally and in writing
- effectively use telephony equipment, computer systems, and associated software
- maintain telephone systems
- operate back-up and business continuity systems
- work in stressful situations

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- effective telephone techniques
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant legislation and regulations
- safety issues such as acoustic shock, head set, electrical storms, spurious noises, required breaks, stress management, ergonomics

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use telephone system in a time critical environment • effectively apply telephone functions • effectively apply protocols and procedures • implement back-up arrangement. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations, particularly in a stress environment involving 000 calls.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • agency protocol documentation • back-up systems • operations and systems manuals • organisational documentation • relevant databases

© Commonwealth of Australia, 2025 Public Skills Australia

	• telephony system • training databases, where available • training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following unit: • PUAECO002A Process emergency incident calls and enquiries. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational procedures may include	• Legislation relevant to the organisation • Operational, corporate and strategic plans • Operational performance standards • Operational policies and procedures • Organisational personnel and occupational health and safety practices and guidelines • Organisational quality standards • Organisation's approach to environmental sustainability
Operating a telephony system may include	• Using computer software • Using hard phone and soft (electronic touch screen)

© Commonwealth of Australia, 2025 Public Skills Australia

	phone • Using text telephone or telephone typewriter (TTY)
Manufacturer's instructions may include	• Functions such as conference calls, quick dial, hold, transfer, direct lines • Safety such as acoustic shock, head set attachments, lightning • Use of head set and hand set
System functions may include	• Allocating lines to specific operators • Conference calls • Direct lines • Holding calls • Memory dialling • Muting calls • Transferring calls
Systems may include	• Computer aided dispatch (CAD) • Manual
Taking appropriate action may include	• Identifying technical faults • Dealing with identified faults if within own area of responsibility • Referring identified faults to supervisor or appropriate personnel

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive incoming incident calls/enquiries	1.1 ***Routine and emergency incident calls*/*enquiries*** are answered promptly using standard agency answering protocols and telephony system, ***related equipment*** and computer aided dispatch system, in accordance with ***organisational policies and procedures.***
	1.2 Relevant information of the caller/incident/enquiry is ***established*** in accordance with organisational policies and procedures.
	1.3 ***Factors which may affect the caller's ability to provide accurate information*** are assessed and taken into consideration.
	1.4 ***Type of incident call*/*enquiry*** is determined quickly and accurately, and call authenticity is determined, in accordance with organisational protocols.
	1.5 ***Details*** of the incident call/enquiry are obtained and accurately ***logged***, in accordance with organisational policies and procedures.
	1.6 Appropriate response is ensured by interacting with other relevant personnel.
2. Provide information to caller/s in possible danger	2.1 ***Potential danger*** to caller/s is assessed quickly and accurately.
	2.2 ***Safety information appropriate to the situation and caller's needs*** is communicated clearly.
3. Locate an incident	3.1 Organisation's area/s of operational responsibility is identified.
	3.2 Appropriate directories, ***maps*** and databases are used to find incident location/s.
	3.3 Calls/enquiries are ***concluded*** in accordance with organisational policies and procedures.
4. Action received request	4.1 Request for assistance is actioned in accordance with organisational policies and procedures.
	4.2 ***Information*** is ***summarised and communicated*** using clear and appropriate language, in accordance with organisational policies and procedures.
	4.3 Follow-up procedures and notifications to other emergency services or agencies are implemented as required.
5. Operate equipment	5.1 Appropriate ***equipment*** is chosen for the task, context and needs of the incident.
	5.2 Equipment is used and operated safely in accordance

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with organisational and manufacturer's instructions.
	5.3 Faulty equipment is identified and reported in accordance with organisational policies and procedures, and alternative strategies are employed when necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurately record and relay information
- apply relevant organisational policies and procedures to support appropriate response decisions
- control the conversation to ensure necessary information is obtained from the caller
- deal with difficult and distressed callers
- communicate orally and in writing
- use telephony equipment, radios, computer systems and associated software
- employ fault bypass procedures
- maintain readiness in periods of low operational activity
- read and interpret basic maps to identify location of incident
- respond calmly to multiple demands in high operational activity
- type with speed/accuracy in accordance with organisational specifications
- use appropriate questioning techniques
- use codes, abbreviations or specialist terminology in the transmission of information
- use equipment designed to receive incoming incident calls/enquiries in accordance with organisational and supplier procedures
- use equipment relating to incident/information management
- use language appropriate to the caller
- use voice procedures consistent with organisational procedural requirements

Required Knowledge

- area of operations
- codes, abbreviations or specialist terminology used by the organisation when receiving or taking action in response to incoming incident calls/enquiries
- communications equipment used in the management of incidents and non operational enquiries
- telephone communication techniques such as responding to queries clearly and concisely; ensuring appropriate referral processes are followed; exercising discretion and confidentially; taking follow-up steps where appropriate; displaying empathy;

© Commonwealth of Australia, 2025 Public Skills Australia

effectively handling caller behaviour (such as aggressive, angry, controlled, distressed, hysterical, passive, scared, timid); effectively responding to callers whose first language is not English or who have difficulties with the English language; effectively responding to the age of the caller; questioning caller in such a way that allows the caller to respond in a timely manner; using open and closed questioning

- organisational policies, procedures and practices
- organisational resources such as aerial appliances (hydraulic/telescopic ladder, hydraulic platform, combination ladder/platform); aircraft (helicopters and fixed wing); special appliances (hazardous materials response vehicles, specialist rescue vehicles, special materials carriers [foam, breathing apparatus], command and control vehicles); vehicles (pumpers/tankers/combinations; heavy, medium, light; four-wheel drive)
- relevant legislation and regulation
- stress management techniques
- time management techniques
- types of emergencies (with regards to relevant legislation)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • recognise the difference between routine and emergency incident calls/enquiries • effectively handle incident calls/enquiries • use techniques to obtain information in as short a time as possible • take appropriate action in accordance with organisational procedures as a result of the incoming incident call/enquiry • use relevant technology for the recording of requests for assistance/enquiries in accordance with organisational policies and procedures. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations across a range of different callers, types of emergencies and level of activity.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

resources for assessment	Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • agency protocol documentation • back-up systems • operations and systems manuals • organisational documentation • relevant databases • telephony system • training databases, where available • training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following units: • PUAECO001A Operate telephony systems • PUAECO003A Operate and control radio networks • PUAECO004A Operate computer aided dispatch system. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

© Commonwealth of Australia, 2025 Public Skills Australia

wording in the Performance Criteria is detailed below.

Routine and emergency incident calls/enquiries may include:	• administrative queries • requests for general organisational information • requests for help in critical situations • requests for help in non-critical situations
Related equipment may include:	• computers (data transfer from other agencies) • electronic indicators (such as fire alarms) • paging systems • radio • telephonic services
Organisational policies and procedures may include:	• mutual aid, memorandum of understanding with other agency/s • organisation's approach to environmental management and sustainability • procedures which concern the operations of the organisation in an emergency situation • procedures which are not of an emergency nature but may affect the organisation's operations in an emergency • procedures which form part of the day-to-day running of the organisation • procedures which concern the operations of other agencies, services and organisations which may be required to attend emergency situations
Establishing relevant information of the caller/incident/enquiry may include:	• active listening skills (such as clarifying, giving full attention to the caller, maintaining contact with the caller and prompts, summarising, using open questions) • appropriately responding to cultural diversity and people with specific needs • controlling the call • effective communication skills, techniques and resources • questioning techniques
Factors which may affect the caller's ability to provide accurate information may include:	• ability to speak • age • call difficulties such as call being disconnected • impact of alcohol or drugs • knowledge of the area (for example, a tourist may have limited knowledge) • language spoken • level of distress • mental health

© Commonwealth of Australia, 2025 Public Skills Australia

Type of incident call/enquiry may include:	• alarm • HAZMAT • motor vehicle accident • rescue • structure • vegetation

Details of the incident call/enquiry may include:	• address
	• caller name and phone number
	• location:
	  • commonplace name
	  • cross streets
	  • distinguishing features
	  • landmarks
	  • latitude and longitude
	  • marine chart
	  • nearest intersection
	  • position in street
	  • rural addressing
	  • suburb, town, city
	  • street number
	  • type

Logging incident calls/enquiries may include:	• checking permit log and plotted fires • creating incident file and verifying and saving details • liaising with fire towers • making appropriate records • phoning alarmed premises

Potential danger may include:	• danger from animals, building debris or dangerous goods and hazardous substances
	• factors associated with caller health or wellbeing such as being older or having a physical disability which may mean the caller is not able to evacuate; language difficulties; panic and shock
	• factors which may impact on caller's ability to reach safety:
	  • ability to speak
	  • effects of alcohol and/or drugs
	  • age
	  • knowledge of the area/location
	  • language/s spoken
	  • level of distress

© Commonwealth of Australia, 2025 Public Skills Australia

	• mental health • telephone difficulties such as call being disconnected • smoke inhalation • structural collapse • vehicle ignition
Safety information appropriate to the situation and caller's needs may include:	• drop to floor to reach exit • immediate evacuation in accordance with building evacuation plan • leave area by recommended route • stand in an identified location to wait for the appliance and fire crew • use appropriate protective clothing
Maps may include	• books of maps • computer-generated maps • road maps • street directories • topographical maps • tourist maps
Concluding calls/enquires may include:	• confirmation of response • reassurance • pre-arrival instructions
Information may include:	• environmental factors • factors affecting agency's operational readiness • risks associated with the incident • topography • weather conditions
Summarising and communicating information may include:	• informing other public safety agencies and relevant stakeholders about the response • maintaining liaison with colleagues • notifying senior management and other organisations as required • providing information pre-arrival of the emergency service/s
Equipment may include:	• computer back-up systems • computer hardware - other than the organisation's primary computer hardware system (such as portable computers) • computer software - other than the organisation's primary computer software program/s (such as mapping programs, word processing, hazardous materials databases)

© Commonwealth of Australia, 2025 Public Skills Australia

- facsimile
- landline, mobile and satellite telephones - other than the organisation's primary telephone system
- pager systems
- printers
- recording equipment
- remotely controlled fire station equipment
- security equipment
- signalling devices (such as alarm telemetry equipment)

PUAECO003A Operate and control radio networks

Modification History

PUAECO003A Release 2: Layout adjusted. No changes to content.

PUAECO003A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to efficiently operate and control radio networks and equipment.

Application of the Unit

This unit applies to emergency communications centre personnel who operate and control radio networks to respond to organisational requests and to support operational events.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use radio networks	1.1 Radio network is accessed in accordance with organisational procedures. 1.2 ***Radio equipment*** is operated in accordance with manufacturer's instructions. 1.3 Appropriate channels, frequencies and talk groups are allocated, selected and deselected in accordance with organisational policies and procedures. 1.4 Appropriate codes, terminology, pro-words, call signs and abbreviations are used to receive and transmit information. 1.5 Organisational radio protocols are used to transmit and receive messages. 1.6 Radio contact is monitored in accordance with organisational procedures. 1.7 Network is controlled and coordinated to ensure equitable access and prioritisation of operations. 1.8 Network is operated in accordance with relevant legislation and organisational operational requirements. 1.9 Equipment is used safely in accordance with the organisational and manufacturer's instructions.
2. Identify faults in the radio network	2.1 Technical faults in the radio network are identified and ***appropriate action is taken.*** 2.2 ***Back-up or alternative systems*** are utilised when primary system fails or when required. 2.3 Equipment is tested in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- enunciate clearly
- communicate effectively
- receive messages
- transmit messages
- use call up sequence

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- basic principles of radio operation
- organisational specific communication protocols
- phonetic alphabet/figures/language
- principal components of radios
- radio network/system
- radio procedures (call signs, vehicle codes, codes, terminology, pro-words and abbreviations)
- readability table
- voice procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • enunciate clearly and concisely • use communication protocols • operate equipment correctly within organisational benchmarks • respond to calls from the field in a timely and effective manner • work effectively in stressful situations • maintain control over the network • operate effectively in routine and peak conditions of operational activity. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to:

© Commonwealth of Australia, 2025 Public Skills Australia

	• alternative technologies • back-up systems • communications protocol handbooks • manufacturers' operating instructions • operations and systems manuals • organisational documentation • primary and back-up/alternative radio network • relevant databases • training databases, where available • training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following unit: • PUAECO004A Operate computer aided dispatch system. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Radio equipment may include:	• antenna • associated computer equipment • portable/mobile radios and attached equipment (microphone)

© Commonwealth of Australia, 2025 Public Skills Australia

	• repeaters (static and portable) • transceivers and attached equipment (foot pedal, microphone)
Organisational policies and procedures may include:	• legislation relevant to the organisation • operational, corporate and strategic plans • operational performance standards • operational policies and procedures • organisational personnel and occupational health and safety practices and guidelines • organisational quality standards • organisation's approach to environmental sustainability
Taking appropriate action may include:	• identifying technical faults • dealing with identified faults if within own area of responsibility • referring identified faults to supervisor or appropriate personnel
Back up or alternative systems may include:	• alternative frequencies and spectrums • alternative networks • landline network • mobile phone network • relay systems • satellite phone

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate dispatch systems	1.1 Computer aided dispatch (CAD) log on and shift change protocols are implemented. 1.2 CAD, other interfaces and associated equipment are set up and navigated for optimum operation. 1.3 CAD is interrogated to retrieve required information. 1.4 Data is accurately recorded in accordance with organisational procedures. 1.5 Relevant data/information is continually monitored, maintained and updated, in accordance with organisational protocols. 1.6 Entries are checked for accuracy and corrective action is taken, in accordance with organisational procedures and system capacity. 1.7 Incident completion processes are implemented in the CAD. 1.8 Equipment is used safely in accordance with organisational and manufacturer's instructions.
2. Identify faults in the CAD	2.1 Technical faults in the CAD are identified and ***appropriate action is taken.*** 2.2 ***Back-up systems*** are utilised when primary system fails. 2.3 Deficiencies or opportunities for improvement are reported in accordance with organisational policies and procedures. 2.4 Systems and equipment are tested in accordance with organisational policies and procedures. 2.5 Test issues are referred to supervisor and/or relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurately record and relay information
- assess and prioritise information appropriately
- multi task
- operate a computer

© Commonwealth of Australia, 2025 Public Skills Australia

- operate and adapt to different programs/databases
- operate CAD during peak activity
- process data
- retrieve information
- type with speed/accuracy in accordance with organisational specifications

Required Knowledge

- codes, terminology, pro-words and abbreviations
- databases (fire alarm, mapping, hazardous substances)
- message notification systems such as pager networks, SMS, short data messaging
- organisational resource availability and locality
- organisational procedures and protocols
- relevant computer operations and functions
- relevant legislation and regulations
- specific program/database operations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • multi task • effectively apply computer skills and knowledge • manage an incident from creation to finalisation, using the equipment effectively • use and work with relevant programs/databases. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • back-up systems

© Commonwealth of Australia, 2025 Public Skills Australia

	• CAD work station • relevant databases • operations and systems manuals • organisational documentation • training databases, where available • training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following unit: • PUAECO002A Process emergency incident calls and enquiries. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine appropriate response	1.1 Information required to determine the appropriate response to an incident is quickly identified, in accordance with ***organisational policies and procedures.***
	1.2 ***Sources of information*** are accessed and relevant information is retrieved quickly and efficiently.
	1.3 Availability and capability of resources is assessed.
	1.4 Organisational response procedures are applied to ensure appropriate resources are matched to incident/s.
	1.5 Request/s for assistance are prioritised in accordance with agency protocols and legislation where required.
2. Dispatch resources	2.1 ***Equipment and systems*** are used to locate, allocate and dispatch resources.
	2.2 Resource dispatch announcements are made promptly and accurately, in an organised, concise and complete manner using clear and appropriate language in accordance with organisational turnout methods and technology.
	2.3 ***Public safety agencies and relevant organisations*** are notified in accordance with operational procedures.
	2.4 Communication with dispatched resources is ***established and recorded.***
	2.5 Additional information is disseminated to dispatched responding resources.
	2.6 Resource dispatch follow-up procedures are implemented.
	2.7 Administrative duties and support tasks are completed promptly, in accordance with organisational policies and procedures.
	2.8 All ***incident information*** is recorded, maintained and updated in accordance with organisational requirements.
	2.9 Back-up or business continuity systems are used when required.
3. Provide ongoing support to operations	3.1 Status of resources is ***monitored.***
	3.2 Public safety agencies and relevant organisations are notified in accordance with operational procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 ***Field requests*** are actioned. 3.4 Resources are allocated as required. 3.5 ***Resource information*** is maintained and updated. 3.6 Communication with personnel in the field is maintained and recorded.

Required Skills and Knowledge

This describes the essential skills and resources knowledge and their level, required for this unit.

Required Skills

- apply operational knowledge to deploy resources
- communicate and liaise with colleagues and stakeholders
- disseminate information
- make decisions and solve problems to prioritise requests
- operate and access a range of information sources
- operate back-up and business redundancy systems
- receive, record and relay information
- use technology

Required Knowledge

- communication protocols
- equipment attached to specific resources
- follow up procedures
- functions of other agencies, jurisdictions, organisations, authorities and regulators
- organisational resources
- organisational policies, procedures and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant databases and sources of information and how to access them
- relevant legislation
- relevant procedures
- responsibilities specified in memoranda of understanding (MOU) relevant to dispatching resources
- service level agreements

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • quickly and accurately access the required information and dispatching resources, including additional resources and specialised information • effectively maintain communication with emergency resources using communication protocols • effectively liaise with other organisations and agencies • adhere to standard operating guidelines and procedures and take actions to follow the chain of command and instructions of manager/leading emergency communications centre officers as appropriate. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations across a range of different types of emergencies and level of activity.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • agency protocol documentation • back-up systems • computer aided dispatch (CAD) • operations and systems manuals • organisational documentation • relevant databases • telephony system • training databases, where available • training manual • workplace expert/s
Method of assessment	This unit may be assessed with the following units:

© Commonwealth of Australia, 2025 Public Skills Australia

- PUAECO001A Operate telephony systems
- PUAECO002A Process emergency incident calls and enquiries
- PUAECO003A Operate and control radio networks
- PUAECO004A Operate computer aided dispatch system.

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational policies and procedures may include:	• directives • legislation\multi agency agreements • mobilising procedures • operational procedures • standard operating guidelines and procedures
Sources of information may include:	• databases • systems • MOUs • other organisations • service level agreements • standard operational procedures
Equipment and systems may include:	• ancillary equipment

© Commonwealth of Australia, 2025 Public Skills Australia

	• computer aided dispatch system • paging networks • phone networks • radio • radio networks
Public safety agencies and relevant organisations may include:	• ambulance • government services/authorities • non-government agencies • police • public utilities
Establishing and recording communication with dispatched resources may include:	• radio • telephone • text messaging
Incident information may include:	• casualty numbers and details • incident type • level of assistance that is required • location of incident • origin of call • relative priorities • responding resources • situation reports from incident commander/controller • time stamping of manual records
Status of resources are monitored for:	• incidents • response coverage, in accordance with organisational requirements
Field requests may include:	• appliance voice requests • escalating resources and agencies • facilitating logistical support • maintenance breakdowns • notifying appropriate authorities • situation reports or informative messages • specific resources and agencies • status changes • stop messages • upgrade of response levels
Resource information may include:	• dispatching assets/resources/appliance • entering equipment changes such as appliance change over • returning assets/resources/appliances

PUAECO006A Read and interpret maps

Modification History

PUAECO006A Release 2: Layout adjusted. No changes to content.

PUAECO006A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to read, interpret and plot locations using paper based maps, and mapping software and systems to relay incident locations to emergency responders.

Application of the Unit

The unit applies to emergency communications personnel who locate emergency incidents but will also have application in a variety of other situations such as utilities or other service contractors where the ability to read and interpret maps in rural and urban areas is required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify incident location from caller	1.1 ***Effective communication techniques*** are used to ascertain ***incident location*** as quickly and as precisely as possible, in accordance with organisational policies and procedures. 1.2 Information and reports are received from a variety of identified ***sources.***
2. Provide grid references from paper maps to incident operations team	2.1 ***Map features*** are identified and located using ***marginal information*** on paper ***maps.*** 2.2 Six figure grid references are received and used. 2.3 Grid references are calculated using magnetic bearings, and/or latitude and longitude and/or incident location details provided by callers. 2.4 Relevant references using the current ***standards*** are provided to field personnel for use by ***portable navigational aids.*** 2.5 ***Directional information*** is provided to operations team on request.
3. Use mapping software and systems to locate incidents and dispatch resources	3.1 Mapping system is access and logged into, in accordance with organisational policies and procedures. 3.2 Information provided by caller is used to enter grid references into computer aided dispatch (CAD) system. 3.3 ***Visual representation markers*** analysed to locate incident. 3.4 Location is verified with caller using system information. 3.5 Location is save to the CAD system and resources are dispatched in accordance with organisational policies and procedures.
4. Plot an incident location from magnetic bearings from fixed and mobile fire towers	4.1 Software or pen and paper are used to draw a line from a given landmark or fire tower to calculate distance and general location. 4.2 Information is obtained from other fixed or mobile fire towers or infrastructure to ***fix a position.*** 4.3 Data is analysed to accurately plot incident location and is relayed to land or air operations using six figure grid references and/or latitude and longitude.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurately record and relay information
- calculate grid references from a variety of data and information
- convert centimetres to metres and kilometres
- identify features on a map
- interpret and apply contour and other topographic information
- use grid references using agency protocols
- use mapping software in accordance with organisational and supplier procedures
- use protractors and compass to measure and calculate distance using map scales including the distance on a curved road

Required Knowledge

- meaning of marginal map information
- northing and easting references
- organisational policies, procedures and practices (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- situational and appropriate application of open and closed questioning to elicit information on incident location
- types of maps

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • determine and accurately relay location of an incident using a variety of paper and electronic methods including: • computer aided dispatch system • metropolitan street directories • topographical maps of various scales • map reading software and systems

© Commonwealth of Australia, 2025 Public Skills Australia

	• portable hand held and vehicle mounted navigational aids • other reference material • determine and accurately relay location of an incident given information which may include one or more of the following pieces of information: • magnetic bearings • six figure grid references • latitude and longitude • street directory or map grid and/or page reference numbers • one or more of the following - street, suburb, town landmark. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations across a range of different callers, types of emergencies and level of activity.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • resources required under normal operational conditions • resources required in disaster back-up conditions • resources required in field or incident management system conditions.
Method of assessment	This unit may be assessed with the following unit: • PUAECO002A Process emergency incident calls and enquiries. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

	Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Effective communication techniques may include	• clarifying • giving full attention to the caller • maintaining contact with the caller and prompts • summarising • using appropriate questioning
Sources of information may include:	• aircraft • map symbols • other agencies • other emergency services • watercraft
Map features may include:	• building structures and services • infrastructure including bridges, towers, railways, roads, dams • locked gates and cattle grids • road types and classifications • topographical features (such as hills, streams, trees, termite mounds)
Map types must include:	• cadastral maps • topographical maps
Marginal information must include:	• key information • map scale • symbols, markings, notations
Directional information may include:	• cardinal points • degree systems including bearings, back bearings, north points, magnetic variation and conversion of bearings

© Commonwealth of Australia, 2025 Public Skills Australia

	• navigation and map reading aids
Fixing a position must include:	• triangulation • using local objects
Standards must include:	• geocentric Datum of Australia (referred to as GDA94 or GDA) • converting Australian Map Grid (AMG66) to GDA94 and vice versa • global positioning systems (GPS) international standard
Portable navigational aids may include:	• GPS • geographic information systems (GIS) • proprietary handheld and vehicular devices (such as nav man, tom tom)
Visual representation markers may include:	• symbols for hospitals, schools etc.
Determining location of incident and response may include using:	• computer aided dispatch system • directories • manuals • other reference material • relevant mapping information

PUAECO007A Respond to and maintain monitored alarm systems

Modification History

PUAECO007A Release 2: Layout adjusted. No changes to content.

PUAECO007A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to efficiently respond to and maintain ***monitored alarm systems***.

Application of the Unit

This unit applies to emergency communications centre personnel.

This unit may also apply to people required to monitor various types of alarm systems and devices in the community and business environments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Respond to active alarms	1.1 Alarm notification is acknowledged and confirmed as an active alarm, in accordance with organisational procedures. 1.2 ***Appropriate response to alarm activation*** is undertaken, in accordance with organisational procedures. 1.3 ***Remedial action is taken*** for issues identified by responding agency in accordance with organisational procedures .
2. Respond to alarm faults	2.1 ***Alarm fault*** is identified and acknowledged. 2.2 Remedial action is taken in accordance with organisational procedures. 2.3 Alarm fault information is collected and recorded in appropriate databases.
3. Complete follow up activities	3.1 ***Alarm connections***, ***disconnections and maintenance*** are processed in accordance with organisational policies and procedures. 3.2 ***Databases*** are maintained for currency and accuracy in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurately record and relay information
- deal with difficult customers
- effectively communicate orally and in writing
- effectively use telephony equipment, computer systems and associated software
- operate computer aided dispatch (CAD) systems
- use communications equipment
- use language appropriate to the caller
- work in stressful situations

Required Knowledge

- alarm codes

© Commonwealth of Australia, 2025 Public Skills Australia

- alarm protocols
- effective telephone techniques
- how to interrogate databases
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant legislation and regulations
- relevant types of alarm systems (such as fire alarm, security alarm, medical alert)
- terminology and abbreviations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • differentiate between active and fault alarms • operate a CAD system • work in high pressure stressful situations • effectively manage time and prioritise activities. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • back-up systems • CAD system • operations and systems manuals • organisational documentation • relevant databases • training databases, where available

© Commonwealth of Australia, 2025 Public Skills Australia

	• training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following units: • PUAECO002A Process emergency incident calls and enquiries • PUAECO003A Operate and control radio networks • PUAECO005A Dispatch resources from within an emergency communications centre. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Monitored alarm systems may include:	• fire alarms • medical alerts • security alarms (monitored or not monitored) • surf life saving alerts
Appropriate response to alarm activation may include:	• contacting management representatives • contacting client representatives • using CAD to generate a response
Taking remedial action may include notifying:	• agencies • appropriate personnel • building owners/occupiers

© Commonwealth of Australia, 2025 Public Skills Australia

	• network provider (monitoring companies, agencies) • utilities
Alarm faults may include:	• alarm panel fault • communications centre monitoring equipment (e.g. computer hardware or software) fault • fire suppression equipment (e.g. sprinkler valve) fault • interface equipment fault • isolations • loss of signal • power failure/depletion • pump runs
Alarm connections and disconnections may include:	• fixed line services • internet protocol connections • public switch telephone network (PSTN) • wireless
Maintenance of alarm monitoring may include:	• follow up checks • notification of alarm faults and communications failures • review of faults
Databases may include:	• manual systems • relational databases • spreadsheets/tables

PUAECO008A Receive and action notification of uncontrolled hazardous materials situations

Modification History

PUAECO008A Release 2: Layout adjusted. No changes to content.

PUAECO008A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to receive and action incoming calls and enquiries about an uncontrolled hazardous materials situation.

'Hazardous materials' is a generic term used to refer to an incident involving any material such as ***dangerous goods*** and ***hazardous substances*** that poses an unreasonable risk to life, property and the environment.

Application of the Unit

This unit applies to personnel who process emergency calls for assistance and routine enquiries in an emergency communications centre.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

PUAECO001A Operate telephony systems.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather information in relation to a call/enquiry about an uncontrolled hazardous materials situation	1.1 Caller is questioned, prompted and/or interrogated about the potential hazardous materials situation. 1.2 A range of ***sources*** is used to identify hazardous materials information based on information received from the caller. 1.3 ***Specific hazardous materials*** present at the scene are identified.
2. Analyse information gathered in relation to an uncontrolled hazardous materials situation	2.1 Information about the dangerous good or hazardous substance is ***gathered*** using a range of sources. 2.2 Information obtained from the caller is assessed to determine the level of immediate risk to personnel and the public. 2.3 Information gathered about dangerous good or hazardous substance is ***interpreted.*** 2.4 Information accessed about appropriate safety precautions and remedial action is applied to the current situation.
3. Transmit appropriate information to attending personnel	3.1 Relevant information about the hazardous material, potential risk and safety precautions is conveyed to attending personnel, in accordance with organisational procedures. 3.2 Information transmitted is recorded in accordance with organisational procedures. 3.3 ***Resources*** appropriate for use in hazardous materials situations are located and dispatched.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply organisational policies, procedures and guidelines
- interrogate and obtain, sufficient relevant information relating to a hazardous materials situation from the caller
- operate communications centre equipment
- recognise an uncontrolled hazardous materials situation from information received

© Commonwealth of Australia, 2025 Public Skills Australia

- record or retrieve information accurately
- type with speed/accuracy in accordance with organisational specifications

Required Knowledge

- equipment and vehicle types used in uncontrolled hazardous materials situations
- nature and properties of hazardous materials
- organisational policies, procedures and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisational predetermined response for hazardous materials incidents
- resource location
- roles of other agencies attending an uncontrolled hazardous materials situation
- types of protective clothing/equipment appropriate to a range of uncontrolled hazardous materials situations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • interrogate a caller to determine whether hazardous materials are present at a scene and obtain sufficient relevant information to be able to confirm the type of hazard present, using a range of documentation • access information about a hazardous material, personal protective clothing and equipment requirements, and safety considerations by using a range of documentation and transmitting this information to the field. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include a range of different hazardous materials situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace.

© Commonwealth of Australia, 2025 Public Skills Australia

	Specific resources for assessment Access is required to: • agency protocol documentation • back-up systems • operations and systems manuals • organisational documentation • reference material relevant to hazardous materials identification • relevant databases • telephony system • training databases, where available • training manual • workplace expert/s.
Method of assessment	This unit may be assessed with the following units: • PUAECO002A Process emergency incident calls and enquiries • PUAECO003A Operate and control radio networks • PUAECO004A Operate computer aided dispatch system. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

© Commonwealth of Australia, 2025 Public Skills Australia

wording in the Performance Criteria is detailed below.

Dangerous goods are:	• substances which are either specifically listed in the Australian Dangerous Goods (ADG) Code, or meet the classification criteria of the ADG Code • materials and articles that are considered to present, in most cases, an immediate risk to people, property and/or the environment if they are not properly controlled during handling, transportation or storage; these risks are described in terms of the nine classes in the ADG Code

Hazardous substances are:	• substances which:
	  • are listed in the national occupational health and safety commission's list of designated hazardous substances [nohsc: 10005 (1999)], or
	  • have been classified as hazardous substances by the manufacturer or importer, in accordance with the national occupational health and safety commission's approved criteria for classifying hazardous substances [nohsc: 1008 (1999)]
	• any substance that is assessed by an emergency service as likely to endanger people, property or the environment and includes:
	  • dangerous goods
	  • hazardous substances
	  • scheduled poisons
	  • listed wastes
	  • radioactive substances
	  • environmental pollutants

Sources used to identify hazardous materials information may include:	• databases/documents:
	  • books designed specifically to assist in the identification, storage and handling of hazardous materials
	  • electronic databases
	  • emergency procedure guides
	  • information cards
	  • material safety data sheets
	  • safe storage and information handling cards
	  • storage manifests
	  • transport documents
	• human resources such as:
	  • personnel within the organisation
	  • personnel from other agencies

© Commonwealth of Australia, 2025 Public Skills Australia

	• organisations who store or convey hazardous materials • members of the public reporting an uncontrolled hazardous materials situation (prompting and/or interrogation processes may be required to ensure accurate recognition of the situation) • technical experts (such as chemists)
Specific hazardous materials may include:	• agricultural chemicals • asbestos • biological warfare agents • biomedical hazards • boiling liquid expanding vapour explosions • chemical warfare agents • clandestine drug laboratories • cryogenic liquids and refrigerated gases • radiation
Gathering information about the dangerous good or hazardous substance may include:	• chemical names and CAS numbers • dangerous goods class labels • emergency information panels • packing groups • placarding • product names or trade names • proper shipping names • storage manifests • transport documents • un numbers
Interpreting information gathered about dangerous good or hazardous substance may include:	• emergency response guide books • HAZCHEM code • NFPA code • European marking ADR hazard identification numbers • emergency procedure guides • electronic databases • HAZMAT action guides • material safety data sheets • safe storage and handling information cards • technical advice
Resources may include:	• personal protective clothing and equipment • personnel • response equipment

PUAECO009A Coordinate emergency communications centre operations

Modification History

PUAECO009A Release 2: Layout adjusted. No changes to content.

PUAECO009A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to coordinate the day-to-day operational readiness of the emergency communications centre, to ensure sufficient resources to run the centre and to ensure the service meets organisational standards.

Application of the Unit

This unit applies to senior operators/team leaders/shift supervisors of an emergency communications centre.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Coordinate availability and deployment of resources	1.1 Allocation and deployment of ***resources*** is monitored, and adjusted to ensure they comply with organisational policies, operational procedures and incident requirements. 1.2 Emergency communications centre operators are assisted by making ***incident resourcing decisions*** prior to the arrival of resources at an incident. 1.3 Coordination and liaison with ***support services and other agencies*** is maintained to optimise incident resourcing. 1.4 ***External requests and notifications*** are managed and actioned.
2. Support emergency communications centre team	2.1 Shift activities of the team are allocated, supervised and reviewed. 2.2 ***Situations that arise*** during a shift period, including responsibility for assigned personnel, are managed. 2.3 Emergency communications centre is coordinated during routine and peak periods of operational activity. 2.4 Liaison is maintained with senior management and on-call personnel. 2.5 Rosters are maintained in accordance with level of responsibility. 2.6 Shift changes are managed to facilitate effective hand over. 2.7 Welfare and safety of personnel are monitored and appropriate action is taken as required.
3. Manage emergency communications centre facility	3.1 ***Physical resources*** required for the operations of the centre are maintained at an appropriate level. 3.2 Equipment maintenance processes and procedures are implemented. 3.3 System faults and equipment failures are analysed and remediated.
4. Collect and analyse data, and prepare reports	4.1 Accurate completion of incident records by emergency communications centre operators is monitored and action is taken to address any identified gaps. 4.2 Required statistical data is collected and maintained.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Routine and specific reports are prepared for senior operational staff and managers. 4.4 Data relative to emergency communications centre's performance is collated and reported on. 4.5 Internal and external complaints are investigated and reported on. 4.6 Inquiry and other evidence is prepared for manager, senior officers and other agencies and authorities. 4.7 Debriefings and briefings are conducted and attended as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse data and write reports
- identify equipment fault/s
- lead personnel
- make decisions and prioritise actions
- manage complaints
- manage self and others effectively within stressful environments
- manage time effectively
- operate and troubleshoot equipment and systems
- operate under general direction and limited supervision
- participate as a member of the management team as required
- provide continuous feedback to personnel
- retrieve and collate data from the organisation's system
- use research tools

Required Knowledge

- administrative guidelines
- all equipment used in the emergency communications centre
- areas and resources as required
- data sources
- delivery standards, benchmarks, quality assurance measures
- incident management systems, where appropriate
- industrial agreements
- maintenance arrangements

© Commonwealth of Australia, 2025 Public Skills Australia

- memoranda of understanding
- operating systems
- organisational plans
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- rostering methodology (manual and/or electronic)
- service level agreements
- staff occupational health, safety and welfare (OHSW)
- standard administrative procedures
- standard operating guidelines and procedures
- telecommunications networks
- work instructions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • supervise people to meet service delivery standards • maintain the day-to-day functions of the emergency communications centre during all periods of activity • analyse and report on centre operations • work within OHSW guidelines. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace under conditions expected in the workplace. **Specific resources for assessment** Access is required to: • appropriate systems • emergency communications centre

© Commonwealth of Australia, 2025 Public Skills Australia

	• maintenance schedules • organisational documentation • reports • workplace expert/s.
Method of assessment	This unit may be assessed with the following unit: • PUAECO010A Maintain standards of emergency service delivery. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Resources may include:	• appliances • equipment • global information system • personnel • situational report information
Incident resourcing decisions may include:	• downgrading incident • escalating incident • referring to incident controller or senior officer
Support services and other agencies may include:	• ambulance • internal divisions and support areas • other agencies

© Commonwealth of Australia, 2025 Public Skills Australia

	• other fire services in own and other jurisdictions • state/territory emergency services • utilities
External requests and notifications may include:	• hazmat • ministerials • other agencies • road and traffic information • tide information • utilities • weather warnings
Situations that arise may include:	• administrative duties • attendance at meetings • attendance at training • change of roles/functions • staff breaks • staff illness
Physical resources may include:	• building maintenance • consumables • hardware • keys and security passes • office equipment • parking • stationery • uniforms

PUAECO010A Maintain standards of emergency service delivery

Modification History

PUAECO010A Release 2: Layout adjusted. No changes to content.

PUAECO010A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to maintain service delivery standards.

The unit addresses the knowledge and skills necessary to maintain emergency service delivery in a defined area.

Application of the Unit

This unit applies to senior operators/team leaders/shift supervisors in an emergency communications centre who are responsible for ensuring that service delivery standards are maintained to meet performance requirements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ensure service delivery coverage is maintained	1.1 ***Threats and events*** that are likely to impact on the emergency communications centre's ability to maintain ***service delivery*** are identified. 1.2 Emergency communications centre functions and resources are managed to ensure service delivery is maintained to a high level of operational readiness. 1.3 Coordination and supervision of ***activities within the emergency communications centre*** ensures a high level of operational readiness is maintained. 1.4 Service delivery requirements and gaps are identified. 1.5 Appropriate available resources are ***redistributed*** to address identified ***coverage gaps*** to maintain service delivery.
2. Ensure service delivery standards are met	2.1 Inter- and intra-agency policies and ***response protocols*** are implemented and adhered to. 2.2 Appropriate ***reserve resources*** are made operational to maintain service delivery. 2.3 All decisions and actions are in accordance with ***organisational procedures*** and agreed service delivery standards. 2.4 Duties are delegated and re-allocated according to fluctuations in demand and agency procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively with peers and agency management
- identify improvements/amendments to policy, systems and procedures
- identify threats and events that will impact on resource availability
- interpret warnings and forecasts and predict the impact on the emergency communications centre operations and resource availability
- liaise with appropriate agencies to meet service delivery requirements
- maintain emergency communications centre staffing levels during times of peak

© Commonwealth of Australia, 2025 Public Skills Australia

workload
- maintain emergency communications centre welfare requirements during times of peak workload
- manage emergency communications centre functions during periods of peak workload
- record incident and/or event information accurately in accordance with organisational requirements

Required Knowledge

- capability and availability of reserve resources
- capability of available resources
- inter- and intra-agency contacts
- inter- and intra-agency policies and response protocols
- organisational requirements for mobilising resources

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • identify the potential for a loss of service delivery • promptly identify resources to be positioned to prevent loss of delivery service • relocate/redeploy resources to maintain service delivery • allocate/deploy resources to minimise disruption to service delivery. **Consistency in performance** Competency should be demonstrated over time during emergency communications centre operations or simulated operations that include critical and non-critical situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace environment under conditions expected in the workplace. **Specific resources for assessment** Access is required to:

© Commonwealth of Australia, 2025 Public Skills Australia

	• computer aided dispatch system • live environment • organisational-specific documents • service delivery standards/agreements.
Method of assessment	This unit may be assessed with the following unit: • PUAECO009A Coordinate emergency communications centre operations. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Threats and events may include:	• industrial and civil unrest • infrastructure failures (road, rail, water, telecommunications, etc.) • large-scale incidents (such as major weather events, campaign bushfires, flooding, hydrocarbon spills, coastal erosion, drought) • major assets left unprotected (such as airports, refineries, nuclear reactor at Lucas heights) • major drill and training exercises • major events (APEC, olympic games, world youth day, grand prix)

© Commonwealth of Australia, 2025 Public Skills Australia

	• natural disaster and weather warnings • pandemic disease • planned infrastructure outages (water, roads, bridges) • terrorist warnings • war
Service delivery may include:	• emergency communications centre staffing • government and legislative requirements • maintaining equipment and vehicles • maintaining people skill sets • occupational health, safety and welfare (OHSW) requirements • peak load staffing • public expectation • resource availability
Activities within the emergency communications centre may include:	• call taking • dispatch • emergency management • maintaining resource availability • notifications • OHSW requirements • radio operations • reporting • staffing and rostering • training
Redistributing resources may include:	• alternate routes • alternate staffing • maintaining skill levels • moving people and equipment around • mutual aid agreements • peak load staffing • protecting special risks • training • transportation • use of part-time and volunteer staff
Coverage gaps may include:	• crew shortages • equipment and systems failures • industrial and civil unrest • inter- and intra-agency agreements not complied with • infrastructure failures • major assets unprotected

© Commonwealth of Australia, 2025 Public Skills Australia

	• major event planning • major incident activity • pandemic disease affecting staff/volunteer availability • reduced resource cover • specialist resources depleted or unavailable • training • volunteer availability • war
Response protocols may include:	• alarm response protocols • changed responses due to external influences • climate factors • crew changes • cross-border responses • embassies and consulates • inter- and intra-agency requirements • mutual aid agreements • natural and manufactured disasters • response into commonwealth and military installations • special risks
Reserve resources may include:	• cross-border resources • hired or leased equipment • military • mothballed resources • off-duty staff • operational support staff • part-time and volunteer staff • resources from other agencies • senior officers • training staff
Organisational procedures may include:	• awards and industrial agreements • contracts • inter-agency agreements • legislation • memoranda of understanding (MOUs) • mutual aid agreements • organisation’s approach to environmental management and sustainability • performance indicators • qualifications • rank structure

PUAECO011A Support logistics in the field

Modification History

PUAECO011A Release 2: Layout adjusted. No changes to content.

PUAECO011A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to ensure people in the field receive resources they need as efficiently as possible.

Application of the Unit

This unit applies to low level logistical support during an incident.

The supervisor oversees this activity across the emergency communications centre.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm logistics requirements	1.1 Resource requirements are ***clarified.***
	1.2 Location of resources required is confirmed.
	1.3 Requests are verified and authority is confirmed.
	1.4 Resource requirements are documented/logged, in accordance with agency requirements.
2. Procure logistics logged	2.1 Database is interrogated.
	2.2 Currency of database is maintained.
	2.3 Agency ***reference material*** is used, as appropriate.
	2.4 Other agencies are contacted for resources as necessary.
	2.5 Predetermined supplier list is accessed as required.
	2.6 Appropriate resource is located.
	2.7 Field is advised of procured resource/s.
3. Deploy logistics	3.1 Deployment method/s are determined and arranged.
	3.2 Deployed logistics are tracked.
	3.3 ***Feedback from the field*** is investigated and actioned where possible.
	3.4 Documentation is completed as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate and listen effectively
- operate under general direction and limited supervision

Required Knowledge

- agency procedures and process for acquiring resources
- agency resources
- financial delegations approval
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- resource caches

© Commonwealth of Australia, 2025 Public Skills Australia

- types of incidents

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • meet demands requested from the field in a timely manner • access documentation and resources. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • emergency communications centre • database/information/reference sources.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Clarifying resource requirements may include:	• colour • number • quantity • quality • size • specifications • timeframe • type
Reference material may include:	• pre-incident plans • operational emergency plans • list of preferred contractors • telephone books • website • standard operating guidelines (SOGs)
Feedback from the field may include:	• arrival of resources • resource suitability • resource tracking • timing

PUAEME001B Provide emergency care

Modification History

Release	TP Version	Comments
2	PUA12 V1	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the competency to provide emergency care pending the arrival of appropriately qualified personnel.

Application of the Unit

This unit applies to all public safety workers who are required to provide initial life-saving emergency care at an incident. It is not designed for workers whose primary response role is one of emergency care, first aid, or pre-hospital care.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR201B Prevent injury (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify need for emergency care	1.1 Initial assessment is made of extent and nature of emergency care required. 1.2 Initial assessment is communicated to appropriate personnel in accordance with ***organisation's policies and procedures.***
2. Ensure personal safety of carer and casualty	2.1 Hygiene is maintained for protection of self and casualty. 2.2 ***Hazards*** to the carer are identified and ***appropriate action*** taken to safeguard against injury.
3. Reassure casualty	3.1 A calm, ***caring*** and reassuring ***manner*** is adopted in interaction with the casualty and others at the scene. 3.2 Casualty is made comfortable using available resources.
4. Assess casualty and implement emergency care procedures	4.1 Casualty assessed for DRABC. 4.2 Vital signs are continually monitored, recorded and any changes considered in planning ***treatment*** and reported as appropriate. 4.3 Treatment appropriate to the casualty's injuries is provided in line with approved ***first aid techniques and standards.*** 4.4 First aid ***equipment*** is operated in accordance with manufacturer's procedures and instructions, and organisational standards, policies, procedures and protocols. 4.5 Casualty's condition is monitored and reported in accordance with organisation's policies and procedures and treatment modified as necessary. 4.6 Treatment is maintained until qualified medical help takes over.
5. Work cooperatively with personnel from other organisations	5.1 Clear and comprehensive reports are provided to personnel involved in ongoing casualty care. 5.2 Members of other emergency services are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	assisted in their tasks in accordance with organisation's standards and personal level of responsibility and competence.
6. Recover and restore first aid equipment	6.1 First aid equipment is recovered, cleaned, inspected/tested, stored, restocked and resupplied and medical waste disposed of safely according to organisation's polices and procedures.
	6.2 First aid equipment faults are rectified and/or reported in accordance with organisation's policies and procedures.
7. Complete documentation	7.1 ***Documentation*** is completed and processed in line with legislative, regulatory and organisation's requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating verbally with casualties and others
- completing forms
- following procedures
- providing verbal reports to paramedical personnel
- remaining calm under time pressures and in difficult situations
- working with others in a team situation
- writing reports

Required Knowledge

- Occupational Health and Safety guidelines for lifting and carrying
- systems of the body:
  - respiratory
  - skeletal
  - digestive
  - circulatory
  - nervous
  - urinary
  - skin
- causes and management of unconsciousness
- priorities for life support in emergencies including the DRABC (danger, response,

airway, breathing ventilation and circulation assessments) model
- Health Department guidelines for personal hygiene
- Australian Resuscitation Council resuscitation guidelines
- applying resuscitation techniques
- controlling bleeding
- casualty assessment
- principles of initial casualty management
- management of fractures and soft tissue injuries
- management of burns
- personal level of responsibility
- limitations
- competency

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency in this unit must be established through the practical demonstration of first aid skills, maintaining universal precautions and safety awareness.

Accurate documentation and a caring approach to injured persons during first aid activities are critical.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Exercise or simulation, or a series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

Access to first aid equipment used in general operations is essential.

Range Statement

Conditions under which this competency may be required

- operating during any rescue or response situation including specialist rescue

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• hazardous environmental conditions—adverse weather • after dark operations • difficult terrain • debris • traffic • time pressures • varying time frames—short term • sudden impacts • protracted response operations • limited access to equipment necessitating the use of improvised techniques
Equipment may include:	• first aid kit • personal protective equipment • stretchers including improvised
Details of incident obtained from:	• casualty • visual assessment of scene • others at scene
Maintaining personal safety may include:	• washing hands • using gloves
Caring manner may include:	• personal introduction and identification consistent with other priorities • showing empathy • communication with casualty • voice tone and volume • reassurance and gentle treatment all in a culturally appropriate manner
Hazards may include:	• bodily fluids • traffic • environmental hazards • downed wires • bystanders • drugs • sharps
First aid techniques and standards may include:	• Guidelines to Australian Resuscitation Council resuscitation standards • State and Territory regulations
Others may include:	• family • friends at scene
Appropriate action may include:	• protecting scene • isolating scene

© Commonwealth of Australia, 2025 Public Skills Australia

	• relocating casualty
Reporting as appropriate may include:	• team leader • supervisor • medical personnel • paramedical personnel • emergency medical technician
Treatment includes:	• applying resuscitation techniques • controlling bleeding • managing fractures • managing soft tissue injuries • dressing burns and scalds
Qualified health care personnel may include:	• specialist personnel • medical personnel
Organisation's standards, policies, procedures and protocols may include:	• legislation relevant to the provision of emergency care • legislation relevant to the organisation • operational Standard Operating Procedures • operational performance standards
Reporting casualty's condition may include:	• need for confidentiality • status on arrival • treatment provided • history • observations made • changes in conditions • timeframes
Documentation may include:	• written reports • casualty details • approved forms • verbal report • personal notes
Moving casualty may include:	• individually or with assistance • observing decency in regard to culture • a range of manual handling techniques and lifts and carries
Processing documentation may include:	• providing reports to authorised personnel • filing reports • diary entries • logs

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess scene	1.1 Initial ***assessment*** is made of extent and nature of emergency care required.
	1.2 Hazards to self and others are identified and appropriate action taken to safeguard against injury.
	1.3 Identify and communicate additional or specific resource requirements.
2. Assess casualty	2.1 Identified injuries are managed in line with approved emergency care.
	2.2 ***Treatment*** is monitored, assessed and ***management plan*** amended appropriately in response to changes in condition of the casualty and/or environment.
	2.3 Additional or specific ***resources*** are identified.
3. Implement emergency management procedures	3.1 Immediate life saving treatment is administered as determined.
	3.2 Signs and symptoms of shock are recognised and managed.
	3.3 Vital signs are monitored and recorded at regular intervals.
	3.4 Equipment is used according to casualty's condition, availability and to organisation's procedures.
4. Move the casualty	4.1 ***Moving casualty*** to a safer location is assessed.
	4.2 Casualty is moved in accordance with operational standards.
	4.3 Continual assessment of casualty is conducted in accordance with organisation's procedures.
	4.4 Treatment is maintained while moving patient.
5. Complete documentation	5.1 Details of casualties' condition, treatment and response to treatment are accurately recorded in line with organisation's procedures.
	5.2 Hand over of the casualty and records to medical personnel is conducted.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate verbally with casualties and others
- provide reports to paramedical personnel
- work with others in a team situation
- remain calm under pressure
- assess casualty

Required Knowledge

- applying resuscitation techniques
- casualty assessment
- casualty management
- crush injury syndrome
- contraindications
- wound management
- basic toxicology
- environmental exposure
- spinal injuries
- head injuries
- shock:
  - absolute
  - hypovolaemic
  - relative
- legal and ethical issues in pre-hospital care
- anatomy and physiology
- haemorrhage
- cardiovascular emergencies
- hypoxia
- triage
- documentation
- communicate with casualties
- remain calm under pressure
- knowledge of current practices and procedures in emergency care

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the practical demonstration of emergency care skills including:

- maintaining universal hygiene precautions
- accurate documentation
- observation and assessment skills
- correct use of life saving equipment
- appropriate management techniques for emergency encountered

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation, or a series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team or as part of an interagency exercise. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

Access to first aid equipment used in general operations is essential.

Access may also be required to shore based transport, an ambulance or helicopter, depending on the context.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Treatment may include:

- monitor vital signs
- management of shock
- checking and maintaining an airway
- application of spinal immobilisation techniques
- applying resuscitation techniques
- utilisation of oxygen
- managing wounds

© Commonwealth of Australia, 2025 Public Skills Australia

- managing fractures
- use of life saving devices
- giving fluids orally
- use of bandages

Equipment may include:

- oxygen resuscitation
- defibrillation
- first aid kit
- stretchers
- spinal immobilisation collards
- spinal immobilisation frames/devices
- fracture immobilisation devices
- stokes litter

Assessment may include:

- environmental considerations
- casualty triage
- primary survey
- vital signs survey
- secondary survey (head to toe examination)
- evacuation procedures
- helicopter access
- nearest land/wharf based access

Moving a casualty may include:

- individually
- as a member of a team

Management plan may include:

- written
- protocols
- verbal
- transmitted

Resources may include:

- equipment
- personnel

PUAEME003C Administer oxygen in an emergency situation

Modification History

Release	TP Version	Comments
2	PUA12 V1	Layout adjusted. Application added. Range Statement reviewed.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers competency in advanced techniques for management of the administration of oxygen and ventilation of the lungs in line with the requirements of the Australian Resuscitation Council and State and Territory regulatory bodies. Expired air resuscitation is covered in the Pre-requisite unit *Provide emergency care*.

Application of the Unit

This unit applies to public safety workers who attend incidents where the use of oxygen in either life-saving or ongoing management of a casualty is appropriate.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEME001B Provide emergency care.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess casualty and develop management plan	1.1 Assessment of casualty is undertaken including vital signs, details of incident, medical/casualty history, physical appearance and other signs and symptoms. 1.2 Management plan is developed taking into account available equipment, condition of patient and special requirements of certain conditions. 1.3 Where possible casualty is assisted to a comfortable position suitable for implementation of management plan. 1.4 Casualty is encouraged and reassured as necessary to facilitate effective treatment. 1.5 Medical aid is arranged as soon as possible consistent with maintaining casualty safety.
2. Check equipment	2.1 ***Pre-use check*** of safety and potential effectiveness of equipment is undertaken in accordance with operating procedures, Australian standards and ***regulatory requirements.*** 2.2 Minor faults are diagnosed and repairs are carried out in accordance with organisation procedures to restore equipment to working order. 2.3 ***Faults and defects are reported/recorded*** according to organisational procedures.
3. Maintain unobstructed airway	3.1 Airway is cleared and maintained using non-intervention techniques where possible. 3.2 Appropriate steps are taken to reduce risk to self or others of contamination by the casualty's body fluids. 3.3 Where carried, suction apparatus is safely ***inserted into pharynx*** and suction initiated using approved techniques to avoid injuring casualty.
4. Resuscitate casualty	4.1 Where appropriate face masks and other ***barriers*** are used according to ARC standards.
5. Use oxygen to provide	5.1 Where indicated, oxygen therapy is used in the

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
therapy	ventilation of casualty.
6. Recover and restore equipment	6.1 Equipment is cleaned, and discarded or disinfected, restocked and/or replenished and stored safely according to organisation procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- determining oxygen pressure and volume content of cylinders
- reading oxygen content gauges
- use of resuscitation equipment

Required Knowledge

- air passages
- Australian Resuscitation Council standards
- Australian Standards relevant to resuscitation equipment
- causes of hypoxia and hypoxic hypoxia
- correct use of oxygen cylinders and devices
- disease and chronic airways lesions (COAD/CAL)
- estimation of duration of oxygen supply
- importance of oxygen to the body
- indicators of obstructed breathing
- lower airways diseases
- management of COAD/CAL casualties
- possible causes of hypoventilation
- precautions for safe storage and handling of oxygen cylinders
- principles of operation and troubleshooting
- respiratory system- lungs
- resuscitation and kits - specifications
- significance of respiratory noises
- signs and symptoms of chronic obstructed airways
- techniques for maintenance of unobstructed airway
- the mechanism of respiration

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Use of oxygen equipment in accordance with relevant standards and guidelines.

Consistency in performance

Evidence will need to be gathered over time across a range of variables.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment

Specific resources for assessment

- determining oxygen pressure and volume content of cylinders
- reading oxygen content gauges
- use of resuscitation equipment

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Pre-use check may include:
- checking existence of suitable prominent warnings about precautions to be observed
- checking for damage
- to replenish and/or restore

Regulatory requirements may include:
- Australian Resuscitation Council
- relevant State and Territory regulatory bodies

Reporting/recording faults and damage may include:
- verbal
- filling out and processing standard form

Inserted into pharynx:
- no further than the back teeth

Barriers may include:
- facemasks
- unidirectional valves
- bidirectional valves
- filters

PUAEME004A Provide emergency care for suspected spinal injury

Modification History

PUAEME004A Release 2: Layout adjusted. No changes to content.

PUAEME004A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to minimise further injury to a casualty when applying first aid and waiting for emergency medical aid.

Application of the Unit

The application of this unit in the workplace covers recognition and management of suspected spinal injuries while waiting for emergency medical aid.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations which provide a first aid service in an environment where there is a risk of spinal injuries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

HLTFA201B Provide basic emergency life support

OR

HLTFA301C Apply first aid

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify suspected spinal injury	1.1 ***Signs and symptoms*** from a conscious casualty that may suggest a spinal injury are identified. 1.2 ***Signs of life*** in an unconscious casualty are confirmed. 1.3 ***Basic life support protocols*** are followed with care for casualty's spine where casualty exhibits no signs of life. 1.4 ***Likely causes of unconsciousness that may suggest a spinal injury*** are identified. 1.5 Emergency medical aid is requested.
2. Immobilise cervical spine	2.1 Casualty is communicated with to provide reassurance and to explain the need to minimise movement of their spine. 2.2 Casualty is measured and appropriately sized cervical collar is selected. 2.3 Cervical collar is applied ensuring correct location and tension is applied. 2.4 Conscious standing casualty is assisted to supine position in accordance with organisational procedures and availability of personnel.
3. Evaluate need to move casualty	3.1 Potential ***hazards*** to first aider and to casualty are identified. 3.2 Risk of not moving the casualty while waiting for medical aid to arrive is evaluated. 3.3 Plan to move casualty is developed.
4. Prepare casualty for transport	4.1 Casualty is communicated with to provide reassurance and the need to immobilise the casualty for ***transport*** is explained. 4.2 ***Equipment*** to immobilise the casualty's spine is selected. 4.3 Immobilisation equipment is applied in accordance with manufacturer's instructions and organisational procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. Transport and monitor casualty	5.1 Casualty is transported away from hazards ensuring smooth movements are used by team. 5.2 Team is directed in coordinated lifting movement and lowering of casualty. 5.3 Casualty is ***monitored*** during transport.
6. Perform casualty handover	6.1 ***Details*** of incident are communicated to medical personnel. 6.2 ***Assistance*** is given to medical personnel as requested. 6.3 Debriefing with supervisor or other operational staff is undertaken. 6.4 Relevant log books are completed according to organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess casualty
- communicate effectively with casualty to provide reassurance
- use safe manual handling skills

Required Knowledge

- common causes of spinal injuries relevant to the work environment
- risks associated with moving a casualty with a suspected spinal injury
- safe manual handling techniques
- signs and symptoms of suspected spinal injury
- techniques for manual stabilisation
- types of spinal immobilisation equipment available

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for	Assessment must confirm the ability to:

© Commonwealth of Australia, 2025 Public Skills Australia

assessment and evidence required to demonstrate competency in this unit	• identify casualty with a suspected spinal injury • evaluate the need to move casualty with a suspected spinal injury • immobilise casualty prior to moving **Consistency in performance** Competency should be demonstrated in a range of first aid incidents or scenarios requiring management of suspected spinal injuries.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by managing suspected spinal injuries during first aid scenarios. **Specific resources for assessment** Access is required to: • equipment used in managing suspected spinal injuries
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Signs and symptoms of a suspected spinal injury may	• back or neck pain • dilated pupils

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• head injuries • headache or dizziness • increased muscle tone • loss of bladder/bowel control • loss of function in hands or feet • prioprism • tingling or lack of feeling in upper or lower limbs
Signs of life may include:	• breathing • consciousness • movement
Basic life support protocols include:	• Australian resuscitation council guidelines
Likely causes of unconsciousness that may suggest a spinal injury may include:	• diving accident • fall from a height • industrial accident • motor vehicle accident • severe penetrating wounds (impaled, gunshot) • significant blow to the head • sporting accident
Hazards may include:	• fire • traffic • water
Transport may include:	• carrying casualty • using a vehicle
Equipment may include:	• cervical collars • scoop stretchers • spine boards and strapping • stokes baskets
Monitoring casualty may include:	• Assessing vital signs such as: level of consciousness breathing rate pulse rate skin colour and temperature • Remaining with casualty
Details may include:	• casualty injuries • treatment provided
Assistance may include:	• carrying casualty • performing cardiopulmonary resuscitation (CPR)

PUAEME005A Provide pain management

Modification History

PUAEME005A Release 2: Layout adjusted. No changes to content.

PUAEME005A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to administer restricted analgesics as a part of a medically supervised first responder organisation.

State/territory licensing procedures for the storage and administration of drugs apply to this unit.

Application of the Unit

The application of this unit in the workplace covers the administration of restricted pain relief such as analgesics and aspirin, according to a medically endorsed protocol.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations that provide a medically supervised first aid service.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

HLTFA201B Provide basic emergency life support

OR

HLTFA301C Apply first aid

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify need for analgesia	1.1 Casualty's need for pain relief is identified. 1.2 ***Available options*** to relieve casualty's pain are considered. 1.3 ***Contraindications*** and ***precautions*** for use of analgesic drug are identified and use being appropriate for casualty is confirmed. 1.4 Appropriate dosage for casualty is confirmed. 1.5 Emergency medical aid is requested.
2. Access and prepare analgesic	2.1 ***Secure storage*** of analgesic drug is accessed. 2.2 ***Required documentation*** is completed. 2.3 Retrieval of correct drug within its expiry date is confirmed. 2.4 Analgesic drug is prepared according to ***required standards.***
3. Administer analgesic	3.1 Purpose of the analgesic drug is explained to casualty. 3.2 Casualty is instructed in the use of the analgesic drug. 3.3 Casualty consent to administer treatment is obtained. 3.4 Analgesic drug is administered according to required standards. 3.5 Casualty is continuously ***monitored*** while administering analgesic drug.
4. Perform casualty handover	4.1 ***Details*** of incident including analgesic drug administration are communicated to medical personnel. 4.2 Written ***record of treatment*** including analgesic drug and dosage is supplied to medical personnel according to required standards.
5. Complete analgesic use requirements	5.1 Unused analgesic drugs are disposed of in accordance with required standards. 5.2 Details of use of drugs are recorded in ***relevant logs***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	in accordance with required standards. 5.3 Debriefing/evaluation of incident is participated in.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate with casualty to provide comfort and instruction in use of analgesic drugs as required
- complete written logs and documentation
- request for an ambulance and/or medical assistance according to relevant circumstances and report casualty condition
- use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Required Knowledge

- contraindications and precautions for the use of analgesic drugs
- organisational permits for the use of restricted analgesic drugs
- organisational protocols and standard operating procedures covering the storage and administration of restricted drugs
- relevant legislation covering the storage and administration of restricted drugs
- safety procedures for the operation of pressurised gases as relevant to available analgesics
- state/territory regulatory requirements for the currency of skills and knowledge

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • identify appropriate situations to use analgesic drugs during first aid • safely administer analgesic drugs • accurately document storage and use of restricted analgesic drugs.

© Commonwealth of Australia, 2025 Public Skills Australia

	Consistency in performance Competency should be demonstrated within the requirements of a specific organisation with appropriate authority to administer restricted analgesic drugs in actual first aid situations or scenarios.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed within the requirements of a specific organisation with appropriate authority to administer restricted analgesic drugs in actual first aid situations or scenarios. **Specific resources for assessment** Access is required to: • protocols, operating procedures and organisational documentation relating to storage and use of restricted analgesic drugs from an organisation with appropriate approvals to use analgesic drug during first aid • analgesic equipment or relevant placebos used in the approved organisation
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

wording in the Performance Criteria is detailed below.

Available options for pain relief may include:	• Entinox • heat treatment for penetrating marine creature injuries • ice for local skin pain • Methoxyflurane • reassurance
Contraindications may include:	• already received maximum allowable dosage of drug • pre-existing medical conditions • specific injuries or illnesses
Precautions may include:	• pre-existing medical conditions • specific injuries or illnesses
Secure storage may include:	• drug safely secured in a first aid facility • drug safely secured in a vehicle
Required documentation may include:	• drug register • treatment report form
Required standards may include:	• manufacturer's guidelines • organisational protocols • permits for use • state/territory legislation and regulations

Continuously monitoring casualty may include:	• assessing vital signs such as:
	  • level of consciousness
	  • breathing rate
	  • pulse rate
	  • skin colour and temperature
	• remaining with casualty

Details may include:	• casualty injuries
	• drugs administered such as:
	  • type of drug
	  • dosage of drug administered
	  • time of drug administration
	• treatment provided

Record of treatment may include:	• specific organisational first aid and drug administration form • written report
Relevant logs may include:	• drug registers • incident report logs • operational logs • treatment logs

PUAEMR008B Contribute to an emergency risk management process

Modification History

PUAEMR008B Release 2: Layout adjusted. Content reviewed.

PUAEMR008B Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to participate in working groups or other forums that contribute to developing an emergency risk assessment and treatment plan for a community.

The emergency risk management process used will be developed in close cooperation with the community and consistent with the National Emergency Risk Assessment Guidelines.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers who undertake emergency risk assessments with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

This unit is relevant to individuals with specific expertise who may be invited to participate in an emergency risk assessment working group.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Clarify the community context	1.1 ***Information*** about ***known risks***, safety concerns, expectations and desired outcomes is collected and analysed. 1.2 Safety concerns, ***drivers***, recent events, community views and sensitivities are identified. 1.3 Relevant ***legislation, policies, procedures*** and existing emergency management documentation and arrangements are identified. 1.4 Input to building an initial picture of community characteristics, safety expectations and perceptions of risk is provided. 1.5 Significance of available information for own organisation/constituency is assessed and reported. 1.6 Scope and focus of a feasible emergency risk management project are determined.
2 Apply the emergency risk management methodology	2.1 Own role, organisational responsibilities, limits of authority, scope of community knowledge and expertise are outlined to other group members. 2.2 Organisational resources that can be provided to support the emergency risk management process are identified. 2.3 ***Sources of useful, credible information*** are identified through ***stakeholders***, community networks and interested parties. 2.4 Practical consultation, communication and decision making strategies are agreed. 2.5 Processes for accountability and timely communication of accurate, consistent information to stakeholders are developed.
3 Develop risk statements	3.1 Credibility, accuracy and currency of available risk

© Commonwealth of Australia, 2025 Public Skills Australia

	and treatment options	information is assessed. 3.2 Additional information is sought from specialists, organisations and other stakeholders regarding information gaps and conflicting data or views. 3.3 Risk statements are jointly developed by considering sources of risk, elements at risk and vulnerability. 3.4 Risk statements are jointly analysed by considering the consequences and likelihood of occurrences. 3.5 Input is provided to help assess the effectiveness of existing treatment strategies. 3.6 ***Treatment options*** for risks are suggested that take into account implications for stakeholders, ***practical constraints*** and established assessment criteria. 3.7 Feedback on risks and treatment options is obtained from own organisation/constituency and other stakeholders. 3.8 Recommendations are jointly developed and submitted for approval.
4	**Promote ownership for the process and outcomes**	4.1 Comprehensive consultation is undertaken at all stages. 4.2 All positions and commitments are properly authorised before being communicated to others. 4.3 Management is kept informed of project progress, proposed variations in strategy, decisions and recommendations. 4.4 Variations to commitment of resources are negotiated with management. 4.5 All stages of the process, decisions and outcomes are documented in accordance with accountability, legislative, regulatory and organisational requirements. 4.6 Opportunities for improving emergency risk management processes are reported.
5	**Work cooperatively with other participants and stakeholders**	5.1 Commitment is demonstrated by sharing knowledge and expertise, completing allocated tasks on time and encouraging others to help achieve common goals. 5.2 Meeting procedures are observed. 5.3 Accurate information is provided at all times. 5.4 Opinions and advice are contributed while appreciating the boundaries and cultures of organisations and diverse views of other participants. 5.5 A wide range of reactions and views are actively

© Commonwealth of Australia, 2025 Public Skills Australia

sought.

5.6 Language used in meetings is appropriate to the broad range of participants.

5.7 Confidentiality and sensitivity of information and meeting processes are respected.

5.8 Conflicts are resolved constructively with a minimum of fuss.

5.9 Overall community safety outcomes are placed above personal or organisational/constituency interests.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse risks and implications and impacts of proposed treatments
- demonstrate effective interpersonal interactions
- ability to work effectively in small groups
- negotiate commitment of organisation/constituency
- promote two-way communication with organisation/constituency
- research skills to identify sources of risk to the social, built, economic and natural environments
- resolve conflicts constructively
- summarise and explain key information clearly
- value diversity of views and perceptions of risks

Required Knowledge

- principles of risk management outlined in Australian Standard AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*
- principles of emergency risk management outlined in National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines*
- culture, diversity and history of communities, environments and associated concerns, issues and sensitivities, perception of risks
- concepts and principles of emergency management
- group dynamics, strategies for resolving conflict
- legislative and regulatory requirements, agency/organisational arrangements relevant to emergency risk management
- meeting procedures
- organisational requirements for the provision of information, and authorisation of resources, and approval of reports/recommendations
- roles and responsibilities of key response/recovery agencies and organisations

© Commonwealth of Australia, 2025 Public Skills Australia

- spatial information databases and presentation options
- state/territory emergency risk management guidelines

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- provide constructive information and advice based on expertise, knowledge and experience of an organisation, constituency or community
- keep their organisation/constituency informed of the emergency risk management process and outcomes and seek their regular input and feedback
- work collaboratively with other participants to achieve outcomes that contribute to improved community safety
- provide constructive input and gain organisational/constituency support for the outcomes through effective consultation and feedback

Consistency in performance

Competency should be demonstrated in a range of contexts throughout the life of a community emergency risk management project, or during components of a number of projects.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed participating in a group emergency risk management process and contributing to the joint development of a set of recommendations that address community safety in the workplace. Assessment is commonly undertaken in the context of an action learning project on-the-job.

Specific resources for assessment

Access to a community and the opportunity to contribute to an actual emergency risk management process and consider a range of community safety concerns.

Guidance information for assessment

This unit contains many transferrable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context.

Assessors should use formative assessment strategies in

© Commonwealth of Australia, 2025 Public Skills Australia

a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information may include:
- characteristics of natural, local and built environments
- demographics (population distribution, social, cultural, health status and education data)
- details of key infrastructure and emergency/support services
- economic activity reports (employment, products, services, revenue)
- government reports (e.g. environmental impacts)

Known risks may include:
- commercial activity and legal relationships
- economic
- human behaviour and individual activities
- management activities and controls
- natural events
- political circumstances
- technology/technical issues
- terrorism

Drivers may include:
- changes in community characteristics
- changes in legislation, policies and disaster/emergency management plans
- changes in insurance policies and premiums
- new sources of risk or changed perception of risk
- planning deficiencies
- recent emergency incident reports/debriefs, safety issues
- recent judicial decisions
- strategic and corporate plans

Legislation, policies and procedures may include:
- arrangements specified in emergency management, land-use, environmental or other legislation
- organisational or jurisdictional emergency risk

© Commonwealth of Australia, 2025 Public Skills Australia

	management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Sources of useful, credible information may include:	• community information booklets • credible individuals, group and community leaders • documented risk assessments by companies, organisations libraries, research reports, Australian bureau of statistics data, special needs groups, significant cultural organisations • family and historical records • media, council and emergency service personnel and records • spatial information databases
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Treatment options may include:	• avoidance of the risk • removing a risk source • changing the likelihood of • an initiating event or source of risk occurring • a hazard impacting on elements at risk • changing the consequences of an identified hazard impact • sharing the risk • retaining the risk based on an informed decision
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk

PUAEMR009B Facilitate emergency risk assessment

Modification History

PUAEMR009B Release 2: Layout adjusted. Minor edits to unit wording.

PUAEMR009B Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to facilitate development of an agreed list of prioritised risks using an emergency risk management process developed in close cooperation with the community and consistent with the Australian Standard AS/NZS ISO 31000:2009.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers who undertake emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

This unit is relevant to individuals whose role is to act as the project manager or facilitator for working groups used to conduct an emergency risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1 Identify, define and engage the community	1.1 A community profile is developed to identify broad characteristics and special needs. 1.2 Known risks, ***stakeholder*** analysis, community and agency ***sources of information*** are used to identify communication and consultation networks that may be useful. 1.3 A working group is established with an appropriate balance of expertise, representation and authority. 1.4 Group's knowledge of emergency risk management principles, terminology and processes is developed. 1.5 Means of implementing the emergency risk management process are negotiated with stakeholders. 1.6 ***Communication options*** are selected to develop a communication plan. 1.7 Need for specialised information, additional skills and expertise is identified.
2 Establish context and risk criteria	2.1 Community concerns, ***drivers/triggers***; applicable ***legislative, regulatory and organisational requirements; policies, procedures*** and desired outcomes are identified. 2.2 Objectives and scope are identified using emergency risk management ***standards and guidelines.*** 2.3 ***Information on community characteristics***, safety expectations, risk perceptions and the roles and requirements of stakeholders is collected. 2.4 ***Practical constraints***, existing treatment strategies and community expectations are considered when developing relevant ***risk criteria.*** 2.5 Draft criteria and supporting explanations are circulated widely for comment.
3 Identify and analyse risks	3.1 ***Sources of risk*** are identified by considering the interaction of hazards, communities and ***the environment***.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.2 Elements at risk are identified. 3.3 Vulnerability of communities and/or the environment is determined by considering their susceptibility and resilience to sources of risk. 3.4 Risk statements describing consequences are generated. 3.5 Risks are analysed by considering the likelihood of particular consequences occurring. 3.6 Risks are rated in accordance with agreed risk criteria. 3.7 Stakeholders are consulted throughout the process.
4 Evaluate risks	4.1 Risks requiring additional analysis or treatment are determined. 4.2 Tolerability and acceptability of risks are agreed with stakeholders. 4.3 Risk treatments are prioritised using agreed risk criteria.
5 Promote ongoing commitment and ownership for the process and outcomes	5.1 Consultation is undertaken at all stages of the process using a wide range of networks and individuals. 5.2 A variety of communication strategies is used. 5.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with accountability and audit requirements. 5.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
6 Monitor and review the process and outcomes	6.1 Emergency risk assessment is completed efficiently. 6.2 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated. 6.3 Risk register is reviewed in accordance with the review schedule or in response to drivers/triggers. 6.4 Opportunities for improving emergency management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- define and solve problems

© Commonwealth of Australia, 2025 Public Skills Australia

- demonstrate effective interpersonal interactions
- gain cooperation of stakeholders
- listen actively
- locate and interpret community information
- manage projects
- maximise the participation of committee members
- monitor and enhance team work
- negotiate agreed outcomes despite incomplete and/or uncertain information
- recognise the relevance and significance of information for the emergency risk management process
- resolve conflicts between participants constructively
- summarise and explain key information clearly
- value diversity of views and perceptions of risks

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk management process included in the current Australian Standard (AS/NZS ISO 31000:2009*Risk management—Principles and guidelines,* and companion handbook HB 327:2010 *Communicating and consulting about risk*
- risk identification tools, such as bow-tie diagram
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- explain emergency risk management concepts, the process and how to promote its benefits to a wide range of audiences
- apply the emergency risk assessment process (National Emergency Risk Assessment Guidelines)
- facilitate the development of an appropriate and sustainable emergency risk assessment in cooperation with the community and stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

- work with committee members to translate a wide range of risk perceptions, issues of concern and risk evaluation criteria into an agreed set of prioritised risks
- promote community cooperation, input and ownership for the emergency risk management process used and the outcomes
- produce an agreed risk register for a community
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources
- establish a project and see it through to produce a risk register that has broad community and stakeholder support

Consistency in performance

Competency should be demonstrated in at least two different contexts throughout the life of a community emergency risk management project, or during components of a number of projects.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed facilitating a group emergency risk management process in the workplace or in a simulated workplace environment

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context.

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Sources of information may include:	• community information booklets • credible individuals, group and community leaders • documented risk assessments by companies, organisations • family and historical records • libraries, research reports, Australian Bureau of Statistics data • special needs groups, significant cultural organisations • media, council and emergency service personnel and records
Communication options may include:	• community meetings • pamphlets/flyers/brochures • print newsletters • noticeboards • word of mouth • posters/billboards • face-to-face • email newsletters • websites • local newspapers • text messaging • social media • radio and television • video communication

© Commonwealth of Australia, 2025 Public Skills Australia

	• blogs
Drivers/triggers may include:	• changes in community characteristics • changes in legislation, policies and disaster/emergency management plans • changes in insurance policies and premiums • new sources of risk or changed perception of risk • planning deficiencies • recent emergency incident reports/debriefs, safety issues • recent judicial decisions • strategic and corporate plans
Legislative, regulatory and organisational requirements may include:	• arrangements specified in emergency management, land-use, environmental or other legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Standards and guidelines include:	• AS/NZS ISO 31000:2009, *Risk management—Principles and Guidelines* • HB 327:2010, *Communicating and consulting about risk* • ISO Guide 73:2009, *Risk management—Vocabulary* • National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines* or updates thereof. • jurisdictional or organisational emergency risk management policies and procedures
Information on community characteristics may include:	• characteristics of natural, local and built environments • demographics (population distribution, social, cultural, health status and education data) • details of key infrastructure and emergency/support services • economic activity reports (employment, products, services, revenue) • government reports e.g. environmental impacts
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning

© Commonwealth of Australia, 2025 Public Skills Australia

	• legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Sources of risk may include:	• commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human) • political circumstances • technology/technical issues • management activities and controls
The environment may include:	• social environment (individuals, families and common interest groups that form whole communities), • build environment (human-made assets that underpin the functioning of a community), • economic environment, and/or • natural environment

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1 Establish the project and working group	1.1 Applicable ***policies and procedures***, reports, records and emergency risk assessments are located and analysed. 1.2 A working group is established with an appropriate balance of expertise, representation and authority. 1.3 Group's knowledge of emergency risk management principles, terminology and processes is confirmed. 1.4 A sustainable emergency risk management process is negotiated that suits the ***community context*** and capability, ***stakeholder*** needs and ***practical constraints***. 1.5 Project management and consultation plans are developed with stakeholders. 1.6 Need for ***specialised information***, additional skills and expertise is identified.
2 Confirm risks to be considered	2.1 Existing risk assessment is reviewed for continuing relevance. 2.2 ***Sources of risk*** are identified. 2.3 Responsibility for single agency or multi-agency management of risks is identified. 2.4 Risk treatment objectives are identified in consultation with stakeholders.
3 Identify treatment options	3.1 Effectiveness of existing risk treatments is established through research and stakeholder consultation. 3.2 Community vulnerability is reconsidered as a basis for identifying treatment options. 3.3 A range of potential risk treatment options is identified through research and stakeholder consultation.
4 Evaluate treatment	4.1 ***Evaluation methods*** are agreed with stakeholders.

© Commonwealth of Australia, 2025 Public Skills Australia

	options	4.2 Treatment options are assessed and the risks and implications for stakeholders are identified for each option. 4.3 Treatment options are documented so that they are understandable by a wide range of audiences. 4.4 Feedback on likely implications and impacts of treatment options is obtained from stakeholders. 4.5 Residual risks are assessed for tolerability or acceptance. 4.6 Cost-benefit analysis is completed for each risk treatment option.
5	**Recommend treatment options for each risk**	5.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders. 5.2 Recommended options and residual risk are documented according to organisational policies and procedures. 5.3 Recommendations are submitted for approval in accordance with applicable policies and procedures.
6	**Promote ongoing commitment and ownership for the process and outcomes**	6.1 Communication and consultation is undertaken, using a range of options throughout the process. 6.2 A range of communication strategies is used. 6.3 All stages of the process, decisions taken and outcomes are documented accurately in accordance with relevant policy and procedures. 6.4 Information is provided to the community in ways that suit their language, literacy and cultural needs.
7	**Monitor and review the process**	7.1 All relevant data and contact information for key individuals and organisations is regularly reviewed for currency and updated. 7.2 Treatment options are reviewed for continuing relevance. 7.3 Opportunities for improving emergency risk management processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research and analysis skills to determine potential treatment options

© Commonwealth of Australia, 2025 Public Skills Australia

- ability to negotiate and work effectively with stakeholder groups
- ability to lead workgroups
- ability to work effectively in small groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit: cost analysis at an appropriate level
- facilitation and team leadership
- managing meetings
- negotiation and communication
- progress management and monitoring skills

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- concepts of ‘credible consequence level’, likelihood rating, confidence rating, ‘as low as reasonably practicable’ principle
- sources of demographic, geographic and economic information
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish a project and see it through to produce a set of recommended treatment options that has broad community and stakeholder support
- work with committee members to develop feasible and effective treatment options for a given set of risks
- promote community cooperation, input and ownership for the emergency risk management process used and the recommended treatment options
- obtain feedback, monitor and review the process and outcomes
- maintain momentum and achieve the project outcomes within available resources

Consistency in performance

© Commonwealth of Australia, 2025 Public Skills Australia

	Competency should be demonstrated in a range of contexts throughout the life of a community emergency risk management project, or during components of a number of projects.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed facilitating a group emergency risk management process where an agreed set of treatment options is produced for a given set of risks in the workplace or in a simulated workplace environment. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning project. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding
Community context may include:	• characteristics of social, built, natural and economic

© Commonwealth of Australia, 2025 Public Skills Australia

environments
- demographics (population distribution, social, cultural, health status and education data)
- details of key infrastructure and emergency/support services
- economic activity reports (employment, products, services, revenue)
- government reports e.g. environmental impacts

Stakeholders may include:
- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Practical constraints may include:
- arrangements, roles and responsibilities set down in existing emergency management plans
- availability of technical expertise, technology, equipment
- budgets, time, availability and capability of people
- land use planning policy, authority and regulation
- legislation covering emergency management, environmental management, safety standards, local government regulations
- limited community knowledge of emergency risk management processes and benefits
- political, social and cultural considerations

Risk treatment options may include:
- avoidance of the risk
- removing a risk source
- changing the likelihood of
- an initiating event or source of risk occurring
- a hazard impacting on elements at risk
- changing the consequences of an identified hazard impact
- sharing the risk
- retaining the risk based on an informed decision

Specialised information may include:
- community information booklets
- documented risk assessments by companies, organisations
- family and historical records
- research reports, Australian Bureau of Statistics data

© Commonwealth of Australia, 2025 Public Skills Australia

Sources of risk may include:	• media, council, and emergency service records • spatial information data • commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human); • political circumstances; and • technology/technical issues, management activities and controls.
Evaluation methods may include:	• first-pass cost-benefit analysis • analysis of treatment effectiveness • potential to create new or secondary risks • stakeholder acceptability • legal, regulatory and compliance impact

PUAEMR014A Deliver recovery services

Modification History

PUAEMR014A Release 2: Layout adjusted. Content reviewed.

PUAEMR014A Release 1: Primary release.

Unit Descriptor

This unit covers the outcomes required to deliver administrative, technical, and/or professional services in a recovery context by professionals and volunteers working within a framework of existing emergency management legislation, regulations, plans and arrangements.

Application of the Unit

The range of services provided will vary markedly with the scale and type of emergency and will address aspects of recovery in the social, built, economic and natural environments.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Guide.

Elements and Performance Criteria

1 Clarify service delivery requirements	1.1 Nature of own service role is established within the context of the overall emergency recovery strategy and ***service delivery*** model. 1.2 Scope, limits and priorities for required recovery services are confirmed with ***stakeholders***. 1.3 Range of information to be collected during service delivery is confirmed. 1.4 Effective communication is established with recovery services manager and other ***service providers*** to ensure integration of service delivery and ***collection of information***.
2 Develop an action plan for service delivery	2.1 An action plan is developed in consultation with stakeholders and to ***organisational standards***. 2.2 Service delivery implications of potential short, medium and long term recovery issues are considered. 2.3 Contingencies to address the most likely recovery issues are developed. 2.4 Strategies are implemented to ensure the well-being of all staff. 2.5 Action plan is communicated to all stakeholders.
3 Deliver recovery services	3.1 Own team members are briefed/debriefed and assigned tasks and roles consistent with their capability/capacity. 3.2 Services are delivered in a timely, flexible, equitable and culturally appropriate manner. 3.3 Services are delivered in cooperation with other service providers to ensure seamless service delivery. 3.4 All requests for services outside assigned scope are referred to the appropriate service provider. 3.5 Established protocols and administration systems are used to track jobs and expenditure. 3.6 Confidentiality of information about businesses and individuals is maintained. 3.7 Quality and progress of service delivery is monitored and adjusted within agreed scope. 3.8 Information about community needs, service level

© Commonwealth of Australia, 2025 Public Skills Australia

	activity and suggested improvements to service delivery is collected and reported to recovery services manager.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- briefing and debriefing
- data collection and evaluation, needs analysis
- high level interpersonal skills (diplomacy, tact, negotiation, conflict resolution)
- liaison with other service providers, recovery coordinators and managers
- observation, sensitivity to recognising stress behaviours and recovery needs
- organisation and project management skills (prioritising, resource assessments and allocations, use of relevant equipment)
- team work
- verbal and written communication with a wide range of community members, professional and administrative personnel

Required Knowledge

- fundamentals of recovery operations outlined in Australian Emergency Management Handbook 2, *Recovery*
- Jurisdiction recovery assistance programs (relevant to service role)
- awareness of cultural and linguistic diversity and availability of translation/interpreter services
- common impacts of emergencies on communities and individuals
- community development approaches and strategies
- community contexts (social, political, economic, cultural, environmental)
- delegations and administrative processes
- OH&S issues relating to services delivery
- organisational budgeting and financial management
- protocols for information management and liaison with the public and media
- recommended approaches to recovery service delivery (relevant to service role)
- relevant legislative/regulatory framework, local/state/territory emergency management arrangements

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- deliver recovery services safely, effectively and efficiently
- collect accurate information about community needs and services
- monitor and adjust service delivery within agreed scope
- communicate effectively with recovery managers, other service providers and the community

Consistency in performance

Competency should be demonstrated in at least two contexts (either simulated or real-life) such as:

- throughout the life of a recovery operation
- during components of a number of operations

Context of and specific resources for assessment

Context of assessment

Competency should be assessed delivering recovery services in the workplace or in a simulated workplace environment.

Specific resources for assessment

Access is required to community and the opportunity to deliver recovery services during an actual or simulated emergency.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency recovery context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment may not be possible in a real-world environment and assessors should confirm that simulated environments are sufficiently complex to be realistic.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Service delivery may include:

in the social environment:

- community development
- health and medical needs
- pastoral care, counselling, mental health services
- registration, public information, immediate relief services e.g. temporary accommodation, food, transport, relocation
- cultural support and support for people with mobility, vision and hearing impairment and people with a cognitive disability
- tourists and persons from interstate and overseas

in the built environment:

- debris removal
- structure assessment, stabilisation and demolition
- restoration of essential services (power, water, hospitals, schools)
- restoration of lifelines and communication services, transport links, public transport, supply chains
- re-establish commercial and retail facilities

in the natural environment:

- containment of hazards, decontamination and removal of hazards
- habitat restoration/revegetation/rehabilitation
- erosion stabilisation
- threatened species
- prevent further contamination e.g. weeds, fungal disease

in the economic environment:

- restoration of banking and other financial services
- appeals and donations
- economic redevelopment strategies, business and industry recovery packages
- employment issues
- financial advice, insurance advice
- grants and personal support programs e.g. financial relief

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups

© Commonwealth of Australia, 2025 Public Skills Australia

- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Service providers may include:

- architects, engineers, planners, builders
- business recovery advisers
- Australian/state/territory/local government program administration staff
- financial advisers
- bank officers
- insurance assessors
- non-government and community service organisation staff
- personal support staff such as social workers, public health workers, and advocates
- mental health professionals such as psychiatrists, psychologists, counsellors
- suppliers of demolition and debris removal services
- suppliers of earthworks, road making and revegetation services
- utility workers (power, water, drainage, sanitation, garbage)

Collection of information may include:

- collection strategies that recognise the diverse cultural, language and linguistic needs of the community
- feedback from briefings and debriefings
- phone calls and surveys about unmet community needs and service effectiveness
- reports on expenditure, resource availability and use, staff welfare
- summaries of damage assessments, service requests, jobs completed, daily/weekly logs

Organisational standards may include:

- arrangements specified in legislation or regulation
- organisational or jurisdictional emergency recovery policies or procedures
- existing recovery plans, agreements or memoranda of understanding
- Australian Emergency Management Handbook 2, *Recovery*

PUAEMR015A Establish and manage a recovery centre

Modification History

PUAEMR015A Release 2: Layout adjusted. No changes to content.

PUAEMR015A Release 1: Primary release.

Unit Descriptor

This unit covers the outcomes required to set up and daily operate a 'one stop shop' or recovery centre; to provide comprehensive recovery services (excluding shelter); and to eventually close the centre. The mix of recovery/outreach services provided may change throughout the life of the centre to reflect a changing emphasis from short term relief to long term recovery.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people with the responsibility for the management of a recovery centre. This may involve management of centre infrastructure; promotion of the centre; management of paid and volunteer staff in a stressful environment; administration, information and financial management; and the coordination of service providers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the facility	1.1 Emergency ***recovery plans and arrangements***, manuals and contact lists are located and implemented. 1.2 Facility's useability and convenience are assessed given the likely scale of the emergency and impacts. 1.3 Centre's ***initial resource needs*** are assessed and suppliers are selected. 1.4 Relevant financial regulations, administrative procedures and delegations are clarified and applied. 1.5 Utilities and communications are connected and equipment/materials are acquired in accordance with relevant procedures. 1.6 Links with existing and emerging ***stakeholders*** are established to determine their involvement in the centre. 1.8 Regular communication with the recovery committee/recovery manager is established. 1.9 ***Layout of the centre*** is designed/organised to optimise efficiency, privacy, security and OH&S.
2. Manage human resources sustainably	2.1 Capacity/capability of available ***personnel*** is assessed and appropriate roles and responsibilities are assigned. 2.2 Regular operational ***briefings*** are provided to update staff. 2.3 A process for the screening, induction and integration of new staff is established. 2.4 Strategies to ensure well being of all staff are implemented. 2.5 Staffing contingency plans and rosters are adjusted to suit changing needs and circumstances.
3. Manage physical resources	3.1 An accurate assets register is established and maintained. 3.2 Regular facility maintenance is organised.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 Accurate records of consumables and equipment use are maintained.
	3.4 Expenditure is tracked and administered in accordance with relevant financial regulations and procedures.
	3.5 Risks are re assessed regularly and contingency plans are developed for expansion and back up resources.
4. Coordinate information flow and recovery services	4.1 Stakeholders are identified and a communication and consultation plan is developed, using a range of ***communication options***.
	4.2 Community is provided with accurate, current and timely ***service information.***
	4.3 Client satisfaction is monitored to ensure that enquiries are handled sensitively and efficiently.
	4.4 Accurate client files are maintained using an integrated electronic database.
	4.5 Key decisions, rationale for decisions and service activity levels are recorded to enable effective reporting and evaluation.
	4.6 Information is reported to stakeholders in accordance with established ***organisational procedures***.
	4.7 A strategy for the management of media and VIP visits is developed and implemented
5. Manage facility closure and transition to mainstream services	5.1 Transition arrangements are negotiated and publicised to ensure continuity of services.
	5.2 Public confidence in the capacity of mainstream services to meet ongoing recovery needs is promoted.
	5.3 Completeness of all ***files and information records*** is checked and rectified as necessary.
	5.4 Arrangements are made for the transport and secure storage of all files and information records.
	5.5 ***Statistical and financial summaries*** of recovery services delivered are prepared.
	5.6 An audit of equipment and materials is undertaken against the assets register, damage/loss reported and resources released/returned to providers.
	5.7 Facility is restored before returning it to its owners.
	5.8 An operational debrief is held with centre personnel to evaluate the effectiveness of the centre's operation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and service delivery, and to identify any ongoing service needs.
	5.9 Arrangements are made to ensure the smooth transition of staff to normal duties.
	5.10 All audit and reporting requirements are completed to inform future recovery planning and models of service delivery.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- data collection, analysis, synthesis skills
- high level interpersonal skills (diplomacy, tact, negotiation, conflict resolution)
- high level organisation and project management skills (prioritising, resource assessments and allocations, use of relevant equipment)
- liaison with other agencies, service providers, coordinators and controllers
- observation skills, sensitivity to recognising stress behaviours and recovery needs
- team leadership
- written communication skills (preparation of reports, information briefs to suit a range of audiences)
- working with competing/conflicting priorities and possible shortage of resources
- project management

Required Knowledge

- principles of recovery management outlined in Australian Emergency Management Handbook 2, *Recovery*
- media management techniques and sources of organisational media expertise
- characteristics of common emergency events together with related impacts, recovery needs and issues
- communication strategies for promoting the centre's recovery services
- design principles for recovery centres along with essential equipment, systems and consumables
- OH&S principles and procedures for ensuring the safety and well being of recovery operations personnel and visitors
- procedures and protocols governing centre manager role and responsibilities (e.g. financial management, coordinating appeals and donations, liaison and reporting, centre administration, media)
- range of government departments, agencies and organisations and non government service providers who contribute to emergency/disaster recovery operations,

© Commonwealth of Australia, 2025 Public Skills Australia

together with their grants, assistance programs and services
- relevant disaster recovery plans, MOUs and arrangements, contact lists
- relevant legislative/regulatory framework, local/state/territory emergency management arrangements and recovery programs
- special needs and sensitivities of affected community (e.g. cultural, language, religious, physical and dietary)

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish a recovery centre and promote its services
- communicate effectively with community members with diverse needs, perspectives and cultural backgrounds
- manage daily centre operations efficiently and sustainably
- monitor and adjust recovery services to suit changing needs
- liaise closely with other emergency managers and service providers
- maintain accurate files and records
- close the centre and manage the transition to mainstream services

Consistency in performance

Competency should be demonstrated in at least two contexts (either simulated or real-life) such as:

- throughout the life of a recovery operation
- during components of a number of operations

Context of and specific resources for assessment

Context of assessment

Competency should be assessed establishing and managing a recovery centre in the workplace or in a simulated workplace environment.

Specific resources for assessment

Access is required to the opportunity to establish and manage a recovery centre during an actual or simulated emergency situation.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency recovery context. Assessors should use formative assessment

strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment may not be possible in a real-world environment and assessors should confirm that simulated environments are sufficiently complex to be realistic.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Recovery plans and arrangements may include:	• arrangements specified in legislation or regulation • organisational or jurisdictional emergency recovery policies or procedures, including media protocols • existing recovery plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Initial resource needs may include:	• administrative systems • communications • staffing • transport • utilities
Financial regulations, administrative procedures and delegations may include::	• Australian/state/territory government financial management acts and procedures • national disaster recovery administration guidelines • organisational governance and/or financial policies and procedures
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Layout of the centre may include:	• appropriate signage • car parking

© Commonwealth of Australia, 2025 Public Skills Australia

- childminding
- floor plan to optimise access and mobility
- heating/cooling
- ICT connections
- office storage
- public noticeboard, staff information board
- reception, interview rooms, meeting/staff rooms, quiet rooms for privacy, toilets/showers, kitchen/catering facilities
- security

Personnel may include:

- architects
- engineers
- building planners
- business recovery advisers
- financial advisers
- bank officers
- insurance assessors
- non-government and community service organisation staff
- personal support staff such as social workers, public health workers, advocates and mental health professionals, interpreters
- recovery program/service managers
- Australian/state/ territory/local government administration and technical (it) staff
- volunteers

Briefings may include:

- overview of the nature and impact of the emergency
- overview of recovery purpose and operations
- detail of specific activities
- identification of persons in charge, organisations and people involved in the operation
- methods and timing of communication
- staff arrangements (such as shift timings, breaks, meals, additional support)
- resources available and not available
- emergent issues
- protocols and procedures

Strategies to ensure well-being of all staff may include:

- avoiding key dependencies
- debriefing at the end of shifts
- management of ending staff contracts
- monitoring staff workloads and performance
- organising back up with relevant agencies
- organising equitable shift rosters

© Commonwealth of Australia, 2025 Public Skills Australia

	• providing personal support • safety and security briefings • tracking staff visits
Communication options may include:	• community meetings • pamphlets/flyers/brochures • print newsletters • noticeboards • word of mouth • posters/billboards • face-to-face • email newsletters • websites • local newspapers • text messaging • social media • radio and television • video communication • blogs
Service information may include:	• available services • role • function • grants and application forms, tax forms, insurance forms • handling instructions for offered goods and services • location • nearest transport • opening times • parking • relief/assistance information
Organisational procedures may include:	• emergency recovery policies or procedures • governance and/or financial accountability policies and procedures • records management, information management and confidentiality policies and procedures
Files and information records may include:	• key communications • key decisions and their rationale • media releases • personal/operational logs • service/activity reports • situation reports
Statistical and financial	• client numbers • expenditure

PUAEMR016A Facilitate community involvement in recovery

Modification History

PUAEMR016A Release 2: Layout adjusted. Content reviewed.

PUAEMR016A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to support an affected community to develop a strategic approach to its recovery.

This support may include strengthening ongoing community capacity; enhancing the social, economic, environmental and physical infrastructure of the community; and resolving local and external issues hindering recovery.

Application of the Unit

This unit applies to workers involved in middle to senior management of an aspect of disaster recovery.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Engage the community to enhance existing community structures and networks	1.1 ***Recovery plans and arrangements***, manuals and contact lists are located and implemented. 1.2 Key ***stakeholders,*** their potential interests, sensitivities, dependencies, roles and responsibilities are identified. 1.3 Community capacity is assessed to identify gaps. 1.4 Gaps are addressed by cultivating strategic relationships; building alliances with, and between, key individuals and groups; and developing community leaders. 1.5 ***Networks***, organisations and individuals are routinely provided with opportunities to examine ***issues and concerns.*** 1.6 Opportunities are sought for involvement in community forums and decision making. 1.7 A variety of communication and consultation methods is used to provide the community with information in ways that suit their language, literacy and cultural needs.
2. Facilitate the community recovery committee's development of a strategic approach	2.1 Support is provided to establish effective governance structures. 2.2 Support is provided with the identification, assessment and prioritising of community needs and goals. 2.3 Guidance is provided about relevant ***recovery strategies*** that will address the community's multiple concerns, needs and aspirations. 2.4 Support is provided to gather and consider community feedback. 2.5 Support is provided to negotiate and select appropriate recovery strategies that promote community goals, plans and activities. 2.6 Support is provided to identify and develop strategies and links for community action. 2.7 Support is provided to regularly review the committee's strategic approach.
3. Facilitate the community's	3.1 Support is provided with identifying and mobilising existing ***resources.***

© Commonwealth of Australia, 2025 Public Skills Australia

implementation of effective recovery strategies	3.2 Strategies are suggested for accessing additional resources when required. 3.3 Resources are acquired using own networks, where appropriate. 3.4 Support is provided with developing agreed implementation plans. 3.5 Support is provided to enable community based recovery activities. 3.6 Self management strategies are employed to ensure own well-being. 3.7 Effectiveness of recovery strategies and activities, adequacy of resources and expenditure is monitored against plans. 3.8 Variations to implementation plans are suggested to accommodate changed circumstances or to achieve more effective outcomes. 3.9 Ownership is promoted by keeping stakeholders fully informed about overall recovery progress, specific activities and any variations in recovery strategies or their implementation. 3.10 Aspects of the recovery process, decisions taken and outcomes relevant to own role are documented accurately in accordance with accountability and audit requirements.
4. Facilitate sustainability of the community's recovery	4.1 Effectiveness of recovery strategies is ***evaluated*** and recommendations are made for the conduct of ongoing activities. 4.2 An agreed departure plan is developed with sufficient lead time. 4.3 Ongoing community capacity is secured by ensuring recovery plans are current, resources are adequate and structures are self sufficient. 4.4 Long term sustainability of the community is promoted. 4.5 Arrangements for transition to mainstream services and sources of indirect support are clearly communicated to all stakeholders. 4.6 All audit and reporting requirements are completed.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- advocacy, negotiation, mediation, conflict resolution
- group facilitation, leadership, motivation
- interpersonal communication
- liaison, networking with service providers, agencies
- project management including planning, budgeting, organising
- research skills, project/program evaluation
- support multiple agencies and service providers to deal with multiple problems
- work independently with limited supervision and as part of a team
- work with a broad range of diverse groups in the affected community
- work with the media

Required Knowledge

- characteristics of common emergency events together with related impacts, recovery needs and issues
- community profiling, community development principles and practices
- continuous improvement principles
- depending on the work role or services provided, specific knowledge of particular groups or issues such as alcohol and other drugs, risk of self harm, common mental health issues (e.g. trauma); cultural and linguistic diversity, Aboriginal and Torres Strait Islander issues; social policy, social action and social change
- funding sources and their policies and strategies for encouraging community input and participation
- group dynamics
- information dissemination, public speaking, using the mass media
- principles of negotiation and mediation
- relevant legislative/regulatory framework, local/state/territory emergency management arrangements and recovery programs
- structure, processes and characteristics of community based organisations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- communicate effectively with community members with diverse needs, perspectives and cultural backgrounds
- work with community members to develop effective recovery strategies

© Commonwealth of Australia, 2025 Public Skills Australia

- provide accurate information and advice as necessary
- provide links to external networks, expertise and resources as necessary
- empower the community to achieve sustainable recovery.

Consistency in performance

Competency should be demonstrated in a range of contexts such as:

- throughout the life of a recovery operation
- during components of a number of operations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed supporting community members to develop, implement and evaluate recovery strategies and activities in the workplace or in a simulated workplace environment.

Specific resources for assessment

Access is required to the opportunity to support community members during the recovery process in an actual or simulated emergency situation.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency recovery context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment may not be possible in a real-world environment and assessors should confirm that simulated environments are sufficiently complex to be realistic.

Range Statement

Recovery plans and arrangements may include:

- arrangements specified in legislation or regulation
- organisational or jurisdictional emergency recovery policies or procedures, including media protocols
- existing recovery plans, agreements or memoranda of understanding
- local planning regulations, development controls and

© Commonwealth of Australia, 2025 Public Skills Australia

	environmental plans
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Networks may include:	• business owners • rate payers associations • chambers of commerce • community groups • local organisations directly affected by the emergency • NGOs • Government agencies
Issues and concerns may include:	• access to education and training, health services, childcare • access to public information/services for people with different cultural and linguistic backgrounds • apparent rifts in community, social cleavage, isolation, apathy, bereavement • business continuity, economic sustainability • community displacement, lack of housing, loss of infrastructure • damage to built and/or natural environments • increased school absenteeism, domestic violence, child abuse, crime statistics • lack of employment, financial/income support
Recovery strategies may include:	• accessing recovery funds, assistance and resources • collection and analysis of information about impacts, needs and issues to inform recovery planning • consideration of locality development model • development of community infrastructure, programs and support • development of self-help processes • empowerment and ongoing support of new leaders • engaging non-represented individuals and groups • initiation of community action, community projects, community planning

© Commonwealth of Australia, 2025 Public Skills Australia

- keeping families intact
- promotion and enhanced accessibility/relevance for existing services to a wider group of people
- provision of information for the public and media
- working within local frameworks (e.g. local councils, local organisations and business)

Resources may include:

- general office equipment
- external expertise such as community development workers with relevant recovery experience
- funds (including petty cash) and project budget
- local intelligence and information
- administrative assistance
- background information such as:
  - recovery management plans
  - literature dealing with program and project development
  - funding submissions
  - business/calling cards
- directories (local community resources, street, existing local and recovery services)
- mobile phone
- UHF radio
- laptop computer

PUAEMR017A Manage recovery functions and services

Modification History

PUAEMR017A Release 2: Layout adjusted. PC, Required Knowledge and Evidence Guide revised.

PUAEMR017A Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to manage a range of recovery functions and services such as financial assistance, personal support programs, health services, rebuilding programs and business continuity.

It necessarily involves recovery planning (post emergency) and coordinating service delivery together with the monitoring and review of its effectiveness.

Application of the Unit

This unit applies to individuals who might be members of a recovery committee, or directly supporting such members.

People involved in managing recovery functions may include state/territory and municipal recovery coordinators and their deputies; liaison officers and managers; centre and assistance program managers; and representatives from government and non government service providers, welfare agencies, allied professionals and community and business leaders.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain, analyse and share information on impact of emergency	1.1 A comprehensive knowledge base is developed using existing networks and reliable sources of information. 1.2 ***Available data and information*** are analysed to reveal patterns and trends. 1.3 Recovery needs of the affected community and special needs of vulnerable groups are identified in consultation with ***stakeholders***. 1.4 Needs analysis is reviewed as circumstances change. 1.5 A package of recovery functions and services is designed to meet identified needs. 1.6 Analysis outcomes and chosen service model are documented and provided to relevant stakeholders and service providers.
2. Plan the delivery of recovery functions and services	2.1 Relevant agencies and community representatives are engaged in planning and decision making. 2.2 Relevant legislation, regulations and emergency arrangements are identified and applied. 2.3 Pre prepared recovery plans are applied/adapted to suit ***recovery functions and services***. 2.4 Likely impacts of the event are modelled to determine how needs and required recovery services may change. 2.5 Capacity and capability to deliver required recovery services is reviewed. 2.6 Recovery priorities are established by considering political context, public expectations, required services and available resources. 2.7 Appropriate delivery strategies are developed in consultation with stakeholders prior to community

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	endorsement and multi agency commitment.
3. Coordinate the delivery of recovery functions and services	3.1 Stakeholders and ***service providers*** are given regular, up to date information about the event, impacts, likely developments and service priorities. 3.2 Resources are managed to ensure that recovery functions and services are delivered effectively. 3.3 Workloads are managed to ensure the well being of all staff. 3.4 Incoming ***information about needs and service delivery*** is collected, analysed and used to review priorities. 3.5 Delivery of recovery functions and services is adjusted in response to changing circumstances and priorities and in conjunction with other functions and services. 3.6 Community, political and media expectations and interests are managed. 3.7 Transition to mainstream services is managed sensitively and in a timely manner.
4. Evaluate the delivery of recovery functions and services	4.1 Feedback from stakeholders and service providers is sought, collected and analysed. 4.2 ***Operational records***, minutes of meetings and records of decisions are analysed. 4.3 Instances where recovery services were deficient or poorly delivered are identified and analysed and recommendations to improve future practice made. 4.4 Evaluation outcomes are reported to key stakeholders to inform future recovery planning and models of service delivery.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analysis of information (including historical) about disaster impacts on individuals and communities and their recovery needs
- communication - lobbying, negotiating, advocacy, managing conflicts, empathy, diplomacy, chairing meetings, public speaking, active listening
- conduct high level briefings and debriefings, keeping all stakeholders informed

© Commonwealth of Australia, 2025 Public Skills Australia

- consistent, reliable judgment
- cultural sensitivity including working with translators and interpreters
- design and conduct of research
- flexibility, work under high pressure, maintain own well being
- leadership, human resource management, monitoring of staff welfare
- media liaison
- problem solving, lateral thinking
- project management including risk management
- work in multi professional teams

Required Knowledge

- community development principles and processes
- diversity of community/social aspirations, needs and values
- likely impacts on communities and individuals of emergencies and disasters, and recovery needs
- protocols and procedures for release of information
- models of recovery operations and approaches to service delivery
- organisational budgeting and administrative processes and delegations
- relevant legislative/regulatory framework, local/state/territory statutory and emergency management arrangements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- analyse recovery needs and identify required recovery functions and services
- develop effective plans for the delivery of recovery functions and services
- coordinate the effective and efficient delivery of recovery functions and services
- evaluate and report the effectiveness of delivery to inform future emergency planning.

Consistency in performance

Competency should be demonstrated in a range of contexts such as:

- throughout the life of a recovery operation
- during components of a number of operations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed managing recovery

Summative assessment may not be possible in a real-world environment and assessors should confirm that simulated environments are sufficiently complex to be realistic.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Available data and information may include:	• damage/impact and loss assessments • impact modelling • media reports • offers of assistance • requests for services
Stakeholders may include	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Legislation, regulations and emergency management arrangements may include:	• arrangements specified in legislation or regulation • organisational or jurisdictional emergency recovery policies or procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- existing recovery plans, agreements or memoranda of understanding
- Australian Emergency Management Handbook 2, *Recovery*

Recovery functions and services may include:

- in the social environment:
  - community development
  - health and medical needs
  - pastoral care, counselling, mental health services
  - registration, public information, immediate relief services e.g. temporary accommodation, food, transport, relocation
  - cultural support and support for people with mobility, vision and hearing impairment and people with a cognitive disability
  - tourists and persons from interstate and overseas
- in the built environment:
  - debris removal
  - structure assessment, stabilisation and demolition
  - restoration of essential services (power, water, hospitals, schools)
  - restoration of lifelines and communication services, transport links, public transport, supply chains
  - re-establish commercial and retail facilities
  - in the natural environment:
  - containment of hazards, decontamination and removal of hazards
  - habitat restoration/revegetation/rehabilitation
  - erosion stabilisation
  - threatened species
  - prevent further contamination e.g. weeds, fungal disease
- in the economic environment:
  - restoration of banking and other financial services
  - appeals and donations
  - economic redevelopment strategies, business and industry recovery packages
  - employment issues
  - financial advice, insurance advice
  - grants and personal support programs e.g. financial relief

© Commonwealth of Australia, 2025 Public Skills Australia

Service providers may include:

- architects
- engineers
- planners
- builders
- business recovery advisers
- financial advisers
- bank officers
- insurance assessors
- non-government and community service organisation staff
- personal support staff such as social workers, public health workers, and advocates
- mental health professionals such as psychiatrists, psychologists, counsellors
- recovery program/service managers, Australian/state/ territory/local government administration and technical (IT) staff
- suppliers of demolition and debris removal services
- suppliers of earthworks, road making and revegetation services
- utility workers (power, water, drainage, sanitation, garbage)

Information about needs and service delivery may include:

- collection strategies that recognise the diverse cultural, language and linguistic needs of the community
- feedback from briefings and debriefings
- phone calls and surveys about unmet community needs and service effectiveness
- reports on expenditure, resource availability and use, staff welfare
- summaries of service requests, jobs completed

Operational records may include:

- demographic data and community profiles
- financial records
- historical records
- incident reports and damage assessments
- media reports
- personal accounts, daily/weekly logs and file notes
- service requests

PUAEMR018A Work in an emergency management context

Modification History

PUAEMR018A Release 2: Layout adjusted. PC, Required Knowledge and Evidence Guide revised.

PUAEMR018A Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to apply emergency management concepts and principles, and jurisdictional emergency management arrangements to organisational policies, procedures, planning and decision making.

Application of the Unit

This unit applies to people who are undertaking, or are preparing to work in, an emergency management role within their organisation and/or local community and require a broad understanding of the jurisdiction's emergency management framework in order to undertake their work responsibilities.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm organisational emergency management requirements	1.1 Current versions of relevant ***emergency management information*** are accessed. 1.2 Emergency management information is reviewed to identify requirements, roles and responsibilities for different organisations. 1.3 Implications of emergency management requirements for organisational planning, policies, procedures, systems and resource allocation are identified. 1.4 Implications of emergency management requirements for ***stakeholders*** and local communities are identified. 1.5 Action plans are used in line with organisational policies and procedures.
2. Contribute to stakeholder awareness of emergency management	2.1 Application of emergency management concepts and principles to enhance the resilience of organisations and/or communities is conveyed to stakeholders. 2.2 Emergency management arrangements are explained to illustrate the multi-agency approach and to distinguish between the roles and responsibilities of key agencies/organisations. 2.3 Emergency management plans and warning strategies are explained to clarify roles and responsibilities, and to illustrate how plans and warning strategies are developed, maintained and implemented. 2.4 Reliable sources of emergency management information are accessed.
3. Support organisational/ community emergency planning and decision making	3.1 ***Strategies to prepare and engage stakeholders***/ ***organisations***/***communities*** are identified in accordance with organisational responsibilities, policies and procedures. 3.2 Appropriate methods for conducting an all hazards, risk and vulnerability analysis for the organisation/ community are identified.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 Analysis process is participated in and supported .
	3.4 Appropriate prevention/mitigation, preparedness, response and/or recovery strategies are identified in consultation with stakeholders.
	3.5 ***Planning*** and the development and/or improvement of related arrangements, policies and procedures are identified.
	3.6 Relevant components of emergency plans are implemented in accordance with organisational role and responsibilities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- discuss emergency risks and their implications, and impact of proposed treatments for an organisation/community
- identify stakeholder needs, priorities and positions
- locate and interpret emergency management related legislation, regulations, plans, policies and procedures
- locate and interpret information about an organisation/community
- outline the jurisdiction's emergency management arrangement and their impact on the organisation
- participate in/facilitate group discussion and teamwork
- summarise and explain key information clearly

Required Knowledge

- emergency risk management process as per appropriate international and Australian Standards
- legislative/regulatory requirements and agency/organisational arrangements for emergency management
- organisational policies and procedures relating to business planning, communication and consultation with stakeholders, information management, emergency management, occupational health and safety (OH&S) and environmental management
- emergency management terminology, concepts and principles as outlined in current Australian Emergency Management Handbooks

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- provide emergency management information and advice within the scope of own organisational/community role and responsibilities and consistent with jurisdictional emergency management arrangements
- work collaboratively with stakeholders to achieve outcomes that enhance the resilience of the organisation/community.

Consistency in performance

Competency should be demonstrated in a range of contexts such as throughout the duration of significant emergency management activities and during components of a number of emergency management related activities.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or a simulated workplace environment.

Specific resources for assessment

Access is required to:

- emergency management legislation, regulations, plans, policies and procedures
- relevant organisational plans, policies and procedures.

Method of assessment

This unit should be assessed with a blend of formative assessment to confirm underpinning knowledge and scenario-based or real-world projects that require candidates to apply their knowledge in context.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency management information may include:

- land use planning regulations
- legislation dealing with disasters, emergencies, OHS and the environment
- local government regulations
- regulations for handling and transporting dangerous goods
- relevant international and Australian risk management standards
- state/territory emergency risk management guidelines
- state/territory/local government and organisational emergency plans
- state/territory/local government emergency management arrangements

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Reliable sources of emergency management information may include:

- Australian Bureau of Statistics data for communities (such as population distribution, social, cultural, health status and education data)
- details of key infrastructure and emergency/support services
- documented risk assessments conducted by organisations and communities
- expert advice (including local sources)
- publications (such as Australian emergency management handbooks)
- published reports and inquiries
- real time operational information
- state/territory/local emergency (sub) plans
- state/territory/local legislation dealing with emergency management
- authoritative websites (such as Emergency

© Commonwealth of Australia, 2025 Public Skills Australia

	Management Australia)
Strategies to prepare and engage stakeholders/ organisations/communities may include:	• advertising in local media • broadcast facsimile and email messages • contacting individual organisations, professional bodies, unions and recreational/sports associations • distributing pamphlets • electronic communication warning and information systems • focus groups, workshops, surveys • initiating media interviews • letters and articles written for specific audiences • making presentations to a variety of community groups • meetings with groups, key individuals and leaders of minority/ethnic/cultural groups • preparing media releases • social media • speaking at community functions • websites
Appropriate prevention/mitigation, preparedness, response and/or recovery strategies may include:	• building codes • community education • community restoration, reconstruction • critical incident stress management, personal support and counselling • emergency management planning • financial support • land use management • legislation and regulation • mutual aid agreements • safety standards • training and exercises • warning systems
Planning may include:	• business continuity planning • emergency planning • land use planning • operational and strategic business planning

PUAEMR021A Facilitate emergency planning processes

Modification History

PUAEMR021A Release 2: Layout adjusted. PC, Required Skills and Knowledge, Range and Evidence Guide revised.

PUAEMR021A Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to collaboratively facilitate development of new, or revision of existing emergency plans in a multi-agency and community context. Such plans may focus on one or more aspects of emergency management, i.e. prevention, preparedness, response and/or recovery.

Application of the Unit

This unit applies to people responsible for developing emergency management plans within or by local government, emergency service or government agencies and departments, event organisers, utilities, critical infrastructure or high occupancy buildings, and service providers.

The unit focuses on planning which requires input from a number of different organisations and the community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the emergency planning context and framework	1.1 Authority to plan is confirmed with reference to legislation, organisational direction, community or other managerial agreement . 1.2 Planning environment is clarified by analysing ***drivers*** and risk assessment. 1.3 Considerations that may impact on the planning framework are identified and analysed . 1.4 ***Stakeholders,*** their potential interests, sensitivities, roles and responsibilities are identified. 1.5 Planning team/group is established with an appropriate balance of expertise, stakeholder representation and authority to achieve desired outcomes. 1.6 ***Emergency plan*** aims and objectives and governance framework are developed and refined with stakeholders.
2. Develop agreed planning processes and methodology	2.1 A feasible project scope is developed, considering ***practical constraints*** 2.2 Processes for negotiating outcomes, key performance indicators, information management, reporting, accountability and decision making strategies are developed and agreed within existing accountabilities. 2.3 A consultation and communication plan is developed and implemented. 2.4 Sources of expertise are identified to contribute specialised information and analysis as required. 2.5 A project plan is prepared and approved in consultation with stakeholders.
3. Undertake research and analysis for emergency management planning	3.1 Plan is regularly reviewed in response to new information or changes in resources and planning environment. 3.2 Appropriate ***research tools*** and consultation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	strategies are chosen.
	3.3 Comprehensive body of ***community information***, ***risks*** and safety expectations is ***sourced***/built/updated using credible sources.
	3.4 Effectiveness of current emergency management strategies are assessed to address the vulnerability of communities and environments by analysing their susceptibility and resilience to risk.
	3.5 The plan's role as an appropriate risk treatment is confirmed.
4. Develop/refine emergency management planning outcomes	4.1 Emergency management arrangements are reviewed or developed to identify potential gaps or duplication in roles and responsibilities.
	4.2 Emergency management strategies and responsibilities are identified and confirmed in consultation with stakeholders.
	4.3 Broad categories and types of resources and services that are likely to be required, including potential critical shortfalls, are identified.
	4.4 Financial and contractual arrangements for accessing or acquiring resources and services are developed.
	4.5 Arrangements for the command, control and coordination of any emergency response or recovery are addressed in the plan.
	4.6 Contingencies to address potential problems are developed with relevant organisations and service providers.
	4.7 Community and organisational implications of new/revised emergency management plans are identified in consultation with stakeholders.
5. Document the emergency plan	5.1 Plan is iteratively developed in consultation with stakeholders.
	5.2 Plan is prepared in a format prescribed by organisational standards and consistent with broader jurisdictional emergency management arrangements.
	5.3 Clear and concise language appropriate for the audience/s is used.
	5.4 Planning records, supporting documentation and contact information are maintained to organisational standards.
6. Validate the plan	6.1 A maintenance, audit and exercise schedule is implemented in consultation with stakeholders.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.2 Outcomes of exercise and/or review are used to refine plan in consultation with stakeholders.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- build and maintain effective networks and relationships across multiple agencies or organisations
- communicate effectively in writing
- define and provide recommendations to solve problems
- facilitate group work
- manage complex projects
- undertake research and analysis
- use effective interpersonal communication skills
- work with and consult stakeholders
- work cooperatively
- write clearly, concisely using accurate terminology

Required Knowledge

- Fundamentals of risk management included in Australian Standard AS/NZS ISO 3100:2009 *Risk management—Principles and guidelines*
- Fundamentals of emergency management planning included in Australian Emergency Management Manual 43 *Emergency Planning*
- culture, diversity and history of communities, environments and associated concerns, issues and sensitivities, perception of risks
- current state/territory/agency emergency management plans
- planning process and the impact, outcomes and benefits for stakeholders
- relevant emergency risk management terminology, concepts and principles
- relevant jurisdictional emergency management arrangements
- research tools/methodologies for geographic, demographic and economic research
- group dynamics, strategies for team building and resolving conflict
- meeting procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with

© Commonwealth of Australia, 2025 Public Skills Australia

the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- explain the emergency planning process
- develop an appropriate and sustainable emergency planning process in cooperation with planning team/group and stakeholders
- work with planning team/group and stakeholders to develop plans that are readily usable and able to be implemented effectively
- develop emergency plans that have stakeholder approval and support
- evaluate planning process and outcomes with stakeholders.

Consistency in performance

Competency should be demonstrated in at least two multi-agency contexts, with a diverse stakeholder group, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed making significant contributions to an emergency planning process either as an individual or as the representative of a stakeholder, organisation or constituency in the workplace or in a simulated workplace environment.

Specific resources for assessment

Access is required to:

- organisational community
- opportunity to participate in an actual, or simulated, emergency planning process.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation

© Commonwealth of Australia, 2025 Public Skills Australia

- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers may include:

- changes in community characteristics
- changes in legislation, policies and disaster/emergency management plans
- changes in insurance policies and premiums
- new sources of risk or changed perception of risk
- planning deficiencies
- recent emergency incident reports/debriefs, safety issues
- recent judicial decisions
- changes in strategic and corporate plans

Considerations that may impact on the planning framework may include:

- arrangements specified in legislation
- organisational or jurisdictional emergency risk management policies or procedures
- existing disaster plans, agreements or memoranda of understanding
- local planning regulations, development controls and environmental plans

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Emergency plans may include:

- plans developed to address specific risks
- plans required by commonwealth/state/territory legislation
- plans required by regulators and permit conditions

© Commonwealth of Australia, 2025 Public Skills Australia

Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency management planning processes and benefits • political, social and cultural considerations
Research tools may include:	• affinity analysis • brainstorming, visioning • cause and effect analysis, force field analysis • emergency risk management process and tools • SWOT analysis • bow-tie analysis • cost:benefit analysis
Community information may include:	• characteristics of natural, social, economic and built environments • demographics (population distribution, social, cultural, health status and education data) • details of key infrastructure and emergency/support services • economic activity reports (employment, products, services, revenue) • government reports (such as environmental impacts) • emergency risk assessment studies
Risks may include:	• commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human) • political circumstances • technology/technical issues, management activities and controls

PUAEMR022 Establish context for emergency risk assessment

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine an emergency risk assessment's objectives, scope, stakeholders, and risk criteria.

Application of the Unit

This unit applies to people required to initiate an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Identify objectives and scope by research and consultation	1.1 Objectives and scope are identified using emergency risk management ***standards and guidelines.***
	1.2 ***Stakeholder*** roles and required inputs are determined in accordance with ***policies and procedures.***
	1.3 Budget, timeframe and schedule for research and consultation are determined.
	1.4 Information about communities is obtained.
2. Identify and consult with stakeholders	2.1 Stakeholders are identified.
	2.2 Existing and potential liaison networks are identified and evaluated for relevance.
	2.3 Stakeholder networks are developed using a range of strategies.
	2.4 Communication and consultation are established.
	2.5 Communication options are selected to develop a communication plan.
3. Clarify roles and requirements with stakeholders	3.1 Stakeholders' roles and the need for their input are clearly defined and emphasised in seeking their cooperation.
	3.2 Stakeholders are informed of the aims, objectives, risk management context and structure within which they must operate.
	3.3 Stakeholders' needs are determined and conflicting needs identified and noted.
4. Develop risk criteria with stakeholders	4.1 Social, environmental, financial and timeframe needs are identified in consultation with stakeholders.
	4.2 Legal, technical and political considerations are identified in consultation with stakeholders.
	4.3 Reasons for, and selection of, criteria are negotiated with stakeholders and agreed upon.
	4.4 ***Risk criteria*** are recommended which take into account ***practical constraints*** and the community's

© Commonwealth of Australia, 2025 Public Skills Australia

	acceptance of risk.
	4.5 Community expectations of acceptable risk are established.
5. Monitor and review	5.1 Context and evaluation criteria are monitored in accordance with policies and procedures.
	5.2 Context and evaluation criteria are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- stakeholder analysis
- communication and consultation in a group context
- facilitation of group processes
- negotiation
- problem solving
- project management
- research skills to conduct geographic, demographic and socio-economic analysis

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- legislative and regulatory requirements relevant to emergency risk management
- problem solving and decision making techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Stakeholders are comprehensively identified and consulted to establish a clear context, which includes objectives, scope and risk criteria. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

resources for assessment	Evidence of competence in this unit may be collected in a simulated environment and a real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Standards and guidelines may include:	• AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines • HB 327:2010, Communicating and consulting about risk • ISO Guide 73:2009, Risk management—Vocabulary • National Emergency, Management Committee (2010), National Emergency Risk Assessment Guidelines • jurisdictional or organisational emergency risk management policies and procedures
Stakeholders may include:	• staff • client groups • decision makers • members of the public

© Commonwealth of Australia, 2025 Public Skills Australia

	• community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding
Information about communities may include:	• demographic measures • socio-economic measures • local economy and industry makeup and interdependencies • cultural makeup and mix
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning policy, authority and regulation • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations

PUAEMR023 Assess emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to identify, analyse and evaluate risk to determine which risks need treatment and the treatment priorities.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers undertaking an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR022 Establish context for emergency risk assessment

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify risk	1.1 ***Sources of risk*** are identified by considering the interaction of hazards, communities and ***the environment***. 1.2 ***Elements at risk*** are identified. 1.3 ***Stakeholders*** are consulted throughout the risk assessment process. 1.4 Risk statements describing consequences are generated.
2. Analyse risk	2.1 Risks are analysed by considering the likelihood of particular consequences occurring. 2.2 The vulnerability of communities and/or environments is determined by analysing their susceptibility and resilience to risks. 2.3 Risks are rated in accordance with agreed ***risk criteria.***
3. Evaluate risk	3.1 Risks requiring additional analysis or treatment are determined. 3.2 Tolerability and acceptability of risks are agreed with stakeholders. 3.3 Risk treatments are prioritised using agreed risk criteria.
4. Monitor and review	4.1 Evaluated risks are monitored in accordance with ***standards and guidelines.*** 4.2 Evaluated risks are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research skills to identify sources of risk to the social, built, economic and natural

© Commonwealth of Australia, 2025 Public Skills Australia

environments
- analysis skills for qualitative and quantitative risk analysis
- workshop facilitation skills
- identification of stakeholders
- negotiation with stakeholders
- problem definition
- risk analysis
- use emergency risk modelling processes to estimate risk

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- risk identification tools
- format of risk statements and risk register
- structure of risk criteria and the application of scenario dynamics (how a hazard creates consequences)
- concepts of 'credible consequence level', likelihood rating, confidence rating, 'as low as reasonably practicable' principle
- application of spatial analysis techniques
- jurisdiction or organisational emergency risk management principles and guidelines
- problem solving and decision making techniques
- research, demographic and economic analysis techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Learners must demonstrate that they can apply an appropriate method to identify risk, produce meaningful risk statements and apply risk criteria in consultation with stakeholders.

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies.

Specific resources for assessment

For the demonstration of competence in this unit it will

© Commonwealth of Australia, 2025 Public Skills Australia

	be necessary to participate a real life project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context. This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Sources of risk may include	• commercial and legal relationships • economic systems and relationships • human behaviour • natural events • built environment failures • disease (plant, animal or human) • political circumstances • technology/technical issues, management activities and controls
The environment may include	• social environment (individuals, families and common interest groups that form whole communities) • build environment (human-made assets that underpin the functioning of a community) • economic environment • natural environment
Elements at risk may include	• people • buildings and civil engineering works • infrastructure • economic activities

© Commonwealth of Australia, 2025 Public Skills Australia

	• public services • natural environment
Stakeholders may include	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Risk criteria may include	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Standards and guidelines may include	• AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines • HB 327:2010, Communicating and consulting about risk • ISO Guide 73:2009, Risk management—Vocabulary • National Emergency, Management Committee (2010), *National Emergency Risk Assessment Guidelines* • jurisdictional or organisational emergency risk management policies and procedures

PUAEMR024 Develop treatment options for emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine a range of treatment options which can be used to reduce emergency risk.

Application of the Unit

This unit applies to people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify treatment options	1.1 Risk treatment objectives are identified in consultation with ***stakeholders***. 1.2 Existing ***risk treatment options*** are identified through research and stakeholder consultation. 1.3 A range of potential risk treatment options are identified through research and stakeholder consultation.
2. Evaluate options	2.1 ***Evaluation methods*** are agreed with stakeholders. 2.2 Feedback on likely implications and impacts of treatment options is obtained from stakeholders. 2.3 Residual risks are assessed for tolerability or acceptance 2.4 Cost-benefit analysis is completed for each risk treatment option.
3. Recommend treatment options	3.1 Recommended options, including implementation responsibilities, are agreed in consultation with stakeholders. 3.2 Recommended options and residual risk are documented according to organisational ***policies and procedures***. 3.3 Recommended options are submitted for approval in line with organisational policies and procedures.
4. Develop treatment plan	4.1 Treatment options, resources required, milestones, budget, reporting procedures and roles and responsibilities for implementation are identified. 4.2 Communication and project management strategies are developed with stakeholders. 4.3 Implementation issues are identified and

© Commonwealth of Australia, 2025 Public Skills Australia

	contingencies developed where necessary.
	4.4 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- Research and analysis skills to determine potential treatment options
- ability to negotiate and work effectively with stakeholder groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit:cost analysis at an appropriate level

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and Guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Candidates must demonstrate an ability to work with stakeholders and generate an agreed list of recommended treatment options in an appropriate format. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

PUAEMR025 Manage risk treatment implementation

Modification History

PUAEMR025 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to communicate, facilitate and review implementation of selected risk treatments.

Application of the Unit

This unit applies to managers or members of project teams responsible for implementing all or part of a risk treatment plan. It recognises that the manager or project team will commonly not have direct responsibility for implementing parts of the risk treatment plan. Such managers or teams may be working at local, regional or state level within local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm implementation context	1.1 Project ***drivers/triggers***, risks, risk management context, treatment options, priorities and ***practical constraints*** are clarified. 1.2 Applicable ***policies and procedures*** are identified. 1.3 Key ***stakeholders*** are identified along with their potential interests, sensitivities, roles and responsibilities.
2. Develop implementation plan	2.1 Risk(s) to be treated and current relevance of treatment option(s) confirmed. 2.2 Performance criteria for assessing the effectiveness of treatment implementation are established in consultation with stakeholders. 2.3 Treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members are identified. 2.4 Implementation issues are identified and contingencies developed where necessary. 2.5 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies and procedures.
3. Communicate the treatment plan	3.1 Processes to effectively consult and communicate about implementation are selected. 3.2 A consultation plan is developed and implemented.
4. Facilitate treatment plan implementation	4.1 Treatment tasks/activities are allocated in accordance with the implementation plan. 4.2 Effective communication between working group members is maintained. 4.3 Stakeholders are kept fully informed of progress, performance and any proposed variations in strategy or implementation. 4.4 Agreed variations to the treatment plan are introduced to accommodate changed circumstances or to achieve more effective outcomes.
5. Monitor and review treatment plan implementation	5.1 A review process is established in consultation with stakeholders. 5.2 Effectiveness of treatment activities, adequacy of

© Commonwealth of Australia, 2025 Public Skills Australia

resources, project progress and expenditure is monitored against plans, recorded and reported.

5.3 Implementation plans are adjusted as required following the review process.

5.4 Adjustments to implementation plans are communicated to stakeholders.

5.5 Residual risk is re-evaluated and a decision made whether to accept this risk or to re-visit the risk assessment.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- networking and relationship building
- ability to work effectively with stakeholder groups
- ability to apply a range of communication media and methods to communicate with stakeholders
- project planning and oversight
- budgeting and phasing to measure progress against targets

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- jurisdictional, organisational and operational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- jurisdiction and organisational documentation and reporting procedures
- project management techniques
- options for communicating with stakeholders
- analytical, problem solving and decision making techniques to facilitate monitoring progress against targets

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate	Candidates must demonstrate that they have developed criteria to monitor implementation progress, actually monitored and reported on progress, and communicated

© Commonwealth of Australia, 2025 Public Skills Australia

competency in this unit	and consulted with stakeholders. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific resources for assessment	**Context of assessment** Evidence of competence in this unit may be collected in a simulated environment and real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context. This unit may be assessed with other units that address the whole emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers/triggers may include:

- changes in community characteristics
- changes in legislation, policies and disaster/emergency management plans
- changes in insurance policies and premiums
- new sources of risk or changed perception of risk
- planning deficiencies

© Commonwealth of Australia, 2025 Public Skills Australia

	• recent emergency incident reports/debriefs, safety issues • recent judicial decisions • strategic and corporate plans
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Stakeholders may include:	• staff • client groups • decision makers • members of the public • community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Performance criteria for assessing the effectiveness of treatment implementation may include:	• continuous monitoring of the maintenance of equity • continued involvement of stakeholders • cost effectiveness of treatment • evaluation of effectiveness in terms of actual risk reduction • the evaluation of the need for the redefinition of policy • a feedback mechanism • consideration of change that takes place over time

PUAEMR026 Treat operational risk

Modification History

PUAEMR026 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation's policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make risk decision	1.1 Calculated level of risk is compared to the established ***risk criteria*** and determined to be acceptable or unacceptable in consultation with the supervisor. 1.2 Risk that is determined as unacceptable is documented and noted for treatment.
2. Identify and select treatment options	2.1 ***Treatment options*** of known risks are identified and confirmed as contained in ***organisational standards and guidelines*** or supervisor's guidance. 2.2 Treatment options under consideration are evaluated for ***effectiveness*** within the given context. 2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.
3. Implement treatment options	3.1 ***Treatment plans*** incorporating selected options are implemented in accordance with organisational policies and procedures. 3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.
4. Monitor and review risk and the process	4.1 Effectiveness and efficiency of the treatment plan is ***monitored***, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity. 4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process. 4.3 Treatments are adjusted and communicated following the review process.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk

© Commonwealth of Australia, 2025 Public Skills Australia

committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders' involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation. **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Risk criteria may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

Treatment options may include:

- avoidance of the risk
- removing a risk source
- changing the likelihood of
- an initiating event or source of risk occurring
- a hazard impacting on elements at risk
- changing the consequences of an identified hazard impact
- sharing the risk
- retaining the risk based on an informed decision

Organisational standards and guidelines may include:

- AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
- regulatory or legislative requirements
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational OHS, risk management or resilience policies or operating procedures

Effectiveness may include:

- benefits to the individual
- benefits to the organisation
- cost benefits resulting from the implementation of the treatment
- cost of implementing the treatment option

Treatment plans may include:

- budgeting
- expected outcome of treatments
- performance measures

© Commonwealth of Australia, 2025 Public Skills Australia

	• responsibilities • review process to be set in place • schedules
Monitored may include:	• critical observation • identification of changes over time • regular checking • regular recording

PUAEMR027 Assess operational risk

Modification History

PUAEMR027 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predicable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	1.1 Objectives and scope are identified using organisational risk management standards and guidelines.
	1.2 ***Risk criteria*** are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.
	1.3 ***Structure for the planning*** required to conduct a risk assessment is determined.
	1.4 ***Stakeholder*** aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.
2. Identify risk	2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.
	2.2 Risks are identified using a ***specified methodology or tool*** in accordance with workplace procedures and guidelines.
	2.3 Risk statements describing consequences are generated.
3. Analyse risk	3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.
	3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.
4. Evaluate risk	4.1 Levels of risk are prioritised for treatment.
	4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.
	4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder's involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplaces

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of operational risk assessment, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of operational risk assessment in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects

© Commonwealth of Australia, 2025 Public Skills Australia

- simulation or role plays
- case studies and scenarios
- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational risk management standards and guidelines may include:	• Standard AS/NZS/ISO 31000:2009 Risk Management—Principles and Guidelines • regulatory or legislative requirements e.g. ohs act • environmental protection and sustainability regulations • industry standards and codes of practice • organisational charter/business plan • organisational ohs, risk management or resilience policies or operating procedures
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Structure for the planning may include:	• documentation required • analysis tools which are required to conduct the assessment • approach taken to conduct the assessment • depth of assessment
Specified methodology or tools may include:	• a risk matrix • analysis of risk registers • brainstorming • business continuity planning • examining any available data e.g. audit

PUAEMR028 Develop emergency management plans

Modification History

PUAEMR028 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to develop new or revised emergency management plans within an organisation. Such plans may focus on one or more aspects of emergency management, i.e. prevention, preparedness, response and/or recovery.

Application of the Unit

This unit applies to people responsible for developing emergency management plans within a single organisation, or in contexts where the planning process primarily involves only one organisation. More complex planning is required in multi-agency and community based contexts.

Emergency management plans are developed within or by local government, emergency service or government agencies and departments, event organisers, utilities, critical infrastructure or high occupancy buildings, and service providers.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the planning context and framework	1.1 Authority to plan is confirmed by reference to legislation, direction, organisational or other managerial agreement. 1.2 Planning environment is clarified by analysing ***drivers*** and risk assessment. 1.3 ***Legislative, regulatory and organisational requirements***, ***policy, procedures***, existing arrangements and plans that may impact on the planning framework are identified and analysed. 1.4 Key ***stakeholders***, their potential interests, sensitivities, roles and responsibilities are identified. 1.5 Planning purpose, aims, objectives and governance framework are developed and refined with stakeholders.
2. Develop agreed planning processes and methodology	2.1 A feasible project scope is developed, considering ***practical constraints***. 2.2 Processes for negotiating outcomes, making decisions, reporting, and monitoring progress and quality are agreed. 2.3 A consultation and communication plan is developed and implemented. 2.4 Sources of expertise are identified to contribute specialised information and analysis as required. 2.5 Plan structure is agreed in consultation with stakeholders. 2.6 A project plan is prepared and approved in consultation with stakeholders.
3. Undertake risk research and analysis	3.1 Project scope is reviewed in response to new information or changes in resources and planning environment. 3.2 Appropriate ***research tools*** are applied. 3.3 A comprehensive body of ***emergency risk information*** is built and/or updated using credible sources. 3.4 Effectiveness of current emergency risk management

© Commonwealth of Australia, 2025 Public Skills Australia

	strategies is assessed.
	3.5 Organisational vulnerability is determined by analysing susceptibility and resilience to risk.
	3.6 The plan's role as an appropriate risk treatment is confirmed.
4. Develop/refine planning parameters	4.1 Emergency management arrangements are reviewed or developed to identify potential gaps or duplication in roles and responsibilities.
	4.2 Emergency management strategies and responsibilities are identified and confirmed in consultation with stakeholders.
	4.3 Broad categories and types of resources and services that are likely to be required, including potential critical shortfalls, are identified.
	4.4 Financial and contractual arrangements for accessing or acquiring resources and services are developed.
	4.5 Arrangements for the command, control and coordination of any emergency response or recovery operation are confirmed.
	4.6 Contingencies to address potential problems are developed with relevant organisations and service providers.
	4.7 Organisational implications of new or revised plans are assessed.
5. Document the emergency plan	5.1 Plan is iteratively developed in consultation with stakeholders.
	5.2 Plan is prepared in a format prescribed by organisational standards and consistent with broader jurisdictional emergency management arrangements.
	5.3 Language used is clear, concise and appropriate for the audience.
	5.4 Planning records, supporting documentation and contact information are maintained to organisational standards.
6. Validate and implement planning outcomes	6.1 Compatibility, links and interactions between the plan and other organisational documentation is tested.
	6.2 Support for the plan is established by promoting its specific benefits to stakeholders.
7. Monitor and review the planning process and outcomes	7.1 A maintenance, audit and exercise schedule is implemented in accordance with organisational, policy or procedures.
	7.2 Deficiencies identified during audit, activation or exercising of the plan are analysed and reported to

© Commonwealth of Australia, 2025 Public Skills Australia

the relevant party.

7.3 Plan amendments are negotiated, documented and authorised in accordance with organisational procedures.

7.4 Opportunities for improving emergency planning processes are reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- consider wide range of alternatives before making logical decisions
- define and solve problems
- demonstrate attention to detail
- demonstrate effective interpersonal interactions
- encourage the participation of other committee members
- gain cooperation of stakeholders
- listen actively
- locate and interpret risk information
- manage simple projects
- negotiate collective outcomes
- provide credible, reliable and timely information and well reasoned advice and opinions
- recognise the relevance and significance of information for the planning process
- resolve conflicts constructively with a minimum of fuss
- summarise and explain key information clearly
- think creatively (‘big picture’, ‘outside the box’)
- value diversity of views and perceptions of risks
- work cooperatively
- work within organisational boundaries and cultures
- write clearly, concisely using accurate terminology

Required Knowledge

- Fundamentals of risk management included in Australian Standard AS/NZS ISO 3100:2009 *Risk management—Principles and guidelines*
- Fundamentals of emergency management planning included in Australian Emergency Management Manual 43 *Emergency Planning*
- decision making techniques
- emergency risk management terminology, concepts and principles

© Commonwealth of Australia, 2025 Public Skills Australia

- group dynamics, strategies for team building and resolving conflict
- meeting procedures
- relevant legislative and regulatory requirements
- research tools and risk analysis techniques, emergency risk management tools

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- explain the planning process and promote its benefits to a wide range of audiences
- develop an appropriate and sustainable emergency planning process in cooperation with stakeholders
- work with stakeholders to develop plans that are accepted, readily understandable by users and able to be implemented effectively
- evaluate planning process and outcomes with stakeholders

Consistency in performance

Competency should be demonstrated in at least two different contexts throughout the life of an emergency planning project, or during components of a number of projects, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed making significant contributions to an emergency planning process either as an individual or as a stakeholder, in the workplace or in a simulated workplace environment

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world emergency planning project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency planning context. Assessors should use formative assessment

© Commonwealth of Australia, 2025 Public Skills Australia

strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment requires application of the unit in a real-world project, often in an action-learning context.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Drivers may include:	• changes in community characteristics • changes in legislation, policies and disaster/emergency management plans • changes in insurance policies and premiums • new sources of risk or changed perception of risk • planning deficiencies • recent emergency incident reports/debriefs, safety issues • recent judicial decisions • changes in strategic and corporate plans
Legislative, regulatory and organisational requirements may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding • local planning regulations, development controls and environmental plans
Stakeholders may include:	• staff • client groups • decision makers • emergency service organisations
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning, building codes and other regulations • legislation covering emergency management, environmental management, safety standards, local

© Commonwealth of Australia, 2025 Public Skills Australia

	government regulations • limited organisational knowledge of emergency risk management processes and benefits
Research tools may include:	• affinity analysis • brainstorming, visioning • cause and effect analysis, force field analysis • emergency risk management tools • SWOT analysis • bow-tie analysis • cost:benefit analysis
Emergency risk information may include:	• characteristics of natural and built environments • demographics (population distribution, social, cultural, health status and education data) • details of key infrastructure and emergency/support services • economic activity reports (employment, products, services, revenue) • government reports e.g. environmental impacts • business continuity data • emergency risk assessment studies

Unit Sector(s)

Not applicable.

PUAEMR029 Plan and implement a treatment measure

Modification History

PUAEMR029 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to plan and implement a treatment measure that is within the scope and capability of a single agency, organisation, or service provider.

Application of the Unit

This unit applies to people responsible for implementing part of a risk treatment plan that is within the responsibility of their organisation.

This unit is applied following an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community. The output of these assessments includes a risk treatment plan that allocates agreed responsibilities for implementing recommended treatment options.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop treatment plan	1.1 Risk(s) to be treated and current relevance of treatment option(s) confirmed. 1.2 Key ***stakeholders*** are identified along with their potential interests, sensitivities, roles and responsibilities 1.3 Performance criteria for assessing the effectiveness of treatment implementation are established in consultation with stakeholders. 1.4 Treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members are identified. 1.5 Implementation issues are identified and contingencies developed where necessary. 1.6 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies and procedures.
2. Implement and monitor treatment plan	2.1 Team roles and responsibilities are allocated and communication and reporting procedures are confirmed. 2.2 Consultation and communication strategies, treatment activities and adequacy of resources are monitored and reported. 2.3 Variations to the treatment plan are agreed with supervisor/manager and documented. 2.4 Accurate ***records*** of meetings and communications with stakeholders and project team members are maintained 2.5 Treatment activities are completed efficiently.
3. Review the process and treatment implementation	3.1 Effectiveness of treatment implementation is assessed using agreed performance criteria and stakeholder input. 3.2 Planning processes are reviewed to identify opportunities for improvements.

© Commonwealth of Australia, 2025 Public Skills Australia

3.3 All project reporting requirements are completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse effectiveness of treatment implementation
- analyse positions of stakeholders, priorities of agencies and individuals
- define and solve problems
- demonstrate effective interpersonal interactions
- interpret and follow applicable organisational policy and procedures
- listen actively
- locate and interpret community information
- manage projects
- maximise the participation of team members and input of stakeholders
- monitor and enhance team work
- resolve conflicts between participants constructively
- summarise and explain key information clearly
- value diversity of views and perceptions of risks

Required Knowledge

- culture, diversity and history of communities, environments and associated concerns, issues and sensitivities, perception of risks
- culture, structure and responsibility for treatments of key response/recovery agencies and organisations
- decision-making techniques
- jurisdictional, organisational and operational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- meeting procedures
- organisational requirements for the submission and approval of treatment plans and reporting of treatment outcomes
- project management techniques
- planning process and the kinds of outcomes and benefits for communities
- team work principles and strategies
- tools for assessing treatment options

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- evaluate the treatment measure
- develop an effective implementation plan in cooperation with the stakeholders and gain organisational approval for it
- identify implementation issues and develop/document contingencies
- work with stakeholders to monitor treatment implementation
- maintain momentum and achieve the project outcomes within available resources
- establish, conduct and finalise a treatment project that has broad stakeholder and organisational support and produces effective treatment outcomes

Consistency in performance

Competency should be demonstrated in at least two different contexts throughout the life of a treatment project, or during components of a number of projects, one of which may be simulated.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed planning and implementing an agreed treatment measure in the workplace or in a simulated workplace environment.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to participate in a real-world project.

Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.

Guidance information for assessment

This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context.

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context.

This unit may be assessed with other units that address

© Commonwealth of Australia, 2025 Public Skills Australia

project management or other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Performance criteria for assessing the effectiveness of treatment implementation may include:

- benefits of outcomes compared with costs of treatments
- benefits to individuals, enterprises, communities, the environment, governments and their agencies
- improved resilience of community/organisation through improved systems
- reduction of vulnerability

Records may include:

- lists of potential costs, invoice and payment records
- log books, diaries, schedules, charts
- minutes of meetings
- project/organisational files and records
- reports to stakeholders and management
- risk management plans

PUAEMR030 Manage and evaluate emergency management exercises

Modification History

PUAEMR030 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to manage and evaluate activities which exercise elements of emergency management arrangements.

Application of the Unit

This unit applies to people who are responsible for implementing and evaluating pre-designed emergency management exercises. Emergency management exercises may be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage the exercise	1.1 Exercise ***documentation*** reviewed to confirm governance and ***stakeholder*** requirements. 1.2 Exercise aim**,** objectives, activities and evaluation plan are confirmed. 1.3 Relevant permissions, authorities, clearances and approvals are identified and confirmed. 1.4 ***Logistic requirements*** are identified and organised. 1.5 Communication plan is designed and implemented in consultation with stakeholders.
2. Manage exercise activities	2.1 Exercise management team is formed where required. 2.2 Communication and consultation is established with ***activity personnel*** and maintained throughout the conduct of the exercise. 2.3 Exercise site preparation and familiarisation are ensured in accordance with the exercise plan. 2.4 Briefings are prepared and delivered to stakeholders reflecting exercise objectives and activities. 2.5 Confirmation and management of logistic requirements required to conduct exercise activities is ensured. 2.6 The exercise plan is used to initiate and facilitate the conduct and direction of the exercise. 2.7 Risk is managed throughout the exercise.
3. Evaluate outcomes against exercise objectives	3.1 Post-exercise debriefings are conducted and feedback is gathered. 3.2 Exercise feedback is collated, recorded, analysed and issues identified. 3.3 An ***exercise report,*** including recommendations, is prepared to organisational standards and distributed to stakeholders.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group activities
- build effective networks and relationships
- work effectively in a group setting
- consult with stakeholders
- manage and direct activity personnel
- plan and deliver briefings and debriefings
- manage the pace and intensity of the exercise
- manage risk and safety
- gather and analyse feedback

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- legislative, regulatory and insurance arrangements relevant to using resources, such as land, buildings, equipment, staff and volunteers
- relevant organisational policies and procedures (such as legislation relevant to the operation/ incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation’s approach to environmental management and sustainability)
- problem solving and decision making techniques
- project management principles
- project management principles
- risk and safety management principles
- budgeting and logistic management principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- ensure all permissions, authorities, clearances and approvals are obtained,

© Commonwealth of Australia, 2025 Public Skills Australia

- ensure all resources are available for the exercise, and
- the pace of the exercise proceeds appropriately to achieve the objectives

Consistency in performance

Candidates should be expected to present evidence of managing two different types of exercise, including at least one exercise that requires multi-agency or organisation input.

Context of and specific resources for assessment

Context of assessment

This competency cannot be assessed in a simulated environment.

Specific resources for assessment

- Access is required to real-life exercises, including supporting resources.

Method of assessment

This unit contains transferable skills, such as communication, consultation, and logistic management skills that can be applied to managing an emergency management exercise. Assessors may use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment requires application of the unit to manage exercises in the workplace. Evidence of performance can be gathered by:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Documentation may include:

- activity inputs (general and special ideas)
- activity notification
- activity management checklists
- assessor documentation

© Commonwealth of Australia, 2025 Public Skills Australia

- evaluation checklist
- evidence collection templates
- exercise injects
- general instruction
- incident action plans
- permissions and approvals risk assessments
- risk action plans
- safety instructions
- specific inputs
- timetable/schedule of events
- umpire documentation

Stakeholder may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Logistic requirements may include:

- catering
- equipment
- facilities
- finance and accounting procedures
- transport
- accommodation
- guest or specialist speaker(s) or presenters
- first aid and medical supplies and personnel
- exercise management personnel
- role players
- participants

Activity personnel may include:

- exercise management staff
- exercise evaluation staff
- casualty simulation staff
- role players
- public information staff
- participants' management

Exercise report may include:

- executive summary
- acknowledgements
- exercise aim and objectives
- introduction

© Commonwealth of Australia, 2025 Public Skills Australia

- exercise scenario
- sequence of events
- exercise critique (relating observations and feedback to the objectives)
- summary
- recommendations
- attachments (exercise management team, participating organisations and volunteers, referee reports, debrief notes)

Unit Sector(s)

Not applicable.

PUAEMR031 Design emergency management exercises

Modification History

PUAEMR031 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to design, develop or modify activities that exercise elements of emergency management arrangements.

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel, and/or measure an organisation's ability to manage an emergency.

Application of the Unit

This unit applies to workers with the responsibility for designing emergency management exercises. It does not cover the skills and knowledge for implementing those designs.

Emergency management exercises can be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

© Commonwealth of Australia, 2025 Public Skills Australia

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine exercise purpose	1.1 Exercise ***stakeholders*** are identified and engaged. 1.2 Exercise governance arrangements are confirmed. 1.3 Exercise aim is identified in consultation with stakeholders. 1.4 ***Exercise objectives*** that meet the identified aim are determined. 1.5 ***Exercise focus*** is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports.
2. Design and plan exercise activities	2.1 Planning team is established where required. 2.2 Governance and planning meetings are held, agreements and decisions are made, and outcomes are communicated to stakeholders. 2.3 ***Components of the exercise program*** are identified, developed and documented in the exercise plan. 2.4 ***Exercise style*** and activities consistent with exercise objectives are selected in consultation with stakeholders. 2.5 ***Design planning processes*** are undertaken with stakeholders to meet exercise objectives and components. 2.6 Exercise documentation is prepared.
3. Assess exercise risks	3.1 Risk and safety considerations are included in planning process. 3.2 Activities which mitigate/reduce risks associated with conducting exercise activities are designed and included. 3.3 Exercise risk and safety management plan is prepared.
4. Plan resource allocation	4.1 ***Resources*** to support the exercise are identified and secured. 4.2 Exercise host is identified and commitment to

© Commonwealth of Australia, 2025 Public Skills Australia

achieving exercise objectives is secured.

4.3 Appropriate authorisation(s) to use resources are obtained and documented.

4.4 Availability and timeframes for use of resources is agreed by appropriate authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group workshops and activities
- build effective networks and relationships
- work effectively in a group setting
- liaise and communicate with other agencies
- plan and deliver briefings and debriefings
- prepare exercise documentation
- interpret organisational needs to develop measurable, achievable objectives
- research skills to build scenarios and exercise inputs

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- incident management principles
- legislative and regulatory arrangements relevant to using resources, such as land, buildings, equipment and volunteers
- problem solving and decision making techniques
- project management principles
- risk and safety management principles
- budgeting and logistic management principles
- jurisdictional emergency management arrangements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for Assessment must confirm the ability to:

© Commonwealth of Australia, 2025 Public Skills Australia

assessment and evidence required to demonstrate competency in this unit

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts or exercise styles, including at least one exercise that requires multi-agency or organisation input and of which one may be simulated

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated workplace environment.

Specific resources for assessment

Access is required to a real-life exercise design project.

Method of assessment

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

Assessment may occur in a work environment or in a simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public

© Commonwealth of Australia, 2025 Public Skills Australia

- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Exercise objectives may include:

- assessing and/or demonstrating the capability of individuals, teams, systems and/or arrangements
- assessing or auditing system(s) performance
- developing new skills
- evaluating emergency management plans
- evaluating individuals/teams/facilities/systems
- evaluating risk treatment strategies
- exploring issues
- improving team cohesion
- meeting legislative or regulatory requirements
- practising skills, systems or procedures
- promoting awareness
- sharing information
- validating training objectives or learning outcomes

Exercise focus may include:

- improving systems, plans or arrangements
- developing/training participants
- sharing information
- testing or auditing systems, plans, arrangements, facilities, and/or individual or team competencies

Components of the exercise program may include:

- exercise name
- authorities, permissions and governance
- scope or purpose statement
- aim and objectives
- activity plan
- detailed schedule of activities
- location (s)
- risk and safety management plan
- budget and logistics plan
- evaluation/assessment plan
- evidence collection tools/templates
- debrief plan

Exercise style may include:

- case study
- discussion/desktop exercises
- hypothetical exercise/scenario analysis
- distributed interactive exercise
- field exercise
- functional centre exercises

© Commonwealth of Australia, 2025 Public Skills Australia

	• role play
Design planning processes may include:	• Determining assessment and performance criteria • planning briefings and debriefings • developing contingency plans • scenario and activity design • developing background information and exercise inputs • determination of activity management structure • developing documentation • issuing notification s to affected stakeholders • identifying and managing risks • identifying and securing resources • meetings • developing and reviewing key performance indicators • scoping of agencies participating and the level at which they are participating • seasonal weather considerations • agreeing on duration of exercise activities
Exercise documentation may include:	• Activity inputs (general and special ideas) • activity notification • activity management checklists • assessor documentation • evaluation checklist • evidence collection templates • exercise injects • general instruction • incident action plans • meeting details • permissions and approvals • risk assessments • risk action plans • safety instructions • specific inputs • timetable/schedule of events • umpire documentation
Resources may include:	• agency guidelines/instructions • catering • equipment • exercise staff • facilities • finance

PUAEQU001B Prepare, maintain and test response equipment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application and Evidence Guide revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to inspect, maintain and test a range of equipment according to organisation's procedures.

Application of the Unit

This unit applies to workers who have either a primary role in the maintenance of equipment or are required to test and maintain equipment as part of an operational role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR201B Prevent injury (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect response equipment	1.1 Equipment is ***inspected*** in accordance with ***organisation's procedures.***
	1.2 Missing parts are identified and reported according to organisation's procedures.
	1.3 Faulty or damaged equipment is reported and recorded in accordance with organisation's procedures.
2. Test response equipment	2.1 Equipment is tested according to approved procedures and is fit for purpose according to ***organisation's standards.***
	2.2 Test results are ***recorded*** according to regulatory and organisation's requirements.
	2.3 Defective equipment and sub-standard performance is reported and recorded according to organisation's procedures.
3. Clean, maintain and restow equipment	3.1 Equipment is cleaned, maintained, assembled and stowed according to organisation's procedures.
	3.2 Equipment records are updated according to organisation's procedures.
	3.3 Equipment is recovered, restowed and made ready for future use.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- comply with material safety data sheets
- inspect equipment according to organisation's procedures
- safely use cleaning agents and chemicals
- service and clean equipment according to organisation's procedures
- test equipment according to organisation's procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- identification of equipment
- occupational health and safety policy relevant to the maintenance, servicing and testing of equipment
- organisation's policies and procedures concerning the use, testing, cleaning and servicing of response equipment
- relevant parts of environmental legislation relating to waste water run off/pollution
- safe working practices when maintaining, servicing and testing equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence can be demonstrated in organisational procedures for inspection testing, cleaning and servicing of response equipment. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency must be assessed in the context of applying organisation's procedures to equipment used in the workplace. **Specific resources for assessment** Access to relevant equipment is required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational procedures may include:	• regulatory requirements • equipment manufacturer’s specifications and procedures • Australian Standards • industry practices • occupational health and safety requirements

© Commonwealth of Australia, 2025 Public Skills Australia

	• maintenance schedules
Organisational procedures may be specified in:	• operational directives • organisation's procedures • manufacturer's manuals • operations manuals • quality system documentation • induction documentation • workplace notices • operator's manual
Reporting/recording procedures may include:	• Verbal • record sheets or books • computer data bases • card systems • microfiche systems • maintenance schedules
Organisation's standards may include:	• Australian Standards • state/territory or federal standards • industry standards • manufacturer's procedures • international standards
Response equipment may include:	• ropes • hand tools • hoses • branches and nozzles • ladders • pumps • rescue tools • salvage tools • protective clothing and equipment • breathing apparatus • forcible entry tools • portable fire extinguishers • drip torches • maps • powered equipment • organisational specialist equipment • chainsaws • communications equipment • knapsacks • lighting equipment • first aid equipment

© Commonwealth of Australia, 2025 Public Skills Australia

	• pumps • equipment required to undertake specific function such as compressor, generator, hydraulic pump • audible warning systems such as sirens, horns • visual warning systems such as lights • light crystal display signs • Global Positioning Systems • vehicle tracking systems • navigational systems
Inspection may include:	• visual, auditory and tactile inspection to identify possible operational failure of motorised equipment or seizure or physical failure of equipment
Maintenance may include:	• lubrication checks • pressure checks • fuel and water checks • flow rate checks • sharpening • cleaning • flushing
Faulty/damaged equipment may include:	• inoperative • not fit for purpose • operates ineffectively • defects • anomalies • not clean • physical damage

PUALAW001B Protect and preserve incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application reviewed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve scene	1.1 Initial ***assessment*** is participated in to identify ***factors which will impact*** on public safety and scene preservation. 1.2 ***Incident/accident scene*** is effectively secured to ***preserve the scene*** and maintain public safety in line with legislative requirements.
2. Record and report details of incident scene	2.1 ***Details of the scene*** are noted, ***recorded and reported*** according to organisation's policies and procedures. 2.2 ***Witness details*** and information volunteered are recorded in accordance with ***organisational and legislative requirements.*** 2.3 Information is communicated to ***relevant personnel*** in line with organisation's procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- note taking
- observation
- questioning
- reporting

Required Knowledge

- legislative and organisation requirements relating to scene preservation

© Commonwealth of Australia, 2025 Public Skills Australia

- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct initial assessment of scene	1.1 Scene is assessed with regard to occupational health and safety and all actions are undertaken in line with organisation's policies, procedures, guidelines and duty of care requirements. 1.2 Communication is established with the senior ***investigating officer*** and liaison is maintained throughout the investigation. 1.3 Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel. 1.4 Scene boundary is defined/redefined as required to preserve physical evidence for collection. 1.5 Obvious and accessible ***physical evidence*** is located and, where appropriate, protected from possible contamination.
2. Control integrity of scene	2.1 Appropriate ***arrangements for scene access and egress*** are established and maintained. 2.2 All non-essential persons are removed from the scene and relevant details are recorded accurately and legibly in accordance with organisation and regulatory procedures. 2.3 ***Additional resources*** are identified and accessed to secure incident scene. 2.4 The personal and health and safety needs of those involved in the incident are attended to.
3. Examine scene	3.1 An appropriate search pattern is instigated in accordance with instructions from senior investigating officer to ensure all evidence is located and preserved. 3.2 ***Details of the scene*** are recorded comprehensively

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and accurately in line with organisation's operating procedures.
	3.3 Evidence is located, collected, packaged, labelled and stored to ensure preservation for further post-scene examination.
	3.4 An accurate log of all evidence is maintained.
	3.5 Scenes are correctly assessed for future investigative requirements and appropriate persons notified.
4. Identify potential witnesses and initial statements recorded	4.1 Bystanders are canvassed to identify potential witnesses.
	4.2 Details of potential witnesses are recorded.
	4.3 Appropriate recording practices are used that are in accordance with legislative and regulatory requirements and organisation's policies and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurate written recording and compilation of interviews and statements
- attention to detail
- implementing methodical and systematic approach
- listening to bystanders
- putting bystanders at ease
- questioning bystanders
- use of recording and specialised evidence collection equipment
- working with a variety of professionals

Required Knowledge

- anti discrimination public safety
- appropriate use of interpreting services
- collection and recording of various types of evidence ranging from large objects to minute traces
- details of scene
- equal employment opportunity
- features and use of a variety of specialised equipment to search
- functions and roles of other professionals and experts
- incident scene protection and preservation

© Commonwealth of Australia, 2025 Public Skills Australia

- indicators of emotional distress
- indicators of need for specialised investigations
- legislative requirements relating to occupational health and safety
- policies and procedures relating to occupational health and safety
- policies and procedures relating to recording details of persons
- public safety and duty of care at accident/incident scene
- recognition
- record and collect evidence
- shock
- taking and compiling statements
- taking of statements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Correct application of legislative requirements and organisation policies and procedures in all situations. **Consistency in performance** Evidence will need to be gathered over time in a range of actual and/or simulated environment.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial investigation:	• those enquiries conducted by the first public safety official on scene
Incident scene may include:	• structural fire • wild fire

© Commonwealth of Australia, 2025 Public Skills Australia

	• vehicle fire • crime scene • vehicle accident • natural disaster • industrial/mining accidents and incidents • accident/incident involving death or injury to person or damage to property
Incident scene may be:	• indoor or outdoor • in a rural or urban environment
Incident scene may be affected by:	• prevailing weather and require additional resources to preserve and protect incident scene
Security of an incident scene may be affected by:	• topography • climatic conditions • human interference • animal interference • preservation of life/property
Public safety risk factors include:	• those factors at the incident scene that could impact on: the safety of investigators; the security/preservation of the actual site • the security and preservation of situational evidence
Investigating incident scenes may include:	• dangerous or distasteful conditions and may involve handling injured or deceased persons
Circumstances surrounding scene may include:	• sequence of events • possible causes • people involved • property involved • victims • suspects • witnesses • damage • injury • organisation personnel involved • other agencies involved • current status of investigation • action taken to date
Tactical factors may include:	• environmental circumstances • chronology of events • access to scene • number of persons at scene • availability of support services • boundaries

© Commonwealth of Australia, 2025 Public Skills Australia

Persons at incident scene may include:	• Incident scene specialists and forensic experts; witnesses • victims • other bystanders; police and emergency services; media; coroners • pathologists • medical practitioners • undertakers; forensic accountants • information technology consultants and legal officers
Activities at incident scenes may be recorded by:	• running sheets • exhibit logs • receipts and personnel movement • video photography
Physical evidence may include:	• shoe impressions • tyre prints • skid marks • fingerprints • containers • fibres • flammable and combustible liquids • tool marks • bloodstains • identifying numbers • bodily fluids • burn patterns
Methods of collection may include:	• vacuuming • tape lifts • shovelling • photographing • casing
Methods of packaging may include:	• metal containers • plastic bags • paper bags • glass vials
Additional resources may include:	• organisation personnel • other organisation personnel • expert personnel • audio visual services • emergency lighting • forensic personnel

© Commonwealth of Australia, 2025 Public Skills Australia

Relevant details from persons may include:	• name • contact details • other details in accordance with standard operating procedures
Liaison with investigating officer may include:	• professional and technical advice • identification of avenues of inquiry • significance of located evidence
Arrangements for scene access and egress:	• clear brief as to who has control of access • physical barriers may also be required • roster guards • limit entry to essential personnel • delegation of authority to control entry • record all persons who enter or depart the scene and reasons
Arrangements to protect integrity of evidence:	• roster scene guards • cover evidence • may require removal of evidence to ensure its protection
Details of scene:	• time • date • location • damage to property • injury to persons • personnel present • physical details of scene • evidence

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Respond to requests for relevant community information from other police officers or government workers	1.1 Request is acknowledged and satisfied or acknowledged with reason for lack of immediate response 1.2 Requests for ***information*** concerning "***secret business***" is declined as inappropriate for the uninitiated 1.3 Requests for information concerning appropriate behaviour by officers are answered directly or after consultation with community elders
2. Identify local people to other officers	2.1 Persons are identified by European and/or Aboriginal name 2.2 Persons are identified in terms of blood relationships 2.3 Where relevant, persons are identified in terms of Aboriginal skin name and/or kin relations 2.4 Where relevant, persons are identified in terms of dreaming or clan membership
3. Identify local places and access routes to tourists, workers from other government departments and other police officers	3.1 Local place names are explained, and places are pointed out or indicated visually on a map or diagram 3.2 Best access routes are explained or shown and likely dangers pointed out, taking into account weather and/or road conditions 3.3 ***Culturally significant*** places and significant places and applicable access/avoidance protocols and/or required permits detailed
4. Explain local *cultural structure* to other officers when operationally relevant	4.1 Local language groups/people are identified 4.2 Local skin groups and kin relations are explained 4.3 Local kinship terms and ***avoidance relations*** are explained

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- ability to function in two distinct cultural contexts

Required Knowledge

- local knowledge and/or knowledge or Aboriginal or Torres Strait Islander social structures
- this unit presupposes sufficient oral knowledge of English to communicate on ordinary matters and also to relay Aboriginal or Torres Strait Islander cultural information
- it also presupposes significant cross-cultural knowledge in relating European to non-European approaches to identification

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated as follows:

- Assessors must obtain evidence that the Aboriginal officer is willing and able to contribute operationally relevant local information as required
- It should be noted that the provision of information in reply to a non-Aboriginal person's questioner is a non-trivial performance for most Aboriginal people
- Assessors should be fully aware of an Aboriginal person's question/answer styles when determining the possession of the information. They should then determine whether the information would be available to members with a lesser degree of cross-cultural skills. The test at this level is that the information would be made available to a member with sufficient knowledge to formulate the correct type of question
- In relation to culturally sensitive issues it is required that the Aboriginal or Torres Strait Islander officer not volunteer inappropriate information - since that would undermine his or her support in the community - and be prepared to explain to a member of average cross-cultural sensitivity that the information may not be given

Consistency in performance

© Commonwealth of Australia, 2025 Public Skills Australia

	Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments **Specific resources for assessment** If an independent assessment needs to be made (see below) then several days would be required to establish relations with the officer assessed and make on-the-job observations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information:	• requests for information about the community may include:
	  • its geographic and demographic make-up
	  • its roadways, public thoroughfares, means of transport
	  • the incidence of social disorder or substance abuse
	  • community health or safety programs
	  • identification of community contacts supportive of the policing function
	  • local community leaders

"Secret business" may include:	• there may be information of a cultural, ritual or religious nature that either the Aboriginal officer is not privy to or is not culturally permitted to share
Identification includes:	• Aboriginal people identify themselves using a different system from non-Aboriginals • the most relevant identification will depend on the context
Culturally significant/sacred sites may include:	• certain locations may be culturally forbidden to persons of a particular sex or lineage. Others might be generally "out of bounds", including to police. In some cases entry may be permitted on application to the appropriate persons
Cultural structure may	• communities might consist of one or more language

© Commonwealth of Australia, 2025 Public Skills Australia

include:	or clan groups and within these several different kinship groups. In traditional society the behaviour of individuals to one another is determined by their membership in these groups
Avoidance relations may include:	• traditional Aboriginal people or non-Aboriginal people may be prohibited from speaking to or remaining in close proximity to members of related kin groups. Since non-Aboriginal people can be adopted into Aboriginal kinship relations this can be a source of difficulty in policing if not understood and taken into account. It also affects the role an Aboriginal officer may play in some circumstances

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the organisation's public safety responsibilities	1.1 Organisational goals are identified within the context of the organisation's public safety responsibilities. 1.2 The organisational environment is identified and strengths, weaknesses, opportunities and threats are analysed. 1.3 Elements which support or impair the ***organisation's ability to manage risk*** are determined. 1.4 Organisational capabilities to manage risk are identified. 1.5 A strategic plan for risk management is developed.
2. Establish an emergency risk management structure	2.1 An organisational structure is established to implement the organisation's risk management strategic plan. 2.2 The risk management structure is implemented and maintained. 2.3 ***Technical***, ***financial***, ***social***, ***legal*** and other ***considerations against which risk can be prioritised*** are determined. 2.4 Organisational risk management responsibilities are identified.
3. Review the organisation's risk management performance	3.1 An organisational review process is established. 3.2 The effectiveness of the risk management strategies is regularly reviewed. 3.3 The risk management strategic plan is adjusted following the review process if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

© Commonwealth of Australia, 2025 Public Skills Australia

- analyse risk
- assess organisational needs
- define problems
- demonstrate influencing skills
- evaluate and prioritise risk
- identify stakeholders
- use analytical tools and processes

Required Knowledge

- emergency management concepts and principles
- legislative and regulative arrangements relevant to emergency management
- negotiation strategies and tactics
- problem solving and decision making techniques
- the intent and potential application of Australian Standard AS/NZS 4360 to given scenarios and potential situations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the development of a risk management strategic plan and an organisational structure which meet the organisation's public safety risk management needs and are consistent with its responsibilities and objectives.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of competence in this unit should be collected in one or more actual situations or scenarios where there is the capacity to demonstrate the required evidence in a real or simulated environment in conjunction with portfolio evidence Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects.

Specific resources for assessment

For the demonstration of competence in this unit it will be necessary to provide a real life environment and/or simulations based on real life incidents. These resources may involve complex scenarios sufficient to allow

© Commonwealth of Australia, 2025 Public Skills Australia

evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period of time. Controlled access to organisational records and personnel may have significant cost implications for the staging of scenarios.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Elements which influence the organisation's ability to manage risk may include:	• legislative authority • emergency management capability • level of community education and awareness • resources and organisational culture
Technical, financial, social and legal considerations against which risk can be prioritised may include:	• technical judgements which appropriately acknowledge uncertainty include: • international technical standards • national standards • codes of practices • procedures • professional judgement • legal considerations may include: • international law • conventions and treaties • statutory provisions • common law precedents • recommendations of investigative offices such as the coroner • boards of inquiry (e.g. Air Safety) and royal commissions • land use and exposure to litigation • social and political considerations may include: • government policy • community expectations • community values • community attitudes • community perceptions and special group interests
The environment within which the emergency management responsibilities	• the organisational and administrative environment • current public service practices • government and organisational policy

© Commonwealth of Australia, 2025 Public Skills Australia

are developed may include:	• public perceptions and attitudes • the natural physical environment • the present emergency management capability • the technological • social • political and economic environment
Emergency risk management structure will reflect:	• context • nature of the risk • responsibilities of the organisation

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and allocate resources	1.1 Required ***resources*** are identified, and accessed in accordance with organisation's policy and procedures. 1.2 ***Resources are allocated*** to facilitate required outcomes . 1.3 Equipment stock and supplies are stored in accordance with ***organisation's policy and procedures.*** 1.4 Resources are handled in accordance with organisation's policy and procedures and ***resource management systems.***
2. Monitor, evaluate and report on resource usage	2.1 Records of resources allocation and usage are maintained in accordance with relevant legislation and organisational guidelines. 2.2 Resource usage is monitored and evaluated against targets and organisational standards. 2.3 Resource utilisation issues are addressed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- evaluate resource usage
- interpret budget reports
- monitor resource allocation and usage
- produce resource reports
- utilise resource inventories

Required Knowledge

- computer based tools to produce resource reports
- equal employment opportunity policy and procedures
- management information systems

© Commonwealth of Australia, 2025 Public Skills Australia

- occupational health and safety policy and procedures
- organisation's policies and procedures for budget administration
- organisation's policy and procedures relating to resource acquisition and allocation
- stock handling procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in knowledge and application of the coordination of resources in a range of contexts to achieve the organisation's objectives.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance should be gathered by observing an individual in a resource coordination role in the workplace or exercise or operational environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Resources may include:

- finances
- facilities equipment
- stock and supplies
- human resources

Organisation's policy procedures and standards may include:

- equal employment opportunity and occupational health and safety work group policy and procedures
- environmental protection and sustainability
- organisation's work group plans
- organisation's financial and other resource

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Lead and motivate people	1.1 Goals for people and teams to optimise achievement in work tasks are established and agreed upon. 1.2 Goals are unambiguous and take into account the capabilities of people and teams. 1.3 Advice and support sensitive to the individual's needs is provided to people in the performance of their duties. 1.4 Activities are undertaken to achieve commitment to common goals. 1.5 Initiative and innovation are recognised and encouraged. 1.6 Achievements are recognised and communicated within the organisation.
2. Undertake human resource planning	2.1 ***Human resource needs*** are determined/reviewed within the anticipated operational needs and allocated budget. 2.2 Alternatives to staffing levels which clearly demonstrate returns to the organisation are analysed. 2.3 Contingency plans for staffing are developed which meet key provisions of the human resources plan. 2.4 Existing competencies of staff are compared with the needs of the work group. 2.5 Staffing levels are planned and negotiated with ***stakeholders*** within the organisational framework to achieve maximum efficiency of operations.
3. Develop and facilitate performance	3.1 Performance criteria are negotiated and agreed upon with individuals, teams and work groups. 3.2 Performance criteria are reviewed as circumstances change. 3.3 ***Performance appraisal*** is conducted, based on clearly established and agreed performance criteria. 3.4 The total performance development system identifies and proposes strategies to rectify performance shortfalls and recognise success.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.5 Performance problems are addressed confidentially and in a constructive and timely manner, in line with relevant organisational procedures.
	3.6 ***Selections***, ***transfers and promotions*** are made in accordance with organisation policies and supported with documented information.
	3.7 Mechanisms are developed and implemented for the identification of human resource development needs within the work group taking account of the strategic plan for the organisation.
4. Facilitate training, education and development opportunities	4.1 Information on planned training events is made widely available throughout the organisation.
	4.2 Training, education and development plans are included as part of individual/team performance plans.
	4.3 Individual/team access to, and participation in, training, education and development opportunities is facilitated.
	4.4 Coaching and mentoring contribute effectively to the training, education and development of personnel in an environment of change.
	4.5 ***Training***, ***education and development opportunities*** enhance individual, team and organisational performance.
	4.6 A workplace environment is created which facilitates training, education and development.
5. Develop and implement issue resolution and grievance procedures	5.1 Problem solving/issue resolution procedures are established within legislative requirements and organisation's guidelines.
	5.2 Grievances and complaints are managed in a timely and caring way to optimise likelihood of a favourable outcome for all parties and in line with organisational objectives and procedures.
	5.3 Individual's rights and obligations under industrial awards/agreements and legislation are documented and communicated in a clear and concise manner and in appropriate language.
	5.4 Hearings, interviews and meetings are conducted within the principles of industrial democracy and participative, consultative processes.
	5.5 All relevant industrial parties are identified and invited to participate in the resolution process.
6. Manage disciplinary	6.1 ***Disciplinary matters*** are implemented in accordance

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
matters	with organisation's procedures. 6.2 Investigations are conducted in a caring and confidential manner to maintain performance and morale. 6.3 Feedback is provided promptly. 6.4 Appeals processes are instituted in accordance with organisational procedures. 6.5 Deficiencies in procedures are recognised and recommendations for change are made.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- achieve agreed results
- apply interpersonal skills
- demonstrate consistency between instructions and action in self and others
- display personal and professional integrity in working relationships
- establish key performance measures for individuals/work groups
- establish training and development opportunities as needed
- identify and where appropriate use stress management facilities and services
- monitor performance of individuals and teams/groups against key performance indicators
- use consultative methods to achieve operational targets
- use decision making processes which are understood and respected
- use effective management techniques and processes

Required Knowledge

- communication principles
- conflict resolution principles and practice
- Equal Employment Opportunity
- grievance procedures
- interpersonal relations
- leadership theory and principles
- management principles and practice
- Occupational Health and Safety
- training and education principles
- training need analysis

ELEMENT	PERFORMANCE CRITERIA
	order to determine that the offer is clear, calculable and not open to manipulation.
	4.6 A cost-benefit analysis shows that the selected contractor offers best value for money.
5. Finalise contract details	5.1 Letter of acceptance outlines all relevant requirements for signing of documentation and satisfaction of pre-commencement conditions.
	5.2 Discrepancies and disagreements about proposed supply arrangements are clarified and resolved prior to entering into the agreement.
	5.3 Contract is properly executed by the successful proponent and is in accordance with legal requirements.
	5.4 Unsuccessful tenderers are briefed if appropriate.
	5.5 Contract conditions are read and understood by all personnel involved in contract administration.
	5.6 Contract documents are prepared, approved and distributed.
	5.7 Fulfilment of any ***outstanding requirements*** is checked and rectified if necessary.
6. Evaluate performance of the contract on completion	6.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.
	6.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
	6.3 ***Contractor performance***/level of service is evaluated against agreed benchmark.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- establish effective feedback and monitoring systems
- implement risk management plans
- monitor and review contract performance
- plan effectively and solve problems
- supply information relevant to contract performance

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- assessment of tenders
- award of contracts
- basics of contract law
- contract administration
- contract requirements
- negotiation processes
- organisational procedures and guidelines for the calling of tenders
- principles of quality assurance
- risk management principles
- sources of legal advice
- terms and conditions

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstration of knowledge and skills required to award, manage and evaluate a contractor's performance and attend to any variations and difficulties which arise during the course of the contract. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments. **Specific resources for assessment** Evidence of competent performance by observing an individual in a contract management role within the workplace or simulated environment. PUAMAN006B Manage and facilitate change

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to introduce, manage and evaluate change in a range of organisational contexts.

Application of the Unit

This unit applies to managers who have the resource and financial authority to make change to organisational policies, procedures, and/or strategies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop change management strategies	1.1 Optional and specific proposals for change are developed and communicated to stakeholders. 1.2 ***Stakeholders*** are consulted when developing strategies for dealing with workplace change. 1.3 Future trends and organisational needs are discussed and considered in process of developing strategies for dealing with change. 1.4 Options and specific proposals for change are developed and discussed with stakeholders 1.5 A change management strategy is adopted.
2. Facilitate change management strategy	2.1 Advice is communicated to stakeholders on the requirements for effective change implementation. 2.2 ***Resource requirements*** to implement change in the workplace are obtained and used. 2.3 Leadership is provided to assist others to adapt to change, including appropriate guidance, training and support and a positive role model.
3. Implement change	3.1 Work practices, policies, strategies and resource requirements are amended to accommodate changing circumstances. 3.2 Outcomes of change management strategy are achieved .
4. Review effectiveness of change	4.1 Feedback and monitoring mechanisms are put in place. 4.2 The outcomes of monitoring and evaluation are communicated to relevant personnel. 4.3 ***Impact of change*** on the workplace is monitored and evaluated and results are reflected in future change management.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- analyse change needs
- communication
- identify and meet the needs of particular groups in the change process
- monitor and evaluate the impact of change
- obtain and use resources to support change
- promote change

Required Knowledge

- change management processes
- models of organisational change
- organisational theoretical frameworks

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Knowledge and application of change management and skills in a wide range of contexts to achieve actual organisation change objectives. **Consistency in performance** Evidence will need to be gathered over time in a range of actual or simulated change management contexts.
Context of and specific resources for assessment	**Context of assessment** Evidence of competent performance should be obtained by observing an individual in a change management role within the workplace or exercise or operational environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Resource requirements may include:	• changes in the workplace • implementation of new work practices • machinery of government change

© Commonwealth of Australia, 2025 Public Skills Australia

- budgetary reform
- organisation restructure
- technology transfer to the workplace
- emerging community issues
- new government programs
- natural disasters
- staffing changes

Stakeholders may include:

- personnel
- clients
- community
- other organisations
- unions
- management

Change contexts may include:

- strategic influences
- technology changes
- procedures and practices
- policy directions
- government legislation
- community expectations
- staffing levels
- finance
- skills available to meet opportunities
- freedom of information
- non-discriminatory guidelines
- new opportunities open to the organisation

Impact of change may include:

- working relationships
- public relations
- productivity/effectiveness measures
- working environment
- quality of services/products
- industrial relations
- individual skills/knowledge and career paths
- staff competency and developmental requirements

PUAMAN007B Manage financial resources

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to manage financial resources to achieve organisation and operational objectives.

Application of the Unit

This unit applies to any workers with authority for a budget within a public safety organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR505B Administer cost centre's financial resources (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a budget	1.1 Budgets are developed in the required format and consistent with organisation's guidelines and procedures. 1.2 Cost elements are identified and quantified to eliminate/reduce wastage. 1.3 Cost-benefit analyses are prepared for major cost items in accordance with the organisation's policy and procedures. 1.4 Sub-budgets prepared by other staff are coordinated in order that desired objectives are achieved. 1.5 Implications of major shifts in proposed or actual budget expenditures are analysed, determined and taken into account. 1.6 Performance indicators are developed and agreement reached based on the budget.
2. Allocate, authorise and monitor expenditure	2.1 Financial resources are allocated as agreed to in the operational plan and the budget negotiation process (as appropriate). 2.2 Expenditure management meets the financial accountability requirements of the organisation. 2.3 Expenditure is kept within budget or any potential over-runs identified and budget renegotiated accordingly. 2.4 Expenditure is authorised within financial authority limits established by the organisation. 2.5 Supply and expenditure processes are in accordance with corporate governance and organisational protocols. 2.6 ***Financial reports*** are produced when and in a format required by the organisation. 2.7 Sub-budgets are continuously monitored to ensure appropriate controls and authorisations are observed. 2.8 Finance allocation is continually monitored against organisational objectives and priorities ensuring optimum service delivery. 2.9 Re-allocation of resources is undertaken taking

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	account of needs and priorities.
3. Utilise relevant financial management information systems	3.1 ***Management information systems*** are used for planning, implementing and monitoring the financial resources usage. 3.2 Management information system reports are produced, verified and interpreted.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- cost-benefit analysis
- interpret financial reports
- monitor financial accounts
- prepare budgets
- prioritise financial resource allocation
- produce financial reports
- utilise management information systems

Required Knowledge

- accounting principles
- accrual and cash management procedures
- computer-based tools to produce financial reports
- costing policies and procedures
- financial management principles
- legislative and organisation's procedures for budget development and financial management
- management information systems
- organisation's financial accountability requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in application of financial resource management in a wide range of contexts in achieving the organisation's financial objectives.

© Commonwealth of Australia, 2025 Public Skills Australia

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance by observing an individual in a financial management role within the workplace or exercise or operational environment Knowledge may be assessed through:

- written assignments
- projects reports
- debriefings and action learning projects

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Budget formats may include:

- zero based budgeting
- program budgeting
- line item budgeting

Operating budget may include:

- staffing costs
- capital expenditure/income
- recurrent expenditure/income
- forward estimates
- cash flow

Policy may include:

- supply
- procurement
- expenditure
- audit
- reporting and recording policies

Financial reports may include:

- annual reports
- program financial statements
- accrual reports
- monthly/quarterly financial reports

Management information systems may include:

- computers
- communication channels

© Commonwealth of Australia, 2025 Public Skills Australia

- records management data
- procedures
- protocol
- legislation
- guidelines and awards
- organisation
- legal and policy materials
- client information
- market trends
- registries and file records
- library
- financial records
- basic statistical information
- personnel records

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan, determine and review physical resource requirements	1.1 Resource requirements are determined in line with demonstrated needs. 1.2 Cost benefit analyses demonstrate the return to the organisation. 1.3 Resource requirements are consolidated, rationalised and prioritised across workplaces. 1.4 Resource requirements are negotiated and acquired in the context of organisational priorities and ***budget.*** 1.5 Replacement/acquisition/refurbishment of major items are scheduled based on ***expected lifetime of equipment*** and anticipated needs of the organisation.
2. Direct and coordinate the acquisition and allocation of physical resources	2.1 Resources are acquired and deployed in accordance with organisational needs. 2.2 Resources inventory is established and maintained for easy tracking of resource location/history. 2.3 Maintenance schedules and ***budgets*** are developed and approved in consultation with ***stakeholders*** with due regard to occupational health and safety needs and in accordance with organisational policies and procedures. 2.4 Systems are developed and implemented which facilitate collection, processing and management of data on resource use and maintenance/asset management. 2.5 Resource performance is evaluated against agreed standards, to ensure efficient, effective and safe operation. 2.6 Resource use is maintained to ensure operational requirements are met. 2.7 Resources are re-allocated or disposed in accordance with ***organisational policy and procedures*** as necessary for maximum performance across the organisation.
3. Evaluate and report on physical resource	3.1 Effectiveness of resource acquisition and allocation is monitored and assessed to meet organisational

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
provision	needs. 3.2 Inefficiencies in resources provision are identified and corrected. 3.3 ***Acquisition and allocation of resources*** and costs incurred are recorded and reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse costs and benefits of resource acquisition and utilisation
- develop maintenance schedules and budgets
- evaluate resource performance
- monitor the effectiveness of resources acquisition and allocation
- utilise resource inventory

Required Knowledge

- budget processes
- organisational policy and procedures relating to physical resource acquisition and allocation
- resource management systems
- stock handling procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in knowledge and application of asset management in a wide range of contexts in achieving the organisation's objectives. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence of competent performance should be obtained by observing an individual in a physical resource management role within the workplace or exercise or

operational environment.

Knowledge may be assessed through written assignments, projects, reports, debriefings and action learning projects.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Physical resources:

- properties/facilities
- fixtures and plant
- vehicles
- equipment
- stock and supplies

Acquisition and allocation of resources based on:

- identified priorities
- suitability
- type of physical resource
- urgency
- cost of use
- accessibility
- endurance
- maintenance demands
- deployment time
- customer needs
- hazard and risk analysis

Organisational policy and procedures may vary between sectors and organisations and may include:

- legislation relevant to the management of physical resources
- legislation relevant to the organisation, operational, corporate and strategic plans
- organisational performance standards
- organisational personnel practices and guidelines
- organisational quality standards
- government policies

Budget formats may include:

- zero based budgeting
- program budgeting
- line item budgeting

© Commonwealth of Australia, 2025 Public Skills Australia

Budget may include:	• organisation – specific budgets • output and outcome budgeting • capital expenditure • recurrent expenditure • output investment proposals • cash flow
Stakeholders may include:	• staff • managers • government (state • local • federal) • unions • community • industry • owners of leased property • vehicles or equipment
Monitoring physical resource provision may include:	• site visits • inspections • partial or full audits of physical resources
Expected lifetime of equipment may include:	• organisation's corporate and strategic plans • organisation's financial and other resource management guidelines • government policy • capacity of equipment to perform to operational requirements
Reporting requirements may include:	• spreadsheets • written reports • completion of proformas • completion of forms • verbal reports • government budget submission proformas

PUAOHS001C Follow defined occupational health and safety policies and procedures

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers competency for applying general occupational health and safety requirements when working in the usual workplace environment, excluding emergency incidents.

This unit is based on the national Guidelines for Integrating Occupational Health and Safety Competencies into National Industry Competency Standards [NOHSC:7025 (1994)].

Application of the Unit

This unit applies to all workers within the public safety Industry, but is particularly relevant to new workers who need to understand OHS in the public safety context.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Follow workplace procedures for hazard identification and risk control	1.1 ***Hazards*** in the work area are recognised, rectified where possible and reported to designated personnel according to ***workplace procedures.***
	1.2 Workplace procedures and work instructions for controlling risks are followed.
	1.3 Workplace procedures for dealing with ***workplace emergencies*** are followed whenever necessary within scope of responsibilities and competencies.
2. Contribute to participative arrangements for the management of occupational health and safety (OHS)	2.1 Occupational health and safety issues are raised with designated personnel in accordance with workplace procedures and relevant occupational health and safety ***legislation.***
	2.2 Contributions to ***participative arrangements*** in the workplace are made within organisational procedures and scope of responsibilities and competencies.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate concerns verbally
- fill in accident and incident forms
- identify hazards and assess risks
- participate in group meetings
- use communication technology if relevant to workplace requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- ability to interpret Material Safety Data Sheets
- accidents
- emergencies
- fire
- incidents
- meaning of occupational health and safety signs and symbols relevant to area of work
- organisation's policies and procedures relating to hazards
- organisation's policies procedures relating to risk control and hazard reporting
- participative arrangements for occupational health and safety

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in all relevant workplace procedures followed. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentation. Observation, on the job and/or in a range of simulated environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Workplace procedures may include:	• hazard procedures • emergency procedures • accident and incident procedures • procedures for use of personal protective equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- procedures for reporting accidents
- incidents
- hazards and emergencies
- risk control procedures
- extrication procedures

Hazards may include:

- extreme temperatures
- emergency situations requiring evacuation or security
- earthquake
- manual handling
- damaged or broken furniture and fittings
- spillages
- damaged or worn equipment
- items blocking exits
- cords/ropes across walkways
- items of equipment in areas of pedestrian traffic
- slippery surfaces
- breakages
- noise
- machinery
- electricity
- sea conditions
- rocks
- dangerous creatures

Legislation may include:

- Commonwealth
- state and territory legislation
- standards
- codes of practice
- regulations and statutory requirements relevant to workplace OHS

Workplace emergencies may include:

- accidents
- vehicle and industrial accidents
- incidents involving dangerous goods and hazardous substances
- bomb scares
- terrorist action
- fires
- floods
- storm and tempest
- earthquake
- emergency situations requiring evacuation or security

© Commonwealth of Australia, 2025 Public Skills Australia

	• aquatic accidents • vessel aground, holed • towing emergencies • fire on board
Participative arrangements may include:	• Occupational health and safety committees team or workgroup meetings

PUAOHS002B Maintain safety at an incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to recognise potential health and safety risks and take action to eliminate or control those risks at incident scenes, to prevent injury to self, other personnel or members of the public.

Application of the Unit

This unit applies to all public safety workers attending an incident scene, and links to the individual's responsibility to maintain personal safety and to be aware of how actions affect the safety of others, including team members, other agency workers, and general public.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	1.1 Issues affecting safety of self and other personnel are established by identification of ***hazards*** and assessment of ***risks***, and by liaison with others at the scene. 1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies. 1.3 Duties are undertaken in line with organisational health and safety codes of practice and ***relevant legislation.***
2. Implement hazard controls at incident scene	2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures. 2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures. 2.3 Changes in situation and/or conditions are reported immediately to ***designated person.*** 2.4 ***Hazard controls*** are monitored and communicated to relevant personnel to ensure continuing effectiveness. 2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others. 2.6 Incident/accident scene is effectively secured to preserve the scene and maintain ***public safety*** in line with legislative requirements.
3. Maintain personal safety	3.1 ***Personal protective clothing and equipment*** is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation. 3.2 Personal protective clothing and equipment appropriate to dealing with the hazard is worn/fitted

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and used in accordance with organisation's policies and procedures and manufacturer's guidelines.
	3.3 Water and food intake, rest breaks and shelter requirements are maintained.
	3.4 ***Survival technique strategies*** are implemented in accordance with organisation's policies and guidelines.
4. Contribute to maintaining safety of other work group members	4.1 Impact of own actions on safety of others is recognised.
	4.2 Contact is maintained at all times with other work group members.
	4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

© Commonwealth of Australia, 2025 Public Skills Australia

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Working environment may be:	• hazardous • unpredictable • subject to time pressure • chaotic and expose responders to risk
Public Safety workplaces include:	• any location where a Public Safety incident occurs
Response situation include:	• single and multi agency response situations
Hazards include:	• all potential sources of injury or damage to property or the environment including identified and potential hazards to persons • equipment or the environment
Risk is:	• the likelihood of injury or damage occurring and the potential consequences of any injury or damage

Incidents may include:	• a variety of natural or man made events including but not limited to rescues and extrications
	• flood
	• storm
	• tempest
	• natural disaster
	• vehicle
	• aircraft
	• rail
	• industrial
	• civil defence
	• fires:
	  • structural
	  • wild
	  • prescribed burning
	• search and rescue :
	  • urban
	  • rural
	  • sea
	• hazardous materials and dangerous goods

Hazards may be identified by:	• scene assessment • visual inspections • plan reviews • recognising hazard warnings • accessing data bases • interviewing others at scene • seeking expert advice

© Commonwealth of Australia, 2025 Public Skills Australia

Others at scene may include:	• organisational personnel • personnel from other organisations • general public
Hazardous materials may include:	• thermal • mechanical • explosives • toxic • corrosive • asphyxiant • radiation • etiological hazards • mutagenic materials
Biological hazards may include:	• bacteria • viruses • fungi and yeasts • including exotic organisms
Physical hazards may include:	• noise • slippery surfaces • poor visibility • smoky environments • fallen/falling objects • fatigue
Electrical hazards may include:	• pole fires • electrical fires • electricity in damaged/burning structures • energised vehicles/structures due to downed wires • photovoltaic generation systems
Manual handling hazards may include:	• heavy objects • content and shape of containers
Environmental hazards may include:	• temperature • darkness • fire • snow • floods • winds • rain • hail • flora • fauna • postural restrictions and access • terrain

© Commonwealth of Australia, 2025 Public Skills Australia

	• traffic
Hazard control measures may include:	• erection of barriers • establishment of control zone • use of spill clean up kits • use of electrically insulated tools and equipment • vehicle protection hoses and devices • life support equipment (heat radiation shielded crew cabin • vehicle cabins with/without sprays) • entry control procedures to hazardous areas • decontamination • isolation of electricity supply
Relevant legislation may include:	• state or territory occupational health and safety acts and regulations
Personal protective clothing and equipment may include:	• breathing apparatus • personal lines • air lines • personal distress units • respiratory protection • protective hoods • goggles • hearing protectors • sunscreen • chemical protective clothing • personal flotation devices • wet suits • turnout uniform • gloves • hard hat • safety boots • overalls • chainsaw chaps • bullet proof vests • firearms • batons • handcuffs
Hazard control equipment may include:	• atmospheric monitoring equipment • meteorological equipment • radiation monitoring equipment • oxygen meters • flammable gas detectors

© Commonwealth of Australia, 2025 Public Skills Australia

Reporting may include:	• verbal • written reports • completing standard forms • logs • sitreps • note taking • logging entry to hazardous areas
Designated person may include:	• supervisor • team leader • workplace occupational health and safety representative • officer in charge
Survival strategies which may be applied in:	• buildings • wildfire situations • water • extreme heat or cold
Factors which may require monitoring may include:	• traffic • weather conditions • vegetation type • spectators • temperature • structural integrity • relative humidity • slope • terrain • water supply/pressure • fire development • stream flows • suspect atmospheres
Contact with other personnel may include:	• visual • vocal • touch • radio • audible warnings • signalling

PUAOHS003B Implement and monitor the organisation's occupational health and safety policies, procedures and programs

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers competency in implementing and monitoring occupational health and safety (OH&S) policies, procedures and programs in the workplace.

The unit is based on the National Guidelines for Integrating Occupational Health and Safety Competencies into national industry competency standards.

Application of the Unit

This unit applies to workers who have legislated or delegated role to ensure that organisational OHS policy and procedures are implemented in a specific workgroup.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide information to the workgroup about occupational health and safety and the organisation's occupational health and safety policies, procedures and programs	1.1 ***Relevant provisions of occupational health and safety legislation*** and codes of practice are accurately and clearly explained to the work group. 1.2 Information on the organisation's occupational health and safety policies, procedures and programs is provided in a readily accessible manner and is accurately and clearly explained to the work group. 1.3 Information about identified hazards and the outcomes of risk assessment and risk control procedures is regularly provided and is accurately and clearly explained to the work group.
2. Implement and monitor participative arrangements for the management of occupational health and safety	2.1 Organisational procedures for consultation over occupational health and safety issues are implemented and monitored to ensure that all members of the work group have the opportunity to contribute. 2.2 Issues raised through consultation are dealt with and resolved promptly or referred to the appropriate personnel for resolution in accordance with ***workplace procedures*** for resolution. 2.3 The outcomes of consultation over occupational health and safety issues are made known to the work group promptly.
3. Implement and monitor the organisation's procedures for identifying hazards and assessing risks	3.1 Existing and potential hazards in the work area are identified and reported so that risk assessment and control procedures can be applied.
4. Implement and monitor the organisation's procedures for controlling risks	4.1 Work procedures to control risks are implemented and adherence to them by the work group is monitored in accordance with workplace procedures. 4.2 Existing risk control measures are monitored and results reported regularly in accordance with workplace procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Inadequacies in existing risk control measures are identified in accordance with the hierarchy of control and reported to designated personnel.
	4.4 Inadequacies in resource allocation for implementation of risk control measures are identified and reported to designated personnel.
5. Implement the organisation's procedures for dealing with hazardous events	5.1 Workplace ***procedures for dealing with hazardous events*** are implemented whenever necessary to ensure that prompt control action is taken.
	5.2 ***Hazardous events*** are investigated to identify their cause in accordance with investigation procedures.
	5.3 Control measures to prevent recurrence and minimise risks of hazardous events are implemented based on the hierarchy of control, or alternatively, referred to designated personnel for implementation.
6. Implement and monitor the organisation's procedure for providing occupational health and safety training	6.1 Occupational health and safety training needs are identified accurately, specifying gaps between occupational health and safety competencies required and those held by workgroup members.
	6.2 Arrangements are made for fulfilling identified occupational health and safety training needs in both on and off-the-job training programs in consultation with relevant parties.
7. Implement and monitor the organisation's procedure for maintaining occupational health and safety records	7.1 Occupational health and safety records for work area are accurately and legibly completed in accordance with workplace requirements for occupational health and safety records and legal requirements for maintenance of records of occupational injury and disease.
	7.2 Aggregate information from the area's occupational health and safety records is used to identify hazards and monitor risk control procedures within work area according to organisational procedures and within scope of responsibilities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate information orally and in writing

© Commonwealth of Australia, 2025 Public Skills Australia

- implement safety awareness programs
- make decisions
- write reports

Required Knowledge

- accident reporting procedures
- availability and contact numbers of emergency services
- current principles and procedures relating to workplace occupational health and safety policies and procedures
- employee obligations and responsibilities
- equal employment opportunity principles and practices
- hierarchy of control
- job design and workplace layout
- legal health and safety ramifications
- procedures for implementing accident investigation
- relevant occupational health and safety regulations and acts

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Working knowledge consistent with the elements of competence of all applicable occupational health and safety legislation and codes of practice.

Demonstrated understanding of the hierarchy of control (the preferred order of risk control measures from most to least preferred, that is:

- elimination
- substitution
- engineering controls
- administrative controls
- and lastly, personal protective equipment)

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Competence is demonstrated in the context of an established organisational occupational health and safety system with related policies, procedures and programs.

Competence may be demonstrated working individually or under the guidance of, or as a member of a team with

© Commonwealth of Australia, 2025 Public Skills Australia

specialist occupational health and safety staff or managers.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Relevant provisions of occupational health and safety legislation may include:	• general duty of care including public safety requirements for maintenance and confidentiality of records of occupational injury and disease • provision of information and training • regulations and codes of practice relating to hazards present in work area • health and safety representatives and occupational health and safety committees
Workplace procedures may include:	• inspection/evaluation • housekeeping • consultation processes • training and assessment • specific hazard policies and procedures including public safety procedures • occupational health and safety information • occupational health and safety record keeping and reporting • maintenance of plant and equipment • purchasing of supplies and equipment • counselling and disciplinary procedures
Hazardous events may include:	• accidents • fires • floods • storms • emergencies—chemical spills • bomb scares • ‘near misses’
Procedures for dealing with hazardous events may include:	• evacuation • chemical containment • first aid procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace procedures—inspection
- housekeeping
- consultation processes (either general or specific to occupational health and safety)
- training and assessment
- specific hazard policies and procedures
- occupational health and safety information
- occupational health and safety record keeping
- maintenance of plant and equipment
- purchasing of supplies and equipment
- safety audits

Unit Sector(s)

Not applicable.

PUAOHS004B Establish and maintain the occupational health and safety system

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers how to establish, maintain and evaluate an occupational health and safety system in the work environment.

This unit is based on the National Guidelines for Integrating Occupational Health and Safety Competencies into National Industry Competency Standards [NOHSC: 7025 (1994)].

Application of the Unit

This unit applies to workers who have either a legislated or delegated responsibility to implement OHS systems to meet the organisation's policy requirements. These roles require significant role or delegated authority to allow effective implementation and review. While designed for public safety workers, this unit could be applied in a range of industries. This unit does not cover the broader implementation of organisation wide OHS policy.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise consultation process	1.1 ***Relevant personnel*** or other representative personnel are identified and invited into the development and maintenance processes. 1.2 Issues raised through consultation are effectively handled according to issue resolution procedures. 1.3 Results from the ***consultation process*** are verified and made available to relevant personnel. 1.4 ***Consultative*** processes are flexible and consistent with representatives requirements.
2. Design Occupational Health and Safety framework	2.1 ***Hazards*** and risks are correctly identified and confirmed according to occupational health and safety legislation, codes of practice and prevailing trends. 2.2 Procedure for ongoing identification of hazards and risks is developed and integrated within work systems and procedures. 2.3 ***Occupational health and safety policies*** are developed in line with relevant legislation. 2.4 Occupational health and safety responsibilities and duties are clearly defined and incorporated into job descriptions/statements. 2.5 Adequate ***resources*** are sourced and provided in a timely and consistent manner. 2.6 Measures to control assessed risks are developed and implemented in accordance with the hierarchy of control, relevant occupational health and safety legislation, codes of practice and trends. 2.7 ***Interim solutions*** are implemented until a permanent control measure is developed. Details are recorded clearly and efficiently according to organisation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	policy and procedures and relevant legislation.
3. Design and implement an Occupational Health and Safety awareness training program	3.1 Educational ***information*** on the occupational health and safety system is made available to all relevant personnel. 3.2 Appropriate training is provided to all relevant personnel to enable the implementation of safety procedures.
4. Establish, monitor and maintain Occupational Health and safety system	4.1 A ***system for keeping occupational health and safety records*** is established in accordance with legislative requirements. 4.2 Work activities are monitored to ensure that ***hazard identification and risk assessment*** and control procedures are effectively adopted. 4.3 Inadequacies in ***hazard identification***, ***risk assessment*** and established risk control measures are identified in accordance with the hierarchy of control and reported to designated personnel. 4.4 Amendments to procedures are undertaken through appropriate consultation methods.
5. Establish and maintain a system for accident investigation	5.1 A system is developed and implemented for reporting and investigation of all accidents/incidents in accordance with the policies and procedures. 5.2 Training is provided to employees responsible for accident investigation for effective implementation of accident investigation policy. 5.3 Policies and procedures for reporting and investigating all accidents/incidents are reviewed and updated as required.
6. Evaluate the organisation's Occupational Health and Safety system and related policies procedures and programs	6.1 The effectiveness of the occupational health and safety system and related policies, procedures and programs is assessed according to the organisation's occupational health and safety policy. 6.2 Improvements to the occupational health and safety system are developed and implemented. 6.3 Compliance with occupational health and safety legislation and codes of practice is assessed to ensure that legal occupational health and safety standards are maintained.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- high level interpersonal skills
- high level skills in clear written and oral communication
- procedures and personnel
- skills in management of systems

Required Knowledge

- details of all relevant Occupational Health and Safety legislation and its relevance to organisation operations
- details of codes of practice and their relevance to organisation operations
- hierarchy of control (the preferred order of risk control measures from most to least preferred that is:
  - elimination
  - substitution
  - engineering control
  - administrative controls
  - and personal protective equipment)
- literacy levels and communication skills of work group members
- knowledge of current principles and practices used to implement and monitor organisational OH&S policies
- procedures and programs
- suitable communication techniques to address needs of work group members

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstrated understanding of principles and practices for Occupational Health and Safety. Demonstrated understanding of the significance of other management systems and procedures for occupational health and safety. **Consistency in performance** Evidence will need to be gathered over time across a range of variables.
Context of and specific resources for assessment	**Context of assessment** Evidence must include observation of performance in

© Commonwealth of Australia, 2025 Public Skills Australia

the work environment or a simulation. Written and verbal tests may be used as supporting evidence. Competence may be demonstrated working individually or under the guidance of or as a member of a team with specialist occupational health and safety staff or managers.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Occupational Health and Safety policies may:	• express the organisation's commitment to OHS, and demonstrate consistency of application across the organisation's policies
Resources may include:	• financial and human
Information should be:	• clear • concise • written in plain English where possible • in suitable format for particular target group • timely
Consultative process may include:	• meetings • workshops • reports
Persons involved in consultation may include:	• employer • employee • representative body (regulator, unions) • independent advisor
Occupational Health and Safety trends:	• occupational health and safety trends may be identified from the occupational health and safety records system
System used to record safety details may:	• allow the recording and identification of patterns of occupational injury and disease
Occupational Health and Safety training program may be:	• internal or external • fulfil employees' occupational health and safety needs as identified • as part of the organisation's general training

© Commonwealth of Australia, 2025 Public Skills Australia

	program
Hazard identification and risk assessment may include:	• visual inspections • reports • notices • situational analyses
Hazards may be:	• existing or potential
Hazardous procedures may include:	• work practices • equipment • situations
Hazardous events may include:	• accidents • fires • emergencies such as chemical spills and bomb scares
Procedures for dealing with hazardous events may include:	• evacuation • chemical containment • first aid procedures • PIN notice • ceasing activity
Interim measures may be necessary when:	• measures that control a risk at its source are not immediately practicable
Processes for consultation may include:	• occupational health and safety committees • consultation with health and safety representatives • resolution procedures • participative/consultative procedures conducted by supervisory staff within the area of managerial responsibility • union/association and management meetings
Monitoring of activities may include:	• review of written reports • performance appraisal • auditing procedures • observation of work task
Relevant personnel may include:	• managers • supervisors • occupational health and safety officer/manager • permanent and part time workers • representative personnel • suppliers • staff organisation

PUAOIL201 Use basic equipment operations for oil spill response

Modification History

PUAOIL201 Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to operate and deploy, operate, monitor and recover basic (Tier 1) oil spill response equipment as part of a team

Application of the Unit

This unit applies to personnel deployed to operate basic (Tier 1) oil spill response equipment

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Undertake a health and	1.1 Identify and communicate potential hazards and

© Commonwealth of Australia, 2025 Public Skills Australia

safety site review	risks. 1.2 Report hazards and risks in accordance with policies and procedures. 1.3 Select, use maintain and store personal protective equipment in accordance with both occupational health and safety and material safety data sheet requirements.
2. Prepare Tier 1 equipment for use	2.1 Use the incident action plan (IAP) and/or the site-specific deployment plan to identify and select ***oil spill response equipment*** according to supervisor's instructions. 2.2 Use manufacturer's specifications and ***standard operating procedures*** (SOPs) in the management of routine ***pre-operational checks*** of equipment while working as part of a team. 2.3 Report unsafe or faulty equipment in accordance with workplace procedures and set aside for repair or replacement.
3. Operate and/or deploy Tier 1 equipment	3.1 Operate and maintain equipment in accordance with manufacturer's specifications, SOPs and supervisor's instructions while working in a team. 3.2 Complete work tasks in accordance with health and safety requirements and the IAP. 3.3 Identify, ***action*** and monitor ***environmental implications*** associated with the operation and maintenance of equipment. 3.4 Monitor ***environmental conditions*** in conjunction with operational activities.
4. Check, clean and store Tier 1 equipment	4.1 Report equipment use in accordance with IAPs/SOPs and/or the incident management system 4.2 Clean, secure and store equipment in accordance with manufacturer's specifications, maintenance manuals, supervisor's instructions and/or SOPs. 4.3 Report equipment malfunctions, faults, wear or damage to supervisors for actioning. 4.4 Maintain and clean workplaces in accordance with Occupational Health and Safety requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- ability to identify hazards:
- environmental
- physical
- chemical
- take appropriate initiative relating to the handling and monitoring equipment
- communicate effectively with others
- modify activities dependent on workplace situations including risk and environment
- read and interpret material safety data sheets
- monitor equipment performance
- complete maintenance checks and identify any required maintenance
- work safely and collaboratively with others
- recognise and address problems when dismantling, inspecting and assembling equipment
- work effectively within a team environment
- safe loading and unloading of materials

Required Knowledge

- OHS responsibilities
- safe working procedures
- operational characteristics of equipment
- operation of equipment in accordance with SOPs
- environmental impact of equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: Work effectively in a team to safely deploy and monitor basic (Tier 1) equipment for the containment, recovery and storage of oil.
Context of and specific resources for assessment	Competency should be assessed in a simulated response environment or operational situation.
Method of assessment	Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an approved simulated environment. Forms of assessment may include:

© Commonwealth of Australia, 2025 Public Skills Australia

- direct observation
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions
- case studies

Guidance information for assessment

Where possible assessment should be completed holistically and may be assessed with other relevant units of competence. For example this unit may be assessed with PUAOIL302 Use advanced equipment operations for oil spill response.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include:

- chemical
- working environment:
- heat
- cold
- operational:
- vehicles
- manual handling
- slips, trips and falls
- noise

Risks may include:

- fatigue
- hyper/hypothermia
- dehydration
- hearing loss
- physical injury
- equipment damage
- poisoning
- burns
- respiratory problems
- injection - hydraulic and pneumatic

Personal protective equipment as dictated by the material safety data sheets and the work environment

- personal flotation device (PFD)
- hearing protection
- boots (appropriate to conditions)
- gloves (chemical and / or abrasive protection)

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	• eye protection • respirators • disposable overalls
Oil spill response equipment may fall into the following categories:	• containment: • general purpose boom + ancillary equipment • shoreline boom + ancillary equipment • recovery: • passive weir skimmer • positive displacement pump • storage: • temporary storage • ancillary: • correct use of sorbents • anchor kit
Standard operating procedures are:	• procedures identifying safe and effective work method statements
Pre-operational checks may include:	• equipment ‘in-test’ tagged and tested – electrical, slings, hoses • maintenance checks • pre-start and stop • safety checklist • fuels, fuel lines and oil • battery electrolyte levels, wheels and tyre pressure • air filters • safety guards • safety signs and barricades
Actioned may include:	• logged • verbal • written
Environmental implications may include:	• secondary contamination (decontamination station) • waste (hot and cold zones) • sensitive areas • wildlife habitats • flora/fauna
Environmental conditions may be:	• weather • tides • current • isolation

PUAOIL301 Apply health, safety and risk controls when working on oiled shorelines

Modification History

PUAOIL301 Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to identify health and safety hazards relating to oil spill response as well as implementing and managing safety procedures.

Application of the Unit

This unit applies to shoreline supervisors and/or coordinators responsible for occupational health and safety in the assessment, coordination and supervision of activities relating to oiled shoreline response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify potential hazards	1.1 Identify ***hazards*** in the work area before and during work. 1.2 Assess ***risks*** for the identified hazards. 1.3 Identify ***controls*** for these hazards. 1.4 Review effectiveness of controls within the scope of authority. 1.5 Identify and report remaining risks.
2. Follow procedures for risk control	2.1 Select, use and maintain relevant ***personal protective equipment***. 2.2 Develop site specific health and safety plans. 2.3 Develop induction processes.
3. Follow guidelines for working with oil	3.1 Explain contact procedures for personnel involved in oil spill response. 3.2 Follow approved safety procedures and use personal protective equipment as specified in procedures. 3.3 Observe safety requirements when operating near volatile substances.
4. Report hazards, injuries, near misses	4.1 Communicate reporting requirements for all incidents. 4.2 Remediate practices where appropriate following the report of any incident. 4.3 Complete appropriate forms/reports and forward to identified personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- effective communication verbal/written
- correct and appropriate use of PPE
- identification of hazards
- implementation of controls for hazardous situations
- plan development and implementation

Required Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

- identification of hazards and hazardous areas
- identification of standard controls for the hazard
- recognition of hazards common to the industry
- use of personal protective equipment
- severity of risks from materials and work processes used
- environmental impact and risks to individuals
- correct use of equipment for handling materials

Evidence Guide

Overview of assessment	Assessors must be satisfied that the person can consistently perform the Unit as a whole as defined by the Elements, Performance Criteria, skills and knowledge.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • put into practice health and safety practices when working in oiled environments • identify and manage health and safety risks associated with oil • ensure tasks are performed in accordance with safety requirements and quality systems • recognise potential emergency situations and communicate promptly • understand and implement emergency provisions
Context of and specific resources for assessment	Simulation will be required for the timely assessment of this unit of competency. Simulation should be based on a potential work environment and should include the use of case studies/scenarios/what ifs and questions and answers.
Method of assessment	Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Forms of assessment may include: • direct observation • responses to what if scenarios • third party reports from supervisors • written or oral questions • case studies • role play

© Commonwealth of Australia, 2025 Public Skills Australia

Guidance information for assessment	Where possible assessment should be completed holistically and may be assessed with other relevant units of competence for example but not limited to: • HLTFA301C Apply first aid • PUAOIL402 Apply oiled shoreline assessment strategies in an oil spill response • PUAOIL403 Lead a team in oiled shoreline clean up

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include:	• hazardous materials • fire or explosion • inhalation of hydrocarbon vapour • working in confined spaces • skin or eye contact through handling of oil or chemicals • prolonged exposure to heat, cold, wet, sun, wind • slips and falls • dangerous wildlife • working close to water (currents, rips and eddies) • fatigue from heavy physical work and/or long hours • use of machinery • people • stress associated with causes and consequences of serious incidents
Risks may include:	• fire and explosion hazards • inhalation • lack of appropriate PPE • boats not operated by trained personnel • machinery not operated by trained personnel • chemicals handled inappropriately and not by trained personnel • fatigue • slips, trips and falls • manual handling
Controls may include:	• rest breaks and relief teams • site specific health and safety plans

© Commonwealth of Australia, 2025 Public Skills Australia

	• operation specific health and safety plans • clear communication and training • first aid
Personal protective equipment as dictated by the material safety data sheets and the work environment may include:	• overalls • rubber boots • eye protection • ear protection • gloves • hard hat • respirator • communications (radio or mobile depending on area) • insect repellent • sunscreen
Site specific health and safety plans may include:	• H & S responsibilities • induction and training requirements • health and safety monitoring • first aid/medical support arrangements • assessment of known hazards and risks • management strategies for known hazards and risks

Unit Sector(s)

Marine pollution response.

© Commonwealth of Australia, 2025 Public Skills Australia

PUAOIL302 Use advanced equipment operations for oil spill response

Modification History

PUAOIL302 Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to safely deploy, operate, monitor and recover advanced oil spill response equipment.

Application of the Unit

This unit applies to personnel responsible for the choices and deployment of appropriate oil spill response equipment according to the type of product and the environmental conditions for a Tier 1, 2 or 3 response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage the safety of the operation	1.1 Identify ***hazards*** and ***risks*** for the site and equipment use through a job safety analysis. 1.2 Apply the ***hierarchy of controls*** to manage hazards and risks. 1.3 Select, use, maintain and store ***personal protective equipment*** in accordance with both occupational health and safety and material safety data sheet requirements.
2. Communicate effectively with work team and incident management team	2.1 Prepare site specific deployment plans based on the incident action plan (IAP). 2.2 Plan, prepare and present ***briefs and debriefs***. 2.3 Maintain effective ***communication*** channels with all ***stakeholders*** involved in the deployment and recovery of ***oil spill response equipment***. 2.4 Ensure response personnel are capable of deploying the equipment in a team environment.
3. Prepare equipment for use	3.1 Identify required equipment using the IAP and/or site-specific deployment plan. 3.2 Conduct routine ***pre-operational checks*** of equipment using manufacturer's specifications and ***standard operating procedures***. 3.3 Identify and segregate faulty equipment for repair or replacement. 3.4 Identify equipment requiring licensed operators.
4. Operate and/or deploy equipment	4.1 Use equipment according to state/NT/Commonwealth ***licensing requirements***. 4.2 Operate and monitor equipment in accordance with manufacturer's specifications, supervisor's instructions and/or safe operating procedures (SOPs). 4.3 Carry out work in accordance with occupational health and safety requirements and the IAP. 4.4 Identify and record the use of consumables.
5. Monitor operations	5.1 Monitor, assess and re-assess the effectiveness of equipment and/or the recovery operation. 5.2 Identify, action and monitor ***environmental implications*** associated with the operation and maintenance of equipment. 5.3 Identify any changes to the response as a result of ongoing monitoring.

© Commonwealth of Australia, 2025 Public Skills Australia

6. Check, clean and store equipment	6.1 Maintain records of equipment use in accordance with IAP, SOPs and/or the incident management system. 6.2 Clean, secure and store equipment in accordance with manufacturers specifications, maintenance manual, supervisor's instructions and/or SOPs. 6.3 Report and take action on equipment malfunction, fault, wear or damage. 6.4 Maintain and clean the workplace in line with occupational health and safety requirements and the demobilisation plan.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively with others
- work effectively within a team environment
- work safely and collaboratively with others
- read and interpret material safety data sheets
- take appropriate initiative relating to the handling of equipment
- recognise and address problems when dismantling, inspecting and assembling equipment
- monitor equipment performance
- modify activities dependent on workplace situations including risk and environment
- complete maintenance records
- ability to identify hazards:
  - environmental
  - physical
  - chemical
- safe handling and use of equipment

Required Knowledge

- hazards:
  - environmental
  - physical
  - chemical
- OHS responsibilities
- loading and unloading of materials
- operational characteristics of equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- operation of equipment in accordance with SOPs

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- demonstrate the safe deployment and operation of equipment to contain, recover and store oil
- ensure safety and hazard control procedures are implemented
- identify hazardous situations that may arise and take appropriate action
- communicate effectively with others involved in the response
- monitor and reassess situations to ensure the best possible response according to environmental conditions

Context of and specific resources for assessment

Competency should be assessed in a simulated response environment or in an operational situation. It is suggested that Apply basic equipment operation be assessed either prior or with this unit.

Method of assessment

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an approved simulated environment.

Forms of assessment may include:

- direct observation
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions
- case studies

Guidance information for assessment

Where possible assessment should be completed holistically and may be assessed with other relevant units of competence For example may be assessed with PUAOIL201 Use basic equipment operations for oil spill response.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include:

- manual handling
- slips, trips and falls
- noise
- working around aircraft
- working around / on vessels
- chemical properties of oil:
  - combustibility
  - vapour
- environment:
  - heat
  - cold
  - tides
  - current
  - isolation
  - cliffs/heights
  - heights
  - rocks
- wildlife
- confined spaces
- vehicles

Risks may include:

- fatigue
- hearing loss
- physical injury
- equipment damage
- poisoning
- burns
- respiratory problems
- injection - hydraulic and pneumatic
- chemical risks:
  - inhalation
  - ingestion
  - absorption

Hierarchy of controls may include:

- elimination
- substitution
- modification
- containment

© Commonwealth of Australia, 2025 Public Skills Australia

	• ventilation • work practices • personal protection
Personal protective equipment as dictated by the material safety data sheets and the work environment may include:	• personal flotation device (PFD) • hearing protection • boots (appropriate to conditions) • gloves (chemical and / or abrasive protection) • eye protection • respirators • disposable overalls

Briefs and debriefs may include:	• can use SMEACS or similar format
	• SMEACS:
	  • Situation – what has happened.
	  • Mission – what you need to do about it.
	  • Execution – how you are going to do it.
	  • Administration & logistics – what you need to take action.
	  • Command and communication – who else needs to be involved, who needs to know about it etc
	  • Safety

Communication may be by:	• briefings
	• reports
	• sitreps
	• logs
	• incident forms / records
	• incident action plans
	• site specific deployment plans
	• discussion
	• verbal directions
	• hand signals
	• information board
	• using:
	  • landline phone
	  • mobile
	  • computer
	  • marine radio (VHF)
	  • uhf
	  • satellite phone
	  • pager
	  • facsimile

© Commonwealth of Australia, 2025 Public Skills Australia

Stakeholders may include:	• incident management team • aircraft operators • marine vessel operators and crew • logistics officers • media • public • traditional owners • government • businesses • team members

Oil spill response equipment may include:	• containment:
	  • boom inflatable – plus v sweep boom
	• recovery:
	  • heavy oil transfer pump (and ancillary equipment)
	  • oil recovery vessels
	  • active skimmers
	  • disk / drum skimmers
	  • rope mops
	• storage:
	  • towable storage bladder
	• other:
	  • dispersant spray bucket and transfer pumps
	  • shoreline flushing pump
	  • marine radio (UHF, VHF)
	  • correct use of sorbents

Pre-operational checks may include:	• equipment ‘in-test’ tagged and tested – electrical, slings, hoses • maintenance checks • pre-start and stop • safety checklist • fuels, fuel lines and oil • battery electrolyte levels, wheels and tyre pressure • air filters • safety guards • safety signs and barricades
Standard operational procedures	• procedures identifying safe and effective work method statements
Licensing requirements may include:	• state, territory and commonwealth legislation must be checked for high risk work and relevant licenses:

© Commonwealth of Australia, 2025 Public Skills Australia

- dogging
- crane and hoist operation
- forklift
- confined spaces
- 27 mhz and vhf marine radio equipment

Environmental implications may include:

- secondary contamination (decontamination station)
- waste (hot and cold zones)
- sensitive areas
- wildlife habitat
- flora

PUAOIL401 Release 1: Primary release.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to make strategic, planning and operational decisions in an oil spill.

Application of the Unit

This unit applies to individuals working in functional management roles within the incident management team who have the responsibility for ensuring the viability and success of a marine pollution response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish context of spill	1.1 Gather ***intelligence*** to determine the size and impact of the situation. 1.2 Identify the ***character*** and ***behaviour*** of the oil spill. 1.3 Consult and involve appropriate ***advisors*** in establishing the ***context of the spill***. 1.4 Identify and confirm response ***objectives***. 1.5 Provide accurate, timely and relevant communication about the spill to ***stakeholders***.
2. Consider response options to make a decision	2.1 Identify and review available ***response options*** to the spill. 2.2 Review strengths and weaknesses of options with appropriate advisors if necessary. 2.3 Determine ***risk*** areas and ***levels of risk***. 2.4 Determine and select best response option/s based on ***critical factors***. 2.5 Determine the ***scale of response*** to the spill. 2.6 Document decision making processes.
3. Implement response	3.1 Develop response plans for selected options. 3.2 Develop an incident action plan. 3.3 Communicate proposed response actions to relevant people/stakeholders. 3.4 Monitor and review response actions and modify as appropriate in response to changing circumstances.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- critical analysis
- evaluation and decision making
- assertiveness
- ability to work within and/or lead a team
- flexibility
- advanced verbal and written communication skills, including proficiency in mathematical concepts and calculations
- ability to undertake a value chain analysis to review, strengths and weaknesses

© Commonwealth of Australia, 2025 Public Skills Australia

- ability to develop risk management plans and implement with due diligence
- ability to implement a plan that has public and political impact
- problem solving appropriate to identified risks

Required Knowledge

- relevant organisational legal requirements
- relevant legislation impacting on spill response operations, particularly in regard to health and safety, environmental issues, industrial relations etc.
- strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- oil spill response equipment (limitations and benefits)
- oil types, spill behaviours and effects within the marine environment
- policies and procedures for liaising with media and politicians according to organisational policies and procedures
- health and safety issues / management
- international conventions and compensation regimes
- protection and indemnity clubs (P&I), the international tanker owners pollution federation limited (ITOPF) and similar organisations and the role of them and their representatives in oil spill response
- indigenous and cultural issues
- the role of salvors

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- details of a management plan which includes stakeholder analysis, explanation of the risk context, critical success factors, identified and analysed risks, treatments for prioritised risks
- knowledge of relevant legislation, codes of practice and national standards
- details of monitoring arrangements for risk management plan and an evaluation of the efficiency of the risk management in treating risk
- communication to stakeholders through Incident Action Plans

Context of and specific resources for assessment

Assessment must be based on a real or simulated oil response situation where multiple decisions may be made but where critical analysis of information allows for considered and justifiable actions.

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • review of documentation • simulation • direct observation • third party reports • case studies • scenarios • action plans • reports • written or oral questions
Guidance information for assessment	It is important that assessment with other units relevant to oil spill management or incident management systems is taken into account.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Sources of intelligence may include:	• initial visual reports (location) • oil samples • MSDS • Australian dangerous goods code • oil spill response atlas • oil spill response trajectory modelling • reports from ship's master indicating type and quantity • aerial observations • tides • current • weather forecast • reports from operational, technical and environmental advisors • net environmental benefit analysis

Character of oil could be defined by:	• chemical characteristics:
	  • aromatic content
	  • aliphatic content

© Commonwealth of Australia, 2025 Public Skills Australia

- asphaltene content
- wax content
- physical characteristics:
  - flash point
  - pour point
  - in relation to surface water temperature
  - solubility
  - density (API gravity or specific gravity)
  - in relation to density of sea water
  - viscosity
  - viscous/non-viscous
  - thickness
  - stickiness
  - in relation to adherence to physical structures or habitats
  - persistence
- oil character influence on response options:
  - selection of response equipment
  - amenability to chemical dispersion

Behaviour of oil could be defined by:

- movement of oil:
  - volume
  - spread
  - drift
  - area of coverage
  - percentage coverage
  - rate of flow
  - flow continuing
  - flow stopped
- weathering and influence on oil character:
  - spreading
  - evaporation
  - emulsification (mousse formation)
  - dispersion
  - dissolution
  - sinking/sedimentation
  - biodegradation
  - photo-oxidation

Advisors may include

- operational, technical and environmental experts including:
  - environmental scientists

© Commonwealth of Australia, 2025 Public Skills Australia

- marine pollution experts
- AMSA
- oil importers/exporters
- ships master
- salvage advisors
- government agencies

Context of the spill may include:

- location
- environmental sensitivity
- estuaries
- wildlife habitats
- tourism
- indigenous culture
- business/industry

Objective is:

- Consultative management to determine the desired outcomes of the incident which are then communicated through the response team

Stakeholders may include:

- government agencies and representatives:
  - federal
  - state
  - local
- businesses
- community
- protection and indemnity (P &I club)
- indigenous communities
- national response team
- media
- salvors
- ship owner, charterer or manager

Response options may include:

- mechanical
- chemical
- manual
- observation and monitoring
- manual clean up

Risk may include:

- properties of oil
- health and safety:
  - fire and explosion
  - ingestion
  - skin damage
  - restricted breathing
  - physical injury
- contamination

© Commonwealth of Australia, 2025 Public Skills Australia

- proximity to land
- community impact
- wildlife habitats
- environmental conditions:
  - weather
  - tides
  - currents
  - location
- wildlife
- inappropriate use of dispersant (not using the correct window of opportunity)
- fatigue
- hypothermia
- hyperthermia
- health impact of oil
- flammability and volatility of oil
- political
- media

Levels of risk may include:

- assessed through risk analysis and minimised through hierarchy of controls

Critical factors may include:

- health and safety of responders and community
- minimisation of impact
- environment
- appropriate approvals

Scale of response could take into account:

- human resources
- physical resources
- access

Unit Sector(s)

Marine pollution response.

PUAOIL402 Apply oiled shoreline assessment strategies in an oil spill response

Modification History

PUAOIL402 Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to lead a team in oiled shoreline assessment as a shoreline supervisor or coordinator.

Application of the Unit

This unit applies to a shoreline supervisor or coordinator responsible for collating data about shorelines and the extent and degree of oiling.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct pre deployment preparations	1.1 Identify ***jurisdictions*** and response ***constraints*** to assist deployment planning. 1.2 Identify, analyse and record ***deployment information*** to aid planning. 1.3 Select, source, and check tools and ***equipment*** consistent with plan requirements. 1.4 Document and provide information to the incident management team.
2. Conduct on-site assessment	2.1 Plan and prepare briefing prior to ***on-site assessment***. 2.2 Complete and record on-site assessment of incident zone. 2.3 Communicate assessment information to shoreline coordinator to assist in the management of the response.
3. Plan and monitor response	3.1 Determine and plan clean up priorities and communicate to relevant parties. 3.2 Identify and communicate specific duties/responsibilities. 3.3 Plan and communicate daily objectives and priorities. 3.4 Monitor incident and modify response plan based on response team reports and ongoing oiling of shoreline.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- prepare, present and communicate information
- identify the relationship between the goals of the incident management team and how own work contributes to these goals
- make decisions
- prioritise work tasks
- map reading
- safe work practice
- application of environmental legislation

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- state/territory emergency procedures and networks
- knowledge of principles and practices to conduct an activity which exercises elements of public safety management
- range of communication equipment available to the organisation
- legislative and statutory safety requirements
- relevant environmental legislation
- environmental impact
- shoreline attributes

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- describe:
  - shoreline substrates and the influence of substrate on shoreline response
  - shoreline type or form
  - biological character
  - shoreline oiling
  - priorities for shoreline protection
- implement plans for shoreline protection
- understand and convey the importance of health and safety in the oiled environment

Context of and specific resources for assessment

Competency should be assessed in a simulated multi-agency response environment or in an operational environment.

Method of assessment

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an approved simulated environment.

Forms of assessment may include:

- direct observation
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions
- case studies

Guidance information for

Where possible assessment should be completed

© Commonwealth of Australia, 2025 Public Skills Australia

assessment	holistically and may be assessed with other relevant units of competence such as but not limited to : • PUAOIL301Apply health, safety and risk controls when working on oiled shorelines • PUAOIL401 Apply decision making strategies in an oil spill response • PUAOIL403 Lead a team in oiled shoreline clean up • PUATEA003B Lead, manage and develop teams

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Jurisdiction may include:	• commonwealth • state • local government • environment and conservation department • parks and wildlife • great barrier reef marine park
Constraints may include:	• health and safety of team members • remoteness • access • equipment • damage to shoreline • sensitivity of shoreline and environmental impact • public and media • support services • tides • threat from wildlife • communication • waste storage and removal
Deployment information may include	• shoreline sector allocation • shoreline assessment forms using GIS and map data • location, character and behaviour of oil and oiled shoreline • clean up response areas • environmentally or socially sensitive areas • resource requirements
Equipment may include:	• digital camera with sufficient memory and power

© Commonwealth of Australia, 2025 Public Skills Australia

	packs • water tight camera bags • video camera, tapes and batteries • photo log book • shoreline assessment forms • field notebooks (waterproof) • pencils, waterproof markers, rulers, protractors, scissors • waterproof pack • compass • global positioning system (GPS); hand held portable • topographic maps or charts • road maps • radios/satellite phones or mobile phones • emergency position indicating radio beacon • first aid kit • sunscreen/hat or cold weather gear • rain gear/overalls • rubber boots, not skid soles/steel caps • gloves (waterproof) • tape – wide fluorescent flagging tape • tape measure (30m) • marker posts (e.g. garden stakes) post hammer, labels and waterproof non fade marker pens • shovels: folding type with a pick on the back • sample jars (labelled) and container (protective) • spatulas, spoons and other sampling instruments • ice chests if biological samples are to be taken • plastic bags – heavy duty • vehicles appropriate for terrain
On-site assessment may include:	• identifying shoreline character • calculating potential waste volumes

Unit Sector(s)

Marine pollution response.

PUAOIL403 Lead a team in oiled shoreline clean up

Modification History

PUAOIL403 Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to lead a team in oiled shoreline clean up. It involves the establishment of teams, the planning and implementation of worksite management zones, and the deployment and monitoring of work teams to the final reporting stage of a clean up.

Application of the Unit

This unit supports the attainment of skills and knowledge required for shoreline supervisors or coordinators to coordinate, supervise and manage oiled shoreline clean up activities, including preparing disseminating plans and strategies to control the incident.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the shoreline response unit	1.1 Determine the size and structure of the shoreline response unit. 1.2 Deploy ***appropriate staff*** physically able to assist in the response. 1.3 Implement a ***site induction*** that incorporates safe systems of work, communication methods, hierarchy of roles and reporting systems within the Incident management system. 1.4 Identify any training that may need to be implemented.
2. Plan clean up operations	2.1 Identify ***hazards*** relevant to the operation and ensure safe systems of work are implemented. 2.2 Establish priorities for shoreline protection and clean up based on data and reports received. 2.3 Sector and segment shoreline for identification and management of clean up zone. 2.4 Implement ***clean up method/s*** appropriate to environmental conditions.
3. Organise resources	3.1 Identify and organise ***response equipment*** through appropriate channels. 3.2 Make arrangements for the transport of resources and personnel. 3.3 Establish ***on-site support*** for personnel
4. Establish worksite management zones	4.1 Implement a three-zone system to control access and activities around the Incident Control Centre. 4.2 Organise appropriate security. 4.3 Establish a decontamination centre.
5. Manage waste from clean up	5.1 Consider and implement ways to minimise waste. 5.2 Establish temporary waste holding areas that allow for safe containment and appropriate segregation of waste. 5.3 Arrange for the removal of waste from temporary to permanent storage in line with relevant legislation.
6. Deploy and monitor work teams	6.1 Develop and communicate work orders to relevant personnel. 6.2 Brief teams and allocate tasks relating to the relevant period of time and job role to be performed. 6.3 Monitor work situation on a regular basis for effectiveness and safety of task.

© Commonwealth of Australia, 2025 Public Skills Australia

	6.4 Maintain accurate logs to record actions and decisions made.
	6.5 Review and change plans as required.
7. Terminate response	7.1 Personnel are debriefed.
	7.2 Equipment is returned to designated areas as requested through work orders.
	7.3 Post spill reports completed and submitted to relevant personnel.
	7.4 Records collected, collated, checked and forwarded to appropriate personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- develop safe work systems
- prepare, present and communicate information
- identify the relationship between the goals of the incident management team and how own work contributes to these goals
- display resilience by continuing to move forward despite criticism or setbacks
- machinery and equipment operation
- problem solving
- decision making
- conflict resolution and negotiation
- prioritise work tasks
- effective and efficient deployment of human and physical resources

Required Knowledge

- state/territory emergency procedures and networks
- knowledge of principles and practices to conduct an activity which exercises elements of public safety management
- range of communication equipment available to the organisation
- legislative and statutory safety requirements
- applicable environmental legislation
- local government legislation
- local wildlife groups such as wires

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- collect, evaluate and disseminate information on the current and forecast situation
- demonstrate the ability to establish management zones
- demonstrate sound methodologies in planning and organising resources for clean up response
- evaluate, plan and activate workforce deployment
- maintain logs and produce effective reports
- work effectively as a member of an Incident management Team to resolve an incident

Context of and specific resources for assessment

Competency should be assessed in a simulated multi-agency response environment or an operational environment.

Method of assessment

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an approved simulated environment.

Forms of assessment may include:

- direct observation
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions
- case studies

Guidance information for assessment

Where possible assessment to be completed holistically and may be assessed with other relevant units of competence. For example including but not limited to:

- PUAOIL301 Apply health, safety and risk controls when working on oiled shorelines
- PUAOIL402 Apply oiled shoreline assessment strategies in an oil spill response
- PUATEA003B Lead, manage and develop teams

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

© Commonwealth of Australia, 2025 Public Skills Australia

wording in the Performance Criteria is detailed below.

Appropriate staff may include:	• medical conditions that preclude the type of work involved • physical or medical unfitness • behavioural unsuitability
Site induction may include:	• records kept • command and control structure • authority of shoreline coordinator • role of supervisors and team leaders • roles of the agencies and personnel • rules of conduct including alcohol and drugs policy • procedures for dealing with the media and public • health and safety • incident briefs • scope of response • shorelines impacted • types of shoreline impacted • methods being employed • PPE needs • muster areas and schedules • use of private vehicles • wildlife • log keeping and other documentation
Hazards may include:	• risks associated with the oil • environmental hazards • response hazards • incident health and safety plans • site specific health and safety plan
Clean up method/s may include	• natural recovery • manual recovery • mechanical removal • use of sorbents • vacuum recovery • sediment reworking • vegetation cutting/removal • flooding (deluge) • low pressure washing • high pressure washing • hot water washing • use of cleaning agents • steam cleaning/sand blasting

© Commonwealth of Australia, 2025 Public Skills Australia

	• bioremediation/aeration • in-situ burning • trenching

Response equipment may include:	• mechanical tools:
	  • grader
	  • front end loader
	  • dump truck
	  • elevating scraper
	  • tractor
	• loose sorbents
	• manual equipment
	• shoreline boom

On-site support may include:	• ablutions • accommodation • canteen facilities • decontamination areas • equipment and spares • first aid • refuelling area • helicopter landing site • PPE • rest areas • security • vehicle parking • temporary holding area for waste

Unit Sector(s)

Marine pollution response.

PUAOPE006B Control multi-agency emergency situations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to take and establish control of a multi-agency response to an emergency situation. Control refers to the overall direction of emergency management activities in an emergency situation. Authority for control is established in legislation or in an emergency plan and carries with it the responsibility for tasking other organisations in accordance with the needs of the situation. Control relates to situations and operates horizontally across organisations.

Application of the Unit

This unit applies to public safety workers who have a command role within their own organisation and are required to administer control of workers from all agencies in a multi-agency response environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE007B Command agency personnel within a multi-agency (Fire specific)

PUAOPE016A Manage a multi team response (Fire specific)

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take control	1.1 Control is established in accordance with designated responsibility/authority. 1.2 The identity of the controller is communicated to participating organisations/authorities and to relevant authorities/organisations pertinent to the emergency/incident situation. 1.3 The ***nature*** and complexity ***of the emergency***/incident is identified through liaison with relevant personnel/authorities.
2. Establish a control facility	2.1 An appropriate ***control facility is established*** in accordance with approved operating procedures and principles. 2.2 The establishment of the facility is communicated to participating and relevant personnel/authorities. 2.3 Communication systems and procedures are established to facilitate the functions of control.
3. Establish and maintain a control structure	3.1 A control structure is established appropriate to the nature and complexity of the emergency, encompassing specific roles and responsibilities of each participating organisation. 3.2 The control structure is expanded or contracted in response to changes within the emergency environment. 3.3 Control systems are managed ensuring flow of information is clear, accurate, timely and follows ***agreed reporting mechanisms.*** 3.4 Control systems are managed ensuring human, physical, fiscal and communication systems are identified, allocated and deployed in accordance with the control structure.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.5 Control systems are managed ensuring accurate recording and reporting systems are established and maintained.
4. Establish procedures to permit control to be exercised	4.1 Control structure is communicated to participating organisations and relevant authorities/individuals who may have a regulatory or economic interest applicable to the emergency/incident. 4.2 Communication is implemented to provide an effective exchange between the controller and all organisations engaged in the emergency, supporting organisations, coordinator, higher authorities, media. 4.3 Liaison is initiated and maintained with those organisations that may provide information or ***resources*** applicable to the emergency/incident.
5. Assess the situation and determine priorities	5.1 Information about emergency is sought from participating organisations and relevant sources. 5.2 The nature, extent and potential of the emergency is continually assessed. 5.3 Relevant information is analysed and processed to establish priorities for dealing with the emergency/incident. 5.4 Desired objectives are determined to effectively manage the emergency/incident. 5.5 Objectives and priorities are continually reviewed in light of information updates, reports and feedback.
6. Develop control plan	6.1 Appropriate strategy(s) are determined to achieve objectives. 6.2 Components of the strategy are determined in consultation with organisations. 6.3 Control plan is documented in writing. 6.4 Control plan is communicated to relevant organisations following established procedures.
7. Implement control plan	7.1 Components of the strategy are allocated to operational and support organisations. 7.2 Performance is monitored and reports/feedback communicated through appropriate communication channels. 7.3 Control plan is monitored to meet changes in conditions and modifications are made where appropriate.
8. Conclude emergency activities	8.1 Recovery management is initiated. 8.2 Physical, human and fiscal resources are accounted

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	for.
	8.3 Debriefing requirements are met and operational control documentation is completed.
	8.4 Reports are produced as required.
9. Review emergency activities	9.1 Plans and procedures are evaluated and reviewed.
	9.2 Effectiveness of the control function and its interaction with command organisations is evaluated and documented.
	9.3 Reports are produced and communicated in accordance with established protocols.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from organisations
- application of relevant agreements
- codes of practice or other legislative requirements
- development of response plans including predicting consequences and identifying improvements
- effective and efficient use of human and physical resources including:
  - equipment and consumables
  - identification and correct use of equipment
  - materials
  - operative and non-operative personnel
  - personnel and external authorities
  - processes and procedures
- using a range of information technology devices including:
  - computers
  - radio frequency devices
  - electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- decision making
- emergency site layout
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management

© Commonwealth of Australia, 2025 Public Skills Australia

- operation of work systems and equipment
- security and confidentiality of material

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in effective assignment and monitoring of organisation allocated task(s):

- Analyse emergency situations both functionally and strategically
- Select, prioritise, implement and evaluate appropriate courses of action
- Strategically react to changes within the emergency environment
- Incorporate risk management and contingency processes
- Modify activities to cater for variations and changes in emergency contexts and environments
- Establish plans
- Describe consequences
- Complete tasks
- Identify improvements
- Apply precautions relevant to the task
- Hazard specific policies and procedures
- Issue resolution procedures
- Job procedures and work instructions
- Guidelines relating to safe use of machinery and equipment
- Quality assurance procedures (where existing)
- Privacy
- Confidentiality and security procedures
- Waste pollution and environmental management
- Recovery management processes
- Work completed systematically ensuring minimal damage to equipment and emergency site

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or

© Commonwealth of Australia, 2025 Public Skills Australia

in an industry-approved simulated work environment.

Specific resources for assessment

Resources should involve access to, or simulation of, emergency situations in a multi-agency response environment This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include:

- natural events
- drought
- fire (forest
- grasslands
- urban)
- avalanche snow/ice/hail
- tsunami
- windstorm/tropical storm
- hurricane/typhoon
- biological
- extreme heat/cold
- flood/wind driven water
- earthquakes/land shifts
- volcanic eruption
- tornado/cyclone
- landslide/mudslide
- dust/sand storms
- lightning storm
- oil spills
- marine life rescue

Technological/industrial events may include:

- radiological accidents
- dam/levee failure
- fuel/resource shortages
- hazardous material releases
- explosions/fire
- transportation accidents
- building/structure collapse

© Commonwealth of Australia, 2025 Public Skills Australia

	• power/utility failure • extreme air pollution • strikes • business interruption • financial collapse • high rise or underground incidents • industrial accident and confined spaces
Civil/political events may include:	• economic • general strike • terrorism • sabotage • hostage situation(s) • civil unrest • eco-terrorism • enemy attack
Considerations in the determination of the nature extent and potential of an emergency may include:	• risk to life • risk to property • risk to environment • scope and scale of incident including likely duration of incident • resource availability • potential for changes in situation • topography • weather • speed of onset • hazard agent(s) • location • demography • magnitude • intensity
Resources may include:	• human-operations personnel • volunteers • support personnel • local • state/territory and federal governments • physical-equipment • machinery • vehicles • technology devices • communication devices • fiscal

© Commonwealth of Australia, 2025 Public Skills Australia

Information management system may include:	• data receival • recording • storage and dispatch modes • procedures and protocols • types of technology – electronic data exchange devices • audio and visual recording mechanisms • security and authorisation assignment
Control facility establishment procedures and principles may include consideration of:	• legislation • proximity to emergency/incident • size and type of structure • special incident requirements • communication modes • topography • environment • climatic conditions • logistical operations • site access and exit requirements • security requirements • equipment characteristics • support services • amenities • span of control
Communication processes and systems may include:	• designation of appropriate modes and channels of communication • communication responsibilities of personnel • radio communications • inter organisation liaison • data transfer • telecommunications • interpersonal communications
Participating and relevant organisations/authorities may comprise:	• emergency organisations • ancillary organisations • higher authorities • public • media • clients • government and semi government authorities and departments • witnesses • victims • occupational health and safety specialists

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency management specialists
- service providers
- other analysts and other stakeholders

Agreed reporting mechanisms may include:

- authorisation distribution and developments of reports in accordance with regulatory and organisational requirements and may include:
  - media reports
  - ministerial reports
  - coronial reports
  - situation reports-within emergency
  - for external distribution-status reports
  - performance evaluations
  - legal reports
  - final reports
  - briefing papers

Activities controlled may include:

- operations
- planning
- logistics
- communications
- mapping
- aircraft
- information displays
- resourcing

Sources of information/documents may include:

- emergency procedures
- standard operating procedures
- relevant Australian or international documentation in disaster/emergency management
- organisational and workplace operating procedures and policies
- client requirements
- communications technology equipment
- oral, aural or signed communications
- personal and work area
- work procedures and practices
- evacuation procedures
- occupational health and safety procedures
- applicable State, Territory and Commonwealth legislation and regulations which relate to:
  - public safety
  - state of emergency
  - occupational health and safety regulations and

© Commonwealth of Australia, 2025 Public Skills Australia

legislation
    - Workplace Relations Act(s)
    - workers compensation
    - privacy and confidentiality legislation
    - freedom of information
    - environment protection legislation
- equal opportunity
- equal employment opportunity and affirmative action
- legislation
- standards and certification requirements
- quality assurance procedures
- memorandum of understanding/agreement
- conventions
- protocols
- policies
- codes of practice
- maps
- field reports

Unit Sector(s)

Not applicable.

PUAOPE007B Command agency personnel within a multi-agency emergency response

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competence to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

Application of the Unit

This unit applies to Public Safety personnel who have a command role within their own organisation and are required to administer that command in a multi-agency response environment. It does not include the requirement to administer command of personnel from other agencies in a multi-agency response.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE021A Control a Level 1 incident

PUAOPE015A Conduct briefings and debriefings (Fire specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take command	1.1 Command is exercised in accordance with organisation authority and guidelines. 1.2 The identity, location and contact details of the commander are communicated to internal personnel and to relevant external authorities/organisations/individuals pertinent to the emergency/incident.
2. Establish a command facility	2.1 An appropriate ***command facility*** is established and operated in accordance with organisational guidelines. 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required.
3. Establish a command structure	3.1 A command structure is established appropriate to the nature and complexity of the task (s) undertaken by the organisation. 3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment.
4. Establish procedures to permit command to be exercised	4.1 Command structure is communicated to internal personnel and external authorities/individuals whom may have a regulatory interest applicable to the emergency/incident. 4.2 Command ***information management system*** is implemented. 4.3 Communication mechanisms and procedures are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	implemented between levels of command in accordance with organisational guidelines.
	4.4 Liaison is established and maintained to meet control and command requirements.
	4.5 A public information system is established in accordance with control plan requirements.
5. Determine operational command plan	5.1 Tasks are received and/or determined in accordance with the control requirements.
	5.2 Operational command plan to implement strategies is developed and modified as required in accordance with organisational guidelines.
	5.3 Appropriate tactics to effectively manage the emergency/incident are identified in accordance with the operational command plan.
6. Manage resources under organisation command	6.1 ***Resources*** are deployed to ensure that the operational command plan is implemented in accordance with organisational guidelines.
	6.2 Human and physical resources are effectively managed to achieve command plan outcomes.
7. Manage operation(s)	7.1 Operations are conducted in accordance with the operational command plan.
	7.2 Significant changes in status and actions taken are reported consistent with organisational policy and procedures.
	7.3 Operations are redirected as required to meet changes in the conditions which affect the emergency/incident situation.
8. Conclude operation(s)	8.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines.
	8.2 ***Debriefing*** requirements are met in accordance with organisational guidelines.
	8.3 Operational documentation is completed to organisation standards.
	8.4 Reports are produced as required.
9. Review operations	9.1 Plans and guidelines are evaluated and reviewed.
	9.2 Effectiveness of command and interaction with control is evaluated and documented.
	9.3 Reports are produced and communicated in accordance with established protocols.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility, other organisations' personnel and external authorities
- analyse emergency situations both functionally and strategically
- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
  - operative and non-operative personnel
  - materials
  - equipment and consumables
- effective deployment, monitoring and communication of organisation allocated task(s)
- identification and correct use of equipment
- implement response in accordance with organisational procedures and within bounds of authority
- incorporate risk management and contingency processes
- liaise effectively with emergency controller
- operation of work systems and equipment
- processes and procedures
- secure emergency/operations site
- select, prioritise, implement and evaluate appropriate strategies
- strategically react to changes within the emergency environment
- using a range of information technology devices including:
  - computers
  - radio frequency devices
  - electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- applications of relevant agreements
- code of practice or other legislative requirements
- emergency site layout
- identification and correct use of equipment
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management
- organisational command structure
- processes and procedures
- security and confidentiality of material

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- Effective deployment, monitoring and communication of organisation allocated task(s)
- analysis of emergency situations both functionally and strategically
- selection, prioritisation, implementation and evaluation of appropriate strategies
- implementation of response in accordance with organisational procedures and within bounds of authority
- securing emergency/operations site
- strategic reaction to changes within the emergency environment,
- incorporation of risk management and contingency processes
- effective liaison with emergency controller and
- logging and recording all actions and decisions

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Specific resources for assessment

Resources should involve access to or simulation of emergency situations in a multi-organisation response environment. This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Public Skills Australia

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include:	• natural events • drought • fire (forest • range • urban) • avalanche snow/ice/hail • tsunami • windstorm/tropical storm • hurricane/typhoon • biological • extreme heat/cold • flood/wind driven water • earthquakes/land shifts • volcanic eruption • tornado/cyclone • landslide/mudslide • dust/sand storms • lightning storm • search and rescue • fauna rescues e.g. marine life rescue
Technological/industrial events may include:	• radiological accidents • dam/levee failure • fuel/resource shortages • hazardous material releases • explosions/fire • transportation accidents • building/structure collapse • power/utility failure • extreme air pollution • strikes • business interruption • financial collapse
Civil/political events may include:	• economic • general strike • terrorism • sabotage • hostage situation(s) • civil unrest • eco-terrorism

© Commonwealth of Australia, 2025 Public Skills Australia

Considerations in the determination of the nature, extent and potential of an emergency may include:	• enemy attack • risk to life • risk to property • risk to environment • scope and scale of incident including likely duration of incident • resource availability • potential for changes in situation • topography • weather • speed of onset • hazard agent location • demography
Resources may include:	• human-operations personnel • volunteers • support personnel • local • state/territory and federal governments • physical-equipment • machinery • vehicles • technology devices • communication devices • aviation and marine vessels
Information management system may include:	• data receival • recording • storage and dispatch modes • procedures and protocols • types of technology – electronic data exchange devices • audio and visual recording mechanisms • public/media information dissemination • security and authorisation assignment • recording and documenting of incident
Personnel support activities may include supply of:	• catering • sanitation • shelter • rest/relief counselling services • stress management services
Command facility establishment procedures and principles may include	• proximity to emergency/incident • size and type of structure • special incident requirements

© Commonwealth of Australia, 2025 Public Skills Australia

consideration of:	• communication modes • logistical operations • site access and exit requirements • security requirements • equipment characteristics • support services • amenities • parking • topography • environment • climatic conditions • logistical operations
Communication processes and systems may include:	• designation of appropriate modes and channels of communication • communication responsibilities of personnel • radio communications • inter organisation liaison • data transfer • telecommunications • interpersonal communications
Internal and external personnel and authorities may include:	• operational personnel • emergency organisations • ancillary organisations • higher authorities • public • media • clients • government and semi government authorities and departments • witnesses • victims • occupational health and safety specialists • emergency management specialists • service providers • other analysts and stakeholders
Support services may include:	• emergency agencies • water • gas and power agencies • welfare and counselling organisations • medical organisations • equipment suppliers • contractors

© Commonwealth of Australia, 2025 Public Skills Australia

- community service organisations
- land management agencies
- transport

Debriefing may include:

- critical incident stress debriefing
- performance evaluations
- operational analysis

Agreed reporting mechanisms will involve:

- authorisation
- distribution and development of reports in accordance with regulatory and organisational requirements and may include:
  - media reports
  - ministerial reports
  - coronial reports
  - situation reports-within emergency for external distribution-status reports
  - performance evaluations
  - legal reports
  - final reports
  - briefing papers

Activities controlled include:

- operations
- planning
- logistics
- communications

Sources of information/ documents may include:

- emergency procedures
- standard operating procedures
- maps
- field reports
- relevant Australian or international documentation in disaster/emergency management
- organisational and workplace operating procedures and policies
- client requirements
- communications technology equipment
- oral
- aural or signed communications
- personal and work area work procedures and practices
- evacuation procedures
- occupational health and safety procedures
- applicable state, territory, commonwealth legislation and regulations which relate to:
  - public safety

© Commonwealth of Australia, 2025 Public Skills Australia

    - state of emergency
    - occupational health and safety regulations and legislation
    - Workplace Relations Act(s)
    - workers compensation
    - privacy and confidentiality legislation
    - freedom of information
    - environment protection legislation
- equal opportunity
- equal employment opportunity and affirmative action legislation
- standards and certification requirements
- quality assurance procedures
- memorandum of understanding/agreement
- conventions
- protocols
- policies
- codes of practice

PUAOPE009C Navigate in an aquatic environment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to navigate in an aquatic environment including inland rivers, lakes, dams, surf zones and oceans, using a range of navigation equipment and techniques while undertaking search and rescue.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of open or closed water situations where a vessel (of varying sizes) is required to navigate.

The unit typically applies to personnel from emergency services and/or volunteer organisations or organisations where surveillance and rescue operations in open water are required.

The unit applies in an aquatic search and rescue operation to locate a vessel in distress under a variety of environmental conditions by day and at night.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine current location, destination and resources	1.1 Incident location and task information are obtained from vessel in distress or enterprise base station. 1.2 Relevant ***maps***/***charts***, electronic navigation aids and ***navigation equipment*** are prepared and ***made ready for use.*** 1.3 Drift, leeway and tidal influences are identified and recorded. 1.4 Current location and estimated destination of vessel in distress are plotted on a chart using coastal ***navigational techniques*** within ***accepted tolerances.***
2. Determine and plan a safe route/course	2.1 Operational plan is compiled, including intercept and rendezvous chart work. 2.2 All plots are recorded on a chart allowing for variables and weather conditions in accordance with organisational standard operating procedures. 2.3 Rescue vessel's speeds within the sea and weather conditions are estimated and allowances are made to provide an estimated time of arrival. 2.4 Hazards en-route to the incident area are researched to determine a safe route/course.
3. Navigate to destination	3.1 Route/course is checked, monitored and maintained using navigational aids and ***alternate route***/***course*** is plotted if required. 3.2 Helmsman is instructed to follow planned route/course, and crew look outs are instructed to report any sightings, including other marine traffic.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 Regular fixes are continued to determine rescue vessel's position relative to the planned route. 3.4 Search and rescue patterns are initiated if required within the incident area where distressed vessel or survivors are believed to now be located. 3.5 En-route and arrival position reporting information is communicated to enterprise base in accordance with organisational policies and ***procedures.***
4. Return to home port	4.1 Course to return to home port with distressed vessel in tow or with survivors aboard is set, on resolution of incident requirements. 4.2 Navigational techniques are used to ensure a safe and timely return to home port or alternate port as instructed by state/territory authorities.
5. Complete post navigational activities	5.1 Navigation or nominated ***reports*** are completed in accordance with organisational policies and procedures. 5.2 Navigational equipment is recovered, reset, updated and serviced according to operational standards and manufacturers' specifications.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively non-verbally (use hand signals, write instructions)
- communicate effectively verbally
- identify natural and cultural features for transport modes
- interpret cartographic symbology including contour lines, scale, magnetic variation information
- interpret route/course and arrival information
- observe situational environment (scan, pick up on physical cues)
- operate a radio system
- operate an intercom system
- operate appropriate sized rescue vessel
- operate chart plotter
- operate global positioning system (GPS)
- operate RADAR
- operate RDF

© Commonwealth of Australia, 2025 Public Skills Australia

- operate satellite phones from search and rescue authority
- solve problems
- use navigation aids

Required Knowledge

- cartographic information
- chart features (date of map/chart, legend/AUS5011, contours/depth, scale/latitude and longitude, north point/compass rose, grid references/position fixes, latitude and longitude, magnetic variation, contour intervals, datum information)
- chart symbols
- coastal navigation techniques
- course planning techniques and calculations
- latitude and longitude plotting
- local knowledge of area en-route and at the incident scene
- map and chart types
- methods for determining current position

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • plot a navigation route maintaining accuracy within accepted tolerances when following a route • maintain positional awareness. • effectively react to changes in the operating environment necessitating re-planning a course. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments that include a variety of conditions, seas, winds, weather and visibility.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual incident, exercise or simulation or series of tasks using electronic aids. As navigation of rescue operations is usually undertaken in adverse weather and sea conditions assessment must cover the environmental conditions covered in the

© Commonwealth of Australia, 2025 Public Skills Australia

	Range Statement. **Specific resources for assessment** Access is required to: • equipment used in operational navigation is essential • rescue vessel fitted with RADAR • GPS chart plotters • communications room • operations centre with trained staff
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Maps/charts may include:	• Aerial photographs • Cadastral maps • Local authority maps • Marine navigational charts • Orthophoto maps • Satellite imagery • Street directories • Topographic maps
Navigation equipment may include:	• Area plotters

© Commonwealth of Australia, 2025 Public Skills Australia

	• Chart plotters • Communications equipment • Computers • Deviation card • Douglas protractor • Geographical information systems (GIS) • GPS • Hand held compass • Interface with auto pilot • Magnetic compasses • Navigator's Log Book • Parallel rulers • Pencil and rubbers • Planimeters • Protractors • RADAR • Romers • Scale rules • Sliding rulers • Vessels compass • Watch/stopwatch • Writing equipment
Making charts, navigational aids and equipment ready for use may include:	• Delineating search areas to incorporate set and drift • Identifying hazards (reefs, bars, shallow water, rocks) • Planning intercept and rendezvous courses • Plotting incident location (latitude and longitude)
Navigational techniques may include:	• Bearings and reciprocal bearings • Deviation and variation magnetic conversions • GPS way points • Grid and latitude/longitude position fixing • Intercept and rendezvous courses • Plotting • RADAR use • Route time calculations • Running fixes • Set and drift allowances • Transits
Accepted tolerance may include:	• Fuel carried • Prevailing weather and environmental conditions • Vessel category and distance
Alternate route/course	• Changing route to suit sea conditions, state of tide,

© Commonwealth of Australia, 2025 Public Skills Australia

strategies may include:	and areas which contain hazards to safe navigation • Dispatching additional vessels • Transferring those injured to helicopter rescue at an appropriate location more suited to the time restraints that may exist • Using vessels in the local area
Organisational arrival procedures include:	• Condition of survivors and the need for first aid and movement to health care professionals updates and situational reports (SITREPs) • Confirmation of timely, safe arrival appropriate to the incident/task • Determining existence of hazards such as proximity to rocks and shallow water, trailing lines, broken rigging, anchored or drifting
Reporting requirements may include:	• Assessing safety procedures utilised • Attending and providing input to debrief • Back at home port • Completing incident report, radio logs records and vessel logs including fuel used and lost/damage report • Completing operational tasks • Disseminating debriefing report • Position reports as per organisation's standard operating procedures • Pre-departure briefing • SITREPs on arrival and regular updates thereafter or immediately on the occurrence of a further event

PUAOPE010C Operate an automated external defibrillator in an emergency

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to operate an automated external defibrillator (AED) to defibrillate a casualty in an emergency situation.

This unit includes advanced techniques for management of the administration of an AED in line with the requirements of the Australian Resuscitation Council and State and Territory regulatory bodies. The unit also involves working with personnel who are engaged in the resuscitation of the casualty.

Cardio pulmonary resuscitation is covered in the prerequisite unit PUAEME001B Provide emergency care.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers administration of an AED according to a medically endorsed protocol, working with or without other personnel while engaged in the resuscitation of a casualty.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations that provide a medically supervised first aid service.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

PUAEME001B Provide emergency care

OR

HLTFA201B Provide basic emergency life support

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess casualty and develop management plan	1.1 ***Hazards*** are identified, minimised and if possible removed, in accordance with state/territory ***regulatory requirements***
	1.2 ***Casualty*** is reassured and positioned in a suitable position
	1.3 Evaluation of ***signs and symptoms*** is undertaken to determine the casualty's condition
	1.4 Casualty's condition is analysed to determine treatment requirements
	1.5 Management plan is developed based on the results of the casualty assessment and the availability of equipment
	1.6 Medical aid is arranged as soon as possible, consistent with maintaining casualty safety
2. Check equipment	2.1 ***Pre-use check*** of safety and potential effectiveness of equipment is undertaken in accordance with operating procedures, Australian Standards and regulatory requirements
	2.2 Minor faults are diagnosed and repairs are carried

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	out to restore equipment to working order in accordance with organisational procedures
	2.3 Faults and defects are ***reported***/***recorded*** in accordance with organisational procedures
3. Attach and operate equipment	3.1 Equipment is set up in accordance with manufacturer's instructions
	3.2 AED is attached and operated as per manufacturer's guidelines and safety procedures
	3.3 Work is undertaken cooperatively with person conducting resuscitation techniques
4. Recover and restore equipment	4.1 Equipment is cleaned, discarded or disinfected, restocked and/or replenished in accordance with organisational procedures and manufacturer's guidelines
	4.2 Equipment is charged, stored and safeguarded against damage or loss in accordance with organisational procedures
	4.3 Reports are completed and submitted to appropriate personnel

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively
- manage self and own work
- manage time
- participate as a team member
- use resuscitation equipment and techniques

Required Knowledge

- Australian Resuscitation Council standards
- circulatory system
- common cardiac rhythms
- defibrillation safety
- duty of care
- effective adherence of pads
- electrical action of the heart
- management of COAD/CAL casualties

© Commonwealth of Australia, 2025 Public Skills Australia

- mechanical action of the heart
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- positioning of electrodes pads
- precautions for safe storage and handling of defibrillator resuscitation and kits - specifications
- principles of operation and troubleshooting
- relevant Australian Standards
- relevant state/territory legislative and regulatory requirements
- respiratory system
- roles and responsibilities of team members
- SAED basic operations
- safety precautions
- shock delivery protocols
- shockable rhythms
- techniques for maintenance and battery changes
- verbal and non-verbal communication techniques

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply safe work practices while using an AED • manage the situation in a calm and orderly manner and to take every action to ensure the safety and comfort of the casualty. **Consistency in performance** Competency should be demonstrated over time across a range of emergency situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a simulated emergency situation. Simulation should recreate realistic emergency situations in which the individual is exposed to the full range of hazards and is placed under the same pressures and timelines associated with operating a an AED in an emergency situation.

© Commonwealth of Australia, 2025 Public Skills Australia

	Specific resources for assessment Access is required to: • defibrillation equipment/kit • appropriate resuscitation manikin • suitable site or training area to simulate an emergency situation
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards include:	• contact with patient during defibrillation • conductive surfaces (water, fluids, metal) • explosive environments (oxygen, gases, fumes) • unstable environment
Regulatory requirements may include:	• Australian Resuscitation Council requirements • relevant state/territory regulatory requirements
Casualties may include:	• adults • children over 8 years old/25 kg
Signs and symptoms may include:	• casualty history • details of incident • medical history

© Commonwealth of Australia, 2025 Public Skills Australia

Equipment may include:	• physical appearance • vital signs • gauze wipes • gloves • razors • resuscitation masks • SAED equipment used for delivery of external defibrillation • shears • spare AED pads • spare battery
Pre-use check may include:	• battery life • environmental factors that affect operation • existence of suitable prominent warnings about precautions to be observed • for damage or malfunctions • pad use by date • to replenish and/or restore
Reporting/recording faults and defects may include:	• filling out and processing standard forms • verbal communication

PUAOPE011B Inspect property and facilities

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This competency standard specifies the outcomes required to inspect various types of property for conditions and compliance with approved requirements. It requires the ability to communicate effectively with those involved in the inspection process, and to have a clear understanding of methods for carrying out and reporting the results of a property inspection.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to workers who engage with the broader community as compliance building inspectors. While developed specifically with a public safety compliance framework, this unit could be applied in a range of industries and roles.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify inspection requirements	1.1 Purpose and ***type of inspection*** is established from property records in accordance with client and ***organisational requirements.***
	1.2 ***Inspection processes*** and timelines are negotiated and agreed with ***relevant people*** in accordance with organisational requirements.
	1.3 ***Property documentation*** and ***legislative requirements*** are specified, gathered and reviewed to identify critical aspects requiring inspection.
	1.4 Access arrangements are coordinated with relevant people in accordance with organisational requirements.
2. Inspect property	2.1 Property is inspected in accordance with industry and organisational requirements, ensuring all relevant aspects of the property are sighted and noted.
	2.2 Inspection processes are reliable and make efficient use of available time and resources in accordance with organisational requirements.
	2.3 Appropriate ***interpersonal techniques*** are used to access relevant information from ***inspection site*** personnel.
	2.4 Variations in compliance with approved requirements are recognised and noted in accordance with organisational and legislative requirements.
	2.5 Situations requiring ***specialist advice*** are identified and assistance sought as required in accordance with organisational requirements.
3. Record and report inspection findings	3.1 Inspection findings are organised in a format suitable for analysis and dissemination in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	client and organisational requirements.
	3.2 Inspection conclusions are supported by ***verifiable evidence*** and are consistent with relevant legislative and organisational requirements.
	3.3 ***Business equipment*/*technology*** is used to maintain relevant documentation in accordance with applicable OHS, legislative and organisational requirements.
	3.4 Inspection report is distributed promptly to relevant people in accordance with client and organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- organisational skills to:
  - plan and arrange a property inspection
  - schedule and meet timelines
- communication skills to:
  - interpret written and oral information
  - complete documentation and report findings
  - negotiate client requirements and access arrangements
- observation skills to:
  - assess condition of property
- technical skills to:
  - use business equipment to complete reports
  - interpret maps/plans/diagrams etc
- interpersonal skills to:
  - relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

Required Knowledge

- organisational and professional procedures, ethical practices and business standards
- OHS issues and requirements
- EEO, equity and diversity principles
- limitations of work role, responsibility and professional abilities
- relevant Acts and regulations

© Commonwealth of Australia, 2025 Public Skills Australia

- BCA requirements
- types of property classes and characteristics
- basic knowledge of property contracts and administrative requirements
- inspection methods for different property types

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Conducting and completing a property inspection within agreed timeframes and in compliance with all applicable industry, legal and organisational requirements.
- Applying effective communication and coordination techniques required to access property and organise inspection.
- Complying with established inspection processes, noting any variations in approved property requirements, and preparing findings in a report suitable for analysis and dissemination.

Consistency in performance

Competency will need to be demonstrated over a period of time reflecting the scope of the role.

Where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice with a decision of competence only taken at the point when the assessor has complete confidence in the ability of the person to assess competence.

All assessment which is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be current and show that it represents competency demonstrated over a period of time.

Context of and specific resources for assessment

Context of assessment

Assessment can be through a simulated project based activity and must include evidence relating to each of the elements in this unit, covering all activities from identifying inspection requirements to undertaking a property inspection and reporting the findings.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence must include relevant property documentation including notes from at least two property inspections and copies of the property inspection reports.

Specific resources for assessment

- A registered provider of assessment services
- Competency standards
- Assessment materials and tools
- Suitable site for property inspection
- Workplace documentation
- Candidate special requirements
- Cost/time considerations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Type of inspection may be:

- statutory
- planned
- periodic
- irregular
- at change of use
- at development stage
- related to a complaint
- related to illegal works and/or usage

Clients may include:

- property owners
- property agents
- tenants
- building supervisors
- project managers
- agents
- government and legal instruments/agencies

Organisational requirements may be outlined and reflected in:

- quality assurance and/or procedures manual
- goals, objectives, plans, systems and processes
- business and performance plans
- mission statements, strategic plans
- policies and procedures in relation to client service
- legal and organisational policy/guidelines
- access and equity principles and practice guidelines
- ethical standards, codes of practice

- complaints and dispute resolution procedures
- ohs policies, procedures and programs
- quality and continuous improvement processes and standards

Inspection processes may relate to:

- timeframes
- statutory limitations
- the type of job
- the complexity of construction
- the type of construction

Relevant people may include:

- supervisors
- site personnel
- colleagues
- clients
- legal representatives
- industry professionals and associations

Property documentation may include:

- contracts
- permits
- building codes
- licences
- specifications
- agreements
- plans
- checklists
- previous inspection reports

Legislative requirements may be outlined and reflected in:

- relevant commonwealth/state/territory legislation which affect organisational operation:
  - ohs
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - anti-discrimination and diversity
  - Australian standards, quality assurance and certification requirements
- codes of practice which may cover areas including: the market sector, financial transactions, taxation, environment, construction, land use, native title, zoning, utilities use (water, gas, electricity), contract or common law
- award and enterprise agreements
- trade practices
- privacy requirements
- strata, community and company titles

PUAOPE012A Control a Level 1 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to control a Level 1 incident through the use of local or initial response resources.

This unit includes the competency to proceed to the incident, to assess the incident, to plan and implement an operational response and post-response activities.

A Level 1 incident is characterised by being able to be resolved through the use of local or initial response resources only. In a Level 1 response the major function is operations, that is, to resolve the incident.

Control of the incident is limited to the immediate area and therefore the operations function can usually be carried out by the Incident Controller. Being relatively minor, the other functions of planning and logistics will generally be undertaken concurrently by the Incident Controller.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people responsible for:

- developing an Incident Action Plan
- achieving the incident objective
- providing a safe work environment
- managing the incident as effectively and efficiently as circumstances allow
- keeping relevant people informed and aware of incident progress.

The authorisation to control a Level 1 incident is subject to organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive incident response request	1.1 Requests for ***response*** are received and dealt with in accordance with ***organisational policies and guidelines.***
	1.2 Relevant ***incident*** information is obtained and assessed to inform decision making processes.
	1.3 Location of the incident and most appropriate route to the incident are ascertained.
2. Proceed to incident	2.1 Personnel, equipment and ***transport*** resources are dispatched promptly, consistent with the nature of the incident and information available.
	2.2 Communication is established and maintained.
	2.3 Appropriate route to the incident is followed to minimise response time.
	2.4 En route ***hazards*** are recognised and negotiated to minimise risk.
	2.5 Observations are made en route to assist with ***incident assessments.***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 Multi-vehicle response is conducted in accordance with organisational procedures.
	2.7 Arrival at the incident is confirmed according to organisational policies and procedures.
3. Assess the incident	3.1 ***Communications*** are established in accordance with organisational policies and procedures.
	3.2 Initial assessment of the incident is carried out promptly.
	3.3 Hazards or potential hazards are assessed and monitored so that they are minimised or controlled.
	3.4 ***Resources*** are assigned to deal with the incident.
	3.5 Need for additional resources is identified and resources are requested in accordance with organisational policies and procedures.
	3.6 Actions are taken to protect, secure and preserve incident scene where required.
	3.7 Incident potential is assessed and transition to a Level 2 incident is considered.
4. Establish and maintain control	4.1 Control and command are established in accordance with legislation, and organisational policies and procedures.
	4.2 ***Incident Action Plan*** (***IAP***) appropriate to incident situation is developed based on available information and organisational procedures.
	4.3 Strategies and tactics are determined and tasks are allocated to appropriate personnel.
	4.4 Incident personnel are briefed clearly, accurately and in a timely manner.
	4.5 Relevant incident information is communicated to ***key stakeholders.***
	4.6 IAP is implemented, continually monitored, reported on and reviewed in the light of additional information and is communicated in accordance with organisational policies and procedures.
	4.7 Appropriate resources are deployed to deal with the incident.
	4.8 Response is adjusted in a timely manner.
	4.9 Leadership, supervision and ***team welfare*** are provided to ensure performance and practice are to operational standards.
	4.10 Changes to the IAP are communicated to relevant personnel and organisations.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. Conclude operation	5.1 Final incident assessment is conducted in accordance with organisational procedures. 5.2 Incident actions and decisions are recorded in accordance with organisational policies and procedures. 5.3 Incident is concluded in accordance with organisational requirements.
6. Supervise post-response activities	6.1 Welfare of team members is assessed and appropriate action is taken. 6.2 Equipment cleaning, repair, storage and replenishment is supervised. 6.3 Debriefing requirements are met. 6.4 Post incident reports are prepared to organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess risks and apply safe work practices
- communicate effectively
- conduct an incident assessment
- conduct briefings and debriefings
- deploy personnel and equipment to deal with the incident
- develop and maintain incident situational awareness
- make and implement decisions
- use communication equipment

Required Knowledge

- agency policies and procedures for determining the Control Authority and Incident Controller
- agency procedures for establishing control and communicating to relevant authorities
- agency protocols for liaising with stakeholders and media on scene
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- briefing/debriefing requirements
- current navigational practices to perform navigation
- occupational health and safety (OH&S) agency safe work practices, and health and

© Commonwealth of Australia, 2025 Public Skills Australia

welfare arrangements at incidents
- organisational incident management system
- organisational policies and procedures relating to operations (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisational process for developing IAP objectives, strategies and tactics for a Level 1 incident
- organisational process for developing, implementing, monitoring and reviewing IAP for a Level 1 incident
- procedures for protecting and preserving an incident scene and recording requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • develop, implement and monitor an IAP to effectively deal with an incident • direct and supervise incident control activities • maintain situational awareness. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or simulated workplace environment. **Specific resources for assessment** Access is required to: • simulation of Level 1 incidents in a response environment • relevant transport, communications equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

When dealing with aircraft response, ***performance*** may be affected by:	• Airstrip length requirements • Engine type-piston • Fire behaviour • Load capacity • Pilot ability • Range • Task • Terrain • Twin/single engine • Turbine • Weather • Wing configuration
When dealing with aircraft response, ***suitability*** may be affected by:	• Communications systems availability • Pilot local knowledge • Range

© Commonwealth of Australia, 2025 Public Skills Australia

When dealing with aircraft response, ***supervising of aircraft management procedures*** include:	• Speed • Take off capability • Visibility • Aircraft separation - vertically and horizontally • Direction • Fire Common Traffic Advisory Frequency (F-CTAF) • Height separation • Inbound/outbound calls • Temporary restricted space
Organisational policies and guidelines may vary between sectors and organisations and may include:	• Civil Aviation Orders and requirements • Environmental management and sustainability • Incident management systems • Interagency liaison • Legislation • Operational policies, procedures and standards • Procedures, requirements • Search and rescue time/procedures/action
Incidents may include:	• Accident • Animal and marine mammal rescue • Crime • Fire • Flood • Hazardous substances and dangerous goods • Public disorder • Rescues • Searches • Storm
Transport may include:	• Aviation • By foot • Horses • Maritime • Rail • Vehicular on-road and off-road
Hazards may include:	• Adverse weather • After-dark operations • Civil unrest • Crowds • Dangerous goods and hazardous substances • Debris • Difficult terrain

© Commonwealth of Australia, 2025 Public Skills Australia

	• Fire behaviour • Hazardous trees • Interference to communications • Level of visibility • Masts/aerials • Other aircraft • Powerlines and cables • Restricted areas • Road conditions • Smoke • Structural collapse • Terrain and topography • Tidal and flood behaviour • Traffic • Wildlife
Incident assessments may include:	• Access and egress • Adequacy of allocated equipment • Capability of assigned personnel • Climatic and weather conditions • Crowds • Disruption to essential services • Evacuation zones • Hazards/no go areas • Information gathered from existing plans/databases • Installed fire protection • Nature, type and size of incident • Risk to life, property and environment • Type and construction of building
Communications may include:	• Audible alarms/whistles • Computer • Distress signal units • Facsimile • Ground to air • Hand signals • Mobile data terminal • Pager • PA equipment • Radio • Telephones • Verbal and written instructions
Resources may include:	• Aircraft (rotary- and fixed-wing) • Equipment

© Commonwealth of Australia, 2025 Public Skills Australia

	• Materials • Maps • Navigation aids • Personnel trained for the task • Protective clothing • Pumps • Vehicles, vessels, aircraft and machinery
Incident Action Plan may include:	• Accommodation and welfare arrangements • Air Operations Plan • Communications Plan • Incident objectives • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical arrangements • Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of OH&S issues • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Structural chart • Timings of meetings and changeovers • Traffic management • Written or mental plan
Key stakeholders may include:	• Affected individuals • Community groups • Media • Other agencies
Team welfare may include:	• Fatigue management • Physical needs such as refreshments • Physical stress • Psychological stress

PUAOPE013A Operate communications systems and equipment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

Application of the Unit

This unit applies to a person who is required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This work may occur either in the field or from a facility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communications systems and equipment	1.1 ***Communications equipment*** and techniques including ***verbal communications*** and ***voice procedures***, are selected to best meet the task, context and needs of the situation 1.2 Equipment is operated safely to support communications consistent with organisational policies and procedures 1.3 ***Communications system*** is correctly utilised to facilitate transmission and reception
2. Transmit and receive communications	2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisational policies and procedures 2.2 Contact is acknowledged, communication is confirmed and action is initiated 2.3 Communication faults and deficiencies are reported according to organisational policies and procedures 2.4 Alternative communications strategies are employed according to organisational procedures to address identified faults and deficiencies in communication 2.5 Communication is processed and recorded in accordance with organisational policies and procedures
3. Maintain communications equipment	3.1 Communications equipment is inspected to ensure operational readiness 3.2 Fault finding techniques are applied and basic maintenance is conducted according to organisational policies and procedures 3.3 Faulty equipment is identified and noted for repair, and documentation is completed in accordance with organisational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- maintain communications equipment according to organisational procedures
- operate the different communications equipment required by the organisation
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communications system
- utilise the organisation's communications processes and systems

Required Knowledge

- organisational policies and procedures relevant to the operation of communications equipment (such as relevant legislation; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications system
- range of communications equipment available to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use communications equipment under non-operational and operational conditions • accurately transmit and receive communications using the organisation's communications systems and equipment. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environmentor in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment**

PUAOPE014A Navigate to an incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to navigate to an incident in urban and rural environments.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a person who is required to make decisions about the most appropriate route to an incident. This involves determining the current location of personnel, destination and resources required; determining and planning the route; navigating to the destination; and completing any post-navigating activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine current location, destination and resources	1.1 ***Incident and task information*** is obtained. 1.2 Relevant ***navigational maps*** and ***navigation equipment*** are gathered and checked. 1.3 Positional information and navigation techniques are applied to plot positions on a map and to determine current location and destination within ***accepted tolerances.***
2. Determine and plan a safe route	2.1 Navigation plans are prepared according to organisational practices. 2.2 Maps, ***navigation techniques***, ***map features***, local and ***environmental conditions*** are interpreted to determine and plan a safe and timely route. 2.3 ***Potential access restrictions*** which may limit thoroughfare are identified and arrangements are made to gain access in accordance with organisational policies, practices and regulatory requirements.
3. Navigate to destination	3.1 Navigation plans and navigation aids are used to maintain compliance with planned route. 3.2 Indicated route is ***communicated*** and followed as required. 3.3 Current location is regularly verified within accepted tolerances. 3.4 Route is modified to address prevailing conditions and, if required, ***alternate route strategies*** are initiated. 3.5 Unanticipated access difficulties are reported in accordance with organisational policies and procedures. 3.6 En route and arrival reporting information is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	communicated using ***communications systems*** as required, in accordance with organisational policies and procedures.
4. Complete post navigational activities	4.1 ***Reporting requirements*** are completed in accordance with organisational policies and procedures. 4.2 Navigational equipment and aids are recovered, reset, updated, serviced and stored according to operational standards and manufacturer's specifications.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate verbally
- identify natural and cultural features for transport modes
- solve problems
- use maps and navigation aids

Required Knowledge

- cartographic symbols and legends
- grid/magnetic conversion
- map and chart types
- methods for determining current location
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- route planning techniques and calculations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • plot a navigation route accurately and within accepted tolerances when following a route • maintain positional awareness • react effectively to changes in the operating environment that require re-planning of a course • demonstrating navigation to an incident in urban and/or rural locations. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual incident, exercise or simulation or series of tasks required to demonstrate competence including demonstrating navigation to an incident in urban and/or rural locations. **Specific resources for assessment** Access is required to: • equipment used in operational navigation
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Public Skills Australia

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident and task information may include:	• Areas of probability • Data gathering • En route and arrival information • Establishing radii • Flood height predictions • Nature of incident • Plotting fire fronts • Rates of fire line constructions • Search operation
Navigational maps may include:	• Aerial photographs • Cadastral maps • Emergency service maps • Local authority maps • Navigational charts • Satellite imagery • Street directories • Topographic maps
Navigation equipment may include:	• Area plotters • Communications equipment • Computers • Geographical information systems (GIS) • Global positioning systems (GPS) • Magnetic compasses • Protractors • Romers • Scale rules • Watch/stopwatch • Writing equipment
Accepted tolerances may include:	• Prevailing weather and environmental conditions • Relating the margin of error allowable as determined by the nature of the task/incident terrain
Navigation techniques may include:	• Bearings and back bearings • Defining or plotting incident location • Delineation of search areas • Grid and latitude/longitude conversions • Identifying features • Magnetic conversions • Planning access and egress routes • Plotting and calculation of areas subject to hazard

© Commonwealth of Australia, 2025 Public Skills Australia

	impact such as flood inundation, fire damage • Resection and triangulation • Route-time calculations
Map features include:	• Cartographic symbols and legends • Contour intervals • Contours • Cultural information • Date of map • Datum information • Eastings and northings • Grid references • Hill shading • Latitude and longitude • Legend • Magnetic variation • North point/s • Scale • Transport routes • Vegetation types
Environmental conditions may include:	• Atmospheric conditions • Fire • Flood • Hazardous goods and dangerous materials • Need to match transportation mode to terrain • Road conditions including vehicle height and/or width clearance requirements • Seasonal factors such as snow, ice extreme heat • Storm damage • Time of day
Potential access restrictions may include:	• Agency and regulatory requirements • Aboriginal and Torres Strait Islander sacred sites • Hazardous areas • Military areas • Other areas of cultural significance • Other areas requiring permission and/or authorisation to enter • Seasonal factors • Wilderness areas
Communicating indicated route may include:	• Hand signals • Verbal instructions • Written instructions
Alternate route strategies	• Lost procedures

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	• Use of additional/alternate vehicles
Communications systems may include:	• Intercom system • Internet based systems • Radio system • Telephone systems
Reporting requirements may include:	• Completion of organisational documentation • Input to debriefs • Journal records • Pre-departure briefing • Situational reports

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for the briefing and debriefing	1.1 ***Content and format*** for briefing and debriefing are determined. 1.2 Briefing and debriefing plan is prepared in accordance with organisational policies and procedures. 1.3 ***Relevant personnel*** involved in the ***activity*** are identified and informed of briefing and debriefing requirements. 1.4 ***Safe and appropriate location*** for the briefing and debriefing is selected.
2. Conduct the briefing and debriefing	2.1 Purpose and structure of the briefing and debriefing is outlined to incident personnel. 2.2 Understanding is sought and clarifications are provided, where required. 2.3 Contributions from personnel during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged. 2.4 Briefing and debriefing is ***conducted*** in accordance with organisational policies and procedures. 2.5 Briefing and debriefing ***checklist*** is used as appropriate.
3. Conclude the briefing and debriefing	3.1 Contributions of personnel are acknowledged in a positive way. 3.2 ***Briefing and debriefing follow-up action*** is identified and acted upon in a timely manner. 3.3 Debriefing activity is reviewed against the policies, practices and training of the organisation to identify opportunities for continuous improvement and to identify lessons learnt. 3.4 Briefing and debriefing findings are summarised and recorded, if appropriate, in a format suitable for ***subsequent action*** by appropriate personnel.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly in a group setting
- lead and manage group processes
- prepare briefing and debriefing plans
- provide feedback and encourage contributions from group members

Required Knowledge

- organisational policies
- organisational procedures for activity briefing and debriefing
- practices and training processes in relation to activity

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • communicate effectively with personnel • elicit and encourage contributions to the briefings and debriefings in a constructive and positive way **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed conducting briefings and debriefings in a variety of actual and/or simulated workplace contexts. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified

© Commonwealth of Australia, 2025 Public Skills Australia

	assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Content and format for briefing and debriefing may include:	• Collaborative • Descriptive illustrative • Facilitator led • Level of language used • Predetermined (SMEAC) • Problem based
Briefing and debriefing plan may include:	• Appropriate incident information collected prior to undertaking operational activities • Location • Methodology • Participants • Purpose • Subject matter • Timing
Organisational policies and procedures may include:	• Briefing and debriefing formats • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational, corporate and strategic plans • Operational performance standards • Operational policies and procedures • Organisational personnel and occupational health and safety practices and guidelines • Organisational quality standards

© Commonwealth of Australia, 2025 Public Skills Australia

	• Organisation's approach to environmental management and sustainability
Relevant personnel may include:	• Contractors • Local, state/territory and federal government employees • Operations personnel • Support personnel • Volunteers • Other agency personnel
Activity may include:	• Incidents • Meetings • Public safety campaigns
Safe and appropriate locations may vary according to:	• Ambient conditions (noise, light, smell) • Distractions • Timing of the briefing and debriefing which may be before, during or following an activity • Weather • Whether briefing and debriefing is under operational or non-operational conditions
Briefing and debriefing may be conducted:	• After a meeting/event • As soon as possible following an incident • At convenient time after the incident • At regular intervals • At shift change over • Immediately after the incident • Prior to undertaking training • Prior to undertaking workplace projects and other work related activities • When incident personnel have been relieved • When personnel return to their home base • When significant changes are anticipated at an incident
Briefing and debriefing checklist may include:	• Control and command • Communications • Damage • Equipment and plant • Fatalities • First aid and medical • Incident background • Incident response • Injuries • Loss

© Commonwealth of Australia, 2025 Public Skills Australia

	• Resources committed to the incident • Strategies to improve response • Stress • Supporting organisations • Welfare
Briefing and debriefing follow-up action may include	• Action taken to address issues identified • Informing participants on the outcomes of the debriefing
Subsequent action may include	• Reporting to appropriate supervisor or agency • Reviewing procedures

PUAOPE016A Manage a multi-team sector

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Fire specific prerequisites removed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to manage a multi-team response to incidents which may be time critical and/or potentially threatening to life, property or the environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit typically applies to Sector/Division Commanders and Level 1 Operations Officer who are responsible for:

- implementing their portion of the Incident Action Plan (IAP)
- allocating resources within their sector
- reporting on incident situation, the progress of operations, emerging risks and the status of resources within the sector
- maintaining situational awareness

Licensing/Regulatory Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct an assessment of the incident	1.1 Initial briefing is obtained 1.2 ***Risk assessment*** of all factors relevant to the sector is conducted 1.3 ***Resources*** required to deal with the ***incident*** are identified 1.4 ***Constraints*** which may impede the response are identified 1.5 ***Initial response options*** are identified and assessed
2. Take command of the sector	2.1 Command of all sector personnel is assumed and maintained in accordance with ***organisational policies and procedures*** 2.2 ***Communications systems*** are used in accordance with organisational policies and procedures 2.3 Reporting processes are activated in accordance with organisational policies and procedures to provide continuous monitoring and evaluation of incident
3. Implement operations portion of the IAP	3.1 ***IAP*** is communicated to teams in accordance with organisational guidelines 3.2 Resources are deployed to ensure operations portion of the IAP is implemented in accordance with organisational guidelines 3.3 Operations are conducted and ***monitored*** in accordance with IAP 3.4 Operational reports are issued in accordance with organisational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.5 Operations are modified as required by the situation
4. Manage and monitor sector operations	4.1 Sector is managed is accordance with agency workplace policies
	4.2 Safe work practices, health and welfare arrangements are implemented and monitored
	4.3 Strategies are implemented and tactics are determined in accordance with IAP
	4.4 Team leaders are briefed and tasked in accordance with the IAP
	4.5 Specific tasks are reviewed and modified as required
	4.6 Regular exchange of information is maintained with Operations Officer on incident situation, progress, achievement of incident, objectives and emerging risks
	4.7 All unexpected situations that require a quick and decisive response are recognised and responded to in accordance with operational requirements and procedures
	4.8 Reports are provided to Operations Officer on required modification to the IAP, additional resources required, surplus resources and hazards present
	4.9 Need for additional resources and logistical support is identified and communicated to Operations Officer
	4.10 Activities are coordinated with adjacent sectors
5. Manage post incident operations	5.1 Resources are accounted for and demobilised in accordance with organisational policies and procedures
	5.2 Post operational ***documentation*** is completed to organisational requirements
	5.3 Sector debrief is conducted in accordance with organisational guidelines
	5.4 Recommendations are made for changes in policies and procedures

Required Skills and Knowledge

Required Skills:

- access information and support from the control facility

© Commonwealth of Australia, 2025 Public Skills Australia

- brief and debrief personnel
- develop and maintain incident situational awareness
- effectively and efficiently deploy human and physical resources
- identify and correctly use equipment
- lead teams
- make decisions, negotiate and resolve conflict
- manage resources

Required Knowledge:

- agency procedures for managing operations
- Australasian Inter-service Incident Management System (AIIMS) structure
- codes of practice and legislation
- emergency site layout
- equipment and personnel capabilities for incident type
- focus of operation of work systems and equipment
- IAP (objectives, strategies and tactics) and development of appropriate tactics
- industrial awards and agreements, and agency personnel practices and guidelines
- organisational command structure
- post operational procedures
- processes for implementing, monitoring, amending and reviewing tactics
- reporting and recording requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess effectiveness of strategies and tactics on sector • implement relevant part of the IAP for the sector • adapt tactics, where required • provide reports to operational supervisor. • Consistency in performance • Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	Context of assessment Competency should be assessed in an operational environment or in an industry-approved simulated workplace environment. Specific resources for assessment Access is required to: • emergency situations or simulation of emergency situations, in a multi-team response environment

© Commonwealth of Australia, 2025 Public Skills Australia

	• equipment, personnel, facilities etc. appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

Risk assessment may include:	• Adequacy of allocated equipment • Capability of assigned personnel • Forecasts • Hazards • Information gathered from existing plans/databases • Meteorological profiles • Property and environment • Risk to life • Type of incident

Resources may include:	• Aircraft
	• Amenities
	• Communication devices
	• Equipment characteristics
	• Human:
	  • operations personnel
	  • specialised personnel such as aviation authorities
	  • support personnel/services

© Commonwealth of Australia, 2025 Public Skills Australia

	• volunteers
	• Local, federal and state/territory governments
	• Parking
	• Physical:
	  • aircraft
	  • equipment
	  • machinery
	  • material
	  • safety equipment
	  • vehicles
	• Technology devices

Incidents may include:	• Life threatening situations
	• Protection of property and the environment
	• Risks to life and property such as:
	  • biological agents
	  • fauna rescue
	  • fire
	  • flood
	  • hazardous materials
	  • landslip
	  • severe storm

Constraints may include:	• Aboriginal and Torres Strait Islander sacred sites • Constraints on road closure • Existing emergency management plans • Financial • Hazardous areas • Legislative • Military areas • Other areas requiring permission and/or authorisation to enter • Other areas of environmental and cultural significance • Prevailing weather • Redirection of water course • Resources • Restrictions on duration of work or the conditions under which personnel may be employed • Seasonal factors • Time • Wilderness areas
Initial response options will	• Availability of resources and estimated outcome

© Commonwealth of Australia, 2025 Public Skills Australia

be determined by:	• Legislative requirements • Organisational guidelines • Regulatory authorities
Organisational policies and procedures may include:	• Civil Aviation Orders • Corporate and strategic plans • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational performance standards • Operational procedures • Organisational performance standards • Organisational personnel practices and guidelines • Organisational quality standards • Organisation's approach to environmental management and sustainability • Procedures/action • Search and rescue time procedures and action
Communications systems may include:	• Computer • Facsimile • Mobile data terminal • Pager • Radio • Satellite • Signage • Signalling • Telephone • Warnings
IAP may include:	• Area or region • Aims and objectives of the response/incident/operation • Consideration or aircraft type • Contingencies and alternatives • Coverage of one or more places • Document (formal or informal) • Flight plans • Limitations • Monitoring and evaluative procedures • Part of an overall plan • Performance and suitability • Possible strategies to achieve objectives • Possible tactics to implement strategies • Pre-plans

© Commonwealth of Australia, 2025 Public Skills Australia

Monitoring of operations may include:	• Reporting requirements • Resources required including their availability • Progress against plan • Utilisation of resources and potential of incident • Welfare of personnel
Documentation may include:	• Assessment of safety procedures utilised • Completion of logs • Financial statements • Input to debriefs • Journal records • Post-operational report • Situational reports

PUAOPE017A Coordinate resources for a multi-agency incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to bring together organisations and other resources to support an incident.

Incidents that require such resource coordination are typically Level 3 incidents, which are characterised by degrees of complexity that may require the establishment of divisions for effective management of the situation. These incidents will usually involve delegation of all functions.

This unit also coves the systematic acquisition and application of organisational, human and equipment resources in an incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who perform the role of emergency coordination at a Level 3 incident.

The authorisation to perform this role is subject to emergency state/territory emergency management arrangements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Commence coordination	1.1 Coordination arrangements are invoked in accordance with agreed authority/responsibility. 1.2 ***Coordination function*** is ***established*** within an Incident Control Centre or facility in consultation with Incident Controller. 1.3 Coordination arrangements are communicated to participating organisations and to relevant authorities/organisations pertinent to the ***type of incident.***
2. Establish and maintain a coordination network	2.1 ***Coordination network*** and structure is established appropriate to the nature and complexity of the incident . 2.2 Coordination network is integrated with the control and command activities to meet the objectives of the control plan using ***communications processes and systems*** as required. 2.3 Coordination network is expanded, contracted or modified in response to changes within the incident environment.
3. Manage resource requirements in accordance with control requirements	3.1 ***Resources*** are ***identified*** through the coordination network and external providers/authorities which may be appropriate to control requirements including ***sources of information and/or documents.*** 3.2 Resources are ***acquired*** to meet the requirements of the ***Incident Action Plan*** and ***Recovery Plan***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	including ***personnel support*** activities. 3.3 Resources are supplied to meet operational requirements within negotiated timeframes. 3.4 Allocation of resources is monitored to ensure operational effectiveness and to confirm additional requirements.
4. Conclude coordination activities	4.1 An ***audit*** is undertaken to ensure resources are acquired and supplied in a cost-effective and efficient manner (where applicable) according to ***standard procedures.*** 4.2 Resources released from the incident are returned to providers as appropriate.
5. Review coordination	5.1 ***Debriefings*** are conducted to evaluate coordination effectiveness using ***consultative processes*** where appropriate. 5.2 Reports are produced as required and communicated in accordance with established protocols and ***agreed reporting mechanisms.***

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access information and support from the control facility
- apply relevant agreements, codes of practice or other legislative requirements
- communicate with colleagues and stakeholders effectively
- deploy human and physical resources effectively and efficiently
- implement coordination plans including predicting consequences and identifying improvements
- manage logistics
- use a range of information technology devices including computers
- use equipment
- use tools and techniques to solve problems

Required Knowledge

- control and organisation command structure
- electronic data exchange systems
- focus of operation of work systems and equipment
- incident site layout

© Commonwealth of Australia, 2025 Public Skills Australia

- other organisations' personnel and external authorities
- principles and practices to conduct an activity which exercises elements of public safety management
- radio frequency devices
- resources including operative and non-operative personnel, materials, equipment and consumables
- security and confidentiality of material

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • implement coordination response in accordance with control plan and within bounds of authority • identify, select, prioritise, implement and evaluate appropriate strategies for the acquisition and deployment of resources in accordance with control and command plan requirements • analyse resource requirements in accordance with present and future control requirements • implement and maintain an effective communication system both internal and external to an incident • monitor the deployment of resources in meeting control requirements • maintain procurement and workplace records • strategically react to changes within the incident environment • incorporate risk management and contingency processes • evaluate performance of coordination in meeting the requirements of control • modify activities to cater for variations and changes in incident contexts and environments • apply underpinning knowledge and skills when establishing plans • describe consequences • complete tasks • identify improvements • apply safety precautions relevant to the task • show evidence of application of relevant workplace

© Commonwealth of Australia, 2025 Public Skills Australia

	procedures including hazard policies and procedures, issue resolution procedures, job procedures and work instruction guidelines relating to the procurement of resources, quality assurance procedures (where in existence), privacy, confidentiality and security procedures, waste, pollution and environmental management recovery processes. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • incidents or simulation of incidents, in a multi-agency response environment • equipment, personnel, facilities appropriate to the incident and within the bounds of responsibility as designated within the requirements of the Incident Controller
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Establishing coordination function may include considering:	• Amenities • Communication modes • Equipment characteristics • Logistical operations • Parking • Proximity to incident • Security requirements • Site access and exit requirements • Size and type of structure • Special incident requirements • Support services

Type of incident (imminent or actual) may include:	• Civil/political incidents such as:
	  • civil unrest
	  • economic
	  • eco-terrorism
	  • enemy attack
	  • general strike
	  • hostage situation/s
	  • sabotage
	• terrorism
	• Marine rescue
	• Natural events such as:
	  • avalanche snow/ice/hail
	  • biological
	  • drought
	  • dust/sand storms
	  • earthquakes/land shifts
	  • extreme heat/cold
	  • fire (forest, grassland, urban)
	  • flood/wind driven water
	  • hurricane/typhoon
	  • landslide/mudslide
	  • lightning storm
	  • pandemic
	  • tornado/cyclone
	  • tsunami

© Commonwealth of Australia, 2025 Public Skills Australia

	• windstorm/tropical storm • volcanic eruption • Rescue • Search • Technological/industrial incidents such as: • building/structure collapse • business interruption • dam/levee failure • explosion/fire • extreme air pollution • financial collapse • fuel/resource shortages • hazardous material releases • hazardous material spills • power/utility failure • radiological accidents • strikes • transportation accidents
Coordination network may include:	• Community services organisations • Contractors • Equipment suppliers • Gas and power agencies • Land management agencies • Local, state/territory and commonwealth government authorities • Medical organisations • Operative and support organisations • Other emergency organisations • Water • Welfare and counselling organisations
Communications processes and systems may include:	• Audio and visual recording mechanisms • Communication responsibilities of personnel • Data retrieval • Data transfer • Designation of appropriate modes and channels of communication • Inter organisation liaison • Interpersonal communications • Procedures and protocols • Radio communications • Recording

© Commonwealth of Australia, 2025 Public Skills Australia

	• Security and authorisation assignment • Storage and dispatch modes • Telecommunications • Types of technology - electronic data exchange devices
Resources may include:	• Communication devices • Equipment • Local, state/territory and commonwealth governments • Machinery • Operations personnel • Support personnel • Technology devices • Vehicles • Volunteers
Identifying and acquiring resources may include:	• Cost benefit analysis • Geographical analysis • Logistics • Networking • Supply-demand financial analysis

Sources of information and/or documents may include:	• Applicable state, territory, commonwealth legislation and regulations which relate to:
	  • codes of practice
	  • conventions
	  • freedom of information
	  • environment protection
	  • equal employment opportunity and affirmative action
	  • equal opportunity
	  • memorandum of understanding/agreement
	  • occupational health and safety (OH&S)
	  • policies
	  • privacy and confidentiality legislation
	  • procurement procedures
	  • protocols
	  • public safety
	  • quality assurance procedures
	  • standards and certification requirements
	  • state of emergency
	  • workers compensation
	  • workplace relations

© Commonwealth of Australia, 2025 Public Skills Australia

	• Communications technology equipment • Client requirements • Emergency procedures • Evacuation procedures • OH&S procedures • Oral, aural or signed communications • Organisational and workplace operating procedures and policies • Personal and work area procedures and practices • Relevant Australian or international documentation in disaster/emergency management • Standard operating procedures
Incident Action Plan may include:	• Accommodation and welfare arrangements • Communications Plan • Incident objectives • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical arrangements • Management arrangements, including establishment of sectors and divisions • Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of OH&S issues • Resources to be allocated to each division and sector • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Structural chart depicting the personnel in the incident management arrangements, including establishment of sectors and divisions • Timing of meetings and changeovers • Traffic management
Recovery Plan may include:	• Re-establishment of infrastructure • Rehabilitation • Relocation of members of the public
Personnel support activities may include supply of:	• Catering • Medical • Rest/relief counselling services • Sanitation • Shelter

© Commonwealth of Australia, 2025 Public Skills Australia

Audit may comprise:	• Stress management services • Damage reports • Reconciliation • Supply cost • Supply mechanisms
Standard procedures may include:	• Australian Standards • Defence Instructions • Doctrine pamphlets • Job guides, other publications • Manufacturers' handbooks, industry specifications and technical instructions • OH&S regulations • Organisational policies and procedures • Procedure manuals • Relevant local government byâ€‘laws • Relevant state/territory or commonwealth legislation • Routine Orders • Standing Operating Procedures • Standing Orders • Written and verbal orders
Debriefings may include:	• Financial analysis • Logistics • Operational analysis • Performance evaluation • Supply-demand
Consultative processes may include:	• Clients • Emergency management specialists • Emergency organisations • Higher authorities • Media • OH&S specialists • Other professional or technical staff and/or organisations • Public

Agreed reporting mechanisms will involve:	• Authorisation
	• Distribution and development of reports in accordance with regulatory and organisational requirements and may include:
	  • briefing papers
	  • coronial reports
	  • final reports
	  • legal reports

© Commonwealth of Australia, 2025 Public Skills Australia

- media reports
- ministerial reports
- performance evaluations
- situation reports - within incident for external distribution
- status reports

PUAOPE018A Control a Level 2 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to control a multi-team response to an incident, to undertake a scene assessment, and to plan and implement an operational response and post-response activities. A person performing this role has the title of Incident Controller.

Level 2 incidents are complex either in size, resources or risk. They are characterised by the need for:

- deployment of resources beyond initial response

OR

- sectorisation of the incident

OR

- establishment of functional sections due to the levels of complexity (e.g. operations and planning)

OR

- a combination of the above

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a Level 2 Incident Controller who is responsible for managing a response to a Level 2 incident through the use of internal and external resources.

A Level 2 Incident Controller is responsible for:

- developing an Incident Action Plan to control the incident

© Commonwealth of Australia, 2025 Public Skills Australia

- establishing effective liaison and cooperation with all relevant persons, including the affected community, external to the incident
- managing the incident as effectively and efficiently as circumstances allow
- establishing systems and procedures for the safety, health and welfare of all persons working at the incident.
- The authorisation to control a Level 2 incident is subject to organisational policies and procedures

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish control	1.1 Control is established in accordance with ***organisational policies and procedures.***
	1.2 Identity of the Incident Controller is communicated to participating organisations/authorities.
	1.3 Communications systems are activated in accordance with organisational policies and procedures.
	1.4 Command and control ***facilities*** are ***established.***
2. Conduct an assessment	2.1 ***Required information*** to manage the ***incident*** is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
of the incident	sought and obtained, including ***operational briefing*** from the previous Incident Controller, if appropriate. 2.2 Risk assessment of all factors impacting on the response is conducted. 2.3 Key people and relevant support agencies are identified and notified, and communication channels are established to allow required exchange of information. 2.4 ***Resources*** required to deal with the incident are identified. 2.5 ***Constraints*** which may impede the response are identified. 2.6 Relevant information is analysed and processed to establish priorities for dealing with the incident. 2.7 Actions are taken to protect, secure and preserve incident scene, where required. 2.8 Incident potential is assessed and transition to a Level 3 incident is considered.
3. Establish and maintain a control structure	3.1 Incident management structure appropriate to the incident is established and functions are delegated . 3.2 Control structure is scaled up or down in response to changes within the emergency environment. 3.3 Reporting processes are activated in accordance with organisational policies and procedures, to provide continuous ***monitoring*** and evaluation of incident.
4. Develop Incident Action Plan	4.1 ***Incident Action Plan*** (***IAP***) is developed and adjusted if required in accordance with response requirements and operational guidelines. 4.2 IAP is updated for the next shift, if required.
5. Implement Incident Action Plan	5.1 IAP is communicated to teams in accordance with organisational guidelines. 5.2 Resources are requested, acquired and deployed to ensure IAP is implemented in accordance with organisational guidelines. 5.3 ***Operations*** are ***monitored*** in accordance with IAP. 5.4 Operational ***reports*** are gathered in accordance with organisational policies and procedures.
6. Maintain control of incident	6.1 Briefings and planning meeting requirements with IMT and ***key personnel*** are met. 6.2 Incident Management Team support is maintained. 6.3 Information is provided to community and other

ELEMENT	PERFORMANCE CRITERIA
	stakeholders. 6.4 Incident records are maintained in accordance with organisational guidelines.
7. Conclude incident activities	7.1 Support requirements for recovery management are provided as required. 7.2 Resources are accounted for and demobilised in accordance with organisational policies and procedures. 7.3 ***Operational debriefing*** is conducted in accordance with organisational guidelines. 7.4 ***Welfare of team members*** is assessed and appropriate action is taken.
8. Manage post incident operations	8.1 Post operational documentation is completed to organisational requirements. 8.2 Effectiveness of operations is evaluated and documented. 8.3 Recommendations are made for changes in policies and procedures where applicable.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access information and support from the control facility
- deploy human and physical resources effectively and efficiently including electronic data exchange systems, equipment and consumables, other organisations' personnel
- develop IAPs including predicting consequences and identifying improvements
- identify and use correctly equipment and materials
- use a range of information technology devices including computers
- use tools and techniques to solve problems

Required Knowledge

- agency work systems and equipment
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- codes of practice and legislation
- crime scene contamination
- current principles and practices in response activities

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency management plans
- emergency site layout
- organisational command structure
- processes and procedures
- relevant agreements
- roles and responsibilities of involved organisations, e.g. crime scene establishment
- security and confidentiality of material
- team and personnel management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • control an incident • approve plans and strategies (such as the IAP) to control the incident • establish effective liaison and cooperation with all relevant persons, including the affected community, external to the incident • manage the incident as effectively and efficiently as the circumstances allow • establish systems and procedures for the safety, health and welfare of all persons working at the incident. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • Level 2 incidents or simulation of Level 2 incidents, in a multi-agency response environment • equipment, personnel, facilities appropriate to a Level 2 incident and within the bounds of

	responsibility
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational policies and procedures may vary between sectors and organisations and may include:	• Civil aviation orders • Corporate and strategic plans • Environmental management and sustainability • Legislation and regulations relevant to the operation/ incident/response • Legislation relevant to the organisation • Organisational personnel practices and guidelines • Organisational quality standards • Operational performance standards • Operational procedures • State/territory emergency management arrangements
Command facilities may include:	• Field facility such as an existing airfield, helipads or established operations centre
Establishing command facilities may include:	• Climatic conditions • Communication modes • Environment • Logistical operations

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment of the incident may include:	• Proximity to incident
	• Security arrangements
	• Site access and exit requirements
	• Size and type of structure
	• Special incident requirements
	• Topography
	• Adequacy of allocated equipment
	• Capability of assigned personnel
	• Hazards
	• Information gathered from existing plans/databases
	• Meteorological profiles and forecasts
	• Predictions
	• Predictions of the incident's likely development including key risk exposures:
	  • life
	  • environment
	  • property

Required information may include:	• Type of incident
	• Advice/information from:
	  • safety Advisor
	  • technical specialists
	• Briefing from previous Incident Controller
	• Information from other organisations, witnesses or observers on scene
	• Organisational documentation

Incidents may include:	• Accident • Animal and marine mammal rescue • Crime • Fires • Flood • Hazardous substances and dangerous goods • Public disorder • Rescues • Searches • Storms
Operational briefings/debriefings may include:	• Alternative strategies and the economic, social, public health and environmental risks associated with each • Arrangements for record keeping • Arrangements in place to facilitate planning function • Current and expected resourcing at the incident • Current and projected situation

© Commonwealth of Australia, 2025 Public Skills Australia

	• Current arrangements for information dissemination • Current incident objectives, strategies and their rationale • Key risk exposures • Opportunity to clarify understanding

Resources may include:	• Aircraft
	• Amenities
	• Equipment
	• Equipment characteristics
	• Human:
	  • operations personnel
	  • support personnel
	• volunteers
	• Local, state/territory and federal governments
	• Material
	• Parking
	• Personnel
	• Physical:
	  • communication devices
	  • equipment
	  • machinery
	  • technology devices
	  • vehicles/vessels
	• Safety equipment
	• Specialised personnel such as aviation authorities
	• Support services

Constraints may include:	• Aboriginal and Torres Strait Islander sacred sites • Constraints on road closure • Existing emergency management plans • Financial • Hazardous areas • Legislative • Military areas • Other areas of environmental and cultural significance • Other areas requiring permission and/or authorisation to enter • Prevailing weather • Redirection of water course • Restrictions on duration of work or the conditions under which personnel may be employed • Resources

PUAOPE019A Control a Level 3 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to take and establish control of a Level 3 incident.

A Level 3 incident is characterised by degrees of complexity that may require the establishment of divisions for the effective management of the incident.

Control refers to the overall direction of emergency management activities at an incident. Authority for control is established in legislation or in an emergency plan and carries with it the responsibility for tasking other organisations in accordance with the needs of the situation. Control relates to situations and operates horizontally across organisations.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a Level 3 Incident Controller responsible for:

- management of all activities undertaken to control an incident
- establishment of systems and procedures for the safety and welfare of personnel at the incident
- management of the interface with organisations and people working outside the incident management structure
- management of the interface with organisations, communities and people affected, or likely to be affected, by the incident

The authorisation to control a Level 3 Incident is subject to organisational policies and procedures.

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish control	1.1 Control is established in accordance with designated responsibility/authority. 1.2 Identity of the controller is communicated to participating organisations/authorities and to relevant authorities/organisations pertinent to the emergency/incident situation. 1.3 ***Nature***, extent and potential of an incident is identified through liaison with relevant personnel/authorities.
2. Establish a control facility	2.1 Appropriate ***control facility*** is ***established*** in accordance with approved operating procedures. 2.2 Establishment of the facility is communicated to participating and relevant personnel/authorities. 2.3 ***Communications systems and procedures*** are established to facilitate the functions of control.
3. Establish and maintain a control structure	3.1 Control structure is established appropriate to the nature and complexity of the emergency,

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	encompassing specific roles and responsibilities of each participating organisation.
	3.2 Control structure is scaled up or down in response to changes within the emergency environment.
	3.3 Flow of information is managed ensuring accurate recording and reporting mechanisms are established and maintained.
	3.4 Control systems are ***identified*** and managed in accordance with the control structure.
4. Establish procedures to permit control to be exercised	4.1 Control structure is communicated to participating organisations and relevant authorities/individuals who may have a regulatory or economic interest applicable to the emergency/incident.
	4.2 Communication is implemented to provide an effective exchange between the controller and all organisations engaged in the emergency, supporting organisations, coordinator, higher authorities, media.
	4.3 Liaison is initiated and maintained with organisations that may provide information or ***resources*** applicable to the emergency/incident.
5. Assess the situation and determine priorities	5.1 Information about incident is sought from participating organisations and relevant sources.
	5.2 Community and environmental risks are identified.
	5.3 Relevant information is analysed and processed to establish priorities for dealing with the incident.
	5.4 Incident objectives are determined, utilising consultation where appropriate and are communicated within and external to the incident.
	5.5 Need for immediate provision of assistance to the public and for recovery management is considered and appropriate support and recovery agencies are notified.
	5.6 Objectives are continually reviewed in light of information updates, reports and feedback.
6. Develop an Incident Action Plan	6.1 Appropriate strategies are determined to achieve objectives.
	6.2 Components of strategies are determined in consultation with organisations.
	6.3 ***Incident Action Plan*** (***IAP***) is documented in writing.
7. Maintain control of incident	7.1 Incident planning and logistics support is maintained.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	7.2 Situation systems are provided to the control organisation. 7.3 Planning meeting is conducted with Incident Management Team and key agency commanders. 7.4 ***Information is provided to community*** and other stakeholders with an emphasis on public safety. 7.5 Communication to community and other stakeholders is accurate and is delivered in a timely manner using appropriate strategies. 7.6 Incident records are maintained in accordance with organisational guidelines.
8. Implement an Incident Action Plan	8.1 Strategies are implemented through delegation within the control structure and allocation to supporting organisations. 8.2 IAP is monitored to meet changes in conditions and modifications are made where appropriate. 8.3 IAP is communicated to ***relevant organisations*** following established procedures.
9. Conclude incident activities	9.1 Support requirements for recovery management are provided as required. 9.2 Physical, human and fiscal resources are accounted for. 9.3 Debriefing requirements are met and operational control documentation is completed. 9.4 Reports are produced as required.
10. Review incident activities	10.1 Plans and procedures are evaluated and reviewed. 10.2 Effectiveness of the control function and its interaction with command organisations is evaluated and documented. 10.3 Reports are produced and communicated in accordance with established protocols.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access information and support from organisations

© Commonwealth of Australia, 2025 Public Skills Australia

- apply relevant agreements
- use human and physical resources effectively and efficiently including equipment and consumables, identification and correct use of equipment, materials
- use tools and techniques to solve problems

Required Knowledge

- accountabilities (including outcomes and human and physical resource management)
- application of safety factors and safe operating procedures
- Australasian Inter-service Incident Management System (AIIMS) incident control structure and principles
- codes of practice or other legislative requirements
- decision making processes
- disaster and emergency management arrangements
- emergency management communications requirements
- emergency site layout options
- IAP process for a Level 3 incident
- national and state/territory agreed industry protocols
- national and state/territory based coordination arrangements
- operation of work systems and equipment
- operative and non operative personnel
- organisational processes and procedures
- personnel and external authorities
- radio frequency devices
- risk management processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • establish and maintain control for the effective management of the incident • effectively assign and monitor organisation allocated task/s • analyse incidents both functionally and strategically • select, prioritise, implement and evaluate appropriate courses of action • strategically react to changes within the emergency environment

© Commonwealth of Australia, 2025 Public Skills Australia

	• incorporate risk management and contingency processes • implement risk assessment processes • modify activities to cater for variations and changes in emergency contexts and environments • approve plans and strategies to control the incident • initiate recovery arrangements • describe consequences • complete tasks • identify improvements • apply safe work practices • show evidence of application of relevant workplace procedures including: • hazard policies and procedures • issue resolution procedures • job procedures and work instruction guidelines relating to the procurement of resources • quality assurance procedures (where existing) • privacy • confidentiality and security procedures • waste, pollution and environmental management recovery processes • complete work systematically ensuring minimal damage to equipment and environment. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • Level 3 incidents or simulation of Level 3 incidents, in a multi-agency response environment • equipment, personnel, facilities appropriate to a Level 3 incident and within the bounds of the Incident Controller's responsibility
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter

© Commonwealth of Australia, 2025 Public Skills Australia

supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Nature of the incident (imminent or actual) may include:

- Biological
- Civil/political events such as:
  - civil unrest
  - economic
  - eco-terrorism
  - enemy attack
  - financial collapse
  - general strike
  - hostage situation/s
  - sabotage
  - strikes
  - terrorism
- Fire (forest, range, urban)
- Natural events such as:
  - avalanche snow/ice/hail
  - drought
  - dust/sand storms
  - earthquakes/land shifts
  - extreme heat/cold
  - fauna rescue (e.g. marine life rescue)

© Commonwealth of Australia, 2025 Public Skills Australia

	• flood/wind driven water • hurricane/typhoon • landslide/mudslide • lightning storm • search and rescue • tornado/cyclone • tsunami • volcanic eruption • windstorm/tropical storm • Technological/industrial events such as: • bio-hazards • building/structure collapse • business interruption • dam/levee failure • explosions/fire • extreme air pollution • fuel/resource shortages • hazardous material releases • power/utility failure • radiological accidents • transportation accidents
Establishing control facility may include consideration of:	• Amenities • Climatic conditions • Communication modes • Equipment characteristics • Legislation • Logistical operations • Proximity to emergency/incident • Safety requirements • Security requirements • Site access and exit requirements • Size and type of structure • Span of control • Special incident requirements • Support services • Topography
Communications systems and procedures may include:	• Communications planning • Communications responsibilities of personnel • Data transfer • Designation of appropriate modes and channels of communication

© Commonwealth of Australia, 2025 Public Skills Australia

	• Inter organisation liaison • Interpersonal communications • Radio communications • Telecommunications
Identifying control systems may include:	• Communications systems • Fiscal • Human • Information flow, e.g. media • Physical • Political
Agreed reporting mechanisms may include:	• Authorisation, distribution and developments of reports in accordance with regulatory and organisational requirements and may include: • briefing papers • final reports • for external distribution-status reports • legal reports • media reports • ministerial reports • performance evaluations • situation reports-within emergency
Resources may include:	• Aircraft • Communications devices • Equipment • Fiscal • Local, state/territory and federal governments • Machinery • Operations personnel • Support personnel • Technology devices • Volunteers • Vehicles
Incident Action Plan may include:	• Accommodation and welfare arrangements • Communications Plan • Incident objectives • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical arrangements • Management arrangements, including establishment of sectors and divisions

© Commonwealth of Australia, 2025 Public Skills Australia

	• Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of occupational health and safety issues • Resources to be allocated to each division and sector • Risk assessment based on current and predicted circumstances • Safety concerns and actions for mitigating risk • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Structural chart depicting the personnel in the incident management arrangements, including establishment of sectors and divisions • Timings of meetings and changeovers • Traffic management
Providing information to the community may include:	• Advice about evacuation • Emergency warnings • Relocation • Situation update
Relevant organisations may include:	• Ancillary organisations • Clients • Community groups • Emergency management specialists • Emergency organisations • Government and semi government authorities and departments • Higher authorities • Media • Occupational health and safety specialists • Other analysts and other stakeholders • Public • Service providers • Victims • Witnesses

PUAOPE020A Lead a crew

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to lead a small team to perform operational tasks at an incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who are responsible for ensuring that tasks allocated to their team are effectively and efficiently carried out.

This work is typically undertaken under the supervision of an Operations Officer, Sector Commander, Strike Team Leader or Task Force Leader.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare crew for tasks	1.1 Initial briefing is obtained from Operations Officer or other designated supervisor in accordance with the Incident Action Plan (IAP). 1.2 Additional information, ***equipment and resources*** are obtained as required. 1.3 Crews are briefed and tasks are allocated.
2. Lead crew to perform tasks	2.1 Tasks are implemented as directed by Operations Officer or other designated supervisor in accordance with the IAP. 2.2 Progress towards completion of tasks is ***monitored*** and tasking are adjusted as necessary. 2.3 ***Reports*** are provided to supervisor as per instruction. 2.4 ***Communication is maintained*** with supervisor, crew members and other personnel in the work area. 2.5 Safety, health and well being of crew members is monitored and appropriate action is taken where required.
3. Conclude tasks	3.1 Completion of tasks is reported to designated supervisor. 3.2 Crew and equipment are made ready for further tasks. 3.3 Crew is debriefed in accordance with organisational requirements. 3.4 ***Documentation*** is completed in accordance with organisational requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- brief and debrief crew members
- communicate effectively with crew members
- identify and correctly use equipment
- perform relevant operational tasks
- provide reports
- use communication equipment

Required Knowledge

- agency work practices and guidelines
- communication flow requirements of sector to operations officer or sector personnel
- organisational command structure
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- reporting requirements
- resource management responsibilities and systems (safe deployment and recording)
- risk assessment principles
- occupational health and safety (OH&S) requirements and procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • understand briefings and communication requirements and convey these to crew members • allocate tasks to crew members to achieve required outcomes • monitor and report on progress **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Equipment and resources may include:	• Communication devices • Consumable materials • Food and drink • Machinery • Response equipment • Safety equipment • Vehicles
Monitoring of progress may include:	• Progress against plan • Utilisation of resources and incident behaviour • Welfare of personnel
Reports may include:	• Changes in incident behaviour • Incident situation • Progress of tasks • Safety risks
Incidents may include:	• Fire • Flood • Hazardous materials • Landslip

© Commonwealth of Australia, 2025 Public Skills Australia

Communication may be maintained by:	• Severe storm • Mobile data terminal • Radio • Signalling • Talking face-to-face • Telephone
Documentation may include:	• Completion of logs • Input to debriefs • Work times of crew members

PUAOPE021A Manage information function at an incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to manage the information function within the Incident Management Team.

The information function prepares and disseminates timely, accurate and relevant incident information to a range of stakeholders including community, government, media, incident personnel and their organisations, as well as other organisations.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

A person performing this role has the title of Information Officer and is delegated responsibility for the:

- collection and dissemination of accurate incident information to meet the needs of stakeholder groups, the community, the media; for internal use within the incident control structure and for involved and affected organisations
- regular provision of timely, accurate and relevant information to stakeholders

The community includes both the local community directly affected by an incident, as well as the broader community.

The authorisation to perform this role is subject to organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish the Information Unit	1.1 ***Initial briefing*** and information required to establish the Information Unit (Unit) is sought and obtained from the ***supervisor.***
	1.2 Unit priorities are confirmed with the supervisor and are in accordance with the ***Incident Action Plan*** (***IAP***).
	1.3 Unit is established and resourced to meet incident requirements and establishment is communicated to the ***Incident Management Team*** (***IMT***).
	1.4 ***Structure of the Information Unit*** is determined by ***incident complexity*** and consequential communication requirements.
	1.5 Media Officer is appointed within the Unit, if required, to prepare media releases for authorisation by the Incident Controller, to provide information to the media and to ensure media needs and deadlines are met.
	1.6 ***Briefings*** to members of the Unit are conducted upon commencement of shift and at regular intervals.
	1.7 Safe work practices, health and welfare arrangements for work area are implemented and monitored.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Collect information on the current and predicted incident situation	2.1 Accurate information on the current and projected incident situation as well as incident control objectives, strategies and resources working at the incident is collected, summarised and prepared for dissemination.
	2.2 Local knowledge and information regarding risks, issues and local factors provided by stakeholder groups and the community is communicated to the IMT.
3 Develop an Information Unit Communications Plan	3.1 ***Information Unit Communications Plan*** (***IUC Plan***) is prepared and specifies the objectives and strategies to meet the information needs of the community, media, incident personnel and ***involved and affected organisations.***
	3.2 Analysis of the incident, ***risks*** and ***constraints*** and the information to be reported to identified ***target audiences*** is incorporated in the IUC Plan.
	3.3 Tactics and timelines required to implement the strategies are identified in the IUC Plan.
	3.4 IAP is supported by the IUC Plan by confirming the process and means by which information is to be disseminated both within the incident and to parties external of the incident.
	3.5 How information is to be communicated internally and externally, to the community, media and other relevant stakeholders is confirmed in the IUC Plan.
4 Disseminate information to the community	4.1 Timely, accurate and relevant information, approved by the Incident Controller, is disseminated to ***stakeholders*** in conjunction with the IMT.
	4.2 Planning Officer is advised of any emerging issues.
5. Engage with the community	5.1 Community information strategy is developed by the Unit in accordance with the IAP requirements.
	5.2 Communication with communities both affected and likely to be affected by the incident are organised and conducted.
	5.3 Communities are provided with information to prepare themselves and to manage risks.
	5.4 Community meetings to respond to community information needs are coordinated.
	5.5 Information and feedback from the community on the effectiveness of its communications strategies and community concerns is sought.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Manage the Information Unit	6.1 Members of the Unit are briefed on their responsibilities in meeting the outcomes of the IUC Plan. 6.2 Unit is publicised as the point of contact for the media, the public and other organisations for general information about the incident. 6.3 Accurate and regular flow of information within the incident and to parties external to the incident, is maintained and effective incident management is supported. 6.4 Work by members of the Unit is undertaken in close liaison with the Management Support Unit and Liaison Officers. 6.5 Structure of the Unit is adjusted during the incident to meet the predicted and actual information demands of the incident. 6.6 Unit is managed in accordance with control agency workplace policies. 6.7 Appropriate document management and record keeping systems are established.
7. Contribute to the planning processes	7.1 Communication is maintained with the IMT formally, through meetings, briefings and debriefings, and informally, as required. 7.2 IMT is briefed on social or political issues and is provided with feedback on community needs and concerns as required. 7.3 Input is provided to the development of the IAP in relation to information collection and dissemination.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- anticipate, analyse and assess information needs
- collect and collate information
- communicate facts in a fluent, clear and unambiguous manner
- conduct press conferences and group interviews
- delegate appropriately
- communicate effectively with colleagues and stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

- experience in public liaison and media relations
- make presentations to the media
- provide briefings to the IMT
- supervise staff effectively
- undertake public speaking engagements

Required Knowledge

- agency workplace policies, practices and procedures
- analysis and display techniques
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- current practice for media liaison
- legal and organisational requirements relating to confidentiality, libel, accuracy, discrimination requirements of media to present information in a newsworthy manner
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- requirements of different media: newspapers, magazines, radio, television
- requirements of local versus regional versus national media
- role of media in disseminating information

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • collate and prepare timely, accurate, relevant and consistent information to be disseminated to a range of stakeholders to meet their individual information requirements • develop an IUC Plan to meet the needs of the community, media, stakeholders and the incident control structure • organise and conduct community meetings to assist local groups to prepare themselves and to manage their risks **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

	Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • incidents or simulation of incidents, in a multi-agency workplace environment
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

PUAOPE022A Manage logistics for a Level 2 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to acquire and provide human and physical resources, facilities, services and materials to support the achievement of the objectives for a Level 2 incident.

A person performing this role has the title of Logistics Officer and is responsible for the acquisition and provision of human and physical resources, facilities, services and materials to support achievement of incident objectives. The Logistics Officer contributes to objectives and strategies through input on implementation of the Incident Action Plan.

Level 2 incidents are complex either in size, resources or risk. They are characterised by the need for:

- deployment of resources beyond initial response:

OR

- sectorisation of the incident

OR

- establishment of functional sections due to the levels of complexity (such as operations and planning)

OR

- a combination of the above

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who perform the role of the Logistics Officer and who are required to provide support for control of the incident through the obtaining and maintaining of:

© Commonwealth of Australia, 2025 Public Skills Australia

- human and physical resources
- facilities
- services
- materials

The authorisation to perform this role is subject to organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish logistics section	1.1 Initial briefing is obtained from Incident Controller. 1.2 Current forecast operational, planning and other incident activities and their resultant logistical requirements are determined. 1.3 Logistics Section objectives and tasks are identified. 1.4 Logistics structure appropriate to incident requirements is developed and required logistical resources are identified and obtained. 1.5 ***Logistics units*** are established, tasks are delegated and briefings are given to delegated personnel.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.6 Safe work practices, and health and welfare arrangements for work area are implemented and monitored.
2. Develop logistics plans	2.1 ***Logistics plans*** required for the delivery of logistics resources, services, facilities and materials are identified and delegated to personnel for development.
	2.2 Information required for the development and implementation of logistics plans is identified and sourced.
	2.3 Logistics plans are produced on time and provided to personnel for implementation.
	2.4 Logistics plans and components of plans required for inclusion in the Incident Action Plan (IAP) are developed.
	2.5 Incident Management Team (IMT) members are briefed on progress of the logistics plans as required.
3. Manage activities for provision of logistics support	3.1 Financial management and oversight is maintained in accordance with the controlling agency's requirements.
	3.2 Refreshment and sustenance are provided to incident personnel and support staff within agreed timeframes and in accordance with nutritional guidelines.
	3.3 Transport for personnel, equipment, supplies and food is provided within required timeframes..
	3.4 Equipment, vehicles and/or vessels are prepared, maintained and secured as required
	3.5 Staging areas are established and maintained in accordance with operational requirements.
	3.6 Medical support provided is consistent with the IAP requirements.
	3.7 Communications systems, networks and equipment are established and maintained consistent with the incident communications plan and IAP requirements.
	3.8 Locations and facilities where personnel work, sleep, cook, maintain and repair equipment are selected, established and managed based on ***agency criteria.***
	3.9 Requests for resources, services, facilities and materials are met and feedback is provided.
	3.10 Facilities, services and materials are procured

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	consistent with agency protocols and guidelines. 3.11 Reusable resources, equipment and materials are accounted for at the conclusion of the incident.
4. Manage logistics processes	4.1 Logistics requirements are managed in accordance with agency workplace policies. 4.2 Safe work practices, health and welfare arrangements for work area are implemented and monitored. 4.3 Logistics Section meetings are conducted as required. 4.4 Workload and progress against logistics plans are monitored. 4.5 Logistics plans are reviewed to meet current and projected incident requirements throughout the incident. 4.6 Information exchange between logistics and other incident sections is maintained. 4.7 Relationships between Logistics Section and external agencies and providers are established and maintained. 4.8 Records are kept of logistical transactions including resources requested, en route, allocated to, and released from the incident. 4.9 Record of activities is kept.
5. Participate in the IMT	5.1 IMT planning meetings are attended. 5.2 Strategic advice is provided to the IMT in regard to provision of resources, services, facilities and materials, and the prioritisation of requirements. 5.3 IMT is kept informed of logistical arrangements. 5.4 Incident Controller is briefed on analysis of progress against the logistics portion of the IAP as required. 5.5 Liaison with other members of the IMT is undertaken as required. 5.6 IMT is kept informed of status of inter agency and external supplier arrangements.
6. Monitor and review logistics functions	6.1 Allocation and performance of resources is monitored and reviewed. 6.2 Incident reports are produced as required. 6.3 After action reviews and post incident analyses are initiated and/or participated as required. 6.4 Briefings/debriefings are conducted as required.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- conduct meetings and prepare agendas
- delegate units within the Logistics Section
- manage a team within a dynamic environment
- make decisions
- manage time effectively and efficiently
- prepare, present and communicate information
- prioritise work tasks
- problem solve
- resolve conflict and negotiate

Required Knowledge

- agency-specific purchasing arrangements
- agency workplace policies, procedures and welfare arrangements
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- briefing/debriefing requirements
- emergency management and organisational arrangements in relation to acquisition of resources from the local area, wider region, state/territory resources and other agencies
- meeting protocols and procedures
- state/territory emergency management legislation, policy, procedures and interagency MOUs
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications policy and requirements including requirements of a Logistics Section facility; requirements of different facilities (e.g. base camps, Incident Control Centre)
- resource management responsibilities and systems
- suppliers of services, equipment, material and protocols for obtaining these
- use of agency operational electronic systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • establish, implement and monitor the logistics portion of an IAP to deal effectively with the incident • work effectively as a member of an IMT to resolve an incident • develop logistics review processes and documentation appropriate to a Level 2 incident • log and record all actions and decisions • operate in a management role, effectively and efficiently delegating responsibility, monitoring performance, providing feedback and taking mitigation action to ensure completion of logistics requirements at an incident **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • Level 2 incident or simulation of Level 2 incident, in a multi-agency response environment • equipment, personnel, facilities appropriate to a Level 2 incident and within the bounds of responsibility as designated to the Logistics Officer by the Incident Controller
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of

© Commonwealth of Australia, 2025 Public Skills Australia

assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Logistics units may include	• Catering Unit • Communications Support Unit • Facilities Unit • Finance Unit • Ground Support Unit • Medical Services Unit • Supply Unit
Catering Unit services may include	• Contract delivery of prepared food and drink • Packaging of food and drink for delivery around incident • Preparing food and drink

Communications Support Unit services may include	• Providing technical advice, equipment, installation and service for incident communications systems such as:
	  • information technology
	  • landline, mobile and satellite telephones
	  • radio

Facilities Unit services may include	• Provision and maintenance of:
	  • accommodation facilities
	  • ablutions
	  • catering facilities and dining areas
	  • fixed or mobile Incident Control Centre
	  • operations point
	  • staging areas

© Commonwealth of Australia, 2025 Public Skills Australia

	• vehicle servicing areas
Finance Unit services may include:	• Keeping financial records in accordance with agency requirements • Maintaining accounts for purchases of supplies and hire of equipment • Maintaining information on insurance arrangements and compensation for personnel, property, machines and vehicles
Ground Support Unit services may include:	• Maintaining signage around incident • Pick up and delivery of goods, materials and equipment • Provision of fuel • Servicing vehicles including fixing tyres • Transport of personnel
Medical Services Unit services may include:	• Ambulance services • Advising hospital services of incident • First aid posts
Supply Unit services may include:	• Acquiring equipment, materials, goods and resources • Storing and issuing equipment, materials and goods
Logistics plans may include:	• Accommodation • Catering • Communications support • Facilities maintenance • Financial management • Goods pickup and delivery • Mechanical service and fuelling • Medical • Personnel transport • Rubbish removal • Traffic and signage
Agency criteria may include:	• Awards • Cost • Quality

PUAOPE023A Manage operations for a Level 2 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to command resources to achieve resolution of a Level 2 incident.

A person performing this role has the title of Operations Officer and is delegated responsibility by the Incident Controller to implement the strategies to resolve the incident.

Level 2 incidents are complex either in size, resources or risk. They are characterised by the need for:

- deployment of resources beyond initial response

OR

- sectorisation of the incident

OR

- establishment of functional sections due to the levels of complexity (such as operations and planning)

OR

- a combination of the above

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to Operations Officers responsible for:

- all activities undertaken directly to resolve the incident
- management of all resources assigned to operations
- identification of new and emerging risks at the incident.

© Commonwealth of Australia, 2025 Public Skills Australia

The authorisation to perform this role is subject to organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish command and develop operational structure	1.1 Initial briefing including information to manage the operations requirements for the incident is sought and obtained from Incident Controller. 1.2 Command of operations function is established. 1.3 ***Principles of span of control*** are applied to operational resources. 1.4 Divisions and sectors are delineated taking account of geographic and functional requirements. 1.5 Strike teams/task forces/units are formed from allocated single resources as required.
2. Contribute to the development of the Incident Action Plan	2.1 ***Incident Action Plan*** (***IAP***) for the current operational period is monitored and reviewed. 2.2 Input into incident objectives and operational strategies is provided. 2.3 Operations component of the IAP is developed in

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	accordance with operational procedures, safe work practices, agency workplace policies, industrial awards and agreements.
	2.4 Need for logistical support is determined and documented.
3. Manage operations	3.1 Site security is established in accordance with agency policies and procedures.
	3.2 Records of activities are kept in accordance with agency policies and procedures.
	3.3 Operations function is established to achieve objectives and tasks are delegated in accordance with a Level 2 incident.
	3.4 Operations requirements are identified and resources are sought to meet incident requirements.
	3.5 Operations personnel are briefed and tasks are allocated in accordance with the IAP.
	3.6 ***Resources*** are deployed in accordance with the IAP
	3.7 Operations progress is monitored against the IAP and operational activities are adjusted as required throughout the incident.
	3.8 Operational effectiveness is regularly reviewed and required changes to operational structure, available resources and logistical support are determined and communicated to Incident Controller.
	3.9 Operations resources are managed in accordance with agency workplace policies.
	3.10 Safe work practices, health and welfare arrangements for work area are implemented and monitored.
	3.11 Agreed protocols are followed when managing personnel from other agencies.
	3.12 Action is taken to protect and preserve incident scene in accordance with agency policies and procedures.
	3.13 Staging areas are established and maintained, where required.
4. Establish effective communications	4.1 Incident Communications Plan is implemented, monitored and reviewed.
	4.2 Communication is maintained with incident personnel.
	4.3 Current and emerging operational risks are communicated to personnel.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.4 Communication is maintained with stakeholders and affected parties present at the scene. 4.5 Emerging or anticipated problems with incident communications are reported immediately.
5. Participate in the Incident Management Team	5.1 Incident Management Team (IMT) planning meetings are attended in accordance with Incident Controller's requirements. 5.2 Incident Controller is advised of incident situation, control progress and emerging risks in a timely manner. 5.3 IMT is kept informed of progress of operations plan and of operational requirements. 5.4 Advice is provided to IMT on provision of services and resources, and prioritisation of requirements. 5.5 Incident Controller is briefed on analysis of progress against the operations portion of the IAP as required. 5.6 Liaison with other members of the IMT is undertaken as required. 5.7 Regular information exchange is maintained with Planning Section and Logistics Section.
6. Monitor and review operations functions	6.1 Allocation and performance of resources are monitored and reviewed. 6.2 Incident reports are produced as required. 6.3 Operational briefings/debriefings are conducted as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse everyday situations both functionally and strategically
- communicate information
- conduct briefings and debriefings
- conduct assessment of operational activities
- contribute to development of IAP
- delegate
- lead teams
- make decisions

© Commonwealth of Australia, 2025 Public Skills Australia

- manage a team within a dynamic environment
- manage time effectively
- prioritise work tasks
- resolve conflict and negotiate effectively
- solve problems

Required Knowledge

- agency procedures for managing and concluding Level 2 incident operations
- agency arrangements for liaising with personnel from other agencies
- equipment and personnel capabilities for incident type
- interagency MOUs relating to incident type, and agency policies and procedures related to liaising with other organisations
- organisational communications policy and requirements
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- procedures for deploying and tasking personnel
- occupational health and safety (OH&S) agency risk assessment arrangements and safe work practices, health and welfare arrangements at incidents
- operational risk identification
- post incident procedures
- process for determining operational priorities
- processes for deployment and communication of the organisation's allocated tasks
- protecting and preserving incident scene and recording requirements
- resource management responsibilities and systems (safe deployment and recording)
- risk management processes and agency arrangements (including incident analysis), including contingency planning
- sectorisation of incident
- state/territory-based coordination arrangements
- state/territory emergency management legislation with particular emphasis on incident type
- team dynamics

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence	Assessment must confirm the ability to:

required to demonstrate competency in this unit	• establish and manage an Operations Section appropriate to the nature and complexity of the incident • task and apply resources to achieve resolution of the incident in accordance with the IAP and the principles of span of control • regularly communicate within the operational structure, and monitor and review progress towards achievement of IAP • implement response in accordance with organisational procedures and within bounds of authority • secure emergency/operations site • react to strategic changes within the environment • advise Planning Section and Incident Controller of incident situation, control progress and emerging risks • effectively liaise with Incident Controller and exchange information with the Planning and Logistics Section on a regular basis • develop and implement operations portion of the IAP for a Level 2 incident • establish and maintain staging areas for a Level 2 incident • log and record all actions and decisions • liaise effectively with the Incident Controller and other members of the IMT • work effectively with internal and external stakeholders • operate in a management role, effectively and efficiently delegating responsibility, monitoring performance, providing feedback and taking mitigation action to ensure completion of operations requirements at an incident. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to:

© Commonwealth of Australia, 2025 Public Skills Australia

	• Level 2 incidents or simulation of Level 2 incidents, in a multi-agency response environment • equipment, personnel, facilities appropriate to a Level 2 incident and within the bounds of responsibility as designated to the Operations Officer by the Incident Controller
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Principles of span control:	• Relate to the number of groups or individuals which one person can successfully supervise • Up to five reporting groups or individuals is considered desirable as this maintains a supervisor's ability to effectively task, monitor and evaluate performance
Incident Action Plan may include:	• Accommodation and welfare arrangements for incident personnel and affected people • Communications Plan • Incident objectives • Information on alternative or fallback strategies • Information plan for dissemination of information to all stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

	• Information regarding the necessary logistical arrangements • Management arrangements, including establishment of sectors and divisions • Maps or site plans of the incident • Medical Plan and consideration of OH&S issues • Resources to be allocated to each division and sector • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Structural chart depicting personnel in the incident management structure if established • Timings of meetings and changeovers • Traffic management
Resources may include:	• Aviation and marine vessels • Communication devices • Human (operations personnel) • Local • Machinery • Physical (equipment) • State/territory and federal governments • Support personnel • Technology devices • Vehicles • Volunteers
Operational briefings/debriefings may include:	• Critical incident stress debriefing • Operational analysis • Performance evaluations

PUAOPE024A Manage operations for a Level 3 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Fire specific prerequisite removed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to command operational personnel to achieve resolution of a Level 3 incident.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who perform the role of operations officer at a multi-agency Level 3 incident.

A Level 3 incident is characterised by degrees of complexity that may require the establishment of divisions for effective management of the situation. These incidents will usually involve delegation of all functions.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take command	1.1 Initial briefing including information to manage the operations requirements for the incident is obtained from Incident Controller. 1.2 Command is established and exercised in accordance with organisational authority and guidelines. 1.3 Commander details are communicated to internal personnel and to external authorities pertinent to the incident using a range of ***communication processes and systems.*** 1.4 Identify commanders under supervision within the Operations Section.
2. Establish command facilities	2.1 Appropriate ***command facility is established and operated*** in accordance with organisational guidelines. 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required, including ***support services.*** 2.3 Staging areas are established and maintained.
3. Establish a command structure	3.1 Command structure is established appropriate to the nature and complexity of the task/s undertaken by the organisation and the ***nature of the incident.*** 3.2 Command structure is expanded, contracted or modified in response to ***activities and controlled changes*** within the incident environment ***considering the nature, extent and potential of an***

ELEMENT	PERFORMANCE CRITERIA
	incident.
	3.3 Agreed protocols are followed when managing another agency's personnel.
4. Establish procedures to permit command to be exercised	4.1 Command structure is communicated to ***internal and external personnel and authorities/individuals*** who may have a regulatory interest applicable to the incident.
	4.2 Command information management system is implemented.
	4.3 Communication mechanisms and procedures are implemented between levels of command in accordance with organisational guidelines.
	4.4 Liaison is established and maintained to meet command requirements.
5. Contribute to the development of the Incident Action Plan	5.1 ***Incident Action Plan*** (***IAP***) for the current operational period is monitored and reviewed.
	5.2 Input is provided into incident objectives and operational strategies.
	5.3 Operations component of the IAP is developed in accordance with operational procedures, safe work practices, agency workplace policies, industrial awards and agreements.
	5.4 Need for logistical support is determined and documented.
6. Manage operations	6.1 Operations personnel are briefed and tasks are allocated in accordance with the IAP.
	6.2 IAP is implemented and modified as required, in accordance with organisational guidelines.
	6.3 Tactics to effectively manage the incident are identified in accordance with the operational portion of the IAP.
	6.4 ***Resources*** are deployed to ensure the IAP is implemented in accordance with organisational guidelines.
	6.5 Human and physical resources, including ***personnel support activities*** are effectively managed to achieve command plan outcomes.
	6.6 Significant changes in status and actions taken are reported using ***agreed reporting mechanisms*** and are consistent with organisational policies and procedures.
	6.7 Operations are redirected as required to meet

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	changes in conditions which affect the incident situation.
	6.8 Welfare of members of the public within the area of operations is addressed.
7. Conclude operations	7.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines.
	7.2 ***Operational debriefing*** requirements are met in accordance with organisational guidelines.
	7.3 Operational ***documentation*** is completed to organisation standards.
	7.4 Reports are produced as required.
8. Review operations	8.1 Plans and guidelines are evaluated and reviewed.
	8.2 Effectiveness of command and interaction with control is evaluated and documented.
	8.3 Reports are produced and communicated in accordance with established protocols.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse emergency situations both functionally and strategically
- conduct assessment of operational activities
- deploy human and physical resources effectively and efficiently
- liaise effectively with Incident Controller
- select, prioritise, implement and evaluate appropriate strategies
- react to changes within the emergency environment
- use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems etc

Required Knowledge

- agency procedures for managing and concluding Level 2 incident operations
- agency arrangements for liaising with personnel from other agencies
- interagency MOUs relating to incident type, and agency policies and procedures related to liaising with other organisations
- organisational communications policy and requirements
- procedures for deploying and tasking personnel
- determining operational priorities

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency site layout
- identification and correct use of equipment
- occupational health and safety (OH&S) agency risk assessment arrangements and safe work practices, health and welfare arrangements at incidents
- operational risk identification
- organisational command structure
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- processes and procedures
- post incident procedures
- processes for deployment and communication of the organisation's allocated tasks
- protecting and preserving incident scene and recording requirements
- resource management responsibilities and systems (safe deployment and recording)
- risk management processes and agency arrangements (including incident analysis), including contingency planning
- sectorisation of incident
- security and confidentiality of material
- state/territory-based coordination arrangements
- state/territory emergency management legislation with particular emphasis on incident type

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communication processes and systems may include:	• Communication responsibilities of personnel • Data transfer • Designation of appropriate modes and channels of communication • Inter organisation liaison • Interpersonal communications • Radio communications • Telecommunications
Establishing and operating a command facility may include consideration of:	• Amenities • Climatic conditions • Communication modes • Environment • Equipment characteristics • Logistical operations • Parking • Proximity to incident • Security requirements • Site access and exit requirements • Size and type of structure • Special incident requirements • Support services • Topography
Support services may include:	• Emergency agencies • Equipment suppliers • Community service organisations • Contractors • Gas and power agencies • Land management agencies • Medical organisations • Transport

© Commonwealth of Australia, 2025 Public Skills Australia

Nature of the incident (imminent or actual) may include:	• Water
	• Welfare and counselling organisations
	• Biological
	• Civil/political events such as:
	  • civil unrest
	  • economic
	  • eco-terrorism
	  • enemy attack
	  • financial collapse
	  • general strike
	  • hostage situation/s
	  • sabotage
	  • strikes
	  • terrorism
	• Fire (forest, range, urban)
	• Natural events such as:
	  • avalanche snow/ice/hail
	  • drought
	  • dust/sand storms
	  • earthquakes/land shifts
	  • extreme heat/cold
	  • fauna rescue (e.g. marine life rescue)
	  • flood/wind driven water
	  • hurricane/typhoon
	  • landslide/mudslide
	  • lightning storm
	  • search and rescue
	  • tornado/cyclone
	  • tsunami
	  • volcanic eruption
	  • windstorm/tropical storm
	• Technological/industrial events such as:
	  • bio-hazards
	  • building/structure collapse
	  • business interruption
	  • dam/levee failure
	  • explosions/fire
	  • extreme air pollution
	  • fuel/resource shortages
	  • hazardous material releases

© Commonwealth of Australia, 2025 Public Skills Australia

	• power/utility failure • radiological accidents • transportation accidents
Activities and controlled changes include:	• Communications • Logistics • Operations • Planning
Considering the nature, extent and potential of an incident may include:	• Risk to life • Risk to environment • Risk to property • Demography • Hazard agent location • Potential for changes in situation • Resource availability • Scope and scale of incident including likely duration of incident • Speed of onset • Topography • Weather
Internal and external personnel and authorities may include:	• Ancillary organisations • Clients • Emergency management specialists • Emergency organisations • Government and semi government authorities and departments • Higher authorities • Media • OH&S specialists • Operational personnel • Public • Service providers • Victims • Witnesses • Other analysts and stakeholders
Information management system may include:	• Audio and visual recording mechanisms • Data receival • Public/media information dissemination • Procedures and protocols • Recording • Recording and documenting of incident • Security and authorisation assignment • Storage and dispatch modes

© Commonwealth of Australia, 2025 Public Skills Australia

	• Types of technology - electronic data exchange devices
Incident Action Plan may include:	• Accommodation and welfare arrangements • Change over procedures • Communications Plan • Incident objectives • Integrity of evidence • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical arrangements • Management arrangements, including establishment of sectors and divisions and site security • Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of OH&S issues • Resources to be allocated to each division and sector • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Structural chart depicting the personnel in the incident management arrangements, including establishment of sectors and divisions • Timings of meetings and changeovers • Traffic management
Resources may include:	• Aviation and marine vessels • Communication devices • Human (operations personnel) • Local, state/territory and federal governments • Machinery • Physical (equipment) • Support personnel • Technology devices • Volunteers • Vehicles
Personnel support activities may include:	• Catering • Rest/relief counselling services • Sanitation • Shelter • Stress management services
Agreed reporting	• Authorisation

PUAOPE025A Manage planning for a Level 2 incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Fire specific prerequisites removed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to collect, analyse and disseminate information and to develop plans for the resolution of a medium sized incident.

A person performing this role has the title of Planning Officer and is delegated responsibility by the Incident Controller. This person supports the Incident Controller (and Operations Officer and Logistics Officer) and provides strategic advice to the Incident Management Team (IMT).

Level 2 incidents are complex either in size, resources or risk. They are characterised by the need for:

- deployment of resources beyond initial response

OR

- sectorisation of the incident

OR

- establishment of functional sections due to the levels of complexity (e.g. operations and planning)

OR

- a combination of the above

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to Planning Officers responsible for:

- provision of strategic advice and support to the IMT

© Commonwealth of Australia, 2025 Public Skills Australia

- collection, interpretation and processing of incident intelligence in various forms that meets the needs of end users (enabling public warnings, incident predictions, likely impacts and control strategies)
- preparation and dissemination of the plans and strategies that are to be used in controlling the incident
- collection and maintenance of information about the resources allocated to the incident
- provision of management support services
- development and implementation of a Communications Plan, as required, in consultation with the Logistics Section

The authorisation to perform this role is subject to organisational policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish planning section	1.1 Initial briefing including information required to manage the planning requirements for the incident is sought and obtained from Incident Controller. 1.2 Current and forecast operational activities and resource levels are determined. 1.3 Planning Section objectives and tasks are identified.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Planning structure appropriate to ***nature of the incident*** is developed and required planning resources are identified and obtained. 1.5 Planning Section units are established, tasks are delegated and briefings are given to delegated personnel. 1.6 Safe work practices, and health and welfare arrangements for work area are implemented and monitored.
2. Manage Planning Section	2.1 Planning requirements are reviewed and adjusted as required throughout the incident. 2.2 Workload and progress are monitored. 2.3 Planning Section meetings are conducted as required. 2.4 Communications Plan is developed, reviewed and implemented as necessary. 2.5 Records are kept of resources requested, en route, allocated to, and released from the incident. 2.6 ***Maps and schematic plans*** are produced to meet incident requirements . 2.7 Document management and record keeping systems are established in accordance with agency requirements. 2.8 ***Log of activities*** is kept. 2.9 ***Management support services*** are provided in a timely and effective manner as requested. 2.10 Incident risk management plans is developed.
3. Collect and evaluate information on the current and forecast situation	3.1 Information sufficient for incident prediction is collected regarding the current incident situation. 3.2 Incident predictions and options analysis covering ***new and emerging risks*** are provided using appropriate models. 3.3 ***Specialist technical information*** and incident behaviour predictions are provided to the IMT. 3.4 Procedures to identify, mitigate and monitor all risks related to the incident are established. 3.5 Current and predicted key risk exposures are identified and impacts are mitigated where possible. 3.6 Effectiveness of risk mitigation strategies is monitored and strategies are adjusted as required.
4. Disseminate information on the current and	4.1 Incident information services are provided as appropriate to incident personnel, the media and the

ELEMENT	PERFORMANCE CRITERIA
forecast situation	public. 4.2 Information is provided to the IMT relevant to controlling the incident and potential safety issues. 4.3 Information display boards are ***prepared and maintained.*** 4.4 Information regarding the extent of the impact of the incident on community and stakeholders is communicated in a manner suitable to community and stakeholders. 4.5 Information provided to the media is current, timely to meet media needs, and is consistent with incident requirements and local knowledge. 4.6 Organisational requirements for media liaison are applied. 4.7 Collected information is sorted into ***categories.*** 4.8 Information sharing and transition arrangements with recovery agencies are established and maintained.
5. Prepare incident action plan and brief IMT	5.1 Options and recommendations for objectives and strategies for controlling the incident are developed in consultation with the IMT and are produced for IMT consideration. 5.2 Risks and likely outcomes associated with preferred and alternative incident objectives and strategies are specified. 5.3 Incident Controller and other IMT members are briefed, and incident objective and strategies are determined by the Indent Controller. 5.4 ***Incident Action Plan*** (***IAP***) is prepared for the subsequent operations period and is distributed/disseminated on time. 5.5 Recovery and changeover plans are developed to tie in with the IAP. 5.6 Plans developed are in accordance with agency workplace policies, industrial awards and agreements.
6. Participate in the IMT	6.1 IMT planning meetings are scheduled and conducted in accordance with the Incident Controller's requirements. 6.2 IMT is kept informed of current and predicted incident situation and progress towards incident objectives and strategies.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.3 Specialist information requirements are obtained and provided as required by the IMT. 6.4 Strategic advice is provided to the IMT based on interpretation of information received. 6.5 Incident Controller is briefed on analysis of progress against IAP as required. 6.6 Liaison with other members of the IMT is undertaken as required.
7. Monitor and review planning functions	7.1 Allocation and performance of resources is monitored and reviewed. 7.2 Incident reports are produced as required. 7.3 After action reviews and post incident analyses are initiated and/or participated as required. 7.4 ***Briefings***/***debriefings*** are conducted as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- conduct meetings and prepare agendas
- delegate units within the planning section
- manage a team within a dynamic environment
- prepare, present and communicate information
- resolve conflict and negotiate

Required Knowledge

- agency workplace policies (e.g. EEO, anti-discrimination legislation, occupational health and safety) and procedures and welfare arrangements
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- briefing/debriefing processes and requirements
- communication requirements for stakeholders, government, other agencies and community
- establishing processes for monitoring and reviewing the IAP for a Level 2 incident
- incident action planning process for a Level 2 incident
- incident documentation and management of information
- industrial awards and agreements, and agency personnel practices and guidelines
- interagency MOUs relating to incident type

© Commonwealth of Australia, 2025 Public Skills Australia

- meeting protocols and procedures
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's protocols relating to media liaison e.g. confidentiality, libel, discrimination and accuracy
- requirements of a Planning Section facility
- resource management responsibilities and systems
- risk management processes and arrangements (including incident analysis)
- state/territory emergency management legislation, policy, procedures and interagency memorandums of understanding

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- collect, evaluate and disseminate information on the current and forecast situation
- prepare and disseminate the IAP
- establish a Communications Plan for the incident (a portion of the IAP)
- maintain a resource management system recording the status of resources allocated to the incident
- manage technical specialists
- liaise effectively with the Incident Controller and the Logistics Officer
- work effectively as a member of an IMT to resolve an incident
- provide management support services
- log and record all actions and decisions
- operate in a management role, effectively and efficiently delegating responsibility, monitoring performance, providing feedback and taking mitigation action to ensure completion of planning requirements at an incident

Consistency in performance

Competency should be demonstrated over time in a

© Commonwealth of Australia, 2025 Public Skills Australia

	range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or simulated workplace environment. **Specific resources for assessment** Access is required to: • equipment, personnel, facilities appropriate to a Level 2 incident and within the bounds of responsibility as designated to the Planning Officer by the Incident Controller
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Nature of the incident (imminent or actual) may include:	• Biological
	• Civil/political events such as:
	  • civil unrest
	  • economic
	  • eco-terrorism
	  • enemy attack
	  • financial collapse

© Commonwealth of Australia, 2025 Public Skills Australia

- general strike
- hostage situation/s
- sabotage
- strikes
- terrorism

- Fire (forest, range, urban)
- Natural events such as:
  - avalanche snow/ice/hail
  - drought
  - dust/sand storms
  - earthquakes/land shifts
  - extreme heat/cold
  - fauna rescue (e.g. marine life rescue)
  - flood/wind driven water
  - hurricane/typhoon
  - landslide/mudslide
  - lightning storm
  - search and rescue
  - tornado/cyclone
  - tsunami
  - volcanic eruption
  - windstorm/tropical storm
- Technological/industrial events such as:
  - bio-hazards
  - building/structure collapse
  - business interruption
  - dam/levee failure
  - explosions/fire
  - extreme air pollution
  - fuel/resource shortages
  - hazardous material releases
  - power/utility failure
  - radiological accidents
  - transportation accidents

Maps and schematic plans may include:

- Briefing maps
- Display board maps
- Geospatial information systems
- Incident plan maps
- Incident prediction
- Locality maps

© Commonwealth of Australia, 2025 Public Skills Australia

	• Sector/division • Traffic plan
Log of activities may include:	• Critical decisions • Event or running log • Radio communication printouts
Management support services may include:	• Administrative support • Computer operators • Radio • Telephone
New and emerging risks may include:	• Economic • Environmental • Political • Public safety • Social
Specialist technical information may include:	• Advisors with special skills needed to support incident activities and functions • Information sources available on site and remotely
Preparing and maintaining information display boards may include:	• Currency of information • Layout • Maps • Safety alerts • Timeliness of information
Categories may include:	• Control information • Current situation • Predicted situation • Transition to recovery
Incident Action Plan may include:	• Accommodation and welfare arrangements for incident personnel and affected people • Communications Plan • Incident objectives • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical arrangements • Management arrangements, including establishment of sectors and divisions • Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of occupational health and safety issues • Resources to be allocated to each division and sector

© Commonwealth of Australia, 2025 Public Skills Australia

Briefings/debriefings may include:	• Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies and tactics for divisions and sectors to achieve defined incident objectives • Structural chart depicting the personnel in the incident management arrangements, including establishment of divisions and sectors • Timings of meetings and changeovers • Traffic management • Transition to recovery arrangements • Alternative strategies and the economic, social, public health, cultural, historical and environmental risks associated with each • Arrangements for record keeping • Arrangements in place to facilitate planning function • Current and expected resourcing at the incident • Current and projected situation • Current arrangements for information dissemination • Current incident objectives, strategies and their rationale • Key risk exposures • Opportunity to clarify understanding

PUAOPE026A Provide strategic safety advice at an incident

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to provide advice to the Incident Controller on issues related to safety, health and welfare at an incident.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a person who is appointed to the role of Safety Advisor and is required to provide strategic advice to an Incident Controller in relation to safety, health and welfare risks, issues and requirements at an incident.

The authorisation and authorities to perform this role are subject to organisational policies and procedures.

Note: Safety Advisors may be appointed to a Level 2 or Level 3 Incident Management Team (IMT). Strategic safety issues or potential problems affecting one or more sections of the incident need to be raised and discussed at the IMT as early as practicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to the safety, health and welfare of all personnel involved in an incident	1.1 ***Initial briefing*** and regular updates are obtained from Incident Controller. 1.2 Safety Unit priorities are obtained and confirmed with Incident Controller throughout an incident. 1.3 Requirements for safety, health and welfare in incident management are identified. 1.4 Safety, health and welfare of operational and other associated personnel is monitored and reviewed throughout an incident. 1.5 Information relating to safety, health and welfare is collected, collated and analysed. 1.6 Predictions and forecasts are made about the safety, health and welfare environment of an incident and components contributing to that environment are identified. 1.7 Mitigation strategies for risks that may not have been controlled elsewhere in the planning process are identified and developed. 1.8 Extant and potential safety roles are identified. 1.9 Overview of the adequacy of ***procedures*** related to safety is maintained. 1.10 Meetings and briefings are monitored for adequacy of safety and health information.
2. Provide advice to relevant personnel on mitigating safety, health	2.1 ***Relevant personnel*** are immediately informed of any action or condition that has the potential to place any person's life or safety at risk.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
and welfare risks	2.2 Mitigation actions are recommended as appropriate, where actions or conditions have the potential to place any person's life, safety, health or welfare at risk. 2.3 Work is undertaken with relevant personnel to ensure safety, health and welfare issues are considered and addressed. 2.4 Occupational health and safety (OH&S) advice is provided and outcomes of that advice are documented. 2.5 Incident Controller is alerted to unsafe work practices and alternative strategies/mitigations are suggested.
3. Manage the Safety Unit	3.1 Safety Unit is established in accordance with Incident Controller's direction and the perceived risk profile of the incident. 3.2 Structure of the Safety Unit is adjusted during the incident to meet the predicted and actual safety demands of the incident. 3.3 Log of activities is maintained. 3.4 Performance of the Safety Unit is designed, activated and monitored in accordance with the requirements of the organisation and the demands of the incident. 3.5 Operational plans are produced for the Safety Unit and Safety Unit members are briefed on their responsibilities in meeting the outcomes of the plan. 3.6 Work undertaken by Safety Unit members is supervised, monitored and reviewed. 3.7 Demobilisation of the Safety Unit is planned. 3.8 Handover briefings are prepared and delivered.
4. Contribute to the planning processes	4.1 ***Meetings***, briefings and debriefing sessions are attended and participated in as required. 4.2 Liaison is undertaken with the IMT to produce a safe operational plan. 4.3 Safety related input is provided to the development of the ***Incident Action Plan*** (IAP) in relation to incident safety. 4.4 Relevant sections of the IAP are contributed to and/or ***reviewed*** as they are developed. 4.5 Participation in the development and dissemination of ***specific plans*** is undertaken as required.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. Support the management of safety event	5.1 Initiation of initial investigation/analysis of ***safety event*** is ensured. 5.2 Interaction is maintained with relevant personnel during/following a safety event. 5.3 Monitoring of safety, health and welfare requirements across an incident is maintained to ensure routine requirements are being met and to ensure unusual or unexpected situations or circumstances are not missed in the preparation and implementation of incident plans. 5.4 Passing on of information to the Incident Controller in relation to safety event investigations that take place on the incident ground and any impact investigations may have on operations is ensured. 5.5 Information relating to safety event cause and immediate and future mitigations is passed on to Incident Controller, Section and/or Unit Leader/s as appropriate. 5.6 Hazards and risks associated with the safety event are analysed to determine if appropriate control strategies have been identified and adequate mitigations have been put in place. 5.7 Development and submission to management of initial safety event report and recommendations for the prevention of similar occurrences is ensured. 5.8 Inclusion of any appropriate follow up actions required for safety events in demobilisation and recovery plans is ensured. 5.9 Implementation of safety recommendations arising out of a safety event investigation are implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply relevant legislation, codes, policies, procedures and systems
- conduct risk management under severe time constraints
- delegation
- ensure administrative requirements for the Safety Unit are met
- identify potential issues and maintain a strategic focus

© Commonwealth of Australia, 2025 Public Skills Australia

- identify safety risks
- maintain focus on safety under conditions of high operational demand
- manage the Safety Unit's workload (including numbers and type of staff needed)
- practise leadership and management strategies
- provide briefings to the IMT
- supervise staff

Required Knowledge

- agency workplace policies, practices and procedures
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- general OH&S principles, in particular the principle that each individual, as well as the organisation, has a shared responsibility for workplace safety
- methods of monitoring safe work practices at incidents such as:
- establishment of staging area and check-in procedures
- assessment of strategies and tactics
- operational procedures, practices and implementation
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- protocols to be observed when present on an incident ground
- relevant OH&S legislation
- risk management process
- roles of Safety Unit members
- safety event investigation during incidents
- span of control
- work requirements of AIIMS sections, units and risks associated with their activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • conduct an assessment of the emerging hazards and risks at an incident and identify issues relating to the safety, health and welfare of personnel and actions required to mitigate those risks • analyse operational plans for potential to

© Commonwealth of Australia, 2025 Public Skills Australia

	compromise safety • record observations and recommendations and report regularly on safety issues to the Incident Controller and members of the IMT • manage people, information and resources. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environment or in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • incidents or simulation of incidents, in a multi-agency workplace environment • risk management and safety tools and systems used to support the role of the Safety Advisor such as aide memoirs, technical data sheets, databases • deployment of technical or industry specialists to scene • proforma checklists - action, briefing and safety
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial briefing may include:	• Current situation • Objectives and strategies • Potential OH&S issues • Potential public health and environmental risks
Procedures may include:	• Communication and warning systems • Risk management procedures • Skills and training of personnel prior to deployment to any task or role at an incident • Appropriate supervision of all personnel working in and around the incident • Incident and safety information provided to incident personnel • IAP development process • Reporting of accidents and near-misses • Suitability of protective clothing and equipment prior to deployment • Internal auditing of systems
Relevant personnel may include:	• Incident Controller • IMT • Line supervisor • Officers representing other agencies and support organisations • Operational personnel • Personnel involved in, or affected by a health, safety or welfare incident • Section managers • Unit managers/leaders
Meetings may include:	• IAP planning meetings • IMT meetings
Incident Action Plan may include:	• Accommodation and welfare arrangements • Communications Plan • Incident control structure, including establishment of sectors and divisions • Incident objectives • Information on alternative or fallback strategies • Information Plan for dissemination of information to all stakeholders • Information regarding the necessary logistical

© Commonwealth of Australia, 2025 Public Skills Australia

	arrangements • Management structure if established • Maps or site plans of the incident • Medical Plan and consideration of occupational health and safety issues • Resources to be allocated to each division and sector • Statement of current situation and predictions of the incident's likely development (including key risk exposures) • Strategies to achieve defined incident objectives • Timings of meetings and changeovers • Traffic management
Reviewing relevant sections of the Incident Action Plan includes:	• Ensuring IAP can be implemented effectively while catering for the health, safety and welfare requirements of the incident • Monitoring the effectiveness of mitigations • Reporting to the Incident Controller and other appropriate members of the IMT on safety issues and investigations
Specific plans may include:	• Catering plans • Communication plans • Division and Sector plans • Facilities plans • Fatigue management plans • Medical plans • Recovery plans • Resource management plans • Traffic and transport plans
Safety event may include:	• Accident • Breach of safety requirements/procedures • Near miss/hit • OH&S incident including accidents, injuries and near-misses

PUAOPE027A Undertake beach safety management activities

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to coordinate beach surveillance and rescue as a part of a structured service.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers coordination of surveillance and rescue alone or as a part of a team in a beach/surf/open water environment.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations where a structure beach surveillance and rescue service is supplied.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised t***ext is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for beach surveillance and rescue	1.1 ***Duty information*** is obtained. 1.2 ***Beach information and weather forecasts*** are accessed and ***likely conditions*** are considered. 1.3 Availability of ***appropriately skilled personnel*** is ensured to meet likely conditions and ***organisational requirements.*** 1.4 Pre-use check of ***equipment*** is completed in accordance with organisational procedures.
2. Undertake preventative actions	2.1 ***Beach and surf conditions*** are evaluated. 2.2 Safest swimming location is determined and signage is erected in accordance with Australian Standards. 2.3 Equipment availability is ensured and ***appropriately located*** to meet likely need and organisational requirements. 2.4 ***Operational command*** is notified of availability for duty. 2.5 Public is proactively ***engaged*** to inform them of hazards.
3. Respond to casualties in distress	3.1 Casualties in distress are identified and/or information about casualties in distress is received from team members. 3.2 Incident details are gathered and risk assessment of casualties and incident is undertaken. 3.3 Appropriate rescue method is determined and appropriate rescue equipment is chosen as a result of this risk assessment. 3.4 Operational command is notified of rescue situation and continuous updates are provided as required. 3.5 ***Casualty rescue*** is undertaken or team member is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	directed to undertake casualty rescue. 3.6 Casualty management is coordinated. 3.7 Liaison is undertaken with emergency services as required. 3.8 Completion of casualty handover to ambulance personnel is ensured.
4. Complete beach surveillance and rescue recovery requirements	4.1 Operational command is notified of end of service provision. 4.2 Equipment is returned to storage and post-operational checks and maintenance are completed. 4.3 Personnel are debriefed as required. 4.4 Organisational documentation is completed as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and interpret data
- communicate effectively with colleagues and stakeholders
- coordinate a range of beach related issues/rescues
- identify rips
- identify wave types
- manage a range of situations in a calm, concise manner
- undertake a risk assessment

Required Knowledge

- Australian Standards in relation to signage and beach safety
- Australian Beach Safety and Management Program [ABSAMP]
- Bureau of Meteorology
- dangers associated with different wave types
- different types of beaches and associated hazards
- local government and by-laws
- organisational operating procedures and structure

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess beach conditions • plan safest swimming location • coordinate a rescue situation • set up for beach surveillance and appropriately locate signage and equipment **Consistency in performance** Competency should be demonstrated reviewing a range of beaches or range of conditions at the same beach.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed during patrolling activities or as a part of structured beach set-up and surveillance scenario. **Specific resources for assessment** Access is required to: • rescue equipment • patrol personnel • range of beaches with varying conditions
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Duty information may include:	• Hours of operations • Number of personnel available • Providing a lifesaving/lifeguard patrol service at one or multiple locations • Type of service provided
Beach information and weather forecasts may include:	• Australian Beach Safety and Management Program (ABSAMP) rating • Local knowledge • Bureau of Meteorology reports and weather warnings • Tide times
Likely conditions may include:	• Estimated beach attendance • Littoral currents (side sweeps) • Rip currents • Sandbars • Surf size • Temperature • Wave types and associated hazards
Appropriately skilled personnel may include:	• Self • Qualified according to organisational requirements • Team members
Organisational requirements may include:	• Standard operating procedures • Service agreements
Equipment may include:	• Automated External Defibrillator • First Aid Kit • Inflatable rescue boat (IRB) • Oxygen Resuscitation Kit • Personal water craft (PWC) • Radios • Rescue board • Rescue tube • Signage • Spinal board
Beach and surf conditions may include:	• Choppy/calm water • Rip currents • Surf size

© Commonwealth of Australia, 2025 Public Skills Australia

	• Wave types
Appropriately locating equipment to meet likely need may include:	• Locating rescue equipment at start of rip • Making first aid equipment available at central location • Situating rescue powercraft in a location clear of swimmers for safe launching
Operational command may include:	• Local supervisor • Remote communications centre
Engaging the public proactively may include:	• Directing bathing public back to safe swimming area through use of gestures • Explaining safest swimming location and hazards to beach going public • Making public announcements using address system/load hailer

Casualty rescue includes:	• Negotiating the surf to reach the casualty
	• Securing the casualty
	• Returning the casualty to shore
	• Providing first aid
	• And may include use of:
	  • IRB
	  • no equipment
	  • PWC
	  • rescue board
	  • rescue tube

PUAPOL014B Manage performance/behavioural issues

Modification History

Release	TP version	Comments
3	PUA12 v1.1	Unit Descriptor and Application updated.
2	PUA12 v1	Layout adjusted.
1	PUA00 v8.1	Primary release.

Unit Descriptor

This unit covers the competency to develop and implement intervention strategies to address and manage performance/behavioural issues.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application for this unit has not been fully developed. It will be reviewed as part of the process of implementing the Design Model for Streamlined Training Package Material.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify performance/ behavioural issues	1.1 The performance/behavioural issue is defined and documented in accordance with legislative and organisational policy and procedures 1.2 Opportunities are provided and staff are encouraged to discuss performance/behavioural issues which affect their work 1.3 The ***scope of performance***/***behavioural issue*** and all available factors are determined and analysed 1.4 An informed and verifiable assessment is made regarding appropriate further action or need for ***referral***
2. Determine intervention strategy(s)	2.1 ***Aims and objectives of the intervention*** are identified to set direction 2.2 A collaborative or directive approach is adopted where appropriate to define action plan/outcomes sought 2.3 Opportunities are taken to reinforce the individual's responsibility for their decisions and actions 2.4 An ***intervention strategy*** is agreed which is the best fit for the performance/behavioural issue being addressed
3. Implement the intervention strategy(s)	3.1 The chosen intervention strategy/procedures are implemented in accordance with legislation and organisational guidelines and procedures 3.2 Implementation is progressed in a manner which demonstrates confidentiality, impartiality, ethics, integrity and leadership 3.3 Intervention strategy is modified to address contingencies as these arise 3.4 Sequencing and timing of action reflects what was agreed in the intervention strategy
4. Monitor and review outcomes of the intervention strategy	4.1 Outcomes of the intervention strategy are monitored and reviewed against identified aims/objectives 4.2 Appropriate action is taken regarding the need for

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	further individual or organisational intervention
	4.3 Post-intervention procedures are completed in line with organisational policy and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating
- resolving conflict
- mediating and negotiating
- counselling
- solving problems
- feedback skills

Required Knowledge

- legal and ethical guidelines for performance management
- organisational grievance
- complaints and disciplinary guidelines and procedures
- organisation's performance enhancement model guidelines

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in accurate identification of the performance/behavioural issue and the relevance of the intervention strategy adopted to address the issue identified. **Consistency in performance** Evidence of competency should be assessed over time in a range of performance/behavioural management contexts.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

© Commonwealth of Australia, 2025 Public Skills Australia

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of the performance or behavioural issue may include:	• source • nature or type • impact or extent
Referrals may be made to:	• welfare officer • social worker • counsellor • medical practitioner • internal investigation • immediate report • senior management
Aims and objectives of the intervention strategy are:	• to achieve a logical conclusion in minimising workplace impact by identifying the nature of the performance/behavioural issue and addressing its source
Intervention strategies may include:	• grievance procedures • issue resolution • mediation • negotiation • disciplinary action • complaints procedures • conflict resolution • counselling

PUAPOL017B Plan and develop strategies to support organisational policy

Modification History

PUAPOL017B Release 3: Unit descriptor and Application updated.

PUAPOL017B Release 2: Layout adjusted. No changes to content.

PUAPOL017B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to translate policies into strategic plans to ensure the organisation's policies are realised.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application for this unit has not been fully developed. It will be reviewed as part of the process of implementing the Design Model for Streamlined Training Package Material.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain and evaluate planning information	1.1 ***Information requirements*** are identified accurately and re-evaluated at regular intervals 1.2 Information is collected in time to be of use 1.3 A variety of ***sources of information*** are regularly scanned for usefulness, reliability and cost 1.4 Opportunities are taken to identify, establish and maintain contacts with those who may provide useful information 1.5 The needs of clients are researched, confirmed and assessed 1.6 Alternative methods of collecting information are identified and utilised when normal information routes are blocked 1.7 Information is collated and organised into a form to optimise planning 1.8 Conclusions drawn from relevant information are based on reasoned argument and appropriate evidence
2. Forecast trends and developments which affect service delivery goals	2.1 ***Forecasts*** are based on the best information available within given constraints of cost and time 2.2 Assessments of future ***trends*** and developments are made at appropriate time, on a regular basis, and prior to planning 2.3 The assumptions made and degree of certainty are clearly stated 2.4 The ***impact of the relevant trends*** on the operations of the area of control are clearly illustrated 2.5 The forecasts provide suitable quantitative information for taking decisions on resource allocation 2.6 ***Review systems*** are used to identify and evaluate service needs in area of control 2.7 ***Risk management*** aspects are calculated and included in planning
3. Coordinate planning	3.1 ***Networks*** are established as required to ensure all

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	stakeholders are informed and involved
	3.2 ***Stakeholders*** who may be affected by strategies developed are included in the planning process
	3.3 Strategies are communicated to appropriate personnel
	3.4 The work of stakeholders is coordinated to ensure efficiency and effectiveness
4. Develop strategies to support organisational goals	4.1 Outcomes of planning are consistent with the organisational goals and policies
	4.2 Outcomes are realistic and measurable and indicate the criteria to be used in measuring performance
	4.3 ***Implications for resource*** acquisition and allocation are realistically calculated and clearly presented
5. Negotiate and secure agreement for strategies	5.1 Negotiations are conducted ethically
	5.2 Concessions made remain consistent with the original intentions and with the objectives of the organisation
	5.3 ***Communication channels*** are kept open whilst additional support, arguments or further evidence is obtained when agreement is not immediately possible
	5.4 Agreements which have wider implications for the organisation are considered and relevant stakeholders are advised and consulted
6. Provide professional and technical direction and advice	6.1 Professional and technical advice is provided either on request or where it will improve the quality of strategic decisions
	6.2 Professional and technical advice is provided in a timely manner
	6.3 Personal preference or opinion offered is clearly distinguished from professional or technical advice
	6.4 Interests are declared when the interests of the manager's own area affect the advice given
7. Establish/revise systems for future service delivery	7.1 Monitoring systems are established to provide feedback information for future planning
	7.2 Information is disseminated to appropriate personnel and relevant stakeholders in a timely manner and appropriate format

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- research
- analyse and interpret information
- forecasting
- trend analysis
- establish networks
- communicate
- negotiating

Required Knowledge

- organisational policy
- organisation review systems
- risk management principles
- organisational information sources

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the ability to develop strategies that accurately reflect organisational policies and facilitate the realisation of policy objectives. **Consistency in performance** Evidence will need to be gathered over time in an actual or simulated work environment.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Public Skills Australia

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information sources may include:	• departmental information • computer information systems • intelligence • community information • other organisations
Information requirements are:	• accurate • timely • concise • current • format that can be used • easy to obtain
Community requirements may include:	• surveys • crime statistics • community concern • public press • representations - members of parliament, community leaders • departmental policy
Information presentation may include:	• computerised systems • local information systems • intelligence systems
Forecast trends may include:	• crime statistics • compare with similar areas • trends in crime • social changes • population demographics
Impact of trends may include:	• type of crime • time of crime • area of crime • frequency of crime • impact on community • planning implications • surrounding areas crime trends • strategies in surrounding areas that may impact
Review systems may include:	• regular feedback from patrols and clients • crime statistics trends • effect of strategies on surrounding areas • client satisfaction

© Commonwealth of Australia, 2025 Public Skills Australia

Risk management:	• cost benefit
Networks may include:	• peers • other patrols formal/informal • specialist groups • community contacts • other organisations • other police services
Stakeholders may include:	• department • community • government bodies • other organisations • other police services
Communication channels may include:	• formal and informal • written • verbal/written • verbal • departmental policy • client need to know
Resource implications may include:	• finances • personnel • equipment • specialist groups • other organisation involvement • joint operations
Review systems may include:	• feedback reports - verbally or written • department requirements • statistics • outcomes against expected outcomes • client satisfaction • personnel satisfaction

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify organisational objectives	1.1 Organisational objectives are identified for the specific service delivery objectives 1.2 Specific performance targets against delivery objectives are identified and set 1.3 Quality of outcomes are identified and agreed upon 1.4 ***Financial viability*** of proposed outcomes is assessed 1.5 Core values, principles and aims are matched against proposed strategies 1.6 ***Performance indicators*** to evaluate the effectiveness and efficiency of service delivery are established
2. Establish service profile and conduct resource audit	2.1 Existing service is reviewed to identify the strengths and weaknesses, achievements and problems 2.2 Core services to be reflected in the business plan are identified and are used to inform the plan's outcomes 2.3 The organisation and management of the workforce is examined and matched to the resource requirements 2.4 Financial resources and unit costs are identified and committed 2.5 Physical resources, plant and equipment are identified and committed
3. Analyse client needs and expectations	3.1 Clients and their needs are identified 3.2 ***Demographic trends/issues*** which may impact on service delivery are identified
4. Establish staffing requirements	4.1 Staffing levels and skill requirements are identified 4.2 Training programs to develop competence in business planning are identified, developed and implemented 4.3 Changes in productivity related to pay and conditions of service are recognised 4.4 EEO and OH&S policies and practices are identified and implemented 4.5 Changes in the workplace and to client's needs are managed and responded to
5. Seek approval of the	5.1 The business plan is approved by senior

ELEMENT	PERFORMANCE CRITERIA
plan	management and the CEO of the organisation 5.2 The business plan, strategy and outcomes are communicated throughout the workforce and to relevant external organisations
6. Monitor, evaluate and update the business plan	6.1 Performance criteria and targets are measured against business plan outcomes 6.2 The outcomes are reviewed and the business plan is adjusted 6.3 Reports to management and feedback to management, persons involved and clients are provided

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- write strategic outcomes and objectives
- survey client needs
- conduct a SWOT analysis
- prepare budgets
- prepare a resource inventory
- manage change
- communicate

Required Knowledge

- organisational strategic plan
- organisational mission statement
- 'code of ethics and conduct'
- SWOT analysis
- EEO and OH&S policies and practices
- the organisation's core services

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate	It is essential for this unit that competence be demonstrated in the business plan's reflection of the organisation's strategic objectives. It identifies outcomes

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use information-gathering techniques	1.1 ***Potential sources of information*** are identified and assessed 1.2 Identified sources of information are utilised 1.3 Information is obtained from identified sources, in accordance with organisational guidelines, Freedom of Information and Privacy legislation 1.4 ***Informants*** are cultivated and managed 1.5 Persons/locations of interest are monitored
2. Evaluate information	2.1 Elements of offence and coronial needs are identified 2.2 Persons/locations of interest are identified and profiles maintained 2.3 All potential intelligence/***evidence*** is identified from obtained information 2.4 The validity and integrity of the information is evaluated fairly and objectively 2.5 Relevant information is used to inform decision-making 2.6 Information is corroborated independently where possible
3. Respond to information	3.1 Information is placed into relevant information systems in accordance with organisational policy and procedures 3.2 Information is communicated to relevant areas 3.3 Security of information is maintained 3.4 Information gathered is responded to through immediate action or further inquiry or filing

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

© Commonwealth of Australia, 2025 Public Skills Australia

- written and oral communication (listening, establishing rapport, public relations, negotiation, conflict resolution, feedback)
- sourcing
- collecting and evaluating diverse pieces of information
- using information storage and retrieval systems
- classifying information
- validating information
- compliance with operational safety guidelines when dealing with informants
- identifying and managing informants
- disseminating information in appropriate forms

Required Knowledge

- organisational corporate goals and objectives
- legislation and organisational guidelines relevant to information collection
- storage and retrieval including FOI and Privacy legislation
- organisational guidelines for dealing with informants
- investigative processes
- including surveillance and intelligence processes pertaining to the area of investigational responsibility
- information sources
- security classification criteria and dissemination protocols
- information evaluation processes for establishing validity and reliability
- professional codes of conduct/ethics relating to the investigatory process

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the gathering of information that is accurate and relevant to the investigation. **Consistency in performance** Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Potential sources of information may include:

- internal (documents/databases, intelligence, specialist sections such as covert/surveillance policing, technical services and forensic services and other police)
- external (witnesses, victims/suspects/informants/ informers, government agencies and authorities, private agencies, literature, members of the public, surveillance)

Informants may be cultivated and managed in the following ways:

- researching background reliability
- communicating with persons at all levels
- recording information accurately
- displaying knowledge of specialist crime culture and terminology
- identifying motives of informants (these may include money, revenge, consideration of penalty, civic duty)
- controlling informants effectively
- registering informants correctly
- maintaining personal integrity
- anonymity and own counsel
- maintaining contact with informants regularly
- being self-motivated in cultivating informants

Evidence may include:

- direct
- circumstantial
- physical
- opinion
- documentary
- hearsay

Information systems are:

- either computer based or manual. What relevant information systems are depends on:
  - importance of information
  - sensitivity of information
  - reliability of information
  - where information is to be disseminated

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan a confiscation of assets operation	1.1 An appraisal is conducted to identify opportunities and limitations for asset forfeiture that is consistent with ***overall operational objectives***
	1.2 A ***plan*** is developed to confiscate assets in accordance with organisational policy, procedures, and ***legislation***
	1.3 Provisions for ***safe storage and maintenance*** of confiscated assets are made and incorporated into the plan
	1.4 ***Relevant personnel*** are consulted/informed of the plan of action and the plan is modified/confirmed as required to ensure it is consistent with the overall investigation
2. Confiscate assets	2.1 Collect, collate, and analyse information that identifies assets owned by target(s)
	2.2 ***Documentation*** is prepared in accordance with organisational policy, procedures, and legislation to ***locate and quantify assets***
	2.3 Material that identifies and quantifies assets is seized in accordance with organisational policy, procedures, and legislation
	2.4 Documentation is prepared in accordance with organisational policy, procedures, and legislation to ***seize or restrain assets***
	2.5 Operatives are briefed on their duties and involvement in the operation so that they clearly comprehended the message
	2.6 Assets are seized or restrained in accordance with organisational policy, procedures, and legislation
3. *Dispose of assets*	3.1 Documentation is prepared for disposal of assets in accordance with organisational policy, procedures, and legislation
	3.2 Seized material is disposed of in accordance with organisational policy, procedures, and legislation
	3.3 Relevant personnel are advised of the outcomes of the criminal assets investigation

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- written and oral communication skills (listening, negotiation, conflict resolution)
- planning
- coordination and leadership skills to lead a multi-agency personnel response
- presentation skills
- eliciting skills
- debriefing
- interpreting skills to interpret intelligence information
- logic and reasoning
- decision making and problem solving

Required Knowledge

- case officer's role
- operations in general
- organisational operational procedures and guidelines
- relevant legislation
- correct interpretation of all applicable laws, policy and procedures
- planning (appreciation) process
- written communication
- problem solving techniques
- unit and equipment capabilities and their application to a plan
- briefing techniques
- information management systems
- government and policy environments within which operations will be conducted
- available resources which may need to be deployed to support the operation, eg. security issues and classifications
- court procedures and evidentiary requirements in provision of briefs of evidence for use by the prosecution

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence in this unit must be established through the practical demonstration of skills in confiscating assets in accordance with organisational policy and legislation, and storing assets securely.

© Commonwealth of Australia, 2025 Public Skills Australia

Consistency in performance

Evidence of competency in this unit needs to be gathered over time and in a range of confiscation of assets contexts.

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Specific resources for assessment

Access to storage facilities for confiscated assets.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The term overall operational objectives relates to:	• an investigation or operation into a substantive offence/a part, of which involves an operation to seize or restrain assets
The ***plan*** would include:	• avenues of inquiry to be pursued • timings • investigative tools to be utilised such as search warrants • production orders and should cover pre and post interdiction as well as the execution phase of the operation
The legislation relating to confiscation of assets include:	• The Proceeds of Crime Act 1987 and the Customs Act 1901
Safe storage and maintenance provisions include:	• the provision for vehicles • vessels and other personal property • valuables such as jewellery and currency • maintenance of seized equipment or property • maintenance of premises
Relevant personnel to be informed of the plan include:	• the team leader of the overall investigation • other agencies involved in the investigation • Department of Public Prosecutions • ITSA
The documentation required to locate and quantify assets	• monitoring orders, production orders and search warrants pursuant to the Proceeds of Crime Act

© Commonwealth of Australia, 2025 Public Skills Australia

include:	1987
The documentation required to seize or restrain assets include:	• search warrants pursuant to the Proceeds of Crime Act 1987 • seizure warrants pursuant to the Customs Act 1901 restraining orders pursuant to the Proceeds of Crime Act 1987
A briefing should contain elements such as:	• evidence of the existence of a search/seizure warrant or details of the target • types of documents/assets to be seized • details of the target site • equipment required • rehearsals • timings of the operation • tasks to be completed prior to, during and after the operation • procedures of the securing of documentation/assets
Seized assets include:	• assets seized pursuant to the Proceeds of Crime Act 1987 • Customs Act 1901 or other appropriate legislation
Restrained assets include:	• assets include assets restrained pursuant to the Proceeds of Crime Act 1987 whether they are physically seized or not
The documentation required to dispose of assets include:	• correspondence with DPP and ITSA, confiscation and forfeiture orders pursuant to the Proceeds of Crime ACT 1987

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish project parameters	1.1 ***Strategic***, operational, and tactical projects are identified and prioritised to optimise resources
	1.2 ***Clients*** and stakeholders are identified and communication channels formalised to facilitate immediate and appropriate contact
	1.3 ***User expectations*** are established to formulate project objectives and outcomes
	1.4 Time frames for intelligence projects are established and agreed to reflect client needs and investigation deadlines
	1.5 Potential implications and constraints are identified and addressed in ***the project management plan***
	1.6 Client/stakeholders ownership is established to ensure involvement from the case officer and other ***users*** of the intelligence ***product***
	1.7 Terminology is defined to ensure a common understanding between those involved
	1.8 The project is compared to other current projects to determine its priority in terms of its scope, importance, and resource requirements
2. Develop a project management plan	2.1 The scope of the ***project*** is determined, including the linkages between different possible entities, to form the intelligence plan
	2.2 ***Models*** are developed to direct and inform intelligence activities
	2.3 Aims, objectives and key issues are identified
	2.4 ***Strategies*** to achieve the ***objectives*** are specified
	2.5 Communication channels between the ***operatives***, client, stakeholders and users are formalised to facilitate immediate contact
	2.6 Risk factors associated with the project are identified and strategies put in place to minimise risk
	2.7 Information is managed to facilitate its ready accessibility
	2.8 The project management plan is documented and approved

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Plan resource allocation	3.1 The ***resources*** required for the project are estimated as accurately as possible given available information 3.2 Negotiations are undertaken with decision-makers who have responsibility for resources to make them available when required 3.3 A resource plan seeking commitment to expend resources is clearly and concisely written for decision-makers

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral communication (listening, establishing rapport, negotiation, conflict resolution)
- written communication in preparing intelligence plans and documentation, tactical and resource plans, etc.
- resource management including budgetary, human and physical resources and allocation/access
- organisation and time management
- computer and information management
- gather, collate and record information
- operate safely as reflected

Required Knowledge

- correct interpretation of all applicable laws
- policy and procedures
- government and policy environments within which intelligence operations will be managed and political considerations which may impact
- agency goals and objectives
- information management systems and law enforcement databases
- possible client/users of the intelligence product and the different contexts in which this may be used
- different types of criminal activity and their elements eg. general crime, theft, burglary, assault, drugs, fraud, homicide, available resources which may need to be deployed to support the intelligence operation and negotiation strategies to access these
- security issues and classifications
- intelligence principles and a practical knowledge of case management systems and a range of contexts in which these can be applied, and evidentiary requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in a plan that reflects strategic objective and resource constraints.

Consistency in performance

Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities.

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The ***project management plan*** should include:

- the aims and objectives of the project
- the possible strategies available to achieve the objectives
- identified risk strategies, and costings
- It would also include reference to resources: the sources of the resources, their availability, limitations, and contingencies or alternatives
- The plan would include reference to strategies put in place to maintain or replace systems

Strategic includes:

- environmental scanning and identification of emerging issues and trends

Clients are:

- the persons or organisations requesting intelligence projects for whom completed projects are intended. Clients may be internal or external and can range from an individual to a group of people representing various levels of management from an intelligence unit, another section of the agency or multi-agency and multi-organisational group

© Commonwealth of Australia, 2025 Public Skills Australia

Users are:	• other people or organisations (not being the client) who may legitimately have access to and make use of the completed intelligence project • users may be internal or external
A ***project*** can:	• have a wide range of classifications ranging from classified through to highly classified • present a range of risks to the agency and/or client should confidentiality be breached • have routine through to unusual and unfamiliar aims and expectations • have simple through to complex parameters
User expectations include:	• the outcomes and anticipated levels of achievement of completed intelligence projects
Products can be:	• tactical or strategic, and can be formal or informal, written or oral, hard copy or electronic and of varying lengths
Objectives are:	• goals or outcomes that are realistic and measurable
Operatives may include:	• team members • clients • stakeholders and users
Strategies may include:	• identifying time frames • constraints • phases and methodologies for example: interviews, surveys, participant observation, content analysis
Resources may include:	• human • equipment/physical • financial information • information technology • intelligence • resources may be internal or external
Limitations may include:	• training needs • staff and equipment availability • computer access time • economic and financial considerations
Resource allocation decisions may be affected by:	• staffing and equipment levels of the analytical unit
Information sources may include:	• internal and external sources • individuals • groups • organisations

© Commonwealth of Australia, 2025 Public Skills Australia

Models may include:

- management of the collection
- collation and evaluation of intelligence information

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop an information collection plan	1.1 The type and quality of information required is identified to inform the ***collection plan***
	1.2 The most suitable ***information source*****(*s*)** is identified and briefed as to information required
	1.3 Potential information channels are identified to assist selection of the most suitable collection channel
	1.4 A clear, concise, and accessible information collection plan is written to inform operatives and users
2. Collect information	2.1 The type and quality of information required is identified and communicated clearly to information sources and collectors to facilitate desired outcomes
	2.2 ***Information*** is collected according to the methods outlined in the information collection plans
	2.3 Information is graded registered, recorded and stored according to organisational guidelines
	2.4 The Information Collection Plan is continually reviewed and amended as required to ensure a sound collection process
3. Collate information	3.1 Information is collated using methods which facilitate accessibility and rapid retrievability
	3.2 Gaps in gathered information are identified and steps taken to gather further pertinent information and give a better understanding of events
	3.3 The ***collation*** process is evaluated to determine what improvements can be made, and those improvements implemented
4. Evaluate information	4.1 The source of the ***information is evaluated*** to determine its reliability and value
	4.2 Previously collected information is ***re-evaluated*** in light of the most recently collected information to confirm a picture of events
	4.3 Invalid and/or irrelevant information is removed from further processing and retained to facilitate future reference

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral communication (listening, establishing rapport, negotiation, conflict resolution)
- written communication in preparing intelligence documentation and collection plans
- resource management including budgetary, human and physical resources and allocation/access
- analyse and evaluation information
- organise and manage time
- decision making and problem solving, including lateral thinking and perseverance
- operational safety as reflected in Unit APS 001 Maintain Operational Safety (General)

Required Knowledge

- government and policy environments within which operations will be managed and political considerations which may impact
- correct interpretation of all applicable laws, policy and procedures. Applicable law, policy and procedures for all the jurisdictions are detailed in the comprehensive legislation appendix at the close of the police standards submission,
- available resources which may be deployed to support the intelligence operation. As an example, the provision of surveillance, technical support
- security issues and classifications
- Informant/source cultivation and handling/management procedures
- information management and collection techniques, in the context of intelligence processes and legal requirements regarding information storage and retrieval
- information/database systems
- different types of criminal activity and their elements eg general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc
- intelligence principles and a practical knowledge of case management systems and the range of contexts in which these can be applied
- evidentiary requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the management of intelligence information consistent with the project plan.

Consistency in performance

Evidence of competency in this Unit will need to be

© Commonwealth of Australia, 2025 Public Skills Australia

	gathered over time and from across a range of simulated and/or actual workplace activities.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The information collection plan may include:	• time frames for the collection of the information. Such timeframes may be affected by the work involved in preparing the jobs, turn around time, and translation times, • appropriate methods of information transfer which could include: (modem, facsimile, post, courier, oral, and/or by hand • assessment of risks to the source, individual or organisation)
The unpredictable nature of subjects' activities mean:	• that new entities come to notice when intelligence officers and officers are providing tactical and operational support. Therefore, the Information Collection Plan must be monitored for current relevance and brought up to date from time to time to keep up with operational developments. The plan would be classified appropriately
Information sources may include:	• other law enforcement officers in the agency • existing holdings with the agency • other law enforcement agencies • government departments • private sector • public domain, libraries • informants • regulatory bodies and professional associations • academic and research institutes
Collection techniques may include:	• library searches • interviews

© Commonwealth of Australia, 2025 Public Skills Australia

	• surveillance (physical and electronic) • observation posts • overt and covert means • surveys • hearings
Information may include:	• data • facts • anecdotal evidence • allegations and processed intelligence • pictures • video recordings • audio recordings • transcripts • narration • objects or things
Information may be:	• in hard copy or electronic form • It can be obtained by overt or covert means, and apply to unclassified through to highly classified material
Collation methods may include:	• Indexing • cross referencing • linking • sorting • comparing • categorising • integrating • using appropriate • available software programs • filing systems
The ***information is evaluated*** according to its:	• credibility • validity • reliability • accuracy • pertinence
Re-evaluation means:	• subjecting existing information to evaluation processes in the light of new information received

PUAPOL034B Analyse information

Modification History

PUAPOL034B Release 3: Unit Descriptor and Application revised.

PUAPOL034B Release 2: Layout adjusted. No changes to content.

PUAPOL034B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to analyse collated information for intelligence purposes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application for this unit has not been fully developed. It will be reviewed as part of the process of implementing the Design Model for Streamlined Training Package Material.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Reduce and describe information	1.1 Information to be subjected to ***analysis*** is identified 1.2 ***Information is reduced*** and described in a suitable form to support the development of ***interpretations*** 1.3 The reduction and description processes are reviewed to determine their appropriateness, and improvements made where necessary 1.4 Information not used in the reduction and description processes is archived to facilitate future reference
2. Analyse and interpret information	2.1 Appropriate ***thinking processes*** are used to interpret the information 2.2 Sound inductive reasoning is applied to ensure consistency of interpretations based on the information 2.3 Interpretations are credible to facilitate user acceptance of interpretations and formulation of inferences based on the factual quantitative and qualitative information
3. Develop inferences	3.1 Possible interpretations are tested to review credibility and consistency with new information 3.2 ***Interpretations are refined and consolidated*** to strengthen inferences drawn 3.3 Assumptions in the arguments leading to inferences are clearly stated to inform clients and users 3.4 ***Sound inferences*** are formulated from facts and the tested interpretations 3.5 The chain of reasoning in formulating inferences is clear to ensure transparency to users and clients 3.6 Inferences are reviewed to identify and address any fallacies in reasoning 3.7 The ***relationship*** between the information developed and the probable interpretations ***is assessed*** and reported to ensure validity and compliance with agency guidelines 3.8 ***Sound recommendations*** are developed and reported to inform users of intelligence analysis outcomes

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral communication (listening, establishing rapport, negotiation, conflict resolution, presentations)
- written communication in preparing intelligence analysis reports etc,
- deductive and inductive reasoning
- constructing sound inductive arguments
- evaluation and re-evaluation
- computer and information system usage
- resource management including budgetary, human and physical resources and allocation/access
- work safety

Required Knowledge

- government and policy environments within which operations will be managed
- different types of criminal activity and their elements (eg general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc)
- correct interpretation of all applicable laws, policy and procedures. Applicable law, policy and procedures for all the jurisdictions are detailed in the comprehensive legislation appendix at the close of the police standards submission
- available resources required to support the intelligence analysis process
- security issues and classifications
- the range of analytical techniques appropriate for information analysis
- evaluation system, such as the Admiralty Code or other system
- thinking and inductive/deductive reasoning processes
- the influence of human factors on information analysis, eg. prejudice and biases, personalities in analysis, construction of sound inductive arguments, and fallacies in reasoning,
- criminal justice system procedures and evidentiary requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in analysis that must be logical, valid, reliable and relevant. **Consistency in performance** Evidence of competency in this Unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Analysis can be:	• quantitative and/or qualitative • It can be explorative, descriptive, causative or predictive
Methods of analysis can include:	• hypothesis development • link analysis • comparative analysis • biographical analysis • demographics or geographic analysis • historical analysis • scenario generation • Delphi technique • morphological analysis
Thinking processes will be:	• inductive (interpreting raw information, identifying trends or patterns and testing them) • deductive (beginning with a hypothesis and testing it), lateral, critical, or creative • thinking processes involve the use of problem solving techniques and decision making
Forms of reduced information include:	• charts • lists • diagrams • tables • summaries
Testing of interpretations must be:	• balanced • logical • sceptical • objective and comprehensive to be considered appropriate

© Commonwealth of Australia, 2025 Public Skills Australia

	• testing must involve logical reasoning • and may involve critical evaluation of additional information collection
Refining and consolidating interpretations involves:	• additional testing • re-evaluation • reformation or other activities aimed at conformation to a strong degree of probability
Sound inferences may include:	• predictions and interpretations that are probable, estimates, and/or explanations
The assessment of the relationship:	• between the information developed and the probable interpretations may be reported in written form, orally, formally or informally
Sound recommendations may address:	• both strategies and tactical issues

Unit Sector(s)

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Write reports	1.1 The client's expectation of an appropriate ***written report protocol*** is determined
	1.2 The written report ***format***, tone and language are specific to the audience and/or operational circumstances
	1.3 The report content is accurate and written in a concise and logical manner
	1.4 The written report conforms to acceptable writing conventions and is presented in a ***professional manner***
	1.5 The written report is disseminated to the intended recipients in a timely manner
2. Conduct briefings	2.1 The briefing is planned so that all essential information is included and logically arranged
	2.2 Briefing content is developed and delivered in a concise and logical manner
	2.3 Briefing content is structured to facilitate audience comprehension
3. Provide electronic products	3.1 Intended recipients are identified and contacted to establish needs and expectations
	3.2 Caveats are determined and applied to ensure that limitations on release of the product are understood
	3.3 ***Electronic products*** are designed to be compatible with intended recipient needs/systems and/or operational circumstances
	3.4 Electronic products are selected and presented to ensure conciseness and enhance delivery and recipient understanding of the message
	3.5 Electronic products are disseminated to the intended recipient in a form and timeframe to meet client needs and expectations
4. Obtain feedback from clients	4.1 Lines of communication are established and maintained to elicit feedback from clients
	4.2 ***Feedback*** on products and dissemination methods is actively sought from clients to facilitate an improved product

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Client feedback is acknowledged and recorded to enable ***appropriate action***/adjustments to the intelligence product to be made

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral communication (listening, establishing rapport,
- negotiation, conflict resolution, presentations)
- written communication in preparing intelligence analysis reports etc
- analysing, synthesising and evaluating
- deductive and inductive reasoning
- constructing sound inductive arguments
- computer and information system usage
- resource management including budgetary, human and physical resources and allocation/access
- operational safety

Required Knowledge

- government and policy environments within which operations will be managed
- different types of criminal activity and their elements eg general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc
- correct interpretation of all applicable laws, policy and procedures. Applicable law, policy and procedures for all the jurisdictions are detailed in the comprehensive legislation appendix at the close of the police standards submission
- briefing and report writing techniques
- available resources/equipment required to support intelligence reporting and briefing processes (in a range of formats)
- security issues and classifications
- electronic presentation techniques
- client feedback mechanisms
- intelligence dissemination protocols, including appropriate caveats and releasability of information

Evidence Guide

Critical aspects for	It is essential for this unit that competence be

assessment and evidence required to demonstrate competency in this unit	demonstrated in provision of intelligence information that is useable. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Written report protocol:	• will generally include a cover page • caveat • probability rating • table of contents • glossary of terms • executive summary • introduction (aim, objective, methodology, limitations) • body • conclusion • recommendation • appendices • security classification • referenced sources and agencies • time frame reference • authorship
Types of written report may include:	• briefing papers • tactical • strategic • threat assessment • information report • operational • ministerial

© Commonwealth of Australia, 2025 Public Skills Australia

	• the written report may be disseminated to addressees on the Information Collection Plan list, organisational management, and team members
Professional manner include:	• using correct grammar and syntax • correct spelling • appropriate paragraphing • page layout • justification • use of colour • graphics • paper quality
Style includes:	• briefing 'on the run' • formal/informal • structured/unstructured • planned or impromptu • questions/no questions
Format may be:	• interactive or didactic
Logistics may include:	• presenter • invitations • suitable locations • time • duration
Resources may include:	• public address system • overhead projector and screen • handouts • video • electronic aids • human resources
Notification may be:	• by written • oral • electronic means
Briefing protocols generally:	• introductions • security classifications • briefing formats • statement of purpose, statement of duration • presentation of major findings, supporting data, conclusions, recommendations • provision of questioning time • closing of briefing
Communication skills	• visual aids • speech

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• presence and language • as well as interpersonal skills such as empathy and fairness and being perceptive of all forms - verbal and non-verbal - of feedback from the audience
Presentation include:	• both the body of the presentation and the answering of questions
Electronic products may include:	• computer databases • software • modem communication • video or audio tape • e-mail and electronic versions of oral briefings or written reports
Feedback may be:	• formal • informal • written • oral • electronic
Appropriate action may include:	• no action • amend present and future products and dissemination methods • responding to feedback

PUAPOL036B Provide crime prevention advice through environmental design

Modification History

PUAPOL036B Release 3: Unit Descriptor and Application revised.

PUAPOL036B Release 2: Layout adjusted. No changes to content.

PUAPOL036B Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to provide advice to customers to promote crime prevention through design of the built and natural environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application for this unit has not been fully developed. It will be reviewed as part of the process of implementing the Design Model for Streamlined Training Package Material.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify a crime and safety issue	1.1 Nature of a ***customer need*** is determined and the police role is confirmed 1.2 Patterns and trends are identified through statistics and observation 1.3 ***Proactive measures*** are identified and a plan to address the crime and safety issue is developed
2. Obtain information	2.1 ***Resources*** necessary to obtain information are identified 2.2 An initial assessment of the issue is conducted 2.3 Trends, patterns and affected parties are identified
3. Analyse information to determine issues	3.1 ***Information is interpreted*** to allow preliminary decision making to occur 3.2 ***Additional content expertise*** is identified to provide further input 3.3 Relevance and ***value of the information*** is determined 3.4 A ***risk analysis*** is conducted to ensure preliminary findings reflect the intended outcome of the advice
4. Develop strategies and make recommendations	4.1 ***Crime prevention principles*** are applied to the crime and safety issue 4.2 ***Stakeholders*** are consulted to identify ***constraints*** of the potential strategy 4.3 ***Additional information*** is researched to assist strategy development 4.4 Draft strategies are formulated and options are provided to stakeholders 4.5 Recommendations are communicated to stakeholders
5. Evaluate the effectiveness of recommendations	5.1 Strategies for ***evaluation*** are identified 5.2 Effectiveness of the advice process is monitored 5.3 Ongoing ***monitoring*** of the recommendations is carried out 5.4 Effects of the implementation are monitored

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- Analytical
- Consultation
- Interpretation
- Negotiation
- Plan reading
- Presentation
- Report writing
- Survey design

Required Knowledge

- Building/planning codes
- Community liaison
- Community oriented policing
- Consequences of crime
- Local history
- Local government strategic planning
- OH&S
- Problem oriented policing
- Risk assessment
- Roles of external agencies
- Security/safety audit
- Situational crime prevention
- 3D principles: design, definition, designation
- Use of space in relation to aesthetics, lighting, seating, surfaces, signage

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to present a crime prevention through environmental design workplace project; to develop a report that includes appropriate recommendations; to develop a security audit; to measure the impact of strategies; and to survey public perception. **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

	Competency should be demonstrated in a range of contexts.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or a simulated workplace. **Specific resources for assessment** Access to: • guest speakers • digital camera, light meter, overhead projector, slide projector, whiteboard, video and replay equipment, photocopier • simulated or actual crime prevention through environmental design environments • plans and specifications • transport

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Crime and safety issues may relate to:	• Local police knowledge • OH&S • Use of space involving councils, railway stations, shopping centres, car parks, bus stops, toilets, lighting, seating, community groups, organisations, policies, cultural, regulations, taxi ranks, speaker systems, members, vandalism, safety
Customer needs may be received via:	• Business plans (police, council etc.) • Community perception • Crime reports • Cultural organisations • Direction • Letters • Liaison • Members • Organisations • Promote • Quality assurance processes • Response

© Commonwealth of Australia, 2025 Public Skills Australia

	• School security • Telephone
Proactive measures may include:	• Council planning process • Marketing • Member and public education • Networking • Observation • Promotion
Plan may include:	• Evaluation strategies • Key stakeholder identification • Statistical measures (before crime prevention through environmental design development)
Resources may include:	• Architects • Community • Developers • DISC office • Emergency services • Interest groups • Intergraph • Internet • Library • Local council • Local members • Newspapers • Other jurisdictions • Statistics
Information interpretation may include:	• Analysis • Architectural • Developer plans • Drawings • Government Information Service • Graphs • Landscape • Lighting • Map information • Photographs • Qualitative/quantitative • Schematics • Signage • Statistics
Additional content expertise	• Anthropologists

© Commonwealth of Australia, 2025 Public Skills Australia

may include:

- Architects
- Councils
- Landscapers
- Music specialists
- OH&S co-ordinator
- Planners
- Psychologists
- Risk assessment
- Sociologists
- Statisticians
- Technical experts

Information value may include:

- Accuracy
- Cost effectiveness
- Priority
- Source

Risk analysis may include:

- Analysis
- Consultation
- Data gathering
- Demographics
- Environment
- Focus groups
- History
- OH&S
- Proactive response
- Risk assessment
- Statistics
- Surveys

Crime prevention principles may include:

- Community liaison
- Crime prevention through environmental design
- Education of public
- Problem orientated policing
- Situational crime prevention
- 3 Ds
- Use of space relating to aesthetics, environmental, lighting, seating, surfaces, signage, history, video/natural surveillance, landscaping, design, access control, territorial reinforcement, security survey/audit

Stakeholders may include:

- Appropriate police channels
- Community groups
- Councils
- Customers

© Commonwealth of Australia, 2025 Public Skills Australia

	• Internal/external organisations/people • Liaison • Organisations
Constraints may include:	• Aesthetics • Building control • Budget • Community groups • Cost • Councils • Cultural • Planning and design • Policies • Politics • Practicality • Public expectation/perception • Regulations
Additional information may include:	• Academics • CPO • Internet • Library • Members • Other jurisdictions • Stakeholders
Evaluation may include:	• Analysing • Cost-budget • Developing • Implementing • Recommendations • Reports • Verbal presentations • Written
Monitoring may include:	• Advice to other jurisdictions/districts/regions • Analysis • Anecdotal evidence • Cost-budget • Critiques • Interviews • Liaison • Observations • Maintenance • Members

© Commonwealth of Australia, 2025 Public Skills Australia

- Perceptions
- Reports
- Response
- Stakeholder consultation
- Statistics
- Strengths/weaknesses
- Surveys

Unit Descriptor

This unit is a Police specialist unit of competency.

Police specialist units of competency and qualifications are not included in this document; Police specialist units of competency and qualifications are confidential and should not be accessible in the public domain. Public access to these units of competency and qualifications has the potential to compromise Police operations and security as well as place members of the public and Police Officers at risk. These units are contained in a separate document and are only available to persons authorised by the Australia New Zealand Policing Advisory Agency (ANZPAA) – via website contact www.anzpaa.org.au http://www.anzpaa.org

PUAPOLFC002B Maintain a safe forensic working environment

Modification History

Release	TP version	Comments
3	PUA12 V1.1	Unit Descriptor revised.
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to maintain a safe working environment while working in a forensic role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to forensic investigators required to create a safe working environment within the context of forensics.

This unit may be applied in the field at crime/incident scenes, in a laboratory and/or at mortuary facilities and clandestine laboratories.

Forensic investigators will use this unit to identify and establish safety zones for particular functions under identified conditions. The unit will also contribute to the implementation of communication strategies by forensic investigators and will enable them to safely use laboratory equipment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and monitor potential health/safety risks	1.1 Potential physical, chemical and biological hazards are identified and risk management strategies are employed. 1.2 Relevant ***occupational health and safety*** (***OH&S***) ***guidelines*** are applied to contain/control exposure levels. 1.3 ***Personnel*** and members of the public at risk of exposure are immediately identified and notified of potential hazard. 1.4 Hazards are immediately cordoned off and clearly identified.
2. Identify specialist/external agency requirements	2.1 Need for specialist and/or ***external agency*** assistance is assessed and requested where necessary. 2.2 Access pathways are identified to both specialist/external agencies and other relevant personnel.
3. Use and maintain protective clothing and safety equipment	3.1 ***Protective clothing*** and ***safety equipment*** is maintained in accordance with manufacturer's instructions and kept is readily available. 3.2 Protective clothing and safety equipment is replaced in accordance with documented replacement programs.
4. Apply collection/packaging procedures safely	4.1 Safe ***collection*** and ***packaging procedures*** are identified and employed to contain health and safety risks and to maintain integrity of exhibits.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.2 Relevance of packaging procedures to the type and scope of hazard and potential periods of storage is ensured. 4.3 Disposal of ***hazardous material*** including protective clothing and packaging is in accordance with documented procedures and relevant OH&S legislation, laboratory safety and environmental protection guidelines.
5. Use and maintain equipment and substances, and dispose of safely	5.1 Manufacturer's instructions, documented procedures and best practice are employed during the operation of equipment and the use of ***substances*** and consumables. 5.2 Potential hazards identified during the use/operation of equipment are documented. 5.3 Where faulty the use/operation of that equipment is ceased pending inspection/repair. 5.4 Operational equipment, consumables and substances are secured to ensure only restricted/***authorised*** access at all times. 5.5 Potential hazards relating to equipment, disposables and substances are identified and requisite warning labels/notices along with relevant HAZCHEM/safety symbols are made clearly visible. 5.6 Documented training programs relating to the function, use and operation of relevant laboratory and ***field equipment*** are undertaken. 5.7 Material safety data information is located, read and followed as appropriate to tasks undertaken.
6. Follow accident/Injury reporting procedures	6.1 Documented procedures relating to OH&S incidents are adhered to. 6.2 Relevant forms are completed and submitted according to documented procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- effectively communicate safety issues/concerns to colleagues, supervisors and when necessary other emergency service workers and the public

© Commonwealth of Australia, 2025 Public Skills Australia

- minimise workplace risks to self, colleagues and the public
- plan, implement and where necessary adapt workplace safety responses to situational contexts
- recognise and accurately assess situational risks/hazards
- safely operate and use general issue and emergency operational equipment and safety clothing

Required Knowledge

- established strategies to optimise safety under a range of field and laboratory scenarios
- general duty of care responsibilities
- organisational OH&S legislation as it applies to forensic investigation
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisational policy and procedures covering safety issues/practices
- potential risks associated with a range of field and laboratory activities
- relevant OH&S/hazard management specialists and external agencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply safe work practices at all times **Consistency in performance** Competency should be demonstrated over time and across a range of workplace or simulated situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated work environment. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter

© Commonwealth of Australia, 2025 Public Skills Australia

	supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Occupational health and safety guidelines include:	• CCH Safety in Laboratory Guidelines • Commonwealth and state/territory OH&S legislation • documented internal OH&S procedures manuals • national Code of Practice for the labelling of workplace substances [NOHSC: 2012 (1994)] • relevant Australian Standards
Personnel may include:	• forensic operatives • members of the emergency services including ambulance, fire and state/territory emergency services • members of the policing community including investigators • service providers and government instrumentalities such as electricity and water providers
External agencies may include:	• biologists • chemists • industry specific advisers • other government and community based departments and organisations as fire services, ambulance service, health departments, insurance investigators, and other public safety organisations
Protective clothing may	• aprons and specialist HAZCHEM and biological

© Commonwealth of Australia, 2025 Public Skills Australia

include:	apparel • boots • disposable overalls • gloves • smocks
Safety equipment may include:	• breathing apparatus • first aid kits and equipment • fuming hoods • helmets • safety shower and eyewash equipment • sharps containers and biohazard packaging and containers • spill kits • visors
Collection means:	• retrieval or acquisition of any item by any means which is related to a forensic investigation
Packaging procedures may include:	• type, physical properties and methodology employed during the packaging of any item/exhibit relevant to a forensic investigation
Hazardous material may include:	• materials with inherent or introduced biological, chemical, radioactive or physical hazards of any type or severity including teratogenic • mutagenic and corrosive substances and explosives
Substances may include:	• field and laboratory chemistry • other substance that may be found in either the field or laboratory during a forensic investigation
Authorised may include:	• access • acquire and use any substance • apparatus • equipment or thing in relation to a forensic investigation
Field equipment may include:	• camera equipment of various types • crime scene/fingerprint examination kits • fuming equipment • hand tools of various types • ladders • light sources • vehicles

PUAPOLFC003B Detect, record and collect physical evidence

Modification History

Release	TP version	Comments
3	PUA12 V1.1	Unit Descriptor revised.
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to process activities involved in recording and collecting physical evidence during ***incident*/*crime scenes*** and ***laboratory examinations***.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Detecting, recording and collecting physical evidence is of the utmost importance and can be applied in various contexts within incident/crime scenes and laboratory examinations.

This unit is relevant for all aspects of handling physical evidence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Detect and record physical evidence	1.1 ***Physical evidence*** is ***detected*** using observation techniques and appropriate technological methods. 1.2 Physical evidence is collected to prevent contamination or loss. 1.3 Samples collected are sufficient in quantity, where possible, to allow all potential examinations/analysis to be carried out. 1.4 Samples collected are sufficient to represent the ***natural variation*** that occurs in the physical evidence. 1.5 ***Control reference samples*** are collected, where available and appropriate. 1.6 Documented record of the physical evidence is produced in line with agreed agency procedures.
2. Collect physical evidence	2.1 Physical evidence is recorded prior to examination to ensure continuity and accuracy. 2.2 ***Recording methods*** are identified to document the physical evidence in accordance with quality system requirements and within resource limitations. 2.3 Latent evidence is ***collected***/detected by physical or chemical means.
3. Package physical evidence	3.1 Items are ***packaged and stored*** to maintain continuity and prevent degradation or contamination. 3.2 Physical evidence is packaged in accordance with occupational health and safety (OH&S) guidelines. 3.3 Details of evidence collected are entered in case notes and where appropriate in the exhibit register to maintain continuity.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse, make decisions and solve problems in responding to a range of physical evidence contexts including the systematic examination of items of physical evidence
- collect, package and preserve specific evidence types
- communicate in writing clearly and unambiguously
- handle exhibits and preserve continuity of evidence
- maintain operational safety
- manage resources and time effectively
- use specialised evidence recording equipment as required

Required Knowledge

- application and potential limitations of forensic investigative techniques
- legislative, policy, and quality system context in which forensic examinations are conducted
- legislative, policy, and quality system requirements for search and the seizure of physical evidence
- legislative, policy, and quality system requirements for collecting, preserving continuity and disposing of exhibits
- legislative, policy and quality system requirements for the security, protection and preservation of the evidence
- OH&S practices to be followed when recording, collecting and packaging physical evidence
- range of techniques available for the recording, collecting, packaging and preserving physical evidence
- required forensic documentation for the recording and collection of physical evidence
- role and functions of other forensic discipline specialists in the recording, collection, preservation and continuity of physical evidence

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate	Assessment must confirm the ability to: • maximise the potential evidentiary value of the exhibit

© Commonwealth of Australia, 2025 Public Skills Australia

competency in this unit	**Consistency in performance** Competency should be demonstrated over time and across a range of workplace or simulated situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated work environment. This unit must be assessed against the relevant discipline such as Crime Scenes, Fingerprints, Documents, Firearms, Toolmarks, Fire and Explosion, Criminalistics or Biology. Competency in this unit in one particular discipline does not imply competence in any other forensic discipline in this same unit. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident/crime scenes may	• Civil investigations

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• Controlled drug deliveries • Criminal investigations • Disasters • Drug substitutions • Fire and explosions • Industrial accidents • Search of persons/evidence • Searches and evidence collection • Sudden deaths • Special events • Vehicle collisions • Vehicle identification
Laboratory examinations may include:	• Document examination • Fingerprint development/enhancement/examination • Firearm examinations • Motor vehicle examinations • Shoeprint development/enhancement/examination • Toolmark examinations • Trace evidence examinations
Physical evidence may include:	• Any and all objects • Liquid or gas including the relationship between all such objects • Living or inanimate objects • Objects gross or microscopic in size • Solid • Tyremarks, shoemarks, toolmarks, fingerprints, fibres, biological tissue, blood stain analysis, vehicle examinations, paint, clothing, fire debris and documents
Detection methods may include:	• Chemical • Optical • Physical
Natural variation refers to:	• Diversity of characteristics that occurs in all items of physical evidence
Control/reference samples refers to:	• Control samples which represent background contaminants • Samples collected from a known source (such as elimination fingerprints, hairs from the victim and suspect)
Recording methods can be:	• Audio recording • Computer generated data • Digital imaging

© Commonwealth of Australia, 2025 Public Skills Australia

	• Hand written notes • Global positioning system (GPS) • Photographic • Physical capture • Sketch plan • Video recording
Evidence collection methods may include:	• Hand picking (including use of forceps, gloves) • Swabbing • Sweeping • Tape lifting • Vacuuming
Packaging and storing to maintain continuity and prevent degradation or contamination may include consideration of:	• Drying of wet exhibits • Exhibit labels • Packaging medium • Physical nature of exhibit • Storage temperature • Tamper evident seals

PUAPOLFC004B Evaluate and document cases and facilitate analyses

Modification History

PUAPOLFC004B Release 3: Unit Descriptor revised.

PUAPOLFC004B Release 2: Layout adjusted. No changes to content.

PUAPOLFC004B Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to evaluate and document cases submitted for forensic examination, and to facilitate analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit may be applied in a forensic examinations context and will enable analysis of cases. Analysing and assessing skills, documenting information related to cases, and liaison and communication skills will be applied within the context of this unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate cases	1.1 ***Physical evidence*** being presented for examination is checked to ensure the ***integrity of the exhibit*** has not been compromised. 1.2 Information about the case is assessed to determine client needs. 1.3 Case is evaluated to gauge the appropriateness of proceeding in light of laboratory policy and resource limitations.
2. Document cases	2.1 Physical evidence is received and processed according to organisational guidelines and legislative requirements. 2.2 Documentation is completed in accordance with evidentiary requirements and organisational guidelines. 2.3 Relevant information is accurately entered into the ***case management system*** in accordance with organisational procedures. 2.4 Physical evidence is stored according to organisational guidelines to ensure its continuity, integrity and security.
3. Facilitate examination by appropriate forensic practitioners	3.1 Evidence is assessed and identified for examination by appropriate forensic practitioners. 3.2 ***Liaison with clients***/***investigators*** is conducted to ensure ***relevance of examinations.*** 3.3 ***Logistics*** of the examination are discussed and documented with other forensic practitioners as required. 3.4 ***Movement of exhibits*** for examination is undertaken in accordance with organisational procedures to ensure continuity, security and integrity.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse situations, make decisions and solve problems in responding to a range of forensic investigation contexts
- apply occupational health and safety (OH&S) principles
- communicate in writing (clearly and unambiguously)
- communicate orally (listen, establish rapport, negotiate, resolve conflict)
- handle exhibits and preserve continuity of evidence
- manage resources including allocation/access (budgetary, human, physical resources)
- manage time effectively
- work effectively with a range of practitioners

Required Knowledge

- legislative, policy, procedural and quality system requirements for the collection, preservation, security, continuity, receipt and disposal of exhibits
- OH&S practices to be followed when handling physical evidence
- organisational and quality system requirements relating to the evaluation of cases
- preparation and submission of forensic documentation
- range of services available to assist laboratory examination and interpretation of physical evidence
- role and functions of forensic discipline specialists in the laboratory examination of physical evidence

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- appropriately handle physical evidence submitted with cases
- determine appropriate sites for the examination of evidence

Consistency in performance

Competency should be demonstrated over time and across a range of workplace or simulated situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated work environment. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Physical evidence may include:	• Any and all objects • Liquid or gas including the relationship between all such objects • Living or inanimate objects • Objects gross or microscopic in size • Solid • Tyremarks, shoemarks, toolmarks, fingerprints, fibres, biological tissue, blood stain analysis, vehicle examinations, paint, clothing, fire debris and documents
Integrity of the exhibit incorporates:	• Assessment of the circumstances surrounding the collection and preservation of the evidence to determine any potential contamination of the exhibit

© Commonwealth of Australia, 2025 Public Skills Australia

	• Assessment of the package in which the evidence is contained • Package must be sealed and labelled in accordance with agency guidelines (agency guidelines may include methods and procedures manuals quality system requirements)
Case management system may include:	• Electronic case management database system • Hard copy case files and associated filing/retrieval system
Liaison with clients/investigators includes:	• Face-to-face or by phone • Formal and informal meetings • Transmission of documentation electronically
Relevance of examinations may include:	• Appropriateness • Sequence and timeliness of examinations in the context of investigation directions/timeframes
Logistics includes:	• Delivery of exhibits • Cost • Timeframes and security
Movement of exhibits encompasses:	• Transportation of evidence between forensic disciplines, external agencies and professionals

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain and complete case notes and associated records	1.1 ***Case notes and associated records*** are completed and maintained in accordance with procedural and quality system requirements. 1.2 Accuracy, completeness, legibility and clarity of case file content is ensured in accordance with organisational guidelines.
2. Report results	2.1 Results are documented in the established format to ensure quality and consistency in accordance with organisational policies and procedures. 2.2 Information provided in the report is accurate and succinct, and conveys outcomes of the examination/s. 2.3 Reports are submitted in accordance with quality control procedures. 2.4 Reports are submitted in a manner that ensures security of the information and timeliness of results.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply techniques for information collection, recording, collating, analysing and re-evaluating
- communicate clearly and unambiguously in writing when preparing statements, reports, case files, and other documentation
- manage time
- organise work effectively
- use computers and information technology

Required Knowledge

- organisational policy and procedural requirements for the reporting of findings to clients/stakeholders
- quality system requirements relating to the taking of case notes and preparation of case files and reports

© Commonwealth of Australia, 2025 Public Skills Australia

- various approved formats of forms, case files and reports

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Comply with quality system requirements	1.1 ***Organisational policies and procedures*** are followed in accordance with quality system requirements. 1.2 Any variations from quality system procedures are clearly documented. 1.3 Non-conformance of laboratory practice is identified and reported in accordance with quality system requirements. 1.4 Corrective action to address non-conformance is implemented.
2. Undertake proficiency testing/casework review	2.1 Internal/external proficiency tests are completed in accordance with organisational policies/guidelines/quality system requirements. 2.2 Case work is submitted for quality assurance review in accordance with organisational policies/guidelines/quality system requirements.
3. Contribute to quality system maintenance	3.1 Quality system issues are raised with designated person in accordance with quality system procedures. 3.2 Audit processes are participated in as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively
- follow instructions and directions
- identify system improvements and deficiencies and convey to management

Required Knowledge

- quality system context in which forensic examinations are conducted
- relevant organisational quality system procedures

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate evidence for comparison	1.1 Type of comparative evidence is identified and examined to determine its forensic value in accordance with organisational policies, procedures and guidelines. 1.2 Examination regime is chosen to ensure the integrity of the process, samples and exhibits. 1.3 ***Standards*** and ***known samples*** are selected for inclusion in the ***comparative process*** based on relevance and integrity of source.
2. Conduct comparison	2.1 ***Characteristics*** are determined to facilitate comparison. 2.2 Characteristics are distinguished and evaluated in accordance with documented discipline procedures and quality system requirements.
3. Verify and report results	3.1 Comparative processes and conclusions are subjected to ***peer review.*** 3.2 Results are reported in accordance with discipline and quality system requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse, make decisions and solve problems in responding to a range of comparative examinations
- apply occupational health and safety (OH&S) principles
- communicate and negotiate in discussing comparative examination results with investigators, forensic practitioners and other stakeholders
- handle exhibits and preserve continuity of evidence
- manage resources and time
- use discipline specific laboratory equipment, such as fingerprinting equipment, computer software, photographic equipment

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- background, methodology principles, application and potential limitations of comparative examination techniques
- characteristics which typify evidence collected in a specific forensic discipline
- legislative and procedural requirements for the security, protection and preservation of evidence
- legislative, policy, and quality system context in which comparative examinations are conducted
- OH&S practices to be followed when examining physical evidence
- quality system requirements for comparative examinations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- include or exclude evidence on the basis of comparative examination

Consistency in performance

Competency should be demonstrated over time and across a range of workplace or simulated situations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

This unit must be assessed against the relevant discipline such as Crime Scenes, Fingerprints, Documents, Firearms, Toolmarks, Fire and Explosion, Criminalistics or Biology.

Competency in this unit in one particular discipline does not imply competence in any other forensic discipline in this same unit.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically

© Commonwealth of Australia, 2025 Public Skills Australia

recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Standards:	• Are subject to documented quality system guidelines and include control standards relevant to specific disciplines
Known samples:	• Should be collected in accordance with documented procedures
Comparative process:	• Means any analysis of items to compare identifying features and determine commonality/difference
Characteristics may include:	• Class and individual characteristics • Handwriting including spatial quality, line quality, pictorial consistency and feature comparison such as size, proportion, slant, spacing, style, form and baseline characteristics • Impressions and marks or occurrences of any kind whether occurring naturally or by a process • Minutiae • Points of identity • Striations • And characteristics relevant to specific disciplines such as: • fingerprints (pattern types include arches, loops, whorls and composites) • characteristics include ridge endings and bifurcations

© Commonwealth of Australia, 2025 Public Skills Australia

- classification includes cores and deltas
- firearms: (projectiles; lands and grooves and direction of twist, cartridge cases, firing pin impressions, ejector marks and extractor marks)

Peer review:

- Means any review, re-examination, critical appraisal or verification of results, determinations or opinions made by practitioners in the relevant discipline, in accordance with quality system requirements

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for proceedings	1.1 Arrangements, role and involvement in proceedings are confirmed
	1.2 Case requirements are assessed and ***evidence*** is prepared in accordance with organisational and judicial requirements
	1.3 All forensic evidence in proceedings is reviewed prior to presentation in court to ensure accuracy, continuity and integrity
	1.4 Proceedings and ***protocols*** are adhered to in preparing evidence in accordance with organisational policies and procedures
	1.5 Precedents relevant to procedures are identified to assist ***court proceedings*** as required
	1.6 Case briefings are conducted with relevant personnel in accordance with judicial and organisational policies and procedures
2. Present evidence	2.1 Adherence to rules of evidence, protocols and procedures relevant to the jurisdiction is applied
	2.2 Evidence is communicated in a clear concise and articulate manner
	2.3 Expert evidence or opinion is provided on request in accordance with judicial requirements
	2.4 Exhibits are presented in accordance with legal, judicial and occupational health and safety (OH&S) requirements as required
3. Review court proceedings	3.1 Outcomes of proceedings are reviewed and where appropriate, issues are communicated to appropriate personnel in the organisation
	3.2 Involvement in the judicial proceedings is evaluated to inform future practice

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- brief counsel
- collate evidence
- prepare statements
- present evidence clearly and concisely
- produce scientific reports
- research and identify precedents
- take notes
- use a computer to create, edit and print documents
- write reports

Required Knowledge

- appeals systems
- burden of proof
- conduct and operation of hearings
- Coroners Act
- Criminal Code
- exemptions and defences
- general principles of criminal liability
- Hearsay Rule
- how to prepare legal brief (precedents, witness statements, records of evidence, investigator's reports, media footage, log books)
- how to prepare submissions
- legislative requirements of presenting evidence
- organisational policies and procedures relating to preparation of documents and evidence, and providing expert opinion
- points of proof
- procedures and protocols in different judicial/quasi-judicial systems
- qualifications and experience required of expert witnesses
- range of crimes/offences that can be committed
- relevant sections of Evidence Act
- relevant sections of legislation
- role of lay and expert witnesses
- role of legal personnel in judicial/quasi-judicial systems
- rules of evidence in different judicial or quasi-judicial settings
- types of evidence admissible in judicial/quasi-judicial systems
- types of offences
- use of notes in court/tribunal/commission

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- prepare forensic evidence, statements and submissions
- brief counsel utilising the full and detailed evidence to hand
- prepare and present comprehensive and accurate legal briefs.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

© Commonwealth of Australia, 2025 Public Skills Australia

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain equipment	1.1 ***Maintenance*** routines are performed on ***equipment*** and where required, documented, to comply with established ***maintenance schedules***
	1.2 Equipment is stored to maintain its security and handled in accordance with manufacturer's recommendations
2. Use equipment	2.1 Task requirements are analysed and strategies are implemented to successfully examine and record forensic evidence
	2.2 Equipment is used in accordance with manufacturer's instructions, documented procedures and organisational policies and procedures
	2.3 ***Safety equipment*** is used at accident, crime, incident or other situations as necessary
	2.4 Equipment ***fault or failure*** is ***reported*** in accordance with documented procedures and alternative equipment or methods are employed

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurately use recording equipment and processes to produce evidence that is acceptable in courts
- apply occupational health and safety (OH&S) principles, which includes OH&S legislation, laboratory safety manuals, relevant Australian Standards
- select and use appropriate laboratory and field equipment
- take forensic photographs
- undertake routine equipment maintenance of applicable equipment

Required Knowledge

- disciplines such as Crime Scenes, Fingerprints, Documents, Firearms and Toolmarks, Fire and Explosion scenes
- jurisdictional laws, policies and procedures covering the use of laboratory and field

© Commonwealth of Australia, 2025 Public Skills Australia

equipment
- maintenance requirements for equipment
- operating procedures for equipment
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- requirements of the quality system
- safety practices that must be followed when using equipment
- various types of equipment maintenance logs/damage reports required and when they must be completed

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use properly maintained equipment to maximise the evidentiary value of physical evidence.

Consistency in performance

Competency should be demonstrated over time and across a range of workplace or simulated situations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated work environment.

This unit must be assessed against the relevant discipline such as Crime Scenes, Fingerprints, Documents, Firearms, Toolmarks, Fire and Explosion, Criminalistics or Biology.

Competency in this unit in one particular discipline does not imply competence in any other forensic discipline in this same unit.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Maintenance would include:

- Cleaning
- Repairing faults and breakages
- Replenishing consumables
- Warranty and routine services
- Waste disposal

Equipment may include:

- Crime scene investigation - recording and capture devices, light sources, casting and restoration equipment and electrostatic lifters
- Fingerprint identification - recording and capture devices, fuming cabinets, fume hoods, light sources and IT equipment (e.g. NAFIS system)
- Firearms and toolmark examination - microscopes, recording and capture devices, and measurement devices
- Document examination - recording and capture devices, light sources and electrostatic detection apparatus
- Fire and explosion scene investigation - recording and capture devices and light sources

Maintenance schedules would include:

- Calibration routines, which are applied where measurements are required to be verified against a reference standard according to documented procedures
- Calibration schedules from quality manuals and maintenance contracts

© Commonwealth of Australia, 2025 Public Skills Australia

Safety equipment includes:	• Manufacturer's guidelines • Boots • Chemical spill kits • Coveralls • Emergency eye wash and showers • Eye protection • First aid kits • Fume hoods • Gloves • Masks • Overalls • Protective clothing • Respirators • Splash suits
Fault or failure includes:	• System or item failure or physical damage
Reporting of a fault or failure may include:	• Verbal communication • Written communication

PUAPOLGD001A Maintain police operational safety

Modification History

PUAPOLGD001A Release 3: Unit Descriptor revised.

PUAPOLGD001A Release 2: Layout adjusted. No changes to content.

PUAPOLGD001A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to assess and respond to operational safety risks.

This unit does not cover the specialised safety practices required of specialist officers such as police diver, search and rescue squad member, special operations/tactical response group member, covert investigators or some forensic investigators.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to persons who assess and respond to situational risks in the workplace and support the maintenance of a safe working environment. The ability to employ operational safety skills and tactics are embedded within this unit.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess and action situational risks in *workplaces*	1.1 Situational safety is assessed and well-informed judgements are made in accordance with agreed operational practices and the surrounding environment 1.2 ***Potential risks*** to own safety, the safety of fellow officers and members of the public are quickly and correctly identified, ***assessed and actioned*** where appropriate
2. Maintain a safe working environment	2.1 Operational safety responses/procedures are identified and/or planned and implemented within organisational policies and procedures 2.2 Equipment, materials and environment are assessed for hazards and protective action is planned to ensure the health and safety of people 2.3 ***Safety issues*** are evaluated and advised to relevant officers and alternate responses are actioned where appropriate 2.4 Appropriate protective clothing and equipment are correctly identified, worn and utilised where and when required 2.5 Incidents are identified, and observations are recorded and reported accurately, promptly and in the required format to relevant personnel
3. Employ operational safety skills and tactics	3.1 Situations are assessed correctly and informed judgements made as appropriate for the use of ***operational safety skills and tactics*** 3.2 Operational safety skills and tactics are applied in accordance with organisational policies and procedures, subject to surrounding conditions 3.3 Documentation regarding the use of force is completed and submitted in accordance with organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- effectively communicate safety issues/concerns to colleagues, supervisors and when necessary, other emergency service workers and the public
- effectively communicate with a wide range of community members such as those with physical/sensory/intellectual impairment and with different cultural backgrounds
- minimise workplace risks to self, colleagues and the public
- plan, implement and where necessary adapt workplace safety responses to situational contexts
- recognise and accurately assess, situational risks/hazards
- safely operate and use general issue and emergency operational equipment and safety clothing

Required Knowledge

- established strategies to optimise safety under a range of operational scenarios
- general duty of care responsibilities
- most appropriate use of force (restraining and defensive tactics)
- occupational health and safety (OH&S) guidelines for lifting and carrying persons
- organisational OH&S legislation as it applies to policing
- organisational policies and procedures covering operational safety issues/practices
- potential risks associated with a full range of non-specialist operational policing activities
- use of force, its legal parameters and reporting requirements in relation to operations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- identify workplace safety risks, work practices and defensive tactics to ensure the safety of self and others.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time in a range of actual or simulated workplace environments. **Specific resources for assessment** Access is required to: • standard organisational operational accoutrements • operational safety equipment and vehicles.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Workplaces may include:	• Crime/incident scenes • Foot or mobile patrol environments • Industrial/business/domestic buildings • Police stations • Public crowd/traffic control tasking sites • Public transport systems • Sporting and social venues • Watch houses
Potential risks may include:	• Buildings or property and could be already present or evolve as a result of actions taken

© Commonwealth of Australia, 2025 Public Skills Australia

	• Matters or events that could harm persons
Assessing and actioning potential risks may include:	• Analysing situational intelligence and evidence • Communicating with other agencies such as the Road Traffic Authority (RTA), local government, community services • Gathering existing situational intelligence from colleagues • Identifying and valuing potential risks (and their strengths) arising from a situation or a situation's particular timeframe • Other emergency service workers and/or public present at site • Reporting • Reviewing previous reports • Safe control/management of hazard • Techniques such as personal observation
Safety issues may include:	• Issues/matters that may impact on the future safety of officers and could include faulty equipment • Inappropriate operational procedures or the need for skills enhancement
Operational safety skills and tactics may include:	• Crowd control • Dealing with aggressive/violent/intoxicated/drugged/ injured/uncooperative persons • Dealing with potentially hazardous substances such as noxious gases, chemicals, fuels • Lifting and carry persons • Operation of police vehicles and equipment including weapons • Preventing disease transmissions • Range of skills and tactics sanctioned by an organisation to enable an officer to defend against or restrain persons attempting to physically harm themselves • Risk assessment and contingency planning • Situational communication techniques • Use of force techniques/options/strategies • Use of safety clothing (such as visibility vests, wet weather gear, riot clothing/headgear, rubber gloves) • Warning devices (portable lamps, signs, torches) and safety barriers/warning tapes

PUAPOLGD002A Apply policing methods

Modification History

PUAPOLGD002A Release 3: Unit Descriptor revised.

PUAPOLGD002A Release 2: Layout adjusted. No changes to content.

PUAPOLGD002A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to undertake patrols and to respond to situations to enforce laws and/or to maintain public order.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to persons undertaking patrols and using knowledge of the local patrol area to inform policing strategies.

This unit supports the ability to analyse information/intelligence in order to use policing strategies, which include the ability to resolve/refer/respond to issues.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake patrols	1.1 Positive visual and professional presence is maintained while ***patrolling***
	1.2 Emergent situations are correctly analysed and appropriate actions are taken, including requests for further assistance
	1.3 ***Effective communication*** is maintained with other relevant officers, other related agencies and the public where appropriate
	1.4 Patrolling is undertaken in accordance with organisational requirements, principles of non-discrimination, supervisor's instructions and in a manner that optimises achievement of patrol goals
	1.5 ***Information***/***intelligence*** gathered and analysed while on patrol is shared with other officers
2. Analyse, maintain and utilise knowledge of the local patrol area	2.1 Features particular to a patrol area are analysed, noted and disseminated
	2.2 Communication paths are established and fostered with patrol community members
	2.3 Policing issues concerning a patrol area are identified in the media, through internal intelligence and bulletins/notices
	2.4 Patrol area information and issues are analysed and used to select policing strategies
3. Utilise and maintain currency of internal intelligence	3.1 Internal/external sources of information are accessed and used to maintain currency with general and patrol specific criminal and community social and economic issues
	3.2 Communication, regarding latest patrol area issues, is maintained with other patrol members and sections in accordance with organisational information security procedures
	3.3 Activities are based on an analysis of the latest patrol intelligence and in accordance with organisational procedures
4. Analyse and respond to	4.1 ***Taskings*** are received, acknowledged and actioned

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
incidents/taskings and requests for assistance	in accordance with operational procedures 4.2 Incident attendance and method of approach are timely, situationally and culturally appropriate, well planned and consistent with organisational policy 4.3 All actions taken in response to incident/tasking are in accordance with organisational policies and procedures 4.4 ***Requests for assistance*** from community members are dealt with in an effective, timely and professional manner 4.5 ***Follow-up action*** is taken with efficient management of issues, selection of appropriate equipment, services and techniques for self and others 4.6 Communication is maintained with ***relevant personnel*** throughout the incident
5. *Analyse situations* and implement strategies to *resolve issues*	5.1 Problems and barriers to resolution are readily identified, critically evaluated and a range of response options are developed and planned 5.2 Most situationally appropriate and timely response is selected and safely implemented in accordance with organisational procedures 5.3 All actions are undertaken within organisational guidelines for professional behaviour
6. Analyse behaviour and implement reaction/response strategies	6.1 ***Situational behaviour*** of persons is accurately assessed with due regard to ***cultural diversity*** 6.2 Professionally responsible and flexible response strategies are planned and adopted in accordance with organisational policies and procedures 6.3 Potential causes of conflict and harmful behaviour are anticipated and responses to prevent escalation are selected and implemented 6.4 Relevant operational safety practices are identified and implemented where necessary 6.5 Personnel required to facilitate resolution are accessed, briefed and supported
7. Provide first response control, command and coordination at incidents	7.1 Level of ***first response*** control/command for each situation/incident is accurately assessed and responses are planned that comply with organisational operational policy 7.2 First response control/command/coordination of the police response to an situation/incident is carried out

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	in accordance with organisational policies and procedures
	7.3 Appropriate communication is maintained with supervising officer
	7.4 First response control/command/ coordination duties are transferred to appropriate person and that person is accurately briefed regarding the situation/incident

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- act autonomously
- analyse and plan appropriate action
- apply the use of force (restraining and self-defence tactics) including the use of lethal force
- command, control, coordinate initial emergency responses at an incident scene
- de-escalate incidents
- effectively communicate appropriate instructions/directives to suspects/victims and other members of the public
- identify situational behaviour and problems
- mediate as required
- minimise workplace risks to self, colleagues and the public
- resolve conflict
- use counselling techniques when required

Required Knowledge

- general duty of care responsibilities
- human behaviour (individual and group) and the impacts of age, gender, ethnicity, social background and recreational practices such as drugs, alcohol
- jurisdictional laws, by-law and regulations relating to offences against persons and property
- jurisdictional laws, policy and procedures covering discrimination and disability
- organisational policies and procedures covering reactive operational safety issues/practices
- potential risks associated with operational policing
- reporting requirements in relation to operational safety matters
- strategies to optimise safety under a range of operational scenarios
- use of force and its legal parameters

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- demonstrate knowledge of the patrol area
- accurately analyse and assess incidents and situations
- communicate effectively
- exercise discretion in taking action to avoid escalation of an incident or deterioration of a scene.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Patrolling could be on foot or mobile (vehicle, bike, on public transport) and should cover a range of community settings such as:	• Business, residential and industrial areas • Car parks • Entertainment/club/hotel areas • Shopping centres • Sporting grounds and other open areas
Effective communication includes:	• Being appropriate and professional at all times • Contributing to the safety of officers and the public • Ensuring all relevant scenario information is shared between officers present at a specific scene/incident • Ensuring lawful directions given are clearly understood by the recipient • Following organisational code of ethics for dealing with fellow officers and members of the public
Information/Intelligence may include:	• Activities • Counter terrorism • Forthcoming community actions/activities that could be of promotional assistance to policing • Groups • Previous unresolved crime/s and/or the whereabouts of criminals • Social/cultural/physical changes within a patrol area • Suspicious persons • Vehicles
Taskings should cover complete range of administrative and patrol activities and includes:	• Attendance at emergency incidents such as traffic accidents • Brawls • Counter terrorism • Court duties • Crowd control at public venues such as sporting events • Desk inquiries • Domestic disputes • General foot and mobile patrols • Major incidents • Mental health • Music concerts and festivals • Planning and management of investigations • Processions

© Commonwealth of Australia, 2025 Public Skills Australia

	• Rallies • Riots • Station duties • Triple zero (000) calls
Requests for assistance may include:	• People seeking general information or reporting disturbances or suspicious activity
Follow-up action may include:	• Analysis of information/intelligence gathered • Attendance in court • Interviews • Mental health • Preparation of regulatory/infringement notices/court documents/briefs • Provision of advice/intelligence to other police officers, etc. • Provision of further information
Relevant personnel may include:	• Business proprietors • Government/non-government agencies • Medical/hospital staff • Other emergency service workers • Partners/colleagues • Supervisors present/not present at the incident site • Suspect's/victim's family members
Analysing situations may include:	• Appreciating the incident • Determining response level • Determining whether security is required • Establishing communication • Situational analysis of evidence and information at hand
Resolving issues may include:	• Controlling emergencies such as road accidents • Counselling juveniles • Counter terrorism • Dealing with new or unexpected responses to police interventions • Dealing with verbal/physical abuse from the public • Domestic disputes • Life threatening encounters • Mental health • Responding to the different needs of people within a culturally diverse society, which should reflect a variety of situations where professional judgement regarding arrest, cautioning or reporting is required • Wide range of day-to-day normal and unexpected

© Commonwealth of Australia, 2025 Public Skills Australia

	situations that could arise
Situational behaviour may include:	• Full range of verbal and non-verbal behavioural responses to the presence of police officers or lawful instruction given by such officers
Cultural diversity encompasses:	• Recognition of the linguistic and cultural assets in the population as a valuable resource • Respect for and the accommodation of culture, language and religion of others within an Australian legal and institutional framework where English is the primary language • Utilising and promoting this resource to maximise the development of the nation
First response relates to:	• Responsibilities of the officer first at the scene/incident and could cover situations such as traffic accidents, brawls, hostage situations, counter terrorism, suspected crime scenes or other emergency situations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess and preserve crime/incident scenes and when required, assist in investigation process	1.1 Crime/incident scenes are correctly assessed and evaluated in preparation for investigation requirements 1.2 Where necessary crime/incident scenes are correctly secured to facilitate investigation activity and to preserve the integrity of the evidence 1.3 All actions and reports taken at crime/incident scenes optimise sourcing and preservation of evidence present and its lawful presentation in judicial processes
2. Collect and analyse information relevant to investigations	2.1 Every avenue for the collection of relevant and reliable information sources is assessed and evaluated in accordance with organisational guidelines 2.2 Relevant information is legitimately collected and documented 2.3 Evidence from incoming information is identified, secured and controlled in accordance with organisational guidelines
3. Seize, process and manage exhibits	3.1 Exhibits are identified, seized and documented 3.2 Continuity and security of exhibits is ensured to maintain integrity 3.3 Legislative and administrative procedures for handling, recording, storing and disposing of exhibits are complied with
4. Identify and investigate persons of interest	4.1 All organisational avenues of inquiry and investigative procedures are considered and utilised to identify persons of interest 4.2 All relevant information is utilised to identify and locate persons connected to the investigation 4.3 Organisational policies, guidelines and established Codes of Conduct are applied in the selection of investigation techniques or referral to other personnel for further investigation or advice

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. Conduct searches of persons, property and vehicles	5.1 Decision to ***search*** is made and conducted with due regard to lawful authority, organisational procedures, judgement of evidence at hand and surrounding environment 5.2 Thorough and meticulous search process that adheres to operational and occupational health and safety (OH&S) policy and procedures is followed 5.3 Property is seized/collected, recorded and stored in accordance with organisational policies and legislative requirements 5.4 Any damage and/or injuries are accurately documented as per organisational policies and procedures
6. Process persons of interest	6.1 **Breaches of the law** are identified and investigated in accordance with relevant jurisdictional law, policies and procedures 6.2 Decision to transport and ***process persons of interest*** is undertaken in accordance with statute law, organisational guidelines and professional Codes of Conduct 6.3 Relevant and accurate ***documentation*** is evaluated, prepared and submitted as required by law and/or organisational policies
7. Afford rights to persons of interest and victims of crime	7.1 All members of the community are treated in a fair, equitable and non-discriminatory manner 7.2 Victims are made aware of their legal rights in a caring and empathetic manner 7.3 Persons of interest are made aware of, and provided with, their legal entitlements under relevant jurisdictional laws and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply the use of force (defensive tactics) including the use of lethal force
- command, control, coordinate initial emergency responses at an incident scene
- contain and preserve various crime/incident scenes
- de-escalate incidents

© Commonwealth of Australia, 2025 Public Skills Australia

- effectively communicate appropriate instructions/directives to suspects/victims and other members of the public
- identify situational behaviour and problems
- manage and analyse evidence
- mediate
- minimise workplace risks to self, colleagues and the public
- resolve conflict
- use counselling techniques when required

Required Knowledge

- general duty of care responsibilities
- human behaviour (individual and group) and the impacts of age, gender, ethnicity, social background and recreational practices such as drugs, alcohol
- jurisdictional laws, by-laws and regulations relating to offences against persons, property
- organisational policies and procedures covering reactive and operational safety issues/practices
- potential risks associated with operational policing
- relevant legislation such as the Anti-discrimination Act, Disability Act
- reporting requirements in relation to operational safety matters
- requirements for crime/incident scene preservation and investigation
- strategies to optimise safety under a range of operational scenarios
- use of force and its legal parameters

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • exercise police powers with tact, discretion and sensitivity in an ethical manner and in accordance with legal and organisational policies and procedures. **Consistency in performance** Competency should be demonstrated over time and from across a range of actual/simulated workplace situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace and/or

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse information from the community	1.1 Sources of information and records relevant to the matter being examined are identified
	1.2 Information relevant to police issues is ***sought*** from the community (including ethnic communities) and is collected and recorded in accordance with jurisdictional laws, policies and procedures
	1.3 ***Information obtained*** is analysed, sorted and collated in relation to the purpose for which it has been obtained
	1.4 Accurate, concise, legible complete and understandable ***recording forms***/***reports*** are produced in the correct format
2. Take and compile statements	2.1 Comprehensive ***statements*** are taken
	2.2 All details relevant to the matter being examined are contained in these statements in accordance with jurisdictional laws, policies and procedures
	2.3 Active and accurate listening is used when taking statements
3. Conduct interviews	3.1 ***Interviews*** are planned, managed and conducted to gather maximum amount of information relevant to the matter being examined
	3.2 All interviewees are afforded their legal rights and are treated fairly and equitably
	3.3 Interview techniques employed comply with jurisdictional law and organisational Codes of Ethics/Practice
	3.4 Interviews are conducted and recorded in accordance with jurisdictional laws, policies and procedures
4. Use interview and evidence recording	4.1 All ***interview and evidence recording equipment*** is operated in accordance with jurisdictional laws,

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
equipment	policies and procedures 4.2 Records produced are authorised, stored and assessed in accordance with organisational procedures 4.3 Records produced are clear, audible and presentable as evidence to the courts 4.4 Maintenance and usage logs of equipment are maintained
5. Utilise police and other appropriate information/database systems	5.1 Information entered on database systems is accurate, understandable, complete, verifiable and the required organisational data entry security procedures are adhered to 5.2 Appropriate sources of information are identified and correctly accessed 5.3 Information is legitimately retrieved from appropriate database systems 5.4 Freedom of information and privacy of information laws and/or guidelines are complied with 5.5 Information is accessed/stored in accordance with organisational codes of ethics/practice
6. Exchange information with other members within the organisation	6.1 Communication links within the organisation/department are identified and utilised to exchange/share information 6.2 Information received is recorded and assessed for relevancy to the purpose/issue for which it was sought in accordance with organisational policies and procedures 6.3 Information is shared with organisationally sanctioned persons

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply investigative techniques
- apply questioning and interviewing techniques
- identify, label and store evidence
- operate interviewing recording equipment
- prepare and compile statements

© Commonwealth of Australia, 2025 Public Skills Australia

- use police information systems

Required Knowledge

- information types and their sources
- procedures and security measures for accessing, storing, retrieving and sharing data from police databases
- relevant jurisdictional laws, by-laws and regulations such as that relating to offences against persons, property, accessing information systems and privacy legislation
- rights of individuals in relation to the conduct of interviews and statement compilation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • relevant information and record it accurately. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time in a range of actual or simulated workplace environments. **Specific resources for assessment** Access is required to: • interview and evidence recording equipment.

	required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- deploy safety equipment at accident, crime, incident or other emergency situations
- maintain a professional safety first attitude to the use of police equipment
- undertake routine equipment maintenance
- use accoutrements/appointments to resolve situations
- use all types of commonly available police communications equipment
- use audio and visual recordings to produce evidence that is acceptable in courts
- use office equipment to produce, file, send/receive and secure documents, reports, proformas, maintenance/usage logs

Required Knowledge

- jurisdictional laws, policy and procedures covering the use of administrative and operational equipment
- legal parameters and organisational policies governing the use of force and use of lethal force
- organisational computer systems/document security system requirements
- organisational radio communication call signs, codes and phonetic alphabet
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- required document layouts, styles and filing mechanisms
- safety practices that must be followed when using police equipment
- various types of equipment maintenance logs/damage reports required and when they must be completed

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate	Assessment must confirm the ability to: • observe all safety principles for self and others

© Commonwealth of Australia, 2025 Public Skills Australia

competency in this unit	• use equipment in accordance with organisational policies and procedures and manufacturer's guidelines • comply with occupational health and safety legislation. **Consistency in performance** Competency should be demonstrated over time and across a range of simulated or actual workplace situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time in a range of actual or simulated workplace environment. In the case of weapons and use of force equipment, assessment should be undertaken in simulated workplace settings. **Specific resources for assessment** Access is required to: • equipment identified within the Range Statement • weapons firing ranges.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

wording in the Performance Criteria is detailed below.

Communications equipment may include:	• In-car computer systems • Loud hailers/PA systems • Police radios (mobile and in-car) • Telephones (fixed and mobile)
Appropriate language:	• Is that language style sanctioned by an organisation via its operational procedures manual
Computing equipment may include:	• Access control systems • Digital imaging • Network computers • Other surveillance/monitoring equipment that may from time to time be issued • Personal and in-car computers
Security of information and equipment may include:	• Access restrictions to equipment through passwords • Equipment locks • Log-in codes • Restricted areas
Computer applications may include:	• Data entry and/or retrieval from information systems • Specific computer applications • Word processing
Accoutrements may include:	• Handcuffs • Service revolver/pistols and other organisationally sanctioned/legal personal protection devices such as oleo-capsicum sprays and tasers • Standard/general issue batons
Due consideration and regard to personal safety and safety of others may include:	• Determining and implementing the response that will maximise the safety and security for all concerned • Quick and accurate analysis of the risks arising from the application of available/potential response strategies • Quick and accurate analysis of the situational risks present
Documentation refers to:	• Recording in equipment registers
Basic safety equipment may include:	• Equipment used at crowd control at sporting events, rallies, demonstrations, blockades, etc. • Equipment used support of other emergency service agencies such as at natural disasters, fires • First aid kits • Light wands, portable flashing lights, reflective and illuminated signs, hand held spotlights • Mobile RBT stations, mobile vehicle

© Commonwealth of Australia, 2025 Public Skills Australia

	inspection/search sites, etc. • Protective glasses • Reflective hats • Riot shields/helmets and facemasks etc. • Rubber gloves • Safety barriers and witches hats, which may be used in a variety of incident settings such as traffic accidents, hazardous material spillages, etc. • Wet weather and protective clothing including reflective safety vests
Faults, breakdowns and/or deficiencies may include:	• Computer system software/hardware failures • Physical damage to equipment • Reporting to the organisation's IT helpline or the person delegated to handle such matters

PUAPOLGD006A Facilitate effective communication in the policing environment

Modification History

PUAPOLGD006A Release 3: Unit Descriptor revised.

PUAPOLGD006A Release 2: Layout adjusted. No changes to content.

PUAPOLGD006A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to communicate verbally and non-verbally (using body language) in the policing environment.

This unit does not address written communication.

This unit replaces PUAPOL006B Facilitate effective communication in the workplace.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit will be applied in environments where effective communication skills and techniques are needed. The ability to assess situations and adapt communication techniques to enable effectiveness is embedded within this unit. Conflict resolution/negotiation skills to address issues/incidents are supported by this unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess situations and adapt communication technique accordingly	1.1 Verbal ***communication*** is tailored to identified audience of recipients from a range of communication approaches 1.2 ***Body language*** and non-verbal behaviour is correctly assessed and responded to 1.3 Active listening skills are employed and questioning techniques are used to clarify issues 1.4 Communication strategies adopted reflect consideration of cultural, gender, age issues and are in accordance with organisational policies and procedures 1.5 Where required expert advice is sought or referrals are made according to agreed procedures 1.6 Contradictions, ambiguities, uncertainty or misunderstandings are identified and checked with a range of sources and references
2. Communicate effectively in the workplace	2.1 ***Interpersonal*** communication techniques and ***skills*** are selected from a range of options and applied 2.2 Clear, concise, accurate and appropriate communication is applied in routine situations in accordance with organisational policies and procedures 2.3 Clear, concise, accurate and appropriate communication is applied in ***high demand situations***
3. Utilise conflict resolution/negotiation skills to address issues/incidents	3.1 Control and objectivity is maintained at all times in conflict situations 3.2 Situational conflict is, as far as possible, ***de-escalated*** 3.3 Persons in conflict are separated, where appropriate, and ***relevant solutions*** are negotiated or imposed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	that comply with organisational policies and procedures
	3.4 Where required, ***external agencies*** are accessed and utilised, according to agreed procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- adapt personal communication style to a variety of situations including those requiring sympathy and empathy
- effectively communicate to all persons, including suspects/victims and other members of the public, colleagues and other members of the organisation
- de-escalate incidents
- negotiate/resolve/mediate conflict (negotiation can take place with supervisors, colleagues and members of the public)
- use counselling techniques when required
- use interpreting services
- use verbal communication to take control of situations
- work in a team

Required Knowledge

- communicative processes and internal/external barriers (to the individual officer) to effective communication
- impact of age, gender, ethnicity/Aboriginality, special needs groups, personality, drugs/alcohol on the communicative process
- meaning of various body language forms
- organisational Codes of Ethics
- relevant legislation (such as Anti-discrimination Act, Disability Act)
- relevant organisational policies and procedures (such as those covering verbal communication requirements, critical incident negotiation)
- various support agencies available and the types of services offered

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the

Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • effectively interact and communicate with colleagues and clients. **Consistency in performance** Competency should be demonstrated over time and from a range of actual workplace or simulated situations.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Situations:	• Cover all taskings undertaken by officers, whether reactive or proactive patrolling, undertaking station duties etc. and relate to circumstances in which the

© Commonwealth of Australia, 2025 Public Skills Australia

	officer is in contact with other persons
	• And may include:
	  • criminals
	  • face-to-face
	  • fellow officers
	  • individuals or groups of persons from the public/community
	  • suspects
	  • victims
	  • giving and/or receiving instructions and lawful direction
	  • interviewing persons
	  • providing verbal reports or seeking information
	  • responding to inquiries

Communication may include:	• Formal, informal, pre-planned, and involve functional area/authority personnel, and may be for:
	  • occupational health and safety
	  • operational planning
	  • briefings/debriefings e.g. shift changeovers; parades
	  • operations assessment/debriefings
	  • interactions with media

Body language may include:	• Non-verbal characteristics exhibited by each person in response to the presence of police officers or lawful instruction given by such officers • Characteristics that represent positive compliant behaviour or a negative non-cooperative/aggressive response
Interpersonal skills may include:	• Appropriate language • Empathy • Fairness • Recognition and professional response to cultural diversity
High demand situations may include:	• High stress • Managing violent, abusive or highly emotive persons • Situations requiring quick decision making • Volatile situations
Areas requiring resolution may include:	• Arrest scenes • Crime scenes • Controlling crowds • Domestic disputes, serving summons/orders

© Commonwealth of Australia, 2025 Public Skills Australia

- Disputes at traffic accident sites
- Disputes over procedural issues such as at. rallies, demonstrations, processing/charging persons
- Disruptive public behaviour
- Life threatening situations (such as family hostage situations, confrontations with armed persons)
- Workplace disputes, workplace complaints
- Workplace grievance situations

De-escalation means:

- Reducing a situation to a point where the issue is reduced to a controllable level and the risk to life or property is minimised

Relevant solutions, depending on the actual situation, may include the use of one or more techniques and attributes such as:

- Accessing further assistance from fellow officers, other emergency service, community support agencies, victim's/suspect's relations and/or friends
- Arresting, cautioning, reporting and detaining
- Developing appropriate response strategies - taking into account the needs and characteristic of factors that can impact on the communication process such as Aboriginality, age, ethnicity, family situation/security, gender, geographic and demographic impacts, health and physical capacity
- Impacts of alcohol and legal (recreational and prescription) and illegal drugs
- Peer group pressures
- Personality
- Previous experiences/encounters with police/other authorities
- Self image
- Employing de-escalation processes
- Issuing lawful instruction/direction
- Providing on-the-spot counselling
- 'Use of force' and/or 'use of lethal force'

External agencies may include both government and non-government counselling, mediation and support agencies such as:

- Aboriginal liaison centres
- Child protection agencies
- Community services departments
- Crisis and sexual assault referral centres
- Disability support groups
- Ethnic advisory services
- Health departments
- Internal police support and counselling services
- Local church counselling centres
- Women's refuges

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine level of assistance required by persons in care or custody	1.1 Initial assessment is made of extent and nature of assistance required by ***persons in care or custody***
	1.2 Initial assessment of assistance required is communicated to appropriate personnel in accordance with organisational policies and procedures
2. Provide for persons in care or custody	2.1 Persons in care or custody are provided for in accordance with organisational policies and procedures
	2.2 Persons in care or custody are treated in a professional and ethical manner at all times
	2.3 Documentation, as required under jurisdictional laws, policies and procedures, is complied with
	2.4 Guidelines covering the special requirements of ***particular categories of persons*** are strictly adhered to
	2.5 ***Security of persons in care or custody*** is maintained and organisational operational safety guidelines adhered to
	2.6 Conditions of persons in care or custody are routinely monitored and recorded and remedial action is taken where appropriate
3. Process persons in care or custody	3.1 Persons in care or custody are ***processed*** in accordance with organisational policies and procedures
	3.2 Cultural awareness, sensitivity and discretion is observed when processing persons in care or custody
	3.3 Documentation, as required under organisational policies and procedures, is complied with
	3.4 Person's legal rights are ensured
4. Escort/transport persons in care or custody	4.1 Persons are ***escorted*** in accordance with organisational policies and procedures
	4.2 Any special circumstances of persons are made

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	known to all ***escorting officers***
	4.3 Correct documentation is conveyed with persons
	4.4 Persons are conveyed in a safe and secure manner and organisational operational safety guidelines are adhered to
5. Protect persons in care or custody and others from harm	5.1 Safety and hygiene standards are ***maintained*** according to organisational standards, relevant legislation, regulations and guidelines
	5.2 ***Hazards*** and risks are identified and ***appropriate action*** is taken to prevent harm

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- balance prescribed processes and procedures (such as processes related to introductions and identification) with other priorities that may occur while managing persons in care or custody
- deal with a range of uncooperative persons
- identify and arrange for the needs of specific categories of persons in care or custody
- observe, assess and classify human behaviour in terms of custodial risks
- optimise the potential safety and security of persons in care or custody
- process persons into/out of custodial care
- secure and escort persons

Required Knowledge

- categories of persons and their particular needs
- duty of care responsibilities
- ethnicity and cultural differences
- issues/problems that can arise under police custodial care
- laws, policies and procedures pertaining to providing for, processing and escorting persons in care or custody
- police cell routines, procedures and security arrangements
- relevant legislation, regulations and guidelines
- support agencies/persons/groups and their contact points

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- ensure security and physical wellbeing of persons in care or custody.

Consistency in performance

Competency should be demonstrated over time and from a range of actual/simulated workplace situations involving different categories of persons.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

ELEMENT	PERFORMANCE CRITERIA
prosecuting authority	to support the prosecution's case 4.2 Informal and formal communication channels are maintained with ***prosecuting authority*** 4.3 Judicial guidelines, protocols and legal requirements are observed and adhered to at all times
5. Undertake *court* and/or *post-court procedures*	5.1 Briefs of evidence and other documents are acted upon in accordance with organisational policies and procedures 5.2 Property and exhibits are returned or disposed of in accordance with organisational policies and procedures where required 5.3 ***Relevant parties*** are notified of court results in accordance with organisational requirements 5.4 Where required, avenues of possible further action are constructively and objectively discussed with a prosecuting authority 5.5 ***Proceedings*** and ***protocols*** relevant to the jurisdiction involved are adhered to throughout the proceedings

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in writing (prepare briefs of evidence, exhibit register)
- communicate orally (briefing, responding to questioning, listening, reflecting, establishing rapport, negotiating, resolving conflict)
- implement operational safety skills
- maintain an acceptable demeanour (in relation to issues such as appearance, confidence, deportment, dress standard)
- make decisions and solve problems
- manage computers and information
- manage witness/victim, in particular by using cultural awareness skills, ethical behaviours and integrity
- organise and manage time effectively

Required Knowledge

- compilation of a brief of evidence
- court procedures and processes

© Commonwealth of Australia, 2025 Public Skills Australia

- government and policy environments within which interviews will be managed
- organisational goals and objectives
- potential discussions with prosecuting authorities (which may be formal or informal and may occur before, during or after a trial)
- potential influencing circumstances (such as likelihood of repeat offences, nature of the person of interest's antecedents, protection of witnesses, tampering with evidence)
- professional standards (such as impartiality, integrity, language, respect for people and offices held, voice clarity)
- relevant law (including the rules of evidence, continuity of evidence), policies and procedures
- victim/witness support services

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- apply organisational policies and procedures in effectively preparing and managing evidence, witnesses and person/s of interests.

Consistency in performance

Competency should be demonstrated over time and from a range of actual workplace or simulated situations.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Documents may include:

- Briefs of evidence
- Court brief/summary of facts
- Inquest briefs
- Reports or legal opinion
- Requests for medical and other specialist reports
- Statements/affidavits
- Victim impact statements

Authorities may include:

- Bail/watch house
- DPP
- Legal representatives
- Officer in Charge
- Relevant court

Liaison and support for witnesses:

- Is a continuing process and will therefore take place before, during and after a trial

Support agencies are statutory or voluntary and may include:

- Child welfare agencies
- Counselling agencies
- Court-based witness assistance
- Medical services
- Sexual assault units
- Victims of crime associations

Monitoring person/s of interest may include:

- Bail conditions
- Curfew checks
- Reporting conditions
- Residential checks
- Respondents in family court matters

© Commonwealth of Australia, 2025 Public Skills Australia

Procedures may include:	• People summonsed or on notice to appear • Person of interests on bail • Others subject to court orders e.g. victims/witnesses
Prosecuting authority may include:	• Coroner • And assistance to the prosecuting authority may be required before, during and after court
Court procedures and processes may include:	• Being advised of obligations and format for giving evidence • Being advised of the procedure for obtaining witness fees • Being kept informed of investigation/court status
Post-court procedures may include:	• Discussion of possible appeal • Implementation of judicial orders such as for confiscation or destruction of property
Relevant parties to be notified may include:	• Aboriginal legal aid • Defence forces • Foreign embassies • Government departments • Internal and external agencies • Other police • Parents/care givers • Victim • Witness
Proceedings and protocols may include:	• Judicial and quasi judicial tribunals • Rules of court

ELEMENT	PERFORMANCE CRITERIA
	policies and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access databases for the purposes of checking applicant details/history
- accurately complete departmental forms and reports complying with organisational requirements regarding completion/currency of maintenance logs, patrol records
- accurately operate a computer keyboard
- produce clear and concise written communication

Required Knowledge

- by-laws and regulations relating to the preparation of documentation
- storage of property/money
- jurisdictional laws
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- various types of departmental and licensing system documents/proformas/logs and the preparation requirements for each

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- accurately prepare documentation, receipt, storage and recording of money/property consistent with organisational policies, procedures and guidelines.

Consistency in performance

Competency should be demonstrated over time and from a range of simulated and/or actual workplace

© Commonwealth of Australia, 2025 Public Skills Australia

situations.

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time in a range of actual or simulated workplace environments. **Specific resources for assessment** Access is required to: • appropriate departmental proformas, licence applications, property books and storage systems • information databases to enable applicant suitability checks.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Administrative tasks cover the full range of tasks undertaken in support of the function's operational activities and may include:	• Equipment maintenance • Initiating telephone calls • Organising transport • Stores requisitions and distribution
Correspondence and records	• Audible and accountable documents • Audiotape records

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	• Computer • Formatted documents • Internal and external memos • Investigation files
Departmental reports and forms may include:	• Accoutrements usage reports • Coroner's reports • Exhibit/evidence reports/briefs • Incident reports • Interview reports • Motor vehicle log books • Patrol activity reports • Property book and disposal schedules • Time sheets, leave forms
Money and property received may or may not:	• Become evidence in later court proceedings
Receiving money and property may include:	• Money/property found and handed in to police • Money/property recovered/confiscated in the process of an investigation • Money/property recovered from accident scenes
Disposing of money and property of may include:	• Forfeiture to the Crown (under Confiscated Assets laws) • Organisationally sanctioned means such a public auction • Return to lawful claimant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model high standards of personal performance, ethics and integrity	1.1 ***Own performance*** standards consistently serve as a role model for other officers and the community as a whole 1.2 Personal and professional integrity is demonstrated to engender confidence and respect 1.3 Commitment to jurisdictional laws and organisational policies, procedures and objectives is constantly demonstrated
2. Review and monitor own performance	2.1 Required personal and ***professional performance standards*** are readily identified and acknowledged 2.2 ***Self-assessment and reflection*** in practice are regularly used to ***monitor*** performance against established standards and to accurately identify personal strengths and weaknesses 2.3 Formal and informal performance feedback is regularly sought, accepted and ***acted upon appropriately*** 2.4 Tasks are carried out to achieve outcomes sought and to minimise resource usage
3. Develop and maintain ongoing personal competence	3.1 Currency of relevant professional operational competencies is maintained 3.2 ***Personal development strategies*** are identified, planned and implemented and results are evaluated 3.3 New developments and trends in policing are identified and associated knowledge and skills are identified, acquired and applied
4. Manage personal work priorities	4.1 Jobs/tasks are ***prioritised*** and undertaken in accordance with unit team goals 4.2 Competing demands are assessed and organised within time constraints to achieve individual, team

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and organisational priorities
5. Assist and support other personnel	5.1 Productive and harmonious work environment is promoted through interaction with others 5.2 Encouragement, ***support and advice*** is provided to personnel as required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- deal with and effectively respond to, issues/events that challenge professional ethics
- display integrity in behaviour including the reporting of breaches to appropriate authorities
- maintain consistently high levels of personal presentation (dress code, mannerisms, respectfulness, etc.)
- maintain consistently high levels of professional ethics and integrity in all work practices and dealings with the community
- plan and implement personal improvement plans
- recognise, accurately assess and acknowledge personal strengths and weaknesses
- seek out and respond effectively to feedback related to personal performance

Required Knowledge

- acceptable/non-acceptable behaviour and practices
- cultural awareness
- ethical and integrity issues confronting police officers
- internal/external professional support and development mechanisms
- internal procedures for dealing with breaches of professional ethics
- methods for assessing/reviewing personal performance and planning and implementing effective personal improvement strategies
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- professional associations
- professional integrity and behaviour standards
- registration bodies (if applicable)
- relevant organisational codes of practice/ethics
- statements of values

© Commonwealth of Australia, 2025 Public Skills Australia

- team dynamics and its impacts on personal work performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- consistently maintain professional performance standards.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate orally and in writing
- evaluate information and disseminate it to customers
- liaise with various levels/types of the customers and gain their support for policing activities
- negotiate effectively
- present/model a professional ethical approach to all levels of customers
- provide instructions/make presentations

Required Knowledge

- application of, and adherence to, security classification procedures
- customer needs analysis and feedback gathering strategies
- duty of care responsibilities
- jurisdictional laws
- negotiation practices and techniques
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- policies and procedures in particular legislation pertaining to freedom of information and privacy issues procedures
- range of available support services and agencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- respond to customer needs
- provide a quality service
- communicate with different types of customers
- provide accurate information to customers.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish relationships to convey and receive information and ideas	1.1 Communication is established with internal/external ***stakeholders*** and their needs are identified
	1.2 ***Information and ideas*** are conveyed and received in a manner which is sensitive to social and cultural diversity
	1.3 Input from others is sought in developing new ideas
2. Develop productive relationships	2.1 Regular consultation is undertaken with a range of internal and external stakeholders
	2.2 Interpersonal styles and methods are used in line with the social, work and cultural environment
	2.3 Issues raised through consultations are dealt with and resolved promptly or referred to the appropriate personnel for resolution
3. Maintain productive working relationships	3.1 Productive working relationships are maintained with stakeholders in relevant agencies, services and/or community groups
	3.2 Concerns held by other agencies are addressed positively, honestly and respectfully
	3.3 Contact with other agencies is maintained according to terms agreed to by the relevant stakeholders
	3.4 Outcomes of consultation are made known to stakeholders

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

© Commonwealth of Australia, 2025 Public Skills Australia

- communicate and negotiate with colleagues, supervisors and subordinates
- counsel and mentor colleagues
- monitor work performance, formally and informally
- motivate, lead and direct individuals/teams
- network
- overtly display professionalism in all day-to-day work activities
- respond to the concerns of individuals and work teams

Required Knowledge

- general and/or specialised policing tasks as appropriate to area of supervision
- goal setting
- jurisdictional laws
- mentoring/coaching/developing others
- organisational corporate goals, plans and strategies
- organisational policies and guidelines (that is, established gazetted or implied guidelines for professional policing practice) covering operational safety issues/practices
- principles of networking
- professionalism as expressed through an organisation's codes of ethics/codes of practice
- recognising individual differences
- relevant policies and procedures, in particular those related to work practices
- rostering and workplace agreements, and disciplinary procedures
- strategies to motivate and promote working relationships
- work performance review processes and mechanisms

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop effective and sound internal and external relationships which facilitate the achievement of planned outcomes.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Networks may be internal or external to the organisation and/or the workplace and could include links with:	• Community groups/individuals • Internal departments/sections • Local businesses • Local disadvantaged support groups
Stakeholders may include:	• External (government/non-government agencies, local community services including ethnic communities and groups, businesses, individuals) • Internal (colleagues, supervisors, other police personnel)

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare vehicle for operational driving	1.1 ***Vehicle*/s** appropriate to operational requirements and terrain are selected 1.2 ***Pre-drive check*** of vehicle, equipment and accessories is performed to ensure availability and serviceability in accordance with organisational policies and procedures and ***manufacturer's specifications*** 1.3 ***Start-up checks*** are performed in accordance with training/organisational policies and procedures 1.4 Audible and visual warning systems are checked for operation in accordance with organisational policies and procedures 1.5 Vehicle and operational response documentation is recorded in accordance with organisational policies and procedures
2. Drive vehicle in *operational conditions*	2.1 ***Defensive driving techniques*** are applied in accordance with organisational policies and procedures 2.2 Vehicles are driven and controlled in accordance with manufacturer's specifications, ***road and traffic conditions*** and organisational policies and procedures 2.3 Appropriate ***risk management*** strategies are applied during ***operational driving*** to maintain operational safety, in accordance with workplace environment 2.4 Most efficient route of travel is anticipated and monitored considering traffic flows and environmental conditions 2.5 Ethical and professional behaviour is applied when driving police vehicles in accordance with organisational policies and procedures 2.6 ***Situational awareness*** is applied in accordance with organisational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply engine power management and safe driving strategies
- apply vehicle handling techniques, including defensive driving
- assess and manage risk
- manage personal stress and fatigue during urgent duty and pursuit situations or when driving in operational conditions
- maintain situational awareness
- monitor and anticipate traffic hazards and take appropriate action
- perform vehicle checks
- plan route, navigate roads and read maps
- solve problems
- use on-board vehicle technology, including audible and visual warning systems
- use police communication systems and processes

Required Knowledge

- causes and effects of fatigue on drivers
- ethical considerations, including public expectations and perceptions of police driving
- jurisdictional reporting and recording requirements
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant jurisdictional legislation such as that relating to traffic and road rules, occupational health and safety (OH&S)
- relevant jurisdictional policies and procedures such as that relating to driving, OH&S, accidents, urgent duty/pursuit driving, drugs and alcohol
- risk assessment strategies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence	Assessment must confirm the ability to:

© Commonwealth of Australia, 2025 Public Skills Australia

required to demonstrate competency in this unit

- prepare vehicles for operational driving
- drive the vehicle in operational conditions
- plan for potential traffic flow problems
- demonstrate ethical and professional driving.

Consistency in performance

Competency should be demonstrated consistently through practical performances of operational driving and over time to ensure the competence has been achieved.

Maintaining personal safety, safety awareness and awareness of traffic conditions and other road users is critical.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in either an operational or simulated operational situation under varying conditions and contexts.

Specific resources for assessment

Access is required to:

- operational vehicle
- appropriate equipment and resources
- real or simulated policing environment.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Vehicles may include:

- Automatic and manual vehicles
- Marked and unmarked four wheel drive vehicles
- Marked and unmarked motor cycles
- Marked and unmarked police sedans
- Marked and unmarked station wagons

Pre-drive check may include:

- Battery
- Bio hazards (blood etc)
- Brakes (park, pedal [pressure/travel], anti-lock braking systems, including warning light)
- Electronic stability program
- Equipment (operational, PPK)
- Fan belts
- Fuel
- Instrument/control layout
- Lights (external - headlamps, indicators, etc.)
- Operation of emergency warning devices (lights/sirens)
- Mirrors
- Mobile data terminal or equivalent
- Physical check or scan of gauges
- Police radio/mobile data terminals
- Radio
- Registration
- Roadworthiness
- Seat belts
- Steering
- Traction control
- Tyres and tyre pressures
- Vehicle fluids (includes oil leaks)
- Visual inspection of vehicle (internal, external and underneath)
- Weapons/foreign objects
- Wheel changing equipment
- Wheels/tyres (including spare)
- Windscreen/wipers/wiper blades
- Warning devices, including instrumentation
- Windows (electric/manual operated)

© Commonwealth of Australia, 2025 Public Skills Australia

Manufacturer's specifications may include:	• Clearance height • Engagement procedures • Engine characteristics • Engine horsepower rating • Fuel capacity for range • Maximum vehicle weight • No-spin locking differential • Radius of turning circle • Safety procedures • Systems warning functions
Start-up checks may include:	• Adjusting seats and mirrors • Fastening seatbelts • Re-checking brake pedal • Re-checking warning lights and systems • Starting vehicle in accordance with training/organisational procedures • Unusual engine compartment noises
Operational conditions may include:	• Driving in special environments (e.g. on actual airport movement areas) • Hazardous environmental conditions (e.g. bushfires) • Prevailing weather • Sealed/unsealed roads • Time of day/night • Traffic conditions • Urban/rural • Visibility
Defensive driving techniques may include:	• Accelerating • Braking • Cornering • Correcting and overtaking • Night driving • Skid avoidance • Steering techniques (such as hand over hand steering, fixed hand steering, pull/push steering)
Road conditions may include	• Effect of weather on roads • Foreign material • Road surface (sealed/unsealed, corrugated, sand etc.) • Visibility
Traffic conditions may include:	• Community functions and events • Day/night • Parking • Peak/non-peak

© Commonwealth of Australia, 2025 Public Skills Australia

	• Road surface • Traffic pattern and density • Visibility • Weather conditions, including temperature and climate
Risk management may include:	• Analysing/assessing risk • Controlling/treating risk • Hazard assessment • Identifying risk • Monitoring • Personal, fellow worker or public safety • Reviewing
Operational driving may include:	• Levels of response • Procedures/policies • Pursuit driving • Risk assessment • Routine patrol • Traffic conditions • Traffic legislation • Type of vehicle, in accordance with jurisdictional requirements or policy • Type or nature of incident • Urgent duty driving • Warning devices
Situational awareness may include:	• Managing operational response • Multi-tasking • Receiving and processing incoming information from a variety of sources including police radio, partner, other vehicles, own observations, other communications, previous knowledge, etc.

PUAPOLGD015A Employ media strategies

Modification History

PUAPOLGD015A Release 3: Unit Descriptor revised.

PUAPOLGD015A Release 2: Layout adjusted. No changes to content.

PUAPOLGD015A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to employ media strategies to enhance work outcomes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Media strategies may be used for a range of reasons including to increase community confidence or to seek information from witnesses to events.

This unit applies to people required to effectively employ media strategies in a work context. It requires the purpose for media involvement and potential media interest in the information to be balanced with legal, operational and organisational requirements. It also requires a planned release of authorised, relevant information in an appropriate format.

In liaising with the media, this unit requires the establishment of an effective relationship with media personnel, compliance with organisational protocols and the maintenance of a positive organisational image at all times.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media involvement	1.1 Purpose of ***media*** involvement is identified and recorded in ***relevant documents*** as appropriate
	1.2 Media's potential interest is assessed to determine the ***type of information*** to be released
	1.3 ***Legal***, ***operational and organisational responsibilities*** are balanced against providing information to the media
2. Provide information to the media	2.1 Release of information is planned to avoid the release of unauthorised information
	2.2 ***Relevant and succinct information*** is supplied to the media in accordance with organisational policies and guidelines
3. Liaise with media	3.1 Relationship is established with the media that facilitates the release of information as planned
	3.2 ***Positive image of the organisation*** is maintained when dealing and/or corresponding with the media
	3.3 ***Organisational protocols*** are followed when liaising with the media

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attend to detail
- communicate facts in a fluent, clear and interesting manner
- liaise with media and other organisational personnel

© Commonwealth of Australia, 2025 Public Skills Australia

- make media presentations
- prioritise between operational responsibilities and provision of information to media
- retain professionalism under duress
- show empathy with victims and operational personnel
- undertake public speaking as required

Required Knowledge

- communication techniques
- establishing media relationships
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisational protocols relating to media liaison, such as legal and organisational requirement relating to confidentiality, disclosure, libel, accuracy, discrimination
- requirements of media to present information in a newsworthy/informative manner
- role of media in disseminating information

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- identify, select and use various media strategies suited to specific instances
- communicate authorised information to the media accurately and in accordance with relevant jurisdictional policies and procedures
- liaise with the media portraying a positive image of the organisation within established organisational protocols

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the outcome and apply the competence in different situations or environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or an environment that closely resembles normal work

practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Media includes:

- Community and ethnic television
- Internal media teams/units
- Mainstream media
- Print and broadcast media

Relevant documents may include:

- Email or other correspondence to internal media teams/units
- Investigation plan
- Media release forms

Type of information may include:

- Content of information to be released (who, what, when, where)
- Format of information to be released (text, video footage, photos and other relevant forms)

Legal, operational and

- Ensuring the accuracy of the content

PUAPOLGD016A Perform inter-jurisdictional police duties

Modification History

PUAPOLGD016A Release 3: Unit Descriptor revised.

PUAPOLGD016A Release 2: Layout adjusted. No changes to content.

PUAPOLGD016A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to perform the roles and functions required for police performing duties in more than one jurisdiction.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace involves applying relevant policies and legislation for police working in more than one police jurisdiction.

This work would typically be undertaken by police working within close proximity to state and territory borders where there is a requirement to work closely and within neighbouring jurisdictions.

Licensing/Regulatory Information

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to cross state/territory borders	1.1 ***Roles and responsibilities*** of a police officer working within an inter-jurisdictional context are identified in accordance with home and/or host jurisdictional requirements 1.2 Given ***workplace situations*** are assessed as requiring appropriate execution of inter-jurisdictional police powers 1.3 ***Standard operating procedures*** (SOPs) of home and/or host jurisdiction are applied when seeking permission to enter host jurisdiction 1.4 Rationale and circumstances warranting entry are clearly provided and recorded in accordance with jurisdictional requirements, using appropriate communication technology
2. Apply appropriate legislation	2.1 Workplace situation is assessed and relevant host jurisdictional ***legislation*** is obtained and considered accordingly 2.2 Any differences in legislation between home and host jurisdictions are considered and course of action is determined accordingly 2.3 Appropriate police response is undertaken in accordance with home and/or host jurisdictional legislation, workplace situation and occupational health and safety (OH&S) considerations
3. Apply relevant policies and procedures	3.1 Applicable host jurisdiction ***policies and procedures*** are obtained and interpreted in accordance with the workplace situation 3.2 Any implications of exercising inter-jurisdictional police powers are identified, considered and a course of action is determined accordingly 3.3 Police response is undertaken in accordance with home and/or host jurisdictional policies and procedures, the workplace situation and OH&S considerations

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Participate in host jurisdictional briefings and debriefings	4.1 Host jurisdictional briefings and debriefings are ***attended*** in accordance with jurisdictional policies and procedures 4.2 Relevant stakeholders are identified and engaged in accordance with home and/or host jurisdictional requirements 4.3 Relevant ***reports*** are completed and disseminated in accordance with home and/or host jurisdictional requirements

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse and plan appropriate action
- apply use of force (restraining and self-defence tactics) including the use of legal force
- de-escalate incidents
- effectively communicate safety issues/concerns to colleagues, supervisors and when necessary, other emergency services and the public
- evaluate self (via diary, notebook, personal log/journal, verbal discussion)
- maintain ethical behaviour and professionalism
- make decisions and manage priorities
- minimise workplace risks to self, colleagues and the public
- participate in briefings and debriefings
- recognise and accurately assess situational risks/hazards
- use communications technology effectively

Required Knowledge

- communication processes
- cross jurisdictional legislation, by-laws and regulations relating to offences against persons, property or statute
- general duty of care and OH&S responsibilities
- host jurisdictional legislation and policies and procedures on urgent duty/pursuit driving
- organisational policies and procedures covering reactive operational safety issues/practices
- potential risks associated with operational policing
- reporting requirements in relation to operations

© Commonwealth of Australia, 2025 Public Skills Australia

- SOPs relating to cross border pursuits
- strategies to optimise safety under a range of operational scenarios
- use of force and its legal parameters

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- accurately assess and analyse the range of workplace situations

perform duties and tasks in accordance with host jurisdictional legislation, and organisational policies and procedures required of an officer performing inter-jurisdictional role.

Consistency in performance

Competency should be demonstrated over time to ensure that the individual is assessed across a wide variety of situations within the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in a workplace or simulated environment.

Specific resources for assessment

Access is required to:

- relevant policies, procedures and legislation
- operational procedures manual
- code of conduct
- relevant circulars, handbooks, fact sheets, internet sites.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Roles and responsibilities may include:

- Alcohol related driving offences
- Blood tests
- Breath testing
- Code of ethics
- Cross border information
- Custody
- Entry to vehicles
- Extra-territorial warrants
- Extraditions
- Mental health
- Patrols
- Use of force

Workplace situations may include:

- Acting in course of operation order
- Foot or mobile patrols
- Inter-state/territory search warrants
- Lawful and unlawful entry into jurisdiction
- Obtaining permission to enter jurisdiction
- Performing authorised surveillance
- Pursuits (engaged in)
- Responding to incidents requiring immediate police attention
- Safety of public
- Stop, search and detain
- Traffic enforcement

Standard operating procedures may include:

- Adhering to state/territory safe driver policy
- Any operational reason to cross state/territory

PUAPOLGD017A Employ protective service methods

Modification History

PUAPOLGD017A Release 3: Unit Descriptor revised.

PUAPOLGD017A Release 2: Layout adjusted. No changes to content.

PUAPOLGD017A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to undertake protective service functions within an operational environment.

The ability to diligently patrol, respond to incidents, conduct searches, analyse behaviour, caution and arrest persons are essential to performance. In practice, any of these functions may overlap with other work activities such as using operational equipment, managing professional performance, workplace communication and operational safety.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit of competency has a wide application in the public safety industry in the roles involving protective service activities. Competency requires operational, legal and procedural knowledge applicable to the protective service role. The unit is applied within professional standards, relevant legislative and organisational guidelines.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake patrols	1.1 ***Patrol*** objectives are identified and confirmed
	1.2 Potential threats or incidents are identified and plan of action is formulated in accordance with organisational procedures
	1.3 Equipment is prepared and checked for serviceability in accordance with organisational requirements and manufacturer's instructions
	1.4 Personal dress and presentation are checked in accordance with organisational requirements
	1.5 Patrol is carried out in accordance with patrol objectives and organisational procedures
	1.6 Personal security and safety is maintained in accordance with organisational requirements
	1.7 Security breaches are detected and actioned in accordance with organisational procedures
	1.8 High visibility presence/deterrence is provided in accordance with organisational requirements
2. Respond to incident	2.1 Potential threats or incidents are identified and responded to in accordance with organisational procedures
	2.2 Information about the ***incident*** is received, gathered confirmed and communicated
	2.3 First response is planned and implemented with roles and responsibilities clearly identified
	2.4 Response to incident is carried out by the most effective route
	2.5 Incident risks and hazards are identified and assessed to maximise officer and public safety
	2.6 Safe areas are identified and established
	2.7 Effective first response command and control is

ELEMENT	PERFORMANCE CRITERIA
	exercised and further assistance is requested where incident cannot be resolved by attending parties
	2.8 Area concerned is evacuated, cordoned and contained in accordance with operating procedures
3. Conduct searches	3.1 Decision to ***search*** is made and conducted with due regard to lawful authority and/or client requirements and organisational procedures
	3.2 Methodological search process is undertaken in accordance with operational and occupational health and safety (OH&S) policies and procedures
	3.3 Item/s found are either contained, seized, recorded or stored in accordance with organisational policies and legislative requirements
	3.4 Any damage and/or injuries incurred are accurately documented as per organisational policy
4. Caution, report or arrest persons	4.1 ***Breaches of the law*** are identified in accordance with relevant jurisdictional law, policies and procedures
	4.2 Personal discretion is used to caution, report or arrest and actions taken are explained to the person/s concerned in accordance with organisational guidelines and professional codes of conduct
	4.3 Person/s are released from custody when criteria that formed the basis for the arrest no longer exists
	4.4 Person/s held in custody are transferred to relevant jurisdiction in accordance with organisational policies and procedures
5. Carry out post incident actions	5.1 Notebook entries are recorded to document all actions and observations
	5.2 ***Reports*** are completed and submitted to relevant personnel in accordance with organisational policies and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply tactical awareness techniques and strategies
- assess risk in handling incidents

© Commonwealth of Australia, 2025 Public Skills Australia

- communicate effectively to manage incidents and to provide situation reports by:
- speaking clearly and concisely in public
- using radio communication
- communicating in writing
- direct and control traffic
- follow duty of care towards persons in custody
- implement first response command and control procedures
- implement situational awareness processes and procedures
- make and report on, observations
- patrol
- search
- solve problems and make decisions
- use defensive tactics
- work in a team

Required Knowledge

- cordon and containment principles
- critical incident roles and responsibilities
- cultural diversity, which encompasses respect for and the accommodation of the culture, language and religion of others
- human behaviour (individual and group) and the impacts of age, gender, ethnicity, social background and recreational practices such as drugs and alcohol
- issues/problems that can arise with persons in custody
- officer safety principles
- organisational policies, procedures and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- potential risks associated with operational protective service roles and responsibilities
- protective service responsibilities contained within the National Counter Terrorism Plan
- search and evacuation procedures
- strategies to optimise safety under a range of operational scenarios
- tactical communication
- traffic direction principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Patrols may be on foot, vehicle, bike and may include:

- Airports
- Embassies, high commissions, consulates and official residences
- Official establishments
- Other government facilities
- Overseas missions
- Other areas as directed by governmental and organisational requirements

Incidents may include:

- Aircraft crash
- Aircraft hijacking
- Alarms
- Assassination or attempted assassination
- Bomb threats
- Chemical, biological, radiological and nuclear (CBRN)
- Critical infrastructure outage
- Damage to commonwealth property
- Demonstrations
- Domestic altercations
- Hostage takers
- Identified explosive device
- Other terrorist or criminal activity
- Natural disasters (fire, gas leak)
- Post bomb blast
- Suspect items
- Suspect persons
- Suspicious vehicles
- Theft of property
- Traffic accidents or incidents
- Trespassers

Search may include:

- Aircraft
- Buildings
- Open areas
- Persons
- Property

PUAPOLGD018A Perform court security duties

Modification History

PUAPOLGD018A Release 3: Unit Descriptor revised.

PUAPOLGD018A Release 2: Layout adjusted. No changes to content.

PUAPOLGD018A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to undertake court security duties within a range of courts. Court security enforces laws relating to the safety, security, good order and management of the court premises.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to authorised officers as defined within relevant jurisdictional court security legislation.

The unit addresses identifying appropriate court security measures to maintain the safety of all court users. It also covers providing prompt and effective response to any security issues and potential disruptions to the court including high-risk court cases.

The unit involves identifying and facilitating any specific requirements of individual courts and conducting constant risk assessment pre/post and during court hearings. Stakeholders may include court officials, correctional service staff, community groups, police and other relevant parties including the media, victim and family members, witnesses and members of the public.

Court security duties may be conducted in Supreme, County or Magistrates Courts, other tribunals or authorised bodies entitled to hear, receive, or examine evidence in accordance with relevant legislation.

Sound judgement with regard to operational policing methods is required to ensure the safety of all court users within courtrooms and law court precincts. Sound knowledge of relevant law enforcement principles is needed as applied within the court operations context. An understanding of operational safety tactics is necessary when dealing with conflict.

This unit requires sound knowledge of legal and police court processes as they relate to courts, to ensure the provision of prompt and effective responses to breaches of security and the law in the court environment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- outline the range of courts in the state/territory or commonwealth
- apply court protocols and procedures
- apply court security statutes
- apply court security operational procedures including secure court operational procedures.

Consistency in performance

Competency should be demonstrated gathered over time in a range of actual or simulated workplace environments to ensure the person can achieve the outcome and apply the competence in different situations or environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time and through a range of contexts in order to ensure consistency of performance over a range of situations.

Specific resources for assessment

Access is required to:

- suitable equipment, courtroom and associated facilities including court security briefing instructions, hand-held scanners, adequate furniture including seating, court security signage such as condition of entry signage, full personal accoutrements
- other miscellaneous items such as adequate search tables, mirrors, torches and weapon detection systems.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

PUAPOLIM001A Assist police with members of a culturally specific community

Modification History

PUAPOLIM001A Release 3: Unit Descriptor revised.

PUAPOLIM001A Release 2: Layout adjusted. No changes to content.

PUAPOLIM001A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to use own cultural identity and knowledge to further organisational purposes in an operational setting in accordance with organisational policies and guidelines.

Similar functions specifically for Aboriginal or Torres Strait Islander officers are covered in separate units.

This unit replaces PUAPLO001B Assist police with members of a culturally specific community.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a specialist officer whose own cultural identity and knowledge is used to further organisational purposes in line with organisational policies and guidelines.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist in maintaining a police presence	1.1 Positive presence is maintained in interaction with community 1.2 Cultural identity is accepted and used to facilitate interaction with community 1.3 All actions taken are consistent with assigned powers and organisational guidelines
2. Assist in communication with members of a culturally specific community	2.1 Advice is given on cultural issues affecting police and members of a ***culturally specific community*** 2.2 Particular misunderstandings in communication between other police and members of a culturally specific community are identified and resolved 2.3 Interpreting and translating assistance is provided subject to organisational guidelines
3. Consult with respected members and organisations of a culturally specific community	3.1 Problems in police relations with a culturally specific community are identified and discussed 3.2 Crime and social disorder concerns of the community are identified and reported to supervisors 3.3 Community suggestions are elicited and reported back to supervisors 3.4 Police service strategies are explained and feedback is reported to supervisors
4. Advise members of the organisation on cultural factors	4.1 Relevant cultural protocols are explained 4.2 Appropriate communications channels are identified 4.3 Community decision-making practices are explained and the roles of key groups and organisations are identified 4.4 Strategies are suggested to achieve service objectives while respecting cultural differences

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- make oral and/or written presentations

Required Knowledge

- culturally specific community social and political structure
- organisational policies and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- perform a range of comprehensive consultations
- establish a respectful police presence
- use cultural knowledge in dealing with problems
- maintain social order.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

PUAPOLIM003A Provide interpreting and translating services

Modification History

PUAPOLIM003A Release 3: Unit Descriptor revised.

PUAPOLIM003A Release 2: Layout adjusted. No changes to content.

PUAPOLIM003A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to interpret and translate questions, requests and responses between policing English and Aboriginal English or a community language and explain departmental requirements in Aboriginal English or a community language.

It also includes interpreting non-verbal behaviour in accordance with organisational policies, procedures and guidelines.

This unit replaces PUALIO004B Provide interpreting and translating services.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to persons required to interpret and translate policing terms/requests/responses/questions in such a manner that communication is enhanced with members of a specific community.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret/translate questions in policing terms into an appropriate questioning strategy in an appropriate language	1.1 Intent of questions is clarified with questioner 1.2 Feedback is given on appropriateness, effectiveness and progress of questioning 1.3 Answers to modified questions are obtained from informant or interviewee
2. Interpret/translate responses, requests and complaints from community members into appropriate policing terms	2.1 Literal translation is provided and meaning is explained 2.2 Appreciation is supplied of the credibility of the information or seriousness of the request or complaint, reasons for supplying the information or making the request or complaint, and any relevant circumstances to take into account in interpreting it 2.3 Questions are asked of informant when necessary to clarify responses or to check understanding
3. Interpret/translate organisational policies and procedures, requests and requirements into an appropriate language	3.1 Organisational policies and procedures, requests and requirements are conveyed to appropriate community members in a manner likely to secure acceptance 3.2 Reasons for the request or requirement are explained in terms understandable to the community 3.3 Status of the request or requirement is explained

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

© Commonwealth of Australia, 2025 Public Skills Australia

- achieve rapport
- fluency in English
- fluency in Aboriginal English or a community language

Required Knowledge

- departmental interview policy and procedure
- differences between European and Indigenous question and answer styles
- legal and policing terminology
- organisational policies, procedures and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- ensure each party to the communication receives a clear and accurate understanding of the positions, claims or views of the other.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

Access is required to:

- either an assessor fluent in the language in question or elaborate structured assessments that compare known behaviour with the descriptions of behaviour provided independently by the interpreter.

Method of assessment

This unit may be assessed with the following unit/s:

PUAPOLIM001A Assist police with members of a culturally specific community

PUAPOLIM002A Promote public safety objectives by

© Commonwealth of Australia, 2025 Public Skills Australia

liaison with a culturally specific community.

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Appropriate language includes:	• Any Aboriginal or Torres Strait Islander language including Torres Strait Creole (broken) and Kriol • Any language other than English

PUAPOLIM004A Provide police services in an Aboriginal or Torres Strait Islander community

Modification History

PUAPOLIM004A Release 3: Unit Descriptor revised.

PUAPOLIM004A Release 2: Layout adjusted. No changes to content.

PUAPOLIM004A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to provide basic policing services while operating in a community without the presence of a supervisor.

This unit replaces PUACPO001B Provide police services in an Aboriginal or Torres Strait Islander community.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit will be applied in a basic policing services context.

This unit applies to non-constabular Aboriginal or Torres Strait Islander officers within community groups. The knowledge and skills in this unit will enable the officer to work without the presence of a supervisor.

ELEMENT	PERFORMANCE CRITERIA
	appropriate
	4.3 Supervising officers are kept informed of the background and progress of serious community disputes as culturally appropriate
	4.4 Disputes requiring outside legal or other intervention are referred to appropriate persons and supervising officer is informed
5. Report criminal activity and serious incidents to supervising officer	5.1 Criminal activity and incidents with policing implications are reported to supervisors in a timely manner
	5.2 Any initial actions or investigations undertaken are in accordance with ***powers exercised***, organisational instructions and own abilities
	5.3 All actions undertaken to investigate crimes, respond to incidents or penalise breaches of law or regulations are reported to supervising officer according to departmental instructions

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- negotiate effectively

Required Knowledge

- departmental policies and procedures
- law and legal powers
- organisational policies, procedures and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- traditional law and social structure

Evidence Guide

PUAPOLIV001A Manage police investigations

Modification History

PUAPOLIV001A Release 3: Unit Descriptor revised.

PUAPOLIV001A Release 2: Layout adjusted. No changes to content.

PUAPOLIV001A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to plan, document and allocate resources to manage and review police investigations effectively, in accordance with jurisdictional law, policies and procedures.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people required to manage a police investigation. It involves planning and implementing strategies for the overall management of an investigation including establishing investigation aims/objectives, assessing risks and security, allocating tasks, selecting appropriate investigation methods and communication strategies, and establishing a case management system. It also requires the management of resources and information/records throughout the investigation and the review of outcomes to inform practice improvements.

The work outlined in this unit would typically be undertaken by a police investigator in a designated investigation role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan investigations	1.1 ***Investigation aims*/*objectives*** are clearly defined to provide operational focus
	1.2 ***Investigation plan*** is prepared which reflects analysis of all available ***factors*** to set directions for the investigation
	1.3 Risk assessments are conducted to identify investigational opportunities and limitations
	1.4 ***Security plan*** is formulated to address the investigation's security requirements
	1.5 Investigatory phases and tasks are prioritised to inform the sequence of activities and to provide for future review of the investigation process
	1.6 Methods to achieve the investigation's aims and objectives are authorised in accordance with organisational policies and guidelines
	1.7 Communication channels are established with appropriate personnel to facilitate contact in the conduct of the investigation
	1.8 ***Case management system*** is initiated to facilitate the planning, resolution and review of the investigation
2. Prepare documentation to support the investigation	2.1 All relevant information is recorded in a timely, chronological and accurate manner and complies with organisational guidelines
	2.2 ***Operational documentation*** is compiled to provide an ongoing reference for operatives and a formal record for evidentiary purposes
	2.3 Security and evidentiary requirements are complied with via ***recording procedures***
3. Coordinate resources	3.1 Available ***resource requirements*** are identified and accessed to support the operation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Contingency responses are identified that address resource limitations
	3.3 Resource usage is managed effectively to achieve the desired aim
4. Review investigations	4.1 Investigation outcomes are reviewed against the aims and objectives specified in the investigation plan
	4.2 Procedures are reviewed for adherence to organisational policies and guidelines
	4.3 Post investigation procedures are completed to finalise the investigation
	4.4 Review outcomes are disseminated and where relevant used to inform future practice

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply investigation methods and skills
- communicate effectively in writing (prepare investigation plans, tactical plans resource bids etc.)
- communicate effectively orally (listen, establish rapport, negotiate, resolve conflict)
- manage resources (budgetary, human, physical resources and allocation/access)

Required Knowledge

- applicable laws, policies and procedures pertaining to the conduct of investigations within own organisational environment
- available resources which may need to be deployed to support the investigation
- court procedures and evidentiary requirements
- different types of criminal activity and their elements (such as general crime, theft, burglary, assault, drugs, fraud, homicide)
- government and policy environments within which operations will be managed
- investigation principles and case management systems, and range of contexts in which these can be applied
- organisational policies and guidelines (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)

- security issues and classifications

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- manage at least two investigations using an investigation plan to direct, manage, monitor and review the investigation.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competence in different situations or environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors

© Commonwealth of Australia, 2025 Public Skills Australia

- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Investigations may include:	• Operations • Criminal and/or coronial investigations
Investigation aims/objectives may include:	• Apprehending and arresting offenders • Excluding suspects • Satisfying the coroner and providing material to assist the prosecution's case • Taking the investigation to logical conclusion
Investigation plan may include:	• Actions the investigator may take • Aims of the investigation • Factors that may influence the investigation (such as people involved, evidence to be obtained, points to prove, defences/exculpations) • And may be formal or informal
Factors may include:	• Age • Any information which impacts on the formulation of the investigation plan • Climatic conditions • Cost-benefit analysis Culture or mental capacity of subject/witnesses • Own courses of action • Own resources • Person of interest's likely course/s of action • Person of interest's resources • Political sensitivities • Time • Topography
Security plan may include:	• Any plan to ensure the integrity of the investigation
Case management system:	• Is defined by the organisation's operational practices
Operational documentation may include:	• Affidavits • Briefing notes • Case management system documents • Crime reporting system documents

© Commonwealth of Australia, 2025 Public Skills Australia

	• Declarations of major crime • Incident log • Investigation log • Investigational plans • Joint agency investigation agreements • Memoranda of understanding • Operational orders • Progress reports • Running sheets • Standard operating procedures (SOPs) • Tactical appreciations • Target profiles • Terms of reference • Warrant applications • Material gathered for the purposes of evidence
Recording procedures may include:	
Resource requirements may include:	• Financial • Human • Physical • And may be internal or external in origin

Modification History

PUAPOLIV002A Release 3: Unit Descriptor revised.

PUAPOLIV002A Release 2: Layout adjusted. No changes to content.

PUAPOLIV002A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to apply police investigation processes in accordance with jurisdictional law, policies and procedures.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people required to conduct a police investigation in accordance with an already established investigation plan. It involves regular investigation progress reviews, adapting to changing circumstances and briefing/debriefing relevant personnel as required. The unit also covers collecting, securing and analysing relevant information, identifying people relevant to the investigation and developing suspect and subject profiles. In finalising an investigation, this unit requires relevant persons and authorities be advised of investigation outcomes, case management systems updated and relevant documents and exhibits dealt with in accordance with organisational requirements.

The work outlined in this unit would typically be undertaken by a police investigator in a designated investigation role.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate operational direction	1.1 ***Investigation*** is conducted in accordance with investigation plan
	1.2 Process of continual assessment is applied to evaluate progress, and new directions are implemented in response to ***unforeseen events***
	1.3 Regular ***briefings and debriefings*** of ***all relevant personnel*** are conducted to ensure the sharing of information
2. Manage information relevant to investigations	2.1 Relevance and reliability of ***information sources*** are assessed in accordance with organisational guidelines
	2.2 Work practices and/or investigative techniques that address ***emerging technologies*** are used to obtain information relevant to the investigation
	2.3 Relevant ***information*** is legitimately analysed, and documented to progress the investigation
	2.4 Evidence from incoming information is controlled in accordance with organisational guidelines
	2.5 All information obtained throughout the conduct of the investigation is assessed to determine relevance
3. Investigate subjects and suspects	3.1 All relevant information is applied to identify and locate ***persons relevant to the investigation*** and to eliminate persons who are not
	3.2 Persons relevant to the investigation are interviewed in accordance with organisational policies and guidelines
	3.3 All organisational ***avenues of inquiry*** and investigative procedures are considered and utilised to identify ***subjects*** and ***suspects***
	3.4 ***Investigation techniques*** are applied, in accordance

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with jurisdictional laws, policies, guidelines and established Codes of Ethical/Professional Conduct
4. Develop profiles	4.1 ***Movements*** of profile subjects/suspects relating to the offence are identified and recorded
	4.2 Available information and intelligence is recorded in subject/suspect profiles
	4.3 Risk/threat levels of subjects/suspects contribute to profiles and inform subsequent ***actions***
	4.4 Documented profiles are securely distributed to inform relevant operatives in accordance with organisational policy
	4.5 Profiles are assessed to identify further avenues of inquiry
5. Finalise investigations	5.1 Relevant ***recommendations*** regarding the investigation are developed and forwarded to the ***relevant authorities*** for consideration/implementation
	5.2 Persons relevant to the investigation are advised of investigation outcomes in accordance with organisational policies and procedures
	5.3 ***Case management systems*** are updated to reflect the status of the investigation
	5.4 ***Documents*** and exhibits are managed, developed and forwarded to relevant authorities for consideration/implementation, in accordance with organisational policies and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply analytical techniques, in particular application of logic and reasoning to identify and select avenues of inquiry and substantiate these choices
- apply investigation methods and skills
- apply operational safety techniques
- communicate in writing (provide clear comprehensive, accurate and chronologically sequenced written documentation)
- communicate orally (listen, establish rapport, negotiate, resolve conflict)
- make decisions and solve problems

© Commonwealth of Australia, 2025 Public Skills Australia

- prepare and submit documents

Required Knowledge

- available resources which may need to be deployed to support the investigation
- case management systems and the range of contexts in which they can be applied
- correct interpretation of all applicable laws, policy and procedures
- court procedures and evidentiary requirements in provision of briefs of evidence for use by the prosecution
- different types of criminal activity and their elements
- ethics, professionalism and cultural diversity
- general background appreciation of pathology
- government and policy environments within which operations will be conducted
- impact of the police role on individuals and groups regarding law enforcement
- investigation principles and the range of investigation techniques available
- legal and ethical considerations in investigations which involve juveniles and indigenous people
- methods and process for subject/suspect identification and profiling
- relevant legislation
- role and functions of other agencies who work with policing in the conduct of investigations
- security issues and classifications

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- conduct investigations on at least two separate occasions in relation to different offences
- developed at least one subject, one suspect and one witness/victim profile
- finalise each investigation with a Brief of Evidence, legal submission, Coronial File or other relevant document.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competence in different situations or environments.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Investigations may include:	• Criminal and/or coronial purposes • Multi disciplinary approaches
Unforeseen events may include:	• Critical evidence • Withdrawal/reduction of allocated resources, which may be financial, human, physical and may include other agencies, such as: • other police organisations • National Crime Authority • Criminal Justice Commissions

© Commonwealth of Australia, 2025 Public Skills Australia

	• other government departments/agencies • non-government agencies such as financial institutions and insurance companies
All relevant personnel may include:	• Investigation supervisors • Team members
Briefing and debriefings may be:	• Formal or informal • Written or verbal
Information sources may include:	• Internal/external agencies • Suspects • Surveillance provided by self or from other legitimate sources • Witnesses/victims/human sources
Emerging technologies may include:	• Internet • Listening devices • Mobile technologies • New information communications technologies • New systems • Telecommunications • Telephone intercept technology
Information may be utilised in relation to:	• Identification of data collection plans • Information analysis • Linking of information • Task allocation
Persons relevant to the investigation may include:	• Complainant/s • Coroners • Defence forces • Embassies • Immigration Department • Legal representatives • Next-of-kin • Neighbours • Police pathologists • Suspect • Victims (individuals and/or companies) • Witnesses • Other non-police agencies
Avenues of inquiry may include:	• Financial practicalities • Human and legal constraints • Physical
Subjects may include:	• Locations

© Commonwealth of Australia, 2025 Public Skills Australia

	• Places • Premises • Vehicles • Vessels
Suspects may include:	• Person/s of interest in relation to the commission of the offence (or involved in the commission of the offence)
Investigation techniques may include:	• Computer interrogation/data retrieval • Doorknocks • Forensic examination/analysis • Human sources • Internet • Listening devices and other covert surveillance techniques • Search and search warrants • Telecommunications • Using other sources of information such as media • Other emerging technologies
Movements may be determined by:	• Analysis of known habits • Analysis of physical evidence • Database inquiries • Direct evidence from witnesses • Reconstructions • Time and movement analysis
Actions may include:	• Arrest • Caution • Closing report • Coronial reports • Forfeiture of assets • Investigation techniques • Summons
Recommendations may include:	• Changes to law • Legal advice • Policy and procedures of both internal and external agencies
Relevant authorities may include:	• External (prosecutorial agencies or specialist service providers) • Internal (supervisors/commanders)
Case management system:	• Is defined by the organisation's operational practices
Documents may include:	• Briefs of evidence • Coroner's files

© Commonwealth of Australia, 2025 Public Skills Australia

- Legal documents
- Preparation of reports
- Requests for direction
- Search warrants
- Summons/warrants

PUAPOLIV003A Manage incident scenes

Modification History

PUAPOLIV003A Release 3: Unit Descriptor revised.

PUAPOLIV003A Release 2: Layout adjusted. No changes to content.

PUAPOLIV003A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to appreciate, control and coordinate incident scenes to obtain and secure all available evidence to assist investigations, in accordance with jurisdictional law, policies and procedures.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people required to assess, control and coordinate the investigation of an incident scene in a policing context.

Incident scenes provide useful information and evidence to support investigations. The proper management of an incident scene is critical to the investigative process and can influence outcomes, particularly where prosecutions are involved.

Proper incident scene assessment requires the identification of primary and secondary scenes, the treatment of risks and consideration of tactical factors that may influence the preservation of life, property and evidence. To preserve evidence control must be established at the incident scene by defining scene boundaries, tasking police and support personnel, recording all activities, supporting victims and exercising control over all persons present. Scene investigation requires coordinating interviews with relevant people, recording and handling evidence/exhibits for continuity and using support personnel to identify and gather evidence.

The work outlined in this unit would typically be undertaken by a police investigator in a designated investigation role.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess incident scenes	1.1 Primary and secondary ***incident scenes*** are identified to establish resource needs within the incident scene assessment
	1.2 ***Risk factors*** affecting the incident scenes are identified and managed
	1.3 Preservation of life, property and evidence are prioritised in the assessment of the incident scene
	1.4 ***Tactical factors*** and resulting priorities are identified to assist decision making/subsequent action
2. Control incident scenes	2.1 To support subsequent lines of inquiry, all activities at the incident scene are ***recorded*** in accordance with organisational guidelines
	2.2 Boundaries of the incident scene are established and secured to prevent contamination of prospective evidence/exhibits
	2.3 Persons are supported and referred to relevant support agencies in accordance with organisational requirements
	2.4 ***Suspects are controlled*** in accordance with organisational policies and procedures
	2.5 ***Persons at the incident scene*** are ***controlled*** to safeguard their welfare and prevent contamination of the scene
	2.6 ***Personnel*** are coordinated to manage the incident

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	scene
	2.7 Potential evidence/exhibits are preserved to prevent contamination
3. Coordinate incident scene investigations	3.1 Persons relevant to the incident scene are identified and interviewed to determine possible avenues of inquiry and offences/defences
	3.2 Information collected is assessed and used to initiate investigative action
	3.3 Evidence/exhibits at incident scene/s are identified and recorded prior to examination to ensure continuity
	3.4 Evidence/exhibits are processed in accordance with organisational requirements to maintain continuity and integrity
	3.5 Incident scene investigations are managed to preserve life, property and evidence, to minimise disruption and to ensure compliance with operational safety guidelines
	3.6 ***Support services*** are utilised to investigate incident scene

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse situations and make decisions
- apply operational safety techniques
- communicate (listen, question) and negotiate when questioning witnesses and controlling persons in the vicinity of the incident scene
- handle exhibits and preserve continuity of evidence
- manage resources and time
- manage witnesses and in doing so, demonstrate ethical behaviour and cultural awareness
- solve problems in responding to a range of incident scene contexts
- use specialised investigatory equipment such as fingerprinting equipment, computer software, photographic equipment etc.

Required Knowledge

- government and policy context in which incident scenes are managed and

© Commonwealth of Australia, 2025 Public Skills Australia

investigated, and all relevant law, policies and procedures
- judicial and evidentiary requirements and organisational processes for the collection, preservation and continuity of exhibits
- range of investigation techniques
- range of support services available to assist investigators in managing incident scenes, in particular forensic services
- roles and functions of other agencies in managing incident scenes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- manage at least two incident scenes to ensure the accurate assessment, preservation and collection of evidence and exhibits at the scene.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the outcome and apply the competence in different situations or environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or

© Commonwealth of Australia, 2025 Public Skills Australia

in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scenes may be:	• Primary (where the offence actually took place) • Secondary (where any physical evidence leading to establishment of the incident is located)
Risk factors may include:	• Factors at the incident scene that could impact on: • safety of investigators • security/preservation of the actual site • security and preservation of situational evidence
Tactical factors may include:	• Access to scene • Availability of support services • Boundaries • Chronology of events • Number of persons at scene • Those which affect the quality of the investigation and may include environmental circumstances
Recording activities at the incident scene may include:	• Digital imaging technology • Exhibit logs • Photography • Receipts and personnel movement • Running sheets • Video
Suspects may be controlled by:	• Advising of rights • Apprehension • Search • Securing • Separation
Persons at incident scenes	• Coroners • Incident scene specialists and forensic experts

© Commonwealth of Australia, 2025 Public Skills Australia

may include:

- Forensic accountants
- Information technology consultants
- Legal officers
- Media
- Medical practitioners
- Offenders
- Other bystanders
- Pathologists
- Police and other public safety agency personnel
- Suspects
- Undertakers
- Victims
- Witnesses

Control may include:

- Isolate and search
- Group
- Muster
- Secure
- Segregate
- Task

Personnel may include:

- Personnel from other agencies
- Police
- Specialist support
- Any other person deemed necessary to assist in the management of the incident scene

Support services may include:

- Coroner
- Document examiners
- External agencies
- Financial organisations
- Handwriting experts
- Incident scene specialists such as pathologists
- Information technology consultants
- Forensic accountants
- Forensic investigators
- Government medical officers
- Interpreters
- Legal officers
- Technical services
- Undertakers

PUAPOLIV004A Conduct investigative interviews

Modification History

PUAPOLIV004A Release 3: Unit Descriptor revised.

PUAPOLIV004A Release 2: Layout adjusted. No changes to content.

PUAPOLIV004A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to plan, conduct, record and review interviews during investigations, in accordance with organisational policies and procedures.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people required to plan, prepare, conduct and review interviews for investigative purposes with a variety of people including victims, suspects and witnesses.

Investigative interviewing is the questioning of victims, witnesses and suspects to obtain complete, accurate and reliable information to discover the truth about the matter under investigation.

The unit requires the application of appropriate communication skills and interviewing techniques to illicit information in compliance with organisational requirements. This unit also requires the evaluation of the interview process to improve future performance and to inform the direction of an investigation.

The work outlined in this unit would typically be undertaken by a police investigator in a designated investigation role.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan interview	1.1 ***Type of interviewee*** is established to determine interview approach 1.2 ***Interview plan*** is developed in accordance with ***organisational requirements*** 1.3 ***Venue*** and timing for interview are selected to achieve interview aims and objectives 1.4 ***Information relevant to the interview*** is gathered and analysed to inform the plan 1.5 ***Points of proof*** for potential offences and possible defences are reflected in the plan 1.6 ***Recording methods*** are selected and equipment to conduct the interview is prepared 1.7 ***Exhibits*** necessary to conduct the interview are obtained and handled to ensure security and continuity 1.8 ***Interview strategies*** are selected to achieve interview aims and objectives 1.9 Role of ***assisting interviewer***, where appropriate, is clarified with that person
2. Conduct interview	2.1 Interview is conducted in accordance with legislative requirements and organisational policies and guidelines 2.2 Questions are communicated in the interview that reflect fairness, objectivity and impartiality to the interviewee 2.3 ***Condition*** of the interviewee is continually assessed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	throughout the interview to establish ***competence***
	2.4 Interview procedures are employed in consideration of ***interviewee's status***, welfare and safety
	2.5 Appropriate ***safeguards*** are applied according to the status of the interviewee
	2.6 ***Allegations of unethical behaviour*** are responded to in accordance with organisational policies and guidelines where applicable
	2.7 Additional information is gathered through the interview process with regard to other matters where applicable
	2.8 Exhibits are introduced at an appropriate time during the interview and handled to ensure security and continuity are maintained
3. Use appropriate interview techniques	3.1 Rapport is established with interviewee to enhance communication
	3.2 Range of ***interview techniques and communication methods*** are employed to engage interviewee
	3.3 Selected interview strategies are regularly reviewed and modified to adapt to ***changing circumstances***
	3.4 Interview plan and logical line of questioning are followed during interview process
	3.5 Each point of proof and possible defences for the matters being investigated are covered during questioning
	3.6 Assisting interviewer is utilised to assist where applicable
4. Conclude interview	4.1 Information gathered during interview is summarised to provide the interviewee with an opportunity to confirm, alter or add information
	4.2 Interview is ***closed*** in accordance with jurisdictional and organisational requirements
5. Evaluate interview	5.1 Interview is reviewed to determine ***further action*** in relation to new information obtained during the interview
	5.2 All available evidence is assessed against information obtained during interview to verify or amend the direction of the investigation
	5.3 ***Own performance*** during interview is reviewed to identify areas for improvement
6. Record interview	6.1 Recording equipment is checked where appropriate to ensure working order prior to and during

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	interview
	6.2 Recording methods specified in interview plan and organisational guidelines are followed
	6.3 Alternative recording methods are used when a change in circumstances occurs
	6.4 ***Characteristics***, ***responses and behaviour of interviewees*** during the interview are recorded as appropriate
	6.5 ***Special arrangements***, ***requests and activities*** not directly related to the interview are recorded to comply with legal and ethical obligations
	6.6 Required ***post-interview procedures*** are completed to comply with legal, judicial and security requirements

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse situations and think logically
- apply operational safety techniques
- communicate in writing (prepare interview documentation and records of interview)
- communicate orally (listen, probe, reflect, establish rapport, negotiate, resolve conflict)
- identify when a person has an intellectual disability, is intoxicated, has a mental or physical impairment (either permanent or temporary)
- make decisions and solve problems
- manage computer information
- manage interviewee and in doing so, demonstrate ethical behaviour, cultural awareness and integrity
- organise and manage time effectively
- use recording equipment

Required Knowledge

- agency goals and objectives
- approaches to addressing unusual circumstances during the interview
- available recording methods and use of recording equipment
- different types of criminal activity and their elements (such as general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc.)

© Commonwealth of Australia, 2025 Public Skills Australia

- government and policy environments within which interviews will be managed and factors which may impact on interviews
- intelligence and interviewing
- interview techniques and points of proof, in particular legal and ethical considerations, in conducting interviews which involve youth, indigenous people, disciplinary matters
- post-interview procedures
- procedures for the utilisation of interpreters
- relevant law (including the rules of evidence), policies and procedures
- security issues, classification criteria

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- plan, conduct and review interviews with at least two suspects and two witnesses/victims in accordance with organisational policies and procedures.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the outcome and apply the competence in different situations or environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Type of interviewee may include:	• Adult • Child • Complainant • Cooperative • From a culturally diverse background • Intimidated • Suspect • Uncooperative • Vulnerable • Witness
Interview plan:	• May be formal • May be informal • Provides a framework to base the line of questioning within an interview • Should be adaptable to change as required • Should consider interview aim, topics to be covered, points to prove or possible defences (where applicable), known evidence and exhibits to potentially use during the interview
Organisational requirements may include:	• Organisational policies and procedures relating to: • interviewing • investigations • taking statements • obtaining physical evidence

© Commonwealth of Australia, 2025 Public Skills Australia

Interview venue may include:	• Field (public places, street, car, private dwellings) • Police station
Information relevant to the interviews may include:	• All information about the person being interviewed and the matter under investigation
Points of proof may include:	• Admissibility • Corroboration • Criminal intent • Elements • Evidence
Recording methods may include:	• Audio • Hand written • Type written • Video and audio
Exhibits may include:	• Relevant documentary and/or physical materials gained as a result of investigations
Interview strategies may vary but may require consideration of:	• Avoidance of cross-examinations • Exclusion of leading questions • Location • Method (direct questioning, empathetic questioning) • Person being interviewed • Strategies for developing rapport • Timing
Assisting interviewer may be:	• Aide or assistant to the interviewer who may or may not be part of the same organisation as the interviewer but is impartial and is not a subject of the investigation
Condition may include:	• Age • Behaviour • Intoxication (alcohol or drugs) • Mental health • Physical injury
Competence provides for:	• Ability of the interviewee to: • take part in the interviewee • understand the nature of the interview • understand the questioning within the interview
Interviewee's status may include:	• Age • Disability • Ethnicity • Gender • Race

© Commonwealth of Australia, 2025 Public Skills Australia

Safeguards may include:	• Any requirements as imposed by legislation, policies or procedures that affect the methods or manner of the interview, such as the right to silence or the presence of a legal representative or other support person
Allegations of unethical behaviour may include:	• Acts of misconduct • Coercion • Disregard for standard operating procedures (SOPs) • Duress • Inducements • Legislative requirements • Physical abuse • Promises • Threats • Unfair representation
Interview techniques and communication methods may include:	• Avoiding interruptions • Clarification of responses • Cognitive interviewing (including free recall) • Conversation management • Conversational style • Echoing • Free recall • Maintaining control • Open questioning • Pausing • Probing • Verbal and non-verbal communication
Changing circumstances may include:	• Allegations of misconduct • Demeanour of interviewee • Equipment failure • Information disclosed • Interviewee request • Refusal to answer questions
Closing the interview may include:	• Complying with legislation, policy or procedure • Considering if interview aims as determined in the interview plan have been achieved • Considering if the interviewee has provided all the information that they are able and willing to provide • Determining that all intended questions are covered • Explaining to interviewee any requirements following the interview • Where appropriate, providing copies of statements

© Commonwealth of Australia, 2025 Public Skills Australia

	or recordings
Further action may include:	• Arrest • Bail • Charge • Further investigation • No further action • Release
Own performance during an interview may be evaluated by:	• Considering the effectiveness of the interview in terms of planning and preparing for the interview, conducting the interview, and reflecting upon: • what was done well • what could have been done better • what areas can be developed • how to acquire these skills
Characteristics, responses and behaviour of interviewees may be influenced by:	• Age • Demeanour • Disability • Dress • Ethnicity • Gender • Non-verbal responses to questions • Race
Special arrangements, requests and activities may include:	• Medical attention • Refreshments • Seeing superiors • Telephone calls • Toilet breaks • Visitors
Post-interview procedures may include:	• Explaining future process to complainants and witnesses • Processing of offender • Tape management security • Tape transcription where applicable, copy of tape or statement to interviewee

PUAPOLIV009A Manage physical evidence

Modification History

PUAPOLIV009A Release 3: Unit Descriptor revised.

PUAPOLIV009A Release 2: Layout adjusted. No changes to content.

PUAPOLIV009A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to manage physical evidence within an investigation process.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The correct management of physical evidence is a critical skill for investigators. This unit addresses the knowledge and skills required to detect, seize and effectively handle physical evidence in a compliance context. It requires the identification and preservation of physical evidence including dealing with associated hazards, and the recording, collecting, labelling and appropriate storage of evidence in a way that maintains its continuity and integrity. It also requires recording evidence movements and the return, disposal or retention of evidence in accordance with organisational requirements.

This unit is not intended to cover the recording and collection of physical evidence by forensic specialists, which is covered by PUAPOLFC003B Detect, record and collect physical evidence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Detect physical evidence	1.1 ***Physical evidence*** relevant to the investigation is identified using appropriate ***investigative methods***
	1.2 Action is taken to preserve physical evidence in its original state and to prevent contamination
	1.3 ***Hazards associated with physical evidence*** are dealt with in accordance with occupational health and safety (OH&S) and organisational guidelines
2. Seize physical evidence	2.1 Identified physical evidence is ***recorded*** in accordance with ***organisational guidelines and requirements***
	2.2 Legislative requirements are complied with when physical evidence is ***seized***
	2.3 Identified physical evidence is ***labelled*** and ***packaged***/***secured*** to ensure continuity and integrity
3. Control physical evidence	3.1 Physical evidence is ***stored*** in accordance with organisational guidelines to maintain continuity and prevent degradation and contamination
	3.2 Movement of physical evidence for ***investigative purposes*** is recorded in accordance with legislative and organisational guidelines
	3.3 Return, disposal or retention of physical evidence is facilitated in accordance with organisational requirements

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- apply public sector standards and legislation such as OH&S and environment in the context of gathering and managing evidence
- communicate with people from diverse backgrounds
- liaise and negotiate
- make comparisons and exercise judgement about facts in written materials
- organise evidence
- respond appropriately to diversity, including gender and disability
- solve problems
- write reports using formal structures and language

Required Knowledge

- document management systems
- equal employment opportunity, equity and diversity principles
- evidence legislation relevant to the jurisdiction
- exhibit management principles
- legislation which contains the offence/s under investigation
- organisational policies, guidelines and regulations (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- public sector legislation such as OH&S and environment relating to gathering and managing evidence
- rules of evidence relevant to the jurisdiction

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- gather and manage evidence in a range of contexts or occasions (at least two) over time.

Consistency in performance

Competency should be demonstrated over time in a range of contexts to ensure the person can achieve the outcome and apply the competence in different situations or environments.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	This unit may be assessed with the following unit/s: • PUAPOLGD009A Manage involvement in the judicial process • PUAPOLIV002A Conduct police investigations. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Physical evidence may include:	• Documents and/or information received/requested from other organisations (enforcement or other) • Electronic or digital data/images • Individual items of evidence that could be presented

© Commonwealth of Australia, 2025 Public Skills Australia

	to a court • Items located during a search or search warrant • New evidence which results in reopening an investigation • Photographic or video • Physical exhibits located at the scene of a crime or incident • Real, oral, computer data or documentary • Records (electronic, digital or written) of the seizure or recovery of exhibits or other items • Relevant documentary and/or physical materials gained as a result of investigations • Requirements identified in an evidence guide or evidence matrix
Investigative methods may include:	• General (examination of scene or incident, public inquiries, human sources/witness inquiries, internal or external agencies, searches and search warrants) • Specialised (technical skills, covert policing, surveillance, forensic examination or analysis, document analysis, electronic data examination and retrieval)
Hazards associated with physical evidence may include:	• Consideration with respect to handling, collection and/or storage • Factors at the scene or incident that could impact on the safety of investigators, security or preservation of the scene, and the security and preservation of evidence • Physical nature of any specific item of evidence
Organisational guidelines and requirements may include:	• Ethical and conduct standards • Jurisdictional procedures manuals • Judicial standards which must be followed in evidence collection to ensure the continuity of possession and admissibility of the evidence • Relevant commonwealth/state/territory legislation and guidelines
Recording identified physical evidence may include:	• Audio or video recording • Digital imaging • Notes • Photographs • Sketches • Use of other appropriate emerging technologies
Seizing physical evidence may include:	• Acquisition through legislative or common law powers • Voluntary submission

© Commonwealth of Australia, 2025 Public Skills Australia

Labelling physical evidence may include:	• Date • Details of person/s giving the evidence • Location • Person/s collecting the evidence • Time
Packaging/securing physical evidence may include:	• Guarding a scene or exhibit • Placing in an appropriate receptacle • Sealing • Taping
Storing physical evidence may include:	• Completing relevant documentation, including forms and registers • Holding evidence in a place appropriate to its nature (such as size, consistency, need for refrigeration) • Treating evidence in a way to minimise contamination or degradation
Investigative purposes may include:	• Disposal • Identification purposes • Presentation in court proceedings • Referral during interview • Testing/analysis

PUAPOLIV011A Manage information within specialised policing functions

Modification History

PUAPOLIV011A Release 3: Unit Descriptor revised.

PUAPOLIV011A Release 2: Layout adjusted. No changes to content.

PUAPOLIV011A Release 1: Primary release.

Unit Descriptor

This unit covers the competency required to gather, collate, analyse, store and disseminate information within a variety of specialised operational policing functions/roles.

This unit does not cover managing information associated with the intelligence function.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace addresses the knowledge and skills to be able to manage information within a specialised policing context. Individuals will be able to apply the skills and knowledge within various policing functions and environments.

The unit supports the collection, collation, analysis and evaluation of information that may be of a sensitive nature. The protection of the integrity and security of the information is also covered in this unit. Police officers will also develop inferences after the interpretation of information and produce written reports in this regard.

The competence specified in this unit would typically be required by police officers.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect information	1.1 ***Information sources*** are established and ***managed*** to maximise the availability of information prior to, during and after the operation
	1.2 Information requirements are clearly communicated to collectors to focus the gathering of relevant information
	1.3 Appropriate collection techniques are applied to information sources
	1.4 ***Specialist information systems*** are accessed in accordance with agency guidelines
	1.5 Collected information is registered, ***recorded and stored*** for future access and retrieval
	1.6 Information gaps are identified and addressed to improve operational response
2. Protect the integrity and security of information	2.1 Legislative, policy and environmental factors are considered and addressed in the management of information
	2.2 Information is entered into organisational recording system ensuring the security and integrity of information
	2.3 Strategies, systems and procedures are developed and implemented to ensure the security and integrity of information
	2.4 Existence of internal control procedures is ensured in accordance with organisational policies and guidelines
3. Collate information	3.1 ***Collation methods*** relevant to ***operational circumstances*** are identified and applied
	3.2 Effectiveness of collation is ***evaluated*** and methods

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are amended as required to provide relevant summary data
	3.3 Organisational administrative requirements are complied with
4. Evaluate information	4.1 Source of information is evaluated to determine reliability and associated risk
	4.2 Information gathered is evaluated to determine operational relevance
	4.3 Existing information is regularly subjected to ***re-evaluation*** to determine currency
	4.4 Invalid and/or irrelevant information is removed from further processing in accordance with agency guidelines
5. Analyse and interpret information	5.1 Variety of appropriate ***thinking processes*** is applied to information
	5.2 Consistency of interpretations/inferences with available data is ensured
	5.3 Interpretations made are relevant to ***critical issues***
6. Develop inferences	6.1 Possible interpretations are subjected to ***testing***
	6.2 Possible interpretations are subjected to ***refinement and consolidation***
	6.3 ***Sound inferences*** are formulated from tested interpretations
	6.4 Assessment is prepared identifying relationship between data developed and probable interpretations
	6.5 Sound recommendations are developed to provide direction to the operation
7. Produce written report	7.1 Intended recipients are identified and expectations are negotiated to provide relevant information
	7.2 ***Written report protocols*** are followed in accordance with agency guidelines
	7.3 Written report format, tone and language are specific to client need and/or operational circumstances
	7.4 Report content is accurate and written in a concise and logical manner
	7.5 Written report is presented in a ***professional manner***
	7.6 Written report is disseminated to intended recipients in a timely manner
8. Obtain feedback from clients and operational units	8.1 Lines of communication for ***feedback*** are established and maintained to review performance
	8.2 Feedback on products and dissemination methods is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	actively sought to review performance
	8.3 Feedback is acknowledged, recorded and ***appropriate action*** is taken to review performance

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- collect, record, collate, analyse, evaluate and disseminate information
- communicate effectively orally and in writing
- conduct formal and informal briefings and debriefings
- delegate
- manage time effectively
- network
- plan and organise information activities
- solve problems
- think laterally

Required Knowledge

- dissemination and security
- freedom of information and privacy legislation
- information analysis and interpretation processes
- information collation/recording and dissemination processes
- jurisdictional laws
- organisational/agency information management principles/techniques and systems
- policies and procedures related to information gathering
- recording
- storage

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence

Assessment must confirm the ability to:

- ensure the integrity and security of information

© Commonwealth of Australia, 2025 Public Skills Australia

required to demonstrate competency in this unit	• accurately analyse and interpret information. **Consistency in performance** Competency should be demonstrated over time and across a range of simulated or actual workplace activities.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time in a range of actual or simulated workplace environments. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information sources may include:	• Agents and operators both private and commercial • Departmental sections • Informants • Government departments and other agencies • Members of the public • Other police officers

© Commonwealth of Australia, 2025 Public Skills Australia

	• Professional associations and event organisers • Specialist and public information systems/databases • Victims • Volunteer organisations • Witnesses
Managing information sources may include:	• Compliance with organisational legal and policy constraints • Identification • Monitoring • Ongoing maintenance and evaluation of sources of information • Recording
Specialist information systems could include:	• Australian Bureau of Criminal Intelligence (ABCI) • For search and rescue, this may also include COSPAS-SARSAT and similar satellite systems, the Australian Ship Reporting System (AUSREP) and/or similar systems • Interpol, National Crime Authority • National Exchange of Police Information (NEPI) system • Organisational information systems (such as COPS. in NSW) • Other government/non-government information services/databases
Recorded and stored include:	• Documents • Electronic or manual storage • Files • Filing cabinets/compactus • Information recording systems such as computers, audio/video tape, photographs • Operational logs • Running sheets/logs including charts/overlays • Statements
Collation methods may include:	• Categorising • Comparing • Covert and overt • Cross-referencing information collected • Electronically transmitted data and written correspondence • Interviews - face-to-face, radio, telephone • Linking • Surveillance • Validating

© Commonwealth of Australia, 2025 Public Skills Australia

Operational circumstances may include:	• Visual observations • Availability of resources • Environmental • Financial • Geographical operational areas • Technological • Timeframes
Evaluating effectiveness of collation may include:	• Accuracy • Consideration of issues of credibility • Pertinence • Reliability • Validity
Re-evaluation means:	• Subjecting existing information to evaluation processes in the light of new information received
Thinking processes may include:	• Creative • Critical • Lateral • Reasoning that is deductive (hypotheses testing - gathering and interpreting raw data, identifying patterns or trends and testing them)
Critical issues may include:	• Environmental • Medical • Physiological • Timeframe for survival
Testing of interpretations must be:	• Balanced • Logical • Objective and comprehensive to be considered appropriate • Sceptical • And may involve critical evaluation, logical reasoning or additional data collection
Refinement and consolidation of interpretations involves:	• Additional testing • Re-evaluation • Reformation or other activities aimed at confirmation to a strong degree of probability
Sound inferences may include:	• An assessment being written • Formal or informal • Interpretations that are probable • Predictions • Sound recommendations that address both strategic and tactical issues • Verbal

© Commonwealth of Australia, 2025 Public Skills Australia

Written report protocols may include:	• Authorship • Covering reports (overview of operation, recommendations, attachments) • Dissemination/circulation schedules • Initial advice forms • Media release details where relevant • Messaging systems • Operational running sheets/logs, progress to date/current position, difficulties/issues
Written reports may include:	• Briefing papers • Information report • Judicial and coronial • Ministerial • Operational • Strategic • Tactical
Professional manner may include:	• Labelling of attachments • Paragraphing • Page layout • Using correct grammar and spelling
Feedback may be:	• Formal or informal • Oral or electronic • Written
Appropriate action may include:	• Examining and/or amending present and future methodologies • No action • Only responding to feedback

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess scene and/or organisational requirements	1.1 ***Organisational protocols*** are followed when ***liaising with the media***
	1.2 Restricted and/or special access areas are clearly defined to media personnel to safeguard the operation and to prevent contamination of evidence where relevant
	1.3 Media access to personnel/volunteers/victims/casualties is controlled as appropriate
	1.4 Operational responsibilities and provision of information to media is assessed in accordance with organisational policies and procedures
2. Develop media strategy	2.1 Media plan is used to form the media strategy
	2.2 Arrangements are made to meet ***media requirements*** in accordance with incident characteristics, current developments and ***organisational and legal requirements***
	2.3 Organisational media representative is selected and briefed according to availability, knowledge of incident, media presence and role played in the incident, as appropriate
	2.4 Media briefing area is allocated with required resources where possible
	2.5 Media cooperation is gained in order to coordinate information flow and to ***provide information to the public*** on matters of safety and public interest
	2.6 Media strategy is changed at any time to suit operational demands and/or level of incident
	2.7 Approval is gained for information releases where appropriate
	2.8 Information briefing sessions and tours are scheduled at appropriate times in line with operational responsibilities and media requirements
	2.9 Media personnel and VIP are provided with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	occupational health and safety clothing where appropriate
3. Provide information to media	3.1 Organisational protocols are followed when liaising with the media
	3.2 Provision of current developments of incident by organisational media representative is ensured where appropriate
	3.3 Interview and photo opportunities are scheduled and conducted to provide information where appropriate
	3.4 Other organisations are consulted with at the incident to ensure a consistent presentation of information to the media
	3.5 Accurate records of media enquiries and interviews are maintained
	3.6 Two-way communication process between organisation and media is maintained
4. Promote the organisation via the media	4.1 Work and achievements of organisation, volunteer and/or other organisational personnel at incident are promoted to assist in maintaining morale and public profile
	4.2 Professional standards of the organisation and support for victims and others affected by the incident are reflected through own demeanour and presentation where relevant

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attend to detail
- communicate facts in a fluent, clear and interesting manner
- conduct press conferences and group interviews
- liaise with media and other organisational personnel
- make media presentations
- retain professionalism under duress
- show empathy with victims and operational personnel
- undertake public speaking as required

Required Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

- current practices for media liaison
- newsworthiness of information
- organisational and legal requirements relating to confidentiality, libel, accuracy, discrimination
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- requirements of different media: newspapers, magazines, radio, television
- requirements of local versus regional versus national media
- requirements of media to present information in a newsworthy/entertaining manner
- role of media in disseminating information

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- manage media to ensure integrity of information being disseminated

communicate organisation's message accurately and in a professional manner in accordance with relevant jurisdictional policies and procedures.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered in the workplace, including coping with difficulties, irregularities and breakdowns in routine.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter

© Commonwealth of Australia, 2025 Public Skills Australia

supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational protocols may include:	• Acknowledging support of other organisations • Ensuring media liaison person is fully briefed and prepared • Limiting comments on role of own service • Organisational policies and procedures • Personal presentation being as neat as possible considering the operational circumstances • Relevant federal and state/territory legislation and regulations • Seeking advice from headquarters where appropriate
Liaising with the media may include:	• Electronic • Print (local, community, daily newspapers, magazines) • Radio (live or pre-recorded) • Relevant websites • Television (live or pre-recorded)
Media requirements may include:	• Access for crew and equipment • Bilingual briefing • Community, commercial, government-owned media • Facsimiles • Food

© Commonwealth of Australia, 2025 Public Skills Australia

	• Human interest interviews and stories • Individual requests from media personnel • Interviews with particular personnel • News angles • Newsworthiness • Onsite interviews • Photographic/film opportunities • Personal protective equipment • Power outlets • Print, radio, television • Shelter • Technical and other requirements of local, regional and national media • Technical, such as lighting and sound • Telephones
Information which needs to be provided to the public may include:	• Danger zones • Emergency hotlines • Evacuation details • Facility closures • Road closures • Warnings • Persons police are seeking to interview • Public information/assurance
Organisational and legal requirements may include:	• Confidentiality • Operational priorities • Public safety • Relating to occupational health and safety
Organisational requirements for press conferences may include:	• Currency of information • Need for public assistance • Operational requirements • Policies and procedures

PUAPOLMG007A Release 1:	Primary release.

Unit Descriptor

This unit covers the competency required to participate effectively in the formulation and revision of organisational policy.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies in instances where policy is to be formulated or revised. This unit supports the contribution of an individual to this policy formulation and revision process.

The unit embeds a solid understanding of relevant legislation, policies and procedures in the workplace in order to provide guidance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Revise and formulate policy	1.1 Effectiveness of existing policies, legislation and guidelines is evaluated and the requirements for ***policy development*** are identified 1.2 Policy development activities required by the organisation are undertaken 1.3 Consideration of all ***relevant issues*** is reflected in participation in policy development activities
2. Contribute to policy promotion and implementation	2.1 Role and responsibility of the organisation to government and the community are used to form the basis of decision making 2.2 Advice is provided when required on implementation of the organisation's policies 2.3 Detailed knowledge of the legislation and regulatory framework is applied to work activities 2.4 Activities which assist in clarifying and promoting policy issues are identified and undertaken
3. Provide guidance on application of relevant legislation, policies and procedures in the workplace	3.1 Personnel are advised of the relevant acts, regulations, policies and guidelines which affect them 3.2 Relationship between the organisation's policies and guidelines and workplace procedures is assessed for continuing relevance 3.3 Breaches and inconsistencies in applying guidelines are reported or dealt with as required by the organisation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply legislation and guidelines to organisational strategies and work practices

© Commonwealth of Australia, 2025 Public Skills Australia

- assess relevance of policies
- communicate in a group setting
- identify and analyse trends
- provide advice

Required Knowledge

- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- policy development, strategies and processes
- procedures for dealing with breaches of guidelines
- relevant legislation, regulations, policies and guidelines

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- apply knowledge and understanding of relevant acts, regulations, policies and guidelines
- communicate to, and participate with, senior management in the policy review, formulation and implementation processes.

Consistency in performance

Competency should be demonstrated over time in a range of policy formulation and review contexts.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed over time in a range of actual or simulated workplace environments.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Policy development may include:

- Operational policies
- Organisational policies
- Plans
- Service-wide policies

Relevant issues may include:

- Cultural
- Economic
- Organisational
- Political
- Social
